FINAL WINTER 2005 CURRICULUM REPORT
Passed, as amended, by the University Senate on March 9, 2005.

OVERVIEW

The body of this report consists of two major sections: Course Proposals reviewed winter 2005 and Other Curricular Matters. Policies and definitions governing group and multicultural general-education requirements are under Other Curricular Matters. Unless indicated otherwise, courses may be taken either pass/no pass or for letter grades. P/N only or Graded only indicates that all students must take the course as specified in the bold print. Separate grading options for majors are bracketed in this report and appear in UO class schedule notes; they are not printed in the UO Catalog. R after course credits means that the course number may be repeated for credit. “Sequence:” after the description means the courses must be taken in numerical order.

Course proposals approved by both the University Committee on Courses (UOCC) and the University Senate are effective fall term 2005, unless a specific term is requested by an academic department and stated otherwise in this report.

The UOCC will consider new proposals during spring term and will submit a spring quarterly report to the University Senate in May 2005.

Routing of Minor Changes: The UOCC has confirmed that the following minor course changes may be made without review by the full committee: minor edits of course description, pre- or co-requisites, grading option, and conditions of repeatability. Changes may be submitted in writing directly to the Offices of the Registrar and Creative Publishing, in care of Gayle Freeman(gfreeman@uoregon.edu) and Scott Skelton (sskelton@darkwing.uoregon.edu), respectively. The memorandum should indicate the effective term for the change(s). Note: extensive changes may be referred to the UOCC for review.

LOOKING AHEAD

March 9, 2005: University Senate considers winter 2005 preliminary report of the University of Oregon Committee on Courses.

March 15, 2005: Curricular proposals for consideration in the spring round must be submitted to the provost’s office.

May 11, 2005: University Senate considers spring 2005 preliminary report of the University of Oregon Committee on Courses.

INTL 251 Examining the Culture of Capitalism (4)
SUBMITTING COURSE PROPOSALS

The Committee on Courses offers the following reminders:

✓ Proposals to the Committee on Courses must be submitted on electronic forms, available on the CAS website, http://uocurriculum.uoregon.edu/. Arrangements for access may be made with Peter Campbell in the CAS office, knroc@cas or 6-3336. Proposals submitted on old forms will be returned, without review, to academic departments, schools, or colleges.

✓ Proposals must be submitted to the Committee on Courses prior to the beginning of the term in which they are to be considered. Proposals received after the beginning of the term will be deferred to the following term. Departments in the arts and sciences should consult the college for deadline dates.

✓ The following minor course changes may be made without review by the full committee: minor edits of course description, pre- or co-requisites, grading option, and conditions of repeatability. Changes may be submitted in writing directly to the Offices of the Registrar and Creative Publishing, in care of Gayle Freeman(gfreeman@uoregon.edu) and Scott Skelton (sskelton@darkwing.uoregon.edu), respectively. The memorandum should indicate the effective term for the change(s). Note: extensive changes may be referred to the UOCC for review.

✓ If there is any question that a proposed new or changed course might duplicate coverage in an existing course from another department or school, the proposing department must gain written confirmation that the other department has been consulted and does not object to the new or changed course.

✓ Proposals for new courses must be accompanied by full syllabi.

✓ For 4xx/5xx level courses, both proposal forms and syllabi must state explicitly the substantive and measurable differences in type and amount of work for the two levels.

✓ The minimal requirements for general-education status of a course are regarded as necessary, but not always sufficient, for inclusion of a course as part of a comprehensive general-education program at the university.

Group satisfying courses are intended to provide students with a cohesive general-education program. Proposals for group-satisfying status of a course should explain how the course enhances general education at the university, explicitly stating how the course would complement other group-satisfying courses, and which other courses would be especially suitable for students to take in accompaniment. Approved March 10, 2004.

According to University Senate legislation, courses submitted for group-satisfying status must be submitted to the Intercollege General Education Review Committee.

Proposals for undergraduate group-satisfying and multicultural courses must include written justification, regardless of whether they are new or existing courses.

✓ The minimal requirements for multicultural status of a course are regarded as sufficient for inclusion of a course as part of the multicultural course requirements.

Any course that might appear to satisfy the university multicultural requirements, either by title, description, or content, is carefully examined to see if it should be listed as a multicultural course. If a course might appear on its face eligible for multicultural status, the committee needs clear explanation of why the course does—or does not—satisfy multicultural course guidelines. Arbitrary exclusion of courses from the list of multicultural satisfying courses can engender student confusion or cynicism. Approved on March 10, 2004.

✓ The UO Committee on Courses has established the policy that the phrase “or instructor’s consent” will not be stated along with any other course prerequisites. The prerequisites of any course may be overridden by instructor’s consent, and need not be stated explicitly for individual courses. Academic departments are able to override any prerequisite requirements in Banner should a student qualify to enroll.

“Instructor’s consent” is reserved for use alone as a sole prerequisite to allow departments to monitor suitability of enrollment in courses for individual students, preventing enrollment without prior approval. Academic departments should be aware they must code the courses correctly and assume enrollment management responsibilities, preauthorizing each student individually, with this option. Approved March 10, 2004.
CONTENTS OF COURSE SYLLABUS

As the primary, commonly available summary of a course, the syllabus serves several purposes. It outlines the course, it denotes what students may expect from the course, and it locates the course in the curriculum. The syllabus is the best, most concise description of a course by its teacher available to both prospective students and colleagues. The Committee on Courses uses syllabuses in its review of courses. To maximize the usefulness of a syllabus to students and faculty, it should contain the following contents:

1. Course Number
2. Title
3. Credits
4. Term, place, time, instructor
   (For a new course proposal, indicate when it is likely to be offered, and how frequently)
   (For a new course proposal, indicate who is likely to teach the course)
5. Position in the curriculum
   • Satisfies group requirement? Explain why
   • Satisfies multicultural requirement? Explain why
   • Satisfies other general-education requirement?
   • Satisfies other major or program requirement?
   • Preparatory for other courses?
   • List prerequisites or other suggested preparation
6. Format (lecture, discussion, laboratory)
7. Outline of subject and topics explored
8. Course materials (texts, books, readings)
9. Instructor expectations of students
   • Be explicit (by pages assigned, lengths of assignments)
   • Level of student engagement expected (see suggested Student Engagement Inventory on following page)
   • Readings
   • Problems
   • Attendance
   • Project
   • Writing
   • Laboratory
   • Field work
   • Work with electronic media, network, online
   • Performance
   • Presentation
   • Exams
   • Differential expected for graduate work for joint 4xx/5xx-level courses
10. Assessment
    • Methods (testing, homework)
    • Times or frequency
    • Grading policy

[See Faculty Handbook for other recommendations regarding university policies.]
STUDENT ENGAGEMENT INVENTORY

To aid in assigning student credit hours uniformly to courses in the curriculum, the committee inventories the amount of student engagement in a course. The committee has found the following tool to be useful. Departments preparing course proposals are invited to use this form when deciding how many SCH units to request for a proposed course. Departments are encouraged to report to the committee how this tool may be improved for their use.

Please identify the number of hours a typical or average student would expect to spend in each of the following activities. The general guideline is that each undergraduate credit should reflect thirty hours of student engagement. Therefore, a 3-credit course would engage students for ninety hours total among the activities listed below, whereas a 4-credit course would list 120 hours of activities in which students are engaged over the course of the term. (Graduate students are expected to perform work of higher quality and quantity, typically with an additional 20–25 percent effort expected.)

UNDERGRADUATE GENERAL-EDUCATION REQUIREMENTS
GROUP-REQUIREMENT POLICIES

The following criterions were proposed by the Undergraduate Council and the College of Arts and Sciences Curriculum Committee. The University Senate approved them in May 2001 by Motion US0001-3 Replacement Motion governing the approval of courses meeting general education requirements and the distribution of courses student must complete within each group.

1. Group satisfying courses in Arts and Letters, Social Science, and Science must meet the following general criteria:
   1.1. **Group satisfying courses in arts and letters** must create meaningful opportunities for students to engage actively in the modes of inquiry that define a discipline. Proposed courses must be broad in scope and demonstrably liberal in nature (that is, courses that promote open inquiry from a variety of perspectives). Though some courses may focus on specialized subjects or approaches, there must be a substantial course content locating that subject in the broader context of the major issues of the discipline. Qualifying courses will not focus on teaching basic skills but will require the application or engagement of those skills through analysis and interpretation.
   1.2. **Group satisfying courses in the social sciences** must be liberal in nature rather than being professionally oriented or limited to the performance of professional skills. They must cover a representative cross-section of key issues, perspectives, and modes of analysis employed by scholars working on the subject matter addressed by the course. The subject matter of the course will be relatively broad, e.g. involving more than one issue, place, or time. Courses with an emphasis on methods and skills will satisfy the requirement only if there is also a substantial and coherent theoretical component.
   1.3. **Group satisfying courses in the sciences** should introduce students to the foundations of one or more scientific disciplines, or should provide an introduction to fundamental methods (such as mathematics) that are widely used in scientific disciplines. Courses should introduce students to the process of scientific reasoning.

2. Specific Criteria:
   2.1. Group satisfying courses must be numbered at the 100, 200, and 300 levels.
   2.2. Lower division courses must be offered annually, and upper division courses at least every other year.
   2.3. Approved courses must be at least 4 credits each.
   2.4. Upper division group satisfying courses must provide depth and rigor beyond that of typical lower-division general education courses. Departments must justify, in terms of content, workload, and method of instruction, the assignment of a course to the upper level.
   2.5. Courses that are offered for majors only are excluded from group status, but courses that are designed for both majors and other students may qualify.
   2.6. Although laboratory courses are not automatically excluded from group status in the sciences, to acquire this status, the courses must not focus primarily on techniques or data collection.

3. Procedures governing the approval of all courses designed to meet General Education requirements:
   3.1. Before submission to the Senate, such courses proposed by departments must be reviewed at several levels:
       3.1.1. By the curricular committees of the various colleges and schools
       3.1.2. By an inter-college committee including the members of the CAS Curricular Committee and two representatives appointed by the deans of the others schools and colleges. This second committee is also charged to review such courses as do not meet the standards set in paragraph (2.) and to negotiate a solution with the sponsoring department.
       3.1.3. By the University Committee on Courses.
   3.2. The inter college committee is authorized to establish procedures governing the review process.

4. Completion of group requirements (student progress):
   4.1. Within the full set of courses that fulfills all of the requirements, students may not count
       4.1.1. more than one course that has the subject code of the major, or
       4.1.2. more than three courses that have the same subject code.
   4.2. Within the smaller set of courses that fulfills the requirements of each group, students must complete at least two courses that have the same subject code.
SUSTAINABLE COURSE DESCRIPTIONS

The 2000–2001 academic year was the first year that the Committee on Courses systematically deleted from the university catalog courses that have not been taught for three years or more.

In several cases, departments had not offered a specialized course under a course number and title specified in the catalog. Yet similar courses had been taught regularly in the department in various formats, under experimental numbers (410, 510, 610), or under the general designations for special topics seminars, workshops, or practicums (the 406/407/408/409, 506/507/508/509, 606/607/608/609 series). With time, departments had discovered that a course description in the catalog was too specialized to apply to any of their courses as actually being taught.

Unfortunately, removal of an overly specialized course, although untaught, still might have consequences for departments. Often that course had been the sole representative in the catalog of subjects that are taught by a department and are part of the regular curriculum. Dropping that course could make it appear that a department offered no courses in that course’s subject area.

The committee has noted another, companion problem. Over the years, the committee has observed that new courses tailored to the particular research interests and instructional style of an individual faculty member are likely to fall into disuse within a few years as the person’s teaching assignments and interests change, or if the instructor becomes unavailable for teaching that particular course.

The Committee on Courses recommends that departments and programs develop more sustainable course descriptions. A sustainable course description would identify a subject area and general approach, but would not be so restrictive as to exclude different perspectives or specializations also representative of that subject area.

The committee also recommends that departments and programs be selective when proposing permanent course status for specialized courses that can only be taught by one particular instructor.

For example, a department with several experts qualified to teach ceramics, but having only one instructor who specializes in Ming porcelain *per se*, might currently have a specialized course titled Ming Dynasty Porcelains in the catalog. A more sustainable course title could be Chinese Porcelains or even Porcelains, depending upon the range of expertise available to teach the course. Another approach would use the topics course Ceramics, possibly repeatable as the exact subject material—and transcript title—changes.

Departments following these recommendations could then represent the full range of their curricular offerings and could maintain a sustainable list of courses in the catalog.

MULTICULTURAL-CATEGORY DEFINITIONS

Category A: American Cultures. The goal is to focus on race and ethnicity in the United States by considering racial and ethnic groups from historical and comparative perspectives. Five racial or ethnic groups are identified: African American, Chicano or Latino, Native American, Asian American, European American. Approved courses deal with at least two of these groups in a comparative manner. They do not necessarily deal specifically with discrimination or prejudice, although many do.

Category B: Identity, Pluralism, and Tolerance. The goal is to gain scholarly insight into the construction of collective identities, the emergence of representative voices from varying social and cultural standpoints, and the effects of prejudice, intolerance, and discrimination. The identities at issue may include ethnicities as in the American Cultures category, as well as classes, genders, religions, sexual orientations, or other groups whose experiences contribute to cultural pluralism. This category includes courses that analyze the general principles underlying tolerance, or the lack of it.
Category C: International Cultures. The goal is to study world cultures in critical perspective. Approved courses either treat an international culture in view of the issues raised in Categories A and B (namely, race and ethnicity, pluralism and monoculturalism, prejudice and tolerance) or explicitly describe and analyze a worldview (i.e., a system of knowledge, feeling, and belief) that is substantially different from those prevalent in the twentieth-century United States.

CRITERIA FOR ADDING AN “H” SUFFIX TO A COURSE NUMBER

The Committee on Courses has discussed the criteria for adding an “H” suffix to a course number and recommends the following:

The “H” suffix is intended to advise students that a course provides honors content of significant difficulty and requires honors effort from students. The Committee on Courses will be looking for evidence of the following in determining whether a course should hold an “H” suffix designation:

1. Students enrolling should have a cumulative GPA of at least 3.30 in their major.
2. The content of the class, and the level of analysis, should be significantly deeper than for nonhonors classes.
3. Class size should be small enough to promote intensive student participation.
4. The faculty member(s) teaching the course should be available for close advising outside of class.

SUGGESTIONS FOR REVISING DEFINITIONS OF UNDERGRADUATE MAJORS, MINORS, CERTIFICATES

MAJOR

Definition
Courses in designated primary subject areas or disciplines in which a student commits to gaining in-depth knowledge, skills, competence, and attitudes through a coherent pattern of courses. A footnote accompanies the major definition: Divisional major programs emphasize a general and integrated approach to learning, with the student’s major program broadly inclusive of work in several of the discipline or subject areas within the specific division within which the student’s degree program lies (i.e., humanities, social science, science). For instance, a divisional major program in the social sciences would call for the student to include within his or her major work from several of the disciplines or subject areas in the social sciences (such as sociology, political science, or economics). Because of the breadth of disciplines or subjects included in the major, the student has less opportunity to delve in depth into a single subject area such as sociology, political science, or economics, than they would be able to do were they in a “departmental major” program in a single one of these disciplines or subject areas.

Minimal Requirements
36 credits, of which a minimum of 24 must be upper division. Departments should consider setting minimum residency requirements.

MINOR

Definition
Courses in a designated secondary subject area or discipline distinct from and usually outside the student’s degree major in which knowledge is gained in a coherent pattern of courses.
Minimal Requirements
24 credits, of which a minimum of 12 must be upper division. Should be within a discipline that already has a preexisting major or is sponsored by a department.

CERTIFICATE

Definition
An approved academic award given in conjunction with the satisfactory completion of a program of instruction requiring one year or more, but less than four years, of full-time equivalent, postsecondary-level work. The conditions and conferral of the award are governed by the faculty and ratified by the governing board of the institution granting the certificate.

Minimal Requirements
36 credits—24 upper division with 12 minimum at 400 level. The sponsoring department must provide guidance—a template or check list and the name of an adviser, with notice that the student must consult an adviser to apply for the certificate at least two terms prior to graduation.
