their doctoral degrees within five to six years. The Division of Graduate Studies imposes a limit of seven years for completion of the PhD degree.

The distribution requirements may be satisfied by receiving a mid-B or better in

- one course from each of three historical periods: ancient, modern (16th–18th centuries), 19th century,
- one courses from each of the four philosophical traditions—continental, analytic, American, and feminist—that ground the diverse philosophical perspectives of the department. This is usually fulfilled by taking the Advanced Introductory course in the area (571, 572, 573, 574) within the first two years of graduate study
- three courses in Emerging and Engaged Philosophies. Students must complete *two courses* in Emerging Philosophies, such as Critical Race Theory, Latin American Philosophy, Native American Philosophy, Feminist Philosophy and LGBTQ philosophy. Students must also complete *one course* in Engaged philosophies, such as Environmental Philosophy, Biomedical Ethics, Animal Ethics, and Data Ethics.
- one course in advanced logic
- In the first year of employment as a GE, graduate students must also complete a total of 3 credits by enrolling in a one-credit professionalization pro-seminar on teaching for all three terms of the regular academic year.

Note on criteria for multiple fulfillment: Graduate courses may be listed as counting toward the simultaneous fulfillment of multiple categories of distribution simultaneously, though this is possible for only *some* of the categories. A course may count toward one Historical Period while also fulfilling a Philosophical Tradition or a course in Emerging and Engaged Philosophies. Courses may count toward *either* a Philosophical Tradition *or* the Emerging and Engaged requirement, but no course may count toward both of these requirements at once. For example, a course in nineteenth-century feminist philosophy can count toward either the requirement in the Feminist Tradition or in Emerging and Engaged Philosophies (but not both) and at the same time fulfill a requirement for Historical Periods. When a course is listed so as to provide an option for fulfillment of either the Traditions or Emergent & Engaged requirements, students must choose which requirement the course is to fulfill.

Code	Title	Credits
History Requirements		
One course from each of the following:		12
Course from ancient period		
Course from modern (16th-18th centuries) period		
Course from 19th century		
Traditions Requirements		
One courses about continental philosophical traditions ¹		4
One courses about analytic philosophic traditions ¹		4
One courses about American philosophical traditions ¹		4
One courses about feminist philosophical traditions ¹		4
Engaged and Emerging Philosophy		
Two courses in Emerging Philosophies		8
One course in Engaged Philosophies		4
Logic		
One course in advanced symbolic logic		4
Teaching Seminar		

Three one-credit teaching seminars	3
Dissertation	
PHIL 603 Dissertation	18
Total Credits	65

¹ The traditions requirement is usually fulfilled by completing the Advanced Introductory course in the area (571, 572, 573, 574).

Additional Requirements

The comprehensive examinations are passed by completing two substantial research papers under the supervision of faculty members. Students are advanced to candidacy upon completion of the comprehensives. A dissertation prospectus must be accepted by the candidate's committee after a preliminary oral examination. The written dissertation must receive the approval of the dissertation committee after a final oral examination.

Admission

Applicants for admission to graduate studies are asked to write a brief letter explaining their philosophical background and their specific philosophical interests. This helps the department's admissions committee decide whether this is an appropriate philosophy department for the applicant's goals. They should also submit a writing sample and a college transcript. International students must provide proof of competence in English. A score of at least 500 on the Test of Spoken English (TSE), 26 on the Internet-based Test of English as a Foreign Language (TOEFL), or 7 on the International English Language Testing System (IELTS) is required of international students unless their native language is English.

In addition to general university regulations governing graduate admission (see the **Division of Graduate Studies** section of this catalog), the Department of Philosophy requires applicants to submit three confidential report forms completed by teachers (preferably philosophy teachers) familiar with the applicant's academic background.

The application process is exclusively online; a link to the application guidelines is posted on the department website. Applicants who are unable to make the application fee payment online with Visa, Discover, or MasterCard may now pay online with a check. This application and one complete set of transcripts, together with the application fee (\$70 for domestic applicants, \$90 for international applicants), should be sent to the Office of Admissions, 1217 University of Oregon, Eugene OR 97403-1217. A second set of transcripts should be uploaded to GradWeb (<https://gradweb.uoregon.edu/>). Confidential report forms should be sent directly to the department by the faculty members recommending the applicant if they are unable to upload their letters of recommendation.

Graduate teaching fellowships are the only form of financial aid available in the philosophy department; the application deadline is January 2 for the following academic year. An application form is provided upon request.

Courses

PHIL 101. Philosophical Problems. 4 Credits.

Introduction to philosophy based on classical and modern texts from Plato through the 21st century. Sample topics include free will, the mind-body problem, the existence of an external world.

PHIL 102. Ethics. 4 Credits.

Study of moral theories and issues central to moral theory (such as justification of moral judgments and concepts of duty, goodness, and virtue) as well as theoretical engagement with pressing contemporary moral debates.

PHIL 103. Critical Reasoning. 4 Credits.

Introduction to thinking and reasoning critically. How to recognize, analyze, criticize, and construct arguments.

PHIL 104. History of Western Philosophy. 4 Credits.

The course is an introduction to some currents, seminal thinkers, and texts of the Western philosophical tradition from the Ancient Greeks to Medieval, Modern, and 19th and 20th Century Philosophy. The course includes both classical text and readings traditionally excluded from the canon.

PHIL 110. Human Nature. 4 Credits.

Consideration of various physiological, cultural, psychological, and personal forces that characterize human beings, taking into account issues of class, gender, race, and sexual orientation.

PHIL 120. Ethics of Enterprise and Exchange. 4 Credits.

Moral examination of business by considering the nature of enterprise and exchange. Topics include corporate and consumer responsibility, meaningful work, and leadership.

PHIL 123. Internet, Society, and Philosophy. 4 Credits.

Introduction to philosophical problems of the Internet. Primary focus on social, political, and ethical issues with discussion of epistemological and metaphysical topics.

PHIL 130. Philosophy and Popular Culture. 4 Credits.

Engages in critical philosophical reflection about and through popular culture, including movies, music, graphic novels, and sports.

PHIL 135. Ethics in the Life Sciences. 4 Credits.

Focused on complex ethical issues in the life sciences, ranging from debates over human enhancement, the use of human cells in research, non-human animals in research, synthetic biology, genetically-modified organisms, and recent research in microbial biology.

PHIL 170. Love and Sex. 4 Credits.

Philosophical study of love, relationships, marriage, sex, sexuality, sexual identity, and sexual representation.

PHIL 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

PHIL 199L. Special Studies: [Topic]. 4 Credits.

Repeatable.

PHIL 211. Existentialism. 4 Credits.

Basic ideas of the Christian and atheistic divisions of the existentialist movement; some attention to the philosophical situation that generated the existentialist rebellion.

PHIL 216. Philosophy and Cultural Diversity. 4 Credits.

Philosophical investigation of the implications of cultural diversity for identity, knowledge, and community, from the perspectives of several American cultures.

PHIL 220. Food Ethics. 4 Credits.

Examination of a variety of issues relating to food production and consumption in light of virtue, utilitarian, deontological, pragmatist, and care ethics.

PHIL 223. Data Ethics. 4 Credits.

This course explores central ethical challenges in data science and related fields of computational analysis. Offers both an overview of the major theoretical commitments of data ethics as well as engagement with applied contexts such as computer engineering, behavioral sciences, marketing, and surveillance.

PHIL 225. Introduction to Formal Logic. 4 Credits.

Introduces formal logic, including both propositional (setence) and predicate logic, including the use of truth trees. Students cannot receive credit for both PHIL 225 and MATH 307.

PHIL 307. Social and Political Philosophy. 4 Credits.

Major social and political theorists from Plato through Marx. Inquiry into such ideas as justice, natural law, natural rights, and the social contract.

PHIL 308. Social and Political Philosophy. 4 Credits.

Major social and political theorists from Plato through Marx. Inquiry into such ideas as justice, natural law, natural rights, and the social contract.

PHIL 309. Global Justice. 1-4 Credits.

Introduction to philosophical problems of globalization and justice related to global poverty, citizenship, human rights, and issues of identity, multiculturalism, war, terrorism, environmentalism and health care.

PHIL 310. History of Philosophy: Ancient and Medieval. 4 Credits.

Focuses primarily on Plato and Aristotle. Examines their roots in pre-Socratic philosophy and their influence on medieval philosophers such as St. Augustine and St. Thomas Aquinas.

Prereq: one lower-division philosophy course.

PHIL 311. History of Philosophy: Modern. 4 Credits.

Survey of European philosophy through Hume, including the work of Descartes, Locke, and Spinoza.

Prereq: one course from Philosophy.

PHIL 312. History of Philosophy: 19th Century. 4 Credits.

Traces Kant's influence on such philosophers as Hegel, Nietzsche, and Marx.

Prereq: one philosophy course.

PHIL 315. Introduction to Feminist Philosophy. 4 Credits.

Introduces basic questions of philosophy through topics central to feminism.

PHIL 320. Philosophy of Religion. 4 Credits.

Philosophical investigation of the nature of "religion" (e.g., the nature of the sacred, spirituality, and transcendence).

Prereq: one philosophy course.

PHIL 322. Philosophy of the Arts. 4 Credits.

Survey of classical and contemporary theories of art and aesthetic experience, with examples from various arts.

Prereq: one philosophy course.

PHIL 323. Moral Theory. 4 Credits.

Study of the most important traditional ethical theories; modern philosophical analysis of moral terms and statements.

Prereq: one philosophy course.

PHIL 331. Philosophy in Literature. 4 Credits.

Selective study of major philosophical ideas and attitudes expressed in the literature of Europe and America.

Prereq: one philosophy course.

PHIL 332. Philosophy of Film. 4 Credits.

Explores questions about the aesthetic dimensions of film, its relation to the other arts, and the treatment of philosophical questions in films.

PHIL 335. Medical Ethics. 4 Credits.

Introduces theoretical tools and concrete case studies for formulating, analyzing, and evaluating ethical judgments raised by contemporary biomedical practice.

PHIL 339. Introduction to Philosophy of Science. 4 Credits.

Examines theories of scientific practice, rationality, objectivity, values in science, and the role of science in society.

Prereq: one philosophy course.

PHIL 340. Environmental Philosophy. 4 Credits.

Considers the nature and morality of human relationships with the environment (e.g., the nature of value, the moral standing of nonhuman life).

PHIL 341. African Philosophy. 4 Credits.

Survey of contemporary African philosophy with a focus on current debates (for example, critique of ethnophilosophy; relation between orality and writing; decolonization of knowledge).

PHIL 342. Introduction to Latin American Philosophy. 4 Credits.

History of Latin American philosophy through the study of ideas, issues, problems, and forms of thinking in the work of key periods, movements, and authors.

PHIL 343. Critical Theory. 4 Credits.

Examines the methodological, epistemological, moral, and political dimensions of critical theory. Prereq: one philosophy course. Offered alternate years.

PHIL 344. Introduction to Philosophy of Law. 4 Credits.

Introduces central problems in the law; examines the nature of legal reasoning.

PHIL 345. Place in the Cosmos. 4 Credits.

Explores the relation between humans and the cosmos as a matter of place by comparing seminal texts in the history of philosophy. Offered alternate years.

PHIL 350. Metaphysics. 4 Credits.

Traditional issues in metaphysics selected from among such topics as substance, existence, time, causation, God, the nature of individuals, and the meaningfulness of metaphysics.

Prereq: one philosophy course.

PHIL 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

PHIL 401. Research: [Topic]. 1-21 Credits.

Repeatable.

PHIL 403. Thesis. 1-12 Credits.

Repeatable.

PHIL 405. Reading and Conference: [Topic]. 1-21 Credits.

Repeatable.

PHIL 407. Seminar: [Topic]. 1-5 Credits.

Repeatable. Recent topics include Eastern Philosophy, Feminist Theory, Nonviolence.

Prereq: one 300-level philosophy course.

PHIL 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

PHIL 415. Continental Philosophy: [Topic]. 4 Credits.

Survey of significant areas in the Continental tradition, e.g. phenomenology, critical social theory, deconstruction, feminism, and hermeneutics. Repeatable when topic changes.

Prereq: junior standing.

PHIL 420. American Philosophy: [Topic]. 4 Credits.

Survey of significant areas of the American tradition, e.g. 19th-, 20th-, and 21st-century thought, African and Native American thought, feminism, recent pragmatism, the self, and pluralism. Repeatable when topic changes.

Prereq: junior standing.

PHIL 421. Ancient Philosophers: [Topic]. 4 Credits.

Repeatable. Concentrates on the work of a single philosopher, typically Plato or Aristotle. Repeatable when philosopher changes.

Prereq: PHIL 310.

PHIL 423. Technology Ethics: [Topic]. 4 Credits.

Advanced inquiry in ethics with a focus on technology. Addresses moral, political, and cultural issues raised by socio-technical systems for everyday living and democratic citizenship. Repeatable once for a maximum of 8 credits when the topic changes.

PHIL 425. Philosophy of Language. 4 Credits.

Philosophical theories of language and meaning, with special attention to the nature of concepts and reasoning.

Prereq: junior standing.

PHIL 426. Advanced Logic. 4 Credits.

This course covers classical and non-classical logics. A review of propositional and predicate logic will be followed by a consideration of "non-normal" logics of strict implication, conditional logics, many-valued logics, and first degree entailment. The course will consider philosophical issues raised by these diverse logics.

Prereq: PHIL 225.

PHIL 433. 17th- and 18th-Century Philosophers: [Topic]. 4 Credits.

Repeatable. Concentrates on the work of a single philosopher, typically Descartes, Locke, Hume, Leibniz, Berkeley, or Kant. Repeatable when philosopher changes.

Prereq: PHIL 310, PHIL 311.

PHIL 443. Feminist Philosophy: [Topic]. 4 Credits.

Repeatable. Examines contemporary feminist contributions to philosophy. Repeatable once for maximum of 8 credits.

Prereq: one 300-level PHIL course

PHIL 451. Native American Philosophy. 4 Credits.

Survey of Native American philosophy focusing on philosophical perspectives in historical traditions and contemporary Native American philosophy. Offered alternate years.

PHIL 452. Philosophy and Race. 4 Credits.

Surveys the philosophical contribution to studies of race including intellectual history, philosophy of science, racism and its remedies, media studies, and cultural criticism.

Prereq: one philosophy course at the 300 level.

PHIL 453. 19th-Century Philosophers: [Topic]. 4 Credits.

Repeatable. Concentrates on the work of a single philosopher, typically Hegel, Nietzsche, Marx, or Kierkegaard. Repeatable when philosopher changes.

Prereq: PHIL 312.

PHIL 463. 20th-Century Philosophers: [Topic]. 4 Credits.

Repeatable. Concentrates on the work of a single philosopher (e.g., Wittgenstein, Dewey, Quine, Merleau-Ponty, C.I. Lewis, or Foucault). Repeatable when philosopher changes.

Prereq: junior standing.

PHIL 471. Advanced Introduction to American Philosophy. 4 Credits.

An advanced introduction to central debates, topics, figures, and trajectories in American Philosophy.

Prereq: PHIL 401 or PHIL 403 or PHIL405 or PHIL 407 or PHIL 410 or PHIL 415 or PHIL 420 or PHIL 421 or PHIL 423 or PHIL 425 or PHIL 426 or PHIL 433 or PHIL 443 or PHIL 451 or PHIL 452 or PHIL 453 or PHIL 463.

PHIL 472. Advanced Introduction to Analytic Philosophy. 4 Credits.

An advanced introduction to central debates, topics, figures, and trajectories in Analytic philosophy.

Prereq: One 400 level philosophy course.

PHIL 473. Advanced Introduction to Continental Philosophy. 4 Credits.

An advanced introduction to central debates, topics, figures, and trajectories in Continental Philosophy.

Prereq: One 400 level philosophy course.

PHIL 474. Advanced Introduction to Feminist Philosophy. 4 Credits.

An advanced introduction to central debates, topics, figures, and trajectories in Feminist Philosophy.

Prereq: One 400 level philosophy course.

PHIL 503. Thesis. 1-16 Credits.

Repeatable.

PHIL 507. Seminar: [Topic]. 1-5 Credits.

Repeatable. Recent topics include Eastern Philosophy, Feminist Theory, Nonviolence, Philosophy and Race, Philosophy and Tragedy, Philosophy of Education, Philosophy of Nature.

PHIL 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

PHIL 521. Ancient Philosophers: [Topic]. 4 Credits.

Repeatable. Concentrates on the work of a single philosopher, typically Plato or Aristotle. Repeatable when philosopher changes.

PHIL 526. Advanced Logic. 4 Credits.

This course covers classical and non-classical logics. A review of propositional and predicate logic will be followed by a consideration of "non-normal" logics of strict implication, conditional logics, many-valued logics, and first degree entailment. The course will consider philosophical issues raised by these diverse logics.

PHIL 533. 17th- and 18th-Century Philosophers: [Topic]. 4 Credits.

Repeatable. Concentrates on the work of a single philosopher, typically Descartes, Locke, Hume, Leibniz, Berkeley, or Kant. Repeatable when philosopher changes.

PHIL 551. Native American Philosophy. 4 Credits.

Survey of Native American philosophy focusing on philosophical perspectives in historical traditions and contemporary Native American philosophy. Offered alternate years.

PHIL 553. 19th-Century Philosophers: [Topic]. 4 Credits.

Repeatable. Concentrates on the work of a single philosopher, typically Hegel, Nietzsche, Marx, or Kierkegaard. Repeatable when philosopher changes.

PHIL 563. 20th-Century Philosophers: [Topic]. 4 Credits.

Repeatable. Concentrates on the work of a single philosopher (e.g., Wittgenstein, Dewey, Quine, Merleau-Ponty, C.I. Lewis, or Foucault). Repeatable when philosopher changes.

PHIL 571. Advanced Introduction to American Philosophy. 4 Credits.

An advanced introduction to central debates, topics, figures, and trajectories in American Philosophy.

PHIL 572. Advanced Introduction to Analytic Philosophy. 4 Credits.

An advanced introduction to central debates, topics, figures, and trajectories in Analytic philosophy.

PHIL 573. Advanced Introduction to Continental Philosophy. 4 Credits.

An advanced introduction to central debates, topics, figures, and trajectories in Continental Philosophy.

PHIL 574. Advanced Introduction to Feminist Philosophy. 4 Credits.

An advanced introduction to central debates, topics, figures, and trajectories in Feminist Philosophy.

PHIL 601. Research: [Topic]. 1-16 Credits.

Repeatable.

PHIL 602. Supervised College Teaching. 1-16 Credits.

Repeatable.

PHIL 603. Dissertation. 1-16 Credits.

Repeatable.

PHIL 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

PHIL 607. Seminar: [Topic]. 1-5 Credits.

Repeatable. Recent topics include Emerson, Philosophy of Race, Recent Moral Theory, Schelling.

PHIL 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

PHIL 614. Issues in Ethics. 4 Credits.

Examination of ethical theory.

Prereq: major standing.

PHIL 615. Continental Philosophy: [Topic]. 4 Credits.

Explores philosophical problems and traditions in contemporary European philosophy. Repeatable three times for a maximum of 16 credits when topic changes.

PHIL 620. American Philosophy: [Topic]. 4 Credits.

Treats issues in classical and contemporary American philosophy. Repeatable three times for a maximum of 16 credits when topic changes.

PHIL 623. Data Ethics. 4 Credits.

This course offers an advanced exploration of central ethical challenges in data science and related fields of computational analysis.

PHIL 641. Social and Political Philosophy: [Topic]. 4 Credits.

Examination of classical and current problems in social and political philosophy including the nature of justice, legitimacy of the state, conditions of war and peace. Repeatable three times for a maximum of 16 credits when topic changes.

PHIL 643. Feminist Philosophy: [Topic]. 4 Credits.

Explores contemporary feminist philosophy. Repeatable three times for a maximum of 16 credits when topic changes.

PHIL 645. Environmental Philosophy: [Topic]. 4 Credits.

Pursues advanced questions in environmental philosophy regarding a particular tradition or problem area. Repeatable up to 3 times when topic changes.

PHIL 657. Philosophy and Race: Contemporary Issues. 4 Credits.

Examination of contemporary discussions regarding race including biology and race, race in medicine, reparations, perspectives on race in Continental and American philosophy.

PHIL 658. Philosophy of Mind. 4 Credits.

Analyzes basic concepts and problems in psychology.

Physics

Richard P. Taylor, Department Head

541-346-4741

541-346-5861 fax

173 Willamette Hall

1274 University of Oregon

Eugene, Oregon 97403-1274

Physics, the most basic of the natural sciences, is concerned with the discovery and development of the laws that describe our physical universe. This endeavor serves, also, to directly benefit humankind: integrated circuits found in computers, mobile phones, and solar cells, lasers in DVD players and computer mice, and the Internet itself were developed from fundamental physics discoveries.

Faculty

Benjamín Alemán, associate professor (experimental condensed matter, optical physics). BS, 2004, Oregon; MA, 2010, PhD, 2011, California, Berkeley. (2013)

David Allcock, assistant professor (ion trapping and quantum information). MS, 2007, PhD, 2012, Oxford. (2019)

Jayanth Banavar, professor (statistical physics). BS, 1972, MS, 1974, Bangalore University, PhD, 1978, University of Pittsburgh. (2019)

Dietrich Belitz, professor (condensed matter theory). Dipl Phys, 1980, Dr.rer.nat., 1982, Technical University Munich. (1987)

Bryan S. Boggs, senior lecturer (optical physics). BS, 1995, MS, 1996, PhD, 2012, Oregon. (2013)

Gregory D. Bothun, professor (astronomy). BS, 1976, PhD, 1981, Washington (Seattle). (1990)

James E. Brau, Philip H. Knight Professor (experimental elementary particle physics). BS, 1969, United States Air Force Academy; MS, 1970, PhD, 1978, Massachusetts Institute of Technology. (1988)

Spencer Chang, associate professor (theoretical high-energy physics). BS, 1999, Stanford; PhD, 2004, Harvard. (2010)

Timothy Cohen, associate professor (elementary particle theory). BS, 2006, MS, 2009, PhD, 2011, Michigan, Ann Arbor. (2015)

Eric Corwin, associate professor (biophysics, soft condensed matter). BA, 2001, Harvard; PhD, 2007, Chicago. (2010)

Ben Farr, assistant professor (gravitational waves). BS, 2009, Rochester Institute of Technology; PhD, 2014, Northwestern. (2017)

R. Scott Fisher, senior lecturer (astronomy). BS, 1993, PhD, 2001, Florida. (2012)

Raymond E. Frey, professor (experimental elementary particle physics). BA, 1978, California, Irvine; MS, 1981, PhD, 1984, California, Riverside. (1989)

James N. Imamura, professor (astrophysics); director, Institute of Theoretical Science. BA, 1974, California, Irvine; MA, 1978, PhD, 1981, Indiana. (1985)

Laura Jeanty, assistant professor (high-energy physics). BS, 2006, Yale; MS, 2009, PhD, 2013, Harvard. (2018)

Stephen D. Kevan, professor (solid state physics). BA, 1976, Wesleyan; PhD, 1980, California, Berkeley. (1985)

Graham Kribs, professor (elementary particle theory). BAsC, 1993, Toronto; PhD, 1998, Michigan, Ann Arbor. (2004)

Dean W. Livelybrooks, senior instructor (geophysics). BS, 1977, Massachusetts Institute of Technology; MS, 1984, PhD, 1990, Oregon. (1996)

Stephanie Majewski, associate professor (experimental elementary particle physics). BS, 2002, Illinois, Urbana-Champaign; PhD, 2007, Stanford. (2012)

Benjamin McMorran, associate professor (experimental condensed matter, optical physics). BS, 2000, Oregon State; MS, PhD, 2009, Arizona. (2011)

Stanley J. Micklavzina, senior instructor (physics education). BS, 1982, MS, 1985, Oregon. (1985)

Jens Nöckel, associate professor (optical physics). Dipl. Phys., 1992, Hamburg; PhD, 1997, Yale. (2001)

Raghuvveer Parthasarathy, Alec and Kay Keith Professor (condensed matter physics, biophysics). BA, 1997, California, Berkeley; PhD, 2002, Chicago. (2006)

Jayson Paulose, assistant professor (condensed matter theory). AB, 2007, Princeton; SM, 2009, PhD, 2013, Harvard. (2018)

Michael G. Raymer, Philip H. Knight Professor (quantum optics and optical physics). BA, 1974, California, Santa Cruz; PhD, 1979, Colorado. (1988)

William C. Scannell, lab instructor (physics education). BS, 2002, MS, 2004, PhD, 2010, Oregon. (2016)

James M. Schombert, professor (astronomy). BS, 1979, Maryland; MPhil, 1982, PhD, 1984, Yale. (1996)

Brian J. Smith, professor (quantum optics, optical physics). BA, 2000, Gustavus Adolphus College; PhD, 2007, Oregon. (2015)

Daniel Steck, associate professor (atom optics and nonlinear dynamics). BS, 1995, Dayton; PhD, 2001, Texas, Austin. (2004)

David M. Strom, professor (experimental elementary particle physics). BA, 1980, St. Olaf; PhD, 1986, Wisconsin, Madison. (1991)

Richard P. Taylor, professor (solid state physics). BS, 1985, PhD, 1988, Nottingham. CAD, 1995, Manchester School of Art; MA, 2000, New South Wales. (1999)

John J. Toner, professor (condensed matter theory). BS, 1977, Massachusetts Institute of Technology; MA, 1979, PhD, 1981, Harvard. (1995)

Eric Torrence, professor (experimental elementary particle physics). BS, 1990, Washington (Seattle); PhD, 1997, Massachusetts Institute of Technology. (2000)

Tristan S. Ursell, assistant professor (condensed matter physics, biophysics). BS, 2003, Rensselaer Polytechnic Institute; MS, 2003, PhD, 2009, California Institute of Technology. (2014)

Steven J. van Enk, professor (theoretical optical physics). MSc, 1988, Utrecht; PhD, 1992, Leiden. (2006)

Hailin Wang, professor (quantum optics); Alec and Kay Keith Chair. BS, 1982, Science and Technology (China); MS, 1986, PhD, 1990, Michigan. (1995)

David Wineland, research professor (atomic spectroscopy, quantum information, quantum-limited metrology). BA, 1965, California, Berkeley; MA, 1966, PhD, 1970, Harvard. (2018)

Tien-Tien Yu, assistant professor (high-energy physics). AB, 2007, Chicago; PhD, 2013, Wisconsin, Madison. (2017)

Research Faculty and Staff

Robert Schofield, research associate professor (nuclear biophysics). BS, 1982, Brigham Young; PhD, 1990, Oregon. (1993)

Nikolai Sinev, senior research associate (experimental high energy physics). BS, 1968, PhD, 1974, Moscow State. (1993)

Frank Vignola, senior research associate (solar energy). BA, 1967, California, Berkeley; MS, 1969, PhD, 1975, Oregon. (1977)

Emeriti

Paul L. Csonka, professor (elementary particle theory). PhD, 1963, Johns Hopkins. (1968)

Nilendra G. Deshpande, professor (elementary particle theory). BSc, 1959, MSc, 1960, Madras; PhD, 1965, Pennsylvania. (1975)

Rudolph C. Hwa, professor emeritus. BS, 1952, MS, 1953, PhD, 1957, Illinois; PhD, 1962, Brown. (1971)

Harlan Lefevre, professor emeritus. BA, 1951, Reed; PhD, 1961, Wisconsin. (1961)

David K. McDaniels, professor emeritus. BS, 1951, Washington State; MS, 1958, PhD, 1960, Washington (Seattle). (1963)

John T. Moseley, professor emeritus. BS, 1964, MS, 1966, PhD, 1969, Georgia Institute of Technology. (1979)

George W. Rayfield, professor emeritus. BS, 1958, Stanford; PhD, 1964, California, Berkeley. (1967)

David R. Sokoloff, professor emeritus. BA, 1966, City University of New York, Queens; PhD, 1972, Massachusetts Institute of Technology. (1978)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

- **Bachelor of Arts: Physics**
- **Bachelor of Science: Physics**
- **Minor**

Undergraduate Studies

As it involves the development of analytical, technical, problem-solving, and science communication skills, a major in physics provides a good start for many career paths. In addition to major and minor programs,

the Department of Physics offers a variety of courses for nonmajors and health science premajor students.

Preparation

Entering freshmen should have taken as much high school mathematics as possible in preparation for starting calculus in their freshman year. High school study of physics and chemistry is desirable.

The tables below show the preferred path through our physics major. Alternative paths through the major, with relaxed math requirements are available. For more information, please contact the UO Department of Physics.

Transfer Students

Because of the sequential nature of the physics curriculum, it is useful for students from two-year colleges to complete as much as possible of calculus, differential equations, several-variable calculus, chemistry, and calculus-based physics (part of an associate's degree) before transferring.

Years Completed Before Transfer	Suggested Completed Courses	UO Equivalent Courses
Two, more than two	One year of differential and integral calculus	MATH 251–253-253
Two, more than two	One year of calculus general physics with laboratory	PHYS 251–253-253, PHYS 290
Two, more than two	General chemistry	CH 221–222-222 or CH 224H–225H-225H
Two, more than two	One term of differential equations and two terms of multivariable calculus	MATH 256, MATH 281–282-282
More than two	Second year of physics	

Transfer students should also have completed as many as possible of the university requirements for the bachelor's degree (see Bachelor's Degree Requirements (p. 26)).

Careers

Fifty percent of graduates with bachelor's degrees in physics find employment in the private sector working as applied physicists, software developers, managers, or technicians, typically alongside engineers and computer scientists. About 30 percent of students who earn an undergraduate degree continue their studies in a graduate degree program, leading to a career in teaching or research or both at a university, at a government laboratory, or in industry. In addition, a degree in physics is good preparation for a career in business. Students who have demonstrated their ability with a good record in an undergraduate physics program are generally considered very favorably for admission to medical and other professional schools.

Major Requirements

The major in physics leads to a bachelor of arts (BA) or a bachelor of science degree (BS). Complete requirements are listed under **Bachelor's Degree Requirements**. The bachelor of arts degree has a second-language requirement. Knowledge of a language other than English is recommended for students planning graduate study in physics.

Required courses must be taken for letter grades and a grade point average of 2.00 (mid-C) or better must be earned in these courses. Courses beyond the minimum requirement may be taken pass/no pass (P/N). At least 20 of the upper-division credits must be completed in residence at the University of Oregon. Exceptions to these requirements must be approved by the physics director of undergraduate studies.

Undergraduate research is strongly encouraged. Laboratory courses such as Foundations of Physics Laboratory (PHYS 290) and Physics Experimentation Data Analysis Laboratory (PHYS 391) provide the correct foundation. Approximately 50 percent of physics undergraduates engage in substantive research during their course of study—typically beginning with Research Project I-III (PHYS 491–493). Contact the physics advisor for more information.

The sequential nature of physics courses makes it imperative to start planning a major program in physics early. Interested students should consult the advisor in the Department of Physics near the beginning of their studies. The programs assume that students are prepared to take calculus in their freshman year. Consult the physics advisor for assistance in planning a specific program adapted to a student's individual needs.

Bachelor of Arts: Physics

Code	Title	Credits
Physics Core Courses		
MATH 251–253	Calculus I-III	12
or MATH 261–263	Calculus with Theory I-III

Sample Programs for Transfer Students

These sample programs are for transfer students who have completed two years of college work including one year of calculus, one year of general physics with laboratories, one year of general chemistry, and as many as possible of the university requirements for the bachelor's degree. In addition to graduation requirements for the bachelor's degree, transfer students should plan to take the following courses, depending on their area of emphasis:

Third Year		Credits
MATH 256	Introduction to Differential Equations	4
MATH 281–282	Several-Variable Calculus I-II	8
PHYS 351–353	Foundations of Physics II	12
PHYS 391	Physics Experimentation Data Analysis Laboratory	4
Fourth Year		
PHYS 411–413	Mechanics, Electricity, and Magnetism	12
PHYS 414–415	Quantum Physics	8
PHYS 417	Topics in Quantum Physics	4
PHYS 422	Electromagnetism	4
Select one or two of the following:		4-8
PHYS 424	Classical Optics	4
PHYS 425	Modern Optics	4
PHYS 431	Analog Electronics	4
PHYS 432	Digital Electronics	4
PHYS 491	Research Project I	4
PHYS 492	Research Project II	4
PHYS 493	Research Project III	4
Mathematics or physics electives or both		8
Total Credits:		68-72

Honors

To be recommended by the faculty for graduation with honors in physics, a student must complete at least 46 credits in upper-division physics courses, of which at least 40 credits must be taken for letter grades, and earn at least a 3.50 grade point average in these courses.

As an alternative, undergraduate research leading to the defense of a thesis accompanied by at least a 3.30 grade point average can lead to recommendation for graduation with honors. Contact the director of undergraduate studies for more information.

Minor Requirements

Code	Title	Credits
Pre-Minor Requirements		
Required Courses		
PHYS 251–253	Foundations of Physics I ¹	12
	or PHYS 201–203	General Physics
PHYS 351–353	Foundations of Physics II	12
PHYS 391	Physics Experimentation Data Analysis Laboratory	4
400-level physics course ²		4
Total Credits		32

¹ General Physics (PHYS 201–203) may fulfill requirements with the approval of the Physics Director of Undergraduate Studies.

² All 400-level PHYS classes count towards this requirement. However, keep in mind that some classes have pre-requisites that need to be met before they can be taken. Contact the Physics Director of Undergraduate Studies if you have questions about this requirement.

Additional Requirements

Course work must be completed with grades of C– or better or P. At least 12 of the upper-division credits must be completed in residence at the University of Oregon.

Engineering

Students interested in engineering may complete preparatory course work at the University of Oregon before enrolling in a professional engineering program at another institution. The Department of Physics coordinates a three-plus-two program that allows a student to earn a bachelor's degree in physics from Oregon and one in engineering from another institution. For more information, see Preparatory Programs in the **Academic Advising** section of this catalog.

Engineering students interested in semiconductor process engineering or polymer science may be interested in the nationally recognized master's industrial internship program. For more information, visit internship.uoregon.edu (<http://internship.uoregon.edu/>).

Preparation for Kindergarten through Secondary School Teaching Careers

The College of Education offers a fifth-year program for middle-secondary teaching licensure in physics and integrated sciences and a program for elementary teaching. Students considering a career pathway to teaching should consider following the physics teaching emphasis to prepare for the licensure programs. More information is available from the department's education advisor, Dean Livelybrooks; see also the **College of Education** section of this catalog.

- Master of Arts
- Master of Science: Physics
- Doctor of Philosophy

Graduate Studies

The Department of Physics offers graduate programs leading to the master of science degree in applied physics or to the master of arts (MA), master of science (MS), and doctor of philosophy (PhD) degrees in physics with a variety of opportunities for research. Current research areas include astronomy and astrophysics, biophysics, condensed matter physics, elementary particle physics, and optical physics.

The interdisciplinary Institute for Fundamental Science (IFS) enhances the experimental, theoretical, (<http://physics.uoregon.edu/%7Ehet/>) and astronomy research activities at the University of Oregon. (<http://uoregon.edu/>) IFS is one of several centers and institutes supported by the Office of the Vice President for Research and Innovation (<http://research.uoregon.edu/>), and maintains a close relationship with the Department of Physics (<https://physics.uoregon.edu/>) as well as the Department of Chemistry (<https://chemistry.uoregon.edu/>) and the Department of Mathematics (<https://math.uoregon.edu/>).

The Materials Science Institute and the Oregon Center for Optics provide facilities, support, and research guidance for graduate students and postdoctoral fellows in the interdisciplinary application of concepts and techniques from both physics and chemistry to understanding physical systems.

Cooperative programs of study are possible in molecular biology through the Institute of Molecular Biology.

Pine Mountain Observatory

Pine Mountain Observatory, operated by the Department of Physics for research and advanced instruction in astronomy, is located thirty miles southeast of Bend, Oregon, off Highway 20 near Millican, at an altitude of 6,300 feet above sea level. The observatory has three telescopes—fifteen inches, twenty-four inches, and thirty-two inches in diameter—the largest governed by computer. All are Cassegrain reflectors. A wide-field CCD camera is available on the thirty-two-inch telescope. The site has an astronomers' residence building and a caretaker's house. Professional astronomical research is in progress at the observatory on every partially or totally clear night of the year, and the site is staffed year round.

Admission and Financial Aid

For admission to graduate study, a bachelor's degree in physics or a related area is required with a minimum undergraduate grade point average (GPA) of 3.00 (B) in advanced physics and mathematics courses. Submission of scores on the General Graduate Record Examinations (GRE), is required; the Physics GRE is strongly recommended. Students from non-English-speaking countries must demonstrate proficiency in English by submitting scores from the Test of English as a Foreign Language (TOEFL). Information about the department and the Graduate Admission Application are available through the department's website.

Financial aid in the form of graduate employee (GE) opportunities or research fellowships is available on a competitive basis to PhD students. GEs require approximately sixteen hours of work a week and provide a stipend and tuition waiver. New students are typically eligible only for teaching fellowships.

The sequential nature of most physics courses makes it difficult to begin graduate study in terms other than Fall. Furthermore, financial aid is usually available only to students who begin their studies in the Fall.

To ensure equal consideration for fall term admission, the deadline for applications for financial aid is January 15.

Degree Requirements

Entering students should consult closely with their assigned advisors. Students showing a lack of preparation are advised to take the necessary undergraduate courses in order to remedy their deficiencies.

Students should consult the **Division of Graduate Studies** section of this catalog for general university admission and degree requirements. Departmental requirements, outlined in a handbook for incoming students that is available in the department office and online, are summarized below.

Master of Science: Physics

Typically this degree is based solely on course work. Detailed requirements can be found in the Graduate Student Handbook on the department's website.

Candidates must either submit a written thesis **or** take a program of specialized courses.

Thesis Option

Code	Title	Credits
Select one of the following:		
PHYS 503	Thesis	9
PHYS 503 & PHYS 601	Thesis and Research: [Topic]	
Total Credits		9

Specified-Course Option

The specified-courses option requires 40 graded graduate credits in physics with a GPA of at least 3.00 in these courses; 36 of those 40 credits must be selected from a list of courses approved by the department.

The master's degree program is typically completed in four terms, unless sufficient transfer credits are available, in which case it can be obtained in three.

Master of Arts

Typically this degree is based solely on course work. Detailed requirements can be found in the Graduate Student Handbook on the department's website.

Candidates must either submit a written thesis **or** take a program of specialized courses.

Thesis Option

Code	Title	Credits
Select one of the following:		
PHYS 503	Thesis	9
PHYS 503 & PHYS 601	Thesis and Research: [Topic]	
Total Credits		9

Specified-Course Option

The specified-courses option requires 40 graded graduate credits in physics with a GPA of at least 3.00 in these courses; 36 of those

40 credits must be selected from a list of courses approved by the department.

The master's degree program is typically completed in four terms, unless sufficient transfer credits are available, in which case it can be obtained in three.

In addition to all the preceding requirements, candidates for the master of arts (MA) degree must demonstrate foreign-language proficiency.

Doctor of Philosophy

The doctor of philosophy degree (PhD) in physics is based primarily on demonstrated knowledge of physics and doctoral dissertation research. PhD students also must take and pass the core graduate sequences, listed below, achieving a B– or better grade in each course. Courses may be retaken once to achieve this minimum grade. The director of graduate studies can selectively waive these requirements in exceptional cases:

Code	Title	Credits
Core Sequences		
PHYS 611 & PHYS 612	Theoretical Mechanics and Theoretical Mechanics	6
PHYS 613 & PHYS 614	Statistical Physics and Statistical Physics	6
PHYS 622 & PHYS 623	Electromagnetic Theory and Electromagnetic Theory	8
PHYS 631 & PHYS 632 & PHYS 633	Quantum Mechanics and Quantum Mechanics and Quantum Mechanics	12
Breadth Requirements		
Six breadth courses ¹		

¹ Breadth courses can be chosen from several areas of physics and allied areas such as mathematics, chemistry, and biology.

Next, students must locate an advisor and an advisory committee, who then administer a comprehensive oral examination testing whether the student is ready to undertake dissertation research. The heart of the PhD requirements is research leading to a doctoral dissertation.

Detailed information is available in the *Graduate Student Handbook* on the department's website.

Astronomy Courses

ASTR 121. The Solar System. 4 Credits.

Naked-eye astronomy, development of astronomical concepts, and the solar system.

ASTR 122. Birth and Death of Stars. 4 Credits.

The structure and evolution of stars.

ASTR 123. Galaxies and the Expanding Universe. 4 Credits.

Galaxies and the universe.

ASTR 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

ASTR 321. Topics in Astrophysics. 4 Credits.

Problem solving of the orbits, kinematics, and dynamics of astronomical systems, structure and evolution of stars and galaxies.

Pre- or coreq: MATH 252; PHYS 252 or equivalents.

Physics Courses

PHYS 101. Essentials of Physics. 4 Credits.

Fundamental physical principles. Mechanics.

PHYS 152. Physics of Sound and Music. 4 Credits.

Introduction to the wave nature of sound; hearing; musical instruments and scales; auditorium acoustics; and the transmission, storage, and reproduction of sound.

PHYS 153. Physics of Light, Color, and Vision. 4 Credits.

Light and color, their nature, how they are produced, and how they are perceived and interpreted.

PHYS 155. Physics behind the Internet. 4 Credits.

How discoveries in 20th-century physics mesh to drive modern telecommunications. Topics include electron mobility in matter, the development of transistors and semiconductors, lasers, and optical fibers.

PHYS 156M. Scientific Revolutions. 4 Credits.

Surveys several major revolutions in our views of the natural and technological world, focusing on scientific concepts and methodological aspects. For nonscience majors. Multilisted with EARTH 156M.

PHYS 161. Physics of Energy and Environment. 4 Credits.

Practical study of energy generation and environmental impact, including energy fundamentals, fossil fuel use, global warming, nuclear energy, and energy conservation.

PHYS 162. Solar and Other Renewable Energies. 4 Credits.

Topics include photovoltaic cells, solar thermal power, passive solar heating, energy storage, geothermal energy, and wind energy.

PHYS 171. The Physics of Life. 4 Credits.

Explores how physical laws guide the structure, function, and behavior of living organisms, and examines the physical properties of biological materials. Topics span microscopic and macroscopic scales.

PHYS 181. Quantum Mechanics for Everyone. 4 Credits.

Introduction to quantum mechanics, a set of sometimes counterintuitive scientific principals describing atoms and light, along with the modern technologies it makes possible.

PHYS 196. Field Studies: [Topic]. 1-2 Credits.

Repeatable.

PHYS 198. Workshop: [Topic]. 1-2 Credits.

Repeatable.

PHYS 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

PHYS 201. General Physics. 4 Credits.

Introductory series. Mechanics and fluids.

Prereq: MATH 112 or equivalent.

PHYS 202. General Physics. 4 Credits.

Introductory series. Thermodynamics, waves, optics.

Prereq: PHYS 201.

PHYS 203. General Physics. 4 Credits.

Introductory series. Electricity, magnetism, modern physics.

Prereq: PHYS 201.

PHYS 204. Introductory Physics Laboratory. 2 Credits.

Practical exploration of the principles studied in general-physics lecture. Measurement and analysis methods applied to experiments in mechanics, waves, sound, thermodynamics, electricity and magnetism, optics, and modern physics. Sequence.

Pre- or coreq: PHYS 201.

PHYS 205. Introductory Physics Laboratory. 2 Credits.

Practical exploration of the principles studied in general-physics lecture. Measurement and analysis methods applied to experiments in mechanics, waves, sound, thermodynamics, electricity and magnetism, optics, and modern physics.
Pre- or coreq: PHYS 202.

PHYS 206. Introductory Physics Laboratory. 2 Credits.

Practical exploration of the principles studied in general-physics lecture. Measurement and analysis methods applied to experiments in mechanics, waves, sound, thermodynamics, electricity and magnetism, optics, and modern physics.
Pre- or coreq: PHYS 203.

PHYS 251. Foundations of Physics I. 4 Credits.

Newtonian mechanics; units and vectors; one-dimensional motion; Newton's laws; work and energy; momentum and collisions. Sequence.
Coreq: MATH 251; Prereq MATH 112 or equivalent.

PHYS 252. Foundations of Physics I. 4 Credits.

Vibrations and waves; oscillations; wave mechanics; dispersion; modes; introductory optics.
Prereq: PHYS 251; coreq: MATH 252 or equivalent.

PHYS 253. Foundations of Physics I. 4 Credits.

Electricity and magnetism; charge and electric field; electric potential; circuits; magnetic field; inductance.
Prereq: PHYS 252; coreq: MATH 253 or equivalent.

PHYS 290. Foundations of Physics Laboratory. 1 Credit.

Repeatable. Introduction to laboratory measurements, reports, instrumentation, and experimental techniques. Repeatable twice for maximum of 3 credits.
Coreq: PHYS 251, PHYS 252 or PHYS 253.

PHYS 299. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

PHYS 351. Foundations of Physics II. 4 Credits.

Introduction to relativity and quantum physics with applications to atomic, solid-state, nuclear, and astro-particle systems
Prereq: MATH 253, PHYS 253; coreq: MATH 256 or MATH 281.

PHYS 352. Foundations of Physics II. 4 Credits.

Thermodynamic systems; first and second laws; kinetic theory of gases; entropy. Sequence.
Prereq: PHYS 351; coreq: MATH 281.

PHYS 353. Foundations of Physics II. 4 Credits.

Thermal radiation; Maxwell-Boltzmann statistics; Fermi and Bose gases; phase transitions. Sequence.
Prereq: PHYS 352; coreq: MATH 282.

PHYS 369M. Science of Climbing. 2 Credits.

Introduction to the physics and scientific principles behind climbing, climbing equipment, anchors, ropes, climbing gear, static versus dynamic load, fall factor, and breaking strength. A prerequisite is students must have completed at least one Outdoor Program climbing course.
Multilisted with PEO 369M.
Prereq: PEO 251.

PHYS 391. Physics Experimentation Data Analysis Laboratory. 4 Credits.

Practical aspects of physics experimentation, including data acquisition, statistical analysis, and introduction to scientific programming, and use of Fourier methods for data analysis.

PHYS 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

PHYS 400M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

PHYS 401. Research: [Topic]. 1-16 Credits.

Repeatable.

PHYS 402. Supervised Tutoring. 1-12 Credits.

Repeatable.

PHYS 403. Thesis. 1-12 Credits.

Repeatable.

PHYS 405. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

PHYS 406. Field Studies: [Topic]. 1-21 Credits.

Repeatable.

PHYS 407. Seminar: [Topic]. 1-4 Credits.

Repeatable.

PHYS 408. Workshop: [Topic]. 1-21 Credits.

Repeatable.

PHYS 409. Terminal Project. 1-12 Credits.

Repeatable.

PHYS 410. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

PHYS 411. Mechanics, Electricity, and Magnetism. 4 Credits.

Fundamental principles of Newtonian mechanics, conservation laws, small oscillations, planetary motion, systems of particles. Electromagnetic phenomena. Only nonmajors may earn graduate credit.
Prereq: MATH 282.

PHYS 412. Mechanics, Electricity, and Magnetism. 4 Credits.

Fundamental principles of Newtonian mechanics, conservation laws, small oscillations, planetary motion, systems of particles. Electromagnetic phenomena.
Prereq: MATH 281.

PHYS 413. Mechanics, Electricity, and Magnetism. 4 Credits.

Fundamental principles of Newtonian mechanics, conservation laws, small oscillations, planetary motion, systems of particles. Electromagnetic phenomena.
Prereq: PHYS 412.

PHYS 414. Quantum Physics. 4 Credits.

Planck's and de Broglie's postulates, the uncertainty principle, Bohr's model of the atom, the Schrodinger equation in one dimension, the harmonic oscillator, the hydrogen atom, molecules and solids, nuclei and elementary particles. Sequence.
Prereq: PHYS 413.

PHYS 415. Quantum Physics. 4 Credits.

Planck's and de Broglie's postulates, the uncertainty principle, Bohr's model of the atom, the Schrodinger equation in one dimension, the harmonic oscillator, the hydrogen atom, molecules and solids, nuclei and elementary particles. Sequence.
Prereq: PHYS 414.

PHYS 417. Topics in Quantum Physics. 4 Credits.

Perturbation theory, variational principle, time-dependent perturbation theory, elementary scattering theory.
Prereq: PHYS 415.

PHYS 421M. Partial Differential Equations: Fourier Analysis I. 4 Credits.

Introduction to PDEs with a view towards applications in physics. Wave and heat equations, classical Fourier series on the circle, Bessel and Legendre series. Multilisted with MATH 421M.

Prereq: MATH 253; one from MATH 256, MATH 281.

PHYS 422. Electromagnetism. 4 Credits.

Study of electromagnetic waves. Topics include Maxwell's equations, wave equation, plane waves, guided waves, antennas, and other related phenomena.

Prereq: PHYS 413.

PHYS 423M. Introduction to Space Physics. 4 Credits.

Course explores the interaction of the solar wind with the Earth's magnetosphere using fundamental plasma physics supported and motivated by spacecraft observations. Students will gain an understanding of the physics governing the interaction building from single particle plasma motion to specific observation supported examples.

Prereq: PHYS 253, MATH 282.

PHYS 424. Classical Optics. 4 Credits.

Geometrical optics, polarization, interference, Fraunhofer and Fresnel diffraction.

Prereq: PHYS 353.

PHYS 425. Modern Optics. 4 Credits.

Special topics in modern applied optics such as Fourier optics, coherence theory, resonators and lasers, holography, and image processing.

Prereq: PHYS 424.

PHYS 431. Analog Electronics. 4 Credits.

Passive and active discrete components and circuits. General circuit concepts and theorems. Equivalent circuits and black box models. Integrated circuit operational amplifiers.

Prereq: PHYS 203 or equivalent; knowledge of complex numbers; MATH 256.

PHYS 432. Digital Electronics. 4 Credits.

Digital electronics including digital logic, measurement, signal processing and control. Introduction to computer interfacing.

Prereq: PHYS 203 or equivalent; MATH 253.

PHYS 481. Design of Experiments. 4 Credits.

Applies statistics to practical data analysis, data-based decision making, model building, and the design of experiments. Emphasizes factorial designs.

PHYS 491. Research Project I. 2-4 Credits.

For physics and other science majors, Physics Projects entails construction and use of apparatus, interfaces and computers to perform technically-sophisticated experiments, analyze and communicate results.

Prereq: PHYS 391 or PHYS 399.

PHYS 492. Research Project II. 2-4 Credits.

For physics and other science majors, Physics Projects entails construction and use of apparatus, interfaces and computers to perform technically-sophisticated experiments, analyze and communicate results.

Prereq: PHYS 491.

PHYS 493. Research Project III. 2-4 Credits.

For physics and other science majors, Physics Projects entails construction and use of apparatus, interfaces and computers to perform technically-sophisticated experiments, analyze and communicate results.

Prereq: PHYS 492.

PHYS 500M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

PHYS 503. Thesis. 1-16 Credits.

Repeatable.

PHYS 507. Seminar: [Topic]. 1-4 Credits.

Repeatable.

PHYS 508. Workshop: [Topic]. 1-21 Credits.

Repeatable.

PHYS 510. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

PHYS 521M. Partial Differential Equations: Fourier Analysis I. 4 Credits.

Introduction to PDEs with a view towards applications in physics. Wave and heat equations, classical Fourier series on the circle, Bessel and Legendre series. Multilisted with MATH 521M.

PHYS 523M. Introduction to Space Physics. 4 Credits.

Course explores the interaction of the solar wind with the Earth's magnetosphere using fundamental plasma physics supported and motivated by spacecraft observations. Students will gain an understanding of the physics governing the interaction building from single particle plasma motion to specific observation supported examples.

PHYS 581. Design of Experiments. 4 Credits.

Applies statistics to practical data analysis, data-based decision making, model building, and the design of experiments. Emphasizes factorial designs.

PHYS 601. Research: [Topic]. 1-16 Credits.

Repeatable.

PHYS 602. Supervised Tutoring. 1-12 Credits.**PHYS 603. Dissertation. 1-16 Credits.**

Repeatable.

PHYS 604. Internship: [Topic]. 1-16 Credits.

Repeatable.

Coreq: good standing in applied physics master's degree program.

PHYS 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

PHYS 606. Field Studies: [Topic]. 1-16 Credits.

Repeatable.

PHYS 607. Seminar: [Topic]. 1-4 Credits.

Repeatable. Recent topics include Astrophysics and Gravitation, Biophysics, Condensed Matter, High Energy Physics, Physics Colloquium, Theoretical Physics.

PHYS 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

PHYS 609. Terminal Project. 1-16 Credits.

Repeatable.

PHYS 610. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

PHYS 610L. Experimental Course: [Topic]. 4 Credits.

Repeatable.

PHYS 611. Theoretical Mechanics. 4 Credits.

Lagrangian and Hamiltonian mechanics, small oscillations, rigid bodies. Sequence.

PHYS 612. Theoretical Mechanics. 2 Credits.

Lagrangian and Hamiltonian mechanics, small oscillations, rigid bodies. Sequence.

Prereq: PHYS 611.

PHYS 613. Statistical Physics. 2 Credits.

Thermodynamics, statistical mechanics, kinetic theory, application to gases, liquids, solids, atoms, molecules, and the structure of matter. Sequence.

PHYS 614. Statistical Physics. 4 Credits.

Thermodynamics, statistical mechanics, kinetic theory, application to gases, liquids, solids, atoms, molecules, and the structure of matter. Sequence.

Prereq: PHYS 613.

PHYS 622. Electromagnetic Theory. 4 Credits.

Microscopic form of Maxwell's equations, derivation and solution of the wave equation, Lorentz covariant formulation, motion of charges in given fields, propagation and diffraction, radiation by given sources, coupled motion of sources and fields, the electromagnetic field in dense media.

PHYS 623. Electromagnetic Theory. 4 Credits.

Microscopic form of Maxwell's equations, derivation and solution of the wave equation, Lorentz covariant formulation, motion of charges in given fields, propagation and diffraction, radiation by given sources, coupled motion of sources and fields, the electromagnetic field in dense media. Sequence.

Prereq: PHYS 622.

PHYS 626. Physical Optics with Labs. 4 Credits.

Fundamentals of applied geometric and wave optics theory, reinforced through homework assignments, and explored in experiments conducted with lasers and optical components. Sequence with PHYS 627, PHYS 628.

PHYS 627. Optical Materials and Devices. 4 Credits.

Principles of quantum mechanics and solid-state physics relating to material properties of optoelectronic devices with corresponding laboratories teaching how to operate and characterize these devices. Sequence with PHYS 626, PHYS 628.

Prereq: PHYS 626 with B- or better grade.

PHYS 628. Laser and Nonlinear Optics with OpticStudio. 4 Credits.

Introduction to the nature of laser and nonlinear optics and the practical systems that utilize these phenomena with computational simulations using Zemax OpticStudio software. Sequence with PHYS 626, PHYS 627.

Prereq: PHYS 627 with B- or better grade.

PHYS 631. Quantum Mechanics. 4 Credits.

Review of fundamentals, central force problems, matrix mechanics. Sequence.

PHYS 632. Quantum Mechanics. 4 Credits.

Approximation methods, scattering. Sequence.

Prereq: PHYS 631.

PHYS 633. Quantum Mechanics. 4 Credits.

Rotation symmetry, spin, identical particles. Sequence.

Prereq: PHYS 632.

PHYS 661. Particle Physics I. 4 Credits.

Theory, phenomenology, and experimental basis of the standard model of particle physics: fundamentals; symmetries; quantum electrodynamics; R; quarks and leptons; chirality; flavor symmetry; mesons; baryons; form factors; deep inelastic scattering. Sequence.

PHYS 662. Particle Physics II. 4 Credits.

Theory, phenomenology, and experimental basis of the standard model of particle physics: quantum chromodynamics; parton distribution functions; hadron-hadron collisions; particle interactions in matter; collider detectors; experimental methodologies to analyze data; statistical thresholds and significance. Sequence with PHYS 661, PHYS 663.

Prereq: PHYS 661.

PHYS 663. Particle Physics III. 4 Credits.

Theory, phenomenology, and experimental basis of the standard model of particle physics: electroweak symmetry breaking; CKM mixing; Higgs couplings; early universe cosmology; Friedmann expansion; entropy; freeze-out; impact of neutrinos on cosmology; dark matter evidence and candidates. Sequence with PHYS 661, PHYS 662.

Prereq: PHYS 662.

PHYS 664. Quantum Field Theory. 4 Credits.

Canonical quantization, path integral formulation of quantum field theory, Feynman rules for perturbation theory, quantum electrodynamics, renormalization, gauge theory of the strong and electroweak interactions. Sequence with PHYS 665, PHYS 666.

PHYS 665. Quantum Field Theory II. 4 Credits.

The purpose of this course is to apply the methodology established in QFT I to theories of charged fermions coupled to a photon. Then we will begin to explore QFT beyond leading order. Sequence with PHYSS 664, PHYS 666.

Prereq: PHYS 664.

PHYS 666. Quantum Field Theory III. 4 Credits.

The purpose of this course is to understand QFT at loop level, and to extend the formalism to non-Abelian gauge bosons. In addition, we will cover a variety of special topics. This course is designed to be the last quarter of a full year sequence. Sequence with PHYS 664, PHYS 665.

Prereq: PHYS 665.

PHYS 671. Solid State Physics. 4 Credits.

Crystallography; thermal, electrical, optical, and magnetic properties of solids; band theory; metals, semiconductors, and insulators; defects in solids. Sequence.

Prereq: PHYS 633.

PHYS 672. Solid State Physics. 4 Credits.

Crystallography; thermal, electrical, optical, and magnetic properties of solids; band theory; metals, semiconductors, and insulators; defects in solids. Sequence.

Prereq: PHYS 671.

PHYS 674. Theory of Condensed Matter. 4 Credits.

Advanced topics include quantum and statistical description of many-particle systems, electronic structure, elementary excitations in solids and fluids, critical phenomena, statics and dynamics of soft condensed matter. Topics and emphasis vary.

Prereq: PHYS 673.

PHYS 675. Theory of Condensed Matter. 4 Credits.

Advanced topics include quantum and statistical description of many-particle systems, electronic structure, elementary excitations in solids and fluids, critical phenomena, statics and dynamics of soft condensed matter. Topics and emphasis vary.

Prereq: PHYS 674.

PHYS 677M. Semiconductor Device Physics. 4 Credits.

Introduction to the theory behind semiconductors. Elementary theory of inorganic solids; electronic structures and transport properties. Basic theory of devices including diodes, transistors, mosfets, and optoelectronic devices. Offered only in summer. Sequence with PHYS 678M, PHYS 679M. Multilisted with CH 677M.

PHYS 678M. Semiconductor Processing and Characterization Technology. 4 Credits.

Introduction to the techniques required to make semiconductors and test their properties. Solid-state and surface chemistry of inorganic semiconductors as it pertains to microelectronic devices. Offered only in summer. Multilisted with CH 678M. Sequence with PHYS 677M, PHYS 679M.

Prereq: PHYS 677M.

PHYS 679M. Device Processing and Characterization Laboratory. 4 Credits.

Students use theory and techniques learned to design, fabricate, and test a device that performs a specific function, with an emphasis on wafer processing and device realization. Offered only in summer. Sequence with PHYS 677M, PHYS 678M. Multilisted with CH 679M.

Prereq: CH 678M.

PHYS 684. Quantum Optics and Laser Physics. 4 Credits.

Nonlinear optical processes and quantum statistical properties of light produced by such processes, laser theory, wave mixing processes, optical Bloch equations, field quantization, photon statistics, cooperative emissions. Sequence.

Prereq: PHYS 354 or equivalent.

PHYS 685. Quantum Optics and Laser Physics. 4 Credits.

Nonlinear optical processes and quantum statistical properties of light produced by such processes, laser theory, wave mixing processes, optical Bloch equations, field quantization, photon statistics, cooperative emissions. Sequence.

Prereq: PHYS 684; coreq PHYS 631.

PHYS 686. Quantum Optics and Laser Physics. 4 Credits.

Nonlinear optical processes and quantum statistical properties of light produced by such processes, laser theory, wave mixing processes, optical Bloch equations, field quantization, photon statistics, cooperative emissions. Sequence.

Prereq: PHYS 685; coreq: PHYS 632.

Political Science

Tuong Vu, Department Head

541-346-4864

541-346-4860 fax

936 Prince Lucien Campbell Hall

1284 University of Oregon

Eugene, Oregon 97403-1284

polisci@uoregon.edu

The Department of Political Science offers a broad range of courses. For undergraduates, three 100-level courses cover foundational knowledge and skills, and six 200-level courses serve as “gateways” to career paths that organize the upper-division curriculum: public policy and political action; politics, law, and justice; politics of business; global engagement; sustainability, development, and social action; and ethics, identity, and society. For graduate study, the department offers training in six traditional subfields of political science, each with their own designated faculty members: comparative politics, formal theory and methodology, international relations, public policy, political theory, and United States

politics. Faculty members employ varied theoretical and methodological approaches but share the pursuit of answers to questions with real-world implications.

Careers

An undergraduate degree in political science provides a strong foundation for any number of career choices. The program has been designed to develop in students a concrete set of skills—critical thinking, analytical abilities, writing proficiency, and precise communication.

Majors are encouraged to select course work that aligns with their career goals, and may choose to complete as many as two career paths. Students begin a career path by completing a 200-level gateway introductory course, then develop and refine skills in upper-division courses. Majors may be awarded at most two career path certificates of completion upon graduation, adding documented expertise to their degree.

The department offers credit for internships related to political science and a workshop to explore and prepare students for the job market. For more information, visit polisci.uoregon.edu/internship-careers.

Political science graduates may also continue on to graduate education, especially in the fields of law, international studies, business administration, or advanced studies in political science.

Faculty

Yvette Alex-Assensoh, professor (immigration, racial politics): vice president for equity and inclusion. BA, 1988, Columbia; MA, 1991, PhD, 1993, Ohio State; JD, 2006, Indiana, Bloomington. (2012)

Erin Beck, associate professor (Latin American politics; micropolitics; women, gender, and development). BA, 2004, Providence College; MA, 2007, PhD, 2012, Brown. (2012)

Neil O'Brian, assistant professor (political parties, Congress, public opinion, polarization). BA, 2011, Case Western Reserve University; PhD, 2020, University of California, Berkeley. (2019)

Anita Chari, associate professor (political theory). BA, 2001, Georgetown; MA, 2003, PhD, 2008, Chicago. (2010)

James Conran, assistant professor (comparative politics, European politics, political economy). BA, 2006, University College, Dublin; MSc, 2008, London School of Economics and Political Science; PhD, 2017, Massachusetts Institute of Technology. (2017)

Jane K. Cramer, associate professor (international relations, international security, US foreign policy). BA, 1986, Oberlin; PhD, 2002, Massachusetts Institute of Technology. (2000)

Dennis C. Galvan, professor (Africa, development, comparative politics); vice provost for international affairs. See **International Studies**.

Alison Gash, associate professor (public law). BA, 1995, Vassar College; MPA-URP, 2000, Princeton; MA, 2004, PhD, 2010, California, Berkeley. (2010)

Burke Hendrix, associate professor (normative political theory, indigenous politics, global justice). BA, 1992, Linfield College; MA, 2000, PhD, 2002, Colorado, Boulder. (2012)

Craig Kauffman, associate professor (environmental politics, global governance, democratization). BA, 1992, College of Wooster; MS, 1996, George Mason; PhD, 2012, George Washington. (2012)

Joseph E. Lowndes, professor (US politics). BA, 1990, Antioch College; MA, 1996, New School for Social Research; PhD, 2004, New School University. (2003)

Ronald B. Mitchell, professor (environmental politics, international relations). BA, 1981, Stanford; MPP, 1985, PhD, 1992, Harvard. (1993)

Mikhail Myagkov, professor (comparative politics, formal political theory). BS, 1990, Moscow Institute of Physics and Technology; MS, 1994, PhD, 1996, California Institute of Technology. (1996)

Craig Parsons, professor (comparative politics, European politics). BA, 1992, Stanford; CEP, 1993 Institut d'Etudes Politiques; MA, 1994, PhD, 1999, California, Berkeley. (2004)

Lars Skalnes, associate professor (international political economy, international relations). CandMag, 1984, Bergen; MA, 1989, PhD, 1993, California, Los Angeles. (1992)

Yeling Tan, assistant professor (international and comparative political economy, global economic governance, politics of China). BA, 2002, Stanford; MPA, 2011, PhD, 2017, Harvard. (2017)

Daniel Tichenor, professor (American presidency, interest groups and social movements, US political institutions); Philip H. Knight Chair. BA, 1988, Earlham College; PhD, 1996, Brandeis. (2008)

Tuong Vu, professor (comparative politics, political economy, nationalism, revolution, East and Southeast Asia). BA, 1994, Minnesota, Twin Cities; MPA, 1997, Princeton; PhD, 2004, California, Berkeley. (2007)

Priscilla Yamin, associate professor (US politics and history, gender studies, feminist theory). BA, 1990, Wisconsin, Madison; MA, 1996, PhD, 2005, New School for Social Research. (2007)

Emeriti

William H. Baugh, associate professor emeritus. SB, 1963, Massachusetts Institute of Technology; MS, 1965, Rochester; MA, 1971, PhD, 1973, Indiana. (1978)

Deborah Baumgold, professor emerita. BA, 1971, Oberlin; MA, 1975, PhD, 1980, Princeton. (1987)

Gerald Berk, professor emeritus (American politics, political development, political economy). BA, 1977, Clark; PhD, 1987, Massachusetts Institute of Technology. (1994)

Daniel Goldrich, professor emeritus. BA, 1955, Antioch; MA, 1957, PhD, 1959, North Carolina, Chapel Hill. (1963)

Arthur M. Hanhardt Jr., professor emeritus. BA, 1953, Rochester; M.A., 1958, Colgate; Ph.D., 1963, Northwestern. (1963)

Richard Kraus, professor emeritus. BA, 1966, Grinnell; certificate (East Asian Institute), 1969, MA, 1969, PhD, 1974, Columbia. (1983)

Jerry F. Medler, associate professor emeritus. BA, 1963, Northwestern; MA, 1965, PhD, 1966, Oregon. (1968)

Priscilla Southwell, professor emerita. BA, 1974, MA, 1977, Colorado; PhD, 1983, North Carolina, Chapel Hill. (1981)

Richard P. Suttmeier, professor emeritus. AB, 1963, Dartmouth College; PhD, 1969, Indiana. (1990)

M. George Zaninovich, professor emeritus. BA, 1953, MA, 1959, PhD, 1964, Stanford. (1966)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

- Bachelor of Arts
- Bachelor of Science
- Minor

Undergraduate Studies

The Department of Political Science offers a program leading to a bachelor of science (BS) or a bachelor of arts (BA) degree. This program is designed to

1. provide students with substantive expertise in political institutions, key policy issues, salient ideologies, law and regulation, and political identities in local, national, and global contexts
2. prepare students for graduate work or professional careers in law, business, government, teaching, journalism, social activism, or the academic community

Bachelor's Degree

Courses at the 100 and 200 levels are introductory, setting foundations for the major. Courses at the 300 and 400 level build students' expertise in selected career paths, with 300-level courses typically in lecture format and 400-level courses typically in seminar format. A minimum of 32 credits must be upper division.

At the discretion of the instructor, certain 300- and 400-level courses may have prerequisites. Students are advised to complete foundational lower-division requirements prior to taking upper-division courses, especially at the 400 level.

Undergraduate majors who complete a 200-level introductory course and four upper-division courses in a career path earn a certificate of completion, adding documented expertise to their degree. Additional information may be found online (<https://polisci.uoregon.edu/career-path/>).

Freshmen and Transfer Students

There are no departmental requirements for entering freshmen. Students planning to transfer to the university from two-year colleges should take the basic introductory political science courses offered at those institutions. At least 20 credits in upper-division graded political science courses must be completed in residence at the University of Oregon to qualify for a BA or BS degree in political science. Transfer students should ensure that all transcripts are submitted to the Office of the Registrar prior to their first term of enrollment. During the first term, the department office will review transferred credits approved by the registrar to confirm courses that fulfill degree requirements. In all cases, students are required to fulfill the equivalent of 48 credits for the major.

Second Bachelor's Degree or Second Major

Students who want to earn a second bachelor's degree or a second or double major in political science must complete 48 credits in political science, as outlined under Bachelor of Arts Degree Requirements (p.) or Bachelor of Science Degree Requirements (p.).

Students who are considering a second bachelor's degree and have prior political science credits should consult with the undergraduate advisor, John Davidson. Some of these prior credits may not be applicable to the second bachelor's degree.

Honors in Political Science

Political science majors who have reached junior standing and meet GPA minimums are eligible to enter the honors program. The honors program spans the spring term of a student's junior year to the spring term of senior year. GPA minimums must be maintained to participate—an overall grade point average for UO and transfer credits of at least 3.50, plus a 3.70 GPA or above in the political science major. Students must successfully complete Honors Thesis Prospectus (PS 411) during fall term of the academic year in which the thesis is completed, then complete 4 credits in Thesis (PS 403) in the following winter term. Honors students select a thesis advisor and reader; the advisor supervises and grades the thesis course. The thesis advisor and reader determines if the thesis is approved for honors distinction after eligibility is determined prior to graduation.

Minor Requirements

Code	Title	Credits
	Political science courses	8
	Upper-division political science courses ¹	16
Total Credits		24

¹ Only 6 credits may be in Research: [Topic] (PS 401), Reading and Conference: [Topic] (PS 405), and Workshop: [Topic] (PS 408).

All credits must be taken for letter grades and passed with grades of C– or better. As many as 8 credits may be transferred from another institution.

PS 400M, Thesis (PS 403), Internship: [Topic] (PS 404), Terminal Project (PS 409), Honors Thesis Prospectus (PS 411), and Overseas Study: Internships (OINT 488) do not count toward the minor. The minor in political science does not have a subfield requirement.

Kindergarten through Secondary Teaching Careers

Students who complete a degree with a major in political science are eligible to apply to the College of Education's fifth-year licensure program in middle-secondary teaching or the fifth-year licensure program in elementary teaching. More information is available in the **College of Education** section of this catalog.

Four-Year Degree Plan

Bachelor of Arts in Political Science

Course	Title	Credits	Milestones
First Year			
Fall			
WR 121	College Composition I	4

- Doctor of Philosophy (p. 470)

Graduate Studies

The Department of Political Science offers a graduate program of studies leading to the master of arts (MA), master of science (MS), and doctor of philosophy (PhD) degrees. The program is designed to prepare students for teaching, research, and government or other public service, and to enable them to understand and participate in public affairs.

Members of the faculty offer advanced courses and seminars across the major fields of political science. Graduate student participation in joint faculty-student research and interdepartmental research projects is common on a wide range of topics.

Admission

Admission preference is given to doctoral applicants. Applicants are not required to hold a master's degree to apply to the doctoral program. Applicants whose main goal is to get a PhD in political science should apply directly to the doctoral program.

Applications for the master's and doctoral programs are submitted online and consist of the following documents:

1. Official transcripts; successful applicants usually have a grade point average (GPA) of 3.00 or higher for all undergraduate and graduate academic work
2. Official scores on the Graduate Record Examinations (GRE) taken within the last five years; successful applicants usually have a combined verbal and quantitative score of 300 or better
3. International students from non-English-speaking countries must provide proof of English language proficiency by submitting results from one of the following:
 - a. Official English as a Foreign Language (TOEFL) test results taken within the last two years. A minimum score of 575 (paper-based) or 88 (internet-based) is required

- a. Official International English Language Testing System (IELTS) test results taken within the last two years with a minimum score of 7.0
 - b. Official International English Language Testing System (IELTS) test results taken within the last two years with a minimum score of 7.0
 - c. A transcript showing the applicant has received a bachelor's degree or higher from an accredited US institution or from an institution in the following countries: Australia, Canada (excluding Quebec), Ireland, New Zealand, or the United Kingdom
4. A statement of purpose prepared by the student
 5. Recommendations from at least three teachers from whom courses have been taken, or from practitioners in your expected field of study
 6. Other evidence that may be helpful in reaching a decision. Although an undergraduate major in political science is not a prerequisite for admission, the committee takes into consideration previous academic work in political science

Information about the graduate program, graduate employee appointments, and application process may be obtained by visiting the department's website. The deadline for fall term admission and graduate employee appointment applications is January 10.

Courses

PS 102. Thinking Like a Social Scientist. 4 Credits.

Illustrates how the ways social scientists think—using quantitative, qualitative, and interpretive methods—help to sharpen thinking for many contexts and careers.

PS 106. Power, Politics, and Inequality. 4 Credits.

Examines power and politics through the lens of inequality, focusing on the constant struggle between the haves and the have-nots.

PS 111. Introduction to Political Science. 4 Credits.

Offers students the tools to think for themselves about politics: multiple ideological and analytical viewpoints on varying political arrangements around the world.

PS 199. Special Studies: [Topic]. 1-5 Credits.

Topics vary from year to year. Repeatable once when topic changes.

PS 201. United States Politics. 4 Credits.

Theoretical introduction to American institutions, political doctrines, and ideology as these affect the course of politics and public policy in the United States.

PS 205. Introduction to International Relations. 4 Credits.

Introduction to theoretical and methodological tools for the analysis of world politics.

PS 206. Ethics, Identity, and Power. 4 Credits.

This course is a gateway for those considering the "Ethics, Identity, and Society" track in the Political Science major. The course examines political power and ethical ideas about its use, with a focus on race, gender, religion, class, and other forms of social differentiation.

PS 210. Politics of Business. 4 Credits.

Introduces the political science subfield of political economy, which studies the relationship between concepts like the market and the state, capitalism and democracy, politics and the economy. The American political economy is examined from both a historical and an international perspective.

PS 275. Legal Process: An Introduction to the American Judiciary. 4 Credits.

Overview of the United States legal system. Covers a range of sociolegal writing and provides a context for the legal system under which the U.S. operates.

PS 297. Introduction to Environmental Politics. 4 Credits.

United States environmental policy and alternative environmental political futures.

PS 302. States' Rights (and Wrongs). 4 Credits.

Explores the division between U.S. federal, state and municipal power through the lens of our nation's most contentious and most critical political and policy debates. Examines how elected officials, judges and activists influence fights over federalism.

PS 304. Democracy, Dictators, and Development. 4 Credits.

Examines key questions in political science like why some countries are rich while others are poor, why some countries are democratic and others are authoritarian, how these different political systems work, and which are best equipped to address ethno-nationalist conflict and economic development.

PS 308. United States Political Thought. 4 Credits.

Development of United States political thought from the Revolution through the 20th century. Includes writings of Jefferson, Paine, Madison, Tocqueville.

PS 309. Political Ideologies. 4 Credits.

Ideology is a more-or-less coherent lens through which a person views the world in order to process information and direct action. The course examines how the world looks different for those holding liberal, conservative, communist, fascist, or anarchist world views.

PS 310. Roots of Democracy. 4 Credits.

Examines modern conceptions of democracy, citizenship, legality, virtue, equality, and political order, which grew out of ideas initially developed in ancient Greek city-states. Special attention given to ideas of active citizenship.

PS 311. Sovereignty and Revolution. 4 Credits.

Examines contemporary conceptions of politics springing from European debates about the power of kings, law, and the people. Considers key textual moments in the process by which modern conceptions of democracy emerged.

PS 312. Shadows of Modernity. 4 Credits.

Explores the distinct critiques of modernity offered by John Stuart Mill, Karl Marx, Friedrich Nietzsche, Michel Foucault, and Sigmund Freud. Concepts explored include liberalism, capitalism, power, morality, and the unconscious.

PS 316. Black Lives Matter and American Democracy. 4 Credits.

Explores the ideological origins and contemporary politics of the Black Lives Matter movement. Modules include the demands of/on democracy, race and the criminal justice system, and the politics of protest.

PS 319. The Politics of the Body. 4 Credits.

This course examines the politics of the body in the US. It will focus on scientific and biological definitions of identity and how that affects policies.

PS 320. International Organization. 4 Credits.

Studies efforts by states to cooperate in an effort to avoid or resolve conflict in the realms of security, trade, human rights, and the environment.

PS 324. European Politics. 4 Credits.

Overview of the formation and current dynamics of national politics in Western Europe.

PS 326. United States Foreign Policy I. 4 Credits.

Basic concepts underlying the formulation and implementation of United States foreign policy; relationships between American society and foreign policy; the relationship of the U.S. to its international environment.

PS 330. Governments and Politics in Latin America. 4 Credits.

Social, political, and economic developments in Latin America; causes and consequences of revolutions, democratization, economic politics; examples from Mexico, Brazil, Chile, Argentina, Guatemala, Venezuela. Offered alternate years.

PS 337. The Politics of Development. 4 Credits.

Presents alternative perspectives on key north-south issues: trade, aid, foreign investment, debt, and the environment. Includes such institutions as the International Monetary Fund, World Bank, and World Trade Organization.

PS 340. International Political Economy. 4 Credits.

Links between economics and politics in the international system. Basic concepts include power, dependence, inequality, imperialism, and development. EC 201, EC 202, or PS 205 recommended preparation.

PS 342. Politics of China. 4 Credits.

Survey of the politics of the People's Republic of China. Emphasis on political sociology and group conflict: elites, ideology, social change, and organization.

PS 345. Southeast Asian Politics. 4 Credits.

Surveys major themes in contemporary Southeast Asian politics, including nation-state building, economic development, authoritarianism and democracy, and religious and ethnic politics.

PS 346. Terrorism and Weapons Proliferation. 4 Credits.

Examines causes and control of terrorism, especially preventing terrorist use of weapons of mass destruction; theories and policies of nonproliferation and arms control.

PS 347. Political Power, Influence, and Control. 4 Credits.

Survey of the use of the concept of power in the social sciences, stressing diverse theoretical perspectives and empirical studies of political institutions.

PS 348. Women and Politics. 4 Credits.

Examines the political role of women and questions of equality in the U.S. from historical and contemporary perspectives. Topics may include voting, welfare, reproductive rights, and representation.

PS 349. Mass Media and American Politics. 4 Credits.

The role of the mass media in contemporary American politics; the effect of the media on such institutions as political parties, elections, and the presidency.

PS 350. Politics and Film. 4 Credits.

Examines the political relevance of films and their role as a medium for illustrating, defending, and challenging political ideas.

PS 351. Democratic Dilemmas. 4 Credits.

Core course for the Wayne Morse Scholars Program, exploring significant political and policy challenges confronting our representative democracy.

PS 352. Political Parties and Elections. 4 Credits.

Overview of current developments in political parties and interest groups in the United States.

PS 355. Oregon Government and Politics. 4 Credits.

Current political issues in Oregon with particular attention to political races and ballot measures before the Oregon electorate as well as the state's major political institutions.

PS 367. Science and Politics of Climate Change. 4 Credits.

Understanding the causes, impacts, policies, and politics of global climate change from natural and social science perspectives.

PS 368. Gender in the Law. 4 Credits.

Examines the role courts have played in framing and shaping policies where gender is a central feature with a focus on reproductive rights, pregnancy and abortion, domestic violence, rape, family issues, prostitution, and sexual harassment. Offered alternate years.

PS 371. United States Congress. 4 Credits.

Study of Congress as an institution: congressional elections, the committee system, and the internal distribution of influence; relations with the president and the Supreme Court.

PS 372. Music and Politics. 4 Credits.

In this class we will be asking questions about what is political about music of various musical styles and from diverse historical periods, exploring issues of cultural appropriation, issues of race, gender, and sexuality in music, and the politics of technology and music.

PS 375. Race, Politics, and the Law. 4 Credits.

Examines the development and transformation of race-based domination and resistance in the United States by examining the intersection of policy and law.

PS 378. Games in Politics. 4 Credits.

Politics viewed as strategic interactions among politicians, voters, and countries; focuses on how to model these interactions using tools of game theory.

PS 380. Gender and Politics in Developing Countries. 4 Credits.

Examines gender politics in the developing world and efforts to help women. Topics include female genital cutting, violence against women, economic development, microfinance, migration, trafficking. Offered alternate years.

PS 384. Nuclear Politics of the Middle East. 4 Credits.

History and current nuclear capabilities of all major Middle East states are evaluated. Nuclear strategy, arms control and important technological developments are examined. Theoretical models of proliferation, and debates of a nuclear "taboo" discussed. U.S. foreign policy options toward the Middle East critiqued.

PS 386. United States Social Movements and Political Change. 4 Credits.

Causes and consequences of American social movements. Considers theoretical perspectives. Topics may include agrarian populism, labor movement, civil rights movement, the women's movement, and identity politics.

PS 387. Russian Politics. 4 Credits.

The course traces Russian politics from a communist regime to its current state, investigates contemporary aspects of Russian politics, and examines Russia's vision of the world and its foreign policy.

PS 390. American Indian Politics. 4 Credits.

Examination of the political and constitutional status of American Indian tribes in the United States, with some comparison to Canada. Focus on history, current policy, and potential futures.

PS 399. Special Studies: [Topic]. 1-5 Credits.

Topics vary from year to year. Repeatable when topic changes.

PS 400M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

PS 401. Research: [Topic]. 1-15 Credits.

Repeatable.

PS 403. Thesis. 1-12 Credits.

Repeatable.

PS 404. Internship: [Topic]. 1-2 Credits.

Repeatable once for a maximum of four credits.

PS 405. Reading and Conference: [Topic]. 1-15 Credits.

Repeatable.

PS 406. Field Studies: [Topic]. 1-5 Credits.

Repeatable for maximum of 10 credits.

PS 407. Seminar: [Topic]. 1-4 Credits.

Offerings vary from year to year, depending on student need and faculty interests. Repeatable when topic changes.

PS 408. Workshop: [Topic]. 1-21 Credits.

Repeatable when title changes.

PS 409. Terminal Project. 1-12 Credits.

Repeatable.

PS 410. Experimental Course: [Topic]. 1-4 Credits.

Offerings vary from year to year, depending on student need and faculty interests. Repeatable when topic changes.

PS 411. Honors Thesis Prospectus. 1 Credit.

Prepares students for writing the senior honors thesis in political science. Provides guidance in framing a suitable topic, conducting preliminary research, and writing a prospectus. Prereq: majors with honors standing.

PS 433. Marxism and Radical Thought. 4 Credits.

Surveys utopian socialist thought, anarchism, Marxism, and Leninism. Central themes include the nature of radical theory, the role of the state, human nature and the new society.

PS 440. Causes and Prevention of War. 4 Credits.

Surveys theories of causes of war; focuses on major theories of prevention; case studies from World War I, World War II, and other wars.

PS 445. Methods for Politics and Policy Analysis I. 4 Credits.

Introduction to quantitative analysis, concepts and methods of empirical research, applied statistical data analysis in political science. Methods include descriptive statistics, bivariate correlation, and regression techniques.

PS 449. Racial Politics in the United States. 4 Credits.

Considers how race has interacted with political development in the U.S. from the New Deal to the present.

PS 455. Theories of International Politics. 4 Credits.

Competing theories of international relations and strategies for testing the theories.

PS 458. Feminist Political Theories. 4 Credits.

Examines the relationship between feminism, gender, and the state. Offered alternate years.

PS 465. LGBT Rights in the Courts. 4 Credits.

Analyzes the role of legal advocates and the courts in advancing and curtailing lesbian, gay, bisexual, and transgender rights with a focus on relationship recognition, parenting, employment, housing, military, education, and health care. Offered alternate years.

PS 466. Civil Rights in Post-Warren Era. 4 Credits.

Analyzes development in civil rights advocacy in the United States since the heyday of the Warren Court. Focuses primarily on developments in race, gender, disability, and sexuality. Offered alternate years.

PS 467. The United States Presidency. 4 Credits.

An ambivalent view of the presidency as the key institution in the United States political system: source of great good but also of great harm.

PS 470. Constitutional Law. 4 Credits.

Surveys how the U.S. Constitution works as a structure for government. Addresses how the federal courts interact within the U.S. system of government.

PS 475. Politics of the European Union. 4 Credits.

Surveys the historical development and current workings of the European Union's major institutions and policies. Offered alternate years.

PS 477. International Environmental Politics. 4 Credits.

How nations solve international environmental problems. Explores major problems, processes, and current debates. Evaluates existing treaties through case studies.

PS 479. U.S. Interventions in Developing Nations. 4 Credits.

Examines theories of intervention: security, economic imperialism, humanitarian intervention, spreading democracy, domestic politics; over thirty-seven U.S. interventions since 1898 are surveyed.

PS 480. Introduction to Rational Choice. 4 Credits.

Introduces the paradigm of rational choice and game theory that is of special significance to politics.

PS 484. United States Supreme Court. 4 Credits.

The Supreme Court as a political body; the judicial role in the context of the economic, political, social, and psychological factors that influence the court's decisions.

PS 485. Civil Rights and Civil Liberties. 4 Credits.

Overview of the role of rights in the United States legal system. Particular emphasis on the role of freedom and equality in a federal system.

PS 491. Politics of Everyday Life. 4 Credits.

Examines how we try to influence each other's behaviors in the course of everyday life. Readings from several disciplines.

PS 495. United States Political Economy. 4 Credits.

Examines United States political-economic institutions from a comparative and historical perspective. Topics include rise and fall of mass production, labor and the law, and regional development.

PS 503. Thesis. 1-16 Credits.

Repeatable.

PS 507. Seminar: [Topic]. 1-4 Credits.

Repeatable. Offerings vary from year to year, depending on student needs and faculty interests.

PS 508. Workshop: [Topic]. 1-21 Credits.

Repeatable.

PS 510. Experimental Course: [Topic]. 1-4 Credits.

Offerings vary from year to year, depending on student needs and faculty interests. Repeatable when topic changes.

PS 540. Causes and Prevention of War. 4 Credits.

Surveys theories of causes of war; focuses on major theories of prevention; case studies from World War I, World War II, and other wars.

PS 545. Methods for Politics and Policy Analysis I. 4 Credits.

Introduction to quantitative analysis, concepts and methods of empirical research, applied statistical data analysis in political science. Methods include descriptive statistics, bivariate correlation, and regression techniques.

PS 549. Racial Politics in the United States. 4 Credits.

Considers how race has interacted with political development in the U.S. from the New Deal to the present.

PS 555. Theories of International Politics. 4 Credits.

Competing theories of international relations and strategies for testing the theories.

PS 558. Feminist Political Theories. 4 Credits.

Examines the relationship between feminism, gender, and the state. Offered alternate years.

PS 566. Civil Rights in Post-Warren Era. 4 Credits.

Analyzes development in civil rights advocacy in the United States since the heyday of the Warren Court. Focuses primarily on developments in race, gender, disability, and sexuality. Offered alternate years.

PS 567. The United States Presidency. 4 Credits.

An ambivalent view of the presidency as the key institution in the United States political system: source of great good but also of great harm.

PS 570. Constitutional Law. 4 Credits.

Surveys how the U.S. Constitution works as a structure for government. Addresses how the federal courts interact within the U.S. system of government.

PS 575. Politics of the European Union. 4 Credits.

Surveys the historical development and current workings of the European Union's major institutions and policies. Offered alternate years.

PS 577. International Environmental Politics. 4 Credits.

How nations solve international environmental problems. Explores major problems, processes, and current debates. Evaluates existing treaties through case studies.

PS 579. U.S. Interventions in Developing Nations. 4 Credits.

Examines theories of intervention: security, economic imperialism, humanitarian intervention, spreading democracy, domestic politics; over thirty-seven U.S. interventions since 1898 are surveyed.

PS 584. United States Supreme Court. 4 Credits.

The Supreme Court as a political body; the judicial role in the context of the economic, political, social, and psychological factors that influence the court's decisions.

PS 585. Civil Rights and Civil Liberties. 4 Credits.

Overview of the role of rights in the United States legal system. Particular emphasis on the role of freedom and equality in a federal system.

PS 595. United States Political Economy. 4 Credits.

Examines United States political-economic institutions from a comparative and historical perspective. Topics include rise and fall of mass production, labor and the law, and regional development.

PS 601. Research: [Topic]. 1-16 Credits.

Repeatable.

PS 602. Supervised College Teaching. 1-5 Credits.

Repeatable up to five times for a total of six credits.

PS 603. Dissertation. 1-16 Credits.

Repeatable.

PS 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

PS 606. Field Studies: [Topic]. 1-16 Credits.

Repeatable.

PS 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

PS 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

PS 609. Terminal Project. 1-16 Credits.

Repeatable.

PS 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

PS 612. Qualitative Methods. 5 Credits.

Survey of rationales for qualitative methods in the social sciences and the main conceptual and practical issues raised in qualitative research. Offered alternate years.

PS 613. Interpretive Methods in Political Science. 5 Credits.

This seminar trains graduate students in the philosophy, theory and practice of interpretive methods by engaging five methods: discourse analysis, genealogy, political ethnography, interpretive interviewing, and decoloniality. We will take some time with each approach, devoting a week or more to theory method

PS 614. Research Design. 5 Credits.

This course is designed to give students the practical skills necessary to craft a well-designed research project for any type of political science research question. In this way, it prepares students for writing a successful dissertation prospectus, as well as design a second-year paper.

PS 615. Teaching and Learning in Politics and Policy. 1 Credit.

This course for beginning PhD students in Political Science and the School of Planning, Public Policy, and Management provides a forum to discuss teaching as Graduate Employee and fundamental learning skills for new graduate students.

PS 616. Professionalization in Politics and Policy: [Topic]. 1 Credit.

This course for graduate students in Political Science and PhD students the School of Planning, Public Policy, and Management develops skills necessary for future academic professionals. The specific skills taught are indicated by the course subtitle.

PS 618. American Political Institutions. 5 Credits.

This is one of three required core seminars for PhD students who plan to take a comprehensive examination in American politics. We explore how political science approaches the study of institutional contributions to political and policy developments.

PS 620. State of the Discipline. 5 Credits.

Introduction to trends in the political science profession and to the faculty at the University of Oregon.

PS 622. Political Theory. 5 Credits.

Survey of major works in the field of classical and contemporary political theory.

PS 624. International Relations. 5 Credits.

Survey of major works in the field of international relations.

PS 625. Public Policy. 5 Credits.

Survey of major works in the field of public policy.

PS 626. International Political Economy. 5 Credits.

One of two required seminars for PhD students planning to take a comprehensive examination in international relations. Explores how politics and economics interact in shaping economic relations among states.

PS 628. States and State-Society Relations. 5 Credits.

Examines how scholars have studied the state and its relationship to society. Students develop a comparative perspective of contentious politics ranging from peasant rebellions to revolutions to transnational social movements.

PS 629. Comparative Political Economy. 5 Credits.

Doctoral-level survey of how political factors explain variations in national or regional trajectories of economic development, including industrialization, wealth, growth, and inequality.

PS 630. States and Regimes. 5 Credits.

Introduction to the major issues, theories, concepts, and arguments about states and regimes in comparative politics. Offered alternate years.

Bachelor of Arts and Bachelor of Science in Political Science

The Department of Political Science offers a program leading to a bachelor of science (BS) or a bachelor of arts (BA) degree. This program is designed to

1. provide students with substantive expertise in political institutions, key policy issues, salient ideologies, law and regulation, and political identities in local, national, and global contexts
2. prepare students for graduate work or professional careers in law, business, government, teaching, journalism, social activism, or the academic community

Bachelor of Arts Degree Requirements

Code	Title	Credits
Two 100-level courses		8
Two 200-level courses		8
Course in political theory (any level) ¹		4
Two 400-level courses ²		8
Additional upper-division courses ^{3,4}		20
Total Credits		48

- ¹ Political theory courses are indicated by a footnote in the Class Schedule.
- ² A minimum of two 400-level courses numbered 407, 410, or 412–499 are required.
- ³ If the political theory course is upper-division, the total number of additional upper-division credits needed will total 20. If it is lower-division, the total number of additional upper-division credits needed will total 24.
- ⁴ A minimum of 20 upper-division credits must be completed in residence at the University of Oregon.

Additional Requirements

The 48 credits that satisfy major requirements must be taken for letter grades and passed with C– or better with the exception that one course (as many as 4 credits) may be taken pass/no pass (P/N). Courses such as Thesis (PS 403) and Honors Thesis Prospectus (PS 411) are offered pass/no pass only and may be applied to the 48 credits. Credits earned in Terminal Project (PS 409) may not be applied to the major.

No more than a total of 16 credits in Research: [Topic] (PS 401), Thesis (PS 403), Internship: [Topic] (PS 404), Reading and Conference: [Topic] (PS 405), Workshop: [Topic] (PS 408), Honors Thesis Prospectus (PS 411), and Overseas Study: Internships (OINT 488) may be applied toward the 48-credit requirement. Overseas Study: Internships (OINT 488) is subject to preapproval by the political science department.

No more than 8 credits of Internship: [Topic] (PS 404) or Overseas Study: Internships (OINT 488) may be applied toward the 48 credits. This work must be done under the direction of a faculty member who, prior to registration, must approve and set up academic criteria to evaluate

the work. Credit for these courses must be earned at the University of Oregon.

UO bachelor's degree requirements also apply.

Credit for these courses must be earned at the University of Oregon.

UO bachelor's degree requirements also apply.

Master of Arts in Political Science

The master's degree program prepares students for professional careers in teaching and research. Two years is the typical period for completing the program. The graduate program is geared toward doctoral studies and typically only admits students for a terminal master's degree under exceptional circumstances. Applicants whose main goal is to obtain a PhD should apply directly to the doctoral program. Those wanting to obtain a terminal master's degree should contact the department's director of graduate studies before applying to discuss a potential fit.

Master of Arts Degree Requirements

- Completion of 45 credits of graduate course work
- Completion of required courses as specified by the department
- Demonstrated proficiency in qualitative and quantitative research methods
- Completion of a master's degree thesis

PS 628	States and State-Society Relations	
PS 629	Comparative Political Economy	
PS 630	States and Regimes	
Methods Requirement:		
PS 545 & PS 546	Methods for Politics and Policy Analysis I and Methods for Politics and Policy Analysis II	8
PS 612 & PS 613	Qualitative Methods and Interpretive Methods in Political Science	5
PS 614	Research Design	5
Thesis Requirement:		15
PS 503	Thesis	
Total Credit Requirement:		45

Master of Science in Political Science

The master's degree program prepares students for professional careers in teaching and research. Two years is the typical period for completing the program. The graduate program is geared toward doctoral studies and typically only admits students for a terminal master's degree under exceptional circumstances. Applicants whose main goal is to obtain a PhD should apply directly to the doctoral program. Those wanting to obtain a terminal master's degree should contact the department's director of graduate studies before applying to discuss a potential fit.

Master of Science Degree Requirements

- Completion of 45 credits of graduate course work
- Completion of required courses as specified by the department
- Demonstrated proficiency in qualitative and quantitative research methods
- Completion of a master's degree thesis

Code	Title	Credits
Seminar Requirement:		
PS 620	State of the Discipline	5
Two Seminar Courses from the Following:		
PS 607	Seminar: [Topic]	
PS 617	Political Behavior	
PS 618	American Political Institutions	
PS 619	United States Political Culture

PhD in Political Science

This program is designed to allow the well-prepared student to complete course requirements for the PhD in two years of full-time study. Students complete a research paper in their second year and take comprehensive examinations during their third year, followed by preparation of a dissertation.

Doctoral Program

This program is designed to allow the well-prepared student to complete course requirements for the PhD in two years of full-time study. Students complete a research paper in their second year and take comprehensive examinations during their third year, followed by preparation of a dissertation. Requirements for the PhD in political science include the following:

1. Completion of 100 credits (18 credits are for dissertation) beyond the bachelor's degree. Research: [Topic] (PS 601) and Reading and Conference: [Topic] (PS 605) may be taken pass/no pass. All other course work must be taken for letter grades
2. Completion of State of the Discipline (PS 620), to be taken the first time it is offered
3. Demonstrated proficiency in quantitative and qualitative research methods
4. Completion of a research paper no later than the sixth term of enrollment (excluding summer)

5. Completion of required seminars in the two area fields in which the student takes comprehensive examinations. Students should take these seminars as early as possible, and prior to examination
6. Passing two comprehensive examinations: one major field and one minor field, selected from the list below. Each field comprises several themes from which the student must choose a subset
 - classical and contemporary political theory
 - comparative politics
 - formal theory and methodology
 - international relations
 - public policy
 - United States politics
7. After passing the comprehensive examinations, completion of 18 credits in Dissertation (PS 603), to be taken while completing the PhD dissertation
8. Defense of the written dissertation in an oral examination

A complete description of graduate requirements, including an explanation of themes and field requirements, is available on the department website (<http://polisci.uoregon.edu/>).

Psychology

Ulrich Mayr, Department Head

541-346-4921
Straub Hall
1227 University of Oregon
Eugene, Oregon 97403-1227

The mission of the Department of Psychology undergraduate program is to educate students about the major research findings and theories in the field of psychology, and to train them to use an empirical approach to understanding human behavior. Specifically, the program endeavors to provide students with

- Broad exposure to the basic concepts and ethical issues of psychology
- Education in the scientific method, including applied research opportunities
- Strong critical-thinking and written-communication skills, including the ability to evaluate and convey the evidence for claims regarding human behavior
- Experience through internship and practicum opportunities at partnering community organizations

Faculty

Jennifer Ablow, associate professor (developmental psychopathology, attachment, interpersonal emotional arousal and regulation). BA, 1988, Colorado, Boulder; PhD, 1997, California, Berkeley. (1999)

Nicholas Allen, Ann Swindells Professor in Clinical Psychology (adolescent development and mental health, mood disorders, developmental social and affective neuroscience). BS 1985, MS, 1988, PhD, 1993, Melbourne. (2013)

Holly Arrow, professor (group dynamics, psychology of war). BA, 1977, Elmira; MFA, 1982, Colorado; MA, 1995, PhD, 1996, Illinois, Urbana-Champaign. (1996)

Dare A. Baldwin, professor (language acquisition, semantic development, cognitive development). BA, 1982, California, Berkeley; MSc, 1984, California, Santa Cruz; PhD, 1989, Stanford. (1993)

Ted Bell, instructor (brain development, human memory, applied cognitive science). BS, 1990, Oregon State; MS, 1997, PhD, 2005, Oregon. (2011)

Elliot Berkman, associate professor (affective neuroscience, self-regulation, quantitative methods for neuroimaging). BA, 2002, Stanford; PhD, 2009, California, Los Angeles. (2010)

Justin Caouette, instructor (adolescent social cognition, translational neuroscience, prevention science). BA, 2008, Claremont McKenna College, PhD, 2016, UC Davis. (2020)

Melynda D. Casement, assistant professor (clinical psychology). AB, 2002, Mount Holyoke College; PhD, 2010, Michigan, Ann Arbor. (2016)

Robert Chavez, assistant professor (social neuroscience, interpersonal perception, personality and individual differences). BS, 2008, New Mexico; PhD, 2015, Dartmouth College. (2016)

David Condon, assistant professor (personality and individual differences, data science, cognitive abilities). AB, 1996, Duke; MBA, 2002, Chicago; MS, 2012, PhD, 2014, Northwestern. (2019)

Paul Dassonville, associate professor (cognitive neuroscience, perception, sensorimotor integration). BS, 1986, Texas A & M; PhD, 1992, California, Los Angeles. (1999)

Crystal Dehle, clinical associate professor (clinical psychology). BS, 1990, Washington State; PhD, 1995, Oregon. (2005)

Dagmar Zeithamova Demircan, assistant professor (cognitive neuroscience, memory). MA, 2003, Charles University, Prague; PhD, 2008, Texas, Austin. (2014)

Sarah DuBrow, assistant professor (cognitive neuroscience, memory, decision-making). BA, 2008, Stanford; PhD, 2016, New York. (2019)

Nicole M. Dudukovic, senior instructor (cognitive neuroscience, memory). BA, 2000, Stanford; MA, 2002, California, Los Angeles; PhD, 2007, Stanford. (2015)

Caitlin M. Fausey, assistant professor (development, language and cognition, experience sampling). BA, 2004, Northwestern; MA, 2008, PhD, 2010, Stanford. (2014)

Philip A. Fisher, professor (prevention research, stress neurobiology, foster care); Philip H. Knight Chair. BA, 1986, Bowdoin College; MS, 1990, PhD, 1993, Oregon. (2008)

Jennifer J. Freyd, professor (trauma psychology). BA, 1979, Pennsylvania; PhD, 1983, Stanford. (1987)

Gordon C. Nagayama Hall, professor (sociocultural context of psychopathology, sexual aggression). BS, 1977, Washington (Seattle); PhD, 1982, Fuller Theological Seminary. (2001)

Sara D. Hodges, professor (social cognition, construction of social judgments). BA, 1989, Rhodes; MA, 1992, PhD, 1995, Virginia. (1995)

Benjamin Hutchinson, assistant professor (cognitive neuroscience, memory, attention). BA, 2004, Pennsylvania; PhD, 2011, Stanford. (2018)

Christina M. Karns, research associate (attention, social emotions, neuroplasticity, neuroimaging). BS, 1999, California, San Diego; PhD, 2008, California, Berkeley. (2008)

Jagdeep Kaur-Bala, senior instructor (cognitive neuroscience, perception, attention). BSc, 1988, MSc, 1990, All India Institute of Medical Sciences, New Delhi; PhD, 1996, Tata Institute of Fundamental Research, Mumbai. (2007)

Brice A. Kuhl, associate professor (cognitive neuroscience, memory, neuroimaging). BA, 2001, Kenyon College; PhD, 2009, Stanford. (2015)

Anne Mannering, instructor, program director Online Master's in Psychology (cognitive and social-emotional development, early life stress, self-regulation). BA, 1998, UT Austin; MS, 2001, PhD, 2006, Oregon. (2020)

Robert Mauro, associate professor (social, emotions, psychology and law). AB, 1979, Stanford; MS, 1981, Yale; PhD, 1984, Stanford. (1984)

Ulrich Mayr, Robert and Beverly Lewis Professor in Neuroscience (cognitive neuroscience, cognitive aging). BA, 1988, PhD, 1992, Berlin. (2000)

Jeffrey Measelle, associate professor (developmental psychology, emotional development, family). BA, 1985 Brown; PhD, 1997, California, Berkeley. (1999)

Kate Mills, assistant professor (development, social neuroscience, adolescence). BA, 2011, Portland State; PhD, 2015, University College, London. (2018)

Jordan Pennefather, senior instructor (social and educational psychology, methodology, data analysis). BA, 2003, California State, Dominguez Hills; PhD, 2008, Colorado, Boulder. (2010)

Jennifer Pfeifer, professor (developmental and social cognitive neuroscience, adolescent self-perception and emotion processing). BA, 2000, Stanford; MA, 2003, PhD, 2007, California, Los Angeles. (2008)

Catrin Rode, instructor (cognitive psychology). MA, 1992, Konstanz; PhD, 1996, Münster. (2000)

Gerard Saucier, professor (personality beliefs and values, psychometrics). BA, 1978, North Carolina, Chapel Hill; MA, 1984, PhD, 1991, Oregon. (1997)

Margaret E. Sereno, associate professor (visual cognition, neural network modeling, brain imaging). BA, 1983, Northern Illinois; PhD, 1989, Brown. (1991)

Paul Slovic, professor (judgment, decision-making, risk assessment). BA, 1959, Stanford; MA, 1962, PhD, 1964, Michigan. (1986)

Matt Smear, assistant professor (systems neuroscience, olfaction). ScB, 1998, Duke; PhD, 2005, California, San Francisco. (2014)

Sanjay Srivastava, professor (interpersonal perception and self-perception, social functions of emotions, personality dynamics and development). BA, 1995, Northwestern; PhD, 2002, California, Berkeley. (2004)

Don M. Tucker, professor (emotion, cognition, neuropsychology). BA, 1969, Colorado; MS, 1972, PhD, 1974, Pennsylvania State. (1984)

Nash Unsworth, professor (working memory, memory and attention differences, memory search and retrieval). BS, 2001, Idaho State; PhD, 2006, Georgia Institute of Technology. (2010)

Michael Wehr, professor (systems neuroscience, auditory neurophysiology, cortical circuits). ScB, 1991, Brown; PhD, 1999, California Institute of Technology. (2005)

Sara Weston, assistant professor (social personality, health, personality development). BA, 2012, Northwestern; MA, 2014, PhD, 2017, Washington (St. Louis). (2019)

Maureen Zalewski, associate professor (clinical psychology, emotion and stress regulation contributing to psychopathology) BS, 2005, Pennsylvania State; MS, 2008, PhD, 2012, Washington (Seattle). (2013)

Emeriti

Lewis R. Goldberg, professor emeritus. AB, 1953, Harvard; MA, 1954, PhD, 1958, Michigan. (1960)

Barbara Gordon-Lickey, professor emerita. AB, 1963, Radcliffe; PhD, 1966, Massachusetts Institute of Technology. (1969)

Marvin Gordon-Lickey, professor emeritus. AB, 1959, Oberlin; MA, 1962, PhD, 1965, Michigan. (1967)

Douglas L. Hintzman, professor emeritus. BA, 1963, Northwestern; PhD, 1967, Stanford. (1969)

Ray Hyman, professor emeritus. AB, 1950, Boston University; MA, 1952, PhD, 1953, Johns Hopkins. (1961)

Carolyn Keutzer, associate professor emerita. BA, 1960, MA, 1963, PhD, 1967, Oregon. (1967)

Daniel P. Kimble, professor emeritus. BA, 1956, Knox; PhD, 1961, Michigan. (1963)

Peter M. Lewinsohn, professor emeritus. BS, 1951, Allegheny; MA, 1953, PhD, 1955, Johns Hopkins. (1965)

Edward Lichtenstein, professor emeritus. BA, 1956, Duke; MA, 1957, PhD, 1961, Michigan. (1966)

Richard Marrocco, professor emeritus. BA, 1965, California, Los Angeles; PhD, 1972, Indiana. (1973)

Louis J. Moses, professor emeritus. BA, 1983, Western Australia; PhD, 1991, Stanford. (1993)

Helen Neville, professor emerita. BA, 1968, British Columbia; MA, 1970, Simon Fraser; PhD, 1975, Cornell. (1995)

Michael I. Posner, professor emeritus. BS, 1957, MS, 1959, Washington (Seattle); PhD, 1962, Michigan. (1965)

Mary K. Rothbart, professor emerita. BA, 1962, Reed; PhD, 1967, Stanford. (1969)

Myron Rothbart, professor emeritus. BA, 1962, Reed; PhD, 1966, Stanford. (1969)

Anne D. Simons, professor emerita. BA, 1974, Stanford; PhD, 1982, Washington (St. Louis). (2006)

Marjorie Taylor, professor emerita. BS, 1979, MS, 1981, Acadia; PhD, 1985, Stanford. (1985)

Robert L. Weiss, professor emeritus. BA, 1952, PhD, 1958, State University of New York, Buffalo. (1966)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

- **Bachelor of Arts**
- **Bachelor of Science**
- **Minor**

Undergraduate Studies

All students participate in and collaborate on research as part of the academic course sequence. Students are encouraged to gain additional research experience through research assistant positions in faculty labs and the undergraduate honors thesis program. The psychology major affords students great flexibility in selecting upper-division courses to fit individual goals and interests. Classroom and internship opportunities are enriched by numerous faculty research programs that range in levels of analysis and intellectual focus. An undergraduate degree in psychology provides the background for a broad range of careers, including social services, education, law, or graduate programs in psychology.

Preparation

High school preparation should include courses in social sciences as well as the natural sciences (physics, biology, chemistry). Language and mathematical skills are also highly desirable. In general, the broad liberal-arts training that prepares students for college studies is appropriate for majoring in psychology at the university.

Careers

Some students major in psychology to prepare for graduate training and careers in related fields such as personnel relations, vocational and personal counseling, medicine and dentistry, social and case work, marketing, administration, the legal profession, or counseling in the public schools. Others prepare for careers as academic psychologists (teaching and research), clinical psychologists (mental health centers, institutions, and private practice), industrial and organizational psychologists, and government psychologists (testing, research, and administration).

Career information is also available on the American Psychological Association website.

Review of Courses

Lower-Division Courses

Among lower-division courses, psychology is introduced as a social science by the following courses:

Code	Title	Credits
PSY 201	Mind and Brain	4
PSY 202	Mind and Society	4

Transfer students should plan to take no more than two lower-division courses before starting upper-division work. The introductory courses should be chosen with an eye toward prerequisites for upper-division courses and toward providing a broad background in the field. Transfer equivalents for lower-division courses are evaluated case by case.

Check with the department's head advisor to determine equivalency of completed introductory work.

Upper-Division Courses

Upper-division courses fall into four categories:

1. Courses that teach research skills and methodologies—Scientific Thinking in Psychology (PSY 301), Statistical Methods in Psychology (PSY 302), Research Methods in Psychology: [Topic] (PSY 303)
2. 300-level core courses that provide breadth in the major—Biopsychology (PSY 304), Cognition (PSY 305), Social Psychology (PSY 306), Personality (PSY 307), Developmental Psychology (PSY 308), Psychopathology (PSY 309)
3. Other 300-level courses of broad interest to many different majors throughout the university as well as to psychology majors
4. Area courses, numbered 410 to 480, designed for psychology majors, which may be open to other students who fulfill the prerequisites and obtain instructor approval

Group Requirements

For psychology courses approved to fulfill social science or science group requirements, see the current course list on the registrar's website (<https://registrar.uoregon.edu/current-students/group-satisfying-and-multicultural-courses/>).

Major Requirements

To satisfy major requirements students take a total of 68 credits. Of those credits, 56 credits in psychology courses are required, 48 of which must be upper-division, and 16 of which must be taken in residence at the University of Oregon. Mind and Brain (PSY 201) and Mind and Society (PSY 202) must be taken for letter grades and passed with grades of mid-C or better. All other required courses must be taken for letter grades and passed with grades of C– or better, although elective psychology courses may be taken pass/no pass. A minimum grade point average of 2.00 in psychology course work is required.

Bachelor of Arts Degree Requirements

Code	Title	Credits
Introductory Prerequisite Courses		
WR 121	College Composition I	4
WR 122	College Composition II (WR 123 recommended)	4
or WR 123	College Composition III	
PSY 201	Mind and Brain	4
PSY 202	Mind and Society	4
MATH 243	Introduction to Methods of Probability and Statistics	4
Methods Foundations Courses		
PSY 301	Scientific Thinking in Psychology	4
PSY 302	Statistical Methods in Psychology	4
PSY 303	Research Methods in Psychology: [Topic]	4
300-Level Core Courses 12		
Select three of the following, one of which must be PSY 304 or PSY 305:		
PSY 304	Biopsychology	
PSY 305	Cognition	

PSY 306	Social Psychology	
PSY 307	Personality	
PSY 308	Developmental Psychology	
PSY 309	Psychopathology	
400-Level Specialty Courses		12
Select three of the following:		
PSY 420	Psychology and Law	
PSY 433	Learning and Memory	
PSY 436	Human Performance	
PSY 438	Perception	
PSY 445	Brain Mechanisms of Behavior	
PSY 449	Cognitive Neuroscience	
PSY 450	Hormones and Behavior	
PSY 457	Group Dynamics	
PSY 458	Decision-Making	
PSY 459	Cultural Psychology	
PSY 468	Motivation and Emotion	
PSY 472	Psychology of Trauma	
PSY 473	Intimate Relationships	
PSY 475	Cognitive Development	
PSY 476	Language Acquisition	
PSY 478	Social Development	
PSY 479	Infancy	
PSY 480	Development and Psychopathology	
Upper-Division Elective Courses ¹		12
Total Credits		68

¹ Students must take 12 upper-division psychology elective credits, 8 of which must be actual content courses. A maximum of 4 credits in Research: [Topic] (PSY 401) or Terminal Project (PSY 409) may be applied to the upper-division credits. Practicum credits must be earned at a practicum site approved by the head undergraduate faculty advisor.

Bachelor of Science Degree Requirements

PSY 480	Development and Psychopathology	
Upper-Division Elective Courses ¹		12
Total Credits		68

¹ Students must take 12 upper-division psychology elective credits, 8 of which must be actual content courses. A maximum of 4 credits in Research: [Topic] (PSY 401) or Terminal Project (PSY 409) may be applied to the upper-division credits. Practicum credits must be earned at a practicum site approved by the head undergraduate faculty advisor.

Planning a Program

Besides attending lecture courses, students may participate in seminars, reading and conference courses, laboratory work, and other means of gaining experience. Departmental requirements for a psychology major are designed to maximize individual curriculum planning. Students are encouraged to schedule frequent consultations with their advisors to ensure completion of all requirements. Peer advisors can help students create a two- or four-year plan.

Sample Program

The sample program shown provides an idea of a typical course load during the freshman year for a student working on a bachelor of science or bachelor of art degree.

First Year

Fall	Credits
First-year interest group or elective course	4

First-year interest group course or arts and letters group-satisfying course	4
PSY 202 Mind and Society (or a social science group-satisfying course)	4
BA-required mathematics or second-language course	4
Winter	
WR 121 College Composition I	4
PSY 201 Mind and Brain (or a science group-satisfying course)	4
Arts and letters group-satisfying course	4
BA-required mathematics or second-language course	4
Spring	
WR 123 College Composition III	4
PSY 202 Mind and Society (or social science group-satisfying course)	4
MATH 243 Introduction to Methods of Probability and Statistics (or science group-satisfying course)	4
BA-required second-language or elective course	4
Total Credits:	
	48

Departmental requirements for a psychology major are designed to maximize individual curriculum planning. This should be done in close and frequent consultation with the advisor.

Peer Advising

The psychology department's peer advisors work to make academic advising more effective, inclusive, and efficient. Questions about the university system and specific inquiries about the department's norms, opportunities, and courses are welcome. During the academic year, the peer advisors hold regularly scheduled office hours in 229 Straub Hall.

Preparation for Graduate Study

A bachelor's degree is seldom sufficient qualification for professional work in psychology; at least a master's degree is required for most positions. Students should not undertake graduate work unless their grades in undergraduate psychology and related courses have averaged mid-B (3.00) or better.

Prospective graduate students in psychology are advised to take courses in related fields such as anthropology, biology, computer science, chemistry, linguistics, mathematics, philosophy, physics, and sociology. Strong preparation in quantitative methods is advisable. Reading knowledge of at least one second language appropriate to psychology also may be useful.

Honors Curriculum

Students with excellent records who plan to pursue a career in psychology may consider applying to the departmental honors program upon completion of PSY 303. The honors program centers on an independent research project, which the student develops and carries out under the supervision of a departmental committee. Information about admission criteria and how to apply is available online (<http://psychology.uoregon.edu/undergraduate/academics/honors-program/>).

Minor Requirements

Special Studies: [Topic] (PSY 199) does not count toward the minor.

Code	Title	Credits
PSY 201	Mind and Brain	4
PSY 202	Mind and Society	4
PSY 301	Scientific Thinking in Psychology	4
PSY 302	Statistical Methods in Psychology	4
Select three of the following, one of which must be PSY 304 or PSY 305:		12
PSY 304	Biopsychology	
PSY 305	Cognition	
PSY 306	Social Psychology	
PSY 307	Personality	
PSY 308	Developmental Psychology	
PSY 309	Psychopathology	
Total Credits		28

All 28 credits must be taken for letter grades and passed with a C– or better. At least 16 credits must be upper-division courses taken in residence at the University of Oregon.

Middle and Secondary School Teaching Careers

The College of Education offers a fifth-year program for middle-secondary teaching in social studies. This program is described in the **College of Education** section of this catalog.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Bachelor of Arts in Psychology

Graduate Studies

Online Master's Degree Program

The Online Master's in Psychology program is designed to benefit people with bachelor's degrees working in community-based organizations

and public agencies that address social and mental health needs. This terminal master of science (MS) degree requires 49 credits of coursework completed on a part-time schedule (9 credits per term) distributed over 6 consecutive terms, including summer. All courses are delivered asynchronously online. Students receive advanced training in program evaluation and the brain science of development and behavior change and complete a capstone research project. Upon completion of the program, students will be able to (a) evaluate current interventions delivered in their home agencies, (b) make informed selections of evidence-based programs to deliver, and (c) have a working knowledge of the basic psychological and neural processes at play in their clients as they participate in behavior change programs. This program does not provide clinical training.

Code	Title	Credits
PSY 615	Community Needs Assessments	4
PSY 616	Implementation with Community and Cultural Perspectives	3
PSY 619	Intervention Science	4
PSY 628	Methods of Program Evaluation	4
PSY 629	Methods of Program Measurement	4
PSY 630	Translational Neuroscience in Early Childhood	3
PSY 631	Translational Neuroscience in Adolescence	3
PSY 632	Translational Neuroscience in Adulthood	3
PSY 672	Trauma Informed Interventions	3
PSY 690	Capstone Research	12
Choose Two Electives From The Following:		6
PSY 607	Seminar: [Topic] (Neuroscience in the Community)	
PSY 607	Seminar: [Topic] (Child Psychology and Neurological Development)	
PSY 610	Experimental Course: [Topic] (Implementation Scalability)	
PSY 614	Fast Program Refinement (The proposed change would move PSY 614 from required to elective.)	
PSY 618	Substance Use and Addiction	
PSY 611	Data Analysis I	
Total Credits		49

Individualized Master's Degree Program

The individualized master's degree program does not lead to a PhD. This program is designed to provide advanced training for a small number of individuals who have a clearly focused research interest and an academic plan. Unlike other master's programs, this program is not designed for general master's level training in psychology. We expect persons entering the master's program to be highly self-motivated, with the goal of acquiring conceptual and research skills appropriate to their own work plans. Each program of master's study will be tailored to the individual student's goals within the discipline, so long as it satisfies core master's degree requirements. This program does not provide clinical training.

The degree—either a master of arts (MA) or a master of science (MS) requires 45 credits of work. Program requirements and application information may be obtained from the department website. Clinical training is not available in the master's program.

- 45 credit hours in courses approved for graduate credit
- 24 of the 45 credits must be UO graded graduate credits (B- or higher)
- 30 of the 45 credits must be Psychology graduate credits
- 9 of the 45 credits must be in 600-level courses
- 2 approved graduate-level statistics courses (grade of B- or higher)
- Psy 607 Sem Research Ethics
- Completion of an approved research paper or thesis
- Maintain a UO Cumulative Graduate-Level GPA of 3.0 or higher

The Department expects that most students will complete the Master's degree in 1-2 years

Doctoral Degree Programs

The five chief PhD program options are clinical, cognitive-neuroscience, systems neuroscience, developmental, and social-personality.

The department maintains a psychology clinic; specialized facilities for child and social research; experimental laboratories for human research, and well-equipped animal laboratories.

Applicants to the PhD program in psychology must take the Graduate Record Examination (GRE) and provide official results to institute code 4846 and department code 2016. Applicants must also provide three letters of recommendation, curriculum vitae, writing sample, statement of purpose, and official transcripts from all colleges and universities attended. Instructions, deadlines, and a complete list of required materials may be obtained from the department website.

During the first year of graduate work, students acquire a broad background in psychology and are introduced to methods, research, and ethics. Each student's program is planned in relation to background, current interests, and future goals. Research experience and a dissertation are required of PhD candidates; teaching experience is recommended, and opportunities to teach are available.

Requirements for Doctoral Students

Code	Title	Credits
PSY 611–613	Data Analysis I-III	12
Three of five core courses		
PSY 607	Seminar: [Topic] (three terms: Research, Ethics, Research)	1-5
First-year research requirement		
Supporting area requirement		
Major preliminary examination		
Additional course work required for students in the clinical program ¹		
Doctoral dissertation		

¹ See the *Guide to the Clinical Psychology Program*.

More detailed program and application information may be obtained from the department website.

For general regulations governing graduate work at the university, see the **Division of Graduate Studies** section of this catalog.

Clinical Psychology

The clinical psychology program has been continuously accredited by the American Psychological Association since 1958 (Office of Program

Consultation and Accreditation, American Psychological Association, 750 First Street NE, Washington, D.C. 20002-4242, 202-336-5979, email apaaccred@apa.org, website www.apa.org/ed/accreditation (<http://www.apa.org/ed/accreditation/>)); it is also accredited by the Psychological Clinical Science Accreditation System, and is a member of the Academy of Psychological Clinical Science.

The program endorses a clinical scientist model for graduate training. This model emphasizes multilevel conceptualizations of psychopathology, comprising neurobiological, developmental, psychosocial, and multicultural perspectives. Doctoral students receive training in infant, child, and adult psychopathology; culture and diversity; infant, child, family, and adult assessment; and neuropsychology. In all practica and clinical training experiences there is a strong focus on evidence-based treatments. Students receive training in the clinical techniques and practices, as well as the methodology for development, implementation, and evaluation of these interventions. Both psychotherapeutic interventions and prevention programs are included in the training.

The major goal of doctoral training is to support promising doctoral students in developing careers as scientist-practitioners. Students interested primarily in clinical practice would most likely prefer a program less research-oriented than the Oregon Clinical Psychology Training Program.

The research and clinical opportunities available to doctoral students depend on current activities of the clinical and departmental faculty, and may also encompass ongoing projects in research hubs linked with the clinical program, notably the Center for Translational Neuroscience, Center for Digital Mental Health, and the Prevention Science Institute, as well as research institutes located in the Eugene community that are affiliated with the clinical program. These institutions include the the Oregon Research Institute, Oregon Social Learning Center, Decision Research, and Electrical Geodesics.

Members of the clinical faculty and other faculty members with clinical interests have ongoing research in several areas, including the neurobiology of early stress, brain development and neural plasticity, behavior and molecular genetics, infant mental health, emotion and attention, prevention science, school readiness, child welfare system research, pubertal development and the transition to adolescence, depression, anxiety, personality measurement and theory, cognitive therapy, child and family assessment, social and emotional adjustment of children and adolescents, drug and alcohol abuse, cross-cultural psychology, sexual aggression, interpersonal violence, child abuse, institutional betrayal, and traumatic stress.

The department places a particularly high priority on translational research, encouraging multidisciplinary collaborations with colleagues from other areas of psychology and other academic departments. Currently, faculty research is funded by the National Science Foundation, National Institute of Mental Health, National Institute of Drug Abuse, National Institute on Child Health and Development, and the Institute of Education Sciences.

Please note: All clinical students must submit an FBI criminal background check and, when participating in external practicums, must carry their own liability insurance. Newly admitted students must complete a background check prior to enrolling in the program.

Additional information regarding course requirements for clinical students is provided in the *Guide to the Clinical Program* and the *Doctoral Student Handbook*, located on the department website.

Cognitive Psychology and Cognitive Neuroscience

The Department of Psychology at the University of Oregon has played an important role in the development of the field of cognitive neuroscience, and current researchers are continuing that tradition. Research areas include the cognitive and neural basis of perception, visual cognition, selective attention, working memory, long-term memory, executive control, action, language processing, and brain plasticity. In addition, studies include how these processes are altered by development in impoverished environments, aging, traumatic brain injury, autism, and other conditions. Studies employ a wide range of methods, including behavioral experiments, analyses of individual differences, functional imaging, electrophysiology, and transcranial magnetic and direct current stimulation.

The research efforts of the cognitive neuroscience laboratories benefit from the collaborative atmosphere at the University of Oregon, both within psychology and across other departments, allowing for an exploration of cognitive processes at many levels of analysis. Labs are located within the state-of-the-art facilities of the Robert and Beverly Lewis Integrative Science Building, in close proximity to the many other labs of the Institute of Neuroscience. The building also houses the Lewis Center for Neuroimaging, a research-dedicated facility with a 3T MRI scanner that supports ongoing research and training with functional and structural magnetic resonance imaging.

One of the most important aspects of the cognitive neuroscience graduate program is its informal, collaborative atmosphere. At the same time, there is an emphasis on the development of imagination and intellectual independence. Students are encouraged to explore their research ideas from many different perspectives, with the assistance of the expertise from researchers in several labs within the Department of Psychology and the Institute of Neuroscience.

Developmental Psychology

The Department of Psychology has recently expanded the scope of its developmental psychology program with the addition of new faculty members and new emphases in the graduate curriculum. The department as a whole offers extensive coverage of development during infancy, childhood, and adolescence, with some additional interest in aging. Several areas of research are strongly represented, including cognitive development, socio-emotional development, developmental psychopathology, and developmental social and affective neuroscience.

Several exciting clusters of expertise exist within these broad areas. Research on theory of mind and perspective-taking, as well as learning and knowledge acquisitions, links to research on the development of executive functioning and self-regulation. This cluster also connects with research on self-evaluation, affective and appetitive motivations, and decision-making. Another vibrant area of work looks at infant processing of action, language, and the statistical properties of everyday visual, linguistic, and musical environments. In addition, many researchers share a strong interest in social contextual effects on infant, child, and adolescent well-being, ranging from the small-scale (familial and peer influences, early adversity) to the large-scale (cultural and global contexts of development).

Members of the developmental psychology faculty also have strong collaborative links with the Center for Translational Neuroscience (<http://ctn.uoregon.edu/>), Oregon Social Learning Center (<http://www.oslc.org/>), Prevention Science Institute (<http://psi.uoregon.edu/>), and Oregon Research Institute (<http://www.ori.org/>). Current and previous funding

sources for the faculty and students in developmental psychology include the Bill and Melinda Gates Foundation, National Science Foundation, National Institute on Drug Abuse, Eunice Kennedy Shriver National Institute of Child Health and Human Development, National Institute of Mental Health, John Merck Scholars Program, James S. McDonnell Foundation, John Templeton Foundation, and the Oregon Medical Research Foundation. Graduates from the program have risen to faculty and postdoctoral positions at the University of Minnesota, Swarthmore College, Queen's University, Vanderbilt University, University of California at Davis, University of Michigan, Harvard University, Hamilton College, University of Utah, Oregon Health and Science University, Oregon Social Learning Center, University of Oregon, Villanova University, Brown University, University of Regina, Otterbein University, Wabash College, College of Idaho, and others.

Social and Personality Psychology

Research in social and personality psychology at the University of Oregon reflects an intellectually diverse approach to understanding intrapersonal and interpersonal processes and individual differences. The primary goal of the program is to train outstanding researchers, concentrating on high-quality research and training combined with substantive and methodological breadth. Faculty members conduct research spanning a broad spectrum of human behavior using innovative approaches. Areas of particular focus include the following:

- Emotion and motivation—nature of emotions, emotion regulation, social functions of emotions, self-regulation, goal pursuit, self-control
- Self, identity, and social cognition—self-perception and interpersonal perception, perspective-taking and empathy, self-other comparisons
- Groups, networks, and organizations—status hierarchies, social power, psychology of war and sociopolitical violence, group dynamics, online social networks
- Culture, values, and worldviews—moral psychology, culture and belief systems, psychology of religion
- Personality structure and development—structure of personality attributes, culture and personality description, lifespan development
- Decision-making and risk perception—human judgment, individual and group decision-making, decision-making in applied contexts (e.g., legal, aviation), risk perception, communication, and assessment

Research in these areas draws upon a wide range of methods, including individual, dyadic and group methods, psychophysiology, neuroimaging, neuroendocrinology, experience sampling, longitudinal studies, surveys, computational methods, and field studies. Students have the opportunity to develop their skills through course work and through collaboration with faculty mentors.

The program encourages interdisciplinary approaches, and training exposes students to a wide range of topics through small seminars, informal brown-bag series, lab meetings, and a variety of other opportunities. Students often work with multiple instructors and researchers, including faculty members from other areas of psychology, from other departments and units on campus, and from other institutions. Students may flexibly tailor their own graduate program under the guidance of faculty advisors, making the social and personality psychology program a distinctive training experience for each graduate student.

System Neuroscience

Systems neuroscience at the University of Oregon bridges the psychology and biology departments, and is strongly affiliated with the Institute of Neuroscience. Research areas span levels from genes to circuits to behavior, with a focus on understanding how neuronal computations underlie behavior. Researchers study the sensory systems, such as the olfactory, visual, and auditory systems, as well as how they interact with neural systems for memory, attention, and decision-making. Graduate students studying systems neuroscience join the neurons, circuits, and cognition graduate program, which provides an interdisciplinary training program that includes cross-rotations in different laboratories, multilab group meetings, research seminars, journal clubs, and retreats. Students combine a core neuroscience curriculum with a customized course of study designed to fit their interests.

Systems neuroscience labs at Oregon are highly collaborative within the systems area as well as with biology labs studying synaptic, cellular, and molecular neuroscience and with cognitive neuroscience labs using fMRI and EEG to study working memory and attention in humans. Research uses a range of innovative approaches, including optogenetics, electrophysiology, imaging, and theory, placing systems neuroscience at the heart of a highly collaborative intellectual community.

Courses

PSY 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

PSY 201. Mind and Brain. 4 Credits.

Introduction to perception, memory, learning, and cognition.

PSY 202. Mind and Society. 4 Credits.

Introduction to topics in clinical, personality, social, and developmental psychology.

PSY 301. Scientific Thinking in Psychology. 4 Credits.

Fundamentals in the empirical study of human behavior, including hypothesis formation, experiment design, behavioral data basics, and critical evaluation of scientific claims. Sequence with PSY 302, PSY 303. Students may not register for PSY 301 after completing PSY 303.

PSY 302. Statistical Methods in Psychology. 4 Credits.

Probability and statistics applied in psychological research. Topics include descriptive statistics, hypothesis testing, correlation, regression, and design of experiments. With laboratory. Sequence with PSY 301, PSY 303.

Prereq: MATH 243 or one from MATH 241, MATH 246, MATH 251; PSY 301, WR 121; Pre- or coreq: PSY 201, PSY 202.

PSY 303. Research Methods in Psychology: [Topic]. 4 Credits.

Practical experience designing, conducting, analyzing, and communicating original research about human behavior. Sequence with PSY 301, PSY 302. Repeatable once for a total of 8 credits when the topic changes.

Prereq: PSY 201, PSY 202, PSY 301, PSY 302; one from WR 122, WR 123.

PSY 304. Biopsychology. 4 Credits.

Relationships between brain and endocrine activity and behavior. Topics include sensation, perception, sexual behavior, drug effects, eating, drinking, sleeping, dreaming, and learning.

Prereq: PSY 201.

PSY 305. Cognition. 4 Credits.

Major topics addressed in this class include perception, attention, memory, language, reasoning, and decision-making.

Prereq: PSY 201.

PSY 306. Social Psychology. 4 Credits.

Processes underlying social perception and social interaction. Topics include aggression, the self-concept, stereotyping and prejudice, conformity, persuasion, attraction, and helping.

Prereq: PSY 202.

PSY 307. Personality. 4 Credits.

Theory and methods for studying human traits, including personality tests and measures. Current research in personality. Studies of age, gender, culture, and relation to emotion and motivation.

Prereq: PSY 202.

PSY 308. Developmental Psychology. 4 Credits.

Survey of cognitive, social-emotional, and personality development in infancy, childhood, adolescence, adulthood.

Prereq: PSY 202.

PSY 309. Psychopathology. 4 Credits.

Major descriptive and theoretical approaches to etiological, developmental, and social factors in emotion and personality disorders. Includes assessment, diagnosis, treatment, and special topics.

Prereq: PSY 202.

PSY 348. Music and the Brain. 4 Credits.

Explores the neural correlates of our perception of tonality, harmony, melody, and rhythm and how these relate to neurobiology, brain damage, and cognitive neuroscience.

PSY 366. Culture and Mental Health. 4 Credits.

Role of culture in the definition and maintenance of mental health and the definition and treatment of mental illness.

PSY 380. Psychology of Gender. 4 Credits.

Critical analysis of evidence for sex differences, gender roles, and the effect of gender on traditional issues in psychology. Topics include parenthood, violence, and sexual orientation.

PSY 383. Psychoactive Drugs. 4 Credits.

Physiological and behavioral effects of psychoactive drugs such as alcohol, opiates, barbiturates, and excitants. The psychology of use and overuse; therapies for correcting drug problems.

PSY 388. Human Sexuality. 4 Credits.

The nature of human sexuality; hormonal, instinctual, and learned factors in sexuality; psychosexual development; sexual orientation; frequency and significance of various types of sexual behavior; sexual inadequacy; sexual deviation.

PSY 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

PSY 401. Research: [Topic]. 1-21 Credits.

Repeatable.

PSY 403. Thesis. 1-12 Credits.

Repeatable.

PSY 405. Reading and Conference: [Topic]. 1-21 Credits.

Repeatable.

PSY 406. Practicum: [Topic]. 1-12 Credits.

Repeatable.

PSY 407. Seminar: [Topic]. 1-5 Credits.

Repeatable.

PSY 408. Laboratory Projects: [Topic]. 1-12 Credits.

Repeatable.

PSY 409. Terminal Project. 1-12 Credits.

Repeatable.

PSY 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

PSY 412. Applied Data Analysis. 4 Credits.

Intermediate-level practical data analysis and interpretation. Topics include experimental design, analysis of variance, multiple regression, exploratory data analysis. Extensive computer use. Honors only.

Prereq: PSY 303.

PSY 420. Psychology and Law. 4 Credits.

Introduction to topics of concern to both psychology and the law. Includes eyewitness identification, legal decision-making, criminal defenses, profiling, polygraphy, and mental-health law.

Prereq: PSY 303.

PSY 433. Learning and Memory. 4 Credits.

Processes underlying learning and memory, including evolution. Topics range from simple forms of behavior change to the acquisition, retention, forgetting, and retrieval of symbolic information.

Prereq: PSY 303; one course from PSY 304, PSY 305.

PSY 436. Human Performance. 4 Credits.

Motor and intellectual capacities; analysis of the flow of information within the nervous system; applications of performance principles to human-machine systems.

Prereq: PSY 303, PSY 305.

PSY 438. Perception. 4 Credits.

Topics covered are color, size, shape, depth, distance, and movement. Examines the relationships between stimuli and perception, stimuli and the neural response, and the neural response and perception.

Prereq: PSY 303, PSY 304.

PSY 445. Brain Mechanisms of Behavior. 4 Credits.

Organization of the mammalian brain. Structure and function of the neuronal systems underlying vision, perception, motivation, coordinated movement, sleep-wakefulness, learning and memory, and affective disorders.

Prereq: PSY 303, PSY 304.

PSY 449. Cognitive Neuroscience. 4 Credits.

Integrative neural mechanisms of normal and abnormal processes in systems (e.g., selective attention, language, memory, object recognition, and emotion).

Prereq: PSY 303, PSY 304.

PSY 450. Hormones and Behavior. 4 Credits.

Relationships among the brain, endocrine systems, and behavior. Developmental effects of hormones on the brain, puberty, sexuality, aggression, stress.

Prereq: PSY 303, PSY 304.

PSY 457. Group Dynamics. 4 Credits.

Topics in small-group dynamics, including decision-making, conflict, and changes over time in group structure and behavior.

Prereq: PSY 303.

PSY 458. Decision-Making. 4 Credits.

Psychological processes involved in judgment and decision-making. Normative theories of ideal behavior contrasted with descriptive analysis of actual behavior.

Prereq: PSY 303.

PSY 459. Cultural Psychology. 4 Credits.

Examines interdependence between mind and culture in substantive domains such as social cognition, motivation, emotion, and psychopathology. Cultural pluralism, collective identities, tolerance, and diversity considered.

Prereq: PSY 303.

PSY 468. Motivation and Emotion. 4 Credits.

Adaptive human behavior; considers biological processes involved in emotions, how emotions interact with cognition, and social influences.

Prereq: PSY 303.

PSY 472. Psychology of Trauma. 4 Credits.

Cognitive, neuropsychological, developmental, social, and clinical approaches to understanding trauma. Includes analysis of childhood trauma, sexual assault, domestic violence, terrorism, combat, and natural disasters.

Prereq: PSY 303.

PSY 473. Intimate Relationships. 4 Credits.

Adult intimacy and love relationships. Clinical-counseling approaches: assessment, couple and family therapies, and evaluation. Models of relationship functioning and the empirical study of interpersonal relationships.

Prereq: PSY 303.

PSY 475. Cognitive Development. 4 Credits.

Intellectual development in children from infancy to adolescence with a focus on early childhood. Topics covered include perception, attention, memory, reasoning, conceptual structure, social cognition.

Prereq: PSY 303; one course from PSY 305, PSY 308.

PSY 476. Language Acquisition. 4 Credits.

How children acquire language from the earliest speech sounds to full sentences. Topics include babbling, first words, word combinations, the relationship between cognition and language development.

Prereq: PSY 303; one course from PSY 305, PSY 308.

PSY 478. Social Development. 4 Credits.

Theoretical issues and empirical studies of social-emotional development. Topics may include attachment, temperament, moral development, family interaction, self-image, aggression, and sex-role development.

Prereq: PSY 303; one course from PSY 306, PSY 307, PSY 308.

PSY 479. Infancy. 4 Credits.

Mechanisms and processes that underlie and promote rapid changes in physical, cognitive, and linguistic capabilities, from birth to 24 months. Covers innovative methodologies and cultural attitudes toward infants.

Prereq: PSY 303; one course from PSY 308, PSY 376.

PSY 480. Development and Psychopathology. 4 Credits.

Biological and environmental factors that shape normal and abnormal development. Analysis of how family functioning affects psychopathology and resilience in children and adolescents.

Prereq: PSY 303; one course from PSY 308, PSY 309.

PSY 490. Honors in Psychology. 1 Credit.

Repeatable. Reading and conference. Repeatable twice for maximum of 3 credits each.

Prereq: Honors psychology majors only.

PSY 491. Honors in Psychology. 1 Credit.

Repeatable. Reading and conference. Repeatable twice for maximum of 3 credits each.

Prereq: Honors psychology majors only.

PSY 492. Honors in Psychology. 1 Credit.

Repeatable. Reading and conference. Repeatable twice for maximum of 3 credits each.

Prereq: Honors psychology majors only.

PSY 503. Thesis. 1-16 Credits.

Repeatable.

PSY 507. Seminar: [Topic]. 1-5 Credits.

Repeatable.

PSY 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

PSY 512. Applied Data Analysis. 4 Credits.

Intermediate-level practical data analysis and interpretation. Topics include experimental design, analysis of variance, multiple regression, exploratory data analysis. Extensive computer use.

PSY 520. Psychology and Law. 4 Credits.

Introduction to topics of concern to both psychology and the law. Includes eyewitness identification, legal decision-making, criminal defenses, profiling, polygraphy, and mental-health law.

PSY 533. Learning and Memory. 4 Credits.

Processes underlying learning and memory, including evolution. Topics range from simple forms of behavior change to the acquisition, retention, forgetting, and retrieval of symbolic information.

PSY 536. Human Performance. 4 Credits.

Motor and intellectual capacities; analysis of the flow of information within the nervous system; applications of performance principles to human-machine systems.

PSY 538. Perception. 4 Credits.

Topics covered are color, size, shape, depth, distance, and movement. Examines the relationships between stimuli and perception, stimuli and the neural response, and the neural response and perception.

PSY 545. Brain Mechanisms of Behavior. 4 Credits.

Organization of the mammalian brain. Structure and function of the neuronal systems underlying vision, perception, motivation, coordinated movement, sleep-wakefulness, learning and memory, and affective disorders.

PSY 549. Cognitive Neuroscience. 4 Credits.

Integrative neural mechanisms of normal and abnormal processes in systems (e.g., selective attention, language, memory, object recognition, and emotion).

PSY 550. Hormones and Behavior. 4 Credits.

Relationships among the brain, endocrine systems, and behavior. Developmental effects of hormones on the brain, puberty, sexuality, aggression, stress.

PSY 557. Group Dynamics. 4 Credits.

Topics in small-group dynamics, including decision-making, conflict, and changes over time in group structure and behavior.

PSY 558. Decision-Making. 4 Credits.

Psychological processes involved in judgment and decision-making. Normative theories of ideal behavior contrasted with descriptive analysis of actual behavior.

PSY 559. Cultural Psychology. 4 Credits.

Examines interdependence between mind and culture in substantive domains such as social cognition, motivation, emotion, and psychopathology. Cultural pluralism, collective identities, tolerance, and diversity considered.

PSY 568. Motivation and Emotion. 4 Credits.

Adaptive human behavior; considers biological processes involved in emotions, how emotions interact with cognition, and social influences.

PSY 572. Psychology of Trauma. 4 Credits.

Cognitive, neuropsychological, developmental, social, and clinical approaches to understanding trauma. Includes analysis of childhood trauma, sexual assault, domestic violence, terrorism, combat, and natural disasters.

PSY 573. Intimate Relationships. 4 Credits.

Adult intimacy and love relationships. Clinical-counseling approaches: assessment, couple and family therapies, and evaluation. Models of relationship functioning and the empirical study of interpersonal relationships.

PSY 575. Cognitive Development. 4 Credits.

Intellectual development in children from infancy to adolescence with a focus on early childhood. Topics covered include perception, attention, memory, reasoning, conceptual structure, social cognition.

PSY 576. Language Acquisition. 4 Credits.

How children acquire language from the earliest speech sounds to full sentences. Topics include babbling, first words, word combinations, the relationship between cognition and language development.

PSY 578. Social Development. 4 Credits.

Theoretical issues and empirical studies of social-emotional development. Topics may include attachment, temperament, moral development, family interaction, self-image, aggression, and sex-role development.

PSY 579. Infancy. 4 Credits.

Mechanisms and processes that underlie and promote rapid changes in physical, cognitive, and linguistic capabilities, from birth to 24 months. Covers innovative methodologies and cultural attitudes toward infants.

PSY 580. Development and Psychopathology. 4 Credits.

Biological and environmental factors that shape normal and abnormal development. Analysis of how family functioning affects psychopathology and resilience in children and adolescents.

PSY 601. Research: [Topic]. 1-21 Credits.

Repeatable.

PSY 602. Supervised College Teaching. 1-3 Credits.

Repeatable.

PSY 603. Dissertation. 1-16 Credits.

Repeatable.

PSY 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

PSY 606. Practicum: [Topic]. 1-16 Credits.

Repeatable.

PSY 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

PSY 609. Terminal Project. 1-12 Credits.

Repeatable.

PSY 610. Experimental Course: [Topic]. 1-21 Credits.

Repeatable.

PSY 611. Data Analysis I. 4 Credits.

Introduction to probability, hypothesis testing, and analysis of variance with applications. Includes training in the statistical analysis of data by computer. With laboratory.

PSY 612. Data Analysis II. 4 Credits.

Multiple regression and advanced topics in analysis of variance. Includes training in the statistical analysis of data by computer. With laboratory.
Prereq: PSY 611.

PSY 613. Data Analysis III. 4 Credits.

Multivariate techniques including MANOVA, factor analysis, principal components. Includes training in the statistical analysis of data by computer. With laboratory.
Prereq: PSY 612.

PSY 614. Fast Program Refinement. 4 Credits.

This course introduces a structured but flexible framework for intervention program development, implementation, and evaluation. Students will explore why change is needed in the field as they learn and practice the Framework's guiding principles (precision, fast-cycle iteration, co-creation, and shared learning).

PSY 615. Community Needs Assessments. 4 Credits.

Explores the formative steps in intervention design and implementation. Introduces key concepts and methods for needs assessments with agencies and individuals serving at-risk communities. Topics include building community partnership and using qualitative research methodology to empirically assess barriers to and facilitators of access to interventions.

PSY 616. Implementation with Community and Cultural Perspectives. 3 Credits.

This course explores essential tools for implementing effective (or evidence-based) programs with fidelity in community settings. Topics include community outreach, diversity science, partnership and co-creation, team science, and models of change.

PSY 618. Substance Use and Addiction. 3 Credits.

Exploration of brain mechanisms underlying motivated behaviors and dysfunctions that lead to addictive behaviors. Topics include neurobiological and psychological effects of addictive drugs, factors that contribute to addiction, societal impacts, the link between addiction and habits, and how this relates to behaviors like pathological gambling.

PSY 619. Intervention Science. 4 Credits.

Exploration of the development and evaluation of evidence-based treatments, the field of implementation science, and culturally competent intervention approaches. Students develop clinical intervention and case conceptualization skills while learning about infant, child, adolescent, adult, and couple focused evidence-based treatments for a variety of disorders.

PSY 620. Psychopathology. 3 Credits.

Definition, measurement, and diagnosis of deviant behavior; includes critical reviews of research on the etiology, intervention, and outcome of major mental disorders.
Prereq: major standing.

PSY 621. Clinical Psychobiology. 3 Credits.

Research and theory from the neurosciences applied to clinical problems and biological therapies.
Prereq: major standing.

PSY 628. Methods of Program Evaluation. 4 Credits.

This course provides full-spectrum coverage of program evaluation. We will cover theory, model testing, experimental design and basic statistical theory and methods. Designed to provide students with tools and techniques they can apply to program development and evaluation within their home organizations.

PSY 629. Methods of Program Measurement. 4 Credits.

This course provides students with an understanding of best practices in quantitative and qualitative measurement. Topics include assessment, psychometrics, validity, and reliability. Students will gain practical tools they can apply to conducting research within social service and related settings.

PSY 630. Translational Neuroscience in Early Childhood. 3 Credits.

Introduction to key concepts and methods of translational neuroscience. Uses a multidisciplinary lens to examine environmental influences on early human development, from the prenatal period through early childhood. Reviews the evidence base for interventions that aim to mitigate risk factors in these critical developmental periods.

PSY 631. Translational Neuroscience in Adolescence. 3 Credits.

Examines neuroscience research on brain structure, function and neuroplasticity specific to adolescent development. Relates principles of adolescent brain development to evidence-based treatments. Topics include the effects of hormones on brain development, increased sensitivity to dopamine in reward seeking, and the neural basis of social cognition.

PSY 632. Translational Neuroscience in Adulthood. 3 Credits.

Examines neuroscience research on brain development and neuroplasticity in adulthood. Emphasizes bidirectional links between neurobiology and behavior and connections to evidence based psychosocial treatment common to aging adult populations. Topics include stress neurobiology, anxiety and depression, substance use, and cognitive function over the adult lifespan.

PSY 672. Trauma Informed Interventions. 3 Credits.

Seminar on the effects of adverse childhood experiences (ACES) and trauma on physical and mental health. Topics include stress-related psychopathology, culture- and trauma-informed clinical intervention, and socio-demographic and cultural factors related to adversity and stress.

PSY 690. Capstone Research. 1-2 Credits.

Faculty-supervised research credits for each quarter in which students conduct their capstone research project, which is embedded in their home agency / employer (minimum 3 terms of 2 units per term). Small group advising allows for faculty-student advising on project enhanced by peer-to-peer advising/mentoring.

PSY 704. Internship: [Topic]. 1-15 Credits.

Repeatable.

Religious Studies

Mark Unno, Department Head

541-346-4971
541-346-4118 fax
311 Susan Campbell Hall
1294 University of Oregon
Eugene, Oregon 97403-1294
religion@uoregon.edu

The Department of Religious Studies offers courses about the teachings and practices of the world's religions from an academic perspective. Courses focus on the history of religions including their origins, sacred texts, rituals and practices, beliefs, and subgroups. These courses provide a broad understanding of the nature and role of religion in the world's many cultures, present and past, for students in all fields, as well as integrated programs for majors in religious studies.

The department annually sponsors two programs, the Ira E. Gaston Lecture in Christianity and the Distinguished Visiting Lecturer in Asian

Religion, which bring eminent scholars to campus for lectures and seminars.

Preparation

The best high school or community college preparation for an undergraduate program in religious studies is a good general background in social science and the humanities.

Careers

An undergraduate major in religious studies can lead to graduate programs in religious studies—either academic or professional—as well as other related areas of graduate studies such as history, sociology, folklore, and various area studies (e.g., Middle East studies, East Asian languages and literatures).

Students with a bachelor of arts in religious studies have had success in various professional fields such as religion, journalism, social work, education, business, and law.

Graduate Studies

In the absence of a graduate program, students may work with faculty members from religious studies as well as other university departments toward an interdisciplinary studies: individualized program master's degree (MA or MS) focusing on religious studies, offered through the Division of Graduate Studies. Information is available in the **Division of Graduate Studies** section of this catalog.

Advanced Degrees in Other Departments

Faculty members in other departments may have a specialty or interest in the study of religion. Students interested in an advanced degree in these areas should apply for admission to graduate study in the relevant department. Prior contact with the faculty member is encouraged. The available degrees, faculty members, and area of specialty are listed below as a guide.

Department	Degree(s)	Specialty	Faculty
Anthropology	PhD (general anthropology MA presupposed)	Comparative religions, religion and symbol in particular cultures	Johanna Richlin
Asian Studies	MA	Buddhism in premodern Japan	Andrew E. Goble (history)
		East Asian religions	Mark Unno (religious studies)
		Religion and thought in premodern China	Ina Asim (history)
Classics	MA	Classical civilization, ancient philosophy and religions in or related to ancient Greece and Rome	Kristen Seaman (art history), Mary K. Jaeger (classics), Steven Shankman (English), Malcolm Wilson (classics)
Folklore	MA		Martha Bayless (English), Daniel N. Wojcik (English)

History	MA, PhD	Reformation	David M. Luebke
History of Art and Architecture	MA, PhD	Buddhist art	Mariachiara Gasparini
		Japanese art	Akiko Walley

Faculty

Faten Arfaoui, instructor (Arabic). BA, 2006, Ibn Charaf; MA, 2010, 2012, Texas Tech. (2014)

Frederick Colby, associate professor (Islam). BA, 1991, Haverford College; MA, 1995, Chicago; PhD, 2002, Duke. (2008)

Hanan Elsherif, senior instructor (Arabic). BA, 1993, MA, 2002, PhD, 2009, Minia. (2011)

Deborah A. Green, associate professor (history and literature of Judaism, biblical studies). BA 1984, Brandeis University; MA 1997, University of Chicago; PhD 2003, University of Chicago. (2003)

Luke Habberstad, assistant professor. BA, 2003, Yale; MA, 2007, PhD, 2014, California, Berkeley. (2014)

David Hollenberg, associate professor (Arabic). BA, 1990, Wesleyan; MA, 1996, California, Santa Barbara; PhD, 2006, Pennsylvania. (2010)

Anne Kreps, assistant professor (biblical studies, history of Christianity). BA, 2003, Michigan; MA, 2005, California, Berkeley; PhD, 2013, Michigan. (2016)

Jeffrey Schroeder, assistant professor (religion and modern Asia). BA, 2005, MA, 2009, Reed; MA, 2009, Duke; PhD, 2015, Duke. (2017)

Stephen J. Shoemaker, professor (history of Christianity). BA, 1991, Emory; MA, 1994, PhD, 1997, Duke. (2000)

Mark T. Unno, associate professor (East Asian religions, Buddhism). BA, 1987, Oberlin; MA, 1991, PhD, 1994, Stanford. (2000)

Emeriti

Judith R. Baskin, professor emerita. BA, 1971, Antioch; PhD, 1976, Yale. (2000)

Hee-Jin Kim, professor emeritus. BA, 1957, MA, 1958, California, Berkeley; PhD, 1966, Claremont. (1973)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Participating

Andrew E. Goble, history

Akiko Walley, history of art and architecture

Anita M. Weiss, international studies

Daniel N. Wojcik, English

- **Bachelor of Arts**
- **Bachelor of Science**
- **Minor in Religious Studies**
- **Minor in Arabic Studies**

Undergraduate Studies

The Department of Religious Studies offers bachelor of arts (BA) and a bachelor of science (BS) degrees. The department also offers minors in religious studies and Arabic studies. Courses used to satisfy major and minor requirements must be taken for letter grades and passed with a mid-C or better.

Bachelor of Arts Degree Requirements

Code	Title	Credits
REL 101–102	World Religions	8
Electives in religious studies or additional courses		8
Upper-division religious studies courses (Must include REL 411)		16
Upper-division courses (see Additional Courses list)		12
Total Credits		44

Honors in Religious Studies

Requirements for a degree with honors in religious studies typically include the following:

1. Satisfaction of the requirements for a major
2. A cumulative grade point average of 3.80 in courses taken to satisfy the major requirements
3. Formal approval of the department

The candidate for honors shall request approval no later than the second week of fall term in the senior year. Students are strongly encouraged to meet with the undergraduate advisor before applying. Application forms are available in the department office.

A faculty committee supervises the honors thesis project. Candidates typically register for 3 credits of Research: [Topic] (REL 401) for both fall and winter terms of the senior year to prepare for writing the thesis. Contingent on satisfactory progress, the candidate then enrolls for 4 credits of Thesis (REL 403) spring term. A first draft of the thesis must be submitted six weeks before the end of spring term and the final draft two weeks after that.

Religious Studies Minor Requirements

Code	Title	Credits
REL 101	World Religions: Asian Traditions	4
REL 102	World Religions: Near Eastern Traditions	4
Religious studies courses		4

Arabic Studies Minor Requirements

Code	Title	Credits
Category I: Third-Year Arabic		
ARB 301–303	Language and Culture	12
Category II: Advanced Arabic		

ARB 331	Reading Classical Arabic	4
An additional course, approved by an advisor		4
Category III: Arabic Culture and Society		
An elective from the following list (or any course with substantial content in Arabic, Middle Eastern, or Islamic studies):		4
ARB 199	Special Studies: [Topic]	
COLT 370	Comparative Comics	
COLT 462	Cultural Intersections: [Topic] (Orientalism)	
COLT 470	Studies in Identity: [Topic] (Multiculturalism and Empire)	
GEOG 209	Geography of the Middle East and North Africa	
HIST 199	Special Studies: [Topic] (The Iraq War; Islamic Civilization I or II; Islam in the Modern World)	
HIST 399	Special Studies: [Topic] (The Iraq War)	
GLBL 399	Special Studies: [Topic]	
GLBL 407	Seminar: [Topic]	
GLBL 423	Development and the Muslim World	
J 467	Issues in International Communication: [Topic] (The Arab World and the Media)	
PS 399	Special Studies: [Topic] (Egypt; Politics of the Middle East)	
REL 102	World Religions: Near Eastern Traditions	
REL 233	Introduction to Islam	
REL 324–325	History of Eastern Christianity	
REL 335	Introduction to the Qur'an	
REL 432	Islamic Mysticism: [Topic]	
TA 472	Multicultural Theater: [Topic] (Arab American Theater)	
Total Credits		24

Modified Requirements for Students with Prior Literacy in Arabic

Students who already have skills that satisfy the equivalent of the ARB 301–303 third-year sequence—whether from native proficiency, study abroad, or courses from another university—may choose to test out of one or more of these courses by passing a proficiency examination, administered by the UO Testing Center, designed to demonstrate basic literacy in Arabic. If students wish to transfer their third-year Arabic courses from other universities or from overseas study, they may do so contingent on the successful completion of an examination at the appropriate level, to ensure proper placement.

Students who pass the proficiency exam must still complete 24 credits for the minor in Arabic studies, including at least 12 from among Category II courses and up to 12 from among Category III electives.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Arabic Courses

ARB 101. First-Year Arabic. 5 Credits.

Introduction to Arabic with emphasis on speaking, reading, writing, and comprehension. Sequence with ARB 102, ARB 103.

ARB 102. First-Year Arabic. 5 Credits.

Introduction to Arabic with emphasis on speaking, reading, writing, and comprehension. Sequence with ARB 101, ARB 103.

Prereq: ARB 101.

ARB 103. First-Year Arabic. 5 Credits.

Introduction to Arabic with emphasis on speaking, reading, writing and comprehension. Sequence with ARB 101, ARB 102.

Prereq: ARB 102

ARB 199. Special Studies: [Topic]. 1-10 Credits.

Repeatable.

ARB 201. Second-Year Arabic. 5 Credits.

Development of Arabic speaking, reading, writing and comprehension; study of short literary and cultural materials. Sequence with ARB 202, ARB 203.

Prereq: ARB 103 or equivalent.

ARB 202. Second-Year Arabic. 5 Credits.

Development of Arabic speaking, reading, writing, and comprehension; study of short literary and cultural materials. Sequence with ARB 201, ARB 203.

Prereq: ARB 201 or equivalent.

ARB 203. Second-Year Arabic. 5 Credits.

Development of Arabic speaking, reading, writing, and comprehension; study of short literary and cultural materials. Sequence with ARB 201, ARB 202.

Prereq: ARB 202 or equivalent.

ARB 301. Language and Culture. 4 Credits.

Provides third-year-level Arabic proficiency and substantially adds to the vocabulary base. Activates and augments grammar structures of modern spoken Arabic, colloquial Egyptian Arabic, and the study of Arabic culture. Sequence with ARB 302, ARB 303.

Prereq: ARB 203.

ARB 302. Language and Culture. 4 Credits.

Provides third-year-level Arabic proficiency and substantially adds to the vocabulary base. Activates and augments grammar structures of modern spoken Arabic, colloquial Egyptian Arabic, and the study of Arabic culture. Sequence with ARB 301, ARB 303.

Prereq: ARB 301.

ARB 303. Language and Culture. 4 Credits.

Provides third-year-level Arabic proficiency and substantially adds to the vocabulary base. Activates and augments grammar structures of modern spoken Arabic, colloquial Egyptian Arabic, and the study of Arabic culture. Sequence with ARB 301, ARB 302.

Prereq: ARB 302.

ARB 331. Reading Classical Arabic. 4 Credits.

Improves students' abilities to work with classical Arabic texts; serves as a gateway to other classical Arabic text courses.

Prereq: ARB 202 or equivalent.

ARB 353. Arab Cinema. 4 Credits.

Introduction to Arab cinema and culture through an examination of the development of cinema in Arabic-speaking countries. Offered alternate years.

ARB 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

ARB 405. Reading and Conference: [Topic]. 1-5 Credits.

Repeatable.

ARB 406. Practicum: [Topic]. 1-12 Credits.

Repeatable.

ARB 407. Seminar: [Topic]. 1-5 Credits.

Repeatable.

ARB 409. Terminal Project. 1-12 Credits.

Repeatable.

ARB 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

ARB 507. Seminar: [Topic]. 1-5 Credits.

Repeatable.

ARB 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

ARB 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

Religious Studies Courses

REL 101. World Religions: Asian Traditions. 4 Credits.

Introduction to related religious traditions of Asia, including Hinduism, Buddhism, Daoism, Confucianism and Shinto. Readings in sacred texts and scholarly literature. Lecture, discussion.

REL 102. World Religions: Near Eastern Traditions. 4 Credits.

Introduction to the Abrahamic religions of Judaism, Christianity, Islam and to related traditions such as the Zoroastrian, Manichaean, Mandaean, Baha'i. Lecture, discussion.

REL 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

REL 200M. Temp Multilist Course. 4 Credits.**REL 211. Early Judaism. 4 Credits.**

Development of the Jewish religion from its earliest existence until the Christian era.

REL 222. Introduction to the Bible I. 4 Credits.

Content and organization of the Hebrew scriptures (Old Testament); examination of scholarly methods and research tools used in biblical studies.

REL 223. Introduction to the Bible II. 4 Credits.

Examination of the written traditions of early Christianity with an emphasis on the New Testament.

REL 233. Introduction to Islam. 4 Credits.

Islamic religious tradition, beginnings to present. Pre-Islamic Arabia, Prophet Muhammed, pillars of Islam, ethics and piety, Sunni-Shiite divide, reform and renewal movements.

REL 302. Chinese Religions. 4 Credits.

Prehistoric roots of Chinese religion, Confucius and his followers, philosophical Taoism, Han Confucianism, religious Taoism, Chinese Buddhism, Neo-Confucianism, religion in China today.

REL 303. Japanese Religions. 4 Credits.

Early Shinto and its developments, Japanese Buddhism, transformation of Taoism and Confucianism, medieval Shinto, religion in the Tokugawa period, Nationalistic Shinto, folk religion, new religions.

REL 317. Jesus and the Gospels. 4 Credits.

Considers early evidence for Jesus, including canonical and noncanonical gospels, in light of critical scholarship and historical reconstructions.

REL 321. History of Christianity. 4 Credits.

Course of Christian history in East and West; relations between spirituality, doctrine, and institutional forms. Covers the ancient period, from the Apostolic Fathers to the Islamic conquests (90–650).

REL 322. History of Christianity. 4 Credits.

Course of Christian history in East and West; relations between spirituality, doctrine, and institutional forms. Covers medieval Western Christianity, from the Germanic invasions to the Reformation (400–1500).

REL 324. History of Eastern Christianity. 4 Credits.

Byzantine Christianity from the founding of the Christian Roman Empire to the Fall of Constantinople in the 15th century.

REL 335. Introduction to the Qur'an. 4 Credits.

An introduction to the nature of the Qur'an and the various ways it has been interpreted throughout history by both Muslims and non-Muslims.

REL 353. Dark Self, East and West. 4 Credits.

Comparative examination of selfhood in Eastern and Western religious thought and cultural contexts. Focus on dark side or problematic dimensions of Buddhist, Christian, Daoist, Jewish, and other thought.

REL 355. Mysticism. 4 Credits.

The experiential or mystical dimensions of the three major Abrahamic faiths. Exploration of the original writings of men and women from each spiritual tradition.

REL 357. War, Terrorism, and Religion. 4 Credits.

Offers an examination of the theme of war, terrorism, and religion, focusing on cases of religiously motivated acts of violence in the contemporary era.

REL 359. Religion After Atheism. 4 Credits.

Atheist critiques of religion, analyses of secularism from multiple disciplinary perspectives, and responses to atheism and secularism by modernist Christian, Muslim, and Buddhist writers.

REL 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

REL 401. Research: [Topic]. 1-4 Credits.

Repeatable.

REL 403. Thesis. 1-4 Credits.

Repeatable.

REL 405. Reading and Conference: [Topic]. 1-4 Credits.

Repeatable.

REL 407. Seminar: [Topic]. 1-4 Credits.

Repeatable.

REL 408. Workshop: [Topic]. 1-12 Credits.

Repeatable.

REL 409. Terminal Project. 1-12 Credits.

Repeatable.

REL 410. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

REL 411. Making Sense of Religion. 4 Credits.

History of the study of religion, from the late 19th century to the present, as an expression of society, agent of oppression, psychological experience, symbolic system, and Western concept. Junior standing required.

REL 414. Biblical Book: [Topic]. 4 Credits.

Close reading of one or more books of the Judeo-Christian Bible in literary, historical, and cultural contexts; history of interpretation; and critical scholarship. Repeatable twice when topic changes for a maximum of 12 credits.

REL 417. New Religious Movements. 4 Credits.

This course offers a deep exploration of New Religious Movements both ancient and modern. How are New Religious Movements born? What determines whether they grow, thrive, and die? Through a survey of biblically based new religions, we will analyze the formation of New Religious Movements.

REL 432. Islamic Mysticism: [Topic]. 4 Credits.

Inner dimensions of Islamic piety and righteousness, from the Koranic and prophetic foundations to principal thinkers in the medieval Arabic and Persian Sufi traditions. Repeatable twice for a maximum of 12 credits.

REL 440. Readings in Buddhist Scriptures. 4 Credits.

Readings in representative scriptures in English translation. Selection based on their import in development of Indian Buddhist philosophy and their impact on evolution of East Asian forms of Buddhism.

REL 444. Medieval Japanese Buddhism. 4 Credits.

Medieval Japanese Buddhism of the 12th and 13th centuries. Examination of religious thought and cultural history including Zen and Pure Land.

REL 507. Seminar: [Topic]. 1-4 Credits.

Repeatable.

REL 508. Workshop: [Topic]. 1-12 Credits.

Repeatable.

REL 510. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

REL 511. Making Sense of Religion. 4 Credits.

History of the study of religion, from the late 19th century to the present, as an expression of society, agent of oppression, psychological experience, symbolic system, and Western concept.

REL 514. Biblical Book: [Topic]. 4 Credits.

Close reading of one or more books of the Judeo-Christian Bible in literary, historical, and cultural contexts; history of interpretation; and critical scholarship. Repeatable twice when topic changes for a maximum of 12 credits.

REL 517. New Religious Movements. 4 Credits.

This course offers a deep exploration of New Religious Movements both ancient and modern. How are New Religious Movements born? What determines whether they grow, thrive, and die? Through a survey of biblically based new religions, we will analyze the formation of New Religious Movements.

REL 532. Islamic Mysticism: [Topic]. 4 Credits.

Inner dimensions of Islamic piety and righteousness, from the Koranic and prophetic foundations to principal thinkers in the medieval Arabic and Persian Sufi traditions. Repeatable twice for a maximum of 12 credits.

REL 540. Readings in Buddhist Scriptures. 4 Credits.

Readings in representative scriptures in English translation. Selection based on their import in development of Indian Buddhist philosophy and their impact on evolution of East Asian forms of Buddhism.

REL 544. Medieval Japanese Buddhism. 4 Credits.

Medieval Japanese Buddhism of the 12th and 13th centuries. Examination of religious thought and cultural history including Zen and Pure Land.

REL 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

REL 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

REL 609. Terminal Project. 1-16 Credits.

Repeatable.

Romance Languages

David Wacks, Department Head

541-346-4021
541-346-4030 fax
119 Friendly Hall
1233 University of Oregon
Eugene, Oregon 97403-1233

The Department of Romance Languages offers an extensive range of courses and degree programs, from instruction in beginning languages through the study of the literatures and cultures of French-, Italian-, Portuguese-, and Spanish-speaking countries. Students can earn a bachelor of arts (BA) degree in French, Italian, Spanish, or Romance languages; the master of arts (MA) is also available in these areas. The doctor of philosophy (PhD), is awarded in either Spanish or Romance languages (RL). The RL PhD encompasses a primary language and literature and a supporting area. Romance languages is a liberal-arts major, providing a valuable background for students interested in graduate work, teaching, and a wide array of other professional and international careers that require strong analytical and communication skills.

Preparation

The department recommends the following preparation for study leading to a major in any of the Romance languages:

1. As much work as possible in the student's major language. Knowledge of a second Romance language is helpful but not required
2. Knowledge of the history, geography, and politics of the areas where the student's major language is spoken
3. Communication skills, speech, and essay writing that help the student convey ideas logically. In literature and film courses, papers or essay examinations are generally required
4. Experience in literary and cultural studies and linguistics

Careers

Students who graduate with a bachelor of arts degree in Romance languages typically enter a variety of occupations. Language teaching is an obvious possibility. Proficiency in a second language and knowledge of other cultures enhances study and career opportunities in other areas as well. Romance languages majors, especially those who have a second major in another discipline (e.g., art history, business administration, economics, family and human services, history, international studies, journalism, music, or political science) find positions in communications media, government foreign service, international business and law, libraries, social service organizations, and travel and tourist-related agencies, among others.

Faculty

Faculty members in the Department of Romance Languages actively participate in other UO interdisciplinary programs and departments (e.g., African studies, cinema studies, comparative literature, European studies, Latin American studies, linguistics, medieval studies, and women's and gender studies). For descriptions, see those sections of this catalog.

Scholarships

The department administers scholarships for undergraduate and graduate students of Romance languages:

- The Beall Graduate Dissertation Scholarship is awarded to doctoral students to support dissertation writing
- The Françoise Calin scholarship is awarded every year to a French major or minor
- The Leona M. Kail Scholarship supports studies in the Department of Romance Languages (Offered on alternate years.)
- Wayne Andre Gottshall Fund supports undergraduate students in studies in the Department of Romance Languages
- The Emmanuel Hatzantonis Scholarship is awarded every year to a Romance languages major or minor who is studying in Italy with the university's overseas study program
- Dr. Carl L. Johnson Scholarship supports studies in the Department of Romance Languages with preference to French majors.
- The Helen Fe Jones Spanish Student Fellowship supports study abroad in a Spanish-speaking country
- The Perry J. Powers Scholarship is awarded annually to an outstanding Romance languages student
- The Charles Stickles Endowment Scholarship is awarded for study in a Spanish-speaking country

- Nicolette B. Weicker Memorial Scholarship is awarded with preference to students specializing in French or Italian.
- The James T. and Mary Alice Wetzels Graduate Scholarship is awarded every year to an outstanding graduate student in the Department of Romance Languages

More information may be obtained from the department office in early January or on the department website, rl.uoregon.edu/scholarships (<http://rl.uoregon.edu/scholarships/>).

Faculty

Maria Licia Aldana Rogers, instructor I (Spanish); BA,

Rafael Arias, senior instructor I (Spanish); BA, 2009, MA, 2011, Oregon (2011)

Jeffrey Contreras, instructor I (Spanish); BA, 2001, Oregon State, MA, 2009, Oregon. (2010)

Amy Costales, senior instructor I (Spanish). BA, 1993, State University of New York, Cortland; MA, 2009, Oregon. (2007)

Lillian Darwin Lopez, senior instructor I (Spanish). BA, 2001, MA, 2007, Oregon. (2007)

Robert L. Davis, professor (methodology and pedagogy, Spanish and Romance linguistics). BA, 1983, Southern Mississippi; MA, 1987, PhD, 1991, North Carolina, Chapel Hill. (1991)

Lauretta De Renzo-Huter, senior instructor (Italian); supervisor and coordinator, first-year Italian programs. Laurea in Lingue e Letterature Starniere Moderne, 1988, Torino; MA, 1992, PhD, 2001, Oregon. (2019)

Juanita Devereaux, senior instructor II (Spanish). BA, 1999, MA, 2001, Oregon. (2001)

Connie Dickey, senior instructor I (French); supervisor-coordinator, first-year French program. BA, 1979, Portland; MA, 1981, Seattle; PhD, 1991, California, Berkeley. (2014)

André Djiffack, associate professor (Francophone literatures, 20th-century French literature, colonial and postcolonial studies). BA, 1987, Maîtrise, 1988, Doctorat de 3e Cycle, 1992, Yaoundé; PhD, 1998, Cape Town. (2000)

Paula Ellister, senior instructor II (Spanish); supervisor and coordinator, first-year Spanish program. BA, 1992, MA, 1994, Oregon. (1994)

Cecilia Enjuto Rangel, associate professor (Spanish and Latin American poetry, transatlantic studies, gender and literary theory). BA, 1998, Universidad de Puerto Rico; MA, 2002, PhD, 2005, Yale. (2005)

Pedro García-Caro, associate professor (19th- and 20th-century literatures of the Americas, postcolonial studies, literary theory). Licenciatura, 1995, Murcia; BA, 1996, Roehampton; MA, 1997, PhD, 2004, University College, London. (2006)

Diana Garvin, assistant professor (Mediterranean studies). AB, 2006, Harvard; PhD, 2016, Cornell. (2019)

Amalia Gladhart, professor (20th-century Latin American literature, theater, feminist studies). BA, 1989, Michigan State; PhD, 1995, Cornell. (1995)

Devin Grammon, assistant professor (Spanish socio-linguistics). BA, 2010; University of Northern Colorado; MA, 2012, University of Colorado, Boulder; PhD 2018, The Ohio State University, Columbus (2018)

Paulo Henriquez, instructor (Spanish); licenciado en castellano, 2000, Universidad Austral de Chile; MA, 2005, PhD, 2012, Oregon. (2012)

Gina Herrmann, associate professor (contemporary Spanish literature, politics and culture, autobiographical studies, gender studies). BA, 1990, Cornell; MA, 1993, Columbia; PhD, 1998, Cornell. (2002)

Nathalie Hester, associate professor (French and Italian Renaissance and baroque literature and culture, travel literature). BA, 1992; MA 1993; PhD, 2001, Chicago. (2001)

Harinder Kaur Khalsa, senior instructor (Italian). BA, 1991, Istanbul; MA, 1996 and 1998, Oregon. (1999)

Kelley León Howarth, senior instructor II (Spanish); cohead, undergraduate advising. BA, 1995, Wisconsin, Eau Claire; MA, 2002, Oregon. (2002)

Sergio Loza, Assistant professor (Spanish heritage language education, Spanish socio-linguistics) BA, 2013, Arizona State University; PhD, 2019, Arizona State University. (2019)

Leah Middlebrook, associate professor (early modern Spanish and French literature and culture, lyric poetry, comparative literature). See **Comparative Literature**.

Lanie Millar, associate professor (20th- and 21st-century Caribbean and Latin American literature, Luso-African literature, global south studies). BA, 2002, Baylor; MA, 2003, Middlebury College; PhD, 2011, Texas, Austin. (2013)

Fabienne Moore, associate professor (French Enlightenment, prose poetry, contemporary France). License, 1987, Toulouse—Le Mirail; PhD, 2001, New York University. (2000)

Heather Quarles, senior instructor II (Spanish). BA, 2000, MA, 2003, Oregon. (2001)

Sergio Rigoletto, associate professor (European cinema, popular culture, gender studies). Laurea, 2002, Catania; MA, 2004, Birkbeck, London; PhD, 2010, Reading. (2012)

Andrew Rothgery, senior instructor II (Spanish). BA 1991, MA, 1994, Oregon. (1994)

Maria Benedita Santos, senior instructor I (Portuguese). BA, 1974, Federal University of Maranhão; MA, 2007, Oregon. (2012)

Jésus Sepúlveda, senior instructor I (Spanish). BA, 1995, Universidad Metropolitana de Ciencias de la Educación; MA, 1997, PhD, 2003, Oregon. (2008)

Analisa Taylor, associate professor (Mexican literary and social history). BA, 1992, Oregon; MA, 1996, PhD, 2002, Duke. (2002)

Claudia Ventura, senior instructor I (Italian). supervisor and coordinator, second-year Italian. Laurea, 1995, Bologna; MA, 2006, Ca' Foscari, Venice. (2005)

David Wacks, professor (medieval Iberian literature and culture, Sephardic studies). BA, 1991, Columbia; MA, 1997, Boston College; PhD, 2003, California, Berkeley. (2003)

Nathan Whalen, senior instructor II (Spanish). BA, 1999, MA, 2001, Oregon. (2001)

Melanie Williams, senior instructor II (French); cohead, undergraduate advising. BA, 1992, MA, 1996, Oregon. (1996)

Alex Zunterstein, senior instructor II (Spanish). BA, 2000, MA, 2002, Oregon. (2002)

Emeriti

Alexandre Albert-Galtier, associate professor emeritus. Licence, 1981, DEA, 1983, PhD, 1988, Lyon II. (1994)

Randi M. Brox, professor emerita. Cand. Philol., 1960, Oslo; PhD, 1965, Illinois. (1965)

Françoise G. Calin, professor emerita. Licence, 1963, Diplôme d'Études Supérieures, 1964, CAPES, 1966, Sorbonne; PhD, 1972, Stanford. (1973)

Nadia Ceccacci, senior instructor emerita (Italian). Corso di laurea in Lingue e Letterature Straniere, 1981, Università degli Studi di Perugia; MA, 1986, Oregon. (1989)

Richard H. Desroches, associate professor emeritus. BA, 1947, Clark; PhD, 1962, Yale. (1957)

Juan A. Epple, professor emeritus. Licenciante, 1971, Chile; MA, 1977, PhD, 1980, Harvard. (1980)

Leonardo García-Pabón, professor emeritus (colonial Latin American literature, contemporary Latin American poetry, literary theory). BS, 1980, Universidad Mayor de San Andrés; MA, 1981, Université Catholique de Louvain; PhD, 1990, Minnesota, Twin Cities. (1990)

Sylvia Giustina, senior instructor emerita. BA, 1956, Marylhurst; MA, 1966, Oregon. (1968)

Evlyn Gould, professor emerita. BA, 1975, California, Irvine; MA, 1977, PhD, 1983, California, Berkeley. (1983)

Mónica Lara, senior instructor emerita (Spanish). BA, 1982, MA, 1992, Oregon. (1992) Massimo Lollini, professor emeritus. Laurea, 1978, Bologna; PhD, 1992, Yale. (1992)

Elisabeth A. Marlow, associate professor emerita. Diplôme, 1953, Hautes Études Commerciales, Paris; MA, 1958, PhD, 1966, Oregon. (1958)

Karen McPherson, professor emerita. BA, 1970, Oregon; MA, 1983, PhD, 1987, Yale. (1998)

Rosario Murcia, senior instructor emerita (Spanish); supervisor-coordinator, second-year Spanish program. BA, 1984, Alicante; MA, 1988, Oregon. (1988) Barbara D. May, associate professor emerita. BA, 1972, MA, 1973, PhD, 1975, Utah. (1976)

Amanda W. Powell, senior lecturer emerita. BA, 1977, Yale; MA, 1983, Boston University. (1991)

F. Regina Psaki, professor emerita. BA, 1980, Dickinson; MA, 1986, PhD, 1989, Cornell. (1989)

Steven Rendall, professor emeritus. BA, 1961, Colorado; PhD, 1967, Johns Hopkins. (1967)

Wolfgang F. Sohlich, associate professor emeritus. BA, 1959, Johns Hopkins; MA, 1970, PhD, 1971, Emory. (1970)

Gloria Zabala, senior instructor emerita (Spanish). BA, 1983, MA, 1989, Oregon. (1989)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

- **Bachelor of Arts: French**
- **Bachelor of Arts: Italian**
- Bachelor of Arts: Spanish (p. 493)
- **Bachelor of Arts: Romance Languages**
- **Minor: French**
- **Minor: Italian**
- **Minor: Spanish**

Undergraduate Studies

Programs leading to undergraduate degrees are offered in French, Italian, Spanish, and Romance languages (a major that combines advanced study in two languages). Students concentrate on the languages, literatures, and cultures of the Romance world, both modern and historical. They work on understanding, speaking, reading, and writing the modern language; they also focus on the historical roots of these languages and cultures, and on their writings—fiction, poetry, film, theater, criticism, and nonfiction.

To get exposure to the cultures of the countries where Romance languages are spoken, students are urged to study abroad. Visit the department website (<http://rl.uoregon.edu/study-abroad/>) for more information.

Students who intend to pursue graduate work in Romance languages are advised to begin a second Romance language early in their studies. Courses in English and other literatures are also recommended. A goal of the department is to give students a thorough view of the cultures of the countries where Romance languages are spoken.

Major Requirements

Students are urged to consult their faculty advisors regularly to create balanced programs and avoid mistakes in course selection.

French, Italian, or Spanish

Courses for the major must be taught in the target language and address the target culture; readings in courses taken for the major must be in the target language. Internship credits, always taken pass/no pass, do not apply toward major or minor requirements. Courses must be passed with grades of C– or better beyond the second-year language sequence.

Bachelor of Arts: French

Code	Title	Credits
FR 301	Culture et langage: la France contemporaine	4
FR 302	Culture et langage: Le monde francophone contemporain	4
Select three of the following, or their equivalent:		12

FR 312	French Survey: Francophone Literature ¹	
FR 317	French Survey: Medieval and Renaissance	
FR 318	Monarchy, Liberty, Revolution	
FR 319	French Survey: 19th and 20th Centuries	
FR 416	Advanced Writing in French	4
or FR 425	French-English Translation	
	330-level or higher French literature, film, or translation courses ²	12
	Upper-division French electives taught in French ³	12
Total Credits		48

¹ Students who have already taken *Culture et langage: identités francophones* (FR 303) cannot receive credit for French Survey: Francophone Literature (FR 312).

² Taught in residence on the Eugene campus. At least 8 credits must be at the 400 level.

³ May include FR 150. Must address the cultures of the French-speaking world (e.g., courses in literature, language, culture, film).

Bachelor of Arts: Italian

Code	Title	Credits
ITAL 301	Cultura e lingua: l'Italia contemporanea	4
ITAL 303	Cultura e lingua: societa, economia, politica	4
ITAL 307	Oral Skills ((twice) or another 300-level language course)	4
ITAL 317–319	Italian Survey	12
	Italian literature courses beyond the surveys. ¹	12
	Upper-division Italian electives taught in Italian ²	12
Total Credits		48

¹ Taught in residence on the Eugene campus. At least 8 credits must be at the 400 level.

² Courses must be upper-division, taught in Italian and address the cultures of the Italian-speaking world (e.g. courses in literature, language, culture, film, etc.)

Bachelor of Arts: Spanish with Literature and Culture Concentration

Code	Title	Credits
Lengua y cultura		
Two from the following:		8
SPAN 301	Cultura y Lengua: Identidades Hispanas	
SPAN 303	Cultura y lengua: expresiones artisticas	
SPAN 305	Cultura y lengua: cambios sociales	
SPAN 308	Cultura y lengua: comunidades bilingues	
Advanced Writing		
SPAN 311	Advanced Writing in Spanish ¹	4
or SPAN 312	Spanish in the Media	
Survey Courses		
Three from the following:		12
SPAN 341	Hispanic Cultures through Literature I	
SPAN 342	Hispanic Cultures through Literature II	
SPAN 343	Hispanic Cultures through Literature III	
SPAN 344	Hispanic Cultures through Literature IV	

SPAN 350	Introduction to Poetry	
SPAN 351	Introduction to Theater	
SPAN 353	Introduction to Narrative	

Expertise and Mastery

Three courses in literature, film, or translation in Spanish: one from SPAN 348 or above; two from SPAN 407, SPAN 436, or above. One course may be RL 407 or LAS 407.

Electives

Upper-division courses in literature, film, or linguistics, taught in Spanish, that address the cultures of the Spanish-speaking world ²

Experiential Learning

Academic experience that involves using the Spanish language outside the classroom ³

Total Credits **48**

¹ Students cannot receive credit for both SPAN 311 and SPAN 312.

² May include up to 4 lower-division credits from LAS 200, SPAN 150, SPAN 238, or SPAN 248 or SPAN 299.

³ Must involve at least 30 hours of work per term.

Bachelor of Arts: Spanish with Language and Society Concentration

Code	Title	Credits
Lengua y cultura		
SPAN 308	Cultura y lengua: comunidades bilingues	4
One from the following:		4
SPAN 301	Cultura y Lengua: Identidades Hispanas	
SPAN 303	Cultura y lengua: expresiones artisticas	
SPAN 305	Cultura y lengua: cambios sociales	
Advanced Writing		
SPAN 311	Advanced Writing in Spanish ¹	4
or SPAN 312	Spanish in the Media	
Survey Courses		
SPAN 320	Intensive Spanish Grammar Review	4
SPAN 322	Introduction to Hispanic Linguistics	4
SPAN 324	Spanish Pronunciation and Phonetics	4

Expertise and Mastery

Three from the following: ²

SPAN 348	United States Latino Literature and Culture	
SPAN 420	Spanish Linguistics: [Topic]	
SPAN 424	History of the Spanish Language	
SPAN 425	Literary Translation	
SPAN 428	Spanish in the United States	

Electives

Upper-division courses in literature, film, or linguistics, taught in Spanish, that address the cultures of the Spanish-speaking world ³

Experiential Learning

Academic experience that involves using the Spanish language outside the classroom ⁴

Total Credits **48**

- ¹ Students cannot receive credit for both SPAN 311 and SPAN 312
- ² One course may be RL 407 or LAS 407, with course work in the target language; student should discuss with an advisor.
- ³ May include up to 4 lower-division credits from LAS 200, SPAN 150, SPAN 151, SPAN 238, SPAN 248, or SPAN 299
- ⁴ Must involve at least 30 hours of work per term.

Romance Languages

Romance languages majors must complete a minimum of 12 credits in literature, film, translation, and/or linguistics courses on the Eugene campus. At least 8 credits of these 12 must be in courses numbered 407 or higher.

Bachelor of Arts: Romance Languages

Code	Title	Credits
First Romance Language		
Language courses		12
Literature survey sequence for French, Italian, or Spanish: ¹		12
Three of the following in French:		
FR 312	French Survey: Francophone Literature ²	
FR 317	French Survey: Medieval and Renaissance	
FR 318	Monarchy, Liberty, Revolution	
FR 319	French Survey: 19th and 20th Centuries	
Three of the following in Italian:		
ITAL 317	Italian Survey: Medieval and Renaissance	
ITAL 318	Italian Survey: Baroque and Enlightenment	
ITAL 319	Italian Survey: 19th and 20th Centuries	
Spanish Literature and Culture Concentration (three of the following):		
SPAN 341	Hispanic Cultures through Literature I	
SPAN 342	Hispanic Cultures through Literature II	
SPAN 343	Hispanic Cultures through Literature III	
SPAN 344	Hispanic Cultures through Literature IV	
Spanish Language and Society Concentration:		
SPAN 320	Intensive Spanish Grammar Review	
SPAN 322	Introduction to Hispanic Linguistics	
SPAN 324	Spanish Pronunciation and Phonetics	
Additional literature, film, linguistics, or translation courses		8
Second Romance Language		
Language courses		8
Courses in literature, film, linguistics, or translation		8
Total Credits		48

- ¹ For the Spanish survey, choose only **one** of the two concentrations: Literature and Culture **or** Language and Society.
- ² Students who have already taken *Culture et langage: identités francophones* (FR 303) cannot receive credit for French Survey: Francophone Literature (FR 312).

Departmental Honors

Approval for graduation with honors is granted to any student who meets one of the following requirements:

1. Maintains at least a 4.00 grade point average (GPA) in all upper-division department course work and at least a 3.50 GPA overall, **or**

2. Maintains at least a 3.75 GPA in all upper-division department course work and at least a 3.50 GPA overall, and submits an honors thesis written under the guidance of a Romance languages faculty thesis advisor. The thesis adviser determines whether the thesis is acceptable and may require the student to register for up to 6 pass/no pass (P/N) credits in Thesis (FR, ITAL, SPAN 403)

If a student wishes to apply for honors by submitting an honors thesis, the application for graduation with honors must be submitted by the end of the term that immediately precedes the term of graduation. If a student is planning on graduating in the spring term, they must apply for graduation through their departmental advisor during the winter term.

Transfer credits and overseas-study work used to fulfill major graduation requirements are typically included in determining the major GPA.

Minor Requirements

Students may earn a minor in French, Italian, or Spanish. Courses taken for the minor must be passed with grades of C– or better and must be in the target language and address the target culture. Further details are available on the department website.

Minor in French

Code	Title	Credits
Upper-division language courses		12

Upper-division electives taught in Spanish ²		4
Total Credits		28

¹ Must be taught on the Eugene campus.

² Courses must be upper-division, taught in Spanish and address the cultures of the Spanish-speaking world (e.g. courses in literature, linguistics, language, culture, film, etc.)

Study Abroad

One of the best ways to learn a language and its culture is the experience of immersion in it. The Department of Romance Languages strongly encourages students to participate in one of the numerous study-abroad programs that the UO offers. Visit the department website (<http://rl.uoregon.edu/study-abroad/>) for more information.

The department sponsors programs for the study of French, Italian, Portuguese, and Spanish languages and cultures. Students live, study, and travel in Europe, Africa, and the Americas, in countries such as Argentina, Bolivia, Brazil, Ecuador, France, Italy, Mexico, Morocco, Peru, Senegal, and Spain. Cosponsoring programs include IE₃ Global, the Council on International Educational Exchange, the School for International Training, and the National Student Exchange.

To ensure success in goals of language and cultural study, majors and minors in the department need to identify the program that best fits their academic requirements, financial situation, and personal interests. The list of programs posted on the department website is recommended based on their outstanding academic, linguistic, and cultural opportunities and strong on-site support.

Before traveling abroad, students should consult their assigned major or minor advisor about the selection of a program and the courses to be taken within that program.

Tips for Selecting a Study-Abroad Program

- Choose a program that offers a maximum of immersion (e.g., living with host families or local students, course work entirely in the target language, direct university enrollment opportunities)

- Longer programs offer you more opportunity to acclimate to the language, to be more fully immersed in the local culture, and to form meaningful relationships with people from the host country
- Courses in which the readings and lectures are in English **do not** count toward majors or minors in the Department of Romance Languages or the UO bachelor of arts second-language requirement
- Students in all UO overseas study programs enroll in courses with subject codes that are unique to individual programs. Special course numbers are reserved for overseas study. Advisors can help students determine course equivalencies to maximize the credits applied to requirements for the degree
- The department offers scholarships to help students with travel expenses for language learning and research projects. For more information, visit the scholarships page (<http://rl.uoregon.edu/scholarships/>).

For additional information and to obtain applications for specific programs, contact the Office of International Affairs at (541) 346-3206. For questions on applying study-abroad credit to majors or minors, students should visit their assigned departmental advisor.

Cultural Ambassador Program in Spain

The Ministry of Education of Spain offers more than 1,200 openings for U.S. and Canadian language and culture assistants (termed “cultural ambassadors”). The positions are offered in Spain’s equivalent of the K–12 school system of public education.

Teaching Assistant Program in France

This program is coordinated by the French Embassy and offers 1,500 positions for native English speakers with a demonstrated knowledge of French to teach and its overseas department in France, to assist French teachers with English courses for a period of six to nine months, or both. The positions are offered in elementary and high schools (*écoles primaire, collèges, and lycées*). This is an excellent opportunity for graduating seniors with interest in education and experience abroad. It is open to United States citizens or permanent residents under 29 years of age with a demonstrated knowledge of French—not just majors or minors. The Department of Romance Languages does not administer the program, but simply offers guidance to interested students, and gives information and advice on the application process and on the program itself.

Kindergarten through Secondary School Teaching Careers

Students who complete a degree with a major in French, Spanish, or Romance languages are eligible to apply for the College of Education’s fifth-year licensure program in middle-secondary teaching. Students may also apply to the fifth-year licensure program to become an elementary teacher. More information is available from the department’s education advisor, Robert Davis; see also the **College of Education** section of this catalog.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Graduate Studies

The Department of Romance Languages offers programs of study leading to the degree of master of arts (MA) in Romance languages,

French, Italian, or Spanish and to the degree of doctor of philosophy (PhD) in Romance languages or Spanish.

The master's degree program provides solid grounding and broad coverage in the literatures and cultures of each of the language areas. The PhD program allows students to focus on a specific literary and/or cultural field of interest.

Students follow these degree programs in an intellectually stimulating and supportive environment, characterized by close personal supervision, interdisciplinary approaches to literary and cultural studies, and professional training in both research methods and foreign-language pedagogy.

The university's library resources for research in French, Italian, and Spanish support the department's graduate programs; in some fields they are outstanding. The library's holdings of learned periodicals are extensive.

Admission

An applicant for admission to the master of arts (MA) program should have completed an undergraduate major in a Romance language and literature or its equivalent (e.g., licence, laurea, licenciatura). Students with a degree in another discipline may apply, provided they have a good knowledge of at least one Romance language and are familiar with one Romance literature.

An applicant for admission to the PhD program should have completed a master of arts degree in a Romance language and literature or its equivalent. Students should have at least a reading knowledge of a second Romance language upon entering the PhD program.

Admission Procedure

Applications may be made online at rl.uoregon.edu/graduate/admissions (<http://rl.uoregon.edu/graduate/admissions/>). Applicants are required to

- upload transcripts
- submit a 750-word statement of purpose describing academic experience, the reasons for wanting to do graduate work in the Department of Romance Languages, and eventual career goals. Students applying to the PhD program are encouraged to specify research interests
- submit three letters of recommendation from faculty members who can directly comment on the applicant's language competence and aptitude for graduate studies in literature. One letter may refer to potential teaching ability

International students must demonstrate proficiency in English to the Division of Graduate Studies and the Department of Romance Languages by one of the following three methods:

1. Submit an acceptable score from the Test of English as a Foreign Language (TOEFL) examination, currently offered in paper-based (written) or Internet-based formats. A minimum score of 575 on the paper-based test or 88 on the Internet-based test is required. More information on Division of Graduate Studies admission requirements may be found at gradschool.uoregon.edu/academic-programs?page=gradProgramInfo (<http://gradschool.uoregon.edu/academic-programs/?page=gradProgramInfo>)
2. Submit an acceptable score from the International English Language Testing System (IELTS) examination. The minimum IELTS (academic module) overall band score for graduate admission is 7.0

3. Submit degree transcripts proving that you have received a bachelor's degree or higher from an accredited U.S. institution or from an institution in the following countries: Australia, Canada (excluding Quebec), Ireland, New Zealand, or the United Kingdom

If applying to the PhD program, submit a substantial writing sample (e.g., master's thesis graduate seminar paper or master's-level research paper on a relevant topic).

In addition to the application, send all official transcripts showing college-level work as of the date of application to the department's graduate coordinator at the following address:

University of Oregon
Department of Romance Languages
1233 University of Oregon
Eugene, Oregon 97403-1233

Priority is given to applicants whose files are complete by January 6. The department's graduate admissions committee reviews the completed file and notifies each applicant of its decision. New students are typically admitted to the program for fall term.

Graduate Employee Opportunities

Graduate employee (GE) opportunities are available each year for new graduate students in the department. Students should apply to the department by January 6 for fall admission and appointment priority. In exceptional cases, these fellowships may be supplemented by academic scholarships and awards.

Students who hold a graduate employee (GE) appointment are required to register and complete a minimum of 9 graduate credits during each quarter of their appointment, all of which must apply toward their degree programs. GTF support to complete the master's degree program is two years.

Master of Arts Program

Students entering the MA program may specialize in French, Italian, or Spanish, or combine two of these fields for a major in Romance languages. The master of arts program consists of course work, written examinations, and a research project. The program is designed to be completed in two years.

To help students navigate requirements, a faculty advisor is assigned by the department during fall term of the first year. Students may change advisors later if they wish.

Degree Requirements

All courses must be taken on a graded basis. Course work must be completed with grades of B– or better, and a grade point average (GPA) of 3.00 or better must be maintained.

A student whose knowledge of the language or languages is found to be deficient must take remedial work—an advanced writing class, additional study abroad, or some form of language immersion.

Master of Arts Research Project

The degree requires a research project (either a master's essay or a pedagogy portfolio) that allows a student to expand his or her expertise in literary and cultural studies or in teaching language, literature, and culture. A faculty member oversees the development of the final product and evaluates it. The student must identify a faculty member willing to serve as director and secure his or her signature of approval for the project by the ninth week of spring term of the first year.

The research project should be between 6,000 and 9,000 words. In consultation with the research project director, the student chooses whether to write the project in a Romance language or in English.

Research projects are approved by the director and are referred to the student's MA examination committee (see below) for remediation if the work is found to be deficient or in need of revision. The director submits a final copy of the approved essay or portfolio to the department office by the last day of classes in spring term of the second year.

Essay in Literary and Cultural Studies

This essay allows students to widen their knowledge in one or more Romance languages, literatures, and cultures. In addition, the essay permits students to focus in greater depth on writing formal academic prose, presenting an interpretation, constructing an argument, documenting sources and references, and honing persuasive strategies.

At the end of the first year of study, the student chooses one of the seminar papers that he or she submitted during the first three terms of course work. During the summer session immediately following, the student expands and polishes the paper.

Students who plan to apply for the PhD program in Romance languages at the University of Oregon must complete an essay in literary and cultural studies.

MA Pedagogy Portfolio in Teaching Language, Literature, and Culture

This project allows students to explore in depth specific issues of teaching a Romance language, its literature and cultures. The portfolio is designed in consultation with the director and serves to demonstrate the student's professional expertise. The portfolio may include the following documents: a coherent collection of teaching materials supported by a theoretical rationale; a description, personal assessment, and third-party evaluation of an internship experience (e.g., a participatory learning experience at the UO); a formal "philosophy of teaching" statement; documentation of participation in a professional conference; and other components as recommended by the director.

Students who plan to apply for the doctoral program in Romance languages at the University of Oregon must complete a master of arts essay in literary and cultural studies.

Examinations

The master of arts examination comprises two four-hour exams taken in the seventh week of spring term in the second year.

For students studying for the MA in French, Italian, or Spanish, the first exam consists of one specific question in each of the four literary periods. The second exam consists of a detailed analysis of a short text in two parts: a close reading of the text and a consideration of the text in its social, historical, cultural, and/or literary contexts. The student, in consultation with the examination committee, chooses in which of the four periods this second exam is done.

The exams for the Romance languages MA are similar to those for French, Italian and Spanish. However, in the first exam students are asked to draw on examples from both their major and minor literatures in their answer to at least one of the questions. They are encouraged (but not required) to refer to both literatures in their answers to the other three short questions.

The graduate secretary informs the students and the examination committee members of the scheduled exam date.

Examination Committee

By the sixth week of fall term in the second year, students submit to their advisors and to the director of graduate studies an MA Examination Committee form with the names of faculty members suggested to cover other examination periods and signed by the committee chair.

By the end of the tenth week of fall term in the second year, students submit a preliminary examination reading list of literary works on which to be examined to the members of their exam committees and to the director of graduate studies.

Examination Reading List

Students construct a reading list, drawn up in consultation with the exam committee, using the departmental reading list and the syllabuses and

bibliographies of the seminars they have taken, as well as the summer reading done in preparation for the fall forum.

For students studying for the MA in French, Italian, or Spanish, the reading list consists of at least ten items in each of the four periods, drawn up in consultation with the exam committee. Of the ten works in each period, at least five must be chosen from the departmental reading list. The other works can be suggested by the student, based on his or her own interests and readings.

For students studying for the MA in Romance languages, the reading list consists of at least twelve items in each of the four periods: eight in the major language and four in the minor. Of the eight works in the major language, at least four must be chosen from the departmental reading list; all texts in the minor language must be chosen from the departmental reading list.

The examination reading list also contains two additional secondary readings (usually literary histories or general literary surveys) that cover the four periods, also drawn from the departmental reading list.

The final version of the examination reading list must be approved and signed by the student's exam committee and filed with the graduate secretary by the end of winter term of the second year. Students are responsible for distributing the approved reading list to the MA committee members as soon as the list is approved.

Examination Questions

In all fields, one of the two exams must be answered in the candidate's major language; the other can be written in the major language or in English. Choice of language is to be determined in consultation with the committee chair.

The four members of the MA exam committee work together to prepare the questions for the candidate. The exam committee chair is responsible for collecting questions from the committee members and submitting them to the graduate secretary. On the first exam, the candidate answers four questions, choosing between two questions in each of four periods. On the second exam, the candidate chooses between two possible selections for the close reading analysis. The four members read and grade both exams and come to an agreement on the final grade to be submitted for each exam. The committee chair moderates this discussion, submits the grades to the graduate secretary, and communicates the results to the candidate. The student passes when the average grade for each exam is satisfactory (*low pass*, *pass* or *high pass*).

The master's examination is a closed book exam and therefore without footnotes or a bibliography. The exam must be typed using a twelve-point font, double-spaced.

Students who fail the master of arts examination in whole or in part will be allowed to take it over (in whole or in part) once. They are encouraged to do so during the course of the following term (usually the summer session) and no later than six months after failing. If they fail again, they are disqualified.

Research: [Topic] (FR 601), Research: [Topic] (ITAL 601), or Research: [Topic] (SPAN 601) and Practicum: [Topic] (FR 606), Practicum: [Topic] (ITAL 606), or Practicum: [Topic] (SPAN 606).

Students who hold a GTF appointment may register for 2 credits of Practicum or one credit of Research in order to complete the nine credits per term required by the Division of Graduate Studies (two graduate courses constitute 8 credits). During the first quarter of their first year, students holding a GTF appointment use Practicum to develop their

teaching skills in practical application. Students not holding a GTF appointment are encouraged to take a third course (for a total of 12 credits) or 1 credit of Research to work on an independent research project.

Reading and Conference: [Topic] (FR 605), Reading and Conference: [Topic] (ITAL 605), or Reading and Conference: [Topic] (SPAN 605).

Students may request to do a Reading and Conference course to address a specific problem on which no course currently exists. Before the end of the term preceding the Reading and Conference course, the student prepares a project proposal and submits it to the faculty member with whom he or she wants to work. The project proposal should include a statement of the problem the student wants to explore and a tentative reading list of primary and secondary sources. Only one 4-credit Reading and Conference course may be used to satisfy requirements for the MA degree.

Reading and Conference: [Topic] (RL 605). The purpose of this required independent reading course is to motivate students to begin reading during the summer following their first year in the MA program in preparation for the exams that will take place in the spring term of their second year.

During the spring term of the first year of the MA program, students present to their advisors a reading list of eight to ten works to be studied during the summer. The books must belong to no more than two of the periods defined by the MA program, and five of the books must be taken from the departmental reading list. At least one of the texts should be a literary history or a similar text about the period. This approved list (signed by the faculty advisor) will be submitted to the director of graduate studies before the end of the spring term.

In fall term, students will register for a 2-credit, graded Reading and Conference course with the director of graduate studies as the instructor of record.

In the third week of the fall term of the second year, students present the findings of their summer study in a public forum. This one-day forum is organized as a professional meeting, with a chair for each session, a discussion following the presentations, and refreshments. Most Romance language faculty members are present during these presentations, as well as all MA students.

Presentations are fifteen minutes long and delivered in English. Presentations focus on the main themes that students have explored in their readings. Students should be able to discuss both literary techniques and historical context of the period selected, providing examples from the books they have read. Plot summaries should be avoided.

At the end of the presentations, the faculty members meet to evaluate the presentations. On satisfactory completion of this exercise, students receive 2 graded credits for the course. If the faculty members find that a presentation was deficient, they recommend that the student do supervised reading with the faculty specialist in the period before being assigned a grade and receiving course credit.

Incompletes

Incompletes are strongly discouraged. However, students who find it necessary to ask for an incomplete are urged to complete their incompletes as rapidly as possible. Agreements for obtaining and completing incompletes must be filed with the department. Graduate students must convert a graduate course incomplete into a passing grade within one calendar year of the assignment of the incomplete.

Any student who has more than 5 credits of incompletes is making unsatisfactory progress toward the degree.

Doctor of Philosophy: Romance Languages

The PhD program in Romance languages is designed to provide

- a thorough familiarity with several fields (e.g., a movement, a genre, a period, or a literary problem)
- the opportunity to situate the student's special interests in the wider context of Romance languages and literatures as well as in the context of trends inside and outside Western European culture
- the tools necessary to engage literary issues at a high level
- the ability to examine new and challenging literary or theoretical perspectives

Students who enter the PhD program with no knowledge of a second Romance language are required to start learning one as soon as possible during their graduate studies.

The PhD program has five components: course work, comprehensive examination, dissertation prospectus, original dissertation, and final oral defense.

Course Work

The PhD degree requires a total of 84 graduate-level credits—32 credits in addition to the 52 required for the master's degree. Course work applied to the degree must be taken for letter grades, and a grade point average (GPA) of 3.00 or better must be maintained.

Students must complete at least 21 graduate seminars in the department (at least 84 credits in all) beyond the bachelor's degree. PhD students must thus take at least 8 graduate courses (32 credits) beyond the 13 courses (52 credits) required for the master's. Only one of these 8 courses (4 credits) may be satisfied in the form of a Reading and Conference course (Reading and Conference: [Topic] (FR 605), Reading and Conference: [Topic] (ITAL 605), or Reading and Conference: [Topic] (SPAN 605)).

Of the twenty-one courses (84 credits), three (12 credits) must be taken in a second Romance language.

As many as three of the twenty-one courses (12 of the 84 credits) may be taken outside the department, with the authorization of the advisor, and provided that the courses bear directly on the student's program of study.

Doctoral students are also strongly encouraged to take Romance Languages Colloquium: [Topic] (RL 623) for at least two credits. Colloquium may either be taken as a 2-credit pass/no pass course (in which case it does not count toward the 52 credits required for the degree) or as a 4-credit graded course.

Students with an MA in French, Italian, Spanish, or Romance languages from the University of Oregon may count a maximum of two graduate courses completed during the MA program toward PhD course requirements, provided that these courses were not used to fulfill MA requirements.

Graduate students with an MA in French, Italian, Spanish, or Romance languages from another institution must take a minimum of 40 credits in the Department of Romance Languages. The department's graduate committee evaluates previous graduate course work and determines whether additional work is necessary to fill any gaps in a student's preparation. This may result in a student having to take more than 40

credits at the University of Oregon—up to a maximum of 68 credits. If the candidate is found to be seriously deficient or if the master's degree is in a field other than Romance languages, the graduate committee may admit the student into the master's program. In this case, the student may submit a petition to the committee to transfer a maximum of three courses toward the twelve courses required for the MA. This petition may be submitted after the student has completed four graduate-level courses with grades of mid-B or better in the Romance languages master's program.

*Students typically will register for RL 601 or RL 605 during the terms that they are preparing for exams or writing their prospectus, and will register RL 603 Dissertation (18 credits) while writing their dissertation.

Comprehensive Examination

Students entering the PhD program should develop, as soon as possible but no later than the third term of course work beyond the master's degree, a field of interest that forms the basis of their research for the PhD comprehensive examination and ideally for the dissertation. This field of interest usually emerges from the selected courses and shapes the areas of concentration represented on the comprehensive examination.

The comprehensive examination consists of two written examinations and an oral examination. Each written examination covers a subfield that pertains to the student's field of interest. The subfields should be defined and prepared with three members of the Romance languages faculty who constitute the PhD examination committee. One of these faculty members should represent the student's second Romance language. A fourth member may be added from another department. In consultation with the members of the examination committee, the student creates a reading list for each of the subfields. The reading list must be approved by the examination committee no later than four weeks before the date of the exam. Student are responsible for distributing the reading list to the committee members of the examination committee as soon as the list is approved.

The written examinations take the form of two essays that respond to questions formulated by members of the PhD examination committee. Each written examination covers one of the subfields and is a maximum of twenty double-spaced, typed pages in length. The student has two weeks to write each of the two essays.

Two weeks after the successful completion of the written essays, the student takes an oral examination. The oral examination attempts to integrate the subfields addressed in the written examinations with the other facets of the student's declared field of interest. In a two-hour conversation, the candidate and the committee members examine and elaborate on ways in which the written essays help to define a project within the student's field of interest.

Typically undertaken during the fifth term of study following the master's degree, the comprehensive examination should result in clarification of the dissertation's subject matter and possible approaches to it. The exam should, in other words, yield at least a tentative dissertation topic.

A student who fails the PhD examination in whole or in part will be allowed to take it over (in whole or in part) once. The student is encouraged to do so no later than six months after failing. A second failure results in disqualification.

It is the student's responsibility to schedule both the written and oral portions of the comprehensive examination.

With the successful completion of the PhD comprehensive exam, the student will advance to candidacy and begin preparing the dissertation prospectus.

Dissertation Prospectus

The prospectus, typically completed during the sixth term of study following the master's degree, defines the scope of the dissertation and demonstrates the originality of the project. It consists of an eight- to ten-page description of the proposed dissertation project and a substantial research bibliography of primary and secondary material.

Students are responsible for putting together a dissertation committee, which typically consists of four members: one director and two readers from the Department of Romance Languages, and one reader from another department. A student may also choose to have two codirectors in the Department of Romance Languages (plus two further members of the department).

When the student has a solid draft of the prospectus, she or he schedules a meeting with the dissertation committee members for a presentation and discussion of the prospectus. Following this conversation, the student will make final revisions to the prospectus. Once the committee has given its final approval, the student submits the prospectus to the department for filing.

Students are reminded that they must have a dissertation committee in place and proper documents filed with the Division of Graduate Studies six months before the dissertation defense.

Any student making significant changes to the dissertation project after the final approval of the prospectus must schedule a meeting with the dissertation committee before proceeding.

Dissertation

The dissertation constitutes an original and valuable contribution to scholarship in the student's field of interest. It should be characterized by mature literary interpretation, informed and reasoned argument, and an awareness of the means and goals of research.

It is the student's responsibility to ascertain the rules and deadlines of the Division of Graduate Studies for proper filing of the dissertation. Students are strongly encouraged to familiarize themselves with the stringent formatting and structure guidelines for the dissertation provided by the Division of Graduate Studies (available online).

A final copy of the dissertation must be distributed to the dissertation committee for final approval at least three weeks before the dissertation defense.

Final Oral Defense

When all members of the dissertation committee have approved the dissertation, a final public oral presentation and defense of the work is held.

Doctor of Philosophy: Spanish

Coursework for the PhD in Spanish allows students to:

- acquire exposure to a broad range of theoretical perspectives and methodological approaches;
- develop expertise in a primary and secondary field;

- broaden and deepen their conception of the Ph.D. Scholarly Project/dissertation;
- acquire exposure to interdisciplinary comparative approaches, transnational connections, and minority languages and cultures;
- join and/or establish professional networks in their chosen discipline(s).

Course requirements depend on students' credentials when admitted. Students entering with a B.A must complete 80 credits; students holding an M.A. degree in an appropriate field (see Admissions section) must complete 40 credits. All credits must be taken graded and at the graduate level (500-600). Distribution of course requirements for the PhD is as follows:

1. RL 616 Language teaching methods (4 credits)
2. RL 620 Graduate Study in RL (4 credits)
3. RL 623 RL Colloquium (4 credits)
4. 4 courses in primary area (16 credits)
5. 3 courses in secondary area (12 credits)
6. RL 603 Dissertation (18 credits)

Students typically will register for RL 601 or RL 605 during the terms that they are preparing for exams, and for RL 603 when writing their prospectus.

PhD students who are teaching take Span 609 1st year Pedagogy or Span 609 2nd year Pedagogy (2 credits), which requires weekly meetings with their teaching supervisor and provides training that prepares them further to teach their classes successfully.

ourses should come primarily from the Romance Languages department, but this distribution can be met with courses from any department on campus, with approval from the student's advisor(s). Of the 6 courses taken in Primary and Secondary areas, at least 4 of them should be in Spanish. For courses taken outside RL, research papers should deal with the Spanish language and/or the communities where it is used, and serve to prepare the student for the Scholarly Project and/or dissertation (see below).

Second-language requirement

In addition to Spanish, students must demonstrate proficiency in a second language that is relevant to their research interests and that will allow them to participate in additional academic discourse communities. This may be another Romance language taught in the department (French, Italian, or Portuguese) or another language relevant to their research (Latin, Arabic, or Ladino; Basque, Catalan, or Galician; Nahuatl, Quechua, or Yucatec Maya; Caló or Spanglish, etc.). Students will justify their choice of second language and how they will evidence competency in the annual review at the end of their first year.

Students can fulfill the second-language requirement in several ways, as follows:

- Completing one graduate course (4 graded credits) in a second Romance language: French, Italian, Spanish or Portuguese or RL-prefix course structured around readings in one of these languages.

- Completing one graduate course (4 graded credits) in an approved language outside the Romance Languages department.

With the approval of the adviser(s) and the Director of Graduate Studies, students may design a program of study or language experience on or off campus (e.g., a study abroad program) that evidences/results in a proficiency level appropriate for research.

The students' faculty adviser(s) will indicate that the second-language requirement has been satisfied through one of the options above by submitting an email to the Director of Graduate Studies and the Graduate Program Coordinator.

Students entering the SPAN PhD program with a BA will need take a total of 20 courses (80 credits) to complete their PhD requirements:

1. 3 courses (12 credits) of RL required courses (RL 636, 620, 623)
2. 11 courses (40 credits) in the Romance Languages department. At least 9 courses must have a SPAN prefix; up to two courses may have an RL prefix when the written coursework is completed in Spanish.
3. 3 courses (12 credits) outside the department in fields related to their research (i.e.: Linguistics, Philosophy, History, English, Anthropology, Ethnic Studies, Women and Gender Studies, Education Studies, Comparative Literature).
4. 3 courses (12 credits) with the RL prefix (RL, ITAL, PORT or FR), or in other departments if the courses are related to their primary and secondary fields. (One of these courses may also satisfy the second language requirement).

Students entering the SPAN PhD with an MA will complete a total of 10 courses (40 credits), with their Primary and Secondary Field-satisfying courses drawn from any of the categories below:

1. 3 graduate courses (12 credits) of RL required courses (RL 636, 620, 623)
2. 4 graduate courses (16 credits) in the Romance Languages Department with SPAN prefix
3. 3 graduate courses (12 credits) in Romance Languages, SPAN, FR, PORT, ITAL, or outside the department. (One of these courses may also satisfy the second language requirement).

*Students who have taken RL 636, RL 620, and RL 623 in the course of completing an MA in the Romance Languages department at UO will be considered to have met these requirements.

Benchmarks

Graduate Portfolio: Students will file the materials they create throughout their progress in the program (Coursework essays, Pre-professional Experience Internship, Prospectus, publications, and their dissertation) in a Portfolio that will allow their committees to track their academic progress and their intellectual commitment to the field.

Professional Development Experience

Students interested in exploring alternative careers as future professional opportunities are encouraged to undertake an internship or a comparable experience in the community in Eugene in the summer or during the year, or in another state or any other Latin American country or Spain, in a place where they can use their Spanish linguistic skills while developing administrative skills. This is not a mandatory professional

experience. Faculty advisors or/and the Career Center will work with students to locate appropriate opportunities. This professional development experience is envisioned to train further our graduate students for a career paths outside the academia. The experience does not have to be local; students can contemplate diverse options nationally or internationally. For example, some options would be to work as a volunteer interpreters in a court of law or in a hospital, as assistant teacher in a public school, internship in a government facility, administrative assistant or Public relations in a business, assistant or interpreter in an NGO such as Centro Latinoamericano in Eugene, or another NGO related to their field in the US, Latin America or the Iberian peninsula. The internship or voluntary work could range from 15 hours to 30 hours. It may be completed at any time during their years of study; it is an optional experience, not a requirement. Students must submit a brief reflection (500-1000 words) on their experience to their graduate advisor; the reflection should address how the experience has been formative, and how it affected their thinking about future career option once they finish their PhD. The reflection should also speak to how it may connect to their course of study and enrich their preparation as graduate students. The reflection should be shared with the contact person in the institution they worked with, who should also send a brief letter certifying that the student did the voluntary work.

Annual Meeting: Students provide a progress report, a future plan of study term by term, and meet with their advisor annually during the spring term. We will have a template for the progress report with an advising checklist to assure consistency.

DISSERTATION PROGRESS MEETING In the fall term of the first full year of dissertation writing, the student meets with the advisor and one other member of the dissertation committee to discuss the progress, status and trajectory of the dissertation, potential publications associated with it, and any factors impeding the work or troubling the student. The student will submit all drafted work to the advisor and second committee member at least one week before the meeting takes place. After this meeting, the advisor will submit a brief description of the student's qualitative and quantitative progress to the Director of Graduate Studies. Please use the First Year Dissertation Status Meeting form to document the meeting. Students may find it useful to have a fall term progress meeting with two members of their committee during each year of dissertation writing. Advisors should submit a Progress Meeting form to the Director of Graduate Studies.

FIRST CHAPTER REQUIREMENT By the last day of classes of winter term of the first full year of dissertation writing, the student must submit a fully drafted chapter of the dissertation to the Dissertation Advisor and the Graduate Coordinator. "Fully drafted" implies a chapter whose argumentative structure is complete, and which has been proofread and includes references, but which might not be considered "polished" or final text. Students who do not meet this milestone work must meet with the Director of Graduate Studies to discuss available resources and strategies to support their progress and to craft and execute a writing plan. (Such meetings are available to all students at any point of the degree.) As per the GDRS, graduate students must be making satisfactory progress toward degree. Students who fail to submit a fully drafted chapter of the dissertation to the Graduate Coordinator by the end of winter term of the first full year of dissertation writing risk losing their GE appointments, unless the advisor or the DGS can provide and document the reasons for an extension of this submission. Note: It is worth emphasizing that the first fully drafted chapter may be submitted as part of the dissertation progress meeting during the fall term and that, ideally, students will have progressed well beyond a single chapter draft at the end of the first full year of dissertation writing. At the same time,

individual paths and timelines to a complete dissertation vary widely among students.

Guided Readings: Taken in the final term of coursework before the Ph.D. exams, these readings have two objectives: (1) to help students prepare for the Ph.D. exams and to reinforce coverage of the areas of expertise students will need as they begin preparing for the dissertation project and (2) to acquire knowledge in areas not covered in their coursework. By the completion of the guided readings (2-4 credits) as Span 605, students should submit two **Annotated Bibliographies** of Primary Works in the Primary Field (15 works; one page per work); and Annotated Bibliography of Primary Works in their Secondary Field(s) (10 works; one page per work).

Ph.D. Statement & Plan of Study: Students work with their primary adviser to compose a one-page statement that explains their interests, the connections among their fields of study, the beginnings of their primary project, and a term-by-term plan of work. The statement is approved by the primary adviser and shared with the members of the Ph.D. exam committee. The statement should be completed by the beginning of the term when students will take their Ph.D. exams. The statement should serve as another academic tool to prepare for the Exams.

Ph.D. Comprehensive Examinations

The comprehensive examination consists of two written exams and an oral defense. Students will submit two **Annotated Bibliographies** the term before their Ph.D. exams (after completing their Guided Readings), which will then serve as the basis for their Ph.D. exam reading lists. Each written examination covers a subfield that pertains to the student's primary fields of interest. The subfields should be defined and prepared with three RL faculty members who will constitute the Ph.D. exam committee. Students will be encouraged to include a fourth member from another UO department. By week 2 of the term of their Ph.D. exams, students submit a form with the signature of each member of the committee, verifying that they have received the final reading list for exams and that they are prepared to participate in the examination committee. The exam committee is selected by the student and the advisor, according to the student's fields of research and in consultation with the faculty members the student has been working with throughout their graduate studies.

In consultation with the members of this committee, students create a reading list for their designated primary field and secondary field. In consultation with their adviser, they may opt to add a third subfield. Students will prepare a list of critical, methodological, and/or theoretical works that support their primary and secondary fields, which they will then incorporate into their preparation for the second exam. This reading list must be approved by the exam committee no later than week 2 of the term of the exams. Students are responsible for distributing the reading list to each of the committee members as these members sign the exam form. Each written exam will take the form of an essay (maximum 25 pages, double-spaced) that responds to one of two questions formulated by members of the Ph.D. exam committee, and will cover one or more of the subfields. Students will have two weeks to write each of these essays. Two weeks after the successful completion of these written essays, students will then take an oral examination. The oral exam will allow students to integrate the areas addressed in the written exams with the other facets of their declared fields of interest. In this two-hour conversation, the committee members help students to articulate how their written essays will best lead to the development of the dissertation project. Exam 1 should be received in Week 4, turned in in Week 6;

Exam 2 should be received in Week 6 and submitted in Week 8; the oral defense should be in Week 10.

Undertaken by the sixth term of study following the M.A., the comprehensive examination should result in clarification of both the subject matter of the dissertation and possible approaches to it. The exam should, in other words, yield a dissertation topic. It is the responsibility of the students to initiate the scheduling of both the written and the oral portions of the comprehensive examination. Upon successful completion of the Ph.D. comprehensive exam, students are formally advanced to candidacy and may begin preparing the dissertation prospectus. Students who fail one or both components of the Ph.D. exam will be allowed to retake it (in whole or in part) once. The Graduate Coordinator and the DGS will make sure that the student retakes the exams no later than 6 months after their first attempt. If their second attempt is deemed unsatisfactory, they are disqualified from Ph.D. candidacy and must withdraw from the graduate program, the department will award them a terminal MA.

During the term the students are taking the Ph.D. Exams they would not be taking courses, but 8 credits RL 600 Exam course.

Prospectus

Students are responsible for putting together their dissertation committee, which normally consists of four members: one director and two readers from the Department of Romance Languages, and one reader from another department. Students must submit a form—either digitally or on paper—two weeks before the defense of the prospectus or by week 7 at the latest—with the signature of each member of this committee, verifying that they have received the final draft of the prospectus and agree to serve on the committee.

Students will submit a ten- to fourteen-page prospectus accompanied by a substantial research bibliography of primary and secondary material to the dissertation committee members in the term following successful completion of their PhD Exam. This prospectus should define the scope of the dissertation; demonstrate the significance and originality of the project; explain the methodology and theoretical grounding; and provide a short summary of each chapter and its main arguments. Occasionally, a student may choose to have two co-directors in the Department of Romance Languages (plus two additional members, one from the department and one from another department).

Students are responsible for putting together their dissertation committee, which normally consists of four members: one director and two readers from the Department of Romance Languages, and one reader from another UO department. Students are expected to consult with each of their committee members while drafting the prospectus. The defense of the Prospectus must be scheduled by week 2 of that term, and it must occur by week 10. Students must submit a form - either digitally or on paper - two weeks before the defense of the prospectus or by week 7 at the latest -- with the signature of each member of this committee, verifying that they have received the final draft of the prospectus and agree to serve on the committee.

Once the dissertation director notifies the Ph.D. candidate in writing that all members of the committee have approved the prospectus, the candidate will schedule a meeting with the dissertation committee members for a presentation and discussion of the prospectus. Following this conversation, the candidate will make final revisions to the prospectus. Once the committee has given its final approval, the student will file the prospectus with the department.

It is the candidate's responsibility to have a dissertation committee in place and to have filed all necessary documents with the Division of Graduate Studies six months before the dissertation defense. Upon completion of the Prospectus Defense, the student will be advanced to candidacy.

Any student making significant changes to the dissertation project after the final approval of the prospectus must schedule a meeting with the dissertation committee before proceeding.

Scholarly Project or Versatile Ph.D. Project: The student chooses a seminar paper or project to develop into an article or other scholarly project that complements the student's chosen professional goals and plan of study. Students preparing for an academic job are strongly encouraged to pursue publication of one scholarly articles or a Translation project. Working with their adviser or in the context of a graduate course, they prepare the article or text, choose a publication venue, and submit the article or translation for publication by the end of the fourth year. Students may propose and prepare other versatile Ph.D. projects, however, in consultation with their advisers and the DGS. Students will also be encouraged to develop an Individual Development Plan (IDP) to actively prepare for jobs outside the academia.

Dissertation/Thesis

Students must form a dissertation committee (at least 4 members; 3 from Romance Languages and one UO faculty member from outside the RL department), defend their dissertation proposal to their committee, must take a minimum of 18 dissertation credits while writing the dissertation, submit at 6-3 weeks in advance the final dissertation to the committee (if the committee does not receive the dissertation 3 weeks in advance the defense has to be postponed) and give an oral defense of their dissertation. All UO Division of Graduate Studies dissertation requirements must be adhered to.

RL 607 Professionalization and Dissertation Workshop This course will be offered every other year for students who have submitted their prospectus, and before or while they enter the job market. While the course will allow students to examine the range of career opportunities within and outside the academic job market, the focus will be on drafting cover letters, teaching statements, CVs, and grant proposals; throughout the term, workshop participants will draft a journal article, most likely from a dissertation chapter in progress, and identify an appropriate journal for submission and peer review. As part of this course requirements the students will be developing **Professional Portfolio**, and an **Individual Development Plan (IDP)** to explore professional, career opportunities outside the academia, and how to prepare for them competitively.

Original Dissertation/Oral Defense

Students must complete a PhD Thesis Progress form at least 6 weeks before the defense of their dissertation with the signature of each member of the committee, verifying that they have received the final draft of the dissertation and that they will participate in the defense.

The dissertation should constitute an original and significant contribution to scholarship in the student's field of expertise. It should be characterized by mature literary, cinematic, linguistic, and/or cultural interpretation; by informed and reasoned argument; and by an awareness of the means and goals of research. In the context of a PhD in Spanish this means that their dissertation will be showing the new paths of Latin American and/or Iberian Studies, for example in dialogue with African Studies, Mediterranean Studies, Caribbean Studies. Dissertations might be written in Spanish or in English, making its contribution in a wide

range of fields such as Translation Studies, Linguistics, Gender Studies, Holocaust or Memory Studies, and Visual Culture, among many others.

Students must also, of course, familiarize themselves with the stringent formatting and structure guidelines for the dissertation (the information is provided by the Division of Graduate Studies and is available online or in pamphlet form). A final copy of the dissertation must be distributed to the dissertation committee for final approval at least six weeks before the dissertation defense.

Final Oral Dissertation Defense

When all members of the dissertation committee have agreed that it is a defensible the dissertation, a public oral presentation and defense of the work is held. If a member of the committee does not think that the dissertation can be defended then they must notify the advisor three weeks in advance of the defense.

Admission

An applicant for admission to the PhD in Spanish program should have completed an undergraduate major in Spanish, a Romance language and literature or its equivalent (e.g., licence, laurea, licenciatura) or in a Humanities or Social Science major. Students with a degree in another discipline may apply, provided they have a near native Skills or very advanced knowledge of Spanish.

Admission Procedure

Applications may be made online at rl.uoregon.edu/graduate/admissions (<http://rl.uoregon.edu/graduate/admissions/>). Applicants are required to

- upload transcripts
- submit a 750-word statement of purpose describing academic experience, the reasons for wanting to do graduate work in the Department of Romance Languages, and eventual career goals. Students applying to the PhD program are encouraged to specify research interests
- submit three letters of recommendation from faculty members who can directly comment on the applicant's language competence and aptitude for graduate studies in literature. One letter may refer to potential teaching ability

International students must demonstrate proficiency in English to the Division of Graduate Studies and the Department of Romance Languages by one of the following three methods:

1. Submit an acceptable score from the Test of English as a Foreign Language (TOEFL) examination, currently offered in paper-based (written) or Internet-based formats. A minimum score of 575 on the paper-based test or 88 on the Internet-based test is required. More information on Division of Graduate Studies admission requirements may be found at gradschool.uoregon.edu/academic-programs?page=gradProgramInfo (<http://gradschool.uoregon.edu/academic-programs/?page=gradProgramInfo>)
2. Submit an acceptable score from the International English Language Testing System (IELTS) examination. The minimum IELTS (academic module) overall band score for graduate admission is 7.0
3. Submit degree transcripts proving that you have received a bachelor's degree or higher from an accredited U.S. institution or from

an institution in the following countries: Australia, Canada (excluding Quebec), Ireland, New Zealand, or the United Kingdom

If applying to the PhD program, submit a substantial writing sample (e.g., master's thesis graduate seminar paper or master's-level research paper on a relevant topic).

In addition to the application, send all official transcripts showing college-level work as of the date of application to the department's graduate coordinator at the following address:

University of Oregon
Department of Romance Languages
1233 University of Oregon
Eugene, Oregon 97403-1233

Priority is given to applicants whose files are complete by January 6. The department's graduate admissions committee reviews the completed file and notifies each applicant of its decision. New students are typically admitted to the program for fall term.

Students typically reside on campus, specially if they are teaching as a GE in Spanish in the department and taking courses.

Funding

All post-MA work, including the dissertation, is typically completed in four to five years of study. PhD students making satisfactory progress toward the degree are eligible for funding packages in the form of graduate employee (GE) opportunities. These fellowships include stipends for teaching, as well as tuition waivers. Satisfactory progress entails completing all courses taken for credit with a grade of mid-B or better; passing the PhD comprehensive examination; timely submission of an acceptable dissertation prospectus; and regular and timely progress on the dissertation itself.

French Courses

FR 101. First-Year French. 5 Credits.

Introduction to French stressing the development of listening, speaking, reading, and writing skills through a communicative approach. Sequence. Conducted in French.

FR 102. First-Year French. 5 Credits.

Introduction to French stressing the development of listening, speaking, reading, and writing skills through a communicative approach. Sequence. Conducted in French.
Prereq: FR 101.

FR 103. First-Year French. 5 Credits.

Introduction to French stressing the development of listening, speaking, reading, and writing skills through a communicative approach. Sequence. Conducted in French.
Prereq: FR 102.

FR 111. Intensive Beginning French. 5 Credits.

Intensive study for experienced language learners; introduction to French culture. Sequence. Cannot be combined with FR 101, FR 102, FR 103 for more than 15 credits of first-year French.
Prereq: previous study of French or competence in another Romance language.

FR 112. Intensive Beginning French. 5 Credits.

Intensive study for experienced language learners; introduction to French culture. Cannot be combined with FR 101, FR 102, FR 103 for more than 15 credits of first-year French.
Prereq: FR 111.

FR 150. Cultural Legacies of France. 4 Credits.

French civilization in France and beyond. Possible topics are the Francophone world; premodern, early modern, and modern France; French film, architecture, and painting. Conducted in English.

FR 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

FR 201. Second-Year French. 4 Credits.

Development of reading, writing, and speaking skills; study of short literary and cultural texts; considerable attention paid to oral use of the language. Sequence.

Prereq: first-year language competence.

FR 202. Second-Year French. 4 Credits.

Development of reading, writing, and speaking skills; study of short literary and cultural texts; considerable attention paid to oral use of the language. Sequence.

Prereq: FR 201.

FR 203. Second-Year French. 4 Credits.

Development of reading, writing, and speaking skills; study of short literary and cultural texts; considerable attention paid to oral use of the language. Sequence.

Prereq: FR 202.

FR 301. Culture et langage: la France contemporaine. 4 Credits.

Training in language and culture of modern France using newspapers, short stories, poetry and film. Vocabulary enrichment activities. Conducted in French.

Prereq: FR 203.

FR 302. Culture et langage: Le monde francophone contemporain. 4 Credits.

Training in language and cultures of the French-speaking world using literary texts, websites, videos. Grammar review and vocabulary enrichment.

Prereq: FR 203.

FR 307. Oral Skills. 2 Credits.

Repeatable. Practice in improving oral, comprehension, and listening skills in French. Communicative activities in class in addition to language laboratory work. Repeatable once for maximum of 4 credits.

Prereq: FR 203 or equivalent.

FR 312. French Survey: Francophone Literature. 4 Credits.

Introduction to major authors and texts of the French-speaking world outside of France.

Prereq: FR 301 or FR 302.

Repeatable.

RL 604. Bilingual Internship. 2 Credits.

A bilingual internship opportunity in area schools or community agencies for students of French or Spanish. Repeatable twice for a maximum of 6 credits in another term.

Prereq: third-year language competence.

RL 605. Reading and Conference: [Topic]. 1-6 Credits.

Repeatable.

RL 607. Seminar: [Topic]. 1-6 Credits.

Repeatable.

RL 608. Workshop: [Topic]. 1-16 Credits.

Teaching Methods offered fall term only. Other workshops may be offered. Repeatable when topic changes.

RL 609. Terminal Project. 1-16 Credits.

Repeatable.

RL 620. Graduate Study in Romance Languages. 2-4 Credits.

Discussion of purposes, problems, and methods of graduate study in Romance languages. Elements of critical method, research techniques, scholarly writing, and professional development.

RL 623. Romance Languages Colloquium: [Topic]. 2-4 Credits.

Seminar organized around a series of speakers exposes students to critical and theoretical issues central to the study of Romance languages and literatures. Repeatable for a maximum of 8 credits.

RL 636. Teaching and Learning Romance Languages. 4 Credits.

Specialized training in teaching and learning French, Italian, and Spanish.

Spanish Courses

SPAN 101. First-Year Spanish. 5 Credits.

Emphasis on the development of speaking, reading, and writing skills; introduction to Hispanic culture. Sequence. Conducted in Spanish.

SPAN 102. First-Year Spanish. 5 Credits.

Emphasis on the development of speaking, reading, and writing skills; introduction to Hispanic culture. Sequence. Conducted in Spanish.

Prereq: SPAN 101.

SPAN 103. First-Year Spanish. 5 Credits.

Emphasis on the development of speaking, reading, and writing skills; introduction to Hispanic culture. Sequence. Conducted in Spanish.

Prereq: SPAN 102.

SPAN 111. Intensive Beginning Spanish. 5 Credits.

Intensive study for experienced language learners; introduction to Hispanic culture. Prereq: evidence of placement. Sequence. Conducted in Spanish. Cannot be combined with SPAN 101, SPAN 102, SPAN 103 for more than 15 credits of first-year Spanish.

Prereq: previous study in Spanish or competence in another Romance language.

SPAN 112. Intensive Beginning Spanish. 5 Credits.

Intensive study for experienced language learners; introduction to Hispanic culture. Prereq: evidence of placement. Sequence. Conducted in Spanish. Cannot be combined with SPAN 101, SPAN 102, SPAN 103 for more than 15 credits of first-year Spanish.

Prereq: SPAN 111.

SPAN 150. Hispanic and Latinx Cultures. 4 Credits.

This course provides students with an overview of the cultures of the Hispanic/Latinx world (Spain, Latin America, US)

SPAN 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

SPAN 200M. Temp Multilist Course. 4 Credits.**SPAN 201. Second-Year Spanish. 4 Credits.**

Continued development of Spanish-language skills; emphasis on diversity of Hispanic cultures. Sequence. Conducted in Spanish.

Prereq: first year language competence.

SPAN 202. Second-Year Spanish. 4 Credits.

Continued development of Spanish-language skills; emphasis on diversity of Hispanic cultures. Sequence. Conducted in Spanish.
Prereq: SPAN 201.

SPAN 203. Second-Year Spanish. 4 Credits.

Continued development of Spanish-language skills; emphasis on diversity of Hispanic cultures. Sequence. Conducted in Spanish.
Prereq: SPAN 202.

SPAN 218. Latino Heritage I. 5 Credits.

Designed for heritage learners—students who grew up with Spanish in their community and want to build communication skills in Spanish. Content focuses on personal experiences in U.S. Latino communities. Cannot be combined with SPAN 201, SPAN 202, SPAN 203 for more than 15 credits of second-year Spanish.
Prereq: placement through self-identification or placement by Spanish heritage language placement test.

SPAN 228. Latino Heritage II. 5 Credits.

Designed for heritage learners—students who grew up with Spanish in their community and want to continue developing communication skills in Spanish. Content focuses on personal experiences in U.S. Latino communities. Cannot be combined with SPAN 201, SPAN 202, SPAN 203 for more than 15 credits of second-year Spanish.
Prereq: SPAN 218 or placement by Spanish heritage language placement test.

SPAN 238. Spanish Around the World. 4 Credits.

Introduction to language variation (dialects) through the study of the places, peoples, history, and social differences that make the Spanish language what it is today.
Prereq: SPAN 103 or SPAN 112 or equivalent proficiency in Spanish language.

SPAN 299. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

SPAN 301. Cultura y Lengua: Identidades Hispanas. 4 Credits.

Develops advanced language skills through analysis of major historical influences in the cultures of Spanish-speaking regions: Spain, Latin America, and the United States. Taught in Spanish.
Prereq: SPAN 203 or SPAN 228.

SPAN 303. Cultura y lengua: expresiones artísticas. 4 Credits.

Develops advanced language skills through the study of cultural products (e.g., art, literature, film, music) in Spanish-speaking societies. Taught in Spanish.
Prereq: SPAN 203 or SPAN 228.

SPAN 305. Cultura y lengua: cambios sociales. 4 Credits.

Develops advanced language skills through the investigation of major currents of change in modern Spanish-speaking societies; gender issues, technology, revolution and counter-revolution. Taught in Spanish.
Prereq: SPAN 203 or SPAN 228.

SPAN 307. Oral Skills. 2 Credits.

Practice in improving listening, comprehension, and oral skills in Spanish. Communicative activities in class in addition to language laboratory work. Repeatable once for maximum of 4 credits.
Prereq: SPAN 203 or SPAN 228.

SPAN 308. Cultura y lengua: comunidades bilingües. 4 Credits.

Designed for heritage learners—students who grew up with Spanish in their community and want to continue developing communication skills in Spanish. Explores socio-linguistic dynamics of communities in which Spanish is in contact with another language. Open to all students. Taught in Spanish.
Prereq: SPAN 203 or SPAN 228.

SPAN 311. Advanced Writing in Spanish. 4 Credits.

This requirement for the Spanish major provides additional language development for students early on in the major, emphasizing academic writing skills in Spanish.
Prereq: two from SPAN 301, SPAN 303, SPAN 305, SPAN 308.

SPAN 312. Spanish in the Media. 4 Credits.

Designed for heritage learners. Examines the role of Spanish in various forms of media such as television, Internet, and literature. Students practice advanced writing skills necessary to participate in argumentative writing and close textual readings.
Prereq: SPAN 308 or any two from SPAN 301, SPAN 303, SPAN 305; SPAN 308 is recommended.

SPAN 320. Intensive Spanish Grammar Review. 4 Credits.

Review and development of the more complex aspects of Spanish grammar with special attention to idiomatic usage.
Prereq: SPAN 203 or SPAN 228.

SPAN 322. Introduction to Hispanic Linguistics. 4 Credits.

Linguistic description of the Spanish language, including phonetics and phonology, morphology, syntax, history, and social and geographical variation.
Prereq: SPAN 308; one course from SPAN 301, SPAN 303, SPAN 305, SPAN 311, SPAN 312.

SPAN 324. Spanish Pronunciation and Phonetics. 4 Credits.

Study of Spanish sounds, rhythms, and intonation; supervised pronunciation practice. Offered alternate years.
Prereq: SPAN 308; one course from SPAN 301, SPAN 303, SPAN 305, SPAN 311, SPAN 312.

SPAN 341. Hispanic Cultures through Literature I. 4 Credits.

Introduces students to a variety of texts written in the Hispanic world in their literary, artistic, and historical contexts, from 1100 to 1600.
Prereq: two from SPAN 301, SPAN 303, SPAN 305, SPAN 308.

SPAN 342. Hispanic Cultures through Literature II. 4 Credits.

Introduces students to a variety of texts written in the Hispanic world in their literary, artistic, and historical contexts, from the 16th century to the Latin American independences.
Prereq: two from SPAN 301, SPAN 303, SPAN 305, SPAN 308.

SPAN 343. Hispanic Cultures through Literature III. 4 Credits.

Introduces students to a variety of texts written in the Hispanic world in their literary, artistic, and historical contexts, from the revolutionary wars to the Spanish Civil War.
Prereq: two from SPAN 301, SPAN 303, SPAN 305, SPAN 308.

SPAN 344. Hispanic Cultures through Literature IV. 4 Credits.

Introduces students to a variety of texts written in the Hispanic world in their literary, artistic, and historical contexts, from the 20th century into the 21st.
Prereq: two from SPAN 301, SPAN 303, SPAN 305, SPAN 308.

SPAN 348. United States Latino Literature and Culture. 4 Credits.

Introduction to Hispanic literature written in the United States. Close reading and discussion of selected texts by Hispanic authors; emphasis on literary trends and themes.
Prereq: two from SPAN 301, SPAN 303, SPAN 305, SPAN 308.

SPAN 350. Introduction to Poetry. 4 Credits.

Explores important aspects of Spanish poetry; reading poems from different periods of Spanish and Spanish American literature. Emphasizes formal aspects and critical reading.
Prereq: two from SPAN 301, SPAN 303, SPAN 305, SPAN 308.

SPAN 351. Introduction to Theater. 4 Credits.

Explores important aspects of Spanish theater; reading plays from different periods of Spanish and Spanish American literature. Emphasizes formal aspects and critical reading.
Prereq: two from SPAN 301, SPAN 303, SPAN 305, SPAN 308.

SPAN 353. Introduction to Narrative. 4 Credits.

Explores important aspects of Spanish narrative; reading texts from different periods of Spanish and Spanish American literature. Emphasizes formal aspects and critical reading.
Prereq: two from SPAN 301, SPAN 303, SPAN 305, SPAN 308.

SPAN 355. Creative Writing in Spanish. 4 Credits.

This course aims to expand the students' creative capabilities in Spanish through writing exercises in poetry and fiction. Students will develop their literary sensitivity as well as their critical judgment and interpretative skills. Writing creatively diversifies the students' experience with the Spanish language.
Prereq: SPAN 311 or SPAN 312; one course from SPAN 341, SPAN 342, SPAN 343, SPAN 344, SPAN 350, SPAN 351, SPAN 353.

SPAN 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

SPAN 403. Thesis. 3-6 Credits.

Repeatable.

SPAN 405. Reading and Conference: [Topic]. 1-6 Credits.

Repeatable.

SPAN 406. Practicum: [Topic]. 1-12 Credits.

Repeatable.

SPAN 407. Seminar: [Topic]. 1-6 Credits.

Recent topics include Golden Age Theater, Latin American Film, Medieval Iberian, Mexican Literature and Culture, 19th-Century Spanish Decadence, Postwar Spain, Testimonial Literature. Repeatable.
Prereq: two from SPAN 341, SPAN 342, SPAN 343, SPAN 344.

SPAN 408. Workshop: [Topic]. 1-12 Credits.

Special on-campus activities in Spanish. Repeatable.

SPAN 409. Terminal Project. 1-12 Credits.

Repeatable.

SPAN 410. Experimental Course: [Topic]. 1-4 Credits.

Recent topics include Literature and Democratic Transition, Race in Modern Los Angeles, Social Roots of Creativity. Repeatable.

SPAN 420. Spanish Linguistics: [Topic]. 4 Credits.

Variable topics in Spanish linguistics, including advanced grammar, history of the Spanish language, the language of Iberia, Spanish sociolinguistics. Repeatable when topic changes.
Prereq: Two from SPAN 320, SPAN 322, SPAN 324.

SPAN 424. History of the Spanish Language. 4 Credits.

Linguistic changes and social-historical influences on the development of Spanish from its roots in Latin to the diversity of modern dialects. Offered alternate years.
Prereq: Two from SPAN 320, SPAN 322, SPAN 324.

SPAN 425. Literary Translation. 4 Credits.

Variable topics include con textos, first issues, and cultural translation-transculturation in practice.
Prereq: SPAN 311 or SPAN 312; one course from SPAN 320, SPAN 322, SPAN 324, SPAN 341, SPAN 342, SPAN 343, SPAN 344.

SPAN 428. Spanish in the United States. 4 Credits.

The history and description of the linguistic characteristics of and narratives about the use of Spanish within the United States. Offered alternate years.
Prereq: two from SPAN 320, SPAN 322, SPAN 324.

SPAN 448. National Identities and Border Cultures in the Americas. 4 Credits.

Examines 19th and 21st century national formation and alternative forms of collective identity in the Americas through literary texts, historical documents and film. Offered alternate years.
Prereq: SPAN 311 or SPAN 312; and two from SPAN 320, SPAN 322, SPAN 324, SPAN 341, SPAN 342, SPAN 343, SPAN 344, SPAN 348.

SPAN 466. Introduction to Spanish Golden Age. 4 Credits.

Survey of major figures and cultural issues in the Spanish Golden Age, c. 1500s–1700s.
Prereq: two from SPAN 341, SPAN 342, SPAN 343, SPAN 344.

SPAN 480. 19th-Century Spanish American Literature: [Topic]. 4 Credits.

Topics include issue of literary periods, authors, narrative and nation, genres, and indigenismo. Repeatable twice when topic changes for maximum of 12 credits.
Prereq: two from SPAN 341, SPAN 342, SPAN 343, SPAN 344.

SPAN 490. 20th-Century Latin American Literature: [Topic]. 4 Credits.

Explores major literary trends, authors, and works. Recent topics are Avant-garde in the Mexican Revolution, Testimonial Literature, Latin American Theater. Repeatable twice when topic changes for maximum of 12 credits.
Prereq: SPAN 311 or SPAN 312; and two from SPAN 341, SPAN 342, SPAN 343, SPAN 344.

SPAN 507. Seminar: [Topic]. 1-6 Credits.

Recent topics include Golden Age Theater, Latin American Film, Medieval Iberian, Mexican Literature and Culture, 19th-Century Spanish Decadence, Postwar Spain, Testimonial Literature. Repeatable.

SPAN 508. Workshop: [Topic]. 1-12 Credits.

Repeatable.

SPAN 510. Experimental Course: [Topic]. 1-4 Credits.

Recent topics include Literature and Democratic Transition, Race in Modern Los Angeles, Social Roots of Creativity. Repeatable.

SPAN 520. Spanish Linguistics: [Topic]. 4 Credits.

Variable topics in Spanish linguistics. Recent topics include Spanish Phonology, History of the Spanish Language. Repeatable when topic changes.

SPAN 524. History of the Spanish Language. 4 Credits.

Linguistic changes and social-historical influences on the development of Spanish from its roots in Latin to the diversity of modern dialects. Offered alternate years.

SPAN 525. Literary Translation. 4 Credits.

Variable topics include con textos, first issues, and cultural translation-transculturation in practice.
Prereq: SPAN 520 recommended.

SPAN 548. National Identities and Border Cultures in the Americas. 4 Credits.

Examines 19th and 21st century national formation and alternative forms of collective identity in the Americas through literary texts, historical documents and film. Offered alternate years.

SPAN 566. Introduction to Spanish Golden Age. 4 Credits.

Survey of major figures and cultural issues in the Spanish Golden Age, c. 1500s–1700s.

SPAN 580. 19th-Century Spanish American Literature: [Topic]. 4 Credits.

Topics include issue of literary periods, authors, narrative and nation, genres, and indigenismo. Repeatable twice when topic changes for maximum of 12 credits.

SPAN 590. 20th-Century Latin American Literature: [Topic]. 4 Credits.

Explores major literary trends, authors, and works. Recent topics are Avant-garde in the Mexican Revolution, Latin American Theater. Repeatable twice when topic changes for maximum of 12 credits.

SPAN 601. Research: [Topic]. 1-6 Credits.

Repeatable.

SPAN 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

SPAN 606. Practicum: [Topic]. 1-4 Credits.

Repeatable.

SPAN 607. Seminar: [Topic]. 1-6 Credits.

Repeatable.

SPAN 609. Terminal Project. 1-12 Credits.

Repeatable.

SPAN 680. Advanced 19th-Century Spanish American Literature: [Topic]. 4 Credits.

Selected Latin American topics from literary periods, authors, genres, and aesthetic trends. Repeatable twice when topic changes for maximum of 12 credits.

SPAN 690. Advanced 20th-Century Latin American Literature: [Topic]. 4 Credits.

Selected topics from literary periods, authors, genres, and aesthetic trends. Repeatable twice when topic changes for maximum of 12 credits.

Russian, East European, and Eurasian Studies

Katya Hokanson, Program Director

541-346-4065

175 Prince Lucien Campbell Hall

The Russian, East European, and Eurasian Studies Program is devoted to the study of the peoples living in the eastern third of Europe, throughout the northern steppes of Central Asia, and across Siberia to the Pacific Ocean. Settled over a territory that spans half the earth's time zones, these peoples have created a complex mosaic of cultures, expressed in literature and art as well as in institutions and social forms. Over the centuries, these lands have come under the sway of several great world-historical civilizations and empires: the Byzantine, Mongolian, Ottoman Turkish, Holy Roman, Austro-Hungarian, Russian, and Soviet. These lands have felt the influence of Orthodox Christianity, Catholicism, Protestantism, Judaism, Islam, and Communism. At the intersection of many powerful forces, these lands experience the historical drama of what some call "modernization" with its challenge to customary ways of

life. Yet, after centuries of massive transplantation and transformation, national and ethnic heritages survive. Customary ways and native self-consciousness, more diverse than anywhere else on the globe, express themselves with new vigor.

Visiting Faculty Members

The program sponsors extended stays by visiting Fulbright and International Research and Exchange Board scholars from Russia and Eastern Europe.

Overseas Study

Qualified students of Russian may spend a summer, semester, or academic year in the Commonwealth of Independent States—in the Council on International Educational Exchange (CIEE) Cooperative Russian Language Program, of which the University of Oregon is an affiliate. Participating CIEE schools include Novosibirsk State University and St. Petersburg University. Students may also participate in Moscow and St. Petersburg programs sponsored by the American Council of Teachers of Russian and at a direct exchange program with the University of Latvia. Opportunities also exist for study in the Czech Republic, Hungary, and Poland. Limited fellowship aid is available for these programs.

Students in University of Oregon overseas study programs enroll in courses with subject codes that are unique to individual programs. Special course numbers are reserved for overseas study. See International Affairs in the **Academic Resources** section of this catalog. Students interested in study in the Commonwealth of Independent States or in Eastern Europe should write or call the Overseas Program Coordinator, Office of International Affairs, 5209 University of Oregon, Eugene, Oregon 97403-5209; 541-346-3206.

Cultural Programs

The program sponsors lectures, panel discussions, symposiums, films, plays, exhibitions, concerts, and festivals. These presentations involve scholars from other institutions in the United States and Europe as well as specialists at the university. In addition, the program faculty engages in outreach activities with local schools, community groups, and organizations such as the Eugene-Irkutsk Sister City Committee. Students in the program organized a Russian Club.

Resources

The University of Oregon's library has more than 130,000 volumes in Russian and other Slavic and East European languages, more than 60,000 on Russia and Eastern Europe in Western languages; and subscribes to more than 100 serial titles. The library also has a large collection of Russian and East European films. The bulk of the collection is in the humanities and social sciences.

Facilities at the well-known Yamada Language Center enhance the learning of Slavic and East European languages. For more information, visit the website (<https://babel.uoregon.edu>).

Faculty

Heghine Hakobyan, instructor (Slavic librarian). BA, 1983, Kurgan College of Culture and Enlightenment; MA, 1988, Tyuman State; MLIS, 2003, City University of New York, Queens College. (2007)

Katya E. Hokanson, associate professor (Russian literature, travel literature, cultural studies). B.A., 1984, Williams; M.A., 1988, Ph.D., 1994, Stanford. (1995)

Susanna Soojung Lim, associate professor (19th- and 20th-century Russian literature). BA, 1996, MA, 1998, Korea; MA, 1999, PhD, 2006, California, Los Angeles. (2007)

Julia Nemirovskaya, senior instructor (Russian literature and theater). MA, 1986, PhD, 1991, Moscow State. (2002)

Jenifer Presto, associate professor (Russian literature, modernism, environmental criticism). A.B., 1985, Smith; M.A., 1988, Middlebury; M.A., 1989, Ph.D., 1996, Wisconsin, Madison. (2003)

Lara Ravitch, Senior Instructor (Russian language). B.A., 1998, Connecticut College; M.A., 2002, Monterey (Middlebury) Institute of International Studies. (2012)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Participating

Roy Bing Chan, East Asian languages and literatures (Chinese literature)

Julie Hessler, history (20th-century Russia, Europe)

Ryan Tucker Jones, history (Russian and environmental history)

Mikhail Myagkov, political science (comparative politics, formal political theory)

Steven Shankman, English (comparative literature, Russian novel)

Courtesy

Amanda Bird, courtesy instructor (folklore, translation, Persian literature). BA, 1994, Baylor; MA, 2006, Oregon. (2013)

Alexander Kashirin, courtesy professor. BA, 2002, Eastern New Mexico University; MA, 2005, Oregon; Ph.D., 2010, Oregon. (2003)

Tamara Morris, courtesy professor (Russian language, culture of "Old Believers"). Baccalaureate, D. Banzarov; MA, 1984, Krasnoyarsky State Pedagogical Institute; PhD, 1986, Institute of Russian Language. (2013)

Emeriti

Esther Jacobson-Tepfer, history of art and architecture

R. Alan Kimball, history (modern Russia)

Yelaina Kripkov, Russian Language

Stephen J. Shoemaker, religious studies (history of Eastern Christianity)

Carol T. Silverman, anthropology (performance, eastern Europe, gender)

Sherwin Simmons, history of art and architecture

Ronald Wixman, geography

Cynthia Vakareliyska, linguistics

Associated

John E. Bonine, law

Lisa Wolverton, history

- Bachelor of Arts (p. 516)
- **Minor**

Undergraduate Studies

The program offers a bachelor of arts degree (BA) and a minor. The undergraduate certificate is inactive.

General Requirements

Fields of Concentration

The program offers the following concentrations for the undergraduate major and minor:

- Russian language, literature, and culture (humanities emphasis/field of concentration)
- Russian and East European history, politics, and society (social science emphasis/field of concentration)

Courses with these focus areas are offered by the program and such participating departments as anthropology, geography, history, political science, and sociology. Any course taken that includes instruction on one of these focus areas and has at least 40 percent Russian, East European, former Soviet Eurasian, or Slavic content, including independent research undertaken by the student, may be applied to the field of concentration requirement with administrative approval. Students may petition to the REEES Director of Undergraduate Studies to have courses taken in other disciplines count toward the concentration or elective requirement if the content of these courses meets the 40 percent standard. This applies to regularly scheduled courses and to independent reading and conference courses.

Students can view sample programs of study in the various concentrations on the program website.

Major Requirements

The major requires 36 graded credits; courses must be passed with grades of C– or better. Credits used to fulfill the language requirement may not be applied to the 36-credit requirement.

Bachelor of Arts Degree Requirements

Code	Title	Credits
Language Courses		
RUSS 101–103	First-Year Russian ¹	15
RUSS 201–203	Second-Year Russian ¹	15
RUSS 316–318	Third-Year Russian ¹	15
Field of Concentration Courses		20
At least four upper-division courses in a chosen concentration ²		
Elective Courses ³		16
Total Credits		36

¹ Three years of college-level Slavic language study is usually fulfilled by taking Russian language courses. Students may petition to substitute one year of a second Slavic language for one year of the primary Slavic language. The language option is chosen in consultation with program advisors.

² Two courses must be at the 400 level.

³ At least two 4-credit courses should be outside of the field of concentration.

Honors in Russian, East European, and Eurasian Studies

Majors who have an overall GPA of 3.50 by the end of the junior year and who are interested in honors should meet with the REEES Director of Undergraduate Studies, then submit a thesis proposal to the program's director for approval. If approved, the student registers for a minimum of 4 credits in Thesis (403) under the supervision of a program faculty member. The thesis must be completed at least one term before the term of graduation.

Minor Requirements

The minor requires 24 graded credits; courses must be passed with a grade of C– or better. Courses taken to fulfill the language requirement may not be used to fulfill the 24-credit requirement.

Code	Title	Credits
Language Courses		
RUSS 101–103	First-Year Russian ¹	15
RUSS 201–203	Second-Year Russian ¹	15
RUSS 316–318	Third-Year Russian ¹	15
Field of Concentration Courses		12
Three upper-division courses in a chosen concentration ²		
Elective Courses		12
Total Credits		24

¹ Three years of college-level Slavic language study is usually fulfilled by taking Russian language courses. Students may petition to substitute one year of a second Slavic language for one year of the primary Slavic language. The language option is chosen in consultation with program advisors.

² One course in the field of concentration must be at the 400 level.

Additional Requirements

There is no limit on the number of language courses taken at other universities, including courses taken abroad, that may be used to satisfy the language requirement for the major or minor, subject to an equivalency assessment by the Russian language coordinator. With respect to concentration and elective requirements, undergraduate majors may apply as many as 16 transfer credits to the major, but no more than 8 of these credits can be applied to the field of concentration. Undergraduate minors may apply up to 8 transfer credits to the minor, but no more than 4 of them can be applied to the field of concentration.

Secondary School Teaching Careers

The College of Education offers a fifth-year program for teaching licensure in foreign language. This program is described in the **College of Education** section of this catalog.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years (Below is a sample for a Russian, East European, and Eurasian studies major with a concentration in Russian

language, literature, and culture). There are alternative ways. Students should consult their advisor to determine the best path for them.

- Master of Arts
- Certificate

Graduate Studies

The program offers a master of arts (MA) and a graduate certificate in Russian, East European, and Eurasian studies. The center is affiliated with the master's and PhD programs in comparative literature and linguistics, and students in the center have also successfully applied to PhD programs in history, geography, and other fields.

Master of Arts

Application

Graduate application instructions are available online (<http://reeses.uoregon.edu/graduate/admission-and-aid/>). The application deadline for admission the following fall term is February 1. Applicants who are not seeking graduate fellowship support are considered for admission throughout the academic year if space is available in the program.

Incoming candidates for the master's degree must meet with an advisor and take a Russian proficiency examination on the Friday before the beginning of their first academic term.

Graduate students are expected to meet regularly with their advisor and submit an updated program plan every spring term. Students and their advisors use degree planning sheets to design individual programs.

Master of Arts Degree Requirements

The MA in Russian, East European, and Eurasian studies requires 40 graded graduate-level credits passed with a grade of B– or better and 9 thesis credits (taken pass/no pass), for a total of 49 graduate credits. Credits used to fulfill the language requirement may not be applied to the 49-credit requirement. The MA typically takes two years (six terms) to complete.

Code	Title	Credits
Language Courses		
Four years of university study of a Slavic language or equivalent, plus reading competency as defined by a translation exam in the student's field of concentration ¹		
Field of Concentration Courses		
Four graded graduate-level courses in a chosen concentration		16
Research and Thesis		
REES 503	Thesis	9
or RUSS 503	Thesis	
Elective Courses		
Six graded graduate-level courses ²		24
Total Credits		49

¹ In exceptional cases, a student may petition to substitute one year of a second Slavic language or equivalent mastery for one of the years of the primary language, but must pass the reading exam. Native speakers of a Slavic language may petition to substitute an appropriate alternative measure of English competency to the translation exam.

² Two courses may be in the field of concentration. The electives must include courses in at least two fields outside the student's concentration.

Fields of Concentration

- Russian literature
- Russian and East European history
- Contemporary Russia, East Europe, and Eurasia

Additional Requirements

A written comprehensive examination on the field of concentration is typically taken the term prior to submission of the thesis. The thesis is defended before the candidate's committee. The defense may include discussion of the comprehensive exam.

Graduate Certificate

The graduate certificate in Russian, East European, and Eurasian studies requires 32 graded graduate-level credits; courses must be passed with grades of B– or better. Credits used to fulfill the language requirement may not be applied to the 32-credit requirement.

Code	Title	Credits
Language Courses		
Select one of the following:		
Four years of college study or equivalent in one Slavic language		
Total of four years of college study in two languages of the region		
Field of Concentration Courses		
Three graduate-level courses in chosen concentration		12
Elective Courses		
Four graduate-level courses ¹		16
Total Credits		28

¹ One elective may be in the field of concentration.

Additional Requirements

A research paper written in conjunction with a course or as a separate reading course in the field of concentration.

Fields of Concentration

- Russian literature
- Russian and East European history
- Contemporary Russia, East Europe, and Eurasia

The certificate may be earned in conjunction with any MA or PhD degree. Courses taken to fulfill the graduate degree may also be used to fulfill certificate requirements. Master's candidates in the program may earn the graduate certificate if the field of concentration chosen for the certificate is not the same as the one for the master's degree.

Intermediate Russian grammar, reading, conversation, and composition.
Study of representative literary works.
Prereq: RUSS 202 or equivalent.

RUSS 204. Introduction to Russian Literature. 4 Credits.
Survey of Russian literature from its origins to the present; emphasis on Pushkin, Gogol, Turgenev, Dostoevsky, Tolstoy, Chekhov, and contemporary works. Readings, lectures, and discussions in English.

RUSS 205. Introduction to Russian Literature. 4 Credits.
Survey of Russian literature from its origins to the present; emphasis on Pushkin, Gogol, Turgenev, Dostoevsky, Tolstoy, Chekhov, and contemporary works. Readings, lectures, and discussions in English.

RUSS 206. Introduction to Russian Literature. 4 Credits.
Survey of Russian literature from its origins to the present; emphasis on Pushkin, Gogol, Turgenev, Dostoevsky, Tolstoy, Chekhov, and contemporary works. Readings, lectures, and discussions in English.

RUSS 240. Russian Culture. 4 Credits.
Comparative aesthetics and development of art, film, architecture, music, and literature in the context of Russian intellectual history. Readings, lectures, and discussions in English.

RUSS 309. Russian through Theater. 2-4 Credits.
Combined elements of Russian language, literature, and culture learned through participation in a theater production. Credits vary with degree of involvement. Repeatable up to three times for a total of 16 credits.

RUSS 316. Third-Year Russian. 5 Credits.
Intermediate-to-advanced Russian. Further development of basic skills, with special attention to reading comprehension, conversational competence, grammatical accuracy, and cultural sophistication.
Prereq: RUSS 203 or equivalent.

RUSS 317. Third-Year Russian. 5 Credits.
Intermediate-to-advanced Russian. Further development of basic skills, with special attention to reading comprehension, conversational competence, grammatical accuracy, and cultural sophistication.
Prereq: RUSS 203 or equivalent.

RUSS 318. Third-Year Russian. 5 Credits.

Intermediate-to-advanced Russian. Further development of basic skills, with special attention to reading comprehension, conversational competence, grammatical accuracy, and cultural sophistication. Prereq: RUSS 203 or equivalent.

RUSS 334. Dostoevsky. 4 Credits.

Introduction to the novels and short stories of Dostoevsky. His literary, ethical, and political development. Readings and instruction in English.

RUSS 335. Tolstoy. 4 Credits.

Examines short and long works by Leo Tolstoy, focusing on ethical questions and Tolstoy's literary art. Besides being a great writer, Tolstoy was also a philosopher, a religious thinker and a reformer. Readings and instruction in English.

RUSS 351. Russian Literature and Film. 4 Credits.

Introduction to great works of 19th-century Russian literature and analysis of the cinematic adaptation of these works by Western filmmakers.

RUSS 360. Race in Russia and America. 4 Credits.

While the racial conversation dominates American culture, few consider the history and significance of race beyond the U.S. This course examines race from a fresh, much less examined, perspective – that of Russia, Soviet Union, and post-Soviet world, in comparison to the US.

RUSS 399. Special Studies: [Topic]. 1-5 Credits.

Recent topics are Solzhenitsyn, Sex and Feminism in Russia. Repeatable when topic changes.

RUSS 401. Research: [Topic]. 2-6 Credits.

Repeatable.

RUSS 403. Thesis. 3-6 Credits.

Repeatable.

RUSS 405. Reading and Conference: [Topic]. 1-6 Credits.

Repeatable.

RUSS 406. Field Studies: [Topic]. 1-21 Credits.

Repeatable.

RUSS 407. Seminar: [Topic]. 2-4 Credits.

Repeatable when topic changes.

RUSS 408. Workshop: [Topic]. 1-12 Credits.

Repeatable..

RUSS 409. Terminal Project. 1-12 Credits.

Repeatable.

RUSS 410. Experimental Course: [Topic]. 2-4 Credits.

Recent topics are Self and Other in Russian Literature and Film. Repeatable when topic changes.

RUSS 436. Advanced Russian: [Topic]. 4 Credits.

Analysis of Russian texts, films, and TV broadcasts about selected topics in Russian culture, literature, politics, and economics with practice in comprehension, conversation, and composition. Repeatable twice when topic changes for a maximum of 12 credits. Prereq: RUSS 318 or equivalent.

RUSS 503. Thesis. 1-9 Credits.

Repeatable.

RUSS 507. Seminar: [Topic]. 2-4 Credits.

Repeatable when topic changes.

RUSS 508. Workshop: [Topic]. 2-12 Credits.

Conducted in Russian. Repeatable when topic changes.

RUSS 510. Experimental Course: [Topic]. 2-4 Credits.

Recent topics are Self and Other in Russian Literature and Film. Repeatable when topic changes.

RUSS 536. Advanced Russian: [Topic]. 4 Credits.

Analysis of Russian texts, films, and TV broadcasts about selected topics in Russian culture, literature, politics, and economics with practice in comprehension, conversation, and composition. Repeatable twice when topic changes for a maximum of 12 credits.

RUSS 601. Research: [Topic]. 2-6 Credits.

Repeatable.

RUSS 602. Supervised College Teaching. 1-5 Credits.

Repeatable.

RUSS 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

RUSS 606. Field Studies: [Topic]. 1-16 Credits.

Repeatable.

RUSS 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

RUSS 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

RUSS 609. Terminal Project. 1-12 Credits.

sociology@uoregon.edu

Sociology is the systematic study of human social life, groups, and societies. Sociology can reveal how society works, what motivates individuals to behave in certain ways, how particular rules and norms get established, why people obey those rules and norms, how seemingly invisible social forces might govern our behavior, and how the outcome of our lives are frequently determined by forces largely outside of our control. It can even help us understand why we might sometimes act in ways that are contrary to our deeply held beliefs.

Sociologists study how societies form, change, and die out. They study how society affects you and vice versa. The department curriculum focuses on social institutions—the family, work, religion, and the economy; culture—the governing ideas and beliefs of a society; and social interactions—the way people behave as individuals and in groups. Taken together, they make up what sociologists call the social structure: enduring, patterned, orderly relationships among institutions, people, and other elements of a given society. Through a systematic study of society, sociology helps us understand social problems such as inequality, racism, environmental degradation, and poverty, to name a few, and aids in the development of creative solutions to solve them.

Faculty

Michael B. Aguilera, associate professor (economic sociology, social inequality, race and ethnicity). BA, 1995, California, Irvine; MA, 1995, PhD, 1999, State University of New York, Stony Brook. (2004)

Oluwakemi Balogun, assistant professor (gender, race and migration, African Studies). See **Women's, Gender, and Sexuality Studies**.

Michael C. Dreiling, professor (political sociology, environmental sociology, social movements). BA, 1990, California, Irvine; MA, 1993, PhD, 1997, Michigan, Ann Arbor. (1996)

Clare R. Evans, assistant professor (medical sociology, quantitative methods, social networks). BA, 2008, Lewis and Clark College; MPH, 2011, Columbia; ScD, 2015, Harvard. (2015)

John B. Foster, professor (environment, Marxism, political economy). BA, 1975, Evergreen State; MA, 1977, PhD, 1984, York. (1985)

Aaron O. Gullickson, associate professor (race and ethnicity, stratification, demography). BA, 1998, Washington (Seattle); MA, 1999, 2001, PhD, 2004, California, Berkeley. (2007)

Jill A. Harrison, associate professor (work, organizations, qualitative methods). BA, 2000, Youngstown State; MA, 2004, PhD, 2009, Ohio State. (2009)

Claire W. Herbert, assistant professor (crime & socio-legal studies, housing, urban sociology, race, poverty & inequality). BS, 2006, University of Oregon; MA, 2014, University of Michigan; PhD, 2016, University of Michigan. (2019)

Jocelyn Hollander, professor (gender, microsociology, gender-based violence). BA, 1987, Stanford; MA, 1991, PhD, 1997, Washington (Seattle). (1997)

Raoul S. Liévanos, assistant professor (environment and health, race and ethnicity, science and technology). BA, 2004, California State, Fresno; MA, 2007, PhD, 2013, California, Davis. (2016)

Ryan Light, associate professor (cultural sociology, inequality, social networks). BA, 2000, Kenyon College; MA, 2004, PhD, 2009, Ohio State. (2009)

Krystale Littlejohn, assistant professor (health and medicine, social cognition, inequality). BA, 2007, Occidental College; MA, 2010, PhD, 2013, Stanford. (2019)

Kari Marie Norgaard, professor (environmental sociology, gender and environment, race and environment, climate change, sociology of culture, social movements and sociology of emotions). BS, 1992, Humboldt State; MA, 1994, Washington State; PhD, 2003, Oregon. (2011)

Matthew Norton, associate professor (political and cultural sociology, theory). BA, 1998, Villanova; MA, 2002, Bradford; PhD, 2012, Yale. (2012)

C. J. Pascoe, associate professor (sexuality and gender, childhood and youth, new media). BA, 1996, Brandeis; MA, 2000, PhD, 2006, California, Berkeley. (2013)

Elaine Repogle, senior instructor I (sociology of medicine and mental health, culture, qualitative methods). BA, 1989, Earlham College; MTS, 1994, Harvard; MA, 2002, PhD, 2005, Rutgers. (2008)

Ellen K. Scott, professor (low-wage work, public policy, gender). BA, 1982, Williams; MA, 1991, New School for Social Research; MA, 1992, PhD, 1997, California, Davis. (2001)

Jiannbin Lee Shiao, associate professor (race and ethnicity, research methods, Asian America). BA, 1991, Brown; MA, 1994, 1996, PhD, 1998, California, Berkeley. (1998)

Jessica Vasquez-Tokos, professor (race and ethnicity, immigration, family). BA, 1998, Princeton; MA, 2002, PhD, 2007, California, Berkeley. (2012)

Richard York, professor (environmental sociology, statistics, research methods). BS, 1994, Southern Oregon; MS, 1997, Bemidji State; PhD, 2002, Washington State. (2002)

Emeriti

Vallon L. Burris, professor emeritus. BA, 1969, Rice; PhD, 1976, Princeton. (1977)

Steven Deutsch, professor emeritus. BA, 1958, Oberlin; MA, 1959, PhD, 1964, Michigan State. (1966)

Marion Sherman Goldman, professor emeritus [sic]. AB, 1967, California, Berkeley; MA, 1970, PhD, 1977, Chicago. (1973)

Patricia A. Gwartney, professor emerita. AB, 1973, California, Berkeley; MA, 1979, PhD, 1981, Michigan. (1981)

Benton Johnson, professor emeritus. BA, 1947, North Carolina; MA, 1953, PhD, 1954, Harvard. (1957)

Kenneth B. Liberman, professor emeritus. BA, 1970, State University of New York, Old Westbury; MA, 1976, PhD, 1981, California, San Diego (1983)

Gregory McLauchlan, associate professor (urban sociology; political sociology; science, technology, environment). BA, 1974, MA, 1978, PhD, 1988, California, Berkeley. (1989)

Robert M. O'Brien, professor emeritus. BS, 1967, Pomona; MS, 1970, PhD, 1973, Wisconsin. (1981)

Donald R. Van Houten, professor emeritus. BA, 1958, Oberlin; PhD, 1967, Pittsburgh. (1968)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

- **Minor in Sociology (p. 529)**

Undergraduate Studies

Sociology is the analytical study of the development, structure, and function of human groups and societies. It is concerned with the scientific understanding of human behavior as it relates to, and as a consequence of, interaction within groups. The undergraduate program in the Department of Sociology provides a broad understanding of human society for students in every field and integrated programs for majors in sociology.

Preparation

High school students planning to major in sociology should take courses in history and social studies; in addition, a course in statistics should be considered. Substantial work in English composition, mathematics, and second languages is also desirable. Two-year transfer students are advised to come with a year's work in introductory sociology courses as well as courses that fulfill university group requirements.

Careers

Recent graduates with bachelor's degrees in sociology are found in all the pursuits traditionally open to liberal-arts graduates—especially social service, management, marketing, teaching, library, and research-statistics occupations in industries related to health, education, business, government, and the environment. Some graduates seek additional training in graduate professional schools of social work, business administration, and law. A bachelor's degree alone is seldom sufficient to allow a person to enter a professional career as a sociologist. Students who seek careers as social scientists enter graduate programs in sociology or related fields.

Advising

Academic advising in sociology is provided Public Policy, Society and Identity Flight Path through Tykeson College and Career Advising. The advising office is located on the first and second floors of Willie and Donald Tykeson Hall. Advisors may be reached via Navigate, Microsoft Teams or by phone at 541-346-9200.

Internship advising and information is available through the Director of Undergraduate Studies, Jessica Vasquez-Tokos. She can be reached at vasquezj@uoregon.edu.

Career Planning

With the help of advisors, each student should select courses that emphasize experiences most useful for the student's educational and career objectives. Career advising is available through the University Career Center, located in the Garden Level of Tykeson Hall. Appointments can be scheduled through Navigate. The career center may be contacted through Microsoft Teams or at 541-346-3235. Jobs and internships are listed in Handshake.

When planning a program, students should keep in mind the ways in which major requirements fit with career objectives.

Social Service Professions

Social service professions include social work, work in nonprofit organizations, counseling, community relations, housing, labor relations, and human resources. Sociology majors who want to enter a helping profession should take at least one course each in sociological methodology and social psychology and several courses dealing with social issues and problems.

Students may supplement their programs with courses in the psychology and political science departments and in the College of Education. Many of these occupations require graduate or field training. Students can get more detailed information from the University Career Center.

Business or Government Service

Business or government organizations typically require general human-relations skills, some awareness of organizations and the surrounding

social environment, and an ability to analyze and understand basic social data.

Students interested in business should include in their programs courses in methodology, social psychology, and organizations and occupations. Programs may be supplemented with courses in the Lundquist College of Business and in the Department of Economics.

Students with career goals in governmental service should include courses in community, urban affairs, population, and resources; social psychology; organizations and occupations; and methodology. Related courses in economics, political science, and planning, public policy and management departments also are useful.

Honors in Sociology

Motivated students may participate in the honors program in sociology. Qualified senior year students have the opportunity to write an honors thesis by working closely with faculty members and fellow honors students on a year-long empirical research project of their own design. The Sociology Department encourages students to apply for admission to the Honors Program in Sociology if they are planning to pursue advanced training in sociology, if they are interested in more direct applications of sociology, or if they simply desire a more challenging academic experience.

Students who successfully complete the honors program are awarded departmental honors. The honors distinction is noted on the student's official transcript and diploma.

Applicants to the honors program must demonstrate a high level of competence and motivation for advanced studies in sociology. A GPA of no less than 3.40 in at least 12 units of sociology courses or a nomination by two faculty members is required for admittance but does not guarantee acceptance. Students selected for the program are notified during spring term of their junior year. Application forms are available on the department's web page. Students also receive an e-mail describing the application process in the spring term.

During fall and winter terms of the senior year, honors students take part in the two-credit honors thesis seminar, Seminar: [Topic] (SOC 407), and in all three terms of the senior year also enroll in Thesis (SOC 403).

In fall term, they work closely with the Honors Program advisor and other honors students to design a research proposal and identify a primary thesis advisor from among the UO Sociology faculty. By the end of the term, each student submits a thesis proposal for approval. During winter term, students proceed with data collection. In the spring term, students work independently with their individual thesis advisor and proceed with analysis and writing. Students are required to submit their thesis for presentation at the Undergraduate Research Symposium in spring quarter, and the final thesis is due in June.

Twelve credits of sociology degree requirements are earned through the honors program: 8 credits of SOC 403 and 4 credits of SOC 407. The SOC 407 credits count toward the 400-level requirement for the major.

Preparing for Graduate Study

Students planning graduate work in sociology should have a strong background in sociological theory and social research methods well beyond courses required for the major. Besides taking advanced courses in areas of special interest to them, students should take a substantial number of upper-division courses in other social sciences.

Applications to graduate school should be made in fall or winter the year before the student plans to enter a graduate program. Students considering graduate school should talk to their faculty advisors before their final year of school about programs at various schools, experiences that increase chances for admission, and requirements for students in graduate programs in sociology.

Kindergarten through Secondary Teaching Careers

Students who complete a degree with a major in sociology are eligible to apply to the College of Education's fifth-year program for a license in middle-secondary teaching or the fifth-year program for a license in elementary teaching. Refer early to information in the **College of Education** section of this catalog.

- Sociology (MA, MS) (p. 530)
- Doctor of Philosophy in Sociology (p. 530)

Graduate Studies

The Department of Sociology offers graduate work leading to a doctor of philosophy (PhD) and is intended for students seeking a professional career in research and teaching in both academic and nonacademic settings. The department does not offer a terminal master's degree, although students enrolled in the PhD program will also receive a master's degree as part of their training.

Students receive training in qualitative and quantitative research methodologies, sociological theory, and major substantive fields within sociology such as gender, sexuality, environment, race and ethnicity, culture, social networks, labor, immigration, and political economy. The department places a strong emphasis on research, and many students will find opportunities to participate in projects conducted by faculty members.

Courses

SOC 196. Field Studies: [Topic]. 1-2 Credits.

Repeatable.

SOC 198. Workshop: [Topic]. 1-2 Credits.

Repeatable.

SOC 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

SOC 204. Introduction to Sociology. 4 Credits.

The sociological perspective with emphasis on fundamental concepts, theories, and methods of research.

SOC 207. Social Inequality. 4 Credits.

Overview of social inequality, cross-culturally and within the United States. Examines relationship of social inequality based on social class, race, and gender to social change, social institutions, and self-identity.

SOC 301. American Society. 4 Credits.

Selected aspects of American culture and institutions and the ways in which they are changing.

Prereq: SOC 204 recommended.

SOC 304. Community, Environment, and Society. 4 Credits.

Interrelationship of social and environmental factors in human communities, processes of community change, impact of environmental change on human communities.

SOC 310. Social Theory. 4 Credits.

Analysis of the major writers and ideas that have shaped contemporary sociology. Focus on recurrent concepts and issues that continue to challenge sociological inquiry.

SOC 311. Research Methods. 4 Credits.

The development of social research; the nature of scientific inquiry and basic methods and techniques; examination of representative sociological studies from the standpoint of methodology.

Prereq: SOC 204 or SOC 207.

SOC 312. Statistical Analysis in Sociology. 4 Credits.

Construction and interpretation of tables and graphs, descriptive statistics, measures of association and contingency relationships, basic ideas of probability, and elementary statistical inference applied to nonexperimental research.

SOC 313. Social Issues and Movements. 4 Credits.

Contemporary social issues viewed in relation to the social structure of American society. Social movements and ideologies related to these issues.

SOC 317. Sociology of the Mass Media. 4 Credits.

Analysis of media events: advertisements, news broadcasts, documentaries, popular music, and television. Perspectives include content analysis, semiotics, functionalist and structuralist paradigms, and power system analysis.

SOC 328. Self and Society. 4 Credits.

How the thought, feeling, and behavior of individuals influence and are influenced by the actual, imagined, or implied presence of others.

SOC 330. Sociology of the Family. 4 Credits.

Introduction to and historical perspective of the family as a social institution and small-group association.

Prereq: SOC 204 or SOC 207.

SOC 345. Race and Ethnicity. 4 Credits.

Examines the major racial and ethnic groups in the United States with special attention to social interactions and inequalities.

SOC 346. Work and Occupations. 4 Credits.

Characteristics of work and occupational careers in modern societies; relationships of those to family, the economy, bureaucracy, technology, and alienation.

SOC 355. Sociology of Gender. 4 Credits.

Position of women in contemporary society; women and work, politics, families, the economy; intersection of gender, race, and class; women's movements.

SOC 370. Urban Sociology. 4 Credits.

Examines the growth of cities; urban inequalities, politics, and social movements; built environment, ecology, and sustainability of cities and identity; global cities and immigration.

SOC 380. Introduction: Deviance, Control, and Crime. 4 Credits.

Origins of rules and laws, patterns of reactions to their violation, emphasis on causal theories of deviance and of crime, data sources for study of crime.

SOC 385. Medical Sociology. 4 Credits.

This course is designed as an introduction to the broad field of medical sociology and the sociology of health and illness.

SOC 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

SOC 400M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

SOC 401. Research: [Topic]. 1-21 Credits.

Repeatable.

SOC 403. Thesis. 1-12 Credits.

Repeatable.

SOC 404. Internship: [Topic]. 1-12 Credits.

Repeatable.

SOC 405. Reading and Conference: [Topic]. 1-21 Credits.

Repeatable.

SOC 406. Practicum: [Topic]. 1-12 Credits.

Repeatable.

SOC 407. Seminar: [Topic]. 1-5 Credits.

Repeatable. Offerings vary from year to year depending on student needs and faculty interests.

Prereq: SOC 204 or SOC 207.

SOC 408. Workshop: [Topic]. 1-21 Credits.

Repeatable.

SOC 409. Terminal Project. 1-12 Credits.

Repeatable.

SOC 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

SOC 412. Sociological Research Methods. 4 Credits.

Descriptive and inferential statistics, including multiple regression.

SOC 413. Sociological Research Methods. 4 Credits.

Advanced statistical techniques focusing on generalized linear models.

Prereq: SOC 412.

SOC 416. Issues in Environmental Sociology [Topic]. 4 Credits.

Analysis of selected topics in environmental sociology. Topics include environmental movement, impacts of technological change, environmental policy and the state, environmental values, attitudes, and behaviors. Repeatable twice when topic changes for maximum of 12 credits.

SOC 420. Political Economy. 4 Credits.

Survey of the fundamentals of political economy. Readings from Marxian and mainstream traditions introduce contemporary debates on socioeconomic crisis.

SOC 425. Issues in Sociology of Family: [Topic]. 4 Credits.

Analysis of selected topics in the sociology of the family. Topics include the sociology of parenthood, feminist perspectives on the family, and the family in cross-cultural perspective. Repeatable twice for a maximum of 12 credits when topic changes.

Prereq: SOC 330.

SOC 442. Issues in Urban Sociology: [Topic]. 4 Credits.

Determinants and consequences of urbanization under different conditions; the city as a social and ecological system. Repeatable twice when topic changes for a maximum of 12 credits.

SOC 445. Sociology of Race and Ethnicity: [Topic]. 4 Credits.

Advanced analysis of selected topics in sociology of race/ethnicity. Topics vary. Examples include Asian Americans, Latinos, mixed race, racial oppression, residential segregation, and the post-civil rights era. Repeatable twice for a maximum of 12 credits.

Prereq: SOC 310, SOC 311.

SOC 446. Issues in Sociology of Work: [Topic]. 4 Credits.

Selected topics in sociology of work: occupational structures and careers, industrial democracy; technological change and work reform, politics of work. Repeatable twice when topic changes for maximum of 12 credits.

SOC 447. Issues in Sociology of Organizations: [Topic]. 4 Credits.

Analysis of selected topics in the sociology of organizations. Topics include industrial sociology, organizational change; organizational democracy; corporate deviance; bureaucracy, power, and society. Repeatable twice when topic changes for maximum of 12 credits.

SOC 451. Social Stratification. 4 Credits.

The interrelations among class, race, and sex. Historical origins and development of class and class systems including slavery.

Prereq: SOC 310, SOC 311, SOC 312.

SOC 452. Issues of Migration: [Topic]. 4 Credits.

Sociological analysis of migration, including dynamics of race and ethnicity, social structure, and social policy. Examines assimilation, marginalization, multiculturalism, postcolonialism, and social cohesion. Repeatable twice when the topic changes for a maximum of 12 credits. Offered alternate years.

Prereq: SOC 310.

SOC 455. Issues in Sociology of Gender: [Topic]. 4 Credits.

Advanced analysis of gender and social relations of power in contemporary society. Variable topics include Women and Health; Violence against Women. Repeatable twice when topic changes for maximum of 12 credits.

SOC 456. Feminist Theory. 4 Credits.

Examines major sociological theories that elucidate the position of women and gender as part of the configuration of social relations of power in contemporary societies.

SOC 457. Sex and Society. 4 Credits.

Examines alternative sociological perspectives on sexual behavior, the social construction and regulation of sexuality, contemporary social and political issues pertaining to sexuality.

Prereq: SOC 310.

SOC 458. Issues in Cultural Sociology: [Topic]. 4 Credits.

Topics include the examination of sociological literature, research, and perspectives on a range of important themes core to cultural sociology, including production and consumption of culture, semiotics, community and networks, and popular culture. Repeatable twice for a maximum of 12 credit when topic changes.

SOC 459. Issues in Science, Technology & Society: [Topic]. 4 Credits.

Topics include the examination of sociological literature, research, and perspectives on a range of themes core to understanding science, technology and society, including the public understanding of science, science and social movements, and social inequalities in science.

SOC 465. Political Sociology. 4 Credits.

Analysis of political theory and behavior, social bases of power and policy determination, institutional interrelationships, intellectuals and ideologies, political trends and change, political participation and membership.

SOC 467. Economic Sociology. 4 Credits.

Applies the sociological perspective to basic economic phenomena such as markets, exchange, prices, money and rationality.

Prereq: SOC 310.

SOC 475. Marxist Sociological Theory. 4 Credits.

Basic concepts, theory, and social analysis in the works of Marx and Engels. Topics include dialectical and historical materialism, class, historical development, political economy, and imperialism.

SOC 484. Issues in Deviance, Control, and Crime: [Topic]. 4 Credits.

Topics vary. Examples are modern policing, juvenile delinquency, correction, emerging forms of social control. Repeatable twice when topic changes for maximum of 12 credits.

SOC 491. Sociology of Education. 4 Credits.

The relationship between education and other social institutions, the school and the community, the school as a social system, social change and education.

SOC 503. Thesis. 1-16 Credits.

Repeatable.

SOC 507. Seminar: [Topic]. 1-5 Credits.

Repeatable. Offerings vary from year to year depending on student needs and faculty interests.

SOC 508. Workshop: [Topic]. 1-21 Credits.

Repeatable.

SOC 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

SOC 512. Sociological Research Methods. 4 Credits.

Descriptive and inferential statistics, including multiple regression.

SOC 513. Sociological Research Methods. 4 Credits.

Advanced statistical techniques focusing on generalized linear models. Prereq: SOC 512.

SOC 516. Issues in Environmental Sociology [Topic]. 4 Credits.

Analysis of selected topics in environmental sociology. Topics include environmental movement, impacts of technological change, environmental policy and the state, environmental values, attitudes, and behaviors. Repeatable twice when topic changes for maximum of 12 credits.

SOC 520. Political Economy. 4 Credits.

Survey of the fundamentals of political economy. Readings from Marxian and mainstream traditions introduce contemporary debates on socioeconomic crisis.

SOC 542. Issues in Urban Sociology: [Topic]. 4 Credits.

Determinants and consequences of urbanization under different conditions; the city as a social and ecological system. Repeatable twice when topic changes for a maximum of 12 credits.

SOC 545. Sociology of Race and Ethnicity: [Topic]. 4 Credits.

Advanced analysis of selected topics in sociology of race/ethnicity. Topics vary. Examples include Asian Americans, Latinos, mixed race, racial oppression, residential segregation, and the post-civil rights era. Repeatable twice for a maximum of 12 credits.

SOC 547. Issues in Sociology of Organizations: [Topic]. 4 Credits.

Analysis of selected topics in the sociology of organizations. Topics include industrial sociology, organizational change; organizational democracy; corporate deviance; bureaucracy, power, and society. Repeatable twice when topic changes for maximum of 12 credits.

SOC 551. Social Stratification. 4 Credits.

The interrelations among class, race, and sex. Historical origins and development of class and class systems including slavery.

SOC 552. Issues of Migration: [Topic]. 4 Credits.

Sociological analysis of migration, including dynamics of race and ethnicity, social structure, and social policy. Examines assimilation, marginalization, multiculturalism, postcolonialism, and social cohesion. Repeatable twice when the topic changes for a maximum of 12 credits. Offered alternate years.

SOC 555. Issues in Sociology of Gender: [Topic]. 4 Credits.

Advanced analysis of gender and social relations of power in contemporary society. Variable topics include Women and Health; Violence against Women. Repeatable twice when topic changes for maximum of 12 credits.

SOC 556. Feminist Theory. 4 Credits.

Examines major sociological theories that elucidate the position of women and gender as part of the configuration of social relations of power in contemporary societies. Prereq: SOC 555.

SOC 557. Sex and Society. 4 Credits.

Examines alternative sociological perspectives on sexual behavior, the social construction and regulation of sexuality, contemporary social and political issues pertaining to sexuality.

SOC 558. Issues in Cultural Sociology: [Topic]. 4 Credits.

Topics include the examination of sociological literature, research, and perspectives on a range of important themes core to cultural sociology, including production and consumption of culture, semiotics, community and networks, and popular culture. Repeatable twice for a maximum of 12 credit when topic changes.

SOC 559. Issues in Science, Technology & Society: [Topic]. 4 Credits.

Topics include the examination of sociological literature, research, and perspectives on a range of themes core to understanding science, technology and society, including the public understanding of science, science and social movements, and social inequalities in science. Repeatable twice for a maximum of 12 credits when topic changes.

SOC 565. Political Sociology. 4 Credits.

Analysis of political theory and behavior, social bases of power and policy determination, institutional interrelationships, intellectuals and ideologies, political trends and change, political participation and membership.

SOC 567. Economic Sociology. 4 Credits.

Applies the sociological perspective to basic economic phenomena such as markets, exchange, prices, money and rationality.

SOC 575. Marxist Sociological Theory. 4 Credits.

Basic concepts, theory, and social analysis in the works of Marx and Engels. Topics include dialectical and historical materialism, class, historical development, political economy, and imperialism.

SOC 584. Issues in Deviance, Control, and Crime: [Topic]. 4 Credits.

Topics vary. Examples are modern policing, juvenile delinquency, correction, emerging forms of social control. Repeatable twice when topic changes for maximum of 12 credits.

SOC 601. Research: [Topic]. 1-16 Credits.

Repeatable.

SOC 602. Supervised Tutoring. 1-12 Credits.

Repeatable.

SOC 603. Dissertation. 1-16 Credits.

Repeatable.

SOC 604. Internship: [Topic]. 1-6 Credits.

Repeatable.

SOC 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

SOC 606. Field Studies: [Topic]. 1-12 Credits.

Repeatable.

SOC 607. Seminar: [Topic]. 1-5 Credits.

Proseminar required for all incoming Sociology graduate students. Professional socialization and preparation for the discipline. Repeatable.

SOC 608. Workshop: [Topic]. 1-16 Credits.

Repeatable. A current topic is Master's Project.

SOC 609. Terminal Project. 1-16 Credits.

Repeatable.

SOC 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

SOC 612. Overview of Sociological Methods. 5 Credits.

Examines the research process—framing research questions, qualitative and quantitative design, relationships between methods and theory, deductive and inductive investigation logic, research ethics, sampling procedures, explanatory power.

SOC 613. Advanced Sociological Methods: [Topic]. 5 Credits.

Major methodological topics such as comparative, demographic, experimental, field, historical, and survey methods. Other possible topics include time-series analysis. Repeatable twice when topic changes for maximum of 15 credits.

Prereq: SOC 612 or equivalent.

SOC 615. Advanced Sociological Theory: [Topic]. 5 Credits.

Major sociological theories such as modern functionalism, contemporary Marxism, phenomenology, postmodernism, feminist and organizational theory. Repeatable twice when topic changes for maximum of 15 credits.

SOC 616. Environment and Resource Issues: [Topic]. 5 Credits.

Explores issues of environmental sociology and resource policy, including ecological crisis; environmental justice as it pertains to race, gender, class, and international inequality. Repeatable twice when topic changes for maximum of 15 credits.

SOC 617. Sociological Theory I. 5 Credits.

Sociological theories of the 19th century (especially Marx, Weber, and Durkheim) and 20th century (e.g., modern functionalism, feminist, neo-Marxism, neo-Weberian, poststructuralist theories).

SOC 618. Sociological Theory II. 5 Credits.

Major themes and historical foundation of contemporary sociological theory.

Prereq: SOC 617.

SOC 621. Teaching in the Social Sciences. 4 Credits.

Prepares graduate students to teach their own classes. Covers pedagogy and develops practical skills. Offered alternate years.

SOC 644. Race and Ethnicity Issues: [Topic]. 5 Credits.

Explores current research and theoretical debates, such as Chicano-Chicana and Latino-Latina studies, in the sociology of race and ethnicity. Repeatable twice when topic changes for maximum of 15 credits.

SOC 656. Issues in Sociology of Gender: [Topic]. 5 Credits.

Examines sociological theories of gender, focusing on a particular substantive area such as health, work, family, or sexuality. Explores gender in relation to race, ethnicity, and class. Repeatable twice when topic changes for maximum of 15 credits.

Bachelor of Arts and Bachelor of Science in Sociology

Sociology is the systematic study of human social life, groups, and societies. Sociology can reveal how society works, what motivates individuals to behave in certain ways, how particular rules and norms get established, why people obey those rules and norms, how seemingly

invisible social forces might govern our behavior, and how the outcome of our lives are frequently determined by forces largely outside of our control. It can even help us understand why we might sometimes act in ways that are contrary to our deeply held beliefs.

General Sociology

Work in sociology begins with Introduction to Sociology (SOC 204) or Social Inequality (SOC 207), both of which provide an introduction to the discipline. They emphasize how sociology can be applied to contemporary social issues. Students specializing in general sociology move on to courses that provide a more in-depth study of social institutions. Courses on social stratification, social psychology, social change, and sociological theory help to tie these diverse areas together by providing perspectives that are useful in the study of any institutional area. Finally, courses in methodology and statistics provide a tool kit of analytical and research skills that are useful both in sociology courses and in whatever activities the student pursues after graduation.

Bachelor of Arts Degree Requirements

Code	Title	Credits
Core Courses		
SOC 204	Introduction to Sociology (May be replaced by SOC 207 Social Inequality)	4
SOC 310	Social Theory	4
SOC 311	Research Methods	4
SOC 312	Statistical Analysis in Sociology ¹	4
Upper-Division Courses		
400-level lecture courses (407, 410–499) ²		12
300- or 400-level courses		8
Additional Courses		
Sociology courses (any level)		12
Total Credits		48

¹ MATH 243, MATH 425, or PSY 302 can be taken as substitutes for SOC 312. If MATH 243 is substituted for SOC 312 then an additional upper division 4 credit SOC course must be taken.

² These credits must be earned at the University of Oregon.

Bachelor of Science Degree Requirements

Code	Title	Credits

Additional Courses		
Sociology courses (any level)		12
Total Credits		48

¹ MATH 243 , MATH 425, or PSY 302 can be taken as substitutes for SOC 312. If MATH 243 is substituted for SOC 312 then an additional upper division 4 credit SOC course must be taken.

² These credits must be earned at the University of Oregon.

Curriculum

Undergraduate courses in sociology are offered at four levels.

- Topical courses at the 100 level provide an introduction to a specific facet of sociology.
- Courses at the 200 level provide a broad introduction to the field. Basic courses are Introduction to Sociology (SOC 204) and Social Inequality (SOC 207). Completion of one 200-level course is a major requirement. One must also be taken to advance to some 300-level courses.
- Courses at the 300 level extend the student's knowledge of subjects covered in the 200-level courses and provide an introduction to social research methods and social theory.
- Courses at the 400 level are advanced and specialized. Most build on background obtained in the 100-, 200- and 300-level courses. As prerequisites for enrollment in some 400-level courses, students must successfully complete one or more of the core courses: Social Theory (SOC 310), Research Methods (SOC 311), Statistical Analysis in Sociology (SOC 312). Upper-division (300- and 400-level) classes are usually smaller in size than the lower-division classes and provide more opportunity for faculty-student interaction.

Courses used to satisfy major requirements must be taken for letter grades and passed with grades of C– or better; at least a 2.00 grade point average (GPA) must be achieved in these courses. Four credits from a course not numbered 401–409 may be taken pass/no pass (P/N); P grades must be earned to apply them to the major.

Courses numbered 401–406 may be taken pass/no pass (P/N); P grades must be earned to apply them to the major. No more than 8 credits from these courses may be applied to the major.

Concentration in Critical Thinking with Data

Minor in Sociology

Minor Requirements

The minor in sociology complements a major in another discipline. Courses used to satisfy requirements for the minor must be taken for letter grades and passed with grades of C– or better.

- Of the 24 credits required in sociology courses, 12 must be upper division
- 12 credits must be taken in residence at the University of Oregon; 8 of those credits must be upper division
- No more than 8 credits from the sociology minor may be used to complete the requirements of another major or minor

Code	Title	Credits
Select one from the following:		4
SOC 204	Introduction to Sociology	
SOC 207	Social Inequality	
Select one of the following: ¹		4
SOC 310	Social Theory	
SOC 311	Research Methods	
SOC 312	Statistical Analysis in Sociology	
Other sociology courses ²		16
Total Credits		24

¹ Students in the minor may take 400-level courses only after completing this requirement. Exceptions may be made by instructor permission.

² No more than 4 credits in courses numbered 401–406 may be applied to the minor.

Graduate Studies in Sociology

Graduate Studies

The Department of Sociology offers graduate work leading to a doctor of philosophy (PhD) and is intended for students seeking a professional career in research and teaching in both academic and nonacademic settings. The department does not offer a terminal master's degree, although students enrolled in the PhD program will also receive a master's degree as part of their training.

Students receive training in qualitative and quantitative research methodologies, sociological theory, and major substantive fields within sociology such as gender, sexuality, environment, race and ethnicity, culture, social networks, labor, immigration, and political economy. The department places a strong emphasis on research, and many students will find opportunities to participate in projects conducted by faculty members.

Master of Arts and Master of Science in Sociology

Code	Title	Credits
SOC 601	Research: [Topic]	1-16
SOC 603	Dissertation	1-16
SOC 605	Reading and Conference: [Topic] ¹	1-16
SOC 606	Field Studies: [Topic]	1-12
SOC 608	Workshop: [Topic] (Master's Project)	1-16

¹ In some cases, Reading and Conference: [Topic] (SOC 605) must be taken for a grade. Consult with the graduate coordinator.

Master of Arts Degree Requirements

Code	Title	Credits
Graduate-level sociology courses		55
Master's paper ¹		
Total Credits		55

¹ The paper must present original empirical research and be stylistically formatted for an existing peer-reviewed journal approved by the student's advisor.

Master of Science Degree Requirements

Code	Title	Credits
Graduate-level sociology courses		55
Master's paper ¹		
Total Credits		55

¹ The paper must present original empirical research and be stylistically formatted for an existing peer-reviewed journal approved by the student's advisor.

Master's-Level Requirements

Students typically complete 55 credits of master's-level requirements in the first six terms of full-time work. Students are awarded a master's degree if they have completed their required courses, achieved a mid-B or better average in their graded courses, and passed the master's paper requirement. Students who enter with a master's degree in sociology may request substitution of as many as five courses from their previous institutions to meet programmatic requirements.

Doctor of Philosophy in Sociology

Code	Title	Credits
SOC 601	Research: [Topic]	1-16
SOC 603	Dissertation	1-16
SOC 605	Reading and Conference: [Topic] ¹	1-16
SOC 606	Field Studies: [Topic]	1-12
SOC 608	Workshop: [Topic] (Master's Project)	1-16

¹ In some cases, Reading and Conference: [Topic] (SOC 605) must be taken for a grade. Consult with the graduate coordinator.

Doctor of Philosophy Degree Requirements

Code	Title	Credits

Dissertation		18
SOC 603	Dissertation	
Total Credits		93

Master's-Level Requirements

Students typically complete 55 credits of master's-level requirements in the first six terms of full-time work. Students are awarded a master's degree if they have completed their required courses, achieved a mid-B or better average in their graded courses, and passed the master's paper requirement. Students who enter with a master's degree in sociology may request substitution of as many as five courses from their previous institutions to meet programmatic requirements.

Doctoral-Level Requirements

After earning the master's degree, students take an additional 20 credits of doctoral-level course work and prepare for a comprehensive examination in a sociological subfield chosen jointly by the student and the advisor.

Upon passing the comprehensive examination, the student is advanced to PhD candidacy and begins work on the doctoral dissertation. The final product is a book-length manuscript presenting empirical research that demonstrates originality and the scholar's ability to conduct independent investigation.

Doctor of Philosophy in Sociology

Curriculum

All graduate-level courses taken to meet requirements are taken for letter grades except for the following courses:

Code	Title	Credits
SOC 601	Research: [Topic]	1-16
SOC 603	Dissertation	1-16
SOC 605	Reading and Conference: [Topic] ¹	1-16
SOC 606	Field Studies: [Topic]	1-12
SOC 608	Workshop: [Topic] (Master's Project)	1-16

¹ In some cases, Reading and Conference: [Topic] (SOC 605) must be taken for a grade. Consult with the graduate coordinator.

Doctor of Philosophy Degree Requirements

Code	Title	Credits
Graduate-level sociology courses		75
Dissertation		18
SOC 603	Dissertation	
Total Credits		93

Master's-Level Requirements

Students typically complete 55 credits of master's-level requirements in the first six terms of full-time work. Students are awarded a master's degree if they have completed their required courses, achieved a mid-B

or better average in their graded courses, and passed the master's paper requirement. Students who enter with a master's degree in sociology may request substitution of as many as five courses from their previous institutions to meet programmatic requirements.

Doctoral-Level Requirements

After earning the master's degree, students take an additional 20 credits of doctoral-level course work and prepare for a comprehensive examination in a sociological subfield chosen jointly by the student and the advisor.

Upon passing the comprehensive examination, the student is advanced to PhD candidacy and begins work on the doctoral dissertation. Southeast Asian Studies

William S. Ayres, Associate Director

541-346-5119

541-346-0668 fax

837 Prince Lucien Campbell Hall

5206 University of Oregon

Eugene, Oregon 97403-5206

ast@uoregon.edu

The University of Oregon offers students an opportunity to pursue interdisciplinary studies on Southeast Asia. Specialists from across the university acquaint students with recent research on such topics as women, health, healing, and nutrition in Thailand and Indonesia; the archaeology of Thailand and Malaysia; education and development in Vietnam, Laos, and Thailand; regional transnationalisms; and indigenous minority communities and cultures throughout the region. Individualized and self-instructional study of Southeast Asian languages can be arranged through the Yamada Language Center.

Important resources include Southeast Asian library collections, the Center for Asian and Pacific Studies, and the Office of International Affairs. The university also sponsors conferences, workshops, outreach, study abroad opportunities, internships, fellowships, student and faculty exchange, and cooperation between libraries.

Southeast Asian studies is a track in the Asian Studies Program. Undergraduates may pursue a minor in Southeast Asian studies in conjunction with majors in most departments (e.g., anthropology, history), as a concentration in international studies, or as the basis for a BA in Asian studies. See the Asian Studies (p. 77) section of this catalog for requirements and curriculum offerings.

Statistics

The University of Oregon does not have a formal department of statistics. However, a variety of courses are either exclusively or primarily about statistics. Over the past several decades, statistical techniques have become a primary tool of empirical research. As such, a variety of functional areas and disciplines teach applied statistical techniques. This is particularly true at the graduate level, where research plays an important role.

Degrees

The Department of Mathematics in the College of Arts and Sciences offers both undergraduate and graduate degrees with options that allow a specialty in statistics. Interested students should address inquiries about specific requirements to that department.

Statistics Courses

Students and advisors should be aware that, within any given area, two or more courses offered by different departments could contain such similar content that a student might not be granted credit toward graduation for more than one of the courses.

Introductory Statistics

- **Earth Sciences.** Earth and Environmental Data Analysis (ERTH 418), Earth and Environmental Data Analysis (ERTH 518)
- **Human Physiology.** Scientific Investigation in Physiology (HPHY 212)
- **Mathematics.** Introduction to Methods of Probability and Statistics (MATH 243), Statistical Models and Methods (MATH 343), Statistical Methods I (MATH 425), Statistical Methods I (MATH 525)
- **Political Science.** Methods for Politics and Policy Analysis I (PS 445)
- **Psychology.** Applied Data Analysis (PSY 412), Applied Data Analysis (PSY 512)
- **Sociology.** Statistical Analysis in Sociology (SOC 312)

Advanced Statistics

- **Anthropology.** Statistical Analysis of Biological Anthropology (ANTH 470), Statistical Analysis of Biological Anthropology (ANTH 570)
- **Economics.** Introduction to Econometrics (EC 320), Introduction to Econometrics (EC 421), Econometrics (EC 423), Econometrics (EC 523), Econometrics (EC 424), Econometrics (EC 524), Econometrics (EC 425), Econometrics (EC 525)
- **Education.** Educational Statistics (EDUC 614), Applied Statistical Design and Analysis (EDUC 640), Applied Multivariate Statistics (EDUC 644)
- **Finance.** Quantitative Methods for Finance (FIN 615)

Email: ostmeier@uoregon.edu

216 Villard Hall

1231 University of Oregon

Eugene, Oregon 97403-1231

About the Department

The Department of Theater Arts offers major curricula leading to the Bachelor of Arts (BA), Bachelor of Science (BS), Master of Arts (MA), Master of Fine arts (MFA) with a specialization in design and technology, and Doctor of Philosophy (PhD) degrees. The Master of Science (MS) degree program is currently inactive.

Courses in Theater Arts are available for all students who want to develop their communication skills, explore lighting, scenic design and costume technology, practice leadership in collaborative teamwork, or study diverse Histories of Theater (including Middle Eastern American and Arab American Theater, Native and Latinx Theatre, Eco Dramaturgy, Ethnic and Communal Engagements). Students can also gain practical theater experience through involvement with our University Theater productions as actors, designers, technicians, dramaturgs and stage managers.

The Department offers a cross-disciplinary and liberal-arts education. Upper division courses provide vocational competence in many aspects of commercial theater. Students seek careers in professional, educational, and community theaters as designers, actors, technicians, stage managers, or theater managers, or continue specialized training in MFA degree programs or non-degree professional training schools. Other students use the Theater Arts' background to pursue vocational opportunities that require advanced skills in communication and organization.

At the graduate level, the department offers intensive study and practical work toward the MFA degree focus areas of costume design, scenic design, lighting design, and technical theater, with opportunities to also emphasize projection design, sound design, or both. The MFA also provides training and experience in teaching theatre. The MA and PhD programs offer an in-depth study of theater and performance through contemporary critical and cultural theories as well as historiography and performance praxis.

Theaters

The James F. Miller Theatre Complex includes the renovated Robinson Theatre, a proscenium theater seating 300, and the Hope Theatre, a flexible venue that can seat 100–150. The complex includes a large lobby and costume and scene shops. The Pocket Playhouse, in Villard Hall, is a small proscenium stage and seats 75 people.

Technical Facilities

The scene shop is well equipped with power tools for wood and metal fabrication. Lighting equipment includes computerized controls and up-to-date instruments. The costume shop has power sewing and serging machines and a laundry and crafts area. Students are encouraged to sign up for production workshop classes or to practice their crafts as

volunteers. Those who qualify for work-study financial aid are hired to assist in the shops. The shops are open every day.

Pocket Playhouse

Pocket Playhouse is the site for a series of productions presented by an elected student board.

University Theatre

The department's season is composed of productions in two venues: the Robinson Theatre and the Hope Theatre. Faculty members and graduate students direct and design as many as six shows a year. Auditions are open to UO students, and admission for UO students is free.

Faculty

Bradley Branam, associate professor (technical direction, media design). BA, 2000, Luther College; MFA, 2009, Missouri, Kansas City. (2012)

Bair, Heather, instructor, (costume shop). BFA, 1995, Southwest Missouri State University; MFA, 1999 Temple University. (2021)

Jeanette De Jong, associate professor. BA, 1982, Puget Sound; MFA, 1984, Oregon. (2015)

Jerry Hooker, associate professor (scene designer). BA, 1978, Puget Sound; MFA, 1985, Utah State. (2001)

Theresa May, professor (acting, embodiment, Native American theater); director, graduate studies. BA, 1980, California, Irvine; MFA, 1983, Southern California; PhD, 2000, Washington (Seattle). (2007)

Michael Malek Najjar, associate professor (Arab American theater and performance, playwriting, performance theory). BA, 1993, New Mexico; MFA, 1999, York; PhD, 2011, California, Los Angeles. (2011)

Tricia Rodley, instructor (acting, voice and dialect) BA, 1992, Oregon; MA, 2005, Royal Central School of Speech and Drama (London); PhD, 2014, Oregon. (2015)

Janet Rose, senior instructor (technical director, lighting designer). BFA, 1977, Florida Atlantic; MFA, 1979, Ohio. (1987)

John Schmor, associate professor (theory, history, acting). BA, 1984, Willamette; MA, 1989, PhD, 1991, Oregon. (1999)

Emeriti

Alexandra Bonds, professor emerita. BS, 1972, Syracuse; MA, 1974, Denver. (1979)

Robert Barton, professor emeritus. BA, 1967, Western Michigan; MA, 1968, PhD, 1977, Bowling Green State. (1980)

Jerry R. Williams, professor emeritus. BFA, 1964, Carnegie-Mellon; MA, 1965, Washington (Seattle). (1973)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

- **Bachelor of Arts**
- **Bachelor of Science**
- **Minor**

Undergraduate Studies

For its undergraduate major program, the Department of Theater Arts has three principal objectives:

1. The attainment, by all of its majors, of a broad liberal arts education
2. Sufficient instruction to provide an appreciation of the different areas of theater
3. Direct experience in several aspects of theater production

Students study acting, directing, design, costume, lighting, stagecraft, history, dramatic literature, and theory. Courses in these fields are available to both majors and nonmajors.

In addition to the BA or BS degree requirements of the university, the following requirements are specified for students with a major in theater arts:

Bachelor of Arts Degree Requirements

Code	Title	Credits
TA 210	Introduction to Design	4
TA 211–212	Theater Production I-II	8
TA 250	Acting I	4
TA 271	Introduction to Theater Arts	4
TA 367–369	History of the Theater I-III	12
TA 470	Majors Seminar	4
TA 490	Theater Capstone: [Topic] (Play Direction, Playwriting, Devising, Dramaturgy)	4
Three of the following: ¹		3
TA 321	Scenery Production	
TA 322	Costume Production	
TA 323	Lighting Production	
TA 324	Production	
Three upper-division courses in acting, directing, design, technical production, or playwriting		12
Three upper-division courses in history, literature, criticism, or dramaturgy ²		12
Total Credits		67

¹ Production assignments are 1–4 credits each and are arranged individually between the student and faculty member overseeing the area of interest.

² With the consent of an advisor, a student may substitute a course in another department for one of these courses, selected from a list approved by the theater arts faculty.

Bachelor of Science Degree Requirements

Code	Title	Credits
TA 210	Introduction to Design	4

TA 322	Costume Production	
TA 323	Lighting Production	
TA 324	Production	
Three upper-division courses in acting, directing, design, technical production, or playwriting		12
Three upper-division courses in history, literature, criticism, or dramaturgy ²		12
Total Credits		67

¹ Production assignments are 1–4 credits each and are arranged individually between the student and faculty member overseeing the area of interest.

² With the consent of an advisor, a student may substitute a course in another department for one of these courses, selected from a list approved by the theater arts faculty.

Grading Options

Some courses in theater arts are offered pass/no pass (P/N) only. Work counts toward fulfillment of the 180-credit requirement for a BA or BS only if satisfactorily completed.

Transfer Students

Transfer students must complete six 4-credit, upper-division courses and two of the production courses listed in the course list in residence at the University of Oregon.

Honors in Theater Arts

At the end of each academic year, the department's faculty selects certain graduating seniors and confers on them departmental honors. Criteria include academic performance as well as the quality of participation in the production program.

Minor Requirements

Course work for the minor must be completed with letter grades of mid-C or better. At least 16 credits must be taken at the university. One course in each of the following areas must be included:

- literature and criticism
- performance
- technical theater
- theater history

Code	Title	Credits

- **Master of Arts**
- **Master of Fine Arts**
- **Doctor of Philosophy**

Graduate Studies

The department offers graduate work leading to the master of arts (MA), master of fine arts (MFA), and doctor of philosophy (PhD) degrees. The master of science (MS) degree program is currently inactive. Students entering the master's degree program should have an undergraduate major in theater arts or the equivalent, while students entering the doctoral program should have completed a master's degree in theater arts or the equivalent.

Each graduate student is expected to show ability in both academic and production areas. During residence at the university, a student is expected to make a significant contribution in three areas out of the following seven: acting, directing, technical theater, management, playwriting, teaching, and design.

Master of Arts Degree Requirements

Code	Title	Credits
Graduate credits in graded theater arts course work		28
TA 503	Thesis	12
TA 607	Seminar: [Topic] ¹	16
Total Credits		56

¹ Course topic changes every term. The master of arts requires at least 16 credits (four seminars). The student may also take approved 600-level course work.

Additional Requirements

- A minimum grade point average of 3.00
- Language proficiency (course work or examination)
- Completion of approved thesis
- Faculty-guided artistic production in design, acting, directing, technical production, dramaturgy, and playwriting

Master of Fine Arts Degree Requirements

The following are minimum requirements, all of which must be taken for a letter grade with the exception of Research: [Topic] (TA 601) and Practicum: [Topic] (TA 609).

Code	Title	Credits
TA 601	Research: [Topic]	4
TA 607	Seminar: [Topic] ¹	8
TA 609	Practicum: [Topic]	16

Design and technology courses ²	24
Theater history, literature, and theory courses at the 500 and 600 level	8
Related courses outside the department ³	8
At least one course from acting, directing, dramaturgy, or stage management	4
Additional graded graduate-level theater arts course work	16
Total Credits	88

- 1 Course topics change every term. The MFA requires at least 8 credits. Students may also take approved and graded 600-level course work.
- 2 Must include at least one course each in lighting, scenery, and costumes.
- 3 With advisor approval, undergraduate courses at the 300 level may apply.

Additional Requirements

- A minimum grade point average of 3.00
- Completion and approval of a final project and written document

Specialization

Areas of specialization are set design, lighting design, technical direction, and costume design.

The master of fine arts degree does *not* require proficiency in a second language. Course work is substantially completed during the first two years; the MFA program typically takes three years to complete.

Doctor of Philosophy Degree Requirements

The PhD in theater arts requires nine courses in the first year and seven courses in the second year, which may include as much as 6 credits of independent reading toward the qualifying examinations in winter or spring terms of the second year. Students seeking the PhD must have demonstrated proficiency in a foreign language, either from two years of successful college course work or by passing a basic translation-comprehension exam, such as the College-Level Examination Program (CLEP) test.

Following completion of course work, students wishing to pass to doctoral candidacy must pass qualifying examinations. Within one month after advancement to doctoral candidacy, students must deliver a dissertation prospectus for committee approval. Candidacy may be granted only after an approved dissertation prospectus. The degree is granted only with successful completion and full approval of a dissertation under Division of Graduate Studies rules and deadlines.

Requirements Summary

- A minimum of 20 graded credits in 600-level graduate seminars
- At least 12 graded credits (or three 500- to 600-level courses) in a related field outside of theater arts
- Proof of reading comprehension in a foreign language (transcript credits or examination)
- Involvement in a faculty-guided artistic production in design, acting, directing, technical production, dramaturgy, and playwriting
- Qualifying examinations, oral defense, and approved prospectus
- At least 18 credits of Dissertation (TA 603)
- Completion of dissertation and approval of oral defense

Courses

TA 121. Scenery and Lighting Laboratory. 1-2 Credits.

Building and painting scenery, hanging lights for productions. Repeatable thrice for maximum of 8 credits.

TA 122. Costume Laboratory. 1-2 Credits.

Building costumes for productions. Repeatable thrice for maximum of 8 credits.

TA 124. Production. 1-2 Credits.

Working backstage for productions. Repeatable thrice for maximum of 8 credits.

TA 196. Field Studies: [Topic]. 1-2 Credits.

Repeatable.

TA 198. Workshop: [Topic]. 1-2 Credits.

Repeatable.

TA 199. Special Studies: [Topic]. 1-5 Credits.

Freshman seminars. Repeatable.

TA 210. Introduction to Design. 4 Credits.

Introduction to the principles of design as applied to the arts of theater design, scenery, costumes, and lighting. Creative projects to develop concepts of visual imagery. Includes laboratory.

TA 211. Theater Production I. 4 Credits.

Introduction to the mechanics of mounting a theatrical production including basic construction of scenery and props and use of lighting equipment. Includes laboratory.

TA 212. Theater Production II. 4 Credits.

Introduction to costumes and makeup. Costume construction includes basic hand and machine sewing techniques. Beginning makeup covers ingenue, beards, wounds, and fantasy. Includes laboratory.

TA 250. Introduction to Acting. 4 Credits.

Principles of warm-ups, individual inventory, Stanislavski system, character analysis, and rehearsal procedure.

TA 251. Acting Scene Study. 4 Credits.

Continuation of performance principles for contemporary realistic theater with addition of dramaturgical scene study.

Prereq: TA 250.

TA 252. Acting Auditions. 4 Credits.

Development of improvisational skills while establishing a working file of monologue material.

Prereq: TA 250.

TA 271. Introduction to Theater Arts. 4 Credits.

Play and script structure, contemporary aesthetic attitudes, and the value of theater arts to society and the individual.

TA 321. Scenery Production. 1-3 Credits.

Production or performance crew head for scenery. Repeatable thrice for maximum of 12 credits.

Prereq: TA 211

TA 322. Costume Production. 1-3 Credits.

Production or performance crew head for costumes. Repeatable thrice for maximum of 12 credits.

Prereq: TA 212

TA 323. Lighting Production. 1-3 Credits.

Production or performance crew head for lighting. Repeatable thrice for maximum of 12 credits.

Prereq: TA 211

TA 324. Production. 1-3 Credits.

Stage manager, assistant director, or dramaturgy position. Repeatable thrice for maximum of 12 credits.

TA 325. Performance. 1-3 Credits.

Preparation, rehearsal, and performance of an acting role. Repeatable thrice for maximum of 12 credits.

TA 367. History of the Theater I. 4 Credits.

Development of the theater from its origins to the present. Emphasizes the history of dramatic literature, criticism, theater architecture, design, and performance.

TA 368. History of the Theater II. 4 Credits.

Development of the theater from its origins to the present. Emphasizes the history of dramatic literature, criticism, theater architecture, design, and performance.

TA 369. History of the Theater III. 4 Credits.

Development of the theater from its origins to the present. Emphasizes the history of dramatic literature, criticism, theater architecture, design, and performance.

TA 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

TA 401. Research: [Topic]. 1-4 Credits.

Repeatable nine times when the topic changes for a maximum of 40 credits.

TA 405. Reading and Conference: [Topic]. 1-4 Credits.

Repeatable nine times when the topic changes for a maximum of 40 credits.

TA 406. Practicum: [Topic]. 1-3 Credits.

Repeatable three times for a maximum of 12 credits.

TA 407. Seminar: [Topic]. 1-5 Credits.

Repeatable.

TA 408. Workshop: [Topic]. 1-21 Credits.

Repeatable.

TA 409. Terminal Project. 1-12 Credits.

Repeatable.

TA 410. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

TA 411. Costume History I. 4 Credits.

History of Western clothing in cultural context. Egyptian to Renaissance.

TA 412. Costume History II. 4 Credits.

History of Western clothing in cultural context. Mid-Renaissance to romanticism.

TA 416. Costume Design. 4 Credits.

Beginning design concepts and various artistic media as applicable to costume design and rendering techniques.

Prereq: TA 210.

TA 418. Costume Pattern Drafting. 4 Credits.

Designing patterns through flat patterning and draping techniques.

Practical experience in pattern development and execution.

Prereq: TA 212.

TA 419. Costume Construction. 4 Credits.

Practical problems encountered in building and decorating costumes for the stage.

Prereq: TA 212.

TA 420. Return and Review for Actors. 1 Credit.

Review foundational concepts and technique by participating, demonstrating, and coaching in Acting I or II. Repeatable for Acting I (TA 250) once for a maximum of 2 credits; for Acting II (TA 251) once for a maximum of 2 credits.

Prereq: TA 250, 251, 252. Coreq: TA 409.

TA 441. Scene Design: Single Set. 4 Credits.

Elements of scene design; the scene designer's role. Creating a ground plan, measured perspective techniques, elevations, design styles. Design process and procedures related to the proscenium stage only.

Prereq: TA 210.

TA 445. Advanced Projects in Theater Technology: [Topic]. 4 Credits.

Specialized areas of theater technology, one topic per term. Topics include scene painting, stage management, props, and computer drafting. Repeatable seven times when topic changes for maximum of 32 credits.

TA 452. Advanced Acting: [Topic]. 4 Credits.

Topics in the performance of a specific genre or authors, or in specific performance technique, including voice, movement, and musical skills. Repeatable when topic changes.

Prereq: TA 251, TA 252, TA 271; one from TA 210, TA 211, TA 212.

TA 467. Lighting for the Stage. 4 Credits.

Designing lighting for the stage; technical and aesthetic problems.

TA 470. Majors Seminar. 4 Credits.

Capstone seminar for junior theater majors; readings and research in new theater trends, aesthetics, professional and higher academic opportunities.

TA 471. Studies in Theater and Culture: [Topic]. 4 Credits.

Dramatic literature and historical cultural concepts. Establishes a cultural context for periods of drama, using arts materials and socioeconomic factors to clarify aesthetic attitudes and practices of theater. Repeatable thrice when topic changes for maximum of 16 credits.

TA 472. Multicultural Theater: [Topic]. 4 Credits.

Origins and development of contributions in theater and drama by various cultures including Latino, Chicano, African American, Asian American, and Native American. Repeatable four times when topic changes for maximum of 20 credits.

TA 490. Theater Capstone: [Topic]. 4 Credits.

Required for the major and may be fulfilled by successful completion of any one of four topics: Play Direction, Playwriting, Dramaturgy, Devising. Repeatable up to 3 times for a total of 16 credits.

Prereq: TA 210, TA 211, TA 212, TA 250, TA 271, and one from the theatre history series: TA 367, TA 368, TA 369.

TA 503. Thesis. 1-16 Credits.

Repeatable.

TA 507. Seminar: [Topic]. 1-5 Credits.

Repeatable.

TA 508. Workshop: [Topic]. 1-21 Credits.

Repeatable.

TA 510. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

TA 511. Costume History I. 4 Credits.

History of Western clothing in cultural context. Egyptian to Renaissance.

TA 512. Costume History II. 4 Credits.

History of Western clothing in cultural context. Mid-Renaissance to romanticism.

TA 516. Costume Design. 4 Credits.

Beginning design concepts and various artistic media as applicable to costume design and rendering techniques.

TA 518. Costume Pattern Drafting. 4 Credits.

Designing patterns through flat patterning and draping techniques. Practical experience in pattern development and execution.

TA 519. Costume Construction. 4 Credits.

Practical problems encountered in building and decorating costumes for the stage.

TA 541. Scene Design: Single Set. 4 Credits.

Elements of scene design; the scene designer's role. Creating a ground plan, measured perspective techniques, elevations, design styles. Design process and procedures related to the proscenium stage only.

TA 545. Advanced Projects in Theater Technology: [Topic]. 4 Credits.

Specialized areas of theater technology, one topic per term. Topics include scene painting, stage management, props, and computer drafting. Repeatable seven times when topic changes for maximum of 32 credits.

TA 552. Advanced Acting: [Topic]. 4 Credits.

Topics in the performance of a specific genre or authors, or in specific performance technique, including voice, movement, and musical skills. Repeatable when topic changes.

TA 567. Lighting for the Stage. 4 Credits.

Designing lighting for the stage; technical and aesthetic problems.

TA 571. Studies in Theater and Culture: [Topic]. 4 Credits.

Dramatic literature and historical cultural concepts. Establishes a cultural context for periods of drama, using arts materials and socioeconomic factors to clarify aesthetic attitudes and practices of theater. Repeatable thrice when topic changes for maximum of 16 credits.

TA 572. Multicultural Theater: [Topic]. 4 Credits.

Origins and development of contributions in theater and drama by various cultures including Latino, Chicano, African American, Asian American, and Native American. Repeatable four times when topic changes for maximum of 20 credits.

TA 601. Research: [Topic]. 1-16 Credits.

Repeatable.

TA 602. Supervised College Teaching. 1-16 Credits.

Repeatable.

TA 603. Dissertation. 1-16 Credits.

Repeatable.

TA 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

TA 606. Field Studies: [Topic]. 1-16 Credits.

Repeatable.

TA 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

TA 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

TA 609. Terminal Project. 1-12 Credits.

Repeatable.

TA 610. Experimental Course: [Topic]. 1-5 Credits.
Repeatable.

TA 651. Theory of Dramatic Production. 4 Credits.
Theory of acting.

Women's, Gender, and Sexuality Studies

Priscilla Yamin, Department Head

541-346-5529
541-346-0652 fax
315 Hendricks Hall
1298 University of Oregon
Eugene, Oregon 97403-1298
wgs@uoregon.edu

The Department of Women's, Gender, and Sexuality Studies offers students an interdisciplinary curriculum that focuses on the diverse experiences of women in both national and international contexts. The department also examines the meaning of gender as a socially constructed category that shapes personal identities, beliefs, opportunities, and behaviors. The wide range of courses explores the intersections of gender, race, class, and sexuality; the institutional structures that have an impact on women's and men's lives; and the broad range of feminist theory that seeks to explain and influence women's status in society. Among the areas of emphasis in women's, gender, and sexuality studies are gender and sexuality, queer studies, third-world feminism, cultural representation and literature, women and labor, feminist theory, critical race feminism, immigration and citizenship, and social activism.

Core and affiliated faculty members in the department come from a wide range of disciplinary perspectives including history, literature, anthropology, sociology, geography, environmental studies, ethnic studies, philosophy, religious studies, architecture and fine arts, music, Romance and Germanic languages, political science, public policy, and law.

Any student may take women's, gender, and sexuality studies courses. Some students take a few courses to complement the curriculum in another major. Others choose to fulfill the requirements for a major in women's, gender, and sexuality studies or a minor in women's, gender, and sexuality studies or in queer studies.

Most women's, gender, and sexuality studies courses satisfy group and multicultural requirements. For courses approved to fulfill these requirements, see the current list on the registrar's website (<http://registrar.uoregon.edu/current-students/group-satisfying-and-multicultural-courses/>).

Faculty

Oluwakemi Balogun, associate professor (globalization, nationalism, African studies). BA, 2003, Pomona College; PhD, 2012, California, Berkeley. (2013)

Jamie M. Bufalino, senior instructor (gender and sexuality in US history, history of feminism, US consumer culture). See **History**.

Ana-Maurine Lara, associate professor (Black feminisms, decolonial theories and methodologies, speculative fiction and poetry). BA, 1997,

Harvard-Radcliffe University; MA, 2012, Yale University; PhD, 2014, Yale University. (2015)

Isabel Millán, assistant professor (Latino and Chicano studies, transnational feminism, women and queer of color theory). BA, 2004, California, Santa Barbara; MA, 2007, San Francisco State; PhD, 2013, Michigan, Ann Arbor. (2018)

Judith Raiskin, associate professor (postcolonial literature, feminist theory, sexuality). BA, 1979, California, Berkeley; MA, 1981, Chicago; PhD, 1989, Stanford. (1995)

Yvette Saavedra, assistant professor (Chicana/o history, US history, gender and sexuality history). BA, 2001, Pitzer College; MA, 2003, University of Texas, El Paso; PhD, 2013, University of Texas, El Paso. (2019)

Carol Stabile, professor (gender, race, and class in the media). AB, 1983, Mount Holyoke College; MA, 1985, PhD, 1992, Brown. (2008)

Priscilla Yamin, associate professor (marriage and family politics; US political development and institutions; race, gender, and sexuality studies). See **Political Science**.

Emerita

Barbara Corrado Pope, professor emerita. BA, 1964, Hiram; MA, 1966, Iowa; PhD, 1981, Columbia. (1976)

Linda O. Fuller, professor emerita. BA, 1966, MA, 1977, PhD, 1985, California, Berkeley. (1989)

Elizabeth Reis, professor emerita. AB, 1980, Smith; MA, 1982, Brown; PhD, 1991, California, Berkeley. (2002)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Undergraduate Studies

Preparation

No specific high school preparation is necessary. Students who transfer to the university from other colleges may apply as many as 8 credits of women's, gender, and sexuality studies courses to the major or to the minors.

Careers

An understanding of gender and of women's experiences, abilities, and needs is an asset to careers in such fields as education, social service, government, business, law, medicine, the ministry, journalism, media, technology, counseling, and child care. In addition, a background in women's, gender, and sexuality studies can be used as a basis for entering a growing number of graduate programs that emphasize the study of women or gender.

Major Requirements

The Department of Women's, Gender, and Sexuality Studies offers an undergraduate major leading to a bachelor of arts (BA) or bachelor of science (BS) degree. Students may major in women's, gender, and sexuality studies alone or as one of two or more majors. Majors must construct their programs in consultation with women's, gender, and sexuality studies advisors.

Graded courses in the major must be completed with grades of C– or higher. No more than 8 credits taken pass/no pass in these courses may be counted toward the major.

At least 36 credits must be in upper-division courses; of those 36 credits, as many as 12 may be approved in other subject codes with advisor approval. At least 16 credits applied to the major must be taken at the University of Oregon. Women's, gender, and sexuality studies (WGS) majors must attain a grade point average of 2.50 or higher in courses

applied to the major. No more than 8 credits from another major or minor may count toward the major.

Bachelor of Arts Degree Requirements

Code	Title	Credits
WGS 101	Introduction to Women's and Gender Studies	4
Select two of the following:		8
WGS 201	Introduction to Queer Studies	
WGS 221	Bodies and Power	
WGS 250	Gender, Literature, and Culture	
WGS 251	Transnational and Indigenous Feminisms	
WGS 261	Gender and Popular Culture	
Select eight of the following: ¹		32
WGS 303	Women and Gender in American History	
WGS 315	History and Development of Feminist Theory	
WGS 321	Feminist Perspectives: Identity, Race, Culture	
WGS 322	Queer Theory	
WGS 331	Science, Technology, and Gender	
WGS 341	Women, Work, and Class	
WGS 350	Literature as Feminist Theory	
WGS 351	Decolonial Feminisms	
WGS 361	Gender, Film, and the Media	
WGS 407	Seminar: [Topic]	
WGS 409	Terminal Project	
WGS 421	Bodies and Embodiment	
WGS 422	Sexuality Studies: [Topic]	
WGS 432	Gender, Environment, and Development	
WGS 450	Literature and Feminist World-Making	
WGS 451	Global Perspectives on Gender [Topic]	
WGS 411	Feminist Praxis ²	4
Total Credits		48

¹ Students may choose one of two options to satisfy the eight-course requirement:

- Choose three 300-level courses and five 400-level courses
- Choose four 300-level courses and four 400-level courses

² Offered fall term only.

- Choose three 300-level courses and five 400-level courses
- Choose four 300-level courses and four 400-level courses

² Offered fall term only.

Senior Honors Thesis

Students interested in producing a substantial piece of original research and writing may elect to write a senior thesis in women's, gender, and sexuality studies.

To be eligible to write an honors thesis, students should have a cumulative GPA of 3.50 in WGS courses. Students who satisfy the major requirements, maintain throughout their undergraduate studies at Oregon a GPA of 3.50 or above in courses in the major, and submit a copy of the honors thesis approved by their committee to the department receive a baccalaureate degree with honors in women's, gender, and sexuality studies.

Thesis Criteria

A thesis must be based on a student's original research. Depending on the discipline, it can be a written paper that presents the results of the research. Theses average between 30 and 50 pages, including notes and bibliographies.

Only theses that meet the following criteria will be approved and awarded honors:

- Identifies a clear and original topic or research question
- Demonstrates knowledge of the literature concerning that topic or research question in the field of gender studies by reviewing that body of literature and providing a substantive bibliography
- Provides an analysis of the topic or research question, using clearly identified methodology
- It uses the citational style appropriate to its disciplinary focus

- The thesis is mindful of the relationships among gender, race, class, ability, and national identity as these pertain to the object of study

Students producing a senior thesis should expect to do the following work over the course of a full year prior to their graduation. In the spring and summer before the thesis writing begins, students need to identify a primary advisor (first reader) and a second reader, both of whom are either a faculty member in the department or an affiliated faculty member (see faculty list). If an affiliated faculty member is the first reader, then the instructor of Reading and Conference: [Topic] (WGS 405) will be the second reader.

In fall, students should register for Reading and Conference: [Topic] (WGS 405) (1–4 variable credits) with their thesis advisor and submit a timeline for completion of the thesis to the thesis advisor.

By the end of the fall term, students should complete a draft of a research proposal that is five to eight pages in length and includes a literature review, a short section on the methods that will be used, research questions or a thesis statement (depending on the discipline), and a bibliography.

Research proposals must be approved by the thesis advisor and a copy must be submitted to the department. If an affiliate faculty member is the thesis advisor, the proposal must be approved by the student's primary advisor in the department as well.

In winter, students should register for Thesis (WGS 403). Using the timeline submitted in the fall, students spend winter term conducting research and writing the thesis in consultation with their advisor. By the end of winter term, research should be complete and thesis writing should be significantly underway.

In spring, students write, revise, and produce a final draft of the thesis following the timeline submitted in the fall. By no later than the end of the fifth week of the term, students must submit their final thesis to their departmental advisor, their affiliate advisor, or both. Upon approval, students must submit a copy of their final thesis to the department head.

The student's performance on the thesis and on courses taken during the senior year will be reviewed before the honors distinction is granted. Obtain complete instructions and required forms from the department office.

Minor Requirements

Graded courses in the minors must be completed with grades of C– or higher. No more than 8 credits taken pass/no pass in these courses may be counted toward the minors.

A minimum of 16 credits applied to the minors must be taken at the University of Oregon. No more than 8 credits from other majors or minors may count toward the minors for women's, gender, and sexuality studies and queer studies.

Women's, Gender, and Sexuality Studies Minor Requirements

Code	Title	Credits
WGS 101	Introduction to Women's and Gender Studies	4
Select one of the following:		4
WGS 201	Introduction to Queer Studies	
WGS 221	Bodies and Power	

WGS 250	Gender, Literature, and Culture	
WGS 251	Transnational and Indigenous Feminisms	
Select three of the following: ¹		12
WGS 303	Women and Gender in American History	
WGS 315	History and Development of Feminist Theory	
WGS 321	Feminist Perspectives: Identity, Race, Culture	
WGS 322	Queer Theory	
WGS 331	Science, Technology, and Gender	
WGS 341	Women, Work, and Class	
WGS 350	Literature as Feminist Theory	
WGS 351	Decolonial Feminisms	
WGS 361	Gender, Film, and the Media	
WGS 407	Seminar: [Topic]	
WGS 409	Terminal Project	
WGS 411	Feminist Praxis ²	
WGS 421	Bodies and Embodiment	
WGS 422	Sexuality Studies: [Topic]	
WGS 432	Gender, Environment, and Development	
WGS 450	Literature and Feminist World-Making	
WGS 451	Global Perspectives on Gender [Topic]	
Choose one 300- or 400-level WGS elective or an advisor-approved course with another subject code		4
Total Credits		24

Queer Studies Minor Requirements

Code	Title	Credits
WGS 201	Introduction to Queer Studies	4
Select one of the following:		4
WGS 221	Bodies and Power	
WGS 250	Gender, Literature, and Culture	
WGS 251	Transnational and Indigenous Feminisms	
Select one of the following:		4
WGS 322	Queer Theory	
WGS 422	Sexuality Studies: [Topic] (repeatable when topic changes)	
Select one queer studies course (with the QST subject code) at any level—100. 200. 300. or 400		4
Select two 300- or 400-level queer studies courses (with the QST subject code)		8
Total Credits		24

Students wishing to minor in queer studies should consult frequently with a women's, gender, and sexuality studies advisor to determine which courses offered during any given academic year will count toward the fulfillment of credits.

Students must apply for the queer studies minor in the women's, gender, and sexuality studies office well in advance of graduation for transcript evaluation. In order to be eligible for the minor, students must complete all degree requirements and a major in women's, gender, and sexuality studies or another academic department.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

The degree plan shows courses that are solely within the department (subject code WGS) and suggestions for arranging general-education courses, language courses, and mathematics courses. The plans below do not necessarily include sufficient courses to meet the 180-credit minimum to graduate.

It is suggested that students look for courses that meet the multicultural requirements when taking general-education requirements.

Graduate Studies

The graduate certificate in women's, gender, and sexuality studies requires 24 credits in courses approved by the women's, gender, and sexuality studies graduate advisor. At least 12 of these credits must be in core courses in the Department of Women's, Gender, and Sexuality Studies. At least 8 of these credits must be in approved graduate courses offered in other departments.

Graduate Certificate Requirements

Code	Title	Credits
Core Courses		
WGS 615	Contemporary Feminist Theory	5
Select WGS courses totaling 12 credits from the following:		12
WGS 507	Seminar: [Topic]	
WGS 511	Feminist Praxis	
WGS 521	Bodies and Embodiment	
WGS 522	Sexuality Studies: [Topic]	
WGS 532	Gender, Environment, and Development	

WGS 550	Literature and Feminist World-Making	
WGS 551	Global Perspectives on Gender [Topic]	
WGS 605	Reading and Conference: [Topic] ¹	
WGS 607	Seminar: [Topic]	
WGS 606	Practicum: [Topic] ¹	
Other Courses		
Approved graduate courses in WGS or other departments		7
Total Credits		24

¹ Indicates a variable-credit course. The student must declare the credit value upon registering online—e.g., Practicum: [Topic] (WGS 606).

Additional Requirements

No more than 4 credits in Reading and Conference: [Topic] (WGS 605) and Practicum: [Topic] (WGS 606) can be applied to the certificate.

No more than 8 credits may be taken pass/no pass without specific approval.

Applicants should arrange an appointment with the graduate advisor.

Courses

WGS 101. Introduction to Women's and Gender Studies. 4 Credits.

Interdisciplinary examination of the diverse experiences, status, and contributions of women in the United States. Topics include social construction of gender, race, sexualities, work, class, violence, and health.

WGS 198. Workshop: [Topic]. 1,2 Credit.

Repeatable.

WGS 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

WGS 201. Introduction to Queer Studies. 4 Credits.

Introduction to the study of sexuality and society from a queer studies interdisciplinary perspective.

WGS 221. Bodies and Power. 4 Credits.

Focuses on gender, the body, and dis/ability as a particular nexus of experience and social meaning, influenced as well by race, sexuality, age and class. This course considers bodies and how we understand them within contexts shaped by social relations and systems of power.

WGS 250. Gender, Literature, and Culture. 4 Credits.

Examines literary and other cultural representations of gendered experiences using novels, short stories, poetry, plays, and visual cultural production.

WGS 251. Transnational and Indigenous Feminisms. 4 Credits.

Introductory survey of transnational and Indigenous feminist scholarship, two intersecting strains of feminism that address the workings of culture, nationalism, and gender in multiple contexts. Explores cross-section of key issues and perspectives using interdisciplinary lenses and methodologies employed by scholars in transnational and Indigenous studies.

WGS 261. Gender and Popular Culture. 4 Credits.

Drawing on contemporary popular culture texts, including films, music, and TV shows, introduces students to feminist perspectives on pop culture representations, production, and reception. Engages with pop culture as a meaningful site for the construction of gender in intersection with sexuality, race, nation, and bodies.

WGS 303. Women and Gender in American History. 4 Credits.

Focuses on women and gender in America, highlighting how diverse women have experienced gender roles and sexism since the 17th century.

WGS 315. History and Development of Feminist Theory. 4 Credits.

Feminist theory from the Enlightenment through the Second Wave, with special emphasis on the diverse theories of the 1960s to the present.

Prereq: WGS 101.

WGS 321. Feminist Perspectives: Identity, Race, Culture. 4 Credits.

Examines intersections of race and ethnicity, class, sexuality, and gender in the history and lives of United States women of color. Explores definitions of community, culture, and identity.

Prereq: one course WGS or ES 101.

WGS 322. Queer Theory. 4 Credits.

Surveys key terms and texts of the interdisciplinary fields that constitute queer theory; recent debates in scholarship and popular culture on gender, sexuality, race, disability, and other identities.

WGS 331. Science, Technology, and Gender. 4 Credits.

Topics include the role of gender in the practice of science and the impact of sexism and racism on the development of science and technology.

Prereq: WGS 101 or equivalent.

WGS 341. Women, Work, and Class. 4 Credits.

Explores contexts and cultural attitudes shaping the women's market and domestic labor including race, sexuality, age, and class as well as occupational segregation and control.

WGS 350. Literature as Feminist Theory. 4 Credits.

Analyzes literary and media texts while considering questions and intersections of race, gender, sexuality, ability, class, nation, culture, and power central to the field of women and gender studies, and demonstrates how these intersections within literary texts are sites of knowledge production in feminist theory.

Prereq: one 200 level WGS course.

WGS 351. Decolonial Feminisms. 4 Credits.

Exploration of feminist activism and women's movements globally, organizing to challenge the state, civil society, international agencies, and corporations for a more just world.

Prereq: one 200-level WGS course.

WGS 361. Gender, Film, and the Media. 4 Credits.

Students read, view, examine, discuss, and write about film and media in terms of gender and feminist and queer theory. Offered alternate years.

WGS 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable up to five times.

WGS 401. Research: [Topic]. 1-16 Credits.

Repeatable.

WGS 403. Thesis. 1-12 Credits.

Repeatable with program director's and thesis adviser's consent for maximum of 12 credits.

WGS 405. Reading and Conference: [Topic]. 1-5 Credits.

Repeatable.

WGS 406. Practicum: [Topic]. 1-5 Credits.

Repeatable.

WGS 407. Seminar: [Topic]. 1-5 Credits.

A current topic is Feminist Research Issues. Repeatable when topic changes.

WGS 408. Workshop: [Topic]. 1-16 Credits.

Repeatable.

WGS 409. Terminal Project. 1-12 Credits.

Repeatable.

WGS 410. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

WGS 411. Feminist Praxis. 4 Credits.

Combined internship and seminar explores the history and politics of community agencies and the relationship of feminist theory to practice.

Prereq: one course WGS or equivalent.

WGS 421. Bodies and Embodiment. 4 Credits.

Focuses on the complex relationships between gender, bodies, and society from theoretical and empirical perspectives. Theories examine the body through an intersectional lens to understand social construction, cultural symbolism, and political struggles, especially within institutional contexts like the media, medicine, and the market.

Prereq: one 300-level WGS course.

WGS 422. Sexuality Studies: [Topic]. 4 Credits.

Various topics in sexuality studies, including the relationship between gender and sexuality and between queer studies and women's and gender studies. Repeatable twice when topic changes for maximum of 12 credits.

Prereq: WGS 101 or WGS 201.

WGS 432. Gender, Environment, and Development. 4 Credits.

Surveys gender and political, economic, and cultural strategies for development and environmental change around the world.

Pre- or coreq: WGS 101.

WGS 450. Literature and Feminist World-Making. 4 Credits.

Examines feminist world-making in literary texts as a form of political theory, a strategy for thinking critically about the present, imagining the world under different circumstances, and building an alternative world from a feminist perspective.

Prereq: one 300-level WGS course.

WGS 451. Global Perspectives on Gender [Topic]. 4 Credits.

Designed to deepen understanding of diverse global issues and perspectives related to women's and gender studies. Repeatable twice when topic changes for a maximum of 12 credits.

WGS 507. Seminar: [Topic]. 1-5 Credits.

A current topic is Feminist Research Issues. Repeatable when topic changes.

WGS 508. Workshop: [Topic]. 1-16 Credits.

Repeatable.

WGS 510. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

WGS 511. Feminist Praxis. 4 Credits.

Combined internship and seminar explores the history and politics of community agencies and the relationship of feminist theory to practice.

Prereq: one course WGS or equivalent.

WGS 521. Bodies and Embodiment. 4 Credits.

Focuses on the complex relationships between gender, bodies, and society from theoretical and empirical perspectives. Theories examine the body through an intersectional lens to understand social construction, cultural symbolism, and political struggles, especially within institutional contexts like the media, medicine, and the market.

WGS 522. Sexuality Studies: [Topic]. 4 Credits.

Various topics in sexuality studies, including the relationship between gender and sexuality and between queer studies and women's and gender studies. Repeatable twice when topic changes for maximum of 12 credits.

WGS 532. Gender, Environment, and Development. 4 Credits.

Surveys gender and political, economic, and cultural strategies for development and environmental change around the world.

WGS 550. Literature and Feminist World-Making. 4 Credits.

Examines feminist world-making in literary texts as a form of political theory, a strategy for thinking critically about the present, imagining the world under different circumstances, and building an alternative world from a feminist perspective.

WGS 551. Global Perspectives on Gender [Topic]. 4 Credits.

Designed to deepen understanding of diverse global issues and perspectives related to women's and gender studies. Repeatable twice when topic changes for a maximum of 12 credits.

WGS 601. Research: [Topic]. 1-16 Credits.

Repeatable.

WGS 602. Supervised College Teaching. 1-16 Credits.

Repeatable.

WGS 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

WGS 606. Practicum: [Topic]. 1-16 Credits.

Repeatable.

WGS 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

WGS 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

WGS 609. Terminal Project. 1-12 Credits.

Repeatable.

WGS 610. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

WGS 615. Contemporary Feminist Theory. 5 Credits.

This interdisciplinary graduate seminar covers foundational texts as well as critical cutting-edge developments in feminist theory. The course centers intersectional, transnational, and de-colonial theoretical frameworks.

Robert Donald Clark Honors College

Carol Stabile, Acting Dean

541-346-5414
541-346-0125 fax
Chapman Hall
1293 University of Oregon
Eugene, Oregon 97403-1293
honors@uoregon.edu

The Robert Donald Clark Honors College at the University of Oregon is a competitively enrolled college of approximately 1,400 students. Its classes—limited to 19 students—and four-year curriculum features close interaction between students and faculty members. The Clark Honors College offers a liberal arts curriculum with all the advantages of a large research institution.

The college's curriculum—lower-division courses, upper-division colloquia, and thesis courses—integrate the humanities, social sciences, and sciences and foregrounds the study of diverse cultures and issues. Honors college courses are taught by core faculty members as well as by specially selected affiliated faculty members from other campus schools and programs. The college's curriculum replaces the general-education requirements mandated for all other university students.

The Clark Honors College is the university's honor college: honors college students enroll in every school and department at the university, from architecture and music to biology and business. Each honors college student selects a major from the academic departments or professional schools of the university. Twenty-one percent of honors students have more than one major.

An honors college undergraduate education culminates in a thesis project completed in students' major field. The thesis project prepares students for success in multiple career paths, from industry and government to graduate and professional school. The thesis project is the culmination of a Clark Honors College education, emphasizing curiosity, independent research, the capacity to design and execute a complex project, and the ability to analyze and present the results of their research both in writing and in an oral presentation in a clear and compelling manner.

Students pay honors college tuition, known as differential tuition, established yearly by the University of Oregon Board of Trustees. Complete tuition information is available on the honors college website. The honors college awards need-based tuition-remission scholarships based on the expected family contribution listed on a student's Free Application for Federal Student Aid (FAFSA). Scholarships covering the cost of differential tuition are offered through the Office of Admissions and the Office of Student Financial Aid and Scholarships based on demonstrated financial need as determined by the FAFSA.

Facilities

The Clark Honors College is located in historic Chapman Hall on the west side of the University of Oregon campus, close to Knight Library. Renovated in 2018, the building provides classrooms, student common areas, and a library.

The honors college academic residential community (ARC) is located on the east side of campus in the Global Scholars Hall and the adjacent

Justice Bean Hall. The ARC offers academic and social programming and access to campus resources that support undergraduate research.

Programs

Calderwood Seminars in Public Writing (CSPW)

CSPWs are small (12 student) writing-intensive seminars targeted at juniors and seniors that teach students how to translate complex arguments and professional jargon to a broad audience. In these courses, students engage in forms of writing very different from the academic writing done in most courses. The seminars allow students to work collaboratively in the writing and peer-editing process. The fast-paced exchanges of drafts between writers and editors and the deadline-driven structure of the course simulate the work environment of professional journalists. Intensive discussion, feedback, and shared commitment to the clear expression of ideas create camaraderie and cooperation among student writers.

3 + 3 Program

The 3 + 3 Program enables highly talented and motivated honors college students interested in a legal career to complete both a bachelor's degree and a doctor of jurisprudence at the University of Oregon in six years rather than the usual seven. All honors college students who meet the minimum requirements are guaranteed admission to the UO School of Law. Advantages of the program include

- Saving a year's tuition and living expenses associated with undergraduate education
- Getting an early start on establishing a professional career
- Avoiding the time, effort, and expense of applying to multiple law schools

Inside-Out Prison Exchange Program

Each term, Clark Honors College offers one or two course sections of the Inside-Out Prison Exchange Program, which brings together honors students and incarcerated men and women to study as peers in a seminar behind prison walls. The course meets once a week in Salem, Oregon (the state capitol), at a major correctional institution. Each class includes as many as 12 "outside" (Clark Honors College) students and the same number of "inside" (incarcerated) students.

CHC/UO's Knight Campus Undergraduate Scholars Program

In partnership with UO's Knight Campus for Accelerating Scientific Impact, the Clark Honors College sponsors two mentored research opportunities for second- and third-year CHC students majoring in the natural sciences in a Knight Campus-affiliated lab. Each selected CHC Scholar receives \$8,000 in support.

Oregon Health and Science University Internships

Each year Oregon Health and Science University (OHSU), a leading, nationally ranked medical teaching school, hosts an internship program in its Department of Cell, Developmental, and Cancer Biology. A partnership between the Clark Honors College and OHSU reserves two intern spots exclusively for CHC students. This partnership provides an invaluable firsthand learning experience for undergraduate students considering a medical career.

Oregon Forensics

Oregon Forensics provides students with unique opportunities to develop advocacy, critical thinking, and collaboration skills, with instructional and competitive opportunities in debate and mock trial. All students are welcome, regardless of experience or background. Students learn to translate and communicate what they learn in the classroom for different contexts and audiences. Students acquire and refine the ability to carefully evaluate complex and often controversial issues from varied points of view, guided by the latest in scholarly research. The program emphasizes education, community, and competition. Oregon Forensics enjoys considerable competitive success, including a 5th National Championship in debate in 2022.

Entering the Clark Honors College

Clark Honors College seeks high-achieving, academically motivated students who will make diverse and unique contributions to its community. The admissions committee looks for evidence of academic scholarship, motivation, and creative and independent critical thinking.

Application Procedure

General university application procedures, prerequisites, and requirements apply. First-year applicants to Clark Honors College may complete the UO's online application, the Common Application, or the Coalition Application to apply to both the honors college and the University of Oregon at the same time. Transfer students with an excellent academic record who have attended another higher-education institution should complete the University of Oregon's online transfer application. International students who wish to apply must complete an International Undergraduate Application for Admission.

Current UO students may apply for admission as lateral transfers by completing the Clark Honors College application on Duck Web. Applications are accepted for winter, spring, and fall terms, subject to the specific application windows and corresponding deadlines for lateral transfers.

Application Deadlines

Freshman applications:

Early notification deadline: November 1
Supporting documents due by November 15
Regular notification deadline: January 15
Supporting documents due by February 15

Deadlines to apply are the same for all first-year applicants including domestic and international freshmen and institutional transfer students.

Lateral Transfer Applications for Current UO Students:

Winter term admission deadline: October 15
Spring term admission deadline: January 15
Fall term admission deadline: March 15

Faculty

Dare Baldwin, Professor, Psychology

Corinne Bayerl, Senior Instructor I, Comparative Literature, German/Scandinavian

Anita Chari, Associate Professor, Political Science

Nicole Dudukovic, Senior Instructor I, Neurosciences Major Director, Psychology

Daphne Gallagher, Senior Instructor I, Clark Honors College

Alison Gash, Associate Professor, Political Science

Lindsay Hinkle, Instructor, Clark Honors College

Trond Jacobsen, Instructor, Director of Forensics, Clark Honors College

Ian McNeely, Professor, History, European Studies, German & Scandinavian

Brian McWhorter, Professor, School of Music and Dance

Michael Moffitt, Professor, School of Law

Kate Mondloch, Professor, History of Art & Architecture

Barbara Mossberg, Professor of Practice in Literature, Clark Honors College

Lisa Munger, Instructor, Clark Honors College

Carol Paty, Professor, Earth Sciences, Physics

Elizabeth Raisanen, Officer of Admin, Clark Honors College

Angela Rovak, Office of Admin, Clark Honors College

Casey Shoop, Senior Instructor I, Clark Honors College

Carol Stabile, Professor, Women & Gender Studies

Lisa Wolverton, Professor, History

Emeritus Faculty

Henry M. Alley, Professor emeritus.

Louise M. Bishop, Associate Professor emerita.

Joseph G. Fracchia, Professor emeritus.

David Frank, Professor emeritus.

Roxann Prazniak, Professor emerita.

Academic Requirements

Requirements in the honors college satisfy the core-education requirements that other University of Oregon students meet for graduation. Honors college faculty and professional advisors advise honors college students concerning these requirements and mentor them concerning their academic choices. Students retain full responsibility for understanding and shaping their study programs.

Depending on test scores, students may use advanced placement or international baccalaureate credits as well as transfer credits from other higher education institutions toward honors college outside course requirements, second-language requirements, applicable major requirements, cultural literacy requirements, or university electives. To earn a BS degree, students must complete one year of college-level mathematics or the equivalent. Advanced placement, international baccalaureate, and transfer credits may help fulfill either such a math requirement or the language requirement.

University and Major Requirements

Honors college requirements, which replace university core-education requirements, represent roughly one-third of a student's total four-year schedule. Before graduating, Clark Honors College students must also meet the requirements, listed elsewhere in this catalog, of their major department or professional school. They must maintain a 3.00 or better cumulative grade point average (GPA).

Clark Honors College students who have completed the CHC#core#education requirements (HC 101H, 221H, 231H, 241H, and 301H; Area of Inquiry approved courses outside the CHC in Arts and Letters, Social Science, and Science (one course in each area); an approved quantitative reasoning course; and 20 credits in upper division CHC Colloquia) have fulfilled the university's Area of Inquiry requirements. Should a student leave the CHC after successful completion of all of these requirements, the student will retain their clearance of the university's Area of Inquiry requirements.

Honors College Degree Requirements

Code	Title	Credits
Foundations in Liberal Arts Inquiry		
HC 101H	Liberal Arts: [Topic]	4
200-level Disciplinary Requirements		
HC 221H	Arts and Letters Inquiry: [Topic]	4
HC 231H	Social Science Inquiry: [Topic]	4
HC 241H	Scientific Inquiry: [Topic]	4
Research and Writing Requirement		
HC 301H	Research and Writing: [Topic]	4
Outside Course Requirements		
	One course in quantitative reasoning or mathematics from the UO approved Bachelor of Science list	4
	One additional Science course from the UO approved Areas of Inquiry list	4
	One additional Social Science course from the UO approved Areas of Inquiry list	4
	One additional Arts and Letters course from the UO approved Areas of Inquiry list	4
Second-Language Requirements ¹		
	Demonstrate second-language proficiency equivalent to completion of second college year in second language; satisfy all requirements in university department, program, or school that offers a major leading to a BA or BS	
Cultural Literacy Requirements		8
	University cultural literacy requirement ²	
Colloquia Requirements ⁷		
HC 421H	Honors College Arts and Letters Colloquium: [Topic]	4
HC 431H	Honors College Social Science Colloquium: [Topic]	4
HC 441H	Honors College Science Colloquium: [Topic]	4
	Any two additional colloquia ⁴	8
Thesis Requirements		
HC 277H	Thesis Orientation	2

HC 477H Thesis Prospectus ³ 2

Successful completion and defense of a thesis

- The second-language requirement is waived if a department, program, or school requires 90 or more credits of course work for a major leading to a BS degree (see Majors, Degrees, and Contexts Waiving Second-Language Requirements list). No case exists in which Clark Honors College language requirements replace departmental language requirements.
- Designated honors college colloquia carry a supplemental course number if they satisfy one of the below categories—, Honors College International Cultures Colloquium: [Topic] (HC 434H), Honors College American Cultures Colloquium: [Topic] (HC 444H)—or any approved (p. 47) UO courses may be used to satisfy the multicultural/cultural literacy requirement.
- Course taken at least one term before intended graduation to formalize the thesis project.
- Students may substitute four credits of independent thesis research (403), taken within or outside the honors college, in place of an elective colloquium. Independent research credits may be taken P/ NP

Majors, Degrees, and Contexts Waiving Second-Language Requirement

- Accounting
- Biology
- Business administration
- Biochemistry
- Chemistry
- Computer science
- Data science
- Earth sciences
- Environmental science
- Environmental studies
- General science
- Human physiology
- Math and computer science
- Marine biology
- Music, only in cases in which the second language is not a requirement for the student's chosen degree (Note: The second language requirement is not waived for General Music and Popular Music concentrations)
- Bachelor of Music in Music Education
- Music Composition
- Music Performance
- Music Technology
- Neuroscience
- Jazz Studies
- Physics
- Product design
- Bachelor of architecture
- Bachelor of interior architecture
- Bachelor of landscape architecture
- Students pursuing a bachelor of fine arts degrees (students must still fulfill the BFA Language or Math/Science Requirement)

Writing

The honors college is committed to excellence in writing. The core curriculum integrates instruction and practice in fundamental rhetorical skills—writing, reading, speaking, and listening—with the subject matter of the courses. Students who complete the honors college lower-division courses (HC 101H, HC 221H, HC 231H, and HC 241H) as well as HC 301H with a grade point average of 3.00 or better in all five courses satisfy the university's writing requirement if they withdraw from the honors college.

Four-Year Degree Plan

The degree plan shown is only an example of how students may complete their degrees in four years. There are alternative ways to navigate the CHC curriculum. Students should consult their advisor to determine the best path for them. The Robert D. Clark Honors College is not a major. Students who follow the honors college curriculum fulfill all of the University of Oregon's core education requirements. Honors college requirements must be taken for a letter grade, unless pass/no pass is the only option. In addition, only courses passed with grades of C– or better will fulfill honors college requirements.

Courses

HC 101H. Liberal Arts: [Topic]. 4 Credits.

This course will introduce students to the intellectual culture of liberal arts scholarship and provide a foundation in academic reading, analysis, and writing.

HC 199H. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

HC 207H. Honors College Science. 4 Credits.

The scientific process as a mode of inquiry to gain insight into fundamental questions in the natural sciences. Includes discussions, lectures, demonstrations, laboratories, field trips.

HC 209H. Honors College Science. 4 Credits.

How science may be applied and misapplied in answering questions about nature and society. Includes discussions, demonstrations, laboratories, field trips. Primarily for nonscience students.

HC 221H. Arts and Letters Inquiry: [Topic]. 4 Credits.

Introduction to critical inquiry in Arts and Letters fields such as literature, philosophy, language, religion, and the visual and performing arts. In this writing-intensive course students will use disciplinary methodologies to develop skills in evidence-based argument.

HC 222H. Honors College Arts and Letters. 4 Credits.

Literary history and modes of literary analysis and interpretation: modern literature.

HC 223H. Honors College Arts and Letters. 4 Credits.

Research in literature.

HC 231H. Social Science Inquiry: [Topic]. 4 Credits.

Introduction to critical inquiry in Social Science fields such as history, economics, anthropology, sociology, political science, law, business, geography, communication, and education. In this writing-intensive course students will use disciplinary methodologies to develop skills in evidence-based argument.

HC 232H. Honors College Social Science. 4 Credits.

Introduction to methods of historical inquiry and to major historical trends in a global framework; focuses on modern history.

HC 233H. Honors College Social Science. 4 Credits.

Research in history.

HC 241H. Scientific Inquiry: [Topic]. 4 Credits.

Introduction to critical inquiry in science fields such as chemistry, earth science, biology, mathematics, physics, engineering, neuroscience, biological anthropology, data science, and human physiology. In this writing-intensive course students will use disciplinary methodologies to develop skills in evidence-based argument.

HC 277H. Thesis Orientation. 2 Credits.

Introduction to the Clark Honors College thesis process; provides an overview of early steps and preparatory activities for the thesis.

HC 301H. Research and Writing: [Topic]. 4 Credits.

An introduction to research including development of research questions, methodology, analysis, and presentation of results.

Prereq: HC 221H, HC 231H, HC 241H.

HC 399H. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

HC 401H. Research: [Topic]. 1-21 Credits.

Repeatable.

HC 403H. Thesis. 1-21 Credits.

Repeatable.

HC 404H. Internship: [Topic]. 1-16 Credits.

Repeatable twice for a maximum of 16 credits.

HC 405H. Reading and Conference: [Topic]. 1-21 Credits.

Repeatable.

HC 406H. Special Problems: [Topic]. 1-21 Credits.

Repeatable.

HC 407H. Seminar: [Topic]. 1-5 Credits.

Repeatable. The 2-credit thesis seminar supports early work on the honors thesis.

HC 408H. Workshop: [Topic]. 1-12 Credits.

Topics include Thesis Orientation. Repeatable.

HC 409H. Practicum: [Topic]. 1-21 Credits.

Repeatable.

HC 410H. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

HC 421H. Honors College Arts and Letters Colloquium: [Topic]. 4 Credits.

Repeatable. Offered in a range of topics with an emphasis on arts and letters. Repeatable thrice when topic changes for a maximum of 16 credits.

HC 431H. Honors College Social Science Colloquium: [Topic]. 4 Credits.

Offered in a range of topics with an emphasis on social science. Repeatable thrice when topic changes for a maximum of 16 credits.

HC 434H. Honors College International Cultures Colloquium: [Topic]. 4 Credits.

Topics focus on race, ethnicity, pluralism-monoculturalism, or prejudice-tolerance of international cultures, or may describe and analyze a worldview substantially different from current U.S. views. Repeatable thrice for a maximum of 16 credits when topic changes.

HC 441H. Honors College Science Colloquium: [Topic]. 4 Credits.

Offered in a range of topics with an emphasis on science. Repeatable thrice when topic changes for a maximum of 16 credits.

HC 444H. Honors College American Cultures Colloquium: [Topic]. 4 Credits.

Topics focus on multiple American racial and ethnic groups—African American, Chicano or Latino, Native American, Asian American, European American—from historical and comparative perspectives. Repeatable thrice for a maximum of 16 credits when subject changes.

HC 477H. Thesis Prospectus. 2 Credits.

Students create prospectus, exchange critiques and ideas, and present research in mock defenses with thesis advisor present.

Charles H. Lundquist College of Business

Bruce Blonigan, Edward Maletis Dean in the Lundquist College of Business

541-346-3300
350 Lillis Hall

The business college was established in 1914 as the School of Commerce. The name was changed to the School of Business Administration in 1921, then to the College of Business Administration in 1967. It was renamed the Charles H. Lundquist College of Business in 1994. Its academic programs are accredited by the Association to Advance Collegiate Schools of Business International—the undergraduate program since 1923, the graduate since 1962. The accounting programs have been separately accredited since 1989.

The college offers programs of study leading to bachelor's degrees in accounting and business administration (with concentrations in finance, marketing, management, operations and business analytics, or sports business). It also offers a master of business administration (MBA) and master's and doctoral degrees in accounting, finance, management, marketing, operations and business analytics, and sports product management.

At the undergraduate level, the college operates an honors program for high-achieving students. Minors are available in business administration, entrepreneurship, and sports business, offering majors the opportunity to enhance their degrees with the knowledge and organizational skills necessary for effective leadership in future professions. Students from all majors may also elect to earn a certificate in global business in preparation for an international career.

Research

Faculty members in the Lundquist College of Business carry on active programs of research, and are the recipients of numerous research awards. Their works are published in the leading academic journals of their disciplines, and many serve as editors or on the editorial boards of premier accounting, finance, management, marketing, and operations management journals. At the forefront of their fields, they bring new ideas to the classroom, keeping their students ahead of the curve through ongoing research on evolving national and international business practices and economic drivers.

Facilities

Designed to complement the college's team-based approach to learning, the Lillis Business Complex (<https://business.uoregon.edu/lillis-complex/>) enhances and enriches the business curriculum. Certified by the US Green Building Council at the silver level with their Leadership in Energy and Environmental Design sustainability rating, the building features one of the largest solar installations in the Pacific Northwest and one of the pioneering uses of photovoltaic solar glass in the world.

The college also maintains a Portland location at 109 NW Naito Parkway, which houses its sports product management master's degree and executive MBA programs, offering to students connections to the city's business community. The Portland facility also houses a product-making innovation lab, providing students with access to specialized equipment

to design, build, and test prototypes of sports and outdoor apparel, footwear, and products.

International Experiences

Students are strongly encouraged to obtain international experience as part of their business education. The college and the university have partnerships with campuses worldwide to provide extensive opportunities for undergraduate and graduate students to study, intern, and research abroad. Faculty-led study tours are also a popular option for students to obtain an introduction to another culture while making progress toward their degree. Business students may opt to study language, culture, business, or a combination of them depending on the specific program selected. Students are advised to meet with an advisor prior to participating in an international program to fully understand how such an experience might apply toward degree requirements. Undergraduates who study or intern in an approved program are exempt from some, or all, of the global context requirement. Business students are encouraged to contact the Office of International Affairs to learn more about these options. Undergraduate students interested in international business are particularly encouraged to take advantage of one of these programs while also completing the certificate in global business.

Charles H. Lundquist College of Business Code of Professional Business Conduct

The Lundquist College of Business learning community is committed to a set of core values (<https://business.uoregon.edu/code-of-conduct/>) that guide members' interactions with one another. These values include integrity, respect, openness, responsibility, and teamwork, and they are as important in the Lundquist College community as they are in the business community.

Centers for Excellence

Experiential learning is a cornerstone of a Lundquist College of Business education. The college provides undergraduate and graduate students many opportunities to take learning beyond the classroom through its many student-run clubs and activities, a faculty-supervised consulting agency, internships, practicums, and its Centers for Excellence.

Center for Sustainable Business Practices

Angela Davis, Sr. Associate Dean, Academic Programs
541-346-8846

The Center for Sustainable Business Practices prepares students to integrate environmental, social, and financial stewardship into competitive business strategies. The center offers a collaborative program focused on supply-chain and operations management, organizational change for sustainability, performance measurement and governance, and life-cycle analysis. It complements the curriculum by giving students real-world experience in industry with consulting projects and internships, seminars, center-sponsored speakers, study tours, and leadership and mentoring opportunities. For more information, visit the website (<https://business.uoregon.edu/centers/csbp/>).

Marilyn C. and Gerry B. Cameron Center for Finance and Securities Analysis

John Chalmers, Head, Department of Finance
541-346-3281

The Cameron Center for Finance and Securities Analysis provides students with practical experience in corporate finance, treasury

management, and investment management. The center augments the curriculum by integrating finance and accounting, allowing students to apply their academic course work to financial analysis and decision-making in real time, using state-of-the-art investment tools and analytics in close collaboration with the center's partners in industry. Opportunities include management of live equity portfolios through the University of Oregon Investment Group and Emerging Markets Equity Portfolio, an Engaging Asia tour, internships, seminars, visiting speakers, and mentoring. For more information, visit the website (<https://business.uoregon.edu/centers/cameron/>).

Lundquist Center for Entrepreneurship

Nathan Lillegard, Interim Director
541-346-3349

The Lundquist Center for Entrepreneurship helps students develop the tools, skills, and abilities to turn innovative ideas into reality, whether the idea is improving a Fortune 500 company or starting a business. Courses, internships, guest speakers, study tours, and business plan competitions offer opportunities to develop entrepreneurial skills, attitude, and knowledge. The center's New Venture Championship is recognized as one of the top business-plan competitions in the world. By creating opportunities for participants to gain from the experience and wisdom of successful entrepreneurs, the center's programs help make students more competitive in today's business world. For more information, visit the website (<https://business.uoregon.edu/centers/lce/>).

James H. Warsaw Sports Marketing Center

Angela Davis, Sr. Associate Dean, Academic Programs
541-346-3706

The Warsaw Sports Marketing Center advances sports marketing and sports business leadership through research, education, and interaction among students, faculty members, alumni, and successful sports business professionals. As the first endowed sports marketing program in a business college at a major public university, the Warsaw Center supports curricula that lead to a concentration in sports business for the bachelor's degree program and to a sports business specialization area in the MBA degree program. The center also organizes research, sports-industry internships, guest speakers, and a variety of nonclassroom experiences for students. For more information, visit the website (<https://business.uoregon.edu/centers/warsaw/>).

Undergraduate Programs

Academic Requirements

To earn an undergraduate degree in the Lundquist College of Business, a student must be an admitted major in good academic standing with the college and the university. Two sets of requirements must be completed: general university requirements and college requirements.

The college is firmly committed to an undergraduate degree program in business based on a solid foundation in the arts and sciences. Students may not earn two majors in the Lundquist College of Business; in other words, a student who has an undergraduate degree in business administration cannot earn another undergraduate degree from the college. See the **Bachelor's Degree Requirements** section of this catalog for specific requirements for bachelor's degrees and for general-education and university requirements.

Students must satisfy the upper-division business core and major requirements in effect when they are admitted as majors.

For a more detailed explanation of requirements for majors, students should pick up the undergraduate degree programs handout in the Advising Office.

Business Premajor Admission

New students planning to earn a bachelor's degree in the Lundquist College of Business typically enter the university as business premajors. Transfer students and university students from other majors may become business premajors by submitting a Request for Addition or Deletion Major form, available in the Advising Office. Students who seek premajor status in business should meet with an advisor in the college if their GPA is below 3.00. Business premajors typically are not eligible to take most 300- and 400-level business courses. Business premajor status does not guarantee admission to the accounting or business administration major.

Admitted business premajors typically spend the first two years fulfilling general-education and premajor requirements.

Premajor Requirements

- **Junior Standing.** Course work of 75 or more credits must be complete.
- **Cumulative GPA Requirement.** Guaranteed admission requires a 3.00 cumulative grade point average in college course work, including transfer work. The college includes all course work when calculating the cumulative GPA for admission to the major.
- **Holistic Review.** Students who have taken all required business premajor course work but fall slightly below the minimum GPA requirements may be considered for admission under a holistic review process. For more details, interested students may visit an academic advisor in 203 Peterson Hall.
- **English Competence.** International students must have a Test of English as a Foreign Language (TOEFL) score of at least 575 (paper-based test), 233 (computer-based test), 89 (internet-based test), an International English Language Testing System (IELTS) score of 7.0, or have completed the Academic English for International Students (AEIS) program.

First-Year Direct Admission

Direct admission is only offered to first-year students who are entering in the fall term and list their intended major as business administration. The University of Oregon considers a number of factors when making direct admissions decisions, including high school GPA, strength of academic course work, test scores, and ability to enhance the diversity of the university. Students selected for direct admission will need to complete the lower-division course requirements but will not need to apply to the major like other students interested in business administration or accounting.

Business Premajor Courses

Premajor core business courses must be taken at the University of Oregon.

In addition, international students are required to take Academic English for International Students (AEIS) courses or produce English language proficiency test scores (575 on the TOEFL paper-based test, 89 on the TOEFL internet-based test, or 7.0 in the IELTS).

Code	Title	Credits
Core Courses ¹		
BA 101	Introduction to Business	4
ACTG 211	Introduction to Accounting I	4
ACTG 213	Introduction to Accounting II	4
EC 201	Introduction to Economic Analysis: Microeconomics	4
EC 202	Introduction to Economic Analysis: Macroeconomics	4
Additional Courses ²		
BA 240	Spreadsheet Analysis and Visualization	4
MATH 241	Calculus for Business and Social Science I	4
MATH 243	Introduction to Methods of Probability and Statistics	4
Select one of the following:		8
WR 121 & WR 122	College Composition I and College Composition II	
WR 121 & WR 123	College Composition I and College Composition III	
Total Credits		40

¹ A 3.00 cumulative GPA (including both UO and transfer course work) and a minimum grade of C– in core courses are required for guaranteed admission to the major. Premajor requirements must be taken for letter grades. The university limits retaking of courses in which a P or mid-C or better is earned; a petition is required. When repeating a core course, only the second grade is used in calculating the core GPA. Core courses may be repeated only once (including marks of W, N, F, D, C–).

² Must be taken for letter grades and passed with grades of C– or better.

Application to the Major

Students seeking admission through the standard pathway must submit a formal application for admission to the major one term prior to enrolling in upper-division business courses. Typically this takes place in the term they are completing their lower-division requirements. To be eligible for admission as a major, a student must apply before the term deadline. Applications are due the first week of the term for admission the following term. Applications are not accepted during summer session. Students who are completing their final term of business premajor requirements may submit applications.

The following documents are required for admission:

1. Completed application form (<https://business.uoregon.edu/ug/apply/major/>)
2. Academic transcripts or proof of enrollment
3. A cover letter and résumé
4. Short answer essays

Definitions, Limitations, and Policies

Transfer Students

The sequential nature of this program requires careful academic planning. Students who want to transfer to the college are encouraged to meet with an advisor in the Lundquist College of Business early in their academic careers. Students are admitted to the university as business premajors. Once admitted, they may apply for major status in accordance

with the procedure described. Applications are due the first Friday of the term for admission the following term.

Second Bachelor's Degree

A student who has a bachelor's or master's degree in a field of business administration may not earn a second bachelor's degree in business. Students who have earned a nonbusiness degree and want a second degree in a field of business must be admitted to the university as postbaccalaureate nongraduate students. Second-degree candidates must meet the same admission requirements and follow the same application process described.

Students retain business premajor status until admission requirements are completed or waived because of completed course work. Second-degree students must complete the same upper-division requirements as first-degree candidates. The Second Bachelor's Degree section of this catalog, under **Bachelor's Degree Requirements**, lists university requirements for a second bachelor's degree; the Undergraduate Advising office has information about Lundquist College requirements.

Residence Requirement

Students must complete a minimum of 44 upper-division credits in regularly scheduled Lundquist College of Business courses. With the department head's approval, credits may be transferred from other accredited institutions, independent study, or approved courses in other departments. Accounting majors must complete all upper-division accounting courses at the University of Oregon.

Grading

Premajor required courses and upper-division courses must be taken for letter grades and passed with grades of C– or better. See the **Registration and Academic Policies** section of this catalog for an explanation of the university's grading systems.

Upper-Division Courses

Courses for the minor are open to nonmajors, and courses for the certificate in international business communication are open to students whose native language is not English. Only admitted majors in the Lundquist College of Business may enroll in all other 300- and 400-level business courses.

Continuous Progress

Students who do not attend the university for an extended period of time after being admitted as a major may be required to reapply for admission and fulfill current major requirements if the *UO Catalog* for the last year of attendance has expired. See Catalog Expiration and Requirements Policies in the Reader's Guide to the Catalog (<http://catalog.uoregon.edu/archive/2022-2023/readersguide/>).

Graduate Programs

Graduate School of Management

The Graduate School of Management offers degree programs at the master's and doctoral levels and coordinates the graduate work of the five academic departments in the Lundquist College of Business. Graduate instruction in every field of business is supported by courses in related fields offered elsewhere in the university.

The Graduate School of Management is accredited by the Association to Advance Collegiate Schools of Business International.

Activities of the Center for Sustainable Business Practices, James H. Warsaw Sports Marketing Center, Lundquist Center for Entrepreneurship, and the Marilyn C. and Gerry B. Cameron Center for Finance and Securities Analysis may be of interest to graduate students. The centers are described in the overview section to the Charles H. Lundquist College of Business.

Master's Degree Programs

The Graduate School of Management offers course work leading to the master of accounting (MAcc), the master of science in finance (MSF), the master of science in sports product management (SPM), the master of business administration (MBA) and the executive master in business administration (EMBA). With the exception of the master of science in finance, master of arts (MA) and master of science (MS) degrees in the Lundquist College of Business are available to PhD candidates. Students must complete the requirements specified in the description of their degree program.

Doctoral Degree Programs

Diane Del Guercio, Director, PhD Program
Senior Associate Dean, Faculty and Research | Gerry and Marilyn Cameron Professor of Finance

398C Anstett Hall
 541-346-3251

The Lundquist College of Business offers a program of advanced graduate study and research leading to the degree of doctor of philosophy (PhD) for students preparing for careers in university teaching and research. The program is administered by the director of doctoral programs for the Lundquist College of Business, assisted by the PhD programs committee.

The PhD typically requires four or five years of intensive study with a concentration in accounting, finance, management, marketing, or operations and business analytics. The program focuses on developing productive scholars, and it emphasizes both research and teaching skills. Doctoral students must demonstrate competence in scholarly research, and they must assume primary teaching responsibility for undergraduate business courses sometime during their program. Students are expected to work closely with faculty members whose interests are similar to their own. Applicants are advised to be as specific as possible about their areas of interest. In the Lundquist College, with the exception of the master of science in finance, master of arts (MA) and master of science (MS) degrees are available to PhD candidates. Students must complete the requirements specified in the description of their degree program.

For more information, visit the website (<https://business.uoregon.edu/phd/>).

Concurrent Degree Programs

At the University of Oregon, the term "concurrent degrees" is used when a student is pursuing two degrees simultaneously. Below are some examples involving graduate degrees in business. For more information, visit the website (<https://gradschool.uoregon.edu/policies-procedures/concurrent-degrees/>).

MBA/MS in Finance

Business students may augment their management skills by developing expertise in finance. The curriculum for the master of science in finance is designed to provide students with insights from the most advanced theoretical and empirical research in finance while attending quarterly

professional development seminars taught by a master career consultant. Through the Cameron Center for Finance and Securities Analysis, students have the opportunity to practice securities analysis and portfolio management in a live environment with access to the Pacific Northwest's financial, banking, and investment industry through the center's tailored series and study tours. The concurrent MBA/MSF program may be completed in two years. For more information, visit the website (<https://business.uoregon.edu/mba/degree-programs/concurrent-msf/>).

JD/MBA

In cooperation with the University of Oregon School of Law, a concurrent JD/MBA program makes it possible to earn both the doctor of jurisprudence and master of business administration degrees in four years instead of the five that would be required if each degree was completed separately. Students spend their first year in the School of Law and their second year in the Lundquist College of Business, or vice versa. The third and fourth years are spent taking advanced courses in both law and business.

It is a highly selective program; students must meet the admission requirements of both the School of Law and the Lundquist College of Business. Admission is allowed only for the fall term. Prospective students should consult the admissions staff of both the School of Law and the MBA program. Students interested in sustainability may obtain a JD/MBA with a sustainability specialization in both areas. For more information, visit the MBA website (<https://business.uoregon.edu/mba/degree-programs/full-time/>) and JD website (<https://law.uoregon.edu/explore/joint-biz-and-law/>).

MBA/MAcc

Students who wish to pursue both an MBA and master of accounting degree may do so concurrently if they meet the admissions requirements for both. Concurrent MBA/MAcc students may save as much as two terms compared with the time required for both degrees independently. For more information, visit the website (<https://business.uoregon.edu/master-accounting/>).

MBA/MA or MS in Conflict and Dispute Resolution

Business students may augment their management skills by developing expertise in the management of conflict. The master of arts or master of science in conflict and dispute resolution is structured to prepare a new generation of practitioners, educators, and scholars. Grounded in dispute resolution theory, the program combines broad interdisciplinary training and opportunities for individualized study and skills development. Concurrent MBA/MA or MS students have the option of obtaining both degrees in three years rather than the four years required if earned separately. Students are required to meet the admission requirements of both the schools. Admission is allowed only for the fall term. Prospective students should consult the admissions staffs of the MBA program and the program in conflict and dispute resolution, housed in the School of Law. For more information, visit the website (<https://law.uoregon.edu/explore/CRES-concurrent-degrees/>).

MBA/MCRP

Business students interested in management and leadership roles related to city planning and land development should consider concurrent MBA and MCRP degrees. The master of community and regional planning (MCRP) prepares policy-oriented planners for leadership positions in the public, nonprofit, and private sectors. The program differs from public policy programs primarily in its focus on spatial issues including

but not limited to building form and land use. Students are required to meet the admission requirements of both programs. Admission is allowed only for the fall term. Prospective students should consult the admissions staffs of the MBA program and the School of Planning, Public Policy and Management. For more information, visit the website (<https://pppm.uoregon.edu/grad/master-of-community-and-regional-planning/>).

MBA/Graduate Certificate in Arts Management or Nonprofit Management

Students interested in both business and the arts should consider furthering their careers with a master of business administration degree and a concurrent certificate in arts management or nonprofit management. The certificates in arts management and nonprofit management are based on the underlying belief that professional arts and nonprofit managers must be familiar with the social, cultural, and ethical contexts of the arts in general—and the business context if combined with an MBA. Students are required to meet the admission requirements for both programs. Applications are reviewed on a rolling basis in fall, winter and spring terms. Prospective students should consult the admissions staffs of the MBA program and the School of Planning, Public Policy and Management. For more information, visit the website (<https://pppm.uoregon.edu/grad/certificate/arts-management/>).

Administration of the Master's Degree Programs

The Charles H. Lundquist College of Business seeks diversity in its student population and evaluates applicants on their strengths. The college is interested in applicants' general intellectual ability, initiative and resourcefulness, creativity, seriousness of purpose, maturity, and capacity for growth. Oral and written communication skills are important. Students should have demonstrated a capacity for quantitative thinking and be able to take an orderly, analytical approach to solving problems and generating alternative solutions. The ability to derive ideas from various sources and see important relationships is essential. Students should be self-motivated, with persistence and drive, and with some understanding of the broad social, political, and economic implications of decisions and actions. For MBA students, work experience is highly desirable.

The college's master's degree students describe the programs as rigorous, supportive, interactive, close-knit, warm, and dedicated to a sense of community. Once admitted to a program, students are evaluated as they would be in the workplace: they are given continual feedback on areas in which they are excelling and areas that need improvement.

Admission Criteria and Deadlines

Admission for the MBA, MAcc, MS in Finance

The admission process is based on these factors:

1. Undergraduate academic performance
2. Graduate Management Admission Test (GMAT) score
3. One (MS in finance) to two (MBA and MAcc) written recommendations from people who have worked closely with the applicant and can comment on student's ability, accomplishments, and potential
4. Completion of essay questions included in the application
5. Work experience or demonstrated leadership ability
6. Potential to benefit from and add value to the college's learning community

7. Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) for international applicants
8. Personal interview

The applicant should also provide any other pertinent information for consideration. Applicants are judged on their academic abilities and promise; their potential for leadership; and their commitment, readiness, and motivation to complete the program. Please visit links for each program to explore requirements specific to each program.

Prerequisites

Applicants should demonstrate proficiency in mathematics. MActg applicants with a business degree other than accounting must complete additional accounting courses.

Deadlines

MAcc. To start winter term, the deadline is October 15; to start spring term, the deadline is January 15; to start fall term, the deadline is April 15.

MBA and MSF. A rolling admission system is used. The early-decision deadline is October 15; round two is January 15, round three is March 15, and round four is May 15. The deadline for international applicants is March 15. Admission for applicants whose applications are received after May 15 is granted only if space is available in the incoming class of students.

Admission for the OEMBA

Admission to the program requires the following:

1. Demonstrate at least three years of managerial or leadership experience in a position that included supervision of other employees, responsibility for budgets, or financial performance, project management, account management, or similar responsibilities
2. Demonstrate at least five years of career-related work experience
3. Currently hold a mid- to senior-level management position with significant responsibility
4. Hold an undergraduate degree from a US or internationally accredited institution of recognized standing

Deadlines

A rolling admission system is used.

Admission for the MS in Sports Product Management

Admission to the program requires the following:

1. A bachelor's degree from a regionally accredited four-year college or university in the United States or its equivalent from a foreign institution
2. Two to three letters of recommendation
3. Graduate Management Admission Test (GMAT) or Graduate Record Examination (GRE) scores if GPA is below a 3.00
4. A résumé
5. A product project
6. Three essays

Deadlines

Online. Round one is December 15; round two is January 15; final round is March 1.

Full-time. Round one is November 15; round two is January 15; round three is March 15; round four is May 15; final round is June 30.

Doctoral Admissions

For admission to the doctoral program, the student must

1. Satisfy the admission requirements of the Lundquist College of Business (<https://business.uoregon.edu/phd/admissions/>) and of the Division of Graduate Studies (<https://gradschool.uoregon.edu/?page=admissions>)
2. Be recommended by the department with primary responsibility for the area in which the candidate expects to earn a major
3. Provide evidence of scholarly promise

Averages for Recently Matriculated Students

- Grade point average (GPA)—3.84 on a four-point scale
- Test of English as a Foreign Language (TOEFL), internet-based test score—104
- Graduate Management Admission Test (GMAT) scores—720 (quantitative, 87th percentile; verbal, 87th percentile; writing, 5.3)
- Graduate Record Examination (GRE) revised general test scores—320 (163 quantitative, 87th percentile; 157 verbal, 73rd percentile)

Minimum Testing Qualifications

- GPA—3.00 on a four-point scale (undergraduate and graduate)
- TOEFL scores—96 (internet-based test) or 600 (paper-based test)
- International English Language Testing System (IELTS) score—7.5
- GMAT scores—600 total (quantitative, 63rd percentile; verbal, 65th percentile)
- GRE revised general test scores—315 (155 quantitative, 61st percentile; 160 verbal, 84th percentile; 308 combined quantitative and verbal) for operations and business analytics applicants

PhD students receive financial support in the form of an appointment as a graduate employee. For 2015–16, typical appointments were 0.49 FTE and carried a stipend of approximately \$19,000 plus waiver of tuition, and summer support of approximately \$5,000 for newly admitted students. Graduate employees may assist faculty members in research and teaching and assume responsibility for teaching undergraduate business courses. Inquiries concerning the program should be addressed to the Lundquist College of Business director of doctoral programs.

Deadline

Application to the PhD program for fall term is the preceding January 5 by 5:00 p.m. Pacific Standard Time.

Program Planning

Students should plan their course of study with the director of the program and the PhD coordinator of their major department.

Available Funding

PhD students receive financial support in the form of an appointment as a graduate employee. For 2021-2022, typical appointments were 0.49 FTE and carried a monthly stipend of approximately \$2,200 plus waiver of tuition, and summer support of approximately \$5,000 for newly admitted students. Graduate employees may assist faculty members in research and teaching and assume responsibility for teaching undergraduate business courses. Inquiries concerning the program should be addressed to the Lundquist College of Business director of doctoral programs. <https://graduatestudies.uoregon.edu/funding/ge/>

salary-benefits (<https://graduatestudies.uoregon.edu/funding/ge/salary-benefits/>)

Academic Performance

In addition to fulfilling Division of Graduate Studies requirements, a student enrolled in an advanced degree program is required to maintain a GPA of 3.00 for graduate courses that are counted toward the business degree. Students whose GPAs fall below 3.00 in a graduate college of business degree program are automatically placed on probation. Their continued enrollment is subject to review by the director of the program.

Students may formally appeal disqualification or other decisions relevant to their academic performance or program. A description of the probation policy and appeal procedures is available from the director of the program.

General University Regulations

See the **Division of Graduate Studies** section of this catalog for general university regulations and information regarding registration, academic performance, and other matters applicable to university graduate students.

Student Life and Resources

Collette Niland, Associate Dean, Advising and Student Experience

541-346-3303

203 Peterson Hall

<https://business.uoregon.edu/student-life> (<https://business.uoregon.edu/student-life/>)

The Lundquist College of Business is widely recognized for its outstanding programs in business education. Students and faculty members from around the world come to study, research, and learn together. The college offers courses in business premajor studies, accounting, business administration, global management, sports business, management, entrepreneurship, marketing, finance, operations and business analytics, and international business communications. Students may earn a bachelor of arts (BA) or bachelor of science (BS) degree with a major in either accounting or business administration. An honors program is offered for outstanding undergraduates. Student clubs and organizations provide opportunities to develop leadership and business skills outside of the classroom. A minor is offered for students in other majors. International students, regardless of major, may earn a letter certifying mastery in international business communication. A certificate in global business may be added to the business administration or accounting major.

Student Support Services

Advising

Heather Bottorff, Senior Director, Undergraduate Programs

541-346-3303

Kata Bahnsen-Reinhardt, Associate Director, Graduate Student Experience

541-346-8843

Professional advisors and peer advisors regularly meet with students to answer questions, plan academic programs, and track progress toward graduation. Students are urged to meet with a business college advisor at least once a year to ensure that they are meeting requirements and to stay informed of program changes. The college's undergraduate advising office also maintains information about major and minor admission

processes, degree requirements, scholarships, educational exchange programs, tutoring services, and student organizations. For more information, visit the website (<https://business.uoregon.edu/ug/advising/>).

Mohr Career Services

Gene Rhee, Executive Director
541-346-3301

Through this office, business students explore career paths, develop an employment strategy, identify strengths, form connections with industry leaders, and understand the skills they need to achieve their career ambitions. Services include career advising and exploration, job and internship information, guidance in establishing a résumé and online profile, a job shadow program, networking opportunities, a mentoring program, and skills development through a variety of workshops and events. The office also offers short courses to help students develop advanced skills essential in the modern job market while earning industry-recognized certifications. For more information, visit their website (<https://business.uoregon.edu/career/>).

Braddock Tutoring

Weili Wee, Learning Specialist
541-346-4739

This program provides free tutoring in accounting, economics, finance, calculus, and statistics to business majors, accounting majors, business premajors, and business minors. Private tutoring with hourly fees can also be arranged for select courses. For more information, visit their website (<https://business.uoregon.edu/ug/tutoring/>).

Diversity Programs

Damien Pitts, Academic Advisor and Diversity Initiatives Specialist
541-346-3303

Coordinated through undergraduate advising, a cohort program, Building Business Leaders, is offered for self-identified, underrepresented minority students. It supports students as they progress through the business premajor curriculum with opportunities on campus and in the business community through programs, events, and seminars. Business premajors in this program receive academic support services, such as tutoring, career-development programs, and academic advising, in addition to a seminar teaching students how to maximize their education. For more information, visit the website (<https://business.uoregon.edu/ug/bbl/>).

Computer Laboratories

Shandon Bates, Director, Information Services and Instructional Technology
541-346-3311

The Lundquist College of Business provides dedicated computer labs for business students. The systems run Windows, Microsoft Office, and all software necessary to complete business courses. Students also have access to high-capacity black-and-white and color printers, as well as binding and laminating services for a fee. Electronically enhanced study rooms may be reserved at the front desk of the lab or online, and 50 virtualized lab seats may be accessed via the internet from anywhere in the world. Mac and Dell video and power adapters, calculators, and presentation remotes are also available for checkout. Wireless networking is available throughout the Lillis Business Complex, and most Lillis classrooms are equipped with a resident computer, projector, document camera, and sound system to enhance presentation capabilities. There are two fully operational videoconferencing rooms

in the building, and a portable videoconferencing unit can be requested for classroom use. For more information, visit the website (<https://business.uoregon.edu/computer-labs/>).

Academic Residential Community

541-346-3303
<https://business.uoregon.edu/ug/advising/residential-community> (<https://business.uoregon.edu/ug/advising/residential-community/>)

In partnership with the Office of University Housing, the business college sponsors an academic residential community—an on-campus living and learning opportunity for undergraduate students interested in business. In the business residential community, residents take courses together and participate in a wide variety of dedicated programming, including career exploration, academic advising, résumé building, business etiquette, and panels focused on majors in the Lundquist College of Business.

Student Organizations

Involvement in student organizations helps develop leadership and organizational skills and offers a professional network to students and members of the faculty and the business community. Students may choose from more than a dozen student organizations supported by the college. For more information, visit the website (<https://business.uoregon.edu/ug/clubs/>).

Academic Opportunities

Honors Program

Eric Boggs, Director
541-346-4659

Students in the business honors program are offered unique opportunities to enhance their educational experiences and prepare themselves for the growth and challenge of a career in business. A maximum of 35 students take nine of the core business courses as a cohort. Among the many advantages and benefits are smaller classes, select instructors, and opportunities to gain experience. Undergraduate pre-business or business majors and community college transfer students interested in business as an area of study are encouraged to apply. High school seniors are encouraged to learn more about the Lundquist College of Business and the Honors Program. Additional information and the application is available online (<https://business.uoregon.edu/ug/honors/>).

Scholarships

Each year, the Lundquist College of Business awards scholarships to outstanding students majoring in accounting or business administration. Typically, the college awards approximately 70 scholarships that range from \$500 to \$7,500. Scholarships are made possible through generous donations by alumni and other friends of the Lundquist College of Business. Although criteria vary by scholarship, the primary emphasis is academic performance and demonstrated potential for success in a business career. Financial need may be considered, but it is typically a secondary consideration when making awards. Scholarship applications are available winter term. Scholarships are awarded in the spring. The accounting department has additional scholarship opportunities for its majors. Available scholarships and applications can be found on the Lundquist College of Business website.

Accounting

Dane Christiansen, Department Head

Associate Professor of Accounting | Charles E. Kern Research Scholar

Advising and Student Experience
203 Peterson Hall

Accounting students are highly recruited by a variety of organizations—taking positions in public accounting firms, industry, and government. Accountants deal with issues ranging from the design of information systems to the formulation of acquisition strategies. Given the growing internationalization of business, career paths can even lead to exciting opportunities abroad. Accounting graduates of the University of Oregon include Phil Knight, Nike cofounder and chairman, and Charles H. Lundquist, the namesake of the UO business college.

We provide undergraduate and masters students with excellent conceptual and technical skills that will allow them to excel in productive and successful careers as future business leaders. The challenging curriculum emphasizes the development of skills in problem-solving, analytical reasoning, and written and oral communication. Students participate in various real-world projects and obtain considerable computer experience. The relatively small size of the program allows meaningful student-faculty interaction. The school also actively contributes to creating knowledge by conducting and publishing high-quality scholarly research, and by training PhD students to become future teachers and scholars. The School of Accounting is one of only 120 accounting programs accredited by AACSB International.

The department offers an undergraduate major in accounting, a Masters of Accounting, and a Ph.D.

Faculty

Dane M. Christensen, associate professor (corporate misconduct, corporate social responsibility). BA, 2003, Oregon State; BS, 2004, MActg, 2005, Oregon; PhD, 2013, Arizona. (2016)

Robin P. Clement, Robert and Lois Braddock Distinguished Senior Instructor II (consolidations, financial accounting theory); director, master of accounting program; academic director, sports product management. BSBA, 1979, Ohio State; MBA, 1983, Wisconsin, Milwaukee; PhD, 1994, Michigan State. (2003)

Angela K. Davis, Jack O. Rickli Professor of Business (financial reporting, valuation). BS, 1993, Idaho; PhD, 2001, Washington. (2006)

Qintao Fan, associate professor. BA, 1996, Renmin University of China; MA, 1998, Maryland, College Park; MS, 2001, PhD, 2004, Stanford. (2016)

Nicole Bastian Johnson, associate professor (managerial incentives, performance measurement). BS, 1996, MAcc, 1996, Brigham Young; MS, 2002, PhD, 2005, Stanford. (2013)

Drummond Kahn, instructor (auditing). BA, 1989, Whitman; MS, 1990, Oregon. (2000)

Jaewoo Kim, assistant professor (capital markets, financial reporting, information intermediaries, financial accounting for income taxes). BA, 2000, Korea; MBA, 2004, Korea Advanced Institute of Science and Technology; PhD, 2013, Iowa. (2019)

Linda K. Krull, Tykeson Professor of Accounting (capital structure decisions, effects of taxes on corporate financial reporting and

investment); coordinator, doctoral program. BS, 1992, Indiana; MAcc, 1994, Florida; PhD, 2001, Arizona. (2008)

Steven Roy Matsunaga, Charles E. Johnson Memorial Professor of Accounting (corporate governance, managerial incentives). BA, 1979, San Francisco State; MBA, 1984, William and Mary; PhD, 1992, Washington. (1992)

Sarah Nutter, professor (impact of taxes and taxation structures, institutional and individual behavior); Edward Maletis Dean. BS, Ferris State; MBA, PhD, Michigan State. (2017)

Stephanie Peel, professor of practice (financial, operational, compliance, and systems auditing; data analysis); Porter Faculty Fellow. BS, 1990, Washington, St. Louis. (2018)

Kyle Peterson, associate professor (comparability, disclosure). BS, 2001, MAcc, 2001, Brigham Young; PhD, 2008, Michigan, Ann Arbor. (2008)

Joel Sneed, senior instructor (accounting information systems, financial and international accounting). BS, 1986, MBA, 1988, Appalachia State; MS, 1997, PhD, 2001, Arizona. (2000)

Michael P. Tomcal, senior instructor (financial accounting, cost accounting, federal taxation). BS, 1982, DePaul; MEd, 2005, Oregon State; MActg, 2005, Oregon. (2006)

Brady J. Twedt, assistant professor (capital markets, information intermediaries). BS, 2009, Utah State; PhD, 2013, Texas A&M. (2018)

Jennifer Welander, instructor. BA, 1993, Oregon; MBA, 2013, Oregon. (2021)

Emeriti

Helen Gernon, professor emerita. BBA, 1968, Georgia; MBA, 1972, Florida Atlantic; PhD, 1978, Pennsylvania State; CPA, Florida. (1978)

David A. Guenther, professor emeritus. BA, 1976, California State, San Bernardino; PhD, 1990, Washington. (2005)

Michele C. Henney, professor emerita. BS, 1982, California State; MS, 1988, Golden Gate; PhD, 1994, Oregon. (2004)

Raymond D. King, professor emeritus. BS, 1971, Montana State; MBA, 1974, Montana; PhD, 1980, Oregon; CPA, Montana. (1982)

Dale Morse, professor emeritus. BA, 1969, MBA, 1975, Oregon; PhD, 1978, Stanford. (1991)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them. Milestones are not specific to one course unless explicitly stated. Please visit the website (<https://business.uoregon.edu/ug/advising/>) for more information.

Bachelor of Arts in Accounting

Course	Title	Credits	Milestones

Courses

ACTG 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable when the topic changes.

ACTG 211. Introduction to Accounting I. 4 Credits.

The accounting model and financial statements for external users.

Prereq: sophomore standing.

ACTG 213. Introduction to Accounting II. 4 Credits.

Reporting of assets, equities, revenues, and expenses. Cost information and uses in management planning and control. Budgeting, manufacturing cost flows, and product costs.

Prereq: ACTG 211, C- or better; sophomore standing.

ACTG 340. Accounting for Entrepreneurs. 4 Credits.

Sources and uses of cash in the context of start-up and small firms. Emphasis on cash generated by operations and used for operations and growth. Secondary emphasis on external sources of cash. Prereq: ACTG 211 or MGMT 335.

ACTG 350. Intermediate Accounting I. 4 Credits.

Concepts and principles of financial accounting, including U.S. and international financial reporting standards; analysis of alternatives for income measurement and asset and liability valuation. Prereq: ACTG 213 or BA 215, BA 101, BA 240, EC 201, MATH 241 or MATH 251, MATH 243 or MATH 345, WR 122 or WR 123.

ACTG 351. Intermediate Accounting II. 4 Credits.

Concepts and principles of financial accounting, including U.S. and international financial reporting standards. Analysis of alternatives for income measurement and asset and liability valuation. Prereq: ACTG 350.

ACTG 352. Intermediate Accounting III. 4 Credits.

Concepts and principles of financial accounting, including U.S. and international financial reporting standards; analysis of alternatives for income measurement and asset and liability valuation. Prereq: C- or better in ACTG 351, FIN 316.

ACTG 360. Cost Accounting. 4 Credits.

Development and communication of cost information to assist in planning, motivating managers, controlling costs, and evaluating performance. Prereq: C- or better in ACTG 213, BA 101, BA 240, EC 201, EC 202, MATH 241, MATH 243, and WR 122 or WR 123.

ACTG 401. Research: [Topic]. 1-21 Credits.

Repeatable.

ACTG 403. Thesis. 1-12 Credits.

Repeatable.

ACTG 405. Special Problems: [Topic]. 1-12 Credits.

Repeatable.

ACTG 406. Practicum: [Topic]. 1-12 Credits.

Repeatable.

ACTG 407. Seminar: [Topic]. 4 Credits.

Repeatable.

ACTG 408. Workshop: [Topic]. 1-21 Credits.

Repeatable.

ACTG 409. Terminal Project. 1-12 Credits.

Repeatable.

ACTG 410. Experimental Course: [Topic]. 1-4 Credits.

A recent topic is Accounting Information Systems. Repeatable when the topic changes.

ACTG 440. Auditing. 4 Credits.

The audit environment, examinations of financial statements, and the audit process. Includes professional standards, audit sampling, and the audit profession; concepts underlying professional ethics for auditors. Prereq: C- or better in ACTG 350.

ACTG 450. Advanced Financial Accounting. 4 Credits.

Accounting for equity; financial accounting and reporting for corporate consolidation.

Prereq: C- or better in ACTG 352.

ACTG 460. Government & Not for Profit Accounting. 4 Credits.

This course teaches differences in accounting and financial reporting for governmental and not-for-profit organizations and differences between private sector and public-sector accounting, standards-setting, meeting stakeholder needs.

ACTG 470. Federal Taxation. 4 Credits.

Federal income tax law covering primarily the taxation of individuals with a focus on business income and property transactions. Introduction to tax planning.

Prereq: C- or better in ACTG 213, BA 101, BA 240, EC 201, EC 202, MATH 241, MATH 243.

ACTG 480. Accounting Data Analytics I. 4 Credits.

Focuses on the increased use of data analytics within the accounting profession, including an understanding of data analytic thinking, terminology and application.

Prereq: ACTG 350.

ACTG 503. Thesis. 1-16 Credits.

Repeatable.

ACTG 510. Experimental Course: [Topic]. 1-4 Credits.

A recent topic is Accounting Information Systems. Repeatable when the topic changes.

ACTG 540. Auditing. 4 Credits.

The audit environment, examinations of financial statements, and the audit process. Includes professional standards, audit sampling, and the audit profession; concepts underlying professional ethics for auditors.

ACTG 550. Advanced Financial Accounting. 4 Credits.

Accounting for equity; financial accounting and reporting for corporate consolidation.

ACTG 560. Government & Not for Profit Accounting. 4 Credits.

This course teaches differences in accounting and financial reporting for governmental and not-for-profit organizations and differences between private sector and public-sector accounting, standards-setting, meeting stakeholder needs.

ACTG 570. Federal Taxation. 4 Credits.

Federal income tax law covering primarily the taxation of individuals with a focus on business income and property transactions. Introduction to tax planning.

ACTG 580. Accounting Data Analytics I. 4 Credits.

Focuses on the increased use of data analytics within the accounting profession, including an understanding of data analytic thinking, terminology and application.

ACTG 601. Research: [Topic]. 1-16 Credits.

Repeatable.

ACTG 603. Dissertation. 1-16 Credits.

Repeatable.

ACTG 605. Special Problems: [Topic]. 1-16 Credits.

Repeatable.

ACTG 606. Practicum: [Topic]. 1-16 Credits.

Repeatable.

ACTG 607. Seminar: [Topic]. 1-5 Credits.

Current Research in Accounting is a recent topic. Repeatable.

ACTG 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

ACTG 609. Terminal Project. 1-12 Credits.

Repeatable.

ACTG 610. Experimental Course: [Topic]. 1-5 Credits.

Recent topics include Developing the Business Professional, International Accounting, Tax Pass-Through Entities. Repeatable when the topic changes.

ACTG 612. Financial Accounting. 3 Credits.

Introduces the accounting model and financial statements for external users. Emphasizes the use of accounting information in valuation and performance evaluation.

Prereq: ACTG 211 or equivalent.

ACTG 616. Tax Research. 4 Credits.

Introduces tax law, tax authority, and how to research complex tax issues. Emphasizes development of professional research memorandums and advising clients on tax strategies.

Prereq: ACTG 570 or ACTG 617.

ACTG 617. Taxation of Business. 4 Credits.

Taxation of business entities (C corporations, partnerships, S corporations, and limited liability companies) as they form, operate, and dissolve.

ACTG 618. Taxes and Business Strategy. 4 Credits.

How to use economic analysis as a tax planning tool, thereby incorporating tax factors in economic decisions.

Prereq: ACTG 617.

ACTG 619. Taxation of Pass Through Entities. 4 Credits.

Designed for accountants, managers, and entrepreneurs, covers basics of taxation of partnerships, S corporations and their shareholders, and trusts and their beneficiaries. Also covers taxation of exempt entities. Students cannot receive credit for both ACTG 619 and LAW 681.

ACTG 620. Entrepreneurial Accounting. 3 Credits.

Coverage includes selection of a company's legal organizational structure; compensation strategies for small business owners; cash flow budgeting, management and forecasting; and financial statement analysis.

Prereq: MBA core or the equivalent.

ACTG 625. Financial Reporting. 3 Credits.

In-depth coverage of the measurement and disclosure principles used to prepare generally accepted accounting principle-based financial statements.

Prereq: MBA core introduction to accounting courses or equivalent.

ACTG 630. Accounting Measurement and Disclosure. 4 Credits.

Recent Financial Accounting Standards Board decisions; current measurement and disclosure conflicts facing the accounting profession. Includes exposure to governmental and not-for-profit accounting issues.

ACTG 631. Financial Statement Analysis and Valuation. 4 Credits.

Examines the role of accounting information in financial decisions.

Highlights valuation's relationship to accounting earnings and book value.

ACTG 642. Advanced Assurance Services. 4 Credits.

Knowledge and application of generally accepted accounting principles and generally accepted auditing standards systems, design and flow charting, work paper preparation and review, oral and written presentation, and application of judgment.

Prereq: ACTG 440/540.

ACTG 662. Strategic Cost Management. 4 Credits.

Theory and application of management accounting techniques to decisions made under uncertainty in complex business environments.

ACTG 681. Accounting Data & Analytics II. 4 Credits.

Leveraging skills and knowledge developed in ACTG 480/580, this course focuses on enabling students to successfully engage with an iterative process to more effectively perform and communicate analytics across increasingly complex scenarios, producing actionable results that consider risks related to data quality, privacy and misinterpretation. Prereq: ACTG 480 or ACTG 580.

Finance

John Chalmers, Department Head Abbott Keller Professor of Finance

Advising and Student Experience
203 Peterson Hall

The Department of Finance offers courses in finance and business economics. The curriculum delivers the principles of finance, the application of analytical financial tools, and courses that apply these principles and tools to specific financial instruments and institutions. The curriculum prepares students to apply financial analysis to organizations' fundamental valuation and investment decisions.

The department offers a concentration in finance for the undergraduate major in business administration, a Masters of Science in Finance, a Concentration in Finance and Securities analysis to MBA students and a Ph.D. degree in finance.

Faculty

Wallace Ao, instructor (applied microeconomics, applied econometrics). BA, 2006, New York; MS, 2010, Wisconsin-Madison; PhD, 2014, Wisconsin-Madison. (2020)

Deborah J. Bauer, Peter and Molly Powell Distinguished Senior Instructor of Finance (investment strategies, competitive analysis); academic director, Oregon Executive MBA. BS 1997, Bryant; MS, 2001, Oregon. (2001)

Ioannis Branikas, assistant professor (household finance, mutual funds). BA, 2010, MSc, 2012, Athens University of Economics and Business; MA, 2014, PhD, 2018, Princeton. (2018)

Maria Chaderina, assistant professor (capital structure, liquidity management, financial intermediation). BS, 2007, London; BS, 2007, Higher School of Economics; PhD, 2013, Carnegie Mellon. (2019)

John Chalmers, Abbott Keller Professor in Finance (household finance, municipal bond markets). BA, 1985, Middlebury; MS, 1992, PhD, 1995, Rochester. (1996)

Diane Del Guercio, Gerry and Marilyn Cameron Professor in Finance (corporate governance, institutional investors); senior associate dean, faculty affairs. BA, 1986, California, Santa Barbara; MA, 1989, PhD, 1994, Chicago. (1994)

Ali Emami, Bashaw Senior Instructor II of Finance (economics of the public accounting profession, international trade and finance). BS, 1972, National University of Iran; MS, 1980, Oregon; PhD, 1988, Oregon State. (1991)

Roberto Cruz Gutierrez Jr., associate professor (asset pricing, return anomalies). BS, 1992, Tulane; PhD, 1999, North Carolina, Chapel Hill. (2003)

Brandon R. Julio, associate professor (corporate investment, international finance). BA, 1998, Brigham Young; MS, 2001, South Carolina; MS, 2005, PhD, 2007, Illinois, Urbana-Champaign. (2014)

Scott Kerslake, James F. and Shirley J. Rippey Professor of Practice. BS, 1986, Boston. (2016)

Stephen B. McKeon, associate professor (corporate finance, behavioral finance); academic director, Cameron Center for Finance and Securities Analysis. BS, 2000, Oregon; MS, 2009, PhD, 2011, Purdue, West Lafayette. (2011)

Robert Ready, associate professor (asset pricing, commodities). BA, 2003, Carnegie Mellon; MS, 2008, PhD, 2011, Pennsylvania. (2017)

Zhi "Jay" Wang, associate professor (asset management, institutional investors); coordinator, doctoral program. BA, 1994, Peking (Beijing); MS, 1998, PhD, 2000, Iowa State; PhD, 2004, Michigan, Ann Arbor. (2012)

Michael Wismer, instructor (real estate). BA, 1970, MS, 1974, Brigham Young. (1996)

Youchang Wu, associate professor (asset pricing, corporate finance). BS, 1994, MS, 1996, Peking (Beijing); PhD, 2004, Vienna. (2015)

Emeriti

Larry Y. Dann, professor emeritus. BS, 1967, Northwestern; MBA, 1969, Harvard; PhD, 1980, California, Los Angeles. (1977)

Jerome J. Dasso, professor emeritus. BS, 1951, Purdue; MBA, 1952, Michigan; MS, 1960, PhD, 1964, Wisconsin, Madison. (1966)

Wayne H. Mikkelson, professor emeritus. BA, 1974, Macalester; MS, 1978, PhD, 1980, Rochester. (1984)

George A. Racette, associate professor emeritus. BA, 1966, Stanford; MBA, 1967, Michigan; PhD, 1972, Washington (Seattle). (1974)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Participating

Glen R. Waddell, professor (applied econometrics, industrial organization, labor economics). See **Economics**.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Bachelor of Arts in Business Administration

Course	Title	Credits	Milestones
First Year			
Fall			
BA 101	Introduction to Business		4
BA 199	Special Studies: [Topic] (Academic Residential Community or FIG seminar.)	Attend club fairs	1

MATH 111	College Algebra		4
Review the holistic requirements for admission to the major and establish a plan for developing these traits			
First term of first-year second-language sequence			5
Credits			14
Winter			
EC 201	Introduction to Economic Analysis: Microeconomics		4
Second term of first-year second-language sequence			5
			Use Career Services

Courses

FIN 199. Special Studies: [Topic]. 1-5 Credits.
Repeatable when the topic changes.

FIN 240. Survey of Real Estate. 4 Credits.

Basics of buying, selling, and leasing real estate. Overview of real estate law, commercial and residential brokerage, real estate financing, and real estate administration.

Not open to LCB majors or prebusiness majors with junior standing or above.

FIN 281. Personal Finance. 4 Credits.

Overview of lifetime personal financial strategies. Topics include financial goals and building net worth, major purchasing decisions, credit use, tax planning, retirement, and estate planning.

Not open to LCB majors, prebusiness majors with junior standing or above.

FIN 283. The Stock Market and Investing. 4 Credits.

Investments and the stock market, securities and approaches to security selection, portfolio composition and structure.

Not open to LCB majors, prebusiness majors with junior standing or above, or students who have credit for FIN 380.

FIN 311. Economic Foundations of Competitive Analysis. 4 Credits.

Analysis of market competition and its relation to product cost and pricing decisions by the firm. Students may receive credit for only one of EC 311, FIN 311, or FIN 311H.

Prereq: C- or better in BA 101, BA 240, EC 201, ACTG 211, ACTG 213, MATH 241.

FIN 311H. Economic Foundations of Competitive Analysis. 4 Credits.

Analyzes the competitive structure of markets and industries. Focuses on the relationships among cost, pricing strategy and economic profit in competitive environments. Students may receive credit for only one of EC 311, FIN 311, or FIN 311H.

Prereq: open only to students in the LCB honors program.

FIN 316. Financial Management. 4 Credits.

Corporate financial planning, selection among alternative investment opportunities, analysis of risk, funds acquisition, and long-term financing. Students cannot receive credit for both FIN 316 and FIN 316H.

Prereq: C- or better in BA 101, BA 240, EC 201, ACTG 211, ACTG 213, MATH 241.

FIN 316H. Financial Management. 4 Credits.

Covers the fundamental tools and concepts of finance, including the evaluation of investment opportunities and the relation between risk and return. Students cannot receive credit for both FIN 316 and FIN 316H.

Prereq: open only to students in the LCB honors program.

FIN 380. Financial Markets and Investments. 4 Credits.

Financial markets and security investment decisions, analysis of risk and return, portfolio policies for individual and institutional investors, financial instruments.

Prereq: FIN 316, OBA 330.

FIN 401. Research: [Topic]. 1-21 Credits.

Repeatable.

FIN 403. Thesis. 1-12 Credits.

Repeatable.

FIN 405. Special Problems: [Topic]. 1-12 Credits.

Repeatable.

FIN 406. Practicum: [Topic]. 1-12 Credits.

Repeatable.

FIN 407. Seminar: [Topic]. 4 Credits.

Repeatable.

FIN 409. Terminal Project. 1-12 Credits.

Repeatable.

FIN 410. Experimental Course: [Topic]. 1-4 Credits.

Repeatable when the topic changes.

Prereq: C- or better in FIN 316 or FIN 316H.

FIN 462. Derivative Markets and Financial Institutions. 4 Credits.

Valuation of financial derivatives, methodologies for identifying firms' risk exposures, the role of risk management and financial derivatives in corporate strategy, and analysis of financial institutions.

Prereq: FIN 316.

FIN 463. International Finance. 4 Credits.

Analysis of currency exchange rates, balance of payments; management of foreign exchange risk; risk and return in international investment.

Prereq: FIN 316.

FIN 464. Commercial Banking. 4 Credits.

Operation and pricing policies of a commercial bank, concentrating on management of institutions that take deposits and make loans and investments through the use of computer-simulated banking operations.

Prereq: FIN 316.

FIN 473. Financial Analysis and Valuation. 4 Credits.

Topics include working capital management, advanced capital budgeting, dividend policy, financing policy, business valuation, and corporate acquisitions.

Prereq: FIN 380.

FIN 503. Thesis. 1-16 Credits.

Repeatable.

FIN 510. Experimental Course: [Topic]. 1-4 Credits.

Repeatable when the topic changes.

FIN 562. Derivative Markets and Financial Institutions. 4 Credits.

Valuation of financial derivatives, methodologies for identifying firms' risk exposures, the role of risk management and financial derivatives in corporate strategy, and analysis of financial institutions.

Prereq: FIN 380 or FIN 612.

FIN 564. Commercial Banking. 4 Credits.

Operation and pricing policies of a commercial bank, concentrating on management of institutions that take deposits and make loans and investments through the use of computer-simulated banking operations.

FIN 601. Research: [Topic]. 1-16 Credits.

Repeatable.

FIN 603. Dissertation. 1-16 Credits.

Repeatable.

FIN 604. Internship: [Topic]. 1-9 Credits.

Repeatable.

FIN 605. Special Problems: [Topic]. 1-16 Credits.

Repeatable.

FIN 606. Practicum: [Topic]. 1-16 Credits.

Repeatable.

FIN 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

FIN 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

FIN 609. Terminal Project. 1-12 Credits.

Repeatable.

FIN 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable when the topic changes.

FIN 612. Fundamentals of Finance. 3 Credits.

Covers the fundamental theories and tools of financial analysis. Topics include valuation, capital budgeting, risk and return, market efficiency, and financial policies. Sequence with FIN 613.

FIN 613. Managerial Economics. 3 Credits.

Covers the fundamental theories and tools of economic and strategic analysis. Topics include demand and supply, pricing strategies, and perfect and imperfect competition. Sequence with FIN 612.

Prereq: FIN 612.

FIN 615. Quantitative Methods for Finance. 3 Credits.

Mathematical and statistical tools fundamental to financial analysis; measuring returns and risk, probability models, statistical inference, regression analysis, all with applications to finance.

FIN 617. Data Analysis in Finance. 3 Credits.

Programming for financial data analysis using popular languages; Back testing and developing algorithm trading strategies.

FIN 671. Corporate Finance and Valuation. 3 Credits.

Application of financial principles to problems of valuation, capital budgeting, and financial policy.

Prereq: FIN 612.

FIN 673. Advanced Topics in Corporate Finance. 3 Credits.

Cases dealing with financial analysis, working-capital management, valuation, and firm investment and financing decisions.

Prereq: completion of first-year M.B.A. core.

FIN 675. Fixed Income Securities. 3 Credits.

Theoretical, empirical, and institutional aspects of fixed-income securities and their derivatives; application of these tools to managerial decisions in other contexts.

Prereq: completion of first-year MBA core.

FIN 683. Concepts of Investments. 3 Credits.

Securities markets; risk-return characteristics of investment media; concepts of security analysis; investment and portfolio strategies of individual and institutional investors.

Prereq: completion of first-year M.B.A. core.

FIN 685. Alternative Investments. 3 Credits.

Covers alternative asset classes such as venture capital, private equity (LBO), commercial real estate, and cryptoassets. Focus on valuation methodologies, fund structures, and investment strategies.

Prereq: FIN 612.

FIN 687. Hedge Funds. 3 Credits.

Institutional features and trading strategies of the hedge fund industry; developing trading ideas, evaluating based on historical data or financial statements, and analyzing risk-return tradeoff.

Prereq: FIN 683.

Management

Anne Parmigiani, Department Head
Carolyn S. Chambers Professor of Management

Advising and Student Experience
 203 Peterson Hall

Department of Management courses prepare students for the challenges of managerial responsibility in private and public organizations. They are useful for students who want to develop general management skills that can be applied in a variety of contexts, ranging from new business startups to global businesses. Management courses also serve students

who are concentrating in other areas of business and who recognize the importance of developing management and leadership skills to enhance their chances for career advancement. Courses focus on such critical management and leadership skills as launching new business ventures, negotiation and conflict resolution, managing in dynamic and changing environments, and international management.

The entrepreneurship concentration prepares students for careers in entrepreneurially driven firms. Examples include new and rapidly growing firms, technology-oriented firms, and family businesses. Special attention is given to venture creation, the unique problems encountered by firms that are growing, and the way sound business principles and strategies can be adapted to fit this environment.

The department offers a concentration in entrepreneurship for the undergraduate major in business administration, a minor in business administration, a minor in entrepreneurship, a minor in sustainable business, Concentrations in Advanced Strategy, Innovation and Entrepreneurship, and Sustainable Business Practices for MBA students and a Ph.D.

Faculty

Eric Boggs, instructor; director, honors program. BA, 2001, Lewis and Clark College; MA, 2010, Pacific; MS, 2011, Oregon. (2017)

Kay Crider, instructor (business law, environmental law, litigation). BA, 1986, California; JD, 1989, Chicago-Kent College of Law. (2010)

Michael Crooke, Avamere Professor of Practice. BS, MBA, Humboldt State; PhD, 2008, Claremont Graduate. (2012)

Kathleen Dillon, instructor pro tem. BA, Occidental College; Master of Dispute Resolution, Straus Institute of Dispute Resolution; JD, Pepperdine. (2021)

Ralph A. Heidl, associate professor (collaborative networks, innovation management). MS, 1994, MS, 2000, Pennsylvania State; PhD, 2010, Washington (Seattle). (2015)

Greg Hennessy, instructor. BS, 1987, Houston; MS, 1989, California Institute of Technology; MS, 1993, Massachusetts Institute of Technology; PhD, 2021, Claremont. (2021)

Daniel Howard, instructor. BA, 1996, Ohio State; JD, 2000, California (2022)

Charles Kalnbach, senior instructor (generations in the workplace, Myers-Briggs type indicator). BA, 1991, Thomas Edison State; MS, 1995, Indiana, Bloomington; EdD, 2008, Nova Southeastern. (2003)

Lauren Lanahan, assistant professor (innovation, business policy, entrepreneurship). BA, 2006, Reed College; MA, 2013, PhD, 2015, North Carolina, Chapel Hill. (2015)

Nathan Lillegard, instructor (early-stage finance and operations, new venture development); interim director, Lundquist Center for Entrepreneurship. BA, 1998, MBA, 2006, Oregon. (2012)

Christopher Liu, associate professor (entrepreneurship, scientists, social influences). BA, 1997, Washington; PhD, 2005, Massachusetts Institute of Technology; DBA, 2010, Harvard. (2019)

Farhad Malekafzali, instructor (american institutions, international relations, comparative government). PhD, 1994, Wisconsin-Madison. (2012)

Alexander Murray, assistant professor (entrepreneurship, innovation, technology entrepreneurship). BS, 2011, Alabama; MS, 2012, Virginia; PhD, 2018, Washington. (2019)

Mohan Nair, instructor. BS, 1980, MS, 1982, Oregon. (2015)

Andrew Joel Nelson, associate professor (commercialization of university research, diffusion networks and network analysis); Randall C. Papé Chair in Entrepreneurship and Innovation; academic director, Lundquist Center for Entrepreneurship; associate vice president, entrepreneurship and innovation. BA, 1998, Stanford; MSc, 2000, Oxford; PhD, 2007, Stanford. (2008)

Amy Nuetzman, instructor. BA, 1997, Western Oregon; MA, 2000, New Mexico Highlands. (2019)

Anne Parmigiani, Tykeson Professor (firm capabilities, interfirm relationships). BS, 1987, MBA, 1996, Pennsylvania State; PhD, 2003, Michigan, Ann Arbor. (2004)

Michael V. Russo, professor (corporate policy and strategy, environmental management); academic director, Center for Sustainable Business Practices. BS, 1979, Columbia; MS, 1980, Stanford; MBA, 1986, PhD, 1989, California, Berkeley. (1989)

Steve Schmidt, instructor. BS, 1992, Oregon State; MBA, 2011, Northwest Christian. (2016)

Joshua Skov, instructor (life-cycle assessment, clean energy finance, carbon accounting). BA, 1992, Yale; MA, 1994, Washington (Seattle); MA, 1997, California, Berkeley. (2009)

Tina Starr, senior instructor (business management, expatriates). BSc, 2000, Derby; MSc, 2001, PhD, 2006, Nottingham. (2011)

Jeffrey J. Stolle, senior instructor (ethics, critical thinking). BA, 1990, St. Thomas (Minnesota); MA, 1994, Vanderbilt; PhD, 2001, Oregon. (2007)

David T. Wagner, associate professor (mood and emotion, sleep and work); coordinator, doctoral program. BS, 2002, MAcc, 2004, Brigham Young; PhD, 2009, Michigan State. (2014)

Ed Warnock, instructor. BS, 1968, Arizona; MA, 1993, Antioch. (2011)

Nicole L. Wilson, instructor (personality, individual differences, self-regulation). BA, 1999, MS, 2001, Oregon; PhD, 2008, Washington (Seattle). (2015)

Peter A. Younkin, assistant professor. BA, 1999, Columbia; PhD, 2010, California, Berkeley. (2018)

Emeriti

Warren B. Brown, professor emeritus. BS, 1955, Colorado; MS, 1957, Stanford; MS, 1959, PhD, 1962, Carnegie-Mellon. (1967)

Alan Downing Meyer, professor emeritus. BA, 1968, MBA, 1970, Washington (Seattle); PhD, 1978, California, Berkeley. (2009)

Peter K. Mills, professor emeritus. BS, 1970, MBA, 1971, California State, Long Beach; PhD, 1978, Stockholm; PhD, 1980, California, Irvine. (1995)

Richard T. Mowday, professor emeritus. BS, 1970, San Jose; MS, 1972, PhD, 1975, California, Irvine. (1977)

Richard M. Steers, professor emeritus. BA, 1967, Whittier; MBA, 1968, Southern California; PhD, 1973, California, Irvine. (1975)

James R. Terborg, professor emeritus; James H. Warsaw Academic Director, James H. Warsaw Sports Marketing Center. BA, 1970, Calvin; MS, 1972, Eastern Michigan; PhD, 1975, Purdue. (1980)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Bachelor of Arts in Business Administration

Course	Title	Credits	Milestones
First Year			
Fall			
BA 101	Introduction to Business	4	
BA 199	Special Studies: [Topic]	1	Attend study abroad
MATH 111	College Algebra	4	
First term of first-year second-language sequence		5	
Review the holistic requirements for admission to the major and establish a plan for developing these traits			
Credits		14	
Winter			
EC 201	Introduction to Economic Analysis: Microeconomics	4	Get involved in a club
Second term of first-year second-language sequence		5	Use Career Services
MATH 241	Calculus for Business and Social Science I	4	
WR 121	College Composition I	4	
Meet with a Lundquist Academic advisor to make a long-term plan			
Credits		17	
Spring			
EC 202	Introduction to Economic Analysis: Macroeconomics	4	
Third term of first-year second-language sequence		5	Consider the job shadow program
MATH 242	Calculus for Business and Social Science II	4	

WR 122 or WR 123	College Composition II or College Composition III	Attend the spring career fair	4
Credits			17
Total Credits			48

Course	Title	Credits	Milestones
Second Year			
Fall			
ACTG 211	Introduction to Accounting I	4	
MATH 243	Introduction to Methods of Probability and Statistics	4	Leadership role in club
First term of second-year second-language sequence		4-5	Learn Duck Connect
Social science course that also satisfies a multicultural requirement		4	
Meet an advisor regarding progress toward admission			
Credits		16-17	
Winter			
ACTG 213	Introduction to Accounting II	4	Prepare major application
Arts and letters course that also satisfies a multicultural requirement		4	
Second term of second-year second-language sequence		4-5	Complete a practice interview
General education course in science		4	
See Lundquist Peer Educator about informational interviews			
Credits		16-17	
Spring			
BA 240	Spreadsheet Analysis and Visualization	4	
General education courses in arts and letters		8	
Third term of second-year second-language sequence		4-5	Conduct informational interviews
Apply for business administration major within the first week of the term you are completing business premajor requirements			
Credits		16-17	
Total Credits		48-51	
Course	Title	Credits	Milestones

Courses

MGMT 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable when the topic changes.

MGMT 225. Introduction to Entrepreneurship. 4 Credits.

Understanding of the historical and socio-economic context of entrepreneurship and how entrepreneurial ecosystems function and grow; fundamentals of entrepreneurship and business model development.

MGMT 250. Introduction to Sustainable Business. 4 Credits.

Examination of the challenges and opportunities that the sustainability imperative presents to business. Focus on discussion of specific cases and pertinent issues to promote learning.

MGMT 311. Managing People in Organizations. 4 Credits.

Students learn the theories, empirical evidence, and best practices for managing people at work. Students cannot receive credit for both MGMT 311 and MGMT 311H.

Prereq: MATH 241 and BA 308 or BA 308H.

MGMT 311H. Managing People in Organizations. 4 Credits.

Students learn the theories, empirical evidence, and best practices for managing people at work. Students cannot receive credit for both MGMT 311 and MGMT 311H. Sophomore standing required.

Prereq: MATH 241 and BA 308 or BA 308H.

MGMT 335. Launching New Ventures. 4 Credits.

Skills, behaviors, and knowledge necessary for creating and growing new ventures. Evaluating opportunities, developing growth strategies, obtaining venture financing, intellectual property, and building a management team.

Prereq: BA 101.

MGMT 401. Research: [Topic]. 1-21 Credits.

Repeatable.

MGMT 405. Special Problems: [Topic]. 1-12 Credits.

Repeatable.

MGMT 406. Practicum: [Topic]. 1-12 Credits.

Repeatable.

MGMT 407. Seminar: [Topic]. 4 Credits.

Repeatable.

MGMT 409. Terminal Project. 1-12 Credits.

Repeatable.

MGMT 410. Experimental Course: [Topic]. 1-4 Credits.

Repeatable when the topic changes. Recent topics include Strategic Environmental Management, Technology and Innovation Management.

MGMT 415. Human Resources Management. 4 Credits.

Management of employee relations by an organization. Hiring and developing a productive work force in the context of the legal and competitive environment.

Prereq: MGMT 321 or MGMT 311.

MGMT 416. Organizational Development and Change Management. 4 Credits.

Organizational leaders face an accelerating pace of change in information technology, markets, and consumers. Focuses on how leaders create and sustain these organizational changes.

Prereq: BA 352, MGMT 321 or MGMT 311.

MGMT 417. Negotiation Strategies. 4 Credits.

Introduction to negotiation theory, distributive and integrative bargaining techniques, and alternative dispute resolution. Uses workshop format for in-class negotiation simulations.

Prereq: MGMT 321 or MGMT 311.

MGMT 420. Managing in a Global Economy. 4 Credits.

Economic, political and cultural challenges facing international managers. Topics include developing competitive global strategies and organizations, international negotiations, building strategic alliances, cross-cultural teams, and international staffing.

Prereq: MGMT 321 or MGMT 311.

MGMT 422. Sustainable Business Strategy and Implementation. 4 Credits.

Focus on strategic choice and implementation of initiatives to promote sustainability in business organizations. Exposure to approaches for both established companies and new ventures.

Prereq: BA 101, MGMT 250 or MGMT 311.

MGMT 443. Life Cycle Assessment. 4 Credits.

Build foundations in technical sustainability analysis serving business strategy and operations. Learn tools and skills for firm- and product-level analysis.

Prereq: BA 101, MGMT 250.

MGMT 455. Implementing Entrepreneurial Strategies. 4 Credits.

Fundamentals of entrepreneurship are applied to solve actual problems for real companies. Students will gain a thorough understanding of project management processes (agile, lean six sigma, sprints, etc.) and learn how to effectively execute a project from inception to final deliverable.

Prereq: ACTG 340, MGMT 335, MKTG 445.

MGMT 503. Thesis. 1-16 Credits.

Repeatable.

MGMT 510. Experimental Course: [Topic]. 1-4 Credits.

Repeatable when the topic changes. Recent topics include Strategic Environmental Management, Technology and Innovation Management.

MGMT 543. Life Cycle Assessment. 4 Credits.

Build foundations in technical sustainability analysis serving business strategy and operations. Learn tools and skills for firm- and product-level analysis.

MGMT 601. Research [Topic]. 1-16 Credits.

Repeatable.

MGMT 603. Dissertation. 1-16 Credits.

Repeatable.

MGMT 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

MGMT 606. Practicum: [Topic]. 1-16 Credits.

Repeatable.

MGMT 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

MGMT 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

MGMT 609. Terminal Project. 1-12 Credits.

Repeatable.

MGMT 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable when the topic changes. A recent topic is Sustainable Business Development.

MGMT 612. Managing Individuals and Organizations. 3 Credits.

Design of high-performance organizations and internal systems. Analysis of team dynamics and group decision-making. Study of individual cognitive and leadership styles.

MGMT 614. Strategic Management. 3 Credits.

Analysis of industries and companies, development of competitive and cooperative strategies, analysis of the special demands of alternative social, technological, and international contexts.

MGMT 615. Leadership. 3 Credits.

Development of skills managers need to be effective leaders in organizations, including communicating, problem-solving, influencing, motivating, delegating, and resolving conflict.

MGMT 620. Managing Global Business. 3 Credits.

Focuses on the problems of operating across multiple political and cultural boundaries. Possible topics include corporate strategy, the role of multinational corporations, and international joint ventures.

MGMT 623. Negotiation. 3 Credits.

Negotiation theory including distributive and integrative bargaining techniques, economic complements, game theory, and alternative dispute resolution. Extensive in-class negotiation simulations.

MGMT 625. New Venture Planning. 3 Credits.

Students identify and research a business opportunity; develop and present a professional start-up business plan that includes market, competitor, cash flow, and financial analyses.

MGMT 635. Opportunity Recognition. 3 Credits.

Introduces the fundamentals of entrepreneurship, providing the tools necessary to successfully identify a true opportunity and to start and develop a new organization. Open only to MBA and MActg majors.

MGMT 640. Sustainable Business Development. 3 Credits.

Focuses on corporate environmental management, drawing on economic and policy models, strategic analysis, and use of business cases. Issues facing small and mid-sized companies stressed.

MGMT 641. Industrial Ecology. 3 Credits.

Takes a systems approach to the design and manufacture of products and delivery of services with minimized ecological impact.

MGMT 645. New Venture Scaling. 3 Credits.

New Venture Scaling covers concepts and systems related to financial and operational challenges of scaling staff, activities, and sales and marketing efforts for rapid growth.

Prereq: MGMT 625, MGMT 635.

MGMT 655. New Venture Execution. 4 Credits.

This course guides students as they build and execute on their entrepreneurial ideas.

MGMT 690. Management Proseminar. 1 Credit.

Contemporary issues in management research. Includes visiting speakers, resident faculty members, and doctoral students discussing their research.

Marketing

T. Bettina Cornwell, Department Head

Academic Director, Warsaw Sports Marketing Center | Professor of Marketing | Philip H. Knight Chair

Advising and Student Experience
203 Peterson Hall

The Department of Marketing offers concentrations in marketing and sports business and supports the entrepreneurship concentration for the undergraduate major in business administration. It also offers a minor in sports business.

The marketing concentration provides preparation for careers in marketing management. Examples of such careers include advertising, social media, professional selling, distribution, and marketing research. Special attention is given to the contributions of the social sciences and of quantitative methods to the study of marketing. The program includes courses on marketing research and strategy, marketing communications, and consumer behavior.

The sports business concentration addresses the use of sports to market goods and services. The successful sports marketer must understand business principles and have a strong sense of how value is created through marketing programs tied to athletes, teams, leagues, and organizations. The concentration presents a rigorous academic curriculum in such areas as sponsorship, sports law, and communications while paying close attention to industry practices and trends. Students who choose this concentration prepare for careers in team marketing, sponsor relations, event marketing, and league operations.

At the graduate level, the department delivers the core marketing curriculum and supports the sports business (<https://business.uoregon.edu/mba/specializations/sports-business/>) and the entrepreneurship and innovation (<https://business.uoregon.edu/mba/specializations/innovation-entrepreneurship/>) specializations for the masters in business administration. The PhD in marketing focuses on consumer behavior, marketing communications, sports marketing, international marketing, and marketing strategy.

Faculty

Ashley Angulo, assistant professor (persuasion, charitable decision-making, psychological ownership). BA, 2010, Chicago; PhD, 2017, California. (2019) Joshua T. Beck, assistant professor (business strategy, international marketing). BA, 2007, California State; MS, 2012, PhD, 2014, Washington (Seattle). (2016)

John Clithero, assistant professor (computational modeling, decision making, consumer neuroscience, behavioral economics). BA, 2005, Pomona College; MA, 2007, PhD, 2011, Duke. (2018)

T. Bettina Cornwell, professor (advertising, corporate sponsorship), Judy and Hugh Oliphant Chair in Sports Business; academic director, James H. Warsaw Sports Marketing Center. BA, 1981, Florida State; MBA, 1983, PhD, 1988, Texas, Austin. (2010)

Yoav Dubinsky, instructor (sports marketing, place branding, public diplomacy). BA, 2006, MA, 2008, Tel Aviv; MA, 2011, Peloponnese; PhD, 2015, Tennessee. (2018)

Jessica Gamlin, assistant professor (consumer behavior, goals, instrumentality). BA, 2006, Pennsylvania; MBA, 2012, HEC Paris; PhD, 2019, Northwestern. (2019)

Joshua A. Gordon, senior instructor (strategy, consensus building); Woodard Foundation Fellow; faculty athletics representative. BA, 1995, Massachusetts, Amherst; MA, 2005, Massachusetts, Boston; JD, 2008, Suffolk. (2013)

Conor M. Henderson, assistant professor (marketing strategy). BA, 2008, Gonzaga; MS, 2010, PhD, 2013, Washington (Seattle). (2013)

Steffen Jahn, instructor (experiences in sports and event contexts, motivation in food and entrepreneurial decision making). MS, 2006; PhD, 2012, Chemnitz University of Technology. (2019)

Craig Leon, instructor. BS, 2007; MS, 2009, Ohio. (2015)

Noelle Nelson, assistant professor (information processing, working memory, brand logos, aesthetics in marketing). BS, 2006, PhD, 2012, Minnesota, Twin Cities. (2008)

Leah Schneider, senior instructor (marketing communications). BA, 2005, Brigham Young; PhD, 2017, York. (2015)

Utsav Shenava, instructor (advertising, brand strategy, marketing strategy, digital marketing). BS, 2008, NIT Calicut; MBA, 2014, Syracuse; MS, 2016, Purdue; Phd, 2019, Purdue. (2021)

Douglas L. Wilson, Peter and Molly Powell Distinguished Senior Instructor of Marketing (business plan development, marketing plan development). BS, 1978, Oregon State; MBA, 1990, Oregon. (1994)

Hong Yuan, associate professor (behavior economics, pricing); director, Business Research Institute; coordinator, doctoral program. BS, 1997, Fudan; MA, 2001, PhD, 2005, Michigan, Ann Arbor. (2013)

Jiao Zhang, associate professor (behavior decision theory, international marketing). BS, 1997, MS, 2000, Shanghai Jiao Tong; PhD, 2006, Chicago. (2014)

Emeriti

Gerald S. Albaum, professor emeritus. BA, 1954, MBA, 1958, Washington (Seattle); PhD, 1962, Wisconsin, Madison. (1969)

Roger J. Best, professor emeritus. BSEE, 1968, California State Polytechnic; MBA, 1972, California State, Hayward; PhD, 1975, Oregon. (1980)

Michael F. Dore, instructor emeritus (marketing, advertising); director, undergraduate honors. BS, 1971, MBA, 1972, Southern California. (1996)

Anne M. Forrestel, senior instructor emeritus. BA, 1972, Williams College; MS, 1974, MBA, 1985, Michigan, Ann Arbor. (1997)

Marian Friestad, professor emerita. BA, 1981, MA, 1984, PhD, 1989, Wisconsin, Madison. (1987)

Del I. Hawkins, professor emeritus. BBA, 1966, MBA, 1967, PhD, 1969, Texas. (1970)

Dennis Howard, professor emeritus. BS, 1966, Oregon; MS, 1968, Illinois; PhD, 1974, Oregon State. (1997)

Lynn R. Kahle, professor emeritus. BA, 1973, Concordia; MA, 1974, Pacific Lutheran; PhD, 1977, Nebraska. (1983)

Mark M. Phelps, senior instructor emeritus. BS, 1972, JD, 1975, MBA, 1980, Oregon. (1979)

Peter Wright, professor emeritus. BA, 1966, North Carolina State; MBA, 1968, Virginia; PhD, 1971, Pennsylvania State. (1997)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Bachelor of Arts in Business Administration

Course	Title	Credits	Milestones
First Year			
Fall			
BA 101	Introduction to Business	4	
BA 199	Special Studies: [Topic]	1	Attend study abroad and club fairs
MATH 111	College Algebra	4	
First term of first-year second-language sequence		5	
Review the holistic requirements for admission to the major and establish a plan for developing these traits			
Credits			14
Winter			
EC 201	Introduction to Economic Analysis: Microeconomics	4	Get involved in a club
Second term of first-year second-language sequence		5	Use Career Services
MATH 241	Calculus for Business and Social Science I	4	
WR 121	College Composition I	4	
Meet with a Lundquist Academic advisor to make a long-term plan			
Credits			17
Spring			
EC 202	Introduction to Economic Analysis: Macroeconomics	4	Access tutoring resources
Third term of first-year second-language sequence		5	Consider the job shadow program
MATH 242	Calculus for Business and Social Science II	4	
WR 122 or WR 123	College Composition II or College Composition III	4	Attend the spring career fair
Credits			17

Marketing Courses

MKTG 199. Special Studies: [Topic]. 1-5 Credits.
Repeatable when the topic changes.

MKTG 311. Marketing Management. 4 Credits.

Product, price, promotion, and distribution decisions in consumer and industrial markets. Market segmentation, product positioning for goods and services. Marketing strategy and management. Product life cycles. Students cannot receive credit for both MKTG 311 and MKTG 311H. Prereq: BA 240, BA 308.

MKTG 311H. Marketing Management. 4 Credits.

Explores marketing strategy and tactics for profit and nonprofit organizations including start-ups and global firms. Uses cases and projects; requires intense student participation. Students cannot receive credit for both MKTG 311 and MKTG 311H. Prereq: open only to students in the LCB honors program.

MKTG 390. Marketing Research. 4 Credits.

Design, implementation, analysis, interpretation, and reporting of research for marketing decisions. Hands-on experience with techniques for data collection, statistical data analysis, and communication of results. Prereq: MKTG 311.

MKTG 395. Marketing Analytics. 4 Credits.

Covers three pillars of analytics—descriptive, predictive, prescriptive—within the marketing context. Linear and logistic regression, clustering, customer choice, conjoint, natural language processing, and machine learning methods to drive marketing decisions. Prereq: MKTG 311 or BA 317.

MKTG 401. Research: [Topic]. 1-21 Credits.

Repeatable.

MKTG 405. Special Problems: [Topic]. 1-12 Credits.

Repeatable.

MKTG 406. Practicum: [Topic]. 1-12 Credits.

Repeatable.

MKTG 407. Seminar: [Topic]. 4 Credits.

Repeatable.

MKTG 409. Terminal Project. 1-12 Credits.

Repeatable.

MKTG 410. Experimental Course: [Topic]. 1-4 Credits.

Repeatable when the topic changes. Recent topics include Marketing and Sustainability, Sales Management and Personal Selling.

MKTG 420. Marketing Communications. 4 Credits.

Advertising, sales promotions, public relations, and personal selling. Emerging communication media. Legal regulations and ethical considerations in mass media advertising. Media planning and promotional budgets. Prereq: MKTG 311.

MKTG 435. Consumer Behavior. 4 Credits.

Applications of social science concepts to the understanding of consumers and to the optimal delivery of products and services. Prereq: MKTG 311.

MKTG 445. Entrepreneurial Marketing. 4 Credits.

Techniques for analyzing and developing new markets. Pricing, communicating, and distributing new products or services with limited resources. Developing marketing plans for new ventures. Prereq: MKTG 311 or BA 317, MGMT 335.

MKTG 470. International Marketing. 4 Credits.

Analysis and development of marketing strategy and tactics for multinational and global markets. Prereq: one from BA 317, MKTG 311, 311H.

MKTG 490. Marketing Strategy. 4 Credits.

Capstone marketing course. Primary focus on developing and implementing marketing strategies and determining their impact on customer satisfaction and profitability.

Prereq: MKTG 390; MKTG 420 or SBUS 452.

MKTG 503. Thesis. 1-16 Credits.

Repeatable.

MKTG 510. Experimental Course: [Topic]. 1-4 Credits.

Repeatable when the topic changes. A recent topic includes Marketing and Sustainability.

MKTG 601. Research: [Topic]. 1-16 Credits.

Repeatable.

MKTG 603. Dissertation. 1-16 Credits.

Repeatable.

MKTG 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

MKTG 606. Practicum: [Topic]. 1-16 Credits.

Repeatable.

MKTG 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

MKTG 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

MKTG 609. Terminal Project. 1-12 Credits.

Repeatable.

MKTG 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable when the topic changes. Recent topics include New Product Development, Brand Strategy.

MKTG 612. Marketing Management. 3 Credits.

Marketing Management addresses market analysis and segmentation, targeting, and positioning. Emphasis is on marketing strategies designed to deliver superior customer value and achieve organizational objectives.

MKTG 660. Marketing Research. 3 Credits.

Marketing research as a tool for decision-making. Planning research projects; design, measurement, experimental and nonexperimental techniques, analysis and interpretation of data; reporting research results.

Prereq: completion of first-year MBA core.

MKTG 665. Marketing Strategy. 3 Credits.

Relationship between marketing and other functional areas of a business. Emphasis on case analysis as a means of acquiring both planning and operational skills.

Prereq: completion of first-year MBA core.

MKTG 687. Theory and Research in Marketing Management. 3 Credits.

Application of marketing concepts and of economics, management science, and behavioral science to the management of the product, price, promotion, and distribution variables.

Prereq: doctoral standing.

MKTG 689. Theory and Research in Consumer Behavior. 3 Credits.

The applicability of behavioral theories and methodologies to the understanding of the consumption process.

Prereq: doctoral standing.

Sports Business Courses

SBUS 199. Special Studies: [Topic]. 1-4 Credits.

Repeatable. Recent topics include Sports, Business, and Society.

SBUS 250. Sports Business and Society. 4 Credits.

This course provides an interdisciplinary treatment of the intersection of sports business and society. It reviews the broader sociology of sport and the critical role sport has played on issues of gender and race both domestically and globally.

Prereq: BA 101.

SBUS 250N. Sports Business and Society. 4 Credits.

This course provides an interdisciplinary treatment of the intersection of sports business and society. It reviews the broader sociology of sport and the critical role sport has played on issues of gender and race both domestically and globally.

Prereq: BA 101.

SBUS 255. The Business of the Olympic Games. 4 Credits.

An introduction to the contemporary global business model of the Olympic Games including finance economic impact, sales, sponsorship, media technology, government relations, sustainability regional impact, socio-political context, diversity inclusion.

SBUS 401. Research: [Topic]. 1-4 Credits.

Repeatable up to three times for a total of 16 credits.

SBUS 405. Special Problems: [Topic]. 4 Credits.

Repeatable three times for a maximum of 16 credits.

SBUS 406. Practicum: [Topic]. 1-4 Credits.

Repeatable three times for a maximum of 16 credits.

SBUS 407. Seminar: [Topic]. 4 Credits.

Repeatable up to three times for a total of 16 credits.

SBUS 409. Terminal Project. 1-12 Credits.

Repeatable.

SBUS 410. Experimental Course: [Topic]. 1-4 Credits.

Repeatable up to three times for a total of 16 credits.

SBUS 450. Sports Marketing. 4 Credits.

Essentials of effective sports marketing. Includes research, segmentation, product development, pricing, licensing, and communication channels such as advertising, sales promotion, and publicity.

Prereq: MKTG 311.

SBUS 452. Sports Sponsorship. 4 Credits.

Detailed consideration of the relationship between sports and corporate sponsorship programs. Focuses on alignment marketing, sponsor value, and sponsorship evaluation.

Prereq: MKTG 311 or 311H.

SBUS 453. Law and Sports Business. 4 Credits.

Core legal principles across the sports business spectrum to improve risk and strategic management capabilities, competitive advantage, and critical negotiations.

Prereq: MKTG 311 or 311H.

SBUS 455. Financing Sports Business. 4 Credits.

Revenue sources for sports organizations. Includes conventional sources (e.g., tax support, bonds, ticket, media, concession sales) and innovations (e.g., initial public offerings, seat licenses, naming rights).

Prereq: MKTG 311 or 311H.

SBUS 456. Sports Brand Management. 4 Credits.

An integrative course that supports skills development for success in managing sports-related businesses and brands. It utilizes critical thinking, creative imagining and professional writing in developing capabilities used in businesses aligned with or in sports.

Prereq: BA 101.

SBUS 510. Experimental Course: [Topic]. 1-4 Credits.

Repeatable up to three times for a total of 16 credits.

SBUS 601. Research: [Topic]. 1-4 Credits.

Repeatable up to three times for a total of 16 credits.

SBUS 605. Reading: [Topic]. 1-4 Credits.

Repeatable.

SBUS 606. Practicum: [Topic]. 1-9 Credits.

Repeatable three times for a maximum of 16 credits.

SBUS 607. Seminar: [Topic]. 1-4 Credits.

Repeatable up to five times.

SBUS 608. Workshop: [Topic]. 1-4 Credits.

Repeatable up to three times for a total of 16 credits.

SBUS 609. Terminal Project. 1-12 Credits.

Repeatable.

SBUS 610. Experimental Course: [Topic]. 3 Credits.

Repeatable. A recent topic is Sports Product Branding, Product Line Management.

SBUS 645. Sports Product. 3 Credits.

Examines the companies and organizations of the international sports product industry: manufacturing innovation, company management, branding, retail and wholesale.

SBUS 650. Marketing Sports Properties. 3 Credits.

Examines essentials of effective sports marketing. Includes product or property development, legal aspects, segmentation, pricing, and communication channels (e.g., broadcast media).

Prereq: completion of first-year M.B.A. core.

SBUS 652. Sports Sponsorship Alliances. 3 Credits.

Detailed consideration of the relation between sports, law, and corporate sponsorship programs. Focuses on alignment marketing issues, strategic communication through sponsorship, sponsor value, and sponsorship valuation.

Prereq: completion of first-year MBA core.

SBUS 653. Legal Aspects of Sports Business. 3 Credits.

Examines social responsibility and legal concepts in sports management including constitutional regulatory powers, individual participation rights, drug testing, antitrust, labor rights, intellectual property rights, sponsorships, product and event liability.

SBUS 655. Economic Aspects of Sports. 3 Credits.

Comprehensive coverage of traditional and innovative revenue methods available to sports organizations from public and private sources.

Detailed consideration of venue-based income sources (e.g., premium seating, permanent seat licenses).

Prereq: completion of first-year MBA core.

Operations and Business Analytics

Michael Pangburn, Department Head
Ehrman V. Guistina Professor of Operations and Business Analytics

Advising and Student Experience
 203 Peterson Hall

The curriculum in the Department of Operations and Business Analytics (OBA) prepares students with a solid foundation in operations and data-analytics principles. Understanding analytics and how to manage

business operations are essential to the success of all managers in today's business environment. The OBA concentration is therefore not only appropriate for students interested in supply chain management, sourcing, and logistics, it is also well-suited for business analysts, consultants, and general managers.

Courses offered by the OBA department cover a range of operations and business analytics topics including project management, database systems, predictive modeling (in R), python data analytics, and supply chain management. The department offers a concentration in operations and business analytics for the undergraduate major in business administration; a specialization in operations and business analytics for MBA students; and a Ph.D. in operations management.

Faculty

Eren B. Çil, associate professor (game theory, queueing theory); coordinator, doctoral program. BS, 2004, Middle Eastern Technical; MS, 2006, Koç; PhD, 2010, Northwestern. (2010)

Kraig Delana, assistant professor (queueing theory, game theory, optimization). BS, 2008, Kettering; MSc, 2010, Michigan; PhD, 2019, London Business School. (2019)

Erik Ford, instructor (information technology). BS, 2013, MBA, 2015, Oregon. (2015)

Ming Jin, instructor (operations management, business analytics, supply chain management). BE, 2001, Shanghai Jiao Ton University; MS, 2005 Brigham Young; MS, 2007, Columbia; PhD, 2016, Utah. (2017)

Nagesh N. Murthy, Roger Engemann Professor in Business Administration (call center industry, health-care operations). BE, 1982, MMS, 1983, Birla Institute of Technology and Science; MS, 1988, MA, 1994, PhD, 1997, Ohio State. (2003)

Michael S. Pangburn, Ehrman V. Giustina Professor (retail operations, pricing models, product line design). BS, 1990, Virginia Polytechnic Institute and State Univ. MS, 1993, PhD, 1997, Rochester. (2002)

Pradeep Pendem, assistant professor (large-scale data-driven operational analytics, retail and productivity). BE, 2006, Andhra; MTech, 2008, Indian Statistical Institute; MS, 2015, PhD, 2018, North Carolina, Chapel Hill. (2018)

Saeed Piri, assistant professor (business and data analytics, machine learning). BS, 2008, Amirkabir University of Technology; MS, 2011, Sharif University of Technology; PhD, 2017, Oklahoma State. (2018)

Behrooz Pourghannad, assistant professor (health care and operations analytics). BS, 2008, Azad University; MA, 2003, Sabanci University (Turkey); MA, MA, 2005, Michigan; PhD, 2019, Minnesota.

Yasamin Vahdati, instructor (empirical strategy, CEO and CMO activism). BSc, 2009, Azad; MBA, 2013, Mazandaran University of Science and Technology; PhD, 2019, Oklahoma State. (2020)

Zhibin "Ben" Yang, associate professor (operations management, supply-chain risk management). BS, 1994, Southwest Jiaotong; MS, 2002, Arizona State; PhD, 2009, Michigan. (2009)

Fang Yin, senior instructor (business value of IT, electronic commerce). BA, 1992, Peking (Beijing); PhD, 2002, Texas, Austin. (2008)

Emeriti

Sergio G. Koreisha, professor emeritus. BA, 1974, ME, 1975, California; DBA, 1980. Harvard. (1980)

James E. Reinmuth, professor emeritus. BA, 1963, Washington, Seattle; MS, 1965, PhD, 1969, Oregon State. (1967)

Larry E. Richards, associate professor emeritus. BA, 1962, MBA, 1963, Washington (Seattle); PhD, 1969, California, Los Angeles. (1966)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Courses

OBA 199. Special Studies: [Topic]. 1-5 Credits.
Repeatable when the topic changes.

OBA 311. Business Analytics I. 4 Credits.

Explores standard protocols for describing and modeling business information and processes; techniques for designing management information systems; criteria for analyzing firms' implementations of information technology. Students cannot receive credit for both OBA 311 and OBA 311H. Sophomore standing required.
Prereq: C- or better in BA 101, BA 240, EC 201, MATH 241, MATH 243.

OBA 311H. Business Analytics I. 4 Credits.

Explores standard protocols for describing and modeling business information and processes; techniques for designing management information systems; criteria for analyzing firms' implementations of information technology. Students cannot receive credit for both OBA 311 and OBA 311H. Sophomore standing required.
Prereq: C- or better in BA 101, BA 240, EC 201, MATH 241, MATH 243. Open only to students in the LCB honors program.

OBA 312. Business Analytics II. 4 Credits.

Computer-aided business applications of hypothesis testing, simple linear regression. Introduction to multiple regression and nonparametric techniques. Blocked and completely randomized one- and two-factor experimental designs. Students cannot receive credit for both OBA 312 and OBA 312H. Sophomore standing required.
Prereq: C- or better in OBA 311 or equivalent.

OBA 335. Operations Management. 4 Credits.

Concepts and applications of operations management. Use of information technology in operations. Topics include forecasting, quality, supply chain management, information systems in operations management, and planning and scheduling. Students cannot receive credit for both OBA 335 and OBA 335H. Sophomore standing required.
Prereq: C- or better in BA 101, BA 240, EC 201, MATH 241, MATH 243.

OBA 335H. Operations Management. 4 Credits.

Concepts and applications of operations management. Use of information technology in operations. Topics include forecasting, quality, supply chain management, information systems in operations management, and planning and scheduling. Students cannot receive credit for both OBA 335 and OBA 335H. Sophomore standing required.
Prereq: BA 101, BA 240, EC 201, MATH 241, MATH 243. Open only to students in the LCB honors program.

OBA 401. Research: [Topic]. 1-21 Credits.

Repeatable.

OBA 403. Thesis. 1-6 Credits.

Repeatable.

OBA 405. Special Problems: [Topic]. 1-12 Credits.

Repeatable.

OBA 406. Practicum: [Topic]. 1-12 Credits.

Repeatable.

OBA 407. Seminar: [Topic]. 1-4 Credits.

Repeatable.

OBA 409. Terminal Project. 1-12 Credits.

Repeatable.

OBA 410. Experimental Course: [Topic]. 1-4 Credits.

Repeatable when the topic changes. Recent topics include Service Operations, Business Analytics, Analyzing Big Data.

OBA 444. Business Database Management Systems. 4 Credits.

Techniques for structuring and storing business data; primary focus on relational database theory, with applied skills for business users, including data warehouses, reporting, and normalization.
Prereq: OBA 340 or OBA 340H.

OBA 455. Data Driven Predictive Modeling. 4 Credits.

Introduction to basics of programming and fundamentals of predictive modeling.

Prereq: OBA 312 or MATH 345M.

OBA 466. Project and Operations Management Models. 4 Credits.

Frameworks and solutions for managing complex projects and operations; implementing optimal strategies for producing profitable new products and services in the competitive global business environment.

Prereq: OBA 335 or 335H.

OBA 477. Supply-Chain Operations and Information. 4 Credits.

Strategic and tactical issues pertaining to the distribution and delivery of products and services. Methodologies and systems for designing, tracking, and managing complex global operations.

Prereq: OBA 335 or 335H.

OBA 503. Thesis. 1-16 Credits.

Repeatable.

OBA 510. Experimental Course: [Topic]. 1-4 Credits.

Repeatable when the topic changes. Recent topics include Service Operations, Business Analytics, Analyzing Big Data.

OBA 544. Business Database Management Systems. 4 Credits.

Techniques for structuring and storing business data; primary focus on relational database theory, with applied skills for business users, including data warehouses, reporting, and normalization.

Prereq: all MBA core courses.

OBA 555. Data Driven Predictive Modeling. 4 Credits.

Introduction to basics of programming and fundamentals of predictive modeling.

OBA 566. Project and Operations Management Models. 4 Credits.

Frameworks and solutions for managing complex projects and operations; implementing optimal strategies for producing profitable new products and services in the competitive global business environment.

Prereq: all MBA core courses.

OBA 577. Supply-Chain Operations and Information. 4 Credits.

Strategic and tactical issues pertaining to the distribution and delivery of products and services. Methodologies and systems for designing, tracking, and managing complex global operations.

Prereq: all MBA core courses.

OBA 601. Research: [Topic]. 1-16 Credits.

Repeatable.

OBA 603. Dissertation. 1-16 Credits.

Repeatable.

OBA 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

OBA 606. Practicum: [Topic]. 1-16 Credits.

Repeatable.

OBA 607. Seminar: [Topic]. 1-3 Credits.

Repeatable.

OBA 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

OBA 609. Terminal Project. 1-12 Credits.

Repeatable.

OBA 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable when the topic changes.

OBA 612. Quantitative Methods for Managers. 3 Credits.

Concepts and techniques of analytic decision making, sampling and statistical inference, and regression analysis.

OBA 613. Operations Management. 3 Credits.

Overview of the managerial issues associated with production and delivery of goods and services. Includes the use of quantitative modeling and several case studies in operations.

Accounting

The Lundquist College of Business offers BS and BA degrees in accounting. Accounting students embark on careers in an exciting and prestigious profession pursuing positions in public accounting firms, industry, and government. Accounting majors will complete a set of ten upper-division core courses and seven specific accounting courses.

Code	Title	Credits

- The 400-level courses are typically taken in the senior year. Upper-division accounting credits applied toward the major must be taken at the Lundquist College. Exceptions require explicit approval from the accounting department head.
- Students pursuing the certified public accountant (CPA) designation are required to take additional course work prior to sitting for the Certified Public Accountant Examination.

3 + 1 Accounting Pathway (Concurrent Degree Program)

The 3+1 Accounting Pathway is an accelerated program for accounting majors, an opportunity for qualified incoming freshman students interested in accounting to complete within four years the bachelor's degree in accounting concurrently with the master of accounting degree. Through an evaluation of college-ready credits (e.g., Advanced Placement and International Baccalaureate programs), high-achieving students are fast-tracked for admission to the Lundquist College of Business one full year before their contemporaries. Students in this

program may complete their undergraduate degree in three years, with the fourth year used to complete the master of accounting program. Students must submit applications for admission to the 3+1 Accounting Pathway by October 31 of the fall trimester of their freshman year.

For more information, visit the website (<https://business.uoregon.edu/master-accounting/>). For application information, visit the admissions website (<https://business.uoregon.edu/ug/majors/accounting/3-1/application-instructions/>).

Business Administration

The Lundquist College of Business offers BS and BA degrees in business administration. All students who are successfully admitted to the major will complete a set of ten upper-division core courses and seven additional electives. Business administration majors can choose to pursue a general business degree or select to concentrate in one of five areas: entrepreneurship, finance, marketing, operations and business analytics, and sports business.

Business Premajor Courses

In addition, international students are required to take Academic English for International Students (AEIS) courses or produce English language proficiency test scores (575 on the TOEFL paper-based test, 89 on the TOEFL internet-based test, or 7.0 in the IELTS).

Upper-division core courses typically are completed during junior year.

Courses

BA 101. Introduction to Business. 4 Credits.

Historical, social, political, economic, and legal environments within which business operates. Interrelationships of the functional areas of management, finance, marketing, accounting, and international studies.

BA 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable when the topic changes.

BA 215. Accounting: Language of Business Decisions. 4 Credits.

How the accounting model reflects business transactions or events. Interpretation and analysis of financial statements. Understanding cost and revenue information, organization, and decisions. Prereq: BA 101.

BA 240. Spreadsheet Analysis and Visualization. 4 Credits.

Data-oriented approaches for structuring and analyzing information, with applications in the traditional functional areas of business, emphasizing modern techniques for developing fact-based decision models.

BA 252. Global Perspectives in Business. 4 Credits.

An interdisciplinary introduction to what it means to participate in a global economy, critically reflecting on globalization, the impacts of business activity, human rights, global finance, marketing, and management. Also explores concepts and skills in intercultural communication and working with others from around the world.

BA 308. Leadership and Communication. 4 Credits.

Personal leadership and communication skills. Focuses on self-awareness for leading, persuading, and working with others; effective business writing and speaking; and team development. Students may not receive credit both BA 308 and BA 308H. Sophomore standing required. Prereq: C- or better in BA 101; WR 122 or WR 123.

BA 308H. Leadership and Communication. 4 Credits.

Personal leadership and communication skills. Focuses on self-awareness for leading, persuading, and working with others; effective business writing and speaking; and team development. Students may not receive credit both BA 308 and BA 308H. Open only to students in the LCB Honors Program.

Prereq: C- or better in BA 101; WR 122 or WR 123.

BA 315. Economy, Industry, and Competitive Analysis. 4 Credits.

Free enterprise capitalism and market competition. Economic value added, product cost, and product pricing. Organizational arrangements and the control of economic activity.

Prereq: BA 101.

BA 316. Management: Creating Value through People. 4 Credits.

Management systems for planning, controlling, organizing, and leading; how they influence human behavior in organizations. Selecting, training, retaining, and motivating the human resource in organization.

Prereq: BA 101.

BA 317. Marketing: Creating Value for Customers. 4 Credits.

Market analysis, target customer identification, and development of marketing-mix strategies to deliver superior customer value and contribute to the performance of the organization.

Prereq: BA 101.

BA 318. Finance: Creating Value through Capital. 4 Credits.

Financial statement analysis, pro forma statements and capital budgeting, time value of money, net present-value analysis, risk and cost of capital.

Prereq: BA 101; BA 215 or ACTG 211.

BA 325. Business Law and Ethics. 4 Credits.

Legal and ethical environments of business, including U.S. legal concepts, social and environmental impacts of business, and ethical decision making.

Prereq: C- or better in BA 101; WR 122 or WR 123.

BA 361. Cross-Cultural Business Communication. 4 Credits.

Theoretical and practical approach to value dimensions across cultures and their impact on communication in business and professional contexts. Develops intercultural business communication skills.

Prereq: WR 121 recommended.

BA 365. Cross-Cultural Negotiation. 4 Credits.

Theory and practice of negotiating effectively across cultures. Research and analysis of culturally specific models for negotiating and experience using those models in cross-cultural simulations.

Prereq: WR 121 recommended.

BA 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

BA 400M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

BA 404. Internship: [Topic]. 1-4 Credits.**BA 406. Practicum: [Topic]. 1-12 Credits.**

Repeatable.

BA 407. Seminar: [Topic]. 1-4 Credits.**BA 410. Experimental Course: [Topic]. 1-4 Credits.**

Repeatable when the topic changes.

BA 453. Business Strategy and Planning. 4 Credits.

Capstone course focusing on strategy formulation and decisional processes. Includes writing a business plan that applies knowledge and develops course of action to accomplish organizational objectives. Students cannot receive credit for both BA 453 and BA 453H.

Prereq: completion of 300-level business core courses, senior standing.

BA 453H. Business Strategy and Planning. 4 Credits.

Provides conceptual tools for in-depth strategic analysis and interactive discussions from sources relevant to the challenge of developing and implementing strategy. Students cannot receive credit for both BA 453 and BA 453H.

Prereq: completion of 300-level business core courses, senior standing. Open only to students in the LCB honors program;

BA 510. Experimental Course: [Topic]. 1-4 Credits.

Repeatable when the topic changes.

BA 601. Research: [Topic]. 1-16 Credits.

Repeatable.

BA 604. Internship: [Topic]. 1-9 Credits.

Repeatable.

BA 605. Reading and Conference: [Topic]. 1-16 Credits.

BA 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

BA 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

BA 610. Experimental Course: [Topic]. 1-6 Credits.

Repeatable when the topic changes.

BA 661. Oregon Advanced Strategy. 3 Credits.

Examines advanced strategic analysis in corporate setting and integrates multidisciplinary values such as sustainability, product-service excellence, cultural values, financial strength, advanced marketing, entrepreneurial thinking, customer relationship management, big data analytics. This course is taught through the C-level practitioner's perspective.

Prereq: MGMT 614.

BA 705. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

BA 707. Seminar: [Topic]. 1-6 Credits.

Repeatable.

BA 708. Workshop: [Topic]. 1-16 Credits.

Repeatable.

BA 710. Experimental Course: [Topic]. 1-9 Credits.

Repeatable.

BA 711. Legal Environment of Business. 3 Credits.

Analysis of government policy and the legal environment in which business operates; the effects of law, government policy, and social forces on the formulation of business strategy and decision-making.

BA 712. Financial Accounting and Reporting. 3 Credits.

Preparation, interpretation, and use of external financial statements and reports. Covers basic accounting principles, recording and reporting techniques underlying valuation and income determination.

BA 713. Data and Business Decisions. 3 Credits.

Integrates statistical tools for analyzing business data and covers process analysis, data collection, regression, statistical control, and forecasting.

BA 714. Managerial Accounting. 3 Credits.

Introduction to cost accounting terminology; costing strategies, nontraditional costing systems, activity-based costing and product-service costing applications.

BA 715. Managerial Economics. 3 Credits.

Covers micro- and macroeconomic analyses and the concepts of cost, demand, profit, and competition. Examines monetary and fiscal policy, the Federal Reserve System, and money and capital markets.

BA 716. Managing Organizations. 2 Credits.

Organizations as complex social systems; leadership; managing individuals, groups, and teams; formal and informal processes and systems.

BA 717. Marketing Management. 3 Credits.

Examines marketing analysis and planning necessary to develop marketing plans and strategies for a product-line. Includes basic marketing concepts and philosophies and brief exposure to macromarketing strategies. Sequence with BA 719.

BA 718. Financial Analysis. 4 Credits.

Covers objectives, tools, methods, and problems of financial management. Includes fund acquisitions, dividend policy, capital acquisitions, taxes, mergers, and investment banking. Sequence with BA 720.

BA 719. Marketing Strategy. 3 Credits.

Marketing strategies for product-service introduction, growth, maturity, and decline; managing product-service innovation and development; brand equity, relationship marketing. Sequence with BA 717.

BA 720. Corporate Financial Strategy. 3 Credits.

Advanced topics in firm evaluation (e.g., acquisitions, restructuring) and financial risk management (e.g., hedging, derivatives, foreign projects) as related to global and domestic corporate strategies. Sequence with BA 718.

BA 721. Business Writing. 1 Credit.

Reviews the theory and practice of writing effectively for U.S. and international business audiences, addressing the use of rhetorical, cultural, and organizational analysis to create persuasive business documents.

BA 722. Leadership and Motivation: [Topic]. 1 Credit.

LEAD is the leadership foundation course that runs across the entire first year. The instructors and 2nd year students lead the in-class discussions of a variety of leadership topics. Topics include elements of motivation and leadership that affect management decision-making and problem-solving. Repeatable twice for a maximum of 3 credits.

BA 723. Formulating Corporate Strategy. 3 Credits.

Focuses on how corporations choose to compete. Covers the analytical techniques and planning models appropriate for making this fundamental decision.

BA 725. Implementing Corporate Strategy. 3 Credits.

Uses problems and cases to examine the implementation of corporate strategy, the strategy process and cycle, and implementation methods. Sequence with BA 723.

BA 726. Global Business. 3 Credits.

Examines global competition and strategy, regional economic integration, cross-cultural challenges, foreign market entry, international joint ventures and strategic alliances, international dimensions in functional areas of business.

BA 727. Operations Management. 3 Credits.

Examines methods and processes for providing a competitive advantage through continuous quality and process improvements, supplier management, and efficient production of goods and services.

BA 729. Business Negotiation. 3 Credits.

Explores the major theories and concepts of negotiation. Opportunities to practice deal-making and conflict resolution. Encourages improvement in communication and persuasion.

BA 730. Business Ethics. 1 Credit.

Studies the derivation of values and the application of those values to individual choices. Emphasizes the conflict manager's experience when choosing between two alternatives.

BA 731. New Venture Planning. 3 Credits.

Students identify and research a business opportunity; develop and present a professional start-up business plan that includes market, competitor, cash flow, and financial analyses.

BA 732. Technology and Innovation Management. 3 Credits.

Exposes students to the dynamics of industries driven by technological innovation, and focuses on thinking strategically about technological innovation and new product development and deployment.

BA 735. Opportunity Recognition. 3 Credits.

Provides students with techniques and models to identify and develop new opportunities and manage innovation processes.

BA 736. Alliances and Acquisitions. 3 Credits.

Using alliances and acquisitions as a strategic tool; emphasis on value creation. Includes deal valuation, deal-making, due diligence, integration, and ecosystem development. Builds on negotiation, strategy, and finance courses.

BA 740. Capstone Business Project I. 1 Credit.

Focuses on integration of functional areas of business. Includes writing a plan that applies knowledge and develops a course of action to accomplish organizational objectives. First in a series for 2yr OEMBA students.

Entrepreneurship Concentration for Business Majors

The entrepreneurship concentration prepares students for careers in entrepreneurially driven firms. Examples include new and rapidly growing firms, technology-oriented firms, and family businesses. Special attention is given to venture creation, the unique problems encountered by firms that are growing, and the way sound business principles and strategies can be adapted to fit this environment.

Concentration: Entrepreneurship

Code	Title	Credits
MGMT 335	Launching New Ventures	4
ACTG 340	Accounting for Entrepreneurs	4
MKTG 445	Entrepreneurial Marketing	4
MGMT 455	Implementing Entrepreneurial Strategies	4
Total Credits		16

Finance Concentration for Business Majors

The finance concentration is designed to impart an understanding of the principles of finance and to provide students with analytical training. Courses on financial institutions and markets, financial management, and investments provide an understanding of the application of financial analysis to the solution of business problems.

Concentration in Finance

Code	Title	Credits
FIN 380	Financial Markets and Investments	4
FIN 473	Financial Analysis and Valuation	4

Select two of the following:

FIN 462	Derivative Markets and Financial Institutions	
FIN 463	International Finance	
FIN 464	Commercial Banking	

3 + 1 Finance Pathway (Concurrent Degree Program)

The 3 + 1 Finance Pathway is an opportunity for qualified incoming freshman students interested in finance to complete both a bachelor of arts degree and a master of science in finance degree in four years.

Through an evaluation of college-ready credits—e.g., the Advance Placement (AP) and International Baccalaureate programs—these high-achieving students are fast-tracked for admission to the Lundquist College of Business one full year before their contemporaries. Students in this program may complete their undergraduate degree (bachelor of arts in accounting, business administration, or economics) in three years, with the fourth year used to complete the master's degree.

For more information, visit the website (<https://business.uoregon.edu/ug/concentrations/finance/3-1/>).

Marketing Concentration for Business Majors

The marketing concentration provides preparation for careers in marketing management. Examples of such careers include advertising, professional selling, distribution, and marketing research. Special attention is given to the contributions of the social sciences and of quantitative methods to the study of marketing. The concentration's curriculum includes courses on marketing research and strategy, marketing communications, and consumer behavior.

Concentration: Marketing

Code	Title	Credits
MKTG 390	Marketing Research	4
MKTG 420	Marketing Communications	4
MKTG 435	Consumer Behavior	4
MKTG 490	Marketing Strategy	4

Operations and Business Analytics Concentration for Business Majors

The operations and business analytics concentration (formerly known as ISOM) is designed for students who want to prepare for a career in applied statistics, operations management, management information systems, or a management career with a strong emphasis in these areas. Students are introduced to the major concepts and techniques of analytic decision-making, information technology, supply-chain operations, and e-business.

Concentration: Operations and Business Analytics

OBA 466	Project and Operations Management Models	4
OBA 477	Supply-Chain Operations and Information	4

Sports Business Concentration for Business Majors

The sports business concentration addresses the use of sports to market goods and services. The successful sports marketer must understand business principles and have a strong sense of how value is created through marketing programs tied to athletes, teams, leagues, and organizations. The concentration presents a rigorous curriculum in such areas as sponsorship, sports law, and communications while paying close attention to industry practices and trends. Students are prepared for careers in team marketing, sponsor relations, event marketing, and league operations.

SBUS 453	Law and Sports Business	

Minor in Business Administration

The minor in business administration is open to students from all majors other than business administration, accounting, and general social science with a concentration in applied economics, business, and society. Completing the minor requires 24 credits of course work, which can be completed in one academic year.

Students may declare a minor in business administration online at the college's website, where a checklist of requirements can be found. Advising assistance is available in the Office of Undergraduate Advising.

Twelve upper-division credits must be taken in the Lundquist College of Business. Upper-division business courses must be taken for letter grades. Students must earn a C– or better in all courses taken for a letter grade to fulfill minor requirements. When minor requirements have been completed and notification of application for a degree has been received from the Office of the Registrar, the student is cleared for the minor.

Business Administration Minor

All professions and organizations, public and private, operate according to business principles. Earning a minor in business administration prepares students to participate in organizational conversations and become leaders within their future professions. The minor in business administration is open to students from all majors other than

business administration, accounting, and general social science with a concentration in applied economics, business, and society. Completing the minor requires 24 credits of course work, which can be completed in one academic year.

Students may declare a minor in business administration online at the college's website, where a checklist of requirements can be found. Advising assistance is available in the Office of Undergraduate Advising.

BA 316	Management: Creating Value through People	4
BA 317	Marketing: Creating Value for Customers	4
BA 318 or FIN 316	Finance: Creating Value through Capital ³ Financial Management	4

¹ Must be taken before the other required minor courses.

² Must be taken before Finance: Creating Value through Capital (BA 318)

³ Financial Management (FIN 316) may be substituted by economics majors who have maintained a 3.00 GPA

Minor in Entrepreneurship

The minor in entrepreneurship is intended for nonbusiness students who want to learn about innovation processes and the managerial and leadership skills required to create a new venture. The entrepreneurship minor gives students the opportunity to envision, develop, test, and build a for-profit or nonprofit venture working within an interdisciplinary framework of exploration and self-discovery.

The minor in entrepreneurship is open to students from all majors except business administration, accounting, and general social science with a concentration in applied economics, business, and society. Completing the minor requires 24 credits of course work, which can be completed in one academic year.

Students may declare a minor in entrepreneurship online at the college's website (<https://business.uoregon.edu/ug/minors/entrepreneurship/>), where a checklist of requirements can be found. Advising assistance is available in the Office of Undergraduate Advising.

¹ It is possible to earn more than one minor within the Lundquist College of Business. However, for students earning more than one business-related minor, no more than three courses can be used to satisfy multiple business minors. Please see an advisor for more details.

Minor in Sports Business

The sports business minor develops skills in teamwork, writing, and oral communications with an emphasis on providing core business competencies to those pursuing sports industry–related careers. The minor is intended to provide baseline business skills and knowledge to students who are not intending to pursue a sports business career per se, but rather are pursuing sports-related professional paths in which business acumen is a supporting skill (e.g., sports journalist, sports psychologist, sportswear designer).

Sports Business Minor

The sports business minor develops skills in teamwork, writing, and oral communications with an emphasis on providing core business competencies to those pursuing sports industry–related careers. The minor is intended to provide baseline business skills and knowledge to students who are not intending to pursue a sports business career per se, but rather are pursuing sports-related professional paths in which business acumen is a supporting skill (e.g., sports journalist, sports psychologist, sportswear designer). The minor in sports business is open to students from all majors except business administration, accounting, and general social science with a concentration in applied economics, business, and society. Completing the minor requires 24 credits of course work, which can be completed in one academic year.

Students may declare a minor in sports business online at the college's website (<https://business.uoregon.edu/ug/minors/sports-business/>), where a checklist of requirements can be found. Advising assistance is available in the Office of Undergraduate Advising.

Twelve upper-division credits must be taken in the Lundquist College of Business. Upper-division business courses must be taken for letter

grades. Students must earn a C– or better in all courses taken for a letter grade to fulfill minor requirements. When minor requirements have been completed and notification of application for a degree has been received from the Office of the Registrar, the student is cleared for the minor.

Global Business Certificate

Our global certificates give students from all majors the preparation needed to accept a job internationally and appreciate the different cultural values, economies, and communication styles of our vast and varied business world. The Certificate in Global Business is for those who want to be prepared to accept a job internationally and appreciate the different cultural values, economies, and communication styles of our vast and varied business world and is open to students in all University of Oregon majors. Upon successful completion of an approved plan, students will receive their certificate in addition to their diploma. Applications can be submitted to an academic advisor.

To receive a Certificate in Global Business, students must complete a total of 36 credits (must include 24 upper division credits) with 12 credits at the 400 level. Of the 12 400-level credits, 8 are included in the

international business core. The remaining 4 credits must be planned as part of the area studies.

Code	Title	Credits
International Business Core:		
BA 101	Introduction to Business	4
BA 252	Global Perspectives in Business	4
MGMT 420	Managing in a Global Economy	4
MKTG 470	International Marketing	4
Area Study/Global Systems/Cross Cultural Competencies ¹		20
Total Credits		36

¹ Area study requirements consist of 20 credits of coursework that relate to an international theme with at least 4 credits at the 400 level. This must be approved by an advisor in the Lundquist College of Business. Area studies coursework must include at least two department prefixes. Usually this theme will be geographically-based, focusing on a region such as Latin America, North Africa, or Europe. Other themes that are not geographic may be submitted for approval; for example global systems, cross cultural competencies, and macro level international forces (such as globalization). Four credits of second year second language can be used toward this requirement. Literature or cultural studies courses taught in a second language may be applied to the area studies. Only 4 credits of business course work can be used in this category and must be pre-approved.

Second Language or Pre-Approved Study Abroad/International Internship Program

Second language requirements are two years of university-level foreign language study that complements your area study theme. University equivalency rules apply in this situation. Studying or interning abroad can be done in lieu of second year language, but the program must be pre-approved by an advisor in the Lundquist College of Business.

Oregon MBA

302 Peterson Hall
Lillis Business Complex
541-346-3306
541-346-0073 fax

The Charles H. Lundquist College of Business MBA degree embodies the college's emphasis on interdisciplinary study, experiential learning, research excellence, and a supportive learning environment.

True to this interdisciplinary focus, the MBA curriculum consists of five tracks: advanced strategy and leadership, innovation and entrepreneurship, finance and securities analysis, sports business, and sustainable business practices. Building on a common core of foundational courses in accounting, decision sciences, finance, management, marketing, and operations and business analytics, students choose one of these curricular tracks when applying to the program.

Four of the tracks of the MBA curriculum are aligned with the college's centers—the Lundquist Center for Entrepreneurship, the Cameron Center for Finance and Securities Analysis, the Center for Sustainable Business Practices, and the James H. Warsaw Sports Marketing Center. The

centers not only promote research collaboration among faculty members from different departments but they also facilitate student interactions with industry professionals and provide practical, real-world learning opportunities. These include internships, business planning ventures, competitions, and one- or two-term consulting projects in the second year.

Strong faculty involvement and the state-of-the-art facilities of the Lillis Business Complex create an ideal learning environment. An emphasis on group work ensures that students get to know one another and their instructors well. In addition, a strong cohort model aids in developing solid working relationships and strong friendships. Finally, students may choose to enhance their international education by studying abroad in the summer on the Engaging Asia tour.

Virtually all MBA students come to the university with work experience; the average is four years. About one-third are women; two thirds hold a nonbusiness bachelor's degree; and one-sixth are international students. The program draws students from across the United States and 12 to 15 countries.

Two years of full-time study are needed to earn the minimum of 76 credits required for the degree. See the website (<https://business.uoregon.edu/executive-mba/>) for more information and admission requirements.

Accelerated Program

The accelerated master's degree program is intensive, allowing outstanding undergraduate majors in business, economics, or students of the science, technology, engineering, and mathematics (STEM) curriculum from an accredited institution to earn an MBA degree in nine or 15 months by taking 15 courses (a minimum of 45 credits) in three or four terms. Applicants should have a strong overall academic record and significant full-time work experience. Students choose one of the five tracks listed above. See the website (<https://business.uoregon.edu/mba/degree-programs/accelerated/>) for more information.

Program Requirements

- Oregon MBA application (<https://business.uoregon.edu/mba/admissions/>) (statement of purpose, two professional recommendations, résumé)
- University of Oregon Division of Graduate Studies application
- GMAT or GRE scores
- Transcripts
- Proof of English language proficiency (TOEFL, IELTS, PTE scores) for applicants whose native language is not English

Executive MBA

109 NW Naito Parkway
Portland, Oregon 97209
503-412-3777
oemba@uoregon.edu (oemba@oemba.uoregon.edu)

The University of Oregon offers the two-year Oregon Executive Master of Business Administration (OEMBA) Program for employed mid- to senior-level executives. Classes are held in Portland every other week. In addition to meeting standard admission criteria, applicants to this program must have substantial managerial experience and corporate sponsorship. Courses are open only to students who apply and are admitted to this program. For more information, visit the website (<https://business.uoregon.edu/executive-mba/>). For admission criteria and deadlines, visit the admissions website (<https://business.uoregon.edu/mba/admissions/>).

Sports Product Management

109 NW Naito Parkway
Portland, Oregon 97209
503-412-3777
uospm@uoregon.edu

The degree program leading to a master of science in sports product management is designed for experienced professionals looking to advance their careers by learning about the design and manufacture of sports-related products. Students learn from leading industry professionals in the sports and outdoor product industry, while instructors and guest speakers bring a wealth of real-world experience to the classroom. A 50-member advisory board of senior industry executives continually shape the content and direction of the program to align with industry needs. The curriculum is available online or full-time. For more information, visit the website (<https://business.uoregon.edu/spm/masters/>). For admission criteria and deadlines, visit the admissions website (<https://business.uoregon.edu/spm/apply/>).

Master of Science in Finance

302G Peterson Hall
Lillis Business Complex
541-346-8925
msfinfo@uoregon.edu

The master of science in finance is a 12-month degree program with an emphasis on valuation and asset management designed for students who recently graduated with majors in science, technology, engineering, mathematics, business, economics, or equivalent subjects.

The curriculum is designed to provide students with insights from the most advanced theoretical and empirical research in finance while attending quarterly professional development seminars. Through the UO's Cameron Center for Finance and Securities Analysis, students have the opportunity to practice securities analysis and portfolio management in a live environment with access to the Pacific Northwest's financial, banking, and investment industry.

Program Requirements

The program requires an undergraduate degree in science, technology, engineering, mathematics, business, economics, or equivalent subjects. Applications are evaluated holistically; this includes the essay, recommendations, and list of experience—not merely test scores and grades.

The following accomplishments fit the profile for a typical master of finance student:

- GMAT score of 620, GRE score of 310 (not the minimum requirements)
- grade point average of 3.20 on a four-point scale (not the minimum requirement)
- a four-year undergraduate degree

Course Requirements

Students complete the program in 12 months (four terms). The curriculum consists of six core courses plus electives, totaling a minimum of 45 credits. The plan of study for the electives is determined by the student and the program director.

Visit the college's master of science in finance website (<https://business.uoregon.edu/ms-finance/>) for more information.

Master of Science in Finance

The MSF curriculum totals a minimum of 45 credits, allowing students to complete the degree in 12 months (four quarters).

The program consists of six required courses - including a capstone practicum and a quarterly seminar - along with 13 available electives. Emphasis is on valuation and asset management. The required core courses have no pre-requisites for MSF students. The program will coordinate with industry partners to design such real-world projects as security analysis, portfolio allocation, risk management, and valuation of corporate investment projects or startups.

Master of Accounting

Robin P. Clement, Director

308A Peterson Hall
541-346-3295

The master of accounting is designed for students whose undergraduate major is accounting or the equivalent. The program is constructed so that it can be completed in three terms (one academic year) of full-time study. The curriculum is designed to sharpen written and oral communication, leadership, critical thinking, and analytical skills that are needed to excel in the accounting profession.

Program Requirements

The program requires an undergraduate degree in accounting or the equivalent. Five core accounting courses, two accounting electives, five general business or other graduate electives, and two one-credit seminars titled Developing the Business Professional are required. A four-day orientation in September is also required, and an optional half-day mini-orientation in June is optional.

Master of Accounting Course Requirements

Code	Title	Credits

PhD Program

Lundquist College of Business
PhD Program
1208 University of Oregon
Eugene, OR 97403-1208
398C Anstett
541-346-3251
phdinfo@uoregon.edu

The PhD program in business at the University of Oregon develops scholars who will take their places at leading colleges and universities throughout the world. Students must demonstrate the ability to create knowledge through original research in their areas of specialization.

Linda Krull, Director

393D Anstett Hall
541-346-3252

Faculty expertise focuses on federal income taxation, disclosure of financial information, and use of accounting information in corporate governance

The student's program must satisfy the requirements of the Graduate School and the following requirements of the Lundquist College of Business.

The doctoral program requires four to five years of work while in residence on the Eugene campus.

PhD Degree Requirements

Code	Title	Credits
Nine doctoral courses ¹		
Five or more graduate-level statistics courses ²		
Three graduate-level economics, mathematics, or behavioral science courses ³		

- ¹ The department specifies the courses. At least three courses must be taken at the University of Oregon after admission to the doctoral program.
- ² Grades of mid-B or better are required; none of these courses may be taken pass/no pass. These courses may be taken outside the Lundquist College of Business. At least three courses must be completed at the university after admission to the doctoral program.
- ³ Courses in these areas of study are subject to final approval by the student's advisory committee and the director of doctoral programs. Each course used to meet this area requirement must be passed with a grade of mid-B or better, and at least two courses must be completed at the university after admission to the doctoral program.

Competence in Specialty

Students are expected to master the literature and techniques in their area of concentration, prepare to write an acceptable dissertation, and perform high-quality research. Competence is demonstrated by passing a departmental written comprehensive examination and by successfully completing one or more required research papers. The department specifies the number of required papers. To be eligible to take a comprehensive examination, students must have completed most of the course work required in the area.

Competence in Statistics and Research Methods

If the department requires an examination in statistics and research methods, it is administered and graded by a committee that includes at least two operations and business analytics faculty members appointed by the director of doctoral programs.

Examinations

Students must pass one written comprehensive examination in their area of concentration. Examinations are graded *high pass*, *pass*, or *no pass*. For examinations given in separate and predesignated parts, the grade may apply to each subpart. All grades are outright; a conditional pass is not permitted.

In the event of failure, a student may be allowed to retake a comprehensive examination or predesignated subpart one time, at the discretion of the department in which the student is majoring. Normally, the examination or predesignated subpart should be retaken during the term following the initial attempt, but it may be taken no sooner than two months after the initial attempt. Failure to pass the comprehensive examination or a subpart on the second attempt results in automatic termination from the PhD program.

Advancement to Candidacy

The student is advanced to candidacy for the PhD degree after satisfying the preceding requirements and upon recommendation by his or her advisory committee to the Lundquist College of Business and to the Graduate School. Advancement must occur no later than three years after the student's entry into the doctoral program.

Dissertation

The student must complete a dissertation embodying the results of research and showing evidence of originality and ability in independent investigation. The dissertation must show mastery of the literature and techniques, be written in creditable literary form, and make a contribution to knowledge.

The student is responsible for formation of a dissertation committee, subject to approval by the Lundquist College of Business and the Graduate School of the university. This committee includes at least three regular faculty members of the college and at least one member from outside the college. The chair of the committee serves as the student's primary dissertation advisor. Before the dissertation topic is accepted by the dissertation committee, the student makes an oral presentation and defense of the research proposal and design. When the topic is accepted by the committee, a copy of the proposal, signed as approved by the committee, is placed in the candidate's file.

The dissertation must be completed within four years of the student's advancement to candidacy. Upon petition to and approval by the PhD program committee and the Graduate School, this period may be extended for one year. Failure to complete the dissertation within this time period invalidates the student's comprehensive examinations and advancement to candidacy. The student must successfully defend the completed dissertation in a public oral examination and defense before the dissertation committee.

The student's program must satisfy the requirements of the Graduate School and the following requirements of the Lundquist College of Business.

The doctoral program requires four to five years of work while in residence on the Eugene campus.

PhD Degree Requirements

Code	Title	Credits
	Nine doctoral courses ¹	
	Five or more graduate-level statistics courses ²	
	Three graduate-level economics, mathematics, or behavioral science courses ³	
¹	The department specifies the courses. At least three courses must be taken at the University of Oregon after admission to the doctoral program.	
²	Grades of mid-B or better are required; none of these courses may be taken pass/no pass. These courses may be taken outside the Lundquist College of Business. At least three courses must be completed at the university after admission to the doctoral program.	
³	Courses in these areas of study are subject to final approval by the student's advisory committee and the director of doctoral programs. Each course used to meet this area requirement must be passed with a grade of mid-B or better, and at least two courses must be completed at the university after admission to the doctoral program.	

Competence in Specialty

Students are expected to master the literature and techniques in their area of concentration, prepare to write an acceptable dissertation, and perform high-quality research. Competence is demonstrated by passing a departmental written comprehensive examination and by successfully completing one or more required research papers. The department specifies the number of required papers. To be eligible to take a comprehensive examination, students must have completed most of the course work required in the area.

Competence in Statistics and Research Methods

If the department requires an examination in statistics and research methods, it is administered and graded by a committee that includes at least two operations and business analytics faculty members appointed by the director of doctoral programs.

Examinations

Students must pass one written comprehensive examination in their area of concentration. Examinations are graded *high pass*, *pass*, or *no pass*. For examinations given in separate and predesignated parts, the grade may apply to each subpart. All grades are outright; a conditional pass is not permitted.

In the event of failure, a student may be allowed to retake a comprehensive examination or predesignated subpart one time, at the discretion of the department in which the student is majoring. Normally, the examination or predesignated subpart should be retaken during the term following the initial attempt, but it may be taken no sooner than two months after the initial attempt. Failure to pass the comprehensive examination or a subpart on the second attempt results in automatic termination from the PhD program.

Advancement to Candidacy

The student is advanced to candidacy for the PhD degree after satisfying the preceding requirements and upon recommendation by his or her advisory committee to the Lundquist College of Business and to the

Graduate School. Advancement must occur no later than three years after the student's entry into the doctoral program.

Dissertation

The student must complete a dissertation embodying the results of research and showing evidence of originality and ability in independent investigation. The dissertation must show mastery of the literature and techniques, be written in creditable literary form, and make a contribution to knowledge.

The student is responsible for formation of a dissertation committee, subject to approval by the Lundquist College of Business and the Graduate School of the university. This committee includes at least three regular faculty members of the college and at least one member from outside the college. The chair of the committee serves as the student's primary dissertation advisor. Before the dissertation topic is accepted by the dissertation committee, the student makes an oral presentation and defense of the research proposal and design. When the topic is accepted by the committee, a copy of the proposal, signed as approved by the committee, is placed in the candidate's file.

The dissertation must be completed within four years of the student's advancement to candidacy. Upon petition to and approval by the PhD program committee and the Graduate School, this period may be extended for one year. Failure to complete the dissertation within this time period invalidates the student's comprehensive examinations and advancement to candidacy. The student must successfully defend the completed dissertation in a public oral examination and defense before the dissertation committee.

The focus is financial economics applied to financial management, financial institutions and markets, and includes course work in microeconomics, statistics, and econometrics. Specializations are corporate finance, corporate governance, managed portfolios and institutional investors, empirical asset pricing.

The student's program must satisfy the requirements of the Graduate School and the following requirements of the Charles H. Lundquist College of Business.

The doctoral program requires four to five years of work while in residence on the Eugene campus.

For more information, visit the website (<https://business.uoregon.edu/phd/concentrations/finance/>).

Failure to complete the dissertation within this time period invalidates the student's comprehensive examinations and advancement to candidacy. The student must successfully defend the completed dissertation in a public oral examination and defense before the dissertation committee.

Grade Point Average (GPA)

The student must maintain a cumulative GPA of 3.00 or higher in graduate courses.

Termination from Program

A student's participation in the PhD program may be terminated under one or more of the following conditions:

- failure to make satisfactory progress toward advancement to candidacy
- a GPA below 3.00 for two consecutive terms
- failure to complete a dissertation within four years after advancement to candidacy

The decision to terminate will be made by the director of the PhD program after consultation with the PhD coordinator and faculty members of the department in which the student is majoring.

A student dropped from the program is notified in writing, with reasons for termination clearly explained, and a copy of the letter is placed in the student's file. The student has the right to appeal the termination decision by submitting a petition to the senior associate dean for academic affairs.

Waivers

Waiver of any of the above requirements is permitted only in exceptional instances and with the approval of the candidate's program committee, the PhD program committee, and the director of PhD programs. Under no circumstances can requirements of the Graduate School be waived by the Lundquist College of Business.

PhD Degree Requirements

Code	Title	Credits
Core Courses ¹		
	Three econometrics and advanced statistics-probability courses	
	Four optimization method courses	
	Three foundations of economic analysis courses	
	Two advanced mathematical tool courses	
Supporting Courses		
	Four courses from among accounting, finance, marketing, statistics, operations management, microeconomics, and linear algebra ²	

¹ Students are required to take at least twelve core courses passed with grades of B– or better; none of these courses may be taken pass/no pass. They may be taken outside the Lundquist College subject to the approval of the faculty advisor. At least eight courses must be completed at the UO after admission to the doctoral program.

² Courses must be passed with a grade of mid-B or better. At least two courses must be completed at the UO after admission to the doctoral program.

Advancement to Candidacy

Students are advanced to candidacy for the PhD degree after satisfying the preceding requirements and upon recommendation by their advisory committee to the Lundquist College of Business and to the Division of Graduate Studies. Advancement must occur no later than three years after the student's entry into the doctoral program.

Examinations

Students must pass one written comprehensive examination in their primary area. Examinations are graded high pass, pass, or no pass. For examinations given in separate and predesignated parts, the grade may apply to each subpart. All grades are outright; a conditional pass is not permitted.

In the event of failure, a student may be allowed to retake a comprehensive examination or predesignated subpart one time, at the discretion of the department in which the student is majoring. Typically, the examination or predesignated subpart should be retaken during the term following the initial attempt, but it may be taken no sooner than two months after the initial attempt. Failure to pass the comprehensive examination or a subpart on the second attempt results in automatic termination from the PhD program.

Dissertation

The student must complete a dissertation embodying the results of research and showing evidence of originality and ability in independent investigation. The dissertation must show mastery of the literature and techniques, be written in creditable literary form, and make a contribution to knowledge.

The student is responsible for formation of a dissertation committee, subject to approval by the Lundquist College of Business and the Division of Graduate Studies of the university. This committee includes at least three regular faculty members of the college and at least one member from outside the college. The chair of the committee serves as the student's primary dissertation advisor. Before the dissertation topic is accepted by the dissertation committee, the student makes a public oral presentation and defense of the research proposal and design. When the topic is accepted by the committee, a copy of the proposal, signed as approved by the committee, is placed in the candidate's file.

The dissertation must be completed within four years of the student's advancement to candidacy. Upon petition to and approval by the PhD program committee and the Division of Graduate Studies, this period may be extended for one year. Failure to complete the dissertation within this time period invalidates the student's comprehensive examinations and advancement to candidacy. The student must successfully defend the completed dissertation in a public oral examination and defense before the dissertation committee.

Grade Point Average (GPA)

The student must maintain a cumulative GPA of 3.00 or higher in graduate courses.

Termination from Program

A student's participation in the PhD program may be terminated under one or more of the following conditions:

- failure to make satisfactory progress toward advancement to candidacy
- a GPA below 3.00 for two consecutive terms
- failure to complete a dissertation within four years after advancement to candidacy

The decision to terminate will be made by the director of the PhD program after consultation with the PhD coordinator and faculty members of the department in which the student is majoring.

A student dropped from the program is notified in writing, with reasons for termination clearly explained, and a copy of the letter is placed in the student's file. The student has the right to appeal the termination decision by submitting a petition to the senior associate dean for academic affairs.

College of Design

Adrian Parr, Dean

541-346-3631

105 Lawrence Hall

A unique academic ecosystem, the College of Design includes not only creative practitioners—artists, architects, and designers—but also social scientists, humanities scholars, engineers, economists, biologists, planners, and policy makers. Using diverse methods, we are asking critical questions and tackling complex problems. The college (founded in 1914 and formerly known as the School of Architecture and Allied Arts) has degree programs in both Eugene and Portland.

The College of Design comprises three schools and one independent department:

- School of Architecture and Environment
- School of Art and Design
- School of Planning, Public Policy and Management
- Department of the History of Art and Architecture

Programs

Undergraduate students may major in architecture; art (which includes nine media areas); art and technology; history of art and architecture; interior architecture; landscape architecture; planning, public policy and management; and product design. In addition, the college offers minors in most of those areas.

Graduate degree programs offered include architecture, art, art history, community and regional planning, historic preservation, interior architecture, landscape architecture, nonprofit management, public administration, public affairs, and sports product design. Several graduate certificate programs are also available including arts management, museum studies, and nonprofit management. Visit the College of Design website (<https://design.uoregon.edu>) for the latest information.

In addition, the college offers advanced study opportunities in architecture, historic preservation, product design, and sports product design at the University of Oregon in Portland, located at the historic White Stag Block. Research initiatives in urban design, housing, historic preservation, energy studies, lighting, mass timber, and design are led by faculty members in partnership with area professionals, governmental leaders, and nonprofit agencies.

Admission

Admission to a major or a minor, degree requirements, and course offerings are described in the department sections of the College of Design website (<https://design.uoregon.edu>). First-year students and transfer students must meet University of Oregon requirements for admission to College of Design departments and programs. Work submitted for transfer credit must be approved by the major department. Please note that some majors have several application cycles a year and some invite current students to apply to the major on a rolling admission cycle.

Student Services

Academic and Career advisors in the College of Design provide comprehensive academic advising and robust help with identifying

career goals, finding internships, and setting job-search strategies. Career advising services also encompass job counseling, professional mentoring, group presentations, workshops, job fairs, and several career symposiums.

Technology and Facilities

Students in the College of Design learn to explore new ideas through a combination of traditional methods and experimental techniques. The college provides access to a full array of computing applications through its instructional and research laboratories located in Eugene and Portland. A technical staff maintains these resources as well as shared large-scale color plotters and high-resolution printers along with special studio shops. Technical support is available through Information Services, College of Design Technology Services, and informal peer consulting. Lecture rooms, studios, classrooms, and review rooms are networked (wired and wireless) to support instructional technology on Windows and Macintosh operating system workstations. The university provides server accounts for e-mail and web pages and maintains a high-speed computer network.

Facilities include classrooms, studio spaces, fabrication laboratories, workshops, galleries, the Design Library, and the Urban Farm.

Research, Scholarship, and Creative Work

Faculty members in the architecture, design, and planning fields are active in professional practices, design competitions, and theoretical studies. Faculty members in the arts participate nationally and internationally in exhibitions of their creative work.

The College of Design faculty participates in many of the university's interdisciplinary research centers, institutes, and initiatives including the Center for Art Research, Center for Latino and Latin American Studies, Fuller Center for Productive Landscapes, Institute for Health in the Built Environment, Institute for Policy Research and Engagement, Pacific Northwest Just Futures Institute for Racial and Climate Justice, Sustainable Cities Initiative, and Urbanism Next, among others.

Premajors and Nonmajors

Many courses are open to majors outside of the College of Design or to students who are exploring their major options. The college offers a range of general-education, group-satisfying courses as well as courses that satisfy multicultural requirements. In addition, students may access art and art and technology studio offerings as nonmajors, provided they have completed the appropriate course prerequisites. Courses are subject to change but may include the following:

The Study of Architecture

Architectural Education

Students of architecture learn how to make physical changes to their surroundings that enhance the quality of the built environment and their community's experience of life. Within this broad purpose, architectural study and practice include the tasks of providing shelter and environmental protection, providing appropriate settings for human activities, and creating forms that are aesthetically pleasing and supportive of social well-being. In the context of rapid urbanization, climate change, transforming economies, emerging technologies, growing inequalities, and other challenges, the potential impact and value of architectural design has never been greater.

Because interdisciplinary collaboration is key to the practice of architecture, the Department of Architecture shares classes and facilities with the Interior Architecture Program and the Department of Landscape Architecture in Eugene and the Historic Preservation Program in

Portland, all units within the College of Design's School of Architecture and Environment.

A central part of education in the field of architecture is the design studio, where students learn by doing—hands-on application of knowledge and skills toward the design of buildings. This type of learning is demanding, and students are expected to stay motivated and work independently and responsibly toward program and course objectives. In the design studio, continuous evaluation and response are the basic learning modes.

The department sets high standards for student performance. Advanced students often work together in courses and as collaborators with faculty members in research investigations through independent-study courses.

Preparation

Architecture is an inclusive art, bringing together a variety of disciplines. Students should prepare themselves in the following fields:

1. Social sciences
2. Natural sciences
3. Humanities
4. Fine arts

Students are also encouraged to travel and broaden their experiences related to environmental design.

Guest Instructors, Lecturers, and Critics

The Department of Architecture has an extensive program of visiting instructors, lecturers, and critics who are brought to the school each year. The program includes the Pietro Belluschi Distinguished Visiting Professor in Architectural Design.

Careers

Although most students prepare for professional registration and internship with practicing architects, others choose careers in allied fields such as construction management, environmental policy development, urban and community planning, architectural programming, and facilities management.

Accreditation

In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes three types of degrees: the bachelor of architecture, the master of architecture, and the doctor of architecture. Doctor of architecture and master of architecture degree programs may consist of a preprofessional undergraduate degree and a professional graduate degree that, when earned sequentially, constitute an accredited professional education. However, the preprofessional degree is not, by itself, recognized as an accredited degree.

At the University of Oregon, both the bachelor of architecture (BArch) and the master of architecture (MArch) degree programs are accredited by NAAB. The next accreditation review for these programs is 2021.

The post-professional master of science in architecture (MS) degree program and the PhD degree program are not accredited. Admission to these programs is restricted to applicants who already hold a NAAB-accredited degree or the international equivalent.

The Architecture Curriculum

The professional curriculum in architecture has two principal objectives:

1. broad inquiry into the integrative nature of environmental design and
2. a comprehensive professional education that develops the ability to design built environments ranging from intimate personal spaces to cities.

Curriculum requirements are published in the *UO Catalog* and in the department's online curriculum guides, which include sample course sequences. Grading policies, an explanation of how students' progress is monitored through the program, and other advising information is available through the online Student Handbook. Academic advising is offered through the College of Design's Student Services and the School of Architecture and Environment's professional advisor. Students are encouraged to consult their advisor for specific information.

Professional Curriculum

The professional curriculum of the bachelor of architecture (BArch) program and the master of architecture (MArch) programs, Track I and Track II, include required architectural design studios and architectural subject courses. In addition, each program's curriculum is supplemented by professional electives.

Architectural Design

The architectural design studio is a social and interactive workplace where students work cooperatively with their peers under the guidance of faculty members with frequent input from practicing architects and experts as well as representatives of communities served by the studio's design explorations. Through design projects, students learn to respond to complex environmental and cultural contexts through the exploration of architectural form. Introductory studios emphasize creativity, design communication skills, and critical thinking fundamental to the design process; intermediate studios emphasize integration of architectural subjects with design; advanced studios emphasize comprehensive integration of these elements. Student performance in all design studios is graded on a pass/no pass basis and evaluated through final reviews, written evaluations, and exit interviews with faculty members.

Design credit may be earned only through participation in design studios. BArch and MArch Track I students are required to complete 64 design studio credits. MArch Track II students are required to complete 40 design studio credits.

Architectural Subjects

Subject courses develop theory, knowledge, and skills in architecture and related disciplines, with an emphasis on learning architectural subjects in the context of design. This course work develops design skills and examines the influences of place, human activity, spatial order, structure, construction, environmental control, professional practice, and history on the practice of architecture.

Residence Requirements

For transfer students to earn the bachelor of architecture or master of architecture degree, the following minimum course work must be successfully completed in residence:

Code	Title	Credits
ARCH 485/585	Advanced Architectural Design I	8
ARCH 486/586	Advanced Architectural Design II	8

Design: two additional terms of architectural design	12
Architecture subjects	30
Upper-division, writing-intensive, general electives that delve into the literature of academic subjects outside the subject areas of architecture and interior architecture (undergraduates only)	16

Leave of Absence

University Policy

Graduate students should see the Continuous Enrollment statement in the **Division of Graduate Studies** section of this catalog. Undergraduate students should contact the UO admissions office to learn how withdrawal from the university affects residency status.

Departmental Policy

Undergraduate and graduate students may interrupt the course of study for various reasons. In order for the department to plan for maximum use of resources, students must file a leave-of-absence form with the department indicating the expected date of return. Leave-of-absence status is renewable. Undergraduates may accumulate up to a total of two years of leave; they must file a departmental leave-of-absence agreement and submit a reenrollment card to the Office of the Registrar. Graduate students may accumulate up to a total of one year of leave; they must file a Division of Graduate Studies leave-of-absence form, available online, and a departmental agreement, available on the department website. If the limits on accumulated leave are exceeded or the leave-of-absence terms of agreement are not met, major status may be revoked. Students who do not file a leave-of-absence agreement form with the department cannot be guaranteed access to design studio courses the year they return.

Computer Literacy Requirement

Introductory architecture courses presume knowledge of computer operations, general-use software, and Internet communications. Students lacking preparation may draw on resources at the College of Design Technology Services, the University Teaching and Learning Center, the Library and Learning Commons, or Information Technology services. By the end of their first year in the bachelor's or master's program, students are expected to have achieved basic literacy in computer graphics as an integrated tool for architectural design—diagramming, two-dimensional drawing, image processing, three-dimensional modeling, accurate sun casting, parametric modeling, and presentation methods. Students must have an awareness of building information modeling, digital fabrication, building performance analysis software, and geographic information systems.

Students are required to have a high-speed laptop computer and a specified complement of software. Each year the department reviews its software and hardware recommendations. Minimum hardware specifications and software requirements (<https://blogs.uoregon.edu/designtech/>) are posted on the department website.

Mathematics and Physics Literacy Requirement

Students are required to pass a diagnostic examination to show that they have a working knowledge of prerequisite math and physics subjects prior to enrolling in Structural Behavior (ARCH 461) or Structural Behavior (ARCH 561). Students who do not take (or do not pass) the examination are required to take a weeklong review course offered during the week prior to the start of fall term. In some cases, based on

examination results, students may only be required to attend certain days of the review course.

Off-Campus Study

Students may participate in off-campus study programs hosted by the Department of Architecture, the Historic Preservation Program, the Department of Landscape Architecture, and Global Education Oregon.

Portland, Oregon

The department maintains an extension of its NAAB-accredited professional and post-professional graduate programs at the University of Oregon in Portland, where advanced graduate and undergraduate architecture students may study. Students in the master of science or master of architecture Track II programs may complete all studies in residence in Portland or take courses in Eugene and Portland.

The University of Oregon's Portland facility, housed in the historic White Stag Block, includes studio spaces, classrooms, a fabrication shop, a computing lab, review rooms, and a library. Portland students also have access to the resources on the Eugene campus, including scholarships and financial aid. Through provisions of the Oregon University System, students in Portland may enroll in courses and use libraries at other state-system universities.

Portland is an ideal laboratory for the exploration and study of real problems in urban design and architecture. Civic and regional issues are actively studied and tested in the design studios, in courses, and through research opportunities. The school maintains strong ties with Portland's professional community of architects, planners, and developers. Additional enrichment is provided through the department's sponsorship of professional and public events. Students may take advantage of Portland's status as a major center for architectural and interior design services by seeking practicum experience or internships in local firms and organizations. The program provides interested students with opportunities to contribute to urban design projects for government agencies and nonprofit organizations in the Portland area. More information is available through the department's offices in Portland or Eugene and the department website.

Rome, Italy

The Department of Architecture and the Department of the History of Art and Architecture offer an interdisciplinary summer program in Rome, housed in the historic center of the city. Students experience the layers of history and vibrant design culture through the art, architecture and urban design of the city. Rome serves as the laboratory for courses in the areas of architectural design, media, art history, and architectural history. Students live in apartments within walking distance of the facility. Architecture majors who have successfully completed at least four design studios are eligible to take the studio component.

Vancouver, British Columbia

This architecture and urban design program offered in the spring and based on Granville Island—one of the “world's great public spaces”—in the heart of this multicultural, dynamic metropolis and seaport. Emily Carr University of Art and Design is the host institution for the program, with design studio and support facilities located in their Granville Island buildings. Student housing is located in Vancouver's colorful West End and at Jericho Beach, along the West Point Grey waterfront. Students follow an integrated, design-based curriculum of four coordinated courses: an architectural design studio, a kinetic architecture seminar,

an urban design and programming seminar, and an advanced 3-D digital modeling course.

Vicenza, Italy

This architecture program, offered in the spring, is based in the town of Vicenza in the Veneto region of Italy. The program is housed in the heart of Vicenza, where students have access to studio and seminar spaces, a library, and student lounge. The curriculum includes studio, media, and seminar courses that examine historic and contemporary regional architecture. This curriculum is designed for advanced architecture, interior architecture, and landscape architecture majors.

Barcelona, Spain

This summer urban design program in the Catalan city of Barcelona offers students insight into the measurement and design of urban relationships. Students use sensors and mapping to understand cities from the scale of human experience, integrating existing and newly acquired data sets to inform design insights. These methods are supported by interaction with local experts in planning, urban ecology, architecture, robotic engineering, transit, and landscape architecture. Cultural context is provided through trips to Granada to study different neighborhoods and the Alhambra. In Barcelona, students live, work, and research in the city's newly planned three-by-three-block, pedestrian-friendly *Superilles*, designed to create a refuge from air pollution, traffic congestion, and sound pollution.

Stuttgart, Germany

A small number of Oregon students change places for a semester with students in the architecture programs at the University of Stuttgart, one of the strongest technical universities in Germany. BArch students in their third or fourth year and MArch Track I and II students who have a full year of study remaining after the exchange year are eligible. German language proficiency is required, except for specific international programs.

Tokyo, Japan

Students may spend an exchange semester studying architecture in Tokyo, Japan, at Meiji University, one of the most prominent private institutions in Japan. Graduate students enroll in English-taught courses in the International Program in Architecture and Urban Design. Undergraduate students enroll in courses taught in Japanese. Several classes of Meiji architecture students have visited the University of Oregon for short-term collaborations.

Danish International Studies Program

Architecture and interior architecture students travel to Copenhagen to participate in programs focused on architecture and urban design or furniture design. Summer, fall, and academic-year options are offered. Credits are automatically transferred and financial aid is available. Instruction is in English.

Hong Kong, China

Students may participate in a semester-long exchange program at the University of Hong Kong, where English instruction makes Asia accessible. Students study the challenges of an ultradense metropolis and experience futuristic skyscrapers and public transit.

National University of Singapore

With its Malay, Chinese, Indian, and Western cultural influences, Singapore provides a wealth of architectural diversity. Architectural styles

range from traditional Chinese temples to ultramodern buildings. This exchange program allows you to take courses (taught in English) in design and other fields at one of the top universities in the Asia-Pacific Region.

Registering for Study-Abroad Courses

Students in University of Oregon study-abroad programs enroll in courses with subject codes that are unique to individual programs. Upon completion of a program, the credits earned are transferred to fulfill the appropriate degree requirements. See Study Abroad (p. 911) in the **Supplementary Academic Programming** section of this catalog for more information.

Faculty

Kyu-Ho Ahn, associate professor (interior architecture). BFA, 1992, Hong-Ik; MFA, Iowa State. NCIDQ certificate. (2008)

Juli Brode, senior instructor.

G. Z. Brown, professor (design, environmental control systems, effect of energy and material conservation on architectural form). BA, 1964, MA, 1966, Michigan State; MBA, 1971, Akron; MArch, 1974, Yale; reg. architect, Oregon; fellow, American Institute of Architects. (1977)

Virginia Cartwright, associate professor (design, Finnish architecture, lighting). AB, 1975, California, Berkeley; MArch, 1981, Oregon. (1986)

Nancy Yen-Wen Cheng, associate professor (design, digital media). BA, 1983, Yale; MArch, 1990, Harvard; reg. architect, Massachusetts (inactive); NCARB certificate. (1996)

Donald B. Corner, professor (design, construction systems, housing production). BA, 1970, Dartmouth College; MArch, 1974, California, Berkeley; reg. architect, Massachusetts. (1979)

Howard Davis, professor (design, urban vernacular architecture, culturally sustainable urban districts); director, graduate studies. BS, 1968, Cooper Union; MS, 1970, Northwestern; MArch, 1974, California, Berkeley; Association of Collegiate Schools of Architecture Distinguished Professor. (1986)

Mark Donofrio, associate professor (design, structures, interdisciplinary design). BA, 2004, Illinois, Chicago; MArch, 2006, Illinois, Urbana-Champaign; reg. architect, Illinois. (2010)

Stephen F. Duff, associate professor (design; structures, construction, and design-build; naval architecture). BA, 1985, Washington (Seattle); MArch, 1988, MS, 1993, California, Berkeley. (1994)

Ihab Elzeyadi, professor (design, environmental control systems). BArch, 1988, Graduate Diploma in Architectural Engineering, 1990, Ain Shams University; MS, 1996, Pennsylvania State; PhD, 2001, Wisconsin, Milwaukee; reg. architect, reg. engineer, Egypt. (2001)

Michael E. Fifield, professor (design, housing, urban design). BA, 1973, California, Berkeley; MArch, 1980, California, Los Angeles; reg. architect, Oregon, Arizona, Idaho; NCARB certificate; fellow, American Institute of Architects; member, American Institute of Certified Planners. (1998)

Gerald Gast, associate professor (urban and architectural design, urban studies). BArch, 1967, MArch, 1969, Illinois; reg. architect, California. (1994)

Donald Genasci, professor (history and theory, architecture and urban design). BArch, 1963, Oregon; Dipl. in Urban Design, 1965, Architecture Association; MA, 1974, Essex; reg. architect, Oregon, NCARB certificate; Architects' Registration Council of the United Kingdom. (1977)

Mark Gillem, professor (urban design, social and cultural factors in design). BArch, 1989, Kansas; MArch, 1996, PhD, 2004, California, Berkeley; reg. architect, California, South Dakota; NCARB certificate; member, American Institute of Architects, American Institute of Certified Planners. (2005)

James W. Givens, senior instructor (design, design theory and process). BArch, 1985, MArch, 1989, Oregon. (1986)

Esther Hagenlocher, associate professor (architecture, interior architecture). Certificate of Profession—Cabinet Maker, 1987, Technical College, Stuttgart; DiplIng, 1994, State Academy of Art and Design, Stuttgart; MArch, 1998, University College, London; reg. architect, Germany (inactive). (2004)

Peter A. Keyes, associate professor (design, housing research and building technology, community design). AB, 1978, Harvard; MArch, 1983, Columbia; reg. architect, New York (inactive). (1990)

Solmaz Mohammadzadeh Kive, assistant professor (interior, history and theory). MArch, 2005, Shahid Beheshti; MArch, 2010, McGill; reg. architect, Tehran. (2017)

Alison G. Kwok, professor (design, environmental control systems). BA, 1977, Knox; MEd, 1980, Hawaii; MArch, 1990, PhD, 1997, California, Berkeley; reg. architect, California, Oregon; NCARB certificate; certified passive house consultant. (1998)

Nico Larco, professor (design, urban design, suburban development). BA, BArch, 1996, Cornell; MArch, MCUP, 2001, California, Berkeley; reg. architect, Massachusetts, NCARB certificate. (2005)

Erin Moore, associate professor (design, technology, media). BA, 1996, Smith; MArch, 2003, California, Berkeley; reg. architect, Arizona; NCARB certificate. (2008)

Brook Muller, associate professor (design theory, environmentally responsive architecture); associate dean for academic affairs. BA, 1987, Brown; MArch, 1992, Oregon. (2004)

Hans Joachim Neis, associate professor (urban and architectural design and theory). DiplIng, Darmstadt, 1976; MArch, 1979, MCP, 1980, PhD, 1989, California, Berkeley; reg. architect, urban designer, Germany. (2000)

Kevin Nute, professor (design history and theory, time-sensitive buildings). BA, 1981, BArch, 1985, Nottingham; PhD, 1993, Cambridge. (2000)

Otto P. Poticha, adjunct associate professor (design, architectural practice, community involvement in physical change). BS, 1958, Cincinnati; reg. architect, California, Colorado, Illinois (inactive), New Mexico, Oregon, Virginia (inactive), Washington, Washington, D.C. (inactive); NCARB certificate; fellow, American Institute of Architects. (1962)

Siobhan Rockcastle, assistant professor (design, lighting, environmental psychology); director, Baker Lighting Laboratory. BArch, 2008, Cornell; SMArchS, 2011, Massachusetts Institute of Technology; PhD, 2017, École polytechnique fédérale de Lausanne. (2017)

John S. Rowell, associate professor (design, construction, building enclosure). BS, 1984, British Columbia; MArch, 1990, Oregon; reg. architect, Washington, Oregon, California; NCARB certificate; member, American Institute of Architects. (1996)

Judith E. Sheine, professor (design, history and theory, housing). AB, 1975, Brown; MArch, 1979, Princeton; reg. architect, California. (2012)

Philip Speranza, associate professor (design, design communications). BS, 1997, Virginia; MArch, 2002, Columbia; reg. architect, California, New York. (2011)

Robert L. Thallon, associate professor (design, media, construction). BA, 1966, California, Berkeley; MArch, 1973, Oregon; reg. architect, Oregon, California. (1979)

Roxi Thoren, associate professor. See **Landscape Architecture**.

James T. Tice, professor (urban design, architectural history and theory). BArch, 1968, MArch, 1970, Cornell; reg. architect, California. (1990)

Glenda Fravel Utsey, associate professor (design, site-specific process and skill development, settlement patterns). BArch, 1971, MLA, 1977, Oregon. (1981)

Kevin G. Van Den Wymelenberg, professor; director, Energy Studies in Buildings Laboratory. BS, 2000, Wisconsin, Milwaukee; MArch, 2002, PhD, 2012, Washington (Seattle). (2015)

Daisy-O'lice Ida Williams, associate professor (design, design communications); BS, 2002, MArch, 2005, Florida A&M. (2011)

Jenny Young, professor (design, programming, health-care facilities). BA, 1970, Vassar; MArch, 1974, California, Berkeley; reg. architect, Oregon. (1982)

Linda K. Zimmer, associate professor (design, media, behavioral factors). BIArch, 1982, Kansas State; MIArch, 1990, Oregon; NCIDQ certificate; member, Institute of Business Designers. (1990)

Courtesy

Edward Allen, courtesy professor (technical teaching program). BArch, 1962, Minnesota; MArch, 1964, California, Berkeley; reg. architect, Massachusetts. (2001)

Emeriti

Wilmot G. Gilland, professor emeritus. AB, 1955, MFA, 1960, Princeton; reg. architect, California, Oregon; Fellow, American Institute of Architects. (1969)

Arthur W. Hawn, professor emeritus. BA, 1961, MA, 1964, Washington State; Fellow, Interior Design Educators Council. (1967)

Earl E. Moursund, professor emeritus. BS, 1949, Texas; MArch, 1951, Cranbrook Academy of Art; reg. architect, Texas. (1955)

Gary W. Moye, associate professor emeritus. BArch, 1967, Oregon; MArch, 1968, Pennsylvania; reg. architect, Pennsylvania, New York, Oregon. (1976)

Donald L. Peting, associate professor emeritus; assistant dean, architecture and allied arts. BArch, 1962, Illinois; MArch, 1963, California, Berkeley; reg. architect, Oregon, Washington. (1963)

James A. Pettinari, professor emeritus. BArch, 1966, Minnesota; MArch, 1970, Pennsylvania; reg. architect, Minnesota; NCARB certificate. (1975)

Guntis Plesums, professor emeritus. BArch, 1961, Minnesota; MArch, 1964, Massachusetts Institute of Technology; reg. architect, Oregon, New York. (1969)

John S. Reynolds, professor emeritus. BArch, 1962, Illinois; MArch, 1967, Massachusetts Institute of Technology; reg. architect, Oregon; fellow, American Institute of Architects; Association of Collegiate Schools of Architecture Distinguished Professor. (1967)

Michael D. Utsey, associate professor emeritus. BArch, 1967, Texas; MEvD, 1971, Yale; reg. architect, Oregon. (1967)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

- Bachelor of Architecture (p. 608)
- Minor (p. 609)

Undergraduate Studies

Undergraduate programs include the bachelor of architecture (BArch) degree and the minor in architecture. The five-year professional BArch degree program is highly structured the first two years and more flexible the last three. This flexibility allows each student to establish a study sequence according to individual interests and needs. Transfer students should be aware that an accelerated program is normally possible only for students who transfer from an NAAB-accredited architecture program.

Prospective applicants who have a four-year undergraduate degree in any field must apply to the graduate program (see Graduate Admission).

Major Requirements: 231 credits

The bachelor's degree program includes requirements for a liberal education.

Core Education Requirements for Professional School Majors

Code	Title	Credits
Select one of the following:		8
WR 121 & WR 122	College Composition I and College Composition II	
WR 121 & WR 123	College Composition I and College Composition III	
Core Education Electives		
ARH 314	History of World Architecture I	4
ARH 315	History of World Architecture II	4
Select one approved group-satisfying arts and letters course outside of Art History		4
Select three approved group-satisfying social science courses		12
PHYS 201 & PHYS 202	General Physics and General Physics	8
Select one approved group-satisfying science course outside of Physics		4
Additional Requirements		
Elective courses outside the ARCH or IARC subject codes ^{1,2}		16

Select two courses that satisfy multicultural requirements from different categories, if not met in other courses ³ 9

Total Credits 69

- 1 Art history (ARH) courses at the 300 level or above taken beyond the art history requirement (see footnote 2) may be applied toward the upper-division, general-education elective requirements.
- 2 These courses delve into the literature of academic subjects outside the subject areas of architecture and interior architecture. The upper-division electives may not be courses in service, weekend seminar, human development, or leisure studies. They must be taken in residence at the University of Oregon.
- 3 Some general-education electives may fulfill multicultural requirements.

Professional BArch Requirements: 144 credits

Code	Title	Credits
Introductory Architectural Design Studios		
ARCH 283 & ARCH 284	Architectural Design I and Architectural Design II	12
ARCH 383 & ARCH 384	Architectural Design III and Architectural Design IV	12
Intermediate Architectural Design Studios		
ARCH 484	Architectural Design (repeatable studio for all professional-degree students; BArch students must complete four terms of ARCH 484) ¹	24
Advanced Architectural Design Studios		
ARCH 485 & ARCH 486	Advanced Architectural Design I and Advanced Architectural Design II	16
General Theory		
ARCH 201	Introduction to Architecture	4
Architectural Design Theory and Practice		
ARCH 202	Design Skills	3
ARCH 222	Introduction to Architectural Computer Graphics	4
ARCH 423	Media for Design Development: [Topic]	3
Architectural Design Theory and Practice		
ARCH 430	Architectural Contexts: Place and Culture	4
ARCH 440	Human Context of Design	4
ARCH 450	Spatial Composition	4
Building Technology		
ARCH 461	Structural Behavior	6
ARCH 462	Structural Design	6
ARCH 470	Building Construction	4
ARCH 471	Building Enclosure	4
ARCH 491 & ARCH 492	Environmental Control Systems I and Environmental Control Systems II	8
Approved advanced technology course ²		4
Professional Practice		
ARCH 417	Context of the Architectural Profession	4
Architectural History		
ARH 314	History of World Architecture I	4
ARH 315	History of World Architecture II	4

Two additional architectural history courses taught either in the Department of the History of Art and Architecture or the School of Architecture and Environment ³	8
Subject Area Electives ⁴	2
Total Credits	144

- ¹ One may be Interior Design (IARC 484), Furniture Design (IARC 486), or Site Planning and Design (LA 489).
- ² Approved advanced technology courses vary by term; visit department website (<https://archenvstudents.uoregon.edu/architecture-and-interior-architecture/course-syllabi/eugene-courses/>) for full list.
- ³ Approved architectural history courses vary by term; visit department website (<https://archenvstudents.uoregon.edu/architecture-and-interior-architecture/course-syllabi/eugene-courses/>) for full list.
- ⁴ Approved subject area electives vary by term; visit department website for full list. One 3-credit (minimum) subject area elective must be an approved design arts course (not technology or media).

Courses required for the minor must be passed with a grade of at least C- or P or P* to count toward the major.

A sample plan for the bachelor of architecture degree (<http://architecture.uoregon.edu/programs/b.arch>) is available on the department website.

Minor Requirements: 26 credits

Code	Title	Credits
ARCH 201	Introduction to Architecture	4
ARCH 484	Architectural Design (only required for interior architecture and landscape architecture majors) ¹	6
Electives (see table below; any students outside of interior architecture and landscape architecture must take 22 credits of electives)		16
Total Credits		26

- ¹ ARCH 484 Architectural Design is a course that may not be taken by students outside of the Department of Architecture, with the exception of landscape architecture students.

Electives

Code	Title	Credits
DSGN 321	Inclusive Urbanism	4
ARCH 407	Seminar: [Topic] (Renaissance Architecture)	1-6
ARCH 407	Seminar: [Topic] (Sustainable Urbanism)	1-6
ARCH 409	Practicum: [Topic] (Off-Campus Experience)	1-6
ARCH 430	Architectural Contexts: Place and Culture	4
ARCH 439	Minimal Dwelling	3
ARCH 440	Human Context of Design	4
ARCH 450	Spatial Composition	4
ARCH 491	Environmental Control Systems I	4
ARCH 492	Environmental Control Systems II	4

It is possible to take other architecture courses and apply them to the minor with the permission of the instructor.

Undergraduates who are enrolled in any major may apply to the minor. Completed applications including a statement of support from the student's major advisor are submitted to the Department of Architecture office. Applicants must make an appointment with the architecture advisor to discuss their plan of study. Because the department's first obligation is to its majors, it cannot guarantee availability of courses for minors. Minors may register if space is available after the needs of majors have been met. Space for enrollment in the minor program is limited.

Undergraduate Admission

Interest in the program exceeds the capacity of the department. Approximately equal numbers of first-year and transfer (including change-of-major) applicants are admitted to the first year of the bachelor of architecture program each year. A smaller number of applicants from other NAAB-accredited or recognized programs are admitted as advanced transfer students. Prospective students should review application requirements posted online during the fall, well before application deadlines (see Application Deadlines in the **Admissions** section of this catalog). January 15 is the deadline for completion of both the department and university applications. Admission notices for fall term are e-mailed around April 1.

Admission to the BArch major program is through a selective review that focuses on three attributes: creative potential, academic capability, and potential for contribution to the program through diversity of background, experience, maturity, or demonstrated motivation. Students are expected to submit specific materials supporting each of these attributes (academic records, essays, recommendations, and a portfolio of creative work). Applicants need not have prior course work in building design, but they are encouraged to seek a broad foundation in the visual arts (e.g., drawing, painting, sculpture, graphic design). Experience with crafts and construction may also demonstrate evidence of creative potential.

Prospective applicants may find information about the program and application requirements on the department website (<http://architecture.uoregon.edu/>).

- Master of Architecture (p. 610)
- Master of Science (p. 610)
- Doctor of Philosophy (p. 611)
- Certificate in Ecological Design (p. 612)
- Certificate in Technical Teaching in Architecture (p. 612)

Graduate Studies

There are three graduate degree programs in architecture: the professional master of architecture (MArch) degree, the post-professional master of science in architecture (MS) degree, and the doctor of philosophy (PhD) degree. Graduate certificate programs (<http://architecture.uoregon.edu/programs/certificates/>) sponsored by the department include ecological design, museum studies, new media and culture, Oregon leadership in sustainability, and technical teaching in architecture. Students interested in pursuing a concurrent master's degree in interior architecture may find information about the combined degree requirements and application procedures on the Department of Architecture website.

Students enrolled in the master of science degree program must take a minimum of 45 graduate credits, of which 30 must be in architecture

and 9 must be at the 600 level. The PhD degree program consists of a minimum of 66 graduate-level credits, including at least 50 credits in the Department of Architecture. These degree programs do not have a graded-credit requirement, although students who enroll for graded credits must maintain a 3.00 minimum GPA. Additional requirements for each program are listed below.

Professional Master of Architecture Degree Requirements

The professional, NAAB-accredited master of architecture (MArch) degree program prepares students for careers in architectural practice and careers in allied professions that contribute to shaping the built environment.

The department offers two tracks of study, both of which lead to the MArch degree. Track I typically takes ten terms to complete and requires 144 credits.

Track I students typically complete all or most of the MArch degree program requirements at the University of Oregon, and begin the program the summer before their first full academic year of study. Students with bachelor's degrees (BA, BS) other than a preprofessional degree in architecture must apply to the Track I program.

Students with degrees in related design disciplines (e.g., landscape architecture, interior architecture, environmental design, or architecture degrees from programs at schools that are not accredited) may be given advanced standing, up to a maximum of three terms of studio credit for equivalent prior studio work. Track I students may apply to transfer to Portland after completing the introductory design studio sequence in Eugene.

MArch Track I

Code	Title	Credits
Introductory Architectural Design Studios		
ARCH 680 & ARCH 681 & ARCH 682	Introductory Graduate Design and Introductory Graduate Design and Introductory Graduate Design	18
Intermediate Architectural Design Studios		
ARCH 584	Architectural Design (repeatable studio for all professional-degree students) ¹	30
Advanced Architectural Design Studios		
ARCH 585 & ARCH 586	Advanced Architectural Design I and Advanced Architectural Design II	16
Design Media and Communication

Professional Practice		
ARCH 517	Context of the Architectural Profession	4
Architectural History		
	Approved 500- or 600-level courses in architectural history ²	12
Architectural Electives		
	Approved 500- or 600-level courses in architecture or allied fields	12
Total Credits		144

¹ LA 589 Site Planning and Design, IARC 584 Interior Design, or IARC 586 Furniture Design may be substituted for one of the required ARCH 584 Architectural Design studios.

² Students must take at least one course in each of the following historical periods: ancient, Renaissance, and modern.

Courses required for the program must be passed with a grade of at least C- or P or P* to count toward the program. There is no minimum graded credit requirement for Architecture, however, the Division of Graduate Studies requires a GPA of a 3.0 to remain in good standing.

Of the required 144 credits, 15 credits must be applied to an advanced study cluster (<http://architecture.uoregon.edu/current/m.arch-cluster/>) or 16 credits must be applied to a specialization or 12 credits must be applied to one of the department's graduate certificate programs. Students who complete a concurrent master's degree in an allied field are exempt from this requirement. This work may include an independent research project.

MArch Track I Sample Plan of Study

MS Architecture: Post-professional Master of Science in Architecture Degree Requirements

The Master of Science in Architecture degree program provides an opportunity for advanced study and contribution to knowledge in the field through a thesis or terminal project. The post-professional Master of Science in Architecture (MS) degree allows students to complete advanced research and/or design inquiry that builds on an existing professional degree in architecture, interior architecture, landscape architecture, architectural engineering, structural engineering, construction management, or another related field. Students enrolled in the Master of Science degree program must take a minimum of 45 graduate credits, of which 30 must be in architecture and 9 must be at the 600 level. Students complete a minimum of three terms in residence and are required to complete 9 credits in ARCH 503 (<http://catalog.uoregon.edu/search/?P=ARCH%20503>) Thesis or Terminal Project (ARCH 619 (<http://catalog.uoregon.edu/search/?P=ARCH%20619>)). Students in this program are expected to develop an individual research topic leading to a thesis or terminal project in one or more of the following areas of faculty research and design excellence:

- **Sustainable Buildings:** Green Technologies, High-Performance Envelopes, Net-Zero Buildings, and Eco-Districts.
- **Sustainable Construction:** Mass Timber Design, Green Building Materials, Fabrication, Construction Methods, and Life Cycle Analysis.

- **Lighting Design:** Daylighting, Electric Lighting, Luminaires and Photometrics, and Visual Comfort.
- **Health and Indoor Environments:** Indoor Environmental Quality, Human-Centric Design, Occupant Performance and Health.
- **Sustainable Urbanism and Housing:** Urban Architecture and Urban Design, Housing Design, Community Design, Livable Communities, New Mobility, and Climate Action.
- **Design for Social Sustainability:** Environment-Behavior Studies, Human-Context of Design, Spatial Justice, Accessibility and Universal Design, Cultural, Social and Economic Sustainability.
- **Design Computing:** Modeling, Simulations, and Design Communication.
- **Architectural History and Theory:** Preservation, Adaptive-reuse, Architectural Theory and Criticism.

The post-professional MS curriculum focuses on individual research and/or design inquiry that draws from professional and general university courses and consultation with the student's advisor and thesis or terminal project committee. For more information about the thesis, see the **Division of Graduate Studies** section of this catalog.

Code	Title	Credits
	Research Inquiry ¹	9-18
	Area of Research/Design Focus	27-36
Minimum Total Credits:		45

¹ Students complete a minimum of three terms in residence and are required to complete 9 credits in ARCH 503 (<http://catalog.uoregon.edu/search/?P=ARCH%20503>) Thesis or Terminal Project (ARCH 619 (<http://catalog.uoregon.edu/search/?P=ARCH%20619>)).

Doctor of Philosophy Requirements

The PhD degree program focuses on sustainable design, addressing the needs of the profession as society faces the environmental impact of its cities. It prepares students for careers at universities and other institutions engaged in research related to sustainable design, such as national research laboratories, industry research and development, public agencies, and nongovernment organizations. PhD students address research topics that encompass spatial, environmental, historical, social, political, technical, and economic factors. In addition to a rigorous understanding of building performance, aspects of sustainable community development, and broader social processes and policies, each student is expected to demonstrate an understanding of theory and research in a related focus area. Completion of the program requires demonstrated excellence through original contributions to the field. Depending on background and research goals, students can expect to complete the degree in three to six years, with four to five years being most typical. There is a minimum residency of two years of full-time graduate work at the Eugene campus.

The program supports advanced study in the following areas:

- Design and policy for sustainable cities and livable communities
- Design for climate change and adaptation
- Cultural, social, and economic sustainability
- Net-zero building and eco-district design
- Resource forecasting and simulation of place and building performance

- Energy-efficient, adaptive reuse of existing buildings
- Indoor environmental quality and occupant health
- High-performance building envelopes and green technologies
- Life-cycle building analysis design and modeling

Students are required to satisfy university PhD requirements explained in the **Division of Graduate Studies** section of this catalog and on the Division of Graduate Studies website. Degree requirements include the following:

- Five required theory and research courses that address qualitative and quantitative studies of environmental and building design and the planning processes that shape them
- 4 credits of supervised college teaching
- Additional course work in two focus areas, one within the department and one in a different department or program to develop knowledge of a second discipline that supports the student's research (e.g., anthropology, architectural history, biology, ecology, education, landscape architecture, planning theory, urban geography). Courses are selected in consultation with a faculty advisor
- A written comprehensive exam followed by an oral comprehensive exam upon completion of course work, typically at the end of the second year. After the student has passed both the written and oral comprehensive exams, he or she will be advanced to candidacy
- A dissertation proposal typically submitted the term following the comprehensive exams, but at least within three terms of the exams. The student forms a dissertation committee that must approve the proposal following a scheduled public proposal presentation and before undertaking the dissertation
- A public presentation and defense of the dissertation research followed by final approval by the dissertation committee

The required 84 credits are distributed as follows:

Doctor of Philosophy Degree Requirements

Code	Title	Credits
Research and Investigation ¹		
Research - ARCH 601		4-8
ARCH 601	Research: [Topic]	
ARCH 620	Research Methods in Sustainable Design	2-6
ARCH 678	Advanced Research in Sustainable Design	2-6
ARCH 695	Advanced Dissertation Proposal Development	4-6
Primary Inside Focus Area ²		
ARCH 608	Workshop: [Topic]	1
ARCH 633	History of Sustainable Design	4
Advanced electives (500 level and above)		13
Secondary Outside Focus Area ³		
Courses at the 600 level		16
Dissertation ⁴		
ARCH 603	Dissertation	18
Minimum Total Credits:		84

¹ A minimum of 20 credits required.

² A minimum of 18 credits required.

³ A minimum of 12 graduate credits required.

⁴ A minimum of 18 credits required.

Graduate Admission

MArch Admission

The master of architecture degree allows students to complete a professional degree leading to licensure. Students with a non-relevant undergraduate degree are eligible for the three-year master of architecture Track I degree. The program is studio-based, with a full complement of professional courses and opportunities to focus on an area of special interest. Students may take advantage of numerous on- and off-campus opportunities for expanding their academic experience. An array of foreign-study programs and internships are offered, in addition to various opportunities to work directly with communities.

Prospective applicants may find information about the program tracks and application requirements on the department website (<https://archenvironment.uoregon.edu/architecture/apply/MArch/>).

PhD Admission

Students interested in applying to the PhD program (<https://archenvironment.uoregon.edu/architecture/grad/phd/>) in the Department of Architecture are encouraged to contact prospective advisors to discuss research interests. Before applying, prospective students should review additional information about the PhD program, including a typical course of study, the PhD Handbook (https://archenvironment.uoregon.edu/sites/archenvironment1.uoregon.edu/files/uo_arch_phd_handbook_8_september_20172.pdf), and funding (<https://archenvironment.uoregon.edu/architecture/grad/funding/>).

Admission to the PhD degree program is through a highly selective review that focuses on the applicants' prior academic and professional preparation and their demonstrated potential to make original research contributions and contribute to the teaching and research mission of the department. Prospective doctoral students must have earned a professional master of architecture degree, a postprofessional graduate degree in architecture, or a professional degree in architecture and a graduate degree in a related field.

Students admitted to the program must already hold either a master's degree in architecture from an accredited program or have an accredited professional degree in architecture and a master's degree in a related field. A current architectural license and design practice may be applied in lieu of a professional degree in architecture; however, a master's degree in a related field would still be required in this scenario.

Prospective applicants may find information about the program and application requirements on the department website (<https://archenvironment.uoregon.edu/architecture/apply/phd/>).

Graduate Employee and Research Appointments

A number of graduate employee teaching or research fellowships (GEs) are available to well-qualified graduate students. MS or MArch Track II applicants with previous education in architecture or an allied field are encouraged to apply for GE positions. MArch Track I students are typically selected in the second or third year of their degree program. Information about the GE application process is available on the department and Division of Graduate Studies websites.

- **Certificate in Museum Studies**
- **Certificate in New Media and Culture**

Certificate in Ecological Design

The certificate in ecological design is an interdisciplinary program focused on the development of a practical framework for the integration of the built environment with local and regional natural systems. It is available to all graduate students within the College of Design. Participating students develop an in-depth understanding of the relationships between ecological processes, issues of cultural and social sustainability, and urban development and form, as well as how allied design and planning disciplines approach these relationships.

Students must complete a minimum of 24 credits in approved ecological design subject courses. Of these, 11–12 credits must come from a list of foundation courses; 12–13 additional credits are selected by students from a list of approved electives. A maximum of 12 credits may be counted for both the certificate and a graduate degree program, but required courses for the degree will not satisfy certificate electives. For most architecture and interior architecture students, this certificate requires 12 credits in addition to their degree requirements. Some students may need to complete prerequisites to develop subject proficiency for approved electives. More information on course requirements and application to the certificate program may be found online, aaa.uoregon.edu/certificates/ecological-design (<http://aaa.uoregon.edu/certificates/ecological-design/>).

Certificate in Technical Teaching in Architecture

The Technical Teaching Certificate program prepares graduate students in the fields of architecture and interior architecture for teaching positions on building technology in academic and professional settings. Building technology includes subjects such as structural design, construction materials and processes, and environmental control systems. Students investigate curricula, tools, and strategies for teaching and concentrate on improving their comprehensive knowledge of the technical subjects. It is designed for graduate students enrolled in the postprofessional MS programs in architecture and interior architecture, but graduate students in the professional MArch Track I and II programs may apply. Individuals who hold a master's degree and at least one professional degree in architecture or interior architecture may apply to this certificate program without being concurrently enrolled in a master's program at the University of Oregon.

Certificate candidates must demonstrate advanced proficiency in at least one technical subject area (structures, construction, or environmental control) and have the background necessary to teach at the introductory level in the other two. This requirement may be fulfilled by submitting a portfolio documenting professional experience or prior course work to the technology faculty, or it can be met by completing a sequence of advanced courses. A minimum of 24 credits is required for the certificate. A maximum of 12 credits may be counted for both the certificate and a graduate degree program, but required courses for the degree will not satisfy certificate electives.

More information on course requirements and application to the certificate program may be found online, architecture.uoregon.edu/programs/techteaching/ (<http://architecture.uoregon.edu/programs/techteaching/>).

Courses

ARCH 196. Field Studies: [Topic]. 1-12 Credits.
Repeatable.

ARCH 198. Workshop: [Topic]. 1-3 Credits.

Repeatable.

ARCH 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

ARCH 201. Introduction to Architecture. 4 Credits.

Offers a structure of principles for making places for people. Examines places, design procedures, and the use of architectural principles in general.

ARCH 202. Design Skills. 3 Credits.

Introduction to basic design processes, methods, and media.

Prereq: ARCH 201 or IARC 204; coreq: ARCH 283.

ARCH 222. Introduction to Architectural Computer Graphics. 4 Credits.

Introduces basic skills and literacy with the computer for architectural illustration, drafting, and design.

Prereq: ARCH 202.

ARCH 283. Architectural Design I. 6 Credits.

Design studio projects and exercises introducing fundamental concepts and considerations in environmental design. Teaches knowledge and skills needed in subsequent studios and professional course work.

Sequence with ARCH 284.

Prereq: ARCH 201 or IARC 204; coreq: ARCH 202.

ARCH 284. Architectural Design II. 6 Credits.

Design studio projects and exercises introducing fundamental concepts and considerations in environmental design. Teaches knowledge and skills needed in subsequent studios and professional course work.

Sequence with ARCH 283.

Prereq: ARCH 202, 283; coreq: ARCH 222.

ARCH 383. Architectural Design III. 6 Credits.

Studio projects. Integration of issues of context, activity support, spatial order, construction, structure, and environmental control. Emphasis on schematic concept formation and subsequent architectural development.

Sequence with ARCH 384.

Prereq: ARCH 284.

ARCH 384. Architectural Design IV. 6 Credits.

Studio projects. Integration of issues of context, activity support, spatial order, construction, structure, and environmental control. Emphasis on schematic concept formation and subsequent architectural development.

Sequence with ARCH 383.

Prereq: ARCH 383 and 222.

ARCH 399. Special Studies: [Topic]. 1-6 Credits.

Repeatable.

ARCH 400M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

ARCH 401. Research: [Topic]. 1-6 Credits.

Repeatable.

ARCH 403. Thesis. 1-9 Credits.

Repeatable.

ARCH 405. Special Problems: [Topic]. 1-12 Credits.

Repeatable.

ARCH 406. Practicum: [Topic]. 1-12 Credits.

Repeatable.

ARCH 407. Seminar: [Topic]. 1-6 Credits.

Repeatable.

ARCH 408. Workshop: [Topic]. 1-6 Credits.

Repeatable.

ARCH 409. Terminal Project. 1-12 Credits.

Repeatable.

ARCH 410. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

ARCH 410L. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

ARCH 417. Context of the Architectural Profession. 4 Credits.

Introduction to the professional practice of architecture and related careers. Examines the professional, legal, and regulatory environment; firm organization and management; marketing; contractual issues; and the construction process.

Prereq: ARCH 484 or IARC 484 or LA 489.

ARCH 423. Media for Design Development: [Topic]. 3 Credits.

Instruction in media for design process. Techniques for problem and context analysis, generating concepts, developing form, and testing proposals. Subject emphasis varies with instructor. Repeatable.

Prereq: ARCH 202.

ARCH 430. Architectural Contexts: Place and Culture. 4 Credits.

How the design of buildings interacts with physical and cultural contexts of human traditions, landscape, settlements, cities, and suburbs.

Historical and contemporary examples.

Prereq: ARCH 284 or architectural minor status.

ARCH 431. Community Design. 3 Credits.

Multidisciplinary examination of the history, theory, and practice in the design and development of meaningful and sustainable neighborhoods. Special focus selected by faculty. Open to all majors. Offered alternate years.

Prereq: junior standing.

ARCH 435. Principles of Urban Design. 4 Credits.

Introduction to theory and practice of urban design, comparative studies of neighborhood conservation, central city regeneration, growth policies and prospects for restructuring cities, metropolitan regions.

ARCH 436. Theory of Urban Design I. 3 Credits.

Examines the cultural and formal ideas that underlie American and European urban design. Ancient Greek to 1700.

Prereq: ARCH 430.

ARCH 437. Theory of Urban Design II. 3 Credits.

Examines the cultural and formal ideas that underlie American and European urban design. 1700 to the present.

ARCH 438. Housing Prototypes. 3 Credits.

An examination of modern housing prototypes (1920s to the present) with an emphasis on understanding the many and varied factors involved in the production of quality housing. Open to all majors.

Prereq: Junior standing.

ARCH 439. Minimal Dwelling. 3 Credits.

Examination of the design of small dwelling units for a variety of users. Offered alternate years.

Prereq: junior standing.

ARCH 440. Human Context of Design. 4 Credits.

Theoretical principles, case studies, and technical skills for assessing user needs, developing building programs, applying research findings to design, and evaluating performance of the built environment.

Prereq: ARCH 284 or architectural minor status.

ARCH 450. Spatial Composition. 4 Credits.

Architectural space as a means to measure existence and expand awareness. Focus on compositional principles in architecture and methods for analyzing and generating spatial organizations.

Prereq: ARCH 284 or architectural minor status.

ARCH 458. Types and Typology. 3 Credits.

Critical introduction to theory of typology that categorizes urban and architectural forms by formal characteristics and cultural meaning. Lectures cover basic concepts, historical development, and case studies.

Prereq: ARCH 384, 450.

ARCH 461. Structural Behavior. 6 Credits.

Develops understanding of behavior of structural elements and systems and their implications on architectural form with reference to historical and contemporary buildings. Sequence with ARCH 462.

Prereq: PHYS 201; ARCH 470; passing score on diagnostic examination or completion of zero-week prerequisite course.

ARCH 462. Structural Design. 6 Credits.

Historical development of materials. Analyzes elements, connections, and systems of wood, steel, and concrete structures from the perspective of construction process, spatial and structural design. Sequence with ARCH 461.

Prereq: ARCH 461.

ARCH 470. Building Construction. 4 Credits.

Provide an understanding of the basic materials and methods of architecture with emphasis on the design, construction and performance of primary structure.

Prereq: ARCH 284 or architectural minor status.

ARCH 471. Building Enclosure. 4 Credits.

Selection, design, detailing, and performance evaluation of building envelopes: wood, metals, glass, concrete, and masonry veneers and roofing.

Prereq: ARCH 462, 470, 491.

ARCH 476. Residential Construction. 4 Credits.

Provides an understanding of basic materials and methods of North American residential construction with emphasis on design and construction of the wood light frame. Offered alternate years.

Prereq: ARCH 484

ARCH 480. Supervised Design Teaching. 1-3 Credits.

Supervised assistance with desk critiques and tasks related to studio teaching. Written application required. Repeatable for a maximum of 3 credits.

Prereq: ARCH 384.

ARCH 484. Architectural Design. 6 Credits.

Design projects requiring comprehensive and integrative study over a wide range of project options. Individual criticism, group discussions, lectures and seminars by visiting specialists, public review of projects. Repeatable.

Prereq: ARCH 384.

ARCH 485. Advanced Architectural Design I. 8 Credits.

In-depth work on complex design projects and design development beyond that normally possible in intermediate studios. Sequence.

Prereq: 24 credits in ARCH 484.

ARCH 486. Advanced Architectural Design II. 8 Credits.

In-depth work on complex design projects and design development beyond that normally possible in intermediate studios.

Prereq: ARCH 485.

ARCH 491. Environmental Control Systems I. 4 Credits.

Influence of energy source, climate, heating, cooling, lighting, acoustics, and water and waste systems on design of buildings and sites.

Architectural and mechanical means to manipulate thermal environment. Sequence.

Prereq: ARCH 284 or architecture minor status.

ARCH 492. Environmental Control Systems II. 4 Credits.

Influence of energy source, climate, heating, cooling, lighting, acoustics, and water and waste systems on design of buildings and sites.

Implications of lighting, acoustics, and water and waste for architectural design.

Prereq: ARCH 284 or architecture minor status.

ARCH 493M. Passive Cooling. 4 Credits.

Conceptual and quantitative investigations of passive cooling design and performance, including precedents, shading, natural ventilation, evaporative cooling, use of thermal mass, radiant cooling assisted by cold night skies, and control scheduling, supported by field investigations and introductory energy modeling. Multilisted with ENV5 493M.

Prereq: ARCH 491.

ARCH 494M. Passive Heating. 4 Credits.

Conceptual and quantitative investigations of passive solar heating design and performance, including precedents, solar resource evaluation, glazing selection and orientation, thermal mass materials and positioning, movable insulation, and control scheduling, supported by solar site surveys and modeling in EnergyPlus. Multilisted with ENV5 494M.

Prereq: ARCH 491

ARCH 495. Daylighting. 3 Credits.

"Daylighting"—increasing the energy efficiency of a building by maximizing the amount of daylight versus electric light—as an element in architectural design. Models and photography used to study behavior of light. Case studies and prediction techniques.

Prereq: ARCH 492.

ARCH 500M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

ARCH 503. Thesis. 1-9 Credits.

Repeatable.

ARCH 507. Seminar: [Topic]. 1-6 Credits.

Repeatable.

ARCH 508. Workshop: [Topic]. 1-6 Credits.

Repeatable.

ARCH 510. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

ARCH 510L. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

ARCH 517. Context of the Architectural Profession. 4 Credits.

Introduction to the professional practice of architecture and related careers. Examines the professional, legal, and regulatory environment; firm organization and management; marketing; contractual issues; and the construction process.

ARCH 523. Media for Design Development: [Topic]. 3 Credits.

Instruction in media for design process. Techniques for problem and context analysis, generating concepts, developing form, and testing proposals. Subject emphasis varies with instructor. Repeatable.

Prereq: ARCH 611.

ARCH 530. Architectural Contexts: Place and Culture. 4 Credits.

How the design of buildings interacts with physical and cultural contexts of human traditions, landscape, settlements, cities, and suburbs. Historical and contemporary examples.
Prereq: ARCH 680 or 683.

ARCH 531. Community Design. 3 Credits.

Multidisciplinary examination of the history, theory, and practice in the design and development of meaningful and sustainable neighborhoods. Special focus selected by faculty. Open to all majors. Offered alternate years.

ARCH 535. Principles of Urban Design. 4 Credits.

Introduction to theory and practice of urban design, comparative studies of neighborhood conservation, central city regeneration, growth policies and prospects for restructuring cities, metropolitan regions.

ARCH 536. Theory of Urban Design I. 3 Credits.

Examines the cultural and formal ideas that underlie American and European urban design. Ancient Greek to 1700.

ARCH 537. Theory of Urban Design II. 3 Credits.

Examines the cultural and formal ideas that underlie American and European urban design. 1700 to the present.

ARCH 538. Housing Prototypes. 3 Credits.

An examination of modern housing prototypes (1920s to the present) with an emphasis on understanding the many and varied factors involved in the production of quality housing. Open to all majors.

ARCH 539. Minimal Dwelling. 3 Credits.

Examination of the design of small dwelling units for a variety of users. Offered alternate years.

ARCH 540. Human Context of Design. 4 Credits.

Theoretical principles, case studies, and technical skills for assessing user needs, developing building programs, applying research findings to design, and evaluating performance of the built environment.
Prereq: ARCH 680 or 683.

ARCH 550. Spatial Composition. 4 Credits.

Architectural space as a means to measure existence and expand awareness. Focus on compositional principles in architecture and methods for analyzing and generating spatial organizations.
Prereq: ARCH 680.

ARCH 558. Types and Typology. 3 Credits.

Critical introduction to theory of typology that categorizes urban and architectural forms by formal characteristics and cultural meaning. Lectures cover basic concepts, historical development, and case studies.
Prereq: ARCH 550 and 682 or 683.

ARCH 561. Structural Behavior. 6 Credits.

Develops understanding of behavior of structural elements and systems and their implications on architectural form with reference to historical and contemporary buildings.
Prereq: Passing score on diagnostic examination or completion of zero-week prerequisite course.

ARCH 562. Structural Design. 6 Credits.

Historical development of materials. Analyzes elements, connections, and systems of wood, steel, and concrete structures from the perspective of construction process, spatial and structural design. Sequence with 561.
Prereq: ARCH 461 or 561.

ARCH 570. Building Construction. 4 Credits.

Provide an understanding of the basic materials and methods of architecture with emphasis on the design, construction and performance of primary structure.
Prereq: ARCH 680.

ARCH 571. Building Enclosure. 4 Credits.

Selection, design, detailing, and performance evaluation of building envelopes: wood, metals, glass, concrete, and masonry veneers and roofing.
ARCH 562, 570, 591.

ARCH 576. Residential Construction. 4 Credits.

Provides an understanding of basic materials and methods of North American residential construction with emphasis on design and construction of the wood light frame. Offered alternate years.

ARCH 580. Supervised Design Teaching. 1-3 Credits.

Supervised assistance with desk critiques and tasks related to studio teaching. Written application required. Repeatable for a maximum of 3 credits.
Prereq: ARCH 681 or 683.

ARCH 584. Architectural Design. 6 Credits.

Repeatable. Design projects requiring comprehensive and integrative study over a wide range of project options. Individual criticism, group discussions, lectures and seminars by visiting specialists, public review of projects.
Prereq: ARCH 682 or 683.

ARCH 585. Advanced Architectural Design I. 8 Credits.

In-depth work on complex design projects and design development beyond that normally possible in intermediate studios. Sequence.
Prereq: 30 credits in ARCH 484/584.

ARCH 586. Advanced Architectural Design II. 8 Credits.

In-depth work on complex design projects and design development beyond that normally possible in intermediate studios.
Prereq: ARCH 485/585.

ARCH 591. Environmental Control Systems I. 4 Credits.

Influence of energy source, climate, heating, cooling, lighting, acoustics, and water and waste systems on design of buildings and sites. Architectural and mechanical means to manipulate thermal environment. Sequence.
ARCH 680 or 683.

ARCH 592. Environmental Control Systems II. 4 Credits.

Influence of energy source, climate, heating, cooling, lighting, acoustics, and water and waste systems on design of buildings and sites. Implications of lighting, acoustics, and water and waste for architectural design.
ARCH 680 or 683.

ARCH 593M. Passive Cooling. 4 Credits.

Conceptual and quantitative investigations of passive cooling design and performance, including precedents, shading, natural ventilation, evaporative cooling, use of thermal mass, radiant cooling assisted by cold night skies, and control scheduling, supported by field investigations and introductory energy modeling. Multilisted with ENVS 593M.
Prereq: ARCH 591.

ARCH 594M. Passive Heating. 4 Credits.

Conceptual and quantitative investigations of passive solar heating design and performance, including precedents, solar resource evaluation, glazing selection and orientation, thermal mass materials and positioning, movable insulation, and control scheduling, supported by solar site surveys and modeling in EnergyPlus. Multilisted with ENV5 594M.
Prereq: ARCH 591

ARCH 595. Daylighting. 3 Credits.

"Daylighting"—increasing the energy efficiency of a building by maximizing the amount of daylight versus electric light—as an element in architectural design. Models and photography used to study behavior of light. Case studies and prediction techniques.
Prereq: ARCH 492 or 592.

ARCH 600M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

ARCH 601. Research: [Topic]. 1-6 Credits.

Repeatable.

ARCH 602. Supervised College Teaching. 1-6 Credits.

Repeatable.

ARCH 603. Dissertation. 1-9 Credits.

Repeatable.

ARCH 605. Special Problems: [Topic]. 1-16 Credits.

Repeatable.

ARCH 606. Practicum: [Topic]. 1-16 Credits.

Repeatable.

ARCH 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

ARCH 608. Workshop: [Topic]. 1-6 Credits.

Repeatable.

ARCH 609. Terminal Project. 1-16 Credits.

Repeatable.

ARCH 610. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

ARCH 610L. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

ARCH 611. Graduate Design Process. 3 Credits.

Foundation knowledge, concepts, and skills fundamental to design process and media subject areas.

ARCH 619. Terminal Project. 1-9 Credits.

Repeatable.

ARCH 620. Research Methods in Sustainable Design. 2-6 Credits.

Research methods to assess the design of buildings and communities; discussions include defining research themes, hypotheses, and developing thesis proposals.

Prereq: conditional MArch or PhD standing.

ARCH 633. History of Sustainable Design. 4 Credits.

History and theory of sustainable design practices; the evolution of codes and standards related to building design; perspectives and implementation strategies by leading ecological practitioners.

Prereq: conditional MArch or PhD standing.

ARCH 661. Teaching Technical Subjects in Architecture. 1-3 Credits.

Covers techniques for effective teaching. Focuses on one or more standard building-technology courses in architecture and interior architecture. Repeatable thrice for maximum of 12 credits.

ARCH 678. Advanced Research in Sustainable Design. 2-6 Credits.

Quantitative and qualitative techniques used in validating the design practice and research covering analytic approaches, including research design, surveys, case-study research, measurement, evaluation, and data presentation.

Prereq: conditional MArch or PhD standing.

ARCH 680. Introductory Graduate Design. 6 Credits.

Design projects and exercises intended to familiarize the student with fundamental concepts of environmental design. Emphasis on developing graphic skills and the capability for visual thinking that are essential to advanced studios. Sequence.

ARCH 681. Introductory Graduate Design. 6 Credits.

Design projects and exercises intended to familiarize the student with fundamental concepts of environmental design. Emphasis on developing graphic skills and the capability for visual thinking that are essential to advanced studios. Sequence.

Prereq: ARCH 680.

ARCH 682. Introductory Graduate Design. 6 Credits.

Design projects and exercises intended to familiarize the student with fundamental concepts of environmental design. Emphasis on developing graphic skills and the capability for visual thinking that are essential to advanced studios.

Prereq: ARCH 681.

ARCH 683. Graduate Architectural Design: Track II. 6 Credits.

Design to expand perception and response to issues in architectural design. Design as exploration of fundamental theoretical ideas. Studio projects require comprehensiveness and integrative study. Repeatable.

ARCH 695. Advanced Dissertation Proposal Development. 4-6 Credits.

Directed study for the development of dissertation proposals. Approval of faculty advisor required. Repeatable twice for a maximum of 18 credits based on development of proposal for dissertation.

Prereq: PhD standing.

Amanda Wojick, Department Head

541-346-3610
254 Lawrence Hall
5232 University of Oregon
Eugene, Oregon 97403-5232
artuo@uoregon.edu

The Department of Art curriculum approaches studio visual art through a broad range of media practices—ceramics, art & technology, drawing, fibers, metalsmithing and jewelry, painting, photography, printmaking, and sculpture. The department encourages breadth and interdisciplinary investigation, as well as depth within media, emphasizing the development of the material skills and understanding of art-making processes as well as a conceptual and critical understanding of the context of art. As actively practicing artists themselves, faculty members offer students an introduction to the compelling challenges, questions, and rewards of artistic practice.

Four bachelor's degrees are offered by the department. A four-year program leads to the bachelor of arts (BA) or bachelor of science (BS) degree with a major in art or art and technology; the bachelor of fine arts (BFA) in art with a concentration in ceramics, fibers, metalsmithing and jewelry, painting, photography, printmaking, or sculpture; the bachelor of

fine arts (BFA) in art & technology. At the graduate level, the master of fine arts (MFA) is the terminal professional degree in art.

In addition, students may access art studio offerings as nonmajors, provided they complete the appropriate course prerequisites. The department offers two courses that serve the larger university community as arts-and-letters group-satisfying courses.

Arts and Letters Group Courses

Code	Title	Credits
ART 101	Understanding Contemporary Art	4
ART 111	The Artist Experience	4

Faculty

Jonathan Bagby, instructor of practice (art). BA, 2009, Tennessee; MFA, 2014, Oregon. (2014)

Marissa Benedict, instructor (fibers). BFA, 2007, Rhode Island School of Design; MFA, 2011, School of the Art Institute of Chicago. (2016)

Carla Bengtson, professor (painting). BFA, 1980, Tyler School of Art; MFA, 1983, Yale. (1995)

Michael Bray, senior instructor (art and technology). BA, 1997, Illinois, Urbana-Champaign; MFA, 2008, Oregon. (2008)

Rebecca Childers, senior instructor (printmaking). BA, 1987, Cornell College; MFA, 1995, Iowa. (2002)

Isami Ching, senior instructor (art and technology, foundations). BA, 1994, Dartmouth College; BFA, 1998, Massachusetts College of Art and Design; MFA, 2002, Columbia. (2008)

Colleen Choquette-Raphael, senior instructor (photography). BA, 1991, BFA, 1992, Oregon; MFA, 1996, Washington (Seattle). (1997)

Jovencio de la Paz, assistant professor (fibers). BFA, 2008, School of the Art Institute of Chicago; MFA, 2012, Cranbrook Academy of Art. (2015)

Tannaz Farsi, associate professor (sculpture). BFA, 2004, West Virginia; MFA, 2007, Ohio. (2008)

Brian Gillis, professor (ceramics). BA, 2000, Humboldt State; MFA, 2002, Alfred. (2008)

Colin Ives, associate professor (art and technology). BA, 1987, Cornell College; MA, 1992, MFA, 1994, Iowa. (2002)

Ron Jude, professor (photography). BFA, 1988, Boise State; MFA, 1992, Louisiana State. (2015)

Anya Kivarkis, associate professor (metalsmithing and jewelry). BFA, 1999, Illinois, Urbana-Champaign; MFA, 2004, State University of New York, New Paltz. (2004)

Sylvan Lionni, assistant professor (painting, drawing). BFA, 1995, School of Visual Arts; MFA, 1998, Bard College. (2011)

Charlene Liu, associate professor (printmaking). BA, 1997, Brandeis; MFA, 2003, Columbia. (2007)

Christopher Michlig, associate professor (foundations); director, graduate program. BA, 1999, Oregon; MFA, 2007, Art Center College of Design. (2013)

Donald L. Morgan, associate professor (foundations). BFA, 1993, Oregon; MFA, 2001, Art Center College of Design. (2008)

John Park, senior instructor (art and technology). BA, 2003, Oregon; MFA, 2006, State University of New York, Buffalo. (2007)

David Rueter, assistant professor (art and technology). BA, 2009, Oberlin College; MFA, 2013, School of the Art Institute of Chicago.

Jack T. Ryan, professor (foundations). BFA, 1992, Oregon; MFA, 2000, Georgia. (2008)

Michael Salter, professor (art and technology). BFA, 1991, Miami; MFA, 1994, North Carolina, Chapel Hill. (2005)

James Schauer, senior instructor (foundations). BFA, 1999, Montana State; MFA, 2002, Oregon. (2003)

Stacy Jo Scott, assistant professor (ceramics, digital fabrication). BFA, 2010, Oregon; MFA, 2012, Cranbrook. (2017)

Rick Silva, associate professor (art and technology). BFA, 2001, MFA, 2007, Colorado, Boulder. (2013)

Jessica Swanson, senior instructor (ceramics). BA, 1996, Whitman College; MFA, 2002, School of the Art Institute of Chicago. (2010)

Ying Tan, associate professor (art and technology). BA, 1983, Teacher's University, Shandong, China; MAEd, 1987, Georgia State. (1996)

Jessie Vala, instructor. BFA California College of Arts 1999; MFA, 2015, University of Oregon.

Laura Vandenburg, professor (painting). BS, 1984, DVM, 1988, California, Davis; MFA, 1993, Hunter. (1998)

Kathleen E. Wagle, professor (metalsmithing, jewelry). BS, 1975, Portland State; MFA, 1981, Arizona State. (1994)

Tyrras Warren, senior instructor (art and technology, foundations). BA, 1998, BFA, 1998, Texas Christian; MFA, 2008, Oregon. (2009)

Amanda Wojick, professor (sculpture). BA, 1995, Colgate; MFA, 1999, Alfred; MFA, 2000, Bard. (2001)

Emeriti

Laura J. Alpert, associate professor emerita. BA, 1968, Stanford; MFA, 1971, Oregon. (1979)

Ronald J. Graff, associate professor emeritus. BFA, 1973, Kansas City Art Institute; MFA, 1975, Yale. (1981)

R. Craig Hickman, professor emeritus. BS, 1971, Portland State; MFA, 1981, Washington (Seattle). (1984)

Robert C. James, professor emeritus. BA, 1952, California, Los Angeles; MFA, 1955, Cranbrook Academy of Art. (1955)

George Kokis, professor emeritus. BFA, 1955, MFA, 1961, Alfred. (1973)

Sana Krusoe, associate professor emerita. BA, 1968, Occidental; MFA, 1987, Claremont Graduate. (1990)

Kenneth R. O'Connell, professor emeritus. BS, 1966, MFA, 1972, Oregon. (1977)

Kenneth H. Paul, associate professor emeritus. BA, 1961, MA, 1965, Wyoming. (1970)

Barbara Setsu Pickett, associate professor emerita. BS, 1971, Portland State. (1975)

Dan Powell, associate professor emeritus. BA, 1973, MA, 1977, Central Washington; MFA, 1980, Illinois. (1987)

Margaret Prentice, associate professor emerita. BFA, 1967, Arizona, Tucson; MFA, 1980, Colorado, Boulder. (1986)

Terri Warpinski, professor emerita. BA, 1979, Wisconsin, Green Bay; MFA, 1983, Iowa. (1984)

Undergraduate Studies

Advising and Program Planning

The department stresses the importance of interdisciplinary programs as well as concentrated study. Each student is encouraged to select a faculty advisor in the first year. It is critical to the development of a worthwhile program that the advisor be familiar with and sympathetic to the student's direction and capabilities. The importance of program planning cannot be overemphasized.

Major in Art

The bachelor of arts or bachelor of science degree with a major in art is a liberal arts degree focusing on studio art practice. The curriculum is designed to train students to think critically, communicate clearly, and work creatively. Students develop an understanding of materials and tools, technical skills, strategies of experimentation, as well as fluency in visual languages and the articulation of meaning. They gain an understanding of the larger context of art through courses in art history and theory, opportunities to study abroad, and lectures by visiting artists.

The curriculum includes course work in eight media areas—painting, drawing, sculpture, printmaking, art & technology, photography, ceramics, fibers, and jewelry and metalsmithing. While all art majors share the basic requirements such as the core foundations courses and art history, students have the flexibility to pursue more advanced course work in the areas of primary interest to them.

Declare the Major in Art

Students declare the major at any time for the BA, BS in art degree programs. Forms to declare the major are available at the department art office and on the department website.

Bachelor's Degree Requirements

Whether studying for a bachelor of arts, bachelor of science, or bachelor of fine arts degree, all art majors complete a series of foundations courses called core studios, which are prerequisite to 200-level studio courses. This three-course structure includes an intensive studio investigation of techniques, methods, and concepts common to all areas of studio practice, emphasizing processes of experimentation, a range of technology, and translations between two-dimensional, three-dimensional, and time-based media. The core sequence includes ART 115, 116, and 233.

Bachelor of Arts: Art

Total Credits		68

- ¹ Students must pass the core studio courses with a P or C– or better.
² At least 24 credits of studio work must be completed in residence; 12 of these credits must be upper division.

Bachelor of Fine Arts: Art

The bachelor of fine arts degree is a professional baccalaureate degree. Students apply for admission for the BFA in a particular media area in the last term of their fourth year of study. Students who are working across more than one media area may earn their degree in art, with sponsorship from faculty members in more than one media area. The application process is competitive and includes a portfolio review. Students who have completed a comparable four-year degree in art at another institution may be admitted to the BFA program. Such candidates must satisfy the university's 45-credit residence requirement.

Students must complete the four-year program with a total of 108 credits in art (a total of 180 university credits).

Modern/Contemporary		
Total Credits		108

¹ 20 credits must be concentration studios; 4 credits must be 400-level concentration studio

² At least one course from each categories

Additional Requirement: Math/CS or Language

Math/CS:

- Show proficiency through three terms of math with courses that satisfy BS Math/CS requirements.

Language:

- Completion of at least the third term of the first year in a Second Language taught in the language (103 or Equivalent)

- Satisfactory completion of an examination administered by the appropriate language department
- International students: if your language or instruction in high school was in a language other than English, satisfactory completion of all AEIS courses and WR 121 and either WR 122 or WR 123

Major in Art and Technology

The bachelor of arts or bachelor of science degree with a major in art and technology is a liberal arts degree focusing on digital media in studio art practice. The curriculum broadly encompasses print media, time-based media, and interactivity, grounded in the history and practice of visual art and communication. Through studios, laboratories, and art history and theory courses, students gain an understanding of technical skills, visual design, theory, and the articulation of meaning. The program emphasizes creative thinking, visual communication, experimentation, and innovation.

Art and technology majors share a foundation in core studios and art history with other art majors. This connection to the history and practice of visual communication is a strength of the program.

Computers in the Curriculum

A digital tools application is at the core of the art and technology program. Although campus computer laboratories and facilities are available to students, they are heavily used, and access is limited. Students are required to purchase or have unlimited access to a personal computer. Refer to the College of Design computing services website (<https://blogs.uoregon.edu/designtech/home/computer-purchasing/>) for equipment purchase.

Application to the Major

Students should prepare themselves for study in the broad and inclusive field of art & technology by developing a wide range of interests and skills that might include fine arts, music, computer science, writing, literature, games, popular culture, theater, journalism, and media theory and criticism. Foundation courses—Print Media Digital Arts (ARTD 250), Time-Based Digital Arts (ARTD 251) Interactive Digital Arts (ARTD 252)—provide opportunities to develop general skills and portfolio materials for application to the major.

The major in art and technology is an intensive, limited-enrollment program. Acceptance is competitive and based on documented evidence of potential to excel in the field. Admission screening takes place on a rolling basis and requires review of a portfolio of visual materials submitted by each applicant. These portfolios should display promise and creativity, but need not demonstrate extensive experience. Applications that don't include visual materials are not reviewed.

Complete a four-year program and a minimum of 180 credits, including satisfaction of general-university requirements for a BA or BS degree.

Students apply directly to the art and technology program for admission as majors. The postmark deadline for applications is February 1 for fall term admission. Write or call the Department of Art, or visit the department website for application instructions.

Bachelor's Degree Requirements

All art majors, regardless of degree, complete a series of foundations courses called core studios, which are prerequisite to 200-level studio courses. This three-course structure includes an intensive studio investigation of techniques, methods, and concepts common to all areas of studio practice, emphasizing processes of experimentation, a

range of technology, and translations between two-dimensional, three-dimensional, and time-based media. The core sequence includes ART 115, 116, and 233.

Bachelor of Fine Arts: Art and Technology

The bachelor of fine arts degree with a major in art and technology is a professional baccalaureate degree. Students enrolled in the digital arts BFA are in residence at the University of Oregon in Portland as they develop the body of work for their BFA terminal project.

The application process is competitive and includes a portfolio review. Students who have completed a comparable four-year degree in art at another institution may be admitted to the BFA program. Such candidates must satisfy the university's 45-credit residence requirement.

Students must complete the four-year program with a total of 118 credits in digital arts (a total of 180 university credits).

² At least 24 of these credits must be in digital arts (ARTD) studio courses.

³ A maximum of 6 credits in Internship: [Topic] (ARTD 404) and a maximum of 12 credits in Special Problems: [Topic] (ARTD 406) may be counted toward the 36 upper-division credits.

⁴ Three terms of course

Minor Requirements

Minor in Art

The minor requires 40 credits. Course work must be taken in at least two departmental curricular areas, excluding courses taken to fulfill the core studios requirements.

Students are encouraged to declare the minor at least three terms before graduating. At the time the minor is declared, a departmental advisor may be assigned to help the student develop an individualized program.

• Master of Fine Arts: Art

Graduate Studies

The department offers the master of fine arts (MFA) degree in art.

The graduate program seeks to prepare students for serious artistic practice. The objectives for students are not only to arrive at an accomplished body of work, but also to develop the practices and critical-thinking skills necessary to develop and sustain the work beyond school.

The program focuses on individual studio practice, the cultivation of a visual language, material process, and conceptual approach relevant to each student's intentions and sensibility. Students are challenged to devise strategies of experimentation and research and to cultivate an ability to articulate ideas and critical responses to work. As part of a larger community, students are expected to have a significant understanding of the historical frameworks and the contemporary discourse of art.

The MFA curriculum is designed to provide both interdisciplinary discourse and disciplinary depth. MFA students have much of their course work in common through classes such as Graduate Critique (ART 612), theory and history seminars, and special topics courses. Graduate review and thesis committees are made up of faculty members across the range of media concentrations. Through Issues and Practices seminars and independent studies, students also have opportunities to concentrate on particular areas of specialization. Specialized facilities and equipment are available in the eight media areas that compose the department—art & technology, sculpture, photography, ceramics, jewelry and metalsmithing, painting, printmaking, and fibers.

MFA Requirements

Code	Title	Credits
ART 612	Graduate Critique ¹	15
Two graduate-level art history (ARH) courses; one must be contemporary history		8
One art theory and criticism seminar		4
One writing course		3
Issues and Practices chosen from ARTC, ARTD, ARTF, ARTM, ARTO, ARTP, or ARTR		
ARTS 609	Terminal Creative Project MFA (or Terminal Creative Project M.F.A. chosen from ARTC, ARTD, ARTF, ARTM, ARTO, ARTP, or ARTR)	18
ART 614	Graduate Studio ³	24
Additional art credits		9
Total Credits		81

¹ Five courses

² One course each year

³ Six courses in first two years

A minimum of 24 credits must be graded with a grade of mid-B or better.

Additional Requirements

- Participation in at least two graduate reviews—one prior to reclassification to graduate master's candidacy and a second prior to the MFA exhibition
- Public exhibition of the MFA thesis and final review with the terminal project committee
- Terminal creative project report

Residency Requirements

Nine consecutive terms of full-time enrollment, not including summer session, is the minimum residence requirement. Under special circumstances, an official University of Oregon leave of absence may be requested.

Formal Procedures

Application and Admission

Students applying to the master of fine arts program in the Department of Art are asked to list areas of concentration. You may list one or multiple media areas. At different stages of the admissions process, applications are reviewed by the full faculty and by faculty members specific to your areas of concentration.

Because the principal requirement is that of residence, which may not be waived, graduate transfer credits are not accepted.

Applicants must have a bachelor's degree and are expected to possess a high level of proficiency in their chosen media and a strong commitment to their work and artistic intentions. In their application, candidates should demonstrate an understanding of creative practice in the context of historical and conceptual frameworks. See the department website for specific application requirements and process.

Conditional Status

Applicants accepted by the Division of Graduate Studies are given conditional admission to study for the MFA degree. Until or unless

an entering student requests a specific graduate advisor, one faculty member designated by the department serves as the advisor to conditionally admitted students.

Conditional status of a candidate can be reviewed for reclassification to graduate master's after completion of at least two of the required core courses, one graduate review, at least 30 credits of course work toward the MFA degree, and course work to remedy any background deficiencies. Faculty members from the department conduct a review of the student's academic program in spring term. Following this review, the student's advisor relays a progress report to the student and determines if the student is eligible to change classification to graduate master status.

Terminal Project and Advisor

After reclassification, the student selects a terminal project advisor from the faculty. With this advisor, the candidate selects a terminal project committee of three faculty members. A faculty member from outside the department may serve on the committee. The committee meets with the student for the project proposal, at least one progress report, and the terminal review.

Through these meetings, the committee oversees the development of the terminal project in the final year. The terminal project includes a public exhibition, a written report, and a final review by the committee.

The MFA degree is officially granted after the candidate has fulfilled all requirements, including submission to the department of a project report in a form appropriate to the nature of the project and suitable for binding for use in the Architecture and Allied Arts Library.

Art Courses

ART 101. Understanding Contemporary Art. 4 Credits.

Critical exploration of concepts surrounding and defining the experience of understanding contemporary art. Students are guided by instructors through issues relating to their work and disciplines.

ART 111. The Artist Experience. 4 Credits.

Critical exploration of concepts surrounding and defining contemporary art through the examination of the individual studio practice of members of the art faculty.

ART 115. Surface, Space, and Time. 4 Credits.

Introduces interdisciplinary media processes, critical theory, formal communication design, color theory, skills in objective evaluation and critique, and how materials, processes, and context establish meaning.

ART 116. Core Interdisciplinary Laboratory. 4 Credits.

Rigorous studio projects in the core studio sequence stressing interdisciplinary media transitions and the interrelatedness of conceptual and formal concerns.

Prereq: ART 115.

ART 198. Technical Workshop: [Topic]. 1-3 Credits.

Possible topics include Beginning Woodworking, Book Arts, Professional Practices. Repeatable when change of topic for maximum of 15 credits.

ART 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

ART 233. Drawing I. 4 Credits.

Introduction to basic drawing concepts and practices. Repeatable.

ART 333. Drawing II. 4 Credits.

Emphasizes synthesis of ideas and approaches, complex subjects, investigation, and expression while building on previous drawing skills. Sequence with ART 233.
Prereq: ART 115, 116, 233.

ART 381. Letterpress. 4 Credits.

Experiments with lead and wooden type as related to graphic composition and communication. Repeatable ten times for a maximum of 44 credits.
Prereq: ART 115, 116, 233.

ART 401. Research: [Topic]. 1-12 Credits.

Repeatable.

ART 404. Internship: [Topic]. 1-12 Credits.

Repeatable.

ART 405. Special Problems: [Topic]. 1-12 Credits.

Repeatable.

ART 406. Practicum: [Topic]. 1-12 Credits.

Repeatable.

ART 407. Seminar: [Topic]. 1-4 Credits.

Repeatable.

ART 408. Workshop: [Topic]. 1-6 Credits.

Repeatable.

ART 409. Terminal Creative Project BFA. 1-12 Credits.

Repeatable.

ART 410. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

ART 412. BFA Critique. 3 Credits.

Interdisciplinary critique and discussion course for B.F.A. students.
Prereq: B.F.A. standing. Repeatable once for a maximum of six credits.

ART 507. Seminar: [Topic]. 1-4 Credits.

Repeatable.

ART 508. Workshop: [Topic]. 1-6 Credits.

Repeatable.

ART 510. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

ART 601. Research: [Topic]. 1-12 Credits.

Repeatable.

ART 602. Supervised College Teaching. 1-5 Credits.

Repeatable.

ART 604. Internship: [Topic]. 1-12 Credits.

Repeatable.

ART 605. Special Problems: [Topic]. 1-16 Credits.

Repeatable.

ART 606. Practicum: [Topic]. 1-16 Credits.

Repeatable.

ART 607. Seminar: [Topic]. 1-4 Credits.

Topics change every term. If link to syllabus is not available, contact instructor by e-mail. Repeatable.

ART 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

ART 609. Terminal Creative Project MFA. 1-16 Credits.

Repeatable.

ART 610. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

ART 612. Graduate Critique. 3 Credits.

Repeatable. Interdisciplinary critique and discussion course for MFA students. Repeatable five times for a maximum of 18 credits.

ART 614. Graduate Studio. 4 Credits.

Repeatable. Students engage in a rigorous studio practice through independent production, experimentation, and research. Faculty mentors instruct in rotation. Repeatable five times for a maximum of 24 credits.

Art: Ceramics Courses**ARTC 199. Special Studies: [Topic]. 1-5 Credits.**

Repeatable.

ARTC 255. Introduction to Ceramics. 4 Credits.

Specific skills focus each term. Subjects includes processes related to design development, forming and fabrication, firing methods, glazing.
Prereq: ART 115, ART 116; one from ART 233, PD 223.

ARTC 354. Industrial Ceramics. 4 Credits.

Intermediate-level course focusing on skill development pertinent to ceramics industry. Emphasis on material, tools, techniques, and history. Repeatable three times for a maximum of 16 credits.
Prereq: ART 115, ART 116; one from ART 233, PD 223.

ARTC 355. Intermediate Ceramics: [Topic]. 4-5 Credits.

Advanced processes and concepts. Areas of technical focus include slip casting, glaze and decorator surface embellishment, architectural ceramic, low fire, and raku. Repeatable twice for a maximum of 12 credits.
Prereq: ARTC 255.

ARTC 401. Research: [Topic]. 1-12 Credits.

Repeatable.

ARTC 404. Internship: [Topic]. 1-12 Credits.

Repeatable.

ARTC 405. Reading and Conference: [Topic]. 1-6 Credits.

Repeatable.

ARTC 406. Practicum: [Topic]. 1-12 Credits.

Repeatable.

ARTC 407. Seminar: [Topic]. 1-3 Credits.

Repeatable.

ARTC 408. Workshop: [Topic]. 1-6 Credits.

Repeatable.

ARTC 409. Terminal Creative Project BFA. 1-12 Credits.

Repeatable.

ARTC 410. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

ARTC 455. Advanced Ceramics. 4 Credits.

Students will be exposed to a range of ceramic histories, technical processes, conceptual frameworks, and professional practices to develop an artistic practice. Repeatable ten times for a maximum of 44 credits.
Prereq: ARTC 255, ARTC 354, ARTC 355.

ARTC 507. Seminar: [Topic]. 1-3 Credits.

Repeatable.

ARTC 508. Workshop: [Topic]. 1-6 Credits.

Repeatable.

ARTC 510. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

ARTC 555. Advanced Ceramics. 4 Credits.

Students will be exposed to a range of ceramic histories, technical processes, conceptual frameworks, and professional practices to develop an artistic practice. Repeatable ten times for a maximum of 44 credits.

ARTC 601. Research: [Topic]. 1-12 Credits.

Repeatable.

ARTC 604. Internship: [Topic]. 1-12 Credits.

Repeatable.

ARTC 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

ARTC 606. Practicum: [Topic]. 1-16 Credits.

Repeatable.

ARTC 607. Seminar: [Topic]. 1-4 Credits.

Repeatable.

ARTC 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

ARTC 609. Terminal Creative Project MFA. 1-16 Credits.

Repeatable.

ARTC 610. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

Art: Digital Arts Courses**ARTD 198. Technical Workshop: [Topic]. 1-3 Credits.**

Possible topics include DreamWeaver, InDesign, PhotoShop. Repeatable when change of topic for maximum of 15 credits.

ARTD 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

ARTD 250. Print Media Digital Arts. 4 Credits.

Examines application of print media in contemporary visual culture; explores its use in a fine art context. Introduces digital drawing, digital photo editing, and typographic layout to visually communicate expressive concepts. Laboratories, lectures. Repeatable once for 8 maximum credits.

ARTD 251. Time-Based Digital Arts. 4 Credits.

Explores the notion of time as a medium in relation to contemporary art through which concepts of sequence, narration, scoring, and motion are expressed. Laboratories, lectures. Repeatable once for a maximum of 8 credits.

ARTD 252. Interactive Digital Arts. 4 Credits.

Introduces resources that the computer offers the artist. Concentrates on animation, interaction, and the web as expressive mediums. Laboratories, lectures. Repeatable once for a maximum of 8 credits.

ARTD 256. Introduction to Production. 4 Credits.

Traditional camera, sound, and lighting techniques in production; nonlinear editing; and key theoretical, historical, and aesthetic approaches to video art.

Prereq: J 201, ENG 260; two from ENG 265, 266, 267.

ARTD 350. Digital Drawing. 4 Credits.

Applies technology as a drawing medium to communicate concepts visually. The entire creative process is researched in an experimental studio environment.

Prereq: ART 115, ART 116, ART 233, ARTD 250.

ARTD 360. Digital Imaging. 4 Credits.

Intermediate-level focus on the proper preparation and presentation of digital images for use in print and on screen. Covers color theory.

Prereq: ART 115, 116, 233, ARTD 250.

ARTD 361. Introduction to Animation. 4 Credits.

Introduction to principles of animation, timing, sequence; key frames, in-betweens, and metamorphosis. Uses various methods to record and edit animation tests.

Prereq: ART 115, 116, 233 & ARTD 251 or ENG 260, J 201; two from ENG 265, 266, 267; one from ARTD 256, CINE 270, J 208.

ARTD 362. Digital Letterform. 4 Credits.

Concepts in the history, use, and appreciation of digital typography.

Considers issues in communicative power of type and situations where it functions as message.

Prereq: ART 115, 116, 233, ARTD 250, 251, 252, 350.

ARTD 370. Digital Interactivity. 4 Credits.

Students will learn programming to interactive artworks. This class will include how to program microcontrollers and use electronics to create responsive and expressive interactive systems.

Prereq: ARTD 252, ART 115, ART 116, ART 233.

ARTD 378. Computational Aesthetics. 5 Credits.

Introduces screen-based programming and data navigation; use of motion, duration, and time-based interaction as a means of artistic expression. Students build navigational structures and explore stochastic principles in developing an individual approach to interactivity. Repeatable once for a maximum of 10 credits.

Prereq: ART 115, ART 116, ART 233, ARTD 252.

ARTD 379. Introduction to Video Art. 4 Credits.

Intermediate video-audio production and nonlinear editing, including camera, sound, and lighting techniques. Key theoretical, historical, and aesthetic approaches to time-based art in video and sound are surveyed.

Prereq: ART 115, 116, 233 & ARTD 251 or ENG 260, J 201; two from ENG 265, 266, 267; one from ARTD 256, CINE 270, J 208.

ARTD 401. Research: [Topic]. 1-12 Credits.

Repeatable.

ARTD 404. Internship: [Topic]. 1-12 Credits.

Repeatable.

ARTD 405. Special Problems: [Topic]. 1-12 Credits.

Repeatable.

ARTD 406. Practicum: [Topic]. 1-12 Credits.

Repeatable.

ARTD 407. Seminar: [Topic]. 1-4 Credits.

Repeatable.

ARTD 408. Workshop: [Topic]. 1-6 Credits.

Repeatable.

ARTD 409. Terminal Creative Project BFA. 1-12 Credits.

Repeatable.

ARTD 410. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

ARTD 412. Experimental Animation. 5 Credits.

Intermediate to advanced students explore personal creative practice and experiment with film, video, and computer animation techniques.

Integrates readings, screening, and discussion with production.

Prereq: ARTD 361.

ARTD 413. Emerging Technologies. 5 Credits.

Explores use of emerging technologies in art. Create works using emerging technologies and techniques and explore contemporary artworks, philosophies, and cultural trends.

Prereq: ARTD 370, 378 or 416.

ARTD 415. Video Art: Experimental Film. 4 Credits.

Repeatable. Video and sound art practices, from conceptual deconstructions of the film-video apparatus to self-reflexive socio-political and/or cultural critique, are examined through short format and video installation. Repeatable once for a maximum of 8 credits.

ARTD 416. Programming for Artists. 4 Credits.

Introduces students to the basics of computer programming within an art context. Topics include interaction design, web development, and physical computing programming. Repeatable once for a maximum of 8 credits.

Prereq: ART 115, ART 116, ART 233, ARTD 252.

ARTD 463. Communication Design. 4 Credits.

Repeatable. Explores the communication of ideas and information through visual means. Introduces design process and principles, visual language, and the art of problem solving in visual communication. Repeatable once for maximum of 8 credits.

Prereq: ARTD 350.

ARTD 471. 3-D Computer Imaging. 5 Credits.

Repeatable. Introduces 3-D computer graphic arts: 3-D digital space and form, model building, scene composition, surface properties, lighting, and rendering 3-D images. Repeatable once for maximum of 10 credits.

Prereq: ARTD 350 or 361.

ARTD 472. 3-D Computer Animation. 5 Credits.

Repeatable. Introduces 3-D computer animation arts. Includes time and space in the digital 3-D environment, animation concepts and techniques in 3-D space, production techniques for various multimedia applications. Repeatable once for maximum of 10 credits.

Prereq: ARTD 471.

ARTD 490. Issues and Practices in Digital Arts. 1-5 Credits.

Intensive critique, discussion, readings, and presentations. Repeatable up to nine times.

Prereq: B.F.A. standing.

ARTD 507. Seminar: [Topic]. 1-4 Credits.

Repeatable.

ARTD 508. Workshop: [Topic]. 1-6 Credits.

Repeatable.

ARTD 510. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

ARTD 512. Experimental Animation. 5 Credits.

Intermediate to advanced students explore personal creative practice and experiment with film, video, and computer animation techniques. Integrates readings, screening, and discussion with production.

Prereq: ARTD 361, 395 or equivalent.

ARTD 513. Emerging Technologies. 5 Credits.

Explores use of emerging technologies in art. Create works using emerging technologies and techniques and explore contemporary artworks, philosophies, and cultural trends.

Prereq: ARTD 378 or 4/516.

ARTD 515. Video Art: Experimental Film. 4 Credits.

Repeatable. Video and sound art practices, from conceptual deconstructions of the film-video apparatus to self-reflexive socio-political and/or cultural critique, are examined through short format and video installation. Repeatable once for a maximum of 8 credits.

ARTD 516. Programming for Artists. 4 Credits.

Introduces students to the basics of computer programming within an art context. Topics include interaction design, web development, and physical computing programming. Repeatable once for a maximum of 8 credits.

ARTD 563. Communication Design. 4 Credits.

Repeatable. Explores the communication of ideas and information through visual means. Introduces design process and principles, visual language, and the art of problem solving in visual communication. Repeatable once for maximum of 8 credits.

Prereq: ARTD 362, 394 or equivalent.

ARTD 571. 3-D Computer Imaging. 5 Credits.

Repeatable. Introduces 3-D computer graphic arts: 3-D digital space and form, model building, scene composition, surface properties, lighting, and rendering 3-D images. Repeatable once for maximum of 10 credits.

ARTD 572. 3-D Computer Animation. 5 Credits.

Repeatable. Introduces 3-D computer animation arts. Includes time and space in the digital 3-D environment, animation concepts and techniques in 3-D space, production techniques for various multimedia applications. Repeatable once for maximum of 10 credits.

Prereq: ARTD 4/571.

ARTD 601. Research: [Topic]. 1-12 Credits.

Repeatable.

ARTD 604. Internship: [Topic]. 1-12 Credits.

Repeatable.

ARTD 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

ARTD 606. Practicum: [Topic]. 1-16 Credits.

Repeatable.

ARTD 607. Seminar: [Topic]. 1-4 Credits.

Repeatable.

ARTD 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

ARTD 609. Terminal Creative Project MFA. 1-16 Credits.

Repeatable.

ARTD 610. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

Art: Fibers Courses

ARTF 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

ARTF 270. Introduction to Fibers: [Topic]. 4 Credits.

Skills and conceptual concerns of fibers, pertaining to structural textile forms and embellished or manipulated surfaces. Introduces historical and contemporary work through slides and lectures. Repeatable twice for a maximum of 12 credits.

Prereq: ART 115, ART 116, ART 233.

ARTF 368. Textile Printing. 4 Credits.

Repeatable. Introduction to screen-printing process for fabric and alternative substrates. Textile history, the relevance of printing, and related ideas of decoration, repetition, and appropriation are explored. Repeatable five times for a maximum of 24 credits.

Prereq: ARTF 270.

ARTF 369. Woven Structures. 4 Credits.

Repeatable. Introduction to floor-loom hand weaving. Traditional and experimental use of materials, techniques, and structures are used to understand weaving as a cross-disciplinary practice. Repeatable five times for a maximum of 24 credits.

Prereq: ARTF 270.

ARTF 370. Stitchwork Strategies. 4 Credits.

Exploration of stitch techniques, including embroidery, beading, applique, collage, piecing, and quilting. Topics include public versus private, language and narrative, and dimensional forms. Repeatable three times for a maximum of 16 credits.

Prereq: ARTF 270.

ARTF 401. Research: [Topic]. 1-12 Credits.

Repeatable.

ARTF 404. Internship: [Topic]. 1-12 Credits.

Repeatable.

ARTF 405. Reading and Conference: [Topic]. 1-6 Credits.

Repeatable.

ARTF 406. Practicum: [Topic]. 1-12 Credits.

Repeatable.

ARTF 407. Seminar: [Topic]. 1-3 Credits.

Repeatable.

ARTF 408. Workshop: [Topic]. 1-6 Credits.

Repeatable.

ARTF 409. Terminal Creative Project BFA. 1-12 Credits.

Repeatable.

ARTF 410. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

ARTF 456. Advanced Fibers: [Topic]. 3-5 Credits.

Repeatable. Develops individual studio practice through exploration of contemporary issues in textile-based processes and expansion of the rhetoric of craft.

Prereq: one course from ARTF 267, 268, 269, 270; ARTF 368 or 369.

ARTF 507. Seminar: [Topic]. 1-3 Credits.

Repeatable.

ARTF 508. Workshop: [Topic]. 1-6 Credits.

Repeatable.

ARTF 510. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

ARTF 556. Advanced Fibers: [Topic]. 3-5 Credits.

Repeatable. Develops individual studio practice through exploration of contemporary issues in textile-based processes and expansion of the rhetoric of craft.

ARTF 601. Research: [Topic]. 1-12 Credits.

Repeatable.

ARTF 604. Internship: [Topic]. 1-12 Credits.

Repeatable.

ARTF 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

ARTF 606. Practicum: [Topic]. 1-16 Credits.

Repeatable.

ARTF 607. Seminar: [Topic]. 1-4 Credits.

Repeatable.

ARTF 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

ARTF 609. Terminal Creative Project MFA. 1-16 Credits.

Repeatable.

ARTF 610. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

Art: Metalsmithing and Jewelry Courses**ARTM 199. Special Studies: [Topic]. 1-5 Credits.**

Repeatable.

ARTM 257. Introduction to Jewelry and Metalsmithing. 4 Credits.

Explores developing and constructing jewelry and objects rooted in material culture. Introduces historical and contemporary work through image presentations, lectures, and independent research.

Prereq: Art 115, 116, 233

ARTM 357. Metalsmithing and Jewelry: [Topic]. 3-5 Credits.

Further exploration of techniques related to conceptual problems.

Content varies by term with a focus on individual processes: hollowware, forging, connections, casting, aluminum anodizing, enameling, stone setting. Repeatable.

Prereq: ARTM 257.

ARTM 401. Research: [Topic]. 1-12 Credits.

Repeatable.

ARTM 404. Internship: [Topic]. 1-12 Credits.

Repeatable.

ARTM 405. Reading and Conference: [Topic]. 1-6 Credits.

Repeatable.

ARTM 406. Practicum: [Topic]. 1-12 Credits.

Repeatable.

ARTM 407. Seminar: [Topic]. 1-3 Credits.

Repeatable.

ARTM 408. Workshop: [Topic]. 1-6 Credits.

Repeatable.

ARTM 409. Terminal Creative Project BFA. 1-12 Credits.

Repeatable.

ARTM 410. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

ARTM 457. Metalsmithing and Jewelry: [Topic]. 3-5 Credits.

Emphasis on creative work. Advanced investigation of techniques and process. Content varies by term related to process focus. Includes hollow-ware, forging, connections, casting, aluminum anodizing, enameling, stone setting. Repeatable.

Prereq: ARTM 357.

ARTM 459. Advanced Metalsmithing and Jewelry. 3-5 Credits.

Emphasis on individual creative development. Various conceptual problems. Repeatable.

Prereq: ARTM 357.

ARTM 507. Seminar: [Topic]. 1-3 Credits.

Repeatable.

ARTM 508. Workshop: [Topic]. 1-6 Credits.

Repeatable.

ARTM 510. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

ARTM 557. Metalsmithing and Jewelry: [Topic]. 3-5 Credits.
Emphasis on creative work. Advanced investigation of techniques and process. Content varies by term related to process focus. Includes hollow-ware, forging, connections, casting, aluminum anodizing, enameling, stone setting. Repeatable.
Prereq: ARTM 357 or equivalent.

ARTM 559. Advanced Metalsmithing and Jewelry. 3-5 Credits.
Emphasis on individual creative development. Various conceptual problems. Repeatable.
Prereq: ARTM 357.

ARTM 601. Research: [Topic]. 1-12 Credits.
Repeatable.

ARTM 604. Internship: [Topic]. 1-12 Credits.
Repeatable.

ARTM 605. Reading and Conference: [Topic]. 1-16 Credits.
Repeatable.

ARTM 606. Practicum: [Topic]. 1-16 Credits.
Repeatable.

ARTM 607. Seminar: [Topic]. 1-4 Credits.
Repeatable.

ARTM 608. Workshop: [Topic]. 1-16 Credits.
Repeatable.

ARTM 609. Terminal Creative Project MFA. 1-16 Credits.
Repeatable.

ARTM 610. Experimental Course: [Topic]. 1-6 Credits.

Art: Painting Courses

ARTP 199. Special Studies: [Topic]. 1-5 Credits.
Repeatable.

ARTP 281. Introductory Painting I. 4 Credits.
Basic visual elements and their application to painting as a means of expression. Incorporates traditional subject matter: still life, landscape, figure.
Prereq: ART 115, 116, 233.

ARTP 381. Introductory Painting II. 4 Credits.
Integrates concepts and approaches introduced in Introductory Painting I (ARTP 281) to develop more individual and complex strategies of form and meaning. Sequence with ARTP 281.
Prereq: ARTP 281.

ARTP 390. Intermediate and Advanced Painting. 4 Credits.
Repeatable. Advanced painting concepts and technical processes. Independent initiative is encouraged. Repeatable twice for a total of 12 credits.
Prereq: ARTP 381.

ARTP 391. Intermediate and Advanced Drawing. 4 Credits.
Repeatable. Continued study in observation related to visual and spatial phenomena. Repeatable twice for a total of 12 credits.
Prereq: ART 333.

ARTP 401. Research: [Topic]. 1-12 Credits.
Repeatable.

ARTP 404. Internship: [Topic]. 1-12 Credits.
Repeatable.

ARTP 405. Reading and Conference: [Topic]. 1-6 Credits.
Repeatable.

ARTP 406. Practicum: [Topic]. 1-12 Credits.
Repeatable.

ARTP 407. Seminar: [Topic]. 1-3 Credits.
Repeatable.

ARTP 408. Workshop: [Topic]. 1-6 Credits.
Repeatable.

ARTP 409. Terminal Creative Project BFA. 1-12 Credits.
Repeatable.

ARTP 410. Experimental Course: [Topic]. 1-6 Credits.
Repeatable.

ARTP 481. Advanced Painting Practice. 4 Credits.
Pursuit of individual creative practice and forming the critical intelligence necessary to develop as an artist. Sequence: ARTP 281, 381, 390.
Repeatable up to five times.
Prereq: two terms ARTP 390.

ARTP 507. Seminar: [Topic]. 1-3 Credits.
Repeatable.

ARTP 508. Workshop: [Topic]. 1-6 Credits.
Repeatable.

ARTP 510. Experimental Course: [Topic]. 1-6 Credits.
Repeatable.

ARTP 601. Research: [Topic]. 1-12 Credits.
Repeatable.

ARTP 604. Internship: [Topic]. 1-12 Credits.
Repeatable.

ARTP 605. Reading and Conference: [Topic]. 1-16 Credits.
Repeatable.

ARTP 606. Practicum: [Topic]. 1-12 Credits.
Repeatable.

ARTP 607. Seminar: [Topic]. 1-4 Credits.
Repeatable.

ARTP 608. Workshop: [Topic]. 1-16 Credits.
Repeatable.

ARTP 609. Terminal Creative Project MFA. 1-16 Credits.
Repeatable.

ARTP 610. Experimental Course: [Topic]. 1-6 Credits.
Repeatable.

Art: Photography Courses

ARTO 199. Special Studies: [Topic]. 1-5 Credits.
Repeatable.

ARTO 250. Introduction to Photography. 4 Credits.
Covers basic elements of photography using a DSLR camera and provides a broad-based understanding of photographic practice in a fine art context. Sequence with ARTO 350. Repeatable once for a maximum of 8 credits.
Prereq: ART 115, ART 116, ART 233.

ARTO 350. Film and Darkroom. 4 Credits.
Technical and aesthetic consideration of black-and-white analog photography. Basics of camera, film development, and photographic print controls in the darkroom. Sequence with ARTO 250. Repeatable once for a maximum of 8 credits.
Prereq: ARTO 250.

ARTO 351. Constructed Image Photography. 4 Credits.

Explores processes and concepts extending beyond the single photographic image. Narrative and formal strategies in manipulation and sequencing, exploring the materiality of the photograph. Studio course. Repeatable once for a maximum of 8 credits.

ARTO 352. Creative Large-Format Photography. 4 Credits.

Repeatable. Introduces large-format cameras and their aesthetic possibilities. Four-by-five and eight-by-ten view cameras provided. Includes camera use, film and development, printing skills. Repeatable once for maximum of 8 credits.
Prereq: ARTO 350.

ARTO 401. Research: [Topic]. 1-12 Credits.

Repeatable.

ARTO 404. Internship: [Topic]. 1-12 Credits.

Repeatable.

ARTO 405. Reading and Conference: [Topic]. 1-6 Credits.

Repeatable.

ARTO 406. Practicum: [Topic]. 1-12 Credits.

Repeatable.

ARTO 407. Seminar: [Topic]. 1-4 Credits.

Repeatable.

ARTO 408. Workshop: [Topic]. 1-6 Credits.

Repeatable.

ARTO 409. Terminal Creative Project BFA. 1-12 Credits.

Repeatable.

ARTO 410. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

ARTO 455. Conceptual Strategies in Photography. 4 Credits.

Repeatable. Studies the 1960s conceptual art movement and its influence on contemporary photography practice: open-ended projects respond to various conceptual frameworks. Repeatable once for a maximum of 8 credits.
Prereq: ARTO 250.

ARTO 476. Alternative Photographic Processes. 4 Credits.

Repeatable. Combines painterly concerns with printmaking ideas and photographic principles in a mixed-media approach to contemporary image-making through historic and antiquated processes. Studio course. Repeatable once for a maximum of 8 credits.
Prereq: ARTO 350; one course from ARTO 351, ARTO 352.

ARTO 484. Advanced Photography: [Topic]. 4 Credits.

Repeatable. Investigates photographic practice and philosophy through readings and discussion; students engage in personal studio practice and class critiques. Repeatable once for maximum of 8 credits.
Prereq: ARTO 450.

ARTO 507. Seminar: [Topic]. 1-4 Credits.

Repeatable.

ARTO 508. Workshop: [Topic]. 1-6 Credits.

Repeatable.

ARTO 510. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

ARTO 555. Conceptual Strategies in Photography. 4 Credits.

Repeatable. Studies the 1960s conceptual art movement and its influence on contemporary photography practice: open-ended projects respond to various conceptual frameworks. Repeatable once for a maximum of 8 credits.

ARTO 576. Alternative Photographic Processes. 4 Credits.

Repeatable. Combines painterly concerns with printmaking ideas and photographic principles in a mixed-media approach to contemporary image-making through historic and antiquated processes. Studio course. Repeatable once for a maximum of 8 credits.

ARTO 584. Advanced Photography: [Topic]. 4 Credits.

Repeatable. Investigates photographic practice and philosophy through readings and discussion; students engage in personal studio practice and class critiques. Repeatable once for maximum of 8 credits.
Prereq: ARTO 352; ARTO 353 or 4/554.

ARTO 601. Research: [Topic]. 1-12 Credits.

Repeatable.

ARTO 604. Internship: [Topic]. 1-12 Credits.

Repeatable.

ARTO 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

ARTO 606. Practicum: [Topic]. 1-16 Credits.

Repeatable.

ARTO 607. Seminar: [Topic]. 1-4 Credits.

Repeatable.

ARTO 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

ARTO 609. Terminal Creative Project MFA. 1-16 Credits.

Repeatable.

ARTO 610. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

Art: Printmaking Courses

ARTR 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

ARTR 245. Introduction to Printmaking. 4 Credits.

Introduction to printmaking methodologies. Explores the unique print, multiples, and variable edition; techniques may include monotype, linocut, collagraph, etching, and screen print.
Prereq: ART 115, 116, 233.

ARTR 346. Relief. 4 Credits.

Creative exploration of graphic and conceptual possibilities through woodcut and related relief printing methods; techniques include block cutting, registration, single and multicolor printing. Repeatable once for a maximum of 8 credits.
Prereq: ARTR 245.

ARTR 347. Intaglio. 4 Credits.

Techniques of etching, drypoint, engraving, aquatint, soft ground, lift ground, white ground, embossment, relief plate printing. Emphasizes personal imagery development. Repeatable once for a maximum of 8 credits.
Prereq: ARTR 245.

ARTR 348. Screen Printing. 4 Credits.

Creative exploration of graphic and conceptual possibilities through screen printing; techniques include registration, color, edition printing, and stencil-making using hand-drawn, photographic, and digital methods. Repeatable once for a maximum of 8 credits.
Prereq: ARTR 245.

ARTR 401. Research: [Topic]. 1-12 Credits.

Repeatable.

ARTR 404. Internship: [Topic]. 1-12 Credits.
Repeatable.

ARTR 405. Reading and Conference: [Topic]. 1-6 Credits.
Repeatable.

ARTR 406. Practicum: [Topic]. 1-12 Credits.
Repeatable.

ARTR 407. Seminar: [Topic]. 1-3 Credits.
Repeatable.

ARTR 408. Workshop: [Topic]. 1-6 Credits.
Repeatable.

ARTR 409. Terminal Creative Project BFA. 1-12 Credits.
Repeatable.

ARTR 410. Experimental Course: [Topic]. 1-6 Credits.
Repeatable.

ARTR 446. Intermediate and Advanced Printmaking. 4 Credits.
Further exploration of printmaking techniques and concepts with an emphasis on creating a body of work; includes research, discussion, readings, and critiques. Repeatable.
Prereq: two terms from ARTR 245, 346, 347, 348, 349.

ARTR 507. Seminar: [Topic]. 1-3 Credits.
Repeatable.

ARTR 508. Workshop: [Topic]. 1-6 Credits.
Repeatable.

ARTR 510. Experimental Course: [Topic]. 1-6 Credits.
Repeatable.

ARTR 546. Intermediate and Advanced Printmaking. 4-6 Credits.
Further exploration of techniques and concepts with emphasis on discussion and creative work. Content varies by term and may include color methods, chine collé, monoprints. Repeatable.
Repeatable. Prereq: ARTR 346 or 347 or equivalent.

ARTR 601. Research: [Topic]. 1-12 Credits.
Repeatable.

ARTR 604. Internship: [Topic]. 1-12 Credits.
Repeatable.

ARTR 605. Reading and Conference: [Topic]. 1-16 Credits.
Repeatable.

ARTR 606. Practicum: [Topic]. 1-16 Credits.
Repeatable.

ARTR 607. Seminar: [Topic]. 1-4 Credits.
Repeatable.

ARTR 608. Workshop: [Topic]. 1-16 Credits.
Repeatable.

ARTR 609. Terminal Creative Project MFA. 1-16 Credits.
Repeatable.

ARTR 610. Experimental Course: [Topic]. 1-6 Credits.
Repeatable.

Art: Sculpture Courses

ARTS 199. Special Studies: [Topic]. 1-5 Credits.
Repeatable.

ARTS 288. Sculpture I: Mixed Media. 3-5 Credits.
Investigation of 3-D forms in space using a range of processes.
Repeatable three times for a maximum of 20 credits.
Prereq: ART 115, ART 116, ART 233.

ARTS 393. Sculpture II: [Topic]. 3-5 Credits.
Integration of concepts and materials in sculpture; investigation of individual methodology. Topics vary by term: wood, moldmaking, steel.
Reading, presentation on issues and artists. Repeatable when topic changes.
Prereq: ARTS 288.

ARTS 401. Research: [Topic]. 1-12 Credits.
Repeatable.

ARTS 404. Internship: [Topic]. 1-12 Credits.
Repeatable.

ARTS 405. Reading and Conference: [Topic]. 1-6 Credits.
Repeatable.

ARTS 406. Practicum: [Topic]. 1-12 Credits.
Repeatable.

ARTS 407. Seminar: [Topic]. 1-3 Credits.
Repeatable.

ARTS 408. Workshop: [Topic]. 1-6 Credits.
Repeatable.

ARTS 409. Terminal Creative Project BFA. 1-12 Credits.
Repeatable.

ARTS 410. Experimental Course: [Topic]. 1-6 Credits.
Repeatable.

ARTS 491. Methodologies: [Topic]. 4 Credits.
Explores conceptually driven topics in sculpture such as formless, assemblage, and new landscapes. Sequence with ARTS 288, ARTS 393, ARTS 493. Repeatable twice for a maximum of 12 credits.
Prereq: ARTS 393.

ARTS 493. Advanced Sculpture. 4 Credits.
Designed for students who have completed several upper-division sculpture courses. Individual and group critiques; development and articulation of individual voice. Repeatable once for a maximum of 8 credits.
Prereq: ARTS 288, ARTS 393.

ARTS 507. Seminar: [Topic]. 1-3 Credits.
Repeatable.

ARTS 508. Workshop: [Topic]. 1-6 Credits.
Repeatable.

ARTS 510. Experimental Course: [Topic]. 1-6 Credits.
Repeatable.

ARTS 591. Methodologies: [Topic]. 4 Credits.
Explores conceptually driven topics in sculpture such as formless, assemblage, and new landscapes. Repeatable twice for a maximum of 12 credits.

ARTS 601. Research: [Topic]. 1-12 Credits.
Repeatable.

ARTS 604. Internship: [Topic]. 1-12 Credits.
Repeatable.

ARTS 605. Reading and Conference: [Topic]. 1-16 Credits.
Repeatable.

ARTS 606. Practicum: [Topic]. 1-16 Credits.
Repeatable.

ARTS 607. Seminar: [Topic]. 1-4 Credits.
Repeatable.

ARTS 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

ARTS 609. Terminal Creative Project MFA. 1-16 Credits.

Repeatable.

ARTS 610. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

Historic Preservation

James Buckley, Program Director70 NW Couch Street, Floor 4R
Portland, Oregon 97209

The University of Oregon's Historic Preservation Program is best described as having broad cultural concerns with a technical emphasis. Attention is given to historic places, buildings, and landscapes in terms of their specific forms, materials, construction, and use. The cultural and theoretical context in which they were developed is addressed, as is the impact of time upon their materials, meanings, and needs. The technologies, interpretations, and means for sustaining the presence of historic places in the future are also emphasized.

Students gain an understanding of historic resources and the processes for their preservation. This includes core courses in research methods, preservation history and theory, architectural history, and the economic, legal, and administrative processes of preservation. Students choose from three focal areas:

1. sustainable preservation theory, design, and technology
2. cultural resource management
3. resource identification and evaluation

Other focal areas are feasible but must be approved in advance by the submission of a curriculum plan by the student by the second term of the student's first year.

Courses are augmented by fieldwork in the urban, suburban, and rural areas of the region. Oregon contains Native American sites, rural buildings and landscapes developed by U.S. and European immigrant pioneers from the 1830s, as well as urban development since the 1840s. More recent transformations of the landscape by various ethnic groups and technological innovations are also explored. Extensive instructional use of the region takes place through an emphasis on the cultural and technical aspects of vernacular resources, field trips, participation in projects at the university, and through local community groups. There is also frequent involvement with the area's professionals, officials, and agencies concerned with historic resources.

Recent opportunities for experience include window restoration and traditional earth construction workshops, documentation for a Historic American Buildings Survey for the Alaska Regional Office of the National Park Service, U.S. Department of the Interior; a preservation field guide for the community of Ebey's Landing National Historical Reserve; a condition assessment and stabilization of Gilbert's Cabin in North Cascades National Park; a condition assessment of Frank Lloyd Wright's Usonian Gordon House in Silverton, Oregon; the documentation of the Finney House frontier cabin in Nevada City, Montana; the limestone roof replacement on a late sixteenth-century stone cottage on the island of Drvenik Veli, Croatia; and the reconstruction of the Ferry House porch in Ebey's Landing National Historical Reserve, Whidbey Island, Washington.

In addition to providing hands-on training in what might be considered mainstream preservation activities, the program emphasizes the importance of cultural conservation including issues of diversity, identity, and community development. This includes a concern not only for how various ethnic groups shaped buildings and landscapes in the distant past, but how similar settings are reproduced by cultural groups in the present. Individual research efforts by students are augmented by visiting lecturers, such as those by Boyd Pratt, Jean Carroon, and Gunny Harboe.

Beyond completing core and focal area courses, each student is required to complete individualized study, including reading and thesis research, a summer internship, and a thesis or terminal project. Some former students have chosen to develop specialties and concurrent master's degrees in closely related fields such as architecture, landscape architecture, and planning, public policy and management; others have created more unique combinations with studies in museums, economic development, and Russian, East European, and Eurasian studies. Besides encouraging students to develop an individualized course of study, the program is characterized by students who exhibit self-motivation and individual initiative. These traits, which are not only expected but are also necessary for successful completion of the program, contribute to the professional growth of students. Graduates of the Historic Preservation Program are employed in preservation-related fields over a wide geographic area. Some choose to pursue work in the private sector as specialists in architectural offices or as consultants. Others serve in the public sector with municipal planning departments, state historic preservation offices, or federal cultural resources divisions. Some graduates choose to work with nonprofit agencies, while others select careers in preservation and restoration.

Faculty

Christopher Bell, instructor (historic preservation). BA, 1998, Williams; MS, 2005, Oregon. (2009)

James Buckley, associate professor; Venerable Chair in Historic Preservation. BA, 1982, Yale; MCRP, 1986, PhD, 2000, California, Berkeley. (2016)

Elizabeth Carter, instructor (historic preservation). BA, 1988, MS, 1994, Oregon. (2005)

Eric L. Eisemann, instructor (legal issues). BA, 1974, Knox; MA, 1980, Western Kentucky; JD, 1994, Lewis and Clark. (1984)

Kingston Heath, professor (historic preservation). BA, 1968, Lake Forest; MA, 1975, Chicago; MA, 1978, PhD, 1985, Brown. (2003)

Rick Minor, courtesy adjunct instructor (archaeology). BA, 1972, California State, Fullerton; MA, 1973, PhD, 1983, Oregon. (2009)

Suzana Radivojevic, adjunct instructor (wood science). BScFE, 1997, Belgrade; PhD, 2006, Toronto. (2013)

Kirk Ranzetta, instructor (historic preservation, planning). BA, 1994, Mary Washington; MA, 1996, PhD, 2006, Delaware. (2006)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Participating

Howard Davis, architecture

Keith Eggener, history of art and architecture

Mark Eischeid, landscape architecture

Mark Gillem, architecture

Maile Hutterer, history of art and architecture

Renee A. Irvin, planning, public policy and management

Robert L. Thallon, architecture

Jenny Young, architecture

- **Minor**

Undergraduate Studies

Important note: *The Historic Preservation Program is not currently accepting new undergraduate minors during the restructuring of the School of Architecture and Allied Arts into the College of Design.*

Historic preservation is an inherently interdisciplinary field. The minor is particularly well-suited for students studying anthropology, architecture, history, the history of art and architecture, landscape architecture, and planning, public policy and management. Undergraduate students, no matter their major, are eligible to enroll in the minor, however.

The interdisciplinary minor in historic preservation requires a minimum of 27 credits as described below. The lowest accepted passing grade for courses used to complete the undergraduate minor in historic preservation is a C– or better. Some courses required for the minor are only offered every other year.

Minor Program

Code	Title	Credits
Core Courses		
AAAP 411	Introduction to Historic Preservation	3
Select three of the following:		12
AAAP 408	Workshop: [Topic] (Pacific Northwest Field School)	
AAAP 421	American Architecture from a Preservation Perspective I	
AAAP 422	American Architecture from a Preservation Perspective II	
AAAP 423	American Architecture from a Preservation Perspective III	
AAAP 441	Legal Issues in Historic Preservation	
AAAP 451	Historic Survey and Inventory Methodology	
OXEU 488	Overseas Experimental Program: Europe	
Related Courses		
Select courses from the following:		12
AAAP 431	National Register Nomination	
AAD 462	Cultural Policy	
ANTH 449	Cultural Resource Management	
ARCH 430	Architectural Contexts: Place and Culture	
ARCH 440	Human Context of Design	
ARCH 470	Building Construction	
ARH 465	American Architecture II	
ARH 466	American Architecture III	

GEOG 471	North American Historical Landscapes
GEOG 481	GIScience I
PPPM 422	Grant Proposal Writing
PPPM 432	Justice and Urban Revitalization
PPPM 442	Sustainable Urban Development
PPPM 448	Collaboration
PPPM 452	Public Participation in Diverse Communities
PPPM 480	Nonprofit Management
PPPM 481	Fundraising for Nonprofit Organizations

Total Credits

27

Courses from other university departments may be substituted with approval of the program director.

To declare the minor, please complete the undergraduate minor intent form (<http://hp.uoregon.edu/sites/hp.uoregon.edu/files/downloads/HP%20Minor%20Intent%20Form%202013.pdf>) and schedule an advising appointment with the program director, James Buckley (jbuckley@uoregon.edu), to clarify your goals for enrolling in the program and map out your curriculum. Once complete, submit your signed intent form to the program office.

- **Master of Science**

Graduate Studies

The program offers a master of science (MS) degree in historic preservation. Although no particular training is preferred, students whose backgrounds are primarily in historic preservation, architecture, landscape architecture, and architectural history are most prepared for this program. Course work includes training in the social sciences, preservation theory and law, the characteristics of historic buildings and landscapes, historic building technology, and the procedures for evaluating and recording historic sites and buildings.

The program is administered by the Historic Preservation Committee, an interdepartmental committee in the School of Architecture and Environment.

Admission

Applications to the graduate program should contain the following:

1. Completed online application and fee
2. Biographical summary
3. Educational and professional summary
4. Statement of intent
5. Selected examples of written material, graphic work, or both
6. Official transcripts of all college work
7. Three letters of recommendation, preferably from academic or professional sources

Students whose first language is not English must submit Test of English as a Foreign Language (TOEFL) scores of at least 88.

Students who want to participate in the program through the Western Regional Graduate Program (WRGP) should inquire at the historic preservation office or the Division of Graduate Studies.

General university regulations about graduate admission are described in the **Division of Graduate Studies** section of this catalog.

The application deadline is January 15 for admission the following fall term. Requests for more information and application materials should be directed to the office staff of the Historic Preservation Program at histpres@uoregon.edu (p. 635). Information is also available on the program website.

Master of Science Requirements

The MS degree in historic preservation requires 73 credits in five areas: historic preservation core courses, architectural history core courses, focal area courses, approved electives, and individualized study courses, which include thesis or terminal project, research, and an internship. Students choose one of three focal areas in which to specialize—sustainable preservation theory, design, and technology; cultural resource management; or resource identification and evaluation.

Code	Title	Credits
Historic Preservation Core		
AAAP 508	Workshop: [Topic] (Pacific Northwest Field School)	2
AAAP 511	Introduction to Historic Preservation	3
AAAP 531	National Register Nomination	3
AAAP 541	Legal Issues in Historic Preservation	3
AAAP 551	Historic Survey and Inventory Methodology	3
AAAP 610	Experimental Course: [Topic] (Thesis Proposal)	3
Architectural History Core		
Select two of the following: ¹		8
AAAP 521	American Architecture from a Preservation Perspective I	
AAAP 522	American Architecture from a Preservation Perspective II	
AAAP 523	American Architecture from a Preservation Perspective III	
Select one additional course (from the approved list) about the history of architecture, landscape architecture, interior architecture, or the history of building construction ¹		4
Focal Area		
Courses (see Focal Areas section below)		18
Electives		
Courses in other focal areas, from approved list of courses, or in other departments with advisor approval		7
Individualized Study²		
AAAP 601	Research: [Topic]	2
AAAP 609	Terminal Project (Internship I)	2
AAAP 607	Seminar: [Topic] (Internship II)	1
AAAP 503	Thesis ³	12
or AAAP 611	Terminal Project	
Total Credits		71

¹ Courses must be taken for a letter grade.

² An internship is included in the Individualized Study requirements.

³ Before enrolling in Thesis (AAAP 503) or Terminal Project (AAAP 611), the student must develop a project proposal and have it approved by a committee of two or more members, at least one of whom must be University of Oregon faculty members. When the thesis or terminal project nears completion, the student must present the results of the project to faculty members and students and gain final approval of the project's documentation from the faculty committee. Requirements for the final presentation are listed in the current graduate program guide.

All HP Core and the History courses must be taken for a letter grade.

The Division of Graduate Studies requires that graduate students take a minimum of 9 600-level credits. If students opt for a terminal project, this requirement is easily met. If students opt for a thesis, the program does not offer enough 600-level credits to meet this requirement since the internship credit amount changed.

Focal Areas

The three focal areas described in this section reflect the particular interest areas and professional careers that are traditionally sought by program graduates. To focus their studies, students select courses from one of the three areas. Those who want to pursue a broader range of interests may select courses from more than one of the focal areas and develop an approved alternative focal area. It is the student's responsibility to construct such an alternative focal area and present it to the program director for approval no later than the second quarter of the first year of study. A full list of courses for each focal area are available on the program website: archenvironment.uoregon.edu/hp/graduate (<https://archenvironment.uoregon.edu/hp/graduate/>).

- **Sustainable Preservation Theory, Design, and Technology.** Focusing on the practice of preservation, emphasis is placed on the skills needed to research, plan, and direct the restoration and adaptive reuse of buildings, places, and landscapes as well as to determine the appropriate levels of treatment.
- **Cultural Resource Management.** Embodied in historic preservation is the management of cultural resources. This focal area provides the legal, planning, and management skills needed for individuals to work within organizations that support efforts to manage cultural resources in both the public and private sectors.
- **Resource Identification and Evaluation.** This focal area reveals the insights and investigative tools for archival and cultural resource research to establish the history and context of buildings, interior spaces, and landscapes that determined settlement, organization, and a sense of place.

Courses

AAAP 199. Special Studies: [Topic]. 1-5 Credits.
Repeatable.

AAAP 400M. Temporary Multilisted Course. 1-5 Credits.
Repeatable.

AAAP 405. Special Problems: [Topic]. 1-12 Credits.
Repeatable when topic changes.

AAAP 406. Practicum: [Topic]. 1-12 Credits.
Repeatable.

AAAP 407. Seminar: [Topic]. 1-5 Credits.
Repeatable.

AAAP 408. Workshop: [Topic]. 1-5 Credits.
Repeatable up to five times.

AAAP 410. Experimental Course: [Topic]. 1-5 Credits.

Current topics are American Building Construction, American Architecture from a Preservation Perspective, Research Methods. Repeatable.

AAAP 411. Introduction to Historic Preservation. 3 Credits.

History, evolution, modern concepts, and professional techniques of historic preservation.

AAAP 421. American Architecture from a Preservation Perspective I. 4 Credits.

American built environment from the colonial era to the federal period. Stylistic development and building analysis for preservation; cultural, historical, and physical contexts within building forms.

AAAP 422. American Architecture from a Preservation Perspective II. 4 Credits.

American built environment from the federal period to 1893. Stylistic development and building analysis for preservation; cultural, historical, and physical contexts within building forms.

AAAP 423. American Architecture from a Preservation Perspective III. 4 Credits.

American built environment from 1893 to the present. Stylistic development and building analysis for preservation; cultural, historical, and physical contexts within building forms.

AAAP 431. National Register Nomination. 3 Credits.

Provides information and instruction on all aspects of the National Register program and process. Facilitates completion of registration form. Prereq: AAAP 411.

AAAP 438. Building Pathology: Wood. 4 Credits.

Examines scientific fundamentals of material wood properties in building construction and the application of that knowledge to preservation of wood in historic buildings.

AAAP 441. Legal Issues in Historic Preservation. 3 Credits.

Examines constitutional, statutory, and common law affecting historic preservation. Covers First Amendment, eminent domain, due process, police powers, regulatory "takings," and aesthetic zoning.

AAAP 451. Historic Survey and Inventory Methodology. 3 Credits.

Examines how historic inventories help communities plan for wise use of historic resources. Includes complete reconnaissance and survey documentation for historic properties and development of historic context statement.

AAAP 500M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

AAAP 503. Thesis. 1-12 Credits.

Repeatable.

AAAP 507. Seminar: [Topic]. 1-5 Credits.

Repeatable.

AAAP 508. Workshop: [Topic]. 1-5 Credits.

Repeatable up to five times.

AAAP 510. Experimental Course: [Topic]. 1-5 Credits.

Current topics are American Building Construction, American Architecture from a Preservation Perspective, Research Methods. Repeatable.

AAAP 511. Introduction to Historic Preservation. 3 Credits.

History, evolution, modern concepts, and professional techniques of historic preservation.

AAAP 521. American Architecture from a Preservation Perspective I. 4 Credits.

American built environment from the colonial era to the federal period. Stylistic development and building analysis for preservation; cultural, historical, and physical contexts within building forms.

AAAP 522. American Architecture from a Preservation Perspective II. 4 Credits.

American built environment from the federal period to 1893. Stylistic development and building analysis for preservation; cultural, historical, and physical contexts within building forms.

AAAP 523. American Architecture from a Preservation Perspective III. 4 Credits.

American built environment from 1893 to the present. Stylistic development and building analysis for preservation; cultural, historical, and physical contexts within building forms.

AAAP 531. National Register Nomination. 3 Credits.

Provides information and instruction on all aspects of the National Register program and process. Facilitates completion of registration form. Prereq: AAAP 511.

AAAP 538. Building Pathology: Wood. 4 Credits.

Examines scientific fundamentals of material wood properties in building construction and the application of that knowledge to preservation of wood in historic buildings.

AAAP 541. Legal Issues in Historic Preservation. 3 Credits.

Examines constitutional, statutory, and common law affecting historic preservation. Covers First Amendment, eminent domain, due process, police powers, regulatory "takings," and aesthetic zoning.

AAAP 551. Historic Survey and Inventory Methodology. 3 Credits.

Examines how historic inventories help communities plan for wise use of historic resources. Includes complete reconnaissance and survey documentation for historic properties and development of historic context statement.

AAAP 601. Research: [Topic]. 1-6 Credits.

Repeatable.

AAAP 602. Supervised College Teaching. 1-5 Credits.

Repeatable.

AAAP 604. Internship: [Topic]. 1-9 Credits.

Repeatable.

AAAP 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

AAAP 606. Practicum: [Topic]. 1-16 Credits.

Repeatable.

AAAP 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

AAAP 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

AAAP 609. Terminal Project. 1-16 Credits.

Repeatable.

AAAP 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

AAAP 611. Terminal Project. 1-12 Credits.

Repeatable.

History of Art and Architecture

Akiko Walley, Department Head

237A Lawrence Hall
5229 University of Oregon
Eugene, Oregon 97403-5229

The Department of the History of Art and Architecture offers study in the principal and architectural traditions of Asia, the Americas, Europe, and the Mediterranean. Courses are appropriate for students interested in history, art, and the larger cultural context of society. They are also suitable for students intending to concentrate on the practice of art or environmental design. The undergraduate program prepares students for a range of careers (including those in the business world, art museums, and galleries) as well as graduate studies in art history. The graduate program emphasizes both breadth and depth, and it is characterized by close working relationships between students and the faculty.

Students explore global history, culture, and society through art and architecture from antiquity to the present day. Trained to analyze the broad spectrum of human creativity and expression, art history students are natural ambassadors of pluralism and tolerance, developing skills in appreciating visual and material culture to make them true global citizens—ideally equipped to correlate historical events and concerns with important contemporary and international phenomena.

The history of art and architecture program at Oregon is comprehensive in scope. Students learn at least one ancient or modern language associated with their main area of interest, and courses examine cultural production from around the globe. The department trains students to become guardians and advocates for culture and the arts within Oregon, the United States, and the world.

Because of this rigorous training in critical thinking and communication, art history is not merely a preprofessional major for future art historians. An art history degree prepares students to embark on an array of professional careers, including those in business, education, law, private and nonprofit organizations, professional writing, and publishing. More specialized careers include art-based professions in museums, galleries, archives, and cultural institutes.

Financial Assistance

The department offers a number of awards and scholarships for undergraduate and graduate students in art history:

- Amy and Ross Kari Scholarship in Art History
- Mr. and Mrs. Eric G. Clarke Scholarship in Oriental Art
- Gloria T. Lee Graduate Scholarship in Art History
- Gloria T. Lee Scholarship in Art History
- Spontenburgh Endowment for the History of Aesthetics of Sculpture
- Marian C. Donnelly Award in Art History (Book Award)
- Marion Dean Ross Award in Architectural History (Book Award)

Support for travel is available through the Marian C. Donnelly Student Award, the Graduate Travel Award, and the Amy and Ross Kari Travel Grant. Students may also seek scholarship aid through the College of Design and the university's financial aid office.

Faculty

Nina Amstutz, professor (18th- and 19th-century art). BA, 2004, MA 2008, PhD, 2013, Toronto. (2014)

Joyce Cheng, associate professor (modern art). BA, 2001, Northwestern; MA, 2003, PhD, 2009, Chicago. (2009)

Keith Eggener, Marion Dean Ross Distinguished Professor in Architectural History (architectural history). BA, 1985, Portland State; MA, 1989, Washington (Seattle); MA, 1993, Stanford; PhD, 1995, Stanford. (2013)

Mariachiara Gasparini, assistant professor (Chinese and Central Asian art and architecture). BA, 2005, University of Naples; MA, 2011, Sotheby's Institute of Art; PhD, 2015, Heidelberg University. (2002)

James Harper, associate professor (Renaissance and baroque art). BA, 1987, Trinity; PhD, 1998, Pennsylvania. (2000)

Maile Hutterer, associate professor (medieval art and architecture). BA, 2004, California, Santa Barbara; PhD, 2011, New York University. (2014)

Kate Mondloch, professor (contemporary art). BS, 1994, Georgetown; MA, 2000, PhD, 2005, California, Los Angeles. (2005)

Emily Scott, assistant professor (history of art and architecture and environmental studies); BA, Bryn Mawr; PhD, 2010, California, Los Angeles. (2018)

Kristen Seaman, professor (Greek and Roman art and architecture). BA, 1994, Yale University, MA, 2009, PhD, 2009, California, Berkeley. (2015)

Akiko Walley, Maude I. Kerns Professor of Japanese Art; associate professor (Japanese art). BA, 1998, MA, 2001, Aoyama Gakuin; AM, 2004, PhD, 2009, Harvard. (2009)

Emeriti

Charles H. Lachman, associate professor. AB, 1971, Temple; MA, 1974, McMaster; PhD, 1985, Toronto. (1992)

Jeffrey M. Hurwit, professor emeritus. AB, MA, 1971, Brown; MPhil, 1972, PhD, 1975, Yale. (1980)

Esther Jacobson-Tepfer, professor emerita. BA, 1962, MA, 1964, PhD, 1970, Chicago. (1966)

Andrew Morrogh, associate professor emeritus. BA, 1966, Jesus College, Oxford; MA, 1973, PhD, 1983, Courtauld Institute, University of London. (1993)

Kathleen D. Nicholson, professor emerita. BA, 1969, Connecticut; MA, 1971, PhD, 1977, Pennsylvania. (1995)

Leland M. Roth, professor emeritus. BArch, 1966, Illinois; MPhil, 1970, PhD, 1973, Yale. (1978)

W. Sherwin Simmons, professor emeritus. BA, 1967, Yale; MA, 1975, PhD, 1979, Johns Hopkins. (1973)

Richard A. Sundt, associate professor emeritus. BA, 1967, Indiana; MA, 1973, PhD, 1981, Wisconsin, Madison. (1982)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

- Bachelor of Arts
- Art History Minor

Undergraduate Studies

The major combines the study of art and architectural history, leading to the bachelor of arts (BA) degree. The department regularly offers courses

on art, architecture, and visual culture from the following time periods and regions:

- Ancient Mediterranean
- Early Modern
- East Asian (Chinese and Japanese)
- European
- Medieval
- Middle Eastern/West Asian and Central Asian
- Modern and Contemporary
- North American and Latin American
- Recent courses in other areas of focus including Indian, Korean, African, and Islamic traditions

Declaring the Art History Major

Students may declare the major online (<https://design.uoregon.edu/arthistory/apply/major/>) and should consult with the Student Services office in the College of Design for guidance on departmental and university-wide requirements. Majors must take art history courses for letter grades and pass them with a C– or better.

Bachelor of Arts Degree Requirements

Majors in art history are required to complete the language requirement as described under the university's bachelor of arts requirements (p. 26).

Because some languages are required for advanced research and graduate study in art history as well as other humanistic disciplines, majors are urged to choose one of them to satisfy the BA requirement. For example, Greek and Latin are the most commonly used languages in art-historical study about the Ancient Mediterranean; Chinese and Japanese are essential for most areas of East Asian art history; French, German, and Italian are the most commonly used languages in European art-historical research; and Portuguese and Spanish are the most commonly used languages in Latin American art-historical research. Substitution of other languages may be appropriate to a field of interest. Students are urged to consult with their advisors when selecting a language for study.

Code	Title	Credits
General Requirements		
Studio art (e.g., drawing, sculpture, or design)		4
Two years of a second language to satisfy BA degree requirements		27
ARH 411	Critical Approaches to Art Historical Study	
Choose four of the following survey courses:		16
ARH 150	Introduction to Visual Culture	
ARH 204	History of Western Art I	
ARH 205	History of Western Art II	
ARH 206	History of Western Art III	
ARH 208	History of Chinese Art	
ARH 209	History of Japanese Art	
ARH 210	Contemporary Asian Art and Architecture	
ARH 211	Survey of Latin American Arts	
ARH 314	History of World Architecture I	
ARH 315	History of World Architecture II	
Eight upper-division lecture and seminar courses ¹		32

¹ Choose any 300- and 400-level courses with the exception of History of World Architecture I (ARH 314) and History of World Architecture II (ARH 315). Four of the eight courses must be at the 400 level. Of the eight required upper-division courses, two courses must be taken in any three of the following four chronological breadth areas: ancient, medieval, early modern, modern-contemporary. The remaining two courses are electives and may be taken in any area. At least four of the eight required upper-division courses must be taken in residence at the University of Oregon.

Declaring the Art History Minor

Students may declare the minor online (<https://design.uoregon.edu/arthistory/apply/minor/>) and should consult with the Student Services office in the College of Design for guidance on departmental and university-wide requirements. Majors must take art history courses for letter grades and pass them with a C– or better.

Minor Requirements

Three lower-division and four upper-division art history courses (totaling 26 credits minimum) are required to complete the minor. At least 20 credits must be completed in residence at the University of Oregon (nontransfer courses), and all art and architectural history courses (subject code ARH) required for the minor must be passed with letter grades of C– or better.

Lower-division courses include any 100- or 200-level ARH courses as well as History of World Architecture I (ARH 314) and History of World Architecture II (ARH 315). Upper-division courses include any 300- or 400-level ARH courses (with the exception of ARH 314 and 315).

Honors Program

Majors in the history of art and architecture department may enroll in the department's honors essay program if they have

1. completed two lower-division and four upper-division art history courses (one of which must be taken in residence at the University of Oregon)
2. completed Critical Approaches to Art Historical Study (ARH 411) with a grade of A– or better
3. an average GPA of 3.50 or higher in art history courses
4. submitted the departmental honors enrollment form (available online) to the director of undergraduate studies, indicating the support of a faculty advisor

Students are urged to present a first draft of the essay to the faculty advisor six weeks before the end of the term, and a final draft must be submitted two weeks before the end of the same term.

The honors essay must demonstrate the student's ability to formulate a significant research problem. The essay should have approximately 20–25 pages of text, not including notes, bibliography, and illustrations. A copy of the honors essay is deposited in departmental files.

Honors candidates who maintain a 3.50 GPA in all courses required for the art history major are awarded departmental honors upon the approval of their essay by the faculty advisor.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Bachelor of Arts in Art History

Course	Title	Credits	Milestones
First Year			
Fall			
WR 121	College Composition I	4	
	First term of first-year second-language sequence	4	
	Lower-division art history course (subject code ARH)	4	
	General-education course in social science (first subject)	4	
Credits		16	
Winter			
WR 122	College Composition II (WR 123 or WR 123 recommended for art history majors) or College Composition III	4	
	Second term of first-year second-language sequence	4	
	General-education course in social science (first subject)	4	
	General-education course in science (first subject)	4	
Credits		16	
Spring			
	Third term of first-year second-language sequence	4	
	Lower-division ARH course	4	
	General-education course in social science (second subject)	4	
	General-education course in science (first subject)	4	
Credits		16	
Total Credits		48	
Second Year			
Fall			
	First term of second-year second-language sequence	4	
	Lower-division ARH course	4	
	General-education course in social science (on any subject)	4	
	General-education course in science (second subject)	4	
Credits		16	
Winter			
	Second term of second-year second-language sequence	4	
	Lower-division ARH course	4	
	General-education course in arts and letters (first subject)	4	
	General-education course in science (on any subject)	4	
Credits		16	
Spring			
	Third term of second-year second-language sequence	4	Complete language requirement

300-level ARH course (except ARH 314 or 315)	4
General-education course in arts and letters (first subject)	4
General-education course in arts and letters (on any subject)	4
Apply for art history major at beginning of term; begin taking upper-division ARH courses; consider applying for Gloria Tovar Lee Scholarship	
Credits	16
Total Credits	48

Course	Title	Credits	Milestones
Third Year			
Fall			
	Art studio course	4	Complete art history studio requirement
ARH 411	Critical Approaches to Art Historical Study	4	
	Upper-division elective course	4	
	Elective course	4	
Credits		16	
Winter			
	400-level ARH course	4	
	Upper-division elective courses	8	
	Elective course	4	
Credits		16	
Spring			
	Upper-division elective course	4	
	400-level ARH course	4	
	Upper-division elective course	4	
	Elective course	4	
This term, consider applying for book prizes and/or Gloria Tovar Lee Scholarship; consider applying to honors program			
Credits		16	
Total Credits		48	

Course	Title	Credits	Milestones
Fourth Year			
Fall			
	300- or 400-level ARH course	4	
	400-level ARH course	4	
	Upper-division elective course	4	
	Elective course	4	
This term, consider applying for travel-research awards; also consider applying for book prizes (spring deadline)			
Credits		16	
Winter			
	Upper-division ARH course	4	Complete upper-division requirement

400-level ARH course	Complete 400-level requirement	4
Upper-division elective course		4
Elective course		4
Credits		16
Spring		
Upper-division elective course	Complete 180 minimum credits and 62 upper- division credits; complete honors essay (if relevant)	4
Credits		4
Total Credits		36

- Master of Arts (p. 640)
- Doctor of Philosophy

Graduate Studies

The Department of the History of Art and Architecture offers programs leading to the master of arts (MA) and the doctor of philosophy (PhD) degrees in art history. Applications to the graduate program are considered once a year (beginning on January 15) for the following fall term. Applications and supporting documents, including Graduate Record Examinations scores, must be received by January 15.

Master of Arts Requirements

Candidates for the MA degree must complete 45 credits in courses approved by the student's advisor, as well as satisfy the general requirements of the Division of Graduate Studies for residence. Of the 45 credits, a minimum of 36 must be graduate credits in research-based courses, taken for a letter grade.

1. Thesis (ARH 503) or a terminal project, 9 credits
2. **Graduate Seminar Requirements and First-Year Seminar Series.** Of the 36 graduate credits required, 16 must be in graduate seminars, including 4 credits in Graduate Studies in Art History (ARH 611), 8 credits in Seminar: [Topic] (ARH 607), and at least 4 credits (excluding ARH 611) in a course or courses led by your primary advisor
3. **Electives.** A minimum of 12 credits of elective courses; a maximum of 8 credits may be taken outside of the department with an advisor's permission
4. **Distribution Requirement.** Students must undertake course work in three of four historic areas: prehistoric-ancient, medieval, early modern, and modern-contemporary. Students may petition to apply a thematic or non-period-specific course toward the distribution requirement by demonstrating substantial work in the appropriate area. While it is not a requirement, students are strongly recommended to pursue both Western and non-Western courses to fulfill their distribution and elective requirements

5. **Foreign Language Requirement.** The department requires that MA degree candidates demonstrate reading proficiency in at least one foreign language. The chosen language must be approved by the student's advisor and should be relevant to the student's scholarly interests. Language proficiency is typically demonstrated in one of several ways:

- by passing a written language exam given by the department;
- by providing an official transcript from the University of Oregon or elsewhere that shows satisfactory completion of the second or third year of the language, as determined by the student's primary advisor;
- by presenting evidence of having achieved equivalent results on a standardized foreign-language placement test.

The foreign language requirement may be waived for a student who has completed a high school or higher degree that employed the target language as the primary language of instruction. Students who expect to pursue a PhD should also acquire a research capability in additional languages, as appropriate to the student's area of study, as soon as possible in their academic program.

Additional information regarding the MA is available from the Department of the History of Art and Architecture office or on the website.

Doctor of Philosophy Requirements

To fulfill the requirements for the PhD, students are expected to take a total of 72 credits, selected in consultation with the student's advisor. Of the 72 credits, at least 36 credits must be in ARH courses and taken for a letter grade. Of the 36 graduate credits required, a minimum of 12 must be in graduate seminars (600 level), including Graduate Studies in Art History (ARH 611). Students are required to complete all required course work before taking their field exams. A maximum of 4 credits of ARH 601 Research: [Topic] or Special Problems: [Topic] (ARH 605) can be applied to the 20 credits in the student's major and minor fields, if those credits are taken with the major or minor field examiner and if they are taken for a letter grade.

Students are expected to declare a major field of study by spring term of their first year. Students are required to take a minimum of 12 credits in their major field and at least 8 credits in their minor field at the graduate level (500 or 600 level) prior to taking their field exams.

Students entering the PhD program with an MA in hand may petition to waive some course work requirements to more quickly progress through the program. University policy specifies that at least one full-time academic year—the residency year—must be completed following admission into the doctoral program. During this year of residency, the student is expected to make progress toward the degree by completing course credits and satisfying doctoral degree requirements. The residency year consists of three consecutive terms of full-time UO course work toward the degree, with a minimum of 9 completed graduate credits a term. Courses in Research: [Topic] (ARH 601), Special Problems: [Topic] (ARH 605), and other individualized study options may be a part of the 9 credits, but the majority of the year of residency is expected to consist of regular graduate course work.

Foreign Language Requirement

Students should acquire a research capability in two foreign languages appropriate to the student's area of study as soon as possible in their academic program, unless otherwise approved by the student's advisor.

Advancement to Candidacy

Students are required to complete all required course work before taking their field exams. Students are officially advanced to candidacy in the PhD program upon completion of two written field exams: one in a major field in art and architectural history and one in a minor field in art and architectural history or another discipline with departmental approval. The department offers field examinations in the following categories:

- Greek
- Roman
- Latin American
- North American
- Medieval
- Modern
- Contemporary
- Chinese
- Japanese

Additional information regarding the PhD is available from the Department of the History of Art and Architecture office or on the website.

Courses

ARH 150. Introduction to Visual Culture. 4 Credits.

This course introduces to students to a wide variety of methods for looking at and analyzing images and objects of visual culture, drawing on concepts and methods from art history, anthropology, archaeology, and media studies.

ARH 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

ARH 204. History of Western Art I. 4 Credits.

Historical survey of visual arts. Selected works of painting, sculpture, architecture, and other arts studied in relation to the ancient cultures producing them.

ARH 205. History of Western Art II. 4 Credits.

Historical survey of visual arts. Selected works of painting, sculpture, architecture, and other arts studied in relation to the medieval to early Renaissance cultures producing them.

ARH 206. History of Western Art III. 4 Credits.

Historical survey of visual arts. Selected works of painting, sculpture, architecture, and other arts studied in relation to the Renaissance to modern cultures producing them.

ARH 208. History of Chinese Art. 4 Credits.

Historical survey of the visual arts of China. Selected works of painting, sculpture, architecture, and other arts studied in relation to the culture in which they were produced.

ARH 209. History of Japanese Art. 4 Credits.

Historical survey of the visual arts of Japan. Selected works of painting, sculpture, architecture, and other arts studied in relation to the culture in which they were produced.

ARH 210. Contemporary Asian Art and Architecture. 4 Credits.

Broad survey of modern and contemporary Asian art, architecture, and film.

ARH 211. Survey of Latin American Arts. 4 Credits.

Overview of the rich tradition of visual arts within Latin America from the pre-Columbian period, through the art of the Spanish vicerealties, to the contemporary artistic landscape.

ARH 314. History of World Architecture I. 4 Credits.

Survey of global architectural developments from prehistory to the Middle Ages.

ARH 315. History of World Architecture II. 4 Credits.

Survey of global architectural developments from c. 1400 to the present.

ARH 321. Ancient Jewish Art. 4 Credits.

A survey of Jewish art and architecture throughout the ancient Mediterranean (e.g., Aegina, Beth Alpha, Corinth, Dura Europos, Jerusalem, Masada, Ostia, Rome, Sardis, Sepphoris, Qumran)

ARH 323. Roman Art & Architecture. 4 Credits.

This course is a survey of the art and architecture of Republican and Imperial Rome throughout the Mediterranean and Near East. Considering the Roman world as a multicultural space, it explores works at locations such as Alexandria, Athens, Dura Europos, Jerusalem, Petra, Pompeii, and Rome.

ARH 325. Islamic Art & Architecture. 4 Credits.

This course is a survey of visual culture from the Islamic world, beginning with its origins in the seventh century CE.

ARH 326. The Acropolis of Athens. 4 Credits.

The principal architectural and sculptural monuments of the Athenian Acropolis. Emphasis on works from the Age of Pericles. Selected literary texts read in translation.

ARH 327. Medieval Art. 4 Credits.

Introduction to the most important monuments of the Middle Ages, spanning the fourth through the 15th centuries with the primary focus on Western Europe and Byzantium.

ARH 341. Italian Renaissance Art. 4 Credits.

Painting and sculpture of the Renaissance and mannerist periods analyzed in terms of style, iconography, theory, patronage, and social context.

ARH 343. Northern Renaissance Art. 4 Credits.

Painting and graphic arts in the Netherlands, Germany, and France in the 15th and 16th centuries. Van Eyck, Durer, Holbein, other leading artists. Harper.

ARH 344. Northern Baroque Art. 4 Credits.

North Netherlandish, Flemish, and French art of the late 16th and 17th centuries. Changes in patrons, markets, and meaning for art. Rembrandt, Vermeer, Rubens, Poussin, other leading artists.

ARH 348. Rome in Age of Bernini. 4 Credits.

Painting, sculpture, architecture, urbanism in 17th-century Rome with special reference to Bernini, the dominant figure. Patronage and society in the city of the popes.

ARH 351. 19th-Century Art. 4 Credits.

Introduction to artistic movements in Europe from 1780 to the 1880s including neoclassicism, romanticism, realism, and impressionism.

ARH 352. Art of the Enlightenment. 4 Credits.

Explores European art of the 18th century. Lectures cover major movements—rococo, chinoiserie, neoclassicism, early romanticism—in the context of changing social values, the scientific revolution, secularization, and globalization.

ARH 353. Modern Art, 1880–1950. 1-4 Credits.

Modern art from postimpressionism to abstract expressionism in relation to intellectual and historical developments.

ARH 354. Contemporary Art. 4 Credits.

Survey of contemporary art in the West from 1945 to the present in relation to historical, social, cultural, and political concerns.

ARH 358. History of Design. 4 Credits.

Design from the late 18th century to the present--considered in relation to social, political, and technological developments.

ARH 359. History of Photography. 4 Credits.

Photography from the early 19th-century to the present, aesthetics of the medium, its relationship to painting and the graphic arts, and its social role.

ARH 368. Arts and Visual Cultures of Climate Change. 4 Credits.

Critical exploration of climate change and its representation in contemporary art and visual culture (e.g., satellite imagery, activism, science fiction)

ARH 372. Arts of Colonial Latin America. 4 Credits.

This course examines the role of art and architecture in colonial Latin America (ca. 1492- 19th century).

ARH 373. 20th Century Latin American Art. 4 Credits.

Examines art and architecture across 20th-century Latin America, with special emphasis on the formation and expression of ethnic, cultural, regional, and national identity through them.

ARH 382. Arts of the Silk Road. 4 Credits.

This course examines cross-cultural and artistic encounters between Asia, Africa, Europe, and the Americas by studying, diasporas and migrations, religions, urban settlements, trade, and slavery.

ARH 387. Chinese Buddhist Art. 4 Credits.

Introduction to selective aspects of the history of Buddhist art in China. Emphasis on sculpture and painting.

ARH 399. Special Studies: [Topic]. 1-5 Credits.

Offerings vary from year to year and reflect the interests of faculty members. Repeatable.

ARH 401. Research: [Topic]. 1-5 Credits.

Repeatable.

ARH 403. Thesis. 1-6 Credits.

Repeatable.

Prereq: ARH 401; major standing.

ARH 404. Internship: [Topic]. 1-5 Credits.

Repeatable.

ARH 405. Reading and Conference: [Topic]. 1-5 Credits.

Repeatable.

ARH 406. Practicum: [Topic]. 1-12 Credits.

Repeatable.

ARH 407. Seminar: [Topic]. 1-5 Credits.

Repeatable.

ARH 408. Workshop: [Topic]. 1-5 Credits.

Repeatable.

ARH 409. Terminal Project. 1-12 Credits.

Repeatable.

ARH 410. Experimental Course: [Topic]. 1-5 Credits.

Offerings vary from year to year and reflect the interests of faculty members. Repeatable.

ARH 411. Critical Approaches to Art Historical Study. 4 Credits.

Methods used to study art history (formalist, iconographical, social history of art, etc). Materials are drawn from art historical scholarship on art from a variety of regions and periods.

Prereq: Recommend a minimum of six art history courses previously, ideally a combination of lower- and upper-division courses.

ARH 421. Ancient Mediterranean Art: [Topic]. 4 Credits.

This course examines art and architecture from the ancient Mediterranean world, exploring material from a particular region/period or through a particular critical/thematic lens. Repeatable when the topic changes.

ARH 425. Medieval Art and Architecture: [Topic]. 4 Credits.

An in-depth study of a discrete theme within the field of medieval art and architecture. Themes will vary from year to year and will reflect the interests of faculty members. Repeatable twice for a maximum of 12 credits when the topic changes.

ARH 440. Museology. 4 Credits.

This course covers the history and theory of museums. Through readings, written assignments, lecture and classroom discussion we engage issues of museum ethics, the role of museums in society, and curatorial practice. The scope includes art museums as well as other types of museums.

Prereq: Enrollment in the Museum Studies Certificate Program, the Art History Graduate Program, Art History Major or the Art History Minor.

ARH 450. Romanticism in the Visual Arts. 4 Credits.

The course offers an overview of the diverse artists and interests of the Romantic Movement in European art, while critically examining Romanticism as a period term.

ARH 451. Studies in 19th-Century Art: [Topic]. 4 Credits.

Focuses on a specific area, movement, period or issue in visual art of the long 19th century (c. 1770–1914). Repeatable once for a total of 8 credits.

ARH 453. Modern Art: [Topic]. 4 Credits.

This courses focuses on a specific area, movement, period or issue in modern art (c. 1880-1950), specifically a geographical area, movement such as Bauhaus or Dada, or on seminal artist of modernism and the avant-garde.

ARH 456. World Architecture Since 1960. 4 Credits.

Examines key themes, designs and structures, conversations, events, and people in architectural history, theory, and practice from around the world, from the early 1960s up to the present.

Prereq: ARH 206 or ARH 315.

ARH 457. Contemporary Art: [Topic]. 4 Credits.

Topics are unified by their emphasis on the historical, socio-cultural, political, and theoretical conditions associated with art since 1945.

Offerings vary from year to year and reflect the interests of faculty members. Repeatable twice for a maximum of 12 credits.

ARH 462. Modern Architecture. 4 Credits.

Examines modern architecture from 1885 to 1965, and the discourse surrounding it. Emphasis on the meanings and manifestations of modernity as these evolved in Europe, the US, and around the world.

Prereq: ARH 206, ARH 315.

ARH 465. American Architecture II. 4 Credits.

Major developments in American architecture, 1800–1900. Includes the rediscovery of national symbols, the impact of industry, and the national focus on the single-family residence.

Prereq: ARH 206 or ARH 315.

ARH 466. American Architecture III. 4 Credits.

Major developments in American architecture, 1885 to the present. Emphasizes academicism, the impact of international modernism, and the rediscovery of eclectic symbolism.

Prereq: ARH 206 or ARH 315.

ARH 471. Latin American Art History: [Topic]. 4 Credits.

Topics related to arts of Latin America from the Pre-Columbian period to the present. Offerings vary from year to year and reflect the interests of faculty members. Repeatable twice for a maximum of 12 credits.

ARH 481. Chinese Art: [Topic]. 4 Credits.

Topics are unified by their emphasis on the historical, socio-cultural, political, and theoretical conditions associated with Chinese art. Offerings vary from year to year and reflect the interests of faculty members. Repeatable twice for a maximum of 12 credits.

ARH 485. Japanese Art: [Topic]. 4 Credits.

Explores the issues surrounding material cultures of Japan from prehistoric to contemporary periods. Repeatable twice for a maximum of 12 credits when the topic changes.

ARH 488. Japanese Prints. 4 Credits.

The woodblock print in Japan as part of the cultural, social, and political conditions.

ARH 503. Thesis. 1-9 Credits.

Repeatable.

ARH 507. Seminar: [Topic]. 1-5 Credits.

Repeatable.

ARH 508. Workshop: [Topic]. 1-5 Credits.

Repeatable.

ARH 510. Experimental Course: [Topic]. 1-5 Credits.

Offerings vary from year to year and reflect the interests of faculty members. Repeatable.

ARH 521. Ancient Mediterranean Art: [Topic]. 4 Credits.

This course examines art and architecture from the ancient Mediterranean world, exploring material from a particular region/period or through a particular critical/thematic lens.

ARH 525. Medieval Art and Architecture: [Topic]. 4 Credits.

An in-depth study of a discrete theme within the field of medieval art and architecture. Themes will vary from year to year and will reflect the interests of faculty members. Repeatable twice for a maximum of 12 credits when the topic changes.

ARH 540. Museology. 4 Credits.

This course covers the history and theory of museums. Through readings, written assignments, lecture and classroom discussion we engage issues of museum ethics, the role of museums in society, and curatorial practice. The scope includes art museums as well as other types of museums.

Prereq: Enrollment in the Museum Studies Certificate Program, the Art History Graduate Program, Art History Major or the Art History Minor.

ARH 550. Romanticism in the Visual Arts. 4 Credits.

The course offers an overview of the diverse artists and interests of the Romantic Movement in European art, while critically examining Romanticism as a period term.

ARH 551. Studies in 19th-Century Art: [Topic]. 4 Credits.

Focuses on a specific area, movement, period or issue in visual art of the long 19th century (c. 1770–1914). Repeatable once for a total of 8 credits.

ARH 553. Modern Art: [Topic]. 4 Credits.

This courses focuses on a specific area, movement, period or issue in modern art (c. 1880-1950), specifically a geographical area, movement such as Bauhaus or Dada, or on seminal artist of modernism and the avant-garde.

ARH 556. World Architecture Since 1960. 4 Credits.

Examines key themes, designs and structures, conversations, events, and people in architectural history, theory, and practice from around the world, from the early 1960s up to the present.

ARH 557. Contemporary Art: [Topic]. 4 Credits.

Topics are unified by their emphasis on the historical, socio-cultural, political, and theoretical conditions associated with art since 1945. Offerings vary from year to year and reflect the interests of faculty members. Repeatable twice for a maximum of 12 credits.

ARH 562. Modern Architecture. 4 Credits.

Examines modern architecture from 1885 to 1965, and the discourse surrounding it. Emphasis on the meanings and manifestations of modernity as these evolved in Europe, the US, and around the world.

ARH 565. American Architecture II. 4 Credits.

Major developments in American architecture, 1800–1900. Includes the rediscovery of national symbols, the impact of industry, and the national focus on the single-family residence.

ARH 566. American Architecture III. 4 Credits.

Major developments in American architecture, 1885 to the present. Emphasizes academicism, the impact of international modernism, and the rediscovery of eclectic symbolism.

ARH 571. Latin American Art History: [Topic]. 4 Credits.

Topics related to arts of Latin America from the Pre-Columbian period to the present. Offerings vary from year to year and reflect the interests of faculty members. Repeatable twice for a maximum of 12 credits.

ARH 581. Chinese Art: [Topic]. 4 Credits.

Topics are unified by their emphasis on the historical, socio-cultural, political, and theoretical conditions associated with Chinese art. Offerings vary from year to year and reflect the interests of faculty members. Repeatable twice for a maximum of 12 credits.

ARH 585. Japanese Art: [Topic]. 4 Credits.

Explores the issues surrounding material cultures of Japan from prehistoric to contemporary periods. Repeatable twice for a maximum of 12 credits when the topic changes.

ARH 588. Japanese Prints. 4 Credits.

The woodblock print in Japan as part of the cultural, social, and political conditions.

ARH 601. Research: [Topic]. 1-9 Credits.

Repeatable.

ARH 603. Dissertation. 1-9 Credits.

Repeatable.

ARH 604. Internship: [Topic]. 1-9 Credits.

Repeatable.

ARH 605. Special Problems: [Topic]. 1-16 Credits.

Repeatable.

ARH 606. Practicum: [Topic]. 1-16 Credits.

Repeatable.

ARH 607. Seminar: [Topic]. 1-5 Credits.

Departmental offerings vary from year to year and reflect the specialized interests of faculty members. Repeatable.

ARH 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

ARH 609. Terminal Project. 1-12 Credits.

Repeatable.

ARH 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

ARH 611. Graduate Studies in Art History. 4 Credits.

Introduction to bibliographic resources research methodology, and critical issues in art history.

Prereq: major standing.

ARH 614. Terminal Project. 1-12 Credits.

Student-directed research and writing intended to culminate in the production of a master's level project under the supervision of a faculty member.

Interior Architecture

Kyu-ho Ahn, Department Head

541-346-3656

210 Lawrence Hall

1206 University of Oregon

Eugene, Oregon 97403-1206

The Department of Interior Architecture provides a comprehensive professional design education within a unique interdisciplinary structure. By integrating subject-area course work with studio design exploration, the program prepares students to act as independent problem-solvers and valuable design-team members.

Shared course work with architecture in the early stages of the undergraduate or graduate curricula provides an interdisciplinary context for study and learning, leading to advanced courses and studies that explore theory, technology, and practice.

Central to the department is the design studio, where students gain experience with the design of interior spaces and elements and focus on the issues and conditions related to adapting existing sites and buildings. Topical intermediate studios concentrate on specific design issues, human factors, and building types. Specialized intermediate studios focus on the programming, design, and fabrication of furniture, and on construction documents that illustrate a small design project. A final independent two-term comprehensive project caps the design studio experience.

Preparation

High school and college students interested in interior architecture should prepare themselves by taking courses in the following subjects:

1. Fine arts
2. Social sciences
3. Sciences
4. Humanities

Students are encouraged to travel in order to broaden their experiences related to environmental design.

Design Camp

The College of Design offers a summer career exploration program for college-bound students at the school's facilities in the White Stag Block in downtown Portland. Students explore architecture, product design, and the digital arts in the city and in the studio. Information about Design Camp (<https://aaa.uoregon.edu/portland/design-camp-2014/>) may be obtained on the website or by calling the College of Design in Portland.

Careers

Most students prepare for entering professional practice with architecture and interior design firms. Other opportunities exist in related areas such as lighting design, furniture design, facilities and space planning, sales or product marketing, branding and environmental design, exhibition design, and other activities related to the designed environment.

Accreditation

Undergraduate and graduate professional-degree curricula in interior architecture are accredited by the Council for Interior Design Accreditation (CIDA). At the University of Oregon, the bachelor of interior architecture and the master of interior architecture degree programs are accredited by CIDA. The post-professional master of science in interior architecture (MS) program is not accredited. Admission to the MS program is restricted to applicants who already hold a CIDA-accredited degree or the international equivalent. The interior architecture department is also accredited by the National Association of Schools of Art and Design (NASAD).

Internship, Certification, and Licensure

State laws governing interior design registration and licensure vary widely. In those states that have adopted legislation, a professional degree from a CIDA-accredited program is the preferred prerequisite. Candidates must pass an examination established by the National Council of Interior Design Qualification (NCIDQ) to become licensed as interior designers in those states with licensing or certification. Rules vary from state to state but typically two years of professional experience are required prior to taking the exam. Students should visit the websites of the CIDA, NASAD, or NCIDQ for further information about accreditation and licensure.

The Interior Architecture Curriculum

The professional curriculum in interior architecture has two principal objectives:

1. Broad inquiry into the integrative nature of environmental design
2. A comprehensive professional education that develops the ability to design interior environments ranging from intimate personal spaces to large-scale facilities in a variety of site contexts

Curriculum requirements are published in the *UO Catalog* and in the department's *Advising Handbook*, which includes sample course sequences, grading policies, an explanation of how student progress is monitored through the program, and other advising information. Each student is assigned a faculty advisor and encouraged to consult that advisor for specific information. In addition, a departmental advisor is available for degree checks and other academic advising.

Professional Curriculum

The professional curriculum for the bachelor of interior architecture program and the master of interior architecture program include required design studios, subject area courses, and professional electives.

Architectural and Interior Design Studios

The architectural and interior design studios are social and interactive environments where students work cooperatively with their peers under the guidance of faculty members with frequent input from practicing interior designers, architects, and related-field experts as well as representatives of communities served by the studio's design explorations. Students learn to respond to complex environmental and

cultural contexts through design studio projects that explore interior space within a variety of site contexts. Introductory studios emphasize creativity, design communication skills, and critical thinking fundamental to the design process; intermediate studios emphasize integration of interior architecture subjects with critical design issues; advanced studios emphasize the comprehensive integration of these elements. Student performance in all design studios is graded on a pass/no pass basis and evaluated through written evaluations and exit interviews with faculty members.

Interior Architecture Subjects

Subject area course work develops theory, knowledge, and skills in interior architecture and related design disciplines, with an emphasis on learning interior architecture content in the context of design. This course work develops design skills and examines the influences of place, human activity, spatial order, structure, construction, environmental control, professional practice, and history on the practice of interior design.

Residence Requirements

For transfer students to earn the bachelor of interior architecture (BIArch) or professional master of interior architecture (MIArch) degree, the following minimum course work must be successfully completed in residence:

Code	Title	Credits
IARC 488/588	Interior Design Comprehensive Project I	8
IARC 489/589	Interior Design Comprehensive Project II	8
	Interior architecture design courses	12
	Interior architecture courses	30
	Upper-division, writing-intensive general electives ¹	12
Total Credits		70

¹ Courses that delve into the literature of academic subjects outside the subject areas of architecture (ARCH) and interior architecture (IARC).

Leave of Absence

See policy statement in the **Architecture** section of this catalog.

Computer Literacy Requirement

Introductory architecture courses presume a knowledge of computer operations, general-use software, and Internet communications. Students lacking preparation may draw on resources at A&AA Technology Services, the University Teaching and Learning Center, the Library and Learning Commons, or Information Technology services. By the end of their first year in the bachelor's or master's program, students are expected to have achieved basic literacy in computer graphics as an integrated tool for architectural design—diagramming, two-dimensional drawing, image processing, three-dimensional modeling, accurate sun casting, parametric modeling, and presentation methods. Students must have an awareness of building information modeling, digital fabrication, building performance analysis software, and geographic information systems.

Students are required to have a high-speed laptop computer and a specified complement of software. Each year the department reviews its software and hardware recommendations. Minimum hardware specifications and software requirements are posted on the department website.

Off-Campus Study

Students may participate in off-campus and international study programs hosted by the Department of Architecture, the Historic Preservation Program, the Department of Landscape Architecture, and the Office of International Affairs. See the **Architecture** section of this catalog for more information.

Faculty

Kyu-Ho Ahn, associate professor. See **Architecture**.

Virginia Cartwright, associate professor. See **Architecture**.

Solmaz Mohammadzadeh Kive, assistant professor. See **Architecture**.

Esther Hagenlocher, associate professor. See **Architecture**.

Linda K. Zimmer, associate professor. See **Architecture**.

- Bachelor of Interior Architecture (p. 645)
- **Minor in Interior Architecture**

Undergraduate Studies

The undergraduate programs in interior architecture consist of the bachelor of interior architecture (BIArch) degree and a minor in interior architecture. The curriculum of the five-year professional BIArch degree program is highly structured the first two years and more flexible the last three. This flexibility allows each student to establish a study sequence according to individual interests and needs. Transfer students should be aware that an accelerated program is normally possible only for students who transfer from an accredited interior architecture or interior design program.

Prospective applicants who have a four-year undergraduate degree in any field must apply to the graduate program (see Graduate Admission).

Major Requirements: 225 credits

University requirements include group-satisfying requirements and general electives. They are intended to ensure each student receives an education rich in the liberal arts tradition. Undergraduate students should complete most of the general-education and group-satisfying requirements prior to entry into their first intermediate design studio.

Please see the department website for a complete description of these requirements.

Required Courses

Code	Title	Credits
Design Studios		
ARCH 283 & ARCH 284	Architectural Design I and Architectural Design II	12
ARCH 383	Architectural Design III	6
IARC 484	Interior Design ^{1,2}	24
IARC 486	Furniture Design	6
IARC 487	Working Drawings	6
IARC 488 & IARC 489	Interior Design Comprehensive Project I and Interior Design Comprehensive Project II	16
General Theory		
IARC 204	Understanding Contemporary Interiors	4

Design Media		
ARCH 202	Design Skills	3
ARCH 222	Introduction to Architectural Computer Graphics	4
ARCH 423	Media for Design Development: [Topic]	3
Design Arts		
ARCH 440	Human Context of Design	4
IARC 444	Furniture: Theory and Analysis	3
IARC 445	Comprehensive Project Preparation	3
IARC 447	Color Theory and Application for the Built Environment	3
ARCH 450	Spatial Composition	4
Design Technology		
ARCH 470	Building Construction	4
IARC 471	Interior Construction Elements	3
IARC 472	Interior Finishes and Design Application	3
IARC 473	Working Drawings in Interior Architecture	4
ARCH 492	Environmental Control Systems II	4
IARC 492	Electric Lighting	3
Professional Context		
ARCH 417	Context of the Architectural Profession	4
History of Art, Architecture, and Interior Design		
IARC 474	History of Interior Architecture I	3
IARC 475	History of Interior Architecture II	3
IARC 476	History of Interior Architecture III	3
Two additional architectural history courses taught in the Department of the History of Art and Architecture or the School of Architecture and Environment		8
Electives		
300- or 400-level ARCH or IARC courses		6
Approved 300- or 400-level courses in allied fields		7
Total Credits		156

¹ Repeatable studio, to be taken four times.

² Site Planning and Design (LA 489)/Site Planning and Design (LA 589) or Architectural Design (ARCH 484)/Architectural Design (ARCH 584) may be substituted.

BIArch Sample Plan of Study

Most students graduate in the spring term of their fifth year. However, students who enter the program with a year or more of required university credits may be able to accelerate through the curriculum and graduate in spring of their fourth year.

First Year

Fall		Credits
WR 121	College Composition I	4
IARC 204	Understanding Contemporary Interiors	4
ARH 314	History of World Architecture I	4
Social science course		4
Winter		
WR 122 or 123	College Composition II	4
ARCH 202	Design Skills	3
ARCH 283	Architectural Design I	6

Science course		4

Spring		
IARC 489	Interior Design Comprehensive Project II	8
Upper-division general- education elective		4
Total Credits:		223

¹ General-education and subject area electives can be taken any term and in any order.

Minor Requirements: 26 credits

Code	Title	Credits
Subject Area (Nonstudio) Requirements		
IARC 204	Understanding Contemporary Interiors	4
One intermediate studio is required for programs within the School of Architecture and Environment		6

Subject Area Electives ²		16-22
IARC 407	Seminar: [Topic]	
ARCH 440	Human Context of Design	
IARC 444	Furniture: Theory and Analysis	
IARC 447	Color Theory and Application for the Built Environment	
IARC 471	Interior Construction Elements ¹	
IARC 472	Interior Finishes and Design Application ¹	
IARC 473	Working Drawings in Interior Architecture ¹	
IARC 474	History of Interior Architecture I	
IARC 475	History of Interior Architecture II	
IARC 476	History of Interior Architecture III	
IARC 492	Electric Lighting ¹	
Total Credits		29

¹ Course may not be taken by students outside of the Department of Architecture, with the exception of landscape architecture students.

² For students majoring in the Department of Architecture, 16 elective credits are required; for all others, 22 are required.

Undergraduates who are enrolled in any major can apply to the minor. Completed applications including supporting academic records are submitted to the Department of Architecture office. Applicants are notified when their applications have been approved. Because the department's first obligation is to its majors, it cannot guarantee availability of courses for minors. Minors may register if space is available after the needs of majors have been met. Enrollment in the minor program is limited. If the department is unable to accommodate additional minor students, it may suspend admittance to the minor program until space becomes available.

Undergraduate Admission

Grounded in a unique multidisciplinary structure, the Department of Interior Architecture offers a comprehensive accredited professional interior design curriculum. Students are prepared to act as independent interior designers; collaborative experiences teach them to be valuable team members in today's complex and dynamic design atmosphere.

Interest in the program exceeds the capacity of the department. Approximately equal numbers of first-year and transfer (including change-of-major) applicants are admitted to the first year of the bachelor of architecture program each year. A smaller number of applicants from other CIDA-accredited or -recognized programs are admitted as advanced transfer students. Prospective applicants to the BIArch degree program or the minor in interior architecture may find information about the program and application requirements on the department website.

- Master of Interior Architecture (p. 648)
- Master of Science in Interior Architecture (p. 649)

Graduate Studies

There are two graduate degree programs in interior architecture: the professional master of interior architecture (MIArch) degree and the postprofessional master of science in interior architecture (MS) degree.

Students interested in pursuing a concurrent master's degree in architecture and interior architecture may find information about the combined program requirements and application procedures on the Department of Interior Architecture website.

Professional Master of Interior Architecture Degree Requirements

The professional, CIDA-accredited master of interior architecture (MIArch) degree program prepares students for careers in interior design practice and careers in allied professions that contribute to shaping the built environment.

The department offers two tracks of study. Track I typically takes 10 terms to complete. Track II is a six-term advanced placement program.

Track I

Students enrolled in the MIArch Track I program must complete the following:

Code	Title	Credits
Design Studios		
IARC 584	Interior Design (four terms)	24
IARC 586	Furniture Design	6
IARC 587	Working Drawings	6
IARC 588 & IARC 589	Interior Design Comprehensive Project I and Interior Design Comprehensive Project II	16
ARCH 680	Introductory Graduate Design	6
ARCH 681	Introductory Graduate Design	6
Media and Process Skills		
ARCH 611	Graduate Design Process	3
	Architectural computing course	2
Intermediate Media		
ARCH 523	Media for Design Development: [Topic]	3
Design Arts		
ARCH 540	Human Context of Design	4
IARC 545	Comprehensive Project Preparation	3
IARC 547	Color Theory and Application for the Built Environment	3
ARCH 550	Spatial Composition	4
Furniture		
IARC 544	Furniture: Theory and Analysis	3
Design Technology		
ARCH 570	Building Construction	4
IARC 571	Interior Construction Elements	3
IARC 572	Interior Finishes and Design Application	3
IARC 573	Working Drawings in Interior Architecture	4
ARCH 592	Environmental Control Systems II	4
IARC 592	Electric Lighting	3
Professional Practice		
ARCH 517	Context of the Architectural Profession	4
Architectural History		
IARC 574	History of Interior Architecture I	3
IARC 575	History of Interior Architecture II	3
IARC 576	History of Interior Architecture III	3
	One additional architectural history course taught in the Department of the History of Art and Architecture or the School of Architecture and Environment	4
	Course in 20th-century architectural history	4

Subject Area Electives	16
Seminar	6
Total Credits	153

Track I students typically complete all or most of the MIArch degree requirements at the University of Oregon, and begin the program the summer before their first full academic year of study. Students with bachelor's degrees (BA, BS) other than a preprofessional degree in interior design, interior architecture, or architecture must apply to the Track I program.

Seminar		6
Total Credits		126

¹ Subject area electives and seminars may be taken any term and in any order; one 3-credit (minimum) subject area elective must be an approved design arts course (not technology or media).

Applicants who have a four-year preprofessional degree in an environmental design discipline (interior architecture, interior design, or architecture) and an equivalent amount of professional studio and course work may be considered for Track II. Students admitted into Track II begin their studies fall term. Track II students must fulfill the same professional curriculum requirements as those in the Track I program, but are admitted with advanced standing in studio and subject-area courses. Transfer credit may be given to students who have had academic experience in an interior architecture or design program accredited by the Council for Interior Design Accreditation, or an architecture program accredited by the National Architectural Accrediting Board (NAAB). The extent of this advanced standing is determined in consultation with the department academic advisor before beginning the program, and the student's advanced standing is reevaluated at intervals. This preliminary evaluation of transfer credit is provisional, pending satisfactory completion of three terms in residence.

Track II students may receive credit for up to four previously taken design studios and up to 50 credits of subject-area courses. Students usually complete a minimum of six terms and the approximately 87 credits in residence.

Postprofessional Master of Science Degree Requirements

The postprofessional program is for individuals with an undergraduate professional degree in architecture or interior architecture. This degree provides an opportunity for advanced study and contribution to knowledge in the field through the thesis. The course of study prepares students for careers in research, teaching, consulting, and further graduate study. Students also gain a greater understanding of the relationship between the discipline and the profession while working closely with faculty mentors helping to guide their individual research.

Prospective applicants may find information about the program and application requirements on the department website.

Graduate Admission

Admission to the professional MIArch and postprofessional MS graduate degree programs is through a selective review that focuses on three attributes: creative capability, academic capability, and

potential contribution to the program through diversity of background, experience, or demonstrated motivation. Applications include a résumé, a biographical statement, a statement of interest in the field of interior architecture, a portfolio of creative work, three letters of recommendation, and official transcripts from all postsecondary educational institutions attended. Applicants must take the Graduate Record Examinations (GRE) so that the scores, a required component of the application, can be reported by the application deadline. Applicants whose first language is not English must also submit scores from the Test of English as a Foreign Language (TOEFL) of at least 575 (paper-based) or 90 (Internet-based). Applications must be postmarked by the first Monday after January 1 for applicants to be considered for admission the subsequent fall term (or summer session for MIArch students). Notifications of results are mailed by April 1.

Prospective applicants to the MIArch and MS degree programs may find information about the application requirements on the department website.

Graduate Teaching and Research Fellowships

A number of graduate employment (GE) opportunities are available to well-qualified graduate students. MS or MIArch Track II applicants with previous education in interior architecture or an allied field are encouraged to apply for GTF positions. MIArch Track I students are generally selected in the second or third year of their degree program. Information about the GE application process is available on the Department of Architecture and Division of Graduate Studies websites.

Courses

IARC 199. Special Studies: [Topic]. 1-5 Credits.
Repeatable.

IARC 204. Understanding Contemporary Interiors. 4 Credits.
Introduction to the theory of interior architecture. Design criteria explored through illustrated lectures and projects involving analysis of space.

IARC 401. Research: [Topic]. 1-6 Credits.
Repeatable.

IARC 405. Special Problems: [Topic]. 1-12 Credits.
Repeatable.

IARC 406. Practicum: [Topic]. 1-12 Credits.
Repeatable.

IARC 407. Seminar: [Topic]. 1-6 Credits.
Repeatable.

IARC 408. Workshop: [Topic]. 1-6 Credits.
Repeatable.

IARC 409. Terminal Project. 1-12 Credits.
Repeatable.

IARC 410. Experimental Course: [Topic]. 1-6 Credits.
Repeatable.

IARC 444. Furniture: Theory and Analysis. 3 Credits.
Analysis of furniture and cabinetry from a theoretical and practical standpoint. Emphasis on use within architectural space as well as free standing elements. Introduction to structure, construction, and construction installation drawings.
Prereq: PD 323 or ARCH 484 or IARC 484.

IARC 445. Comprehensive Project Preparation. 3 Credits.
Formulation of individual design projects for IARC 488/588, 489/589. Development of project issues and documentation of context, site, and building information; includes research, case studies, and programming.
Prereq: IARC 473, 484.

IARC 447. Color Theory and Application for the Built Environment. 3 Credits.
Use of color in the built environment including principal color systems, methods of color harmony, effects of visual phenomena, and various psychological, cultural, and historic implications.
Prereq: PD 350 or ARCH 484 or IARC 484 or interior architecture minor status.

IARC 471. Interior Construction Elements. 3 Credits.
The properties and detailing of materials used in interior design construction. Code issues that affect interior construction field trips to supply sources and projects.
ARCH 470.

IARC 472. Interior Finishes and Design Application. 3 Credits.
The properties, manufacture, application, and code issues, and ecological considerations of interior finish materials. Field trips to supply sources.
ARCH 470

IARC 473. Working Drawings in Interior Architecture. 4 Credits.
Preparation of working drawings for a small, sustainable interior architecture design project.
Prereq: ARCH 462, 484 or IARC 471, 472, 484

IARC 474. History of Interior Architecture I. 3 Credits.
Interior architecture as artistic expression. Includes the study of furnishings, textiles, and other interior traditions.

IARC 475. History of Interior Architecture II. 3 Credits.
Interior architecture as artistic expression. Includes the study of furnishings, textiles, and other interior traditions.

IARC 476. History of Interior Architecture III. 3 Credits.
Interior architecture as artistic expression. Includes the study of furnishings, textiles, and other interior traditions.

IARC 484. Interior Design. 6 Credits.
Repeatable. A series of creative projects in interior design; intensive analysis of design; methods of problem solving; individual criticism, review of design projects; group discussion and field trips.
Prereq: ARCH 383 or IARC 383.

IARC 486. Furniture Design. 6 Credits.
Projects in design and construction of custom furniture, preparation of detailed shop drawings, shop procedure.
Prereq: IARC 444; IARC 484 or ARCH 484.

IARC 487. Working Drawings. 6 Credits.
Focuses on the design of a small, sustainable interior architecture design project and the production of a set of working drawings.
Prereq: ARCH 462, 484 or IARC 471, 472, 484; coreq: IARC 473.

IARC 488. Interior Design Comprehensive Project I. 8 Credits.
Student-initiated studies in interior design for the terminal project. Emphasis on comprehensive and integrative study.
Prereq: IARC 445.

IARC 489. Interior Design Comprehensive Project II. 8 Credits.
Student-initiated studies in interior design for the terminal project. Emphasis on comprehensive and integrative study.
Prereq: IARC 488

IARC 492. Electric Lighting. 3 Credits.

Principles of lighting with focus on integration of electric illumination and space. Design for lighting, calculations, and available systems and sources tested through models and drawings.

Prereq: ARCH 484/584 or IARC 484/584; ARCH 492/592.

IARC 503. Thesis. 1-6 Credits.

Repeatable.

IARC 507. Seminar: [Topic]. 1-6 Credits.

Repeatable.

IARC 508. Workshop: [Topic]. 1-6 Credits.

Repeatable.

IARC 510. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

IARC 544. Furniture: Theory and Analysis. 3 Credits.

Analysis of furniture and cabinetry from a theoretical and practical standpoint. Emphasis on use within architectural space as well as free standing elements. Introduction to structure, construction, and construction installation drawings.

IARC 484 or ARCH 584

IARC 545. Comprehensive Project Preparation. 3 Credits.

Formulation of individual design projects for IARC 488/588, 489/589. Development of project issues and documentation of context, site, and building information; includes research, case studies, and programming.

Prereq: IARC 573, 584.

IARC 547. Color Theory and Application for the Built Environment. 3 Credits.

Use of color in the built environment including principal color systems, methods of color harmony, effects of visual phenomena, and various psychological, cultural, and historic implications.

Prereq: ARCH 584 or IARC 584.

IARC 571. Interior Construction Elements. 3 Credits.

The properties and detailing of materials used in interior design construction. Code issues that affect interior construction field trips to supply sources and projects.

Prereq: ARCH 570

IARC 572. Interior Finishes and Design Application. 3 Credits.

The properties, manufacture, application, and code issues, and ecological considerations of interior finish materials. Field trips to supply sources.

ARCH 570

IARC 573. Working Drawings in Interior Architecture. 4 Credits.

Preparation of working drawings for a small, sustainable interior architecture design project.

Prereq: ARCH 562, 584 or IARC 571, 572, 584.

IARC 574. History of Interior Architecture I. 3 Credits.

Interior architecture as artistic expression. Includes the study of furnishings, textiles, and other interior traditions.

IARC 575. History of Interior Architecture II. 3 Credits.

Interior architecture as artistic expression. Includes the study of furnishings, textiles, and other interior traditions.

IARC 576. History of Interior Architecture III. 3 Credits.

Interior architecture as artistic expression. Includes the study of furnishings, textiles, and other interior traditions.

IARC 584. Interior Design. 6 Credits.

Repeatable. A series of creative projects in interior design; intensive analysis of design; methods of problem solving; individual criticism, review of design projects; group discussion and field trips.

Prereq: ARCH 681.

IARC 586. Furniture Design. 6 Credits.

Projects in design and construction of custom furniture, preparation of detailed shop drawings, shop procedure.

Prereq: IARC 444/544; ARCH 484/584 or IARC 484/584.

IARC 587. Working Drawings. 6 Credits.

Focuses on the design of a small, sustainable interior architecture design project and the production of a set of working drawings.

Prereq: ARCH 562, 584 or IARC 571, 572, 584; coreq: IARC 573.

IARC 588. Interior Design Comprehensive Project I. 8 Credits.

Student-initiated studies in interior design for the terminal project.

Emphasis on comprehensive and integrative study.

Prereq: 36 credits in IARC design studios.

IARC 589. Interior Design Comprehensive Project II. 8 Credits.

Student-initiated studies in interior design for the terminal project.

Emphasis on comprehensive and integrative study.

Prereq: IARC 588.

IARC 592. Electric Lighting. 3 Credits.

Principles of lighting with focus on integration of electric illumination and space. Design for lighting, calculations, and available systems and sources tested through models and drawings.

Prereq: ARCH 484/584 or IARC 484/584; ARCH 492/592.

IARC 600M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

IARC 601. Research: [Topic]. 1-6 Credits.

Repeatable.

IARC 605. Special Problems: [Topic]. 1-16 Credits.

Repeatable.

IARC 606. Practicum: [Topic]. 1-16 Credits.

Repeatable.

IARC 607. Seminar: [Topic]. 1-6 Credits.

Repeatable.

IARC 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

IARC 609. Terminal Project. 1-16 Credits.

Repeatable.

IARC 610. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

IARC 611. Terminal Project. 1-9 Credits.

Repeatable.

Landscape Architecture

Roxi Thoren, Department Head

541-346-3641

210 Lawrence Hall

archinfo@uoregon.edu (landarch@uoregon.edu)

Landscape architecture is an environmental design and planning profession of broad scope concerned with the creation, protection, restoration, and management of landscapes. Landscape architecture is founded on an awareness of our deep connections to the natural world and how people and their work are part of the web of life.

The profession is deeply attentive to how places serve human needs and support sustainable and resilient cities and other landscapes. A healthy society rests on a commitment to sound landscape design, planning, and conservation that respects the land, its processes, its integrity—and that of human-ecological processes, helping to fulfill human potential.

Both a science and an art, landscape architecture involves creative decision-making based on scientific knowledge of natural processes coupled with awareness of historical, cultural, and social dynamics. The profession also makes intensive use of technologies for landscape construction and environmental management—digital graphics, geographic information systems, and computer-aided design. These are applied to making richly supportive places for people and ecosystems that are beautiful and healthy, responding to human needs and to local natural and socioeconomic systems.

As a profession, landscape architecture includes design at many scales, including ecologically based planning activities, transformation of urban and rural landscapes, service to disadvantaged communities, and design of parks and gardens. As an academic discipline, it provides opportunities for personal development through environmental problem-solving, graphic and oral communication, and project-oriented study in which small groups of students work with instructors to address pressing contemporary problems through detailed development of land and sites.

Preparation

Students planning to major in landscape architecture should prepare by beginning studies in the following areas:

Environmental Awareness. Courses in ecology, biology, botany, geology, environmental science, and geography help begin the process of understanding the complex interrelationships and interdependencies of people and the environment.

Human Behavior. Courses in art history, anthropology, sociology, history, government, psychology, political science, cultural geography, and related subjects help explain human needs, values, attitudes, and activities, and are useful in preparing for the design of physical places.

Visual Language Skills. Courses in drawing, painting, photography, film, design, art history, and related subjects help develop perceptual skills, cultural understanding, and the ability to explore and communicate ideas graphically.

Careers

Graduates of the landscape architecture program continue on to a wide range of careers. Most students prepare for professional licensure, with about half working in landscape architectural design firms and the other half working for government agencies including national parks, regional and local park systems, and city and regional planning offices. Others choose careers in allied fields such as environmental analysis and ecological restoration, construction management, environmental policy development, or urban and community planning.

Accreditation

In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The Landscape Architectural Accrediting Board (LAAB), which is the sole agency authorized to accredit US professional degree programs in landscape architecture, recognizes three types of

degrees: the bachelor of science in landscape architecture, the bachelor of landscape architecture, and the master of landscape architecture.

At the University of Oregon, both the bachelor of landscape architecture (BLA) and the master of landscape architecture (MLA) degrees are accredited by LAAB. Graduates are eligible to begin taking the Landscape Architect Registration Examination (LARE) upon graduation in most states.

The postprofessional master of landscape architecture degree program and the PhD degree program are not accredited. Admission to these programs is restricted to applicants who already hold an LAAB-accredited degree or the international equivalent.

Curriculum Structure

The landscape architecture curriculum consists of the following interrelated areas: design and planning studios, core subject areas, and electives.

Design and planning studios. Studio courses focus on the development and communication of solutions to site, neighborhood, city, transportation, watershed, and regional environmental and social problems. Students work closely with an instructor to analyze and create specific landscape design and planning proposals. This area addresses the physical implications of site constraints and opportunities, client needs, and environmental and social considerations.

Core subject areas. Five subject areas are essential foundations for the design studios: landscape architecture technologies, plant materials, landscape analysis and planning, the history and theory of landscape architecture, and landscape architectural media. Required course work in history, theory, media, and technologies includes electives to allow each student to tailor an individualized educational program with the help of an advisor.

Electives. Subject area electives provide personal choice in selecting additional course work related to the degree, to develop both breadth in understanding of the physical, social, and artistic implications of landscape architecture, as well as depth in areas of student interest, including advanced technologies, ecosystem structure, social and environmental justice, climate-change resilience, healthy built environments, ecological urbanism, and vegetated architecture.

Computers in the Curriculum

Digital tools are necessary for landscape architects. The department requires all students to have unlimited access to their own personal computer. Because of the professional application of complex graphic programs and large data files for most course work, the department's computer requirements exceed the average user's computing needs. See the College of Design's *Student Computer Purchasing Guide* for recommended specifications and departmental requirements.

Off-Campus Study

Students may participate in off-campus study programs hosted by the Department of Landscape Architecture, the Department of Architecture, the Historic Preservation Program, and Global Education Oregon.

Overlook Field School. Students earn University of Oregon credits while living and learning for four weeks at Overlook, a 400-acre property in northeastern Pennsylvania designed by the Olmsted Brothers firm in the early 20th century, and currently being reimaged by the fourth-generation owners and Nelson Byrd Woltz landscape architects. The

summer field school at Overlook offers students a unique opportunity to live, study, and create on an evolving cultural landscape. With faculty members and a visiting artist in residence, students examine the enduring connections among landscape, culture, and production. The fully funded program includes multiday site visits to New York and Philadelphia. Weekly activities include design charrettes, fieldwork, seminars, expert speakers, and site visits to regional cultural and productive sites.

APRU Design Field School. The program is held in conjunction with the annual conference of the Association of Pacific Rim Universities (APRU) Sustainable Cities and Landscapes research hub. Past conferences have included Portland, Oregon, Hong Kong, and Sydney, Australia. The 2018 Design Field School ran parallel to the main conference and brought together students from participating universities to explore issues of modernization and its impact on the sustainability of some of Southeast Asia's most remarkable natural landscapes and urban communities, including the sprawling urban metropolis of Surabaya in East Java, the rich volcanic landscapes of East Java, the cultural splendor of the island of Bali, and high-rise, high-density urban living in Hong Kong.

Rome, Italy. The Department of Architecture and the Department of the History of Art and Architecture offer an interdisciplinary summer program in Rome, housed in the historic center of the city. Students experience the layers of history and vibrant design culture through the art, architecture, and urban design of the city. Rome serves as the laboratory for courses in the areas of design, media, art history, and architectural history. Students live in apartments within walking distance of the facility.

Barcelona, Spain. This urban design summer program in Barcelona offers students insight into the measurement and design of urban relationships. Students use sensors and mapping to understand cities from the scale of human experience, integrating existing and newly acquired data sets to inform design insights. These methods are supported by interaction with local experts in planning, urban ecology, architecture, robotic engineering, transit, and landscape architecture. Cultural context is provided through trips to Granada to study different neighborhoods and the Alhambra. In Barcelona, students live, work, and research in the city's newly planned, pedestrian-friendly three-by-three-block, Superilles, designed to create a refuge from traffic congestion and air and sound pollution.

Danish International Studies Program. School of Architecture and Environment students travel to Copenhagen to participate in the program; summer, fall, and academic-year options are offered. Credits are automatically transferred, and financial aid is available. Instruction is in English.

Hong Kong, China. A short-term summer program and a semester exchange program are offered at the University of Hong Kong, where English instruction makes Asia accessible. Students study the challenges of an ultradense metropolis and experience futuristic skyscrapers and public transit.

Faculty

Jacques Abelman, assistant professor (social justice, landscape infrastructure, food systems). BA, 1996, Amherst College; MA, 2002, University of the Arts, London; MLA, 2014, Amsterdam Academy of Architecture; reg. landscape architect, Netherlands. (2016)

Elisabeth Chan, associate professor (design representation, design theory). BA, 1993, Hampshire; MLA, 2000, Cornell. (2001)

Arica Duhrkoop-Galas, instructor (plants, planting design, landscape construction). BA, 1998, Portland State; CE, 1999, Cambridge; MLA, 2005, Oregon; reg. landscape architect, Oregon. (2010)

Mark Eischeid, assistant professor (landscape history, design theory, critical practice). BS, 1994, Stanford; MLA, 2000, California, Berkeley; MFA, 2010, Edinburgh; reg. landscape architect, California. (2014)

Chris Enright, instructor (landscape planning, landscape analysis, geographic information systems). BA, 1984, California, Santa Barbara; BLA, 2003, MLA 2006, PhD, 2013, Oregon. (2013)

Michael Geffel, visiting professor (design processes, design experiments, construction techniques). BS, 2006, Oregon; MLA, 2013, Virginia. (2017)

David Hulse, Philip H. Knight Professor (alternative futures analysis, river restoration and management, landscape ecology). BSLA, 1981, Colorado State; MLA, 1984, Harvard. (1985)

Bart Johnson, professor (climate change adaptation, ecological restoration, urban ecosystems). BS, 1987, Cornell; MLA, 1992, PhD, 1995, Georgia. (1995)

Harper Keeler, instructor (civic agriculture, landscape biodynamics, urban farm director). BLA, 1995; MLA 2011, Oregon. (2010)

Yekang Ko, assistant professor (urban sustainability, energy landscapes, climate-responsive design). BS, 2005, Korea; PhD, 2012, California, Berkeley (2016)

Jun Hak Lee, instructor (geographic information systems, data visualization). BS, 1999, MS, 2001, Korea; PhD, 2010, California, Berkeley. (2016)

Dennis "Whitey" Lueck, instructor (horticulture, field studies, landscape biodynamics). BS, 1974, Pennsylvania State; MS, MA, 1980, Oregon State. (2005)

Robert G. Ribe, professor (landscape planning and analysis, visual resource management, landscape economics). BS, 1977, California, Riverside; MSLA, 1981, MA, 1987, PhD, 1990, Wisconsin; Fellow, American Society of Landscape Architects. (1988)

Kory Russel, acting assistant professor (water, container-based sanitation, informal settlements). BS, 2003, MES, 2005, Taylor; MS, 2012, Stanford. (2016)

Brad Stangeland, instructor (landscape construction, computer-aided design, professional practice). BLA, 1983, Oregon; reg. landscape architect, Oregon. (2003)

Roxi Thoren, associate professor (productive landscapes, cultural identity, design theory). BA, 1996, Wellesley; MArch, 2001, MLA, 2002, Virginia. (2004)

Emeriti

Jerome Diethelm, professor emeritus. BArch, 1962, Washington (Seattle); MLA, 1964, Harvard; reg. architect and landscape architect, Oregon. (1970)

Kenneth I. Helphand, professor emeritus. BA, 1968, Brandeis; MLA, 1972, Harvard; Fellow, American Society of Landscape Architects. (1974)

Robert Z. Melnick, professor emeritus. BA, 1970, Bard; MLA, 1975, State University of New York, College of Environmental Science and Forestry; Fellow, American Society of Landscape Architects. (1982)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

- Bachelor of Landscape Architecture
- Minor

Undergraduate Studies

The curriculum in landscape architecture leads to a professional degree of bachelor of landscape architecture (BLA). The five-year program, accredited by the Landscape Architecture Accreditation Board (LAAB), combines general preparation in the arts and sciences with a focus on environmental-design studies. The program prepares students for professional careers in the arts and sciences with a core of design studio course work and curricular areas in land analysis, land planning, ecological systems, and planting design. The program's goal is to produce a visually literate, technically skilled, ecologically knowledgeable, and socially responsible designers who will be innovators and leaders in solving the difficult problems of the built environment into the future.

The curriculum is structured on a sequence of 10 design studios, advancing through design fundamentals to advanced research studios and leading to an independent capstone environmental design project. Core curricular areas support the development of design skills, and electives allow each student to develop expertise in topics such as ecological restoration and design, ecological urbanism, climate-change-resilient design, environmental justice, landscape aesthetics, healthy built environments, natural resource analysis and planning, urban design, food systems and urban agriculture, landscape history and preservation, and environmental design research methods.

Bachelor of Landscape Architecture

Requirements for the BLA degree (including university requirements) total 220 credits. Courses required for the major must be passed with a grade of at least C– or P or P*. Studio courses are pass/no pass only; students must pass each studio to progress to the next studio level.

Core Requirements for Professional School Majors

Code	Title	Credits
Written English		
WR 121	College Composition I	4
WR 122	College Composition II	4
or WR 123	College Composition III	
Electives		
LA 260	Understanding Landscapes	4
Select two approved group-satisfying arts and letters courses		8
Select three approved group-satisfying social science courses		12
Select three approved group-satisfying science courses ¹		12
Select one course from the United States: Difference, Inequality, and Agency list		4
Select one course from the Global Perspectives list		4
Total Credits		52

¹ One of the three *may* satisfy the BLA basic ecology or natural systems course requirement.

Professional Bachelor of Landscape Architecture Requirements

Electives ²		40
Total Credits		168

¹ The department maintains a list of approved basic ecology courses that serve as a prerequisite to Principles of Applied Ecology (LA 441).

² The department will accept all courses from College of Design departments (ARCH, ARH, ART, DSGN, HP, IARCH, LA, PD, PPPM), the Environmental Studies Program, and the Department of Geography as electives. Electives from all other departments must be at the 200-level or above. No more than 12 credits at the 100-level may count towards the BLA degree. Typically, at least one-half of the electives are landscape architecture courses, but the subject areas and courses are determined on a case-by-case basis with the student's advisor. Students develop their full set of electives in consultation with an advisor to support educational objectives and career goals in relation to landscape architecture. Additional elective courses may be necessary to meet the credit requirement for the major.

- Introductory design studios Landscape Architectural Design (LA 289) **or** Architectural Design I (ARCH 283) and Architectural Design II (ARCH 284)
- Design Skills (ARCH 202) and Introduction to Architectural Computer Graphics (ARCH 222)
- Satisfactory completion of one basic ecology or natural systems course

Applications may be submitted prior to completion of the premajor requirements. The department admits students fall, winter, and spring terms. Admission to the BLA is effective the following term. The deadline to apply falls on the Friday of the fourth week.

To be considered for admission to the major, students must complete and submit the following materials through the online SlideRoom applicant tracking system:

- Application form
- Landscape architecture premajor checklist, available as a PDF on the department website or in hard-copy form in 210 Lawrence Hall
- Portfolio of design and art work, completed in the Landscape Architectural Design (LA 289) studios, or media courses, or elsewhere

Prospective applicants may find information about the program and application requirements on the department website.

Minor in Landscape Architecture

To earn a minor in landscape architecture, students file a declaration form with the program director. Once admitted, students remain in contact with the director for personalized advising.

Minor candidates are given preference on course waiting lists over nondepartmental students. Students in the minor should inform instructors when asking permission to enroll. To declare the minor, complete the following:

1. Obtain the Undergraduate Minor Declaration Form from the School of Architecture and Environment office, 210 Lawrence Hall. The form includes a curriculum worksheet with the requirements listed below.
2. Meet with the program director to discuss when courses are offered, which topics courses or seminars will be offered to fulfill minor requirements, and to develop a curricular plan.
3. Return the completed and signed form to the department office.

Minor Requirements (26 credits)

Code	Title	Credits
LA 260	Understanding Landscapes	4
LA 413	Analyzing Landscape Systems	4
	One subject area course in plants from list below	4
	One subject area course in history and theory from list below	4
	Elective courses	10
Total Credits		26

Subject Areas

Code	Title	Credits
Plants		
LA 326	Plants: Fall	4
LA 327	Plants: Winter	4
LA 328	Spring Plants	4

Landscape Architecture Premajor

UO students interested in landscape architecture should first declare as a premajor. Current UO students may change their premajor to landscape architecture at any time during their undergraduate years. Landscape architecture premajors receive departmental advising, priority registration, and departmental communications. The department also offers scholarships and funded field studies opportunities exclusively for such students.

Premajor Advising. Landscape architecture premajors are strongly encouraged to meet with the BLA director or the School of Architecture and Environment advisor in 210 Lawrence Hall to receive assistance with applications, gain information about the program, or check on their academic progress and completion of premajor requirements.

Listserver for Premajors. Once students declare the premajor, their UO email addresses are added to the landscape architecture undergraduate listserver, which is used for sharing important departmental information and posts that may be of interest to undergraduate premajors and majors.

Applications. Students in the premajor or landscape architecture minor, or UO applicants with evidence of design background, may apply to the BLA degree at any time prior to entering Landscape Architectural Design and Process (LA 439) studios, which are restricted to BLA students.

UO applicants with little or no design background should enter the premajor.

Current School of Architecture and Environment majors (architecture, interior architecture) in good-standing (2.50 minimum GPA), may enter the BLA program without a formal application. These students should discuss their degree plan with the BLA director, who will confirm enrollment with the School of Architecture and Environment advising staff.

Students who wish to enter the BLA program must meet the requirements below, complete lower-division course work, and complete a separate application to the BLA prior to entering the Landscape Architectural Design and Process (LA 439) studios.

- Cumulative UO GPA of 2.50 or better
- Requirements listed below must be passed with at least a C– or P or P*.
- Satisfactory completion of the following:
 - Lower-division core courses: Understanding Landscapes (LA 260) or Introduction to Landscape Architecture (LA 227)

LA 337	Landscape Field Work: [Topic] (any plants topic)	1-4
LA 390	Urban Farm	2-4
History and Theory		
LA 199	Special Studies: [Topic] (Design for a Sustainable World)	4
LA 407	Seminar: [Topic] (Landscape Architecture Theory)	4
LA 474	History of Landscape Architecture I	4

Elective Courses

Any landscape architecture (LA) courses; Urban Farm (LA 390) may be repeated if taken during different terms

Studio Options ¹

¹ Architecture nonmajors may take Landscape Architectural Design (LA 289), which is offered every winter. Architecture and interior architecture majors may take a landscape architecture studio that is at their appropriate level of work in the major. Students should consult with their minor advisor, the landscape architecture studio instructor, and the Department of Architecture to determine which studio is appropriate *before* enrolling in the studio.

Five-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in five years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Bachelor of Landscape Architecture

- Master of Landscape Architecture (p. 658) **(Track I master's)**
- Master of Landscape Architecture (p. 658) **(Track II master's)**
- **Doctor of Philosophy**

Graduate Studies

The department offers master's and doctoral degrees in landscape architecture.

The three-year professional master of landscape architecture degree (MLA) is accredited by the Landscape Architecture Accreditation Board. The MLA prepares students for professional careers in environmental design with a core in design studio course work and curricular areas in land analysis, land planning, ecological systems, and planting design. The program's goal is to produce visually literate, technically skilled, ecologically knowledgeable, and socially responsible designers—innovators and leaders in solving the difficult problems of the built environment.

The curriculum is structured on a sequence of 10 design studios, advancing through design fundamentals to advanced research studios and leading to an independent capstone research project. Core curricular areas support the development of design skills, and elective courses allow each student to develop expertise in topics such as ecological restoration and design, ecological urbanism, climate-change-resilient design, environmental justice, landscape aesthetics, healthy built environments, natural resource analysis and planning, urban design, food systems and urban agriculture, landscape history and preservation, and environmental design research methods.

The doctoral program in landscape architecture offers opportunities for advanced study and scholarship across a range of spatial scales and cultural contexts. Students in the program pursue varied topics related to their interests and to clusters of faculty expertise. Current clusters include

- critical history, theory, and practice
- ecology, infrastructure, and social justice
- productive landscapes

Master of Landscape Architecture

The professional master of landscape architecture (MLA) degree program, accredited by the Landscape Architectural Accreditation Board, prepares students for careers in landscape architectural practice and careers in allied professions that contribute to shaping the built environment.

The department offers two tracks of study, both of which lead to the MLA. The Track I MLA typically takes ten terms to complete and requires 140 credits. The Track II MLA is a six-term advanced placement program that requires approximately 56 credits (the exact number is determined through individual evaluation of prior course work at the time of admission.)

Track I MLA students typically complete all or most of the degree program requirements at the University of Oregon and begin the program the summer before their first full academic year of study. Students with bachelor's degrees other than a professional degree in landscape architecture must apply to the first professional degree program.

Students with degrees in related design disciplines (e.g., architecture, interior architecture, environmental design, or non-accredited landscape architecture degrees) may be given advanced standing, up to a maximum of four terms of studio credit for equivalent prior studio work. Studio placement will be based on a portfolio review; required core course work will be evaluated on a case-by-case basis.

The Track II MLA is for applicants who have an accredited professional degree in landscape architecture. Students admitted into the Track II MLA begin their studies fall term. Track II students must fulfill the same professional curriculum requirements as first professional students, but are admitted with advanced standing in studio and subject-area courses. The extent of this advanced standing is determined by the department before beginning the program.

Students may enroll in joint MLA degree programs with the master of architecture (MArch) and master of community and regional planning (MCRP) programs with integrated and coordinated degree requirements. Arrangements may be made through academic advisors in the two departments.

Research and Master's Project. Students take two courses in research methods and project development and one mentored research development course. A faculty member serves as a project chair. The MLA project is completed in the final year during a two-term master's clinic studio. This independent project of high academic standard presents original work that contributes to the body of knowledge in landscape architecture and/or demonstrates an advanced capacity to solve design and planning problems through critical inquiry and strong problem-solving analysis. The topic may be selected from a range of theoretical to practical design issues. Projects must include a written component, which sets out the problem, goals and objectives, methodology, findings, and conclusions of the project.

Area of Concentration. The area of concentration courses represent a focused inquiry in advanced topics that master's students undertake while forming and developing their master's projects. When students begin the MLA program, they should consult their departmental advisor to begin planning their area of concentration course work and receive approval for course selection. At the time when a student is assigned a master's project advisor, responsibility for course approval shifts to this person. At any time students may consult with other members of the departmental faculty who might help them craft their area of concentration. To be approved, an area of concentration must be graduate-level (a 500- or 600-level course number) and must be demonstrably related to the student's master's project topic and supportive of the project's development. See an advisor for more information.

Five courses approved by advisor		20
Total Credits		138

¹ Before enrolling in Master's Project (LA 699), students must obtain department approval of a project or thesis proposal from their landscape architecture master's project advisor.

² MLA students must complete 4 credits of supervised research between LA 621 and LA 699, in which they write a Masters Project proposal and complete a literature review of their Masters Project topic. The proposal must be approved by the student's Masters Project advisor prior to enrolling in LA 699.

Postprofessional Master's Program

The two-year graduate program leading to the master of landscape architecture (MLA) degree is intended for students prepared to do advanced work in the field. Students entering the postprofessional MLA program must have a professionally accredited bachelor's degree in landscape architecture. Students are typically interested in pursuing an advanced independent research project with an interest in an academic career.

Students with professional landscape architecture degrees typically spend two years in residence satisfying course requirements.

Required course work includes one design and planning studio [Land Planning and Design (LA 594)], one course in landscape analysis and planning [Introduction to Landscape Planning Analysis (LA 540)], one course in history, literature, and theory, Landscape Research Methods I (LA 620), Landscape Research Methods II (LA 621), and mentored research with a faculty member. In addition, students must complete five courses (20 credits) in an area of concentration.

Postprofessional Master's Curriculum

Total Credits 56

¹ Courses used to satisfy analysis, research, and theory requirements above may not be used to satisfy area of concentration requirements.

² Before enrolling in Master's Project (LA 699), students must obtain department approval of a project or thesis proposal from their landscape architecture master's project advisor.

³ Completed during the second year.

Admission

Prospective applicants to the MLA degree programs may find information about the program and application requirements on the department website (<https://archenvironment.uoregon.edu/landarch/apply/mla/>).

Doctor of Philosophy Degree

The doctoral program in landscape architecture offers opportunities for advanced study and scholarship in ecological landscape planning, sustainable urban design, and design history and theory. Landscape planning is primarily concerned with assessing large landscapes and directing their policy, management, and land-use patterns to meet social and environmental ends, while design typically addresses smaller areas in greater detail.

Because the profession is broad and diverse, the landscape architecture PhD pursues robust development of academic, analytical, creative, and integrative capabilities that can continue to grow throughout subsequent careers. Accordingly, the program emphasizes the following:

- Advanced expertise and understanding in a focused topic
- The ability to form integrative conceptual models of landscape issues, problems, and solutions
- The ability to critically analyze deficiencies in knowledge in the field and identify needs for new, original contributions
- The ability to form and investigate operationally bounded questions

- The ability to independently design and execute a complete, intensive research project
- The ability to fully document a research project with high-quality writing and illustrations

The integrative nature of landscape design as a science and an art entails development of innovative models and methods for design, education, and research. The program offers students the opportunity to develop skills as innovative educators by working with faculty members as teaching assistants, and to teach courses under faculty guidance. The close and supportive relationships among scholarship, teaching, professional growth, and artistic achievement foster excellence in design education, research, and practice. Scholars follow many routes, and the program provides substantial flexibility to tailor students' programs to individual needs.

Course of Study

Completion of the program requires demonstrated excellence through original contributions to the field. Indicators of a doctoral student's achievements are successful completion of the oral and written comprehensive exams and successful completion and defense of a dissertation that substantially advances knowledge in a chosen area of expertise.

Through a series of four required courses in landscape architecture literature, theory, and research, PhD students learn how to conduct both qualitative and quantitative studies of landscapes and the processes that shape them. After completing these core courses, advanced studies in methodology, tailored to suit career intentions, are required. Advanced methodological preparation in quantitative research occurs through statistical and spatial analysis as well as case-study analysis, design criticism, content analysis, historical interpretation, and environment-behavior observation.

The program prepares students to understand and apply appropriate methods of inquiry, and to deepen their understanding of the nature and role of rigorous scholarly inquiry in landscape architecture. Course requirements are designed to provide both depth and breadth of knowledge in landscape architecture, and to draw on the frameworks and methodologies of related disciplines that support the student's dissertation research.

Length of Program and Steps to Completion

A PhD in landscape architecture requires a minimum of three years of full-time graduate work, including one year of residency. Depending on background and research goals, students can expect to complete the degree in three to six years, with a norm of four to five years.

The student's program of study depends substantially on his or her prior degrees.

Pre-Defined Table

Degree Held	Credits to Expect to Complete for PhD
MLA or MArch	68
BLA or BArch only	80
Master's degree without professional environmental-design degree	86

Courses for the doctoral degree include design-studio experience and subject-area courses to provide a foundation in landscape architecture

sufficient to support a student's goals, research, and advanced course work.

At the completion of course work, normally the end of the second year, each student submits a written comprehensive exam, followed by an oral comprehensive exam. The examination committee will consist of three faculty members, two from landscape architecture and one from an outside department or program, who will prepare and administer the written and oral comprehensive exams. Once students have passed both comprehensive exams, they will be advanced to candidacy. Each student must submit the dissertation proposal within three terms of the exams. A student then forms a dissertation committee consisting of four members, with a minimum of two from landscape architecture and at least one from another field related to the student's area of research. The dissertation committee must approve the student's written dissertation proposal following a scheduled, public proposal presentation before the student undertakes the dissertation.

Some credit requirements may be waived or satisfied through transfer credits which must not have previously been applied to any graduate or undergraduate degree. No more than 15 credits may be transferred. Successful completion of the doctoral program is a matter of proven excellence through substantial, original contributions to the field and not the accumulation of a specific number of credits.

Requirements

A student's program of study is developed with the major professor and a second doctoral advisor.

PhD Required Courses, Work

Course List

Code	Title	Credits
Theory, Research, Investigation ¹		
LA 601	Research: [Topic]	6
LA 605	Reading and Conference: [Topic]	6
LA 617	Introduction to Landscape Architecture Theory	4
LA 620–621	Landscape Research Methods I-II	8
Doctoral colloquium		2
Outside analytic-synthetic courses ²		4-12
Electives ³		
Advanced Electives: 500-level and above landscape architecture courses in design theory, history, criticism, preservation, planning, and ecology ⁴		8-12
Supporting Courses: courses typically taken outside of landscape architecture ⁴		12
Dissertation		
LA 603	Dissertation	16
Total Credits		70

Footnotes

¹ A student entering with a master's degree but without a professional environmental-design degree should expect to take a minimum of 18 additional credits in landscape architecture.

² A student may be required to take more than 4 credits in analytic-synthetic courses in other departments.

³ A student entering the program with a BLA or BArch but no master's degree takes an additional 12 credits of electives.

⁴ Selected in consultation with major professor

Admission

Prospective applicants to the landscape architecture doctoral program may find information about the program and application requirements on the department website (<https://archenvironment.uoregon.edu/landarch/apply/phd/>).

Courses

LA 196. Field Studies: [Topic]. 1-12 Credits.
Repeatable.

LA 199. Special Studies: [Topic]. 1-5 Credits.
Repeatable.

LA 227. Introduction to Landscape Architecture. 2 Credits.
Exploring the background and scope of the profession: its history, ethics, goals, skills, topics, achievements, and evolving challenges in making healthy, functional, and beautiful places.

LA 260. Understanding Landscapes. 4 Credits.
The goal of this course is to expand your understanding, perception, and knowledge of landscapes as cultural artifacts and the physical form of invisible processes, histories, culture, people, animals, politics, and events.

LA 289. Landscape Architectural Design. 6 Credits.
Study of places, their use, and how they evolve. Fundamentals of environmental awareness, social factors, and small-scale site design; abstract design and elementary graphic techniques. Repeatable.

LA 326. Plants: Fall. 4 Credits.
Characteristics, identification, and design uses of deciduous trees, shrubs, vines, and ground covers. Emphasis on identification and appropriate use in landscape design.

LA 327. Plants: Winter. 4 Credits.
Characteristics, identification, and design uses of ornamental conifers and broad-leaved evergreen trees, shrubs, and ground covers.
Prereq: LA 326.

LA 328. Spring Plants. 4 Credits.
Focuses on flowering plants, their identification, design use, and ecosystem services they provide. Plant identification focuses on flowering trees and shrubs, groundcovers and perennials, with the intention of understanding how flowering plants may be used in design to support both human needs and ecosystem functions.

LA 337. Landscape Field Work: [Topic]. 1-4 Credits.
Direct examination and appraisal of the function, form, content, and composition of example landscapes in relation to ecological, cultural, legal, technical, aesthetic, and economic objectives. Repeatable twice for maximum of 12 credits.

LA 362. Landscape Technologies I. 4 Credits.
Develops understanding of contours, contour manipulation, and site engineering methodologies in the design of places; fundamentals of inclusive design, stormwater management, earthwork, and design development.

LA 366. Landscape Technologies II. 4 Credits.
Consideration of aesthetic and engineering properties of materials and processes of landscape construction; communication of design intent through documentation including sources and costs.

LA 375. Contemporary American Landscape. 4 Credits.

The course examines ideas, places, and experiences of particular contemporary significance, symbolism or iconic value in the contemporary American landscape, and studies the landscape as an expression of American culture.

LA 390. Urban Farm. 2-4 Credits.

Experimentation with food production in the city; rebuilding urban soils; farm animal-plant relationships; nutrient cycles. Cooperative food production and distribution; use of appropriate technologies. Repeatable.

LA 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

LA 401. Research: [Topic]. 1-21 Credits.

Repeatable.

LA 405. Special Problems: [Topic]. 1-12 Credits.

Repeatable.

LA 406. Practicum: [Topic]. 1-12 Credits.

Repeatable twice.

LA 407. Seminar: [Topic]. 1-5 Credits.

Repeatable once.

LA 408. Workshop: [Topic]. 1-21 Credits.

Repeatable. Concentrated programs of study on special topics. Regular offerings include Fire Ecology and Management, Landscape Design.

LA 409. Terminal Project. 1-12 Credits.

Repeatable.

LA 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

LA 413. Analyzing Landscape Systems. 4 Credits.

Develops skills for collecting data and understanding how landscapes function in space and time to inform good decision-making in planning and design.

Prereq: one course in geography or biology or environmental studies.

LA 415. Computers in Landscape Architecture. 4 Credits.

Repeatable. Development, application, and evaluation of computer systems for land use and site planning (e.g., geographic information systems); encoding of data, cell storage, and analysis systems.

LA 417. Computer-Aided Landscape Design. 2-4 Credits.

Understanding and use of computer-aided drafting and design technology for executing landscape design development, evaluation, and presentation tasks.

LA 423. Drawing The Landscape. 4 Credits.

Exploration of the varied ways to represent and understand the form, cultural meaning, social content, history, natural dynamics, regional context, spiritual intentions, and technical functions of urban and rural landscapes.

LA 429. Civic Agriculture. 4 Credits.

Exploring the impact and subsequent reversal of industrialized food systems through community driven production, distribution and equity methods, foodshed resiliency creation and ecologically literate agriculture practice.

LA 439. Landscape Architectural Design and Process. 6 Credits.

Intermediate problems in landscape architecture design. Relations among problem concepts, goals, design theory, communication media, and technical analysis. Repeatable four times for a total of 30 credits.

Prereq: LA 289.

LA 440. Introduction to Landscape Planning Analysis. 4 Credits.

Principles of designing land- and waterscapes for human use and settlement. Ecological, social, and economic analyses of landscapes, resources, and patterns of occupancy in the Eugene-Springfield area. Prereq: LA 413.

LA 441. Principles of Applied Ecology. 2-6 Credits.

Application of ecological concepts to landscape design, planning, and management. Emphasis on spatially explicit problem-solving over a range of spatial and temporal scales.

Prereq: one course in ecology.

LA 450. Advanced Landscape Media: [Topic]. 2-4 Credits.

Advanced landscape media skills in a variety of media, including 2D and 3D digital skills, visual data representation, and remote data sensing. Repeatable up to three times for a maximum of 12 credits.

LA 451. Landscape Media I. 2 Credits.

Landscape Media I is the first course in a yearlong foundational landscape media sequence. The course focuses on fundamental concepts of cartography, diagramming movement and change, and conceptually representing design ideas, and introduces students to graphic design fundamentals.

LA 452. Landscape Media II. 2 Credits.

Landscape Media II is the second course in a yearlong foundational landscape media sequence. The course explores a variety of media, computer applications, analog approaches, workflows, and theoretical ideas in the context of landform, topography, and grading as both a design process and representation product.

LA 453. Landscape Media III. 2 Credits.

Landscape Media III is the third course in a yearlong foundational landscape media sequence. The course focuses on the visual communication of constructing the landscape, from sketching materials and assemblies, to preparing construction documentation drawings.

LA 459. Landscape Technology Topics. 1-4 Credits.

Intensive study of topics in landscape construction and maintenance. Topics include irrigation, lighting, special structures, water management, and road design. Repeatable thrice for maximum of 10 credits.

LA 462. Professional Practice Landscape Architecture. 2 Credits.

Introduces students to key aspects of professional practice, fundamental professional skills, and professional career planning. Includes licensure, legal aspects of landscape architecture, career options, business management, and project management.

LA 464. Landscape Materials and Construction I. 4 Credits.

Landscape Materials and Construction I is the first course in a three-term sequence, with a primary focus on plants as a medium of landscape architectural design. It is an introduction to plants from the point of view of the landscape architect or architectural designer.

LA 465. Landscape Materials and Construction II. 4 Credits.

Landscape Materials and Construction I is the second of the three-term long Landscape Materials and Construction sequence, with a primary focus on landform as a medium of landscape architectural design and landscape engineering for accessibility, safety, and sustainability. Prereq: LA 464.

LA 466. Landscape Materials and Construction III. 4 Credits.

Landscape Materials and Construction III is the third of the three-term long Landscape Materials and Construction sequence, with a primary focus on structures, material assemblies, and vegetation on and in buildings as media of landscape architectural design. Prereq: LA 465.

LA 472. Landscape Architectural Theory: [Topic]. 4 Credits.

This course examines theories and the role of theory in landscape architecture. Each offering explores landscape theory through a different lens, including the analysis and design of landscapes, the creation of built works, and the discussion and critique of projects. Repeatable three times for a maximum of 16 credits.

LA 474. History of Landscape Architecture I. 4 Credits.

First in a sequence covering the history of landscape architecture. Explores the history and theory of the designed landscape from the beginnings of human settlement to the 19th century.

LA 475. History of Landscape Architecture II. 4 Credits.

The second in a sequence of two classes covering the history of landscape architecture, from the 19th century to the late 20th century. Prereq: LA 474.

LA 489. Site Planning and Design. 6 Credits.

Advanced problems in landscape architecture, cultural determinants of site planning and design, design development and natural systems and processes as indicators of carrying capacity. Repeatable three times. Prereq: LA 362, LA 366, LA 439.

LA 490. Comprehensive Project Preparation. 3 Credits.

Finding, describing, programming, and probing environmental opportunities and problems.

LA 494. Land Planning and Design. 6 Credits.

Problems in landscape architecture of increased cultural complexity. Land use planning, computer-aided ecological analysis of land, environmental impact, urban and new community design. Prereq: LA 489; fifth-year standing for undergraduates.

LA 499. Comprehensive Project. 8 Credits.

Advanced planning and design projects in landscape architecture. Studio development of individually selected projects. Prereq: LA 490.

LA 503. Thesis. 1-16 Credits.

Repeatable.

LA 507. Seminar: [Topic]. 1-5 Credits.

Repeatable once.

LA 508. Workshop: [Topic]. 1-21 Credits.

Repeatable. Concentrated programs of study on special topics. Regular offerings include Fire Ecology and Management, Landscape Design.

LA 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

LA 513. Analyzing Landscape Systems. 4 Credits.

Develops skills for collecting data and understanding how landscapes function in space and time to inform good decision-making in planning and design.

LA 515. Computers in Landscape Architecture. 4 Credits.

Development, application, and evaluation of computer systems for land use and site planning (e.g., geographic information systems); encoding of data, cell storage, and analysis systems. Repeatable.

LA 517. Computer-Aided Landscape Design. 2-4 Credits.

Understanding and use of computer-aided drafting and design technology for executing landscape design development, evaluation, and presentation tasks.

LA 529. Civic Agriculture. 4 Credits.

Exploring the impact and subsequent reversal of industrialized food systems through community driven production, distribution and equity methods, foodshed resiliency creation and ecologically literate agriculture practice.

LA 539. Landscape Architectural Design and Process. 6 Credits.

Intermediate problems in landscape architecture design. Relations among problem concepts, goals, design theory, communication media, and technical analysis. Repeatable four times for a total of 30 credits.

LA 540. Introduction to Landscape Planning Analysis. 4 Credits.

Principles of designing land- and waterscapes for human use and settlement. Ecological, social, and economic analyses of landscapes, resources, and patterns of occupancy in the Eugene-Springfield area. Prereq: LA 513.

LA 541. Principles of Applied Ecology. 2-6 Credits.

Application of ecological concepts to landscape design, planning, and management. Emphasis on spatially explicit problem-solving over a range of spatial and temporal scales. Prereq: one course in the natural sciences.

LA 550. Advanced Landscape Media: [Topic]. 2-4 Credits.

Advanced landscape media skills in a variety of media, including 2D and 3D digital skills, visual data representation, and remote data sensing. Repeatable up to 3 times for a maximum of 12 credits when the topic changes.

LA 551. Landscape Media I. 2 Credits.

Landscape Media I is the first course in a yearlong foundational landscape media sequence. The course focuses on fundamental concepts of cartography, diagramming movement and change, and conceptually representing design ideas, and introduces students to graphic design fundamentals.

LA 552. Landscape Media II. 2 Credits.

Landscape Media II is the second course in a yearlong foundational landscape media sequence. The course explores a variety of media, computer applications, analog approaches, workflows, and theoretical ideas in the context of landform, topography, and grading as both a design process and representation product.

LA 553. Landscape Media III. 2 Credits.

Landscape Media III is the third course in a yearlong foundational landscape media sequence. The course focuses on the visual communication of constructing the landscape, from sketching materials and assemblies, to preparing construction documentation drawings.

LA 559. Landscape Technology Topics. 1-4 Credits.

Intensive study of topics in landscape construction and maintenance. Topics include irrigation, lighting, special structures, water management, and road design. Repeatable thrice for maximum of 10 credits.

LA 562. Professional Practice of Landscape Architecture. 2 Credits.

Introduces students to key aspects of professional practice, fundamental professional skills, and professional career planning. Includes licensure, legal aspects of landscape architecture, career options, business management, and project management.

LA 564. Landscape Materials and Construction I. 4 Credits.

Landscape Materials and Construction I is the first course in a three-term sequence, with a primary focus on plants as a medium of landscape architectural design. It is an introduction to plants from the point of view of the landscape architect or architectural designer.

LA 565. Landscape Materials and Construction II. 4 Credits.

Landscape Materials and Construction I is the second of the three-term long Landscape Materials and Construction sequence, with a primary focus on landform as a medium of landscape architectural design and landscape engineering for accessibility, safety, and sustainability.

LA 566. Landscape Materials and Construction III. 4 Credits.

Landscape Materials and Construction III is the third of the three-term long Landscape Materials and Construction sequence, with a primary focus on structures, material assemblies, and vegetation on and in buildings as media of landscape architectural design.

LA 572. Landscape Architectural Theory: [Topic]. 4 Credits.

This course examines theories and the role of theory in landscape architecture. Each offering explores landscape theory through a different lens, including the analysis and design of landscapes, the creation of built works, and the discussion and critique of projects. Repeatable three times for a maximum of 16 credits.

LA 574. History of Landscape Architecture I. 4 Credits.

First in a sequence covering the history of landscape architecture. Explores the history and theory of the designed landscape from the beginnings of human settlement to the 19th century.

LA 575. History of Landscape Architecture II. 4 Credits.

The second in a sequence of two classes covering the history of landscape architecture, from the 19th century to the late 20th century.

LA 589. Site Planning and Design. 6 Credits.

Advanced problems in landscape architecture, cultural determinants of site planning and design, design development and natural systems and processes as indicators of carrying capacity. Repeatable three times. Prereq: LA 539.

LA 594. Land Planning and Design. 6 Credits.

Problems in landscape architecture of increased cultural complexity. Land-use planning, computer-aided ecological analysis of land, environmental impact, urban and new community design. Prereq: LA 489/589.

LA 601. Research: [Topic]. 1-16 Credits.

Repeatable.

LA 602. Supervised College Teaching. 2-5 Credits.

Repeatable.

LA 603. Dissertation. 1-16 Credits.

Repeatable.

LA 605. Special Problems: [Topic]. 1-16 Credits.

Repeatable.

LA 606. Practicum: [Topic]. 1-16 Credits.

Repeatable twice.

LA 607. Seminar: [Topic]. 1-5 Credits.

Repeatable. A recent topic is Introduction to Landscape Literature.

LA 608. Workshop: [Topic]. 1-16 Credits.

Repeatable. Intensive study combining practical projects with instruction on special topics related to landscape problems.

LA 609. Terminal Project. 1-16 Credits.

Repeatable.

LA 610. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

LA 620. Landscape Research Methods I. 2-4 Credits.

Contemporary research issues and strategies. Theories, approaches, and techniques applicable to topics and problems in landscape architecture. Sequence with LA 621.

LA 621. Landscape Research Methods II. 2-4 Credits.

Contemporary research issues and strategies. Theories, approaches, and techniques applicable to topics and problems in landscape architecture. Sequence with LA 620. Prereq: LA 620.

LA 699. Master's Project. 2-10 Credits.

Student-directed and executed performance and communication of original research or project work to demonstrate advanced mastery of landscape architecture. Repeatable.

Museum Studies

Graduate Certificate in Museum Studies

The Graduate Certificate in Museum Studies (GCMS) is a transdisciplinary program open to graduate students enrolled in any graduate program at UO. The curriculum is designed to provide both scholarly engagement with issues related to museums and an introduction to the specialized skills pertinent to museum professionals.

Housed in the College of Design, the GCMS collaborates with departments, programs, and museum professionals across campus to provide foundational theoretical and practical training in the museum field, while allowing students the freedom to explore museum operations from a variety of perspectives.

Students must complete a minimum of 24 credits in approved courses. For information regarding the requirements, please see the GCMS website (<https://design.uoregon.edu/arthistory/grad/certificates/museum-studies/>).

New Media and Culture

Certificate in New Media and Culture

This multidisciplinary program offers exposure to an array of approaches to the study of contemporary new media topics such as social media, digital surveillance, gaming culture, and the social significance of data analytics through review of the history, theory, criticism, aesthetics, and production of new media technologies. Students blend scholarly research on new media topics with practical experience creating content using digital research tools.

The certificate program is open to graduate students in any UO department or program. Requirements include completion of six graduate-level, new media-related courses, five of which are electives chosen from a flexible menu of offerings across campus, designed to fit seamlessly into students' course requirements for their home department. For more information, including course offerings for the coming year, visit the certificate website. (<http://newmediaculture.uoregon.edu/>)

Planning, Public Policy and Management

Richard D. Margerum, School Director

541-346-3635
147B Hendricks Hall
1209 University of Oregon
Eugene, Oregon 97403-1209

Mission Statement

The School of Planning, Public Policy and Management is nationally known for academic rigor, intellectual leadership, stellar evidence-based, innovative applied instruction and its inclusive and equitable climate. The school's faculty and administration is dedicated to

- a core curriculum and specialized courses that address inequities related to race and ethnicity
- diversity in the composition of faculty, students and professionals
- an environment that is open and welcoming, striving in particular to be inclusive to those traditionally marginalized in society
- informed theory and empirical evidence
- engaging the civic community—public, private, and nonprofit—in democratic processes addressing economic, environmental, and social issues
- seeking good ideas and approaches from around the world and testing their transferability from one area of the globe to another
- ecological, social, and economic sustainability

Faculty

Lisa Abia-Smith, senior instructor (art and special populations, art and museum education, arts in health care); director, educational outreach, Jordan Schnitzer Museum of Art. BA, 1989, St. Mary's College of California; MA, 1992, John F. Kennedy. (1997)

John Arroyo, assistant professor (urban studies, community development, inclusive urbanism). BA, 2002, Southern California; MCP, 2010, Cornell; PhD, 2018, Massachusetts Institute of Technology. (2018)

Doug Blandy, professor (art and community service, art and special populations). BS, 1974, Ohio; MA, 1979, PhD, 1983, Ohio State. (1987)

Anne Brown, assistant professor (transportation planning, mobility). BA, 2010, Macalester; MURP, 2014, California, Los Angeles. (2018)

Robert J. Choquette, senior instructor (strategic planning, project management); graduate programs coordinator. BS, 1982, MUP, 1991, Oregon. (1991)

Ben Clark, associate professor (public management, crowdsourcing, local government management). BA, 1999, Indiana, Bloomington; MPA, 2000, Syracuse; PhD, 2009, Georgia. (2016)

Renee A. Irvin, associate professor (nonprofit and philanthropic sector economics, wealth policy). BA, 1984, Oregon; MA, 1991, PhD, 1998, Washington (Seattle). (2001)

Grant Jacobsen, associate professor (environmental economics and policy, energy efficiency, renewable energy). BA, 2005, College of William and Mary; MA, 2006, PhD, 2010, California, Santa Barbara. (2010)

Patricia Lambert, professor (performing arts, cultural policy). BM, 1990, Indiana; MA, 1997, Webster; MAS, 1998, International Center for Culture and Management; PhD, 2004, Ohio State. (2003)

Laura Leete, associate professor (poverty and social policy, work-force policy, nonprofit economics). BA, 1982, California, Berkeley; MA, 1988, PhD, 1992, Harvard. (2007)

Rebecca C. Lewis, associate professor (land-use policy, sustainable development, state and local finance). BA, 2006, Kentucky; MPP, 2008, PhD, 2011, Maryland, College Park. (2013)

Richard D. Margerum, professor (environmental planning and management, planning processes, conflict management). BA, 1987, Wittenberg; MCP, 1989, Cincinnati; MS, 1992, PhD, 1995, Wisconsin, Madison. (2001)

Dyana Mason, assistant professor (nonprofit management, charitable giving, public management). BA, 1993, Southern California; MBA, 2010, William and Mary; PhD, 2014, Southern California. (2014)

Jessica Matthesen, senior instructor (nonprofit management, program development, public service); director, undergraduate program and internship. BS, 1997, MPA, 2009, Oregon. (2012)

José Meléndez, assistant professor (civic engagement, designing participatory processes, Latino immigrants). BA, 2001, Oberlin; MEd, 2009; PhD, 2016, Illinois, Chicago. (2018)

Nicole S. Ngo, assistant professor (health economics, environmental policy, urban sustainability). BA, BS, 2006, California, Irvine; MA, 2010, PhD, 2013, Columbia. (2013)

Eleonora Redaelli, associate professor. Laurea, 1997, Università degli Studi di Milano; DMA, 2000, Conservatorio di Musica Giuseppe Verdi; PhD, 2008, Ohio State. (2014)

Gerardo Sandoval, associate professor (economic and community development, urban revitalization, immigrant neighborhoods). BS, 2000, California, Davis; MCP, 2002, PhD, 2007, California, Berkeley. (2010)

Marc Schlossberg, professor (geographic information systems, social planning, transportation planning). BBA, 1987, Texas, Austin; MUP, 1995, San Jose State; PhD, 2001, Michigan. (2001)

Julie Voelker-Morris, senior instructor. BA, 1996, Augustana College; MS, 2002, Oregon. (2014)

Yizhao Yang, associate professor (environmental planning, sustainable living design and analysis, geographic information systems). BArch, 1995, Tianjin; MS, 1998, Tsinghua; MRP, 2001, PhD, 2007, Cornell. (2006)

Courtesy

Donald G. Holtgrieve, adjunct assistant professor (local government planning). See **Geography**.

Cassandra Moseley, courtesy assistant professor (natural resource policy, community-based conservation). BA, 1990, Cornell; MA, 1993, MPhil, 1994, PhD, 1999, Yale. (2002)

Emeriti

Gaylene Carpenter, associate professor emerita. BA, 1965, MS, 1973, California State, Long Beach; EdD, 1980, Temple. (1983)

Rogena M. Degge, professor emerita. BA, 1964, Fresno State; MS, 1972, PhD, 1975, Oregon. (1979)

Bryan T. Downes, professor emeritus. BS, 1962, MS, 1963, Oregon; PhD, 1966, Washington (St. Louis). (1976)

Linda F. Ettinger, associate professor emerita. BFA, Southwest Missouri State; MS, 1973, Illinois State; PhD, 1983, Oregon. (1982)

Maradel K. Gale, associate professor emerita. BA, 1961, Washington State; MA, 1967, Michigan State; JD, 1974, Oregon. (1974)

Jane Gehring, associate professor emerita. BS, 1940, Michigan State Teachers; MS, 1960, Oregon. (1958)

Judith H. Hibbard, professor emerita. BS, 1974, California State, Northridge; MPH, 1975, California, Los Angeles; DrPH, 1982, California, Berkeley. (1982)

Michael Hibbard, professor emeritus. BS, 1968, California Polytechnic; MSW, 1971, San Diego State; PhD, 1980, California, Los Angeles. (1980)

Carl J. Hosticka, associate professor emeritus. BA, 1965, Brown; PhD, 1976, Massachusetts Institute of Technology. (1977)

Beverly J. Jones, associate professor emerita. BS, 1967, Oregon College of Education; MS, 1976, PhD, 1977, Oregon. (1977)

Robert E. Keith, planning consultant emeritus. BS, 1944, Kansas State; MArch, 1950, Oregon. (1963)

David C. Povey, professor emeritus. BS, 1963, Lewis and Clark; MUP, 1969, PhD, 1972, Cornell. (1973)

Jean Stockard, professor emerita. BA, 1969, MA, 1972, PhD, 1974, Oregon. (1974)

Kenneth C. Tollenaar, director emeritus. BA, 1950, Reed; MA, 1953, Minnesota. (1966)

Edward C. Weeks, associate professor emeritus. BA, 1973, PhD, 1978, California, Irvine. (1978)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Nico Larco, architecture

Robert G. Ribe, landscape architecture

Anita M. Weiss, international studies

- Bachelor of Arts (p. 666)
- **Bachelor of Science**
- Planning, Public Policy and Management Minor (p. 666)
- **Nonprofit Administration Minor**

Undergraduate Studies

The undergraduate program provides an interdisciplinary liberal arts education that prepares students for work in the fields of planning, policy, and public and nonprofit administration. Through course work that integrates theory and practice, the curriculum focuses on the ways governments, nonprofit organizations, and other institutions solve public problems. Students explore the economic, social, and environmental characteristics of communities and systems of governance to determine effective ways to advance the public's goals. The curriculum helps students develop knowledge of core issues related to planning and public policy as well as more in-depth knowledge in a chosen field of interest.

Academic coursework and learning opportunities such as internships and applied courses create a hands-on educational climate that is both exciting and challenging.

Preparation

A broad liberal arts background, the development of communication and analytical skills, and college-level community volunteer and leadership experiences are excellent preparation for the PPPM major. When selecting courses to meet UO Core Education Requirements, pre-PPPM majors might consider public speaking, economics, political science, sociology, computer science, mathematics, and international studies.

Careers

The bachelor of arts (BA) or bachelor of science (BS) degree in planning, public policy and management prepares graduates for entry-level positions in government agencies and nonprofit organizations. In addition, the degree provides a broad interdisciplinary, professional background and a sound basis for graduate study in fields such as urban planning, public policy and management, business, law, journalism, and nonprofit administration.

Admission Requirements

Students **must** apply to the major **before** earning 30 credits in PPPM major courses. Students are encouraged to apply for admission once they have completed the majority of their UO Core Education Requirements, typically the term prior to achieving junior class standing (90–105 credits). Preference in admission is given to applicants who have:

- a grade point average (GPA) of 3.00 or better
- some college-level experience—paid or volunteer—in public service
- fulfilled a majority of the university core education requirements

The school strongly encourages applicants from diverse backgrounds, regardless of race, age, gender identity, sexual orientation, religion, or ability, and recognizes that affirmative action and equal opportunity begin with the development of professionals who represent a broad array of ideas and cultures.

Prior to applying for admission to the major, students must take Introduction to Economic Analysis: Microeconomics (EC 201) and at least one of the following three courses: Introduction to Public Policy (PPPM 201), Introduction to City Planning (PPPM 205) or Introduction to the Nonprofit Sector (PPPM 280).

Students are encouraged to declare the pre-PPPM major to receive correspondence about upcoming courses and opportunities, advising services, and access to courses with reserved spaces for PPPM students.

Admission Procedures

The school accepts applications for admission to the major fall, winter, and spring terms. Admission to the major is effective the following term. The deadline to apply falls on the Monday of the fourth week. To be considered for admission, students must submit the following materials:

1. Completed application form, available as a Qualtrics survey on the school website
2. Brief résumé of college-level education, employment and volunteer history

- Personal statement describing interest in public service, career goals, and how the major in PPPM will help achieve those goals. This statement should be limited to two typed, double-spaced pages
- Transcripts from all colleges and universities attended

Bachelor of Arts Degree Requirements

Code	Title	Credits
Core Courses ¹		
PPPM 201	Introduction to Public Policy	4
PPPM 205	Introduction to City Planning	4
PPPM 280	Introduction to the Nonprofit Sector	4
PPPM 413	Quantitative Methods	4
PPPM 415	Policy and Planning Analysis ²	4
PPPM 434	Urban Geographic Information Systems	4
PPPM 494	Practice of Leadership and Change	4
Field of Interest		
PPPM electives ³		32
Total Credits		60

¹ PPPM majors must take core courses for letter grades and pass them with grades of C– or better.

² EC 201 is a prerequisite for PPPM 415.

³ Up to 12 credits of Internship: [Topic] (PPPM 404) may count toward fulfilling this requirement. A maximum of 4 credits of lower-division courses may count toward fulfilling this requirement. All additional electives must be upper division.

Bachelor of Science Degree Requirements

¹ PPPM majors must take core courses for letter grades and pass them with grades of C– or better.

² EC 201 is a prerequisite for PPPM 415.

³ Up to 12 credits of Internship: [Topic] (PPPM 404) may count toward fulfilling this requirement. A maximum of 4 credits of lower-division courses may count toward fulfilling this requirement. All additional electives must be upper division.

Students should expect extensive writing, analysis, and collaborative projects as part of their education in PPPM. For more information, contact the PPPM undergraduate advisor.

Fields of Interest

Students are encouraged to work with an undergraduate academic advisor to identify electives in one or more fields of interest.

Fields of interest may include the following:

- arts and cultural leadership
- environment and sustainability
- equity and social justice
- global sustainability and development
- nonprofit administration
- public leadership and management
- social and health policy
- urban planning and development

Internship

Internships are optional but highly recommended for all PPPM students as a way to explore and clarify their interests and career goals, apply academic learning, develop new skills, and network with professionals. These career-building experiences help prepare students for fellowships, professional positions, or further academic stud. Students interested in the PPPM Internship Program should enroll in PPPM 412 Internship and Professional Development and meet with the PPPM Undergraduate Internship Director. More information is on the School website.

Thesis and Honors Program

Students may pursue an undergraduate thesis in PPPM if they are accepted in the honors program, or if they are enrolled in the Clark Honors College. Students may not pursue the thesis option without prior approval; interested students should contact the PPPM Undergraduate Director by the end of their sophomore year for more information. Students must have a 3.75 GPA to be considered for the honors program; a thesis is required.

Minors

Planning, Public Policy and Management Minor

The planning, public policy and management minor complements majors in the humanities or social sciences—anthropology, geography, political science, or economics, for example. It provides a professional context in which to apply the knowledge, theories, and methods of the student's major discipline. Students pursuing the minor are introduced to a broad overview of issues in urban and regional planning, public policy and public management, and nonprofit administration. The minor enhances any student's undergraduate education with preparation for a variety of professional occupations and graduate study.

Students may declare the minor in planning, public policy and management at any time by meeting with the PPPM undergraduate advisor. Materials for declaring the minor are available in the school office and on the website.

Code	Title	Credits
PPPM 201	Introduction to Public Policy ¹	4
PPPM 205	Introduction to City Planning ¹	4
PPPM 280	Introduction to the Nonprofit Sector ¹	4
PPPM 415	Policy and Planning Analysis ^{1, 2}	4

PPPM electives ³	12
Total Credits	28

¹ Must be taken for letter grades and passed with grades of C– or better.

² EC 201 is a prerequisite for PPPM 415.

³ As much as 8 credits of Internship: [Topic] (PPPM 404) may be used toward fulfilling this requirement. A maximum of 4 credits of lower-division courses may count toward fulfilling this requirement. All additional electives must be upper division.

Nonprofit Administration Minor

The School of Planning, Public Policy and Management offers a minor of special value to students interested in a career in the nonprofit sector. Through the minor, students can enhance their undergraduate education to include preparation for occupations and graduate study in nonprofit administration. The nonprofit sector is one of the fastest-growing employment sectors in the country, creating a high demand for graduates with specialized skills to work for these diverse and exciting organizations.

Students may declare the minor in nonprofit administration at any time by meeting with a PPPM undergraduate advisor. Materials for declaring the minor are available in the school office or on the website. Core courses must be taken for letter grades and passed with grades of C– or better, unless offered pass/no pass only.

Code	Title	Credits
PPPM 280	Introduction to the Nonprofit Sector	4
PPPM 422	Grant Proposal Writing	1
PPPM 480	Nonprofit Management	4
PPPM 481	Fundraising for Nonprofit Organizations	4
PPPM 484	Public and Nonprofit Financial Management	4
Upper-division electives ¹		8
Total Credits		25

¹ A list of approved courses are available in the school office. Only preapproved elective courses satisfy this requirement. See a PPPM undergraduate advisor for more information.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

- **Master of Community and Regional Planning**
- **Master of Nonprofit Management**
- **Master of Public Administration**
- PhD in Planning and Public Affairs (p. 675)
- **Graduate Certificate in Arts Management**
- **Graduate Certificate in Nonprofit Management**

Graduate Studies

Programs for the School's master of community and regional planning (MCRP) degree, the master of nonprofit management (MNM), and the master of public administration (MPA) require two years for completion. The MCRP degree is accredited nationally by the Planning Accreditation Board. The MPA is accredited nationally by the Network of Schools of Public Policy, Affairs, and Administration. The department also offers a 24-credit graduate certificate in nonprofit management.

The interdisciplinary and eclectic fields of planning, public policy, and public and nonprofit management are concerned with systematically shaping the future. Professionals in the field are involved in analysis, preparation of recommendations, and implementation of policies and programs that affect public facilities and services and the quality of community life. These professionals assume responsibility for planning, policy, and management in community and regional development,

natural resources, economic development, social sciences, land use, transportation, arts, and other fields.

Planning, public policy, and public and nonprofit management graduates have a comprehensive understanding of economic, environmental, fiscal, physical, political, and social characteristics of a community. Graduates are expected to provide leadership and to otherwise participate effectively in efforts to enhance the capacity of communities to deal creatively with change.

Financial Aid

Approximately 40 percent of the school's students receive some financial assistance (e.g., graduate employment, work-study assistance, or research stipends). Graduate employment positions (GE) are offered to approximately 20 students each year. Each GE position includes a stipend and a waiver of tuition and fees for one or more terms. Graduate students may also work on planning and public policy projects through the Institute for Policy Research and Engagement (IPRE) and Sustainable Cities Institute's Sustainable City Year Origran. Each year, IPRE supports 5-10 students through paid internship positions. Students who participate in Community Planning Workshop in their first year are eligible to apply for GE positions as CPW project managers in their second year.

Applicants to PPPM programs are strongly urged to complete and submit the FAFSA as soon as they complete their application for admission to be eligible for financial assistance including work-study and other assistance offered through the Office of Student Financial Aid and Scholarships.

Community and Regional Planning

The master of community and regional planning (MCRP) program trains policy-oriented planners for leadership positions in planning and planning-related organizations. The field of planning is concerned with rational and sensitive guidance of community and regional change. Planners are responsible for identifying and clarifying the nature and effect of planning problems, formulating potential solutions to these problems, and assisting in the implementation of alternative policies.

To realize these objectives, the planner must draw on the skills and insights of many professions and disciplines. The planner must have a basic understanding of the cultural, economic, social, political, and physical characteristics of a community.

Entering students should be prepared to become involved in and committed to resolving important social, economic, environmental, political, and cultural problems. Courses in and outside the school provide students with an integrated understanding of planning, public policy, and public management as well as specific skills needed for a chosen professional area.

Oregon is an especially fruitful location in which to study planning. The state has an international reputation as a source of innovative approaches to addressing planning issues.

Students select a set of courses in consultation with their advisors that focus their elective work on an area of special interest. The program has exceptional strengths in sustainable cities and transportation, land use and built environment, access and equity (community development) and environmental planning. In addition, the school's strengths in nonprofit management, local government management, and budget and finance are of interest to many students in the field of planning.

The program has strong ties with other programs on campus. Students often pursue concurrent degrees in planning and environmental studies, landscape architecture, business, economics, geography, international studies, or public administration. See Concurrent Master's Degrees (p. 675) in this section.

Preparation

Students are strongly encouraged to complete a thorough social science undergraduate program including courses in economics, sociology, geography, and history. Work experience, particularly if related to planning, is valuable, as are writing and public speaking skills. Courses in the natural sciences, policy sciences, environmental design, or analytic methods are helpful as background for advanced graduate work in a concentration area of interest to the student.

Students must complete either an advanced undergraduate or a graduate-level introductory course in statistics as a pre- or corequisite to Planning Analysis I (PPPM 613). No credit toward the MCRP degree is allowed for the statistics course. The requirement is waived for students with equivalent courses or work experience. Entering students are urged to satisfy this requirement before enrolling in the program.

Students may file petitions to transfer up to 15 graduate credits taken prior to admission to the planning program. Such petitions must be submitted during the first term in the program.

Juniors and seniors who anticipate applying for admission are encouraged to seek advice at the school's office.

Careers

Graduates with an MCRP degree find employment in the public, private, and nonprofit sectors. Graduates work in the public sector at the local, state, regional and federal levels. In the private sector, graduates are typically employed by consulting firms, private developers, and other firms requiring research and analysis skills. Graduates are also employed by such nonprofit organizations as environmental and advocacy groups, community development organizations, and research firms. Positions span a broad variety of sectors including: land use, housing, social services, parks, transportation, economic development and natural resources.

Application Procedures

Importance is placed on the student's preference for and ability to undertake self-directed educational activity.

The admissions committee emphasizes the selection of candidates who present clear and specific reasons for choosing to pursue their graduate work in planning at the University of Oregon.

Application Materials

Interested applicants begin the application process by creating an account at https://gradweb.uoregon.edu/online_app/application/guidelines1.asp. The application process include submission of each of the following components:

1. A résumé
2. A statement, prepared by the applicant, explaining why admission to the UO planning program is sought and what the applicant's expectations are from the field
3. At least three letters of recommendation from people familiar with the applicant's ability to pursue graduate-level studies in planning

unofficial transcripts from all prior undergraduate and graduate institutions in your online application.

4. You must have official transcripts from all colleges or universities where you received a bachelor's degree and all subsequent degrees. Find more information at <https://gradschool.uoregon.edu/admissions/how-to-apply/transcripts>. Graduate Record Examinations (GRE) scores are optional. If submitted, they are considered along with other application materials.
5. Demonstration of English language proficiency. International students should visit <https://gradschool.uoregon.edu/admissions/how-to-apply/english-proficiency> to review the options to demonstrate proficiency.

Applications are accepted beginning September 15 for admission the following fall term.. The deadline for receipt of the application to the program is February 1. Applicants are notified of admission decisions early in March. For more information, call or email the school.

The Planning Curriculum

A total of 72 credits beyond the bachelor's degree is required for the MCRP degree. Core courses must be taken for letter grades, unless offered pass/no pass only.

Students are expected to enroll for six terms with an average course load of 12 credits a term. During the summer, students are encouraged to engage in planning work through external and internal internships.

Students who have successfully completed the two-term Community Planning Workshop are eligible to apply for paid internships with the Institute for Policy Research and Engagement. Successful applicants will continue to provide support for planning projects across the state, gaining valuable experience and professional connections. Many students also pursue internships outside of PPPM (with governments, nonprofits and private planning firms). Internships are not required as part of curricular requirements for MCRP students.

Master of Community and Regional Planning Requirements

PPPM 663	Professional Development II	
PPPM 625	Community Planning Workshop	
PPPM 626	Community Planning Workshop	
FIELD OF INTEREST (25 credits)		25
Total Credits		72

Community Planning Workshop

A distinctive feature of the planning graduate curriculum is the Community Planning Workshop, an applied research and service program that is required for first-year students. Students work on six month planning projects in small teams supervised by program faculty members and second year graduate students in planning. Clients have included federal, state, county, and local governments as well as nonprofit organizations.

Projects typically focus on issues of immediate environmental, social, and economic importance to the client group and the general public. Recent project topics include

- Citizen involvement in planning process
- Housing needs analysis
- Land-use planning
- Natural hazards mitigation
- Program evaluation
- Strategic plans for communities and regions
- Tourism and recreational development
- Watershed planning

Each year, first-year graduate students enrolled in Community Planning Workshop (PPPM 625) and Community Planning Workshop (PPPM 626) complete five to 10 planning projects. Final written reports, prepared by each student team, provide evidence of the students' expertise and ability to conduct planning research and to prepare and present high-quality professional reports. After completing Community Planning Workshop (PPPM 625) and Community Planning Workshop (PPPM 626), selected students may continue to engage in planning research projects for compensation. The popularity of the program with students—and with government and private-sector clients—has enabled the Community Planning Workshop to provide research support for five to 15 students a year.

Federal grants and support from a variety of state agencies have helped the Community Planning Workshop become one of the most successful community planning assistance programs in the nation. Projects have received numerous state and national awards.

Nonprofit Management

The master of nonprofit management (MNM) is a professional degree designed to train students to lead nonprofit organizations. Due to the growth of the nonprofit sector over the past three decades in the US and the growth of nongovernmental organizations internationally, the sector has professionalized. People currently working in the nonprofit sector and others seeking to switch to or enter the nonprofit sector now seek master's-level training to advance their careers, specializing specifically in the administration of nonprofit organizations.

Critical skills for nonprofit administration are common to all nonprofit fields, including handling financial management challenges and tax-

exempt reporting structures, raising funds from individual donors and institutions, and managing a mission-oriented workforce.

Unique Aspects of the Program

The program melds relevant best-practice elements from the business and government sectors with the management imperatives of the nonprofit and philanthropic sectors. Woven into the course work are opportunities to obtain practical experience at nonprofit organizations, so that participants in the program have significant administrative experience upon graduating. Examples include the review and consultation portion of the Fundraising for Nonprofit Organizations (PPPM 581) course, the nine-month board membership required for the Nonprofit Board Governance (PPPM 687) course, and the projects student teams complete for nonprofit organizations in the Nonprofit Consultancy (PPPM 688) course.

Students may combine the master of nonprofit management with another graduate degree from within the department or from other academic units across campus. In most cases, a student is able to obtain two master's degrees within three years. The normal time to completion for the master of nonprofit management degree is six terms (two years).

Application Procedures

To be eligible for the master of nonprofit management, an applicant must hold a bachelor's degree. The department strongly encourages applications from people of all backgrounds, and is dedicated to fostering a diverse academic environment.

Applications for admission are due February 1 for students entering the program in the following fall. In certain cases, students may be admitted at other times of the year. The online application requires the following (please follow the detailed checklist available on the department website):

- Official transcripts from undergraduate college or university, and from graduate study, if applicable
- GRE or GMAT scores (optional)
- TOEFL or IELTS scores for nonnative English speakers
- A personal statement, two to three pages in length, describing your motivation and preparation for entering or furthering a career in the nonprofit sector, and providing a hypothetical blueprint for the next twenty years of your career
- Comprehensive employment and education résumé
- Three recommendation letters, with one or more of the letters by a faculty member
- University of Oregon online graduate admission application

Nonprofit Curriculum

After completion of the core curriculum (33 credits focusing on financial, management, and revenue-development skills), students complete an internship and 20 credits of concentration electives. Students complete a management-based capstone sequence that culminates in successful completion of a consulting project for a nonprofit organization. The two-year program takes 70 credits to complete.

Master of Nonprofit Management Requirements

MGMT 625	New Venture Planning	
MGMT 635	Opportunity Recognition	

GLBL 522	Aid to Developing Countries	
Other course (with MNM faculty advisor approval)		

Total Credits **70**

- 1 Completing a nonprofit internship (3 credits) is highly recommended for all MNM students, and required for those with fewer than two years of relevant professional experience.
- 2 Courses must be approved by an advisor and should focus on a specific field of interest such as policy, community development planning, environmental sustainability, international development, marketing and development, arts management, public advocacy, and education and social services. More options for course work may be found online (<https://pppm.uoregon.edu/grad/master-of-nonprofit-management/>).

Accelerated Master's of Nonprofit Management

This 5-year Accelerated Master's degree program enables students who graduate with a Major in PPPM or Minor in Nonprofit Administration to add one additional year of coursework to earn a Master's of Nonprofit Management degree. University of Oregon is one of the few universities in the world with a master's degree fully dedicated to professional training for executive leadership of nonprofit organizations. Graduates are in high demand, and pursue remunerative and rewarding careers.

Many of our undergraduates choose to pursue graduate work in nonprofit management, but often not at the UO since there is a significant amount of course overlap between our undergraduate and graduate offerings. This program will allow highly qualified and motivated undergraduates to stay with us for one additional year and earn a Master's degree. This is a 4+1 program as envisioned by much the materials and guidance for an accelerated master's program. Students will take 15 credits in master's-level coursework their senior year. They will take an additional 45 minimum graduate study credits (500+ courses) for graduate students seeking a master's degree in their 5th year.

Public Administration

The master of public administration (MPA) is a two-year program for people interested in public service careers that address the critical social, economic, and environmental issues of our time. The curriculum is designed to provide a combination of academic theory, analytic skills, and real-world applications so that students become effective and creative leaders in public service.

A central focus of the program is to prepare students to become evidence-based policymakers, analysts, and managers. Evidence-based policy making—the idea that the formulation of policy and its implementation should be based on evidence of effectiveness—has gained widespread acceptance in the policy community, both in the United States and abroad, and requires a closer connection between research and practice. It requires that researchers ask policy-relevant questions and conduct meaningful and timely analyses that support the decision-making process; conversely, it requires that policymakers, managers, and leaders think critically about research and integrate appropriate evidence in the implementation and formulation of policy and practice.

Recent graduates work as advisors, policy analysts, and strategic planners in all levels of government, in Oregon, throughout the US, and around the globe. Their work addresses the full range of social issues, from improving health-care access, increasing government

efficiency, and responsiveness to creating new governmental structures in developing democracies. Graduates also work in a broad range of nonprofit organizations, for instance, as executive staff members in social service, arts, and environmental organizations.

The State of Oregon is an exciting place to study public administration. As a "laboratory of democracy," it has a long and distinguished record of policy innovation. Most recently, Oregon has been on the forefront of advances in land-use, health-care, and environmental policy.

Unique Aspects of the Program

The size of the program means that master's students at the University of Oregon receive a tremendous amount of individual attention, particularly in the second year when they conduct a team-based policy research project. The close, collegial working relationships between students and instructors means that faculty members are often able to help students attain relevant alumni contacts, internships, and job opportunities.

Since the department also houses a master's degree program in community and regional planning (MCRP), master of public administration students benefit from additional faculty and planning-related course offerings. In particular, students are invited in their first year to enroll in a two-term, field-based course—Community Planning Workshop (PPPM 625)—in which students consult on a topical issue for a local government or nonprofit agency in Oregon.

Students interested in a career in nonprofits can earn a certificate in nonprofit management concurrently with their master of public administration. The certificate program offers innovative courses including one on board governance, in which students serve on a nonprofit board, and another on philanthropy, in which students award a \$15,000 grant to a local agency. As an alternate, students may complete both the MPA and MNM degrees concurrently. See a member of the department staff for application procedures for concurrent programs.

Oregon is known for its progressive policy making, from the Bottle Bill, to vote-by-mail, to current efforts in health-care reform. Students find policymakers and public managers unusually accessible for consultation in Oregon.

The program prepares participants to become effective, creative leaders in the public and nonprofit sectors. The curriculum provides a combination of substantive knowledge, analytic skills, and professional experience that primes students for careers as evidence-based policymakers, analysts, or managers.

Application Procedures

To be eligible for the graduate program in public administration, an applicant must hold a bachelor's degree.

Submit the following documents, which must be received by February 1:

1. Graduate Admission Application, available online—follow the instructions on the department's website
2. Comprehensive employment and education résumé
3. A two-page, typed statement of purpose that clearly describes the applicant's reasons for pursuing graduate study in the program at Oregon, his or her professional goals and objectives, and professional work experience
4. Transcripts of grades in courses taken for the bachelor's degree and of any other college-level work. They should be sent directly by the institution that awarded the course credits

5. Three letters of recommendation
6. The Graduate Record Examination is optional for admission
7. Applicants whose native language is not English must supply results of the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) examination. The minimum acceptable TOEFL score for admission is 575 (paper-based test) or 88 (Internet-based test); the minimum acceptable IELTS exam score is 7.0. The results of the examination should be sent to the Office of Admissions, 1217 University of Oregon, Eugene OR 97403-1217

Students are selected for the program based on a combination of their undergraduate academic performance, intellectual aptitude, commitment to public service, and written statement. The deadline for receipt of fall term admission is February 1. Applications received after the deadline will be considered on a rolling basis as space allows.

The department strongly encourages applications from people of all backgrounds, and is dedicated to fostering a diverse academic environment. This, we believe, will help prepare better future public leaders.

Master of Public Administration Requirements

Code	Title	Credits
CORE COURSES (33 credits)¹		
PPPM 618	Public Sector Theory	4
PPPM 628	Public Sector Economics	4
PPPM 629	Public Budget Administration	4
PPPM 633	Public Management	4
PPPM 636	Public Policy Analysis	4
PPPM 656	Quantitative Methods	5
PPPM 657	Research Methods in Public Policy and Management	4
PPPM 684	Public and Nonprofit Financial Management	4
FIELD OF INTEREST (28 credits minimum)		
plus 24 credits from elective courses focused on a specific field of interest ²		24
PPPM 623	Professional Development	1
PPPM 604	Internship: [Topic] ³	3
APPLIED RESEARCH PROJECT (11 credits)		
PPPM 637	MPA Policy Analysis Project	1
PPPM 638	MPA Capstone Applied Research Project I	5
PPPM 639	MPA Capstone Applied Research Project II	5
Total Credits		72

¹ Must be taken for letter grades.

² Interest areas may include: policy, public management, nonprofit management, planning, environmental policy, or other field of interest. A list of potential courses for each field of interest is available on the department's website. Students who would like to develop their own field of interest are able to do so in consultation with a faculty advisor. Recent graduates have created customized fields of interest in food sufficiency, health policy, and international development.

³ Completing an internship (3 credits) is highly recommended for all MPA students, and required for those with fewer than two years of relevant professional experience.

The master of public administration (MPA) program provides students with two key opportunities to synthesize classroom learning and apply their research skills to current policy and management issues. At the start of the second year, students engage in a policy project intended to simulate the real-world environment where analysts and managers are given short time frames to research a topic that they know little or nothing about. Over forty-eight hours, students read relevant policy and research documents, write a memo detailing the evidence base and key issues, and give an oral presentation. The project takes place the week before fall courses begin, and incoming first-year students have the opportunity to view the presentations as part of their orientation to the program. This component of the curriculum is a signature event and rite of passage each fall.

Students also enroll in a two-term project sequence that serves as the synthesizing capstone of the curriculum. Over winter and spring terms of the second year of study, students work on real-world or simulated real-world projects that require conducting in-depth needs assessments, evaluations, cost-benefit analyses, or other applied research. A faculty member works closely with student groups on these projects over the two terms. Past projects have included a survey for a state commission to gauge attitudes among key shareholders on potential policy change, an analysis of administrative data on the impact of a post-policy implementation on Oregonians, and an examination of three potential communities for a nonprofit's expansion.

Graduate Certificate in Arts Management

The 24-credit graduate certificate in arts management is available to graduate students enrolled in the School of Planning, Public Policy and Management as well as other master's and doctoral students across campus, and as a standalone graduate certificate program. Arts management typically refers to the business and programmatic management of arts organizations in the nonprofit or public sectors, including orchestras, opera companies, presenting organizations, museums, theaters, dance companies, arts councils, and service organizations. Arts managers may also be found in for-profit organizations in such areas as artist management, recording, art galleries, film, and television.

The program of study is designed to develop students' knowledge and competencies in cultural policy, cultural planning, and arts management in an individualized program of study. Additional credits are drawn from other specialized course offerings related to the student's area of interest in arts management, selected from courses offered through the PPPM school as well as from other academic units on campus. The graduate certificate in arts management is suitable for students from a range of fields, including art history, art, anthropology, music, nonprofit management, planning, public policy, theater arts, dance, and folklore.

Of the 24 credits total required for the program, 16 are from four required core courses:

Code	Title	Credits
PPPM 570	The Arts in Society	4
PPPM 571	Cultural Policy	4
PPPM 572	Creative Placemaking	4
PPPM 573	Cultural Programming	4

Electives ¹

Select 8 credits of course work from the following:		8
PPPM 510	Experimental Course: [Topic] (Event Management)	
PPPM 510	Experimental Course: [Topic] (Museum Education)	
PPPM 510	Experimental Course: [Topic] (Museum Practice)	
PPPM 570	The Arts in Society	
PPPM 575	Performing Arts Management	
PPPM 581	Fundraising for Nonprofit Organizations	

¹ This is a list of sample courses. With program director approval, elective credits for the certificate may also be taken in other departments.

Graduate Certificate in Nonprofit Management

The graduate certificate in nonprofit management prepares students for leadership in the nonprofit sector. The focused curriculum develops specific skills that are critical for success in managing nonprofit organizations.

Phenomenal growth in assets and activities of the nonprofit sector over the past two decades have led to career opportunities in the many areas of the nonprofit sector, including cultural and arts organizations, education, health care, human services, international development, and advocacy organizations. Nonprofit enterprise has broadened with developing sources of funding, and the complexities of its management require professional skills specific to the nonprofit sector.

Requirements

Code	Title	Credits

PPPM 688	Nonprofit Consultancy	

PPPM 604	Internship: [Topic] ²	6
Total Credits		24

- Elective credits may be taken in other departments. Information about the many nonprofit elective courses or waiver of required courses is available from the program director.
- Students wishing to complete the certificate must complete an internship and 5 elective credits **or** take 11 credits of nonprofit-relevant elective courses. Students who have no significant work experience in the nonprofit sector are strongly recommended to complete an internship by enrolling in 6 credits of Internship: [Topic] (PPPM 604).

Core courses must be taken for letter grades unless offered P/N only.

Admission

Graduate students from any UO department may apply for admission and add the certificate to their degree programs. Students who hold a bachelor's degree from an accredited university may apply to complete the certificate as a standalone program. Applications are reviewed for admission four times a year. Complete information about admission to the program is available on the nonprofit management certificate section of the department's website.

Concurrent Master's Degrees

Students may participate in a concurrent master's degree program. The fields of planning, public policy administration, and nonprofit management draw on knowledge and expertise from other areas such as business, law, economics, political science, environmental studies, geography, landscape architecture, and architecture. Through the concurrent degree program, students enroll in two master's programs simultaneously in order to complete requirements for both degrees with three years of course work. Students interested in this option should seek program advice from a member of the faculty. Students must be admitted to both programs and make special arrangements with both program directors.

PhD in Planning and Public Affairs

The UO PhD program in Planning and Public Affairs trains students to conduct rigorous, original research to inform scholarship, policy, and practice. Students must have a Masters degree in a related field to be admitted to the program;. Key aspects of our program include:

- **Innovative:** Focused around research groups working to address key societal issues with a high potential for academic employment
- **Interdisciplinary:** Flexible structure allows students to access a range of disciplines across our School and the University
- **Engaged:** Draws upon our international reputation of engaged teaching and scholarship in collaboration with agencies, cities, and communities
- **Inclusive:** Builds on our dedication to equity and inclusion and our diverse faculty

Each admitted student must choose a primary disciplinary track, which can be fulfilled with a previous graduate degree or coursework at Oregon.

1. Community and regional planning
2. Nonprofit management
3. Public administration and public policy

The program focuses on three, cutting-edge research areas that are strengths among the PPPM faculty. Students work with advisors based

in these research groups, and may also engage with other faculty across campus:

- **Sustainable Cities and Transportation:** Analyzing the emerging trends related to technology and cities such as: land use, urban form, street design, new mobility, active transport, micromobility, public policy, and public budgeting/finance.
- **Access and Equity:** Issues of access, equity, social justice, representation, and power for under-represented and under-served communities. This work crosses planning, community engagement, community development, urban design, non-profit management, and public policy disciplines
- **Nonprofit, Philanthropic and Social Enterprise:** Innovative trends related to management, arts and cultural leadership, philanthropy and social enterprise. This work focuses in particular on issues such as social entrepreneurship, high impact philanthropy and the economics of nonprofit organizations

Code	Title	Credits
Methods Plan ¹		16
Disciplinary Track and Concentration ²		36
Career Development ³		3
PPPM 607	Seminar: [Topic]	
PPPM 604	Internship: [Topic]	
Dissertation		18
Total Credits		73

- 1 Approved by the student's Pre-Dissertation Advisory Committee based on field of study.
- 2 Disciplinary Track coursework must be approved by the student's Pre-Dissertation Advisory Committee. Concentration coursework is determined by the student in consultation with their advisor.
- 3 Academic Career Development: may also substitute PS 602/608 teaching and professionalization seminars (or equivalent class with approval)

Institute for Policy Research and Engagement

The Institute for Policy Research and Engagement (formerly the Community Service Center) at the University of Oregon is an interdisciplinary institute that assists Oregon communities by providing planning and technical assistance to help solve local issues and improve the quality of life for Oregon residents. The role of the institute is to link the skills, expertise, and innovation of higher education with the economic development and environmental needs of communities and regions in the state, thereby providing service to Oregon and learning opportunities to the students involved.

Through the institute's programs, students gain important service and professional experience by helping to solve community and regional problems in addition to establishing relationships and strengthening partnerships between faculty members and students, community representatives, state and local agencies, and nonprofit organizations.

The institute oversees several programs:

- Community Planning Workshop
- Resource Assistance for Rural Environments (RARE) AmeriCorps Program
- Oregon Partnership for Disaster Resilience

· Economic Development Administration University Center

The Resource Assistance for Rural Environments (RARE) AmeriCorps Program

The RARE AmeriCorps Program offers a unique opportunity to connect the community and economic development needs of rural Oregon communities with the personal and professional development aspirations of the next generation. Using a tried-and-true model for engagement, we provide a topnotch service-learning experience while delivering resources, expertise, and critical capacity to rural Oregon. Our goal is to ensure a mutually beneficial experience for our RARE AmeriCorps members and rural communities we serve.

RARE AmeriCorps members serve all over the state, from coast to valley to mountain towns to the high desert. A portion of our community partners change each year, helping to ensure we meet the most pressing needs of rural Oregon. Regardless of where they are placed, RARE AmeriCorps members gain hands-on experience in systems thinking, project management and planning, develop technical skills, and build a strong statewide network of professionals, all while creating meaningful change in rural Oregon. Members assist with various levels of planning and implementation of critical projects across Oregon on a wide range of topics, including community and economic development, food systems, and environmental and sustainability planning.

The Oregon Partnership for Disaster Resilience (OPDR)

The partnership promotes risk reduction and mitigation activities around the state through local plan development support, research and technical resource development, training, and capacity building, offering service-learning opportunities to graduate students in planning, policy, environmental studies, and other university programs. The partnership coordinates three program areas: the Oregon Predisaster Mitigation Program; the Disaster-Resilient University Program, including the UO Integrated Emergency Management Program; and the Long-Term Postdisaster Recovery Planning initiative.

Courses

PPPM 101. Advocacy and Social Change. 4 Credits.

Explorations of how policy change occurs, how people and organizations create social and policy change, and how individuals can make a difference in their communities.

PPPM 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

PPPM 201. Introduction to Public Policy. 4 Credits.

Overview of professional public service and the planning and management of public issues. Focuses on the goals of public services within their economic, social, and political contexts.

PPPM 202. Healthy Communities. 4 Credits.

Historical relationships of public policy, planning, and public health; how public policies can promote health; relationship of planning and policies to inequalities in health outcomes.

PPPM 205. Introduction to City Planning. 4 Credits.

Introduction to planning, using urban issues as lenses to explore transportation, housing, environment, and social equity as critical elements shaping where and how people live.

PPPM 250. Arts and Human Values. 4 Credits.

Addresses fundamental aesthetic theory and practice questions resulting from viewing art as a powerful communicator of social and cultural values. Values, rights, and responsibilities of the contemporary visual environment. Institutional structures advancing the arts and culture in society will be examined.

PPPM 280. Introduction to the Nonprofit Sector. 4 Credits.

Overview of the nonprofit sector includes its origin, growth, oversight, and varied elements. Examines theory and research into the effectiveness of nonprofit strategies and structures.

PPPM 321. Inclusive Urbanism. 4 Credits.

Investigates the relationship between social-economic inclusion and the physical form of cities.

PPPM 325. Community Leadership and Change. 4 Credits.

Explores sustainable change at the community level by examining local systems and institutions: transportation, social influences, environment, housing, and the economy.

PPPM 331. Environmental Management. 4 Credits.

Introduction to environmental management. Focuses on solutions to problems in managing population, pollution, and resources.

PPPM 340. Climate-Change Policy. 4 Credits.

Overview of climate-change policy; topics include cap and trade, carbon tax, fuel efficiency standards, biofuel standards, and renewable portfolio standards.

PPPM 360. International Public Policy. 4 Credits.

Introduces international dimensions of public policy making by comparing national systems and institutions of governance, public policy making processes, and public policy decisions. Investigates concepts, theories, and approaches to compare public policies in economic, welfare, educational, health, and environmental sectors.

PPPM 370. Global Sustainable Development and Policy. 4 Credits.

Sustainable Development seeks to reconcile the economic, social, and environmental problems we face in a world with constrained resources. To have a broader perspective of what sustainability means, we examine problems through an interdisciplinary lens and investigate how these issues form and possible policy solutions.

PPPM 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

PPPM 401. Research: [Topic]. 1-21 Credits.

Repeatable.

PPPM 403. Thesis. 1-12 Credits.

Repeatable.

PPPM 404. Internship: [Topic]. 1-12 Credits.

Supervised work experience that offers students opportunities to explore and clarify career goals, apply academic learning, enhance and learn new skills, gain experience, and network with professionals. Repeatable. Prereq: PPPM 412.

PPPM 405. Special Problems: [Topic]. 1-12 Credits.

Repeatable.

PPPM 406. Practicum: [Topic]. 1-12 Credits.

Repeatable.

PPPM 407. Seminar: [Topic]. 1-5 Credits.

Repeatable.

PPPM 408. Workshop: [Topic]. 1-21 Credits.

Repeatable.

PPPM 409. Terminal Project. 1-12 Credits.

Repeatable.

PPPM 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable. Trial courses are taught under these numbers. See the online class schedule for current titles.

PPPM 410L. Experimental Course: [Topic]. 4 Credits.

Repeatable. Trial courses are taught under these numbers. See the online class schedule for current titles.

PPPM 412. Internship and Professional Development. 2 Credits.

Introduction to department's internship program and career development. Overview of professionalism and effective communication, resume and cover letter writing, and interviewing and networking skills.

PPPM 413. Quantitative Methods. 4 Credits.

Introduction to the use of quantitative techniques to answer planning, public policy and management related questions.

PPPM 415. Policy and Planning Analysis. 4 Credits.

Applied problem-solving in the public policy and planning process. Examines the theoretical and methodological underpinnings of policy and planning analysis.
Prereq: EC 201.

PPPM 418. Introduction to Public Law. 4 Credits.

Administrative law, including introduction to legal research, for public administrators. Administrative procedures, implementation of policy through administrative law, judicial review, and practical applications in public agencies.

PPPM 422. Grant Proposal Writing. 1 Credit.

Introduction to the process of preparing grant applications and material for funded research.

PPPM 425. Project Management. 4 Credits.

Application of specific techniques that lead to projects being completed on time, within budget, and with appropriate quality.

PPPM 426. Strategic Planning for Management. 4 Credits.

Process of strategic planning for communities, government agencies, and nonprofit organizations.

PPPM 432. Justice and Urban Revitalization. 4 Credits.

Examines the political, economic, institutional and social forces that affect the long-term vitality of cities and communities and how those factors relate to community redevelopment. Emphasis is given on how to revitalize low-income multicultural communities.

PPPM 434. Urban Geographic Information Systems. 4 Credits.

Introduction to geographic information systems in areas of environmental, demographic, suitability, and transportation-related research.

PPPM 438. Transportation Issues in Planning: [Topic]. 4 Credits.

Introduction to the social implications of various transportation-related policies and practices. Repeatable for a maximum of 8 credits.

PPPM 440. Land-Use Planning and Policy. 4 Credits.

Land use planning processes and policy tools that US governments employ to manage and control land development, especially those considered to support a community's efforts to pursue sustainable urbanization.

PPPM 442. Sustainable Urban Development. 4 Credits.

Introduces issues revolving around cities as the nexus for environmental challenges, including land-use planning, transportation planning, community and neighborhood design, and green buildings.

PPPM 443. Natural Resource Policy. 4 Credits.

Aspects of population and resource systems. Poses questions about population trends, policy, and optimum size; analyzes methods for determining resource availability and flows.

PPPM 444. Environmental Policy. 4 Credits.

Overview of policies related to the environment: examines the design and effectiveness of specific policies.

PPPM 445. Green Cities. 4 Credits.

Examines the history and future of the interface between urban growth and environmental concerns, and the technological, social, and political forces that continue to shape it.

PPPM 446. Socioeconomic Development Planning. 4 Credits.

Planning for responsible economic and social development. Policy problems and issues in providing a stable economic base and social and economic well-being while avoiding environmental degradation.

PPPM 448. Collaboration. 4 Credits.

Explores theory and practice of collaboration in public and nonprofit settings, including the role of organizations, agencies, and the public. Focuses in particular on developing and practicing collaboration skills and strategies.

PPPM 452. Public Participation in Diverse Communities. 4 Credits.

Review of community engagement strategies and tools for encouraging public participation in low income and ethnically diverse communities.
Prereq: PPPM 432.

PPPM 465. Program Evaluation. 4 Credits.

Introduction to the design and implementation of program evaluations.

PPPM 470. The Arts in Society. 4 Credits.

Course examines the arts as they function in society. Anthropological, philosophical, sociological, and art educational orientations to art are examined. Implications for arts and cultural management are addressed.

PPPM 471. Cultural Policy. 4 Credits.

Cultural Policy investigates political choice processes, governmental institutions, and the public policy cycle that shape the arts and culture sector.

PPPM 472. Creative Placemaking. 4 Credits.

This course provides an overview of the relationship between the arts and community development.

PPPM 473. Cultural Programming. 4 Credits.

Explore theory and practice related to arts and cultural programming in the public sector. Emphasis on inclusive and equitable cultural programming.

PPPM 475. Performing Arts Management. 4 Credits.

This course develops management skills for professional nonprofit performing arts organizations, focusing on executive leadership, strategic planning, programming, developing audiences, and venue management.

PPPM 480. Nonprofit Management. 4 Credits.

How to manage nonprofit organizations for superior performance in a humane, responsive, and responsible manner. Distinctive characteristics of nonprofit organizations.
Prereq: PPPM 280.

PPPM 481. Fundraising for Nonprofit Organizations. 4 Credits.

Introduction to fundraising for nonprofit organizations. Annual giving, major gifts, planned giving, and campaigns.

PPPM 483. Volunteer Resource Management. 2 Credits.

This course provides an overview of the role of volunteers in community organizations and serves as a comprehensive introduction to effective practices in volunteer resource management.

PPPM 484. Public and Nonprofit Financial Management. 4 Credits.

Introduction to financial management for public agencies and nonprofit organizations. Topics include budget processes, financial statements, financial resource management (taxes, donations, grants), expenditure systems, and capital project analysis.

PPPM 486. Philanthropy and Grant Making. 2 Credits.

History, economics, and practice of philanthropy and grant making in the United States. Students study philanthropy from a multidisciplinary perspective and finish the quarter by awarding a \$15,000 grant to a nonprofit organization of their choice.

PPPM 487. Impact Philanthropy. 4 Credits.

Introduction to impact philanthropy and related topics. Evidence-based philanthropy, venture philanthropy, impact investing, social impact bonds, impact measurement, and policy environment.

PPPM 488. Nonprofit Legal Issues. 4 Credits.

This course introduces legal issues for administration of nonprofit organizations. Topics include formation and types of organizations, board of directors duties, regulation of nonprofits, risk management, employee and volunteer law, lobbying, charitable solicitation, and laws on discrimination and accommodation.

PPPM 494. Practice of Leadership and Change. 4 Credits.

Examines the principles and practices of leadership and change in communities and organizations through discussions with community leaders and personal reflection.

Prereq: major status, senior standing preferred.

PPPM 495. Advanced Urban Geographic Information Systems. 4 Credits.

Acquiring advanced skills of using Geographic Information Systems (GIS) for community mapping and spatial analysis.

Prereq: PPPM 434 or other intro GIS class.

PPPM 503. Thesis. 1-16 Credits.

Repeatable.

PPPM 507. Seminar: [Topic]. 1-5 Credits.

Repeatable.

PPPM 508. Workshop: [Topic]. 1-21 Credits.

Repeatable.

PPPM 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable. Trial courses are taught under these numbers. See the online class schedule for current titles.

PPPM 518. Introduction to Public Law. 4 Credits.

Administrative law, including introduction to legal research, for public administrators. Administrative procedures, implementation of policy through administrative law, judicial review, and practical applications in public agencies.

PPPM 522. Grant Proposal Writing. 1 Credit.

Introduction to the process of preparing grant applications and material for funded research.

PPPM 525. Project Management. 4 Credits.

Application of specific techniques that lead to projects being completed on time, within budget, and with appropriate quality.

PPPM 526. Strategic Planning for Management. 4 Credits.

Process of strategic planning for communities, government agencies, and nonprofit organizations.

PPPM 532. Justice and Urban Revitalization. 4 Credits.

Examines the political, economic, institutional and social forces that affect the long-term vitality of cities and communities and how those factors relate to community redevelopment. Emphasis is given on how to revitalize low-income multicultural communities.

PPPM 534. Urban Geographic Information Systems. 4 Credits.

Introduction to geographic information systems in areas of environmental, demographic, suitability, and transportation-related research.

PPPM 538. Transportation Issues in Planning: [Topic]. 4 Credits.

Introduction to the social implications of various transportation-related policies and practices. Repeatable for a maximum of 8 credits.

PPPM 542. Sustainable Urban Development. 4 Credits.

Introduces issues evolving around cities as the nexus for environmental challenges, including land-use planning, transportation planning, community and neighborhood design, and green buildings.

PPPM 543. Natural Resource Policy. 4 Credits.

Aspects of population and resource systems. Poses questions about population trends, policy, and optimum size; analyzes methods for determining resource availability and flows.

PPPM 544. Environmental Policy. 4 Credits.

Overview of policies related to the environment: examines the design and effectiveness of specific policies.

PPPM 546. Socioeconomic Development Planning. 4 Credits.

Planning for responsible economic and social development. Policy problems and issues in providing a stable economic base and social and economic well-being while avoiding environmental degradation.

PPPM 548. Collaboration. 4 Credits.

Explores theory and practice of collaboration in public and nonprofit settings, including the role of organizations, agencies, and the public. Focuses in particular on developing and practicing collaboration skills and strategies.

PPPM 552. Public Participation in Diverse Communities. 4 Credits.

Review of community engagement strategies and tools for encouraging public participation in low income and ethnically diverse communities.

Prereq: PPPM 532.

PPPM 560. Health Policy. 4 Credits.

Introduction to the key health policy issues of access, cost, quality, and racial and ethnic disparities.

PPPM 565. Program Evaluation. 4 Credits.

Introduction to the design and implementation of program evaluations.

PPPM 570. The Arts in Society. 4 Credits.

Course examines the arts as they function in society. Anthropological, philosophical, sociological, and art educational orientations to art are examined. Implications for arts and cultural management are addressed.

PPPM 571. Cultural Policy. 4 Credits.

Cultural Policy investigates political choice processes, governmental institutions, and the public policy cycle that shape the arts and culture sector.

PPPM 572. Creative Placemaking. 4 Credits.

This course provides an overview of the relationship between the arts and community development.

PPPM 573. Cultural Programming. 4 Credits.

Explore theory and practice related to arts and cultural programming in the public sector. Emphasis on inclusive and equitable cultural programming.

PPPM 575. Performing Arts Management. 4 Credits.

This course develops management skills for professional nonprofit performing arts organizations, focusing on executive leadership, strategic planning, programming, developing audiences, and venue management.

PPPM 581. Fundraising for Nonprofit Organizations. 4 Credits.

Introduction to fundraising for nonprofit organizations. Annual giving, major gifts, planned giving, and campaigns.

PPPM 583. Volunteer Resource Management. 2 Credits.

This course provides an overview of the role of volunteers in community organizations and serves as a comprehensive introduction to effective practices in volunteer resource management.

PPPM 586. Philanthropy and Grant Making. 2 Credits.

History, economics, and practice of philanthropy and grant making in the United States. Students study philanthropy from a multidisciplinary perspective and finish the quarter by awarding a \$15,000 grant to a nonprofit organization of their choice.

PPPM 587. Impact Philanthropy. 4 Credits.

Introduction to impact philanthropy and related topics. Evidence-based philanthropy, venture philanthropy, impact investing, social impact bonds, impact measurement, and policy environment.

PPPM 588. Nonprofit Legal Issues. 4 Credits.

This course introduces legal issues for administration of nonprofit organizations. Topics include formation and types of organizations, board of directors duties, regulation of nonprofits, risk management, employee and volunteer law, lobbying, charitable solicitation, and laws on discrimination and accommodation.

PPPM 595. Advanced Urban Geographic Information Systems. 4 Credits.

Acquiring advanced skills of using Geographic Information Systems (GIS) for community mapping and spatial analysis.

Prereq: PPPM 434 or other intro GIS class

PPPM 601. Research: [Topic]. 1-16 Credits.

Repeatable.

PPPM 602. Supervised College Teaching. 1-5 Credits.

Repeatable.

PPPM 604. Internship: [Topic]. 1-10 Credits.

Supervised work experience that offers students opportunities to explore and clarify career goals, apply academic learning, enhance and learn new skills, gain experience, and network with professionals. Repeatable.

PPPM 605. Special Problems: [Topic]. 1-16 Credits.

Repeatable.

PPPM 606. Practicum: [Topic]. 1-16 Credits.

Repeatable.

PPPM 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

PPPM 608. Workshop: [Topic]. 1-16 Credits.

Repeatable. A recent topic is Community Planning.

PPPM 609. Terminal Project. 1-16 Credits.

Repeatable.

PPPM 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

PPPM 611. Introduction to Planning Practice. 4 Credits.

Explores the concepts and functions of the planning process as they relate to the social, economic, political, and environmental aspects of communities and regions.

PPPM 612. Legal Issues in Planning. 4 Credits.

Federal and state legal relationships, the role of the courts in reviewing public sector decision-making, sources of the law, issues in land-use regulation, and basic legal research skills.

PPPM 613. Planning Analysis I. 5 Credits.

Data sources and methods of data collection including surveys; descriptive and multivariate analysis; computer applications; selected analytic models, population projections, cost-benefit analysis.

PPPM 616. Planning Theory and Ethics. 4 Credits.

Logic of the planning process; the relationship of planning to the political process and to rational decision making in governance.

PPPM 617. Human Settlements. 4 Credits.

Historical development of cities and the ways in which city and regional contexts influence economic, social, and political processes.

PPPM 618. Public Sector Theory. 4 Credits.

Overview of the core concepts, theories, and practices that provide the foundation for the field of public policy and management.

PPPM 620. Planning and Management Research Skills. 2 Credits.

Surveys research skills in planning and public administration. Applies research skills to applied projects in Community Planning Workshop and Nonprofit Consultancy.

PPPM 623. Professional Development. 1 Credit.

Articulating preliminary career goals and mapping the necessary steps to accomplish these goals.

PPPM 625. Community Planning Workshop. 5 Credits.

First in a two-term sequence of planning and problem-solving courses. Students working in teams conduct research and develop solutions to planning problems for a client community. Sequence with PPPM 626.

PPPM 626. Community Planning Workshop. 5 Credits.

Last in a two-term sequence of planning and problem-solving courses. Students working in teams conduct research and develop solutions to planning problems for a client community. Sequence with PPPM 625. Prereq: PPPM 625.

PPPM 628. Public Sector Economics. 4 Credits.

Reasons for governmental intervention and analysis of revenue sources available to governments. Includes discussion of various taxes, intergovernmental transfer policies, and user fees.

PPPM 629. Public Budget Administration. 4 Credits.

Resource allocation through the budget process. Analysis of budget systems, service costing, and citizen participation in the budget process.

PPPM 633. Public Management. 4 Credits.

Theory and practice of public service management; leadership and organizational capacity building, including key management activities for developing effective public service organizations.

PPPM 636. Public Policy Analysis. 4 Credits.

Techniques in the policymaking process. Determining the impact of policies, comparing alternatives, determining the likelihood that a policy will be adopted and effectively implemented.

Prereq: PPPM 628 or equivalent.

PPPM 637. MPA Policy Analysis Project. 1 Credit.

Students team to produce a professionally oriented policy analysis memorandum and presentation on an assigned topic in a 48-hour period.
Prereq: PPPM 636.

PPPM 638. MPA Capstone Applied Research Project I. 5 Credits.

Team prepare applied research projects for client organizations using analytical and managerial skills to solve problems in public policy analysis or public management. Sequence with PPPM 639.
Prereq: PPPM 618, 629, 633, 636, 657, 684.

PPPM 639. MPA Capstone Applied Research Project II. 5 Credits.

Teams prepare applied research projects for client organizations using analytical and management skills to solve problems in public policy analysis or public management. Sequence with PPPM 638.
Prereq: PPPM 638.

PPPM 640. Land Use Planning and Policy. 4 Credits.

Study spatial planning tools and processes that control and manage land developments in order to enhance the well-being of human societies and natural systems.

PPPM 646. Planning for Growth Management. 4 Credits.

Examines motivations for managing growth. Surveys regulatory and incentive-based approaches to growth management at the state, regional, and local level.

PPPM 656. Quantitative Methods. 5 Credits.

Develops skills in quantitative analysis. Emphasizes selecting appropriate analysis procedures and properly interpreting and reporting results.

PPPM 657. Research Methods in Public Policy and Management. 4 Credits.

Survey of research methods used in the analysis of public policy issues. Emphasis is on determining the appropriate methodology for a given research question.
Prereq: PPPM 656.

PPPM 663. Professional Development II. 1 Credit.

Pre-professional students practice the habits of professionals in the field. Build skills in metacognition and reflection, inclusion and diversity, and personal investment in life long learning and inquiry. Sequence with PPPM 623. Repeatable once for maximum of 2 credits.

PPPM 670. Cultural Administration. 4 Credits.

Course examines the major functions and issues in the administration of the arts and culture. Emphasis is place on nonprofit organizations.

PPPM 680. Managing Nonprofit Organizations. 4 Credits.

Principles of effective management of nonprofit organizations. Governance, strategy, legal structure and standards, and volunteer administration.

PPPM 681. Nonprofit Financial Management. 4 Credits.

Fundamentals of managing nonprofit revenues and expenses, budgeting, fund stewardship, endowment investment and payout, event and service pricing, capital project decision making, and internal control procedures.

PPPM 684. Public and Nonprofit Financial Management. 4 Credits.

Financial management overview for public agencies and nonprofits, including budget processes, financial statements, resource management, expenditure systems, capital project analysis, and internal management control processes.

PPPM 685. Social Enterprise. 4 Credits.

Introduction to social enterprises and their ecosystem. Earned revenue and social business models, social performance management, balancing financial and social objectives, funding landscape, policy environment, and taking social enterprises to scale.

PPPM 686. Nonprofit 48-Hour Charrette. 1 Credit.

Requires students to complete a management memo on an assigned topic. Work is completed within a 48-hour period, mimicking the high-stakes, deadline-intensive schedule characterizing professional work in the nonprofit sector.

PPPM 687. Nonprofit Board Governance. 1 Credit.

Students serve on governing boards of nonprofit organizations for one year: fall, winter, and spring terms. Repeatable twice for a maximum of 3 credits.

PPPM 688. Nonprofit Consultancy. 4 Credits.

Student teams complete projects for nonprofit organizations, assessing organizational needs and capacity, evaluating alternative strategies, and recommending solutions for organizational success.

Product Design

Trygve Faste, Department Head

541-346-6891
251E Lawrence Hall
5282 University of Oregon
Eugene, Oregon 97403-5232

The Department of Product Design rigorously explores the invention, production, and use of products. It integrates the theories and applied practices in the design, art, and architecture disciplines, creating collaborative opportunities across campus with the business school and the anthropology and chemistry departments. The critical research and design work produced by students and faculty members has an impact on both the local and international design communities.

The program exposes and expands on the significance of materials in products, helping students develop an understanding of how aspects of sustainability and ergonomics, tactile and visual aesthetics, and structural integrity can influence their choices in materials.

Overview

The department offers a bachelor of fine arts (BFA) degree in product design. The BFA is a four-year program combining liberal arts and intensive product design studies designed to prepare students for a professional career in product design. Students enrolled in the program share a foundation in design, graphics, drawing, and art history with majors in both architecture and art.

Eugene

Students undertake the first three years of the BFA in product design at the university's main campus in Eugene. This location is well-equipped with computer and digital-imaging labs, a new digital computer-controlled mill, laser cutter, wood shop, digital loom, metals and ceramics shops, large-format printing facility, and other specialized art and design studios in Lawrence Hall, Downtown Eugene and the Northsite studio complex. The Eugene campus has strong undergraduate and graduate degree programs in architecture, art, ceramics, digital arts, fibers, interior architecture, metalsmithing and jewelry, painting, photography, printmaking, and sculpture. In addition, students have access to other university resources, such as the architecture and allied arts and main libraries, Student Recreation Center, Erb Memorial Union, and Craft Center.

Portland

Students pursuing the BFA degree complete their fourth year of study at the university's new facility in Portland's Old Town Historic

District. The White Stag Block houses studio facilities, a digital fusion laboratory, classrooms, a library, exhibit and research spaces, the Sports Product Design Master's Program, and work areas for students and faculty members. An integrated shop and an output center for two- and three-dimensional computer numerical controlled production are available. Product design students benefit by interacting with students from other related professional disciplines, such as architecture and sports product design. An internship component of the BFA program gives students access to design professionals and direct experience at leading Northwest design companies.

Preparation

High school and college students interested in product design should prepare themselves by taking courses in the following subjects:

- Fine arts and design (e.g., drawing, painting, sculpture, two- and three-dimensional design, fiber arts, metal arts, ceramics, drafting, art history, architecture, furniture or interior design)
- Social sciences (e.g., sociology, psychology, cultural anthropology)
- Sciences and mathematics (e.g., physics, algebra, geometry)
- Humanities (e.g., literature, writing)

To better understand the professional field, prospective students may plan to visit and discuss opportunities with local designers and firms practicing product design.

Product design students are required to own a laptop computer. If students purchase recommended equipment, they are eligible for technical support from our computing staff. Recommended systems are listed on the program's website. Purchase of a digital camera to record studio work and use for classroom assignments is strongly advised.

Faculty

John Arndt, associate professor (product design). BFA, 1997, Alfred; MDes, 2006, Design Academy Eindhoven. (2008)

Wonhee Jeong Arndt, associate professor. BFA, 2002, Kookmin; MDes, 2006, Design Academy Eindhoven. (2014)

Trygve Faste, associate professor (product design). BA, 1997, Whitman College; MFA, 2004, Cranbrook Academy of Art. (2010)

Kiersten Muenchinger, Tim and Mary Boyle Chair in Material and Product Studies; associate professor (product design). BA, 1993, Dartmouth College; MS, 1998, Stanford. (2008)

Erdem Selek, associate professor (product design). BID, 2004, Middle East Technical; MA, 2007, Ecole Supérieure d'Art et de Design; MS, 2008, Istanbul Technical. (2015)

Hale Selek, associate professor (product design). BID, 2004, Middle East Technical; MA, 2007, Ecole Supérieure d'Art et de Design; MS, 2008, Istanbul Technical. (2015)

Susan Sokolowski, associate professor (sports product design). BFA, 1990, Fashion Institute of Technology; MA, 1997, Cornell; PhD, 1999, Minnesota, Twin Cities. (2015)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

- Bachelor of Fine Arts in Product Design (p.)

Undergraduate Studies

Application for Product Design Major

The major in product design is an intensive, limited-enrollment program. Acceptance is competitive and based on documented evidence of potential to excel in the field. Admission screening takes place once a year and requires review of a portfolio of visual materials submitted by each applicant. These portfolios should display promise and creativity, but need not demonstrate extensive experience in design or product-related projects. Applications that don't include visual materials are not reviewed.

Students apply directly to the department for admission as majors. The postmark deadline for applications is January 15 for fall term admission. Visit the program website for the application form and instructions.

We are no longer accepting new BA/BS applications because the Department of Product Design now offers a four-year professional Bachelor of Fine Art (BFA) degree in product design.

BFA Application

Admission to the bachelor of fine arts program requires an application that includes a portfolio review of the student's work, usually in the last term of the fourth year of study. Students who have completed a comparable four-year degree in material and product studies at another institution may be admitted to the fifth-year BFA program. Such BFA candidates must satisfy the university's 45-credit residence requirement. Students accepted to the BFA program from schools other than the University of Oregon should speak with an advisor to determine how their credits will transfer. Prerequisites may require the student to spend more than one year in the program. For the latest information on the PD BFA requirements, visit Product Design's BFA webpage (<https://artdesign.uoregon.edu/pd/undergrad/bfa/>).

Bachelor of Fine Arts in Product Design Requirements

Code	Title	Credits
Drawing and Basic Design		16

¹ One studio course chosen from product design (PD), ceramics (ARTC), fibers (ARTF), metalsmithing and jewelry (ARTM), sculpture (ARTS).

Graduate Studies

The Department of Product Design offers a master's degree in Sports Product Design, a two-year program based in Portland, Oregon.

The Master of Sports Product Design prepares designers to be key members and leaders of multidisciplinary development teams within the more than 800 sports product companies located in Oregon and beyond. The program focuses on research and innovation methods, design tailored for the athlete, product materials and sustainability, marketing and branding through the study of sports-specific design techniques, along with human physiology and biomechanics.

Students who graduate from this program will be capable of making strong contributions to the sports design culture of Oregon and the world at large.

Master of Science in Sports Product Design

The Master of Sports Product Design is a two-year program intended for students already equipped with conceptual problem-solving abilities, knowledge of materials and production, strategies for emotional product resonance and relevance, and entrepreneurial skills (typically, but not always, acquired in an undergraduate program in product design or its equivalent).

Degree Requirements

The curriculum is divided into three categories, per NASAD requirements for terminal graduate degrees:

1. A minimum of 65% of the total credits for the degree in studio studies.
2. A minimum of 15% of the total credits for the degree should include academic studies concerned with visual media.
3. At least 10% of the total program should be reserved for elective credits.

Studio Studies. A minimum of 65% of the total credits for the degree shall be in studio. As part of this requirement, institutions are responsible for maintaining title/content consistency.

Code	Title	Credits
SPD 684	Research Methodology and Innovation Process Studio	6

SPD 645	Sports Product Design and Business (SPD and Business)	4
SPD 650	Sports Product Materials and Manufacturing	4
SPD 685	Sports Product Design Studio I	6
SPD 686	Sports Product Design Studio II	6
SPD 687	Sports Product Design Studio III	6
SPD 601	Research: [Topic]	1-6
SPD 688	Innovative Project Strategy Development Studio	9
SPD 689	Collaborative Creation and Launch Studio	9
J 616	Introduction to Strategic Communication Marketing	4
HPHY 631	Human Performance and Sports Products	3
HPHY 632	Human Biomechanics and Sports Product Design	2

Academic Studies. A minimum of 15% of the total credits for the degree should be in academic studies concerned with visual media. Course assignments should be made with careful consideration of (1) the scope and objectives of the student's program, and (2) the content of studies completed at the undergraduate level.

Code	Title	Credits
SPD 415	Soft Goods Technologies (Soft Goods Tech for SPD)	4
SPD 425	Digital Creation Technologies (Digital Tech for SPD)	4
SPD 503	Thesis (Thesis)	1-6
SPD 602	Supervised College Teaching (Supervised Teaching)	1-6
SPD 604	Internship: [Topic]	1-6
SPD 605	Special Problems: [Topic]	1-6

Elective Studies. Elective studies are important since they provide opportunities for students to follow specific areas of interest related to their areas of specialization or their prospective careers. It is strongly recommended that at least 10% of the total program be reserved for electives.

Code	Title	Credits
SPD 606	Practicum: [Topic]	1-6
PD 510	Experimental Course: [Topic]	1-6
J 621	Foundations of Strategic Communication	4
J 624	Strategic Communication: [Topic]	2
MGMT 625	New Venture Planning	3

Professional Connections

Industry partners for Sports Product Design provide special opportunities for students, fulfilling a number of critical roles as part of the learning environment of this program: instructors, advisors, guest reviewers, lecturers, mentors. Some examples of recent partners include Intel, Leatherman, Logitech, Nike, and Under Armour.

Admission

Applicants must have completed an undergraduate degree and demonstrate a combination of education and relevant experience to begin work immediately designing products manually and digitally. This is

typically demonstrated through formal transcripts, but applicants are also required to submit the following:

- Resume/CV.
- A 300-word statement regarding applicant work, internship or personal experience related to sports product design.
- A 300-word personal statement describing interest in the sports product design program and how the applicant sees themselves influencing the industry through their work.
- A portfolio of creative work (a maximum of 20 pages and 5 megabytes) showcasing problem-solving in the design process, drawing and prototyping skills, and storytelling, serving as a demonstration of the candidate's design abilities.
- Three letters of recommendation from faculty members outside of the UO Department of Product Design.
- GRE is optional.
- TOEFL score.

Applications are reviewed beginning on January 15 of each year and undergo rolling review for admission until the cohort is complete (up to 20 students). Incoming students begin the fall term immediately after acceptance.

Product Design Courses

PD 101. Introduction to Product Design. 4 Credits.

This course is an introduction to the Product Design profession and its cultural relevance. Lectures, reading and projects convey theory (critical thinking), designers (history), design methods (CAD, drawing, building), and storytelling (documentation / presentation) to give a foundation in product innovation, creation, and portfolio generation.

PD 198. Workshop: [Topic]. 1-12 Credits.

Repeatable.

PD 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

PD 223. Beginning Design Drawing. 4 Credits.

Focuses on perspective, line weight, construction with primary shapes, and shading in the creation of three-dimensional objects.

PD 240. Designers' Tools. 4 Credits.

Fundamental construction methods for design. Develop and understanding material properties and the use of specific tools through the design, development and construction of two projects.

PD 301. Introduction to Design Studio. 4 Credits.

Introduction to a studio based design course that combines theory and practice with a series of assignments and projects.

Prereq: PD 223, PD 240, PD 330.

PD 302. Introduction to Design Studio II. 4 Credits.

Integrate 2D and 3D communication and presentation skills to develop project-based design solutions.

Prereq: PD 301; coreq: PD 323.

PD 323. Design Drawing. 4 Credits.

Introduces specific techniques in drawing and modeling objects and their spatial context; the demonstration and implementation of various media and types of drawing. Repeatable once for a maximum of 8 credits.

Prereq: ART 115, PD 223.

PD 330. Introduction to Computer Aided Design. 4 Credits.

Introduction to computer-assisted design (CAD) in which students learn virtual design and physical manufacturing relationships and techniques.

PD 340. Design for Use. 4 Credits.

Provides the basic theoretical underpinnings for considering the socio-cultural background and design of products. Lectures and readings present main issues; discussions complete conceptual principals.

Prereq: PD 350.

PD 350. Objects and Impacts. 4 Credits.

Explores how design influences and is influenced by materials and manufacturing processes. Lectures, readings, and discussions present sustainability, aesthetic, and functional aspects of product design.

Prereq: PD 370.

PD 370. Design Process. 4 Credits.

Introduces design processes, from theoretical to professional, using readings, guest lectures, and experimental new structures.

PD 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

PD 400M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

PD 401. Research: [Topic]. 1-12 Credits.

Repeatable with change of topic.

PD 404. Internship: [Topic]. 1-12 Credits.

Repeatable twice for a maximum of 12 credits with change of topic.

PD 405. Special Problems: [Topic]. 1-12 Credits.

Repeatable.

Prereq: instructor's permission.

PD 406. Practicum: [Topic]. 1-12 Credits.

Repeatable with change of topic.

Prereq: instructor's permission.

PD 407. Seminar: [Topic]. 1-4 Credits.

Repeatable.

PD 408. Workshop: [Topic]. 1-6 Credits.

Repeatable with change of topic.

PD 410. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

PD 430. Computer-Assisted Design and Production. 4 Credits.

Meshes virtual design and physical design as students work on projects using shop tools and computer-aided design and manufacturing software and equipment.

Prereq: ART 115, ART 116, PD 223.

PD 483. Advanced Studio I. 4 Credits.

Design studio focuses on personal questions that are explored through active design development. Questions may relate to issues of user interface, sustainability, or societal problems. Repeatable twice for a maximum of 12 credits.

Prereq: PD 302, PD 340.

PD 484. Advanced Studio II. 4 Credits.

Design studio focuses on global questions explored through active development. Questions may relate to issues of user interface, sustainability, or societal problems. Repeatable twice for a maximum of 12 credits.

Prereq: PD 302, PD 340.

PD 485. Advanced Studio III. 4 Credits.

Design studio focuses on corporate questions that are explored through active design development. Questions may relate to issues of user interface, sustainability, or societal problems. Repeatable twice for a maximum of 12 credits.

Prereq: PD 302, PD 340.

PD 486. BFA Studio I. 6 Credits.

Explores problems that stress design development through innovation and the responsibility to solve complex societal, functional, and aesthetic issues. Seminar component fosters theoretical, professional, and creative discussion.

PD 487. BFA Studio II. 6 Credits.

Second course in series of interactive studios in which students engage in independent project-based learning. Sequence with PD 486, PD 488. Prereq: PD 486, BFA standing.

PD 488. BFA Studio III. 6 Credits.

Third course in series of interactive studio in which students engage in independent project-based learning. Sequence with PD 486, PD 487. Prereq: PD 487, BFA standing.

PD 510. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

Sports Product Design Courses

SPD 410. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

SPD 410L. Experimental Course: [Topic]. 3 Credits.

Repeatable.

SPD 415. Soft Goods Technologies. 4 Credits.

An intensive, hands-on exploration of the technologies required to innovate soft good products in the sports product design industry.

SPD 425. Digital Creation Technologies. 4 Credits.

A fundamental course to learn the technologies used to define digital blueprints of sports products.

SPD 503. Thesis. 1-6 Credits.

Repeatable.

SPD 510. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

SPD 510L. Experimental Course: [Topic]. 3 Credits.

Repeatable.

SPD 515. Soft Goods Technologies. 4 Credits.

An intensive, hands-on exploration of the technologies required to innovate soft good products in the sports product design industry.

SPD 525. Digital Creation Technologies. 4 Credits.

A fundamental course to learn the technologies used to define digital blueprints of sports products.

SPD 601. Research: [Topic]. 1-6 Credits.

Repeatable.

SPD 602. Supervised College Teaching. 1-6 Credits.

Repeatable.

SPD 604. Internship: [Topic]. 1-6 Credits.

Repeatable.

SPD 605. Special Problems: [Topic]. 1-12 Credits.

Repeatable.

SPD 606. Practicum: [Topic]. 1-12 Credits.

Repeatable.

SPD 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

SPD 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

SPD 645. Sports Product Design and Business. 4 Credits.

SPD 645 focuses on the fundamental business theories used to create, market, and sell sports products.

SPD 650. Sports Product Materials and Manufacturing. 4 Credits.

Explores the materials science, manufacturing, and sustainability theories applied in sports product design.

Prereq: SPD 684.

SPD 684. Research Methodology and Innovation Process Studio. 6 Credits.

Focuses on the design theories and methodologies used to design innovative sports products.

SPD 685. Sports Product Design Studio I. 6 Credits.

Explores the theories and creative problem-solving methods used to design solutions for sports soft goods. Theories of human thermoregulation, hydroprotection, support, aerodynamics, wearable technology, and kinematics.

Prereq: SPD 684.

SPD 686. Sports Product Design Studio II. 6 Credits.

Explores the theories and creative problem-solving methods used to design solutions for sports footwear. Mechanical theories of cushioning, stability, support, traction, and slipping-sliding.

Prereq: SPD 650, SPD 685.

SPD 687. Sports Product Design Studio III. 6 Credits.

Explores the theories and creative problem-solving methods used to design solutions for sports hard goods. Performance theories are considered to generate creative solutions.

Prereq: SPD 650, SPD 686.

SPD 688. Innovative Project Strategy Development Studio. 9 Credits.

First of a two-term capstone studio that examines the alignment of research, science, materials, and business theories to create an innovative sports product design opportunity.

Prereq: SPD 650, SPD 687.

SPD 689. Collaborative Creation and Launch Studio. 9 Credits.

Second of a two-term capstone studio that critically examines the alignment of design, materials, science, research, and business theories to create an innovative sports product design opportunity.

Prereq: SPD 688.

College of Education

Laura Lee McIntyre, Interim Dean

541-346-7452
230 HEDCO Education Building
1215 University of Oregon
Eugene, Oregon 97403-1215

Preparing Educators in the 21st Century

The College of Education's academic majors are organized into four departments: counseling psychology and human services; educational methodology, policy, and leadership; education studies; and special education and clinical sciences.

The college offers undergraduate, master's, and doctoral degrees and preparation for licensure, programs that link instruction to current research findings and pedagogical practices and to the needs of the educational community, ensuring students are prepared for collaborative practice in the field of education. Students become active learners as they accumulate an understanding of disciplinary content and develop professional knowledge and skills that prepare them for careers in education or the social services. Surveys of graduates from the College of Education indicate that the overwhelming majority are successful in securing employment or continuing their professional preparation in their chosen field.

With school, community, and clinical partners, the college's nationally prominent teaching and research faculty offers opportunities for student practicum and field-based experiences in professional settings where effective policy and practice is created and then implemented.

Academic, research, and outreach service units provide integrated and cross-disciplinary learning experiences that help students acclimate to their professions, develop initial competence, acquire advanced proficiency, and become practicing professionals and scholars.

The College of Education is ranked by *US News and World Report* as one of the nation's top colleges of education (14th nationally in the 2018 rankings). Its scholarship, teaching, and practical learning opportunities offer students a respectful and affirming climate, a culture of belonging, and an inclusive learning environment.

Admission

The College of Education follows university policy in its admission procedures as described in the **Admissions** and **Division of Graduate Studies** sections of this catalog. Students who transfer from other institutions must meet university entrance requirements. Programs in the College of Education have additional requirements for admission and limits on the number of students admitted to the major or licensure programs. Prospective students are urged to check admission requirements for their desired programs. Some require field placements in community settings and require background checks as part of the admissions process.

Financial Assistance

Scholarships

Scholarships are available for undergraduate and graduate students. Application requirements and procedures may be requested from

Andrea Olson, Office of the Dean; telephone 541-346-5943; e-mail coescholarships@uoregon.edu.

Stipends and Fellowships

Stipends and fellowships frequently are awarded to graduate students. Both forms of assistance may cover most of the cost of tuition and provide a monthly cash payment. Information on graduate employee positions is available on the college website.

Information about financial assistance is listed in the application materials for each major and on the College of Education's website. Application deadlines should be followed to receive consideration for aid. Information about university scholarships and loan programs is available from the Office of Student Financial Aid and Scholarships, 260 Oregon Hall.

Dismissal

Some majors and specializations in the College of Education require field placements in community settings such as public schools, community preschools, mental health clinics, correctional institutions, and welfare programs. Many placements are with vulnerable groups such as young children, juvenile offenders, or individuals with disabilities or mental health, adjustment, or learning problems. During these placements students interact with professionals and often are recipients of confidential or sensitive information. Consequently, it is imperative that College of Education students adhere to high ethical and moral standards. The University of Oregon and each major in the College of Education has written ethical standards or a code of conduct for its students. In an instance where evidence exists that a student may have violated the university's conduct code or a program's written ethical standards or code of conduct, the student will immediately be removed from the field placement until the matter is resolved. A student found to be in violation may be terminated from the College of Education and not permitted to reenter.

Academic Programs

Associate Dean

230 HEDCO Education Building

The College of Education offers accredited bachelor's, master's, and doctoral degrees and professional-development programs. Often, in concert with an academic degree, majors offer programs leading to state licensure for employment in Oregon public schools. These licenses are conferred by the state Teacher Standards and Practices Commission (TSPC), the agency authorized by the Oregon Legislative Assembly to issue licenses for teaching, personnel service, or administration in public schools. The TSPC issues appropriate licenses to applicants upon the university's recommendation that they have successfully completed the relevant licensure program. The State of Oregon has reciprocal administrative, teaching, and personnel service license agreements with most other states and Puerto Rico. Students who receive a license from the State of Oregon will most likely find the application process for a license in another state easier, especially if the licensing standards are similar. Information about licensure is available from the college's student academic services.

The following list enumerates the degree, licensure, and endorsement programs offered by the College of Education. Information about a specific program may be found under the relevant area of concentration in this section of the catalog.

Undergraduate Programs

- Bachelor's degree: communication disorders and sciences, educational foundations, family and human services
- Minor: special education
- Certificates: educational foundations—secondary, special education

Graduate Programs

- Master's degree: communication disorders and sciences; counseling, family, and human services; couples and family therapy; prevention science; curriculum and teacher education; curriculum and teaching; educational policy and leadership; school psychology; special education, applied behavioral analysis (scheduled to begin Fall 2023)
- Doctoral degree: communication disorders and sciences, counseling psychology, prevention science, critical and sociocultural studies in education, educational leadership, school psychology, special education, special education: rehabilitation
- Specializations: quantitative research methods, Spanish language psychological service and research

Licensure Preparation

State of Oregon licensure: preliminary teaching license, preliminary administrator license, professional administrator license, preliminary school psychology license

Endorsements

Advanced mathematics, biology, chemistry—elementary multiple subjects, English for speakers of other languages, English language arts, integrated science, foundational English language arts, foundational mathematics, foundational science, foundational social studies, integrated science, music, physics, reading intervention, social studies, special education—early Intervention, special education—generalist (K–12), world language: Chinese, world language: French, world language: German, world language: Japanese, world language: Latin (*currently not accepting students*), world language: Russian (*currently not accepting students*), world language: Spanish

Research and Outreach Services

John Seeley, Associate Dean

541-346-3005

230 HEDCO Education Building

<https://education.uoregon.edu/research> (<https://education.uoregon.edu/research/>)

The nationally recognized research and outreach units of the College of Education provide a comprehensive, research-intensive environment for undergraduate, licensure, master's, and doctoral students. The research units foster fundamental and applied research that faculty members integrate into the college's curriculum. The outreach units offer schools and community agencies access to faculty research and expertise and provide field-based opportunities in which students learn to use research-based knowledge to improve the effectiveness of services, practices, and policies.

Behavioral Research and Teaching

Gerald Tindal and Julie Alonzo, Codirectors

541-346-3535

175 Lorry I. Lokey Education Building

www.brtprojects.org (<http://www.brtprojects.org>)

Behavioral Research and Teaching combines curriculum-based measurement with effective teaching practices to develop, study, and disseminate empirically based educational programs for students who are at risk of failure in school and in the community. Research and professional development activities and projects focus on (1) curriculum-based measurement and large-scale testing; (2) response-to-intervention methods in educating students with disabilities; (3) behavioral and instructional consultation; and (4) systems change and school reform. Opportunities for research and personnel preparation are available for graduate students.

Center for Equity Promotion

Heather McClure, Director

541-346-8904

1600 Millrace Drive, Suite 307

ceqp.uoregon.edu (<http://ceqp.uoregon.edu/>)

The Center for Equity Promotion is dedicated to working with communities to better understand and support the positive development of children and families, particularly those who are underserved by education, health, and social service systems. The center focuses on populations with the greatest burden of health and education disparities related to adverse social and economic conditions. The center's research informs culturally specific prevention science, intervention, and policy efforts that build on community strengths.

Center for the Prevention of Abuse and Neglect

Jeff Todahl, Director

541-346-7484

1244 Walnut Street

<https://education.uoregon.edu/rou/center-prevention-abuse-and-neglect> (<https://education.uoregon.edu/rou/center-prevention-abuse-and-neglect/>)

The Center for the Prevention of Abuse and Neglect is a research and outreach unit designed to coordinate, facilitate, and measure a collective impact violence prevention initiative, with an emphasis on significant reduction in child abuse and neglect in Lane County, Oregon. The center applies public health concerns, prevention theory, and implementation science toward the development of strategies to attain community-level change.

The goals of the center include the following:

1. Develop, implement, and evaluate a place-based, community-generated theory of change for child abuse and neglect
2. Develop and implement a countywide, population-level measurement protocol for child-abuse prevention and a statewide measurement system for the prevalence of child abuse
3. Provide technical assistance expertise and training on child-abuse prevention for other communities in the United States
4. Provide research and evaluation services to private foundations and units of government to test the efficacy of statewide prevention strategies

Center on Human Development University Center for Excellence in Developmental Disabilities

Christopher Murray, Director

541-346-3591

901 E. 18th Ave.
chd.uoregon.edu

The center assists in improving the quality of life for persons with developmental disabilities and their families. The Center on Human Development is home to the University Center for Excellence in Developmental Disabilities, part of a national network of 67 university-based centers that share a vision for a nation in which all Americans, including those with disabilities, participate fully in their communities. The center's scientists and staff members engage in research, teaching, and outreach designed to improve the lives of individuals with disabilities, their families, and their communities.

Center on Teaching and Learning

Ben Clarke, Director

541-346-9120
ctl.uoregon.edu (<http://csws.uoregon.edu>)

The center is a community of scholars who conduct and disseminate research that focuses on the solutions to serious but practical problems in school systems. It seeks to advance the understanding and use of the most rigorous scientific evidence and research-based practices to prevent the academic difficulties that many school-aged children experience. The primary focus of research is the role of curriculum, instruction, and assessment as individual elements that affect student advancement in school systems.

Early Childhood Coordination Agency for Referrals, Evaluations, and Services

LaWanda Potter and Kim Giansante, Codirectors

541-346-2578
299 E. 18th Ave.
earlychildhoodcares.uoregon.edu (<http://earlychildhoodcares.uoregon.edu>)

Early Childhood Coordination Agency for Referrals, Evaluations, and Services (Early Childhood CARES) provides early intervention and early childhood special education services to eligible, birth-to-five-year-old children in Lane County. These services may include a combination of specially designed instruction in community or specialized preschools, parent education, speech therapy, physical and occupational therapy, vision and hearing services, and consultation for autism or challenging behaviors. Practicum opportunities are available for undergraduate and graduate students who are interested in working with young children, in preschools and parent-toddler programs.

Early Intervention Program

Jane Squires, Director

541-346-0807
139 Clinical Services Building
eip.uoregon.edu (<http://eip.uoregon.edu>)

Faculty members, training research efforts, and products of the Early Intervention Program have had a major impact on the fields of early intervention, early childhood special education, and early childhood education. The program's goal is to expand and improve educational and therapeutic services for infants and young children who are at risk and disabled and for their families. Underlying this purpose is the assumption that improving and expanding services that help children become independent and productive benefits not only the individual but society as a whole.

Educational and Community Supports

Kent McIntosh, Director

541-346-2340
141 Lokey Education Building
<https://ecs.uoregon.edu> (<https://ecs.uoregon.edu/>)

Educational and Community Supports was established in 1972 as a research unit within the College of Education. Its purpose is to develop, validate, and implement practices that result in positive, durable, measurable change in the lives of individuals with disabilities and their families. Federal- and state-funded projects within the unit support research, teaching, information systems, and state-level technical assistance. Positive behavior support, secondary education and transition, adult services, and systems change are areas of content focus.

Institute on Violence and Destructive Behavior

Jeffrey R. Sprague and Hill Walker, Codirectors

541-346-3592
Clinical Services Building, Third Floor
ivdb.uoregon.edu (<http://ivdb.uoregon.edu/>)

The mission of the Institute on Violence and Destructive Behavior is to help schools and social service agencies address violence and destructive behavior in schools and beyond their boundaries. The goal is to ensure safety and facilitate the academic achievement and healthy social development of children and youth. Faculty members conduct original research, provide staff training, disseminate knowledge and best practices, and integrate research findings into College of Education academic courses. They also consult with agencies concerned with public safety and youth violence prevention.

The institute has developed evidence-based assessment tools and interventions to address factors associated with violence, dropout frequency, and delinquency, tools used by professionals in schools, mental health facilities, and correctional settings. The institute was approved as a center of excellence by the Oregon State Board of Higher Education in 1995 and receives support for its activities through competitively awarded federal grants.

IntoCareers

Ann Fillback Watt, Director

541-346-2374
5258 University of Oregon
intocareers.or (<http://intocareers.org>) (<http://intocareers.org>)

IntoCareers develops and supports the Career Information System, which provides content, multimedia, curriculum, and Internet applications that assist people in making informed career choices. IntoCareers licenses its products to state entities such as education agencies, offices of postsecondary education, and departments of labor. These entities create localized versions of the Career Information System to support career development programs in their respective states.

Oregon Career Information System

Matt Bell, Director

541-346-3872 or 800-495-1266
Baker Downtown Center
328 East Broadway
oregoncis.uoregon.edu (<http://oregoncis.uoregon.edu>)

The Oregon Career Information System, a state-based resource, helps Oregonians make career decisions and successful transitions throughout their lives. Established in 1971, it was the first state-based career information delivery system in the nation. Administered by the College of Education, the Oregon Career Information System is a self-supporting, fee-based consortium. It uses the Internet to present comprehensive information about occupations and industries, postsecondary programs and schools, and financial aid, connecting career options to the paths for reaching them. Its software and materials are used in schools, colleges, work-force agencies, and private businesses to support the career development of their students, clients, and employees. The staff provides field leadership and training to professionals involved in career development programs and services. Work-study positions and internships are available for undergraduate and graduate students.

Secondary Special Education and Transition Program

Deanne Unruh, Director

541-346-3585

201 Clinical Services Building

<https://pages.uoregon.edu/sset/>

Secondary Special Education and Transition is a multidisciplinary research unit dedicated to developing further scientific understanding of adolescents and young adults with disabilities and other high-risk behaviors. Faculty members conduct research, technical assistance, and outreach activities to develop and implement research-based transition services that assist young people in developing the knowledge and skills to succeed in fulfilling their desired adult roles, including meaningful employment, completion of postsecondary education or training programs, and living independently in the community. Research is conducted in collaboration with state departments of education, schools, service agencies, parents, and youth.

Prevention Science Institute

Laura Lee McIntyre, Director

541-346-3630

1600 Millrace Dr.

PSI is a multidisciplinary institute focused on understanding human development, preventing behavioral health problems, and implementing effective interventions in community settings.

Facilities, Organizations, and Services

HEDCO Clinic

Jody Ferguson, Clinic Manager

541-346-0922

170 HEDCO Education Building

1655 Alder Street

<https://education.uoregon.edu/admin-unit/hedco-clinic> (<https://education.uoregon.edu/admin-unit/hedco-clinic/>)

The HEDCO Clinic is a multidisciplinary training clinic within the College of Education, staffed by a team of faculty scientists, therapists, and psychologists who provide comprehensive, research-based services in the areas of autism, speech-language-hearing, cognitive and language abilities after brain injury, mental health counseling, and academics and teaching. It offers clients state-of-the-art services that faculty researchers and clinicians have developed, providing students with opportunities

to apply evidence-based interventions with intensive instruction and supervision in an integrated health-care setting.

Learning Commons

Ken Loge, Coordinator

541-346-7616

110 HEDCO Education Building

<https://learningcommons.uoregon.edu/>

The Learning Commons is designed for student collaboration and study, providing centralized technology support and services for members of the faculty and staff. Facilities include color and black-and-white printing, document scanning, wall-mounted displays for connecting personal laptops, and study spaces that may be reserved for private or small-group use. Two study rooms can be reserved for groups of as many as ten, with four smaller study rooms that can serve two or three or be used simply for individual study. The main space has a variety of seating for groups or individuals, with a total seating capacity of seventy. Laptops can be connected to five large, wall-mounted flat panel displays for group project work. Thirty desktop computers with Macintosh and Windows operating systems include a variety of software, and the area includes high-speed wireless connectivity. Laptops and adapters can be checked out at the front desk for use in the Learning Commons or in College of Education classes. Both black-and-white and color printing is available using Duck Bucks, and documents can be scanned at no cost using the scanning workstation. Student staff members provide technology help for students when needed.

Student Academic Services

130 HEDCO Education Building

541-346-3405

Student Academic Services offers academic advising and tutoring referrals; information on degree and licensure requirements, academic programs, and university policies and procedures; and information on resources available to students. In addition, Student Academic Services maintains student records and collaborates with educator licensing and accreditation entities at state and federal levels to ensure the College of Education is in compliance with policies and procedures that permit students to receive the appropriate degree and license.

Courses

EDUC 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable. Recent topics include Exploring Careers in Education.

EDUC 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

EDUC 406. Practicum: [Topic]. 1-12 Credits.

Repeatable. Recent topics include Peer Advising Experience.

EDUC 407. Seminar: [Topic]. 1-5 Credits.

Repeatable.

EDUC 408. Workshop: [Topic]. 1-18 Credits.

Repeatable.

EDUC 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

EDUC 507. Seminar: [Topic]. 1-5 Credits.

Repeatable.

EDUC 508. Workshop: [Topic]. 1-18 Credits.

Repeatable.

EDUC 510. Experimental Course: [Topic]. 1-5 Credits.
Repeatable.

EDUC 602. Supervised College Teaching. 1-5 Credits.
Repeatable.

EDUC 605. Reading and Conference: [Topic]. 1-16 Credits.
Repeatable.

EDUC 606. Practicum: [Topic]. 1-16 Credits.
Repeatable.

EDUC 607. Seminar: [Topic]. 1-5 Credits.
Repeatable. Recent topics include Advanced Professional Practices.

EDUC 609. Terminal Project. 1-12 Credits.
Repeatable.

EDUC 610. Experimental Course: [Topic]. 1-5 Credits.
Repeatable.

EDUC 610L. Experimental Course: [Topic]. 1-4 Credits.
Repeatable.

EDUC 611. Survey of Educational Research Methods. 3 Credits.
Survey of qualitative, quantitative, and single-subject research methods. Students develop competence in using published research to inform decision-making in various settings.

EDUC 612. Social Science and Education Research Design. 3 Credits.
Overview of qualitative, quantitative, and single-subject research methods. Emphasis on introducing students to considerations, issues, and techniques of social science research design.

EDUC 614. Educational Statistics. 3 Credits.
Foundations of statistical methods for research producers. Covers sampling methods, descriptive statistics, standard scores, distributions, estimation, statistical significance testing, T tests, correlation, Pearson's chi-square test, power, effect size.
Prereq: EDUC 612.

EDUC 616. Philosophical Foundations of Social Science. 4 Credits.
This course examines the philosophical assumptions that underlie various research methodologies in the human and social sciences. It additionally introduces beginning doctoral students to the work of a variety of professors in the College of Education.

EDUC 620. Program Evaluation I. 3 Credits.
Focuses on small-scale evaluations, particularly in the field of education and human services. Students plan and design an evaluation.
Prereq: EDUC 640.

EDUC 621. Program Evaluation II. 3 Credits.
Implementation and completion of the evaluation design defined in Program Evaluation I.
Prereq: EDUC 620.

EDUC 630. Qualitative Methodology I: Interpretivist Inquiry. 4 Credits.
Examines the history of qualitative research in the study of human experience, emphasizing interpretive approaches to qualitative research that retain the regulative ideal of objectivity.

EDUC 632. Qualitative Methodology II: Postcritical Inquiry. 4 Credits.
Explores the epistemic limits of representing human experience, and the political and ethical implications for researchers beginning with Marx.
Pre- or coreq: EDUC 630.

EDUC 634. Qualitative Methodology III: Posthumanist Inquiry. 4 Credits.
Examines theoretical influences on qualitative research beginning with those associated with the linguistic turn, then critiquing the linguistic turn, and ending with the ontological turn.
Pre- or coreq: EDUC 630, EDUC 632.

EDUC 636. Advanced Qualitative Methodology: New Materialisms. 4 Credits.
Examines contemporary theoretical explorations prompted by "the new materialisms" and how questions of ontology and materiality produce considerations of agency, data, subjectivity, voice, and analysis.
Pre- or coreq: EDUC 630, EDUC 632, EDUC 634

EDUC 640. Applied Statistical Design and Analysis. 3 Credits.
Factor analysis of variance, planned comparisons, post hoc tests, trend analysis, effect size and strength of association measures, repeated measures designs.
Prereq: EDUC 614.

EDUC 642. Multiple Regression in Educational Research. 3 Credits.
Application and use of multiple regression in educational research. Topics include bivariate regression, multiple regression with continuous and categorical independent variables.
Prereq: EDUC 640.

EDUC 644. Applied Multivariate Statistics. 3 Credits.
Advanced statistical techniques including covariance analyses, discriminant function analysis, multivariate analysis of variance, principal components analysis, exploratory factor analysis.
Prereq: EDUC 640.

EDUC 646. Advanced Research Design. 3 Credits.
Provides a deeper understanding of educational research with an emphasis on principles of research designs and their use in applied research. Offered alternate years.
Prereq: EDUC 640.

EDUC 650. Single-Subject Research Methods I. 3 Credits.
Basic single-subject design strategies and general procedures as well as issues related to conducting and analyzing single-subject research in applied settings. Sequence with EDUC 652.
Prereq: EDUC 614.

EDUC 652. Single-Subject Research Methods II. 3 Credits.
Critical evaluation of single-subject and group-analysis research designs; elaboration on critical topics in single-subject methodology. Sequence with EDUC 652.
Prereq: EDUC 650.

EDUC 654. Advanced Applied Behavior Analysis. 3 Credits.
Doctoral-level seminar designed to provide skills, practice, and knowledge in advanced methods and theory of applied behavior analysis.
Prereq: EDUC 652.

EDUC 656. Advanced Analysis of Single-Case Research. 3 Credits.
Focuses on application of statistical and meta-analytic strategies for analyzing single-case research. Sequence with EDUC 650, EDUC 652, EDUC 654. Offered alternate years.
Prereq: EDUC 650. One course in structural equation modeling or hierarchical linear modeling is recommended preparation.

Counseling Psychology and Human Services

Leslie Leve, Department Head
541-346-9148

541-346-0683 fax
240 HEDCO Education Building

Programs in the Department of Counseling Psychology and Human Services educate and train professionals in counseling psychology, couples and family therapy, prevention science, and family and human services. Students are trained to effectively identify, prevent, and treat psychological and public health problems in children, adolescents, adults, and families. At the doctoral level, students extend scientific knowledge through research in collaboration with faculty mentors. Field placements, practicum placements, and internships at all levels of training provide students with opportunities to practice in schools, community agencies, and clinical and research settings under the supervision of faculty members, agency personnel, and collaborating scholars.

Faculty

Tiffany Brown, senior lecturer (self-harm, family dynamics of addiction, collegiate recovery communities). BS, 2002, MEd, 2005, Oregon; PhD, 2009, Texas Tech. (2011)

Elizabeth Budd, assistant professor (early chronic disease prevention, physical activity and healthy eating promotion, adolescent and community health). BS, 2005, Santa Clara; MPH, 2009, Saint Louis; PhD, 2016, Washington (St. Louis). (2016)

Krista Chronister, professor (domestic violence, career counseling, community intervention). BS, 1996, Florida; MS, 2000, PhD, 2003, Oregon. (2003)

Jessica Cronce, associate professor (health and risk behaviors among young adults, individual-focused prevention). BS, 1999, Washington (Seattle); MS, 2005, MPhil, 2006, PhD, 2009, Yale. (2015)

Dave DeGarmo, research associate professor (prevention science methodology, longitudinal analysis, fathers and parenting). BA, 1987, Lock Haven; MS, 1989, PhD, 1993, Akron. (2013).

Wendy Hadley, Julie and Keith Thomson Faculty Chair and HEDCO Clinic Director, associate professor (adolescent sexual and substance use risk prevention, adolescent obesity, technology interventions). BS, 1994, University of Florida; MS, 2000, PhD, 2003, University of Memphis. (2019)

Nichole Kelly, assistant professor (obesity prevention and adolescent health, eating disorders, health promotion). BS, 2004, Virginia; PhD, 2013, Virginia Commonwealth. (2016)

Atika Khurana, associate professor (adolescent development and risk-taking, self-regulation and executive functions, family and ecological influences). BS, 2003, MS, 2005, Punjab; PhD, 2009, Ohio State. (2012)

Jean Kjellstrand, assistant professor (corrections-involved families, positive youth development, reentry and preventive interventions). BA, 1989, Carleton College; MSW, 1991, Wisconsin, Madison; PhD, 2009, Portland State. (2014)

Leslie Leve, professor (foster care, adoption, prevention science). BA, 1990, California, Santa Cruz; MS, 1991, PhD, 1995, Oregon. (2013)

Benedict T. McWhirter, professor (adolescents at risk, college student development, connectedness). BA, 1986, Notre Dame; MC, 1988, PhD, 1992, Arizona State. (1997)

Ellen Hawley McWhirter, Ann Swindells Professor in Counseling Psychology (adolescent career development, empowerment, Latino youth academic success). BA, 1983, Notre Dame; MC, 1988, PhD, 1992, Arizona State. (1997)

Bertranna Muruthi, assistant professor (interventions and prevention programs for immigrant families). BA, 2010, MS, 2012, Miami (OH); PhD, 2017, Georgia. (2019)

James Muruthi, assistant professor (family and neighborhood factors, social capital and health disparities among aging marginalized individuals). BS, 2007, MS, 2010, Miami (OH); PhD, 2016, Georgia. (2019)

Elizabeth A. Stormshak, Philip H. Knight Chair; professor (prevention of delinquency, conduct problems, peer rejection). BA, 1988, Washington (Seattle); MS, 1992, PhD, 1995, Pennsylvania State. (1996)

Emily Tanner-Smith, associate professor (applied research methodology, meta-analysis, substance use and addiction). BS, 2003, Belmont; MA, 2007, PhD, 2009, Vanderbilt. (2017)

Jeff Todahl, associate professor (child abuse and neglect prevention, intimate partner violence, community engagement). BA, 1985, Western Washington; MS, 1989, Seattle Pacific; PhD, 1995, Florida State. (1999)

Karrie P. Walters, senior instructor (human services, child and family interventions, prevention and social justice). BA, 1996, North Texas; MA, 2001, Minnesota, Twin Cities; PhD, 2010, Oregon. (2010)

Courtesy

Joseph Arpaia, courtesy assistant professor (clinical hypnosis, autonomic nervous system, mediation and psychotherapy). BS, 1982, California Institute of Technology; MD, 1990, California, Irvine. (2005)

Philip A. Fisher, professor. See **Psychology**.

Richard D. Freund, courtesy assistant professor (research methods, community college counseling, cognitive therapy). BA, 1966, Brown; PhD, 1971, Stanford. (1975)

Lauren Lindstrom, professor (career development, youth with disabilities, gender equity). BS, 1985, MS, 1991, PhD, 2000, Oregon. (2000)

Emeriti

Henry F. Dizney, professor emeritus. BS, 1954, Southeast Missouri State; MEd, 1955, Wayne State; PhD, 1959, Iowa. (1967)

Gordon A. Dudley, associate professor emeritus. BA, 1956, Kalamazoo; MA, 1959, Colorado; EdD, 1971, Harvard. (1967)

Sally Fullerton, professor emerita. BS, 1956, Oregon State; MA, 1960, Cornell; PhD, 1970, Oregon. (1970)

Weston H. Morrill, professor emeritus. BS, 1960, MS, 1961, Brigham Young; PhD, 1966, Missouri, Columbia. (1990)

Shoshana D. Kerewsky, senior lecturer II emerita. BA, 1983, Swarthmore; MA, 1990, Lesley; PsyD, 1998, Antioch, New England. (1996)

Janet Moursund, associate professor emerita. BA, 1958, Knox; MS, 1961, PhD, 1963, Wisconsin, Madison. (1967)

Anita Runyan, associate professor emerita. BS, 1956, Pacific Union; MS, 1968, PhD, 1972, Oregon. (1972)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

- Bachelor of Arts
- Bachelor of Science
- Bachelor of Education
- Direct Service Intensive Pathway

Undergraduate Studies

Family and Human Services

240 HEDCO Education Building
541-346-0909
fhs@uoregon.edu

The family and human services major leads to a bachelor of arts (BA), bachelor of science (BS), or bachelor of education (BEd) degree. The family and human services major offers two pathways or emphases for study, the Prevention Science (PS) emphasis or Direct Service Intensive (DSI) emphasis. All FHS students are admitted into the Prevention Science emphasis. Students who wish to complete the DSI emphasis must apply.

The PS emphasis is 54 credits and allows students to study the application of research to prevent conditions that negatively impact well-being and focus on studying the design and evaluation of preventive interventions. The DSI emphasis is 64 credits and allows students to study the delivery of preventive interventions, treatment, and recovery support services and to gain applied practicum experience in community social services agencies to apply the knowledge and skills that they have learned.

Careers

Graduates find work as entry-level professionals in a variety of community services and governmental agencies, and many pursue graduate work in disciplines such as counseling psychology, couple and family therapy, prevention science, education, special education, early intervention, agency management and leadership, social work, human development, and family studies.

Direct Service Intensive Pathway

The Family and Human Sciences degree programs default into the Prevention Science pathway. Students may request to instead fulfill the requirements for the Direct Service Intensive Pathway listed below:

Code	Title	Credits
Human Services: Practice		8
FHS 472	Human Services in Practice	
Human Services Practice Supervision		4
FHS 473	Human Services in Practice Supervision	
Direct Service Intensive Capstone		2

* Replaces the Scientific Analysis & Interpretation requirement from the Prevention Science Pathway.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

In addition to required course work, those working toward all degrees listed below must participate in work or volunteer experiences related to human services and maintain a cumulative grade point average (GPA) of 2.50 or better.

- Master of Science in Prevention Science
- Master of Education in Prevention Science
- Doctor of Philosophy in Counseling Psychology
- Doctor of Philosophy in Prevention Science

Graduate Studies

The department offers master's degrees with majors in counseling, family, and human services, couples and family therapy, and prevention science. The department also offers doctoral degrees with majors in counseling psychology and prevention science. The department's faculty also provides courses for other College of Education and university programs.

Master's Degrees in Counseling Psychology

The counseling psychology major leads to a master of arts (MA) and master of science (MS) degree awarded to doctoral students on their path to completing the doctoral degree. The program does not accept independent masters' students.

Master of Arts Degree Requirements

Code	Title	Credits
	Psychological foundations	15
	Research competencies	20
	Practitioner competencies	54
	Professional competencies	7
	Elective courses and seminars	18
Total Credits		114

Additional Requirement

The candidate must demonstrate proficiency in a second language.

Master of Science Degree Requirements

Code	Title	Credits
	Psychological foundations	15
	Research competencies	20
	Practitioner competencies	54
	Professional competencies	7

Elective courses and seminars	18
Total Credits	114

The MA and MS degrees are earned by enrolled doctoral candidates who meet the requirements as they complete a PhD degree. Some graduate courses taken at another accredited institution may be applied to the requirements.

Master of Education in Counseling, Family, and Human Services

The counseling psychology major leads to a master of education (MEd) degree awarded to doctoral students on their path to completing the doctoral degree. The program does not accept independent masters' students.

Couples and Family Therapy

Jeff Todahl, Program Director

240 HEDCO Education Building

541-346-0909

cft@uoregon.edu

This two-year program trains students as professional family therapists in preparation for state licensure. This intensive training combines a strong theoretical base in systemic therapy with applied clinical experience. Students learn how to provide culturally sensitive and responsive therapeutic services and collaborate with providers from other disciplines across a variety of health-care settings.

The clinical practicum includes 500 client contact hours with 200 hours in relational systems (50 percent with couples or families) and 80 hours of individual and group supervision. Supervision at the Center for Healthy Relationships involves live observation, participation in reflecting teams, and feedback on audiovisual recordings of therapy sessions. In addition, students see clients at community agencies, clinics, and therapist practices. The Couples and Family Therapy Program is one of two programs in Oregon to be accredited by the Commission on Accreditation for Marriage and Family Therapy Education and approved by the Oregon Board of Licensed Professional Counselors and Therapists. Students of the program also have the option to complete a research project and formal thesis as well as the Spanish language specialization in addition to the standard program of courses.

Application and Admission

Detailed admission policies and procedures for the couples and family therapy specialization are available on the couples and family therapy website. Students are admitted fall term only. Completed applications must be received by the deadline published on the website for the following fall term. Only completed applications are reviewed for admission. Applicants are evaluated on the following:

1. Quality of work
2. Related work, background, or experience
3. Résumé with statement of purpose
4. Diversity essay response
5. Three letters of recommendation
6. An interview

Notices about disposition of applications are mailed by April 15.

Applicants must pass a criminal background check before they may enroll.

Doctoral Degree in Counseling Psychology

Benedict T. McWhirter, Program Director

240 HEDCO Education Building
541-346-9148
cpsy@uoregon.edu

The doctoral program is the only counseling psychology program in the Pacific Northwest that is accredited by the American Psychological Association Commission on Accreditation (750 First Street NE, Washington, DC 20002-4242, 202-336-5979), and it is recognized as acceptable for licensure by the Oregon Board of Psychologist Examiners. The program has been accredited since 1955.

Earning a doctoral degree in counseling psychology typically requires five to six years of study beyond the bachelor's degree. This period includes a one-year, full-time, supervised predoctoral internship. Students must complete a PhD dissertation that demonstrates a high standard of scholarship and the ability to conduct independent, original research. Students may enter the program with a bachelor's or a master's degree.

The program follows an ecological model of training embedded in the scientist-practitioner tradition. Students learn to use evidence-based preventive and remedial intervention strategies for working with individuals, children, families, and groups within their many contexts. This includes training in culturally sensitive assessment and intervention strategies designed to increase understanding and effect change at all levels. Students engage in critical reflection on the science and practice of health service psychology and social justice advocacy as core to their training.

The doctoral program prepares health service psychologists specializing in counseling psychology who can make a significant contribution to the field through scholarly research and professional practice. Students participate in integrated classroom, practicum, and fieldwork activities in research, prevention, and intervention with children and adults, families, groups, and communities. Training experience may be had at the UO Counseling Center, Oregon State University Counseling and Psychological Services, Lane Community College Counseling

Department, UO Prevention Science Institute, and in community agencies or nonprofit research centers.

Graduates are prepared to work as researchers, practitioners, and educators in research institutions, institutions of higher education, medical settings, managed and integrated health-care organizations, community college and university counseling centers, community mental health centers, juvenile corrections agencies, human resources departments in business, and career counseling agencies.

PhD Requirements

Code	Title	Credits
	Courses in psychological foundations and discipline-specific knowledge	24
	Courses in research methods, design, statistics, and measurement	48
	Dissertation	18
CPSY 603	Dissertation	
	Practitioner competencies	57
	Professional competencies	12
	Additional courses	6
Total Credits		165

Application and Admission

Students are admitted fall term only. Prospective applicants may find detailed admission policies and procedures on the counseling psychology website (<https://education.uoregon.edu/program/prevention-science/>). The closing date for receipt of completed applications is posted on the website for entry the following fall term. Notices about the disposition of applications are e-mailed by April 15.

Applicants are evaluated on the following:

1. Academic record
2. Graduate Record Examinations (GRE) general test scores
3. Related work, research, and life experiences
4. Statement of purpose in seeking admission
5. Letters of recommendation
6. An interview

Only completed applications are reviewed. The application process is online only; see the website for procedures.

Graduate training includes research training, completion of a predissertation research project, and completion of a dissertation as well as practicum and internship placements in which students work with children and adults, families, groups, and communities.

Doctoral Degree in Prevention Science

Nicole Giuliani and Nichole Kelly, Program Directors

240 HEDCO Education Building
541-346-9148
prevsci@uoregon.edu

The doctoral program leads to a doctor of philosophy (PhD) degree in prevention science. This research-intensive degree program can be completed in four years, with students earning an MS en route to the PhD. This program is intended for students who have completed a bachelor's or master's degree in a prevention science-related discipline or have significant human development, psychology, social science,

education, or prevention science experience. Students must complete a PhD dissertation that demonstrates a high standard of scholarship and the ability to conduct independent, original research.

Program Goals and Competencies

Goals

- **Goal 1.** Graduates describe theoretical models, risk and protective factors, preventive interventions (especially evidence-based ones), and implementation practices related to prevention programs and policies for diverse populations
- **Goal 2.** Graduates understand and adhere to the standards of knowledge for prevention science, including best practices in research design and methods, data analysis, interpretation, dissemination and rigorous ethical practice
- **Goal 3.** Graduates commit to multicultural competence and enhancing human welfare in their scholarly work related to prevention science
- **Goal 4.** Graduates display professionalism in their relationships with faculty and staff members, peers, and community partners in diverse settings

Competencies

Learning objectives for the prevention science graduate programs focus on preparing students to achieve the following set of minimum competencies that accompany the stated program goals:

- **Competency 1.** Students describe the origins, foundations, and standards of prevention science (Goal 2)
- **Competency 2.** Students design and carry out theoretically grounded research studies that contribute to the literature on risk and protective factors, and identify their mechanisms of influence associated with behavioral health outcomes across the lifespan (Goal 1, 2, 3)
- **Competency 3.** Students demonstrate knowledge of evidence-based preventive interventions and policies and understand how to apply prevention science theories to the design, implementation, and evaluation of preventive interventions (Goal 1, 2, 3, 4)
- **Competency 4.** Students integrate knowledge of research design, quantitative methods, data analysis, and multimethod, multiagent assessment methods commonly used in prevention science into their research activities (Goal 2)
- **Competency 5.** Students demonstrate skill in disseminating their work to diverse audiences via formal academic presentations, instructional activities, and professional or academic writing (Goal 1, 2, 3, 4)
- **Competency 6.** Students demonstrate awareness and understanding of diversity and contextual issues such as culture, identity, ethnicity, gender, sexual orientation, disability, marginalization, poverty, inequality, and religion in their research, applied activities, and professional behavior (Goal 1, 3, 4)
- **Competency 7.** Students indicate a commitment to continuous learning and professional development by establishing and maintaining effective professional relationships with faculty members, research and teaching supervisors, collaborators, participants, agency personnel, peers, and staff, and being responsive to constructive feedback (Goal 4)
- **Competency 8.** Students demonstrate honesty, personal responsibility, and knowledge and appropriate application of relevant ethical and legal codes related to prevention science (e.g., American Psychological Association ethical standards) (Goal 4)

The course work lays a solid foundation for students interested in careers in academia or local, state, or national prevention and public health agencies.

PhD Requirements

Code	Title	Credits
	Nine courses in psychological foundations	30
	Eight courses in doctoral-level research methods and statistics	32
	Research	4
	Specialty area courses	9
	Dissertation course	18
	Research seminar	8
	Grant-writing course	3
	Supervised college teaching course	1
Total Credits		105

Application and Admission

Students are admitted fall term only. Prospective applicants may find detailed admission policies and procedures on the prevention science website (<https://education.uoregon.edu/program/prevention-science/>). The closing date for receipt of completed applications is posted on the website for entry the following fall term.

Applicants are evaluated on the following:

1. Academic record
2. Prevention-related research and work experiences
3. Statement of purpose in seeking admission
4. Letters of recommendation
5. Interview—in-person, telephone, or video—with a member of the program faculty

Only completed applications are reviewed. Applicants must gather the requested supporting papers and submit them with the application forms as one package. Graduate training includes completion of a research paper and a dissertation.

Specialization in Spanish Language Psychological Service and Research

Ellen McWhirter, Director

240 HEDCO Education Building

541-346-9148

slpsr@uoregon.edu

The 16-credit Spanish language psychological service and research specialization addresses the deficit in family-centered prevention services for the Spanish-speaking Latino community. It is open to students enrolled in the accredited graduate programs of counseling psychology, couples and family therapy, and school psychology who also meet the eligibility criteria. The specialization provides students with skills to support the provision of culturally relevant mental health services and research in Spanish for Latino populations. It is designed to enhance preexisting linguistic and multicultural competencies and increase cultural understanding of US Spanish-speaking populations. Students critically assess the unique social, historical, political, and cultural contexts that shape the experiences of Latinos in the United States, with particular attention to conditions of social injustice and inequity, and how such

conditions influence the health and well-being of Latino Spanish-speaking communities.

Eligibility for this specialization includes maintaining good standing in one of the three specified College of Education graduate programs focused on mental health services, approval from the student's advisor and the director of the specialization, and preexisting competencies in Spanish.

Requirements

Code	Title	Credits
CPSY 612	Professional Ethics	3
CPSY 615	Counseling Diverse Populations	3
CPSY 626	Psychological Services for Latinos	
CPSY 508	Workshop: [Topic] (Topics in Latino Mental Health)	3

CPSY 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

CPSY 609. Terminal Project. 1-12 Credits.

Repeatable.

CPSY 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

CPSY 611. Counseling Skills. 2-3 Credits.

Emphasizes experiential learning of a broad range of communication skills needed to form effective helping relationships. Covers client intake procedures and interviewing strategies. Includes laboratory. Prereq for nonmajors; instructor's consent.

CPSY 612. Professional Ethics. 3 Credits.

Ethical and legal concerns in the professional practice of psychology. Ethical theory and decision-making processes; legal aspects of client-psychologist relationships.

CPSY 613. Introduction to Counseling Psychology. 3 Credits.

Historical foundations of counseling psychology. Major theories and theorists. Counseling as an ecological and context-sensitive interactive process. Settings and roles of the profession.

CPSY 614. Theories of Counseling. 3 Credits.

Overview of selected historical and current counseling theories.

CPSY 615. Counseling Diverse Populations. 3 Credits.

Influence of gender, race, ethnicity, and other factors related to diverse populations on the identity-formation process in contemporary society. Applications to counseling psychology.

CPSY 617. Theories of Career Development. 3 Credits.

Addresses life-span career development including issues, concepts, and definitions; theories of career development and choice; intervention in strategies; and career resources in the context of a multicultural society.

CPSY 618. Group Dynamics and Counseling. 3 Credits.

Presents basic elements of general group counseling theory and group dynamics; includes introduction to group-based interventions, guidelines for multicultural practice, ethical and professional issues in group practice, and group leadership.

CPSY 621. Lifespan Developmental Psychology. 3 Credits.

Understanding continuity and change in human development and the ways in which the development of children, adolescents, and adults can be enhanced. Repeatable once for a maximum of 6 credits.

CPSY 622. Psychological Assessment II. 4 Credits.

Selection and administration of instruments and procedures for generating personality and career assessment reports. Emphasizes the integration of assessment into the intervention planning process. Includes laboratory.

CPSY 625. Child and Family Interventions. 3 Credits.

Empirically oriented interventions with children and families, ranging from early childhood through adolescence. Integrates developmental and intervention sciences.

CPSY 626. Psychological Services for Latinos. 3 Credits.

Provide graduate students with content specific to carrying out human services work and research with those who are Latino and/or Spanish-speaking.

CPSY 627. Latinx Mental Health: [Topic]. 3 Credits.

This course is designed to enhance understanding of Spanish-speaking and Latinx populations in the US with attention to strengths, resilience, social injustice and inequity, and how these influence the health and well-being of Latinx communities as applied in clinical mental health and school settings.

CPSY 635. Social Aspects of Behavior. 4-5 Credits.

This course introduces research and concepts related to social influences on human behavior, including prejudice, conformity, aggression, prosocial behavior, internalized social norms, and social cognition.

CPSY 642. Child-Family Interventions. 4 Credits.

Empirically oriented interventions with children and families, ranging from early childhood through adolescence. Integrates developmental and intervention sciences.

CPSY 645. Health Promotion and Equity. 3 Credits.

This course introduces theoretical and empirical work in prevention-focused health psychology, integrating cultural, developmental, and community psychology concepts as they pertain to health related behaviors.

CPSY 654. Supervision and Consultation. 4 Credits.

Focuses on didactic knowledge of supervision theory, research, models of practice, and evidence-based practices in supervision and consultation and acquisition of supervision and consultation skills. Students refine their knowledge of supervision theory, research, and techniques and integrate these into supervision and consultation activities.

CPSY 690. Adult Practicum. 4 Credits.

Adult Practicum is a three-term experience over one academic year in which counseling psychology doctoral students work in a clinical setting and provide therapy services to adult clients. Students receive individual and group supervision and training in evidence-based interventions and theoretical models of practice.

CPSY 704. Internship: [Topic]. 1-15 Credits.

Repeatable.

CPSY 706. Practicum: [Topic]. 1-16 Credits.

Repeatable.

CFT 612. Parenting Interventions. 3 Credits.

Examines evidence-based practices for parenting children and adolescents, including trauma-focused parenting strategies.

CFT 615. Introduction to Marriage Family Therapy. 3 Credits.

Surveys the distinct disciplines of marriage and family therapy.

CFT 616. Systems Theory Foundations. 3 Credits.

Surveys macro theories and their relationship to families and family therapy with emphasis on systems, communications, and ecological theories.

CFT 620. Mental Health and Diagnosis. 3 Credits.

Study of maladaptive behavior, treatment, and prevention emphasizing the integrative contributions of biological, behavior, cognitive, psychodynamic, humanist-existential, and community perspectives, including the "Diagnostic and Statistical Manual of Mental Disorders."

CFT 625. Violence, Trauma, and Healing. 4 Credits.

Theories and research on the acceleration and cessation of violence in the family and assessment of responses to violent family behaviors and to perpetrators, survivors, and families.

CFT 626. Relational Sex Therapy. 3 Credits.

Increases understanding and clinical abilities for working with couples; special emphasis on the role of intimacy and sexual relationships.

CFT 627. Advanced Theories in Relational Therapy. 4 Credits.

Studies theories and models of couples and family therapy; self-evaluation of clinical work. Examines integration, specifically the "metaframeworks" model, solution-focused therapy, and emotionally focused therapy.

CFT 628. Addiction and Recovery. 4 Credits.

Increases the conceptual understanding and skills of family therapists working with contemporary issues; emphasis on addictions and addiction recovery.

CFT 629. Intimate Partner Therapy. 4 Credits.

Application of systems theory to problems within relationships and their resolution. Includes research findings, assessment, motivation, change, content and process, ethics, and social-macro considerations.

CFT 630. Wellness and Spirituality. 3 Credits.

Provides an understanding of existential issues, spirituality, and wellness. Working with clients' life-cycle stages and health-stress issues; resources to promote wellness.

CFT 632. Medical Family Therapy. 4 Credits.

Introduction to the theory, fundamentals, and practical applications of medical family therapy.

CFT 640. Beginning Practicum. 3 Credits.

Provides basic clinical skills for initial work with client systems including intake and consent procedures, clinical assessment, treatment planning, and risk assessment.

Family and Human Services Courses

FHS 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

FHS 213. Issues for Children and Families. 4 Credits.

Examines issues and problems confronting children and families in the United States. Issues such as disability, poverty, health care, addictions, racism, and violence are addressed.

FHS 215. Exploring Family and Human Services. 3 Credits.

Explores the historic basis and current design of family and human services. Emphasizes services to children, youth, adults, and families. Prereq: FHS 213.

FHS 216. Diversity in Human Services. 4 Credits.

This course is designed to provide the foundational knowledge, awareness, and skills needed for working with diverse populations in the human services. This course will explore issues of equity and inclusion across the levels of the ecological model.

FHS 301. Writing for Human Services Professionals. 3 Credits.

This course prepares students with the knowledge and skills necessary for writing competently for professional/scientific audiences through a series of assigned readings, in- and out-of-class assignments, and quizzes. Students will practice iterative writing by giving and receiving peer reviews and incorporating peer and instructor feedback. Prereq: WR 121 is prereq or co-req.

FHS 328. Human Development in the Family Context. 3 Credits.

Examines human development within the context of the family from an evidence-based perspective. Integration of contemporary family issues experienced across the lifespan within the context of the human service profession.

Prereq: FHS 213, FHS 216, FHS 301.

FHS 329. Youth Psychopathology in Context. 4 Credits.

Presents child and adolescent psychopathology and problems within a diagnostic framework. Topics address psychosocial issues for youth in family and cultural contexts.

FHS 330. Individual Interventions in Ecological Contexts. 4 Credits.

Introduces the concept of individual interventions within an ecological model. Provides knowledge and development of basic listening skills and how to apply these skills to individuals in diverse contexts.

Prereq: major status.

FHS 331. Group and Community Interventions. 3 Credits.

Introduces the concept of group intervention within the context of group theory and community development. Provides knowledge and development of group interventions, including group facilitation skills and curriculum development.

Prereq: FHS 330.

FHS 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

FHS 401. Research: [Topic]. 1-5 Credits.

Repeatable.

FHS 404. Internship: [Topic]. 1-12 Credits.

Repeatable.

FHS 405. Reading and Conference: [Topic]. 1-5 Credits.

Repeatable.

FHS 406. Practicum: [Topic]. 1-12 Credits.

Repeatable.

FHS 407. Seminar: [Topic]. 1-5 Credits.

Repeatable.

FHS 408. Workshop: [Topic]. 1-9 Credits.

Repeatable.

FHS 409. Terminal Project. 1-12 Credits.

Repeatable.

FHS 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

FHS 420. Research in Human Services. 3 Credits.

This course provides a comprehensive introduction to research methods commonly used in human services, prevention science, and social work. Students will learn how to formulate research questions; identify, interpret, and evaluate empirical research articles; and engage in scientific writing by preparing research reports.

Prereq: FHS 213, FHS 216, FHS 301.

FHS 422. Prevention Science in Practice. 2-5 Credits.

Prevention science focused experiential learning within a research center or community agency. Co-enrollment in FHS 423 required. Repeatable four times for a total of 10 credits.

Prereq: FHS 471.

FHS 423. Prevention Science in Practice Supervision. 1 Credit.

Seminar providing group supervision related to field studies participation within a local school or community agency. Repeatable 11 times for a maximum of 12 credits.

FHS 471. Human Services Professional Ethics. 3 Credits.

This course focuses on professional ethics relevant to human services practitioners, with an emphasis on building skills required for ethical decision-making, including self-awareness, identification and integration of personal, professional, and legal values and standards, and evaluating scientific literature on prevention and intervention.

Prereq: FHS 420; pre or coreq: FHS 330.

FHS 472. Human Services in Practice. 2-5 Credits.

Supervised practicum (internship) within a local school or community agency. Co-enrollment in FHS 473 required. Repeatable eight times for a total of 18 credits.

Prereq: FHS 471.

FHS 473. Human Services in Practice Supervision. 1 Credit.

Seminar providing group supervision related to practicum (internship) participation within a local school or community agency. Repeatable 11 times for a maximum of 12 credits.

FHS 482. Prevention of Youth Violence. 4 Credits.

Research and practice in community interventions designed to prevent youth violence. Includes home, school, and community-based interventions.

FHS 483. Prevention of Interpersonal Violence. 4 Credits.

Examines interpersonal violence and community-based prevention using ecological, multicultural, international frameworks. Emphasizes assessment, prevention, intervention, and simultaneous occurrence of adult violence and child maltreatment.

FHS 490. Scientific Analysis in Human Services. 3 Credits.

This course instills students with the knowledge and skills necessary to understand and perform basic quantitative and qualitative data analysis and to understand and demonstrate how data analysis is related to research design within the context of prevention science and the human services, broadly.

FHS 491. Junior Professional Practices and Issues I. 3 Credits.

Examines issues and behaviors associated with being a community service professional. Includes ethical standards for professional practice. Prereq: major status.

FHS 492. Contemporary Issues in Public Health. 3 Credits.

This course covers methods for assessing and addressing community health problems and promoting health equity.

Prereq: FHS 213, FHS 216, FHS 301.

FHS 493. Child and Family Case Management. 3 Credits.

This class provides students skills in case management and human-service-focused direct practice with children, adolescents, and families, including needs assessments, case conceptualization, service plan development, and direct service intervention.

Prereq: FHS 331.

FHS 494. Adolescent and Adult Case Management. 3 Credits.

This class provides students skills in case management and human service focused direct practice with adolescents and adults, including needs assessments, case conceptualization, service plan development, and direct service intervention.

Prereq: FHS 331.

FHS 495. Senior Professional Practices and Issues. 3 Credits.

Examines issues and behaviors associated with being a community service professional.

Prereq: major status.

FHS 496. Senior Project Proposal. 1 Credit.

Students create a written proposal outlining rationale, project description, and timelines for completing the senior project.

Prereq: major status.

FHS 507. Seminar: [Topic]. 1-5 Credits.

Repeatable.

FHS 508. Workshop: [Topic]. 1-9 Credits.

Repeatable.

FHS 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

FHS 582. Prevention of Youth Violence. 4 Credits.

Research and practice in community interventions designed to prevent youth violence. Includes home, school, and community-based interventions.

FHS 583. Prevention of Interpersonal Violence. 4 Credits.

Examines interpersonal violence and community-based prevention using ecological, multicultural, international frameworks. Emphasizes assessment, prevention, intervention, and simultaneous occurrence of adult violence and child maltreatment.

Prevention Science Courses**PREV 601. Research: [Topic]. 1-16 Credits.**

Repeatable.

PREV 602. Supervised College Teaching. 1-5 Credits.

Repeatable up to 4 times.

PREV 603. Dissertation. 1-16 Credits.

Repeatable.

PREV 604. Internship: [Topic]. 1-16 Credits.

Repeatable.

PREV 605. Reading and Conference: [Topic]. 1-5 Credits.

Repeatable up to four times for a total of five credits.

PREV 606. Practicum: [Topic]. 1-16 Credits.

Repeatable for a maximum of 16 credits.

PREV 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

PREV 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

PREV 609. Terminal Project. 1-12 Credits.

Repeatable.

PREV 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable up to four times for a total of five credits.

PREV 611. Capstone Seminar I. 3 Credits.

This is the first of a 3-course sequence to help students learn about prevention science and progress through the MEd/MS Prevention Science program and completion of their Capstone project. Students attend scientific presentations, complete prevention science readings, and write and present on course material.

PREV 612. Capstone Seminar II. 2 Credits.

This is the second of a 3-course sequence to help students learn about prevention science and progress through the MEd/MS Prevention Science program and Capstone project. Students conduct a literature review and develop analytical and writing skills required for their Capstone and other scientific manuscripts.

PREV 613. Capstone Seminar III. 2 Credits.

This is the first of a 3-course sequence to help students learn about prevention science and progress through the MEd/MS Prevention Science program and complete their Capstone project. Students complete an original empirical study and corresponding APA formatted 8 to 12-page scientific manuscript and presentation.

PREV 631. Introduction to Prevention Science. 3 Credits.

Overview of theory, research, and practice in prevention science and health promotion, including foundational concepts, translation of theory into intervention, methodology, and implementation.

PREV 632. Risk and Resilience in Adolescents. 3 Credits.

Research and theory related to risk and resiliency processes during adolescence and young adulthood. Focuses on populations at elevated risk for adverse outcomes.

PREV 633. Contemporary Issues in Public Health. 3 Credits.

This course introduces approaches, concepts, methods, and perspectives of epidemiology as applied to current public health issues and prevention science research and practice.

PREV 634. Implementation Science. 3 Credits.

Provides a framework for examining implementation science and its application to clinical and community-based research.

PREV 635. Prevention and Policy. 3 Credits.

Provide students with an understanding of how basic science is translated into evidence-based prevention programs and policy.

PREV 640. Meta-Analysis I. 3 Credits.

This course provides an introduction to systematic reviewing and meta-analysis methods for synthesizing results from multiple primary research studies. During this course, students will learn how to formulate research questions for a meta-analysis; conduct systematic literature searches; and synthesize effect sizes using basic meta-analytic techniques.

Prereq: EDUC 642.

PREV 641. Meta-Analysis II. 3 Credits.

This course provides an overview of advanced meta-analytic statistical techniques. During this course, students will learn about a range of advanced meta-analytic techniques, including those used to explain heterogeneity, handle complex data structures, and address questions about comparative intervention effectiveness.

Prereq: PREV 640.

Master of Science in Prevention Science

Nicole Giuliani and Nichole Kelly, Program Directors

240 HEDCO Education Building

541-346-9148

prevsci@uoregon.edu

The prevention science major leads to a master of science (MS) or master of education (MEd) degree.

The two-year MS degree in prevention science is intended for students who have completed a bachelor's degree in a prevention science–related discipline or have human development, psychology, education, or prevention science experience, and an interest in advanced training in statistics-methodology and research beyond what is offered in the one-year MEd program. Students applying to the MS are likely to have clearly defined academic goals and seek more in-depth scientific and methodological training in prevention science and program evaluation. This masters' degree option provides greater opportunities for students to develop long-term collaborations in research centers and with faculty members in the College of Education, but does not require the commitment involved in completing the PhD.

Code	Title	Credits
	Seven courses in psychological foundations	22
	Five courses in research methods and statistics	20
	Research courses	14

¹ Partial listing of elective options. Please contact the department for a complete list.

Admissions are open from Jan 1 – July 31 for enrollment in fall of that year. Students are required to submit a statement of purpose, transcripts, CV, and three letters of recommendation. Applications are reviewed by program faculty and the top group of prospective students are interviewed as part of the admissions process.

Education Studies

Joanna Goode, Department Head

541-346-2826

125D Lorry I. Lokey Education Building

License and degree programs in the Department of Education Studies prepare professionals to work in education. For teaching in elementary grade levels (K–5), the undergraduate major in educational foundations leads to a bachelor of arts (BA) or bachelor of science (BS) degree in educational foundations. Undergraduates may also earn a certificate in education foundations—secondary. For teaching in secondary grade levels (6–12), the certificate in educational foundations—secondary is intended to complement the subject area major.

The master's-level programs include

1. a degree in curriculum and teaching with a specialization in elementary multiple subjects education or secondary education, which includes a recommendation for a state-approved teaching license and a master of education (MEd) degree
2. a program in curriculum and teacher education for those already holding a teaching license and are seeking a master of science (MS) degree
3. add-on endorsements for licensed teachers in English for speakers of other languages and multicultural, multilingual reading

The doctoral degree program leads to a doctor of philosophy degree (PhD) in critical and sociocultural studies in education.

Faculty

Katie Fitch, clinical assistant professor (critical geography and education, teacher education, science education); BA, 2007, Trinity University; MAT, 2008, Trinity University; PhD, 2021, Oregon. (2021)

Joanna Goode, Sommerville Knight Professor (computer science education, urban education, educational equity and inclusion). BS 1997, MEd, 1998, PhD, 2004, California, Los Angeles. (2005)

Julie Heffernan, senior lecturer (sexuality and gender studies in education, social studies and language arts curriculum, educational equity and inclusion); graduate director, UO Teach. BA, 1990, MEd, 2004, PhD, 2010, Oregon (2013)

Jenefer Husman, professor (educational psychology). BS, 1992, Evergreen State College; MA, 1996, PhD, 1998, Texas, Austin. (2016)

Michelle Jacob, professor (Indigenous studies in education, health, gender and decolonization). BA, 1998, MA, 2001, California State, San Marcos; PhD, 2004, California, Santa Barbara. (2016)

Abby Lane, instructor (bilingual education, English language learners, migrant education). BA, 1983, California State, Northridge; MEd, 1992, Oregon. (2000)

Audrey Lucero, associate professor (literacy, bilingualism, dual-language schooling), BA, BS, 1996, Boston; MIT, 2002, Seattle; PhD, 2011, Washington (Seattle). (2011)

Lisa A. Mazzei, professor (qualitative research methodology, curriculum theory, whiteness studies). BA, 1983, Marshall; MA, 1984, PhD, 1996, Ohio State. (2012)

Edward M. Olivos, associate professor (bilingual education, Latinos and education, teacher preparation). BA, 1991, MA, 1997, PhD, 2003, San Diego State. (2007)

Jerry L. Rosiek, professor (qualitative research methods, teacher education, critical race theory in education research). BA, 1987, BS, 1988, Texas A & M; PhD, 1997, Stanford. (2005)

Jennifer Ruef, assistant professor (mathematics education, equity, inclusion and social justice). BS, 1990, MS, 2005, Wisconsin, Madison; PhD, 2016, Stanford. (2016)

Leilani Sabzalian, assistant professor (indigenous studies in education, teacher education, elementary social studies). BA, 2001, MEd, 2002, PhD, 2015, Oregon. (2017)

Alison Schmitke, senior lecturer (social foundations of education, social studies curriculum, sports education); director, undergraduate degree program. BA, 1994, Willamette; MEd, 1996, Portland State; PhD, 2008, Alabama. (2006)

Sarah Stapleton, assistant professor (food and environmental justice, social contexts of science and environmental education). BA, 2001, Sweet Briar College; EdM, 2005, Harvard; PhD, 2015, Michigan State. (2015)

Emeriti

Juliet "Jill" A. Baxter, associate professor emerita. AB, 1975, MA, 1986, PhD, 1987, Stanford; MA, 1977, Minnesota. (2002)

Edna P. DeHaven, professor emerita. BS, 1951, Oregon College of Education; MEd, 1962, PhD, 1969, Oregon. (1969)

Gary W. Ferrington, senior instructor emeritus. BS, 1964, Portland State; MS, 1967, Southern California. (1967)

M. D. "Mark" Gall, professor emeritus. BA, 1963, MEd, 1963, Harvard; PhD, 1968, California, Berkeley. (1975)

Judith K. Grosenick, professor emerita. BS, 1964, Wisconsin, Oshkosh; MS, 1966, PhD, 1968 Kansas. (1984)

Ray E. Hull, professor emeritus. BS, 1958, MS, 1962, Oregon State; DEd, 1969, Oregon. (1970)

William E. Lamon, associate professor emeritus. BS, 1964, San Francisco; MS, 1965, California State; PhD, 1968, California, Berkeley. (1972)

Ione F. Pierron, associate professor emerita of librarianship. BA, 1936, Puget Sound; MA, 1955, Minnesota; MS, 1960, Oregon. (1948)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

- Bachelor of Arts (p. 706)
- Bachelor of Science (p. 706)

Undergraduate Studies

Educational Foundations

The purpose of the educational foundations major is to prepare future professionals in education and related fields: critical thinkers, well-informed about theory and practice, who possess the knowledge and

skills to be agents of change in economically, racially, culturally, and linguistically diverse communities. The program focuses on content preparation and provides students with a sophisticated understanding of the intersections of multiple disciplines within larger historical and contemporary themes.

The four-year program, prepares undergraduate students for admission into master's-level teacher certification programs or other Graduate School programs such as social work or psychology. The educational foundations major does not result in a teaching license.

Major Requirements

Students planning to major in educational foundations enter the university as education premajors. Transfer students and university students from other majors may become premajors by submitting a Request for Addition or Deletion Major form, available online. Premajors are not eligible to take most 300- and 400-level education courses. Premajor status does not guarantee admission to the educational foundations major.

The major is designed as a two-year program completed during the undergraduate junior and senior year. The major requires core courses in five areas: learning, teaching, and assessment; curriculum theory; technology and education; literacy; and equality of opportunity. Additional courses are required in mathematics, science, and a variety of other subjects, including reading, art, music, and physical education.

Bachelor of Arts Degree Requirements

Code	Title	Credits
Educational Foundations Lower Division Coursework

Application and Admission

To add the EdF major, schedule an appointment with an advisor at the College of Education Student Academic Services Center (<https://education.uoregon.edu/student-academic-services/>).

Certificate in Educational Foundations—Secondary

The Certificate in Educational Foundations: Secondary is for undergraduates who are committed to social change through a career in education or a related field. The purpose of the certificate is to prepare future professionals who are critical thinkers, well informed about theory and practice, and who possess the knowledge and skills that will enable them to be change agents in economically, racially, culturally, and linguistically diverse communities. This purpose is achieved by providing students with 1) a broad-based focus on content preparation; 2) a sophisticated understanding of the intersections of multiple disciplines within larger historical and contemporary themes.

The Certificate in Educational Foundations: Secondary is designed to complement the Major/subject area preparation of undergraduates who desire to be middle/high school teachers. The certificate consists of 36 credits (12 lower division; 24 upper division). Rather than waiting until graduate school to begin developing the teacher knowledge necessary for classroom life, the certificate gives students a running start as undergraduates. The set of courses provides developmentally appropriate growth for undergraduate students interested in teaching and the opportunity to obtain prerequisite knowledge to assist them as future graduate students.

This is a pre-professional degree preparing graduates who are highly competitive for admission into master's level teacher certification programs or other graduate school programs. The Certificate in Educational Foundations: Secondary does not result in a teaching license.

All undergraduates at the University of Oregon wanting to pursue teaching will attend a graduate teacher education program. Many of our undergraduates continue to UOTeach. UOTeach is the graduate teacher education program in the Department of Education Studies. This is a four-term program resulting in a masters of education (MEd) in Curriculum and Teaching and it fulfills the teaching licensure requirements for the state of Oregon (Elementary K-5 or Secondary 6-12).

For more information about UOTeach, students are encouraged to attend an informational meeting. Website: <https://education.uoregon.edu/uoteach> (<https://education.uoregon.edu/uoteach/>)

Email: uoteach@uoregon.edu

- Master of Science (p. 711)
- Doctor of Philosophy (p. 712)
- ESOL Endorsement (p. 711)

Graduate Studies

Master of Education in Curriculum and Teaching (UOTeach)

Students pursuing a master of education degree (MEd) are admitted to the curriculum and teaching major through the K–12 licensure program, UOTeach, which emphasizes the sociocultural context of teaching and learning, culturally sustaining pedagogy, and supportive learning communities. Completion of the program leads to a teaching license and a master of education degree (MEd) in curriculum and teaching.

The UOTeach program offers the following general-education specializations:

1. Elementary Multiple Subjects (<https://education.uoregon.edu/uoteach/apply/elementary/>)

2. Middle-High school education (<https://education.uoregon.edu/uoteach/apply/secondary/>), in the following content endorsement areas:

- English language arts (<https://education.uoregon.edu/uoteach/endorsements/english/>)
- Social studies (<https://education.uoregon.edu/uoteach/endorsements/social-studies/>)
- Science education (<https://education.uoregon.edu/uoteach/endorsements/science/>) (biology, chemistry, physics, or integrated general science)
- Mathematics (<https://education.uoregon.edu/uoteach/endorsements/math/>) (advanced and foundational)
- World languages (<https://education.uoregon.edu/uoteach/endorsements/languages/>) (French, German, Japanese, Mandarin, and Spanish)

To ensure all graduates are trained to teach culturally and linguistically diverse youth, both specializations include embedded preparation for the English for Speakers of Other Languages (ESOL) endorsement.

UOTeach is a four-term, full-time program, though students may opt for a two-year, part-time program. The graduate program begins in June, preparing students for 34 weeks of progressive field experience in local schools, starting the end of summer term. It is a cohort-based program (students are taught as a community rather than as individuals) in which students explore approaches to teaching and learning that advance equity and access, value student's strengths, facilitate critical thinking, and reflect culturally responsive methods and practices that serve all learners. Study plans are based on endorsement area and sequential courses.

Upon successful completion of related course work, field placement, and licensure requirements, candidates are eligible to apply for the Oregon Teacher Standards and Practices Commission teaching license. The preliminary teaching licenses and subsequent renewals and out-of-state transfers require a College of Education program completion report.

Minimum Required Credits ²		62

¹ *Students seeking to add-in program or post-licensure endorsement areas should take the appropriate methods course at this time. Students not looking to pursue an additional endorsement may select a 500/600 master-level course from EDST, EDLD, EDUC, SPED and/or a related content area course from other departments.*

² * EDST Secondary Certificate requires minimum 52 credits

More information on the UOTeach Curriculum & Teaching MED / Licensure program is available at <https://education.uoregon.edu/uoteach> (<https://education.uoregon.edu/uoteach/>)

Application and Admission

UOTeach prepares teacher leaders to have a lasting impact on the learning and lives of youth. We have an open-door policy, welcoming applicants with demonstrated academic distinction, the disposition and passion for learning and working with youth, and a commitment to supporting equitable educational learning communities.

UOTeach is committed to helping reshape the classroom experience for all students through increasing the numbers of educator candidates from underrepresented groups, including bilingual bicultural candidates, people with disabilities, and first-generation college students.

As a state-approved program, UOTeach adheres to Oregon Teacher Standards and Practices Commission (TSCP) (<http://www.oregon.gov/tspc/Pages/>), University of Oregon, and College of Education standards.

Admissions is competitive but we look holistically at each candidate. Applicants are scored on the criteria listed below. Higher scores lead to a higher likelihood of acceptance to the program.

Our graduate school application is **open Sept 20 to January 15** annually, for June start.

Master of Science in Curriculum and Teacher Education

Code	Title	Credits
Core Courses		
	Foundations of education courses	8
	Teacher professionalism courses	8
	Research methodology courses	8
Specialization Courses		
	Program courses	16
	Electives	16
Total Credits		56

This program is designed for those who already hold a teaching license but want to build on their knowledge by adding a master's degree. Study plans are individualized based on an applicant's educational pursuits. The program accepts applicants on an annual basis. Interested applicants may access the application from October through January 30; the program begins summer session, in June.

Enrollment is limited. Program admission is based on grade point average, recommendations, need in the field, and the results of an interview. See the website (<https://education.uoregon.edu/program/curriculum-and-teachers-education/>) for application details.

Application and Admissions

Enrollment is limited. Program admission is based on grade point average, recommendations, need in the field, and the interview. See the website (<https://education.uoregon.edu/program/curriculum-and-teachers-education/>) for application details.

English for Speakers of Other Languages (ESOL) Endorsement

English learners and emerging bilinguals face linguistic and cultural barriers when acquiring context knowledge in a mainstream classroom. The add-on endorsements in ESOL and ESOL–bilingual education prepare educators to serve students who enter the public school system with a native language other than English. In addition, this endorsement equips teachers with an awareness of the challenges students face in developing English language proficiency and content simultaneously, and how effective use of culturally relevant materials and teaching strategies can help to counteract this challenge.

Licensed teachers who complete the ESOL program demonstrate the following:

- proficiency in planning, delivery, and assessment of English language development instruction
- knowledge of effective inclusive language development program models
- ability to serve as a resource to classroom teachers to ensure a student's successful transition from an English language development program to mainstream classrooms
- ability to serve as an advocate for emerging bilinguals who supports equity and access in educational settings

ESOL Endorsement Requirements

Code	Title	Credits
Courses		16
	Practicum	3
Total Credits		19

The program for the ESOL endorsement requires satisfactory completion of 19 credits, including four courses and a practicum. This endorsement allows licensed teachers to become ESOL specialists.

Students who have completed an ESOL endorsement and are proficient in another language may add the bilingual endorsement by passing the appropriate Oregon Educator Licensure Assessments–National Evaluation Series language test. No course work is necessary for the bilingual endorsement.

Application and Admissions

Applicants must hold a teaching license. Students are admitted on a rolling basis but typically begin the program in summer or fall. For application information and deadlines, visit the website (<https://education.uoregon.edu/program/reading-endorsement/>).

Licensure

Licensure programs of the Department of Education Studies meet the requirements for the Oregon Teacher Standards and Practices Commission for a preliminary teacher license in elementary multiple subjects and middle or high school education content areas. Endorsements are available in ESOL and ESOL-bilingual specialization and reading.

Doctor of Philosophy in Critical and Sociocultural Studies in Education

The University of Oregon doctor of philosophy degree (PhD) in critical and sociocultural studies in education is designed to prepare scholars who intend to be active in the professional research association in their field, publish research in peer-reviewed journals and academic presses, secure positions as faculty members at research universities or research centers, or work at state and federal agencies.

The program provides a comprehensive approach to educational research that considers the consequences of contemporary schooling systems while developing alternatives to current practices that result in systemic change. To provide concentrated faculty support and mentorship for each student, only a small cohort of seven to ten students are accepted every other year, with admission in the fall of odd-numbered years.

The program of study includes a strong foundation in both qualitative and quantitative research methodologies. In addition to the required courses, students will take three additional core courses in CSSE. These courses align with faculty research interests and are offered on a rotating basis. In general, one or two core courses are offered every academic year, so it is recommended that students plan accordingly to ensure that they will be able to take three core courses in a timely manner.

In addition, students complete a supervised research apprenticeship in the second year of study and devise a set of cognate courses in consultation with an advisor.

Admission

The program is small—fewer than 10 students are typically admitted every two years. Applications are accepted from early fall through mid-January for admission in odd-numbered years. The next cohort will be admitted for fall 2023. Application details are available online (<https://education.uoregon.edu/csse/>).

Courses

EDST 111. Education and Social Change. 4 Credits.

Students will evaluate historical, philosophical, and social viewpoints related to the purposes and goals of American education. Additionally, students will compare/contrast multiple approaches to address a range of challenges and opportunities in American schools.

EDST 196. Field Studies: [Topic]. 1-2 Credits.

Repeatable.

EDST 198. Workshop: [Topic]. 1-2 Credits.

Repeatable.

EDST 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable. A recent topic is Exploring Educational Studies.

EDST 211. Childhood Studies. 4 Credits.

Examines child development from within the context of specific development and ecological theories.

EDST 225. School and Representation in Media. 4 Credits.

Examines popular culture's influence on schools and teachers along with the various mediating factors such as race, ethnicity, social class, gender, sexuality, religion, and nationality.

EDST 331. Autobiography of Schooling. 4 Credits.

The purpose of this course is to engage students in a critical reflection on life in classrooms through recognizing and questioning the assumptions underlying the routine of school. Includes analysis of critical autobiographies, case studies, readings along with application activities. Sequence with EDST 332, EDST 333.

Prereq: EDST 111, EDST 211.

EDST 332. Learning, Teaching, and Assessment I. 3 Credits.

Students move beyond their own critical autobiographies of life in classrooms into various disciplinary literatures on learning, teaching, and assessment.

Prereq: EDST 331; coreq: EDST 338.

EDST 333. Learning, Teaching, and Assessment II. 3 Credits.

Focus on specific school subjects that provide a context for examining the basic assumptions underlying teaching, learning, and assessment.

Prereq: EDST 332; coreq: EDST 339.

EDST 338. Observation: Learning, Teaching, Assessment I. 1 Credit.

Students focus on listening to children to better understand how they make sense of school subjects.

Pre- or coreq: EDST 332.

EDST 339. Observation: Learning, Teaching, Assessment II. 1 Credit.

Focuses on developing skills in observation of learning, teaching, and assessments.

Coreq: EDST 333.

EDST 342. Curriculum Studies I. 4 Credits.

This course will examine the development of curriculum theory through analysis of a collection of pivotal readings authored by influential scholars from the 18th and 19th centuries paired with contemporary writings that link historical developments with current policy and practice. Sequence with EDST 333.

Prereq: EDST 333.

EDST 343. Curriculum Studies II. 4 Credits.

Examines basic assumptions underlying curriculum development in K-12 schools.

Prereq: EDST 342.

EDST 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable. Recent topics include Exploring Educational Studies, IDEA Reading.

EDST 401. Research: [Topic]. 1-18 Credits.

Repeatable.

EDST 402. Supervised College Teaching. 1-6 Credits.

Repeatable.

EDST 404. Internship: [Topic]. 1-18 Credits.

Repeatable.

EDST 405. Reading and Conference: [Topic]. 1-18 Credits.

Repeatable.

EDST 406. Practicum: [Topic]. 1-12 Credits.

Repeatable. Recent topics include Educational Foundations.

EDST 407. Seminar: [Topic]. 1-5 Credits.

Repeatable. Recent topics include Professional Practices, Education for Minority Students, Reading in the Upper Elementary Grades.

EDST 408. Workshop: [Topic]. 1-6 Credits.

Repeatable.

EDST 409. Terminal Project. 1-12 Credits.

Repeatable. Topics include Integrated Licensure I, II, III.

EDST 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable. Topics include Foundations of Education, Science and Health Methods, Social Studies and Language Arts Methods.

EDST 420. Living in a Stratified Society. 4 Credits.

Examines the role of public education in the social context of the United States. The purpose of the course is to develop critical ways of thinking about schools as institutions that both reproduce and challenge social inequality.

Prereq: EDST 111, EDST 225.

EDST 422. Technology Education. 4 Credits.

Examines educational technology, including the theoretical, methodological, practical, and policy issues that influence the field.

EDST 440. Physical Education for Diverse Learners. 3 Credits.

Provides a variety of physical education and fitness activities appropriate for children with diverse abilities.

EDST 448. Integrating the Arts. 4 Credits.

This course introduces students to the foundational conceptions of art, learning, curriculum, culture and society that inform the integration of the arts across subjects in elementary classrooms.

EDST 450. Food and Schools. 4 Credits.

This course focuses on a topic that has typically been omitted from education courses and programs: food. Through this course, we will be thinking about the ways that food intersects with schools, and the implications of this for formal and informal educators.

Prereq: EDST 420.

EDST 451. Teaching for Climate Activism. 4 Credits.

Future teachers survey current research and synthesize best practices for teaching about climate change. The course will draw from research across the fields of climate change education and communication as well as current curricula, books, and materials to explore how best to teach climate change.

Prereq: EDST 420.

EDST 452. Poverty and Education. 4 Credits.

Examines the way poverty structures and mediates educational experiences and influences the educational achievement of students.

Prereq: EDST 420.

EDST 453. Racism and Education. 4 Credits.

Examines multiple ways institutionalized racism structures and mediates educational experience and multiple visions of anti-racist teaching.

Prereq: EDST 420.

EDST 454. Patriarchy and Education. 4 Credits.

Examines the way gender affects educational experiences and influences the educational achievement of students.

Prereq: EDST 420.

EDST 455. Heteronormativity and Education. 4 Credits.

Examines the way sexuality and sexual identity influence the educational experiences of students.

Prereq: EDST 420.

EDST 456. Decolonization and Education. 4 Credits.

Examines educational institutions and their continuing part in larger social processes of colonization and cultural genocide.

Prereq: EDST 420.

EDST 457. Immigration, Diaspora and Education. 4 Credits.

Examines the way educational institutions have responded to human migration generally and to immigrant students specifically.

Prereq: EDST 420.

EDST 463. Foundations of Literacy. 4 Credits.

Introduction to the various theoretical dimensions of reading and writing that form the foundation for understanding and teaching the complex texts children encounter today.

Prereq: EDST 333.

EDST 464. Multicultural Literacy. 4 Credits.

Introduces preservice teachers to literature written from ethnic, linguistic, social, and cultural perspectives and draws connections to broader cultural, social, historical, economic, and political contexts.

Prereq: EDST 420.

EDST 471. Foundations of Algebra Learning. 4 Credits.

Focuses on the principles underlying the teaching and learning of algebra. Sequence with EDST 472.

EDST 472. Foundations of Geometry Learning. 4 Credits.

Focuses on the principles underlying the teaching and learning of geometry. Sequence with EDST 471.

Prereq: EDST 471.

EDST 507. Seminar: [Topic]. 1-5 Credits.

Repeatable. Recent topics include Professional Practices, Education for Minority Students, Reading in the Upper Elementary Grades.

EDST 508. Workshop: [Topic]. 1-6 Credits.

Repeatable.

EDST 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable. Topics include Foundations of Education, Science and Health Methods, Social Studies and Language Arts Methods.

EDST 522. Technology Education. 4 Credits.

Examines educational technology, including the theoretical, methodological, practical, and policy issues that influence the field.

EDST 548. Integrating the Arts. 4 Credits.

This course introduces students to the foundational conceptions of art, learning, curriculum, culture and society that inform the integration of the arts across subjects in elementary classrooms.

EDST 550. Food and Schools. 4 Credits.

This course focuses on a topic that has typically been omitted from education courses and programs: food. Through this course, we will be thinking about the ways that food intersects with schools, and the implications of this for formal and informal educators.

EDST 551. Teaching for Climate Activism. 4 Credits.

Future teachers survey current research and synthesize best practices for teaching about climate change. The course will draw from research across the fields of climate change education and communication as well as current curricula, books, and materials to explore how best to teach climate change.

EDST 552. Poverty and Education. 1,4 Credit.

Examines the way poverty structures and mediates educational experiences and influences the educational achievement of students.

EDST 553. Racism and Education. 4 Credits.

Examines multiple ways institutionalized racism structures and mediates educational experience and multiple visions of anti-racist teaching.

EDST 554. Patriarchy and Education. 4 Credits.

Examines the way gender affects educational experiences and influences the educational achievement of students.

EDST 555. Heteronormativity and Education. 4 Credits.

Examines the way sexuality and sexual identity influence the educational experiences of students.

EDST 556. Decolonization and Education. 4 Credits.

Examines educational institutions and their continuing part in larger social processes of colonization and cultural genocide.

EDST 557. Immigration, Diaspora and Education. 4 Credits.

Examines the way educational institutions have responded to human migration generally and to immigrant students specifically.

EDST 601. Research: [Topic]. 1-16 Credits.

Repeatable.

EDST 602. Supervised College Teaching. 1-9 Credits.

EDST 609. Terminal Project. 1-12 Credits.

Repeatable.

EDST 610. Experimental Course. 1-5 Credits.

Repeatable.

EDST 612. Foundations of Teaching and Learning. 3 Credits.

Provides students with the psychological foundations of teaching and learning.

EDST 614. Cultural Context of Education. 4 Credits.

Examines the cultural foundations of educational practice through a critical review of four decades of ethnographic research on school and student culture.

EDST 616. Language, Power, and Education. 1-4 Credits.

Examines the politics, policies, and practical realities associated with language and literacy in educational settings and how these issues affect all students to some degree.

EDST 617. Sapsik'walá Indigenous Education Seminar I. 2 Credits.

Students in the Sapsik'walá (Teacher) Education Program study Indigenous teaching methods, including decolonizing, Indigenous feminist, and Elder pedagogies, and reflect on and analyze the importance of their own work as Indigenous educators who are contributing to Indigenous self-determination in education and Tribal Nation building.

EDST 618. Methods ESOL: Teaching English Language Development, K–12. 3 Credits.

Examines best practices of delivering English-language development in light of federal and state standards, including teaching methods, technology, and parental involvement.

EDST 620. Curricular Controversies: Math and Literacy. 4 Credits.

Focuses on the debates that influence, and in some cases overshadow, the teaching of mathematics and literacy from kindergarten to grade 12. Sequence with EDST 621, EDST 640.

EDST 621. Methods: Representing Mathematical Concepts. 4 Credits.

Students deepen their content knowledge, widen their understanding of student conceptualizations of mathematics, and reflect on their own mathematics instructional practices. Sequence with EDST 620, EDST 622.

EDST 622. Methods: Mathematical Problem-Solving Curriculum. 4 Credits.

Prepares students to view mathematics as a problem-solving field rather than a set of discrete skills and operational rules. Sequence with EDST 620, EDST 621.

Prereq: EDST 621.

EDST 623. Methods: Representing Science Concepts. 4 Credits.

Examines why science is taught, what science subjects need to be taught, and how science is learned. Sequence with EDST 620, EDST 624.

EDST 624. Methods: Scientific Problem-Solving Curriculum. 4 Credits.

Presents science as a problem-solving field rather than a set of discrete facts and concepts. Introduces scientific literacy as the aim of science teaching. Sequence with EDST 620, EDST 623.

Prereq: EDST 623.

EDST 627. Mgmt: Introduction to Supportive Learning Communities. 1 Credit.

Introduces the teacher candidate to the necessary components for creating supportive and successful classroom communities, including interaction between motivation, "classroom management," and teacher-student relationships. Sequence with EDST 628.

EDST 628. Mgmt: Creating Supportive Classroom Communities. 3 Credits.

Builds on EDST 627 by providing specific research, experience, and strategies for developing classroom environments where student behaviors are focused on learning. Sequence with EDST 627.

Prereq: EDST 627.

EDST 630. Curriculum Studies and the Profession of Teaching. 4 Credits.

Examines a variety of ways curriculum is conceptualized at the secondary level. Sequence with EDST 631, EDST 632 (or EDST 634 or EDST 635, EDST 636); EDST 638.

EDST 631. Methods ELA: Representing Literature to Young People. 4 Credits.

Examines why literature is taught and the way teachers represent literary works to students. Sequence with EDST 630, EDST 632, EDST 638.

EDST 632. Methods: Engaging Students in Writing. 4 Credits.

Overview of strategies and tools for engaging students in the writing process. Emphasis on genres of writing and use of technology to enhance student writing. Sequence with EDST 630, EDST 631, EDST 638.

Prereq: EDST 631.

EDST 634. Methods: Second-Language Conversation and Composition. 4 Credits.

Advanced teaching methodologies, techniques, and skills to effectively promote proficiency and fluency in second languages. Sequence with EDST 630, EDST 638.

Prereq: EDST 633.

EDST 635. Methods: Representing Social Studies Concepts. 4 Credits.

Examines why social studies is taught and the way teachers represent social studies concepts to students. Sequence with EDST 630, EDST 636, EDST 638.

EDST 636. Methods: Social Studies Inquiry and Analysis. 4 Credits.

Explores the theory and practice of teaching social studies as a specialized form of inquiry. Sequence with EDST 630, EDST 635, EDST 638.

Prereq: EDST 635.

EDST 638. Methods ESOL: English Language Learners Pedagogy Humanities. 4 Credits.

Examines a variety of research-based instructional and assessment strategies that support English language learners in meeting the curricular mandates of mainstream language arts and social studies courses. Sequence with EDST 630; EDST 631, EDST 632 (or EDST 634 or EDST 635, EDST 636).

EDST 639. Sapsik'walá Indigenous Education Seminar II. 1 Credit.

This continuing Sapsik'walá (Teacher) seminar studies Indigenous teaching methods, including decolonizing, Indigenous feminist, and Elder pedagogies, and reflect on and analyze the importance of their own work as Indigenous educators who are contributing to Indigenous self-determination in education and Tribal Nation building.

EDST 640. Methods: Constructing Meaning through Literacy. 4 Credits.

Provides concepts and strategies used in teaching children to read. Focuses in particular on instruction for beginning and intermediate readers and writers.

EDST 642. Methods: Humanities Pedagogy. 4 Credits.

Explores the application of language arts and social studies methods and strategies for future elementary school practitioners.

EDST 643. Methods: Teaching Mathematics-Facts and Inquiry. 4 Credits.

Focuses on four areas of instruction crucial to becoming a skillful beginning teacher of mathematics.

EDST 645. Methods: Teaching Science-Detail and Discovery. 4 Credits.

Emphasizes science as a process of contemplating, exploring, and raising questions about the world in elementary classrooms.

EDST 646. Methods ESOL: Eng Lang Learners Pedagogy Elementary Classrm. 4 Credits.

Examines a variety of research-based instructional and assessment strategies that support English language learners in meeting the mandates of elementary-level curriculum.

EDST 647. English Language Learner Methods. 3 Credits.

Application-based course to provide English for Speakers of Other Languages (ESOL) endorsement candidates with opportunities to apply research-based instructional and assessment strategies that support English language learners. Method course has strong connection to planning for and assessing emerging bilingual English learner strengths and needs.

EDST 648. Sapsik'walá Indigenous Education Seminar III. 1 Credit.

This continuing Sapsik'walá (Teacher) seminar studies Indigenous teaching methods, including decolonizing, Indigenous feminist, and Elder pedagogies, and reflect on and analyze the importance of their own work as Indigenous educators who are contributing to Indigenous self-determination in education and Tribal Nation building.

EDST 650. Teacher Education: Policy and Practice. 4 Credits.

Explores the work of contemporary scholars who are attempting to bridge the division between policy and practice in teacher education. Offered alternate years.

EDST 654. Learning and Motivational Sciences. 4 Credits.

Survey of the learning and motivational sciences for advanced graduate students. Offered alternate years.

EDST 661. Sociology: From Reproduction to Resistance. 4 Credits.

Focuses on the ways schools reproduce, reinforce, and challenge prevailing social, economic, and political relationships. Offered alternate years.

EDST 662. Curriculum Theory: Contesting Educational Content. 4 Credits.

Survey of the history of curriculum theory, the subfield that asks the fundamental question, what is worth teaching? Offered alternate years.

EDST 663. Education and Immigration. 4 Credits.

Examines the way educational institutions have responded to human migration generally and to immigrant students, with an emphasis on bilingual education policy. Offered alternate years.

EDST 664. Seminar in Bilingualism and Biliteracy. 4 Credits.

This doctoral seminar explores multiple aspects of bilingualism and biliteracy in the United States. The emphasis is on the ways in which bilingualism and biliteracy develop in culturally and linguistically diverse communities and for people from different language groups.

EDST 666. Thesis Writing. 4 Credits.

Seminar for doctoral students who have advanced to candidacy. Emphasis is on support through the dissertation proposal writing process. Repeatable twice for a maximum of 12 credits.

EDST 667. Grant Writing: Finding Funders. 4 Credits.

Provides graduate students with the knowledge and skills needed to write successful grant proposals for research, professional development, and curriculum development projects.

EDST 673. Advanced Qualitative Methodology: Arts-Based Approaches. 4 Credits.

Examines contemporary reflexive social science research writing, focusing on experimentations with the form used by researchers to communicate insights about human affairs. Pre- or coreq: EDUC 630, EDUC 632, EDUC 634.

EDST 675. Indigenous Methods. 4 Credits.

This seminar examines foundational questions and literatures that guide Indigenous methodologies, the purpose of which is to foster students' abilities and commitments to enact inquiries grounded in relationality, respect, and responsibility toward Indigenous peoples and Indigenous struggles for self-determination, sovereignty, and decolonization. Prereq: EDUC 630, EDUC 632.

EDST 681. Elementary Part-Time Teaching. 4 Credits.

Provides scope, structure, supervision oversight, and guidance to support students during the part-time student teaching practicum in an Elementary school setting. Is first of two terms of clinical placement that together satisfy the Oregon Teacher Standards and Practices Commission intensive and extensive field-based requirements. Repeatable once for a maximum of 8 credits.

Prereq: Must complete all prior UOTeach course work with a cumulative 3.00 GPA or higher and have successfully completed prior term of field experience prior to enrollment.

EDST 682. Elementary Teaching Performance Assessment. 2 Credits.

Provides scope, structure, supervision oversight, and guidance to support pre-service teachers during their fulltime student teaching (EDST 683) and together are the last of two terms of clinical placement that together satisfy the Oregon Teacher Standards and Practices Commission (TSPC) intensive and extensive field-based requirement.

Prereq: Must complete all prior UOTeach course work with a cumulative 3.00 GPA or higher and have successfully completed prior term of field experience prior to enrollment.

EDST 683. Elementary Full-Time Student Teaching. 10 Credits.

The Elementary fulltime student teaching is designed to give candidates the opportunity to gradually take the lead in preparation, instruction, and assessment for the classroom. This experience helps develop knowledge, skills, and professional dispositions to make a positive impact on student learning. Repeatable once for a maximum of 20 credits.

Prereq: Must complete all prior UOTeach course work with a cumulative 3.00 GPA or higher and have successfully completed prior term of field experience prior to enrollment.

EDST 686. Secondary Part-Time Teaching. 4 Credits.

Provides scope, structure, supervision oversight, and guidance to support students in part-time pre-service student teaching practicum in an Mid-High School setting. The first of two terms of clinical placement that together satisfy the Oregon Teacher Standards and Practices Commission intensive and extensive field-based experience. Repeatable once for a maximum of 8 credits.

Prereq: Must complete all prior UOTeach course work with a cumulative 3.00 GPA or higher and have successfully completed prior term of field experience.

EDST 687. Secondary Teaching Performance Assessment. 2 Credits.

Provides scope, structure, supervision oversight, and guidance to support students during the full-time student teaching practicum in Mid/High School settings. Is the second of two terms of clinical placement that together satisfy the Oregon Teacher Standards and Practices Commission intensive and extensive field-based requirements. Repeatable twice for a maximum of 4 credits.

Prereq: Must complete all prior UOTeach course work with a cumulative 3.00 GPA or higher and have successfully completed prior term of field experience prior to enrollment.

EDST 688. Secondary Full-Time Student Teaching. 10 Credits.

The Secondary full-time student teaching is designed to give candidate the opportunity to gradually take the lead in preparation, instruction, and assessment for the classroom. This experience helps develop knowledge, skills, and professional dispositions to make a positive impact on student learning. Repeatable once for a maximum of 20 credits.

Prereq: Must complete all prior UOTeach course work with a cumulative 3.00 GPA or higher and have successfully completed prior term of field experience prior to enrollment.

Educational Methodology, Policy, and Leadership

102 Lorry I. Lokey Education Building

The curriculum leading to master's and doctoral degrees in the Department of Educational Methodology, Policy, and Leadership focuses on developing and implementing effective practices in education and social system settings.

Programs provide educational leaders, policymakers, and researchers with the skills needed to design and implement strategies that improve practices in educational organizations. Graduates are qualified for a variety of positions such as education system administrators, principals and superintendents, instructors and researchers in higher education and nonprofit settings, specialists in intervention development, implementation, and evaluation, and researchers in evaluation, management, leadership, and educational policy.

License Programs

The College of Education is currently redesigning the administrative and professional licensure programs.

Faculty

Julie Alonzo, senior lecturer II and research associate professor (teacher professional development, leading for equity, response to intervention); BA, 1990, Carleton College; PhD, 2007, Oregon. (2007)

Nancy Golden, professor of practice (leadership, equity, public policy). BS, 1973, Denver; MS, 1974, PhD, 1987, Oregon. (2015)

Sheree Jederberg, senior lecturer II (school leadership & practice, whole school systems reform, curriculum and instruction, public policy); BS, 1979, California San Diego; BA/MA, 1989, San Diego State; MA, 1991, San Diego State; Ed.D., 2006, Southern California. (2021)

David Liebowitz, assistant professor (education policy analysis, educational inequity, school leadership). BA, 1999, Columbia; EdM, 2008, 2011, EdD, 2015, Harvard. (2018)

Kathleen M. Scalise, professor (quantitative measurement and assessment, instructional technology, computer-adaptive instructional materials). BA, 1982, MA, 2004, PhD, 2004, California, Berkeley. (2005)

Ilana Umansky, associate professor (education policy analysis, quasi-experimental methods and longitudinal data analysis, English learners and immigration). BA, 1998, Wesleyan; MEd, 2003, Harvard; MA, 2012, PhD, 2014, Stanford. (2014)

Cengiz Zopluoglu, associate professor (latent variable modeling, longitudinal data analysis, statistical computing). BA, 2005, Abant Izzet Baysal; MA, 2009, PhD, 2013, Minnesota. (2020)

Keith Zvoch, professor (quantitative methods, program evaluation, statistical modeling). BS, 1992, Pittsburgh; MA, 1995, PhD, 2001, New Mexico. (2007)

Emeriti

Gerald K. Bogen, professor emeritus. BA, 1959, Western Washington; MS, 1961, DEd, 1963, Oregon. (1961)

Michael D. Bullis, professor emeritus. BPE, 1973, MS, 1978, Purdue; PhD, 1983, Oregon. (1995)

David T. Conley, professor emeritus. BA, 1972, California, Berkeley; MA, 1983, PhD, 1986, Colorado, Boulder. (1989)

C. H. Edson, associate professor emeritus. BA, 1964, California, Berkeley; MA, 1970, Oregon; PhD, 1979, Stanford. (1973)

Arthur C. Hearn, professor emeritus. AB, 1934, MA, 1937, EdD, 1949, Stanford. (1950)

John E. Lallas, professor emeritus; executive dean emeritus. BA, 1947, Washington (Seattle); BA, 1952, Western Washington; EdD, 1956, Stanford. (1957)

Philip K. Piele, professor emeritus. BA, 1957, Washington State; MS, 1963, PhD, 1968, Oregon. (1967)

Richard A. Schmuck, professor emeritus. BA, 1958, MA, 1959, PhD, 1962, Michigan. (1967)

Joseph Stevens, professor emeritus. BA, 1974, MA, 1976, PhD, 1983, Arizona. (2005)

Gerald Tindal, professor emeritus. BA, 1975, PhD, 1982, Minnesota. (1984)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Minor in Leadership and Administrative Skills

The minor in leadership and administrative skills (LEADS) allows students to major in any subject offered at the university while also minoring in leadership, providing them with a breadth of interdisciplinary options. Students gain mastery in leading and managing within social systems, preparing undergraduates to address the leadership challenges and opportunities found in their lives and careers. They learn the skills necessary to be proactive, effectively reframing debates, reorganizing coalitions, building center-out alliances, understanding and incorporating minority positions and beliefs into leadership perspectives, and collaborating for effective decision-making within constituencies.

The requirements for the minor consist of 12 core credits and 12 elective credits.

Minor Requirements

Code	Title	Credits
Choose four from the following: ¹		12
EDLD 211	Exploring Leadership	
EDLD 311	Equity Leadership and Social Change	
EDLD 312	Effective Leadership Decision-Making	
EDLD 313	Program Evaluation for Future Leaders	
EDLD 411	Examining Leadership Effectiveness	

EDLD 412 Leading Change in Organizations

Elective courses ² 12

¹ Courses in the program will be offered at 3 credits beginning in fall 2018. When the minor was launched in winter 2018, courses were 4 credits, not 3. Students who enrolled in the LEADS minor in 2018 and have concerns about this change should email their questions to empl@uoregon.edu.

² An extensive list of acceptable elective courses for the LEADS minor may be found online (<https://education.uoregon.edu/edl/undergraduate/minor/>).

Application and Admission

Before applying to the minor program, students must be enrolled in or have already completed the first required core course, Exploring Leadership (EDLD 211), with a letter grade of at least B– or P. Students who are experiencing difficulty enrolling in the course due to scheduling may seek permission from the program advisor to waive this requirement; requests should be emailed to empl@uoregon.edu.

To declare the minor, students must complete the UO LEADS Minor Registration Form (https://oregon.qualtrics.com/jfe/form/SV_9v6lzup4ziE3q9D/). Submissions are reviewed for admission to the minor at the beginning of each term.

Students interested in the minor may schedule advising appointments to discuss whether the program is appropriate for their goals and to plan a course of study by emailing empl@uoregon.edu.

- **Master's Degrees**
- **Doctor of Education**
- Doctor of Philosophy (p.)
- **Graduate Specialization in Educational Data Science**

Graduate Studies

The department offers master of arts (MA), master of science (MS), master of education (MEd), and doctor of education (DEd) degrees with a major in educational leadership. In addition, a doctor of philosophy (PhD) degree is offered with a major in quantitative research methods in education.

Master's Degrees

The Department of Educational Methodology, Policy, and Leadership offers the master of arts (MA), master of science (MS) and master of education (MEd) degrees.

During the first term of graduate work, each student plans a program of study with the assistance of the student's advisor.

The master's degrees in educational leadership focus on two areas of emphasis. Students select one of these areas when entering the degree program:

- **Quantitative Research Methods in Education.** Prepares those pursuing careers in educational research.
- **Policy and Leadership.** For those pursuing careers such as program coordinators or college advisors in central school administration, student support services, or staff and community relations.

Students should consult the **Division of Graduate Studies** section of this catalog for general university admission and degree requirements.

Educational Policy and Leadership

Code	Title	Credits
REQUIRED COURSES		
Term 1 (Summer)		
EDLD 684	Master's Seminar in Educational Policy and Leadership	3
EDUC 612	Social Science and Education Research Design	3
EDLD 636	Governance and Ethics	3
Term 2 (Fall)		
EDLD 696	Professional Writing I: Foundations in Professional Writing	3
EDUC 614	Educational Statistics	3
EDLD 683	State and Local Policy Development in Education	3
Term 3 (Winter)		
EDUC 640	Applied Statistical Design and Analysis	3
Term 4 (Spring)		
EDLD 685	Educational Policy and Leadership Master's Capstone	3
ELECTIVE COURSES (minimum of 7)		
EDUC 642	Multiple Regression in Educational Research	3
EDLD 643	Evidence-Based Decision Making	3
EDLD 625	Survey and Questionnaire Design	3
EDLD 626	Social-Cultural Foundations of Education	4
EDLD 644	Learning Organization	3
EDLD 624	Leading for Equity	3
EDUC 620	Program Evaluation I	3
EDUC 621	Program Evaluation II	3
EDLD 631	Education Policy for Multilingual Students	3
EDLD 632	Educational Policy Analysis	3
EDLD 640	Educational Data Science Capstone Project	3
EDLD 651	Introductory Educational Data Science	3
EDLD 644	Learning Organization	3
EDLD 683	State and Local Policy Development in Education	3
EDLD 652	Data Visualization for Educational Data Science	3
EDLD 653	Functional Programming for Educational Data Science	3
EDLD 654	Machine Learning for Educational Data Science	3

Doctoral Degrees

The Department of Educational Methodology, Policy, and Leadership offers two doctoral degrees—DEd and PhD. The program for the doctor of education (DEd) in educational leadership, which emphasizes the development of expertise in professional practice, is intended for individuals who want careers as administrators, staff developers, curriculum specialists, or positions at state and local offices. The program

for the doctor of philosophy (PhD) in quantitative research methods in education emphasizes the development of expertise in educational research and statistical analysis, in educational organizations, in measurement and assessment, or as preparation for becoming a professor of education with a specialization in research.

The doctoral programs follow the general regulations governing graduate work at the university. Each PhD student plans a program with the guidance of a faculty advisor. In contrast, DEd students complete their program with a cohort and a fixed set of courses. This degree option may be completed concurrently with the administrator licensure program.

Doctoral Degree Requirements

A minimum of 81 graduate credits are required for the doctor of education (DEd) degree program; the doctor of philosophy (PhD) requires a minimum of 108 graduate credits. In both programs, at least 81 credits must be earned after admission to the program; 18 of these 81 credits are earned in Dissertation (EDLD 603). PhD students may request to transfer up to 21 graduate-level credits. The remaining required credits include courses in research methodology and electives.

Course Type	PhD Credits	DEd Credits
Methods	18	21
Advanced quantitative research methods	24	0
Learning community	24	0
Interdisciplinary	24	0
Seminars and institutes	0	6
Writing and communication	0	15
Content, policy, leadership, equity	0	21
Dissertation	18	18
Total Minimum Credits	108	81

For the PhD, a 21-credit maximum of transfer credit is allowed.

Doctor of Education in Educational Leadership

Code	Title	Credits
Course Work:		60

Dissertation:		18
EDLD 603	Dissertation	
Total Credits		81

Residency

Three consecutive terms of full-time study (graduate credits) must be completed to meet Division of Graduate Studies residency requirements.

Application and Admission

The department follows general university policy in its admission procedures. Students who transfer to the university from other institutions must meet UO entrance requirements. Information about admission to graduate study is available from the department student services coordinator and on the College of Education's website. Information about licensure and degree programs may be obtained from the director of graduate studies.

Educational Data Science Graduate Specialization

Code	Title	Credits
EDLD 651	Introductory Educational Data Science	3
EDLD 652	Data Visualization for Educational Data Science	3
EDLD 653	Functional Programming for Educational Data Science	3
EDLD 654	Machine Learning for Educational Data Science	3
EDLD 609	Practicum: [Topic]	1-16

Please contact EMPL Department for Admission Application and Declaration of Specialization.

Graduate Specialization in Quantitative Research Methods

The graduate specialization in quantitative research methods is designed primarily for doctoral students who have chosen quantitative methods as their primary research tradition in the College of Education. Doctoral students in other colleges and programs may be eligible but should confirm with the sponsoring department, the Department of Educational Methodology, Policy, and Leadership. The specialization is a rigorous training program in advanced quantitative research methods designed to prepare PhD students, with a competitive focus on quantitative research methods, for research and scholarship careers in education and the social sciences. Students take a minimum of 20 credits (five 4-credit courses) from among the department's advanced quantitative methods course offerings, building critical expertise in quantitative methodology including applied educational statistics and research design. The course

requirements include a two-course sequence in at least one advanced quantitative method and three additional quantitative methods courses.

Courses

EDLD 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable. Topics include 21st-Century Leadership, Peer Mentoring.

EDLD 211. Exploring Leadership. 3 Credits.

Understanding the context of leadership for the common good and for change in educational and social systems; establishing basic skill-building in project management fundamentals to promote effective leadership.

EDLD 311. Equity Leadership and Social Change. 3 Credits.

Provides foundational exposure to current scholarship and practice in approaches that promote equity and inclusion within professional educational and social service settings.

EDLD 312. Effective Leadership Decision-Making. 3 Credits.

Introduces basic concepts of evidence-based decision-making. Addresses theoretical frameworks for decision-making, statistical applications, common decision-making errors, and ways to involve diverse individuals and groups in making decisions.

Prereq: EDLD 211.

EDLD 313. Program Evaluation for Future Leaders. 3 Credits.

Introduction to evaluation theory and evaluation research design; potential uses and limitations of program evaluation in the public and private sector through study, discussion, and application of course materials.

Prereq: EDLD 211.

EDLD 401. Research: [Topic]. 1-18 Credits.

Repeatable

EDLD 404. Internship: [Topic]. 1-12 Credits.

Repeatable.

EDLD 405. Reading and Conference: [Topic]. 1-21 Credits.

Repeatable.

EDLD 407. Seminar: [Topic]. 1-4 Credits.

Repeatable. Topics include Human Services, Peer Health Education.

EDLD 408. Workshop: [Topic]. 1-21 Credits.

Repeatable.

EDLD 409. Terminal Project. 1-12 Credits.

Repeatable. Topics include Advanced Peer Support, International Educational Leadership.

EDLD 410. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

EDLD 411. Examining Leadership Effectiveness. 3 Credits.

Designed for students who enroll in a proposed minor program yet to be named. Focuses on analysis of personal commitments and goals in the context of leadership for social change.

EDLD 412. Leading Change in Organizations. 3 Credits.

Development of skills for leading change within an organization: planning, managing, enacting, surviving, and evaluating personal and organizational change.

Prereq: EDLD 211.

EDLD 503. Thesis. 1-16 Credits.

Repeatable.

EDLD 507. Seminar: [Topic]. 1-4 Credits.

Repeatable. Topics include Human Services, Peer Health Education.

EDLD 508. Workshop: [Topic]. 1-21 Credits.

Repeatable.

EDLD 510. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

EDLD 601. Research: [Topic]. 1-16 Credits.

Repeatable.

EDLD 602. Supervised College Teaching. 1-5 Credits.

Repeatable.

EDLD 603. Dissertation. 1-16 Credits.

Repeatable.

EDLD 604. Internship: [Topic]. 1-12 Credits.

Repeatable.

EDLD 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

EDLD 606. Field Studies: [Topic]. 1-16 Credits.

Repeatable.

EDLD 607. Seminar: [Topic]. 1-6 Credits.

Repeatable.

EDLD 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

EDLD 609. Terminal Project. 1-12 Credits.

Repeatable.

EDLD 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

EDLD 623. Cultural Adaptation of Evidence-Based Practices. 3 Credits.

This course is designed to provide an advanced foundation in models and methods for the cultural adaptation of evidenced-based prevention and treatment practices in school, community, and family settings.

EDLD 624. Leading for Equity. 3 Credits.

This course is designed to provide advanced exposure to current research and practice in leading for equity and inclusion within professional educational settings and a strong conceptual foundation in leadership.

EDLD 625. Survey and Questionnaire Design. 3 Credits.

Students gain practical experience in the collection and analysis of social science information through the design of surveys and questionnaires.

EDLD 628. Hierarchical Linear Models I. 3 Credits.

Introduction to multilevel modeling and hierarchical data structures, random and fixed effects, intercepts and slopes as outcomes models, estimation, centering, and the use and interpretation of HLM statistical software. Sequence with EDLD 629.

Prereq: EDUC 642.

EDLD 629. Hierarchical Linear Models II. 3 Credits.

This course will include advanced topics in multilevel modeling and hierarchical data structures, including longitudinal and categorical data analysis, estimation methods, missing data and multiple imputation, and the use and interpretation of different HLM statistical software packages, including HLM, R, and Mplus. Sequence with EDLD 628.

Prereq: EDLD 628.

EDLD 631. Education Policy for Multilingual Students. 3 Credits.

Historical and current approaches to meeting the needs of English learners in the US. The focus is on federal, state, and local policies that support English learners' acquisition of English, as well as research on effective programs and practices to ensure educational equity and opportunity.

EDLD 632. Educational Policy Analysis. 3 Credits.

The purpose of this course is to introduce graduate students to the craft of education policy analysis.

EDLD 633. Structural Equation Modeling I. 3 Credits.

Theory, application, and interpretation of structural equation modeling techniques. Includes covariance structures, path diagrams, path analysis, model identification, estimation, and testing. Sequence with EDLD 634. Prereq: EDUC 642; EDUC 644 recommended.

EDLD 634. Structural Equation Modeling II. 3 Credits.

Emphasis on structural and latent variable models, including cross-validation, mean structures, comparing groups and models, latent growth-curve analyses. Sequence with EDLD 633. Offered alternate years. Prereq: EDLD 633.

EDLD 636. Governance and Ethics. 3 Credits.

Examination of how intentional school and district governance serves system transformation. Viewing ethics through an equity lens, leaders develop policies and practices that eliminate systems of advantage and disadvantage thereby closing the opportunity and achievement gaps present in their schools and system.

EDLD 640. Educational Data Science Capstone Project. 4 Credits.

The final course of the Educational Data Science specialization, this course is an applied capstone where students tackle an applied data problem.

Prereq: EDLD 651, EDLD 652, EDLD 653, EDLD 654.

EDLD 643. Evidence-Based Decision Making. 3 Credits.

Introduces basic concepts of evidence-based decision-making.

EDLD 644. Learning Organization. 3 Credits.

Four theories of organizational learning are explored: structural frame, human resource, political, and symbolic.

EDLD 647. Professional Issues in Education I. 1 Credit.

Examines the relationship between scholarship, planned programs of study, preparation for comprehensive exams, master's project, and dissertation.

EDLD 648. Professional Issues in Education II. 2 Credits.

This course focuses on (a) the varied threats to validity in applied education research and (b) the elements of a cogent written argument as applied to academic education research.

Prereq: EDLD 647.

EDLD 650. Advanced Seminar Educational Research Methods. 3 Credits.

Examines special issues in the use and application of educational statistics and research design in a discussion-seminar format.

Prereq: EDUC 612, EDUC 614, EDUC 640.

EDLD 651. Introductory Educational Data Science. 3 Credits.

Introduces students to the fundamentals of statistical computing for data science. Introductory programming, data wrangling, data visualization, reproducible research.

EDLD 652. Data Visualization for Educational Data Science. 3 Credits.

Best practices in data visualization for social data science communication. Visual perception, color, uncertainty, and communication mediums.

Prereq: EDLD 651.

EDLD 653. Functional Programming for Educational Data Science. 3 Credits.

Foundations of functional programming for data science. Function writing and iteration emphasized.

Prereq: EDLD 651.

EDLD 654. Machine Learning for Educational Data Science. 3 Credits.

Statistical models for prediction. Bias-variance tradeoff, cross-validation methods, model evaluation, and a variety of models used in data science.

Prereq: EDLD 651.

EDLD 659. Scholarly Writing. 3 Credits.

Develops proficiency in preparing technical reports, dissertations, grant applications, and literature syntheses to communicate educational programs, processes, and results.

EDLD 661. Item Response Theory I. 3 Credits.

Theory and application of item response measurement models. Participation outcomes include knowledge of IRT models, terminology, and resources. Emphasis on popular models and underlying assumptions.

EDLD 663. Measurement & Assessment: Research. 3 Credits.

Covers applied knowledge in measurement and assessment with an emphasis on use of measures for research purposes.

EDLD 667. Advanced Measurement Assessment. 3 Credits.

Advanced foundation in educational measurement and assessment; emphasis on scale development and psychometric evaluation techniques. Introduction to methodological approaches to develop and evaluate scales designed for educational and applied research settings.

Prereq: EDLD 560 or equivalent.

EDLD 675. School Finance. 3 Credits.

Overview of school finance concepts, Oregon's school financing system, political and legal considerations, taxation, state distribution formulas, school finance reform, the federal role in education.

EDLD 677. PhD Research Seminar. 3 Credits.

The primary purpose of this course is to induct doctoral students into the practice of educational research and provide them a base for a career as a faculty member at an institution of higher education or a member of a research institute.

EDLD 678. PhD Teaching Seminar. 3 Credits.

Facilitates the development of skills that make for successful teaching and the preparation of a teaching statement for submission with job applications. Repeatable twice for a maximum of 9 credits.

EDLD 683. State and Local Policy Development in Education. 3 Credits.

This course introduces students to the education policy process at the state and local levels. The course is designed for students who seek to become more sophisticated in their ability to read critically about, understand, and interpret the policy process.

EDLD 684. Master's Seminar in Educational Policy and Leadership. 3 Credits.

Required course for the Master of Science in Education Policy and Leadership (MS-EPL) to introduce students into the program, build community within the cohort, develop a shared sense of purpose and direction in the program, and learn foundational core concepts of education policy and leadership.

EDLD 685. Educational Policy and Leadership Master's Capstone. 3 Credits.

The purpose of this course is to scaffold students through the development and completion of their Educational Policy and Leadership master's capstone project. The capstone project is a discrete empirical examination of a problem of practice. The course also covers career planning and presentation skills.

EDLD 692. Research Writing. 3 Credits.

Provides structure and guidance to complete the methods section of a dissertation proposal. The nature and scope of the dissertation methods will be determined by a range of factors, including the advisor's guidance, the data to be used, and the scope of the study.

EDLD 694. Dissertation Preparation. 3 Credits.

This course is designed to support students in preparing their a dissertation using the APA guidelines for publications in education/social sciences, the standards for measurement systems used in dissertations, and the standard four chapter format: introduction, methods, results, conclusions. Sequence with EDLD 699.

Prereq: EDLD 699.

EDLD 696. Professional Writing I: Foundations in Professional Writing. 3 Credits.

Covers foundational knowledge of the American Psychological Association's (APA) writing style as well as how to synthesize research for academic purposes.

EDLD 697. Professional Writing II: Organization. 3 Credits.

Explores the types of writing required of the three doctor of education (DEd) dissertation options: scholarly article, policy analysis, and grant proposal.

Prereq: EDLD 696.

EDLD 698. Professional Writing III: Literature Review. 3 Credits.

Students write a review of research manuscripts on a professional topic and continue to learn the nuances of APA writing style.

Prereq: EDLD 697.

EDLD 699. Dissertation Methods Apprenticeship. 3 Credits.

Provides doctoral students in the DEd program a structured opportunity to complete their dissertation proposal and a PowerPoint presentation on their respective proposals.

EDLD 708. Workshop: [Topic]. 1-16 Credits.

Repeatable.

EDLD 709. Terminal Project. 1-16 Credits.

Repeatable.

EDLD 710. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

Special Education and Clinical Sciences

Ben Clarke, Department Head

541-346-1638

541-346-0683 fax

340 HEDCO Education Building

Through teaching, research, and service, the Department of Special Education and Clinical Sciences seeks to improve the quality of education, employment, and community living for children and adults with special needs and their families. The department has three graduate majors: communication disorders and sciences, school psychology, and special education. The department also offers an undergraduate degree in communication disorders and sciences as well as a minor in special education.

Faculty

Franklin Bender, clinical assistant professor; clinical supervisor. BS, 1993, MS, 1996, Portland State; MS, 2014, Oregon. (2015)

Gina Biancarosa, professor (measurement, reading difficulties, reading comprehension). BA, 1992, Boston College; MEd, 1999, EdD, 2006, Harvard. (2009)

Jeanine Brush, clinic supervisor. BS, 2007, MS, 2009, Indiana University of Pennsylvania. (2015)

Chad Catron, instructor (American Sign Language). BA, 2014, California State, Fresno; MA, 2017, Gallaudet. (2019)

Ben Clarke, associate professor (math assessment and intervention; school psychology). BS, 1997, Wabash; MA, 2001, PhD, 2002, Oregon (2016).

Lauren Czyk, assistant professor (early language development, Spanish-English dual language development, caregiver-influenced language development). BA, 2004, George Washington; MS, 2007, Arizona State; PhD, 2016, Temple. (2016)

Stephanie De Anda, assistant professor (early language acquisition, bilingualism, language intervention). BS, 2011, PhD, 2017, California, San Diego. (2017)

Lillian Duran, associate professor. BA, 1995, Antioch College; MA, 1999, George Washington; PhD, 2008, Minnesota, Twin Cities. (2015)

Karen Durany, senior lecturer (anatomy and physiology, aphasia, family advocacy). BA, 1991, Colorado, Boulder; MA, 1996, PhD, 2001, Oregon. (2000)

Jessica L. Fanning, clinic supervisor. BA, 1989, MA, 1996, Colorado, Boulder; PhD, 2007, Oregon. (2010)

Nicole R. Giuliani, assistant professor (cognitive and affective science, translational neuroscience, obesity prevention), BA, 2003, Pennsylvania; PhD, 2011, Stanford (2016).

Beth Harn, associate professor (learning disabilities, assessment, instructional design). BA, 1991, MS, 1994, California State, Fresno; PhD, 2000, Oregon. (2006)

Wendy Machalicek, associate professor (low-incidence disabilities, autism, early intervention). BS, 2000, North Texas; MEd, 2004, PhD, 2008, Texas, Austin. (2011)

Katie Mason, clinic supervisor (speech-language pathology). BA, 2003, MS, 2005, Oregon. (2012)

Kent McIntosh, professor (behavior management, research design, applied behavior analysis); director, educational and community supports. BA, 1997, Duke; MS, 2003, PhD, 2005, Oregon. (2012)

Laura Lee McIntyre, professor (developmental disabilities, early intervention, home-school collaboration). BA, 1997, La Sierra; MA, 2000, PhD, 2003, California, Riverside. (2009)

Jennifer Meyer, associate clinical professor; director, clinic education. BS, 2000, MS, 2002, Southern Illinois. (2010)

Christopher J. Murray, professor (secondary special education and transition). BA, 1989, University of Maryland, College Park; MEd, 1992, Howard; PhD, 1998, Washington, Seattle. (2006)

Rhonda N. T. Nese, assistant professor (alternatives to exclusionary discipline, positive behavioral interventions and supports, implementation and sustainability of equitable schools). BA, 2004, Maryland; MEd, 2008, Howard; PhD, 2013, Oregon. (2016)

Elise Peltier, clinical associate professor; clinic supervisor. BA, 1998, Oregon; MS, 2008, Northern Arizona. (2012)

Billie Jo Rodriguez, lecturer (applied behavior analysis, multi-tiered systems of support, educational consultation and collaboration). BS, 2005, Central Arkansas; MS, 2008, PhD, 2010, Oregon. (2015)

Geovanna Rodriguez, assistant professor (Autism Spectrum Disorder, school climate and mental health, bullying, teacher professional development). BA, 2009, California, Los Angeles; MA, 2015, PhD, 2017, California, Riverside. (2019)

John R. Seeley, professor (emotional and behavioral disorders). BS, 1985, MS, 1991, PhD, 2001, Oregon. (2015)

Stephanie Shire, assistant professor (early intervention, autism spectrum disorders, community-based intervention). BA, 2008, MEd, 2010, Alberta; MA, 2013, PhD, 2013, California, Los Angeles. (2017)

Samantha Shune, assistant professor (dysphagia, aging). BA, 2005, Michigan, Ann Arbor; MA, 2007, Ohio State; PhD, 2014, Iowa. (2014)

McKay Moore Sohlberg, professor (cognitive rehabilitation, traumatic brain injury). BA, 1982, Stanford; MS, 1984, PhD, 1990, Washington, Seattle. (1995)

Sylvia Thompson, associate professor (learning disabilities, English learners, literacy). BS, 1988, Texas, Austin. MS, 1992, Miami. PhD, 1999, Texas, Austin. (2015)

Deanne Unruh, research associate professor (secondary special education and transition, high-risk adolescents, program evaluation). BS, 1985, MS, 1991, Kansas; PhD, 2001, Oregon. (2001)

Valentino Vasquez, instructor (American Sign Language). BA, 1997, MA, 1998, Northern Colorado. (2011)

Angela J. Whalen, clinical professor (professional practices in school psychology, clinical supervision, educational assessment and intervention). BA, 1996, St. Thomas; PhD, 2002, Oregon. (2003)

Emeriti

Barbara D. Bateman, professor emerita. BS, 1954, Washington (Seattle); MA, 1958, San Francisco State; PhD, 1962, Illinois; JD, 1976, Oregon. (1966)

Diane D. Bricker, professor emerita. BA, 1959, Ohio State; MS, 1965, Oregon; PhD, 1970, George Peabody. (1978)

Ned J. Christensen, professor emeritus. BA, 1954, MA, 1955, Brigham Young; PhD, 1959, Pennsylvania State. (1962)

Russell M. Gersten, professor emeritus. BA, 1967, Brandeis; PhD, 1978, Oregon. (1977)

Elizabeth G. Glover, assistant professor emerita. BS, 1959, Tufts; MS, 1963, EdD, 1974, North Carolina, Greensboro. (1964)

Robert H. Horner, professor emeritus. BA, 1971, Stanford; MS, 1975, Washington State; PhD, 1978, Oregon. (1976)

Marilyn A. Nippold, professor emeritus. BA, 1972, California, Los Angeles; MA, 1976, California State, Long Beach; PhD, 1982, Purdue. (1982)

Kenneth Viegas, associate professor emeritus. BS, 1956, Oregon; MSW, 1963, California, Berkeley. (1967)

Hill M. Walker, professor emeritus. BA, 1962, Eastern Oregon; MA, 1964, PhD, 1967, Oregon. (1966)

Ruth Waugh, professor emerita. BS, 1957, Southern Oregon State; MS, 1963, PhD, 1971, Oregon. (1963)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

- Bachelor of Science (p. 723)
- **Minor**

Undergraduate Studies

Communication Disorders and Sciences Major

Karen Durany, Director, Undergraduate Studies

541-346-2480

kdurany@uoregon.edu

The undergraduate program for communication disorders and sciences includes courses in basic processes of speech, language, and hearing as well as courses that survey speech, language, and hearing disorders that affect communication across the life span. The undergraduate program prepares students for graduate training in speech pathology or audiology. It also prepares students to work in other fields where knowledge of speech, language, and communication is important, such as early intervention and special education.

Students may earn a bachelor of science (BS) or bachelor of arts (BA) degree with a major in communication disorders and sciences. Both degrees require 60 credits in communication disorders and sciences and related courses and 16 credits in required science and statistics courses. Students must earn a C– or better or P in required courses.

Course work in the major focuses on acquiring knowledge in the following areas:

- anatomical-physiological bases of speech, language, and hearing
- acoustic properties of sound and speech production

- role of biology, cognition, environment, and culture in language acquisition
- development of speech and language
- speech, language, and hearing disorders across the life span
- assessment and treatment procedures for individuals with speech, language, and hearing disorders
- professional issues in speech-language-pathology and audiology

The following program plans contain specific, required major courses in addition to sample courses a student may select to meet other major and university requirements.

Bachelor of Art Requirements

Code	Title	Credits
LING 150	Structure of English Words	4
CDS 201	Communication Disorders in Society and Media	4
CDS 430	Speech Pathology-Audiology as Professions	2
CDS 431	Beginning Clinical Methods	3
CDS 442	Anatomy and Physiology of Speech Mechanism	4
CDS 444	Clinical Phonetics and Phonology	4
CDS 450	Introduction to Language Development	4
CDS 455	Child and Adolescent Development	4
CDS 457	Fundamentals of Audiology	4
CDS 458	Audiology Disorders and Treatment	4
CDS 460	Developmental Disorders in Communication	4
CDS 462	Acquired Disorders of Communication	4
CDS 470	Neuroscience of Speech and Language	4
	Social-behavioral science course	4
	Biological science course	4
	Physical science course	4
	Statistics course	4
	Area C Elective ¹	3-4
Total Credits		68-69

¹ Contact department for list of Area C electives.

Program Plan

Students must meet with the department's undergraduate advisor to develop an academic program plan and ensure that general university requirements and communication disorders and sciences prerequisites are met. Beginning fall term of their junior year, students must follow the program plan of courses in their prescribed sequence. Students who fail to do so will likely delay their graduation date.

Bachelor of Science Requirements

Special Education Minor

Elisa Jamgochian, Coordinator

340 HEDCO Education Building
 ejamgoch@uoregon.edu
 541-346-5185

The minor in special education is for students who plan to pursue a career teaching in general or special education, are interested in working in nonschool settings with individuals who have disabilities, or want to study issues concerning people with special needs. The minor consists of a core of required course work and electives. Some of these credits can be applied toward meeting the requirements for an Oregon special educator teaching license.

The requirements for the minor consist of 7 core credits and 17 elective credits. Electives provide students with a breadth of interdisciplinary options. Students may plan a course of study that introduces them to the field of special education and prepares them to begin a licensure program, focusing on classroom settings and specific instructional skills and strategies for teaching students with disabilities. Other major course work such as English, comparative literature, law, journalism, architecture, arts administration, business, or planning, public policy and management may be augmented by completing minor course work focused on broad issues concerning people with disabilities. The option provides an enhanced understanding of perspectives on disability and issues in each student's chosen profession.

Minor Requirements

Code	Title	Credits
	Required course credits	7
	Electives ¹	17
Total Credits		24

¹ Elective credits will depend on the option chosen.

Application and Admission

Before applying to the minor program, students must complete at least 1 credit of Field Studies: [Topic] (SPED 406) (or have a Petition to Waiver form on file with the minor coordinator), Seminar: [Topic] (SPED 407), and Foundations of Disability I (SPED 411) with a minimum grade of B– or P. Students apply to the department and are assigned a minor advisor, who helps plan a course of study. Applications are available online (https://oregon.qualtrics.com/jfe/form/SV_6tJ9NcbIWGF9E9f/).

Certificate in Special Education

Elisa Jamgochian, Program Coordinator

340 HEDCO Education Building
 ejamgoch@uoregon.edu
 541-346-5185

The department offers a certificate in special education for students who are interested in a career in public education, human services and social work, or a related field. This certificate is designed to provide foundational knowledge about the field of special education and would benefit students interested in a career in supporting students with disabilities in public school, agency, or community settings. The certificate has an emphasis on developing skills and knowledge in three areas: foundations of disability, instructional methods for students with disabilities, and behavioral and social emotional supports for students with disabilities.

The certificate is available to all students interested in working with students and families with disabilities but does not replace formal teacher licensure programs that are available through graduate study at the University of Oregon. Completion of the certificate will, however, waive *some* of the prerequisites for students who enter the graduate special education program, providing certificate recipients an option for an accelerated pathway to licensure in special education and a master's degree.

The certificate requires 31 400-level course credits.

Courses must be taken for a letter grade unless only offered pass/no pass. Graded courses must be passed with a grade of B– or better so that students are sufficiently prepared to be successful in completing the required practicum experience. If a student receives a grade lower than a B–, the certificate advisor and clinical supervisor will meet to determine if the student has the skills and knowledge to complete the required practicum experience, Practicum: [Topic] (SPED 409).

Students completing this certificate cannot also obtain the minor in special education.

Admissions and Application

Before applying to the certificate program, students must complete at least 1 credit of Field Studies: [Topic] (SPED 406) (or have a Petition to Waiver form on file with the minor coordinator), Seminar: [Topic]

(SPED 407), and Foundations of Disability I (SPED 411) with a minimum grade of B– or P.

Applications are available online. Students are asked to submit a professional goal statement, character questionnaire, and two letters of recommendation along with their application. An initial interview and advising meeting with the program coordinator is also required. Admitted students must have a signed program plan and verification of a background check from the Teacher Standards and Practices Commission on file with the coordinator.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Bachelor of Arts in Communication Disorders and Sciences

Course	Title	Credits	Milestones

541-346-0683 fax

HEDCO Education Building, Second Floor

cds@uoregon.edu

education.uoregon.edu/CDS

The graduate program offers master's and doctoral degrees in communication disorders and sciences. The master's program offers all of the courses and clinical experiences required for the American Speech-Language-Hearing Association Certificate of Clinical Competence. The program also offers course work and clinical experiences required to obtain an Oregon teaching license to work in the public schools. The doctoral program emphasizes advanced scholarship in a specialized area of speech-language pathology.

Accreditation

The master's degree program in speech-language pathology is accredited by the Council on Academic Accreditation of the American Speech-Language-Hearing Association (ASHA).

Master's Degree

The master's degree program provides students with the opportunity to acquire and apply knowledge, skills, and competencies necessary for work with individuals of all ages and of varying social, cultural, linguistic, and economic backgrounds who have cognitive communication and/or swallowing disorders.

The communication disorders and sciences degree leads to a master of arts (MA) or master of science (MS) degree. A planned program for the master's degree must be filed with the department secretary.

Students who have fulfilled the undergraduate prerequisites typically spend two fall-through-spring academic years and one summer session completing the degree as a full-time student. Every student completes an evidence-based practice project, equivalent to a master's thesis, that integrates research and applied clinical experience. A minimum cumulative GPA of 3.00 is required for students to maintain good standing in the program and for graduation.

Application and Admission

On the average, the communication disorders and sciences program admits 30 master's degree applicants each year. Applicants should have a minimum overall GPA of 3.00 with a 3.50 GPA in their major. The Graduate Record Examination is required for admission.

Students for whom English is not a native language must pass the Test of English as a Foreign Language (TOEFL) with a score of 600 or above for the paper version or a score of 100 or above for the Internet-based version. International students who plan to participate in clinical practicums and work toward national certification by the American Speech-Language-Hearing Association must pass the Speaking Proficiency English Assessment Kit (SPEAK) test with a score of 50.

Applications for admission are available online at the communication disorders and sciences website. Application materials must be received by January 15 for entry the following September.

Master of Arts Degree Requirements

Code	Title	Credits
CDS 606	Practicum: [Topic]	1-3
CDS 607	Seminar: [Topic]	1
CDS 608	Workshop: [Topic] (Evidence-Based Project Research)	3
CDS 609	Terminal Project (Externship)	1-15
CDS 609	Terminal Project (September Experience)	3

CDS 609	Terminal Project (Speech-Language-Hearing)	1-4
CDS 625	Final Full-Time Practicum	1-15
CDS 627	Fluency Disorders	2
CDS 631	Cultural-Linguistic Diversity for Clinicians : [Topic]	1-3
CDS 649	Feeding and Swallowing Disorders	4
CDS 651	School-Age Language Disorders	4
CDS 652	Speech Sound Disorders	4
CDS 654	Management of Adult Language Disorders	4
CDS 656	Voice Science and Disorders	3
CDS 657	Augmentative Procedures for Communication Disorders	2
CDS 660	Motor Speech Disorders	3
CDS 663	Management of Acquired Cognitive Disorders	4
CDS 665	Language Disorders in Children	4
CDS 706	Practicum: [Topic]	1-3
Total Credits		47-84

The MA requires the equivalent of two years of a second language.

Master of Science Degree Requirements

Code	Title	Credits
CDS 606	Practicum: [Topic]	1-3
CDS 607	Seminar: [Topic]	1
CDS 608	Workshop: [Topic] (Evidence-Based Project Research)	3
CDS 609	Terminal Project (Externship)	1-15

Total Credits		47-84

ASHA Requirements

In addition to the core master's degree requirements, additional course work may be needed to fulfill ASHA certification requirements. Of the 50 credits, 36 must be taken at the graduate level.

Doctoral Degree

The doctoral degree (PhD) in communication disorders and sciences emphasizes advanced knowledge, scholarship, leadership, and clinical competence in the areas of speech-language acquisition, speech-language pathology, and assessment and intervention strategies. The doctoral degree program is designed to meet the needs of students from various backgrounds and to train future scholars in the profession.

Doctoral Degree Requirements

Code	Title	Credits
	Dissertation research	18
	Courses in primary area of specialization	21
	Courses in collateral or secondary area	9
	Research methodology	24
	Other required courses	6
Total Credits		78

Options for primary area of specialization include child and adolescent language, early language, swallowing, cognitive rehabilitation, and multicultural issues. The collateral or secondary area may involve courses in more than one academic department. Examples of collateral areas are neuropsychology, linguistics, or developmental psychology. Doctoral students must choose an area of research interest (e.g., single-subject or quantitative methodologies). Other requirements are detailed in the *Doctoral Program Handbook*, available through the program office.

Application and Admission

Students should have a GPA of at least 3.50. Most applicants have a master's degree and their certificate of clinical competence upon admission.

Applications for admission are available online at the Communication Disorders and Sciences website. Application materials must be received by January 15 for entry the following September.

Upon admission and in consultation with the student, an academic advisor is selected, taking into account the student's personal and professional goals. This advisor chairs the student's program committee.

Special Education

Sylvia Thompson, Program Director

541-346-1638

541-346-0683 fax

HEDCO Education Building, Third Floor

sped@uoregon.edu

education.uoregon.edu/SPED

Master's and doctoral degrees are offered under the special education major. The master's specializations include early intervention—early childhood and kindergarten through 12th grade, cross-categorical. The doctoral focus includes emphases in positive behavior support, emotional and behavior disorders, autism and other intellectual and developmental disabilities, learning disabilities, early intervention, English learners, and secondary-transition services.

Graduates attain positions in the United States and abroad working in community- and family-based programs; teaching young children; conducting individual and group intervention programs; managing residential living centers; coordinating in-service training programs; consulting with teachers about educating children with disabilities

in general-education classrooms and school settings; conducting research; serving in higher-education faculty positions; working in the administration of special-education programs; and delivering best practices in collaboration with a variety of professions in a range of settings.

Students earn initial teaching credentials in licensure and endorsement programs but can also pursue the master's degree to enhance their skills as early interventionists, special education teachers, or consultants; to work in adult service programs for people with disabilities; or to prepare for the doctoral program.

The doctoral program in special education prepares individuals for research and teaching positions in higher education, research positions with private foundations, administrative positions in school districts and other state educational agencies, and consultation positions in professional education.

Accelerated Master's in Special Education

The Accelerated Master's in Special Education provides foundational knowledge about the field of special education, emphasizing skill development in four areas: (a) foundations of disability; (b) instructional methods for young children (ages birth to five) with developmental delays or disabilities; (c) social emotional and behavioral supports (providing interventions to promote social development and supporting young children with challenging behaviors); and (d) coaching families of young children with disabilities. The program is ideally suited for students interested in careers in education, human services and social work, or related fields, who are interested in supporting young children with disabilities and their families in public or private educational settings, disability-serving agencies, and/or community-based settings. The program will be available to any UO student who (a) completes our existing minor in special education, and (b) meets the program's graduate admission criteria. It provides participants an accelerated pathway to licensure in early intervention/early childhood special education and a master's degree in special education

Master's Degree

Students may work toward a master of arts (MA), master of science (MS), or master of education (MEd) degree in several areas of special education. For the MA degree the candidate must demonstrate proficiency in a second language. For the MEd degree the candidate must have a valid teaching license and have completed at least one year of successful classroom teaching in the United States.

The program of study leading to the master's degree requires a minimum of 45 credits of graduate work. The program of study includes required core courses, associated field studies, electives, and a terminal project.

Doctoral Degree

The department offers doctor of education (DEd) and doctor of philosophy (PhD) degrees with advanced training in preparation for leadership positions in special education. The program requires approximately 90 credits beyond the master's degree and is designed for full-time students. Typically, students complete the program in four years. Financial assistance is awarded based on the applicant's qualifications. The program uses a cohort model, which students begin fall term.

Applications for Admission

Admissions information and application materials are available on the department's website. Materials also may be requested by telephone,

mail, e-mail, or in person from the department office. Master's and doctoral students are admitted fall term. Applications must be received by early December for doctoral applicants and by early May for master's applicants. Priority deadline for application review of master's applicants is early February. See the website for specific program deadlines.

School Psychology

Angie Whalen, Program Director

541-346-1638

541-346-0683 fax

HEDCO Education Building, Third Floor

spsy@uoregon.edu

education.uoregon.edu/SPSY

The nationally recognized school psychology program offers master's and doctoral degrees and provides service courses to other College of Education and university programs. The doctoral program is accredited by the American Psychological Association Commission on Accreditation (750 First Street NE, Washington, DC 20002-4242, 202-336-5979) and both the MS and PhD programs have approval from the National Association of School Psychologists. Both the master's and doctoral programs are approved by the Oregon Teacher Standards and Practices Commission for the education and licensure of school psychologists in the state.

The program's focus is prevention and early intervention. It prepares psychologists as leaders and innovators who can identify, assess, and remedy the social and educational problems of children and adults. Students are trained to be scientists and practitioners from an ecological, data-oriented perspective.

Each student's program of study is tailored to allow development of individual strengths and interests. Master's and doctoral students take course work in the following general areas: psychological and educational foundations of school psychology: psychometrics, assessment, and research; methods of school-based intervention; professional school psychology; application of research skills; and practicum experiences. Every student must complete a one-year, full-time internship. Doctoral students also complete a supervised college teaching experience.

Graduates of the school psychology program find positions in the United States and abroad, in schools and in other settings. These positions include teaching and providing services at infant, preschool, school-age, and adult levels; conducting individual and group intervention programs; coordinating in-service training programs; consulting with teachers about educating children with disabilities and other at-risk students; conducting research, teaching, and coordinating school psychology training programs in colleges and universities; working in the administration of special education programs; and delivering a range of psychological and educational services in collaboration with a variety of professionals.

Master's Degree

The master's degree program in school psychology requires a minimum of 92 credits, and typically takes three years to complete, including a sequence of supervised field experiences, practicums, and a 1,200-hour internship. The master's program is approved by the National Association of School Psychologists and the Oregon Teacher Standards and Practices Commission. Graduates of this program meet State of Oregon licensure requirements and are eligible for the nationally certified

school psychologist credential offered by the National Association of School Psychologists.

Master's Degree in School Psychology

The master's degree (specialist-level) program in school psychology requires a minimum of 92 credits, and typically takes three years to complete. It includes a sequence of supervised field experiences, practica, and a 1,200 hour internship.

The master's program is accredited by the National Association of School Psychologists and approved by the Oregon Teachers Standards and Practices Commission for the educational licensure of school psychologists in the state of Oregon.

Graduates of this program meet school psychologist licensure requirements through the Oregon Teacher Standards & Practices and are eligible for the nationally certified school psychologist credential offered by the National Association of School Psychologists.

Doctoral Degree

The doctoral program includes an individualized plan of study with 160 credits minimum, culminating in an original research dissertation, a predoctoral internship, and the doctor of philosophy (PhD) degree. Students may enter the doctoral program with or without a master's degree. Prior graduate course work may reduce the amount of time needed to finish the doctoral program.

The program prepares students to qualify for licensure as a professional psychologist through the state board of psychologist examiners, as well as state certification or licensure as a school psychologist in Oregon and most other states. Students who complete this program are eligible for the nationally certified school psychologist credential offered by the National Association of School Psychologists.

Application and Admission

Prospective applicants may request detailed admission policies and procedures and applications for admission from the department's student services coordinator, or find them on the program's website. Students are admitted for fall term only.

Applicants are evaluated on

- academic record
- letters of recommendation
- previous related work or experiences
- a statement of purpose in seeking admission
- an interview
- Graduate Record Examinations (GRE) general test scores

Applications and supplemental materials are submitted online. Completed applications must be received by December 15. After initial file screening, finalists will be selected and invited for interviews.

Students are admitted to start summer or fall term only. Prospective applicants may find detailed admission policies and procedures on the UO special education website. The closing date for receipt of completed applications is posted on the website for entry the following summer and fall terms.

Applicants are evaluated on the following:

1. Academic record
2. Related research and work experiences
4. Statement of purpose in seeking admission
5. Letters of recommendation
6. Interview—in-person, telephone, or video—with a member of the program faculty

Only completed applications are reviewed. Applicants must gather the requested supporting materials and submit them as indicated on the

application portal. All students complete a capstone project as part of their graduate training.

Licensure Programs

The Department of Special Education and Clinical Sciences' licensure programs in early intervention, school psychology, and special education meet requirements of the Oregon Teacher Standards and Practices Commission. The communication disorders program meets the requirements for licensure as a speech pathologist in Oregon. These licenses prepare individuals to work with the full range of students with disabilities from birth through high school. The program prepares graduates to work in direct and indirect roles with students with disabilities in homes, schools, and community-based programs.

Early Intervention–Early Childhood Special Education Licensure and Endorsement

TBA Program Coordinator

541-346-1638

sped@uoregon.edu

The early intervention special education endorsement program prepares professionals to work with children who have mild to severe disabilities ranging from birth through primary school. The program integrates didactic course work with practical experience. Full-time students can complete the program in four to six terms.

Special Education Licensure

Elisa Jamgochian, Program Coordinator

541-346-1638

sped@uoregon.edu

The two-year special education licensure and endorsement program prepares preservice or in-service teachers to work with students with disabilities ages three to 21 in a variety of settings, including early childhood–elementary, middle, and high schools. Graduates of the program are prepared to apply for an initial special education teaching license and endorsement across these multiple levels.

The program is designed for

- Individuals who hold a bachelor's degree in any area but want to pursue initial licensure in special education while concurrently completing a master's degree
- Individuals who currently hold a teaching license but want to pursue an add-on special education endorsement
- Individuals pursuing a master's program in an area other than special education who want to combine that degree with course work and experiences in special education

The program prepares professionals to help children and youth with disabilities succeed through rigorous course work and practicum experiences on topics including characteristics of learners and services, advanced assessment techniques, evidence-based approaches to

designing and delivering instruction, effective classroom- and behavior-management techniques, collaborative practices, and transition services.

Admissions and Application

The application may be completed on the Division of Graduate Studies website (https://gradweb.uoregon.edu/online_app/application/guidelines1.asp). This process includes a statement of professional goals and experience, a statement articulating experience working with individuals with disabilities, résumé, letters of recommendation, and transcripts.

Licensing Process

Upon completion of program requirements, graduates of the program are eligible to apply to the Oregon Teacher Standards and Practices Commission for their initial teaching license and/or an endorsement in K–12 special education.

American Sign Language Courses

ASL 101. First-Year American Sign Language. 5 Credits.

Study of basic grammatical structure and vocabulary of American Sign Language, expressive and receptive finger-spelling, and introduction to American deaf culture.

Prereq: WR 122 or WR 123 or HC 221H or HC 231H.

ASL 102. First-Year American Sign Language. 5 Credits.

Increased receptive and expressive communication skills in ASL, and study of cultural values and behavioral rules of the deaf community.

Prereq: C- or better or P in ASL 101 or equivalent.

ASL 103. First-Year American Sign Language. 5 Credits.

Concentration on understanding and acquiring advanced conversational proficiency. Emphasis on ASL classifiers. Continued study of deaf culture as a linguistic minority.

Prereq: C- or better or P in ASL 102 or equivalent.

ASL 201. Second-Year American Sign Language. 4 Credits.

Applied conversational use of ASL through literature, narratives, poetry, and plays. Explores various underlying metaphors found in ASL literature.

Prereq: C- or better or P in ASL 103 or equivalent.

ASL 202. Second-Year American Sign Language. 4 Credits.

Emphasis on more abstract and challenging conversational and narrative ranges. Lab and readings cover historical aspects of deaf community and culture.

Prereq: C- or better or P in ASL 201 or equivalent.

ASL 203. Second-Year American Sign Language. 4 Credits.

Further emphasis on more abstract and challenging conversational and narrative ranges. Explores broader political and social activities of international deaf community.

Prereq: C- or better or P in ASL 202 or equivalent.

ASL 301. American Deaf Culture. 4 Credits.

Study of the relationship between small groups and dominant culture in the United States. Explore issues of language, culture, self-representation, identity, and social structure.

ASL 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

Communication Disorders and Sciences Courses

CDS 201. Communication Disorders in Society and Media. 4 Credits.

Survey of communication disorders and differences, comparing individual and social-cultural perspectives through popular media and real case examples.

Prereq: WR 121.

CDS 401. Research: [Topic]. 1-12 Credits.

Repeatable.

CDS 405. Reading and Conference: [Topic]. 1-3 Credits.

Repeatable.

CDS 406. Practicum: [Topic]. 1-12 Credits.

Repeatable.

CDS 407. Seminar: [Topic]. 1-3 Credits.

Repeatable.

CDS 409. Terminal Project. 1-12 Credits.

Repeatable.

CDS 410. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

CDS 430. Speech Pathology-Audiology as Professions. 2 Credits.

Introduces the broad dimensions of the speech-language pathology and audiology professions. Begins undergraduate process of acquiring observation hours required for graduate school. Sequence with CDS 431.

CDS 431. Beginning Clinical Methods. 3 Credits.

Focuses on basic methods for assessment and intervention within an evidence-based framework. Includes fifteen hours of guided observation. Sequence with CDS 430.

Prereq: CDS 430.

CDS 442. Anatomy and Physiology of Speech Mechanism. 4 Credits.

Study of anatomy, physiology, and neurology of speech and language processes.

CDS 444. Clinical Phonetics and Phonology. 4 Credits.

Focuses on sounds and symbols of American English, foreign accents, and dialects using broad and narrow transcription methods. Presents speech production, distinctive features, and basics of phonology.

Prereq: CDS 442, CDS 450.

CDS 450. Introduction to Language Development. 4 Credits.

Primary focus on the development of phonology, morphology, syntax, semantics, pragmatics, and literacy.

Prereq: LING 150 and WR 122 or WR 123.

CDS 455. Child and Adolescent Development. 4 Credits.

Covers theories, norms, and concepts related to child and adolescent development. Geared toward allied health professionals and educators working in a variety of settings.

CDS 457. Fundamentals of Audiology. 4 Credits.

Anatomy and physiology of hearing and vestibular systems; causes, types, and symptomatologies of hearing impairment.

CDS 458. Audiology Disorders and Treatment. 4 Credits.

Pure tone, speech and impedance audiometry. Special tests, difficult-to-test populations, and central auditory processing. Audiogram interpretation and report writing.

Prereq: CDS 457.

CDS 460. Developmental Disorders in Communication. 4 Credits.

Explores growth and developmental disorders that cause or contribute to child and adult speech, language, and fluency impairments.

Prereq: CDS 450.

CDS 462. Acquired Disorders of Communication. 4 Credits.

Explores neurologic disorders that cause or contribute to child and adult speech, language, and voice impairments.

Prereq: CDS 470.

CDS 470. Neuroscience of Speech and Language. 4 Credits.

Foundation in normal neuroanatomy and neurophysiology and the clinical signs observed with nervous-system damage.

Prereq: CDS 442.

CDS 503. Thesis. 1-15 Credits.

Repeatable.

CDS 507. Seminar: [Topic]. 1-3 Credits.

Repeatable.

CDS 510. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

CDS 542. Anatomy and Physiology of Speech Mechanism. 4 Credits.

Study of anatomy, physiology, and neurology of speech and language processes.

CDS 544. Clinical Phonetics and Phonology. 4 Credits.

Focuses on sounds and symbols of American English, foreign accents, and dialects using broad and narrow transcription methods. Presents speech production, distinctive features, and basics of phonology.

CDS 550. Introduction to Language Development. 4 Credits.

Primary focus on the development of phonology, morphology, syntax, semantics, pragmatics, and literacy.

CDS 557. Fundamentals of Audiology. 4 Credits.

Anatomy and physiology of hearing and vestibular systems; causes, types, and symptomatologies of hearing impairment.

CDS 558. Audiology Disorders and Treatment. 4 Credits.

Pure tone, speech and impedance audiometry. Special tests, difficult-to-test populations, and central auditory processing. Audiogram interpretation and report writing.

CDS 560. Developmental Disorders in Communication. 4 Credits.

Explores growth and developmental disorders that cause or contribute to child and adult speech, language, and fluency impairments.

CDS 562. Acquired Disorders of Communication. 4 Credits.

Explores neurologic disorders that cause or contribute to child and adult speech, language, and voice impairments.

CDS 570. Neuroscience of Speech and Language. 4 Credits.

Foundation in normal neuroanatomy and neurophysiology and the clinical signs observed with nervous-system damage.

Prereq: CDS 542.

CDS 601. Research: [Topic]. 1-9 Credits.

Repeatable.

CDS 602. Supervised College Teaching. 1-9 Credits.

Repeatable.

CDS 603. Dissertation. 1-16 Credits.

Repeatable.

CDS 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

CDS 606. Practicum: [Topic]. 1-16 Credits.

Repeatable.

CDS 607. Seminar: [Topic]. 1-3 Credits.

Repeatable. Topics include Multicultural Issues in Communication Disorders and Sciences, Dysphagia, Professional Ethics.

CDS 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

CDS 609. Terminal Project. 1-12 Credits.

Repeatable.

CDS 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

CDS 611. Clinical Methods. 1 Credit.

Provides methodology behind the sound clinical practices and fundamentals of the UO Speech-Language-Hearing Center operations. Prepares students to begin working with clients.

CDS 620. Workshop: Evidence-Based Practice. 1-2 Credits.

This course supports students in developing their Evidence-Based Practice Projects via: (1) methods to promote critical evaluation and adoption of research findings; (2) principles of culturally responsive research practice, practice-based evidence and implementation science; and (3) activities to prepare students to complete their EBP projects.

CDS 621. Practicum I. 2-7 Credits.

Designed to support first year master's students as they proceed with their clinical training. The course will provide methodology, evidence-based practice and clinic operations training. The focus on using evidence-based practice and rational clinical decision-making will be incorporated throughout class instruction and clinical experiences.

CDS 622. Practicum II. 2-7 Credits.

Designed to help prepare second-year students for their medical and school externships. Students will learn clinical skills in the following areas: professional issues in medical settings; documentation in medical settings; ethical issues in speech-language pathology; school practicum requirements; professional issues in securing employment.

CDS 623. September Experience in Speech Language Pathology. 1 Credit.

Designed to prepare Graduate Student Clinicians to become Speech-Language Pathologists who can work in the school setting. There are specific skills that Speech-Language Pathologists in the school setting perform and the GSC will be prepared to demonstrate these skills by the end of this externship. Repeatable once for a maximum of 2 credits.

CDS 624. Medical Externship. 7-14 Credits.

Designed to prepare Graduate Student Clinicians to become Speech-Language Pathologists who can work in the medical setting. There are specific skills that Speech-Language Pathologists in the medical setting perform and the GSC will be prepared to demonstrate these skills by the end of this externship. Repeatable once for a maximum of 28 credits.

CDS 625. Final Full-Time Practicum. 1-15 Credits.

Diagnostic and treatment experience in the public school setting. Repeatable once for maximum of 30 credits.

CDS 627. Fluency Disorders. 2 Credits.

This course is designed to provide students with a foundation in the diagnosis and treatment of fluency disorders across the lifespan, with an emphasis on developmental stuttering.

CDS 631. Cultural-Linguistic Diversity for Clinicians : [Topic]. 1-3 Credits.

Topics include Multicultural Issues in Communication Disorders and Sciences, Dysphagia, Professional Ethics. Repeatable once for a maximum of 6 credits.

CDS 632. Dual Language Development. 1 Credit.

Discussion-based seminar designed to enhance knowledge of the processes and features of typical and atypical dual language development in children's earliest years of life (infancy to preschool). Focus is on dual language acquisition by children from Spanish-English language backgrounds in the context of the US. Sequence with CDS 633.

CDS 633. Practice with Dual Language Learners. 1 Credit.

Discussion-based seminar designed to further foundational knowledge of dual language assessment and intervention as it relates to the practice of speech-language pathology. Focus is on assessment and intervention with dual language learners ages 0-5 from Spanish-speaking language backgrounds in the context of the US. Sequence with CDS 632. Prereq: CDS 632.

CDS 649. Feeding and Swallowing Disorders. 4 Credits.

Nature and characteristics of feeding and swallowing; methods of evaluation and management of feeding and swallowing in adults and children.

CDS 651. School-Age Language Disorders. 4 Credits.

Presents normal language development and language disorders in school-age children and adolescents. Emphasizes contributions from linguistics, psychology, education, and learning theory.

CDS 652. Speech Sound Disorders. 4 Credits.

Causes and consequences of phonological disorders; principles and procedures for assessment and intervention.

CDS 654. Management of Adult Language Disorders. 4 Credits.

Provides a foundation in diagnosis and treatment of adult neurogenic language disorders, concentrating on aphasia and the cognitive-linguistic changes associated with dementia.

CDS 656. Voice Science and Disorders. 3 Credits.

Anatomy and physiology of vocal mechanism; diagnostic and therapeutic approaches for various voice disorders.

CDS 657. Augmentative Procedures for Communication Disorders. 2 Credits.

Recent advancements in design, development, and use of systems supplemental to vocal speech and language.

CDS 660. Motor Speech Disorders. 3 Credits.

Advanced study of speech disorders associated with lesions of central and peripheral nervous systems.

CDS 663. Management of Acquired Cognitive Disorders. 4 Credits.

Examines current theory and practice in cognitive rehabilitation. Reviews models and tools for treating attention, memory, and dysexecutive syndromes.

Prereq: CDS 662.

CDS 665. Language Disorders in Children. 2,4 Credits.

Child language disorders and related topics, including principles of assessment and intervention, cultural awareness and sensitivity, clinical application, and working with families.

CDS 706. Practicum: [Topic]. 1-12 Credits.

Repeatable.

CDS 707. Seminar: [Topic]. 1-5 Credits.

Repeatable.

CDS 708. Workshop: [Topic]. 1-16 Credits.

Repeatable.

CDS 709. Terminal Project. 1-16 Credits.

Repeatable.

CDS 710. Experimental Course [Topic]. 1-5 Credits.
Repeatable.

School Psychology Courses

SPSY 401. Research: [Topic]. 1-12 Credits.
Repeatable.

SPSY 405. Special Problems: [Topic]. 1-12 Credits.
Repeatable.

SPSY 406. Practicum: [Topic]. 1-12 Credits.
Repeatable.

SPSY 407. Seminar: [Topic]. 1-5 Credits.
Repeatable.

SPSY 408. Workshop: [Topic]. 1-21 Credits.
Repeatable.

SPSY 409. Terminal Project. 1-12 Credits.
Repeatable.

SPSY 410. Experimental Course: [Topic]. 1-5 Credits.
Repeatable.

SPSY 503. Thesis. 1-16 Credits.
Repeatable.

SPSY 507. Seminar: [Topic]. 1-5 Credits.
Repeatable.

SPSY 508. Workshop: [Topic]. 1-21 Credits.
Repeatable.

SPSY 510. Experimental Course: [Topic]. 1-5 Credits.
Repeatable.

SPSY 601. Research: [Topic]. 1-16 Credits.
Repeatable.

SPSY 602. Supervised College Teaching. 1-5 Credits.
Repeatable.

SPSY 603. Dissertation. 1-16 Credits.
Repeatable.

SPSY 605. Reading and Conference: [Topic]. 1-16 Credits.
Repeatable.

SPSY 606. Practicum: [Topic]. 1-16 Credits.
Repeatable.

SPSY 607. Seminar: [Topic]. 1-5 Credits.
Repeatable.

SPSY 608. Workshop: [Topic]. 1-16 Credits.
Repeatable.

SPSY 609. Terminal Project. 1-12 Credits.
Repeatable.

SPSY 610. Experimental Course: [Topic]. 1-5 Credits.
Repeatable.

SPSY 617. Tests and Measurements in Education. 4 Credits.
Introduction to measurement. Provides a theoretical and practical basis for evaluating and using the wide range of test and measurement data in educational research.
Prereq: undergraduate statistics or educational psychology course or equivalent.

SPSY 626. Final Supervised Field Experience. 1-15 Credits.
Limited to students in school psychology program for basic endorsement for an Oregon license. Repeatable

SPSY 630. Introduction to Consultation. 3-4 Credits.
Provides students with basic knowledge and skills in the area of school-based consultation.

SPSY 631. Academic and Behavioral Interventions. 4 Credits.
The overall goal for this course is for students to demonstrate a solid understanding of the conceptual, theoretical, and empirical bases for school-based, multi-tiered systems of academic and behavior support.

SPSY 632. Advanced Consultation. 4 Credits.
Develops and refines competencies in school-based consultation, and provides opportunities for students to practice consultation skills.

SPSY 650. Developmental Psychopathology. 4 Credits.
Overview of developmental psychopathology, with emphasis on childhood, adolescence, and early adulthood. Covers phenomenology, etiology, development, classification systems, and prognosis of major psychological disorders.

SPSY 651. Cognitive-Affective Aspects of Behavior. 4-5 Credits.
Examination of cognitive and affective foundations of human behavior. Emphasis on reciprocal influences of cognition and emotion. Selected topics in attention, language, memory, thinking, reasoning. Offered alternate years.

SPSY 652. Biological Aspects of Behavior. 4-5 Credits.
Provides the appropriate background for students to meet biological psychology course work requirement for board licensure as a psychologist.

SPSY 661. Principles and Practices in School Psychology. 4 Credits.
Theory, role, and function of school psychology in its relation to learning and the school setting.

SPSY 662. Foundations of Clinical Supervision. 3 Credits.
Introduction to theory and practice of clinical supervision. Overview of supervision models, factors affecting the supervision relationship, supervision and evaluation techniques, legal and ethical considerations.

SPSY 663. Professional Ethics. 3 Credits.
Focuses on the study of current ethical standards of professional practice for school psychologists and behavior analysts.

SPSY 671. Behavioral Assessment. 4 Credits.
Principles, techniques, and conceptual and practical issues in behavioral assessment; applied aspects include data gathering and interpretation as well as report writing.

SPSY 672. Intellectual Assessment. 4 Credits.
Covers individual assessment of learning aptitude. Includes administering, scoring, and interpreting intelligence tests as well as report writing. Reviews theories of intelligence.

SPSY 674. Educational Assessment. 4 Credits.
Methods of educational assessment designed to develop and evaluate instructional interventions; topics include systematic observations, curriculum-based assessment, and teacher interviews.

SPSY 690. School Psychology Research Seminar: [Topic]. 1-4 Credits.
Students develop foundational knowledge and applied research skills through participation in a faculty-led research team. The focus of research activities will draw upon faculty expertise and current research.

SPSY 691. Supervised College Teaching. 2 Credits.

Students develop school psychology teaching and clinical supervision competencies through a faculty-supervised college teaching experience. Repeatable three times for a maximum of 8 credits.

Prereq: SPSY 662 Foundations of Clinical Supervision is a prerequisite course for any supervised college teaching experience involving the provision of clinical supervision to others. Students must apply for supervised college teaching experiences following procedures outlined in the current SPSY Program Handbook.

SPSY 692. Professional Competencies Portfolio. 1 Credit.

Students develop a professional competencies portfolio documenting the knowledge and skills needed for school psychologist licensure. The portfolio is the SPSY Master's Program capstone project, and reflects competencies acquired by the student across program coursework, field experiences, research teams, professional leadership and service activities.

SPSY 695. Introductory Field Studies. 1 Credit.

Students will gain exposure to educational practices in school systems, the roles and functions of school psychologists, and school psychological service delivery across domains of professional practice. Guest speakers will provide perspectives from educational researchers and school psychologists in the field.

SPSY 698. School-Based Practicum. 3 Credits.

Students complete a supervised practicum in which they deliver comprehensive school psychological services in PreK-12 school settings. Students develop the knowledge and skill competencies required to progress to internship. Repeatable twice for a maximum of 9 credits.

Prereq: SPED 528, SPED 540, SPSY 630, SPSY 661, SPSY 663, SPSY 671, SPSY 672, SPSY 674, SPSY 695.

SPSY 699. Internship. 3 Credits.

Students complete a supervised internship, in which they deliver comprehensive school psychological services in PreK-12 schools and/or clinical settings. Students develop the knowledge and skill competencies required for professional licensure. Repeatable three times for a maximum of 12 credits.

Prereq: SPSY 698.

SPSY 704. Internship: [Topic]. 1-15 Credits.

Repeatable.

SPSY 706. Practicum: [Topic]. 1-16 Credits.

Repeatable.

SPSY 709. Terminal Project. 1-16 Credits.

Repeatable.

Special Education Courses**SPED 198. Workshop: [Topic]. 1-2 Credits.**

Repeatable.

SPED 401. Research: [Topic]. 1-12 Credits.

Repeatable.

SPED 405. Reading and Conference: [Topic]. 1-21 Credits.

Repeatable.

SPED 406. Practicum: [Topic]. 1-12 Credits.

Repeatable.

SPED 407. Seminar: [Topic]. 1-5 Credits.

Repeatable. Topics include Collaborative Team, Introduction to Talented and Gifted, Introduction to Developmental Disabilities.

SPED 408. Workshop: [Topic]. 1-21 Credits.

Repeatable.

SPED 409. Terminal Project. 1-12 Credits.

Recent topics include Special Education, Talented and Gifted. Repeatable.

SPED 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

SPED 411. Foundations of Disability I. 3 Credits.

Categorical and cross-categorical survey of information about exceptional children and youths. Topics include history, etiology, identification, classification, legislation, alternate program delivery systems.

SPED 415. Diversity and Special Education. 3 Credits.

Provides an overview of issues pertaining to diversity in special education. Topics include race, ethnicity, culture, and disability in a sociopolitical and historical context.

SPED 420. Applied Experience in Special Education. 1 Credit.

This course is designed to provide practical experiences for students enrolled in the special education minor. Students engage with individuals with disabilities in early childhood settings, general or special education classrooms, or through community organizations.

SPED 422. Special Education Mathematics Instruction. 4 Credits.

Systematic instruction of mathematics skills for students with disabilities: assessment, planning, curriculum modification, diagnosis and remediation of persistent error patterns, evaluation.

SPED 426. Behavior and Classroom Management. 4 Credits.

Provides behavior management procedures for a variety of educational environments. Emphasizes functional assessment-based behavior support planning, classroom management, and principles of applied behavior analysis.

SPED 428. Special Education Law. 3 Credits.

This course provides students with knowledge of standards and ethics for professional practice, historical and current case law and legislation, and application of legal principles related to special education services in school settings.

SPED 431. Introduction to Learning Disabilities. 3 Credits.

Introduces major topics, issues, and trends in learning disabilities. Addresses the history, definitions, etiologies, theories, characteristics, instructional interventions, and service-delivery models.

SPED 432. Introduction to Behavioral Disorders. 3 Credits.

Introduces the characteristics and education of children and youth who have emotional and behavioral disorders.

Prereq: SPED 411.

SPED 436. Advanced Behavior and Classroom Management. 3 Credits.

Emphasizes functional assessment-based behavior support planning, individual education plans (IEPs), and effective behavior support systems for a variety of educational environments.

Prereq: SPED 426.

SPED 440. Early Literacy for Diverse Learners. 4 Credits.

Focuses on designing and evaluating instruction in the areas of reading and writing for preschool- to early elementary-aged students with disabilities. Sequence with SPED 441, SPED 442, SPED 443.

SPED 441. Intermediate Literacy for Diverse Learners. 4 Credits.

Focuses on designing and evaluating instruction in the areas of reading and writing for late elementary- to middle school-aged students with disabilities. Sequence with SPED 440, SPED 442, SPED 443.

Prereq: SPED 440.

SPED 442. Adolescent Literacy for Diverse Learners. 4 Credits.

Focuses on designing and evaluating instruction in the areas of reading and writing for middle school- and high school-aged students with disabilities. Sequence with SPED 440, SPED 441, SPED 443.
Prereq: SPED 441.

SPED 443. Supporting Students with Low-Incidence Disability. 4 Credits.

Provides skills on how to plan, coordinate, deliver, and evaluate evidence-based instruction for students with low-incidence disabilities. Sequence with SPED 440, SPED 441, SPED 442.
Prereq: SPED 442.

SPED 470. Principles of Applied Behavior Analysis. 5 Credits.

The purpose of this course is to provide students with opportunities to learn and master basic behavior principles as a foundation to subsequent advanced courses. Students will master and build fluency with the basic principles of applied behavior analysis.

SPED 471. Applied Behavior Analysis Assessment. 3 Credits.

This course provides opportunities to build fluency with the basic principles of applied behavior analysis and the application of these principles to conduct functional behavior assessments including experimental functional analyses to determine the maintaining reinforcers for behavior and to plan for behavior change interventions.

SPED 472. Behavior Change Group Settings. 3 Credits.

This course provides opportunities to build fluency with the basic principles of applied behavior analysis and the application of these principles to develop, implement, and evaluate programs of behavior change in educational settings with a focus on positive behavior interventions and supports.
Prereq: SPED 470.

SPED 473. Behavior Change Procedures 1. 3 Credits.

The purpose of this course is to provide students with an overview of applied behavior analysis based behavior change systems and procedures that will include designing and implementing interventions based on fundamental elements of behavior change.
Prereq: SPED 470, SPED 471.

SPED 488. Professional Practices: [Topic]. 1-3 Credits.

Helps students critically assess their fieldwork and integrate fieldwork and course work in the wider context of the school experience. Repeatable twice.
Coreq: SPED 406 or SPED 409.

SPED 503. Thesis. 1-9 Credits.

Repeatable.

SPED 507. Seminar: [Topic]. 1-5 Credits.

Repeatable. Topics include Collaborative Team, Introduction to Talented and Gifted, Introduction to Developmental Disabilities.

SPED 508. Workshop: [Topic]. 1-21 Credits.

Repeatable.

SPED 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

SPED 511. Foundations of Disability I. 3 Credits.

Categorical and cross-categorical survey of information about exceptional children and youths. Topics include history, etiology, identification, classification, legislation, alternate program delivery systems.

SPED 515. Diversity and Special Education. 3 Credits.

Provides an overview of issues pertaining to diversity in special education. Topics include race, ethnicity, culture, and disability in a sociopolitical and historical context.

SPED 522. Special Education Mathematics Instruction. 4 Credits.

Systematic instruction of mathematics skills for students with disabilities: assessment, planning, curriculum modification, diagnosis and remediation of persistent error patterns, evaluation.

SPED 526. Behavior and Classroom Management. 4 Credits.

Provides behavior management procedures for a variety of educational environments. Emphasizes functional assessment-based behavior support planning, classroom management, and principles of applied behavior analysis.

SPED 528. Special Education Law. 3 Credits.

This course provides students with knowledge of standards and ethics for professional practice, historical and current case law and legislation, and application of legal principles related to special education services in school settings.

SPED 531. Introduction to Learning Disabilities. 3 Credits.

Introduces major topics, issues, and trends in learning disabilities. Addresses the history, definitions, etiologies, theories, characteristics, instructional interventions, and service-delivery models.

SPED 532. Introduction to Behavioral Disorders. 3 Credits.

Introduces the characteristics and education of children and youth who have emotional and behavioral disorders.
Prereq: SPED 511.

SPED 536. Advanced Behavior and Classroom Management. 3 Credits.

Emphasizes functional assessment-based behavior support planning, individual education plans (IEPs), and effective behavior support systems for a variety of educational environments.
Prereq: SPED 526.

SPED 540. Early Literacy for Diverse Learners. 4 Credits.

Focuses on designing and evaluating instruction in the areas of reading and writing for preschool- to early elementary-aged students with disabilities. Sequence with SPED 541, SPED 542, SPED 543.

SPED 541. Intermediate Literacy for Diverse Learners. 4 Credits.

Focuses on designing and evaluating instruction in the areas of reading and writing for late elementary- to middle school-aged students with disabilities. Sequence with SPED 540, SPED 542, SPED 543.
Prereq: SPED 540.

SPED 542. Adolescent Literacy for Diverse Learners. 4 Credits.

Focuses on designing and evaluating instruction in the areas of reading and writing for middle school- and high school-aged students with disabilities. Sequence with SPED 540, SPED 541, SPED 543.
Prereq: SPED 541.

SPED 543. Supporting Students with Low-Incidence Disability. 4 Credits.

Provides skills on how to plan, coordinate, deliver, and evaluate evidence-based instruction for students with low-incidence disabilities. Sequence with SPED 540, SPED 541, SPED 542.
Prereq: SPED 542.

SPED 570. Principles of Applied Behavior Analysis. 5 Credits.

The purpose of this course is to provide students with opportunities to learn and master basic behavior principles as a foundation to subsequent advanced courses. Students will master and build fluency with the basic principles of applied behavior analysis.

SPED 571. Applied Behavior Analysis Assessment. 3 Credits.

This course provides opportunities to build fluency with the basic principles of applied behavior analysis and the application of these principles to conduct functional behavior assessments including experimental functional analyses to determine the maintaining reinforcers for behavior and to plan for behavior change interventions.

SPED 572. Behavior Change Group Settings. 3 Credits.

This course provides opportunities to build fluency with the basic principles of applied behavior analysis and the application of these principles to develop, implement, and evaluate programs of behavior change in educational settings with a focus on positive behavior interventions and supports.

Prereq: SPED 570.

SPED 573. Behavior Change Procedures 1. 3 Credits.

The purpose of this course is to provide students with an overview of applied behavior analysis based behavior change systems and procedures that will include designing and implementing interventions based on fundamental elements of behavior change.

Prereq: SPED 570, SPED 571.

SPED 588. Professional Practices: [Topic]. 1-3 Credits.

Helps students critically assess their fieldwork and integrate fieldwork and course work in the wider context of the school experience. Repeatable twice.

Coreq: SPED 606 or SPED 609.

SPED 601. Research: [Topic]. 1-6 Credits.

Repeatable.

SPED 602. Supervised College Teaching. 1-9 Credits.

Repeatable.

SPED 603. Dissertation. 1-16 Credits.

Repeatable.

SPED 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

SPED 606. Practicum: [Topic]. 1-16 Credits.

Repeatable.

SPED 607. Seminar: [Topic]. 1-5 Credits.

Repeatable. Recent topics include Advanced Applied Behavioral Analysis, Doctoral Orientation, Program Evaluation, Project Aim.

SPED 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

SPED 609. Terminal Project. 1-12 Credits.

Repeatable.

SPED 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

SPED 611. Early Intervention Practicum I. 3 Credits.

Supervised field experience activities provide the experiential counterpart to instructive coursework and are a special emphasis of the Early Intervention/Early Childhood Special Education training program.

SPED 612. Early Intervention Practicum II. 3 Credits.

Supervised field experience activities provide the experiential counterpart to instructive coursework and are a special emphasis of the Early Intervention/Early Childhood Special Education (EI/ECSE) training program.

Prereq: SPED 611.

SPED 622. History of Special Education and Disability. 3 Credits.

Historical context for contemporary issues in understanding and supporting the lives of people with disabilities and their families.

SPED 625. Final Supervised Field Experience. 1-15 Credits.

Repeatable.

SPED 626. Grant Writing. 1-3 Credits.

Provides structure and guidance in developing a grant proposal.

SPED 633. Transition Planning and Instruction I. 3 Credits.

Focuses on preparing youth for postsecondary education and training. Development of skills for using assessment-planning and content-instruction strategies to assist students with disabilities. Sequence with SPED 634.

SPED 634. Transition Planning and Instruction II. 3 Credits.

Focuses on strategies for improving employment and independent-living skills; using individualized assessment and planning strategies, curriculum and instructional strategies, and program delivery to assist students with disabilities. Sequence with SPED 633.

SPED 655. Student Teaching III K-12. 3-9 Credits.

Provides practical experience in teaching students with disabilities in a public-school setting under the direction of cooperating teachers and university supervisors. Repeatable up to seven times for a total of 24 credits.

SPED 656. Student Teaching K-12 Endorsement. 3 Credits.

This course provides field-based practice for licensed teachers adding a Special Education endorsement, giving them opportunities to apply knowledge of evidence-based practices in Special Education while teaching children/adults with disabilities. Students take SPED 588 concurrently.

SPED 657. Student Teaching Reading Endorsement. 3 Credits.

This course provides field-based practice in reading instruction for licensed teachers adding a Reading Intervention endorsement. It provides opportunities to apply evidence-based practices in reading to design, deliver, and improve reading instruction for all students, including English learners and those with reading difficulties and dyslexia.

SPED 660. Design of Instruction. 4 Credits.

Design, development, and evaluation of instructional materials for children with disabilities. Emphasis on analysis and construction of instructional sequences for various learning tasks.

SPED 670. Philosophy of Applied Behavior Analysis. 3 Credits.

Introduces students to the philosophical foundations of radical behaviorism, classic and contemporary readings in behavior analysis. Students will be prepared to understand theoretical approaches to understanding behavior, and to interpret behavior in terms of the concepts and principles of behavior analysis.

SPED 671. Experimental Research in Applied Behavior Analysis. 3 Credits.

This online graduate level course introduces students to the experimental analysis of behavior. This course will cover basic research with humans and non-human animals that explores behavior analytic principles and mechanisms of learning and behavior.

SPED 676. Ethics in Applied Behavior Analysis. 3 Credits.

This course focuses on the Behavioral Analyst Certification Board Professional and Ethical Compliance Code. It provides a basic knowledge of the Ethical Code as well as different problem-solving frameworks to evaluate difficult situations that may arise during their practice.

SPED 677. Single Case Research Design. 5 Credits.

This course focuses on basic and complex single-case experimental design strategies and general procedures, as well as on issues related to clinician-researchers conducting and analyzing single-case research in applied settings.

SPED 678. Behavior Change Procedures II. 3 Credits.

This course provides students with an overview of applied behavior analysis based behavior change systems and procedures that will include designing and implementing interventions based on fundamental elements of behavior change. Emphasis is on decreasing, eliminating, and replacing behavior that is challenging to the context.
Prereq: SPED 570, SPED 571, SPED 572, SPED 573.

SPED 679. Personnel Management. 3 Credits.

This course focuses on the Behavioral Analyst Certification Board (BACB) Professional and Ethical Compliance Code related to personnel management. Emphasis is consultation strategies that board certified behavior analysts use to liaison with medical professionals, parents and other family members, and trainees in applied behavior analysis.

SPED 680. Foundations in Early Childhood and Early Intervention. 3 Credits.

Conceptual underpinnings and practical application of an approach to early intervention that links assessment, intervention, and evaluation.

SPED 681. Early Intervention for Diverse Families. 3 Credits.

Covers procedures for family assessment, intervention, and evaluation. Addresses adult communication and management strategies.

SPED 682. Assessment and Evaluation. 3 Credits.

Presents assessment and evaluation materials used in early intervention programs and provides methods for using these materials.

SPED 683. Curriculum in Early Childhood and Early Intervention. 3 Credits.

Presents curricular materials covering development from birth to six years. Discusses procedures for use and modification.

SPED 686. Autism in Early Intervention. 2-3 Credits.

Information is given regarding the etiology of autism, diagnostic/evaluation procedures and current evidence-based strategies for supporting young children with autism spectrum disorder and their families.

SPED 687. Early Intervention Methods I. 1-3 Credits.

Provides practical information for conducting program-relevant assessments using curriculum-based assessment tools and for developing individualized family service plans.

SPED 688. Early Intervention Methods II. 3 Credits.

The Early Intervention/Early Childhood Special Education Individualized Family Service Plan, Individualized Education Program Methods II course is the second of three Methods courses to be taken by EI/ECSE students across the year.
Prereq: SPED 687.

SPED 691. Professional Practices in Early Intervention I. 1 Credit.

During this seminar students will focus on the structure and process of teaming within Early Intervention/Early Childhood Special Education systems. Additionally, students will participate in team meetings alongside their peers to reflect on and discuss issues related to their practicum experiences.
Prereq: Coreq: SPED 611.

SPED 692. Professional Practices in Early Intervention II. 1 Credit.

During this seminar students will focus on Early Intervention/Early Childhood Special Education practices related to transition, intervention planning, implementation of interventions, self-assessment and reflection of practices, and monitoring child progress.
Prereq: SPED 691; coreq: SPED 612.

SPED 693. Professional Practices in Early Intervention III. 1 Credit.

During this seminar students will focus on Early Intervention/Early Childhood Special Education practices related to student teaching. The purpose of Professional Practices III is to support students in having a positive and productive student teaching experience.
Prereq: SPED 692; coreq: SPED 625.

SPED 706. Practicum: [Topic]. 1-16 Credits.

Repeatable.

SPED 707. Seminar: [Topic]. 1-5 Credits.

Repeatable.

SPED 708. Workshop: [Topic]. 1-16 Credits.

Repeatable.

SPED 709. Terminal Project. 1-16 Credits.

Repeatable.

School of Journalism and Communication

Juan-Carlos Molleda, Dean

217 Allen Hall
1275 University of Oregon
Eugene, Oregon 97403-1275

The School of Journalism and Communication offers programs leading to bachelor's, master's, and doctoral degrees.

Undergraduate students major in the following: journalism, journalism: advertising, journalism: media studies, or journalism: public relations. The school also offers minors in media studies and science communication, and participates in four interdisciplinary programs: the major in cinema studies, the major in general social science, the certificate in film studies, and the minor in multimedia.

Master's degree majors are advertising and brand responsibility, journalism, communication and media studies, multimedia journalism, and strategic communication.

The doctoral program in communication and media studies develops scholars and teachers who can critically examine questions of communication and society from many perspectives.

The school, which started as a department in 1912 and became a professional school in 1916, is one of the oldest journalism schools in the United States and one of the most broadly conceived. It is accredited by the national Accrediting Council on Education in Journalism and Mass Communications.

The school's faculty members are scholars and researchers who combine academic background with professional experience in their teaching fields. Among them are copywriters, designers, and advertising agency executives; newspaper reporters and editors; public relations executives; broadcast journalists and documentarians; communication researchers; photojournalists; magazine writers and editors; Pulitzer Prize winners and Page Legacy Scholars; *New York Times* columnists; and award-winning researchers. The faculty's influence extends beyond the university campus through scholarly and professional publication, consulting, creative design, documentary filmmaking, radio and multimedia production, and textbooks and trade books in such areas as advertising, language skills, ethics, literary nonfiction, international public relations, information gathering, media criticism and history, reporting, visual communication, political communication, public relations writing, graphic arts, magazine writing, and public broadcasting.

The school's George S. Turnbull Portland Center at the White Stag Block offers a gateway to the state's media center. Academic programs include the Portland-based master's degree programs in multimedia journalism and strategic communication, public lectures, Internet programs, regional and national academic conferences, and professional development programs. Current information on the center's programs is available on the school's website (<http://journalism.uoregon.edu/>).

General Information

The School of Journalism and Communication occupies Eric W. Allen Hall, named in memory of the school's first dean. Allen Hall underwent a major renovation in 2012 that updated all facilities and added 18,000 square feet of space. Included in the renovation is an

open and collaborative digital commons that provides students with 24-hour access to the school's computer labs during academic terms. Fully equipped laboratories support writing, editing, design, video and audio, digital photography, mobile media, and web production. The school's Carolyn S. Chambers Electronic Media Center houses video and audio production facilities, and the Student Services Center supports academic-, internship-, and career-advising services for journalism and communication students. The atrium is filled with course-related activities, student meetings, and special events throughout the year. The school receives the newspaper services of the Associated Press. Knight Library, the main branch of the university's library system, houses an extensive collection of the literature of journalism and communication.

Diversity and Freedom of Expression

The goal of building greater social, political, cultural, economic, and intellectual diversity among students and members of the faculty and staff as well as in our curriculum, public scholarship, and communities is central to the school's mission: to prepare professional communicators, critical thinkers, and responsible citizens for a global society. The promotion and practice of freedom of expression and intellectual inquiry across an evolving media environment are integral to the school's long and proud tradition of academic excellence. Discrimination of any kind, disrespect for others, or inequity in educational opportunity are unacceptable.

Code of Conduct

Students enrolled in the School of Journalism and Communication as well as its faculty, staff, and administrators are expected to meet the highest standards of conduct as defined in the school and university codes of conduct and relevant professional codes of ethics. The school reserves the right to deny admission or graduation of a student found to be in violation of these codes.

Minor in Multimedia

Through the multimedia minor, undergraduates study print, time-based, and interactive digital arts; web programming, digital imaging, writing for multimedia, and digital audio and sound design. The interdisciplinary program spans the School of Art and Design, Department of Computer Science, School of Journalism and Communication, and the School of Music and Dance.

More information is available in the Minor in Multimedia section of this catalog under the Department of Art (p. 616).

Certificate in Film Studies

School of Journalism and Communication courses on media production and industries, film history, music, genres, and other topics emphasizing the aesthetic aspects of film may be applied to the requirements for the certificate in film studies.

More information is available in the Cinema Studies Program (p.) section of this catalog under the **College of Arts and Sciences**.

General Social Science Major

Courses from the School of Journalism and Communication and other professional schools can apply to the multidisciplinary major in general social science.

More information is available in the General Social Science Program (p. 268) section of this catalog under the **College of Arts and Sciences**.

Digital Technical Services

Students have access to technical support for computer issues at the help desk in 319 Allen Hall. In 113 Allen Hall, video and photo production equipment is available for checkout to students enrolled in designated courses in those areas.

The School of Journalism and Communication expects students to have regular and reliable access to a laptop computer. Instructors specify technology expectations on the first day of class, in the class syllabus, or both. Some instructors require a laptop for the entire class or just part of the class; some require that no laptops be present in class.

Scholarships

More than \$500,000 in scholarships, ranging from \$300 to \$10,000, are offered by the School of Journalism and Communication with the support of endowments and contributions. Applications are available on the school's website.

Undergraduate Student Services

Information about undergraduate admission and degree requirements, advising materials, sample programs, internships, and careers is available on the school's website. The office of the director of student services is in 134A Allen Hall.

Graduate Programs Manager

Information about graduate admission and degree requirements is available on the school's website. The office of the graduate programs manager is 134G Allen Hall.

Faculty

Jesse Abdenour, assistant professor (news processes and production, documentary, investigative journalism). BS, 1999, Ohio; MA, 2010, Arkansas; PhD, 2015, North Carolina. (2015)

Shan Anderson, senior instructor (advertising, digital publishing, visual design). BFA, 1991, Oregon. (2014)

Steven Asbury, instructor I (visual communications, design, advertising). BS, 1997, Oregon. (2014)

Thomas H. Bivins, John L. Hulteng Chair in Media Ethics and Responsibility; professor (communication ethics, communication history). BA, 1974, MFA, 1976, Alaska, Anchorage; PhD, 1982, Oregon. (1985)

Marquis E. Blaine, professor of practice (multimedia journalism, feature writing). BJ, 1993, Missouri, Columbia; MS, 2000, Oregon. (2003)

Mitchell Block, professor (documentary & film studies). BFA, 1972, NYU; MFA, 1973, NYU; MBA, 1974, Columbia. (2020)

Derek Brandow, instructor. (2018)

Charles Butler, instructor I (magazines, narrative nonfiction, sports journalism). BA, 1985, MS, 1999, Columbia. (2016)

Christopher Chávez, associate professor (advertising, popular culture, media studies and globalization). BS, 1993, California State Polytechnic, Pomona; MA, 1995, MA, 2006, PhD, 2009, Southern California. (2012)

Dayna Chatman, assistant professor (race, gender, and media; television studies; social media). BA, 2005, Saint Mary's College of California; MA, 2012, Illinois, Chicago; MA, 2013, PhD, 2016, Southern California. (2018)

Alexandra Segre Cohen, assistant professor (science communication -- environmental focus). BA, 2016, Clark University; PhD, 2022, Southern California. (2022)

Amanda Cote, assistant professor (media studies, identity, game studies). BA, 2010, Virginia; PhD, 2016, Michigan, Ann Arbor. (2018)

Nicole Smith Dahmen, associate professor (visual communication). BGS, 1997, MMC, 2001, Louisiana State; PhD, 2007, North Carolina, Chapel Hill. (2014)

Donna Davis, associate professor (strategic communication, public relations, virtual worlds); director, Strategic Communication Program. BA, 1981, MS, 2005, PhD, 2010, Florida. (2011)

Nicole (Nikki) Dunsire, instructor. (2021)

Andrew DeVigal, professor of practice (media innovation, community engagement, experience design); Chair in Journalism Innovation and Civic Engagement. BS, 1993, San Francisco. (2014)

Troy R. Elias, associate professor (advertising, race and ethnicity, information and communication technology); director, advertising. BS, 2004, Claflin; MA, 2006, PhD, 2009, Ohio State. (2014)

David Ewald, professor of practice (advertising, brand innovation); BS, 2001. (2019)

Maxwell Foxman, assistant professor (game studies, gamification, immersive media). BA, 2007, Columbia; MA, 2012, New York; MPhil, 2015, PhD, 2018, Columbia. (2018)

Torsten Kjellstrand, professor of practice (photojournalism, multimedia and visual journalism). BA, 1984, Carleton College; MA, 1997, Missouri, Columbia. (2013)

Kathryn Kuttis, instructor I (cultural and media studies, visual design, representation). BA, 1995, Drew; MLA, 2010, Oregon. (2014)

Peter D. Laufer, James N. Wallace Chair of Journalism: News-Editorial; professor (long-form journalism, radio journalism, international journalism). MA, 1986, American; PhD, 2009, Leeds Metropolitan. (2010)

Regina Lawrence, professor (political communication, civic engagement, journalism innovation); Associate Dean, George S. Turnbull Portland Center and Agora Journalism Center. MA, Colorado, 1996; PhD, Washington, 1996. (2015)

Taeho Lee, assistant professor (strategic communication, communication ethics, media law). BA, 2005, Seoul National; JD, 2009, Emory; PhD, 2017, North Carolina, Chapel Hill. (2017)

Seth C. Lewis, Shirley Papé Chair in Emerging Media; professor; director, journalism. BS, 2002, Brigham Young; MBA, 2005, Barry; PhD, 2010, Texas, Austin. (2016)

Ed Madison, associate professor (multimedia journalism, digital publishing, media entrepreneurship). BS, 1979, Emerson College; PhD, 2012, Oregon. (2012)

David Markowitz, assistant professor (language, deception, computational social science). BSc, 2010, MSc, 2015, Cornell; PhD, 2018, Stanford. (2018)

Gabriela Martinez, professor (electronic media, international communication, Latin American studies); director, Journalism Master's Program. BA, 1999, MA, 2000, San Francisco State; PhD, 2005, Oregon. (2005)

Kelli I. Matthews, senior instructor (public relations, strategic communication, social media). BA, 2001, MA, 2004, Oregon. (2011)

Tom McDonnell, professor of practice (advertising). BS, 1982, Oregon. (2014)

Todd Milbourn, senior instructor I (investigative reporting, journalism innovation, news literacy). BA, 2001, Minnesota, Minneapolis; MBA, 2014, Oregon. (2016)

Daniel L. Miller, associate professor (video production, documentary film and video). BS, 1983, MS, 1986, PhD, 1994, Oregon. (2001)

Juan-Carlos Molleda, professor; Edwin L. Artzt Dean. BS, 1990, Zulia; MS, 1997, Radford; PhD, 2000, South Carolina. (2016)

Daniel D. "Dan" Morrison, senior instructor (photojournalism, multimedia and visual journalism). BA, 1984, MPA, 1994, Texas, Austin. (2010)

Deborah K. Morrison, associate dean for undergraduate affairs; Carolyn Silva Chambers Distinguished Professor in Advertising (advertising and brand creativity, creative process, social responsibility). BA, 1978, Sam Houston State; MA, 1984, PhD, 1988, Texas, Austin. (2006)

Dean E. Mundy, associate professor (public relations, media framing); director, public relations. BA, 1996, MA, 2006, PhD, 2010, North Carolina, Chapel Hill. (2014)

Courtney Munther, senior instructor I (nonprofit communication, fundraising, strategic public relations writing). BA, 2004, Smith; MA, 2012, Nebraska, Lincoln. (2014)

Seungahn Nah, professor (political communication, journalism sociology, global communication); associate dean, graduate affairs. BA, 1997, MA, 1999, Yonsei; PhD, 2006, Wisconsin, Madison. (2017)

Bryce Newell, assistant professor (media studies, media law and policy); BS, 2006; JD, 2010, UC Davis; PhD, 2015, University of Washington. (2019)

Julianne H. Newton, professor (visual communication, photojournalism, communication ethics). BA, 1970, Baylor; MA, 1983, PhD, 1991, Texas, Austin. (2000)

Sylvester Senyo Ofori-Parku, professor of practice (consumer insights and strategy, corporate sustainability, consumer behavior). BA, 2003, Cape Coast; MA, 2010, Ghana; PhD, 2015, Oregon. (2017)

Sung J. Park, senior instructor (photojournalism, multimedia journalism). BS, 1991, MFA, 2010, Syracuse. (2010)

Ellen Peters, professor (Philip H. Knight Chair of Science Communication and director of the science and communication research [SCR]); BS/BSE, 1989; MS, 1994, University of Oregon; PhD, 1998, University of Oregon. (2019)

Lisa Peyton, instructor. (2021)

Whitney Phillips, assistant professor (digital platforms and ethics). BA, 2004, Humboldt State; MFA, 2007, Emerson College; PhD, 2012, University of Oregon (2022)

Danny Pimentel, assistant professor (immersive media psychology). BS, Florida; MS, Florida International, 2014; PhD, 2020, Florida. (2020)

Donnalyn Pompper, professor (public relations, corporate social responsibility, critical race and feminist studies). BA, 1983, Rowan; MJ, 1994, PhD, 2001, Temple. (2017)

Wes Pope, associate professor (multimedia journalism). BA, 1996, Washington (Seattle); MA, 2010, Syracuse. (2012)

Damian Radcliffe, Carolyn S. Chambers Professor in Journalism; professor of practice (community journalism, trends in social media and technology, media business models). BA, 1998, MA, 2009, Oxford. (2015)

Biswarup "Bish" Sen, associate professor (communication studies, global media, television studies). BA, 1975, St. Xavier's College, Kolkata; MA, 1982, Ohio State; PhD, 1990, Illinois, Urbana-Champaign. (2010)

Autumn Shafer, associate professor (health communication, communication campaign testing and evaluation, media psychology). BA, 2000, MA, 2003, Washington State; PhD, 2011, North Carolina, Chapel Hill. (2015)

Lori Shontz, senior instructor (writing and reporting, sports journalism, community engagement). BS, 1991, MEd 2013, Pennsylvania State. (2014)

Hollie Smith, assistant professor (science and environmental communication); associate director science and communication research (SCR). BS, 2007, Southern Utah; MA, 2010, Washington State; PhD, 2014, Maine. (2018)

Gretchen Soderlund, associate professor (media history, gender and media); director, media studies. BA, 1993, Virginia Commonwealth; PhD, 2002, Illinois, Urbana-Champaign. (2013)

H. Leslie Steeves, professor (diversity and media, development communication and social change); senior associate dean, academic affairs. BS, 1971, Vermont; MS, 1974, PhD, 1980, Wisconsin, Madison. (1987)

Paul Swangard, instructor. (2019)

Brent Walth, assistant professor (journalism). BS, 1984, Oregon; MFA, 2012, Warren Wilson College. (2007)

Janet Wasko, Philip H. Knight Chair; professor (communication studies, political economy of communication); director, media studies. BA, 1973, MA, 1974, California State; PhD, 1980, Illinois. (1986)

Henry Wear, assistant professor (public relations, sports communication); BS, 2008; MS, 2014, University of Kansas; PhD, 2017, University of South Carolina. (2019)

Kyu Ho Youm, Jonathan Marshall First Amendment Chair; professor (communication law, international law, news-editorial). BA, 1980, Konkuk; MA, 1982, PhD, 1985, Southern Illinois; MSL, 1998, Yale; MSt, 2006, Oxford. (2002)

Will Yurman, instructor (digital video news/broad cast production). BA, 1983, State University of New York, Albany. (2022)

Emeriti

Patricia A. Curtin, professor (international public relations, research methods, culture and identity). AB, 1977, Earlham College; MA, 1991, PhD, 1996, Georgia. (2006)

Rebecca G. Force, professor emerita. BA, 1968, Vassar College. (1996)

Charles F. Frazer, professor emeritus. AB, 1968, Rutgers; MA, 1972, Fairfield; PhD, 1976, Illinois. (1990)

Timothy W. Gleason, professor (communication ethics, communication law, news-editorial). BA, 1980, State University of New York, Empire State; MA, 1983, PhD, 1986, Washington (Seattle). (1987)

Lauren J. Kessler, professor emerita. BSJ, 1971, Northwestern; MS, 1975, Oregon; PhD, 1980, Washington (Seattle). (1980)

David Koranda, professor of practice (advertising campaigns, media planning, strategic planning). BA, 1970, Wilkes; BS, 1978, Oregon. (2001)

Scott R. Maier, professor (investigative journalism, computer-assisted reporting, quantitative methods); director, journalism area. BA, 1977, Oberlin; MA, 1989, Southern California; PhD, 2000, North Carolina, Chapel Hill. (2000)

Ann C. Maxwell, associate professor emerita. BA, 1973, MA, 1975, California State, Fullerton; PhD, 2008, Pacifica Graduate Institute. (1986)

Duncan L. McDonald, professor emeritus. BS, 1966, Ohio; MS, 1972, Oregon. (1975)

Debra L. Merskin, professor (communication studies; gender, race, and media; media and society). BA, 1983, South Florida, Tampa; MLA, 1989, South Florida, St. Petersburg; PhD, 1993, Syracuse. (1993)

Karl J. Nestvold, professor emeritus. BS, 1954, Wyoming; MS, 1960, Oregon; PhD, 1972, Texas, Austin. (1961)

Jon Palfreman, professor emeritus. BS, 1971, University College, London; MS, 1972, Sussex; PhD, 2005, Glamorgan. (2006)

Stephen E. Ponder, associate professor emeritus. B.A., 1964, Washington (Seattle); MA, 1975, George Washington; PhD, 1985, Washington (Seattle). (1985)

Deanna M. Robinson, professor emerita. BA, 1964, MA, 1972, PhD, 1974, Oregon. (1976)

John T. Russial, associate professor (news-editorial, organizational change, technology studies). BA, 1973, Lehigh; MA, 1975, Syracuse; PhD, 1989, Temple. (1992)

William E. Ryan II, associate professor emeritus. BA, 1964, Loras; MA, 1975, EdD, 1991, South Dakota. (1987)

Kim Sheehan, professor (advertising, consumer research and behavior, sustainability communication); coordinator, Honors Program. BS, 1980, Northwestern; MBA, 1993, Boston University; PhD, 1998, Tennessee, Knoxville. (1998)

Ronald E. Sherriffs, professor emeritus. BA, 1955, MA, 1957, San Jose State; PhD, 1964, Southern California. (1965)

James R. Upshaw, professor emeritus. BA, 1962, San Diego State. (1992)

William B. Willingham, associate professor emeritus. AB, 1957, MA, 1963, Indiana. (1965)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Journalism

The University of Oregon undergraduate program is based on the premise that the best professional communicator is broadly educated. In accordance with national accrediting standards, students must take at least 104 credits in courses outside the School of Journalism and Communication. A maximum of 76 credits in the 180-credit undergraduate program may be in journalism and communication courses. Students learn about media practice and effects. They study the role of the media in society, the history of journalism, visual communication, the ethics of media practices, the economics of the media, new media technologies, international communication, diversity in the media, and the legal and social responsibilities of the media.

- Bachelor of Arts
- Bachelor of Science

Undergraduate Studies

The role of the school's undergraduate program is to provide students with the creative, critical, and problem-solving skills they need to become ethical, professional communicators and critical media consumers.

Premajor Admission

New students planning to major in journalism enter the university as premajors and do not need to meet special admission requirements beyond the general university requirements.

Each premajor is assigned to a journalism and communication advisor who assists in planning programs, answering questions, and tracking progress toward admission as a major and toward graduation. Students should check with an advisor at least once a year to ensure that requirements are being met. In addition, students will be assigned a faculty advisor, who will guide them through the portfolio process. The director of student services for the school supervises undergraduate academic advising.

A university student in another major may switch to a journalism premajor online on the School of Journalism and Communication website. To become a premajor, a student must have a minimum cumulative grade point average (GPA) of 2.00 for all work at the University of Oregon.

Premajor Program

Students must complete the school's premajor core curriculum, and earn grades of C or better:

Code	Title	Credits
J 100	Media Professions	2
J 101	Grammar for Communicators	2

J 201	Media and Society	4
Total Credits		8

Admission as a Major

Admission to the School of Journalism and Communication is competitive. The faculty considers applications from premajor students who have

- completed 24 or more graded credits of course work at the University of Oregon, earning a cumulative UO GPA of at least 2.90
- completed College Composition I (WR 121) and College Composition II (WR 122) or College Composition III (WR 123) with grades of P or C– or better
- completed the school's premajor core curriculum

A student's GPA is a major factor in the admissions decision. Students with a GPA of 3.25 or higher are guaranteed admission to the major.

Applicants with grade point averages between 2.90 and 3.24 are evaluated and judged competitively by an admissions committee as applications are received. The admissions committee considers the requirements listed above and other materials that applicants submit, including a personal statement, letters of recommendation, and a portfolio. Students with a GPA below 2.90 may petition the committee for admission. The committee has the option of waiving any of the requirements listed above if evidence of a candidate's high potential for success in the major is presented and approved.

Transfer Students

Students transferring to the University of Oregon School of Journalism and Communication enter as premajors. They apply to the University of Oregon Office of Admissions and are accepted as premajors if they meet the university's general standards for admission. To be admitted to major status, transfer students must meet the school's requirements for admission as a major (p. 743).

Transfer Credit

The School of Journalism and Communication accepts journalism credits earned at other colleges and universities as follows:

1. Credits earned at schools of journalism accredited by the Accrediting Council on Education in Journalism and Mass Communications are accepted for journalism credit and may fulfill specific course requirements
2. Journalism credits may be accepted from unaccredited journalism programs, but they may not be used to meet specific course requirements. They do count toward the 76-credit limit set by national accrediting standards
3. Regardless of the number of credits transferred, students must take at least 27 credits of journalism in residence to earn a degree from the University of Oregon
4. Students may not take more than 76 credits in journalism courses out of the 180 total credits required for a bachelor's degree. They may, however, add credits to the 180-credit total to accommodate extra journalism credits (e.g., take 186 credits to accommodate as many as 82 credits in journalism)
5. The school accepts equivalent courses taught at other colleges to meet the Media and Society (J 201) requirement for application to be a major, and may accept equivalent courses to meet other core

requirements if approved by the associate dean for undergraduate affairs

Transfer students who want to discuss the transfer policy may consult the associate dean, director of student services, or the advisors in the Student Services Center.

The school offers course work leading to bachelor of arts (BA) and bachelor of science (BS) degrees. Major requirements are the same for each. Differences between the two degrees are explained under Requirements for Bachelor of Arts and Bachelor of Science in the **Bachelor's Degree Requirements** section of this catalog.

J 404	Internship: [Topic]	
J 408	Workshop: [Topic] ¹	
J 409	Terminal Project	
J 463	Specialized Reporting: [Topic]	
J 469	OR Magazine	
J 475	Flux Production	

And any additional concentration course not previously taken

Elective: At least four journalism credits are needed to reach the minimum 72 4

General Studies Requirements 104

At least 104 non-journalism credits, including one of the following:

A non-SOJC minor	
A non-SOJC concentration ²	
A non-SOJC double major	
Minimum 2.9 cumulative UO GPA	

Total Credits 176

¹ Only J408 workshops intended for journalism majors will be eligible. J408 workshops intended for media studies, advertising and public relations majors are not suitable for this section.

² A non-SOJC concentration is at least 24 credits from the same non-SOJC subject code. 12 must be upper division credits and 4 of those 12 must be a 400-level course. All courses must be taken graded and passed with a C- or better. Not all subjects are suitable for a concentration; consult an SOJC advisor.

J 408	Workshop: [Topic] ¹
J 409	Terminal Project
J 463	Specialized Reporting: [Topic] (different topic than selected above)
J 469	OR Magazine
J 475	Flux Production

And any additional concentration course not previously taken

Elective: At least four journalism credits are needed to reach the minimum 72 4

General Studies Requirements 104

At least 104 non-journalism credits, including one of the following:

A non-SOJC minor	
A non-SOJC concentration ²	
A non-SOJC double major	

Total Credits 176

¹ Only J408 workshops intended for journalism majors will be eligible. J408 workshops intended for media studies, advertising and public relations majors are not suitable for this section.

² A non-SOJC concentration is at least 24 credits from the same non-SOJC subject code. 12 must be upper division credits and 4 of those 12 must be a 400-level course. All courses must be taken graded and passed with a C- or better. Not all subjects are suitable for a concentration; consult an SOJC advisor.

Additional Requirements

- Satisfactory completion of a minimum of 72 credits and a maximum of 76 credits in journalism, of which at least 27 must be taken at the University of Oregon School of Journalism and Communication and at least 40 must be upper division
- Satisfactory completion of at least 104 credits in academic fields other than journalism. A student who graduates with 180 credits must count no more than 76 credits (including transfer credits) in journalism toward the degree
- Students must take a minimum of 40 upper-division credits in journalism, including prerequisites

- Majors and premajors must take all school courses for letter grades unless a course is only offered pass/no pass (P/N). All graded journalism courses taken to satisfy the major must be passed with a grade of mid-C or better
- A cumulative GPA of 2.70 or better in courses taken in the School of Journalism and Communication at the time of graduation

Internship

A major may earn no more than 9 credits in Internship: [Topic] (J 404).

Honors Program

Departmental or program honors shall be available to all qualified students. Departments and programs must maintain accessible, transparent and accurate information about their honors program in the University Catalog. This information may also be published on department or program websites.

The honors program provides high-achieving students the opportunity to develop analytic, creative, critical thinking and research skills in small-group, discussion-oriented courses. The program develops a small multidisciplinary community of communications scholars from all the majors within the School of Journalism and Communication.

Students take three honors courses focusing on media theory, research, or issues, which partially fulfill the context course requirement. In addition, students complete an original piece of scholarship or creative work in the senior year.

The program targets journalism majors entering their junior year who have a minimum 3.50 cumulative UO GPA. Applications are accepted each spring for the following year's cohort. Clark Honors College students are eligible to apply. More information is available on the school's website.

Second Bachelor's Degree

Students who already have a bachelor's degree and want to earn a second bachelor's degree in the School of Journalism and Communication may apply for premajor status through the university's Office of Admissions. Upon fulfilling the requirements for application for admission, they may apply for major status. Students must complete the university requirements for the BA or BS. Credits, including transfer credits, earned for the first bachelor's degree may count toward meeting the requirements as long as they conform to the transfer-credit policy outlined previously.

J 448	Advertising Campaigns	
J 449	Advanced Advertising Campaigns	
Elective: At least four journalism credits are needed to reach the minimum 72		4
General Studies Requirements		
At least 104 non-journalism credits, including one of the following:		104
A non-SOJC minor		
A non-SOJC concentration ¹		
A non-SOJC double major		
*Completion of UO's writing composition requirement (WR 121 and either WR 122 or WR 123). Students in the Clark Honors College are exempt.		
Minimum 2.90 cumulative UO GPA		
Total Credits		176

¹ A non-SOJC concentration is at least 24 credits from the same non-SOJC subject code. 12 must be upper division credits and 4 of those 12 must be a 400-level course. All courses must be taken graded and passed with a C- or better. Not all subjects are suitable for a concentration; consult an SOJC advisor.

Additional Requirements

- Satisfactory completion of a minimum of 60 credits and a maximum of 76 credits in journalism, of which at least 27 must be taken at the University of Oregon School of Journalism and Communication and at least 40 must be upper division
- Satisfactory completion of at least 104 credits in academic fields other than journalism. A student who graduates with 180 credits must count no more than 76 credits (including transfer credits) in journalism toward the degree
- Majors and premajors must take all school courses for letter grades unless a course is only offered pass/no pass (P/N). All graded

journalism courses taken to satisfy the major must be passed with a grade of mid-C or better

- A cumulative GPA of 2.70 or better in courses taken in the School of Journalism and Communication at the time of graduation

Four-Year Degree Plan

Requirements for the School of Journalism and Communication are complex, and students are strongly encouraged to consult with an advisor in the school's Student Services Center to ensure accurate interpretation of requirements and timely degree completion. For more information on student services and academic requirements, visit the website (<http://journalism.uoregon.edu/students/undergrad/academic-requirements/>).

- **Master of Arts in Journalism**
- **Master of Science in Journalism**
- **Master's Degree in Advertising and Brand Responsibility**
- **Master's Degree in Multimedia Journalism**

Graduate Studies

The master's of arts (MA) and master's of science (MS) programs at the University of Oregon School of Journalism and Communication seek to expose students to a wide range of ideas concerning the structure, function, and role of the media in society.

The professional journalism master's program offers a twelve- to fifteen-month program designed for those holding bachelor's degrees but who have little or no academic or professional journalistic or media background. Graduate students in this program acquire professional skills.

The master's program in advertising and brand responsibility is a one-year graduate program designed to prepare students to guide strong brands in areas such as sustainability, privacy and data protection, social justice, and diversity.

The Portland-based multimedia journalism master's program, offered evenings and weekends, is designed to prepare experienced journalists with the skills needed for multimedia storytelling and for the entrepreneurial imperatives of the contemporary media business environment.

The Portland-based strategic communication master's program, offered evenings and weekends, provides advanced conceptual and tactical skills for working professionals in industries such as public relations, advertising, marketing communication, and corporate communication.

Information about and applications for graduate programs are available on the School of Journalism and Communication website.

Financial Assistance

The school provides a number of graduate scholarships and graduate employee (GE) opportunities. Graduate employees assist faculty members with teaching, research, and administrative responsibilities. Please note that GE positions are only open to communication and media studies students.

International Students

A firm mastery of English, including American mass-communication idiom, is necessary for success at the graduate level. International students who lack such mastery are required to attend courses at the American English Institute on campus before participating in the graduate

program. Though these courses do not carry graduate credit, they qualify to meet students' visa requirements. The best time to enroll in the institute's courses is the summer session preceding the first term in the graduate program.

Admission Requirements

Admission to the graduate program is granted for fall term for communication and media studies, multimedia journalism, and strategic communication; summer session for the Eugene-based professional master's degree in journalism. Application materials are the same for the master's and the doctoral programs. Applicants to the master's programs must have received a BS or BA or equivalent prior to the first term of enrollment; applicants to the doctoral program must have received an MA or MS or equivalent. To be considered for admission, an applicant must submit the following:

1. Official transcripts from all institutions where undergraduate and graduate work was completed. The minimum undergraduate GPA for admission is 3.00. In exceptional cases, an applicant with a lower GPA may be admitted conditionally
2. *Optional*: Official Graduate Record Examination (GRE) scores no more than five years old
3. A 750- to 1,000-word essay describing the applicant's academic and career goals
4. An up-to-date résumé or curriculum vitae
5. A portfolio, string book, clips, or other evidence of relevant professional work or evidence of scholarly writing and research. Doctoral applicants may include a copy of a master's thesis
6. Three letters of recommendation—preferably two from academic sources
7. International students must also submit documentation for either a Test of English as a Foreign Language (TOEFL) score of 100 or better or an International English Language Testing System (IELTS) score of 7 or better.

Application deadlines

- Doctoral program: January 1
- Communication and Media studies master's degree: February 1
- Admission to the graduate program is granted for fall term (summer session for professional master's program students in the Eugene-based journalism *only*; designate summer session as the start date on your application for admission)

Advising

An advisor is appointed for each graduate student in the school by the program director.

Course programs for graduate students are planned individually in consultation with advisors. Graduate students should meet with their advisors at least once a term.

Requirements for Graduation

A graduate student in the School of Journalism and Communication cannot elect the pass/no pass (P/N) option for a graduate course offered by the school unless that course is offered P/N only.

Master's Degree in Journalism

The Eugene-based Journalism master's program is geared toward students of all backgrounds. It serves students who've worked

professionally and are looking to expand their skills as well as students who are new to the field. No previous journalistic experience is required for admission.

Master's Degree in Advertising and Brand Responsibility

This Eugene-based program leads to a master of arts or master of science degree in advertising and brand responsibility. This one-year, full-time program operates on the idea that successful brands in the 21st century must be authentic and committed to the common good and the benefit of society. Diverse brands such as Nike, Patagonia, Cheerios, and Yoplait have successfully addressed social issues while building brand equity by recognizing the power of persuasive communication in making the world a better place.

Course work examines the theory and practice of persuasive communication and brand responsibility; students participate in a three-term seminar that trains students in best practices in planning, brand management, and creative marketing. The course of study concludes with a professional project in which students develop a campaign, a research paper, or some other effort on brand responsibility under the guidance of an advisor.

Applicants should have an interest in the field and some background, either professional or academic, in advertising, public relations, marketing, or strategic communication.

Candidates for this degree must earn at least 46 credits with a cumulative GPA of 3.00 or better. Courses that do not carry graduate credit are not included in the GPA.

See the School of Journalism and Communication website for more detailed and up-to-date information about application requirements, the curriculum, and final project options.

Master's Degree Requirements

Code	Title	Credits
J 557	Curiosity for Strategists	4
J 560	Brand Development: [Topic] (Advertising and Culture)	4

Total Credits		46

¹ Yearlong course.

² Electives include courses in green brand strategy, writing design concepts, quantitative and qualitative methods, "ideasmithing," interactive media, and courses taught as part of the strategic communication master's program such as Introduction to Strategic Communication Marketing (J 616), Strategic Communication Management (J 618), or Strategic Communication: [Topic] (J 624).

Additional Requirements

A master of arts degree requires second-year foreign language proficiency. See the Division of Graduate Studies website for details.

Master's Degree in Multimedia Journalism

This program is based at the School of Journalism and Communication's George S. Turnbull Portland Center and leads to a master of arts or master of science degree in multimedia journalism. Offered evenings

and weekends, it is designed to prepare journalists with the skills needed for multimedia storytelling and for the entrepreneurial imperatives of the contemporary media business environment.

Contemporary journalists must have the fundamental skills and values of the field as well as the ability to tell stories across multiple distribution channels (emerging digital platforms as well as print and broadcast) and to understand the business environment of the new and constantly evolving media world. Tomorrow's journalist must be both collaborative and independent—comfortable working both inside and outside of traditional organizational structures.

The program consists of a core of required 4-credit journalism and communication courses complemented by 2-credit, shorter-term workshop courses and graduate-level course work in an approved area of content outside of journalism and multimedia. The course of study concludes with a professional project that allows the student to report and produce a professional-quality multimedia project under the guidance of an advisor. To prepare for the project, students take a minimum of four terms (including one required summer session course).

Successful applicants typically have professional experience as well as strong academic credentials. Candidates for this MA or MS degree must earn at least 48 credits with a cumulative GPA of 3.00 or better. Courses that do not carry graduate credit are not included in the GPA.

See the School of Journalism and Communication website for more detailed and up-to-date information about application requirements, the curriculum, and final project options.

Master's Degree Requirements

Code	Title	Credits
J 596	Communication Ethics and Law: [Topic]	4

J 608	Workshop: [Topic] ¹	2
J 609	Terminal Project	6
Other courses chosen in consultation with advisor		20
Electives ²		8
Total Credits		48

¹ Students must complete at least one professional development workshop. We encourage students to take additional workshops for a more enriching experience. Workshops vary from term to term and may include topics such as Visualizing Information; Audio Storytelling; Story in Stills; and Innovation, Science, and Story.

² Students may take elective courses from a variety of disciplines. Electives should be chosen in consultation with your adviser. At least 8 elective credits are required.

Additional Requirements

A master of arts degree requires second-year foreign language proficiency. See the Division of Graduate Studies website for details.

Courses

J 100. Media Professions. 2 Credits.

Introduction to dynamic media and communication professions, opportunities, and issues, as well as to majors in journalism and communication.

J 101. Grammar for Communicators. 2 Credits.

Intensive review of grammar, word use, spelling, and principles of clear, concise writing. Introduction to media style. Premajor status required.

J 196. Field Studies: [Topic]. 1-2 Credits.

Repeatable.

J 198. Workshop: [Topic]. 1-12 Credits.

Repeatable.

J 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

J 201. Media and Society. 4 Credits.

Introduction to the critical examination of the roles of media in society.

J 208. Introduction to Documentary Production. 4 Credits.

Introduction to the theory and practice of documentary production. Focuses on aesthetics, technology, research, and writing fundamentals of documentary making, covering preproduction, production and postproduction. Cinema studies majors only.

Prereq: J 201, CINE 260M or ENG 260M; two from CINE 265, CINE 266, CINE 267.

J 211. Gateway to Media. 8 Credits.

Integrates critical thinking, creative thinking, and basic skills for nonfiction storytelling through words, photos, audio, and video. Majors only.

Prereq: J 100, J 101, J 201, and either CHC enrollment or completion of the WR requirement.

J 212. Writing for Communicators. 4 Credits.

Course builds on what was learned in Grammar for Communicators course (J 101) to help students develop the ability to write for a variety of professional platforms and to achieve the appropriate strategic purpose. Prereq: J 100, J 101, J 201, and either CHC enrollment or completion of the WR requirement.

J 213. Fact or Fiction. 4 Credits.

This course helps students grapple with information in the digital age to evaluate how media professionals develop notions of truth, ethics, and transparency. It covers information credibility, social media algorithms, and data and numerical literacy.

Prereq: J 100, J 101, J 201, and either CHC enrollment or completion of the WR requirement.

J 250. Media Studies Production. 2 Credits.

This course complements an understanding of production skills and practice from Gateway to Media by adding critical and cultural theory. By examining the relationship between theory and practice, students gain deeper knowledge of how production practices impact cultural and society.

Prereq: J 211.

J 299. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

J 314. Introduction to Media Studies. 4 Credits.

Presents a historical overview of the study of media, with in-depth discussion of primary theoretical approaches and their application to the current media environment. Majors only.

Prereq: J 201 with a grade better than C-.

J 315H. Honors Media Theory and Research. 4 Credits.

Foundation course for honors program. Introduction to seminal theories in communication; overview of methodologies used in the study of theories. Acceptance into School of Journalism and Communication honors program required for enrollment.

J 320. Gender, Media, and Diversity. 4 Credits.

Critical study of the media with regard to gender, race, ethnicity, and other social divisions. Ramification and possible mechanisms of change. Prereq: J 201 with a grade better than C-.

J 331. Digital Video Production. 4 Credits.

Introduction to techniques of single-camera field video production. Journalism and cinema studies majors only.

Prereq: (J 205 and J 206) or J 208 or J 211 with a grade better than C-.

J 333. Writing for Multimedia. 4 Credits.

Introduction to the process and practice of writing for multimedia, including print, audio-video, computer-assisted presentation, web-based applications, and striking the balance between word and image. Journalism majors or multimedia minor standing only.

Prereq: ARTD 250, ARTD 251, ARTD 252.

J 340. Principles of Advertising. 4 Credits.

Role of advertising in the distribution of goods and services; the advertising agency; the campaign; research and testing; the selection of media: print, electronic, outdoor advertising, direct mailing. Not for journalism: advertising majors.

J 342. The Creative Strategist. 4 Credits.

Creative approaches to ideation and strategic thinking for all advertising industry specialties. Emphasis on creative process, generative techniques, teamwork, career planning, industry trends. Journalism: advertising majors only.

Prereq: J 211, J 212 with a grade better than C-.

J 350. Principles of Public Relations. 4 Credits.

Overview of public relations practice in a diverse global society, including theory, career opportunities, history, communication forms and channels, and legal and ethical concerns.

J 352. Strategic Writing and Media Relations. 4 Credits.

Writing-intensive lab; students produce strategic, theory-based content for multiple media platforms using various journalistic styles and storytelling skills and incorporating ethical media-relations practices.

Prereq: J 211, J 212, J 213, J 350 with a grade of better than C-.

J 361. Reporting I. 4 Credits.

News gathering and writing. Extensive writing in class and outside of class in a variety of forms: news, features, interviews, multimedia scripts. Journalism majors only.

Prereq: (J 205 and J 206) or J 211 with a grade better than C-.

J 365. Photojournalism. 4 Credits.

Visual reporting techniques, with emphasis on practice, law, and ethics of photojournalism and photographic communication. Laboratory and portfolio-intensive. Majors only.

Prereq: (J 205 and J 206) or J 211 with a grade better than C-.

J 371. Feature Writing I. 4 Credits.

Introduction to feature writing for print and online media; marketing your ideas and stories. Journalism majors only.

Prereq: J 361 with a grade better than C-.

J 377. Science of Science Communication. 4 Credits.

In this class students will delve deeper into the theoretical foundations of science communication as a discipline. Students will develop an understanding of the different models of science communication, their benefits, drawbacks, and current use in a variety of contexts.

Prereq: We recommend two area satisfying courses in the sciences.

J 385. Communication Law. 4 Credits.

Legal aspects of the media: constitutional freedom of expression, news gathering, access to public records, libel, privacy, copyright, advertising, electronic media regulation, and antitrust.

Prereq: J 201 with a grade better than C-.

J 387. Media History. 4 Credits.

The changing structure and character of the media in the United States.

Prereq: J 201 with a grade better than C-.

J 396. International Communication. 4 Credits.

National and cultural differences in media and information systems, global news and information flows, implications of rapid technological change, and communication and information policies.

Prereq: J 201 with a grade better than C-

J 397. Media Ethics. 4 Credits.

Ethical problems in the media: privacy, violence, pornography, truth-telling, objectivity, media codes, public interest, media accountability.

Prereq: J 201 with a grade better than C-.

J 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

J 400M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

J 401. Research: [Topic]. 1-9 Credits.

Repeatable.

J 403. Thesis. 1-9 Credits.

Repeatable.

J 404. Internship: [Topic]. 1-9 Credits.

Repeatable for maximum of 9 credits.

J 405. Special Problems: [Topic]. 1-12 Credits.

Repeatable.

J 406. Practicum: [Topic]. 1-12 Credits.

Repeatable.

J 407. Seminar: [Topic]. 1-4 Credits.

Repeatable.

J 408. Workshop: [Topic]. 1-6 Credits.

Repeatable.

J 409. Terminal Project. 1-12 Credits.

Repeatable.

J 410. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

J 411M. US Film Industry. 4 Credits.

Traces the past and present of the U.S. film industry, examining key moments in the development of Hollywood, including the consolidation and restructuring of the major movie studios, the film industry's relationship to TV and the Internet. Journalism Majors and MEST minor.

Prereq: J 201 with a grade better than C-.

J 412. Issues in Communication Studies: [Topic]. 4 Credits.

Uses a variety of theories and methods to examine specific aspects of media content, processes, and audiences. Majors only. Repeatable three times for a maximum of 16 credits when topic changes.

Prereq: J 201 with a grade better than C-.

J 413. Communication Studies Capstone. 4 Credits.

Draws on skills and knowledge learned in other communications studies and related courses to demonstrate competence in broad areas of research.

Prereq: J 211, J 212, J 213, J 314 with a grade better than C-.

J 415. Media Studies Research Methods. 4 Credits.

This course provides the core skills necessary to critically evaluate scientific and analytic studies and conduct research in the media studies tradition. Students learn basic principles of media studies research methods, such as experiments, surveys, naturalistic observations, and interviews.

Prereq: J 201, J 314.

J 416. Survey of the Documentary. 4 Credits.

Historical and critical survey of the documentary as a form of artistic expression and an instrument of social commentary. Majors, cinema studies majors, and media studies minors only.

Prereq: J 201 with a grade better than C-.

J 420. Documentary Pre-Production. 4 Credits.

Students learn to research, plan, budget for, and develop a documentary film idea. They gain experience shooting a sizzle and pitching projects to potential producers. Several documentary forms will be explored, including portraits, ethnographies, interviews, personal stories, processes and events, and re-enactments.

Prereq: J 208.

J 421. Documentary Production. 4 Credits.

Get experience shooting a short documentary worthy of broadcast screening, film festival exhibition, or another venue.

Prereq: For SOJC students J 208 and J 420 with a grade better than C-.

For CINE students: J 208 and permission of the instructor.

J 422. Documentary Post-Production. 4 Credits.

Trains students with to edit and do post-production work on their documentary film projects.

Prereq: J 208, J 420, J 421.

J 424H. Honors Theory and Research: [Topic]. 4 Credits.

Uses a variety of theories and methods to closely examine and analyze contemporary problems and situations in media and communications.

Acceptance into School of Journalism and Communication honors program required for enrollment. Repeatable once when topic changes for a maximum of 8 credits.

J 427M. Latino Roots I. 4 Credits.

Documents Latino history in the racial history of what is now Oregon since 1500 and teaches students to conduct oral history interviews.

Multilisted with ANTH 427M. Sequence with J 428M. Offered alternate years.

J 428M. Latino Roots II. 4 Credits.

Continuation of Latino Roots I, designed for producing a short documentary using oral history as the story. Covers basic theory and practice of digital film-video documentary production. Multilisted with ANTH 428M. Sequence with J 427M. Offered alternate years.

Prereq: J 427M.

J 429. Media Technologies and Society: [Topic]. 4 Credits.

Explores the interrelationship between media technologies and social practices and processes in current and historical contexts. Majors and minors only. Repeatable three times for a maximum of 16 credits when topic changes. Open to MEST minors.

Prereq: J 201 with a grade better than C-.

J 430. Culture and Power in the Media: [Topic]. 4 Credits.

Explores issues of culture, identity, and power, including the role media play in reinforcing social, political, and economic disparities. Majors and minors only. Repeatable three times for a maximum of 16 credits when topic changes.

Prereq: J 201 with a grade better than C-.

J 431. Media Structures and Regulation: [Topic]. 4 Credits.

Explores how the infrastructures and regulatory environments of national and global media institutions influence discourse, democracy, and public life. Majors and MEST minors only. Repeatable three times for a maximum of 16 credits when topic changes.

Prereq: J 201 with a grade better than C-.

J 432. Reporting for Electronic Media. 4 Credits.

Training in gathering, production, and presentation of news for the electronic media. Journalism majors only.

Prereq: J 331, J 361 with a grade better than C-.

J 434. Advanced Television News. 4 Credits.

News gathering and production for television. Students produce live programming for local cable systems. Journalism majors only.

Prereq: J 331, J 361, J 432 with a grade better than C-.

J 436. Media Design: [Topic]. 4 Credits.

Focuses on issues and techniques in picture and graphic editing, typography, and work-picture composition and interaction for long-form visual storytelling across legacy- and emerging-media platforms. Repeatable twice for a maximum of 12 credits.

Prereq: J 361 with a grade better than C-.

J 443. Advertising Media Planning. 4 Credits.

Objectives and strategy for determining effective methods of reaching a designated target audience. Use of media measurement tools.

Journalism: advertising majors only.

Prereq: J 207, J 342 with a grade better than C-.

J 444. Agency Account Management. 4 Credits.

The role of the account executive in the advertising agency examined through case studies. Journalism: advertising majors only.

Prereq: J 211 and J 342 with a grade better than C-.

J 448. Advertising Campaigns. 4 Credits.

Seniors produce a comprehensive campaign involving every aspect of advertising, ranging from market research through creative and media strategy formulation to execution. Journalism: advertising majors only.

Prereq: three from J 443, J 444, J 457, J 458, J 459, J 460 with a grade better than C-.

J 449. Advanced Advertising Campaigns. 5 Credits.

Team experience of creating a professional-level advertising plan. Students participate in a national competition. Journalism: advertising majors only.

J 452. Strategic Public Relations Communication. 4 Credits.

Advanced writing lab emphasizing business communication, direct-to-consumer strategies and techniques, and effective use of web-based communication strategies. Journalism: public relations majors only.

Prereq: J 352 with a grade better than C-.

J 453. Strategic Planning and Cases. 4 Credits.

Campaign planning, administration, crisis communication, and issues management, encompassing research, writing objectives and tactics, evaluation methods, and constructing budgets and timelines. Journalism: public relations majors only.

Prereq: J 352 with a grade better than C-.

J 454. Public Relations Campaigns. 4 Credits.

Capstone course applying theory, skills, and a team-based approach to researching, planning, presenting, and implementing a campaign for a client. Professional portfolios presented and reviewed. Journalism: public relations majors only.

Prereq: J 452, J 453; J 494 with a grade better than C-.

J 457. Curiosity for Strategists. 4 Credits.

Explores the building of intellectual curiosity as a problem-solving technique within the context of culture and media. Emphasis: critical thinking, readings, projects, performance. Journalism: advertising majors only.

Prereq: J 211 and J 342 with a grade better than C-.

J 458. Writing Design Concepts. 4 Credits.

Conceptual problem-solving for traditional and emerging media. Emphasis: conceptual development, advertising writing, design, campaigns, presentation of developed work. Journalism: advertising majors only.

Prereq: J 211 and J 342 with a grade better than C-.

J 459. Branding and Content. 4 Credits.

Capstone course on brand portfolio development for writers, art directors, and strategists. Emphasis: production, multiple-platform creative development, industry-focused portfolios. For Journalism: advertising majors only.

Prereq: J 205, J 206, J 207, J 342 with a grade better than C-.

J 460. Brand Development: [Topic]. 4 Credits.

Revolving topics on emerging issues in branding and advertising, including strategies in digital and interactive brand solutions, media decision-making, and sustainability. Journalism: advertising majors only. Repeatable three times for a maximum of 16 credits when topic changes.

Prereq: J 205 and J 206 and J 342, or J 211 and J 342, with a grade better than C-.

J 461. Newspaper Editing. 4 Credits.

Copyediting, headline writing, and page design for newspapers in print and online; emphasis on grammar and style. Journalism majors only.

Prereq: J 361 or equivalent with a grade better than C-.

J 462. Reporting II. 4 Credits.

In-depth reporting on public affairs and community news. Journalism majors only.

Prereq: J 361 with a grade better than C-.

J 463. Specialized Reporting: [Topic]. 1-4 Credits.

Reporting special topics, including the environment, business and economics, politics, health and medicine, science, and the arts; and digital and multiplatform journalism. Journalism majors only. Repeatable.

Prereq: J 361 with a grade better than C-.

J 466. Advanced Photojournalism: [Topic]. 4 Credits.

Intensive visual reporting techniques, with emphasis on digital production, color, lighting, in-depth storytelling, documentary, and portfolio. Majors only. Repeatable three times for a maximum of 16 credits when topic changes.

Prereq: J 365 with a grade better than C-.

J 467. Issues in International Communication: [Topic]. 4 Credits.

Topics focus on global media issues. Majors and minors only; cinema studies majors for approved topics. Repeatable twice for a maximum of 12 credits when topic changes.

Prereq: J 201 with a grade better than C-.

J 468. Advanced News Editing. 4 Credits.

Advanced training in news editing under newsroom conditions. Discussion of issues in editing, headline writing, and news judgment. Includes work with web-based journalism. Focus on teamwork. Journalism majors only.

Prereq: J 461 with a grade better than C-.

J 469. OR Magazine. 4 Credits.

Building skills in journalistic storytelling and multimedia production of a digital magazine for distribution via mobile devices. Repeatable once for a maximum of 8 credits.

J 472. Feature Writing II. 4 Credits.

In-depth story research and advanced feature writing for print and online markets. Individual conferences. Journalism majors only.

Prereq: J 361, J 371 with a grade better than C-.

J 475. Flux Production. 1-5 Credits.

Planning and production of "Flux" magazine. Students make and carry out assignments, write and edit stories, take photos, shoot video, sell advertising, and design the magazine. Repeatable for a maximum of 12 credits.

Prereq: J 211, J 212, J 213, J 331, J 361 with a grade better than C-.

J 477. Topics in Science of Science Communication: [Topic]. 4 Credits.

This course dives deeply into issues related to the science of science communication, including more advanced exploration of health communication, decision making, numeracy, and environmental communication. Students will focus on developing research projects in consultation with the instructor. Repeatable twice for a maximum of 12 credits when topic changes.

Prereq: J 377.

J 478. Producing the Science Story: [Topic]. 4 Credits.

This course focuses on producing stories about science for a variety of media. Students will incorporate research from the science of science communication in crafting story strategies for specific audiences.

Additional focus will be on innovative storytelling strategies for complicated subjects using journalistic practice. Repeatable twice for a maximum of 12 credits when topic changes.

Prereq: J 377.

J 480. Public Relations: [Topic]. 4 Credits.

Addresses a specific theory, method, or issue in the study and practice of public relations, such as international practice or strategic use of new media. Repeatable thrice when topic changes for a maximum of 16 credits.

J 483. The Journalistic Interview. 4 Credits.

Gathering information through asking questions. Literature and research findings on techniques of listening, nonverbal communication, and psychological dynamics of the interview relationship in journalistic situations. Journalism majors only.

Prereq: J 361 with a grade better than C-.

J 489. Media Entrepreneurship. 4 Credits.

Media Entrepreneurship introduces students from journalism and communication-based fields to the fundamentals of the entrepreneurship and innovation, and gives them an opportunity to conceive, develop and test original media business ideas.

Prereq: SOJC undergrads: Media studies: J 314 with a grade better than C-; Journalism: J 361 with a grade better than C-; Advertising: J 342 with a grade better than C-; Public relations: J 352 with a grade better than C-.

J 494. Strategic Communications Research. 4 Credits.

Introduction to how and why research is conducted and used by public relations and advertising professionals to formulate strategic campaigns and evaluate their effectiveness. Majors only.

Prereq: J 342 or J 350.

J 495. Research Methods: [Topic]. 4 Credits.

Uses a variety of quantitative and qualitative methods to examine concepts and processes of research used in such areas as advertising, public relations, journalism, strategic communication, and communication studies. Majors and minors only. Repeatable when topic changes for a maximum of 12 credits.

Prereq: J 201 with a grade better than C-.

J 496. Communication Ethics and Law: [Topic]. 4 Credits.

Analyses of ethical and legal issues confronting the communications industry using various ethical and legal theories, readings, and cases relevant to the specific topic. Majors and minors only. Repeatable once for a maximum of 8 credits when topic changes.

Prereq: J 201 with a grade better than C-.

J 500M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

J 503. Thesis. 1-9 Credits.

Repeatable.

J 507. Seminar: [Topic]. 1-4 Credits.

Repeatable.

J 508. Workshop: [Topic]. 1-6 Credits.

Repeatable.

J 510. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

J 511M. US Film Industry. 4 Credits.

Traces the past and present of the U.S. film industry. Multilisted with CINE 511M.

J 512. Issues in Communication Studies: [Topic]. 4 Credits.

Uses a variety of theories and methods to examine specific aspects of media content, processes, and audiences. Majors only. Repeatable three times for a maximum of 16 credits when topic changes.

J 516. Survey of the Documentary. 4 Credits.

Historical and critical survey of the documentary as a form of artistic expression and an instrument of social commentary. Majors, cinema studies majors, and media studies minors only.

J 520. Documentary Pre-Production. 4 Credits.

Students learn to research, plan, budget for, and develop a documentary film idea. They gain experience shooting a sizzle and pitching projects to potential producers. Several documentary forms will be explored, including portraits, ethnographies, interviews, personal stories, processes and events, and re-enactments.

J 521. Documentary Production. 4 Credits.

Get experience shooting a short documentary worthy of broadcast screening, film festival exhibition, or another venue.

J 522. Documentary Post-Production. 4 Credits.

Trains students with to edit and do post-production work on their documentary film projects.

J 527M. Latino Roots I. 4 Credits.

Documents Latino history in the racial history of what is now Oregon since 1500 and teaches students to conduct oral history interviews. Multilisted with ANTH 527M. Sequence with J 528M. Offered alternate years.

J 528M. Latino Roots II. 4 Credits.

Continuation of Latino Roots I, designed for producing a short documentary using oral history as the story. Covers basic theory and practice of digital film-video documentary production. Multilisted with ANTH ANTH 528M. Sequence with J 527M. Offered alternate years. Prereq: J 527M.

J 529. Media Technologies and Society: [Topic]. 1-4 Credits.

Explores the interrelationship between media technologies and social practices and processes in current and historical contexts. Majors and minors only. Repeatable three times for a maximum of 16 credits when topic changes. Open to MEST minors.

J 530. Culture and Power in the Media: [Topic]. 4 Credits.

Explores issues of culture, identity, and power, including the role media play in reinforcing social, political, and economic disparities. Majors and minors only. Repeatable three times for a maximum of 16 credits when topic changes.

J 531. Media Structures and Regulation: [Topic]. 4 Credits.

Explores how the infrastructures and regulatory environments of national and global media institutions influence discourse, democracy, and public life. Majors and MEST minors only. Repeatable three times for a maximum of 16 credits when topic changes.

J 532. Reporting for Electronic Media. 4 Credits.

Training in gathering, production, and presentation of news for the electronic media. Journalism majors only.

J 534. Advanced Television News. 4 Credits.

News gathering and production for television. Students produce live programming for local cable systems. Journalism majors only. Prereq: J 532 with a grade of mid-C or better.

J 536. Media Design: [Topic]. 4 Credits.

Focuses on issues and techniques in picture and graphic editing, typography, and work-picture composition and interaction for long-form visual storytelling across legacy- and emerging-media platforms. Repeatable twice for a maximum of 12 credits.

J 543. Advertising Media Planning. 4 Credits.

Objectives and strategy for determining effective methods of reaching a designated target audience. Use of media measurement tools. Journalism: advertising majors only.

J 544. Agency Account Management. 4 Credits.

The role of the account executive in the advertising agency examined through case studies. Journalism: advertising majors only.

J 548. Advertising Campaigns. 4 Credits.

Graduate students produce a comprehensive campaign involving every aspect of advertising, ranging from market research through creative and media strategy formulation to execution. Journalism: advertising majors only.

Prereq: three from J 543, J 544, J 556, J 557, J 558, J 559, J 560.

J 549. Advanced Advertising Campaigns. 5 Credits.

Team experience of creating a professional-level advertising plan. Students participate in a national competition. Journalism: advertising majors only.

J 552. Strategic Public Relations Communication. 4 Credits.

Advanced writing lab emphasizing business communication, direct-to-consumer strategies and techniques, and effective use of web-based communication strategies. Journalism: public relations majors only.

J 553. Strategic Planning and Cases. 4 Credits.

Campaign planning, administration, crisis communication, and issues management, encompassing research, writing objectives and tactics, evaluation methods, and constructing budgets and timelines. Journalism: public relations majors only.

J 554. Public Relations Campaigns. 4 Credits.

Capstone course applying theory, skills, and a team-based approach to researching, planning, presenting, and implementing a campaign for a client. Professional portfolios presented and reviewed. Journalism: public relations majors only.

Prereq: J 552, J 553; one from J 594, J 595.

J 557. Curiosity for Strategists. 4 Credits.

Explores the building of intellectual curiosity as a problem-solving technique within the context of culture and media. Emphasis: critical thinking, readings, projects, performance. Journalism: advertising majors only.

J 558. Writing Design Concepts. 4 Credits.

Conceptual problem-solving for traditional and emerging media. Emphasis: conceptual development, advertising writing, design, campaigns, presentation of developed work. Journalism: advertising majors only.

J 559. Branding and Content. 4 Credits.

Capstone course on brand portfolio development for writers, art directors, and strategists. Emphasis: production, multiple-platform creative development, industry-focused portfolios. Journalism: advertising majors only.

J 560. Brand Development: [Topic]. 4 Credits.

Revolving topics on emerging issues in branding and advertising, including strategies in digital and interactive brand solutions, media decision-making, and sustainability. Journalism: advertising majors only. Repeatable three times for a maximum of 16 credits when topic changes.

J 561. Newspaper Editing. 4 Credits.

Copyediting, headline writing, and page design for newspapers in print and online; emphasis on grammar and style. Journalism majors only.

J 562. Reporting II. 4 Credits.

In-depth reporting on public affairs and community news. Journalism majors only.

J 563. Specialized Reporting: [Topic]. 1-4 Credits.

Reporting special topics, including the environment, business and economics, politics, health and medicine, science, and the arts; and digital and multiplatform journalism. Journalism majors only. Repeatable.

J 566. Advanced Photojournalism: [Topic]. 4 Credits.

Intensive visual reporting techniques, with emphasis on digital production, color, lighting, in-depth storytelling, documentary, and portfolio. Majors only. Repeatable three times for a maximum of 16 credits when topic changes.

J 567. Issues in International Communication: [Topic]. 4 Credits.

Topics focus on global media issues. Majors only. Repeatable twice for a maximum of 12 credits when topic changes.

J 568. Advanced News Editing. 4 Credits.

Advanced training in news editing under newsroom conditions. Discussion of issues in editing, headline writing, and news judgment. Includes work with web-based journalism. Focus on teamwork. Journalism majors only.

Prereq: J 561 with a grade of mid-C or better.

J 569. OR Magazine. 4 Credits.

Building skills in journalistic storytelling and multimedia production of a digital magazine for distribution via mobile devices. Repeatable once for a maximum of 8 credits.

J 572. Feature Writing II. 4 Credits.

In-depth story research and advanced feature writing for print and online markets. Individual conferences. Journalism majors only.

J 575. Flux Production. 1-5 Credits.

Repeatable. Planning and production of "Flux" magazine. Students make and carry out assignments, write and edit stories, take photos, shoot video, sell advertising, and design the magazine. Repeatable for a maximum of 12 credits.

J 577. Topics in Science of Science Communication: [Topic]. 4 Credits.

This course dives deeply into issues related to the science of science communication, including more advanced exploration of health communication, decision making, numeracy, and environmental communication. Students will focus on developing research projects in consultation with the instructor. Repeatable twice for a maximum of 12 hours when topic changes.

J 578. Producing the Science Story: [Topic]. 4 Credits.

This course focuses on producing stories about science for a variety of media. Students will incorporate research from the science of science communication in crafting story strategies for specific audiences. Additional focus will be on innovative storytelling strategies for complicated subjects using journalistic practice. Repeatable twice for a maximum of 12 credits when topic changes.

J 580. Public Relations: [Topic]. 4 Credits.

Addresses a specific theory, method, or issue in the study and practice of public relations, such as international practice or strategic use of new media. Repeatable thrice when topic changes for a maximum of 16 credits.

J 583. The Journalistic Interview. 4 Credits.

Gathering information through asking questions. Literature and research findings on techniques of listening, nonverbal communication, and psychological dynamics of the interview relationship in journalistic situations. Journalism majors only.

J 589. Media Entrepreneurship. 4 Credits.

Media Entrepreneurship introduces students from journalism and communication-based fields to the fundamentals of the entrepreneurship and innovation, and gives them an opportunity to conceive, develop and test original media business ideas.

J 594. Strategic Communications Research. 4 Credits.

Introduction to how and why research is conducted and used by public relations and advertising professionals to formulate strategic campaigns and evaluate their effectiveness. Majors only.

J 595. Research Methods: [Topic]. 4 Credits.

Uses a variety of quantitative and qualitative methods to examine concepts and processes of research used in such areas as advertising, public relations, journalism, strategic communication, and communication studies. Journalism majors only. Repeatable when topic changes for a maximum of 12 credits.

J 596. Communication Ethics and Law: [Topic]. 4 Credits.

Analyses of ethical and legal issues confronting the communications industry using various ethical and legal theories, readings, and cases relevant to the specific topic. Majors only. Repeatable once for a maximum of 8 credits when topic changes.

J 601. Research: [Topic]. 1-6 Credits.

Repeatable for maximum of 16 credits.

J 602. Supervised College Teaching. 1-5 Credits.

Repeatable for maximum of 5 credits.

J 603. Dissertation. 1-16 Credits.

Course may be repeated 25 times for credit after the initial instance.

J 604. Internship: [Topic]. 1-6 Credits.

Repeatable for maximum of 12 credits.

J 605. Special Problems: [Topic]. 1-12 Credits.

Repeatable.

J 606. Practicum: [Topic]. 1-6 Credits.

Repeatable for maximum of 16 credits.

J 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

J 608. Workshop: [Topic]. 1-6 Credits.

Repeatable for maximum of 16 credits.

J 609. Terminal Project. 1-6 Credits.

Repeatable for maximum of 6 credits.

J 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

J 611. Mass Communication and Society. 4 Credits.

Review of the literature of mass communication. Introduction to graduate study in journalism and communication.

J 612. Media Theory I. 5 Credits.

First in a three-part sequence introducing students to media theory, focusing on the social scientific tradition. Sequence with J 613, J 614.

J 613. Media Theory II. 5 Credits.

Second in a three-part sequence introducing students to media theory, focusing on critical approaches. Sequence with J 612, J 614. Prereq: J 612.

J 614. Media Theory III. 5 Credits.

Third in a three-part sequence introducing students to media theory, focusing on contemporary theoretical perspectives. Prereq: J 613.

J 616. Introduction to Strategic Communication Marketing. 4 Credits.

Discussion of fundamental marketing concepts from the perspective of the manager. Analysis of complex marketing challenges in research, segmentation, targeting, pricing, distribution, and branding.

J 617. Strategic Communication Theory and Research: [Topic]. 4 Credits.

Theory, research, and practice of strategic communication. Topics may include relationship management, risk communication, identity and culture, and social media theory. Repeatable when topic changes for a maximum of 20 credits.

Prereq: graduate standing.

J 618. Strategic Communication Management. 4 Credits.

Elements of managing and leading organizations; examination of key issues faced by leaders. Topics include leadership theory, leading change, dealing with conflict, and performance and strategic management.

J 619. Teaching and the Professional Life. 4 Credits.

Explores teaching strategies, curriculum development, and other aspects of academic professional life in journalism and communication.

J 621. Foundations of Strategic Communication. 4 Credits.

Reviews major theories, models, and practices in strategic communications. Theoretical topics include media effects and persuasion as applied to public relations, advertising, and other strategic communication.

J 623. Creativity in Strategic Communication. 4 Credits.

Explores the use of creative conceptual thinking as part of the strategic basis in successful communication campaigns.

J 624. Strategic Communication: [Topic]. 2 Credits.

Explores problems and specialized skills needed in strategic communication management. Examples include crisis communication, creativity in business, corporate social responsibility. Repeatable up to five times with change in topic.

J 627. Foundations of Multimedia Journalism. 4 Credits.

Serves as a foundation of theory and technique, with an introduction to storytelling forms, technical production skills, and the visual language. Students will learn how to use the tools of the trade so that they can communicate effectively with other multimedia journalists.

J 628. Multimedia Journalism Practices. 4 Credits.

Building on the J 627 course, students create a narrative video project that focuses on visual storytelling, character development, and present-tense storytelling.

J 629. Media and Communication Ethics: [Topic]. 4 Credits.

This course explores ethical issues facing media workers and media users in culture and society today. Topics may include digital ethics, strategic communication ethics, visual ethics and global media ethics.

J 635. Thinking Story. 4 Credits.

Recognize and use fundamental approaches to narrative storytelling to create dynamic and engaging multimedia projects.

J 639. Foundations of Explanatory Video Journalism. 4 Credits.

Students explore and practice concepts in visual explanation and explanatory video.

J 641. Qualitative Research Methods. 4 Credits.

Introduces qualitative research methods including traditional historical inquiry, oral history, ethnography, and participant observation.

J 642. Quantitative Research Methods. 4 Credits.

Introduces and analyzes quantitative research methods in terms of design, measurement, inference, and validity. Focuses on conceptualization in communication research.

J 643. Advanced Doctoral Seminar. 5 Credits.

Seminar participants demonstrate competence in broad families of social research by drawing on skills and knowledge obtained in J 612, J 613, J 614, J 641, and J 642.

Prereq: J 612, J 613, J 614, J 641, J 642.

J 644. Philosophy of Communication. 4 Credits.

Explores the philosophical foundations of communication in the United States, including political philosophies that range from Milton to McLuhan.

J 646. Political Economy of Communication. 4 Credits.

Introduction to the political economy of communication. Includes such issues as ownership and control patterns; the role of the state; labor; intellectual property rights; and international markets.

J 648. Cultural Approaches to Communication. 4 Credits.

Examination of communication and mediated communication as cultural processes in the production and reproduction of social systems.

J 649. International Communication. 4 Credits.

Examines global communication structures and processes and their consequences. Topics include new technologies, news and information organizations, cross-cultural uses of Western media, and information policies.

J 654. Reporting within Communities. 4 Credits.

Students explore and practice emerging "community-first" concepts of journalism and reporting to identify the needs of the communities served, codesigning processes and solutions to keep them engaged.

J 656. Producing the Story. 4 Credits.

Students work collaboratively to create a compelling, ethical work of journalism with impact, applying all aspects of community engagement, reporting, storytelling, and production skills learned in previous terms.

J 660. Advanced Research Methods: [Topic]. 4 Credits.

Explores specific qualitative or quantitative communication research methods. Topics may include discourse analysis, oral history, historical methods, legal methods, content analysis, and survey methods. Repeatable when topic changes.

Prereq: J 641 or J 642, depending on topic.

J 663. Foundations of Strategic Sport Communication. 4 Credits.

Presents and reviews major theories, models, and practices in sports communication. Theoretical topics include sports media effects and persuasion as applied to broadcast, public relations, advertising, and other strategic communication. Cultural, societal and industry relevance also discussed.

Journalism: Media Studies

The University of Oregon undergraduate program is based on the premise that the best professional communicator is broadly educated. In accordance with national accrediting standards, students must take at least 104 credits in courses outside the School of Journalism and Communication. A maximum of 76 credits in the 180-credit undergraduate program may be in journalism and communication courses. Students learn about media practice and effects. They study the role of the media in society, the history of journalism, visual communication, the ethics of media practices, the economics of the media, new media technologies, international communication, diversity in the media, and the legal and social responsibilities of the media.

- Bachelor of Arts
- Bachelor of Science

Undergraduate Studies

The role of the school's undergraduate program is to provide students with the creative, critical, and problem-solving skills they need to become ethical, professional communicators and critical media consumers.

Premajor Admission

New students planning to major in journalism enter the university as premajors and do not need to meet special admission requirements beyond the general university requirements.

Each premajor is assigned to a journalism and communication advisor who assists in planning programs, answering questions, and tracking progress toward admission as a major and toward graduation. Students should check with an advisor at least once a year to ensure that requirements are being met. In addition, students will be assigned a faculty advisor, who will guide them through the portfolio process. The

director of student services for the school supervises undergraduate academic advising.

A university student in another major may switch to a journalism premajor online on the School of Journalism and Communication website. To become a premajor, a student must have a minimum cumulative grade point average (GPA) of 2.00 for all work at the University of Oregon.

Premajor Program

Students must complete the school's premajor core curriculum, and earn grades of C or better:

Code	Title	Credits
J 100	Media Professions	2
J 101	Grammar for Communicators	2
J 201	Media and Society	4
Total Credits		8

Admission as a Major

Admission to the School of Journalism and Communication is competitive. The faculty considers applications from premajor students who have

- completed 24 or more graded credits of course work at the University of Oregon, earning a cumulative UO GPA of at least 2.90
- completed College Composition I (WR 121) and College Composition II (WR 122) or College Composition III (WR 123) with grades of P or C- or better
- completed the school's premajor core curriculum

A student's GPA is a major factor in the admissions decision. Students with a GPA of 3.25 or higher are guaranteed admission to the major.

Applicants with grade point averages between 2.90 and 3.24 are evaluated and judged competitively by an admissions committee as applications are received. The admissions committee considers the requirements listed above and other materials that applicants submit, including a personal statement, letters of recommendation, and a portfolio. Students with a GPA below 2.90 may petition the committee for admission. The committee has the option of waiving any of the requirements listed above if evidence of a candidate's high potential for success in the major is presented and approved.

Transfer Students

Students transferring to the University of Oregon School of Journalism and Communication enter as premajors. They apply to the University of Oregon Office of Admissions and are accepted as premajors if they meet the university's general standards for admission. To be admitted to major status, transfer students must meet the school's requirements for admission as a major (p. 756).

Transfer Credit

The School of Journalism and Communication accepts journalism credits earned at other colleges and universities as follows:

1. Credits earned at schools of journalism accredited by the Accrediting Council on Education in Journalism and Mass Communications are accepted for journalism credit and may fulfill specific course requirements
2. Journalism credits may be accepted from unaccredited journalism programs, but they may not be used to meet specific course

requirements. They do count toward the 76-credit limit set by national accrediting standards

3. Regardless of the number of credits transferred, students must take at least 27 credits of journalism in residence to earn a degree from the University of Oregon
4. Students may not take more than 76 credits in journalism courses out of the 180 total credits required for a bachelor's degree. They may, however, add credits to the 180-credit total to accommodate extra journalism credits (e.g., take 186 credits to accommodate as many as 82 credits in journalism)
5. The school accepts equivalent courses taught at other colleges to meet the Media and Society (J 201) requirement for application to be a major, and may accept equivalent courses to meet other core requirements if approved by the associate dean for undergraduate affairs

Transfer students who want to discuss the transfer policy may consult the associate dean, director of student services, or the advisors in the Student Services Center.

The school offers course work leading to bachelor of arts (BA) and bachelor of science (BS) degrees. Major requirements are the same for each. Differences between the two degrees are explained under Requirements for Bachelor of Arts and Bachelor of Science in the **Bachelor's Degree Requirements** section of this catalog.

Additional Requirements

- Satisfactory completion of a minimum of 72 credits and a maximum of 76 credits in journalism, of which at least 27 must be taken at the University of Oregon School of Journalism and Communication and at least 40 must be upper-division
- Satisfactory completion of at least 104 credits in academic fields other than journalism. A student who graduates with 180 credits must count no more than 76 credits (including transfer credits) in journalism toward the degree. The 104 credits must include a minor or area of concentration outside of the School of Journalism and Communication
- Majors and premajors must take all school courses for letter grades unless a course is only offered pass/no pass (P/N). All graded journalism courses taken to satisfy the major must be passed with a grade of mid-C or better
- A cumulative GPA of 2.70 or better in courses taken in the School of Journalism and Communication at the time of graduation

Internship

A major may earn no more than 9 credits in Internship: [Topic] (J 404).

Honors Program

The honors program provides high-achieving students the opportunity to develop analytic, creative, critical thinking and research skills in small-group, discussion-oriented courses. The program develops a small multidisciplinary community of communications scholars from all the majors within the School of Journalism and Communication.

Students take three honors courses focusing on media theory, research, or issues, which partially fulfill the context course requirement. In addition, students complete an original piece of scholarship or creative work in the senior year.

The program targets journalism majors entering their junior year who have a minimum 3.50 cumulative UO GPA. Applications are accepted each spring for the following year's cohort. Clark Honors College students are eligible to apply. More information is available on the school's website.

Second Bachelor's Degree

Students who already have a bachelor's degree and want to earn a second bachelor's degree in the School of Journalism and Communication may apply for premajor status through the university's Office of Admissions. Upon fulfilling the requirements for application for admission, they may apply for major status. Students must complete all of the school's requirements for graduation including the school's nonjournalism requirement and university requirements for the BA or BS. Credits, including transfer credits, earned for the first bachelor's degree may count toward meeting the requirements as long as they conform to the transfer-credit policy outlined previously.

Courses

J 100. Media Professions. 2 Credits.

Introduction to dynamic media and communication professions, opportunities, and issues, as well as to majors in journalism and communication.

J 101. Grammar for Communicators. 2 Credits.

Intensive review of grammar, word use, spelling, and principles of clear, concise writing. Introduction to media style. Premajor status required.

J 196. Field Studies: [Topic]. 1-2 Credits.

Repeatable.

J 198. Workshop: [Topic]. 1-12 Credits.

Repeatable.

J 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

J 201. Media and Society. 4 Credits.

Introduction to the critical examination of the roles of media in society.

J 208. Introduction to Documentary Production. 4 Credits.

Introduction to the theory and practice of documentary production. Focuses on aesthetics, technology, research, and writing fundamentals of documentary making, covering preproduction, production and postproduction. Cinema studies majors only. Prereq: J 201, CINE 260M or ENG 260M; two from CINE 265, CINE 266, CINE 267.

J 211. Gateway to Media. 8 Credits.

Integrates critical thinking, creative thinking, and basic skills for nonfiction storytelling through words, photos, audio, and video. Majors only. Prereq: J 100, J 101, J 201, and either CHC enrollment or completion of the WR requirement.

J 212. Writing for Communicators. 4 Credits.

Course builds on what was learned in Grammar for Communicators course (J 101) to help students develop the ability to write for a variety of professional platforms and to achieve the appropriate strategic purpose. Prereq: J 100, J 101, J 201, and either CHC enrollment or completion of the WR requirement.

J 213. Fact or Fiction. 4 Credits.

This course helps students grapple with information in the digital age to evaluate how media professionals develop notions of truth, ethics, and transparency. It covers information credibility, social media algorithms, and data and numerical literacy.

Prereq: J 100, J 101, J 201, and either CHC enrollment or completion of the WR requirement.

J 250. Media Studies Production. 2 Credits.

This course complements an understanding of production skills and practice from Gateway to Media by adding critical and cultural theory. By examining the relationship between theory and practice, students gain deeper knowledge of how production practices impact cultural and society.

Prereq: J 211.

J 299. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

J 314. Introduction to Media Studies. 4 Credits.

Presents a historical overview of the study of media, with in-depth discussion of primary theoretical approaches and their application to the current media environment. Majors only.

Prereq: J 201 with a grade better than C-.

J 315H. Honors Media Theory and Research. 4 Credits.

Foundation course for honors program. Introduction to seminal theories in communication; overview of methodologies used in the study of theories. Acceptance into School of Journalism and Communication honors program required for enrollment.

J 320. Gender, Media, and Diversity. 4 Credits.

Critical study of the media with regard to gender, race, ethnicity, and other social divisions. Ramification and possible mechanisms of change.

Prereq: J 201 with a grade better than C-.

J 331. Digital Video Production. 4 Credits.

Introduction to techniques of single-camera field video production.

Journalism and cinema studies majors only.

Prereq: (J 205 and J 206) or J 208 or J 211 with a grade better than C-.

J 333. Writing for Multimedia. 4 Credits.

Introduction to the process and practice of writing for multimedia, including print, audio-video, computer-assisted presentation, web-based applications, and striking the balance between word and image.

Journalism majors or multimedia minor standing only.

Prereq: ARTD 250, ARTD 251, ARTD 252.

J 340. Principles of Advertising. 4 Credits.

Role of advertising in the distribution of goods and services; the advertising agency; the campaign; research and testing; the selection of media: print, electronic, outdoor advertising, direct mailing. Not for journalism: advertising majors.

J 342. The Creative Strategist. 4 Credits.

Creative approaches to ideation and strategic thinking for all advertising industry specialties. Emphasis on creative process, generative techniques, teamwork, career planning, industry trends. Journalism: advertising majors only.

Prereq: J 211, J 212 with a grade better than C-.

J 350. Principles of Public Relations. 4 Credits.

Overview of public relations practice in a diverse global society, including theory, career opportunities, history, communication forms and channels, and legal and ethical concerns.

J 352. Strategic Writing and Media Relations. 4 Credits.

Writing-intensive lab; students produce strategic, theory-based content for multiple media platforms using various journalistic styles and storytelling skills and incorporating ethical media-relations practices.

Prereq: J 211, J 212, J 213, J 350 with a grade of better than C-.

J 361. Reporting I. 4 Credits.

News gathering and writing. Extensive writing in class and outside of class in a variety of forms: news, features, interviews, multimedia scripts. Journalism majors only.

Prereq: (J 205 and J 206) or J 211 with a grade better than C-.

J 365. Photojournalism. 4 Credits.

Visual reporting techniques, with emphasis on practice, law, and ethics of photojournalism and photographic communication. Laboratory and portfolio-intensive. Majors only.

Prereq: (J 205 and J 206) or J 211 with a grade better than C-.

J 371. Feature Writing I. 4 Credits.

Introduction to feature writing for print and online media; marketing your ideas and stories. Journalism majors only.

Prereq: J 361 with a grade better than C-.

J 377. Science of Science Communication. 4 Credits.

In this class students will delve deeper into the theoretical foundations of science communication as a discipline. Students will develop an understanding of the different models of science communication, their benefits, drawbacks, and current use in a variety of contexts.

Prereq: We recommend two area satisfying courses in the sciences.

J 385. Communication Law. 4 Credits.

Legal aspects of the media: constitutional freedom of expression, news gathering, access to public records, libel, privacy, copyright, advertising, electronic media regulation, and antitrust.

Prereq: J 201 with a grade better than C-.

J 387. Media History. 4 Credits.

The changing structure and character of the media in the United States.

Prereq: J 201 with a grade better than C-.

J 396. International Communication. 4 Credits.

National and cultural differences in media and information systems, global news and information flows, implications of rapid technological change, and communication and information policies.

Prereq: J 201 with a grade better than C-

J 397. Media Ethics. 4 Credits.

Ethical problems in the media: privacy, violence, pornography, truth-telling, objectivity, media codes, public interest, media accountability.

Prereq: J 201 with a grade better than C-.

J 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

J 400M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

J 401. Research: [Topic]. 1-9 Credits.

Repeatable.

J 403. Thesis. 1-9 Credits.

Repeatable.

J 404. Internship: [Topic]. 1-9 Credits.

Repeatable for maximum of 9 credits.

J 405. Special Problems: [Topic]. 1-12 Credits.

Repeatable.

J 406. Practicum: [Topic]. 1-12 Credits.

Repeatable.

J 407. Seminar: [Topic]. 1-4 Credits.

Repeatable.

J 408. Workshop: [Topic]. 1-6 Credits.

Repeatable.

J 409. Terminal Project. 1-12 Credits.

Repeatable.

J 410. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

J 411M. US Film Industry. 4 Credits.

Traces the past and present of the U.S. film industry, examining key moments in the development of Hollywood, including the consolidation and restructuring of the major movie studios, the film industry's relationship to TV and the Internet. Journalism Majors and MEST minor. Prereq: J 201 with a grade better than C-.

J 412. Issues in Communication Studies: [Topic]. 4 Credits.

Uses a variety of theories and methods to examine specific aspects of media content, processes, and audiences. Majors only. Repeatable three times for a maximum of 16 credits when topic changes. Prereq: J 201 with a grade better than C-.

J 413. Communication Studies Capstone. 4 Credits.

Draws on skills and knowledge learned in other communications studies and related courses to demonstrate competence in broad areas of research.

Prereq: J 211, J 212, J 213, J 314 with a grade better than C-.

J 415. Media Studies Research Methods. 4 Credits.

This course provides the core skills necessary to critically evaluate scientific and analytic studies and conduct research in the media studies tradition. Students learn basic principles of media studies research methods, such as experiments, surveys, naturalistic observations, and interviews.

Prereq: J 201, J 314.

J 416. Survey of the Documentary. 4 Credits.

Historical and critical survey of the documentary as a form of artistic expression and an instrument of social commentary. Majors, cinema studies majors, and media studies minors only.

Prereq: J 201 with a grade better than C-.

J 420. Documentary Pre-Production. 4 Credits.

Students learn to research, plan, budget for, and develop a documentary film idea. They gain experience shooting a sizzle and pitching projects to potential producers. Several documentary forms will be explored, including portraits, ethnographies, interviews, personal stories, processes and events, and re-enactments.

Prereq: J 208.

J 421. Documentary Production. 4 Credits.

Get experience shooting a short documentary worthy of broadcast screening, film festival exhibition, or another venue.

Prereq: For SOJC students J 208 and J 420 with a grade better than C-. For CINE students: J 208 and permission of the instructor.

J 422. Documentary Post-Production. 4 Credits.

Trains students with to edit and do post-production work on their documentary film projects.

Prereq: J 208, J 420, J 421.

J 424H. Honors Theory and Research: [Topic]. 4 Credits.

Uses a variety of theories and methods to closely examine and analyze contemporary problems and situations in media and communications. Acceptance into School of Journalism and Communication honors program required for enrollment. Repeatable once when topic changes for a maximum of 8 credits.

J 427M. Latino Roots I. 4 Credits.

Documents Latino history in the racial history of what is now Oregon since 1500 and teaches students to conduct oral history interviews. Multilisted with ANTH 427M. Sequence with J 428M. Offered alternate years.

J 428M. Latino Roots II. 4 Credits.

Continuation of Latino Roots I, designed for producing a short documentary using oral history as the story. Covers basic theory and practice of digital film-video documentary production. Multilisted with ANTH 428M. Sequence with J 427M. Offered alternate years. Prereq: J 427M.

J 429. Media Technologies and Society: [Topic]. 4 Credits.

Explores the interrelationship between media technologies and social practices and processes in current and historical contexts. Majors and minors only. Repeatable three times for a maximum of 16 credits when topic changes. Open to MEST minors.

Prereq: J 201 with a grade better than C-.

J 430. Culture and Power in the Media: [Topic]. 4 Credits.

Explores issues of culture, identity, and power, including the role media play in reinforcing social, political, and economic disparities. Majors and minors only. Repeatable three times for a maximum of 16 credits when topic changes.

Prereq: J 201 with a grade better than C-.

J 431. Media Structures and Regulation: [Topic]. 4 Credits.

Explores how the infrastructures and regulatory environments of national and global media institutions influence discourse, democracy, and public life. Majors and MEST minors only. Repeatable three times for a maximum of 16 credits when topic changes.

Prereq: J 201 with a grade better than C-.

J 432. Reporting for Electronic Media. 4 Credits.

Training in gathering, production, and presentation of news for the electronic media. Journalism majors only.

Prereq: J 331, J 361 with a grade better than C-.

J 434. Advanced Television News. 4 Credits.

News gathering and production for television. Students produce live programming for local cable systems. Journalism majors only.

Prereq: J 331, J 361, J 432 with a grade better than C-.

J 436. Media Design: [Topic]. 4 Credits.

Focuses on issues and techniques in picture and graphic editing, typography, and work-picture composition and interaction for long-form visual storytelling across legacy- and emerging-media platforms. Repeatable twice for a maximum of 12 credits.

Prereq: J 361 with a grade better than C-.

J 443. Advertising Media Planning. 4 Credits.

Objectives and strategy for determining effective methods of reaching a designated target audience. Use of media measurement tools.

Journalism: advertising majors only.

Prereq: J 207, J 342 with a grade better than C-.

J 444. Agency Account Management. 4 Credits.

The role of the account executive in the advertising agency examined through case studies. Journalism: advertising majors only.

Prereq: J 211 and J 342 with a grade better than C-.

J 448. Advertising Campaigns. 4 Credits.

Seniors produce a comprehensive campaign involving every aspect of advertising, ranging from market research through creative and media strategy formulation to execution. Journalism: advertising majors only. Prereq: three from J 443, J 444, J 457, J 458, J 459, J 460 with a grade better than C-.

J 449. Advanced Advertising Campaigns. 5 Credits.

Team experience of creating a professional-level advertising plan. Students participate in a national competition. Journalism: advertising majors only.

J 452. Strategic Public Relations Communication. 4 Credits.

Advanced writing lab emphasizing business communication, direct-to-consumer strategies and techniques, and effective use of web-based communication strategies. Journalism: public relations majors only. Prereq: J 352 with a grade better than C-.

J 453. Strategic Planning and Cases. 4 Credits.

Campaign planning, administration, crisis communication, and issues management, encompassing research, writing objectives and tactics, evaluation methods, and constructing budgets and timelines. Journalism: public relations majors only. Prereq: J 352 with a grade better than C-.

J 454. Public Relations Campaigns. 4 Credits.

Capstone course applying theory, skills, and a team-based approach to researching, planning, presenting, and implementing a campaign for a client. Professional portfolios presented and reviewed. Journalism: public relations majors only. Prereq: J 452, J 453; J 494 with a grade better than C-.

J 457. Curiosity for Strategists. 4 Credits.

Explores the building of intellectual curiosity as a problem-solving technique within the context of culture and media. Emphasis: critical thinking, readings, projects, performance. Journalism: advertising majors only. Prereq: J 211 and J 342 with a grade better than C-.

J 458. Writing Design Concepts. 4 Credits.

Conceptual problem-solving for traditional and emerging media. Emphasis: conceptual development, advertising writing, design, campaigns, presentation of developed work. Journalism: advertising majors only. Prereq: J 211 and J 342 with a grade better than C-.

J 459. Branding and Content. 4 Credits.

Capstone course on brand portfolio development for writers, art directors, and strategists. Emphasis: production, multiple-platform creative development, industry-focused portfolios. For Journalism: advertising majors only. Prereq: J 205, J 206, J 207, J 342 with a grade better than C-.

J 460. Brand Development: [Topic]. 4 Credits.

Revolving topics on emerging issues in branding and advertising, including strategies in digital and interactive brand solutions, media decision-making, and sustainability. Journalism: advertising majors only. Repeatable three times for a maximum of 16 credits when topic changes. Prereq: J 205 and J 206 and J 342, or J 211 and J 342, with a grade better than C-.

J 461. Newspaper Editing. 4 Credits.

Copyediting, headline writing, and page design for newspapers in print and online; emphasis on grammar and style. Journalism majors only. Prereq: J 361 or equivalent with a grade better than C-.

J 462. Reporting II. 4 Credits.

In-depth reporting on public affairs and community news. Journalism majors only. Prereq: J 361 with a grade better than C-.

J 463. Specialized Reporting: [Topic]. 1-4 Credits.

Reporting special topics, including the environment, business and economics, politics, health and medicine, science, and the arts; and digital and multiplatform journalism. Journalism majors only. Repeatable. Prereq: J 361 with a grade better than C-.

J 466. Advanced Photojournalism: [Topic]. 4 Credits.

Intensive visual reporting techniques, with emphasis on digital production, color, lighting, in-depth storytelling, documentary, and portfolio. Majors only. Repeatable three times for a maximum of 16 credits when topic changes. Prereq: J 365 with a grade better than C-.

J 467. Issues in International Communication: [Topic]. 4 Credits.

Topics focus on global media issues. Majors and minors only; cinema studies majors for approved topics. Repeatable twice for a maximum of 12 credits when topic changes. Prereq: J 201 with a grade better than C-.

J 468. Advanced News Editing. 4 Credits.

Advanced training in news editing under newsroom conditions. Discussion of issues in editing, headline writing, and news judgment. Includes work with web-based journalism. Focus on teamwork. Journalism majors only. Prereq: J 461 with a grade better than C-.

J 469. OR Magazine. 4 Credits.

Building skills in journalistic storytelling and multimedia production of a digital magazine for distribution via mobile devices. Repeatable once for a maximum of 8 credits.

J 472. Feature Writing II. 4 Credits.

In-depth story research and advanced feature writing for print and online markets. Individual conferences. Journalism majors only. Prereq: J 361, J 371 with a grade better than C-.

J 475. Flux Production. 1-5 Credits.

Planning and production of "Flux" magazine. Students make and carry out assignments, write and edit stories, take photos, shoot video, sell advertising, and design the magazine. Repeatable for a maximum of 12 credits. Prereq: J 211, J 212, J 213, J 331, J 361 with a grade better than C-.

J 477. Topics in Science of Science Communication: [Topic]. 4 Credits.

This course dives deeply into issues related to the science of science communication, including more advanced exploration of health communication, decision making, numeracy, and environmental communication. Students will focus on developing research projects in consultation with the instructor. Repeatable twice for a maximum of 12 credits when topic changes. Prereq: J 377.

J 478. Producing the Science Story: [Topic]. 4 Credits.

This course focuses on producing stories about science for a variety of media. Students will incorporate research from the science of science communication in crafting story strategies for specific audiences. Additional focus will be on innovative storytelling strategies for complicated subjects using journalistic practice. Repeatable twice for a maximum of 12 credits when topic changes. Prereq: J 377.

J 480. Public Relations: [Topic]. 4 Credits.

Addresses a specific theory, method, or issue in the study and practice of public relations, such as international practice or strategic use of new media. Repeatable thrice when topic changes for a maximum of 16 credits.

J 483. The Journalistic Interview. 4 Credits.

Gathering information through asking questions. Literature and research findings on techniques of listening, nonverbal communication, and psychological dynamics of the interview relationship in journalistic situations. Journalism majors only.

Prereq: J 361 with a grade better than C-.

J 489. Media Entrepreneurship. 4 Credits.

Media Entrepreneurship introduces students from journalism and communication-based fields to the fundamentals of the entrepreneurship and innovation, and gives them an opportunity to conceive, develop and test original media business ideas.

Prereq: SOJC undergrads: Media studies: J 314 with a grade better than C-; Journalism: J 361 with a grade better than C-; Advertising: J 342 with a grade better than C-; Public relations: J 352 with a grade better than C-.

J 494. Strategic Communications Research. 4 Credits.

Introduction to how and why research is conducted and used by public relations and advertising professionals to formulate strategic campaigns and evaluate their effectiveness. Majors only.

Prereq: J 342 or J 350.

J 495. Research Methods: [Topic]. 4 Credits.

Uses a variety of quantitative and qualitative methods to examine concepts and processes of research used in such areas as advertising, public relations, journalism, strategic communication, and communication studies. Majors and minors only. Repeatable when topic changes for a maximum of 12 credits.

Prereq: J 201 with a grade better than C-.

J 496. Communication Ethics and Law: [Topic]. 4 Credits.

Analyses of ethical and legal issues confronting the communications industry using various ethical and legal theories, readings, and cases relevant to the specific topic. Majors and minors only. Repeatable once for a maximum of 8 credits when topic changes.

Prereq: J 201 with a grade better than C-.

J 500M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

J 503. Thesis. 1-9 Credits.

Repeatable.

J 507. Seminar: [Topic]. 1-4 Credits.

Repeatable.

J 508. Workshop: [Topic]. 1-6 Credits.

Repeatable.

J 510. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

J 511M. US Film Industry. 4 Credits.

Traces the past and present of the U.S. film industry. Multilisted with CINE 511M.

J 512. Issues in Communication Studies: [Topic]. 4 Credits.

Uses a variety of theories and methods to examine specific aspects of media content, processes, and audiences. Majors only. Repeatable three times for a maximum of 16 credits when topic changes.

J 516. Survey of the Documentary. 4 Credits.

Historical and critical survey of the documentary as a form of artistic expression and an instrument of social commentary. Majors, cinema studies majors, and media studies minors only.

J 520. Documentary Pre-Production. 4 Credits.

Students learn to research, plan, budget for, and develop a documentary film idea. They gain experience shooting a sizzle and pitching projects to potential producers. Several documentary forms will be explored, including portraits, ethnographies, interviews, personal stories, processes and events, and re-enactments.

J 521. Documentary Production. 4 Credits.

Get experience shooting a short documentary worthy of broadcast screening, film festival exhibition, or another venue.

J 522. Documentary Post-Production. 4 Credits.

Trains students with to edit and do post-production work on their documentary film projects.

J 527M. Latino Roots I. 4 Credits.

Documents Latino history in the racial history of what is now Oregon since 1500 and teaches students to conduct oral history interviews. Multilisted with ANTH 527M. Sequence with J 528M. Offered alternate years.

J 528M. Latino Roots II. 4 Credits.

Continuation of Latino Roots I, designed for producing a short documentary using oral history as the story. Covers basic theory and practice of digital film-video documentary production. Multilisted with ANTH ANTH 528M. Sequence with J 527M. Offered alternate years. Prereq: J 527M.

J 529. Media Technologies and Society: [Topic]. 1-4 Credits.

Explores the interrelationship between media technologies and social practices and processes in current and historical contexts. Majors and minors only. Repeatable three times for a maximum of 16 credits when topic changes. Open to MEST minors.

J 530. Culture and Power in the Media: [Topic]. 4 Credits.

Explores issues of culture, identity, and power, including the role media play in reinforcing social, political, and economic disparities. Majors and minors only. Repeatable three times for a maximum of 16 credits when topic changes.

J 531. Media Structures and Regulation: [Topic]. 4 Credits.

Explores how the infrastructures and regulatory environments of national and global media institutions influence discourse, democracy, and public life. Majors and MEST minors only. Repeatable three times for a maximum of 16 credits when topic changes.

J 532. Reporting for Electronic Media. 4 Credits.

Training in gathering, production, and presentation of news for the electronic media. Journalism majors only.

J 534. Advanced Television News. 4 Credits.

News gathering and production for television. Students produce live programming for local cable systems. Journalism majors only. Prereq: J 532 with a grade of mid-C or better.

J 536. Media Design: [Topic]. 4 Credits.

Focuses on issues and techniques in picture and graphic editing, typography, and work-picture composition and interaction for long-form visual storytelling across legacy- and emerging-media platforms. Repeatable twice for a maximum of 12 credits.

J 543. Advertising Media Planning. 4 Credits.

Objectives and strategy for determining effective methods of reaching a designated target audience. Use of media measurement tools. Journalism: advertising majors only.

J 544. Agency Account Management. 4 Credits.

The role of the account executive in the advertising agency examined through case studies. Journalism: advertising majors only.

J 548. Advertising Campaigns. 4 Credits.

Graduate students produce a comprehensive campaign involving every aspect of advertising, ranging from market research through creative and media strategy formulation to execution. Journalism: advertising majors only.

Prereq: three from J 543, J 544, J 556, J 557, J 558, J 559, J 560.

J 549. Advanced Advertising Campaigns. 5 Credits.

Team experience of creating a professional-level advertising plan. Students participate in a national competition. Journalism: advertising majors only.

J 552. Strategic Public Relations Communication. 4 Credits.

Advanced writing lab emphasizing business communication, direct-to-consumer strategies and techniques, and effective use of web-based communication strategies. Journalism: public relations majors only.

J 553. Strategic Planning and Cases. 4 Credits.

Campaign planning, administration, crisis communication, and issues management, encompassing research, writing objectives and tactics, evaluation methods, and constructing budgets and timelines. Journalism: public relations majors only.

J 554. Public Relations Campaigns. 4 Credits.

Capstone course applying theory, skills, and a team-based approach to researching, planning, presenting, and implementing a campaign for a client. Professional portfolios presented and reviewed. Journalism: public relations majors only.

Prereq: J 552, J 553; one from J 594, J 595.

J 557. Curiosity for Strategists. 4 Credits.

Explores the building of intellectual curiosity as a problem-solving technique within the context of culture and media. Emphasis: critical thinking, readings, projects, performance. Journalism: advertising majors only.

J 558. Writing Design Concepts. 4 Credits.

Conceptual problem-solving for traditional and emerging media. Emphasis: conceptual development, advertising writing, design, campaigns, presentation of developed work. Journalism: advertising majors only.

J 559. Branding and Content. 4 Credits.

Capstone course on brand portfolio development for writers, art directors, and strategists. Emphasis: production, multiple-platform creative development, industry-focused portfolios. Journalism: advertising majors only.

J 560. Brand Development: [Topic]. 4 Credits.

Revolving topics on emerging issues in branding and advertising, including strategies in digital and interactive brand solutions, media decision-making, and sustainability. Journalism: advertising majors only. Repeatable three times for a maximum of 16 credits when topic changes.

J 561. Newspaper Editing. 4 Credits.

Copyediting, headline writing, and page design for newspapers in print and online; emphasis on grammar and style. Journalism majors only.

J 562. Reporting II. 4 Credits.

In-depth reporting on public affairs and community news. Journalism majors only.

J 563. Specialized Reporting: [Topic]. 1-4 Credits.

Reporting special topics, including the environment, business and economics, politics, health and medicine, science, and the arts; and digital and multiplatform journalism. Journalism majors only. Repeatable.

J 566. Advanced Photojournalism: [Topic]. 4 Credits.

Intensive visual reporting techniques, with emphasis on digital production, color, lighting, in-depth storytelling, documentary, and portfolio. Majors only. Repeatable three times for a maximum of 16 credits when topic changes.

J 567. Issues in International Communication: [Topic]. 4 Credits.

Topics focus on global media issues. Majors only. Repeatable twice for a maximum of 12 credits when topic changes.

J 568. Advanced News Editing. 4 Credits.

Advanced training in news editing under newsroom conditions. Discussion of issues in editing, headline writing, and news judgment. Includes work with web-based journalism. Focus on teamwork. Journalism majors only.

Prereq: J 561 with a grade of mid-C or better.

J 569. OR Magazine. 4 Credits.

Building skills in journalistic storytelling and multimedia production of a digital magazine for distribution via mobile devices. Repeatable once for a maximum of 8 credits.

J 572. Feature Writing II. 4 Credits.

In-depth story research and advanced feature writing for print and online markets. Individual conferences. Journalism majors only.

J 575. Flux Production. 1-5 Credits.

Repeatable. Planning and production of "Flux" magazine. Students make and carry out assignments, write and edit stories, take photos, shoot video, sell advertising, and design the magazine. Repeatable for a maximum of 12 credits.

J 577. Topics in Science of Science Communication: [Topic]. 4 Credits.

This course dives deeply into issues related to the science of science communication, including more advanced exploration of health communication, decision making, numeracy, and environmental communication. Students will focus on developing research projects in consultation with the instructor. Repeatable twice for a maximum of 12 hours when topic changes.

J 578. Producing the Science Story: [Topic]. 4 Credits.

This course focuses on producing stories about science for a variety of media. Students will incorporate research from the science of science communication in crafting story strategies for specific audiences. Additional focus will be on innovative storytelling strategies for complicated subjects using journalistic practice. Repeatable twice for a maximum of 12 credits when topic changes.

J 580. Public Relations: [Topic]. 4 Credits.

Addresses a specific theory, method, or issue in the study and practice of public relations, such as international practice or strategic use of new media. Repeatable thrice when topic changes for a maximum of 16 credits.

J 583. The Journalistic Interview. 4 Credits.

Gathering information through asking questions. Literature and research findings on techniques of listening, nonverbal communication, and psychological dynamics of the interview relationship in journalistic situations. Journalism majors only.

J 589. Media Entrepreneurship. 4 Credits.

Media Entrepreneurship introduces students from journalism and communication-based fields to the fundamentals of the entrepreneurship and innovation, and gives them an opportunity to conceive, develop and test original media business ideas.

J 594. Strategic Communications Research. 4 Credits.

Introduction to how and why research is conducted and used by public relations and advertising professionals to formulate strategic campaigns and evaluate their effectiveness. Majors only.

J 595. Research Methods: [Topic]. 4 Credits.

Uses a variety of quantitative and qualitative methods to examine concepts and processes of research used in such areas as advertising, public relations, journalism, strategic communication, and communication studies. Journalism majors only. Repeatable when topic changes for a maximum of 12 credits.

J 596. Communication Ethics and Law: [Topic]. 4 Credits.

Analyses of ethical and legal issues confronting the communications industry using various ethical and legal theories, readings, and cases relevant to the specific topic. Majors only. Repeatable once for a maximum of 8 credits when topic changes.

J 601. Research: [Topic]. 1-6 Credits.

Repeatable for maximum of 16 credits.

J 602. Supervised College Teaching. 1-5 Credits.

Repeatable for maximum of 5 credits.

J 603. Dissertation. 1-16 Credits.

Course may be repeated 25 times for credit after the initial instance.

J 604. Internship: [Topic]. 1-6 Credits.

Repeatable for maximum of 12 credits.

J 605. Special Problems: [Topic]. 1-12 Credits.

Repeatable.

J 606. Practicum: [Topic]. 1-6 Credits.

Repeatable for maximum of 16 credits.

J 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

J 608. Workshop: [Topic]. 1-6 Credits.

Repeatable for maximum of 16 credits.

J 609. Terminal Project. 1-6 Credits.

Repeatable for maximum of 6 credits.

J 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

J 611. Mass Communication and Society. 4 Credits.

Review of the literature of mass communication. Introduction to graduate study in journalism and communication.

J 612. Media Theory I. 5 Credits.

First in a three-part sequence introducing students to media theory, focusing on the social scientific tradition. Sequence with J 613, J 614.

J 613. Media Theory II. 5 Credits.

Second in a three-part sequence introducing students to media theory, focusing on critical approaches. Sequence with J 612, J 614.

Prereq: J 612.

J 614. Media Theory III. 5 Credits.

Third in a three-part sequence introducing students to media theory, focusing on contemporary theoretical perspectives.

Prereq: J 613.

J 616. Introduction to Strategic Communication Marketing. 4 Credits.

Discussion of fundamental marketing concepts from the perspective of the manager. Analysis of complex marketing challenges in research, segmentation, targeting, pricing, distribution, and branding.

J 617. Strategic Communication Theory and Research: [Topic]. 4 Credits.

Theory, research, and practice of strategic communication. Topics may include relationship management, risk communication, identity and culture, and social media theory. Repeatable when topic changes for a maximum of 20 credits.

Prereq: graduate standing.

J 618. Strategic Communication Management. 4 Credits.

Elements of managing and leading organizations; examination of key issues faced by leaders. Topics include leadership theory, leading change, dealing with conflict, and performance and strategic management.

J 619. Teaching and the Professional Life. 4 Credits.

Explores teaching strategies, curriculum development, and other aspects of academic professional life in journalism and communication.

J 621. Foundations of Strategic Communication. 4 Credits.

Reviews major theories, models, and practices in strategic communications. Theoretical topics include media effects and persuasion as applied to public relations, advertising, and other strategic communication.

J 623. Creativity in Strategic Communication. 4 Credits.

Explores the use of creative conceptual thinking as part of the strategic basis in successful communication campaigns.

J 624. Strategic Communication: [Topic]. 2 Credits.

Explores problems and specialized skills needed in strategic communication management. Examples include crisis communication, creativity in business, corporate social responsibility. Repeatable up to five times with change in topic.

J 627. Foundations of Multimedia Journalism. 4 Credits.

Serves as a foundation of theory and technique, with an introduction to storytelling forms, technical production skills, and the visual language. Students will learn how to use the tools of the trade so that they can communicate effectively with other multimedia journalists.

J 628. Multimedia Journalism Practices. 4 Credits.

Building on the J 627 course, students create a narrative video project that focuses on visual storytelling, character development, and present-tense storytelling.

J 629. Media and Communication Ethics: [Topic]. 4 Credits.

This course explores ethical issues facing media workers and media users in culture and society today. Topics may include digital ethics, strategic communication ethics, visual ethics and global media ethics.

J 635. Thinking Story. 4 Credits.

Recognize and use fundamental approaches to narrative storytelling to create dynamic and engaging multimedia projects.

J 639. Foundations of Explanatory Video Journalism. 4 Credits.

Students explore and practice concepts in visual explanation and explanatory video.

J 641. Qualitative Research Methods. 4 Credits.

Introduces qualitative research methods including traditional historical inquiry, oral history, ethnography, and participant observation.

J 642. Quantitative Research Methods. 4 Credits.

Introduces and analyzes quantitative research methods in terms of design, measurement, inference, and validity. Focuses on conceptualization in communication research.

J 643. Advanced Doctoral Seminar. 5 Credits.

Seminar participants demonstrate competence in broad families of social research by drawing on skills and knowledge obtained in J 612, J 613, J 614, J 641, and J 642.

Prereq: J 612, J 613, J 614, J 641, J 642.

J 644. Philosophy of Communication. 4 Credits.

Explores the philosophical foundations of communication in the United States, including political philosophies that range from Milton to McLuhan.

J 646. Political Economy of Communication. 4 Credits.

Introduction to the political economy of communication. Includes such issues as ownership and control patterns; the role of the state; labor; intellectual property rights; and international markets.

J 648. Cultural Approaches to Communication. 4 Credits.

Examination of communication and mediated communication as cultural processes in the production and reproduction of social systems.

J 649. International Communication. 4 Credits.

Examines global communication structures and processes and their consequences. Topics include new technologies, news and information organizations, cross-cultural uses of Western media, and information policies.

J 654. Reporting within Communities. 4 Credits.

Students explore and practice emerging "community-first" concepts of journalism and reporting to identify the needs of the communities served, codesigning processes and solutions to keep them engaged.

J 656. Producing the Story. 4 Credits.

Students work collaboratively to create a compelling, ethical work of journalism with impact, applying all aspects of community engagement, reporting, storytelling, and production skills learned in previous terms.

J 660. Advanced Research Methods: [Topic]. 4 Credits.

Explores specific qualitative or quantitative communication research methods. Topics may include discourse analysis, oral history, historical methods, legal methods, content analysis, and survey methods.

Repeatable when topic changes.

Prereq: J 641 or J 642, depending on topic.

J 663. Foundations of Strategic Sport Communication. 4 Credits.

Presents and reviews major theories, models, and practices in sports communication. Theoretical topics include sports media effects and persuasion as applied to broadcast, public relations, advertising, and other strategic communication. Cultural, societal and industry relevance also discussed.

Journalism: Public Relations

The University of Oregon undergraduate program is based on the premise that the best professional communicator is broadly educated. In accordance with national accrediting standards, students must take at least 104 credits in courses outside the School of Journalism and Communication. A maximum of 76 credits in the 180-credit undergraduate program may be in journalism and communication courses. Students learn about media practice and effects. They study the role of the media in society, the history of journalism, visual

communication, the ethics of media practices, the economics of the media, new media technologies, international communication, diversity in the media, and the legal and social responsibilities of the media.

- Bachelor of Arts
- Bachelor of Science

Undergraduate Studies

The role of the school's undergraduate program is to provide students with the creative, critical, and problem-solving skills they need to become ethical, professional communicators and critical media consumers.

Premajor Admission

New students planning to major in journalism enter the university as premajors and do not need to meet special admission requirements beyond the general university requirements.

Each premajor is assigned to a journalism and communication advisor who assists in planning programs, answering questions, and tracking progress toward admission as a major and toward graduation. Students should check with an advisor at least once a year to ensure that requirements are being met. In addition, students will be assigned a faculty advisor, who will guide them through the portfolio process. The director of student services for the school supervises undergraduate academic advising.

A university student in another major may switch to a journalism premajor online on the School of Journalism and Communication website. To become a premajor, a student must have a minimum cumulative grade point average (GPA) of 2.00 for all work at the University of Oregon.

Premajor Program

Students must complete the school's premajor core curriculum, and earn grades of C or better:

Code	Title	Credits
J 100	Media Professions	2
J 101	Grammar for Communicators	2
J 201	Media and Society	4
Total Credits		8

Admission as a Major

Admission to the School of Journalism and Communication is competitive. The faculty considers applications from premajor students who have

- completed 24 or more graded credits of course work at the University of Oregon, earning a cumulative UO GPA of at least 2.90
- completed College Composition I (WR 121) and College Composition II (WR 122) or College Composition III (WR 123) with grades of P or C– or better; CHC students are exempt
- completed the school's premajor core curriculum

A student's GPA is a major factor in the admissions decision. Students with a GPA of 3.25 or higher are guaranteed admission to the major.

Applicants with grade point averages between 2.90 and 3.24 are evaluated and judged competitively by an admissions committee as applications are received. The admissions committee considers the requirements listed above and other materials that applicants submit,

including a personal statement, letters of recommendation, and a portfolio. Students with a GPA below 2.90 may petition the committee for admission. The committee has the option of waiving any of the requirements listed above if evidence of a candidate's high potential for success in the major is presented and approved.

Transfer Students

Students transferring to the University of Oregon School of Journalism and Communication enter as premajors. They apply to the University of Oregon Office of Admissions and are accepted as premajors if they meet the university's general standards for admission. To be admitted to major status, transfer students must meet the school's requirements for admission as a major (p.).

Transfer Credit

The School of Journalism and Communication accepts journalism credits earned at other colleges and universities as follows:

1. Credits earned at schools of journalism accredited by the Accrediting Council on Education in Journalism and Mass Communications are accepted for journalism credit and may fulfill specific course requirements
2. Journalism credits may be accepted from unaccredited journalism programs, but they may not be used to meet specific course requirements. They do count toward the 76-credit limit set by national accrediting standards
3. Regardless of the number of credits transferred, students must take at least 27 credits of journalism in residence to earn a degree from the University of Oregon
4. Students may not take more than 76 credits in journalism courses out of the 180 total credits required for a bachelor's degree. They may, however, add credits to the 180-credit total to accommodate extra journalism credits (e.g., take 186 credits to accommodate as many as 82 credits in journalism)
5. The school accepts equivalent courses taught at other colleges to meet the Media and Society (J 201) requirement for application to be a major, and may accept equivalent courses to meet other core requirements if approved by the associate dean for undergraduate affairs

Transfer students who want to discuss the transfer policy may consult the associate dean, director of student services, or the advisors in the Student Services Center.

The school offers course work leading to bachelor of arts (BA) and bachelor of science (BS) degrees. Major requirements are the same for each. Differences between the two degrees are explained under Requirements for Bachelor of Arts and Bachelor of Science in the **Bachelor's Degree Requirements** section of this catalog.

Bachelor of Arts in Journalism: Public Relations Degree Requirements

Code	Title	Credits
Premajor Requirements*		
J 100	Media Professions	2
J 101	Grammar for Communicators	2
J 201	Media and Society	4
Full Major Core		
J 211	Gateway to Media	8

J 212	Writing for Communicators	4
J 213	Fact or Fiction	4
Core Context Requirement		
J 320	Gender, Media, and Diversity	4
J 385	Communication Law	4
J 397	Media Ethics	4
J 494	Strategic Communications Research	4

Select one of the following:		
J 387	Media History	
J 396	International Communication	

Public Relations Major Requirements		
J 350	Principles of Public Relations	4
J 352	Strategic Writing and Media Relations	4
J 452	Strategic Public Relations Communication	4
J 453	Strategic Planning and Cases	4
J 454	Public Relations Campaigns	4
J 480	Public Relations: [Topic]	4

Elective: At least four journalism credits are needed to reach the minimum 72

General Studies Requirements		
At least 104 non-journalism credits, including one of the following:		104

A non-SOJC minor		
A non-SOJC concentration ¹		
A non-SOJC double major		

*Completion of UO's writing composition requirement (WR 121 and either WR 122 or WR 123). Students in the Clark Honors College are exempt.

Minimum 2.90 cumulative UO GPA		
Total Credits		176

¹ A non-SOJC concentration is at least 24 credits from the same non-SOJC subject code. 12 must be upper division credits and 4 of those 12 must be a 400-level course. All courses must be taken graded and passed with a C- or better. Not all subjects are suitable for a concentration; consult an SOJC advisor.

Bachelor of Science in Journalism: Public Relations Degree Requirements

J 452 Strategic Public Relations Communication	4
J 453 Strategic Planning and Cases	4
J 454 Public Relations Campaigns	4
J 480 Public Relations: [Topic]	4

Elective: At least four journalism credits are needed to reach the minimum 72

General Studies Requirements

At least 104 non-journalism credits, including one of the following: 104

- A non-SOJC minor
- A non-SOJC concentration ¹
- A non-SOJC double major

*Completion of UO's writing composition requirement (WR 121 and either WR 122 or WR 123). Students in the Clark Honors College are exempt.

Minimum 2.90 cumulative UO GPA

Total Credits 176

¹ A non-SOJC concentration is at least 24 credits from the same non-SOJC subject code. 12 must be upper division credits and 4 of those 12 must be a 400-level course. All courses must be taken graded and passed with a C- or better. Not all subjects are suitable for a concentration; consult an SOJC advisor.

Additional Requirements

- Satisfactory completion of a minimum of 72 credits and a maximum of 76 credits in journalism, of which at least 27 must be taken at the University of Oregon School of Journalism and Communication and at least 40 must be upper division
- Satisfactory completion of at least 104 credits in academic fields other than journalism. A student who graduates with 180 credits must count no more than 76 credits (including transfer credits) in journalism toward the degree
- Students must take a minimum of 40 upper-division credits in journalism: public relations, including prerequisites
- Majors and premajors must take all school courses for letter grades unless a course is only offered pass/no pass (P/N). All graded journalism courses taken to satisfy the major must be passed with a grade of mid-C or better
- A cumulative GPA of 2.70 or better in courses taken in the School of Journalism and Communication at the time of graduation

Internship

A major may earn no more than 9 credits in Internship: [Topic] (J 404).

Honors Program

The honors program provides high-achieving students the opportunity to develop analytic, creative, critical thinking and research skills in small-group, discussion-oriented courses. The program develops a small

multidisciplinary community of communications scholars from all the majors within the School of Journalism and Communication.

Students take three honors courses focusing on media theory, research, or issues, which partially fulfill the context course requirement. In addition, students complete an original piece of scholarship or creative work in the senior year.

The program targets journalism majors entering their junior year who have a minimum 3.50 cumulative UO GPA. Applications are accepted each spring for the following year's cohort. Clark Honors College students are eligible to apply. More information is available on the school's website.

Second Bachelor's Degree

Students who already have a bachelor's degree and want to earn a second bachelor's degree in the School of Journalism and Communication may apply for premajor status through the university's Office of Admissions. Upon fulfilling the requirements for application for admission, they may apply for major status. Students must complete all of the school's requirements for graduation including the school's arts and sciences requirement and university requirements for the BA or BS. Credits, including transfer credits, earned for the first bachelor's degree may count toward meeting the requirements as long as they conform to the transfer-credit policy outlined previously.

Courses

J 100. Media Professions. 2 Credits.

Introduction to dynamic media and communication professions, opportunities, and issues, as well as to majors in journalism and communication.

J 101. Grammar for Communicators. 2 Credits.

Intensive review of grammar, word use, spelling, and principles of clear, concise writing. Introduction to media style. Premajor status required.

J 196. Field Studies: [Topic]. 1-2 Credits.

Repeatable.

J 198. Workshop: [Topic]. 1-12 Credits.

Repeatable.

J 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

J 201. Media and Society. 4 Credits.

Introduction to the critical examination of the roles of media in society.

J 208. Introduction to Documentary Production. 4 Credits.

Introduction to the theory and practice of documentary production. Focuses on aesthetics, technology, research, and writing fundamentals of documentary making, covering preproduction, production and postproduction. Cinema studies majors only.

Prereq: J 201, CINE 260M or ENG 260M; two from CINE 265, CINE 266, CINE 267.

J 211. Gateway to Media. 8 Credits.

Integrates critical thinking, creative thinking, and basic skills for nonfiction storytelling through words, photos, audio, and video. Majors only.

Prereq: J 100, J 101, J 201, and either CHC enrollment or completion of the WR requirement.

J 212. Writing for Communicators. 4 Credits.

Course builds on what was learned in Grammar for Communicators course (J 101) to help students develop the ability to write for a variety of professional platforms and to achieve the appropriate strategic purpose. Prereq: J 100, J 101, J 201, and either CHC enrollment or completion of the WR requirement.

J 213. Fact or Fiction. 4 Credits.

This course helps students grapple with information in the digital age to evaluate how media professionals develop notions of truth, ethics, and transparency. It covers information credibility, social media algorithms, and data and numerical literacy.

Prereq: J 100, J 101, J 201, and either CHC enrollment or completion of the WR requirement.

J 250. Media Studies Production. 2 Credits.

This course complements an understanding of production skills and practice from Gateway to Media by adding critical and cultural theory. By examining the relationship between theory and practice, students gain deeper knowledge of how production practices impact cultural and society.

Prereq: J 211.

J 299. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

J 314. Introduction to Media Studies. 4 Credits.

Presents a historical overview of the study of media, with in-depth discussion of primary theoretical approaches and their application to the current media environment. Majors only.

Prereq: J 201 with a grade better than C-.

J 315H. Honors Media Theory and Research. 4 Credits.

Foundation course for honors program. Introduction to seminal theories in communication; overview of methodologies used in the study of theories. Acceptance into School of Journalism and Communication honors program required for enrollment.

J 320. Gender, Media, and Diversity. 4 Credits.

Critical study of the media with regard to gender, race, ethnicity, and other social divisions. Ramification and possible mechanisms of change.

Prereq: J 201 with a grade better than C-.

J 331. Digital Video Production. 4 Credits.

Introduction to techniques of single-camera field video production. Journalism and cinema studies majors only.

Prereq: (J 205 and J 206) or J 208 or J 211 with a grade better than C-.

J 333. Writing for Multimedia. 4 Credits.

Introduction to the process and practice of writing for multimedia, including print, audio-video, computer-assisted presentation, web-based applications, and striking the balance between word and image. Journalism majors or multimedia minor standing only.

Prereq: ARTD 250, ARTD 251, ARTD 252.

J 340. Principles of Advertising. 4 Credits.

Role of advertising in the distribution of goods and services; the advertising agency; the campaign; research and testing; the selection of media: print, electronic, outdoor advertising, direct mailing. Not for journalism: advertising majors.

J 342. The Creative Strategist. 4 Credits.

Creative approaches to ideation and strategic thinking for all advertising industry specialties. Emphasis on creative process, generative techniques, teamwork, career planning, industry trends. Journalism: advertising majors only.

Prereq: J 211, J 212 with a grade better than C-.

J 350. Principles of Public Relations. 4 Credits.

Overview of public relations practice in a diverse global society, including theory, career opportunities, history, communication forms and channels, and legal and ethical concerns.

J 352. Strategic Writing and Media Relations. 4 Credits.

Writing-intensive lab; students produce strategic, theory-based content for multiple media platforms using various journalistic styles and storytelling skills and incorporating ethical media-relations practices.

Prereq: J 211, J 212, J 213, J 350 with a grade of better than C-.

J 361. Reporting I. 4 Credits.

News gathering and writing. Extensive writing in class and outside of class in a variety of forms: news, features, interviews, multimedia scripts. Journalism majors only.

Prereq: (J 205 and J 206) or J 211 with a grade better than C-.

J 365. Photojournalism. 4 Credits.

Visual reporting techniques, with emphasis on practice, law, and ethics of photojournalism and photographic communication. Laboratory and portfolio-intensive. Majors only.

Prereq: (J 205 and J 206) or J 211 with a grade better than C-.

J 371. Feature Writing I. 4 Credits.

Introduction to feature writing for print and online media; marketing your ideas and stories. Journalism majors only.

Prereq: J 361 with a grade better than C-.

J 377. Science of Science Communication. 4 Credits.

In this class students will delve deeper into the theoretical foundations of science communication as a discipline. Students will develop an understanding of the different models of science communication, their benefits, drawbacks, and current use in a variety of contexts.

Prereq: We recommend two area satisfying courses in the sciences.

J 385. Communication Law. 4 Credits.

Legal aspects of the media: constitutional freedom of expression, news gathering, access to public records, libel, privacy, copyright, advertising, electronic media regulation, and antitrust.

Prereq: J 201 with a grade better than C-.

J 387. Media History. 4 Credits.

The changing structure and character of the media in the United States.

Prereq: J 201 with a grade better than C-.

J 396. International Communication. 4 Credits.

National and cultural differences in media and information systems, global news and information flows, implications of rapid technological change, and communication and information policies.

Prereq: J 201 with a grade better than C-

J 397. Media Ethics. 4 Credits.

Ethical problems in the media: privacy, violence, pornography, truth-telling, objectivity, media codes, public interest, media accountability.

Prereq: J 201 with a grade better than C-.

J 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

J 400M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

J 401. Research: [Topic]. 1-9 Credits.

Repeatable.

J 403. Thesis. 1-9 Credits.

Repeatable.

J 404. Internship: [Topic]. 1-9 Credits.

Repeatable for maximum of 9 credits.

J 405. Special Problems: [Topic]. 1-12 Credits.

Repeatable.

J 406. Practicum: [Topic]. 1-12 Credits.

Repeatable.

J 407. Seminar: [Topic]. 1-4 Credits.

Repeatable.

J 408. Workshop: [Topic]. 1-6 Credits.

Repeatable.

J 409. Terminal Project. 1-12 Credits.

Repeatable.

J 410. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

J 411M. US Film Industry. 4 Credits.

Traces the past and present of the U.S. film industry, examining key moments in the development of Hollywood, including the consolidation and restructuring of the major movie studios, the film industry's relationship to TV and the Internet. Journalism Majors and MEST minor.

Prereq: J 201 with a grade better than C-.

J 412. Issues in Communication Studies: [Topic]. 4 Credits.

Uses a variety of theories and methods to examine specific aspects of media content, processes, and audiences. Majors only. Repeatable three times for a maximum of 16 credits when topic changes.

Prereq: J 201 with a grade better than C-.

J 413. Communication Studies Capstone. 4 Credits.

Draws on skills and knowledge learned in other communications studies and related courses to demonstrate competence in broad areas of research.

Prereq: J 211, J 212, J 213, J 314 with a grade better than C-.

J 415. Media Studies Research Methods. 4 Credits.

This course provides the core skills necessary to critically evaluate scientific and analytic studies and conduct research in the media studies tradition. Students learn basic principles of media studies research methods, such as experiments, surveys, naturalistic observations, and interviews.

Prereq: J 201, J 314.

J 416. Survey of the Documentary. 4 Credits.

Historical and critical survey of the documentary as a form of artistic expression and an instrument of social commentary. Majors, cinema studies majors, and media studies minors only.

Prereq: J 201 with a grade better than C-.

J 420. Documentary Pre-Production. 4 Credits.

Students learn to research, plan, budget for, and develop a documentary film idea. They gain experience shooting a sizzle and pitching projects to potential producers. Several documentary forms will be explored, including portraits, ethnographies, interviews, personal stories, processes and events, and re-enactments.

Prereq: J 208.

J 421. Documentary Production. 4 Credits.

Get experience shooting a short documentary worthy of broadcast screening, film festival exhibition, or another venue.

Prereq: For SOJC students J 208 and J 420 with a grade better than C-.

For CINE students: J 208 and permission of the instructor.

J 422. Documentary Post-Production. 4 Credits.

Trains students with to edit and do post-production work on their documentary film projects.

Prereq: J 208, J 420, J 421.

J 424H. Honors Theory and Research: [Topic]. 4 Credits.

Uses a variety of theories and methods to closely examine and analyze contemporary problems and situations in media and communications. Acceptance into School of Journalism and Communication honors program required for enrollment. Repeatable once when topic changes for a maximum of 8 credits.

J 427M. Latino Roots I. 4 Credits.

Documents Latino history in the racial history of what is now Oregon since 1500 and teaches students to conduct oral history interviews. Multilisted with ANTH 427M. Sequence with J 428M. Offered alternate years.

J 428M. Latino Roots II. 4 Credits.

Continuation of Latino Roots I, designed for producing a short documentary using oral history as the story. Covers basic theory and practice of digital film-video documentary production. Multilisted with ANTH 428M. Sequence with J 427M. Offered alternate years.

Prereq: J 427M.

J 429. Media Technologies and Society: [Topic]. 4 Credits.

Explores the interrelationship between media technologies and social practices and processes in current and historical contexts. Majors and minors only. Repeatable three times for a maximum of 16 credits when topic changes. Open to MEST minors.

Prereq: J 201 with a grade better than C-.

J 430. Culture and Power in the Media: [Topic]. 4 Credits.

Explores issues of culture, identity, and power, including the role media play in reinforcing social, political, and economic disparities. Majors and minors only. Repeatable three times for a maximum of 16 credits when topic changes.

Prereq: J 201 with a grade better than C-.

J 431. Media Structures and Regulation: [Topic]. 4 Credits.

Explores how the infrastructures and regulatory environments of national and global media institutions influence discourse, democracy, and public life. Majors and MEST minors only. Repeatable three times for a maximum of 16 credits when topic changes.

Prereq: J 201 with a grade better than C-.

J 432. Reporting for Electronic Media. 4 Credits.

Training in gathering, production, and presentation of news for the electronic media. Journalism majors only.

Prereq: J 331, J 361 with a grade better than C-.

J 434. Advanced Television News. 4 Credits.

News gathering and production for television. Students produce live programming for local cable systems. Journalism majors only.

Prereq: J 331, J 361, J 432 with a grade better than C-.

J 436. Media Design: [Topic]. 4 Credits.

Focuses on issues and techniques in picture and graphic editing, typography, and work-picture composition and interaction for long-form visual storytelling across legacy- and emerging-media platforms. Repeatable twice for a maximum of 12 credits.

Prereq: J 361 with a grade better than C-.

J 443. Advertising Media Planning. 4 Credits.

Objectives and strategy for determining effective methods of reaching a designated target audience. Use of media measurement tools.

Journalism: advertising majors only.

Prereq: J 207, J 342 with a grade better than C-.

J 444. Agency Account Management. 4 Credits.

The role of the account executive in the advertising agency examined through case studies. Journalism: advertising majors only.

Prereq: J 211 and J 342 with a grade better than C-.

J 448. Advertising Campaigns. 4 Credits.

Seniors produce a comprehensive campaign involving every aspect of advertising, ranging from market research through creative and media strategy formulation to execution. Journalism: advertising majors only. Prereq: three from J 443, J 444, J 457, J 458, J 459, J 460 with a grade better than C-.

J 449. Advanced Advertising Campaigns. 5 Credits.

Team experience of creating a professional-level advertising plan. Students participate in a national competition. Journalism: advertising majors only.

J 452. Strategic Public Relations Communication. 4 Credits.

Advanced writing lab emphasizing business communication, direct-to-consumer strategies and techniques, and effective use of web-based communication strategies. Journalism: public relations majors only. Prereq: J 352 with a grade better than C-.

J 453. Strategic Planning and Cases. 4 Credits.

Campaign planning, administration, crisis communication, and issues management, encompassing research, writing objectives and tactics, evaluation methods, and constructing budgets and timelines. Journalism: public relations majors only. Prereq: J 352 with a grade better than C-.

J 454. Public Relations Campaigns. 4 Credits.

Capstone course applying theory, skills, and a team-based approach to researching, planning, presenting, and implementing a campaign for a client. Professional portfolios presented and reviewed. Journalism: public relations majors only. Prereq: J 452, J 453; J 494 with a grade better than C-.

J 457. Curiosity for Strategists. 4 Credits.

Explores the building of intellectual curiosity as a problem-solving technique within the context of culture and media. Emphasis: critical thinking, readings, projects, performance. Journalism: advertising majors only. Prereq: J 211 and J 342 with a grade better than C-.

J 458. Writing Design Concepts. 4 Credits.

Conceptual problem-solving for traditional and emerging media. Emphasis: conceptual development, advertising writing, design, campaigns, presentation of developed work. Journalism: advertising majors only. Prereq: J 211 and J 342 with a grade better than C-.

J 459. Branding and Content. 4 Credits.

Capstone course on brand portfolio development for writers, art directors, and strategists. Emphasis: production, multiple-platform creative development, industry-focused portfolios. For Journalism: advertising majors only. Prereq: J 205, J 206, J 207, J 342 with a grade better than C-.

J 460. Brand Development: [Topic]. 4 Credits.

Revolving topics on emerging issues in branding and advertising, including strategies in digital and interactive brand solutions, media decision-making, and sustainability. Journalism: advertising majors only. Repeatable three times for a maximum of 16 credits when topic changes. Prereq: J 205 and J 206 and J 342, or J 211 and J 342, with a grade better than C-.

J 461. Newspaper Editing. 4 Credits.

Copyediting, headline writing, and page design for newspapers in print and online; emphasis on grammar and style. Journalism majors only. Prereq: J 361 or equivalent with a grade better than C-.

J 462. Reporting II. 4 Credits.

In-depth reporting on public affairs and community news. Journalism majors only. Prereq: J 361 with a grade better than C-.

J 463. Specialized Reporting: [Topic]. 1-4 Credits.

Reporting special topics, including the environment, business and economics, politics, health and medicine, science, and the arts; and digital and multiplatform journalism. Journalism majors only. Repeatable. Prereq: J 361 with a grade better than C-.

J 466. Advanced Photojournalism: [Topic]. 4 Credits.

Intensive visual reporting techniques, with emphasis on digital production, color, lighting, in-depth storytelling, documentary, and portfolio. Majors only. Repeatable three times for a maximum of 16 credits when topic changes. Prereq: J 365 with a grade better than C-.

J 467. Issues in International Communication: [Topic]. 4 Credits.

Topics focus on global media issues. Majors and minors only; cinema studies majors for approved topics. Repeatable twice for a maximum of 12 credits when topic changes. Prereq: J 201 with a grade better than C-.

J 468. Advanced News Editing. 4 Credits.

Advanced training in news editing under newsroom conditions. Discussion of issues in editing, headline writing, and news judgment. Includes work with web-based journalism. Focus on teamwork. Journalism majors only. Prereq: J 461 with a grade better than C-.

J 469. OR Magazine. 4 Credits.

Building skills in journalistic storytelling and multimedia production of a digital magazine for distribution via mobile devices. Repeatable once for a maximum of 8 credits.

J 472. Feature Writing II. 4 Credits.

In-depth story research and advanced feature writing for print and online markets. Individual conferences. Journalism majors only. Prereq: J 361, J 371 with a grade better than C-.

J 475. Flux Production. 1-5 Credits.

Planning and production of "Flux" magazine. Students make and carry out assignments, write and edit stories, take photos, shoot video, sell advertising, and design the magazine. Repeatable for a maximum of 12 credits. Prereq: J 211, J 212, J 213, J 331, J 361 with a grade better than C-.

J 477. Topics in Science of Science Communication: [Topic]. 4 Credits.

This course dives deeply into issues related to the science of science communication, including more advanced exploration of health communication, decision making, numeracy, and environmental communication. Students will focus on developing research projects in consultation with the instructor. Repeatable twice for a maximum of 12 credits when topic changes. Prereq: J 377.

J 478. Producing the Science Story: [Topic]. 4 Credits.

This course focuses on producing stories about science for a variety of media. Students will incorporate research from the science of science communication in crafting story strategies for specific audiences. Additional focus will be on innovative storytelling strategies for complicated subjects using journalistic practice. Repeatable twice for a maximum of 12 credits when topic changes. Prereq: J 377.

J 480. Public Relations: [Topic]. 4 Credits.

Addresses a specific theory, method, or issue in the study and practice of public relations, such as international practice or strategic use of new media. Repeatable thrice when topic changes for a maximum of 16 credits.

J 483. The Journalistic Interview. 4 Credits.

Gathering information through asking questions. Literature and research findings on techniques of listening, nonverbal communication, and psychological dynamics of the interview relationship in journalistic situations. Journalism majors only.

Prereq: J 361 with a grade better than C-.

J 489. Media Entrepreneurship. 4 Credits.

Media Entrepreneurship introduces students from journalism and communication-based fields to the fundamentals of the entrepreneurship and innovation, and gives them an opportunity to conceive, develop and test original media business ideas.

Prereq: SOJC undergrads: Media studies: J 314 with a grade better than C-; Journalism: J 361 with a grade better than C-; Advertising: J 342 with a grade better than C-; Public relations: J 352 with a grade better than C-.

J 494. Strategic Communications Research. 4 Credits.

Introduction to how and why research is conducted and used by public relations and advertising professionals to formulate strategic campaigns and evaluate their effectiveness. Majors only.

Prereq: J 342 or J 350.

J 495. Research Methods: [Topic]. 4 Credits.

Uses a variety of quantitative and qualitative methods to examine concepts and processes of research used in such areas as advertising, public relations, journalism, strategic communication, and communication studies. Majors and minors only. Repeatable when topic changes for a maximum of 12 credits.

Prereq: J 201 with a grade better than C-.

J 496. Communication Ethics and Law: [Topic]. 4 Credits.

Analyses of ethical and legal issues confronting the communications industry using various ethical and legal theories, readings, and cases relevant to the specific topic. Majors and minors only. Repeatable once for a maximum of 8 credits when topic changes.

Prereq: J 201 with a grade better than C-.

J 500M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

J 503. Thesis. 1-9 Credits.

Repeatable.

J 507. Seminar: [Topic]. 1-4 Credits.

Repeatable.

J 508. Workshop: [Topic]. 1-6 Credits.

Repeatable.

J 510. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

J 511M. US Film Industry. 4 Credits.

Traces the past and present of the U.S. film industry. Multilisted with CINE 511M.

J 512. Issues in Communication Studies: [Topic]. 4 Credits.

Uses a variety of theories and methods to examine specific aspects of media content, processes, and audiences. Majors only. Repeatable three times for a maximum of 16 credits when topic changes.

J 516. Survey of the Documentary. 4 Credits.

Historical and critical survey of the documentary as a form of artistic expression and an instrument of social commentary. Majors, cinema studies majors, and media studies minors only.

J 520. Documentary Pre-Production. 4 Credits.

Students learn to research, plan, budget for, and develop a documentary film idea. They gain experience shooting a sizzle and pitching projects to potential producers. Several documentary forms will be explored, including portraits, ethnographies, interviews, personal stories, processes and events, and re-enactments.

J 521. Documentary Production. 4 Credits.

Get experience shooting a short documentary worthy of broadcast screening, film festival exhibition, or another venue.

J 522. Documentary Post-Production. 4 Credits.

Trains students with to edit and do post-production work on their documentary film projects.

J 527M. Latino Roots I. 4 Credits.

Documents Latino history in the racial history of what is now Oregon since 1500 and teaches students to conduct oral history interviews. Multilisted with ANTH 527M. Sequence with J 528M. Offered alternate years.

J 528M. Latino Roots II. 4 Credits.

Continuation of Latino Roots I, designed for producing a short documentary using oral history as the story. Covers basic theory and practice of digital film-video documentary production. Multilisted with ANTH ANTH 528M. Sequence with J 527M. Offered alternate years. Prereq: J 527M.

J 529. Media Technologies and Society: [Topic]. 1-4 Credits.

Explores the interrelationship between media technologies and social practices and processes in current and historical contexts. Majors and minors only. Repeatable three times for a maximum of 16 credits when topic changes. Open to MEST minors.

J 530. Culture and Power in the Media: [Topic]. 4 Credits.

Explores issues of culture, identity, and power, including the role media play in reinforcing social, political, and economic disparities. Majors and minors only. Repeatable three times for a maximum of 16 credits when topic changes.

J 531. Media Structures and Regulation: [Topic]. 4 Credits.

Explores how the infrastructures and regulatory environments of national and global media institutions influence discourse, democracy, and public life. Majors and MEST minors only. Repeatable three times for a maximum of 16 credits when topic changes.

J 532. Reporting for Electronic Media. 4 Credits.

Training in gathering, production, and presentation of news for the electronic media. Journalism majors only.

J 534. Advanced Television News. 4 Credits.

News gathering and production for television. Students produce live programming for local cable systems. Journalism majors only. Prereq: J 532 with a grade of mid-C or better.

J 536. Media Design: [Topic]. 4 Credits.

Focuses on issues and techniques in picture and graphic editing, typography, and work-picture composition and interaction for long-form visual storytelling across legacy- and emerging-media platforms. Repeatable twice for a maximum of 12 credits.

J 543. Advertising Media Planning. 4 Credits.

Objectives and strategy for determining effective methods of reaching a designated target audience. Use of media measurement tools. Journalism: advertising majors only.

J 544. Agency Account Management. 4 Credits.

The role of the account executive in the advertising agency examined through case studies. Journalism: advertising majors only.

J 548. Advertising Campaigns. 4 Credits.

Graduate students produce a comprehensive campaign involving every aspect of advertising, ranging from market research through creative and media strategy formulation to execution. Journalism: advertising majors only.

Prereq: three from J 543, J 544, J 556, J 557, J 558, J 559, J 560.

J 549. Advanced Advertising Campaigns. 5 Credits.

Team experience of creating a professional-level advertising plan. Students participate in a national competition. Journalism: advertising majors only.

J 552. Strategic Public Relations Communication. 4 Credits.

Advanced writing lab emphasizing business communication, direct-to-consumer strategies and techniques, and effective use of web-based communication strategies. Journalism: public relations majors only.

J 553. Strategic Planning and Cases. 4 Credits.

Campaign planning, administration, crisis communication, and issues management, encompassing research, writing objectives and tactics, evaluation methods, and constructing budgets and timelines. Journalism: public relations majors only.

J 554. Public Relations Campaigns. 4 Credits.

Capstone course applying theory, skills, and a team-based approach to researching, planning, presenting, and implementing a campaign for a client. Professional portfolios presented and reviewed. Journalism: public relations majors only.

Prereq: J 552, J 553; one from J 594, J 595.

J 557. Curiosity for Strategists. 4 Credits.

Explores the building of intellectual curiosity as a problem-solving technique within the context of culture and media. Emphasis: critical thinking, readings, projects, performance. Journalism: advertising majors only.

J 558. Writing Design Concepts. 4 Credits.

Conceptual problem-solving for traditional and emerging media. Emphasis: conceptual development, advertising writing, design, campaigns, presentation of developed work. Journalism: advertising majors only.

J 559. Branding and Content. 4 Credits.

Capstone course on brand portfolio development for writers, art directors, and strategists. Emphasis: production, multiple-platform creative development, industry-focused portfolios. Journalism: advertising majors only.

J 560. Brand Development: [Topic]. 4 Credits.

Revolving topics on emerging issues in branding and advertising, including strategies in digital and interactive brand solutions, media decision-making, and sustainability. Journalism: advertising majors only. Repeatable three times for a maximum of 16 credits when topic changes.

J 561. Newspaper Editing. 4 Credits.

Copyediting, headline writing, and page design for newspapers in print and online; emphasis on grammar and style. Journalism majors only.

J 562. Reporting II. 4 Credits.

In-depth reporting on public affairs and community news. Journalism majors only.

J 563. Specialized Reporting: [Topic]. 1-4 Credits.

Reporting special topics, including the environment, business and economics, politics, health and medicine, science, and the arts; and digital and multiplatform journalism. Journalism majors only. Repeatable.

J 566. Advanced Photojournalism: [Topic]. 4 Credits.

Intensive visual reporting techniques, with emphasis on digital production, color, lighting, in-depth storytelling, documentary, and portfolio. Majors only. Repeatable three times for a maximum of 16 credits when topic changes.

J 567. Issues in International Communication: [Topic]. 4 Credits.

Topics focus on global media issues. Majors only. Repeatable twice for a maximum of 12 credits when topic changes.

J 568. Advanced News Editing. 4 Credits.

Advanced training in news editing under newsroom conditions. Discussion of issues in editing, headline writing, and news judgment. Includes work with web-based journalism. Focus on teamwork. Journalism majors only.

Prereq: J 561 with a grade of mid-C or better.

J 569. OR Magazine. 4 Credits.

Building skills in journalistic storytelling and multimedia production of a digital magazine for distribution via mobile devices. Repeatable once for a maximum of 8 credits.

J 572. Feature Writing II. 4 Credits.

In-depth story research and advanced feature writing for print and online markets. Individual conferences. Journalism majors only.

J 575. Flux Production. 1-5 Credits.

Repeatable. Planning and production of "Flux" magazine. Students make and carry out assignments, write and edit stories, take photos, shoot video, sell advertising, and design the magazine. Repeatable for a maximum of 12 credits.

J 577. Topics in Science of Science Communication: [Topic]. 4 Credits.

This course dives deeply into issues related to the science of science communication, including more advanced exploration of health communication, decision making, numeracy, and environmental communication. Students will focus on developing research projects in consultation with the instructor. Repeatable twice for a maximum of 12 hours when topic changes.

J 578. Producing the Science Story: [Topic]. 4 Credits.

This course focuses on producing stories about science for a variety of media. Students will incorporate research from the science of science communication in crafting story strategies for specific audiences. Additional focus will be on innovative storytelling strategies for complicated subjects using journalistic practice. Repeatable twice for a maximum of 12 credits when topic changes.

J 580. Public Relations: [Topic]. 4 Credits.

Addresses a specific theory, method, or issue in the study and practice of public relations, such as international practice or strategic use of new media. Repeatable thrice when topic changes for a maximum of 16 credits.

J 583. The Journalistic Interview. 4 Credits.

Gathering information through asking questions. Literature and research findings on techniques of listening, nonverbal communication, and psychological dynamics of the interview relationship in journalistic situations. Journalism majors only.

J 589. Media Entrepreneurship. 4 Credits.

Media Entrepreneurship introduces students from journalism and communication-based fields to the fundamentals of the entrepreneurship and innovation, and gives them an opportunity to conceive, develop and test original media business ideas.

J 594. Strategic Communications Research. 4 Credits.

Introduction to how and why research is conducted and used by public relations and advertising professionals to formulate strategic campaigns and evaluate their effectiveness. Majors only.

J 595. Research Methods: [Topic]. 4 Credits.

Uses a variety of quantitative and qualitative methods to examine concepts and processes of research used in such areas as advertising, public relations, journalism, strategic communication, and communication studies. Journalism majors only. Repeatable when topic changes for a maximum of 12 credits.

J 596. Communication Ethics and Law: [Topic]. 4 Credits.

Analyses of ethical and legal issues confronting the communications industry using various ethical and legal theories, readings, and cases relevant to the specific topic. Majors only. Repeatable once for a maximum of 8 credits when topic changes.

J 601. Research: [Topic]. 1-6 Credits.

Repeatable for maximum of 16 credits.

J 602. Supervised College Teaching. 1-5 Credits.

Repeatable for maximum of 5 credits.

J 603. Dissertation. 1-16 Credits.

Course may be repeated 25 times for credit after the initial instance.

J 604. Internship: [Topic]. 1-6 Credits.

Repeatable for maximum of 12 credits.

J 605. Special Problems: [Topic]. 1-12 Credits.

Repeatable.

J 606. Practicum: [Topic]. 1-6 Credits.

Repeatable for maximum of 16 credits.

J 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

J 608. Workshop: [Topic]. 1-6 Credits.

Repeatable for maximum of 16 credits.

J 609. Terminal Project. 1-6 Credits.

Repeatable for maximum of 6 credits.

J 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

J 611. Mass Communication and Society. 4 Credits.

Review of the literature of mass communication. Introduction to graduate study in journalism and communication.

J 612. Media Theory I. 5 Credits.

First in a three-part sequence introducing students to media theory, focusing on the social scientific tradition. Sequence with J 613, J 614.

J 613. Media Theory II. 5 Credits.

Second in a three-part sequence introducing students to media theory, focusing on critical approaches. Sequence with J 612, J 614.
Prereq: J 612.

J 614. Media Theory III. 5 Credits.

Third in a three-part sequence introducing students to media theory, focusing on contemporary theoretical perspectives.
Prereq: J 613.

J 616. Introduction to Strategic Communication Marketing. 4 Credits.

Discussion of fundamental marketing concepts from the perspective of the manager. Analysis of complex marketing challenges in research, segmentation, targeting, pricing, distribution, and branding.

J 617. Strategic Communication Theory and Research: [Topic]. 4 Credits.

Theory, research, and practice of strategic communication. Topics may include relationship management, risk communication, identity and culture, and social media theory. Repeatable when topic changes for a maximum of 20 credits.

Prereq: graduate standing.

J 618. Strategic Communication Management. 4 Credits.

Elements of managing and leading organizations; examination of key issues faced by leaders. Topics include leadership theory, leading change, dealing with conflict, and performance and strategic management.

J 619. Teaching and the Professional Life. 4 Credits.

Explores teaching strategies, curriculum development, and other aspects of academic professional life in journalism and communication.

J 621. Foundations of Strategic Communication. 4 Credits.

Reviews major theories, models, and practices in strategic communications. Theoretical topics include media effects and persuasion as applied to public relations, advertising, and other strategic communication.

J 623. Creativity in Strategic Communication. 4 Credits.

Explores the use of creative conceptual thinking as part of the strategic basis in successful communication campaigns.

J 624. Strategic Communication: [Topic]. 2 Credits.

Explores problems and specialized skills needed in strategic communication management. Examples include crisis communication, creativity in business, corporate social responsibility. Repeatable up to five times with change in topic.

J 627. Foundations of Multimedia Journalism. 4 Credits.

Serves as a foundation of theory and technique, with an introduction to storytelling forms, technical production skills, and the visual language. Students will learn how to use the tools of the trade so that they can communicate effectively with other multimedia journalists.

J 628. Multimedia Journalism Practices. 4 Credits.

Building on the J 627 course, students create a narrative video project that focuses on visual storytelling, character development, and present-tense storytelling.

J 629. Media and Communication Ethics: [Topic]. 4 Credits.

This course explores ethical issues facing media workers and media users in culture and society today. Topics may include digital ethics, strategic communication ethics, visual ethics and global media ethics.

J 635. Thinking Story. 4 Credits.

Recognize and use fundamental approaches to narrative storytelling to create dynamic and engaging multimedia projects.

J 639. Foundations of Explanatory Video Journalism. 4 Credits.

Students explore and practice concepts in visual explanation and explanatory video.

J 641. Qualitative Research Methods. 4 Credits.

Introduces qualitative research methods including traditional historical inquiry, oral history, ethnography, and participant observation.

J 642. Quantitative Research Methods. 4 Credits.

Introduces and analyzes quantitative research methods in terms of design, measurement, inference, and validity. Focuses on conceptualization in communication research.

J 643. Advanced Doctoral Seminar. 5 Credits.

Seminar participants demonstrate competence in broad families of social research by drawing on skills and knowledge obtained in J 612, J 613, J 614, J 641, and J 642.

Prereq: J 612, J 613, J 614, J 641, J 642.

J 644. Philosophy of Communication. 4 Credits.

Explores the philosophical foundations of communication in the United States, including political philosophies that range from Milton to McLuhan.

J 646. Political Economy of Communication. 4 Credits.

Introduction to the political economy of communication. Includes such issues as ownership and control patterns; the role of the state; labor; intellectual property rights; and international markets.

J 648. Cultural Approaches to Communication. 4 Credits.

Examination of communication and mediated communication as cultural processes in the production and reproduction of social systems.

J 649. International Communication. 4 Credits.

Examines global communication structures and processes and their consequences. Topics include new technologies, news and information organizations, cross-cultural uses of Western media, and information policies.

J 654. Reporting within Communities. 4 Credits.

Students explore and practice emerging "community-first" concepts of journalism and reporting to identify the needs of the communities served, codesigning processes and solutions to keep them engaged.

J 656. Producing the Story. 4 Credits.

Students work collaboratively to create a compelling, ethical work of journalism with impact, applying all aspects of community engagement, reporting, storytelling, and production skills learned in previous terms.

J 660. Advanced Research Methods: [Topic]. 4 Credits.

Explores specific qualitative or quantitative communication research methods. Topics may include discourse analysis, oral history, historical methods, legal methods, content analysis, and survey methods.

Repeatable when topic changes.

Prereq: J 641 or J 642, depending on topic.

J 663. Foundations of Strategic Sport Communication. 4 Credits.

Presents and reviews major theories, models, and practices in sports communication. Theoretical topics include sports media effects and persuasion as applied to broadcast, public relations, advertising, and other strategic communication. Cultural, societal and industry relevance also discussed.

Communication and Media Studies

- Master of Arts
- Master of Science
- Doctor of Philosophy

Graduate Studies

The master of arts (MA) and master of science (MS) programs at the University of Oregon School of Journalism and Communication seek to expose students to a wide range of ideas concerning the structure, function, and role of the media in society.

The professional journalism master's program offers a twelve- to fifteen-month program designed for those holding bachelor's degrees but who have little or no academic or professional journalistic or media background. Graduate students in this program acquire professional skills.

The master's program in advertising and brand responsibility is a one-year graduate program designed to prepare students to guide strong brands in areas such as sustainability, privacy and data protection, social justice, and diversity.

The Portland-based multimedia journalism master's program, offered evenings and weekends, is designed to prepare experienced journalists with the skills needed for multimedia storytelling and for the entrepreneurial imperatives of the contemporary media business environment.

The Portland-based strategic communication master's program, offered evenings and weekends, provides advanced conceptual and tactical skills for working professionals in industries such as public relations, advertising, marketing communication, and corporate communication.

Information about and applications for graduate programs are available on the School of Journalism and Communication website.

Financial Assistance

The school provides a number of graduate scholarships and graduate employee (GE) opportunities. Scholarships range from \$500 to \$15,000. Graduate employees assist faculty members with teaching, research, and administrative responsibilities. Please note that GE positions are only open to communication and media studies students.

International Students

A firm mastery of English, including American mass-communication idiom, is necessary for success at the graduate level. International students who lack such mastery are required to attend courses at the American English Institute on campus before participating in the graduate program. Though these courses do not carry graduate credit, they qualify to meet students' visa requirements. The best time to enroll in the institute's courses is the summer session preceding the first term in the graduate program.

Admission Requirements

Admission to the graduate program is granted for fall term for media studies, multimedia journalism, and strategic communication and media studies; summer session for the Eugene-based professional master's degree in journalism. Application materials are the same for the master's and the doctoral programs. Applicants to the master's programs must have received a BS or BA or equivalent prior to the first term of enrollment; applicants to the doctoral program must have received an MA or MS or equivalent. To be considered for admission, an applicant must submit the following:

1. Official transcripts from all institutions where undergraduate and graduate work was completed. The minimum undergraduate GPA

for admission is 3.00. In exceptional cases, an applicant with a lower GPA may be admitted conditionally

2. *Optional*: Official Graduate Record Examination (GRE) scores no more than five years old
3. A 750- to 1,000-word essay describing the applicant's academic and career goals
4. An up-to-date résumé or curriculum vitae
5. A portfolio, string book, clips, or other evidence of relevant professional work or evidence of scholarly writing and research. Doctoral applicants may include a copy of a master's thesis
6. Three letters of recommendation—preferably two from academic sources
7. International students must also submit documentation for either a Test of English as a Foreign Language (TOEFL) score of 100 or better or an International English Language Testing System (IELTS) score of 7 or better.

Application deadlines

- Doctoral program: January 1
- Communication and media studies master's degree: February 1
- Admission to the graduate program is granted for fall term (summer session for professional master's program students in the Eugene-based journalism *only*; designate summer session as the start date on your application for admission)

Advising

An advisor is appointed for each graduate student in the school by the program director.

Course programs for graduate students are planned individually in consultation with advisors. Graduate students should meet with their advisors at least once a term.

Requirements for Graduation

A graduate student in the School of Journalism and Communication cannot elect the pass/no pass (P/N) option for a graduate course offered by the school unless that course is offered P/N only.

Master's Degree Program in Communication and Media Studies

This major emphasizes communication theory and research, possibly preparatory to work for a PhD degree. An undergraduate education in journalism and communication or professional experience is required for admission. Candidates for this MA or MS degree must earn at least 46 graduate credits with a cumulative GPA of 3.00 or higher. Courses that do not carry graduate credit do not count toward the 46-credit minimum and are not considered in determining the graduate GPA.

Please note: The requirements below are under revision. Please see the School of Journalism and Communication website for the current requirements.

Master of Arts Degree Requirements

Code	Title	Credits
J 611	Mass Communication and Society ¹	4
J 612	Media Theory I	5
J 613	Media Theory II	5
Select one of the following:		8

Option 1

J 641	Qualitative Research Methods	
or J 642	Quantitative Research Methods	
Methodology course (inside or outside the School of Journalism and Communication)		

Option 2

J 641	Qualitative Research Methods	
J 642	Quantitative Research Methods	
Additional 600-level conceptual courses in the School of Journalism and Communication ²		4-12
Graduate courses outside the School of Journalism and Communication ³		8-16
J 503	Thesis ⁴	6-9
or J 609	Terminal Project	

¹ Taken in the first year of graduate study.

² Subject to approval by the school's graduate affairs committee.

³ The courses chosen must be part of a consistent, related, educationally enhancing plan that has been approved by the student's advisor prior to enrollment.

⁴ Approved and supervised by a faculty committee. A written proposal, approved by the advisor and committee, is required before work is begun on either a thesis or project. A student should register for Thesis (J 503) or Terminal Project (J 609) during the terms in which the research and writing occurs.

In addition, the master of arts requires second-year foreign language proficiency. See the Division of Graduate Studies website for details.

Master of Science Degree Requirements

Code	Title	Credits
J 611	Mass Communication and Society ¹	4
J 612	Media Theory I	5
J 613	Media Theory II	5
Select one of the following:		8

Option 1

J 641	Qualitative Research Methods	
or J 642	Quantitative Research Methods	
Methodology course (inside or outside the School of Journalism and Communication)		

Option 2

J 641	Qualitative Research Methods	
J 642	Quantitative Research Methods	
Additional 600-level conceptual courses in the School of Journalism and Communication ²		4-12
Graduate courses outside the School of Journalism and Communication ³		8-16
J 503	Thesis ⁴	6-9
or J 609	Terminal Project	

¹ Taken in the first year of graduate study.

² Subject to approval by the school's graduate affairs committee.

³ The courses chosen must be part of a consistent, related, educationally enhancing plan that has been approved by the student's advisor prior to enrollment.

- ⁴ Approved and supervised by a faculty committee. A written proposal, approved by the advisor and committee, is required before work is begun on either a thesis or project. A student should register for Thesis (J 503) or Terminal Project (J 609) during the terms in which the research and writing occurs.

Students typically take five or six terms to complete the program.

The curriculum in communication and media studies is in the process of being revised. Check the journalism school website for the most current degree requirements.

Doctoral Degree Program

The PhD degree program in communication and media studies trains candidates to do research on a broad array of interdisciplinary questions related to communication and society. The school features course work that explores the cultural, economic, and political aspects of communication and society. Three overlapping areas of faculty and program strength are media institutions; ethics, law, and policy; and international and multicultural communication. The program emphasizes an appreciation of quantitative and qualitative methodologies and offers faculty expertise in content analysis, survey methodology, historical and legal methods, discourse analysis, ethnography, and oral history. Faculty members in departments and schools outside the School of Journalism and Communication have complementary areas of conceptual and methodological expertise to assist in guiding doctoral research.

Doctor of Philosophy Degree

Candidates for the PhD degree in communication and media studies typically take about 80 graduate-level credits of course work beyond the master's degree; the exact number of credits depends on the student's graduate-study experience. The program concludes with a dissertation. Specific requirements follow.

Please note: The requirements below are under revision. Please see the School of Journalism and Communication website for the current requirements.

Code	Title	Credits
J 612	Media Theory I	5
J 613	Media Theory II	5
J 619	Teaching and the Professional Life ⁵	4
J 641	Qualitative Research Methods ¹	4
J 642	Quantitative Research Methods ¹	4
J 643	Advanced Doctoral Seminar ¹	5
Courses in outside field ²		18
Two additional methods courses ³		8
At least three 600-level courses (611 and above) within the School of Journalism and Communication ⁴		12
J 603	Dissertation ⁶	18
Total Credits		83

¹ Completed within the first three terms of study.

² In close consultation with an academic advisor and the school's graduate studies director, each student designs an integrated outside-field component for his or her program. Because the program stresses the interconnection of communication with other disciplines, the outside field may involve more than one outside department.

³ Taken within or outside the school.

- ⁴ Subject to approval by the school's graduate affairs committee. J 601–610 do not count toward this requirement. In some cases, appropriate courses from outside the journalism school may count toward this requirement.
- ⁵ Appropriate teaching experiences are arranged following completion of the course.
- ⁶ A professionally central experience in the design, conduct, and dissemination of original research. It is written after the student's proposed dissertation topic is approved.

The curriculum in communication and media studies is in the process of being revised. Check the journalism school website for the most current degree requirements.

Additional Requirements

- After course work is complete, the student, the graduate studies director, and the student's comprehensive examination committee schedule an examination that requires a synthesis of what the student has learned.
- After passing the comprehensive examination, the student writes a dissertation proposal. The proposal must be approved in writing at a meeting of the dissertation committee, usually within one term of the comprehensive exam. The committee must approve the proposal before the student may advance to candidacy and enroll in dissertation credits.

Courses

J 100. Media Professions. 2 Credits.

Introduction to dynamic media and communication professions, opportunities, and issues, as well as to majors in journalism and communication.

J 101. Grammar for Communicators. 2 Credits.

Intensive review of grammar, word use, spelling, and principles of clear, concise writing. Introduction to media style. Premajor status required.

J 196. Field Studies: [Topic]. 1-2 Credits.

Repeatable.

J 198. Workshop: [Topic]. 1-12 Credits.

Repeatable.

J 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

J 201. Media and Society. 4 Credits.

Introduction to the critical examination of the roles of media in society.

J 208. Introduction to Documentary Production. 4 Credits.

Introduction to the theory and practice of documentary production.

Focuses on aesthetics, technology, research, and writing fundamentals of documentary making, covering preproduction, production and postproduction. Cinema studies majors only.

Prereq: J 201, CINE 260M or ENG 260M; two from CINE 265, CINE 266, CINE 267.

J 211. Gateway to Media. 8 Credits.

Integrates critical thinking, creative thinking, and basic skills for nonfiction storytelling through words, photos, audio, and video. Majors only.

Prereq: J 100, J 101, J 201, and either CHC enrollment or completion of the WR requirement.

J 212. Writing for Communicators. 4 Credits.

Course builds on what was learned in Grammar for Communicators course (J 101) to help students develop the ability to write for a variety of professional platforms and to achieve the appropriate strategic purpose. Prereq: J 100, J 101, J 201, and either CHC enrollment or completion of the WR requirement.

J 213. Fact or Fiction. 4 Credits.

This course helps students grapple with information in the digital age to evaluate how media professionals develop notions of truth, ethics, and transparency. It covers information credibility, social media algorithms, and data and numerical literacy.

Prereq: J 100, J 101, J 201, and either CHC enrollment or completion of the WR requirement.

J 250. Media Studies Production. 2 Credits.

This course complements an understanding of production skills and practice from Gateway to Media by adding critical and cultural theory. By examining the relationship between theory and practice, students gain deeper knowledge of how production practices impact cultural and society.

Prereq: J 211.

J 299. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

J 314. Introduction to Media Studies. 4 Credits.

Presents a historical overview of the study of media, with in-depth discussion of primary theoretical approaches and their application to the current media environment. Majors only.

Prereq: J 201 with a grade better than C-.

J 315H. Honors Media Theory and Research. 4 Credits.

Foundation course for honors program. Introduction to seminal theories in communication; overview of methodologies used in the study of theories. Acceptance into School of Journalism and Communication honors program required for enrollment.

J 320. Gender, Media, and Diversity. 4 Credits.

Critical study of the media with regard to gender, race, ethnicity, and other social divisions. Ramification and possible mechanisms of change.

Prereq: J 201 with a grade better than C-.

J 331. Digital Video Production. 4 Credits.

Introduction to techniques of single-camera field video production. Journalism and cinema studies majors only.

Prereq: (J 205 and J 206) or J 208 or J 211 with a grade better than C-.

J 333. Writing for Multimedia. 4 Credits.

Introduction to the process and practice of writing for multimedia, including print, audio-video, computer-assisted presentation, web-based applications, and striking the balance between word and image. Journalism majors or multimedia minor standing only.

Prereq: ARTD 250, ARTD 251, ARTD 252.

J 340. Principles of Advertising. 4 Credits.

Role of advertising in the distribution of goods and services; the advertising agency; the campaign; research and testing; the selection of media: print, electronic, outdoor advertising, direct mailing. Not for journalism: advertising majors only.

J 342. The Creative Strategist. 4 Credits.

Creative approaches to ideation and strategic thinking for all advertising industry specialties. Emphasis on creative process, generative techniques, teamwork, career planning, industry trends. Journalism: advertising majors only.

Prereq: J 211, J 212 with a grade better than C-.

J 350. Principles of Public Relations. 4 Credits.

Overview of public relations practice in a diverse global society, including theory, career opportunities, history, communication forms and channels, and legal and ethical concerns.

J 352. Strategic Writing and Media Relations. 4 Credits.

Writing-intensive lab; students produce strategic, theory-based content for multiple media platforms using various journalistic styles and storytelling skills and incorporating ethical media-relations practices.

Prereq: J 211, J 212, J 213, J 350 with a grade of better than C-.

J 361. Reporting I. 4 Credits.

News gathering and writing. Extensive writing in class and outside of class in a variety of forms: news, features, interviews, multimedia scripts. Journalism majors only.

Prereq: (J 205 and J 206) or J 211 with a grade better than C-.

J 365. Photojournalism. 4 Credits.

Visual reporting techniques, with emphasis on practice, law, and ethics of photojournalism and photographic communication. Laboratory and portfolio-intensive. Majors only.

Prereq: (J 205 and J 206) or J 211 with a grade better than C-.

J 371. Feature Writing I. 4 Credits.

Introduction to feature writing for print and online media; marketing your ideas and stories. Journalism majors only.

Prereq: J 361 with a grade better than C-.

J 377. Science of Science Communication. 4 Credits.

In this class students will delve deeper into the theoretical foundations of science communication as a discipline. Students will develop an understanding of the different models of science communication, their benefits, drawbacks, and current use in a variety of contexts.

Prereq: We recommend two area satisfying courses in the sciences.

J 385. Communication Law. 4 Credits.

Legal aspects of the media: constitutional freedom of expression, news gathering, access to public records, libel, privacy, copyright, advertising, electronic media regulation, and antitrust.

Prereq: J 201 with a grade better than C-.

J 387. Media History. 4 Credits.

The changing structure and character of the media in the United States.

Prereq: J 201 with a grade better than C-.

J 396. International Communication. 4 Credits.

National and cultural differences in media and information systems, global news and information flows, implications of rapid technological change, and communication and information policies.

Prereq: J 201 with a grade better than C-.

J 397. Media Ethics. 4 Credits.

Ethical problems in the media: privacy, violence, pornography, truth-telling, objectivity, media codes, public interest, media accountability.

Prereq: J 201 with a grade better than C-.

J 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

J 400M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

J 401. Research: [Topic]. 1-9 Credits.

Repeatable.

J 403. Thesis. 1-9 Credits.

Repeatable.

J 404. Internship: [Topic]. 1-9 Credits.

Repeatable for maximum of 9 credits.

J 405. Special Problems: [Topic]. 1-12 Credits.

Repeatable.

J 406. Practicum: [Topic]. 1-12 Credits.

Repeatable.

J 407. Seminar: [Topic]. 1-4 Credits.

Repeatable.

J 408. Workshop: [Topic]. 1-6 Credits.

Repeatable.

J 409. Terminal Project. 1-12 Credits.

Repeatable.

J 410. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

J 411M. US Film Industry. 4 Credits.

Traces the past and present of the U.S. film industry, examining key moments in the development of Hollywood, including the consolidation and restructuring of the major movie studios, the film industry's relationship to TV and the Internet. Journalism Majors and MEST minor.

Prereq: J 201 with a grade better than C-.

J 412. Issues in Communication Studies: [Topic]. 4 Credits.

Uses a variety of theories and methods to examine specific aspects of media content, processes, and audiences. Majors only. Repeatable three times for a maximum of 16 credits when topic changes.

Prereq: J 201 with a grade better than C-.

J 413. Communication Studies Capstone. 4 Credits.

Draws on skills and knowledge learned in other communications studies and related courses to demonstrate competence in broad areas of research.

Prereq: J 211, J 212, J 213, J 314 with a grade better than C-.

J 415. Media Studies Research Methods. 4 Credits.

This course provides the core skills necessary to critically evaluate scientific and analytic studies and conduct research in the media studies tradition. Students learn basic principles of media studies research methods, such as experiments, surveys, naturalistic observations, and interviews.

Prereq: J 201, J 314.

J 416. Survey of the Documentary. 4 Credits.

Historical and critical survey of the documentary as a form of artistic expression and an instrument of social commentary. Majors, cinema studies majors, and media studies minors only.

Prereq: J 201 with a grade better than C-.

J 420. Documentary Pre-Production. 4 Credits.

Students learn to research, plan, budget for, and develop a documentary film idea. They gain experience shooting a sizzle and pitching projects to potential producers. Several documentary forms will be explored, including portraits, ethnographies, interviews, personal stories, processes and events, and re-enactments.

Prereq: J 208.

J 421. Documentary Production. 4 Credits.

Get experience shooting a short documentary worthy of broadcast screening, film festival exhibition, or another venue.

Prereq: For SOJC students J 208 and J 420 with a grade better than C-.

For CINE students: J 208 and permission of the instructor.

J 422. Documentary Post-Production. 4 Credits.

Trains students with to edit and do post-production work on their documentary film projects.

Prereq: J 208, J 420, J 421.

J 424H. Honors Theory and Research: [Topic]. 4 Credits.

Uses a variety of theories and methods to closely examine and analyze contemporary problems and situations in media and communications. Acceptance into School of Journalism and Communication honors program required for enrollment. Repeatable once when topic changes for a maximum of 8 credits.

J 427M. Latino Roots I. 4 Credits.

Documents Latino history in the racial history of what is now Oregon since 1500 and teaches students to conduct oral history interviews. Multilisted with ANTH 427M. Sequence with J 428M. Offered alternate years.

J 428M. Latino Roots II. 4 Credits.

Continuation of Latino Roots I, designed for producing a short documentary using oral history as the story. Covers basic theory and practice of digital film-video documentary production. Multilisted with ANTH 428M. Sequence with J 427M. Offered alternate years.

Prereq: J 427M.

J 429. Media Technologies and Society: [Topic]. 4 Credits.

Explores the interrelationship between media technologies and social practices and processes in current and historical contexts. Majors and minors only. Repeatable three times for a maximum of 16 credits when topic changes. Open to MEST minors.

Prereq: J 201 with a grade better than C-.

J 430. Culture and Power in the Media: [Topic]. 4 Credits.

Explores issues of culture, identity, and power, including the role media play in reinforcing social, political, and economic disparities. Majors and minors only. Repeatable three times for a maximum of 16 credits when topic changes.

Prereq: J 201 with a grade better than C-.

J 431. Media Structures and Regulation: [Topic]. 4 Credits.

Explores how the infrastructures and regulatory environments of national and global media institutions influence discourse, democracy, and public life. Majors and MEST minors only. Repeatable three times for a maximum of 16 credits when topic changes.

Prereq: J 201 with a grade better than C-.

J 432. Reporting for Electronic Media. 4 Credits.

Training in gathering, production, and presentation of news for the electronic media. Journalism majors only.

Prereq: J 331, J 361 with a grade better than C-.

J 434. Advanced Television News. 4 Credits.

News gathering and production for television. Students produce live programming for local cable systems. Journalism majors only.

Prereq: J 331, J 361, J 432 with a grade better than C-.

J 436. Media Design: [Topic]. 4 Credits.

Focuses on issues and techniques in picture and graphic editing, typography, and work-picture composition and interaction for long-form visual storytelling across legacy- and emerging-media platforms. Repeatable twice for a maximum of 12 credits.

Prereq: J 361 with a grade better than C-.

J 443. Advertising Media Planning. 4 Credits.

Objectives and strategy for determining effective methods of reaching a designated target audience. Use of media measurement tools.

Journalism: advertising majors only.

Prereq: J 207, J 342 with a grade better than C-.

J 444. Agency Account Management. 4 Credits.

The role of the account executive in the advertising agency examined through case studies. Journalism: advertising majors only.

Prereq: J 211 and J 342 with a grade better than C-.

J 448. Advertising Campaigns. 4 Credits.

Seniors produce a comprehensive campaign involving every aspect of advertising, ranging from market research through creative and media strategy formulation to execution. Journalism: advertising majors only. Prereq: three from J 443, J 444, J 457, J 458, J 459, J 460 with a grade better than C-.

J 449. Advanced Advertising Campaigns. 5 Credits.

Team experience of creating a professional-level advertising plan. Students participate in a national competition. Journalism: advertising majors only.

J 452. Strategic Public Relations Communication. 4 Credits.

Advanced writing lab emphasizing business communication, direct-to-consumer strategies and techniques, and effective use of web-based communication strategies. Journalism: public relations majors only. Prereq: J 352 with a grade better than C-.

J 453. Strategic Planning and Cases. 4 Credits.

Campaign planning, administration, crisis communication, and issues management, encompassing research, writing objectives and tactics, evaluation methods, and constructing budgets and timelines. Journalism: public relations majors only. Prereq: J 352 with a grade better than C-.

J 454. Public Relations Campaigns. 4 Credits.

Capstone course applying theory, skills, and a team-based approach to researching, planning, presenting, and implementing a campaign for a client. Professional portfolios presented and reviewed. Journalism: public relations majors only. Prereq: J 452, J 453; J 494 with a grade better than C-.

J 457. Curiosity for Strategists. 4 Credits.

Explores the building of intellectual curiosity as a problem-solving technique within the context of culture and media. Emphasis: critical thinking, readings, projects, performance. Journalism: advertising majors only. Prereq: J 211 and J 342 with a grade better than C-.

J 458. Writing Design Concepts. 4 Credits.

Conceptual problem-solving for traditional and emerging media. Emphasis: conceptual development, advertising writing, design, campaigns, presentation of developed work. Journalism: advertising majors only. Prereq: J 211 and J 342 with a grade better than C-.

J 459. Branding and Content. 4 Credits.

Capstone course on brand portfolio development for writers, art directors, and strategists. Emphasis: production, multiple-platform creative development, industry-focused portfolios. For Journalism: advertising majors only. Prereq: J 205, J 206, J 207, J 342 with a grade better than C-.

J 460. Brand Development: [Topic]. 4 Credits.

Revolving topics on emerging issues in branding and advertising, including strategies in digital and interactive brand solutions, media decision-making, and sustainability. Journalism: advertising majors only. Repeatable three times for a maximum of 16 credits when topic changes. Prereq: J 205 and J 206 and J 342, or J 211 and J 342, with a grade better than C-.

J 461. Newspaper Editing. 4 Credits.

Copyediting, headline writing, and page design for newspapers in print and online; emphasis on grammar and style. Journalism majors only. Prereq: J 361 or equivalent with a grade better than C-.

J 462. Reporting II. 4 Credits.

In-depth reporting on public affairs and community news. Journalism majors only. Prereq: J 361 with a grade better than C-.

J 463. Specialized Reporting: [Topic]. 1-4 Credits.

Reporting special topics, including the environment, business and economics, politics, health and medicine, science, and the arts; and digital and multiplatform journalism. Journalism majors only. Repeatable. Prereq: J 361 with a grade better than C-.

J 466. Advanced Photojournalism: [Topic]. 4 Credits.

Intensive visual reporting techniques, with emphasis on digital production, color, lighting, in-depth storytelling, documentary, and portfolio. Majors only. Repeatable three times for a maximum of 16 credits when topic changes. Prereq: J 365 with a grade better than C-.

J 467. Issues in International Communication: [Topic]. 4 Credits.

Topics focus on global media issues. Majors and minors only; cinema studies majors for approved topics. Repeatable twice for a maximum of 12 credits when topic changes. Prereq: J 201 with a grade better than C-.

J 468. Advanced News Editing. 4 Credits.

Advanced training in news editing under newsroom conditions. Discussion of issues in editing, headline writing, and news judgment. Includes work with web-based journalism. Focus on teamwork. Journalism majors only. Prereq: J 461 with a grade better than C-.

J 469. OR Magazine. 4 Credits.

Building skills in journalistic storytelling and multimedia production of a digital magazine for distribution via mobile devices. Repeatable once for a maximum of 8 credits.

J 472. Feature Writing II. 4 Credits.

In-depth story research and advanced feature writing for print and online markets. Individual conferences. Journalism majors only. Prereq: J 361, J 371 with a grade better than C-.

J 475. Flux Production. 1-5 Credits.

Planning and production of "Flux" magazine. Students make and carry out assignments, write and edit stories, take photos, shoot video, sell advertising, and design the magazine. Repeatable for a maximum of 12 credits. Prereq: J 211, J 212, J 213, J 331, J 361 with a grade better than C-.

J 477. Topics in Science of Science Communication: [Topic]. 4 Credits.

This course dives deeply into issues related to the science of science communication, including more advanced exploration of health communication, decision making, numeracy, and environmental communication. Students will focus on developing research projects in consultation with the instructor. Repeatable twice for a maximum of 12 credits when topic changes. Prereq: J 377.

J 478. Producing the Science Story: [Topic]. 4 Credits.

This course focuses on producing stories about science for a variety of media. Students will incorporate research from the science of science communication in crafting story strategies for specific audiences. Additional focus will be on innovative storytelling strategies for complicated subjects using journalistic practice. Repeatable twice for a maximum of 12 credits when topic changes. Prereq: J 377.

J 480. Public Relations: [Topic]. 4 Credits.

Addresses a specific theory, method, or issue in the study and practice of public relations, such as international practice or strategic use of new media. Repeatable thrice when topic changes for a maximum of 16 credits.

J 483. The Journalistic Interview. 4 Credits.

Gathering information through asking questions. Literature and research findings on techniques of listening, nonverbal communication, and psychological dynamics of the interview relationship in journalistic situations. Journalism majors only.

Prereq: J 361 with a grade better than C-.

J 489. Media Entrepreneurship. 4 Credits.

Media Entrepreneurship introduces students from journalism and communication-based fields to the fundamentals of the entrepreneurship and innovation, and gives them an opportunity to conceive, develop and test original media business ideas.

Prereq: SOJC undergrads: Media studies: J 314 with a grade better than C-; Journalism: J 361 with a grade better than C-; Advertising: J 342 with a grade better than C-; Public relations: J 352 with a grade better than C-.

J 494. Strategic Communications Research. 4 Credits.

Introduction to how and why research is conducted and used by public relations and advertising professionals to formulate strategic campaigns and evaluate their effectiveness. Majors only.

Prereq: J 342 or J 350.

J 495. Research Methods: [Topic]. 4 Credits.

Uses a variety of quantitative and qualitative methods to examine concepts and processes of research used in such areas as advertising, public relations, journalism, strategic communication, and communication studies. Majors and minors only. Repeatable when topic changes for a maximum of 12 credits.

Prereq: J 201 with a grade better than C-.

J 496. Communication Ethics and Law: [Topic]. 4 Credits.

Analyses of ethical and legal issues confronting the communications industry using various ethical and legal theories, readings, and cases relevant to the specific topic. Majors and minors only. Repeatable once for a maximum of 8 credits when topic changes.

Prereq: J 201 with a grade better than C-.

J 500M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

J 503. Thesis. 1-9 Credits.

Repeatable.

J 507. Seminar: [Topic]. 1-4 Credits.

Repeatable.

J 508. Workshop: [Topic]. 1-6 Credits.

Repeatable.

J 510. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

J 511M. US Film Industry. 4 Credits.

Traces the past and present of the U.S. film industry. Multilisted with CINE 511M.

J 512. Issues in Communication Studies: [Topic]. 4 Credits.

Uses a variety of theories and methods to examine specific aspects of media content, processes, and audiences. Majors only. Repeatable three times for a maximum of 16 credits when topic changes.

J 516. Survey of the Documentary. 4 Credits.

Historical and critical survey of the documentary as a form of artistic expression and an instrument of social commentary. Majors, cinema studies majors, and media studies minors only.

J 520. Documentary Pre-Production. 4 Credits.

Students learn to research, plan, budget for, and develop a documentary film idea. They gain experience shooting a sizzle and pitching projects to potential producers. Several documentary forms will be explored, including portraits, ethnographies, interviews, personal stories, processes and events, and re-enactments.

J 521. Documentary Production. 4 Credits.

Get experience shooting a short documentary worthy of broadcast screening, film festival exhibition, or another venue.

J 522. Documentary Post-Production. 4 Credits.

Trains students with to edit and do post-production work on their documentary film projects.

J 527M. Latino Roots I. 4 Credits.

Documents Latino history in the racial history of what is now Oregon since 1500 and teaches students to conduct oral history interviews. Multilisted with ANTH 527M. Sequence with J 528M. Offered alternate years.

J 528M. Latino Roots II. 4 Credits.

Continuation of Latino Roots I, designed for producing a short documentary using oral history as the story. Covers basic theory and practice of digital film-video documentary production. Multilisted with ANTH ANTH 528M. Sequence with J 527M. Offered alternate years. Prereq: J 527M.

J 529. Media Technologies and Society: [Topic]. 1-4 Credits.

Explores the interrelationship between media technologies and social practices and processes in current and historical contexts. Majors and minors only. Repeatable three times for a maximum of 16 credits when topic changes. Open to MEST minors.

J 530. Culture and Power in the Media: [Topic]. 4 Credits.

Explores issues of culture, identity, and power, including the role media play in reinforcing social, political, and economic disparities. Majors and minors only. Repeatable three times for a maximum of 16 credits when topic changes.

J 531. Media Structures and Regulation: [Topic]. 4 Credits.

Explores how the infrastructures and regulatory environments of national and global media institutions influence discourse, democracy, and public life. Majors and MEST minors only. Repeatable three times for a maximum of 16 credits when topic changes.

J 532. Reporting for Electronic Media. 4 Credits.

Training in gathering, production, and presentation of news for the electronic media. Journalism majors only.

J 534. Advanced Television News. 4 Credits.

News gathering and production for television. Students produce live programming for local cable systems. Journalism majors only. Prereq: J 532 with a grade of mid-C or better.

J 536. Media Design: [Topic]. 4 Credits.

Focuses on issues and techniques in picture and graphic editing, typography, and work-picture composition and interaction for long-form visual storytelling across legacy- and emerging-media platforms. Repeatable twice for a maximum of 12 credits.

J 543. Advertising Media Planning. 4 Credits.

Objectives and strategy for determining effective methods of reaching a designated target audience. Use of media measurement tools. Journalism: advertising majors only.

J 544. Agency Account Management. 4 Credits.

The role of the account executive in the advertising agency examined through case studies. Journalism: advertising majors only.

J 548. Advertising Campaigns. 4 Credits.

Graduate students produce a comprehensive campaign involving every aspect of advertising, ranging from market research through creative and media strategy formulation to execution. Journalism: advertising majors only.

Prereq: three from J 543, J 544, J 556, J 557, J 558, J 559, J 560.

J 549. Advanced Advertising Campaigns. 5 Credits.

Team experience of creating a professional-level advertising plan. Students participate in a national competition. Journalism: advertising majors only.

J 552. Strategic Public Relations Communication. 4 Credits.

Advanced writing lab emphasizing business communication, direct-to-consumer strategies and techniques, and effective use of web-based communication strategies. Journalism: public relations majors only.

J 553. Strategic Planning and Cases. 4 Credits.

Campaign planning, administration, crisis communication, and issues management, encompassing research, writing objectives and tactics, evaluation methods, and constructing budgets and timelines. Journalism: public relations majors only.

J 554. Public Relations Campaigns. 4 Credits.

Capstone course applying theory, skills, and a team-based approach to researching, planning, presenting, and implementing a campaign for a client. Professional portfolios presented and reviewed. Journalism: public relations majors only.

Prereq: J 552, J 553; one from J 594, J 595.

J 557. Curiosity for Strategists. 4 Credits.

Explores the building of intellectual curiosity as a problem-solving technique within the context of culture and media. Emphasis: critical thinking, readings, projects, performance. Journalism: advertising majors only.

J 558. Writing Design Concepts. 4 Credits.

Conceptual problem-solving for traditional and emerging media. Emphasis: conceptual development, advertising writing, design, campaigns, presentation of developed work. Journalism: advertising majors only.

J 559. Branding and Content. 4 Credits.

Capstone course on brand portfolio development for writers, art directors, and strategists. Emphasis: production, multiple-platform creative development, industry-focused portfolios. Journalism: advertising majors only.

J 560. Brand Development: [Topic]. 4 Credits.

Revolving topics on emerging issues in branding and advertising, including strategies in digital and interactive brand solutions, media decision-making, and sustainability. Journalism: advertising majors only. Repeatable three times for a maximum of 16 credits when topic changes.

J 561. Newspaper Editing. 4 Credits.

Copyediting, headline writing, and page design for newspapers in print and online; emphasis on grammar and style. Journalism majors only.

J 562. Reporting II. 4 Credits.

In-depth reporting on public affairs and community news. Journalism majors only.

J 563. Specialized Reporting: [Topic]. 1-4 Credits.

Reporting special topics, including the environment, business and economics, politics, health and medicine, science, and the arts; and digital and multiplatform journalism. Journalism majors only. Repeatable.

J 566. Advanced Photojournalism: [Topic]. 4 Credits.

Intensive visual reporting techniques, with emphasis on digital production, color, lighting, in-depth storytelling, documentary, and portfolio. Majors only. Repeatable three times for a maximum of 16 credits when topic changes.

J 567. Issues in International Communication: [Topic]. 4 Credits.

Topics focus on global media issues. Majors only. Repeatable twice for a maximum of 12 credits when topic changes.

J 568. Advanced News Editing. 4 Credits.

Advanced training in news editing under newsroom conditions. Discussion of issues in editing, headline writing, and news judgment. Includes work with web-based journalism. Focus on teamwork. Journalism majors only.

Prereq: J 561 with a grade of mid-C or better.

J 569. OR Magazine. 4 Credits.

Building skills in journalistic storytelling and multimedia production of a digital magazine for distribution via mobile devices. Repeatable once for a maximum of 8 credits.

J 572. Feature Writing II. 4 Credits.

In-depth story research and advanced feature writing for print and online markets. Individual conferences. Journalism majors only.

J 575. Flux Production. 1-5 Credits.

Repeatable. Planning and production of "Flux" magazine. Students make and carry out assignments, write and edit stories, take photos, shoot video, sell advertising, and design the magazine. Repeatable for a maximum of 12 credits.

J 577. Topics in Science of Science Communication: [Topic]. 4 Credits.

This course dives deeply into issues related to the science of science communication, including more advanced exploration of health communication, decision making, numeracy, and environmental communication. Students will focus on developing research projects in consultation with the instructor. Repeatable twice for a maximum of 12 hours when topic changes.

J 578. Producing the Science Story: [Topic]. 4 Credits.

This course focuses on producing stories about science for a variety of media. Students will incorporate research from the science of science communication in crafting story strategies for specific audiences. Additional focus will be on innovative storytelling strategies for complicated subjects using journalistic practice. Repeatable twice for a maximum of 12 credits when topic changes.

J 580. Public Relations: [Topic]. 4 Credits.

Addresses a specific theory, method, or issue in the study and practice of public relations, such as international practice or strategic use of new media. Repeatable thrice when topic changes for a maximum of 16 credits.

J 583. The Journalistic Interview. 4 Credits.

Gathering information through asking questions. Literature and research findings on techniques of listening, nonverbal communication, and psychological dynamics of the interview relationship in journalistic situations. Journalism majors only.

J 589. Media Entrepreneurship. 4 Credits.

Media Entrepreneurship introduces students from journalism and communication-based fields to the fundamentals of the entrepreneurship and innovation, and gives them an opportunity to conceive, develop and test original media business ideas.

J 594. Strategic Communications Research. 4 Credits.

Introduction to how and why research is conducted and used by public relations and advertising professionals to formulate strategic campaigns and evaluate their effectiveness. Majors only.

J 595. Research Methods: [Topic]. 4 Credits.

Uses a variety of quantitative and qualitative methods to examine concepts and processes of research used in such areas as advertising, public relations, journalism, strategic communication, and communication studies. Journalism majors only. Repeatable when topic changes for a maximum of 12 credits.

J 596. Communication Ethics and Law: [Topic]. 4 Credits.

Analyses of ethical and legal issues confronting the communications industry using various ethical and legal theories, readings, and cases relevant to the specific topic. Majors only. Repeatable once for a maximum of 8 credits when topic changes.

J 601. Research: [Topic]. 1-6 Credits.

Repeatable for maximum of 16 credits.

J 602. Supervised College Teaching. 1-5 Credits.

Repeatable for maximum of 5 credits.

J 603. Dissertation. 1-16 Credits.

Course may be repeated 25 times for credit after the initial instance.

J 604. Internship: [Topic]. 1-6 Credits.

Repeatable for maximum of 12 credits.

J 605. Special Problems: [Topic]. 1-12 Credits.

Repeatable.

J 606. Practicum: [Topic]. 1-6 Credits.

Repeatable for maximum of 16 credits.

J 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

J 608. Workshop: [Topic]. 1-6 Credits.

Repeatable for maximum of 16 credits.

J 609. Terminal Project. 1-6 Credits.

Repeatable for maximum of 6 credits.

J 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

J 611. Mass Communication and Society. 4 Credits.

Review of the literature of mass communication. Introduction to graduate study in journalism and communication.

J 612. Media Theory I. 5 Credits.

First in a three-part sequence introducing students to media theory, focusing on the social scientific tradition. Sequence with J 613, J 614.

J 613. Media Theory II. 5 Credits.

Second in a three-part sequence introducing students to media theory, focusing on critical approaches. Sequence with J 612, J 614.

Prereq: J 612.

J 614. Media Theory III. 5 Credits.

Third in a three-part sequence introducing students to media theory, focusing on contemporary theoretical perspectives.

Prereq: J 613.

J 616. Introduction to Strategic Communication Marketing. 4 Credits.

Discussion of fundamental marketing concepts from the perspective of the manager. Analysis of complex marketing challenges in research, segmentation, targeting, pricing, distribution, and branding.

J 617. Strategic Communication Theory and Research: [Topic]. 4 Credits.

Theory, research, and practice of strategic communication. Topics may include relationship management, risk communication, identity and culture, and social media theory. Repeatable when topic changes for a maximum of 20 credits.

Prereq: graduate standing.

J 618. Strategic Communication Management. 4 Credits.

Elements of managing and leading organizations; examination of key issues faced by leaders. Topics include leadership theory, leading change, dealing with conflict, and performance and strategic management.

J 619. Teaching and the Professional Life. 4 Credits.

Explores teaching strategies, curriculum development, and other aspects of academic professional life in journalism and communication.

J 621. Foundations of Strategic Communication. 4 Credits.

Reviews major theories, models, and practices in strategic communications. Theoretical topics include media effects and persuasion as applied to public relations, advertising, and other strategic communication.

J 623. Creativity in Strategic Communication. 4 Credits.

Explores the use of creative conceptual thinking as part of the strategic basis in successful communication campaigns.

J 624. Strategic Communication: [Topic]. 2 Credits.

Explores problems and specialized skills needed in strategic communication management. Examples include crisis communication, creativity in business, corporate social responsibility. Repeatable up to five times with change in topic.

J 627. Foundations of Multimedia Journalism. 4 Credits.

Serves as a foundation of theory and technique, with an introduction to storytelling forms, technical production skills, and the visual language. Students will learn how to use the tools of the trade so that they can communicate effectively with other multimedia journalists.

J 628. Multimedia Journalism Practices. 4 Credits.

Building on the J 627 course, students create a narrative video project that focuses on visual storytelling, character development, and present-tense storytelling.

J 629. Media and Communication Ethics: [Topic]. 4 Credits.

This course explores ethical issues facing media workers and media users in culture and society today. Topics may include digital ethics, strategic communication ethics, visual ethics and global media ethics.

J 635. Thinking Story. 4 Credits.

Recognize and use fundamental approaches to narrative storytelling to create dynamic and engaging multimedia projects.

J 639. Foundations of Explanatory Video Journalism. 4 Credits.

Students explore and practice concepts in visual explanation and explanatory video.

J 641. Qualitative Research Methods. 4 Credits.

Introduces qualitative research methods including traditional historical inquiry, oral history, ethnography, and participant observation.

J 642. Quantitative Research Methods. 4 Credits.

Introduces and analyzes quantitative research methods in terms of design, measurement, inference, and validity. Focuses on conceptualization in communication research.

J 643. Advanced Doctoral Seminar. 5 Credits.

Seminar participants demonstrate competence in broad families of social research by drawing on skills and knowledge obtained in J 612, J 613, J 614, J 641, and J 642.

Prereq: J 612, J 613, J 614, J 641, J 642.

J 644. Philosophy of Communication. 4 Credits.

Explores the philosophical foundations of communication in the United States, including political philosophies that range from Milton to McLuhan.

J 646. Political Economy of Communication. 4 Credits.

Introduction to the political economy of communication. Includes such issues as ownership and control patterns; the role of the state; labor; intellectual property rights; and international markets.

J 648. Cultural Approaches to Communication. 4 Credits.

Examination of communication and mediated communication as cultural processes in the production and reproduction of social systems.

J 649. International Communication. 4 Credits.

Examines global communication structures and processes and their consequences. Topics include new technologies, news and information organizations, cross-cultural uses of Western media, and information policies.

J 654. Reporting within Communities. 4 Credits.

Students explore and practice emerging "community-first" concepts of journalism and reporting to identify the needs of the communities served, codesigning processes and solutions to keep them engaged.

J 656. Producing the Story. 4 Credits.

Students work collaboratively to create a compelling, ethical work of journalism with impact, applying all aspects of community engagement, reporting, storytelling, and production skills learned in previous terms.

J 660. Advanced Research Methods: [Topic]. 4 Credits.

Explores specific qualitative or quantitative communication research methods. Topics may include discourse analysis, oral history, historical methods, legal methods, content analysis, and survey methods.

Repeatable when topic changes.

Prereq: J 641 or J 642, depending on topic.

J 663. Foundations of Strategic Sport Communication. 4 Credits.

Presents and reviews major theories, models, and practices in sports communication. Theoretical topics include sports media effects and persuasion as applied to broadcast, public relations, advertising, and other strategic communication. Cultural, societal and industry relevance also discussed.

Communication Ethics

Graduate Certificate in Communication Ethics

Any student who is unconditionally admitted to the Division of Graduate Studies may earn a certificate in communication ethics as an enhancement to a graduate degree. However, the certificate may be of particular interest to the journalism school's graduate students.

The certificate program is designed to provide students with the ability to apply and teach both theoretical and applied ethical decision-making strategies covering a variety of media—from print and broadcast journalism to advertising and public relations, including both message construction and the multiple delivery systems associated with the modern mass media (print, broadcast, electronic, and digital).

Students should be able to fulfill the program requirements within a two-year period, normally in conjunction with their primary graduate emphasis.

Communication Ethics Graduate Certificate Requirements

Code	Title	Credits
J 644	Philosophy of Communication	4
Select three of the following: ¹		12
J 512	Issues in Communication Studies: [Topic]	
J 596	Communication Ethics and Law: [Topic]	
J 646	Political Economy of Communication	
J 648	Cultural Approaches to Communication	
J 649	International Communication	
Approved courses in other departments ²		8
Other journalism or outside courses ^{3,4}		4
Total Credits		28

¹ Students, particularly at the doctoral level, are encouraged to make the 600-level courses a priority. The following list represents courses that have been identified as having a strong or exclusive focus in communication ethics, including topics highly relevant to ethics study.

- Issues in Communication Studies: [Topic] (J 512) (Communication and Democracy)
- Communication Ethics and Law: [Topic] (J 596) (Ethics of Strategic Communication; Persuasion and Ethics; Photo Fiction; Visual Truth)
- Political Economy of Communication (J 646)
- Cultural Approaches to Communication (J 648)
- International Communication (J 649)

² Approved courses are decided in consultation with the student's certificate advisor and are based on relevance to the particular interest area of the student (e.g., political communication, environmental communication, philosophy). The advisor consults with the course instructor before approving a course. Ultimately, program coherence is gained through the core offerings in the school, but may be greatly enhanced through careful choices of outside course work. In most cases, courses in the philosophy department are encouraged as outside choices.

³ No more than 4 credits of Special Problems: [Topic] (J 605) may be applied to the certificate.

⁴ All students pursuing the communication ethics certificate (except PhD students in journalism) must take Mass Communication and Society (J 611). However, it does not count toward the 28 credits required for the graduate certificate.

Additional Requirement

Course work must be taken for letter grades.

The required journalism courses from which students select two courses are generally taught at least once a year. Substitutions may occur if courses are not available. Other, relevant courses may also

be substituted for courses on this list as they are developed or are considered germane to an individual student's program.

Application

For more information on the program and application procedure, contact Tom Bivins, John L. Hulteng Chair in Media Ethics and Responsibility, 541-346-3740, tbivins@uoregon.edu.

Strategic Communication

The School of Journalism and Communication offers a graduate program in strategic communication based at the George S. Turnbull Portland Center. The program, offered evenings and weekends, provides advanced conceptual and tactical skills for working professionals in industries such as public relations, advertising, marketing communication, and corporate communication.

- Master of Arts
- Master of Science

Graduate Studies

The strategic communication master's degree program is designed for working professionals in the Portland area. Classes meet evenings and weekends at the George S. Turnbull Portland Center, 70 NW Couch St.—the White Stag Block in downtown Portland. Students can complete the 48-credit program in two academic years (six terms) by taking as many as 9 course credits for each of six terms, plus at least 6 credits for a final project-portfolio course. Students may also choose to complete the program on a part-time basis and extend the total time to degree.

International Students

A firm mastery of English, including American mass-communication idiom, is necessary for success at the graduate level. International students who lack such mastery are required to attend courses at the American English Institute on campus before participating in the graduate program. Though these courses do not carry graduate credit, they qualify to meet students' visa requirements. The best time to enroll in the institute's courses is the summer session preceding the first term in the graduate program.

Admission Requirements

Admission to the graduate program is granted for fall term for communication and media studies, multimedia journalism, and strategic communication; summer session for the Eugene-based professional master's degree in journalism. Application materials are the same for the master's and the doctoral programs. Applicants to the master's programs must have received a BS or BA or equivalent prior to the first term of enrollment; applicants to the doctoral program must have received an MA or MS or equivalent. To be considered for admission, an applicant must submit the following:

1. Official transcripts from all institutions where undergraduate and graduate work was completed. The minimum undergraduate GPA for admission is 3.00. In exceptional cases, an applicant with a lower GPA may be admitted conditionally
2. *Optional*: Official Graduate Record Examination (GRE) scores no more than five years old
3. A 750- to 1,000-word essay describing the applicant's academic and career goals
4. An up-to-date résumé

5. A portfolio, string book, clips, tapes, or other evidence of relevant professional work or evidence of scholarly writing and research. Doctoral applicants may include a copy of a master's thesis
6. Three letters of recommendation—preferably two from academic sources
7. International students must also submit documentation for either a Test of English as a Foreign Language (TOEFL) score of 100 or better or an International English Language Testing System (IELTS) score of 7 or better

Application deadlines

- Doctoral program: January 1
- Media studies master's degree: February 1
- The professional master's programs have application deadlines throughout the year. For current deadlines, please visit our website at <https://journalism.uoregon.edu/admissions/graduate>.
- Admission to the graduate program is granted for fall term (summer session for professional master's program students in the Eugene-based journalism **only**; designate summer session as the start date on your application for admission).

Advising

An advisor is appointed for each graduate student in the school by the director of graduate studies.

Course programs for graduate students are planned individually in consultation with advisors. Graduate students should meet with their advisors at least once a term.

Requirements for Graduation

A graduate student in the School of Journalism and Communication cannot elect the pass/no pass (P/N) option for a graduate course offered by the school unless that course is offered P/N only.

Master's Degree Program in Strategic Communication

Successful applicants for this program typically have significant professional experience as well as strong academic credentials. Candidates for this MA or MS degree must earn at least 48 credits with a cumulative GPA of 3.00 or better. Courses that do not carry graduate credit do not count toward the graduate credit minimum and are not included in the GPA.

Students typically take six terms to complete the master's program.

See the School of Journalism and Communication website for more detailed and up-to-date information about application requirements, the curriculum, and final project options.

Courses

J 100. Media Professions. 2 Credits.

Introduction to dynamic media and communication professions, opportunities, and issues, as well as to majors in journalism and communication.

J 101. Grammar for Communicators. 2 Credits.

Intensive review of grammar, word use, spelling, and principles of clear, concise writing. Introduction to media style. Premajor status required.

J 196. Field Studies: [Topic]. 1-2 Credits.

Repeatable.

J 198. Workshop: [Topic]. 1-12 Credits.

Repeatable.

J 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

J 201. Media and Society. 4 Credits.

Introduction to the critical examination of the roles of media in society.

J 208. Introduction to Documentary Production. 4 Credits.

Introduction to the theory and practice of documentary production.

Focuses on aesthetics, technology, research, and writing fundamentals of documentary making, covering preproduction, production and postproduction. Cinema studies majors only.

Prereq: J 201, CINE 260M or ENG 260M; two from CINE 265, CINE 266, CINE 267.

J 211. Gateway to Media. 8 Credits.

Integrates critical thinking, creative thinking, and basic skills for nonfiction storytelling through words, photos, audio, and video. Majors only.

Prereq: J 100, J 101, J 201, and either CHC enrollment or completion of the WR requirement.

J 212. Writing for Communicators. 4 Credits.

Course builds on what was learned in Grammar for Communicators course (J 101) to help students develop the ability to write for a variety of professional platforms and to achieve the appropriate strategic purpose.

Prereq: J 100, J 101, J 201, and either CHC enrollment or completion of the WR requirement.

J 213. Fact or Fiction. 4 Credits.

This course helps students grapple with information in the digital age to evaluate how media professionals develop notions of truth, ethics, and transparency. It covers information credibility, social media algorithms, and data and numerical literacy.

Prereq: J 100, J 101, J 201, and either CHC enrollment or completion of the WR requirement.

J 250. Media Studies Production. 2 Credits.

This course complements an understanding of production skills and practice from Gateway to Media by adding critical and cultural theory.

By examining the relationship between theory and practice, students gain deeper knowledge of how production practices impact cultural and society.

Prereq: J 211.

J 299. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

J 314. Introduction to Media Studies. 4 Credits.

Presents a historical overview of the study of media, with in-depth discussion of primary theoretical approaches and their application to the current media environment. Majors only.

Prereq: J 201 with a grade better than C-.

J 315H. Honors Media Theory and Research. 4 Credits.

Foundation course for honors program. Introduction to seminal theories in communication; overview of methodologies used in the study of theories.

Acceptance into School of Journalism and Communication honors program required for enrollment.

J 320. Gender, Media, and Diversity. 4 Credits.

Critical study of the media with regard to gender, race, ethnicity, and other social divisions. Ramification and possible mechanisms of change.

Prereq: J 201 with a grade better than C-.

J 331. Digital Video Production. 4 Credits.

Introduction to techniques of single-camera field video production.

Journalism and cinema studies majors only.

Prereq: (J 205 and J 206) or J 208 or J 211 with a grade better than C-.

J 333. Writing for Multimedia. 4 Credits.

Introduction to the process and practice of writing for multimedia, including print, audio-video, computer-assisted presentation, web-based applications, and striking the balance between word and image. Journalism majors or multimedia minor standing only.
Prereq: ARTD 250, ARTD 251, ARTD 252.

J 340. Principles of Advertising. 4 Credits.

Role of advertising in the distribution of goods and services; the advertising agency; the campaign; research and testing; the selection of media: print, electronic, outdoor advertising, direct mailing. Not for journalism: advertising majors.

J 342. The Creative Strategist. 4 Credits.

Creative approaches to ideation and strategic thinking for all advertising industry specialties. Emphasis on creative process, generative techniques, teamwork, career planning, industry trends. Journalism: advertising majors only.
Prereq: J 211, J 212 with a grade better than C-.

J 350. Principles of Public Relations. 4 Credits.

Overview of public relations practice in a diverse global society, including theory, career opportunities, history, communication forms and channels, and legal and ethical concerns.

J 352. Strategic Writing and Media Relations. 4 Credits.

Writing-intensive lab; students produce strategic, theory-based content for multiple media platforms using various journalistic styles and storytelling skills and incorporating ethical media-relations practices.
Prereq: J 211, J 212, J 213, J 350 with a grade of better than C-.

J 361. Reporting I. 4 Credits.

News gathering and writing. Extensive writing in class and outside of class in a variety of forms: news, features, interviews, multimedia scripts. Journalism majors only.
Prereq: (J 205 and J 206) or J 211 with a grade better than C-.

J 365. Photojournalism. 4 Credits.

Visual reporting techniques, with emphasis on practice, law, and ethics of photojournalism and photographic communication. Laboratory and portfolio-intensive. Majors only.
Prereq: (J 205 and J 206) or J 211 with a grade better than C-.

J 371. Feature Writing I. 4 Credits.

Introduction to feature writing for print and online media; marketing your ideas and stories. Journalism majors only.
Prereq: J 361 with a grade better than C-.

J 377. Science of Science Communication. 4 Credits.

In this class students will delve deeper into the theoretical foundations of science communication as a discipline. Students will develop an understanding of the different models of science communication, their benefits, drawbacks, and current use in a variety of contexts.
Prereq: We recommend two area satisfying courses in the sciences.

J 385. Communication Law. 4 Credits.

Legal aspects of the media: constitutional freedom of expression, news gathering, access to public records, libel, privacy, copyright, advertising, electronic media regulation, and antitrust.
Prereq: J 201 with a grade better than C-.

J 387. Media History. 4 Credits.

The changing structure and character of the media in the United States.
Prereq: J 201 with a grade better than C-.

J 396. International Communication. 4 Credits.

National and cultural differences in media and information systems, global news and information flows, implications of rapid technological change, and communication and information policies.
Prereq: J 201 with a grade better than C-

J 397. Media Ethics. 4 Credits.

Ethical problems in the media: privacy, violence, pornography, truth-telling, objectivity, media codes, public interest, media accountability.
Prereq: J 201 with a grade better than C-.

J 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

J 400M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

J 401. Research: [Topic]. 1-9 Credits.

Repeatable.

J 403. Thesis. 1-9 Credits.

Repeatable.

J 404. Internship: [Topic]. 1-9 Credits.

Repeatable for maximum of 9 credits.

J 405. Special Problems: [Topic]. 1-12 Credits.

Repeatable.

J 406. Practicum: [Topic]. 1-12 Credits.

Repeatable.

J 407. Seminar: [Topic]. 1-4 Credits.

Repeatable.

J 408. Workshop: [Topic]. 1-6 Credits.

Repeatable.

J 409. Terminal Project. 1-12 Credits.

Repeatable.

J 410. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

J 411M. US Film Industry. 4 Credits.

Traces the past and present of the U.S. film industry, examining key moments in the development of Hollywood, including the consolidation and restructuring of the major movie studios, the film industry's relationship to TV and the Internet. Journalism Majors and MEST minor.
Prereq: J 201 with a grade better than C-.

J 412. Issues in Communication Studies: [Topic]. 4 Credits.

Uses a variety of theories and methods to examine specific aspects of media content, processes, and audiences. Majors only. Repeatable three times for a maximum of 16 credits when topic changes.
Prereq: J 201 with a grade better than C-.

J 413. Communication Studies Capstone. 4 Credits.

Draws on skills and knowledge learned in other communications studies and related courses to demonstrate competence in broad areas of research.
Prereq: J 211, J 212, J 213, J 314 with a grade better than C-.

J 415. Media Studies Research Methods. 4 Credits.

This course provides the core skills necessary to critically evaluate scientific and analytic studies and conduct research in the media studies tradition. Students learn basic principles of media studies research methods, such as experiments, surveys, naturalistic observations, and interviews.
Prereq: J 201, J 314.

J 416. Survey of the Documentary. 4 Credits.

Historical and critical survey of the documentary as a form of artistic expression and an instrument of social commentary. Majors, cinema studies majors, and media studies minors only.

Prereq: J 201 with a grade better than C-.

J 420. Documentary Pre-Production. 4 Credits.

Students learn to research, plan, budget for, and develop a documentary film idea. They gain experience shooting a sizzle and pitching projects to potential producers. Several documentary forms will be explored, including portraits, ethnographies, interviews, personal stories, processes and events, and re-enactments.

Prereq: J 208.

J 421. Documentary Production. 4 Credits.

Get experience shooting a short documentary worthy of broadcast screening, film festival exhibition, or another venue.

Prereq: For SOJC students J 208 and J 420 with a grade better than C-.

For CINE students: J 208 and permission of the instructor.

J 422. Documentary Post-Production. 4 Credits.

Trains students with to edit and do post-production work on their documentary film projects.

Prereq: J 208, J 420, J 421.

J 424H. Honors Theory and Research: [Topic]. 4 Credits.

Uses a variety of theories and methods to closely examine and analyze contemporary problems and situations in media and communications.

Acceptance into School of Journalism and Communication honors program required for enrollment. Repeatable once when topic changes for a maximum of 8 credits.

J 427M. Latino Roots I. 4 Credits.

Documents Latino history in the racial history of what is now Oregon since 1500 and teaches students to conduct oral history interviews.

Multilisted with ANTH 427M. Sequence with J 428M. Offered alternate years.

J 428M. Latino Roots II. 4 Credits.

Continuation of Latino Roots I, designed for producing a short documentary using oral history as the story. Covers basic theory and practice of digital film-video documentary production. Multilisted with ANTH 428M. Sequence with J 427M. Offered alternate years.

Prereq: J 427M.

J 429. Media Technologies and Society: [Topic]. 4 Credits.

Explores the interrelationship between media technologies and social practices and processes in current and historical contexts. Majors and minors only. Repeatable three times for a maximum of 16 credits when topic changes. Open to MEST minors.

Prereq: J 201 with a grade better than C-.

J 430. Culture and Power in the Media: [Topic]. 4 Credits.

Explores issues of culture, identity, and power, including the role media play in reinforcing social, political, and economic disparities. Majors and minors only. Repeatable three times for a maximum of 16 credits when topic changes.

Prereq: J 201 with a grade better than C-.

J 431. Media Structures and Regulation: [Topic]. 4 Credits.

Explores how the infrastructures and regulatory environments of national and global media institutions influence discourse, democracy, and public life. Majors and MEST minors only. Repeatable three times for a maximum of 16 credits when topic changes.

Prereq: J 201 with a grade better than C-.

J 432. Reporting for Electronic Media. 4 Credits.

Training in gathering, production, and presentation of news for the electronic media. Journalism majors only.

Prereq: J 331, J 361 with a grade better than C-.

J 434. Advanced Television News. 4 Credits.

News gathering and production for television. Students produce live programming for local cable systems. Journalism majors only.

Prereq: J 331, J 361, J 432 with a grade better than C-.

J 436. Media Design: [Topic]. 4 Credits.

Focuses on issues and techniques in picture and graphic editing, typography, and work-picture composition and interaction for long-form visual storytelling across legacy- and emerging-media platforms. Repeatable twice for a maximum of 12 credits.

Prereq: J 361 with a grade better than C-.

J 443. Advertising Media Planning. 4 Credits.

Objectives and strategy for determining effective methods of reaching a designated target audience. Use of media measurement tools.

Journalism: advertising majors only.

Prereq: J 207, J 342 with a grade better than C-.

J 444. Agency Account Management. 4 Credits.

The role of the account executive in the advertising agency examined through case studies. Journalism: advertising majors only.

Prereq: J 211 and J 342 with a grade better than C-.

J 448. Advertising Campaigns. 4 Credits.

Seniors produce a comprehensive campaign involving every aspect of advertising, ranging from market research through creative and media strategy formulation to execution. Journalism: advertising majors only.

Prereq: three from J 443, J 444, J 457, J 458, J 459, J 460 with a grade better than C-.

J 449. Advanced Advertising Campaigns. 5 Credits.

Team experience of creating a professional-level advertising plan.

Students participate in a national competition. Journalism: advertising majors only.

J 452. Strategic Public Relations Communication. 4 Credits.

Advanced writing lab emphasizing business communication, direct-to-consumer strategies and techniques, and effective use of web-based communication strategies. Journalism: public relations majors only.

Prereq: J 352 with a grade better than C-.

J 453. Strategic Planning and Cases. 4 Credits.

Campaign planning, administration, crisis communication, and issues management, encompassing research, writing objectives and tactics, evaluation methods, and constructing budgets and timelines. Journalism: public relations majors only.

Prereq: J 352 with a grade better than C-.

J 454. Public Relations Campaigns. 4 Credits.

Capstone course applying theory, skills, and a team-based approach to researching, planning, presenting, and implementing a campaign for a client. Professional portfolios presented and reviewed. Journalism: public relations majors only.

Prereq: J 452, J 453; J 494 with a grade better than C-.

J 457. Curiosity for Strategists. 4 Credits.

Explores the building of intellectual curiosity as a problem-solving technique within the context of culture and media. Emphasis: critical thinking, readings, projects, performance. Journalism: advertising majors only.

Prereq: J 211 and J 342 with a grade better than C-.

J 458. Writing Design Concepts. 4 Credits.

Conceptual problem-solving for traditional and emerging media. Emphasis: conceptual development, advertising writing, design, campaigns, presentation of developed work. Journalism: advertising majors only.
Prereq: J 211 and J 342 with a grade better than C-.

J 459. Branding and Content. 4 Credits.

Capstone course on brand portfolio development for writers, art directors, and strategists. Emphasis: production, multiple-platform creative development, industry-focused portfolios. For Journalism: advertising majors only.
Prereq: J 205, J 206, J 207, J 342 with a grade better than C-.

J 460. Brand Development: [Topic]. 4 Credits.

Revolving topics on emerging issues in branding and advertising, including strategies in digital and interactive brand solutions, media decision-making, and sustainability. Journalism: advertising majors only. Repeatable three times for a maximum of 16 credits when topic changes.
Prereq: J 205 and J 206 and J 342, or J 211 and J 342, with a grade better than C-.

J 461. Newspaper Editing. 4 Credits.

Copyediting, headline writing, and page design for newspapers in print and online; emphasis on grammar and style. Journalism majors only.
Prereq: J 361 or equivalent with a grade better than C-.

J 462. Reporting II. 4 Credits.

In-depth reporting on public affairs and community news. Journalism majors only.
Prereq: J 361 with a grade better than C-.

J 463. Specialized Reporting: [Topic]. 1-4 Credits.

Reporting special topics, including the environment, business and economics, politics, health and medicine, science, and the arts; and digital and multiplatform journalism. Journalism majors only. Repeatable.
Prereq: J 361 with a grade better than C-.

J 466. Advanced Photojournalism: [Topic]. 4 Credits.

Intensive visual reporting techniques, with emphasis on digital production, color, lighting, in-depth storytelling, documentary, and portfolio. Majors only. Repeatable three times for a maximum of 16 credits when topic changes.
Prereq: J 365 with a grade better than C-.

J 467. Issues in International Communication: [Topic]. 4 Credits.

Topics focus on global media issues. Majors and minors only; cinema studies majors for approved topics. Repeatable twice for a maximum of 12 credits when topic changes.
Prereq: J 201 with a grade better than C-.

J 468. Advanced News Editing. 4 Credits.

Advanced training in news editing under newsroom conditions. Discussion of issues in editing, headline writing, and news judgment. Includes work with web-based journalism. Focus on teamwork. Journalism majors only.
Prereq: J 461 with a grade better than C-.

J 469. OR Magazine. 4 Credits.

Building skills in journalistic storytelling and multimedia production of a digital magazine for distribution via mobile devices. Repeatable once for a maximum of 8 credits.

J 472. Feature Writing II. 4 Credits.

In-depth story research and advanced feature writing for print and online markets. Individual conferences. Journalism majors only.
Prereq: J 361, J 371 with a grade better than C-.

J 475. Flux Production. 1-5 Credits.

Planning and production of "Flux" magazine. Students make and carry out assignments, write and edit stories, take photos, shoot video, sell advertising, and design the magazine. Repeatable for a maximum of 12 credits.
Prereq: J 211, J 212, J 213, J 331, J 361 with a grade better than C-.

J 477. Topics in Science of Science Communication: [Topic]. 4 Credits.

This course dives deeply into issues related to the science of science communication, including more advanced exploration of health communication, decision making, numeracy, and environmental communication. Students will focus on developing research projects in consultation with the instructor. Repeatable twice for a maximum of 12 credits when topic changes.
Prereq: J 377.

J 478. Producing the Science Story: [Topic]. 4 Credits.

This course focuses on producing stories about science for a variety of media. Students will incorporate research from the science of science communication in crafting story strategies for specific audiences. Additional focus will be on innovative storytelling strategies for complicated subjects using journalistic practice. Repeatable twice for a maximum of 12 credits when topic changes.
Prereq: J 377.

J 480. Public Relations: [Topic]. 4 Credits.

Addresses a specific theory, method, or issue in the study and practice of public relations, such as international practice or strategic use of new media. Repeatable thrice when topic changes for a maximum of 16 credits.

J 483. The Journalistic Interview. 4 Credits.

Gathering information through asking questions. Literature and research findings on techniques of listening, nonverbal communication, and psychological dynamics of the interview relationship in journalistic situations. Journalism majors only.
Prereq: J 361 with a grade better than C-.

J 489. Media Entrepreneurship. 4 Credits.

Media Entrepreneurship introduces students from journalism and communication-based fields to the fundamentals of the entrepreneurship and innovation, and gives them an opportunity to conceive, develop and test original media business ideas.
Prereq: SOJC undergrads: Media studies: J 314 with a grade better than C-; Journalism: J 361 with a grade better than C-; Advertising: J 342 with a grade better than C-; Public relations: J 352 with a grade better than C-.

J 494. Strategic Communications Research. 4 Credits.

Introduction to how and why research is conducted and used by public relations and advertising professionals to formulate strategic campaigns and evaluate their effectiveness. Majors only.
Prereq: J 342 or J 350.

J 495. Research Methods: [Topic]. 4 Credits.

Uses a variety of quantitative and qualitative methods to examine concepts and processes of research used in such areas as advertising, public relations, journalism, strategic communication, and communication studies. Majors and minors only. Repeatable when topic changes for a maximum of 12 credits.
Prereq: J 201 with a grade better than C-.

J 496. Communication Ethics and Law: [Topic]. 4 Credits.

Analyses of ethical and legal issues confronting the communications industry using various ethical and legal theories, readings, and cases relevant to the specific topic. Majors and minors only. Repeatable once for a maximum of 8 credits when topic changes.

Prereq: J 201 with a grade better than C-.

J 500M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

J 503. Thesis. 1-9 Credits.

Repeatable.

J 507. Seminar: [Topic]. 1-4 Credits.

Repeatable.

J 508. Workshop: [Topic]. 1-6 Credits.

Repeatable.

J 510. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

J 511M. US Film Industry. 4 Credits.

Traces the past and present of the U.S. film industry. Multilisted with CINE 511M.

J 512. Issues in Communication Studies: [Topic]. 4 Credits.

Uses a variety of theories and methods to examine specific aspects of media content, processes, and audiences. Majors only. Repeatable three times for a maximum of 16 credits when topic changes.

J 516. Survey of the Documentary. 4 Credits.

Historical and critical survey of the documentary as a form of artistic expression and an instrument of social commentary. Majors, cinema studies majors, and media studies minors only.

J 520. Documentary Pre-Production. 4 Credits.

Students learn to research, plan, budget for, and develop a documentary film idea. They gain experience shooting a sizzle and pitching projects to potential producers. Several documentary forms will be explored, including portraits, ethnographies, interviews, personal stories, processes and events, and re-enactments.

J 521. Documentary Production. 4 Credits.

Get experience shooting a short documentary worthy of broadcast screening, film festival exhibition, or another venue.

J 522. Documentary Post-Production. 4 Credits.

Trains students with to edit and do post-production work on their documentary film projects.

J 527M. Latino Roots I. 4 Credits.

Documents Latino history in the racial history of what is now Oregon since 1500 and teaches students to conduct oral history interviews. Multilisted with ANTH 527M. Sequence with J 528M. Offered alternate years.

J 528M. Latino Roots II. 4 Credits.

Continuation of Latino Roots I, designed for producing a short documentary using oral history as the story. Covers basic theory and practice of digital film-video documentary production. Multilisted with ANTH ANTH 528M. Sequence with J 527M. Offered alternate years. Prereq: J 527M.

J 529. Media Technologies and Society: [Topic]. 1-4 Credits.

Explores the interrelationship between media technologies and social practices and processes in current and historical contexts. Majors and minors only. Repeatable three times for a maximum of 16 credits when topic changes. Open to MEST minors.

J 530. Culture and Power in the Media: [Topic]. 4 Credits.

Explores issues of culture, identity, and power, including the role media play in reinforcing social, political, and economic disparities. Majors and minors only. Repeatable three times for a maximum of 16 credits when topic changes.

J 531. Media Structures and Regulation: [Topic]. 4 Credits.

Explores how the infrastructures and regulatory environments of national and global media institutions influence discourse, democracy, and public life. Majors and MEST minors only. Repeatable three times for a maximum of 16 credits when topic changes.

J 532. Reporting for Electronic Media. 4 Credits.

Training in gathering, production, and presentation of news for the electronic media. Journalism majors only.

J 534. Advanced Television News. 4 Credits.

News gathering and production for television. Students produce live programming for local cable systems. Journalism majors only.

Prereq: J 532 with a grade of mid-C or better.

J 536. Media Design: [Topic]. 4 Credits.

Focuses on issues and techniques in picture and graphic editing, typography, and work-picture composition and interaction for long-form visual storytelling across legacy- and emerging-media platforms. Repeatable twice for a maximum of 12 credits.

J 543. Advertising Media Planning. 4 Credits.

Objectives and strategy for determining effective methods of reaching a designated target audience. Use of media measurement tools. Journalism: advertising majors only.

J 544. Agency Account Management. 4 Credits.

The role of the account executive in the advertising agency examined through case studies. Journalism: advertising majors only.

J 548. Advertising Campaigns. 4 Credits.

Graduate students produce a comprehensive campaign involving every aspect of advertising, ranging from market research through creative and media strategy formulation to execution. Journalism: advertising majors only.

Prereq: three from J 543, J 544, J 556, J 557, J 558, J 559, J 560.

J 549. Advanced Advertising Campaigns. 5 Credits.

Team experience of creating a professional-level advertising plan. Students participate in a national competition. Journalism: advertising majors only.

J 552. Strategic Public Relations Communication. 4 Credits.

Advanced writing lab emphasizing business communication, direct-to-consumer strategies and techniques, and effective use of web-based communication strategies. Journalism: public relations majors only.

J 553. Strategic Planning and Cases. 4 Credits.

Campaign planning, administration, crisis communication, and issues management, encompassing research, writing objectives and tactics, evaluation methods, and constructing budgets and timelines. Journalism: public relations majors only.

J 554. Public Relations Campaigns. 4 Credits.

Capstone course applying theory, skills, and a team-based approach to researching, planning, presenting, and implementing a campaign for a client. Professional portfolios presented and reviewed. Journalism: public relations majors only.

Prereq: J 552, J 553; one from J 594, J 595.

J 557. Curiosity for Strategists. 4 Credits.

Explores the building of intellectual curiosity as a problem-solving technique within the context of culture and media. Emphasis: critical thinking, readings, projects, performance. Journalism: advertising majors only.

J 558. Writing Design Concepts. 4 Credits.

Conceptual problem-solving for traditional and emerging media. Emphasis: conceptual development, advertising writing, design, campaigns, presentation of developed work. Journalism: advertising majors only.

J 559. Branding and Content. 4 Credits.

Capstone course on brand portfolio development for writers, art directors, and strategists. Emphasis: production, multiple-platform creative development, industry-focused portfolios. Journalism: advertising majors only.

J 560. Brand Development: [Topic]. 4 Credits.

Revolving topics on emerging issues in branding and advertising, including strategies in digital and interactive brand solutions, media decision-making, and sustainability. Journalism: advertising majors only. Repeatable three times for a maximum of 16 credits when topic changes.

J 561. Newspaper Editing. 4 Credits.

Copyediting, headline writing, and page design for newspapers in print and online; emphasis on grammar and style. Journalism majors only.

J 562. Reporting II. 4 Credits.

In-depth reporting on public affairs and community news. Journalism majors only.

J 563. Specialized Reporting: [Topic]. 1-4 Credits.

Reporting special topics, including the environment, business and economics, politics, health and medicine, science, and the arts; and digital and multiplatform journalism. Journalism majors only. Repeatable.

J 566. Advanced Photojournalism: [Topic]. 4 Credits.

Intensive visual reporting techniques, with emphasis on digital production, color, lighting, in-depth storytelling, documentary, and portfolio. Majors only. Repeatable three times for a maximum of 16 credits when topic changes.

J 567. Issues in International Communication: [Topic]. 4 Credits.

Topics focus on global media issues. Majors only. Repeatable twice for a maximum of 12 credits when topic changes.

J 568. Advanced News Editing. 4 Credits.

Advanced training in news editing under newsroom conditions. Discussion of issues in editing, headline writing, and news judgment. Includes work with web-based journalism. Focus on teamwork. Journalism majors only.

Prereq: J 561 with a grade of mid-C or better.

J 569. OR Magazine. 4 Credits.

Building skills in journalistic storytelling and multimedia production of a digital magazine for distribution via mobile devices. Repeatable once for a maximum of 8 credits.

J 572. Feature Writing II. 4 Credits.

In-depth story research and advanced feature writing for print and online markets. Individual conferences. Journalism majors only.

J 575. Flux Production. 1-5 Credits.

Repeatable. Planning and production of "Flux" magazine. Students make and carry out assignments, write and edit stories, take photos, shoot video, sell advertising, and design the magazine. Repeatable for a maximum of 12 credits.

J 577. Topics in Science of Science Communication: [Topic]. 4 Credits.

This course dives deeply into issues related to the science of science communication, including more advanced exploration of health communication, decision making, numeracy, and environmental communication. Students will focus on developing research projects in consultation with the instructor. Repeatable twice for a maximum of 12 hours when topic changes.

J 578. Producing the Science Story: [Topic]. 4 Credits.

This course focuses on producing stories about science for a variety of media. Students will incorporate research from the science of science communication in crafting story strategies for specific audiences.

Additional focus will be on innovative storytelling strategies for complicated subjects using journalistic practice. Repeatable twice for a maximum of 12 credits when topic changes.

J 580. Public Relations: [Topic]. 4 Credits.

Addresses a specific theory, method, or issue in the study and practice of public relations, such as international practice or strategic use of new media. Repeatable thrice when topic changes for a maximum of 16 credits.

J 583. The Journalistic Interview. 4 Credits.

Gathering information through asking questions. Literature and research findings on techniques of listening, nonverbal communication, and psychological dynamics of the interview relationship in journalistic situations. Journalism majors only.

J 589. Media Entrepreneurship. 4 Credits.

Media Entrepreneurship introduces students from journalism and communication-based fields to the fundamentals of the entrepreneurship and innovation, and gives them an opportunity to conceive, develop and test original media business ideas.

J 594. Strategic Communications Research. 4 Credits.

Introduction to how and why research is conducted and used by public relations and advertising professionals to formulate strategic campaigns and evaluate their effectiveness. Majors only.

J 595. Research Methods: [Topic]. 4 Credits.

Uses a variety of quantitative and qualitative methods to examine concepts and processes of research used in such areas as advertising, public relations, journalism, strategic communication, and communication studies. Journalism majors only. Repeatable when topic changes for a maximum of 12 credits.

J 596. Communication Ethics and Law: [Topic]. 4 Credits.

Analyses of ethical and legal issues confronting the communications industry using various ethical and legal theories, readings, and cases relevant to the specific topic. Majors only. Repeatable once for a maximum of 8 credits when topic changes.

J 601. Research: [Topic]. 1-6 Credits.

Repeatable for maximum of 16 credits.

J 602. Supervised College Teaching. 1-5 Credits.

Repeatable for maximum of 5 credits.

J 603. Dissertation. 1-16 Credits.

Course may be repeated 25 times for credit after the initial instance.

J 604. Internship: [Topic]. 1-6 Credits.

Repeatable for maximum of 12 credits.

J 605. Special Problems: [Topic]. 1-12 Credits.

Repeatable.

J 606. Practicum: [Topic]. 1-6 Credits.

Repeatable for maximum of 16 credits.

J 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

J 608. Workshop: [Topic]. 1-6 Credits.

Repeatable for maximum of 16 credits.

J 609. Terminal Project. 1-6 Credits.

Repeatable for maximum of 6 credits.

J 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

J 611. Mass Communication and Society. 4 Credits.

Review of the literature of mass communication. Introduction to graduate study in journalism and communication.

J 612. Media Theory I. 5 Credits.

First in a three-part sequence introducing students to media theory, focusing on the social scientific tradition. Sequence with J 613, J 614.

J 613. Media Theory II. 5 Credits.

Second in a three-part sequence introducing students to media theory, focusing on critical approaches. Sequence with J 612, J 614.

Prereq: J 612.

J 614. Media Theory III. 5 Credits.

Third in a three-part sequence introducing students to media theory, focusing on contemporary theoretical perspectives.

Prereq: J 613.

J 616. Introduction to Strategic Communication Marketing. 4 Credits.

Discussion of fundamental marketing concepts from the perspective of the manager. Analysis of complex marketing challenges in research, segmentation, targeting, pricing, distribution, and branding.

J 617. Strategic Communication Theory and Research: [Topic]. 4 Credits.

Theory, research, and practice of strategic communication. Topics may include relationship management, risk communication, identity and culture, and social media theory. Repeatable when topic changes for a maximum of 20 credits.

Prereq: graduate standing.

J 618. Strategic Communication Management. 4 Credits.

Elements of managing and leading organizations; examination of key issues faced by leaders. Topics include leadership theory, leading change, dealing with conflict, and performance and strategic management.

J 619. Teaching and the Professional Life. 4 Credits.

Explores teaching strategies, curriculum development, and other aspects of academic professional life in journalism and communication.

J 621. Foundations of Strategic Communication. 4 Credits.

Reviews major theories, models, and practices in strategic communications. Theoretical topics include media effects and persuasion as applied to public relations, advertising, and other strategic communication.

J 623. Creativity in Strategic Communication. 4 Credits.

Explores the use of creative conceptual thinking as part of the strategic basis in successful communication campaigns.

J 624. Strategic Communication: [Topic]. 2 Credits.

Explores problems and specialized skills needed in strategic communication management. Examples include crisis communication, creativity in business, corporate social responsibility. Repeatable up to five times with change in topic.

J 627. Foundations of Multimedia Journalism. 4 Credits.

Serves as a foundation of theory and technique, with an introduction to storytelling forms, technical production skills, and the visual language. Students will learn how to use the tools of the trade so that they can communicate effectively with other multimedia journalists.

J 628. Multimedia Journalism Practices. 4 Credits.

Building on the J 627 course, students create a narrative video project that focuses on visual storytelling, character development, and present-tense storytelling.

J 629. Media and Communication Ethics: [Topic]. 4 Credits.

This course explores ethical issues facing media workers and media users in culture and society today. Topics may include digital ethics, strategic communication ethics, visual ethics and global media ethics.

J 635. Thinking Story. 4 Credits.

Recognize and use fundamental approaches to narrative storytelling to create dynamic and engaging multimedia projects.

J 639. Foundations of Explanatory Video Journalism. 4 Credits.

Students explore and practice concepts in visual explanation and explanatory video.

J 641. Qualitative Research Methods. 4 Credits.

Introduces qualitative research methods including traditional historical inquiry, oral history, ethnography, and participant observation.

J 642. Quantitative Research Methods. 4 Credits.

Introduces and analyzes quantitative research methods in terms of design, measurement, inference, and validity. Focuses on conceptualization in communication research.

J 643. Advanced Doctoral Seminar. 5 Credits.

Seminar participants demonstrate competence in broad families of social research by drawing on skills and knowledge obtained in J 612, J 613, J 614, J 641, and J 642.

Prereq: J 612, J 613, J 614, J 641, J 642.

J 644. Philosophy of Communication. 4 Credits.

Explores the philosophical foundations of communication in the United States, including political philosophies that range from Milton to McLuhan.

J 646. Political Economy of Communication. 4 Credits.

Introduction to the political economy of communication. Includes such issues as ownership and control patterns; the role of the state; labor; intellectual property rights; and international markets.

J 648. Cultural Approaches to Communication. 4 Credits.

Examination of communication and mediated communication as cultural processes in the production and reproduction of social systems.

J 649. International Communication. 4 Credits.

Examines global communication structures and processes and their consequences. Topics include new technologies, news and information organizations, cross-cultural uses of Western media, and information policies.

J 654. Reporting within Communities. 4 Credits.

Students explore and practice emerging "community-first" concepts of journalism and reporting to identify the needs of the communities served, codesigning processes and solutions to keep them engaged.

J 656. Producing the Story. 4 Credits.

Students work collaboratively to create a compelling, ethical work of journalism with impact, applying all aspects of community engagement, reporting, storytelling, and production skills learned in previous terms.

J 660. Advanced Research Methods: [Topic]. 4 Credits.

Explores specific qualitative or quantitative communication research methods. Topics may include discourse analysis, oral history, historical methods, legal methods, content analysis, and survey methods.

Repeatable when topic changes.

Prereq: J 641 or J 642, depending on topic.

J 663. Foundations of Strategic Sport Communication. 4 Credits.

Presents and reviews major theories, models, and practices in sports communication. Theoretical topics include sports media effects and persuasion as applied to broadcast, public relations, advertising, and other strategic communication. Cultural, societal and industry relevance also discussed.

Minor in Media Studies

The minor in media studies gives students an overview of the role of the media in society.

Students with a major in the School of Journalism and Communication cannot also earn a minor in media studies.

Students who want to minor in media studies should declare the minor online, on the school's website. Students may submit petitions to apply other journalism courses to the minor. A minimum University of Oregon GPA of 2.00 is required to declare the minor.

Code	Title	Credits
J 201	Media and Society	4
J 314	Introduction to Media Studies	4
Select four of the following:		16
J 320	Gender, Media, and Diversity	
J 385	Communication Law	
J 387	Media History	
J 397	Media Ethics	
J 429	Media Technologies and Society: [Topic]	
J 430	Culture and Power in the Media: [Topic]	
J 431	Media Structures and Regulation: [Topic]	
J 496	Communication Ethics and Law: [Topic] ¹	
Total Credits		24

¹ Repeatable once when the topic changes.

All courses must be passed with a grade of mid-C or better.

Minor in Science Communication

Minor in Science Communication

The minor requires 24 graded credits from approved courses, of which a minimum of 12 must be in upper-division courses.

Of the three required courses for the minor, all are upper-division courses. Two of these upper division courses are Topics courses that focus on research in the science of science communication and science storytelling. Students who wish to focus more on the research side of science communication can take multiple offerings of that Topic. Students who wish to focus more on the production and story development side can take multiple offerings of the science storytelling Topic.

Code	Title	Credits
Required courses (12 credits/3 courses):		12
Any two area-satisfying courses used to fulfill UO's Science (>3 or >4) core education requirement. Must be graded and passed with a C or better; recommend completing this before taking J377.		
J 377	Science of Science Communication (Only offered in Fall term)	
Elective Courses from the following (12 credits/3 courses):		12
J 477	Topics in Science of Science Communication: [Topic]	
J 478	Producing the Science Story: [Topic] (Course titles offered within each "topic" will vary. These courses numbers are repeatable when topics have different titles; for a total of 16 credits)	
You are not required to have one from each course number.		
One of the three courses can be a pre-approved 300-/400-level course from another UO science subject. We recommend taking J377 before J477 or J478.		
Pre-approved Substitutions: the course/credits below may be used toward the elective section of this minor:		
J 480	Public Relations: [Topic]	
J 408	Workshop: [Topic] (Science & Memory Fellows Program)	
Total Credits		24

School of Law

Marcilynn Burke, Dean

541-346-3852
 541-346-3846 admissions office
 541-346-1564 fax
 105 Knight Law Center
 1221 University of Oregon
 Eugene, Oregon 97403-1221
lawadmissions@uoregon.edu

The School of Law offers a three-year, full-time professional curriculum leading to the doctor of jurisprudence (JD) degree; a two-year, full-time program leading to an interdisciplinary master's degree (MA or MS) in conflict and dispute resolution; a one-year, full-time program leading to a master of laws (LLM) with concentrations in American law, business law, conflict and dispute resolution, and environmental and natural resources law; and an undergraduate minor in legal studies.

The law school's broad-based curriculum and clinical programs prepare students for careers in almost every practice area and professional setting. Special centers and programs include appropriate dispute resolution; business law; criminal justice; environmental and natural resources law; estate planning; family law; intellectual property law; international law; legal research and writing; the Portland program; public law and policy; sports law; tax law; and the Wayne Morse Center for Law and Politics.

The Center for Career Planning and Professional Development offers counseling, seminars, mentoring programs, and connections to UO law graduates throughout the world.

The William W. Knight Law Center offers a spacious, welcoming environment for study and community activities and includes more than 1,500 fast-Ethernet jacks and wireless access throughout the building.

The John E. Jaqua Law Library is a light-filled space occupying three floors, designed to meet the research and study needs of law students. It provides print, electronic, and video resources, and has full wireless access. Each floor of the law library contains a mix of books, tables, carrels, equipment, and study rooms. Law students can use our online catalog to order materials from the law library and from other libraries in Oregon and Washington. Attorney librarians teach students how to perform legal research in class and in the library.

UO law students run three journals and nearly 40 active student organizations, serve the public in numerous clinical programs, and organize the world's oldest and largest public interest environmental law conference, attracting more than 3,000 participants each year. In addition, the School of Law offers a wide range of options to perform pro bono work in the local community, of which UO law students have a strong tradition.

Academic Calendar for Law Students

The School of Law JD and LLM programs operate on a semester calendar. On this schedule, registration for fall and spring semesters begins the third week of April, fall semester examinations are given before the winter vacation, and the spring semester ends in mid-May. More information about calendar dates is available online at registrar.uoregon.edu/calendars/academic (<http://registrar.uoregon.edu/calendars/academic/>).

January Term

The School of Law offers a collection of one-week intensive courses held the week before the start of the regular spring semester.

Summer Session

The School of Law offers a summer session that is open to law students who have completed at least one year of legal studies and who are in good standing at a law school accredited by the American Bar Association. Summer session is not open to beginning law students.

Experiential Education

The law school's Experiential Education Program, which includes clinics, field placements, and simulation courses, gives students real-world experience with concepts learned in the classroom. These courses offer second- and third-year students access to practical work experiences that better prepare them for law practice, increasing their value to potential employers. Students and employers alike recognize the value of practical learning experiences during law school, and the demand for practice experience is high.

Clinical Offerings (https://mylaw.uoregon.edu/registrar/clinic_information/)

Business Law Clinic (https://mylaw.uoregon.edu/sites/default/files/academic_affairs/business_law_clinic_course_description_ay22-23.pdf) – **Eugene and PDX Campuses**

Students represent small companies and entrepreneurs who need legal assistance in forming and operating their businesses. This includes a weekly seminar offering instruction in substantive law, ethical issues, and practical lawyering, with an emphasis on the skills required in drafting documents, interviewing and counseling clients, and representing clients in organizational and contractual matters. The Business Law Clinic is offered to students enrolled in the Portland Program during the spring semester.

Criminal Defense Clinic (https://mylaw.uoregon.edu/sites/default/files/academic_affairs/criminal_defense_clinic_class_description.pdf)

Participating students will be assigned a variety of misdemeanor cases in the Lane County Circuit Court and will be responsible for all stages of the representation of those clients under the supervision of the supervising attorney. In consultation with our clients, participating students will conduct client interviews, review police reports, interview witnesses, and handle all aspects of the plea negotiations, motions, changes of plea, scheduling hearings, sentencing hearings, and jury trials.

Criminal Prosecution Clinic (https://mylaw.uoregon.edu/sites/default/files/academic_affairs/criminal_prosecution_clinic_course_description_ay22-23.pdf)

In the Prosecution Clinic, most students are assigned to Lane County District Attorney's Office or, on special request, one of several local prosecutors' offices. Students prepare and try both misdemeanor and felony criminal cases under the supervision of an attorney. Students are also given the opportunity to assist senior prosecutors on more serious felony cases. Students who have a demonstrated interest in juvenile or domestic violence issues may have the opportunity to be assigned to units that deal specifically with those issues.

Domestic Violence Civil Clinic (https://mylaw.uoregon.edu/sites/default/files/academic_affairs/dv_civil_clinic_course_description_ay22-23.pdf)

Students enrolled in this clinic will represent victims of domestic violence, sexual assault, and stalking in civil legal actions, with an emphasis on family law (divorce, child custody and parenting time, support, paternity), and may also work on cases involving public benefits, housing (both private landlord/tenant disputes and subsidized housing), employment, unemployment compensation, and consumer credit and related criminal matters (such as crime victims' compensation or coordinating with the district attorney to ensure that the civil and criminal cases are complementary). In the course of providing this representation, students will be involved at every stage of litigation, including interviewing clients and witnesses, obtaining evidence, negotiating with opposing counsel, drafting legal documents, and appearing in court. In addition to participating in litigation, students will meet with clients throughout the term to provide counsel, advice, and brief legal services on a wide variety of civil legal matters

Domestic Violence Protective Order Clinic (https://mylaw.uoregon.edu/sites/default/files/academic_affairs/dv_protective_order_clinic_course_description_ay22-23.pdf)

Students enrolled in this clinic will represent victims of domestic violence, sexual assault, and stalking in civil legal protective order actions, including obtaining and defending restraining, stalking and other protective orders. In the course of providing this representation, students will be involved at every stage of litigation, including interviewing clients and witnesses, obtaining evidence, negotiating with opposing counsel, drafting legal documents, and appearing in court.

Environmental Law Clinic (https://mylaw.uoregon.edu/sites/default/files/academic_affairs/environmental_law_clinic_ay22-23.pdf)

Through the Western Environmental Law Center, clinic students generally will work on emerging or ongoing court cases with WELC attorneys. Students will help develop case strategies, pursue discovery or Freedom of Information Act requests, develop legal theories, and draft or write components of legal motions or memoranda.

Nonprofit Clinic (https://mylaw.uoregon.edu/sites/default/files/academic_affairs/nonprofit_clinic_course_description_ay22-23.pdf)

The nonprofit clinic is a joint venture with the UO's School of Planning, Public Policy and Management, the Master's Degree in Conflict and Dispute Resolution Program, and the Lundquist School of Business. Students conduct a governance assessment of several nonprofit organizations, draft an assessment report, and present their findings and recommendations to the boards of their nonprofit clients. Students work in highly supported interdisciplinary teams and have an opportunity to conduct interviews, review documents, hone their writing, plan and facilitate meetings, and learn about organizational functioning and dynamics.

Field Placement Offerings (https://mylaw.uoregon.edu/registrar/field_placement_information/)

Bankruptcy Field Placements

Students serve as judicial externs for the United States Bankruptcy Court for the District of Oregon and participate in all aspects of judicial decision-making, including researching and drafting bench memorandums and opinions, and observing oral arguments and chambers conferences. Students also have the opportunity to extern at the Office of the United

States Trustee, the division of the US Department of Justice responsible for overseeing the administration of bankruptcy cases.

Criminal Justice Field Placements

Students work for public defenders, US attorneys, state attorneys, and district attorneys doing a range of legal work from conducting legal research on a myriad state/federal issues, drafting briefs, memorandum, and/or internal office documents, and preparing for criminal motion hearings and trials, to attending in-court proceedings and meetings regarding case matters and administration, and appearing in court on behalf of your client/agency.

Domestic Violence Field Placements

Students work in private firms, government agencies and nonprofits focused on domestic violence and family law.

Environmental Law Field Placements

Students are placed with governmental and nonprofit agencies from Oregon to Washington, DC, working on a variety of issues related to environmental regulations and compliance, energy policy, land use, and climate change.

In-House Counsel Field Placements

Students are placed in corporate counsel offices to give them a window into the world of major Oregon businesses and non-profits. Students participating in the program are exposed to the roles of in-house counsel, the relationship between in-house and outside counsel, and the workings of business operations.

Judicial Field Placements

Students work for district and appellate federal courts; state trial, tax, and appellate courts; and other courts such as the federal immigration court. The judges include students in all aspects of their work, including settlement conferences, trials, and discussions in chambers. Students perform legal research and writing for judicial chambers under the supervision of judges, clerks, and staff attorneys.

Government & Public Interest Field Placements

Students work in the office of in-house counsel for cities and counties, state and federal agencies, such as a state's office of attorney general or the US Department of Justice, as well as local, regional, and national nonprofit public interest legal organizations.

Simulation Course Offerings

Simulation courses are reasonably similar to the experience of a lawyer advising or representing a client or engaging in other lawyering tasks in a set of facts and circumstances devised or adopted by a faculty member. Each simulation course is evaluated by the faculty and approved for simulation designation. Examples of simulation courses include Advanced Appellate Advocacy, Business Planning, Mediation, Negotiation, Plea Bargaining, and Trial Practice. A complete list of simulation courses can be found on MyLaw: https://mylaw.uoregon.edu/registrar/degree_requirements (https://mylaw.uoregon.edu/registrar/degree_requirements/).

Centers and Programs

Appropriate Dispute Resolution Center

Many lawyers today are more likely to participate in a settlement conference, mandatory arbitration, or mediation session than they are to argue a case in the courtroom. The law school's appropriate dispute resolution courses, trainings, and programs help students understand a wide range of dispute resolution methods so that as lawyers they may advise their clients wisely. <https://law.uoregon.edu/academics/centers/adr> (<https://law.uoregon.edu/academics/centers/adr/>)

Business Law

Comprehensive business law courses contribute to the core of the law school curriculum. Practical experience is gained in classroom studies and in real-world opportunities, teaching students the relationship between law and entrepreneurship and providing students the necessary deal-making skills to become transactional lawyers. <https://law.uoregon.edu/academics/centers/bizlaw> (<https://law.uoregon.edu/academics/centers/bizlaw/>)

Criminal Justice Program

The criminal justice program prepares future lawyers with the knowledge and practical skills necessary to practice in the criminal justice system as prosecutors and attorneys for criminal defendants and parents and children in the juvenile justice and child-welfare systems. <https://law.uoregon.edu/jd/concentrations/criminal-law> (<https://law.uoregon.edu/jd/concentrations/criminal-law/>)

Environmental and Natural Resources Law

For more than forty years, this program's focus on public interest environmental law and its commitment to innovations in environmental legal education have made it one of the nation's oldest and most respected programs. Its faculty is involved in innovative legal scholarship that makes a global impact on environmental law. <https://law.uoregon.edu/academics/centers/enr> (<https://law.uoregon.edu/academics/centers/enr/>)

Family Law

The increasingly complex nature of family relationships requires lawyers to possess an in-depth understanding of the law that structures them. Future legal practitioners gain the knowledge and practical skills necessary to advocate for children, families, and the elderly. <https://law.uoregon.edu/academics/centers/family> (<https://law.uoregon.edu/academics/centers/family/>)

International Law

Globalization, extensive migration, and shifting demographics make international law a crucial component of legal education, creating an imperative to educate students prepared to practice at home and abroad. <https://law.uoregon.edu/jd/concentrations/international> (<https://law.uoregon.edu/jd/concentrations/international/>)

Legal Research and Writing

This rigorous program thoroughly prepares law students for the exacting style of writing expected of individuals in a clerkship or legal practice. <https://law.uoregon.edu/academics/centers/lrw> (<https://law.uoregon.edu/academics/centers/lrw/>)

Portland Program

The program creates opportunities for students to build ties with the legal and business community in Portland, Oregon. As the state's largest city, Portland is home to more than 3,000 UO School of Law

alumni. The Portland Program offers field placements, courses, and symposiums. <https://law.uoregon.edu/academics/portland> (<https://law.uoregon.edu/academics/portland/>)

Public Law and Policy Program

Building on a foundation of course offerings, career planning support, and service opportunities, UO students prepare for careers in the public sector. UO law graduates accept public service positions at rates far exceeding the national average. <https://law.uoregon.edu/jd/concentrations/plp> (<https://law.uoregon.edu/jd/concentrations/plp/>)

Sports Law

The sports law program prepares students to enter a rapidly growing and evolving field. Through traditional course work and experiences outside of the classroom, students learn about legal areas surrounding the sports industry and gain practical skills in contract negotiation, legal drafting, sponsorships, business development, labor law, and intellectual property and licensing. <https://law.uoregon.edu/academics/centers/OSSLI> (<https://law.uoregon.edu/academics/centers/OSSLI/>)

Wayne Morse Center for Law and Politics

An independent center within the law school, the Wayne Morse Center for Law and Politics organizes dynamic programs in the spirit and tradition of former U.S. senator and law school dean Wayne Morse. Senator Morse was best known for his stance against the Vietnam War and as an advocate for civil rights, labor rights, and the rule of law. waynemorsecenter.uoregon.edu (<http://waynemorsecenter.uoregon.edu>)

Admission Procedures

Prelaw Preparation

The School of Law does not prescribe a prelaw curriculum. Intellectual maturity and breadth of educational background are considered more important than specific subject matter.

Information about the School of Law and its programs is available on its website (<https://law.uoregon.edu/>). Additional information may be requested through the website or by contacting the Office of Admissions. Admissions staff members are happy to respond to inquiries regarding the admission process as well as to make arrangements for visits to the School of Law.

Requirements through the Law School Admission Council

The University of Oregon School of Law is a member of the Law School Admission Council (LSAC). To complete the application process, an applicant must register with LSAC to take the Law School Admission Test (LSAT) and participate in the Credential Assembly Service (CAS); register at www.lsac.org (<http://www.lsac.org>) or call 215-968-1001. An applicant should take the LSAT no later than February of the year in which they wish to enroll. A score from the June 2018 test administration is the oldest acceptable score for fall 2023. An applicant must submit official academic transcripts of all college-level work and postgraduate work and letters of recommendation to the LSAC. All required fees must be paid, and all required documents received before the admissions committee will review an application. Applicants receive an admission decision from the Office of Admissions in a letter sent through email and the United States Postal Service between December and May.

Basic Admission Requirements

An applicant must have a bachelor's degree from an accredited college or university prior to enrolling in the School of Law. Enrollment restrictions and the large volume of applications for admission to the law school make it necessary to admit applicants who, in terms of their overall records, are the most qualified for legal studies.

In evaluating the strength of the overall record, the admissions committee considers the undergraduate grade point average (GPA), the results of the Law School Admission Test (LSAT), the personal statement, and letters of recommendation. The applicant should also submit a résumé that highlights educational background, employment, global and multicultural experience, and extracurricular activities. International applicants are required to submit results of the Test of English as a Foreign Language (TOEFL).

The admissions committee strives to annually enroll a class that is academically distinguished and reflects a rich blend of educational, economic, cultural, and professional backgrounds.

Class Profile for Fall 2021

Percentile	GPA	LSAT Score
75th	3.70	161
50th	3.54	159
25th	3.32	156

Costs and Financial Aid

Law students are classified as graduate students. Tuition and fees are payable in full as prescribed by the Office of Business Affairs. Payment of the stipulated fees entitles students enrolled for academic credit to all services maintained by the university for the benefit of students.

Tuition and Fees for JD Program

For the 2022–23 academic year, tuition is \$41,599 for resident students and \$52,380 for nonresidents. See the law school website for more information. For fee information, please refer to financialaid.uoregon.edu (<http://financialaid.uoregon.edu/>). Tuition and fee schedules are subject to revision by the State Board of Higher Education.

Residence classification regulations appear in Chapter 580, Division 10, of Oregon Administrative Rules, which are quoted in the **Admissions** section of this catalog. Details governing administration of nonresident and resident policies are complex. For answers to individual questions, students are advised to consult a staff member in the university's Office of Admissions.

Total Costs

Because student living arrangements and personal spending habits vary widely, no single figure represents the cost of attending the university. Information on total 2022–23 costs for a resident student at the School of Law is available to view on the Office of Student Financial Aid and Scholarships website (http://financialaid.uoregon.edu/cost_of_attendance_law/). The child-care allowance varies according to circumstance and is based on documentable costs for the period of time the student is enrolled. Transportation costs also vary.

Health insurance is optional for domestic students. Costs for semester or for full twelve-month coverage are available in the office of the University Health Center.

Financial Assistance

See the **Student Financial Aid and Scholarships** section of this catalog for complete information about financial aid including loans.

Scholarships and Fellowships

Law school applicants are automatically evaluated for merit-based scholarships. Admitted law students may also apply for scholarships and fellowships offered exclusively for incoming law students after the time of admission.

Importantly, all law students are encouraged to apply for scholarships offered by the University of Oregon through the Office of Financial Aid and other outside organizations.

The law school has a Loan Repayment Assistance Program (LRAP) to help students with large law school loans to more easily enter public service. Learn more by visiting the website (<https://law.uoregon.edu/explore/LRAP/>).

Faculty

Sarah J. Adams-Schoen, assistant professor (land use, state and local government, ocean and coastal). BA, 1994, Sarah Lawrence; MSc, 1995, London School of Economics; JD, 2002, Lewis and Clark; Federal Bar for U.S. District Court, 2002; Oregon bar, 2002. (2019)

Angela Addae, assistant professor (civil rights, race and law, social enterprise law). BA, 2011, Fisk; MA, 2013, Arizona; PhD, 2019, Arizona; JD, 2016, Arizona; Oregon bar, 2016. (2019)

Adell L. Amos, Clayton R. Hess Professor of Law (environmental and natural resources law). BA, 1995, Drury; JD, 1998, Oregon (Coif); Missouri bar, 1999. (2005)

Howard Arnett, professor of practice. BA, 1970, Stanford; MSc, 1971, London School of Economics; JD, 1977, Oregon; Oregon bar, 1977. (2019)

Kristen Bell, assistant professor (criminal law, advanced appellate advocacy). BA, 2005, Stanford; PhD, 2010, North Carolina; JD, 2013, Stanford; California bar, 2014. (2018)

Carl S. Bjerre, Wallace L. and Ellen A. Kaapcke Law Professor (commercial law, contracts). BA, 1982, California, Berkeley; JD, 1988, Cornell (Coif); New York bar, 1989; Oregon bar, 2001. (1996)

John E. Bonine, Bernard B. Kliks Professor of Law (environmental law, administrative law, constitutional law). AB, 1966, Stanford; LLB, 1969, Yale; California bar, 1970; Oregon bar, 1977. (1978)

Marcilynn A. Burke, Dave Frohnmayer Chair in Leadership and Law; Dean. AB, 1991, North Carolina; JD, 1995, Yale; District of Columbia bar, 1996; New York bar, 1996. (2017)

Stuart Chinn, professor (constitutional law, legislation); Associate Dean, Academic Affairs. BA, 2001, MA, 2001, JD, 2004, PhD, 2008, Yale. (2009)

Andrea Coles-Bjerre, associate professor (creditors' rights, bankruptcy, civil procedure); faculty director, business law. BA, 1984, Barnard; JD, 1987, Brooklyn Law; New York bar, 1988. (1996)

Greg Dotson, associate professor (environmental and energy law). BA, 1991, Virginia Polytechnic Institute and State; JD, 1995, Oregon. (2016)

Garrett Epps, professor practice. BA, 1972, Harvard; MA, 1975 Hollins; JD, 1991, LLM, 1994, Duke. (2021)

Michael Fakhri, professor (international business transactions, law and development). LLB, 2001, Queen's (Ontario); LLM, 2006, Harvard. (2010)

Elizabeth R. Frost, LRW Associate Clinical Professor (legal research and writing, real estate transactions). BA, 2002, Yale; JD, 2006, Michigan, Ann Arbor. (2010)

Kristie Gibson, Instructor. BA, JD, Oregon. LLM Willamette. (2018)

Erik Girvan, associate professor (civil procedure, remedies); faculty director, Master's Degree in Conflict and Dispute Resolution Program. BA, 1998, Alaska, Fairbanks; JD, 2002, Harvard; PhD, 2012, Minnesota, Twin Cities. (2012)

Rebekah Hanley, LRW Clinical Professor (legal research and writing, legal profession). BA, 1996, Yale; JD, 2000, California, Los Angeles. (2004)

Laurie Hauber, Instructor; Director, Experiential Education. BA, 1990, Harvard; JD, 1998, Boston. (2020)

Robert C. Illig, associate professor; dean's distinguished faculty fellow (business associations, mergers and acquisitions, private equity and venture capital). BA, 1991, Williams; JD, 1996, Vanderbilt; New York bar, 1997. (2004)

Tom Lininger, Orlando John and Marian H. Hollis Professor of Law (ethics, criminal law, public interest law). BA, 1988, Yale; JD, 1991, Harvard; California bar, 1993; Oregon bar, 2008. (2003)

Mohsen Manesh, professor (advanced business law, business associations, contracts); faculty director, Portland program. BS, 2003, Arkansas; JD, 2006, Georgetown. (2011)

Roberta Mann, Mr. and Mrs. L. L. Stewart Business Law Professor (tax law, property law, environmental law). BS, 1980, MBA, 1982, JD, 1987, Arizona State; LLM, 1995, Georgetown; Arizona bar, 1987; District of Columbia bar, 1989. (2008)

Megan McAlpin, LRW Clinical Professor (legal research and writing). BS, 2000, Western Oregon; JD, 2003, Willamette; Oregon bar, 2003. (2007)

Michelle McKinley, Bernard B. Kliks Professor of Law (immigration law, refugee and asylum law, international law). BA, 1985, Wellesley; MPhil, 1988, Oxford; JD, 1995, Harvard. (2007)

Kathryn Moakley, Assistant Clinical Professor. BA, Knox; JD, Oregon. (2015)

Michael L. Moffitt, Philip H. Knight professor (civil procedure, negotiation, appropriate dispute resolution). BA, 1991, Marietta; JD, 1994, Harvard. (2001)

Eric Priest, associate professor (copyright law, trademark law, property). BA, 1999, Minnesota, Twin Cities; LLM, 2005, Harvard; JD, 2002, Illinois Institute of Technology. (2009)

Ofer Raban, professor; Elmer Sahlstrom Senior Faculty Fellow (constitutional law, criminal investigation, legal interpretation). BA, 1994,

City University of New York, City College; DPhil, 1994, Oxford; JD, 1999, Harvard. (2008)

Alai Reyes-Santos, professor of practice. BA, 2001, Puerto Rico; MA, 2004, PhD, 2007, California, San Diego. (2021)

Jennifer Reynolds, professor (dispute resolution); faculty director, Appropriate Dispute Resolution Center; Associate Dean, Faculty Research and Programs. AB, 1992, Chicago; MA, 1996, Texas, Austin; JD, 2008, Harvard. (2009)

Joan Rocklin, LRW Clinical Professor (legal research and writing). BA, 1993, Williams; JD, 1998, Pennsylvania (Coif); New York bar, 1998. (2001)

Suzanne E. Rowe, James L. and Ilene R. Hershner Professor in Jurisprudence; director, Legal Research and Writing Program. BA, 1983, North Carolina, Chapel Hill; JD, 1989, Columbia; California bar, 1992; District of Columbia bar, 1992. (2000)

Nancy E. Shurtz, B. A. Kliks Professor of Law (taxation, estate planning, women and the law). BA, 1970, Cincinnati; JD, 1972, Ohio State; LLM, 1977, Georgetown; Ohio bar, 1973; Tennessee bar, 1973; District of Columbia bar, 1977. (1982)

Elizabeth Tippet, associate professor. BA, 2002, Harvard; JD, 2006, Harvard. (2012)

Merle H. Weiner, Philip H. Knight Professor (torts, family law, domestic violence). BA, 1985, Dartmouth College; LLM, 1988, Cambridge; JD, 1990, Harvard; District of Columbia bar, 1991; Maryland bar, 1991; California bar, 1993. (1998)

Mindy Wittkop, Instructor, Director, Business Law Clinic. BA, 1993, Portland. JD, 1997, Oregon. (2010)

Mary C. Wood, Philip H. Knight Professor (Indian law, public lands, property); faculty director, Environmental and Natural Resources Law Program. BA, 1984, Washington (Seattle); JD, 1987, Stanford; Washington bar, 1989; Oregon bar, 1990. (1992)

Emeriti

Barbara Bader Aldave, professor emerita. BS, 1960, Stanford; JD, 1966, California, Berkeley (Coif); Oregon bar, 1966; Texas bar, 1982. (2000)

Donald W. Brodie, professor emeritus. BA, 1958, Washington (Seattle); LLB, 1961, New York University; Washington bar, 1961; Oregon bar, 1981. (1967)

Caroline Forell, professor emerita. BA, 1973, JD, 1978, Iowa (Coif); Oregon bar, 1978. (1978)

Susan N. Gary, professor emerita (trusts and estates, estate planning, nonprofit organizations). BA, 1977, Yale; JD, 1981, Columbia; Illinois bar, 1981; Oregon bar, 1989. (1992)

Ibrahim J. Gassama, professor emeritus (torts, international law, human rights). BA, 1980, Virginia Polytechnic; JD, 1984, Harvard; New York bar, 1985. (1991)

Leslie J. Harris, professor emerita. BA, 1973, New Mexico State; JD, 1976, New Mexico (Coif); New Mexico bar, 1976; District of Columbia bar, 1977. (1982)

Richard G. Hildreth, professor emeritus. BSE, 1965, JD, 1968, Michigan (Coif); diploma in law, 1969, Oxford; diploma in law, 1973, Stockholm; California bar, 1969; Oregon bar, 1982. (1978)

Ralph James Mooney, professor emeritus. BA, 1965, Harvard; JD, 1968, Michigan (Coif); California bar, 1968. (1972)

Michael Musheno, professor emeritus (law and society, public policy, conflict management). BA, 1969, Lycoming College; MA, 1971, PhD, 1974, American. (2014)

Margaret L. Paris, professor emerita. BA, 1981, JD, 1985 (Coif), Northwestern; Illinois bar, 1985. (1992)

Dominick R. Vetri, professor emeritus (art law, torts, gay and lesbian legal issues). BS, ME, 1960, New Jersey Institute of Technology; JD, 1964, Pennsylvania (Coif); New Jersey bar, 1965; Oregon bar, 1977. (1967)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Minor in Legal Studies

The legal studies minor examines how law shapes and is shaped by society. It combines the analytical tools associated with legal scholarship with elements of a liberal arts education to investigate the power of the law and its potential to create social change.

Requirements for the Minor

Code	Title	Credits
	Core courses	8
	Law elective courses	8
	Elective courses in other fields	8
	Total Credits	24

Courses must be passed with grades of C– or better, with at least 12 credits earned in upper-division courses at the 300 or 400 levels. Courses taken by the student toward the minor may also count, as appropriate, to fulfill requirements for other degree programs. The legal studies minor does not count toward any other degree offered by the School of Law (JD, LLM, CRES master's).

The law elective courses are organized into two fields of interest: law in American society and law in global society. The electives include courses from the following departments and programs: business administration (BA), cinema studies (CINE), education studies (EDST), ethnic studies (ES), family and human services (FHS), geography, (GEOG) global studies (GLBL), journalism (J), philosophy (PHIL), planning, public policy, and management (PPPM), political science (PS), psychology (PSY), and sociology (SOC).

Students may petition the School of Law's Managing Director of Legal Studies for approval of another outside course related to legal studies.

- **Doctor of Jurisprudence**
- **Master of Laws**
- Master of Arts in Conflict and Dispute Resolution (p.)
- **Master of Science in Conflict and Dispute Resolution**
- **Graduate Certificate in Institutional and Organizational Conflict Management**

Degree Programs

Doctor of Jurisprudence

The curriculum presents fundamental subjects of law during the first year, and the first-year program is prescribed. These required courses are designed to provide a solid foundation in legal theory, practical writing and research skills, and a theoretical and practical knowledge of the law.

All but two second- and third-year courses are elective.

Code	Title	Credits
First-Year Required Courses		
LAW 611	Contracts	4
LAW 613	Torts	4
LAW 617	Property	4
LAW 615	Civil Procedure	4
LAW 618	Criminal Law	4
LAW 622	Legal Research and Writing I	3
LAW 623	Legal Research and Writing II	3
LAW 643	Constitutional Law I	3
Second- and Third-Year Required Courses		
LAW 644	Constitutional Law II	3
LAW 649	Legal Profession	3
Electives		
Law courses in area of study		50
Total Credits		85

Students who have been admitted to the School of Law, who have satisfactorily completed 85 semester credits, and who have otherwise satisfied the requirements of the university and the School of Law are granted the JD degree provided that they

- earn a BA or BS or equivalent degree from an accredited college or university at least two years before completing work for the JD degree
- complete successfully all prescribed first-year courses
- complete successfully Constitutional Law II (LAW 644) and Legal Profession (LAW 649)
- fulfill an experiential learning requirement, a diversity course requirement, a professional planning requirement, and a writing requirement
- have been full-time law students for at least six semesters or equivalent
- earn a 2.00 cumulative University of Oregon Law School grade point average
- fulfill other requirements as may be imposed

The School of Law reserves the right to modify its curriculum and graduation requirements at any time.

Students in the School of Law may accrue up to 5 of the required 85 semester credits by successfully completing non-law graduate-level courses or seminars at the University of Oregon. These courses must be

relevant to their program of legal studies and approved in advance by the associate dean for academic affairs.

Additional Requirements

A total of three years of full-time resident professional study in the University of Oregon School of Law or another law school of recognized standing is required for the JD degree. At least 55 semester hours must be completed at the University of Oregon School of Law.

Master of Laws

The School of Law offers a degree program leading to a master of laws with concentrations in American law, business law, conflict and dispute resolution, or environmental and natural resources law. Applicants must have a JD from an accredited US law school or a law degree (e.g., LLB or bachelor of laws) from a non-U.S. program of legal education.

This program is intended to prepare a select group of postgraduate students for careers in teaching, governmental or international positions, and legal careers in private or public service.

Students who have been admitted to the School of Law master of laws (LLM) program, who have satisfactorily completed at least 24 semester credits, and who have otherwise satisfied the LLM program requirements, are granted the LLM degree provided that they

- have been full-time law students for at least two semesters
- earn a 2.00 cumulative law school grade point average
- fulfill other requirements as may be imposed

The School of Law reserves the right to modify its curriculum and graduation requirements at any time.

For the 2022–23 academic year, tuition and fees for both resident and nonresident students are \$50,724. For fee information, please refer to the Financial Aid website (<https://financialaid.uoregon.edu>).

Master of Laws Requirements (American Law Concentration)¹

Code	Title	Credits
LAW 780	LLM Seminar: Writing	2
LAW 781	LLM Seminar: In Practice	2
Core courses		4
Elective courses in American law		16
Total Credits		24

¹ Only for students without a doctor of jurisprudence (JD) degree.

Master of Laws Requirements (Business Law Concentration)

Code	Title	Credits
LAW 780	LLM Seminar: Writing	2
LAW 781	LLM Seminar: In Practice	2
Core courses (JD degree holders)		16-19
Core courses (non-JD degree holders)		18-21
Elective courses in business law (JD degree holders)		1-4
Elective Courses in business law (non-JD degree holders)		1-2
Total Credits		24

Master of Laws Requirements (Conflict and Dispute Resolution Concentration)

Code	Title	Credits
LAW 780	LLM Seminar: Writing	2
LAW 781	LLM Seminar: In Practice	2
Core courses (JD degree holders)		11-12
Core courses (non-JD degree holders)		14-16
Elective courses in conflict and dispute resolution (JD degree holders)		8-10
Elective courses in conflict and dispute resolution (non-JD degree holders)		4-6
Total Credits		24

Master of Laws Requirements (Environmental and Natural Resources Law Concentration)

Code	Title	Credits
LAW 780	LLM Seminar: Writing	2
LAW 781	LLM Seminar: In Practice	2
Core courses (JD degree holders)		11-15
Core courses (non-JD degree holders)		12-17
Elective courses in environmental and natural resources law (JD degree holders)		5-10
Elective courses in environmental and natural resources law (non-JD degree holders)		3-8
Total Credits		24

Additional Requirements

- Students who hold a law degree from a non-U.S. institution of higher education are required to take a 2-credit introductory course in American law and a 2-credit course in advanced persuasive legal writing as part of their degree requirements. Depending on a student's course selection and course availability, a student who is required to take these two courses may take more than 24 credits.
- LLM Seminar: Writing (LAW 780) and LLM Seminar: In Practice (LAW 781) are required for all students, providing education on topics of current concern. The students also work to improve their skills in making presentations, drafting articles, legal research, drafting transaction documents, and working collaboratively.
- Master of laws students must complete a written comprehensive paper or project in connection with one of the required concentration-specific courses or as a concentration-focused, independent-study legal research and writing course under the supervision of a faculty advisor.

Full information may be found on the program website (<https://law.uoregon.edu/programs/LLM/>).

Master's Degree in Conflict and Dispute Resolution

The graduate program in conflict and dispute resolution (CRES), housed in the School of Law, offers an interdisciplinary, master's degree (MA or MS) granted by the Division of Graduate Studies. It is an interdisciplinary program that prepares professionals from all disciplines to be collaborative problem-solvers in every aspect of society. The curriculum includes a balance of theory and skills-based learning designed to sharpen analytical and practical skills, encourage intellectual rigor and foster the lively exchange of ideas in and out of the classroom.

The program operates on the quarter (term) calendar. The calendar is available for review online (<http://registrar.uoregon.edu/calendars/academic/>).

Students are admitted to the program once a year for fall term. Applicants do not need to apply to the JD program, nor are they required to have a specific educational background to be eligible. Applicants are required to apply online (<https://law.uoregon.edu/cres/apply/>) through the Division of Graduate Studies system, GradWeb.

For 2022–23, tuition is \$24,759 for resident students and \$33,426 for nonresidents assuming students are enrolled full-time for fall, winter and spring terms. The total cost of attendance (including estimates for housing, books, personal expenses, and transportation) and information about scholarships may be found online (<https://law.uoregon.edu/explore/CRES-tuition-and-financial-aid/>). For fee information, please refer to financialaid.uoregon.edu (<http://catalog.uoregon.edu/law/financialaid.uoregon.edu>).

Master of Arts in Conflict and Dispute Resolution

Code	Title	Credits
	Core courses	32
	Elective courses	20
	Internship (320 hours)	8
	Thesis, terminal project, or course concentration	9
Total Credits		68.5

*Students who wish to obtain a master of arts degree instead of the master of science must demonstrate proficiency in a second language (<https://gradschool.uoregon.edu/academics/completing-degree/masters-minimum-requirements/#language-requirement>).

Master of Science in Conflict and Dispute Resolution

Code	Title	Credits
	Core courses	32
	Elective courses	20
	Internship (320 hours)	8
	Thesis, terminal project, or course concentration	9
Total Credits		68.5

The Division of Graduate Studies requirements may be found online (<https://gradschool.uoregon.edu/policies-procedures/masters/>).

Additional Requirements

First-year students take core courses (<https://law.uoregon.edu/cres/requirements/corecourses/>) together as a cohort. In the second year of study, degree candidates focus on completing their elective course work, internship, and final project. Students have the option to pursue and complete the program on a full-time basis in two-years or pursue the program on a part-time basis which extends the program.

Elective course work (<https://law.uoregon.edu/cres/requirements/electives/>) may come from a wide array of disciplines including business, global studies, public policy and management, philosophy, political science, psychology, and sociology, among others. The CRES Program also offers specific electives in areas such as the Israel-Palestine conflict, environmental conflict resolution, organizational conflict resolution, restorative justice, family mediation, and conflict and gender.

The internship (<https://law.uoregon.edu/cres/practical-experience/>) is a key element of the educational program, providing practical experience in an area that has relevance to the student's educational and career goals. The internship requirement is flexible to allow students to complete their credits over one or more terms with one or more organizations. Opportunities may include local, regional, national, and international locales.

The thesis, terminal project, or course concentration component (the final project (<https://law.uoregon.edu/cres/requirements/final-project/>) for the degree requirement) is flexible in format and content to allow students to choose among a theory-based academic paper that studies an aspect of the field, a practical applied project, or a set of courses selected to build specific expertise in a given area. Successful completion of the final project requires an oral defense before the student's final project committee.

The Conflict and Dispute Resolution Program offers several concurrent degree programs: environmental studies, global studies, law, business administration, multimedia journalism, strategic communication, community and regional planning, nonprofit management, and public administration. Other concurrent master's or doctoral degree opportunities may be approved on a case-by-case basis. Students are also eligible to pursue a variety of graduate certificates and specializations. For more information on these opportunities, click here (<https://graduatestudies.uoregon.edu/academics/programs/#Graduate%20Certificate%20Programs>).

Graduate Specializations

The Conflict and Dispute Resolution Program partners with several other academic departments to offer four graduate specializations (<https://law.uoregon.edu/cres/specializations/>):

- Environmental Conflict: Climate Change
- Environmental Conflict: Land Use
- Environmental Conflict: Water
- Regional and International Conflict

Full information may be found on the program website (<https://law.uoregon.edu/programs/conflict-dispute-resolution-masters/>). For specific questions: Email: cres@uoregon.edu, Phone: 541-346-1604.

Graduate Certificate in Institutional and Organizational Conflict Management

Code	Title	Credits
Required Courses		
CRES 614	Negotiation, Bargaining and Persuasion	4
CRES 620	Facilitation	2
CRES 631	Managing Conflict in Organizations	4
CRES 670	Adversarial Processes	4
Electives Courses		12
CRES 515	Conflict and Gender	
CRES 612	Philosophy of Conflict Resolution	
CRES 660	Environmental Conflict Resolution	
CRES 621	Culture, Power, and Conflict Resolution I

CRES 623	Culture, Power, and Conflict Resolution III	

All courses are regularized or in the process of being regularized.

Concurrent Degree Programs

JD/MA or JD/MS in Conflict and Dispute Resolution

The School of Law offers a concurrent degree program leading to a doctor of jurisprudence and a master of arts or master of science degree in conflict and dispute resolution. Students receive two degrees in four years rather than in the standard five, deepening their understanding of negotiation, dispute resolution, and alternative methods of settlement. Applicants must apply to and be accepted by both programs.

JD/MA in International Studies

The School of Law and the International Studies Program offer a concurrent degree program leading to a doctor of jurisprudence and a master of arts degree in international studies with a specialization in international law. Students receive two degrees in four years. Applicants must apply to and be accepted by both programs.

JD/MBA

The School of Law and the Lundquist College of Business Graduate School of Management offer a doctor of jurisprudence and master of business administration (JD/MBA) concurrent degree program. The program prepares students to use their legal skills in fields that require understanding of business principles, finance, accounting, corporate management, sports marketing, and international business. Students receive two degrees in four years rather than in the standard five. Applicants must apply to and be accepted by both schools.

JD/MA or MS in Environmental Studies

The School of Law and the Environmental Studies Program offer a concurrent degree program leading to a doctor of jurisprudence and a master of arts or a master of science in environmental studies. This program introduces students to scientific, social, and legal aspects of environmental regulation and resource development. Students receive two degrees in four years rather than in the standard five. Applicants must apply to and be accepted by both programs.

JD/MA or MS in Media Studies

The School of Law and the School of Journalism and Communication offer a concurrent degree program leading to a doctor of jurisprudence and a master of arts or master of science in media studies. The degrees provide students with opportunities for both legal and communications internships. Applicants must apply to and be accepted by both schools.

JD/MCRP in Community and Regional Planning

The School of Law and the School of Planning, Public Policy and Management offer a concurrent degree program leading to a doctor of jurisprudence and a master of community and regional planning. The degrees provide students with opportunities for both legal and planning internships. Applicants must apply to and be accepted by both programs.

JD/MNM in Nonprofit Management

The School of Law and the School of Planning, Public Policy and Management offer concurrent degrees that provide students with professionally accredited degrees in both law and public administration, the opportunity to interact with professionals in both the legal and public administration communities, opportunities for both legal and public

administration internships, and an array of course work that prepares students for a wide range of professional careers.

JD/MPA in Public Administration

The School of Law and the School of Planning, Public Policy and Management offer a concurrent degree program leading to a doctor of jurisprudence and a master of public administration. The degrees provide students with opportunities for both legal and public administration internships. Applicants must apply to and be accepted by both programs.

JD/MS in Water Resources Policy and Management

The School of Law and Oregon State University offer a concurrent degree program leading to a doctor of jurisprudence and a master of science in water resources engineering, water resources science, or water resources policy and management. Applicants must apply to and be accepted by both programs.

Conflict and Dispute Resolution Courses

CRES 101. Introduction to Conflict Resolution. 4 Credits.

Explores up-to-date conflict management theories and practical steps to communicate effectively in sensitive situations.

CRES 199. Special Studies: [Topic]. 1-4 Credits.

Repeatable.

CRES 351. Roles of a Diplomat. 2 Credits.

Students learn about diplomats and diplomatic practice in international conflict situations.

CRES 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

CRES 401. Research: [Topic]. 1-4 Credits.

Repeatable.

CRES 404. Internship: [Topic]. 1-4 Credits.

Repeatable.

CRES 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

CRES 415. Conflict and Gender. 4 Credits.

Focuses on the multiple relationships among conflict, violence, and gender in situations of warfare, militarization, and peacemaking.

CRES 420. Restorative Justice. 4 Credits.

Provides a critical introduction to the principles and practices of restorative justice.

CRES 430. Working Internationally: Culture and Context. 4 Credits.

The theoretical, historical, socio-political, and practical contexts of working, volunteering, doing internships and field research internationally.

CRES 435. Israel and Palestine. 4 Credits.

Examination of the Palestinian and Israeli conflict. Evolution of the political struggle with a broad look at the human side of conflict, and examination of critical negotiation issues.

CRES 440. Dialogue across Differences. 2 Credits.

Introduction to processes and facilitation of discourse and dialogue, with special emphasis on participation. Sequence with CRES 441.

CRES 441. Dialogue Across Differences II. 2 Credits.

Advanced course in dialogic processes and facilitation, with special emphasis on context. Sequence with CRES 440. Prereq: CRES 440.

CRES 445. Conflicts of Incarceration. 4 Credits.

Issues of crime, incarceration, and justice within the Western context.

CRES 503. Thesis. 1-9 Credits.

Repeatable.

CRES 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

CRES 515. Conflict and Gender. 4 Credits.

Focuses on the multiple relationships among conflict, violence, and gender in situations of warfare, militarization, and peacemaking.

CRES 520. Restorative Justice. 4 Credits.

Provides a critical introduction to the principles and practices of restorative justice.

CRES 530. Working Internationally: Culture and Context. 4 Credits.

The theoretical, historical, socio-political, and practical contexts of working, volunteering, doing internships and field research internationally.

CRES 535. Israel and Palestine. 4 Credits.

Examination of the Palestinian and Israeli conflict. Evolution of the political struggle with a broad look at the human side of conflict, and examination of critical negotiation issues.

CRES 540. Dialogue Across Differences. 1-2 Credits.

Introduction to processes and facilitation of discourse and dialogue, with special emphasis on participation. Sequence with CRES 541.

CRES 541. Dialogue Across Differences II. 2 Credits.

Advanced course in dialogic processes and facilitation, with special emphasis on context. Sequence with CRES 540.

Prereq: CRES 540.

CRES 545. Conflicts of Incarceration. 4 Credits.

Issues of crime, incarceration, and justice within the Western context.

CRES 601. Research: [Topic]. 1-9 Credits.

Repeatable.

CRES 604. Internship: [Topic]. 1-8 Credits.

Repeatable up to seven times or a maximum of 8 credits.

CRES 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

CRES 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

CRES 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

CRES 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

CRES 611. Terminal Project. 1-9 Credits.

Repeatable.

CRES 612. Philosophy of Conflict Resolution. 4 Credits.

Study of how philosophical and theoretical frameworks influence current views and practices of conflict resolution.

CRES 613. Perspectives on Conflict Resolution. 4 Credits.

Introduction to interdisciplinary perspectives on conflict and conflict resolution. Various disciplines (including economics, psychology, and communication) views of conflict and conflict resolution.

CRES 614. Negotiation, Bargaining and Persuasion. 4 Credits.

Examines issues that pervade negotiations, including framing arguments, analyzing bargaining conditions, and crafting deals. Basic skills in negotiation, bargaining and persuasion developed through simulated negotiations.

CRES 615. Culture, Power and Conflict Resolution. 4 Credits.

Builds or enhances necessary theoretical knowledge, awareness, understanding, practical skills, and strategies for effectiveness in cross cultural conflict resolution in light of existing power dynamics and histories of social violence.

CRES 616. Mediation Skills. 4 Credits.

Develop mediation skills such as problem framing, listening, and issue identification and sequencing. Learn to diagnose problems, clarify facts and craft interventions.

CRES 618. Adjudication and Courts. 2 Credits.

Designed to familiarize students with litigation and formal legal alternatives such as arbitration. Court processes and regulations are explained.

CRES 620. Facilitation. 2 Credits.

Fundamentals of facilitating group discussions and decision-making.

CRES 621. Culture, Power, and Conflict Resolution I. 2 Credits.

This course introduces multiple approaches to conflict drawing from distinct cultural traditions. It asks students to consider how cultural differences and power dynamics impact how people approach conflict and conflict resolution.

CRES 622. Culture, Power, and Conflict Resolution II. 1 Credit.

Students will explore creative ways to engage cultural difference and power as central assumptions in conflict resolution.

Prereq: CRES 621.

CRES 623. Culture, Power, and Conflict Resolution III. 1 Credit.

In this course students theorize how they would like to engage cross cultural dynamics and existing power structures in their own practice.

Prereq: CRES 622.

CRES 625. Psychology of Conflict. 4 Credits.

Examines the psychological sources, nature, and functions of conflict, covering multiple levels of analysis relevant to intrapersonal, interpersonal, intragroup, and intergroup conflict.

CRES 631. Managing Conflict in Organizations. 4 Credits.

Prepares students to assist in managing disputes within organization. Students will receive a basic introduction to organizational context, and structure, leadership and communication styles, and sources of workplace disputes. The course also provides an overview of the processes by which organizations typically resolve disputes.

CRES 632. Research Methods. 3 Credits.

Explores questions that research may encounter or raise, and how to resolve them. Considers both qualitative and quantitative research methods.

CRES 633. Professional Development Seminar. 1 Credit.

Provides incoming students with tools to be successful in the graduate program and the professional world.

CRES 650. Capstone Seminar. 1 Credit.

Provides student with opportunities to systemically consider lessons from their practicum experiences. Class sessions based on student fieldwork.

CRES 651. Academic Capstone: Course Concentration. 1 Credit.

Fulfills the course component of the course concentration final project for conflict resolution students.

Prereq: students must have completed 50 percent or more of their course concentration credits prior to the term in which they enroll in this course.

CRES 660. Environmental Conflict Resolution. 4 Credits.

Students learn and critically examine methods of environmental conflict resolution, including conflict assessment, negotiation, decision-making, adaptive management, collaboration, and public participation.

CRES 665. Family Mediation. 4 Credits.

Preparation for work-related experiences in family mediation, specifically domestic relations involving custody and parenting time.

CRES 670. Adversarial Processes. 4 Credits.

This course is an introduction to the primary adversarial or adjudicative processes used to resolve civil disputes: Litigation and Arbitration.

Law Courses

LAW 101. Introduction to American Law. 4 Credits.

Surveys United States legal system: presents structure and methods of the legal system and fundamentals of several substantive areas of law.

LAW 102. Introduction to Criminal Law. 4 Credits.

Explores criminal law and statutes using primary and secondary sources.

LAW 103. Introduction to Criminal Investigation. 4 Credits.

Examines the constitutional limitations on police officers' authority to detain suspects, search them and their property, and interrogate them.

LAW 104. Introduction to Business Law. 4 Credits.

Examines the context of everyday commerce, shaped by contract, tort, business entity, and securities law, to uncover how the law both affects and is affected by business.

LAW 196. Field Studies: [Topic]. 1-6 Credits.

Repeatable.

LAW 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

LAW 201. Introduction to Environmental Law and Policy. 4 Credits.

An introduction to environmental policy and law, with an overview of major themes and the regulatory framework. Focuses on community resilience.

LAW 202. Introduction to Public International Law. 4 Credits.

An introduction to the origins, application, and main actors in international law, international institutions, and international legal processes.

LAW 203. Controversies in Constitutional Law. 4 Credits.

In-depth examination of five to seven landmark Supreme Court cases over the course of the term, spending three to four class sessions on each case.

LAW 204. Immigration and Citizenship. 4 Credits.

Interdisciplinary study of the way in which the American legal order has constituted citizenship.

LAW 250. Introduction to Legal Research. 2 Credits.

Students investigate sources of law and sharpen analytical skills using issues arising in everyday life and scenarios requiring legal information to develop critical legal information literacy skills.

LAW 301. Youth and Social Change. 4 Credits.

Explore how adults act on youth through law, mass media, policy, and social science, while investigating youth as agents of change, acting on their own perspective of law and justice.

LAW 304. American Law and Families. 4 Credits.

Examines the family through a legal lens: the rules that affect legal relationships among family members and laws related to family property.

LAW 305. Contracts in Society. 4 Credits.

Examines business deals as tools that shape personal and social realities, including related power dynamics and the nuances and limits of language.

LAW 310. Environmental Regulation. 4 Credits.

Provides students with an understanding of laws regulating activities that affect the environment as well as the skills to analyze and apply these laws to current issues.

LAW 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

LAW 401. Research: [Topic]. 1-6 Credits.

Repeatable.

LAW 403. Thesis. 1-12 Credits.

Repeatable.

LAW 404. Internship: [Topic]. 1-12 Credits.

Repeatable.

LAW 405. Reading and Conference: [Topic]. 1-6 Credits.

Repeatable.

LAW 407. Seminar: [Topic]. 1-5 Credits.

Repeatable.

LAW 408. Workshop: [Topic]. 1-12 Credits.

Repeatable.

LAW 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

LAW 415. Human Rights, Law, and Culture. 4 Credits.

The history, theory, and practice of human rights from a global perspective.

LAW 416. Transitional Justice. 4 Credits.

Historical and theoretical overview of the conflicts and international mechanisms, with a focus on cultural, historical, and legal forces that shape postconflict peace-building efforts.

LAW 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

LAW 600. Law Courses for Nonlaw Students. 1-15 Credits.

Generic course number for translating 600-level School of Law semester credits to term credits on academic records for nonlaw students.

Repeatable up to six times.

LAW 601. Research: [Topic]. 1-16 Credits.

Repeatable up to six times.

LAW 605. Reading: [Topic]. 1-16 Credits.

Repeatable up to six times.

LAW 607. Seminar: [Topic]. 1-5 Credits.

Repeatable. Recent topics include Accounting for Lawyers, Alternative Dispute Resolution, American Legal Biography, Immigration Law, Litigation Practice and Procedure, Mediation, Negotiation, Nonprofit Organizations, Postconviction Remedies, White-Collar Crime.

LAW 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

LAW 611. Contracts. 4 Credits.

Examines contractual relationships from formation through interpretation and breach to remedies and potential third-party rights. Covers the common law of contracts and Uniform Commercial Code, Article 2, which governs contracts for the sale of goods.

LAW 613. Torts. 4 Credits.

Liability for intentional and negligently caused injuries to person and property, strict liability, vicarious liability, abnormally dangerous activities, products liability, nuisance, invasion of privacy, defamation, defenses and immunities, the impact of insurance and risk distribution upon liability, accident compensation plans, damages, losses.

LAW 614. Advanced Torts. 3 Credits.

Students study and discuss the economic and dignitary torts (for example, defamation, misrepresentation, invasion of privacy, malpractice); they are able to analyze and apply this knowledge in a classroom environment.

Prereq: LAW 613.

LAW 615. Civil Procedure. 4 Credits.

Survey of federal court organization and jurisdiction and of systems of civil procedure.

LAW 617. Property. 4 Credits.

Nature and function of private property rights. Topics may include the common law classification of estates in land; forms of concurrent ownership; landlord and tenant; adverse possession; incorporeal interests in land, easements, covenants, and servitudes; title; introduction to land use issues and judicial legislative developments in law.

LAW 618. Criminal Law. 4 Credits.

Administration of criminal law and the definition of crimes as a technique of social order with primary basic elements of criminal liability. Emphasis on sources of definitions, limitations of culpability, and defenses.

LAW 619. White-Collar Crime. 2 Credits.

For students interested in the practice of criminal law. Assists business lawyers who advise clients on the business practices that constitute criminal activity.

LAW 620. Business Associations. 3-4 Credits.

This is the introductory course on business law and a prerequisite for most upper-level business law courses. It introduces the governance structure of agency, partnerships, corporations and LLCs.

LAW 622. Legal Research and Writing I. 3 Credits.

Integrated instruction in legal research, analysis, and writing of legal memoranda emphasizes research strategies, problem solving, and the relationship between research strategies and analysis. Writing assignments, each progressively more difficult, are evaluated by faculty members. Offered in small sections. Includes library workshops and individual conferences.

LAW 623. Legal Research and Writing II. 3 Credits.

Building on the research, writing, and analytical skills of Legal Research and Writing I, students focus on persuasive writing as they produce trial memoranda and appellate briefs. Students present final oral arguments in a courtroom setting before a panel of three judges.

LAW 624. Advanced Legal Research. 2 Credits.

Development of skills in formulating efficient research strategies online and in print; exposure to research methods in particular areas of law.

LAW 625. Business Bankruptcy. 3 Credits.

Explores the law governing business bankruptcy; examines tools for restructuring and rehabilitating a business under Chapter 11 of the Bankruptcy Code. Topics include operating a business in bankruptcy, reshaping the estate, and negotiating and confirming a plan of reorganization.

Prereq: LAW 648.

LAW 626. Mergers and Acquisitions. 2-3 Credits.

Participants develop an understanding of how to analyze a potential acquiree and how that analysis informs and governs the drafting of the acquisition agreement and the disclosure document. Presents the germination of a transaction from financial need to executed documentation.

Prereq: LAW 620.

LAW 627. Accounting for Lawyers. 3 Credits.

Covers the accounting cycle, generally accepted accounting principles, financial statements, and common legal and accounting topics.

LAW 628. Nonprofit Organizations. 3 Credits.

Provides an overview of the theory, purposes, and regulation of nonprofit organizations. Practical skills are developed through drafting assignments.

LAW 629. Fundamentals of Loans. 1 Credit.

Covers the rights of borrowers and lenders in unsecured and secured loans in less depth than the Secured Transactions course.

LAW 630. Tax Policy. 2-3 Credits.

Explores tax policy issues including how taxes are used to create social equality. Evaluates the current tax system using the three classic goals: equity, efficiency, and simplification.

LAW 631. Real Estate Planning. 3 Credits.

Covers the planning and documentation of real estate development, financing and leasing transactions, with special emphasis on tax aspects of real estate transactions. Taught from a practical skills perspective that will appeal to practicing lawyers and other employers.

Pre- or co-req: LAW 680.

LAW 632. Sales. 2-3 Credits.

Covers contracts for the sale of goods as codified in Uniform Commercial Code Article 2; international contracts, regulation of consumer warranties, leases of goods under Article 2A.

LAW 633. Business Planning. 2,3 Credits.

Study of business life cycle from its initial organization and operation to its eventual sale and dissolution. Students draft documents for use in hypothetical transactions, compare the way partnerships and corporations deal with similar problems, and analyze the impact taxes have on business decisions.

Prereq: LAW 620, LAW 680.

LAW 634. Contract Drafting. 2 Credits.

The principles of contemporary commercial drafting, introduction to documents typically used in a variety of transactions.

LAW 635. Real Estate Transactions. 3 Credits.

Fundamentals of real estate transactions, with a focus on secured land and finance.

LAW 636. Secured Transactions. 3-4 Credits.

Examines the rules that govern borrowing and lending with collateral; buying and selling promissory notes and other debt; and related transactions that are essential to large and small transactions.

LAW 637. Trusts and Estates I. 3 Credits.

Basics of estate planning law--intestate succession, wills, will substitutes, and trusts.

Prereq: LAW 617.

LAW 638. Workers' Compensation Law. 2 Credits.

Fundamentals of workers' compensation law in Oregon and other states.

LAW 640. Children and the Law. 3 Credits.

Topics include the constitutional framework for allocating the power to make decisions about children among parents, children, and state agents; control of education; parental support duties; establishing paternity; the child welfare system; legal solutions to conflict between adolescents and their parents; and juvenile delinquency and the juvenile justice system.

LAW 641. Legislation. 3 Credits.

Covers theories of the legislative process, normative theories of statutory interpretation, and the main judicial doctrines of statutory interpretation.

LAW 642. International Business Transactions. 3 Credits.

Examines legal issues affecting international business activity; includes forms of doing business, trading of goods, commercial terms, the UN Convention on Contracts for the International Sale of Goods, financing, technology, transfers, foreign investment, and dispute resolution.

LAW 643. Constitutional Law I. 3 Credits.

Government structure and individual rights are examined in the context of the authority of courts to declare legislative acts unconstitutional. Includes congressional regulatory power under the Commerce Clause, implied limits on state regulatory power, and the substantive dimensions of due process.

LAW 644. Constitutional Law II. 3 Credits.

Guarantees of individual rights against government, especially freedom of expression and equal protection of the law.

Prereq: LAW 643.

LAW 645. Oregon Practice and Procedure. 3 Credits.

Intensive study of civil procedure in Oregon courts, and the critical evaluation of Oregon civil procedure in light of the purposes and values of a procedural system and in comparison with federal rules.

LAW 646. Federal Jurisdiction. 3 Credits.

Addresses the role of federal courts in the operation of the federal system. Includes analysis of constitutional and legislative foundations of the judicial power of the United States; jurisdiction--diversity of citizenship, federal question, jurisdictional amount, and removal; venue; federal and state court relationships; the law applied to federal courts; procedure in the federal district courts; appellate jurisdiction and procedure in courts of appeals and the Supreme Court.

LAW 647. Conflict of Laws. 3 Credits.

Students learn to evolve techniques for choosing or selecting the governing law from among the states or nations involved in a private event. Presents some aspects of federalism; jurisdiction; and the recognition, enforcement, and modification of judgments.

LAW 648. Bankruptcy. 3 Credits.

Introduction to bankruptcy law; focuses on consumer bankruptcy and contrasting creditor's rights and debtor's protections under the federal Bankruptcy Code with those under state collection law. Recommended preparation: Commercial Law (LAW 636).

LAW 649. Legal Profession. 3 Credits.

Addresses the Model Code of Professional Responsibility, the Code of Judicial Ethics, roles and functions of lawyers in society, organization and functions of the bar, provision of legal service, responsibilities in representing clients, and the future of the legal profession. It may include the review and analysis of videotaped ethical problems.

LAW 650. Interview and Counsel. 2 Credits.

Explores the client-centered approach to interviewing and counseling through readings, discussions, participatory exercises, and role-playing.

LAW 651. Trial Practice. 3 Credits.

Introduces the essential techniques and theory necessary to conduct a trial in court.

Prereq: LAW 652.

LAW 652. Evidence. 3 Credits.

Covers the structure of the adversary system; roles of judge, jury, and attorney in the fact-finding process; sufficiency of evidence; order of proof; presumptions; relevancy; judicial notice; real and documentary evidence; form and elicitation of oral testimony; impeachment and rehabilitation of witnesses; the hearsay rule and its exceptions; privileges. Addresses practical problems in the introduction of evidence and trial tactics and methods. Courtroom observations, movies, and videotapes of effective trial techniques present realistic situations.

LAW 653. Climate Change Law and Policy. 3 Credits.

This course examines laws and policies in the United States over the last half century related to climate change, including international agreements that the nation has joined or considered joining.

LAW 655. Family Law. 3 Credits.

Marriage and its legal consequences, divorce and its financial consequences; establishing the parent-child relationship; child custody and child support; jurisdiction and choice of law issues at divorce; legal regulation of marriage; rights of unmarried cohabitants.

LAW 656. Elder Law. 3 Credits.

Topics include social security and pensions; health care decision-making, including the right to die, living wills, and durable powers of attorney for health care; planning for health care financing, including alternate living arrangements and financing through private resources, Medicare and Medicaid; regulation of retirement facilities and nursing homes; and protection of disabled adults through guardianships, conservatorships, and related mechanisms. Covers the basic and comprehensive writing requirements.

LAW 658. Local Government Law. 3 Credits.

Uses DeTocqueville and Madison to frame the issue of decentralization versus centralization in governmental structure. Course materials are divided into three sections: 1) vertical governmental organization--the relationships between cities and state governments and the relation of both to the federal government; 2) horizontal governmental relations--how neighboring cities deal with one another on public school funding, exclusionary zoning, regional planning, and other areas; 3) internal relationship between cities and their citizens--voting systems, when citizens can sue a city, referenda, and initiatives.

LAW 659. Labor Law. 3 Credits.

Analysis of the National Labor Relations Act and the Oregon Labor Relations Act; the right of self-organization; selection of the representative by election and by other means; unit determination; bargaining in good faith; remedies for unfair labor practices; judicial review; strikes, boycotts, and lockouts under various labor relations acts; concerted activities; and roles of courts and labor agencies.

LAW 660. Employment Law. 3 Credits.

Examines individual rights in the workplace, including federal and state statutes. Use of questionnaires, polygraph legislation, drug and other medical tests; employment discrimination (Title 7); disability discrimination; family leave statutes; and a variety of working conditions are covered, including harassment, workplace privacy, and free speech as well as the Occupational Safety and Health Act. The doctrine of at-will discharge and whistle-blower legislation are included.

LAW 661. Remedies. 3 Credits.

Remedies available for prevention of redress of civil wrongs; includes monetary damages; restitutionary remedies such as tracing, constructive trusts, equitable liens, and injunctions.

LAW 662. Jurisprudence. 3 Credits.

Topics may include examination of important conceptual theories of law—legal positivism, natural law, legal realism; the relation of law and morality; theories of justice: economic, Kantian, utilitarian; the Critical Legal Studies movement; philosophical aspects of legal issues; abortion and punishment; feminist theories of law; and moral constraints of the practice of law.

LAW 664. Administrative Law. 3 Credits.

Analysis of judicial review of administrative action, including presumptions, standing, ripeness, exhaustion, and questions of fact and law; the process of proof in adjudicatory hearings, including official notice, evidentiary considerations, and investigation; the process of decision in adjudicatory hearings, including separation of function, bias, and ex parte communication; procedural distinctions between rule making and adjudication.

LAW 665. Securities Regulation. 2-3 Credits.

Examines the federal statutes and regulations that affect the initial and secondary distribution of securities. Emphasis is placed on the Securities Act of 1933, the Securities Exchange Act of 1934, and the integrated disclosure system now largely in place.

LAW 667. Copyrights. 3 Credits.

Virtually any creative product (other than inventions) that originates with the author can be protected by copyright. Comprehensive federal copyright statute is built upon extensive judicial interpretations through case law. Considers creations, ownership, and transfer of copyright interests and the rights accorded to copyright owners to make copies and derivative works and to distribute, perform, and display the work. Addresses the basic principles of trademark law.

LAW 668. Land Use Law. 2-3 Credits.

Surveys the function, operation, and legal impact of state and local public planning and land-use control laws, ordinances, and administrative growth-control techniques; transfer of developmental rights; zoning; variances; conditional-use permits; and nonconforming uses. Considers newer state-level land-use control devices, such as state environmental impact assessment acts (e.g., in California) and statewide land-use planning laws (e.g., in Oregon).

LAW 669. Water Resources Law. 2,3 Credits.

Reparian and appropriation water law systems, federal and state power over water resources, transfer of water rights, groundwater management, public water rights, including the public trust doctrine, and environmental constraints on water use.

LAW 671. International Law. 2-3 Credits.

Justification for state actions labeled rules of law; sources and evidence of a law between states; statehood; treaties; state responsibility and authority; individuals in transnational situations; international cooperation; protection of human rights; and use of military force.

LAW 673. Patent Law and Policy. 2,3 Credits.

Developments in patent law including patentable subject matter; requirements for patentability and infringement; the process of obtaining and enforcing a patent; and contemporary controversies in patent law, such as ethical and economic objections to biotechnology and software patents.

LAW 674. Intellectual Property Licensing. 3 Credits.

Course explores business, legal, and negotiating issues in intellectual property licensing agreements. Students gain an overview of intellectual property law, pertinent areas of contract law, business factors, and evaluation issues.

LAW 675. Legal Writing. 1-3 Credits.

Research and writing supervised by a faculty member. Typically 2 credits, but never more than 3, are awarded for a writing project in one semester. Repeatable.

LAW 676. International Tax. 3 Credits.

Addresses the United States taxation of international transactions, including trade, investment, and labor, covering both out-bound (US to foreign) and inbound (foreign to US) transactions. Prereq: LAW 680.

LAW 678. Indian Law. 2-3 Credits.

Provides students with an understanding and overview of the fundamental principles of American Indian law.

LAW 679. Ocean and Coastal Law. 3 Credits.

Surveys federal, state, and international laws governing the use and protection of ocean and coastal resources including relevant judicial decisions, administrative regulations, and management plans.

LAW 680. Federal Income Tax I. 3 Credits.

Statutory, judicial, and administrative material related to individual income tax—concepts of income, deductions, credits, tax accounting, basis, and capital gains and losses.

LAW 681. Federal Income Tax II. 3 Credits.

Tax treatment of partners and partnerships, corporations, and shareholders. Prereq: LAW 680.

LAW 682. Estate and Gift Taxes. 2 Credits.

Analysis of the federal estate and gift tax system and its application to gratuitous transfers. Prereq: LAW 637, LAW 680.

LAW 683. Estate Planning. 3 Credits.

Presents problems in estate analysis, planning, and execution; planning an estate from the interview stage to the drafting of wills and trusts to implement the estate plan. Prereq: LAW 637.

LAW 684. Criminal Investigation. 3 Credits.

Examines the regulation of law enforcement investigatory practices—searches and seizures, the eliciting of confessions, and lineups and other identification procedures. Course materials analyze various constitutional and statutory constraints on law enforcement practices, and deal extensively with landmark federal constitutional cases such as *Miranda v. Arizona*.

LAW 685. Criminal Adjudication. 3 Credits.

Examines the adjudicative part of criminal procedure; covers the decision to charge, bail and pretrial release, grand juries and preliminary hearings, discovery, pretrial motions, plea bargaining, jury trials, appeals, and former jeopardy.

LAW 687. Wildlife Law. 2 Credits.

Overview of the treatment of wildlife; international regulation; federal regulation; the national wildlife refuge system; wildlife management on U.S. Forest Service lands and lands administered by the Bureau of Land Management; fish habitat and hydroelectric development; regulation of private lands to protect species on public lands; tribal rights and wildlife; and state regulation of wildlife.

LAW 688. Hazardous Waste Law. 2 Credits.

Hazardous waste liability and regulation is moving to the forefront of environmental law as industries, governmental agencies, and citizen groups struggle with the problems of remedying contamination caused by past disposal practices and seek to prevent unsafe disposal in the future. Emphasizes the attorney's roles in compliance counseling, in environmental audits, and in negotiation between governmental agencies and regulated parties.

LAW 689. Animal Law. 2 Credits.

Examines the debate between animal rights and animal welfare, and considers legal issues concerning companion animals, farm animals, laboratory animals, wild animals, feral animals, and service animals.

LAW 690. International Environmental Law. 2,3 Credits.

Investigates treaty and customary principles of international law regarding environmental protection. Covers problems of protecting the international environmental commons, transboundary pollution, and international interest in national environmental resources.

LAW 691. Environmental Litigation and Practice. 2 Credits.

This seminar helps students transition from doctrine and theory to law practice – particularly alone or in an environmental law firm. Public interest lawyers participate regularly in person or by Skype.

LAW 693. Human Rights and Environment. 3 Credits.

Environmental rights, increasingly recognized as a new category of human rights as well as an application of existing rights, are both substantive and procedural. Presents recent developments in international law and national law in various countries in Europe, Africa, Asia, and the Americas. Examines international instruments, national constitutions, and legislation. Discussion includes novel international court cases that interpret and apply these rights.

LAW 694. Professional Sports Law. 2-3 Credits.

Is the NFL an illegal cartel? What rights do players and unions have? Explores the regulation of professional leagues, players, teams, coaches, and agents.

LAW 695. Amateur Sports Law. 2-3 Credits.

Are student athletes pampered or victimized? What has Title IX accomplished? What's next for the National Collegiate Athletic Association? Explores the regulation of intercollegiate and interscholastic sports.

LAW 696. Sports Licensing. 1 Credit.

A practical look into the world of sports licensing. The focus will be on examining real-world contracts and the contexts in which they were negotiated.

LAW 697. Consumer Law. 3 Credits.

Overview of major consumer protection laws and concepts, including false advertising, consumer privacy, identity theft, credit reporting, home purchases, credit disclosures, and loan regulations.

LAW 698. Trademark Law. 3 Credits.

Introduces trademark law, focusing on U.S. federal trademark law, and examines common law trademarks and unfair competition as well as international dimensions of trademark law.

LAW 699. Antitrust Law. 2 Credits.

Overview of antitrust law in the United States, with an emphasis on current antitrust practice; recognizing, analyzing, and solving problems involving antitrust issues.

LAW 704. Internship: [Topic]. 1-12 Credits.

Repeatable. Hollywood Externship, Federal Judicial Internship.

LAW 707. Seminar: [Topic]. 1-6 Credits.

Repeatable. Recent topics are Advanced Appellate Advocacy; Interviewing and Counseling; Journal of Environmental Law and Litigation; Legislative Issues Workshop; Moot Court Board; Moot Court Competition; Law Review; Oregon Review of International Law, Trial Practice.

LAW 712. Business Law Clinic. 3 Credits.

Students represent companies who need legal assistance in forming and operating their businesses under the supervision of an attorney. Includes a weekly seminar.

Prereq: LAW 620.

LAW 714. Judicial Externship [Topic]. 1-12 Credits.

Externship at the Lane County Circuit Court. Students conduct research, write legal memoranda, draft opinions and generally participate in the daily operation of the court. Repeatable.

LAW 715. Gender-Based Violence and the Law. 2 Credits.

This class focuses on domestic abuse, sexual assault, and stalking and the diverse array of laws that addresses those topics.

LAW 720. Disability Law. 2 Credits.

Surveys the major federal special education and disability nondiscrimination laws from a disability rights perspective.

LAW 721. Introduction to State Administrative Law. 2 Credits.

Examines Oregon's Administrative Procedure Act and Model State Administrative Procedure Act, with the added context of relevant case law.

LAW 722. Alternative Dispute Resolution Litigation Strategy. 2 Credits.

Provides knowledge, tools and skills for lawyers to settle cases, help clients make an informed decision about settlement, and identify appropriate processes.

LAW 723. Oregon Constitutional Law. 2 Credits.

This course covers provisions of the Oregon Constitution that differ from, and usually provide more rights than, the US Constitution, including equal protection, free speech, search and seizure, guaranteed remedy.

Prereq: LAW 643, LAW 644.

LAW 724. Arbitration. 2-3 Credits.

This course introduces students to the theory and practice of arbitration. Students will learn the statutory framework and caselaw for arbitration in domestic and international contexts.

LAW 725. Mediation. 3 Credits.

This course introduces students to the theory and practice of mediation. In an experiential format, students will learn how to manage the stages of a mediation process.

LAW 726. International Sports Law I. 1 Credit.

An overview of the law and structure of the organizations that govern international sports, including FIFA, the International Olympic Committee, World Anti-Doping Association, and Court of Arbitration for Sport.

LAW 727. International Sports Law II. 1 Credit.

A trip to Europe during J-Term to meet with and learn from foreign sports lawyers at the International Olympic Committee, World Anti-Doping Association, Court of Arbitration for Sport, and others. Repeatable once for a maximum of 2 credits.

Prereq: LAW 726.

LAW 728. Advanced Appellate Advocacy. 3 Credits.

This simulation course teaches students practical skills for engaging in appellate advocacy. Students focus on structuring arguments, writing and editing appellate briefs, and doing oral argument.

LAW 729. Legal Writing for the Bar. 2 Credits.

Offers a head start on bar preparation by helping students to develop and solidify the fundamental skills needed to pass the bar.

LAW 730. Intensive Writing. 2 Credits.

Introduces students to ways in which lawyers communicate and gives students the opportunity to more extensively study the mechanics of effectively communicating legal analysis.

LAW 731. Writing in Law Practice. 2 Credits.

Provides students with opportunities to develop practice-oriented writing skills in a variety of contexts.

LAW 732. Intensive Legal Writing. 3 Credits.

Students produce documents in a wide variety of practice settings, including office memoranda, contracts, and client letters. Students receive extensive feedback and opportunities to revise their work. Offered summer only.

LAW 733. Advanced Uniform Commercial Code. 3 Credits.

Covers property-based aspects of business transactions including secured loans, set-off, and ownership and transfer of investments, from advanced U.S., international, and comparative standpoints.

Prereq: Secured Transactions or Fundamentals of Loans or equivalent.

LAW 734. Start-Up Businesses. 2 Credits.

This course familiarizes students with common issues arising in day-to-day representation of startup businesses, ranging from entity choice, commercial issues, key policies to financings, exits and crisis management.

Prereq: LAW 620.

LAW 739. Writing Colloquium. 1-2 Credits.

Students give and receive feedback on writing in a workshop setting with participants discussing each others' work. Student will explore theme, structure, and style as they learn to critique writing.

LAW 740. Innovations in Criminal Justice. 1 Credit.

Focuses on advanced approaches to the reduction of recidivism in the federal criminal justice system. Discussion centers on the use of therapeutic jurisprudence grounded in evidence-based practice.

LAW 741. Child Development and the Law. 1 Credit.

Provides students with an overview of child development with applications for the law. Course topics span the developmental spectrum from prenatal influences through childhood.

LAW 742. Leadership Practices for Professional Success. 1 Credit.

Examines leadership theories and models. Through intensive readings, exercises, introspection, and open discussion, participants develop workable insights into their own leadership styles and how to improve them.

LAW 743. Law of Settlement. 1 Credit.

Survey of legal issues and lawyering practices associated with the private resolution of litigated cases, including confidentiality, economic incentives, and enforcement.

LAW 744. Art Law. 3 Credits.

Study of law related to the visual arts. Analyzes laws related to the creation, purchase, sale, transfer, import and export of art; protection of artist rights.

LAW 745. Race, Gender, Bias & Law. 3 Credits.

Surveys areas in which law deals with inter-group relations and the biases related to race, gender, and other social categories common to them (e.g., racial profiling, affirmative action, and employment discrimination).

LAW 746. Law and Development. 2-3 Credits.

This course explores the relationship between theories of development and legal knowledge. Students tease out the legal theory inherent in development proposals and socio-economic theories informing law development proposals.

LAW 747. Human Rights. 3 Credits.

The class leads students through a thorough discussion of foundational issues in international human rights law and activism.

LAW 748. Advanced Human Rights Seminar. 2 Credits.

This course offers further examination of the philosophical, sociological, and literary contributions to the human rights movement.

Prereq: LAW 671 or LAW 747.

LAW 749. Immigration Law and Policy. 3 Credits.

Covers statutory, constitutional, and administrative law and policy issues relating to foreign nationals and their relationship with the U.S. government.

LAW 750. Forensic Science in Criminal Law. 3 Credits.

Introduction to forensic science and criminal law. Topics include crime scene investigation, trace evidence, serology, DNA analysis, fingerprints, firearms, documents, and pathology.

Prereq: LAW 652, LAW 685.

LAW 760. Negotiation. 3 Credits.

Explores how negotiations work, what makes negotiators effective, and why negotiations fail. Focuses on analyzing and improving negotiation skills.

LAW 761. Law Journals: [Topic]. 1-3 Credits.

Welcome to law review! As you already know, working on a law review/journal is very demanding. It is also a unique opportunity in law school to develop your project management skills and work with others.

Repeatable 4 times for a maximum of 10 credits.

LAW 762. Criminal Defense Clinic. 3 Credits.

You will represent Defendants in Misdemeanor Criminal Cases, under supervision, including meeting clients, reviewing police reports, discussing alternatives and appearing in Circuit Court for Motions, Hearings and possible Jury Trials.

Prereq: law Students must be Court Certified so they may appear in Court. Evidence, Professional Responsibility and Constitutional Law are strongly suggested.

LAW 764. Criminal Prosecution Clinic. 3 Credits.

Students appear in court on behalf of the state; they prepare and argue legal motions and try cases; and they learn Oregon criminal law and procedure.

Prereq: Evidence and Legal Profession are required; Trial Practice is recommended.

LAW 765. Advanced Criminal Prosecution Clinic. 2 Credits.

Students appear in court on behalf of the state; they prepare and argue legal motions and try cases; and they learn Oregon criminal law and procedure.

Prereq: LAW 764.

LAW 766. Domestic Violence Civil Clinic I. 3 Credits.

Students provide necessary legal services to survivors of domestic violence, with an emphasis on family law.

LAW 767. Domestic Violence Civil Clinic II. 2 Credits.

Students provide necessary legal services to survivors of domestic violence, with an emphasis on family law.

Prereq: LAW 766.

LAW 768. Domestic Violence Protective Order Clinic I. 3 Credits.

Provides students with the opportunity to effectively serve survivors of domestic violence in protective-order litigation through mock exercises and real-world client representation.

LAW 769. Domestic Violence Protective Order Clinic II. 2 Credits.

Provides students who have completed the basic clinic with additional opportunities to represent survivors of domestic violence in more complex protective-order proceedings.

Prereq: LAW 768.

LAW 770. Environmental Law Clinic. 3 Credits.

Under the supervision of an attorney, students work with non-profit clients in the prosecution of primarily federal environmental cases. Students will join new or existing cases, and conduct legal research and writing to develop memoranda, draft sections of complaints or briefs, and review evidence.

LAW 771. Advanced Environmental Law Clinic. 2 Credits.

In the Advanced Environmental Law Clinic, students work one-on-one with attorneys on aspects of an ongoing or prospective case (or cases), with emphasis on research and writing.

Prereq: LAW 770.

LAW 773. Nonprofit Clinic. 4 Credits.

In this course students, working in interdisciplinary teams, perform as consultants to several Oregon nonprofit boards of directors. Students will engage with expert consultants, executive directors, and client boards of directors and work to formulate and deliver a meaningful governance assessment to two 501(c)(3) organizations.

LAW 774. Civil Practice Clinic. 3 Credits.

You will provide legal services to indigent clients through the local legal aid office. You will gain negotiation and litigation experience, managing your own cases under instructor supervision.

LAW 775. Advanced Civil Practice Clinic. 3 Credits.

Work with Oregon Law Center to represent real clients in real cases. Gain negotiation and litigation experience managing your own cases under instructor supervision.

Prereq: LAW 774.

LAW 780. LLM Seminar: Writing. 2 Credits.

Master of laws students will explore the United States legal system and legal profession through in-class workshops, legal research and writing, and oral presentations.

LAW 781. LLM Seminar: In Practice. 2 Credits.

Students studying for a master of laws (LLM) degree explore professional development topics and develop practice skills through in-class workshops, legal writing, a simulated symposium, and negotiation exercises.

LAW 782. Introduction to American Law for International LLM Students. 2 Credits.

This course is specifically designed for international students in the LLM program. The course provides foundational knowledge of US legal system necessary to fully participate in graduate legal education.

LAW 783. LLM Advanced and Persuasive Legal Writing. 2 Credits.

This course is specifically designed for international LLM students. The course provides skills in legal writing and research necessary to participate in graduate legal education in the US.

LAW 790. Tribal Courts and Tribal Law. 2 Credits.

Examines Indian law from the tribal perspective and focuses on the role of tribal lawmaking and tribal courts.

LAW 791. Contemporary Issues in American Indian Law. 2 Credits.

Provides in-depth study of current issues in American Indian law and US public policy regarding Native Americans.

LAW 792. Comparative Law of Indigenous Peoples. 2 Credits.

Examines the historical and contemporary legal and policy treatment of indigenous peoples in select countries with significant indigenous populations.

LAW 793. Environmental Law. 3 Credits.

Overview of environmental law and policy, common-law doctrines, administrative rulemaking, environmental federalism, National Environmental Policy Act, Endangered Species Act, the regulation of hazardous waste, air and water pollution.

LAW 794. Natural Resources Law. 3 Credits.

Provides a foundation in environmental law. Spans international, federal, state, and local jurisdiction, interfacing with classic environmental law (pollution statutes).

LAW 795. Public Trust Law. 2 Credits.

Explores public trust law, which originated as judge-made law and has been enshrined in many statutes and constitutions in the United States and abroad.

LAW 796. Food, Farming, and Sustainability. 3 Credits.

Examines how laws structure processes of food production, distribution, and consumption; surveys food and agricultural laws in review of broader questions of ecological sustainability and commerce.

LAW 797. Energy and the Law Seminar. 2 Credits.

Introduces students to the policies and laws governing energy in the United States. The class covers federal and state jurisdiction, renewable energy laws and policies, regulation of investor-owned utilities, public power, transmission, and the laws that govern the resources used to generate electricity.

School of Music and Dance

Sabrina Madison-Cannon, Dean

541-346-3761
541-346-0723 fax
121 MarAbel B. Frohnmayer Music Building
1225 University of Oregon
Eugene, Oregon 97403-1225

The School of Music and Dance is nationally recognized for its dedication to the highest levels of excellence in teaching, performance, and research. It is the only music school in the state of Oregon authorized to grant master's degrees in dance and doctoral degrees in music.

The School of Music and Dance began as the Department of Music in 1886, then the School of Music in 1900. It was admitted as a charter member of the National Association of Schools of Music in 1928. The school was joined in 1991 by the dance faculty—which had been offering courses at Oregon since 1911, and which established a dance major in 1959—and was renamed the School of Music and Dance in 2005. The UO music and dance departments are among the oldest west of the Mississippi.

The School of Music and Dance serves more than 500 music and dance majors, including 150 graduate students, and offers the following degrees in a wide range of options:

- bachelor of arts (BA)
- bachelor of music (BMus)
- bachelor of music in music education (BMME)
- bachelor of science (BS)
- master of arts (MA)
- master of music (MMus)
- doctor of musical arts (DMA)
- doctor of philosophy (PhD)

The ratio of students to faculty members is 8.3-to-1.

More than 250 performance programs are held annually in Eugene by UO students and faculty members, and more than 500 in the United States and abroad.

Mission Statement

The University of Oregon School of Music and Dance has a threefold mission:

- To prepare students to lead lives enriched by the arts of music and dance
- To provide comprehensive programs for those pursuing professional careers in music and dance, and a broad range of courses for those seeking a liberal arts education
- To serve as an educational and cultural resource for the University of Oregon, the local community, and the state of Oregon

Dance

Christian Cherry, Department Head

541-346-5951
541-346-3380 fax
169 Gerlinger Annex
1214 University of Oregon
Eugene, Oregon 97403-1214

The primary aim of the Department of Dance is to enrich the lives of majors, non-majors, and the Oregon community with diverse dance experiences. Dance is explored as an art form and as one of the humanities in a liberal arts education. Study in dance as an academic discipline integrates inquiry and theory to develop skills in performance, creative practice, observation, critical thinking, problem solving, and evaluation. In addition to the academic components, dance students experience the rigorous professional discipline that is inherent in studio classes. The department explores diverse idioms in dance: African dance and drumming, ballet, contact improvisation, contemporary, jazz, hip-hop, modern, partnering and Salsa.

Regardless of a student's career goals, education in dance at the University of Oregon provides the opportunity to develop motivation and self-discipline, intellectual curiosity, and creative imagination. These attributes are essential not only for a successful career but also for experiencing a fulfilling life.

Information about auditions, performances, placement, master classes, special events, and scheduling is available in the department office and online (<http://music.uoregon.edu/areas-study/dance/>).

Facilities

The Department of Dance has four professional dance studios for classes and activities in dance. In addition to serving as classrooms and rehearsal spaces, two studios in Gerlinger Annex convert into the M. Frances Dougherty Dance Theatre, which seats 200 people.

Performing Opportunities

The department offers frequent opportunities for students to perform in works by faculty, guest artists, and students. Performances are produced throughout the year, and any university student may participate. Participants are usually selected through auditions. Rehearsals and performances earn academic credit.

Performance groups such as Dema, an African dance ensemble, and the UO Student Dance Collective, tour Oregon and the Northwest presenting live concerts as well as lecture-demonstrations and master classes for public schools, colleges, universities, civic organizations, and community concert series.

A student may also earn credit and gain experience in teaching, lighting, production, or a combination of these. Practicum credit is offered in dance choreography, production design, and management.

Collaborations with local dance groups, the Department of Theater Arts, and groups within the School of Music and Dance provide multidisciplinary performance opportunities. These activities carry academic credit.

Scholarships

The Department of Dance awards several partial scholarships yearly to both incoming dance majors and to continuing dance majors.

Dance Oregon

A student organization partially funded by the Associated Students of the University of Oregon, Dance Oregon is open to any student interested in dance. Its purpose is to enhance and enrich the dance opportunities offered through the departmental curriculum. To this end, Dance Oregon provides a variety of activities each year that are promoted on and off campus. Examples include sponsoring professional guest artists to perform, lecture, set repertory, or teach master classes, and organizing student participation in the American College Dance Association.

Dance Program for Non-majors

A variety of dance experiences are provided for enjoyment and enrichment through the dance program. DANC courses generally offer beginning instruction and may be repeated twice for credit. Upper-division DANC courses provide low-intermediate instruction and may be repeated twice for credit. A maximum of 12 credits in DANC courses may be applied to the total number of credits required for a bachelor's degree.

Upper-division DAN courses provide advanced instruction. See DAN course listings for credit repeatability.

Noncredit DANC and DAN studio courses may be available to members of the community through community dance; a modest instructional fee is assessed by the Department of Dance.

Faculty

Steven Chatfield, professor (modern technique, dance sciences, research, improvisation, composition). BA, 1975, MA, 1984, PhD, 1989, Colorado, Boulder. (1989)

Christian Cherry, associate professor (music for dance, composition, contact improvisation); undergraduate director, music director. BA, 1983, Ohio Wesleyan; MM, 1993, Ohio State. (2001)

Sarah Ebert, instructor (contemporary and ballet technique, dance history, somatics). BFA, 1998, University of Illinois at Urbana-Champaign; MFA, 2004, University of Oregon. (2009)

Brad Garner, associate professor (modern, jazz, ballet; improvisation, production). BFA, 1997, Minnesota, Twin Cities; MFA, 2004, Arizona State. (2009)

Rita Honka, senior instructor (African, modern, African diaspora and culture, anatomy, somatics). BS, 1989, Wayne State; MS, 1992, Oregon. (1993)

Habib Iddrisu, assistant professor (West African music, African dance, performance). BA, 2002, MA, 2004, Bowling Green State; PhD, 2011, Northwestern. (2013)

Walter Kennedy, associate professor (modern and ballet, dance history, composition); BFA, 1996, California State, Long Beach; MFA, 1999, Illinois, Urbana-Champaign. (2000)

Shannon Mockli, associate professor (modern, contemporary, and ballet; improvisation, composition). BFA, 2003, Utah; MFA, 2008, Utah. (2008)

Florabelle Moses, instructor (ballet, Salsa and Bachata). B. Dance and Dance Education, Rubin Academy of Music and Dance, Israel (1991); MA in Dance, University of Oregon. (1993)

Hannah Victoria Thomas, assistant professor (hip hop, jazz, and contemporary technique, dance history and culture, composition), BA,

2016, Georgia College and State University; MFA, 2020, Arizona State University. (2021)

Emeriti

Jenifer P. Craig, associate professor emerita. BA, 1971, MA, 1973, Oregon; PhD, 1982, Southern California. (1986)

Bruno V. Madrid, senior instructor emeritus. BMus, 1955, Santo Tomas Conservatory of Music; MMus, 1963, Oregon. (1966)

Susan Zadoff, senior instructor emerita. Ballet Russe de Monte Carlo. (1976)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Undergraduate Programs

- Bachelor of Arts
- Bachelor of Fine Arts
- Bachelor of Science
- Minor
- Certificate in Teaching Dance

Undergraduate Studies

The Department of Dance offers curricula leading to bachelor of fine arts (BFA), bachelor of arts (BA) or bachelor of science (BS) degrees. The goal of the department is to provide comprehensive dance training within the liberal arts framework of the university. The study of dance involves intellectual, artistic, and physical development. The Department of Dance emphasizes all three areas of growth, a commitment made possible by the breadth of its curricular offerings and the depth of faculty expertise.

Facility with oral and written communication is one goal of a liberal arts education. Therefore, dance majors pursue a course of study to acquire a firm intellectual grasp of the theoretical, historical, and creative forces that shape dance as an art form.

Dance, unique in that it is also a physical form of communication, requires continual experience in its technical foundations. Students are expected and encouraged to experience a variety of forms of dance training and idioms. Production and pedagogy are also integral to the undergraduate core, because many students find careers in theater and teaching.

Goals for the Undergraduate Dance Major

1. Explore the field of dance from a liberal arts perspective
2. Explore disciplined technique and creative processes involved in the artistry of dance
3. Formulate an intellectual understanding of the historical, philosophical, and culturally significant aspects of dance
4. Develop a working knowledge of music and science as they relate to and enhance the dance experience
5. Develop an understanding of dance as a unique art form in conjunction with its relationship to other art forms and disciplines
6. Develop a level of competence in performance, creative, and theoretical aspects of dance to pursue graduate studies or other professional goals

Preparation

High school students planning to major in dance should include preparation in music, drama, art, and dance.

Students transferring to the UO as dance majors after two years of college work elsewhere should have completed two terms of college-level English composition, as many of the university's general-education requirements as possible, and training in modern dance.

Careers

Career opportunities include performing in regional dance companies and teaching in community centers, fitness centers, and private studios. Business and technical theater management, dance science, dance research, and dance journalism offer alternatives to performance and creative work.

Bachelor's Degree Program

Students eligible for admission to the university may declare dance as a major. Candidates for the bachelor's degree with a major in dance must satisfy general university requirements, select appropriate courses in related areas, and complete dance course requirements with a grade of C– or better. The faculty regularly reviews students for evidence of satisfactory progress toward fulfilling degree requirements. Students who receive grades lower than C– or I (incomplete) or Y in dance courses are placed on departmental probation and must repeat or complete the course with a minimum grade of C–. Students placed on departmental probation have one term to achieve the goals they agreed upon with their academic advisors. While students are on probation, they receive guidance to help them achieve satisfactory progress toward the degree.

Courses required for a dance major or minor must be taken for letter grades when that option is available. A grade of P must be earned in courses designated pass/no pass (P/N) only.

Advising

Students admitted as majors must meet with a dance faculty advisor prior to registration each term. These meetings inform students about prerequisites and progress toward the degree. Appointment schedules for advising are posted by each advisor. Students must have a signed advising contract in their departmental academic file before they may register each term.

University requirements for the BFA, BA and BS degrees are explained in the **Bachelor's Degree Requirements** section of this catalog.

Honors College Program

See the **Robert Donald Clark Honors College** section of this catalog for specific honors college requirements. Departmental requirements for dance majors enrolled in the Clark Honors College include the following:

- 6 credits of independent study in choreography, technical production, or related research leading to the senior honors thesis
- Either a choreography (minimum of ten minutes) with written description and discussion or an honors essay on an approved research topic

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Courses that apply to the major must be passed with grades of C– or better.

Graduate Studies

The graduate program in dance has been temporarily suspended. No new graduate students are being accepted at this time.

Introductory Dance Courses

DANC 170. Contemporary I. 1 Credit.

DANC 170 Contemporary I is the study of basic principles of dance movement in the contemporary idiom with an emphasis on the elements of space, time and energy. Repeatable eight times for a maximum of 9 credits.

DANC 172. Ballet I. 1 Credit.

Ballet I explores basic movement vocabulary in the ballet idiom.

DANC 175. Hip Hop I. 1 Credit.

Hip hop I is a beginning level hip hop technique class incorporating guided warm-up exercises, choreographed sequences, improvisation, and performance.

DANC 185. African I. 1 Credit.

DANC 185 is a beginning level studio course in dance vocabulary from the African diaspora.

DANC 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable. Recent topics include Tango, Hip-Hop, Salsa, Drumming, and Swing.

DANC 270. Contemporary II. 1 Credit.

DANC 270 Contemporary II is intermediate dance training designed to build upon previously developed technical skills and artistic expression, with a focus on contemporary aesthetics. Repeatable eight times for maximum of 9 credits.

Prereq: DANC 170.

DANC 272. Ballet II. 1 Credit.

Ballet II is an intermediate studio technique course in the ballet idiom.

Prereq: DANC 172.

DANC 275. Hip Hop II. 1 Credit.

Hip hop II is an intermediate level hip hop technique class incorporating guided warm-up exercises, choreographed sequences, improvisation, and performance.

DANC 285. African II. 1 Credit.

African II offers students an intermediate level integration of African movement, traditions, culture, history, music, and storytelling.

Repeatable.

Prereq: DANC 185.

DANC 299. Special Studies: [Topic]. 1-5 Credits.

Repeatable when topic changes.

DANC 370. Contemporary III. 1 Credit.

Contemporary III is an advanced level contemporary technique class incorporating guided warm-up exercises, choreographed sequences, improvisation, and performance.

Prereq: DANC 270.

DANC 372. Ballet III. 1 Credit.

Ballet III is an advanced technique studio course in the ballet idiom.

Repeatable.

Prereq: DANC 272.

DANC 375. Hip hop III. 1 Credit.

Hip hop III is an advanced level hip hop technique class incorporating guided warm-up exercises, choreographed sequences, improvisation, and performance.

Prereq: placement audition or instructor approval.

DANC 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable. Recent topics include Tango, Hip-Hop, Salsa, Drumming, and Swing.

Professional Dance Courses

DAN 125. First Year Seminar: [Topic]. 1 Credit.

DAN 125 provides a general introduction to dance as a field of study in higher education with a specific focus on opportunities in Dance and allied studies at UO. Repeatable twice for a maximum of 3 credits.

DAN 171. Dance Improvisation: [Topic]. 1 Credit.

Dance Improvisation covers a range of solo and group improvisational techniques to develop improvisational skill and heighten creative instincts. Attention will be given to developing safe practices to heighten movement exploration. Topics vary based on the chosen focus of the teacher of record. Repeatable twice for a maximum of 3 credits.

DAN 198. Workshop: [Topic]. 1-2 Credits.

Repeatable. Recent topics include Performance, Production Experience, Repertory.

DAN 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

DAN 241. Screendance: History and Theory. 4 Credits.

This Arts and Letters group satisfying course explores the historical, theoretical, and cultural contexts of screendance, an interdisciplinary art form at the intersection of dance, film, and new media technologies. It focuses on critical inquiries into screendance while locating that subject in a broader context.

DAN 251. Looking at Dance. 4 Credits.

Overview of dance as a cultural and aesthetic experience. Examines its meaning and impact on contemporary United States society.

DAN 252. Dance Composition I. 3 Credits.

This course is an introduction to the elements of dance composition. Students will create studies that concentrate on details of formal compositional structure as well as some more contemporary models

Prereq: DAN 171, DAN 258.

DAN 255. Dance Production I. 3 Credits.

Introduction to production planning, management, lighting, design, costuming, and publicity for the dance concert. Practical experience in Dougherty Dance Theatre.

DAN 256. Dance Somatics. 3 Credits.

Exploration of patterning in movement. Various body therapies—Bartenieff Fundamentals, ideokinesis, and body-mind centering—provide a framework for experiential investigations.

DAN 258. Musical Elements of Dance. 3 Credits.

Explores musical elements of dance and dancing; especially music/dance culture, rhythm, melody, phrasing and form. Sequence with DAN 458.

DAN 260. Anatomy of Human Movement. 4 Credits.

An introduction to scientific reasoning focusing on methodology and current research in dance anatomy and kinesiology.

DAN 271. Contact Improvisation: [Topic]. 1 Credit.

This course is designed to develop skills, experience and awareness of contact improvisation. Sequence with DAN 171. Repeatable twice for a maximum of 3 credits.

Prereq: DAN 171.

DAN 280. Dance Loft Performance. 1 Credit.

Dance Loft Performance is a beginning level repertory dance course modeled after a professional choreographic rehearsal process and performance experience. Participants in this course will perform the work of a student choreographer, under the supervision of a faculty mentor, in a single informal performance.

DAN 294. Modern Dance Laboratory. 3 Credits.

Rigorous training in modern dance as a performing art form emphasizing use of the body as an instrument, elements of movement, and performance skills. Repeatable for a maximum of 24 credits.

Prereq: placement audition.

DAN 299. Special Studies: [Topic]. 1-5 Credits.

Repeatable when topic changes.

DAN 301. African Dance Aesthetics. 4 Credits.

Using the field of dance studies to examine African dance aesthetics in popular culture, daily media landscapes, and expressive cultures in Africa and the diaspora.

DAN 352. Dance Composition II. 3 Credits.

Compositional forms in dance. Crafting of movements into studies.

Prereq: DAN 351.

DAN 355. Dance Production II. 1-2 Credits.

Extended application of skills and procedures used in producing a concert. Practical backstage work; pre- and postconcert sessions. Repeatable eleven times for maximum of 24 credits.

Prereq: DAN 255.

DAN 360. Dance Kinesiology. 4 Credits.

Applications of anatomical, muscular, and motor control information to dance training and injury prevention.

DAN 380. Student Dance Concert Performance. 2 Credits.

Student Dance Concert Performance is an intermediate level practical studio course. Participants in this course will perform the work of a student choreographer, under the supervision of a faculty mentor, performed in a run of fully produced performances.

DAN 394. Contemporary III. 3 Credits.

Intensive 5 days-a-week studio course integrating the study of contemporary dance theory and practice. Fall term focuses on music in dance, winter on dance in culture, and spring term focuses on science and somatics in dance. Repeatable seven times for a maximum of 24 credits.

Prereq: 3 terms of DANC 270, placement audition or instructor approval.

DAN 401. Research: [Topic]. 1-4 Credits.

Repeatable twice.

DAN 403. Thesis. 1-12 Credits.

Repeatable three times.

DAN 404. Internship: [Topic]. 1-4 Credits.

Apprenticeship under the guidance of a supervising teacher in areas such as teaching, arts management, administration, and dance production.

Repeatable twice when topic changes for maximum of 12 credits.

Prereq: Junior standing.

DAN 405. Reading and Conference: [Topic]. 1-21 Credits.

Repeatable up to six times

DAN 406. Practicum: [Topic]. 1-12 Credits.

Repeatable.

DAN 407. Seminar: [Topic]. 1-5 Credits.

Repeatable. Recent topics include Choreographic Analysis, Contemporary Issues. Repeatable when topic changes.

DAN 408. Workshop: [Topic]. 1-21 Credits.

Repeatable. Topics include rehearsal and performance for department-sponsored events.

Prereq: Audition for performance experiences.

DAN 409. Terminal Project. 1-12 Credits.

Repeatable. Current topics are Choreography, Production Design, and Management.

DAN 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable. Current topics include Neuromuscular Bases of Dance, Topics in Technique, Composition III.

DAN 411. Senior Project. 3 Credits.**DAN 412. Student Dance Concert. 1-6 Credits.**

Students apply ideas learned about concert choreography, production, and management. In a cooperative venture, students produce dance works in Dougherty Dance Theatre. Repeatable for maximum of 24 credits.

Prereq: DAN 255, DAN 352.

DAN 425. Senior Seminar: [Topic]. 1 Credit.

This multi term topics course focuses on professional development within dance for senior dance majors. Repeatable twice for a maximum of 3 credits.

DAN 436. Dema African Performance Ensemble: [Topic]. 3 Credits.

Dema is the concept of total performance experience through dance, music, singing, storytelling, and costume-making through education, teaching, and to entertaining. Dema is a means of encouraging independence, critical thinking, self-worth, and freedom of the mind for students to discover their voices. Repeatable twice for a maximum of 9 credits.

DAN 443. Dance and Power. 3 Credits.

This course uses identity as a lens through which we examine structures of power in dance, including, but not limited to, intersections of race, gender, religion, sexual orientation, ethnicity, nationality, socioeconomic status, language, (dis)ability, age, religious commitment, and political perspective. Sequence with DAN 444.

Prereq: DAN 251.

DAN 444. Contemporary Issues in Dance. 3 Credits.

This course engages critical conversations about dance in contemporary society with emphasis on understanding various ways that dance functions within communities, how dance can participate and promote social change, and ways that dance makers are expanding possibility in dance. Sequence with DAN 443.

Prereq: DAN 251, DAN 443.

DAN 452. Dance Composition III. 3 Credits.

Advanced skills in dance composition to engage critical creative processes for the development of substantial choreographies. Repeatable once for a maximum of 6 credits. Sequence with DAN 351, DAN 352.
Prereq: DAN 352.

DAN 458. Music for Dancers. 3 Credits.

Surveys musical form, style, and expressive content as it relates to dance. Examines the interrelationship of elements of music and dance in significant works from around the world.
Prereq: DAN 252.

DAN 480. Faculty Dance Concert Performance. 2 Credits.

Participants in this course will perform the work of a faculty choreographer, or guest artist, in a run of fully produced dance concerts.

DAN 481. Repertory Dance Company: Rehearsal. 1-12 Credits.

Creating and rehearsing new or existing material in preparation for the spring tour. Repeatable four times.
Prereq: audition or application; coreq: DANC 300 level or above in ballet and modern.

DAN 482. Repertory Dance Company: Touring. 1-12 Credits.

Lecture-demonstrations and formal performances of repertory learned in winter rehearsals. Repeatable four times.
Prereq: DAN 481; coreq: DANC 300 level or above in either ballet or modern.

DAN 486. Student Dance Collective: [Topic]. 3 Credits.

Student Dance Collective is an advanced dance performance ensemble modeled after a professional repertory dance company, which includes a collaborative rehearsal process and multiple live performances.
Prereq: DAN 480, DANC 370, DANC 372, DANC 375.

DAN 491. Teaching Dance. 3 Credits.

Application of teaching theories, course planning methods, teaching resources and techniques. Emphasis on teaching in university situation.
Prereq: DAN 252, DAN 394; DAN 271

DAN 494. Advanced Movement Practice. 3 Credits.

Advanced Movement Practice is a synthesis of physicality, creative practice, and theory whereby students will investigate the relationships between form, expression, technique, style and identity through embodiment, discussion, readings, writing, video and performance.
Prereq: DANC 370, DANC 372, DANC 375.

DAN 503. Thesis. 1-16 Credits.

Repeatable nine times.

DAN 507. Seminar: [Topic]. 1-5 Credits.

Recent topics include Choreographic Analysis, Contemporary Issues. Repeatable when topic changes.

DAN 508. Workshop: [Topic]. 1-21 Credits.

Repeatable. Topics include rehearsal and performance for department-sponsored events.
Prereq: Audition for performance experiences.

DAN 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable. Current topics include Neuromuscular Bases of Dance, Topics in Technique, Composition III.

DAN 536. Dema African Performance Ensemble: [Topic]. 3 Credits.

Dema is the concept of total performance experience through dance, music, singing, storytelling, and costume-making through education, teaching, and to entertaining. Dema is a means of encouraging independence, critical thinking, self-worth, and freedom of the mind for students to discover their voices. Repeatable twice for a maximum of 9 credits.

DAN 558. Music for Dancers. 3 Credits.

Surveys musical form, style, and expressive content as it relates to dance. Examines the interrelationship of elements of music and dance in significant works from around the world.

DAN 601. Research: [Topic]. 1-16 Credits.

Repeatable.

DAN 602. Supervised College Teaching. 1-5 Credits.

Repeatable.

DAN 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

DAN 606. Practicum: [Topic]. 1-16 Credits.

Repeatable. Topics include Formal Compositional Structure, Solo Composition, and student-initiated topics. Limited by faculty workload and availability.

DAN 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

DAN 608. Workshop: [Topic]. 1-16 Credits.

Repeatable. Topics include Performance, Production, Rehearsal.

DAN 609. Terminal Project. 1-12 Credits.

Repeatable.

DAN 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

DAN 613. MFA Professional Paper. 1-16 Credits.

Repeatable up to five times.

Bachelor of Arts in Dance

The Department of Dance offers curricula leading to bachelor of fine arts (BFA), bachelor of arts (BA) or bachelor of science (BS) degrees. The goal of the department is to provide comprehensive dance training within the liberal arts framework of the university. The study of dance involves intellectual, artistic, and physical development. The Department of Dance emphasizes all three areas of growth, a commitment made possible by the breadth of its curricular offerings and the depth of faculty expertise.

Facility with oral and written communication is one goal of a liberal arts education. Therefore, dance majors pursue a course of study to acquire a firm intellectual grasp of the theoretical, historical, and creative forces that shape dance as an art form.

Dance, unique in that it is also a physical form of communication, requires continual experience in its technical foundations. Students are expected and encouraged to experience a variety of forms of dance training and idioms. Production and pedagogy are also integral to the undergraduate core, because many students find careers in theater and teaching.

¹ 18 credits minimum in upper division. 6 courses minimum per idiom in DANC.

All courses listed are required unless noted as Electives e.g. DANC 199 Special Studies: Topic, DANC 399 Special Studies: Topic, and DAN 410 Loft.

All Technique courses must be taken in sequence. Students can test out of a level through a Placement Class, but must meet the same number of credits in the dance Technique category in that same idiom e.g. African, or Ballet etc.

Performance courses; DAN 480 Dance Repertory, DAN 481 Repertory Company: Rehearsal, and DAN 482 Repertory Company: Touring must be taken in that sequence.

The Creative Practices must be taken in sequence in this order; DANC 171 Dance Improvisation, DANC 271 Contact Improvisation, DAN 351 Dance Composition 1, DAN 352 Dance Composition 2, DAN 452 Dance Composition 3, and DAN 412 Student Concert.

There is some flexibility within the Theory courses, but the following courses must be taken in sequence (*see Course-to-Course Pre-requisites listed previously):

History and Culture; DAN 251 Looking at Dance is a pre-requisite for DAN 453 Dance and Power and DAN 454 Contemporary Issues in Dance,

Science and Somatics; DAN 260 Anatomy of Human Movement is a pre-requisite for DAN 360 Dance Kinesiology,

Music; DAN 252 Fundamentals of Rhythm is a pre-requisite for DAN 458 Music for Dancers,

Production; DAN 255 Dance Production 1 is a pre-requisite for DAN 355 Dance Production 2.

No tracks or concentrations.

Electives: BFA in Dance majors can take DANC 199 and DANC 399 Special Studies: Topic, which might include dance techniques outside the core curriculum e.g. hip-hop, Salsa, Partnering, Pointe, or Conditioning.

They can also take DAN 410 Loft, where they choreograph for semi-formal live performances offered twice per year under a faculty mentor.

BFA in Dance students will also be provided a recommended list of

elective course options outside the Dance department in such areas as; Music, Art, Theatre, Women and Gender Studies, and Journalism.

Bachelor of Science in Dance

The Department of Dance offers curricula leading to bachelor of fine arts (BFA), bachelor of arts (BA) or bachelor of science (BS) degrees. The goal of the department is to provide comprehensive dance training within the liberal arts framework of the university. The study of dance involves intellectual, artistic, and physical development. The Department of Dance emphasizes all three areas of growth, a commitment made possible by the breadth of its curricular offerings and the depth of faculty expertise.

Students transferring to the UO as dance majors after two years of college work elsewhere should have completed courses for the UO BS mathematics requirement, two terms of college-level English composition, as many of the university's core-education requirements as possible, and training in modern dance.

Minor in Dance

The dance minor is available to undergraduate students who want to combine an interest in dance with a major in another area of study. The minor allows students flexibility in constructing a program of courses to enhance and complement any chosen major.

Dance Minor

The dance minor is available to undergraduate students who want to combine an interest in dance with a major in another area of study. The minor allows students flexibility in constructing a program of courses to enhance and complement any chosen major.

Dance courses applied to the minor must be passed with grades of C– or better. Most upper-division courses have prerequisites, corequisites, or both.

Dance Minor Requirements

Dance courses applied to the minor must be passed with a grade of C– or better. Minors are encouraged to take Looking at Dance (DAN 251) as an arts and letters group-satisfying course and Anatomy of Human Movement (DAN 260) as a science group-satisfying course to enrich their understanding of dance, even though these courses do not count toward the minimum 26 credits required for the minor.

Certificate in Teaching Dance

The certificate in teaching dance is designed to fill a need for training dance teachers for the private dance studio industry. The focus is on evidence-based practice from venerable and contemporary theories of dance pedagogy. Intense technical training in contemporary dance forms the core of the program. These core studio-theory courses are augmented with advanced study in dance injury prevention, improvisation-composition, production, and methods of teaching. The culminating requirement of the certificate is a one-year internship as a student-teacher in a private dance studio partnering with the UO Department of Dance for this program.

Certificate in Teaching Dance

The certificate in teaching dance is designed to fill a need for training dance teachers for the private dance studio industry. The focus is on

evidence-based practice from venerable and contemporary theories of dance pedagogy. Intense technical training in contemporary dance forms the core of the program. These core studio-theory courses are augmented with advanced study in dance injury prevention, improvisation-composition, production, and methods of teaching. The culminating requirement of the certificate is a one-year internship as a student-teacher in a private dance studio partnering with the UO Department of Dance for this program.

The certificate is a residency program. The following courses must be taken in residence at the UO. Required course work totals 42 credits minimum and includes 34 upper-division credits, 17 of which are at the 400 level.

Dance courses applied to the certificate must be passed with a grade of C– or better. Students working toward their certificates are encouraged to take Looking at Dance (DAN 251) as an arts and letters area-satisfying course and to follow up with DAN 454. They are further encouraged to take Dance Kinesiology (DAN 360) and, Music for Dancers (DAN 458), even though these courses do not count toward the minimum 42 credits required.

Music

Sabrina Madison-Cannon, Dean

541-346-3761

541-346-0723 fax

121 MarAbel B. Frohnmayer Music Building

1225 University of Oregon

Eugene, Oregon 97403-1225

Facilities

The School of Music and Dance's five-unit building complex includes the 540-seat Beall Concert Hall, acclaimed for its superb acoustics; separate band, choir, and orchestra rehearsal rooms with support facilities; practice rooms; a small recital hall; studio offices, classrooms, and seminar rooms.

In 2008, two new wings were added to the MarAbel B. Frohnmayer Music Building, containing state-of-the-art, acoustically isolated teaching studios, classrooms, and practice rooms. The Leona DeArmond Academic Wing provides studios for the Suzuki Strings Program, a music education teaching laboratory, twenty-eight teaching studios, classrooms, and practice rooms. The Thelma Schnitzer Performance Wing contains a symphony-size rehearsal hall, dedicated rehearsal spaces for jazz and percussion studies, a recording studio, and additional practice rooms. Significant renovations were also made to the existing facilities.

In 2017 the SOMD welcomed the Oregon Bach Festival into their new building. While the OBF originated with the SOMD (then the School of Music), but since then had found different homes around campus. The new 10,000 square foot building provides space for program rehearsals, recitals, lectures, and receptions, as well as administrative offices and support space, and gives the OBF a prominent presence on campus and in the city. In addition to accommodating the OBF, Berwick Hall is a welcoming destination for students and faculty from the School of Music and Dance. The multi-functional rehearsal room provides dedicated performance space for the festival, with high-performance acoustical design tuned for musicians and their audience. It seats up to 120 patrons and is used for intimate performances. This 2,000 square foot, double-height room is day-lit via skylights, with a window framing a near courtyard garden.

Collier House, one of the buildings within the SOMD's purview, is listed as one of the school's facilities. Built in 1885–86 by the Collier family, it is a rare example of a late Victorian house in bracketed style, with an Italianate-style interior popular in the Northwest in the late 1800s. From the early 1900's to 2004 Collier house has been a residence for a university president and a chancellor, a library, a faculty club, a boarding house for professors, a restaurant, and a community meeting house—pub.

In August 2004, music history faculty offices and the Early Music Program were moved to Collier House. A variety of courses, seminars, meetings, recitals, and programs are held there.

The Music Collection, located on the third floor of Knight Library, contains more than 50,000 recordings and 1,000 serials, including composers' complete works, music reference resources, current and bound periodicals, and a collection of more than 28,000 books and 57,000 scores. The Douglass Room, renovated in 2019, features a study lounge and browsable recording collection (compact discs, LPs, and cassettes). Facilities in the Douglass Room include an audiovisual-wired classroom, listening stations, five MIDI workstations with software for composing, mixing, digital audio editing and music engraving, and two reservable recording/editing suites complete with nearfield monitors, recording gear, and acoustic treatment. The score and record collections' strengths include music by Oregon composers, women composers, and contemporary publications provided by approval plans for recently published North American and international scores. The book collection includes a large German-language collection as well as standard music resources and most university press publications. Electronic resources for music include e-books and databases for scholarly publications, streaming audio and video, and contemporary electronic scores. Reference service to the collection is provided by the Music Librarian and the Music Reference Team. The complete music and recording collections are included in the UO Libraries online catalog (<https://library.uoregon.edu/>).

The School of Music and Dance houses two pipe organs, including a nationally recognized organ by Jürgen Ahrend of East Friesland, Germany—a concert instrument unique in America—and a two-manual tracker organ by David Petty and Associates. Two of the nine harpsichords available for student use are French doubles by William Dowd. The others are a German double by Keith Hill, an Italian by Owen Daly, and a Zuckerman single harpsichord. Of the collection of 125 pianos, which includes eight concert grands, more than 50 are Steinways. Classrooms and practice rooms are equipped with grand or upright pianos, and piano majors have access to locked grand piano practice rooms. Other keyboard instruments include three clavichords and several early pianos. Additionally, the SOMD has a modern group piano laboratory featuring Roland digital keyboards.

Future Music Oregon features a suite of outstanding studios for electroacoustic and new media composition that provide powerful, high-quality environments in which students learn and create. Studios are equipped with current software, digital mixers, and game controllers, with sensor-based interfaces for technological and artistic exploration.

The university owns an extensive collection of orchestral and band instruments and a distinctive collection of instruments used in the study of world music and reproductions of early musical instruments.

The Pacific Rim Gamelan performs on the beautiful instruments of Gamelan Suranadi Sari Indra Putra, donated to the school in 1986 by John and Claudia Lynn of Eugene. The ensemble is a multicultural composing and performing orchestra, and works composed by its members use instruments from around the world as well as gamelan instruments.

Kyai Tunjung Mulya ("Noble Lotus Blossom") is a complete central Javanese court gamelan orchestra, consisting of more than eighty iron, brass, bronze, teak, and bamboo instruments. Classes and workshops in Javanese gamelan music are taught periodically by visiting musicians from Indonesia.

The Kammerer Computer Laboratory offers students the opportunity to become familiar with a variety of mainstream software for digital audio editing, composing, mixing, as well as software for music notation, music theory, and aural skills. Other resources in the lab include MIDI (musical instrument digital interface) keyboards, sound-generating and sequencing software programs; access to the Internet; Microsoft Office applications; and Adobe graphic editing programs for academic use. Among the audio software contained in the lab is: Max/MSP, Apple Logic Pro X, iZotope Ozone, iZotope Nectar, Antares Autotune, Celemony Melodyne, Soundtoys Academic Complete, Spectrasonics Omnisphere, FabFilter total bundle, Finale, and Sibelius.

Concerts and Recitals

More than 250 concerts and recitals are presented on campus throughout the year by visiting artists, members of the School of Music and Dance faculty (Faculty Artist Series), and more than 40 student ensembles. Other regularly scheduled concerts include performances by internationally famous artists sponsored by the Chamber Music at Beall series and the World Music Series.

Hosted events include the Northwest Percussion Festival, Northwest Horn Society regional symposium, International Tuba Euphonium Association Northwest regional conference, American Liszt Society Festival, Northwest Suzuki Institute summer camp, Community Music Institute recitals, Carl Orff workshops, the North American Saxophone Alliance, the Joe Alessi Trombone Seminar, Oregon Music Education Association All-State conference, three high school summer music camps, and lectures from Robert M. Trotter Visiting Professors and the Steve Larson Distinguished Lecture Series, the Musicking Conference, the Society for 17th Century International Conference, the Society for Electro-Acoustic Music in the United States national Conference, and others.

The annual Vanguard Concert Series features 20th-century music in concerts and workshops. Nationally prominent artists give a public concert and hold workshops in which they read, rehearse, and record music composed for them by members of the Composers Forum.

The biennial Music Today Festival, founded and directed by Robert Kyr, is a series of concerts and cultural events that celebrates 20th- and 21st-century music from around the world. The festival features regional performers and ensembles as well as internationally renowned artists.

Jazz concerts and workshops by prominent artists offer opportunities for university students to perform. The Jazz Studies Program hosts the Oregon Jazz Celebration, an annual weekend festival that includes workshops for middle school, high school, and college jazz ensembles.

Since 1969, the School of Music and Dance has hosted the annual Oregon Bach Festival during a two-week period in late June and early July. The festival, founded by Helmuth Rilling and Royce Saltzman, combines an educational program in choral music for academic credit with the offering of some fifty public concerts and events. While the focus is Bach, major choral and instrumental works by other composers are programmed regularly. Distinguished soloists from around the world are featured with the festival chorus and orchestra. Every other year the School of Music and Dance offers a Composers Symposium in conjunction with the Oregon Bach Festival.

THEME (Theory, History, Ethnomusicology, Music Education)—a group of faculty members and graduate students interested in music research—meets three or four times a term on Friday afternoons to share the results of ongoing or recently completed research, discuss the profession

of teaching and research, and hear guest speakers. Some recent guests are Anne Azéma, Michael Broyles, Thomas Christensen, Robert Duke, Allen Forte, Robert Gjerdingen, Douglas Hofstadter, Andrew Homzy, Vijay Iyer, Mark Johnson, Harald Krebs, Barbara Lundquist, Henry Martin, Margarita Mazo, Susan McClary, Ingrid Monson, Bruno Nettle, Alejandro Planchart, Harold Powers, Katharine Preston, Jihad Racy, Carl Schachter, Christopher Smith, Joseph Straus, Steven Strunk, Michael Tenzer, Alan Walker, and Keith Waters.

Student Organizations

The professional music fraternity, Mu Phi Epsilon, and the Kappa Kappa Psi band fraternity maintain chapters at the University of Oregon. There is also an active collegiate chapter of the National Association for Music Education.

Ensembles

- University Symphony Orchestra
- Chamber Choir
- Oregon Wind Ensemble
- Oregon Jazz Ensemble
- Oregon Wind Symphony
- University Singers
- Opera Ensemble
- Repertoire Singers
- Campus Band
- Campus Orchestra
- Oregon Marching Band
- Green Garter Band
- Yellow Garter Band
- Oregon Basketball Band
- Oregon Electronic Device Orchestra
- Oregon Percussion Ensemble
- Trombone Choir
- Tuba-Euphonium Ensemble
- Jazz Guitar Ensemble
- Brass Ensemble
- Jazz Laboratory Bands
- Small jazz ensembles
- Latin Jazz Ensemble
- Andean Music Ensemble
- Hip-Hop Ensemble
- University Gospel Ensemble
- University Gospel Choir
- Gospel Singers
- Pacific Rim Balinese Gamelan
- Javanese Gamelan
- many other small chamber ensembles offer membership and performance opportunities to qualified students

The Collegium Musicum, a vocal-instrumental group, provides opportunities for the study of 16th- through 18th-century music, using the school's collection of reproductions of Baroque and 18th-century instruments. The repertory and activities of these ensembles complement school courses in history, criticism, and performance-practice studies.

Financial Assistance

For complete information about financial aid, including loans, see the **Student Financial Aid and Scholarships** section of this catalog.

Scholarships

The University of Oregon School of Music and Dance gratefully acknowledges the generous contributions of individuals, foundations, businesses, and organizations that have established named endowed and annual scholarships for the benefit of music and dance students. More than \$1.5 million is awarded annually in music scholarships. Although a large portion of these are allocated for undergraduate (<http://music.uoregon.edu/apply/undergraduate-music/financial-aid/>) study, limited scholarship funding is also available for graduate students (<http://music.uoregon.edu/apply/graduate-music/financial-aid/>).

Most undergraduate performance scholarships are automatically renewed for up to four years; graduate performance scholarships are renewed for the standard length of time it takes to complete the degree. Most scholarships are awarded on the basis of musical achievement, however, some specialized scholarships are awarded by individual areas in the School of Music to continuing students for achievements in a particular discipline. To determine scholarship recipients, the music and dance faculty relies on the applicant's application, audition (where applicable), and academic record.

Graduate Employees

A limited number of graduate employee (GE) positions are available to admitted graduate music majors. In addition to the fellowship stipend, tuition and health insurance coverage is paid by the university. For more information, applicants should contact the assistant dean of admissions and financial aid (<http://music.uoregon.edu/apply/graduate-music/financial-aid/>) at 541-346-6191.

Fees

Other Fees (per term)	Dollars
Private performance studies (studio instruction) per term	200-400/term
Ensemble fee	50-80
Music education course fee	50-300
Keyboard skills course fee	20
MIDI music lab course fee	110
Audio recording lab course fee	100-110
Electronic studio course fee	110-125
Recital fee (per recital)	90
Instrument locker fee	8-25
Other music course fees	50-150
Dance course fee	75
Instrument fee per term for harpsichord, organ, classical percussion	50
Rental of university instruments is based on use and value-maximum fee	30-60
Short-term instrument rental (per week)	10
Summer instrument rental	60

Oregon Marching Band uniforms and equipment fee 45–180

Performance Studies

Courses in performance studies are listed with the MUP subject code. Fees are required. These courses customarily include weekly lessons and studio master classes. MUP courses fall into two general categories:

- Basic and Intermediate Performance Studies: MUP 114, 115.
- Performance Studies: MUP 165, 265, 270, 365, 465, 635, 650, 665, 765.

Enrollment in any performance studies registration number between 165 - 765 must be preceded by an audition. Auditions are conducted to establish the appropriate registration number.

Students must register for at least 2 credits of performance study. Students will receive a minimum of nine lessons per term.

Enrollment in performance studies is sometimes limited because of faculty teaching loads. Under such circumstances, priority is given to continuing music majors. Students who are not assigned to a faculty member may study with a graduate employee for credit at extra cost.

Undergraduate Music Performance and Music Education students advance from one registration number to the next through area juries.

Performance studies courses carry 2 or 4 credits per term. Students giving recitals must be enrolled in performance studies. During the term of the recital, students may not enroll in Reading and Conference: [Topic] (MUS 405) or Reading and Conference: [Topic] (MUS 605) in preparation for their recital. Pre-recital hearings are required to evaluate the student's readiness for public performance. After the recital, a faculty evaluation is required. If approval is given, the recital is formally acknowledged as a fulfilled degree requirement.

For details concerning specific registration numbers, repertory, and any other questions, please contact the individual studio faculty members.

Music Performance majors whose primary instrument is piano have an accompanying requirement, described under the Bachelor of Music in Music Performance heading in the Undergraduate section.

General Procedures and Policies

Students are responsible for knowing about degree requirements and university and School of Music and Dance policies and procedures. This information can be found through the SOMD Undergraduate and Graduate offices, as well as through several sections of this catalog, including the Registration and Academic Policies (p. 21) and Division of Graduate Studies (p. 885) sections.

Faculty

D. Tyler Abbott, senior instructor (double bass, jazz string bass). BM, 1999, Eastern Washington; MM, 2003, Oregon. (2003)

Barbara Myers Baird, senior instructor (piano, harpsichord, music appreciation). BMus, 1971, Texas Christian; MMus, 1976, Southern Methodist; DMA, 1988, Oregon. (1986)

Molly Barth, associate professor (flute). BM, 1997, Oberlin College; Artist Diploma, 2000, Cincinnati; MM, 2003, Northwestern. (2008)

Jon Paul Bellona, instructor (music technology). BA, 2003, Hamilton College; MM, 2011, Oregon; PhD, 2018, Virginia. (2017)

Jack Boss, professor (theory, composition). BMus, 1979, MMus, 1981, Ohio State; PhD, 1991, Yale. (1995)

Andiel Brown, instructor (gospel choirs). BMus, 2008, Oregon. (2008)

Melissa Brunkan, assistant professor (choral music education). BM, 1995, Minnesota; MMus, 1999, Northwestern; PhD, 2012, Kansas. (2017)

Mandy Burton, instructor (music education). BMus, 2004, MMus, 2006, Oregon. (2014)

Kwan Leong "Pius" Cheung, associate professor (percussion). BMus, 2004, Curtis Institute; Artist Diploma, 2006, Boston Conservatory; DMA, 2010, Michigan, Ann Arbor. (2011)

Jacqueline Cordova-Arrington, assistant professor (flute). BM, 2008, Michigan; MM, 2010, Cincinnati; DMA, 2015, Eastman School of Music. (2018)

David Crumb, professor (composition, theory). BM, 1985, Eastman School of Music; MA, 1991, PhD, 1992, Pennsylvania. (1997)

Michael P. Denny, senior instructor (guitar, jazz studies). BA, 1992, City College of New York; MA, 1995, Oregon. (1995)

Alexandre Dossin, professor (piano, piano literature). MFA, 1996, Moscow Tchaikovsky Conservatory; DMA, 2001, Texas, Austin. (2006)

Karen Esquivel, senior instructor (opera, voice). BS, 1978, Nebraska, Lincoln; MM, 1990, 2006, DMA, 2009, Florida State. (2011)

Abigail Fine, assistant professor (musicology). BA, 2010, Pennsylvania; PhD, 2017, Chicago. (2019)

C. Brad Foley, professor (saxophone). BA, 1975, Ball State; MM, 1977, DMA, 1983, Michigan. (2002)

Fritz Gearhart, professor (violin). BM, 1986, MM 1988, Eastman School of Music. (1998)

Arnaud Ghillebaert, instructor (viola). DEM, 2006, National Regional Conservatory, Saint-Maur-des-Fossés; MPerf, 2008, Royal College of Music; DMA, 2016, State University of New York, Stony Brook. (2017)

Eliot Grasso, instructor (musicology). BA, 2005, Goucher College; MA, 2007, Limerick; PhD, 2011, Oregon. (2011)

Margret Gries, instructor (musicology, collegium musicum). BA, 1969, Pacific Lutheran; MMus, 1985, Central Washington; PhD, 2012, Oregon. (2012)

Michael Grose, professor (tuba, music appreciation); associate dean, undergraduate studies; summer session coordinator. BM, 1984, MM, 1985, Northwestern. (2001)

Hal Grossman, associate professor (violin). BM, 1981, Michigan; MM, 1985, Eastman School of Music. (2019)

Akiko Hatakeyama, assistant professor (music technology). Associate's degree, 1994, Otsuma Women's; AA, 2006, Community College of Philadelphia; BA, 2009, Mills College; MA, 2011, Wesleyan; MA, 2013, Brown. (2016)

Henry Henniger, associate professor (trombone). BM, 2002, Indiana, Bloomington; MM, 2004, Manhattan School of Music. (2010)

Gary Hobbs, instructor (jazz drum set). (1998)

Habib Iddrisu, assistant professor (African dance and music, ethnomusicology). BA, 2002, MA, 2004, Bowling Green State; PhD, 2011, Northwestern. (2013)

David Jacobs, associate professor (conducting, orchestra); director, orchestral studies. BM, 2000, Duquesne; MA, 2002, Central Florida; DMA, 2011, Eastman School of Music. (2012)

John Jantzi, senior instructor (keyboard skills). Certificat d'études supérieures d'orgue avec mention bien, 1984, Conservatoire de Musique de Geneve; AA, 1974, Hesston; BA, 1978, Seattle Pacific; MM, 1995, PhD, 2002, Oregon. (2002)

Wonkak Kim, assistant professor (clarinet). BMus, BA, 2007, North Carolina, Chapel Hill; MMus, 2009, DM, 2012, Florida State. (2017)

Tobias Koenigsberg, associate professor (jazz piano, jazz studies); associate director, jazz studies. BMus, 1998, Oregon; MM, 2003, Eastman School of Music. (2003)

Lori Kruckenberg, associate professor (musicology). BA, 1985, Bethany (Kansas); MA, 1991, PhD, 1997, Iowa. (2001)

Paul Krueger, instructor (jazz history, jazz studies). BME, 2009, Nebraska, Lincoln; MMus, 2011, Oregon. (2016)

Robert Kyr, Philip H. Knight Professor (composition, theory); director, Pacific Rim Gamelan, Vanguard Concert Series, Music Today Festival. BA, 1974, Yale; postgraduate certificate, 1976, Royal College of Music; MA, 1980, Pennsylvania; PhD, 1989, Harvard. (1990)

Dennis Llinás, associate professor (conducting); director of bands. BME, 2003, Florida International; MM, 2010, Texas, Austin; DMA, 2012, Texas, Austin. (2019)

Terry McQuilkin, instructor (composition). BM, 1977, MM, 1979, Southern California; DMA, 1995, Oregon. (2002)

Brian McWhorter, associate professor (trumpet, music appreciation). BMus, 1998, Oregon; MM, 2000, Juilliard. (2006)

Eric Mentzel, professor (voice, diction, collegium musicum). BM, 1980, Temple; MFA, 1983, Sarah Lawrence. (2002)

Lance Miller, senior sound and video recording engineer (audio recording). AA, 1982, Mt. Hood Community. (1998)

Rosanna Moore, instructor (harp). BMus, 2007, Royal Northern College of Music; MM, 2014, Eastman; DMA, Performer's Certificate, 2019, Eastman. (2020)

Drew Nobile, assistant professor (theory, musicianship). ScB, 2007, Brown; MA, 2009, Washington (Seattle); PhD, 2014, City University of New York, Graduate Center. (2015)

Gordon Ogo, instructor (music education). BA, 1968, Eastern Washington; MS, 1992, Western Oregon. (2014)

Camille Ortiz, assistant professor (voice, solo vocal music). BM, 2004, Oral Roberts; MM, 2007 Manhattan School of Music; DMA, 2017, University of North Texas College of Music. (2020)

Stephen W. Owen, Philip H. Knight Professor (jazz studies); director, jazz studies. BMusEd, 1980, North Texas State; MMus, 1985, Northern Colorado. (1988)

Timothy Pack, senior instructor (theory, musicianship). BA, 1993, Huntingdon College; MM, 1998, Westminster Choir College, Rider; PhD, 2005, Indiana, Bloomington. (2005)

Sharon J. Paul, Robert M. Trotter Chair of Music; professor (choral conducting); director, choral activities. BA, 1978, Pomona; MFA, 1981, California, Los Angeles; DMA, 1984, Stanford. (2000)

Melissa Peña, associate professor (oboe, music appreciation). BM, 1996, Illinois, Urbana-Champaign; MM, 1998, Missouri, Kansas City. (2012)

Craig Phillips, assistant professor (voice, pedagogy, diction). BMus, 1993, Appalachian State; MMus, 1998, College-Conservatory of Music, Cincinnati; DMA, 2017, North Carolina, Greensboro. (2017)

Steven Pologe, professor (cello, chamber music). BM, 1974, Eastman School of Music; MM, 1978, Juilliard School. (1993)

Robert D. Ponto, associate professor; assistant dean, admissions, financial aid. BME, 1979, Wisconsin, Eau Claire; MM, 1985, Michigan, Ann Arbor. (1992)

David Riley, professor (collaborative piano). BM, 1992, Ithaca College; MM, 1995, Cleveland Institute of Music; DMA, 2000, Eastman School of Music. (2004)

Lindsey Henriksen Rodgers, instructor (musicology). BA, 2003, Walla Walla; MM, 2005, Yale; PhD, 2013, Oregon. (2014)

Stephen Rodgers, professor (music theory, musicianship). MPhil, 2001, PhD, 2005, Yale. (2005)

Idit Shner, professor (saxophone, jazz studies). BA, 1998, Oklahoma City; MM, 2001, Central Oklahoma; DMA, 2007, North Texas. (2005)

Jason Silveira, associate professor (instrumental music education). BM, 2002, MM, 2008, Ithaca College; PhD, 2011, Florida State. (2016)

Marian Elizabeth Smith, professor (musicology). BA, 1976, Carleton; BMus, 1980, Texas, Austin; PhD, 1988, Yale. (1988)

Jeffrey Stolet, professor (music technology, intermedia collaboration); director, Future Music Oregon, CPU Concert Series. BMus, 1977, MMus, 1979, New Mexico; PhD, 1984, Texas, Austin. (1988)

Leslie Straka, professor (viola, chamber music); associate dean, graduate studies; director, Community Music Institute. BM, 1976, MM, 1978, DMA, 1987, Arizona State. (1987)

Andrew Strietelmeier, assistant professor (music education, strings). BME, 2002, Valparaiso; MM, 2004, PhD, 2016, Texas, Austin. (2017)

Steve Vacchi, professor (bassoon, chamber music). BM, 1990, Eastman School of Music; MM, 1993, Hartt School; DMA, 1997, Louisiana State. (2000)

Lydia Van Dreel, professor (horn). BM, 1991, Wisconsin, Madison; MM, 1993, Juilliard. (2006)

Marc Vanscheeuwijck, professor (musicology, Collegium Musicum). BA, 1982, 1986, MA, 1984, PhD, 1995, Ghent. (1995)

Sarah Viens, instructor (trumpet). BM, 2004, Cleveland Institute of Music; MM, 2007, Temple. (2014)

Claire L. Wachter, professor (piano pedagogy, piano). BM, 1975, Peabody Conservatory; MM, 1977, DMA, 1993, Texas, Austin. (1991)

W. Sean Wagoner, senior instructor (percussion, music appreciation, scoring). BMus, 1994, MMus, 1997, DMA, 2001, Oregon. (2001)

Zach Wallmark, assistant professor (musicology). BM, 2003, NYU; MA, 2007, Oregon; PhD, 2014, UCLA. (2019)

Lawrence Wayte, senior instructor (musicology). BA, 1985, Wesleyan; JD, 1988, Stanford; MA, 1999, San Francisco State; PhD, 2007, California, Los Angeles. (2008)

Beth A. Wheeler, instructor (music education). BS, 2000, Northwest Missouri State; ME, 2012, Graceland; PhD, 2016, Kansas. (2016)

Eric Wiltshire, associate professor (instrumental music education); assistant director, bands. BA, 1991, San Jose State; MA, 1994, Washington State; PhD, 2006, Washington (Seattle). (2006)

Carl Woideck, senior instructor (jazz history, rock music history, blues history). BMus, 1981, MS, 1989, Oregon. (1996)

Juan Eduardo "Ed" Wolf, associate professor (ethnomusicology); coordinator, UO World Music Series. BA, BS, 1993, Notre Dame; MS, 1995, Northwestern; MA, 2007, PhD, 2013, Indiana, Bloomington. (2013)

Emeriti

Wayne Bennett, professor emeritus. BME, 1968, Oklahoma State; MM, 1969, PhD, 1974, North Texas. (1978)

Leslie T. Breidenthal, professor emeritus. BS, 1948, MA, 1949, Columbia; AMusDoc, 1965, Michigan. (1967)

David R. Case, senior instructor emeritus. BA, 1979, MA, 1984, Oregon. (1975)

Richard G. Clark, associate professor emeritus. BS, 1964, MA, 1971, Oregon; DMA, 1977, Washington (Seattle). (1982)

David P. Doerksen, associate professor emeritus. BME, 1956, Willamette; MM, 1969, Southern California; DMA, 1972, Oregon. (1983)

J. Robert Hladky, professor emeritus. BMus, 1950, Oklahoma State; MMus, performer's certificate, 1952, AMusDoc, 1959, Eastman School of Music. (1961)

Winifred Kerner, senior instructor emerita. (keyboard skills). BA, 1978, MA, 1980, Wesleyan; MM, 1982, Michigan. (1999)

Dean F. Kramer, professor emeritus. BMus, 1973, Oberlin Conservatory; MMus, 1976, DMA, 1992, Texas, Austin. (1983)

Gary M. Martin, professor emeritus. BA, 1961, MA, 1963, Adams State; PhD, 1965, Oregon. (1966)

James A. Miller, professor emeritus. BA, 1952, Goshen; MMus, 1956, AMusDoc, 1963, Michigan. (1965)

J. Robert Moore, professor emeritus. BMusEd, 1961, MMus, 1962, Tulsa; DMA, 1980, Eastman School of Music. (1975)

Randall S. Moore, professor emeritus. BA, 1963, MA, 1965, Oregon; PhD, 1974, Florida State. (1974)

Harold Owen, professor emeritus. BMus, 1955, MMus, 1957, DMA, 1972, Southern California. (1966)

George W. Recker, associate professor emeritus. Former principal trumpet, Kennedy Center Opera House Orchestra, Florida State University, George Peabody College, 1964–69. (1983)

H. Royce Saltzman, professor emeritus. BA, 1950, Goshen; MMus, 1954, Northwestern; DMA, 1964, Southern California. (1964)

Victor Steinhardt, professor emeritus. BMus, 1964, Mount St. Mary's; MA, 1967, California, Los Angeles. (1968)

Stephen Stone, associate professor and assistant dean emeritus. BS, 1949, MS, 1956, DMA, 1971, Oregon. (1976)

Ann Tedards, professor emerita. AB, 1970, Sweet Briar; MM, 1972, North Carolina, Chapel Hill; DMA, 1997, Peabody Conservatory of Music, Johns Hopkins. (1987)

Richard Trombley, associate professor emeritus. BS, 1961, Juilliard School; MMus, 1962, Manhattan School; DMA, 1977, Stanford. (1963)

Mary Lou Van Rysselberghe, senior instructor emerita. BMus, 1956, MMus, 1976, Oregon. (1977)

Milagro Vargas, professor emerita. BM, 1977, Oberlin Conservatory; MM, 1981, Eastman School of Music. (1992)

Jeffrey Williams, professor emeritus. BMus, 1965, North Texas; MS, 1966, Illinois; DMA, 1974, North Texas. (1980)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Music Major Programs

- **Bachelor of Arts in Music (Music History and Culture Concentration)**
- **Bachelor of Arts in Music (Music Theory Concentration)**
- **Bachelor of Arts in Music (Applied Voice Concentration)**
- **Bachelor of Arts in Music (General Music Concentration)**
- **Bachelor of Arts in Music (Popular Music Studies Concentration)**
- **Bachelor of Science in Music (Music Technology Concentration)**
- Bachelor of Science in Music (Applied Voice Concentration) (p. 869)
- **Bachelor of Science in Music (General Music Concentration)**
- **Bachelor of Science in Music (Popular Music Studies Concentration)**
- **Bachelor of Music in Music: Jazz Studies**
- **Bachelor of Music in Music Composition**
- **Bachelor of Music in Music Performance**
- **Bachelor of Music in Music Education**
- **Minor in Audio Production**

- **Minor in Music**
- **Minor in Music Technology**

A detailed checklist of requirements for each undergraduate degree is available online.

Students who want a conservatory-style education in music should work toward the bachelor of music (BMus) degree or a music major with the music history and literature concentration, music theory concentration or music technology concentration. The bachelor of arts (BA) and bachelor of science (BS) degrees with the general music concentration or popular music studies concentration are primarily for students who want a broad liberal arts education while majoring in music.

Undergraduate Studies

Nonmajors

The School of Music and Dance offers nonmajors a variety of music courses and performance ensembles. For details, see course listings. The following courses, which are open to students who have not had musical instruction, satisfy some of the university's general-education requirements. See **Group Requirements** and **Multicultural Requirement** in the **Bachelor's Degree Requirements** section of this catalog.

Code	Title	Credits
MUJ 350	History of Jazz, 1900–1950	4
MUJ 351	History of Jazz, 1940 to Present	4
MUS 125	Understanding Music	4
MUS 141	Popular Piano and Musicianship I	4
MUS 142	Popular Piano and Musicianship II	4
MUS 151	Popular Songwriting	4
MUS 227	Elements of Electronic Music	4
MUS 250	Popular Musics in Global Context	4
MUS 264	US Popular Music 1930 to 1965	4
MUS 265	US Popular Music 1965 to 2000	4
MUS 267–269	Survey of Music History	12
MUS 270	History of the Blues	4
MUS 281	Music of the Woodstock Generation	4
MUS 346	Music, Money, and the Law	4
MUS 349	American Ethnic and Protest Music	3
MUS 351	The Music of Bach and Handel	4
MUS 358	Music in World Cultures	4
MUS 359	Music of the Americas	4
MUS 360	Hip-Hop Music: History, Culture, Aesthetics	4
MUS 363	The Beatles and Their Times	4
MUS 365	Regional Ethnomusicology: [Topic]	4
MUS 367	Survey of African Music	4
MUS 382	American Musical Theater	4
MUS 451	Introduction to Ethnomusicology	4
MUS 452	Musical Instruments of the World	4
MUS 462	Popular Musics in the African Diaspora	4

Ensembles

Course numbers through 499 are undergraduate-level courses; 500-, 600-, and 700-level courses are graduate-level courses.

Code	Title	Credits
MUJ 391/691	Jazz Laboratory Band II	1
MUJ 392/692	Oregon Jazz Ensemble	1-2
MUJ 395/695	Small Jazz Ensemble: [Topic]	1-2
MUS 391/691	Collegium Musicum	1-3
MUS 393	Oregon Electronic Device Orchestra	2
MUS 394/694	Chamber Ensemble: [Topic]	1
MUS 395/695	Band: [Topic]	1-2
MUS 396/696	Orchestra: [Topic]	2
MUS 397/697	Chorus: [Topic]	2
MUS 398/698	Opera Workshop	2
MUS 490/590	Balinese Gamelan	2

Admission

Students who are eligible for admission to the university may apply to the School of Music and Dance as music majors. For information about admission to the University of Oregon, refer to the Admissions (p. 14) section of this catalog.

Application Procedure

1. Complete the University of Oregon application for admission
2. Review the school's undergraduate music major admission requirements (<http://music.uoregon.edu/apply/undergraduate-music/>)
3. Complete the school's online application (<http://music.uoregon.edu/apply/undergraduate-music/>)

Early action—submit UO and School of Music and Dance applications

November 1

Early action—undergraduate auditions; recorded auditions and music technology portfolios

Mid-November

School of Music and Dance standard application deadline

January 15

Undergraduate audition days; recorded auditions and music technology portfolios due

Late January through February

School of Music and Dance mails admission and scholarship offers

April 1

For audition dates and submission deadlines for recordings and portfolios, visit the undergraduate music admissions website.

Auditions

In many degree programs, the audition is the most important factor in determining admission to the School of Music and Dance. As part of the admission process, applicants to most music degree programs must either audition (in person or via recording) or submit a portfolio (the option for applicants to the music technology program). Students who submit recorded auditions may be required to audition in person upon arrival on campus. Auditions for admission are held in November, January, and February. Each student who auditions for admission is automatically considered for a music scholarship. For more detailed information about repertory and procedure, visit the School of Music and Dance admissions website (<http://music.uoregon.edu/apply/undergraduate-music/>). (<http://music.uoregon.edu/apply/>)

An audition is not required for admission to the BA or BS in music with Theory, History & Literature, General Music or Popular Music Studies concentrations. However, the Theory and History & Literature concentrations do have specific requirements for continuation in the program. See the Music Degree Program Continued Enrollment Requirements section below for details.

Jazz Studies

Students who want to enter the jazz studies major have a jazz audition. In addition, a placement examination specific to jazz studies is required of transfer students wishing to enter the program.

Music Technology

Students who want to enter the music technology program must submit a portfolio. A classical audition is not required for admittance to the bachelor or science music technology degree program. However, students admitted only on the basis of a portfolio are only considered for the music technology program and are not eligible to pursue other degree programs within the school.

English Language Proficiency

Scores for the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) are required for students whose first language is not English. For admittance as an undergraduate music major, English language proficiency requirements must be met by one of the following: a minimum total TOEFL score of 575 on the paper-based test or a minimum total score of 88 on the Internet-based test; a minimum total score of 7.0 on the International English Language Testing System (IELTS); or completion of all required Academic English for International Students (AEIS) course work.

Placement Examinations

Incoming music majors may take a musicianship diagnostic, which is designed to assess basic skills in theory, ear training and keyboard skills. All transfer students are required to take a music core placement examination, which determines level placement in music theory, aural skills, and keyboard skills courses. Exceptions may be made for students from institutions with whom the School of Music and Dance has a program articulation agreement, including Lane Community College and Mt. Hood Community College. For details, students should consult the Undergraduate Office (<https://music.uoregon.edu/current-students/undergraduate-music-students/>). Incoming freshman students may choose to take the music core placement exam (for the purpose of testing out of part of the music core). Study guides for the placement are available from the music undergraduate website (<https://music.uoregon.edu/current-students/undergraduate-music-students/>).

Admission to a Specific Degree Program

Students are placed in their primary program of choice, as indicated on their School of Music and Dance application, upon Initial admission to the school. Requirements for continued enrollment in music majors vary significantly, as outlined in the chart below. Additional information is available from the undergraduate office.

Program Overlap Limitations

Due to significant curricular overlap, concurrent pursuit of the following music programs is not allowed:

- Music minor with any other major or minor program in music
- Music technology major with music technology minor

- Music technology major with audio production minor
- Music major with general music or popular music studies concentrations with any bachelor of music (BMus) or bachelor of music in music education (BMME) degree

In addition, it is not possible to pursue a bachelor of arts or bachelor of science in music with multiple concentrations.

Music Degree Program Continued Enrollment Requirements

Degree Program	Continued Enrollment Requirements
Bachelor of Arts in Music (General Music Concentration)	Passing grade of C– or better in MUS 131, MUS 132; and passing grade of C– or better in one course in the history and culture category.
Bachelor of Arts in Music (Music History and Culture Concentration)	Submit research paper and unofficial transcript to the musicology faculty; complete an interview with a member of that faculty. WR 121 must be completed and the Music Core courses passed with a grade of C or better.
Bachelor of Arts in Music (Music Theory Concentration)	Complete an interview with a member of the Theory faculty. The second-year music theory core (theory, aural skills) must be taken in residence and passed with grades of B– or better.
Bachelor of Arts in Music (Popular Music Studies Concentration)	Passing grade of C- or better in one of the following: MUS 131, MUS 141, MUS 151, MUJ 180; and passing grade of C– or better in any one course in the history and culture category.
Bachelor of Science in Music (Music Technology Concentration)	Three audio recordings of recent compositions (audio or visual formats)—candidates who have completed MUS 447, MUS 448 may submit two compositions; one- to two-page description of experience with electronic and computer musical instruments, audio recording, or related software, and reasons for enrolling in this option; list of software and hardware in which the student has experience and the level of expertise with each.
Bachelor of Music in Music Composition	Complete the Music Core courses with grades of C- or better. Complete the Composition I series (MUS 240, MUS 241, MUS 242) with grades of B- or better.
Bachelor of Music in Music: Jazz Studies	Successful completion of sophomore and junior proficiency examinations.

Bachelor of Music in Music Education	In addition to two-year musicianship and history and culture core, successful completion of Foundations of Music Education (MUE 326) with grade of B– or better. Application to degree program, audition, and interview. Students who have not made satisfactory progress may apply one time only.
Bachelor of Music in Music: Performance (Brass)	Successful jury to the MUP 465 level.
Bachelor of Music in Music: Performance (Guitar)	Successful jury to the MUP 465 level.
Bachelor of Music in Music: Performance (Keyboard)	Successful jury to the MUP 465 level.
Bachelor of Music in Music: Performance (Percussion)	Successful jury to the MUP 465 level.
Bachelor of Music in Music: Performance (Strings)	Successful jury to the MUP 465 level.
Bachelor of Music in Music: Performance (Voice)	Successful jury to the MUP 465 level.
Bachelor of Music in Music: Performance (Woodwinds)	Successful jury to the MUP 465 level.

Program Requirements

Accompanying Requirement for Piano Students

Music Performance majors whose primary instrument is piano have an accompanying requirement, described under the Bachelor of Music in Music Performance heading in the Undergraduate section.

Ensemble Requirements for Music Majors

Performance studies and ensemble requirements vary by program. A detailed checklist of requirements for each undergraduate degree is available online (<http://music.uoregon.edu/current-students/undergraduate-music-students/undergraduate-checklists/>). Students must audition for ensemble placement before each fall term, and may also be required to re-audition before each spring term.

Instrumental Majors

Ensembles that satisfy this requirement are

- University Symphony Orchestra
- Oregon Wind Symphony
- Oregon Symphonic Band

Voice Majors

Ensembles that satisfy this requirement are

- University Singers
- Chamber Choir
- Repertoire Singers
- Women's Choir

Assignments take into account the student's preference, level of ability, major performance medium, educational and musical needs, and the needs of the school's ensembles.

Ensemble Credits for Transfer Students

A limited number of ensemble credits may be transferred:

BA in Music (General Music Concentration)—three of the required six terms may be transferred (see checklist for transfer credit limitations)

BA in Music (Music History and Literature Concentration)—all three of the required terms must be completed in residence

BA in Music (Music Theory Concentration)—all three of the required terms must be completed in residence

BA in Music (Popular Music Studies Concentration)—two of the required four terms may be transferred (see checklist for transfer credit limitations)

BS in Music (General Music Concentration)—three of the required six terms may be transferred (see checklist for transfer credit limitations)

BS in Music (Music Technology Concentration)—all three of the required terms must be completed in residence

BS in Music (Popular Music Studies Concentration)—two of the required four terms may be transferred (see checklist for transfer credit limitations)

BMus in Music Composition—three of the required nine terms may be transferred

BMus in Music: Jazz Studies—three of the required nine terms of small jazz ensemble may be transferred; all three of the required terms of classical ensemble may be transferred

BMus in Music Performance—six of the required twelve terms may be transferred

BMME in Music Education—three of the required nine terms may be transferred

Only one approved ensemble per term may be transferred. For the purposes of transfer, two semesters shall equal three terms of credit and one semester shall equal one term of credit.

Exceptions to Ensemble Requirements

Students who meet one of the following exceptions are not required to audition for ensemble placement:

- Harp, classical guitar, harpsichord, and organ students may enroll in MUS 394 Chamber Ensemble: [Topic] (Chamber Ensemble) instead of the large conducted ensembles
- Jazz studies majors must enroll in three terms of classical ensembles, which may include MUS 394 Chamber Ensemble: [Topic], Band: [Topic] (MUS 395), Orchestra: [Topic] (MUS 396), or Chorus: [Topic] (MUS 397)
- With instructor approval, piano students may enroll in MUS 394 Chamber Ensemble: [Topic] (Accompanying) or MUS 421 The Collaborative Pianist, MUS 422 The Collaborative Pianist, MUS 423 The Collaborative Pianist instead of large conducted ensembles
- Composition students may enroll in three terms of gamelan in partial fulfillment of the requirement

- Studio guitar students may enroll in a chamber, studio guitar, or jazz ensemble instead of a large conducted ensemble
- Students pursuing the popular music studies concentration have nontraditional ensemble options and requirements. For details, see checklist.

Other exceptions to ensemble requirements may be considered by the ensemble petition committee after the student completes the following:

- auditions for the appropriate ensemble auditioning committee (choral or instrumental)
- submits a petition to the music undergraduate office

General Requirements

In addition to the general university requirements for bachelor's degrees (see the Registration and Academic Policies (p. 21) section of this catalog), all undergraduate degrees in music require the following:

Core Courses for Traditional Music Major Degree Programs

Code	Title	Credits
Musicianship¹		
MUS 131–133	Music Theory I-III	6
MUS 134–136	Aural Skills I-III	6
MUS 137–139	Keyboard Skills I-III	3
MUS 231–233	Music Theory IV-VI	6
MUS 234	Aural Skills IV	2
MUS 235	Aural Skills V	2
History and Culture		
MUS 267–269	Survey of Music History	12
MUS 358	Music in World Cultures	4
Total Credits		41

¹ For some majors, one to three terms of Analysis: [Topic] (MUS 327) may be required beyond the two-year musicianship core. For details, see checklist (<https://music.uoregon.edu/current-students/undergraduate-music-students/undergraduate-checklists/>).

Satisfactory Progress toward the Degree

Satisfactory progress toward the degree is monitored every term by the SOMD Undergraduate Office. The following conditions must be maintained for good academic standing within the department:

1. Students must maintain a 2.75 GPA for all classes taken with the subject codes MUS, MUP, MUE and MUJ within a given term.
2. Courses must be taken for a grade if the graded option is offered. Majors must earn a C– or better in every course—including courses taken outside the School of Music and Dance—that is required for their major. A student who receives a grade of D+ or worse or a mark of W (withdrawal) or I (incomplete) for a required course is placed on departmental academic warning.
3. Candidates for the BMus, BMME, BA in Music (Theory concentration), or BS in Music (Music Technology concentration) must successfully complete the two-year musicianship core (with the exception of MUS 327 Analysis) within their first two years of residence.

4. Candidates for a BMus in Music Performance or a BMME in Music Education must advance to the next performance level at least once every seven terms.

Not meeting these requirements will result in initial academic warning status. If this status is not lifted by the end of the next term in which the student has had the opportunity to remedy the situation, the student will move on to a level II departmental academic warning. Failure to improve per conditions set forth in an advising plan following the warning will move the student onto probationary status and subsequent failure to improve thereafter will result in dismissal from the music major.

Reinstatement to the major may occur upon review by the SOMD Undergraduate Office and determination that the student has fulfilled the conditions listed above for satisfactory standing.

Undergraduate music majors re-enrolling after two or more consecutive terms of non-enrollment in the music major curriculum (excluding summer session) are required to petition for readmission to the music major. Depending on the results of this petition, a student may be required to reapply for music major admission through standard music admission processes or re-audition for level placement in performance studies as a music major. Placement exams in theory, aural skills, and keyboard skills may also be required. In addition, undergraduate majors admitted to a specific degree program prior to being un-enrolled for two or more consecutive terms may also be required to re-apply for admittance to that specific degree program by their major department or area. Students studying abroad or in an approved exchange program are exempt from the readmission petition requirement.

Typical First-Year Program for Music Major Degree Programs

The bachelor of arts in music (both general music and popular music studies concentrations) and the bachelor of science in music (both general music and popular music studies concentrations) can vary significantly in their options for the first year of study.

First Year		Credits
Fall		
MUS 131	Music Theory I	2
MUS 134	Aural Skills I	2

Spring Credits	15
Total Credits:	45

Specific Degree Requirements

Minimum requirements for a bachelor's degree in music are 36 credits in the major, including 24 upper-division credits. In addition to general university requirements and the general requirements for all undergraduate music degrees, each undergraduate music degree has the following specific requirements.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

- Music (General Music Concentration) (p. 831)
- **Music (Music History and Literature Concentration)**
- **Music (Music Theory Concentration)**
- **Music (Music Technology Concentration)**
- **Music (Popular Music Studies Concentration)**
- **Music Composition**
- **Music Education**
- **Music: Jazz Studies**
- **Music Performance**

Graduate Studies

Degrees Offered:

- Master of Arts in Musicology
- Master of Arts in Music Theory
- Master of Music in Intermedia Music Technology
- Master of Music in Music Composition
- Master of Music in Music: Conducting
- Master of Music in Music Education
- Master of Music in Music: Jazz Studies
- Master of Music in Music: Piano Pedagogy
- Master of Music in Music Performance
- Doctor of Musical Arts in Music Performance
- Doctor of Philosophy in Music Composition
- Doctor of Philosophy in Music Education
- Doctor of Philosophy in Musicology
- Doctor of Philosophy in Music Theory

Certificates Offered:

- Graduate Certificate in Music Performance

Graduate Specializations:

- Collaborative Piano
- Historical Performance Practice
- Jazz Pedagogy
- Music Theory Pedagogy
- Piano Pedagogy
- Violin/Viola Pedagogy

Admission

Applicants must satisfy general university, Division of Graduate Studies, and School of Music and Dance requirements governing admission. See the **Division of Graduate Studies** section of this catalog for information about credits, residence, and transfer of graduate work taken elsewhere.

Submit an online Graduate Admission Application. In addition, send two sets of sealed, official transcripts from all colleges or universities from which a bachelor's and all subsequent degrees were earned; transcripts must show the degrees awarded. Address one set to Office of Admissions, 1217 University of Oregon, Eugene, Oregon 97403-1217.

Address the second set to School of Music and Dance, Graduate Admissions, 1225 University of Oregon, Eugene, Oregon 97402-1225.

Additional Requirements for International Students

International applicants must have a credential that is equivalent to a four-year bachelor's degree earned in the United States. These credentials must be received from an institution recognized by the country's educational body that oversees institutional approval, such as the Ministry of Education. Two copies of the following documents should be requested:

- Official transcripts
- Certified English translations of all college or university work
- If the degree and conferral date do not appear on the transcripts, official degree certificates with certified English translations

Send two sets of transcripts, one to the Office of Admissions, 1217 University of Oregon, Eugene, Oregon 97403-1217 USA, the other to the School of Music and Dance, Graduate Admissions, 1225 University of Oregon, Eugene, Oregon 97402-1225 USA.

International applicants must file the International Student Financial Statement online.

A recent TOEFL exam is required of all international graduate applicants whose native language is not English. An acceptable score must be reported directly to the Office of Admissions by December 10 in order for the application to be complete. Master's degree applicants from a non-English-speaking country must provide a TOEFL score of 575 or better (paper-based test) or 88 or better (Internet-based test) or an International English Language Testing System (IELTS) score of 7.0. Doctoral degree applicants must provide a TOEFL score of 600 or better (paper-based test) or 100 or better (Internet-based test); or an IELTS score of 7.0.

Master's Degree Admission

All submissions must include the University of Oregon online Graduate Application (https://gradweb.uoregon.edu/online_app/application/guidelines1.asp). Following are additional admission requirements for specific programs:

Degree Program	Continued Enrollment Requirements
MA, Musicology	Résumé; statement of purpose; two research or analysis papers in history or ethnomusicology; recent concert or recital programs (optional); three references
MA, Music Theory	Curriculum vitae; statement of purpose; two scholarly writing samples exemplifying scholarship and student's ability to develop a single, coherent line of reasoning and ability to analyze tonal or atonal music or both; Preliminary Written Exam for the Music Theory GE (written test designed to evaluate part-writing and analysis skills); interview with music theory faculty; three references

MMus, Music Composition	Résumé; statement of purpose; scholarly writing sample; evidence of live performance of student works; list of compositions; list of performances of compositions; scores of original works for large and small ensembles that demonstrate marked ability and technical skill in composition; audio or video recordings of compositions; interview with member of composition faculty (optional); three references	MMus, Music Education	Master's music education applicants must have a baccalaureate degree in music education. Résumé detailing teaching experience and educational background; statement of professional and personal goals; scholarly writing sample; copies of concert or recital programs you have conducted (elementary-general applicants may substitute a sample curriculum in lieu of concert-recital programs); recent video recording of K–12 music teaching and ensemble performances; campus visit and interview with members of the music education faculty is recommended; three references
MMus, Music: Conducting (Choral, Orchestral, or Wind Ensemble)	Résumé; statement of purpose; scholarly writing sample; recent concert or recital programs conducted; preliminary audition recording; live audition and interview (if invited to campus following review of preliminary recorded audition); three references. For conducting audition details, visit pages.uoregon.edu/music/admission/docs/AudRequireCurrent_Grad.pdf	MMus, Music Performance	Résumé; statement of purpose; research or music analysis paper; repertoire list; recent concert or recital programs; audition (either live or recorded); three references. For current audition requirements and procedures, visit pages.uoregon.edu/music/admission/docs/AudRequireCurrent_Grad.pdf . Saxophone, Piano and Voice applicants must submit a preliminary audition recording by December 10. Note that any student admitted on the basis of a recorded performance must perform a placement audition upon arrival on campus to begin studies.
MMus, Intermedia Music Technology	Résumé; statement of purpose; scholarly writing sample; recent concert or recital programs; intermedia music technology statement; intermedia music technology-related work summary; software-hardware experience; portfolio recordings; three references	MMus, Music: Piano Pedagogy	Résumé; statement of purpose; scholarly writing sample; repertoire list; recent concert or recital programs; video of student teaching a beginning-level student and an intermediate- or advanced-level student; either a live or a recorded audition; three references. Note that any student admitted on the basis of a recorded performance must perform a placement audition upon arrival on campus to begin studies.
MMus, Music: Jazz Studies (Instrumental Performance or Composition-Arranging)	Résumé; statement of purpose; scholarly writing sample; repertoire list (optional); recent concert or recital programs (optional); preliminary audition recording (due by December 10); live audition, if selected from preliminary audition recording; three references. For audition details, visit pages.uoregon.edu/music/admission/docs/AudRequireCurrent_Grad.pdf . For composition and arranging emphasis, submit two representative scores and recordings of arrangements and/or compositions for jazz ensemble. At least one of these pieces should be scored for a large ensemble (10 or more performers). Students admitted on the basis of recorded performances must perform a placement audition upon arrival on campus to begin studies.		

Doctoral Degree Admission

All submissions must include the University of Oregon online Graduate Application (https://gradweb.uoregon.edu/online_app/application/guidelines1.asp).

Details are available from the School of Music and Dance graduate office. Following are additional admission requirements for specific programs:

Degree Program	Continued Enrollment Requirements
PhD and DMA, Music Composition	Résumé; statement of purpose; scholarly writing sample; evidence of live performance of works; list of compositions; list of performances of compositions; scores of original works for large and small ensembles that demonstrate marked ability and technical skill in composition; audio or video recordings of compositions; interview with a member of the composition faculty (optional); three references
PhD, Music Education	Doctoral music education applicants must have at least one degree in music education. Résumé detailing evidence of at least three years of successful full-time music teaching experience in elementary or secondary public school or both; statement of professional and personal goals; scholarly writing sample; copies of concert or recital programs conducted (elementary-general applicants may substitute a sample curriculum in lieu of concert-recital programs); a recent video recording of K–12 music teaching and ensemble performances; an on-campus interview with members of the music education faculty; three references
PhD, Musicology	Résumé; statement of purpose; two research or analysis papers in history or ethnomusicology; recent concert or recital programs (optional); if interested in historical performance practice, submit recent audio or video recordings of performances (optional); three references
PhD, Music Theory	Curriculum vitae; statement of purpose; two scholarly writing samples exemplifying scholarship and ability to develop a single, coherent line of reasoning and ability to analyze tonal or atonal music or both; recent concert or recital programs (optional); Preliminary Written Exam for Music Theory GE (a written test designed to evaluate part-writing and analysis skills); interview with member of music theory faculty; three references

DMA, Music Performance

Résumé; statement of purpose; research or music analysis paper; repertoire list; recent concert or recital programs; audition; three references. For current audition requirements and procedures, visit pages.uoregon.edu/music/admission/docs/AudRequireCurrent_Grad.pdf. Applicants to the DMA, music performance—piano pedagogy option program have two additional application requirements: (1) a list of pedagogical materials and literature used in the applicant's teaching; and (2) a high-quality, 45-minute video recording demonstrating piano instruction of two different works to an advanced-level student. Teaching repertoire may be chosen from works such as the following: Bach two- and three-part inventions; Beethoven, Haydn, or Mozart sonatas, rondos, or a set of variations; a Chopin nocturne or Brahms intermezzo; a Debussy prelude, or a work by Ravel; a modern work written after 1900. Saxophone, Piano and Voice applicants must submit a preliminary audition recording by December 10. Note that any student admitted on the basis of a recorded performance must perform a placement audition upon arrival on campus to begin studies.

Admission Requirements for Graduate Certificate in Music Performance

Applications for admission into the graduate certificate in music performance program are reviewed at the same time as applications for graduate music degree programs. For current audition requirements and procedures, visit https://music.uoregon.edu/Performance_Certificate (https://music.uoregon.edu/Performance_Certificate/). Saxophone, Piano and Voice applicants must submit a preliminary audition recording by December 10.

To be considered for admission, applicants must hold a bachelor of music degree from an accredited institution and must complete a recorded or live audition. Note that any student admitted on the basis of a recorded performance must perform a placement audition upon arrival on campus to begin studies. For current audition requirements and procedures, see the School of Music and Dance website (<https://music.uoregon.edu/>).

As with all other graduate certificates, applicants must satisfy minimum admission requirements set by the UO Division of Graduate Studies.

All submissions must include the University of Oregon Graduate Application, available online (https://gradweb.uoregon.edu/online_app/application/guidelines1.asp).

Entrance Examinations

Before their first term of enrollment, students who are admitted into a graduate music degree program must take the Graduate Entrance Examination in music theory, aural skills, and music history. The outcome of these exams determines whether graduate music students may register for graduate-level music theory and musicology courses or if subsequent courses will be required to meet the proficiency requirement. Students in the graduate certificate in music performance program are not required to meet the Graduate Entrance Examination proficiency level but must pass the Graduate Entrance Examination in order to meet prerequisites to register for graduate-level music theory and musicology classes.

The Graduate Entrance Examination is administered before each fall term during Week of Welcome. Students are required to either pass the GEE or pass required remedial course work in order to meet the proficiency requirement. Students who fail to pass the examination or pass required remedial undergraduate course work by the end of fall term in their second year will be dismissed from the program.

Students who fail the Graduate Entrance Examination in music theory and/or aural skills (i.e., earn a score of less than 70 percent) will be required to take the undergraduate theory placement exam, the undergraduate aural skills placement exam, or both. Based on the results of the placement exams, students will be required to take the appropriate undergraduate music theory and/or aural skills courses to meet the proficiency requirement. Students who are required to take undergraduate core courses in the first and second years of their program may retake the GEE at the beginning of the second year to satisfy the Level IV requirement. For more information, please see the music school's Procedures and Policies (<https://blogs.uoregon.edu/gradmus/procedures-policies/>).

Students scoring between 50 and 69 percent on the music history portion of the GEE are required to take and pass an additional music history survey course from the MUS 660–665 series (in addition to any MUS 660–665 courses required for the degree). Based on the test results and demonstrated areas of weakness, members of the musicology faculty determine one or two of the survey courses to be taken by the student.

Students scoring below 50 percent are required to pass Survey of Music History (MUS 267), Survey of Music History (MUS 268), and Survey of Music History (MUS 269).

Master's Degree Requirements

In addition to the University of Oregon Division of Graduate Studies' requirements for master's degrees, the School of Music and Dance has the following requirements. For additional information, contact the music graduate office or consult the Info for Grad Students (<https://music.uoregon.edu/current-students/info-graduate-music-students/>) webpage.

A minimum of 9 credits must be taken in 600- or 700-level courses and at least one-half of the required credits must be in courses intended for graduate students only. Degree candidates must complete a terminal project (e.g., recital, thesis, project), all of which must be archived in one of the following locations: Music Services in Knight Library, Scholars' Bank, ProQuest, or Cykler Music Education Library.

Doctoral Program Requirements

Comprehensive Examinations

Written and oral comprehensive examinations are taken before advancement to candidacy but after meeting the following conditions:

1. Completion of all course work and additional requirements
2. Approval from area advisor

Additional information about comprehensive examinations is available from the music graduate office and the advisor.

Advancement to Candidacy

Advancement to candidacy is based on successful completion of the comprehensive examination, approval by the advisory committee of the dissertation or lecture-document proposal, and the recommendation of the advisor.

Dissertation

A dissertation is required in all doctoral degree programs except the DMA in performance, for which a lecture-document that focuses on some aspect of the performance medium may be substituted. Students in the DMA data-driven instruments track are required to complete a digital portfolio dissertation.

For PhD composition, the dissertation must be an original composition of major proportions composed during doctoral study and performed and recorded on the University of Oregon campus.

Time Limit

Doctoral students have seven years from the term of matriculation to complete the degree. All course work, comprehensive examinations, any required recitals, and the dissertation must be satisfactorily completed before the end of the seven-year period. If this period is exceeded, an additional year of residence or a new set of comprehensive examinations or both are required.

Research (MUE or MUS 601), Dissertation (MUE or MUS 603), and Reading and Conference (MUE, MUJ, or MUS 605) are available during summer session only with advisor's consent.

Final Oral Defense

A final oral defense is required in all degree programs. The candidate is expected to defend the dissertation or lecture-document and show a command of the research area. Members of the dissertation or lecture-document advisory committee typically conduct the final examination; their appointment is subject to approval by the Division of Graduate Studies.

Music Education Courses

MUE 126. Orientation to Music Education. 1 Credit.

An orientation for first year music education majors, including an overview of music education philosophy and contemporary issues in music education. In addition, an exploration of career opportunities in music education and other fields will be covered.

MUE 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

MUE 326. Foundations of Music Education. 3 Credits.

Professional orientation for prospective school music teachers; curricular, historical, philosophical, and social foundation of music education; ethical, professional, and social aspects of teaching; comprehensive field experience. Extra fee.

MUE 386. Teaching Laboratory I. 1 Credit.

Practice in teaching using microteaching techniques and music education methods in a laboratory setting.

Prereq: admission to music education. Coreq: MUE 442.

MUE 387. Teaching Laboratory I. 1 Credit.

Practice in teaching using microteaching techniques and music education methods in a laboratory setting.

Prereq: admission to music education. Coreq: MUS 484 or MUS 486.

MUE 388. Teaching Laboratory I. 1 Credit.

Practice in teaching using microteaching techniques and music education methods in a laboratory setting.

Prereq: admission to music education. Coreq: MUE 411 or MUE 413.

MUE 392. Instrumental Techniques: [Topic]. 1 Credit.

Repeatable. Elementary instruction in pedagogy and performance of various instruments. Sections in violin and cello, low brass, high brass, percussion, flute and clarinet, saxophone, oboe and bassoon, and voice. Instrument rental fee.

Prereq: admission to music education.

MUE 401. Research: [Topic]. 1-21 Credits.

Repeatable.

MUE 403. Thesis. 1-12 Credits.

Repeatable.

MUE 405. Reading and Conference: [Topic]. 1-4 Credits.

Repeatable. Individual study of topics at a level above that available in the standard curriculum.

Prereq: completion of all regularly scheduled courses related to the topic or equivalent.

MUE 406. Practicum: [Topic]. 1-12 Credits.

Repeatable.

MUE 407. Seminar: [Topic]. 1-5 Credits.

Repeatable. Various advanced topics offered periodically according to student and faculty interest and availability.

MUE 408. Workshop: [Topic]. 1-21 Credits.

Repeatable. Various topics at a level above that available in the standard curriculum.

MUE 409. Terminal Project. 1-12 Credits.

Repeatable. Practical experience in guiding learning activities.

MUE 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

MUE 411. Band Methods. 3 Credits.

Concerns of band teachers in secondary and elementary schools. Observations, procedures, and instructional materials; planning and teaching lessons for analysis and criticism. Sequence. Repeatable once for a maximum of 6 credits; admission to the MUP 300 level in primary instrument required.

Prereq: admission to music education major; admission to the MUP 300 level on primary instrument; MUE 392, MUS 486; coreq: MUE 388 or MUE 406.

MUE 412. Elementary Music Methods. 3 Credits.

This course is designed to prepare upper-division music education majors to teach elementary music in public schools. Students will become familiar with basic common pedagogical techniques used in the general music classroom. Lab fee.

Prereq: Admission to music education; admission to the MUP 300 level; coreq: MUE 406, MUE 486.

MUE 413. Secondary Choral Methods. 3 Credits.

Secondary choral music curriculum, teaching methods, sight singing and music literacy, developing independent musicianship, philosophical and social foundation of vocal music education in the public schools.

Prereq: admission to music education major; admission to the MUP 300 level in voice or piano; MUS 484; coreq: MUE 388 or MUE 488.

MUE 420. Contemporary Methods in Music Education. 3 Credits.

This course is designed to assist upper-level and graduate music education students develop an understanding of Contemporary methods as commonly used in American public school general music K-9 grade classrooms and to apply these techniques to in-class and virtual teaching assignments.

Prereq: MUE 412.

MUE 428. Music for Early Childhood. 3 Credits.

Musical characteristics and abilities of preschool children. Suitable materials and musical experiences; techniques involving parents and children in a laboratory setting. Laboratory fee. Repeatable once for maximum of 6 credits.

MUE 429. Music in Special Education. 3 Credits.

Designed to assist senior and graduate music education majors and pedagogy majors in their awareness of the physical, intellectual, emotional, and social conditions of students with exceptionalities, so that they may be included and accommodated in music activities in the classroom.

MUE 430. Music Classroom Management. 3 Credits.

Techniques in classroom management; crises prevention and intervention; techniques for providing a safe and positive classroom environment; professional ethics and legal expectations. Repeatable twice for a maximum of 9 credits.

MUE 432. Music in School and Society. 3 Credits.

Elementary and secondary school music programs, past and present, and their relationships to the communities they serve.

MUE 438. Curricular Strategies in Music Education. 3 Credits.

Procedures for developing music courses for today's schools; determination of goals, content, instructional materials, and evaluative criteria; exploration of significant curriculum development projects in music education.

MUE 439. Orff-Schulwerk Pedagogy. 3 Credits.

This course is an enhanced pedagogy course designed to prepare preservice students on the elementary track for general music classroom. Students will study the Orff-Schulwerk teaching process; including preliminary play, imitation, exploration, and improvisation. Students will arrange and teach music following the Orff-Schulwerk harmonic sequence.

MUE 442. Teaching Singing in the Classroom. 3 Credits.

Methods for teaching group vocal technique in the classroom with emphasis on elementary, mid-level, and emerging adult voices. Concentration on development of the adolescent changing voice.

Prereq: admission to music education; coreq: MUE 387.

MUE 450. Practicum in Music Education. 2 Credits.

MUE 450/550 provides scope, structure, supervision, and guidance to support Music Education students during two terms of Music Education practica in accordance with the Oregon Teacher Standards.

MUE 455. Marching Band Methods. 3 Credits.

Teaching methods for secondary school marching bands.

MUE 456. String Methods. 3 Credits.

Teaching methods for the beginning string class in elementary and middle schools. Development of technique sequences for string groups in secondary schools.

MUE 459. Fundamentals of Violin and Viola Teaching. 2 Credits.

Development of technique for instruction of beginning violin students, including philosophy, practice habits for young students, parent education, and pedagogical skills.

MUE 460. Early-Intermediate Violin Repertoire and Technique. 2 Credits.

This course provides an overview of early and intermediate repertoire, focusing specifically on sequentially-organized pieces that teachers can use to logically build violin technique.

Prereq: MUE 459.

MUE 463. Pedagogy Methods: Violin and Viola. 2 Credits.

Principles and techniques of violin and viola teaching selected from the pedagogical approaches of Flesch, Galamian, Dounis, Rolland.

MUE 464. Advanced Violin/Viola Pedagogy. 2 Credits.

This course will examine the major violin pedagogy schools with their pertinent somatic counterparts. Teaching practicums will be included.

MUE 465. Somatics for String Players. 1 Credit.

This course will examine somatic (body awareness) in string playing. Human anatomy, performance anxiety, proper breathing, and playing alignment will be addressed. Teaching practicums will be included.

MUE 466. Community Music Institute Practicum. 1 Credit.

This course serves as a repeatable teaching lab with students enrolled in the University of Oregon's Community Music Institute. Initial term includes observation of master teachers. Subsequent terms include guided teaching assignments commensurate with the university student's level of experience and expertise.

Prereq: MUE 459.

MUE 471. Piano Pedagogy I: Teaching Beginners. 3 Credits.

In-depth study of beginning methods and materials for children and adults. Individual teaching experience. Offered alternating years.

MUE 472. Piano Pedagogy II: Teaching Groups. 2 Credits.

Methods and materials for group instruction of all ages and levels. Survey of learning theories and new technologies. Individual and group teaching experience. Offered alternating years.

Prereq: MUE 471; coreq: MUE 409.

MUE 473. Piano Pedagogy III: Teaching Intermediate Levels. 2 Credits.

Study of repertoire, technique, and teaching methods appropriate for intermediate-level piano students. Individual and master-class teaching experience. Offered alternating years.

Prereq: MUE 472; coreq: MUE 409.

MUE 486. Teaching Laboratory II. 1 Credit.

Practice in teaching using microteaching techniques and music education methods in a laboratory setting.

Prereq: admission to music education.

MUE 491. Advanced Pedagogy: [Topic]. 3 Credits.

Sections in piano and other topics. Repeatable twice in different topics for maximum of 9 credits.

MUE 503. Thesis. 1-16 Credits.

Repeatable.

MUE 507. Seminar: [Topic]. 1-5 Credits.

Repeatable. Various advanced topics offered periodically according to student and faculty interest and availability.

MUE 508. Workshop: [Topic]. 1-21 Credits.

Repeatable. Various topics at a level above that available in the standard curriculum.

MUE 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

MUE 511. Band Methods. 3 Credits.

Concerns of band teachers in secondary and elementary schools. Observations, procedures, and instructional materials; planning and teaching lessons for analysis and criticism. Sequence. Repeatable once for a maximum of 6 credits; admission to the MUP 300 level in primary instrument or voice required.

Prereq: admission to the MUP 300 level on primary instrument; MUE 392, MUS 486; coreq: MUE 388 or MUE 488.

MUE 512. Elementary Music Methods. 3 Credits.

This course is designed to prepare upper-division music education majors to teach elementary music in public schools. Students will become familiar with basic common pedagogical techniques used in the general music classroom. Lab fee.

Prereq: admission to music education

MUE 513. Secondary Choral Methods. 3 Credits.

Secondary choral music curriculum, teaching methods, sight singing and music literacy, developing independent musicianship, philosophical and social foundation of vocal music education in the public schools.

Prereq: admission to the MUP 300 level in voice or piano; MUS 484/MUS 584; coreq: MUE 388 or MUE 488.

MUE 520. Contemporary Methods in Music Education. 3 Credits.

This course is designed to assist upper-level and graduate music education students develop an understanding of Contemporary methods as commonly used in American public school general music K-9 grade classrooms and to apply these techniques to in-class and virtual teaching assignments.

MUE 528. Music for Early Childhood. 3 Credits.

Musical characteristics and abilities of preschool children. Suitable materials and musical experiences; techniques involving parents and children in a laboratory setting. Laboratory fee. Repeatable once for maximum of 6 credits.

MUE 529. Music in Special Education. 3 Credits.

Designed to assist senior and graduate music education majors and pedagogy majors in their awareness of the physical, intellectual, emotional, and social conditions of students with exceptionalities, so that they may be included and accommodated in music activities in the classroom.

MUE 530. Music Classroom Management. 3 Credits.

Techniques in classroom management; crises prevention and intervention; techniques for providing a safe and positive classroom environment; professional ethics and legal expectations. Repeatable twice for a maximum of 9 credits.

MUE 532. Music in School and Society. 3 Credits.

Elementary and secondary school music programs, past and present, and their relationships to the communities they serve.

MUE 538. Curricular Strategies in Music Education. 3 Credits.

Procedures for developing music courses for today's schools; determination of goals, content, instructional materials, and evaluative criteria; exploration of significant curriculum development projects in music education.

MUE 542. Teaching Singing in the Classroom. 3 Credits.

Methods for teaching group vocal technique in the classroom with emphasis on elementary, mid-level, and emerging adult voices. Concentration on development of the adolescent changing voice. Prereq: admission to music education; coreq: MUE 386.

MUE 550. Practicum in Music Education. 2 Credits.

MUE 450/550 provides scope, structure, supervision, and guidance to support Music Education students during two terms of Music Education practica in accordance with the Oregon Teacher Standards.

MUE 555. Marching Band Methods. 3 Credits.

Teaching methods for secondary school marching bands.

MUE 556. String Methods. 3 Credits.

Teaching methods for the beginning string class in elementary and middle schools. Development of technique sequences for string groups in secondary schools.

MUE 559. Fundamentals of Violin and Viola Teaching. 2 Credits.

Development of technique for instruction of beginning violin students, including philosophy, practice habits for young students, parent education, and pedagogical skills.

MUE 560. Early-Intermediate Violin Repertoire and Technique. 2 Credits.

This course provides an overview of early and intermediate repertoire, focusing specifically on sequentially-organized pieces that teachers can use to logically build violin technique.

Prereq: MUE 559.

MUE 563. Pedagogy Methods: Violin and Viola. 2 Credits.

Principles and techniques of violin and viola teaching selected from the pedagogical approaches of Flesch, Galamian, Dounis, Rolland.

MUE 564. Advanced Violin/Viola Pedagogy. 2 Credits.

This course will examine the major violin pedagogy schools with their pertinent somatic counterparts. Teaching practicums will be included.

MUE 565. Somatics for String Players. 1 Credit.

This course will examine somatic (body awareness) in string playing. Human anatomy, performance anxiety, proper breathing, and playing alignment will be addressed. Teaching practicums will be included.

MUE 566. Community Music Institute Practicum. 1 Credit.

This course serves as a repeatable teaching lab with students enrolled in the University of Oregon's Community Music Institute. Initial term includes observation of master teachers. Subsequent terms include guided teaching assignments commensurate with the university student's level of experience and expertise.

Prereq: MUE 559.

MUE 571. Piano Pedagogy I: Teaching Beginners. 3 Credits.

In-depth study of beginning methods and materials for children and adults. Individual teaching experience. Offered alternate years.

MUE 572. Piano Pedagogy II: Teaching Groups. 2 Credits.

Methods and materials for group instruction of all ages and levels. Survey of learning theories and new technologies. Individual and group teaching experience. Offered alternate years.

Prereq: MUE 471/MUE 571; coreq MUE 609

MUE 573. Piano Pedagogy III: Teaching Intermediate Levels. 2 Credits.

Study of repertoire, technique, and teaching methods appropriate for intermediate-level piano students. Individual and master-class teaching experience. Offered alternate years.

Prereq: MUE 472/MUE 572; coreq: MUE 609.

MUE 591. Advanced Pedagogy. 3 Credits.

Sections in piano and other topics. Repeatable twice in different topics for maximum of 9 credits.

MUE 601. Research: [Topic]. 1-16 Credits.

Repeatable.

MUE 602. Supervised College Teaching. 1-5 Credits.

Repeatable.

MUE 603. Dissertation. 1-16 Credits.

Repeatable.

MUE 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable. Individual study of topics beyond regularly scheduled courses.

Prereq: completion of all regularly scheduled courses related to the topic or equivalent.

MUE 606. Practicum: [Topic]. 1-16 Credits.

Repeatable.

MUE 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

MUE 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

MUE 609. Terminal Project. 1-12 Credits.

Repeatable. Professionally related experience, on campus or elsewhere, supervised by a qualified expert both in planning and in carrying out the project.

Prereq: knowledge and competence in the substance of the activity and in curricular planning.

MUE 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

MUE 612. Quantitative Research in Music Education. 3 Credits.

A focus on quantitative methodology and research in music education, including an introduction to descriptive and inferential statistics. Terminology, methods, and concepts relating to peer-reviewed research will be explored. Students will also have the opportunity to carry out a study using quantitative methods.

MUE 615. Jazz Practicum. 1 Credit.

Students will complete observations of experienced teachers in academic, ensemble, and studio settings, and will receive qualitative feedback from cooperating teachers through short, supervised teaching demonstrations.

MUE 639. Pedagogy and Practicum: [Topic]. 3 Credits.

Teaching strategies and practical application. Topics include composition, conducting, ethnomusicology, jazz studies, music education, music history, music technology, music theory, performance practice, instrumental conducting, voice, keyboard, strings, woodwinds, brass, and percussion. Repeatable twice when topic changes for maximum of 9 credits.

MUE 641. College Music Teaching. 3 Credits.

Developing knowledge, skills, and attitudes useful for teaching music; current principles of educational psychology at the college level, instructional techniques, tests and measurements.

MUE 647. Psychology of Music. 3 Credits.

Study of psychological, physiological, and neurological aspects of musical behavior and experience, including acoustics, human hearing, perception and cognition, development and expertise, affective response and preference, unusual abilities.

MUE 649. History of Western Music Education. 3 Credits.

A comprehensive overview of philosophical and historical foundations in music education from antiquity to the present day. It involves not only the study of music education from these perspectives, but general education and policy as well.

Prereq: Graduate Standing

Music Performance Courses

MUP 114. Fundamentals of Music Performance Studies I: [Topic]. 2 Credits.

Beginning-level group instruction for students with little or no previous applied music studies. Repeatable eleven times for a maximum of 24 credits.

MUP 115. Fundamentals of Music Performance Studies II: [Topic]. 2 Credits.

Intermediate-level group instruction for students with only a basic applied music studies background. Repeatable 11 times for a maximum of 24 credits.

MUP 163. Functional Piano. 2 Credits.

Group instruction in functional keyboard skills. Repeatable twice for maximum of 6 credits.

Prereq: MUS 138.

MUP 165. Music Performance Studies: [Topic]. 2 Credits.

Half-hour lessons of studio instruction in music performance. Repeatable 17 times for maximum of 36 credits.

Prereq: Successful audition for studio instructor demonstrating proficiency.

MUP 199. Special Studies: [Topic]. 1-5 Credits.

Recent topics include Breathing Technique and Tuba-Euphonium Routine. Repeatable.

MUP 265. Music Performance Studies: [Topic]. 2 Credits.

One-hour lessons of studio instruction in music performance. Required for BMME freshman and sophomore students. Repeatable eight times for a maximum of 18 credits.

Prereq: Successful audition for studio instructor to demonstrate proficiency.

MUP 270. Music Performance Studies: [Topic]. 4 Credits.

One-hour lessons of studio instruction in music performance. Required for BM-Perf. freshman and sophomore students. Repeatable eight times for a maximum of 36 credits.

Prereq: Successful audition for studio instructor to demonstrate proficiency.

MUP 365. Music Performance Studies. 2 Credits.

One-hour lessons of studio instruction in music performance. Required for BMME juniors and seniors. Repeatable eight times for a maximum of 18 credits.

Prereq: Audition for studio instructor to demonstrate proficiency.

MUP 465. Music Performance Studies: [Topic]. 4 Credits.

One-hour lessons of studio instruction in music performance focusing on degree recital and other significant performance preparation throughout the year. Required for BM-Performance juniors and seniors. Repeatable eight times for a maximum of 36 credits.

Prereq: Successful completion of end of sophomore year checkpoint level-up jury.

MUP 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

MUP 635. Music Performance Studies: [Topic]. 2 Credits.

Half-hour lessons of studio instruction in music performance. Intended for graduate-level non-performance, or secondary instrument master's students. Repeatable nine times for a maximum of 20 credits.

Prereq: Audition for studio instructor to demonstrate proficiency.

MUP 650. Music Performance Studies. 2 Credits.

Hour-long lessons of studio instruction in music performance. Open to Jazz Studies master's students. Repeatable nine times for a maximum of 20 credits.

Prereq: Audition for studio instructor to demonstrate proficiency.

MUP 665. Music Performance Studies. 4 Credits.

Hour-long lessons of studio instruction in music performance. Required for performance major master's students. Repeatable nine times for a maximum of 40 credits.

Prereq: Audition for studio instructor to demonstrate proficiency.

MUP 765. Music Performance Studies: [Topic]. 4 Credits.

Hour-long lessons of studio instruction in music performance. Required for DMA Performance students. Repeatable twelve times for a maximum of 52 credits.

Prereq: Audition for studio instructor to demonstrate proficiency.

Music: Jazz Studies Courses

MUJ 180. Jazz Performance Laboratory. 2 Credits.

Drills and practical application of scales, chords, harmonic progressions, rhythmic patterns, and approach-note groups for development of skills in small jazz ensembles.

MUJ 181. Jazz Performance Laboratory. 2 Credits.

Drills and practical application of scales, chords, harmonic progressions, rhythmic patterns, and approach-note groups for development of skills in small jazz ensembles.

Prereq: MUJ 180

MUJ 182. Jazz Performance Laboratory. 2 Credits.

Drills and practical application of scales, chords, harmonic progressions, rhythmic patterns, and approach-note groups for development of skills in small jazz ensembles.

Prereq: MUJ 181

MUJ 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

MUJ 270. Jazz Theory. 2 Credits.

Introduction to jazz harmony: chord symbols, chord voicing practices, analysis, reharmonization practices, scale choices for improvisation, creation of bass lines.

MUJ 271. Functional Jazz Piano I. 2 Credits.

Performance of one- and two-handed comping style including common voice-leading practices, scales, and harmonic formulas. Reading from chord symbols and lead sheets. Sequence.

Prereq: MUJ 270.

MUJ 272. Functional Jazz Piano II. 2 Credits.

Performance of one- and two-handed comping style including common voice-leading practices, scales, and harmonic formulas. Reading from chord symbols and lead sheets. Sequence.

Prereq: MUJ 271.

MUJ 273. Jazz Improvisation I. 2 Credits.

Task-oriented performance of selected standard jazz repertoire. Chord and scale study, solo transcription, analysis, pattern practice, simple compositional forms.

Prereq: MUJ 270.

MUJ 274. Jazz Improvisation II. 2 Credits.

Task-oriented performance of selected standard jazz repertoire. Chord alteration, chord substitution, reharmonization and chromaticism.

Prereq: MUJ 273.

MUJ 275. Jazz Composition 1. 2 Credits.

Examination and application of contemporary compositional techniques utilized in jazz and commercial music idioms through the study of blues and simple song forms.

Prereq: MUJ 180, MUJ 181, MUJ 182.

MUJ 276. Jazz Composition II. 2 Credits.

The examination and application of contemporary compositional techniques utilized in jazz and commercial music idioms through the study and composition of simple song forms.

Prereq: MUJ 180, MUJ 181, MUJ 182.

MUJ 350. History of Jazz, 1900–1950. 4 Credits.

History, biography, multiculturalism, and racism in early jazz and swing through modern jazz. Includes Louis Armstrong, Duke Ellington, Charlie Parker, Dizzy Gillespie, Miles Davis.

MUJ 351. History of Jazz, 1940 to Present. 4 Credits.

History, biography, multiculturalism, and racism in modern jazz and free jazz to present. Includes Charlie Parker, Dizzy Gillespie, Miles Davis, John Coltrane, Ornette Coleman.

MUJ 390. Jazz Laboratory Band III. 1 Credit.

Large ensembles performing repertoire associated with the jazz idiom. Performances on campus, in the community, and at jazz festivals. Repeatable six times for a maximum of 7 credits. Ensemble fee.

MUJ 391. Jazz Laboratory Band II. 1 Credit.

Large ensembles performing repertoire associated with the jazz idiom. Performances on campus, in the community, and at jazz festivals. Repeatable six times for a maximum of 7 credits. Ensemble fee.

MUJ 392. Oregon Jazz Ensemble. 1-2 Credits.

Large ensembles performing repertoire associated with the jazz idiom. Performances on campus, in the community, and at jazz festivals. Ensemble fee. Repeatable up to six times.

Prereq: audition.

MUJ 395. Small Jazz Ensemble: [Topic]. 1-2 Credits.

Improvisation group. Study current and past small-group jazz performances. Repeatable eleven times for a maximum of 24 credits. Ensemble fee.

Prereq: audition.

MUJ 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

MUJ 405. Reading and Conference: [Topic]. 1-4 Credits.

Repeatable.

MUJ 407. Seminar: [Topic]. 1-5 Credits.

Repeatable.

MUJ 408. Workshop: [Topic]. 1-21 Credits.

Repeatable.

MUJ 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

MUJ 440. Jazz Pedagogy Practicum. 3 Credits.

Study of jazz pedagogy through discussion, observation, reading, listening, and practice. Topics include curriculum, rhythm section fundamentals, ensemble rehearsal strategies, and improvisation methods.

Prereq: MUJ 182 or MUJ 270.

MUJ 474. Jazz Repertoire I. 3 Credits.

Development of professional performance skills in improvisation through the study of traditional jazz repertoire. Sequence.

Prereq: MUJ 274.

MUJ 475. Jazz Repertoire II. 3 Credits.

Development of professional performance skills in improvisation through the study of traditional jazz repertoire. Sequence.

Prereq: MUJ 474.

MUJ 476. Jazz Repertoire III. 3 Credits.

Development of professional performance skills in improvisation through the study of traditional jazz repertoire. Sequence.

Prereq: MUJ 475.

MUJ 477. Advanced Jazz Repertoire I. 3 Credits.

Development of professional performance skills in improvisation through study of traditional and contemporary jazz repertoire. Sequence.

Prereq: MUJ 476.

MUJ 478. Advanced Jazz Repertoire II. 3 Credits.

Development of professional performance skills in improvisation through study of traditional and contemporary jazz repertoire. Sequence.

Prereq: MUJ 477.

MUJ 479. Advanced Jazz Repertoire III. 3 Credits.

Development of professional performance skills in improvisation through study of traditional and contemporary jazz repertoire. Sequence.

Prereq: MUJ 478.

MUJ 480. Jazz Arranging I. 3 Credits.

Study of use of common arranging skills: reharmonization, instrumentation, block harmonization, tutti scoring techniques, five-part density. Sequence.

Prereq: MUJ 272.

MUJ 481. Jazz Arranging II. 3 Credits.

Study of use of common arranging skills: reharmonization, instrumentation, block harmonization, tutti scoring techniques, five-part density. Sequence.

Prereq: MUJ 480.

MUJ 482. Jazz Arranging III. 3 Credits.

Study of use of common arranging skills: reharmonization, instrumentation, block harmonization, tutti scoring techniques, five-part density. Sequence.

Prereq: MUJ 481.

MUJ 483. Advanced Jazz Arranging I. 3 Credits.

Composition, arranging, and performance of works for large and chamber jazz ensembles. Preparation of works for senior degree recitals. Sequence.

Prereq: MUJ 482.

MUJ 484. Advanced Jazz Arranging II. 3 Credits.

Composition, arranging, and performance of works for large and chamber jazz ensembles. Preparation of works for senior degree recitals. Sequence.

Prereq: MUJ 483.

MUJ 485. Advanced Jazz Arranging III. 3 Credits.

Composition, arranging, and performance of works for large and chamber jazz ensembles. Preparation of works for senior degree recitals. Sequence.

Prereq: MUJ 484.

MUJ 503. Thesis. 1-16 Credits.

Repeatable.

MUJ 507. Seminar: [Topic]. 1-5 Credits.

Repeatable.

MUJ 508. Workshop: [Topic]. 1-21 Credits.

Repeatable.

MUJ 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

MUJ 540. Jazz Pedagogy Practicum. 3 Credits.

Study of jazz pedagogy through discussion, observation, reading, listening, and practice. Topics include curriculum, rhythm section fundamentals, ensemble rehearsal strategies, and improvisation methods.

Prereq: For graduates: Admission to MM Jazz Studies Degree or to Graduate Specialization in Jazz Pedagogy - or - Instructor's Permission.

MUJ 574. Jazz Repertoire I. 3 Credits.

Development of professional performance skills in improvisation through the study of traditional jazz repertoire. Sequence.

MUJ 575. Jazz Repertoire II. 3 Credits.

Development of professional performance skills in improvisation through the study of traditional jazz repertoire. Sequence.

Prereq: MUJ 474/MUJ 574.

MUJ 576. Jazz Repertoire III. 3 Credits.

Development of professional performance skills in improvisation through the study of traditional jazz repertoire. Sequence.

Prereq: MUJ 475/MUJ 575.

MUJ 577. Advanced Jazz Repertoire I. 3 Credits.

Development of professional performance skills in improvisation through study of traditional and contemporary jazz repertoire. Sequence.

Prereq: MUJ 476/MUJ 576.

MUJ 578. Advanced Jazz Repertoire II. 3 Credits.

Development of professional performance skills in improvisation through study of traditional and contemporary jazz repertoire. Sequence.

Prereq: MUJ 477/MUJ 577.

MUJ 579. Advanced Jazz Repertoire III. 3 Credits.

Development of professional performance skills in improvisation through study of traditional and contemporary jazz repertoire. Sequence.

Prereq: MUJ 478/MUJ 578.

MUJ 580. Jazz Arranging I. 3 Credits.

Study of use of common arranging skills: reharmonization, instrumentation, block harmonization, tutti scoring techniques, five-part density. Sequence.

MUJ 581. Jazz Arranging II. 3 Credits.

Study of use of common arranging skills: reharmonization, instrumentation, block harmonization, tutti scoring techniques, five-part density. Sequence.

Prereq: MUJ 480/MUJ 580.

MUJ 582. Jazz Arranging III. 3 Credits.

Study of use of common arranging skills: reharmonization, instrumentation, block harmonization, tutti scoring techniques, five-part density. Sequence.

Prereq: MUJ 481/MUJ 581.

MUJ 583. Advanced Jazz Arranging I. 3 Credits.

Composition, arranging, and performance of works for large and chamber jazz ensembles. Preparation of works for graduate degree recitals. Sequence.

Prereq: MUJ 482/MUJ 582.

MUJ 584. Advanced Jazz Arranging II. 3 Credits.

Composition, arranging, and performance of works for large and chamber jazz ensembles. Preparation of works for graduate degree recitals. Sequence.

Prereq: MUJ 483/MUJ 583.

MUJ 585. Advanced Jazz Arranging III. 3 Credits.

Composition, arranging, and performance of works for large and chamber jazz ensembles. Preparation of works for graduate degree recitals. Sequence.

Prereq: MUJ 484/MUJ 584.

MUJ 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

MUJ 660. Survey of Jazz Composition. 3 Credits.

Overview of important developments and historically significant figures in jazz composition and arranging. Analysis of their music and stylistic traits.

MUJ 661. Jazz Program Planning and Development. 3 Credits.

Designing and nurturing a successful jazz program. Jazz curriculum, grant writing, budgets, resources, organizing student support, setting and reaching program goals.

MUJ 690. Jazz Laboratory Band III. 1 Credit.

Large ensembles performing repertoire associated with the jazz idiom. Performances on campus, in the community, and at jazz festivals. Repeatable six times for a maximum of 7 credits. Ensemble fee.

MUJ 691. Jazz Laboratory Band II. 1 Credit.

Large ensembles performing repertoire associated with the jazz idiom. Performances on campus, in the community, and at jazz festivals. Repeatable six times for a maximum of 7 credits. Ensemble fee.

MUJ 692. Oregon Jazz Ensemble. 1-2 Credits.

Large ensembles performing repertoire associated with the jazz idiom. Performances on campus, in the community, and at jazz festivals. Ensemble fee. Repeatable up to six times.

MUJ 695. Small Jazz Ensemble: [Topic]. 1-2 Credits.

Improvisation group. Study current and past small-group jazz performances. Repeatable six times for a maximum of 14 credits. Ensemble fee.

Music Courses

MUS 125. Understanding Music. 4 Credits.

Presents the basic elements of music, historical style periods of Western art music, development of jazz and popular music.

MUS 126. Music Theory Fundamentals. 3 Credits.

Introduction to musical notation and basic musical elements, such as staves, clefs, rhythmic values, scales, and chords. Requires no musical background.

MUS 131. Music Theory I. 2 Credits.

Elementary study of musical structure, emphasizing the acquisition of descriptive, notational, compositional, and analytical capacity. Sequence. Prereq: MUS 134 is prereq or co-req.

MUS 132. Music Theory II. 2 Credits.

Elementary study of musical structure, emphasizing the acquisition of descriptive, notational, compositional, and analytical capacity. Sequence. Prereq: MUS 131, MUS 134, MUS 137, or satisfactory placement test score.

MUS 133. Music Theory III. 2 Credits.

Elementary study of musical structure, emphasizing the acquisition of descriptive, notational, compositional, and analytical capacity. Sequence. Prereq: MUS 132, MUS 135, MUS 138, or satisfactory placement test score.

MUS 134. Aural Skills I. 2 Credits.

Elementary ear training through sight singing, dictation, and related activities. Sequence with MUS 135, MUS 136, MUS 234, MUS 235. Prereq: MUS 131 is prereq or co-req.

MUS 135. Aural Skills II. 2 Credits.

Elementary ear training through sight singing, dictation, and related activities. Sequence. Prereq: MUS 131, MUS 134, MUS 137 or satisfactory placement test score.

MUS 136. Aural Skills III. 2 Credits.

Elementary ear training through sight singing, dictation, and related activities. Sequence. Prereq: MUS 132, MUS 135, MUS 138 or satisfactory placement test score.

MUS 137. Keyboard Skills I. 1 Credit.

Performance of rhythmic patterns, scales, intervals, and chord progressions. Harmonization, transposition, improvisation, and figured bass on the keyboard. Sequence. Keyboard lab fee. Coreq MUS 131, MUS 134.

MUS 138. Keyboard Skills II. 1 Credit.

Performance of rhythmic patterns, scales, intervals, and chord progressions. Harmonization, transposition, improvisation, and figured bass on the keyboard. Sequence. Keyboard lab fee. Prereq: MUS 131, MUS 134, MUS 137 or satisfactory placement test score.

MUS 139. Keyboard Skills III. 1 Credit.

Performance of rhythmic patterns, scales, intervals, and chord progressions. Harmonization, transposition, improvisation, and figured bass on the keyboard. Sequence. Keyboard lab fee. Prereq: MUS 132, MUS 135, MUS 138 or satisfactory placement test score.

MUS 141. Popular Piano and Musicianship I. 4 Credits.

Understanding general musicianship—what it is and how it relates to genre and culture—in popular music. Sequence with MUS 142, MUS 143.

MUS 142. Popular Piano and Musicianship II. 4 Credits.

Continuing study of musicianship—integrated music theory, ear training, and piano—through piano instruction in popular music styles. Sequence with MUS 141, MUS 143. Prereq: MUS 141.

MUS 143. Popular Piano and Musicianship III. 4 Credits.

Continuing study of musicianship—integrated music theory, ear training, and piano—through piano instruction in popular music styles. Sequence with MUS 141, MUS 142. Prereq: MUS 142.

MUS 151. Popular Songwriting. 4 Credits.

Composing and producing songs using software applications and studying historical examples to understand how musical techniques reflect societal trends and express ideas. Music background optional. Laboratory fee.

MUS 155. Introduction to Lyric Diction. 2 Credits.

Introduction to pronunciation of standard languages for students pursuing careers related to singing. The International Phonetic Alphabet is applied to the texts of simple repertoire. English, Italian, Spanish.

MUS 156. Introduction to Lyric Diction. 2 Credits.

Introduction to pronunciation of standard languages for students pursuing careers related to singing. The International Phonetic Alphabet is applied to the texts of simple repertoire. German, French. Prereq: MUS 155.

MUS 198. Workshop: [Topic]. 1-2 Credits.

Repeatable.

MUS 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

MUS 227. Elements of Electronic Music. 4 Credits.

Introduction to experimental and popular electronic music. Topics include fundamental elements of musical construction, history, technology, composers, musicians, copyright law, sampling, styles, and aesthetics.

MUS 231. Music Theory IV. 2 Credits.

Study of musical structure, emphasizing the acquisition of descriptive, notational, compositional, and analytical capacity. Sequence. Prereq: MUS 133, MUS 136, MUS 139 or satisfactory placement test score.

MUS 232. Music Theory V. 2 Credits.

Study of musical structure, emphasizing the acquisition of descriptive, notational, compositional, and analytical capacity. Sequence. Prereq: MUS 231 or satisfactory placement test score.

MUS 233. Music Theory VI. 2 Credits.

Study of musical structure, emphasizing the acquisition of descriptive, notational, compositional, and analytical capacity. Sequence. Prereq: MUS 232 or satisfactory placement test score.

MUS 234. Aural Skills IV. 2 Credits.

Ear training through sight singing, dictation, and related activities. Sequence. Prereq: MUS 133, MUS 136, MUS 139 or satisfactory placement test score.

MUS 235. Aural Skills V. 2 Credits.

Ear training through sight singing, dictation, and related activities. Sequence. Prereq: MUS 234 or satisfactory placement test score.

MUS 240. Composition I. 3 Credits.

Introduction to musical composition. Problems of notation, scoring for instruments, basic concepts of form; contemporary techniques; emphasis on student's own beginning creative work. Sequence.
Prereq: MUS 133, MUS 136, MUS 139 or equivalent.

MUS 241. Composition I. 3 Credits.

Introduction to musical composition. Problems of notation, scoring for instruments, basic concepts of form; contemporary techniques; emphasis on student's own beginning creative work. Sequence.
Prereq: MUS 240.

MUS 242. Composition I. 3 Credits.

Introduction to musical composition. Problems of notation, scoring for instruments, basic concepts of form; contemporary techniques; emphasis on student's own beginning creative work. Sequence.
Prereq: MUS 241.

MUS 249. Popular Music Analysis. 3 Credits.

Analysis of popular songs in diverse styles, focusing on form, harmony, timbre, rhythm, and lyrics.
Prereq: MUS 131, MUS 134, MUS 151.

MUS 250. Popular Musics in Global Context. 4 Credits.

Surveys the global popular music landscape of the 20th and 21st centuries, with an emphasis on identity and cultural mixture.

MUS 263. US Popular Music 1800 to 1930. 4 Credits.

This class examines the origins and development of popular music in the USA from its roots in the 19th century through the 1920s.

MUS 264. US Popular Music 1930 to 1965. 4 Credits.

This class examines the development of popular music in the USA from 1930 to 1965, including swing, blues, and the rise of rock 'n' roll.

MUS 265. US Popular Music 1965 to 2000. 4 Credits.

This class examines the development of popular music in the USA from 1965-2000 by contrasting mainstream rock with various "alternative" genres.

MUS 267. Survey of Music History. 4 Credits.

Study of the history and evolution of music, principally Western art music, from the early Middle Ages to the present.
Prereq: WR 121.

MUS 268. Survey of Music History. 4 Credits.

Study of the history and evolution of music, principally Western art music, from the early Middle Ages to the present.
Prereq: WR 121.

MUS 269. Survey of Music History. 4 Credits.

Study of the history and evolution of music, principally Western art music, from the early Middle Ages to the present.
Prereq: WR 121.

MUS 270. History of the Blues. 4 Credits.

Traces blues music from its African and African American roots through its 20th-century history and its influence on the values of jazz, rhythm and blues, and country music.

MUS 281. Music of the Woodstock Generation. 4 Credits.

Examines the relationship between popular music and social upheavals in the United States during the 1960s.

MUS 322. Music Fundamentals. 3 Credits.

Music notation and terminology; learning musical rudiments through singing simple songs; introduction to simple melodic, rhythmic, and harmonic instruments. Laboratory fee. Educational foundations majors only.

MUS 327. Analysis: [Topic]. 3 Credits.

Techniques of analysis in various types of music. Repeatable up to five times with change of topic.
Prereq: MUS 233.

MUS 340. Composition II. 3 Credits.

Composition and public performance of small works for piano, voice, and small ensembles.
Prereq: MUS 242 or equivalent.

MUS 341. Composition II. 3 Credits.

Composition and public performance of small works for piano, voice, and small ensembles.
Prereq: MUS 340.

MUS 342. Composition II. 3 Credits.

Composition and public performance of small works for piano, voice, and small ensembles.
Prereq: MUS 341.

MUS 346. Music, Money, and the Law. 4 Credits.

Explores theory and history of relationship between money and music, and corresponding laws that govern and shape that relationship. Topics include copyright, contract rights, media distribution technology, marketing, unions.

MUS 349. American Ethnic and Protest Music. 3 Credits.

Social change and ethnicity reflected by music of and about Native Americans, African Americans, and women as well as songs of protest and Spanish-speaking groups.

MUS 351. The Music of Bach and Handel. 4 Credits.

Compositions by Bach and Handel such as organ chorales, cantatas, oratorios, operas, and masses; cultural context in Germany, France, Italy, and England for the development of their styles.

MUS 358. Music in World Cultures. 4 Credits.

Explores the music of three world regions in their sociocultural context. Emphasis on listening skills, relationships between music and culture, aesthetics, styles, genres, music structures and forms, and participatory music making.

MUS 359. Music of the Americas. 4 Credits.

African American, Latin American, and Native American music in sociocultural context. Includes listening skills, music-culture relationship, aesthetics, styles, genres, music structures and forms, and participatory music making.

MUS 360. Hip-Hop Music: History, Culture, Aesthetics. 4 Credits.

Examines the history and evolution of hip-hop and rap music in the late 20th and early 21st centuries.

MUS 363. The Beatles and Their Times. 4 Credits.

Presents and examines the music of the Beatles in the context of post-World War II English and United States cultures and 1960s Western youth cultures.

MUS 365. Regional Ethnomusicology: [Topic]. 4 Credits.

Students analyze the music and dance of a specified geographic region in relation to its culture. Covers local performance and genres, social constructions. Repeatable twice for a maximum of 12 credits when geographic region changes.

MUS 367. Survey of African Music. 4 Credits.

Students analyze musical expression—including traditional, neotraditional, and contemporary mass mediated popular music (Afropop)—in Africa and the diaspora.

MUS 380. Film Music. 4 Credits.

Film is one of the most culturally significant art forms of the 20th–21st centuries, and music has always played a crucial role in its production and experience. This class introduces students to the history and analysis of film music from silent cinema to the present.

MUS 382. American Musical Theater. 4 Credits.

Students analyze selected American musicals in relation to social conditions and events at different junctures in the 19th, 20th, and 21st centuries. Offered alternate years.

MUS 384. Introduction to Conducting. 2 Credits.

Introduction to conducting with emphasis on the art and study of conducting, baton and left-hand technique, nonverbal communication, leadership, terminology, transpositions, and score reading.

Prereq: MUS 233, MUS 236, MUS 239.

MUS 391. Collegium Musicum. 1-3 Credits.

Study of music repertoire of the medieval, Renaissance, and baroque periods through rehearsals and extensive sight-reading; vocal and instrumental repertoire. Ensemble fee. Repeatable up to 6 times.

Prereq: audition.

MUS 393. Oregon Electronic Device Orchestra. 2 Credits.

Performance ensemble that uses data-driven musical instruments in combination with software and hardware to perform music and intermedia compositions. Repeatable eleven times for a maximum of 24 credits.

Prereq: MUS 447 or MUS 448.

MUS 394. Chamber Ensemble: [Topic]. 1-2 Credits.

Participation in a chamber music ensemble. Accompanying, Brass, Chamber Ensemble, Hip-Hop Ensemble, Jazz Guitar Ensemble, Oregon Percussion Ensemble, String Chamber Ensemble, Studio Guitar Ensemble, Trombone Ensemble, Tuba and Euphonium Ensemble, Woodwind Chamber Ensemble. Repeatable 11 times for a maximum of 24 credits.

Prereq: Audition for certain of the chamber ensembles listed above, per instructor. No audition for Brass Chamber Ensemble, String Chamber Ensemble, or Woodwind Chamber Ensemble.

MUS 395. Band: [Topic]. 1-2 Credits.

Participation in a band. Repeatable. Green Garter Band, Oregon Basketball Band, Oregon Marching Band, Oregon Wind Ensemble, UO Campus Band, Oregon Wind Symphony, Yellow Garter Band. Ensemble fee for Oregon Wind Ensemble, Oregon Wind Symphony, UO Campus Band.

Prereq: audition (except UO Campus Band and Oregon Marching Band).

MUS 396. Orchestra: [Topic]. 1-2 Credits.

Participation in an orchestra. University Symphony Orchestra, Campus Orchestra. Ensemble fee. Repeatable 11 times for a maximum of 24 credits.

Prereq: audition (except Campus Orchestra).

MUS 397. Chorus: [Topic]. 2 Credits.

Participation in a choral ensemble. Chamber Choir, Concert Choir, Gospel Singers, Repertoire Singers, University Gospel Choir, University Gospel Ensemble, University Singers, Women's Choir. Ensemble fee. Repeatable.

Prereq: audition or voice screening (except Concert Choir and Gospel Choir).

MUS 398. Opera Workshop. 2 Credits.

Traditional and contemporary repertory for musical theater through analysis, rehearsal, and performance of complete and excerpted works; training in stage movement, diction, and rehearsal techniques. Repeatable up to 6 times.

Prereq: audition.

MUS 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

MUS 401. Research: [Topic]. 1-21 Credits.

Repeatable.

MUS 402. Supervised Tutoring. 1-12 Credits.

Repeatable.

MUS 403. Thesis. 1-12 Credits.

Repeatable.

MUS 405. Reading and Conference: [Topic]. 1-4 Credits.

Repeatable. Individual study of topics agreed upon by the student and faculty adviser.

Prereq: completion of all regularly scheduled courses related to the topic or equivalent.

MUS 407. Seminar: [Topic]. 1-5 Credits.

Repeatable. Various topics at an advanced level, offered periodically according to student and faculty interest and availability.

MUS 408. Workshop: [Topic]. 1-21 Credits.

Repeatable.

MUS 409. Terminal Project. 1-12 Credits.

Repeatable.

MUS 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable. Recent courses include Meditation for Performers and Andean Music Ensemble.

MUS 416. Post-Tonal Theory I. 3 Credits.

Introduction to theory and analysis of post-tonal music. Concepts of pitch-class set analysis and practical applications. Sequence. Offered alternate years.

Prereq: MUS 327.

MUS 417. Post-Tonal Theory II. 3 Credits.

Introduction to theory and analysis of post-tonal music. Concepts of pitch-class set analysis and practical applications. Sequence. Offered alternate years.

Prereq: MUS 416.

MUS 421. The Collaborative Pianist. 2 Credits.

Comprehensive study of techniques and literature for artistic ensemble performance by pianists. Includes chamber music, art song, opera arias, accompaniment, sight-reading, and orchestral reduction skills. Sequence. Repeatable once each for maximum of 4 credits per course.

Prereq: MUP 271 or above.

MUS 422. The Collaborative Pianist. 2 Credits.

Comprehensive study of techniques and literature for artistic ensemble performance by pianists. Includes chamber music, art song, opera arias, accompaniment, sight-reading, and orchestral reduction skills. Sequence. Repeatable once each for maximum of 4 credits per course.

Prereq: MUS 421.

MUS 423. The Collaborative Pianist. 2 Credits.

Comprehensive study of techniques and literature for artistic ensemble performance by pianists. Includes chamber music, art song, opera arias, accompaniment, sight-reading, and orchestral reduction skills. Sequence. Repeatable once each for maximum of 4 credits per course.
Prereq: MUS 422.

MUS 428. Cultures of Musical Celebrity. 3 Credits.

Examines the cultural phenomenon of celebrity among musicians, composers, and audiences from antiquity to the present. Topics include cults, crowds, branding, shrines, and charisma.
Prereq: WR 122 or WR 123.

MUS 430. Tonal Analysis: Linear Prolongational Analysis. 3 Credits.

Introduction to techniques of linear/prolongational analysis; exploration of connections between contrapuntal structures and small musical forms.
Prereq: MUS 327.

MUS 431. Tonal Analysis: Form in Tonal Music. 3 Credits.

Exploration of the analysis of form in music from the Baroque, Classical, and Romantic eras; covers Sonata Theory, form-functional theory, processual approaches to form, and the relationship between formal types and linear structures.
Prereq: MUS 327.

MUS 432. Tonal Analysis: Analysis of Popular Music. 3 Credits.

Exploration of the analysis of popular music, with repertoire from the 1960s to the present; discussion of methodologies adapted from traditional music theory, including form, harmony, meter, and rhythm, as well as more repertoire-specific topics, such as timbre, texture, and lyrics.
Prereq: MUS 327.

MUS 433. Counterpoint. 4 Credits.

Study of modal and tonal counterpoint through analysis and composition: 16th-century sacred polyphony.
Prereq: MUS 233, MUS 236.

MUS 434. Counterpoint. 4 Credits.

Study of modal and tonal counterpoint through analysis and composition: baroque imitative counterpoint.
Prereq: MUS 433.

MUS 435. Counterpoint. 4 Credits.

Study of modal and tonal counterpoint through analysis and composition: varies—typically devoted to more advanced fugal writing, 20th-century counterpoint, or other modal composition.
Prereq: MUS 434.

MUS 436. World Music Ensemble: [Topic]. 2 Credits.

Students engage the embodied practices and sociocultural contexts of diverse music-dance practices associated with the world music categories specified in the topic. Repeatable once for a maximum of 4 credits.

MUS 437. Documentary Field Recording. 3 Credits.

Field Recording centers around the documentation and discovery of sound sources and their cultural relevance. This can take many forms, but all forms have a common thread: creating a narrative. Use of digital media and recording will contribute soundscapes to enhance the narrative we choose.

MUS 438. Composers Forum. 1 Credit.

Formulation of a two- or three-concert series of student compositions; sessions with visiting composers and UO performers and listening projects related to these residencies. Repeatable eleven times for a maximum of 12 credits.

MUS 439. Scoring for Voices and Instruments. 3 Credits.

Techniques of arranging and scoring for various types of choral and instrumental groups.
Prereq: MUS 233, MUS 236, MUS 239.

MUS 440. Composition III. 3 Credits.

Composition and public performance of works including large or chamber ensembles. Preparation of works for senior recital. Repeatable twice for a maximum of 9 credits.
Prereq: MUS 342.

MUS 441. Composition III. 3 Credits.

Composition and public performance of works including large or chamber ensembles. Preparation of works for senior recital. Repeatable once for a maximum of 6 credits.
Prereq: MUS 440.

MUS 442. Composition III. 3 Credits.

Composition and public performance of works including large or chamber ensembles. Preparation of works for senior recital. Repeatable once for a maximum of 6 credits.
Prereq: MUS 441.

MUS 445. Electronic Composition. 3 Credits.

Develops an elementary understanding about how computers and software are used to process digital audio and create musical compositions. Laboratory fee. Repeatable twenty-four times for maximum of 75 credits.
Prereq: MUS 447, MUS 448, MUS 476.

MUS 446. Music Engraving. 2 Credits.

This skills-oriented course focuses on notation and learning how to professionally engrave music using computers and advanced music notation software.

MUS 447. Digital Audio and Sound Design. 4 Credits.

Examines concepts of digital audio representation, sampling, and processing; considers audio mixing, basic synthesis, and sound modification techniques and fundamentals of electroacoustic composition. Laboratory fee. Repeatable once for a maximum of 8 credits.

MUS 448. Interactive Media Performance. 3 Credits.

Examines concepts of interactive performance using MIDI, digital audio, and video processing, and considers issues related to designing performance algorithms in software. Laboratory fee. Repeatable once for a maximum of 6 credits.

MUS 450. Sensor Music. 3 Credits.

Repeatable. Examines the fundamental principles for microprocessors and sensor interface design within the context of musical performance, composition, and improvisation. Repeatable thrice for a maximum of 12 credits.
Prereq: MUS 448.

MUS 451. Introduction to Ethnomusicology. 4 Credits.

World musics studied in their social and cultural contexts. Compares the varied approaches, ideas, and methods of selected American and European researchers since 1980.

MUS 452. Musical Instruments of the World. 4 Credits.

Examines instruments of the world in their cultural contexts. Covers cross-cultural issues and focuses on particular geographic areas. Includes films, recordings, live demonstrations.

MUS 455. Lyric Diction. 3 Credits.

Analysis and International Phonetic Alphabet transcription of song and opera texts with emphasis on the singer's approach to performance. Offered alternate years.
Prereq: MUS 156.

MUS 456. Lyric Diction. 3 Credits.

Analysis and International Phonetic Alphabet transcription of song and opera texts with emphasis on the singer's approach to performance. Offered alternate years.
Prereq: MUS 156.

MUS 462. Popular Musics in the African Diaspora. 4 Credits.

Examines social and historical contexts of popular musics in the African diaspora from the 20th century forward. Geographic focus is North America, the Caribbean, and Africa.

MUS 463. Popular Music Studies. 4 Credits.

This seminar explores current research and foundational texts in the interdisciplinary field of popular music studies.
Prereq: Two from MUS 263, MUS 264, MUS 265.

MUS 467. Solo Vocal Music. 3 Credits.

Solo songs with accompaniment; the lute air and Purcell; 19th-century art songs in Germany and France; 20th-century British, American, and Continental song literature; development of bases for artistic performance and sound critical judgment through study of text, voice, and accompaniment. Offered alternate years.
Prereq: MUS 269 or equivalent.

MUS 468. Solo Vocal Music. 3 Credits.

Solo songs with accompaniment; the lute air and Purcell; 19th-century art songs in Germany and France; 20th-century British, American, and Continental song literature; development of bases for artistic performance and sound critical judgment through study of text, voice, and accompaniment. Offered alternate years.
Prereq: MUS 269 or equivalent.

MUS 470. History of Electroacoustic Music. 3 Credits.

Examines the development of aesthetic movements, styles, media, instruments, and performance practice related to electroacoustic music. Repeatable once with no conditions.
Prereq: Standing as a music technology major or meeting the prerequisites for history survey courses.

MUS 471. Musical Performance Networks. 3 Credits.

Examines various types of network architectures and data-processing and mapping strategies that can be applied to real-time musical outcomes. Repeatable three times for a maximum of 12 credits with no conditions.

MUS 475. History of Opera. 4 Credits.

Critical study of the musical and dramatic content of operas forming the standard international repertoire, from Mozart to the present.
Prereq: MUS 269 or equivalent.

MUS 476. Digital Audio Workstation Techniques I. 3 Credits.

Explores the sequencing, editing, and routing of MIDI and digital audio using a computer. Basic Mac skills recommended. Series with MUS 477 and MUS 478. Repeatable once for a maximum of 6 credits. Laboratory fee.

MUS 477. Digital Audio Workstation Techniques II. 3 Credits.

Explores the principles and techniques of audio mixing, sound design, and music production using a computer. Series with MUS 476 and MUS 478. Repeatable once for a maximum of 6 credits. Laboratory fee.
Prereq: MUS 476.

MUS 478. Digital Audio Workstation Techniques III. 3 Credits.

Explores advanced techniques of mixing, the principles of mastering, and digital distribution using a computer. Series with MUS 476 and MUS 477. Repeatable once for a maximum of 6 credits. Laboratory fee.
Prereq: MUS 476.

MUS 479. Data Sonification. 4 Credits.

Sonification uses non-speech sound to reveal new insights about data, insights that may be missed using visualizations and other graphic representations of data. The course explores developing audio applications for discovery and research and covers work in the fields of data sonification and auditory display.

MUS 480. Audio Recording Techniques I. 3 Credits.

Hardware and software techniques for use in a recording studio environment, including microphone usage, recording techniques, and digital production. Sequence with MUS 481, MUS 482. Laboratory fee.

MUS 481. Audio Recording Techniques II. 3 Credits.

Application of advanced recording techniques. Sequence with MUS 480, MUS 482. Laboratory fee.
Pre- or coreq: MUS 480.

MUS 482. Audio Recording Techniques III. 3 Credits.

Focuses on the production concepts and techniques necessary to produce a full-length, professional-quality compact disc. Sequence with MUS 480, MUS 481. Laboratory fee.
Prereq: MUS 481.

MUS 483. Audio Effects Theory and Design. 4 Credits.

Audio effects are common and useful tools used in the recording, mixing, and mastering of music and other sound, as well as in sound design. This course focuses on understanding, designing, and implementing audio effects, and using them for musical projects.

MUS 484. Choral Conducting and Literature. 3 Credits.

Choral conducting, gesture and communication, rehearsal technique, and choral literature appropriate for secondary school choral music programs (grades 6–12), community youth choirs, and collegiate ensembles. Repeatable once for maximum of 6 credits.
Prereq: MUP 140 or higher. Coreq: MUE 387, MUE 406 Fld Prac Public School.

MUS 486. Instrumental Conducting. 3 Credits.

Conducting techniques as applied to band and orchestral music with emphasis on various styles and periods of music; study of 20th-century rhythms and related conducting problems. Repeatable once for a maximum of 6 credits.
Prereq: major standing. Coreq: MUE 387.

MUS 487. Music and Emotion. 4 Credits.

Introduction to the psychological and philosophical study of music and the emotions, with emphasis on cognitive, evolutionary, behavioral, and socio-cultural perspectives.

MUS 488. Analog Recording Techniques. 3 Credits.

Analog Recording using reel to reel tape machines provides students with a unique experience in not only sonic quality, but also artistic and technical decision-making due to the mechanical limitations presented by the analog format.

MUS 490. Balinese Gamelan. 2 Credits.

Pacific Rim Gamelan ensemble. Performance of original compositions and traditional music for gamelan. Limited to twelve performers. Three public performances a year. Repeatable.

MUS 499. Senior Project. 3 Credits.

Projects in music history, analysis, theory, composition, performance, or related disciplines designed by the student in consultation with the instructor. Repeatable twice for maximum of 9 credits.

MUS 503. Thesis. 1-16 Credits.

Repeatable.

MUS 507. Seminar: [Topic]. 1-5 Credits.

Repeatable. Various topics at an advanced level, offered periodically according to student and faculty interest and availability.

MUS 508. Workshop: [Topic]. 1-21 Credits.

Repeatable.

MUS 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

MUS 516. Post-Tonal Theory I. 3 Credits.

Introduction to theory and analysis of post-tonal music. Concepts of pitch-class set analysis and practical applications. Sequence. Offered alternate years.

MUS 517. Post-Tonal Theory II. 3 Credits.

Introduction to theory and analysis of post-tonal music. Concepts of pitch-class set analysis and practical applications. Sequence. Offered alternate years.

Prereq: MUS 416/MUS 516.

MUS 521. The Collaborative Pianist. 2 Credits.

Comprehensive study of techniques and literature for artistic ensemble performance by pianists. Includes chamber music, art song, opera arias, accompaniment, sight-reading, and orchestral reduction skills. Sequence. Repeatable once each for maximum of 4 credits per course.

MUS 522. The Collaborative Pianist. 2 Credits.

Comprehensive study of techniques and literature for artistic ensemble performance by pianists. Includes chamber music, art song, opera arias, accompaniment, sight-reading, and orchestral reduction skills. Sequence. Repeatable once each for maximum of 4 credits per course.

Prereq: MUS 421/MUS 521.

MUS 523. The Collaborative Pianist. 2 Credits.

Comprehensive study of techniques and literature for artistic ensemble performance by pianists. Includes chamber music, art song, opera arias, accompaniment, sight-reading, and orchestral reduction skills. Sequence. Repeatable once each for maximum of 4 credits per course.

Prereq: MUS 422/MUS 522.

MUS 528. Cultures of Musical Celebrity. 3 Credits.

Examines the cultural phenomenon of celebrity among musicians, composers, and audiences from antiquity to the present. Topics include cults, crowds, branding, shrines, and charisma.

MUS 530. Tonal Analysis: Linear Prolongational Analysis. 3 Credits.

Introduction to techniques of linear/prolongational analysis; exploration of connections between contrapuntal structures and small musical forms.

MUS 531. Tonal Analysis: Form in Tonal Music. 3 Credits.

Exploration of the analysis of form in music from the Baroque, Classical, and Romantic eras; covers Sonata Theory, form-functional theory, processual approaches to form, and the relationship between formal types and linear structures.

MUS 532. Tonal Analysis: Analysis of Popular Music. 3 Credits.

Exploration of the analysis of popular music, with repertoire from the 1960s to the present; discussion of methodologies adapted from traditional music theory, including form, harmony, meter, and rhythm, as well as more repertoire-specific topics, such as timbre, texture, and lyrics. Prereq: MUS 4/531.

MUS 533. Counterpoint. 4 Credits.

Study of modal and tonal counterpoint through analysis and composition: 16th-century sacred polyphony.

MUS 534. Counterpoint. 4 Credits.

Study of modal and tonal counterpoint through analysis and composition: baroque imitative counterpoint.

Prereq: MUS 433/MUS 533.

MUS 535. Counterpoint. 4 Credits.

Study of modal and tonal counterpoint through analysis and composition: focus varies—typically devoted to more advanced fugal writing, 20th-century counterpoint, or other modal composition.

Prereq: MUS 434/MUS 534.

MUS 536. World Music Ensemble: [Topic]. 2 Credits.

Students engage the embodied practices and sociocultural contexts of diverse music-dance practices associated with the world music categories specified in the topic. Repeatable once for a maximum of 4 credits.

MUS 538. Composers Forum. 1 Credit.

Formulation of a two- or three-concert series of student compositions; sessions with visiting composers and UO performers and listening projects related to these residencies. Repeatable eleven times for a maximum of 12 credits.

MUS 539. Scoring for Voices and Instruments. 3 Credits.

Techniques of arranging and scoring for various types of choral and instrumental groups.

MUS 540. Composition III. 3 Credits.

Composition and public performance of works including large or chamber ensembles. Preparation of works for senior recital. Repeatable twice for a maximum of 9 credits.

MUS 541. Composition III. 3 Credits.

Composition and public performance of works including large or chamber ensembles. Preparation of works for senior recital. Repeatable once for a maximum of 6 credits.

MUS 542. Composition III. 3 Credits.

Composition and public performance of works including large or chamber ensembles. Preparation of works for senior recital. Repeatable once for a maximum of 6 credits.

MUS 547. Digital Audio and Sound Design. 4 Credits.

Examines concepts of digital audio representation, sampling, and processing; considers audio mixing, basic synthesis, and sound modification techniques and fundamentals of electroacoustic composition. Laboratory fee. Repeatable once for a maximum of 8 credits.

MUS 548. Interactive Media Performance. 3 Credits.

Examines concepts of interactive performance using MIDI, digital audio, and video processing, and considers issues related to designing performance algorithms in software. Laboratory fee. Repeatable once for a maximum of 6 credits.

MUS 550. Sensor Music. 3 Credits.

Examines the fundamental principles for microprocessors and sensor interface design within the context of musical performance, composition, and improvisation. Repeatable thrice for a maximum of 12 credits. Prereq: MUS 448/MUS 558.

MUS 551. Introduction to Ethnomusicology. 4 Credits.

World musics studied in their social and cultural contexts. Compares the varied approaches, ideas, and methods of selected American and European researchers since 1980.

MUS 552. Musical Instruments of the World. 4 Credits.

Examines instruments of the world in their cultural contexts. Covers cross-cultural issues and focuses on particular geographic areas. Includes films, recordings, live demonstrations.

MUS 555. Lyric Diction. 3 Credits.

Analysis and International Phonetic Alphabet transcription of song and opera texts with emphasis on the singer's approach to performance. Offered alternate years.

MUS 556. Lyric Diction. 3 Credits.

Analysis and International Phonetic Alphabet transcription of song and opera texts with emphasis on the singer's approach to performance. Offered alternate years.

MUS 562. Popular Musics in the African Diaspora. 4 Credits.

Examines social and historical contexts of popular musics in the African diaspora from the 20th century on. Geographic focus is North America, the Caribbean, and Africa.

MUS 567. Solo Vocal Music. 3 Credits.

Solo songs with accompaniment; the lute air and Purcell; 19th-century art songs in Germany and France; 20th-century British, American, and Continental song literature; development of bases for artistic performance and sound critical judgment through study of text, voice, and accompaniment. Offered alternate years.

MUS 568. Solo Vocal Music. 3 Credits.

Solo songs with accompaniment; the lute air and Purcell; 19th-century art songs in Germany and France; 20th-century British, American, and Continental song literature; development of bases for artistic performance and sound critical judgment through study of text, voice, and accompaniment. Offered alternate years.

MUS 570. History of Electroacoustic Music. 3 Credits.

Examines the development of aesthetic movements, styles, media, instruments, and performance practice related to electroacoustic music. Repeatable once with no conditions.

Prereq: Standing as a music technology major or meeting the prerequisites for history survey courses.

MUS 571. Musical Performance Networks. 3 Credits.

Examines various types of network architectures and data-processing and mapping strategies that can be applied to real-time musical outcomes. Repeatable three times for a maximum of 12 credits with no conditions.

MUS 575. History of Opera. 4 Credits.

Critical study of the musical and dramatic content of operas forming the standard international repertoire, from Mozart to the present. Sequence.

MUS 576. Digital Audio Workstation Techniques I. 3 Credits.

Explores the sequencing, editing, and routing of MIDI and digital audio using a computer. Basic Mac skills recommended. Series with MUS 477 and MUS 478. Repeatable once for a maximum of 6 credits. Laboratory fee.

MUS 577. Digital Audio Workstation Techniques II. 3 Credits.

Explores the principles and techniques of audio mixing, sound design, and music production using a computer. Series with MUS 476 and MUS 478. Repeatable once for a maximum of 6 credits. Laboratory fee.

MUS 578. Digital Audio Workstation Techniques III. 3 Credits.

Explores advanced techniques of mixing, the principles of mastering, and digital distribution using a computer. Series with MUS 476 and MUS 477. Repeatable once for a maximum of 6 credits. Laboratory fee.

MUS 579. Data Sonification. 4 Credits.

Sonification uses non-speech sound to reveal new insights about data, insights that may be missed using visualizations and other graphic representations of data. The course explores developing audio applications for discovery and research and covers work in the fields of data sonification and auditory display.

MUS 580. Audio Recording Techniques I. 3 Credits.

Hardware and software techniques for use in a recording studio environment, including microphone usage, recording techniques, and digital production. Sequence with MUS 581, MUS 582. Laboratory fee.

MUS 581. Audio Recording Techniques II. 3 Credits.

Application of advanced recording techniques. Sequence with MUS 580, MUS 582. Laboratory fee.
Pre- or coreq: MUS 580.

MUS 582. Audio Recording Techniques III. 3 Credits.

Focuses on the production concepts and techniques necessary to produce a full-length, professional-quality compact disc. Sequence with MUS 580, MUS 581. Laboratory fee.
Prereq: MUS 581.

MUS 583. Audio Effects Theory and Design. 4 Credits.

Audio effects are common and useful tools used in the recording, mixing, and mastering of music and other sound, as well as in sound design. This course focuses on understanding, designing, and implementing audio effects, and using them for musical projects.

MUS 584. Choral Conducting and Literature. 3 Credits.

Choral conducting, gesture and communication, rehearsal technique, and choral literature appropriate for secondary school choral music programs (grades 6–12), community youth choirs, and collegiate ensembles. Repeatable once for maximum of 6 credits.
Prereq: MUP 140 or higher. Coreq: MUE 387, MUE 606 Fld Prac Public School.

MUS 587. Music and Emotion. 4 Credits.

Introduction to the psychological and philosophical study of music and the emotions, with emphasis on cognitive, evolutionary, behavioral, and socio-cultural perspectives.

MUS 588. Analog Recording Techniques. 3 Credits.

Analog Recording using reel to reel tape machines provides students with a unique experience in not only sonic quality, but also artistic and technical decision-making due to the mechanical limitations presented by the analog format.

MUS 590. Balinese Gamelan. 2 Credits.

Pacific Rim Gamelan ensemble. Performance of original compositions and traditional music for gamelan. Limited to twelve performers. Three public performances a year. Repeatable.

MUS 601. Research: [Topic]. 1-16 Credits.

Repeatable.

MUS 602. Supervised College Teaching. 1-5 Credits.

Repeatable.

MUS 603. Dissertation. 1-16 Credits.

Repeatable.

MUS 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable. Individual study of topics beyond the availability of the standard curriculum.

Prereq: completion of all regularly scheduled courses related to the topic.

MUS 607. Seminar: [Topic]. 1-5 Credits.

Repeatable. Studies of various topics at an advanced level offered periodically according to student and faculty interest and availability. Extra fee for Oregon Bach Festival seminars.

MUS 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

MUS 609. Terminal Project. 1-16 Credits.

Repeatable.

MUS 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

MUS 611. Research Methods in Music. 3 Credits.

Use of reference, research, and bibliographical sources in music. Sequence.

MUS 614. Introduction to Musicology. 4 Credits.

Introduces musicology and several of its subfields; includes current and recent arguments.

Prereq: major standing.

MUS 615. Current Trends in Music Theory. 3 Credits.

Surveys recent and developing trends in the discipline of music theory; includes discussion of writing and research methods.

MUS 620. Bibliography in Instrumental Conducting. 3 Credits.

Survey of research in conducting. Discussion of rehearsal strategies and psychology.

MUS 621. Wind Repertoire. 3 Credits.

Survey and analysis of music composed for large wind groups, from 1500 to the present. Sequence.

MUS 622. Wind Repertoire. 3 Credits.

Survey and analysis of music composed for large wind groups, from 1500 to the present. Sequence.

Prereq: MUS 621.

MUS 623. Wind Repertoire. 3 Credits.

Survey and analysis of music composed for large wind groups, from 1500 to the present. Sequence.

Prereq: MUS 622.

MUS 624. Instrumental Conducting Laboratory. 2 Credits.

Study, preparation, and conducting of works for instrumental ensembles in rehearsals and performances. Repeatable twice for maximum of 6 credits.

MUS 625. Orchestral Music: Bach to Beethoven. 2 Credits.

Survey of orchestral music from Bach to Beethoven. Sequence with MUS 626. Offered alternate years.

MUS 626. Orchestral Music: 1825 to Modern. 2 Credits.

Survey of orchestral music from 1825 to the modern era. Sequence with MUS 625. Offered alternate years.

MUS 627. Survey of Choral Literature I. 3 Credits.

Survey and analysis of choral repertoire from the Renaissance to the modern era with an emphasis on genres and text settings

MUS 628. Survey of Choral Literature II. 3 Credits.

Survey of sacred and secular choral music from 1450 to the present with an emphasis on an expanded view beyond the traditional canon

MUS 629. Repertoire and Analysis. 3 Credits.

Analytical interpretations of musical works in a context that focuses on repertoire rather than on particular analytical methodologies. The pieces studied vary each time the course is offered. Repeatable twice for a maximum of 9 credits with varying repertoire.

MUS 630. History of Theory I. 3 Credits.

Examination and evaluation of theories of music from ancient times to the 16th century, including Aristides Quintilianus, Boethius, Hucbald, Guido, Franco, Tinctoris, Ramis, and Aron. Offered alternate years.

MUS 631. History of Theory II. 3 Credits.

Examination and evaluation of theories of music from the 16th to 19th centuries, including Glarean, Zarlino, Descartes, Rameau, Tartini, Kirnberger, C. P. E. Bach, Fetis, Sechter, and Helmholtz. Offered alternate years.

MUS 632. History of Theory III. 3 Credits.

Theories of harmony and structure ranging from the mid-19th century to the present, including Hauptmann, Riemann, Schenker, Schoenberg, Hindemith, Babbitt, Forte, Lewin, Straus, and Lerdaahl. Offered alternate years.

MUS 633. Advanced Schenkerian Analysis. 3 Credits.

Advanced analytical techniques developed by Heinrich Schenker.

Pre- or coreq: MUS 431/531 or equivalent.

MUS 634. Advanced Post-Tonal Theory. 3 Credits.

Analytic approaches to twelve-tone music.

MUS 640. Advanced Composition Studies. 3 Credits.

Studio instruction in composition. Repeatable twice for a maximum of 9 credits.

Prereq: MUS 442/MUS 542; coreq: MUS 538.

MUS 641. Advanced Composition Studies. 3 Credits.

Studio instruction in composition. Repeatable twice for a maximum of 9 credits.

Prereq: MUS 640; coreq: MUS 538.

MUS 642. Advanced Composition Studies. 3 Credits.

Studio instruction in composition. Repeatable twice for a maximum of 9 credits.

Prereq: MUS 641; coreq: MUS 538.

MUS 643. Notation of Medieval and Renaissance Music. 3 Credits.

Representative examples of notational systems and practices in Western European polyphony from 900 to 1600. Offered alternate years.

MUS 645. Advanced Electronic Composition. 3 Credits.

Develops an advanced understanding of computers and software and how they are used to process digital audio and create musical and mediacompositions. Repeatable with instructor's consent. Laboratory fee. Repeatable up to five times.

Prereq: MUS 547, MUS 548, MUS 576; or equivalent.

MUS 650. Piano Literature. 3 Credits.

Advanced study of solo piano literature from Bach to the present.

Sequence with MUS 650, MUS 651, MUS 652. Offered alternate years.

MUS 651. Piano Literature. 3 Credits.

Advanced study of solo piano literature from Bach to the present.

Sequence with MUS 650, MUS 651, MUS 652. Offered alternate years.

Prereq: MUS 650.

MUS 652. Piano Literature. 1-3 Credits.

Advanced study of solo piano literature from Bach to the present.

Sequence with MUS 650, MUS 651, MUS 652. Offered alternate years.

Prereq: MUS 651.

MUS 660. Music in the Middle Ages. 3 Credits.

Sources of Western European music in classical antiquity and the Near East; sacred monophony, secular monophony; development of polyphony. Offered alternate years.

MUS 661. Music in the Renaissance. 3 Credits.

The central Renaissance style in 15th-century France and Italy; high Renaissance music; late Renaissance music; developments in England and Germany; instrumental music; Renaissance music theory. Offered alternate years.

MUS 662. Music in the Baroque Era. 3 Credits.

Musical genres in Italy, France, Germany, Austria, Britain, the Netherlands, Spain, Mexico, and South America in historical, social, political, and cultural contexts—early 17th century through Bach and Handel. Offered alternate years.

MUS 663. Music in the Classical Period. 3 Credits.

Study of galant, Empfindsamer, and classical styles from c. 1730 to Boccherini, Haydn, and Mozart. Focus on instrumental and sacred music, and on opera before Mozart. Offered alternate years.

MUS 664. Music in the Romantic Era. 3 Credits.

Virtuosic and lyric extremes in instrumental and vocal styles. Literary romanticism, descriptive music, and the Lied; opera in France and Italy; Wagner's music drama as Gesamtkunstwerk. Offered alternate years.

MUS 665. Music in the 20th Century. 3 Credits.

Crisis of romanticism and tonality: transition of Debussy, Mahler, and others; new styles of Stravinsky, Schoenberg, Bartok; developments in the United States; implications of recent trends. Offered alternate years.

MUS 670. Graduate Seminar in Musicology: [Topic]. 4 Credits.

Advanced graduate seminars that revolve around a rotating selection of topics in musicology, emphasizing prominent research and approaches in the field. Repeatable up to ten times for a maximum of 40 credits when topic changes.

MUS 671. Graduate Seminar in Ethnomusicology: [Topic]. 4 Credits.

Discussion-based seminar focused on history, methods, and emerging issues related to the discipline of ethnomusicology (the study of music in/as culture).

Prereq: MUS 551.

MUS 672. Seminar: Music Theory: [Topic]. 4 Credits.

Advanced graduate seminars that revolve around a rotating selection of topics in music theory, emphasizing prominent research and approaches in the field.

MUS 680. Historical Performance Practices I. 3 Credits.

Introduction to theory and practice of sound production, rhetoric, pronunciation, instrumentation, pitch, temperament, and ornamentation in period vocal and instrumental solo and ensemble music, from the 12th through 16th centuries. Offered once every third year.

MUS 681. Historical Performance Practices II. 3 Credits.

Introduction to theory and practice of sound production, rhetoric, pronunciation, instrumentation, pitch, temperament, and ornamentation in period vocal and instrumental solo and ensemble music in the 17th and early 18th centuries. Offered once every third year.

MUS 682. Historical Performance Practices III. 3 Credits.

Introduction to theory and practice of sound production, rhetoric, pronunciation, instrumentation, pitch, temperament, and ornamentation in period vocal and instrumental solo and ensemble music in the late 18th and 19th centuries. Offered once every third year.

MUS 683. Rhetoric and Music. 4 Credits.

This class is designed as an in-depth study seminar of some important aspects of rhetoric as it applies to pre-World-War-One music.

MUS 684. Musical Iconography. 4 Credits.

In-depth study seminar of the interdisciplinary field that deals with visual representations (iconography) of all themes musical, from musical instruments, to musical notation, portraits of musicians, allegories, instruments as symbols and attributes, and concerts, from the late Middle Ages to the nineteenth century.

MUS 691. Collegium Musicum. 1-3 Credits.

Study of music repertoire of the medieval, Renaissance, and baroque periods through rehearsals and extensive sight-reading; vocal and instrumental repertoire. Ensemble fee. Repeatable up to six times. Prereq: audition.

MUS 693. Oregon Electronic Device Orchestra. 2 Credits.

Performance ensemble that uses data-driven musical instruments in combination with software and hardware to perform music and intermedia compositions. Repeatable 11 times. Repeatable eleven times for a maximum of 24 credits.

Prereq: MUS 547, MUS 548.

MUS 694. Chamber Ensemble: [Topic]. 1-2 Credits.

Accompanying, Brass Choir, Brass Ensemble, Chamber Ensemble, Trombone Ensemble, Tuba and Euphonium Ensemble, Studio Guitar Ensemble, Jazz Guitar Ensemble, Latin Jazz Ensemble, Oregon Percussion Ensemble. Repeatable 11 times.

Prereq: audition (except chamber ensemble).

MUS 695. Band: [Topic]. 1-2 Credits.

Green Garter Band, Oregon Basketball Band, Oregon Marching Band, Oregon Wind Ensemble, UO Campus Band, UO Symphonic Band, Yellow Garter Band. Ensemble fee for Oregon Wind Ensemble, UO Symphonic Band, UO Campus Band. Repeatable 11 times.

Prereq: audition (except UO Campus Band and Oregon Marching Band).

MUS 696. Orchestra: [Topic]. 1-2 Credits.

University Symphony Orchestra, Campus Orchestra. Ensemble fee. Repeatable 11 times.

Prereq: audition (except Campus Orchestra).

MUS 697. Chorus: [Topic]. 2 Credits.

Chamber Choir, Concert Choir, Gospel Singers, Repertoire Singers, University Gospel Choir, University Gospel Ensemble, University Singers, Women's Choir. Ensemble fee. Repeatable 11 times.

Prereq: audition or voice screening (except Concert Choir and Gospel Choir).

MUS 698. Opera Workshop. 2 Credits.

Traditional and contemporary repertory for musical theater through analysis, rehearsal, and performance of complete and excerpted works; training in stage movement, diction, and rehearsal techniques. Repeatable 11 times.

Prereq: audition.

Bachelor of Arts in Music

Students who want a conservatory-style education in music should work toward the bachelor of music (BMus) degree or a music major with the music history and literature concentration, music theory concentration or music technology concentration. The bachelor of arts (BA) and bachelor of science (BS) degrees with the general music concentration or popular music studies concentration are primarily for students who want a broad liberal arts education while majoring in music.

Bachelor of arts degrees require proficiency in a foreign language (see the **Bachelor's Degree Requirements** section of this catalog).

Concentration in Applied Music: Voice

Code	Title	Credits
Musicianship		
MUS 131	Music Theory I	2
MUS 132	Music Theory II	2
MUS 133	Music Theory III	2
MUS 134	Aural Skills I	2
Musicianship Electives		8
MUS 135	Aural Skills II

Total Credits **64-72**

- ¹ Additional courses from this list may count toward 16 credits required.
- ² If Music, Politics, and Race (ES 345M) applied to the interdisciplinary studies category, MUS 345M may not be taken to count toward the history and culture category.
- ³ At least 36 total credits in combined musicianship and history and culture categories is required, with a minimum of 16 credits earned in each category.
- ⁴ At least three terms of MUP 114, 115 or 165 on one or more instruments. See also, General Limitations in the Registration and Academic Policies (p. 21) section of this catalog.
- ⁵ At least 12 credits of MUE, MUJ, MUP and/or MUS courses, including any upper-division credits necessary to earn 24 total upper-division credits in music.
- ⁶ See advisor for list of additional preapproved courses.

Bachelor of Music in Music Education

Our comprehensive undergraduate program will provide you practical experience in the performance skills of teaching, including numerous clinical opportunities in our innovative Teaching Laboratory and in area public schools. Successful completion of the BMME program includes certification of teacher licensure, enabling students to teach in Oregon, throughout the United States, and globally.

Total Credits		141-148

- ¹ For band track students only, during the first nine terms, all students enroll in a conducted large ensemble. During the 10th term, students enroll in Small Jazz Ensemble: [Topic] (MUJ 395).
- ² Students receiving a School of Music and Dance scholarship enroll in a conducted large ensemble for 11 terms.
- ³ Six terms at the MUP 265 level and three terms at the MUP 365 level, with concurrent enrollment in assigned ensemble.

The minimum grade requirement of B- will apply to all coursework towards the degree that contains the MUE subject code, as well as MUS 155, MUS 156, MUS 484 and MUS 486.

Other Requirements

- A minimum cumulative grade point average (GPA) of 2.75 and at least two years in residence. Students must achieve a B- or better in all courses with the MUE subject code. Those failing to do so must retake the course before enrolling in student teaching
- Continued enrollment in the music education program, for which students typically apply at the end of their sophomore year, requires a minimum cumulative GPA of 2.75, a grade of B- or better in Foundations of Music Education (MUE 326), a successfully completed audition and application, and faculty approval

Choral option: Students must also pass three terms of Functional Piano (MUP 163). Students whose primary performance is piano or any other wind, percussion, or stringed instrument, must also complete three terms of voice performance studies at MUP 265.

Elementary option: Students must also pass three terms of Functional Piano (MUP 163). Students whose primary performance is piano or any other wind, percussion, or stringed instrument must also complete one term of voice performance studies at MUP 265.

Instrumental Option (Band and Orchestra). Piano, organ, recorder, harp, guitar, or other nontraditional instruments may not be used to meet the primary studio option requirements. String speciality students are also required to complete one term of studio instruction on a secondary string instrument at MUP 265.

The current music education checklist is available from the music undergraduate office.

Bachelor of Music

Students who want a conservatory-style education in music should work toward the bachelor of music (BMus) degree or a music major with the music history and literature concentration, music theory concentration or

music technology concentration. The bachelor of arts (BA) and bachelor of science (BS) degrees with the general music concentration or popular music studies concentration are primarily for students who want a broad liberal arts education while majoring in music.

MUS 446	Music Engraving	2
Select one of the following:		3-4
MUS 447	Digital Audio and Sound Design	
MUS 448	Interactive Media Performance	
Select one of the following:		2-4
MUS 359	Music of the Americas	
MUS 365	Regional Ethnomusicology: [Topic]	
MUS 367	Survey of African Music	
MUS 451	Introduction to Ethnomusicology	
MUS 452	Musical Instruments of the World	
MUS 490	Balinese Gamelan	
Senior Recital ²		
Total Credits		134-137

¹ Music Composition students must take 6 consecutive terms of MUP 165 on piano only, with exceptions allowed by proficiency examination administered by Composition faculty (which may be taken at the end of any of the first five terms of MUP 165 on piano).

² A public performance of compositions written by the student under the guidance of the composition faculty. Final approval of the student's recital and general qualifications are provided by the composition faculty.

³ For continued enrollment in the Music Composition major, students must successfully complete the music Core Courses (listed above) with grades of C- or better. They must also successfully complete the Composition I series (MUS 240, 241, 242) with grades of B- or better. Lastly, students may retake only one course in the nine-quarter Composition course sequence (Composition I, II & III series) in which they earn a C+ or lower.

Bachelor of Music in Music Performance

Code	Title	Credits
Core courses for traditional music major degree programs (listed above)		41
Performance Studies ¹		48
Ensemble (at least 12 terms) ²		24
MUS 327	Analysis: [Topic] (one term)	3
MUS 384	Introduction to Conducting	2
Upper-division MUS electives		5
Junior and senior recitals ^{3, 4}		
Total Credits		123

¹ Six terms at the MUP 270 level and six terms at the MUP 465 level, with concurrent enrollment in assigned ensemble.

² For Music Performance majors whose primary instrument is piano, 6 of the 12 required terms of Ensemble must be MUS 394 Accompanying.

³ Credit may not be earned toward recitals with Reading and Conference: [Topic] (MUS 405).

⁴ Pre-recital hearings must be approved at least four weeks before the proposed recital date. For details, consult studio instructor.

Areas of Specialization

- bassoon
- cello
- clarinet
- classical guitar
- double bass
- euphonium
- flute
- harp
- harpsichord
- horn
- oboe
- organ
- percussion
- piano
- saxophone
- studio guitar
- trombone
- trumpet
- tuba
- viola
- violin
- voice

Students may also specialize in more than one wind instrument. For details, consult studio instructor.

Additional Requirements

Voice Option

Code	Title	Credits
Proficiency in French, German, or Italian equivalent to completion of one year of college study in each of two languages or two years of study in one language (typically 27–30 credits)		
MUS 155–156	Introduction to Lyric Diction	4
MUP 163	Functional Piano (three terms or equivalent)	6
MUS 394	Chamber Ensemble: [Topic] (one term)	1

Piano Option

Code	Title	Credits
Six of the twelve terms of ensemble must be in MUS 394 Chamber Ensemble: Accompanying.		
MUE 471–473	Piano Pedagogy I-III	7
MUE 409	Practicum: [Topic]	1-4

Harpsichord and Organ Option

Six of the 12 terms of ensemble must be in MUS 394 Chamber Ensemble: [Topic] (Accompanying).

Strings, Woodwinds, Brass, and Harp Option

In addition to the 12 terms of ensemble, at least three terms of MUS 394 Chamber Ensemble: [Topic] are required.

Percussion Option

In addition to 12 terms of ensemble, 12 terms of MUS 394 Chamber Ensemble: [Topic] (Oregon Percussion Ensemble) are required.

Bachelor of Science in Music

Students who want a conservatory-style education in music should work toward the bachelor of music (BMus) degree or a music major with the music history and literature concentration, music theory concentration or music technology concentration. The bachelor of arts (BA) and bachelor of science (BS) degrees with the general music concentration or popular music studies concentration are primarily for students who want a broad liberal arts education while majoring in music.

Bachelor of science degrees require competence in mathematics or computer science (see the **Bachelor's Degree Requirements** section of this catalog).

Total Credits 66-76

- Additional courses from this list may count toward 16 credits required.
- If Music, Politics, and Race (ES 345M) applied to the interdisciplinary studies category, Music, Politics, and Race (MUS 345M) may not be taken to count toward the history and culture category.
- At least 36 total credits in combined musicianship and history and culture categories is required, with a minimum of 16 credits earned in each category.
- At least three terms of MUP 114, 115 or 165 on one or more instruments. See also, General Limitations in the Registration and Academic Policies (p. 21) section of this catalog.
- At least 12 credits of MUE, MUJ, MUP and/or MUS courses, including any upper-division credits necessary to earn 24 total upper-division credits in music.

Minors in Music

The School of Music and Dance offers minors in music, music technology, and audio production. Students wishing to pursue a music minor may submit an application (<http://music.uoregon.edu/undergraduate-music-minor-application/>) to the School of Music and Dance at any time during their undergraduate studies. No audition is required.

Music Minor Programs

The School of Music and Dance offers minors in music, music technology, and audio production. Students wishing to pursue a

music minor may submit an application (<http://music.uoregon.edu/undergraduate-music-minor-application/>) to the School of Music and Dance at any time during their undergraduate studies. No audition is required.

Minor in Audio Production

The minor in audio production requires a minimum of 24 credits, 12 of which must be upper-division. A minimum of 14 credits must be taken in residence. Courses applied to the minor must be graded C– or better or P (pass).

Code	Title	Credits

Master of Arts

The University of Oregon offers a Master of Arts degree in Musicology and Music Theory.

In addition to the University of Oregon Division of Graduate Studies' requirements for master's degrees, the School of Music and Dance has the following requirements. For additional information, contact the music graduate office or consult the Info for Grad Students (<https://music.uoregon.edu/current-students/info-graduate-music-students/>) webpage.

A minimum of 9 credits must be taken in 600- or 700-level courses and at least one-half of the required credits must be in courses intended for graduate students only. Degree candidates must complete a terminal project (e.g., recital, thesis, project), all of which must be archived in one of the following locations: Music Services in Knight Library, Scholars' Bank, ProQuest, or Cykler Music Education Library.

Master of Arts in Musicology

Code	Title	Credits
Performance Studies, at least three terms		6
Appropriate ensemble, at least three terms		3-6
MUS 503	Thesis	9
MUS 614	Introduction to Musicology	4

MUS 503	Thesis	9
Total Credits		52

Language Requirement

Reading proficiency in a second language (usually German), demonstrated by two years of successful undergraduate study or by German for Reading Knowledge. Language courses taken to satisfy this requirement may not be used to fulfill the 54 total graduate credits.

Additional Requirements

A final oral examination reviewing the thesis and degree course work.

Master of Music

In addition to the University of Oregon Division of Graduate Studies' requirements for master's degrees, the School of Music and Dance has the following requirements. For additional information, contact the music graduate office or consult the Info for Grad Students (<https://music.uoregon.edu/current-students/info-graduate-music-students/>) webpage.

A minimum of 9 credits must be taken in 600- or 700-level courses and at least one-half of the required credits must be in courses intended for graduate students only. Degree candidates must complete a terminal project (e.g., recital, thesis, project), all of which must be archived in one of the following locations: Music Services in Knight Library, Scholars' Bank, ProQuest, or Cykler Music Education Library.

Master of Music in Intermedia Music Technology

Code	Title	Credits
Two 500-level seminars or courses in music outside the music technology area, approved by an advisor		6-8
MUS 550	Sensor Music	3
MUS 570	History of Electroacoustic Music	3
MUS 571	Musical Performance Networks	3
MUS 609	Terminal Project	9
MUS 611	Research Methods in Music	3
MUS 693	Oregon Electronic Device Orchestra	2
Completion of 18 credits of the following:		18
MUS 645	Advanced Electronic Composition	
Two nonmusic courses, approved in advance by the advisor		6-8
MUS 579	Data Sonification	4
Total Credits		57-61

Additional Requirements

- electroacoustic listening exam—a listening examination covering contemporary and classic works of electroacoustic music literature
- technical exam—a four-hour written examination on theoretical aspects of music technology
- final oral examination—reviewing the terminal project and degree course work

Master of Music in Music Composition

Code	Title	Credits
Appropriate ensemble, at least three terms		3-6
MUS 516	Post-Tonal Theory I	3
Select one of the following:		3
MUS 517	Post-Tonal Theory II	
MUS 531	Schenkerian Analysis	
MUS 634	Advanced Post-Tonal Theory	
MUS 530	Schenkerian Analysis	3
MUS 533–535	Counterpoint	12
MUS 538	Composers Forum (at least four terms)	4
Select one of the following:		3-4
MUS 548	Interactive Media Performance	
MUS 645	Advanced Electronic Composition	
Select one of the following:		4
MUS 551	Introduction to Ethnomusicology	
MUS 552	Musical Instruments of the World	
MUS 590	Balinese Gamelan (two terms)	
MUS 605	Reading and Conference: [Topic] (Thesis Proposal)	1
MUS 611	Research Methods in Music	3
Two sequences of the following:		18
MUS 640–642	Advanced Composition Studies	
Select one of the following:		3
MUS 660	Music in the Middle Ages	
MUS 661	Music in the Renaissance	
MUS 662	Music in the Baroque Era	
MUS 663	Music in the Classical Period	
MUS 664	Music in the Romantic Era	
MUS 665	Music in the 20th Century	3
MUS 503	Thesis ¹	9
Total Credits		72-76

¹ A composition of substantial dimension, composed under the guidance of a member of the music composition faculty, performed and recorded on campus.

Additional Requirements

- proficiency in notation
- proficiency in orchestration
- proficiency in piano

Students have two ways of meeting the piano proficiency:

1. Six consecutive terms of MUP 165 in piano;

2. Pass the proficiency exam administered by the composition faculty, which may be taken at the end of any of the first five terms of piano lessons (MUP 165).

- public performance—usually a graduate recital lasting 50 minutes—of works composed under the guidance of and approved by the composition faculty
- final oral examination reviewing the thesis and degree course work

Master of Music in Music: Conducting—Choral Emphasis

Code	Title	Credits
MUS 611	Research Methods in Music	3
	Performance Studies: Voice, at least three terms	6
MUS 607	Seminar: [Topic] (Choral Conducting)	2
MUS 607	Seminar: [Topic] (Choral Conducting)	2
MUS 607	Seminar: [Topic] (Choral Conducting)	2
MUS 627	Survey of Choral Literature I	3
MUS 628	Survey of Choral Literature II	3
MUE 606	Practicum: [Topic] (three terms)	6
MUS 697	Chorus: [Topic] (three terms of Chamber Choir or University Singers)	6
	Select two of the following:	6
MUS 661	Music in the Renaissance	
MUS 662	Music in the Baroque Era	
MUS 663	Music in the Classical Period	
MUS 664	Music in the Romantic Era	
MUS 665	Music in the 20th Century	
	Select two of the following:	6
MUS 607	Seminar: [Topic] (Master Class in Conducting associated with the Oregon Bach Festival)	
MUS 605	Reading and Conference: [Topic] (OBF Chamber Choir)	
MUS 680–682	Historical Performance Practices I-III	
MUE 542	Teaching Singing in the Classroom	
MUS 555	Lyric Diction	
MUS 556	Lyric Diction	
MUE 639	Pedagogy and Practicum: [Topic] (Choral Conducting or Voice)	
MUS 643–644	Notation of Medieval and Renaissance Music	
MUS 691	Collegium Musicum	1-3
	Electives in the area of emphasis, chosen in consultation with advisor to bring final total to 54 graduate credits	15
Total Credits		61-63

Additional Requirements

- final program portfolio
- as a culminating demonstration of professional capability in the major field, the student must conduct a juried, concert-length public performance or the equivalent
- piano proficiency examination
- a final oral examination that covers degree course work

Residence Requirement

Three consecutive terms must be in residence, excluding summer sessions.

Master of Music in Music: Conducting—Orchestral Emphasis

Code	Title	Credits
MUS 611	Research Methods in Music	3
MUS 624	Instrumental Conducting Laboratory (six terms)	12
MUS 625	Orchestral Music: Bach to Beethoven	2
MUS 626	Orchestral Music: 1825 to Modern	2
MUS 629	Repertoire and Analysis	3
MUS 681	Historical Performance Practices II	3
or MUS 682	Historical Performance Practices III	
MUP Performance Studies (three terms)		6
	Select two of the following:	6
MUS 662	Music in the Baroque Era	
MUS 663	Music in the Classical Period	
MUS 664	Music in the Romantic Era	
MUS 665	Music in the 20th Century	
	Ensemble (three terms) ¹	6
	Electives at the 500 level or above in the area of emphasis ²	11
	Juried rehearsal prepared in consultation with faculty advisor	
Total Credits		54

¹ Ensemble must be approved by an advisor.

² Chosen in consultation with an advisor.

Additional Requirements

- as a culminating demonstration of professional capability in the major field, the student must conduct a juried, concert-length public performance or the equivalent
- academic year in residence
- a final oral examination that covers degree course work
- a research paper dealing with some aspect of orchestral conducting

Master of Music in Music: Conducting—Wind Ensemble Emphasis

Code	Title	Credits
MUP 635	Music Performance Studies: [Topic] (Three terms, 2 credits per term)	6
MUS 611	Research Methods in Music	3
MUS 620	Bibliography in Instrumental Conducting	3
MUS 624	Instrumental Conducting Laboratory (Six terms, 2 credits per term)	12
MUE 507	Seminar: [Topic] (Band Materials)	3
MUS 622	Wind Repertoire	3
MUS 623	Wind Repertoire	3
	Select one of the following:	3
MUS 660	Music in the Middle Ages	
MUS 661	Music in the Renaissance	
MUS 662	Music in the Baroque Era	
MUS 663	Music in the Classical Period	

MUS 664	Music in the Romantic Era	
MUS 665	Music in the 20th Century	3
MUS 695	Band: [Topic] (three terms of Wind Ensemble)	6
Total Credits		45

Additional Requirements

- as a culminating demonstration of professional capability in the major field, the student must conduct a juried rehearsal and concert-length public performance or the equivalent
- academic year in residence
- a final oral examination that covers degree course work
- a research paper dealing with some aspect of wind ensemble conducting

Master of Music in Music Education

Candidates are required to establish an area of emphasis among the following:

- Choral music education (voice and piano must be used)
- Elementary general music education (voice and piano must be used)
- Instrumental music education: band (traditional wind or percussion instruments must be used)
- Instrumental music education: orchestra (violin, viola, cello, or double bass must be used)

Code	Title	Credits
MUE 532	Music in School and Society	3
MUE 612	Quantitative Research in Music Education	3
MUE 538	Curricular Strategies in Music Education	3
MUE 649	History of American Music Education	
Select one of the following:		3
MUS 660	Music in the Middle Ages	
MUS 661	Music in the Renaissance	
MUS 662	Music in the Baroque Era	
MUS 663	Music in the Classical Period	
MUS 664	Music in the Romantic Era	
MUS 665	Music in the 20th Century	
Music Performance Studies		6-12
MUP 635	Music Performance Studies: [Topic]	
500-level or above music theory, musicology, or ethnomusicology course		3-4
500-level or above music education courses in area of emphasis ¹		12
500 or 600-level or above courses ¹		6
Ensemble, three terms ¹		3-6
Electives ¹		6
Select one of the following:		
MUE 503	Thesis (and oral examination) ²	
Major project and oral examination ^{3,4}		
Total Credits		48-58

- ¹ Chosen in consultation with advisor.
- ² Oral examination covers all music education course work.
- ³ Course work is 6 credits of Research: [Topic] (MUE 601).

Additional Requirements

As needed, courses in expository writing.

Master of Music in Music: Jazz Studies— Composition-Arranging Emphasis

Code	Title	Credits
MUJ 583–584	Advanced Jazz Arranging I-II	6
MUJ 605	Reading and Conference: [Topic] (Research Presentation Preparation)	4
MUS 611	Research Methods in Music	3
MUJ 660	Survey of Jazz Composition	3
MUJ 540	Jazz Pedagogy Practicum ((MUJ 440/540 currently in review))	3
MUJ 661	Jazz Program Planning and Development	3
Select one of the following:		6-12
MUJ 690	Jazz Laboratory Band III (six terms)	
MUJ 691	Jazz Laboratory Band II (six terms)	
MUJ 692	Oregon Jazz Ensemble (six terms)	
MUJ 695	Small Jazz Ensemble: [Topic] (three terms)	3
At least four 500-level or above seminars or courses in music outside the jazz area ^{1,2}		12-16
Electives at the 500-level or above to bring final total to 54 graduate credits ³		11
Applied study in jazz composition: MUP 650 or MUP 665		6-12
MUP 650	Music Performance Studies	
MUP 665	Music Performance Studies	
Total Credits		60-76

- ¹ Individualized study and experimental courses do not fulfill this requirement.
- ² Seminar and courses must be approved by advisor.
- ³ Chosen in consultation with an advisor.

Additional Requirements

- successful completion of the graduate jazz arranging barrier exam
- a recorded public recital or CD project of works composed under the guidance of a member of the jazz faculty and approved by the jazz studies committee
- a public lecture-presentation of independent research conducted under the guidance of a member of the jazz faculty
- a final oral examination with emphasis on jazz history, literature, and pedagogy

Both the recital-CD project and lecture-demonstration must have prior approval from the jazz studies committee.

Master of Music in Music: Jazz Studies— Instrumental Performance Emphasis

Code	Title	Credits
MUJ 577–579	Advanced Jazz Repertoire I-III	9
MUS 611	Research Methods in Music	3

MUJ 661	Jazz Program Planning and Development	3
MUJ 540	Jazz Pedagogy Practicum	3
Jazz performance studies		12
To be taken at either MUP 650 or 665		
MUP 665	Music Performance Studies	
MUP 650	Music Performance Studies	
Select one of the following:		3-6
MUJ 690	Jazz Laboratory Band III (three terms)	
MUJ 691	Jazz Laboratory Band II (three terms)	
MUJ 692	Oregon Jazz Ensemble (three terms)	
MUJ 695	Small Jazz Ensemble: [Topic] (six terms)	6
At least four 500-level or above seminars or courses in music outside the jazz area ^{1,2}		12-16
Electives at the 500-level or above to bring final total to 54 graduate credits ³		3
Total Credits		54-61

¹ Individualized study and experimental courses do not fulfill this requirement.

² Seminar and courses must be approved by an advisor.

³ Chosen in consultation with an advisor.

Additional Requirements

- successful completion of the graduate jazz performance barrier exam
- a full-length, recorded public recital or CD project demonstrating mastery of jazz performance and showcasing creativity
- a public lecture-presentation of independent research conducted under the guidance of a member of the jazz faculty
- a final oral examination with emphasis on jazz history, literature, and pedagogy

Both the recital-CD project and lecture-demonstration must have prior approval from the jazz studies committee.

Master of Music in Music: Piano Pedagogy

Code	Title	Credits
MUE 571	Piano Pedagogy I: Teaching Beginners	3
MUE 572	Piano Pedagogy II: Teaching Groups	2
MUE 573	Piano Pedagogy III: Teaching Intermediate Levels	2
MUE 606	Practicum: [Topic] (three terms)	3
MUE 639	Pedagogy and Practicum: [Topic]	3
MUS 611	Research Methods in Music	3
MUS 650–652	Piano Literature	9
Appropriate ensemble, at least three terms		3-6
Applied Piano Study		12-24
6 terms of MUP 650 or MUP 665 for a total of 12-24 credits		
500-level or above seminars or courses in music history, theory, or literature		6
Music electives at the 500-level or above ¹		3
MUE 601	Research: [Topic] (Final Project) ²	3
Total Credits		52-67

¹ Chosen in consultation with an advisor.

² Project and recital of at least 30 minutes of music performance. If pursuing a concurrent piano performance degree, a lecture-demonstration may serve in lieu of the recital.

Additional Requirement

A final oral examination reviewing the project and degree course work.

Master of Music in Music Performance

Options are available in bass, bassoon, cello, clarinet, collaborative piano, euphonium, flute, harp, harpsichord, horn, multiple woodwind or brass, oboe, organ, percussion, saxophone, solo piano, trombone, trumpet, tuba, viola, violin, and voice.

Code	Title	Credits
MUS 611	Research Methods in Music	3
MUP 665	Music Performance Studies ^{1,2}	24
Appropriate ensemble, at least six terms ³		9-12
MUS 691	Collegium Musicum ⁴	1
Select one of the following:		3
MUS 660	Music in the Middle Ages	
MUS 661	Music in the Renaissance	
MUS 662	Music in the Baroque Era	
MUS 663	Music in the Classical Period	
MUS 664	Music in the Romantic Era	
MUS 665	Music in the 20th Century	
500-level or above music theory course		3-4
500-level or above course in musicology-ethnomusicology, theory, or literature ⁵		3-4
600-level or above course in musicology-ethnomusicology or theory ⁵		3-4
Total Credits		49-55

¹ During the term of the public recital, enroll in Music Performance Studies (MUP 665)

² Exception is multiple woodwind or brass instruments option.

³ Exception is voice and multiple woodwind or brass instruments option.

⁴ Not required for saxophone students.

⁵ Exceptions are collaborative piano and voice options.

Additional Requirements

Final oral examination with emphasis on history, literature, and pedagogy of the primary performance medium.

Public recital prepared in consultation with faculty advisor.

Additional Violin and Viola Required Courses:

Code	Title	Credits
MUE 563	Pedagogy Methods: Violin and Viola	2
MUE 564	Advanced Violin/Viola Pedagogy	2
MUE 565	Somatics for String Players	1

Ensemble Requirements

Before each fall term, students must audition for ensemble placement. Students entering winter and spring terms audition at the time of entrance. Factors for placement include the student's preference, level of ability, major performance medium, educational and musical needs, and the needs of the school's ensembles.

- Instrumental ensemble options: University Symphony Orchestra, Oregon Wind Ensemble, Oregon Wind Symphony
- Voice ensemble options: University Singers, Chamber Choir, Repertoire Singers, Opera Ensemble
- Students studying harpsichord, organ, or harp may enroll in one of the following courses instead of large conducted ensembles:

Code	Title	Credits
MUS 605	Reading and Conference: [Topic]	1-4
MUS 691	Collegium Musicum	1-3
MUS 694	Chamber Ensemble: [Topic]	1

Students studying piano must enroll in the following courses:

Code	Title	Credits
MUS 521–523	The Collaborative Pianist	6
MUS 694	Chamber Ensemble: [Topic] (Accompanying)	3

Students studying collaborative piano must enroll in the following course:

Code	Title	Credits
MUS 694	Chamber Ensemble: [Topic] (Chamber Ensemble)	6

Additional Requirements

Final oral examination with emphasis on history, literature, and pedagogy of the primary performance medium.

Public recital prepared in consultation with faculty advisor.

Additional Violin and Viola Required Courses:

Code	Title	Credits
MUE 563	Pedagogy Methods: Violin and Viola	2
MUE 564	Advanced Violin/Viola Pedagogy	2
MUE 565	Somatics for String Players	1

Additional Requirements for Selected Options

Harpsichord

Code	Title	Credits
MUS 605	Reading and Conference: [Topic] (Harpsichord Literature)	3
MUS 650	Piano Literature	3

Multiple Woodwind or Brass Instruments

Code	Title	Credits
MUS 605	Reading and Conference: [Topic] (Wind Instrument Music)	3
	Performance Studies, at least 3 credits in each secondary instrument	6

MUE 639	Pedagogy and Practicum: [Topic] (Woodwinds or Brass)	3
---------	--	---

Additional Requirements

- Public recital of both solo and ensemble music on the primary instrument, and performance of a substantial composition on each of the two secondary instruments during a public student recital
- final oral examination with emphasis on history, literature, and pedagogy of the primary and secondary instruments

Organ

Code	Title	Credits
MUS 605	Reading and Conference: [Topic] (Organ Literature)	1-4
MUE 639	Pedagogy and Practicum: [Topic] (Organ)	3

Percussion

Code	Title	Credits
	Oregon Percussion Ensemble:	6-12
MUS 694	Chamber Ensemble: [Topic] (Oregon Percussion Ensemble)	

Piano

Code	Title	Credits
MUS 650–652	Piano Literature	9

Collaborative Piano

Code	Title	Credits
MUS 155–156	Introduction to Lyric Diction	4
MUS 567–568	Solo Vocal Music	6
MUS 605	Reading and Conference: [Topic]	2
MUP 650	Music Performance Studies (Taken two times)	4

Additional Requirements

Two public recitals: consult an advisor for procedures.

Stringed Instruments

Code	Title	Credits
	Chamber Ensemble:	3
MUS 694	Chamber Ensemble: [Topic]	

Violin and Viola

Code	Title	Credits
MUE 563	Pedagogy Methods: Violin and Viola	2
MUE 564	Advanced Violin/Viola Pedagogy	2
MUE 565	Somatics for String Players	1

Voice

Code	Title	Credits
MUS 555–556	Lyric Diction	6
MUS 567–568	Solo Vocal Music	6
MUS 574–575	History of Opera	8
MUE 639	Pedagogy and Practicum: [Topic] (Voice)	3

One year of college study in each of the following languages: Italian, French, German.

Doctor of Musical Arts in Music Performance

The School of Music and Dance has the largest full-time, in-residence music faculty on the West Coast north of Los Angeles. The school is grounded in the strength of the traditional canon and fosters the creation and performance of new work.

In addition to the Division of Graduate Studies' requirements for doctoral degrees, the School of Music and Dance has the following core and general requirements. For additional information, contact the music graduate office or consult the Info for Grad Students (<https://music.uoregon.edu/current-students/info-graduate-music-students/>) webpage.

At least one-half of the required credits must be in courses intended for graduate students only.

When a graduate student is required to enroll as a full-time graduate student (e.g., doctoral residency, graduate employee), the student may not use undergraduate credits as part of the required 9 graduate credits for full-time enrollment. However, undergraduate credits that exceed the 9 graduate credits are acceptable.

Code	Title	Credits
MUS 611	Research Methods in Music	3
MUS 629	Repertoire and Analysis	3
MUE 641	College Music Teaching	3
Select two of the following:		6
MUS 660	Music in the Middle Ages	
MUS 661	Music in the Renaissance	
MUS 662	Music in the Baroque Era	
MUS 663	Music in the Classical Period	
MUS 664	Music in the Romantic Era	
MUS 665	Music in the 20th Century	
Total Credits		15

Doctor of Musical Arts in Music Performance

Options are available in bassoon, cello, clarinet, collaborative piano, data-driven instruments, euphonium, flute, harp, horn, oboe, percussion, solo piano, saxophone, trombone, trumpet, tuba, viola, violin, and voice.

Code	Title	Credits
Two or more seminars or courses in musicology-ethnomusicology or theory at the graduate level		6-8
MUE 639	Pedagogy and Practicum: [Topic]	3
MUP 765	Music Performance Studies: [Topic] (Performance Studies) ²	24
MUS 607	Seminar: [Topic] (DMA Thesis Organization)	2
MUS 650–652	Piano Literature ³	9
One of the following: ¹		6-18
MUS 601	Research: [Topic] (Lecture, Document)	
MUS 603	Dissertation	
MUE 563	Pedagogy Methods: Violin and Viola ⁴	2

MUE 564	Advanced Violin/Viola Pedagogy ⁴	2
MUE 565	Somatics for String Players ⁴	1
Total Credits		55-69

- ¹ DMA students may complete either option.
- ² Summer sesión enrollment requires advisor's consent.
- ³ Piano students only.
- ⁴ Violin and viola students only

General Degree Requirements

Other courses. Eight credits of non-music courses (excluding basic language courses taken to fulfill the language requirement, and courses taken to fulfill the research development requirement) chosen in consultation with the faculty advisor. Students in the PhD program in music education are exempt from this requirement.

Ensemble. Students in piano performance must enroll in three terms of piano accompaniment courses [The Collaborative Pianist (MUS 521), The Collaborative Pianist (MUS 522), The Collaborative Pianist (MUS 523)]. Students in music performance (collaborative piano option) must enroll in three terms of chamber ensemble accompaniment courses—Chamber Ensemble: [Topic] (MUS 694). DMA students in voice, wind, string, or percussion performance must enroll in six consecutive terms of ensemble (or two cycles of three consecutive terms). Students must audition for ensemble placement before each fall term. Ensembles approved to fulfill this requirement are: University Symphony Orchestra, Oregon Wind Ensemble, Wind Symphony, University Singers, Chamber Choir, and Opera Workshop. Other ensembles (e.g. Collegium Musicum, Oregon Jazz Ensemble, etc.) may fulfill this requirement, at the discretion of the faculty auditioning committee and the student's applied instructor.

In making assignments, the ensemble auditioning committee and applied instructors consider the needs of the school's ensembles, the student's preference, level of ability, major performance medium, and the student's educational and musical needs.

Language. Students in voice must complete two years of college study in French, German, or Italian and one year of college study in each of the other two.

Research Development. DMA and PhD students must complete eight credits (or two courses) in research development, chosen in consultation with the faculty advisor. Credits cannot be used to fulfill the requirement of eight non-music credits.

Additional Requirement

Three public performances (subject to pre-recital approval by faculty jury) on the University of Oregon campus, including one solo recital.

In addition, students in the collaborative piano option must meet the following requirements:

Collaborative Piano Option

Code	Title	Credits
MUS 555–556	Lyric Diction	6
MUS 567–568	Solo Vocal Music	6
MUS 575	History of Opera	4
MUS 691	Collegium Musicum (one term)	3
MUP 635	Music Performance Studies: [Topic] (Performance Studies: Harpsichord)	2

MUS 694	Chamber Ensemble: [Topic] (Chamber Ensemble) (3 terms) ²	3
Two art history courses ³		8

¹ Must be taken prior to Collegium Musicum (MUS 691).

² Fulfills ensemble requirement.

³ Fulfills nonmusic courses.

Data-Driven Instruments Option

Code	Title	Credits
MUS 550	Sensor Music	3
MUS 570	History of Electroacoustic Music	3
MUS 571	Musical Performance Networks	3

Doctor of Philosophy

The University of Oregon offers a Doctor of Philosophy in Music Composition, Music Education, Music Theory, and Musicology.

Doctor of Philosophy in Music Composition

Code	Title	Credits
MUS 516	Post-Tonal Theory I	3
Select one of the following:		3
MUS 517	Post-Tonal Theory II	
MUS 531	Tonal Analysis: Form in Tonal Music	
MUS 634	Advanced Post-Tonal Theory	
MUS 530	Tonal Analysis: Linear Prolongational Analysis	3
MUS 533–535	Counterpoint	12
MUS 538	Composers Forum (at least four terms)	4
Select one of the following:		3-4
MUS 548	Interactive Media Performance	
MUS 645	Advanced Electronic Composition	
Select one of the following:		2-4
MUS 551	Introduction to Ethnomusicology	
MUS 552	Musical Instruments of the World	
MUS 590	Balinese Gamelan (two terms)	
500- or 600-level seminar or course in musicology/ethnomusicology or theory		3-4
MUS 603	Dissertation ¹	18
MUS 605	Reading and Conference: [Topic] (Dissertation Proposal) ¹	1
MUE 639	Pedagogy and Practicum: [Topic] (Composition)	3
Two sequences of the following:		18
MUS 640–642	Advanced Composition Studies	
Total Credits		75-77

¹ Summer session enrollment requires advisor's consent.

Note: Candidates must take MUS 665 Music in the 20th Century as one of the two period survey courses in the core requirements (p.). (See Doctor of Philosophy Core Courses.)

In addition to the Graduate School's requirements for doctoral degrees, the School of Music and Dance has the following core and general

requirements. For additional information, contact the music graduate office or consult the Info for Grad Students (<https://music.uoregon.edu/current-students/info-graduate-music-students/>) webpage.

At least one-half of the required credits must be in courses intended for graduate students only.

When a graduate student is required to enroll as a full-time graduate student (e.g., doctoral residency, graduate employee), the student may not use undergraduate credits as part of the required 9 graduate credits for full-time enrollment. However, undergraduate credits that exceed the 9 graduate credits are acceptable.

MUS 661	Music in the Renaissance	
MUS 662	Music in the Baroque Era	
MUS 663	Music in the Classical Period	
MUS 664	Music in the Romantic Era	
MUS 665	Music in the 20th Century ³	
Total Credits		15

¹ MUS 611 for composition, MUS 614 for musicology, MUS 615 for music theory, and MUE 611 and MUE 612 for music education.

² Music theory students are not required to take MUS 629.

³ Students in composition must take Music in the 20th Century (MUS 665).

Other courses. Eight credits of non-music courses (excluding basic language courses taken to fulfill the language requirement, and courses taken to fulfill the research development requirement) chosen in consultation with the faculty advisor. Students in the PhD program in music education are exempt from this requirement.

Ensemble. Students in piano performance must enroll in three terms of piano accompaniment courses [The Collaborative Pianist (MUS 521 (<https://catalog.uoregon.edu/search/?P=MUS%20521>)), The Collaborative Pianist (MUS 522 (<https://catalog.uoregon.edu/search/?P=MUS%20522>)), The Collaborative Pianist (MUS 523 (<https://catalog.uoregon.edu/search/?P=MUS%20523>))]. Students in music performance (collaborative piano option) must enroll in three terms of chamber ensemble accompaniment courses—Chamber Ensemble: [Topic] (MUS 694 (<https://catalog.uoregon.edu/search/?P=MUS%20694>)). DMA students in voice, wind, string, or percussion performance must enroll in six consecutive terms of ensemble (or two cycles of three consecutive terms). Students must audition for ensemble placement before each fall term. Ensembles approved to fulfill this requirement are: University Symphony Orchestra, Oregon Wind Ensemble, Wind Symphony, University Singers, Chamber Choir, and Opera Workshop. Other ensembles (e.g. Collegium Musicum, Oregon Jazz Ensemble, etc.) may fulfill this requirement, at the discretion of the faculty auditioning committee and the student's applied instructor.

In making assignments, the ensemble auditioning committee and applied instructors consider the needs of the school's ensembles, the student's

preference, level of ability, major performance medium, and the student's educational and musical needs.

Research Development. DMA and PhD candidates must complete eight credits (or two courses) in research development, chosen in consultation with the faculty advisor. Credits cannot be used to fulfill the requirement of eight non-music credits.

Additional Requirements

- proficiency in notation
- proficiency in orchestration
- public performance (60-minute minimum) of compositions completed during doctoral study that have been approved by the music composition faculty—performance on the University of Oregon campus
- reading and recording of the dissertation

Doctor of Philosophy in Music Education

Code	Title	Credits
MUE 612	Quantitative Research in Music Education	3
Graduate Course in Qualitative Research		3-4
MUE 641	College Music Teaching	3
MUE 647	Psychology of Music	3
MUE 649	History of Western Music Education	3
MUE 607	Seminar: [Topic] (Seminar in Music Education)	3
MUE 601	Research: [Topic] (Dissertation Proposal Research) ¹	3-6
MUE 603	Dissertation ²	18
Additional Course Requirements		6-9
Total Credits		45-52

¹ Can be taken concurrently with or after comprehensive exam.

² Summer session enrollment requires advisor's consent.

Note: Music Education PhD students are exempt from non-music course requirements (p.), core, and general requirements.

In addition to the Division of Graduate Studies' requirements for doctoral degrees, the School of Music and Dance has the following core and general requirements. For additional information, contact the music graduate office or consult the Info for Grad Students (<https://music.uoregon.edu/current-students/info-graduate-music-students/>) webpage.

At least one-half of the required credits must be in courses intended for graduate students only.

When a graduate student is required to enroll as a full-time graduate student (e.g., doctoral residency, graduate employee), the student may not use undergraduate credits as part of the required 9 graduate credits for full-time enrollment. However, undergraduate credits that exceed the 9 graduate credits are acceptable.

Code	Title	Credits
Research Methods ¹		3
MUS 629	Repertoire and Analysis ²	3
MUE 641	College Music Teaching	3
Select two of the following:		6

MUS 660	Music in the Middle Ages	
MUS 661	Music in the Renaissance	
MUS 662	Music in the Baroque Era	
MUS 663	Music in the Classical Period	
MUS 664	Music in the Romantic Era	
MUS 665	Music in the 20th Century ³	
Total Credits		15

¹ MUS 611 for composition, MUS 614 for musicology, MUS 615 for music theory, and MUE 611 and MUE 612 for music education.

² Music theory students are not required to take MUS 629.

³ Students in composition must take Music in the 20th Century (MUS 665).

General Degree Requirements

Other courses. Eight credits of non-music courses (excluding basic language courses taken to fulfill the language requirement, and courses taken to fulfill the research development requirement) chosen in consultation with the faculty advisor.

Students in the PhD program in music education are exempt from this requirement.

Ensemble. Students in piano performance must enroll in three terms of piano accompaniment courses [.,.]. Students in music performance (collaborative piano option) must enroll in three terms of chamber ensemble accompaniment courses—. DMA students in voice, wind, string, or percussion performance must enroll in six consecutive terms of ensemble (or two cycles of three consecutive terms). Students must audition for ensemble placement before each fall term. Ensembles approved to fulfill this requirement are: University Symphony Orchestra, Oregon Wind Ensemble, Wind Symphony, University Singers, Chamber Choir, and Opera Workshop. Other ensembles (e.g. Collegium Musicum, Oregon Jazz Ensemble, etc.) may fulfill this requirement, at the discretion of the faculty auditioning committee and the student's applied instructor.

In making assignments, the ensemble auditioning committee and applied instructors consider the needs of the school's ensembles, the student's preference, level of ability, major performance medium, and the student's educational and musical needs.

Research Development. DMA and PhD candidates must complete eight credits (or two courses) in research development, chosen in consultation with the faculty advisor. Credits cannot be used to fulfill the requirement of eight non-music credits.

Additional Requirement

A minimum of two consecutive academic years (not including summer sessions) in residency at the University of Oregon.

Research Development. DMA and PhD candidates must complete eight credits (or two courses) in research development, chosen in consultation with the faculty advisor. Credits cannot be used to fulfill the requirement of eight non-music credits.

Additional Requirements

- consult with advisor and develop a plan to remedy any deficiencies and prepare for comprehensive examinations (no credit earned for this preparation)
- one public lecture (subject to faculty approval) given on the University of Oregon campus

Graduate Certificate in Music Performance

The performance certificate in music offers postbaccalaureate students the opportunity to focus deeply on performance studies outside the academic rigors of traditional graduate music degrees.

Graduate Certificate in Music Performance Requirements

The graduate certificate in music performance offers postbaccalaureate students the opportunity to focus deeply on performance studies outside the academic rigors of traditional graduate music degrees. Geared toward performing instrumentalists and singers who plan on full-time careers as soloists, chamber musicians, and/or large ensemble members, the one-year certificate program requires three terms of study in applied lessons, three terms of ensembles, one juried public recital, one regional outreach event, and minimal electives as approved by the student's advisor.

The graduate certificate is a one-year stand-alone program.

Applied lessons: 12 credits (4 credits each term for three terms, MUP 670–695). Applied lessons consist of one-on-one study with faculty specialists. The music school faculty includes 30 performance members. Students typically receive one hour of private instruction and one to two hours of studio class per week. Studio class includes peers in the same medium and provides the opportunity for weekly performances.

One large ensemble per term: 6 credits. Large ensembles at the music school that are eligible to candidates for the performance certificate include Symphony Orchestra, Oregon Wind Ensemble, Opera Workshop, University Singers, and Chamber Choir. These faculty-directed ensembles typically meet five to 10 hours per week and afford participants critical experience preparing and presenting repertoire invaluable to their future career paths.

One small ensemble per term: 3 credits. Small ensembles at the music school that are eligible to candidates for the performance certificate include Chamber Ensemble (typically two to six players, such as a string quartet) and Collegium Musicum, the study of music repertoire of the Medieval, Renaissance, and Baroque periods through rehearsals and extensive sight-reading of vocal and instrumental repertoire.

Electives, approved by the advisor: 6 credits. Music electives may be taken at the 500 level or above; if the student wishes to take 500- or 600-level theory or musicology courses, they must either pass the graduate music entrance exams or UO School of Music and Dance undergraduate courses as required.

Additional Requirements

- One juried public recital on the UO campus
- One community outreach event in the Northwest region

Code	Title	Credits
Three terms of applied lessons (MUP 665)		12
Three terms of large ensemble chosen from:		6

Division of Graduate Studies

Krista Chronister, Vice Provost for Graduate Studies

541-346-5129

Susan Campbell Hall, first floor

1219 University of Oregon

Eugene, Oregon 97403-1219

Graduate Council

The Graduate Council advises and makes recommendations to the vice provost for graduate studies on matters pertaining to graduate study at the University of Oregon, including changes or additions to policies and regulations governing graduate study. The council consists of a representative elected committee of 12 faculty members, two students, and the vice provost for graduate studies. The current Graduate Council membership is listed on the Division of Graduate Studies website.

Advanced Degrees and Certificates

The University of Oregon offers study leading to advanced degrees in the liberal arts and sciences and in the professional areas of business, conflict and dispute resolution, design, education, journalism and communication, and music. Program offerings are listed in the Graduate Majors and Specializations (<http://catalog.uoregon.edu/graduatemajors/>) section of this catalog.

For information about law degrees, see the **School of Law** section of this catalog.

Specific program requirements for most of these degrees appear in the departmental sections of this catalog; general requirements of the Division of Graduate Studies are stated in this section.

General Information

Students who want to earn a second bachelor's degree should not apply to the Division of Graduate Studies. They should submit an application for postbaccalaureate undergraduate student status to the Office of Admissions via their website (<https://admissions.uoregon.edu/other-applicants/postbaccalaureate/>) or by telephone, 541-346-3201.

Graduate Admission

To be admitted to the University of Oregon for the purpose of seeking a graduate degree or graduate certificate or for enrolling in a formal non-degree graduate program, students must hold a bachelor's degree from a regionally accredited four-year college or university in the United States or its equivalent from a foreign country and must be accepted by the major department in which they propose to study. All applicants for whom English is not a native/primary language must show proof of language proficiency. Information about requirements may be found online (<https://graduatestudies.uoregon.edu/admissions/how-to-apply/>).

Graduate Classification

Students seeking certificates or advanced degrees are classified as follows:

- Graduate postbaccalaureate
- Pre-master's

- Conditional master's
- Master's
- Post-master's
- Conditional doctoral
- Doctoral

The university's schools and departments determine their own requirements for graduate admission. Students should become familiar with these requirements before applying and address inquiries about graduate admission to the department or school in which they plan to study, not to the Division of Graduate Studies or to the Office of Admissions.

Initial student status may be either conditional or unconditional. If a student has not been granted unconditional student status after the completion of 36 credits of graduate course work, the Division of Graduate Studies may inquire into their status and recommend that a decision on the student's status be made as soon as possible.

A former University of Oregon student must be admitted formally in the same way as a student from any other college or university.

A student who has been admitted to a graduate program and wants to change their major must apply for admission to the new major.

Applicants must pay a nonrefundable \$70 application fee for domestic applicants or a \$90 application fee for international applicants. The Division of Graduate Studies offers fee waivers and discounts for applicants who meet specific criteria. More information is available here (<https://graduatestudies.uoregon.edu/admissions/how-to-apply/application-fee-waivers/>).

Application Procedure

Students seeking graduate admission must submit an online application. Links may be found on each program's website, or by contacting the program directly. At the time of application, applicants must submit unofficial transcripts from all colleges or universities previously attended, including the University of Oregon. Applicants who accept their offer of admission and matriculate must submit official transcripts from all colleges or universities from which they received a bachelor's degree or higher. More information is available here (<https://graduatestudies.uoregon.edu/admissions/how-to-apply/transcripts/>).

Programs determine additional transcript requirements. The applicant may also be asked to submit materials such as transcripts of test scores (e.g., Graduate Record Examinations, Miller Analogies Test) and letters of reference. The applicant should ascertain from the program what additional materials, if any, are expected and submit them in the manner described by the program. In some cases, these materials will be collected electronically as part of the online application.

Non-Native English Speakers

All applicants for whom English is not a native/primary language must show proof of language proficiency. More information is available here (<https://graduatestudies.uoregon.edu/admissions/how-to-apply/english-proficiency/>).

Admission for Graduate Postbaccalaureate Study

Applicants who wish to take graduate coursework but do not intend to pursue a specific graduate degree must apply online. Instructions are available here (<https://graduatestudies.uoregon.edu/postbaccalaureate-graduate-status-non-degree-seeking/>).

Language Requirement for International Graduate Employees

Graduate students who are non-native speakers of English who have been hired in teaching positions are required to demonstrate their spoken English proficiency by achieving a minimum score on the Test of Spoken English (TSE), the speaking component of either the Internet-based TOEFL, or the academic version of the International English Language Testing System (IELTS) test. Graduate employees who do not meet the minimum score for these tests must take the UO Speaking Proficiency English Assessment Kit (SPEAK) Test upon their arrival on campus. More information about the GE language requirement is available on the Division of Graduate Studies website.

International students who want instruction in English as a second language before beginning their studies at the University of Oregon or another university in the United States may enroll in the American English Institute. For more information, visit aei.uoregon.edu (<http://aei.uoregon.edu>).

Course Numbering System

500–599

Courses that offer graduate-level work in classes that may also include undergraduate students.

600–699

Graduate courses for graduate students only.

700–799

Except in the School of Music and Dance, courses of a highly technical nature that count toward a professional degree only, not toward advanced academic degrees such as an MA, MS, or PhD. Both 600- and 700-level courses with the MUP subject code denote graduate courses that apply toward advanced academic degrees in the School of Music and Dance.

503, 507, 508, 510, 601–610, 704–710

Graduate and professional courses that may be repeated for credit under the same number.

General Requirements and Policies

Students are responsible for staying informed about, and complying with, departmental regulations as well as Division of Graduate Studies regulations.

Course Registration Requirements and Limits

A graduate student may register for up to 16 credits of graduate or undergraduate course work. Registration in excess of this level, up to a maximum of 18 credits, requires payment of additional fees for each extra credit. During summer session, graduate students are limited to a maximum of 16 credits. Minimum registration is three graduate credits a term.

International students should request information from the International Student and Scholar Services in the Division of Global Engagement about Immigration and Naturalization Service regulations and minimum credit requirements.

Graduate students working toward an advanced degree must be enrolled continuously until all degree requirements are completed (see Continuous

Enrollment (p. 888)). Furthermore, students who use faculty assistance, services, or facilities must register each term for at least 3 graduate credits to compensate for usage. This includes students who are taking only comprehensive or final examinations or presenting recitals or terminal projects.

In the term in which a degree is granted, the student must register for at least 3 graduate credits. If the student is completing a master's degree thesis in this final term, registration must include at least 1 of the 3 credits in Thesis (503). If a doctoral dissertation is being completed, registration must include at least 3 credits in Dissertation (603). Exceptions may be made depending on the timing of the submission of the thesis or dissertation. See the Division of Graduate Studies website for details.

Students living elsewhere while writing a thesis or dissertation and sending chapters to an advisor for feedback must register for a minimum of 3 graduate credits a term; they should register for thesis or dissertation credits.

Various on- and off-campus agencies and offices have their own course-load requirements. For example, some agencies that offer student loans set registration requirements. The Office of the Registrar can only certify the number of credits for which a student has officially registered. Because the minimum registration requirements for the Division of Graduate Studies may not satisfy some agency requirements, it is the student's responsibility to register for the required number of credits.

Course Enrollment for Faculty and Staff Members

Faculty and staff members who want to take graduate courses should refer to the Human Resources office for information about regulations and fees.

Faculty members (including officers of administration) may not pursue an advanced degree in the department in which they hold an appointment. To pursue a degree in another department, they must submit a petition to the vice provost for graduate studies for approval. More information about the petition process is available on the Division of Graduate Studies website.

Joint-Campus Program

Graduate students at the university may, with advisor and departmental approval, take graduate courses at Portland State University or Oregon State University. A student registers for these courses with the University of Oregon registrar, who records each grade on the academic record under Joint Campus Experimental Course: [Topic] (JC 610). A maximum of 15 credits taken under the joint campus program may be applied toward a graduate degree program. Joint campus course work counts toward the 24 graded credits required for the master's degree. Additional information about eligibility and restrictions are available on the Division of Graduate Studies website. Forms are available in the Office of the Registrar.

WICHE Regional Graduate Programs

The Western Interstate Commission for Higher Education (WICHE) coordinates a graduate exchange program, the Western Regional Graduate Program (WRGP), to enable students from Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, North Dakota, Oregon, South Dakota, Utah, Washington, and Wyoming to apply for admission to selected professional programs and, if admitted, to be treated as resident students for tuition purposes.

The University of Oregon currently has a WRGP program in historic preservation. For information, visit the website (<https://archenvironment.uoregon.edu/hp/>).

WGRP certification must be renewed each academic year.

Grade Requirements

Graduate students must maintain at least a 3.00 grade point average (GPA) in graduate courses taken in the degree program. Grades of D+ or less for graduate courses are not accepted for graduate credit but are computed in the GPA. Similarly, the grade of N (no pass) is not accepted for graduate credit. A grade of pass (P) must represent work equal to or better than a B–.

A GPA below 3.00 at any time during a graduate student's studies or the accumulation of more than 5 credits of N or F grades—regardless of the GPA—is considered unsatisfactory. Accumulation of more than 7 credits of Incomplete is also considered unsatisfactory. Students found to be not making satisfactory progress may be placed on academic warning or academic probation, and may be dismissed from the program if improvement is not made. Additional satisfactory progress requirements and procedures may be found on the Division of Graduate Studies website.

Non-Degree Graduate Classifications

A student not seeking a graduate degree may be classified as a graduate student doing graduate-level work as follows:

- postbaccalaureate graduate
- premaster's
- postmaster's
- postdoctoral
- non-admitted non-degree seeking

Credits earned in these classifications are recorded on the student's transcript.

Up to 15 graduate credits earned under one or more of the above classifications may later be transferred in to a master's degree program if endorsed by the school or department and approved by the Division of Graduate Studies. Students must submit a Request for Transfer of Graduate Credit form, which is available on the Division of Graduate Studies website. These credits fall within the 15-credit maximum of transfer credit allowed for a master's degree program. Approved credits may be used to meet relevant university degree requirements.

Incompletes

For graduate students, there are two sets of policies regarding incompletes on the student record—the first is departmental, the second involves the Division of Graduate Studies. Division of Graduate Studies policies are described below; graduate students should check with their home department for information about program-specific policies.

Note: Accumulation of more than 7 credits of Incomplete is considered unsatisfactory. More information about satisfactory academic progress requirements is available on the Division of Graduate Studies website.

These policies apply to the level of the course and not to the level of the student. An undergraduate student in a graduate-level course will be evaluated under Division of Graduate Studies policy. A graduate

student in an undergraduate level course will follow policies in effect for undergraduate students.

Division of Graduate Studies Policy for Incompletes Assigned Beginning Fall 2022

Effective Fall 2022, the following policies apply to both undergraduate and graduate courses:

What is an Incomplete and When is it Appropriate?

A grade of "I" (Incomplete) represents an agreement between an instructor and a student to extend the deadline for coursework completion. Incompletes shall be granted when the instructor determines that the student meets all the following criteria. The student:

- has been making satisfactory progress on coursework as determined by the criteria in the syllabus;
- has been active in the course; and
- is able to independently complete the remaining requirements without attending additional classes beyond the term or receiving additional instruction;
- is unable to complete a portion of the course requirements due to extenuating circumstances beyond their control that occurred after the last day to drop a class (End of Week 7 of Fall/Winter/Spring terms; variable dates for summer courses);
- requests an Incomplete by the published deadline

If additional class attendance or instruction is required to complete course requirements, the instructor shall not issue an Incomplete.

Lack of engagement, poor performance, or a desire to repeat the course are unacceptable reasons for issuance of the "I" mark.

Instructors shall provide to the student access to course materials necessary to complete the missing work.

Incomplete grades can only be granted by instructors and instructors are under no obligation to grant students an incomplete grade if in their judgment the criteria stated above are not met.

An Incomplete shall not be recorded by the instructor unless a contract between the instructor and student has been completed and filed appropriately.

General Process for Incompletes

- Incompletes are initiated by the student
- Student contacts instructor and requests Incomplete by 5:00 pm on the last day of finals week.
- If the instructor agrees that the student meets the criteria, the instructor and the student complete and file a contract outlining how the Incomplete can be resolved, the deadline for resolving the Incomplete, and the default grade should the student not complete the agreed upon work. The default grade is the grade the student would receive according to the syllabus grade guidelines with no credit for the missing work.
- The missing work indicated on the form must be completed by the earlier of:
 - Grading deadline of the term the student applied to graduate, or

- Deadline stated on the Incomplete Request Form **can be extended at the discretion of the instructor, or*
- The day grades are due one academic year later

For students with Incomplete contracts, the instructor will record the grade of "I" in Duckweb that indicates an Incomplete has been agreed to. The instructor will also record, in Duckweb and/or the contract form, the grade the student would have received in the course if they received no credit for the missing work. This becomes the default grade that replaces the Incomplete mark should the student not complete the work outlined in the contract by the appropriate deadline (either the grading deadline of the term the student applied to graduate or the day grades are due one academic year later). If the student completes the work defined in the contract by the agreed upon date, the instructor calculates and updates the grade via the grade change process.

Division of Graduate Studies Policy for Incompletes Assigned Prior to Fall 2022

For Incompletes assigned in graduate courses prior to Fall 2022, Division of Graduate Studies policy requires that graduate students must convert a graduate course grade of Incomplete ("I") into a passing grade within one calendar year of the term the course was taken. After one year, the student must petition the Division of Graduate Studies for the removal of the incomplete.

To be eligible for Division of Graduate Studies approval on a Petition to Remove an Incomplete, all of the following criteria must be met:

- The Incomplete must be no more than seven years old
- The student must have the approval of the instructor to complete the outstanding course requirements
- The student must not have completed a terminal advanced degree since the term of enrollment in the course. Incompletes that remain on the academic record after a degree has been awarded may not be removed. All course work documented on the transcript at the time of the awarding of the degree stands as a permanent record and it is not permissible to revise the record

An incomplete "I" assigned to Research (601) or Terminal Project (609) does not require a petition. Research and terminal project credits require the instructor to submit a Supplementary Grade Report to the Office of the Registrar.

Continuous Enrollment

Unless leave status has been approved, a student in an graduate degree or certificate program must remain in continuous enrollment at the university, taking at least 3 graduate credits each term, until all the program's requirements have been completed. Registration for summer session is not required unless the student is using university facilities or faculty or staff services. Failure to maintain continuous enrollment effectively withdraws the student from graduate status. See Reinstatement.

On-Leave Status

A graduate student interrupting a study program for one or more terms, excluding summer session, must apply for on-leave status to ensure a place upon return. Only graduate students in good standing are eligible for on-leave status, except by petition and with the support of the student's academic department or program.

The Division of Graduate Studies must receive the application by the last day of finals week of the term the leave begins. Leave status is granted for a specified period excluding summer session. Students with approved leave status should not use university facilities or faculty or staff services during the on-leave term and therefore need not pay tuition or fees.

On-leave status does not extend the seven-year deadline except when the leave is for the student's serious health or medical condition or for parenting needs during the 12 months immediately following a child's birth or placement in the home.

Master's Students

Master's students, except summer-only students, may apply for a maximum of three academic terms of on-leave status during the course of study for the degree. A master's student who attends the university only during summer session must obtain on-leave status for each ensuing school year. These summer students also must complete all degree requirements within the seven-year time limit.

Doctoral Students

Doctoral students may apply for a maximum of six academic terms of on-leave status during the course of study for the degree. See Continuous Enrollment (p. 893) under Doctoral Degrees.

Additional details about on-leave status and how to apply are available on the Division of Graduate Studies website.

Reinstatement

A graduate student who fails to maintain continuous enrollment or obtain on-leave status is required to file a Petition for Reinstatement form, available on the Division of Graduate Studies website. The petition is reviewed by the student's major department and the Division of Graduate Studies. The student may, at the discretion of the department, be required to meet departmental admission policies and degree completion requirements that are in effect on the date of reenrollment. Doctoral students may, at the discretion of the department, be required to complete the doctoral residency requirement again. They may also be required to retake the comprehensive examinations if completed prior to stopping out, if the department feels that this is necessary in order to demonstrate currency of knowledge.

Review of the Petition for Reinstatement may result in a change of residency status from resident to nonresident for purposes of tuition assessment if the student has not maintained residency in Oregon. More information is available from the residency officer in the Office of Admissions.

Graduate Residency

Each graduate degree at the University of Oregon has a residency requirement that dictates how much of the work required for that degree must be completed at the University of Oregon. Please refer to the **Master's Degrees** and **Doctoral Degrees** sections below for details about residency requirements for each type of degree.

Waiver of Regulations

Graduate students may file a petition requesting exemption from any academic requirement. The petition must first be submitted to the academic department for review and supporting statement. The Division of Graduate Studies then reviews the educational purpose the regulation in question was designed to serve. Petitions are seldom granted if the only reason given is to save the student from inconvenience or expense.

Division of Graduate Studies petition forms are available on the Division of Graduate Studies website.

Graduate Tuition, Fees, and Financial Aid

Tuition and Fees

Graduate tuition varies by program. Please refer to the Office of the Registrar's website for the current tuition and fees schedule: <https://registrar.uoregon.edu/tuition-fees/graduate> (<https://registrar.uoregon.edu/tuition-fees/graduate/>).

Fellowships and Financial Aid

One purpose of scholarship and fellowship support provided by the UO Division of Graduate Studies is to enhance the diversity of the graduate student population by seeking talented students from groups historically underrepresented in graduate education. Broadening the talent pool from which graduate students are chosen enriches the educational and scholarly activities of all students and faculty members and is good academic practice. By bringing diverse individuals together to engage in intellectual activities, graduate programs engender respect for intellect, regardless of source, and help to build a community whose members are judged by the quality of their ideas.

At the University of Oregon, financial aid is available through graduate employee (GE) opportunities and research fellowships, training grant stipends, scholarships, work-study, loans, and part-time jobs. GEs are available to qualified graduate students who are enrolled in a graduate degree program. Inquire at the department for specific application deadlines. All GEs—research, teaching, and administrative—are represented by the Graduate Teaching Fellows Federation (GTFF), American Federation of Teachers, Local 3544. Recruitment and selection follow established published procedures from departments and the provisions of the GTFF collective bargaining agreement. Details of appointment procedures are available from the departments. Reappointment is subject to departmental policy but is always contingent upon making satisfactory progress toward the degree.

Teaching Fellowships

Nearly all the schools and departments award graduate employee (GE) opportunities. Salaries vary by department, and also depend on the student's past degrees and status within their academic program. More information about salary is available on the Division of Graduate Studies website. The minimum appointment is 0.20 FTE (Full Time Equivalent) and the maximum appointment is .49 FTE. Graduate employees (GEs) must be enrolled in an graduate degree program and must register for and complete a minimum of 9 graduate credits toward the degree each term. Audited courses do not count toward this requirement. Tuition for up to 16 credits a term, a health insurance premium subsidy, and mandatory fees subsidy are provided by the university. Failure to enroll for and complete the minimum of 9 credits a term may nullify an appointment.

Nonnative speakers of English who accept teaching-related GE positions must demonstrate appropriate English language proficiency. See "Language Requirement for International Graduate Employees" above.

Research Fellowships

A number of departments and schools employ graduate students to work on research projects under the supervision of faculty members. Funds typically come from research grants and contracts. Salaries and tuition policy are the same as for graduate students with teaching fellowships. In

addition, some departments have federally supported training grants and consider fellowship applicants for support through these resources.

Fellowships from Other Sources

Graduate students may be eligible for fellowship awards granted by federal agencies and private foundations. Information on internal and external funding opportunities is available on the website (<http://research.uoregon.edu/>) for the Office of the Vice President for Research and Innovation.

Postdoctoral Fellowships

The University of Oregon participates in several postdoctoral fellowship programs and provides facilities for postdoctoral study under faculty supervision. More information is available from individual schools and departments. Additional resources for postdoctoral fellows can be found on the Division of Graduate Studies website.

Other Financial Assistance

Some forms of financial aid depend on financial need, defined as the difference between the cost of attending an institution and the amount the student and his or her family can contribute toward these expenses. See the Student Financial Aid and Scholarships (p. 32) section of this catalog for information about available aid and application procedures.

International Students

International students may work on campus during the school year but should not expect to work off campus. Those who hold student (F-1) visas are expected to have sufficient funds for the period of their studies. Their dependents are not usually allowed to work. However, if it is necessary for a dependent to work, students should contact International Student and Scholar Services in the Division of Global Engagement.

International students are eligible for institutionally supported teaching and research fellowships described above.

Master's Degrees

Master's degree candidates must fulfill the requirements of the Division of Graduate Studies, which are listed below. Students must also complete the additional requirements set by the school or department in which the degree is to be awarded. These are described in the departmental sections of this catalog.

Credit Requirements

To earn a master's degree, students must complete a program of study totaling no fewer than 45 graduate credits. As noted above, some departments require more than 45 credits.

The credits must be taken after admission to the master's degree program or approved for transfer (see **Transferred Credit** below). Of the total, 24 credits must be in graded courses taken at the UO and passed with a grade point average (GPA) of 3.00 or better. A minimum of 30 credits in the major are required for a master's degree with a departmental major. In addition, at least 9 credits in courses numbered 600–699 must be taken in residence at the University of Oregon.

Students working toward a master's degree with thesis must register for a minimum 9 credits of Thesis (503). Credit for thesis is given pass/no pass.

Second Master's Degree

Students who earned the first master's degree from the University of Oregon may earn a second master's degree in another field by taking at least 30 graduate credits, of which 24 must be in courses taken for letter grades, after official admission as a master's degree candidate in the new major at the university. This provision does not apply to a second master's degree in the Interdisciplinary Studies Program (ISP). Although the second master's degree may be permitted with reduced credits, complete records of the student's graduate-level study must reflect the equivalent of all requirements for completion of the degree as described in the University of Oregon Catalog. Schools and departments may require more than this 30-credit minimum or deny the request. If the first master's degree is from another institution, the second master's degree program must comply with the standard university master's degree requirements (a minimum of 45 credits). Students pursuing two graduate degrees at the same time must file a concurrent degree form, available on the Division of Graduate Studies website.

Accelerated Master's Programs (AMPs)

The Division of Graduate Studies offers exceptional undergraduate students in selected majors the opportunity to earn both a bachelor's degree and master's degree in as few as 5 years. Accelerated Master's Programs (AMPs) are for high-achieving undergraduates in participating majors who plan to continue in a master's program. To determine if this is an option in your major, see the list of currently approved AMPs on the Division of Graduate Studies website.

Each AMP sets its own admission criteria and internal admissions processes. Interested students should inquire with the program offering the AMP regarding admission.

AMP Policies:

- Students must be classified as Juniors or Seniors in order to apply to an AMP.
- AMP students must be classified as Seniors in order to begin taking graduate-level courses.
- Typically, AMP students may take up to 24 graduate credits while classified as undergraduates, some of which may be used toward both bachelor's and master's degree requirements. However, AMP requirements and credit limits vary from program to program. Check with the department offering the AMP for more information about requirements specific to that program.
- Students will be charged at the undergraduate rate and retain eligibility for undergraduate scholarships during this transition year.
- Students will be considered undergraduates until the bachelor's degree is conferred, at which point they will be officially admitted as master's students, be charged at the graduate tuition rate, and be eligible for graduate assistantships.
- While classified as undergraduates, even if taking graduate classes, students will be subject to all undergraduate policies, including Academic Standing rules for undergraduate students.
- Students who have been accepted to an accelerated master's program must complete all of their bachelor's degree requirements and graduate within 12 months of the first day of the quarter in which they begin taking graduate courses as part of the accelerated program. Students who fail to do so will undergo a progress review and may be dismissed from the AMP.
- A student who is admitted to an AMP and subsequently decides not to continue into the master's program may still count up to 24

graduate credits earned as an undergraduate toward the bachelor's degree, but they may not use those graduate credits toward a UO graduate degree should they decide to return to the UO at a later date.

- 400-level courses will not be allowed to count toward minimum master's degree requirements, even by petition and even if the associated 500-level course would have been accepted toward master's degree requirements. In the case of a student who has already taken a 400-level course and the corresponding 500-level course is required for the master's degree, the student may be required to take the 500-level course. Once accepted to an accelerated master's program, the designated AMP coordinator for the program should work closely with students to ensure registration in the appropriate graduate-level courses.

Time Limit

Students must complete all work for the master's degree within seven years, including transferred credits, thesis, the language requirement for an MA, and all examinations. On-leave status does not extend the seven-year deadline except when the leave is for the student's serious health or medical condition or for parenting needs during the 12 months immediately following a child's birth or placement in the home.

Residency and Enrollment Requirements

For a master's degree, the Division of Graduate Studies requires that a minimum of 30 credits (applicable to degree requirements) be taken at the University of Oregon during at least two terms of study. A second University of Oregon master's degree also requires a minimum of 30 credits and at least two terms of study at the University of Oregon. Individual schools or departments may have additional residence requirements.

Students enrolled in a graduate degree program must attend the university continuously, except for summers, until all the program's requirements have been completed, unless on-leave status has been approved. For more information, see *Course Registration Requirements and Limits* (p. 886), *Continuous Enrollment* (p. 888), *Graduate Residency* (p. 888), and *On-Leave Status* (p. 888) under *General Requirements and Policies*.

Transferred Credit

Graduate Credit from Other Institutions

Graduate credit earned while enrolled as a graduate student at another accredited college or university may be counted toward the master's degree under the following conditions:

1. Total transferred credits may not exceed 15 credits
2. Courses must be relevant to the degree program as a whole
3. The student's home department and the Division of Graduate Studies must approve the transfer
4. Grades earned must be A+, A, A-, B+, B, or P
5. The courses may not have been used to satisfy the requirements for another degree
6. Transfer courses are subject to the seven-year limit for degree completion

Transferred credit may not be used to meet the requirement of 24 credits in University of Oregon graded graduate courses, nor are they used in computing the UO cumulative GPA.

Reservation of Graduate Credit: Permission to Register for Graduate Credit

An undergraduate student must request permission to register for a graduate-level course. The student must file a Reservation of Graduate Credit form with the Division of Graduate Studies by Wednesday of week 1 of the term in which they want to enroll in the graduate course. The form is available on the Division of Graduate Studies website. Two options are available for disposition of course credits.

Note: These options do not apply to students participating in an Accelerated Master's Program (AMP). AMP students should refer to Accelerated Master's Program policies for information about taking graduate classes while classified as an undergraduate.

Option 1

Include the graduate-level course in requirements for the bachelor's degree. To be eligible, the student must be admitted as an undergraduate and have earned a minimum GPA of 3.00 in each of the three terms prior to enrolling in the graduate course. Non-admitted non-degree seeking students are ineligible for this status. Undergraduates receiving less than a grade of B in a graduate-level course will be ineligible for further enrollment in graduate-level course work.

Option 2

Reserve the graduate-level course for consideration by a department after admission as a graduate student. This option is available to seniors only and is limited to a maximum of three graduate courses not exceeding a total of 12 credits. To be eligible, the student must have earned a minimum GPA of 3.00 in each of the three terms prior to enrolling in the graduate course. Non-admitted non-degree seeking students are ineligible for this status. Undergraduates receiving less than a grade of B in a graduate-level course will not be allowed to use the course toward a master's degree, and will be ineligible for further reservations of graduate credit.

Undergraduates do not qualify to receive credits for the following graduate classes: Research (601), Supervised College Teaching (602), Internship (604), Reading and Conference or Special Problems (605), Field Studies or Practicum (606), Workshop or Laboratory Projects (508 or 608), and Terminal Project or Capstone (609).

Transfer of Reserved Graduate Credit

Undergraduates who completed graduate-level courses at the University of Oregon under the Reservation of Graduate Credit petition process and who reserve the courses by choosing Option 2 on the petition form may apply up to 12 credits toward the master's degree.

Course work taken for letter grades (B or better) and P/N courses, if accompanied by the instructor's statement that the passing grade was equal to a B or better, is eligible for consideration. If approved, these courses can be used to satisfy relevant university master's degree requirements. A Request for Transfer of Graduate Credit form (available on the Division of Graduate Studies website) must be filed within two terms of acceptance into a master's degree program and within two years of earning the bachelor's degree. Any credits transferred under this option fall within the 15-credit transfer maximum.

Other University of Oregon Transferred Credit

A maximum of 15 graduate credits earned at the University of Oregon while classified as a graduate postbaccalaureate student, a non-admitted non-degree seeking graduate student, or a student earning a graduate certificate may later be counted toward the master's degree (see Other

Graduate Classifications (p. 887) under General Requirements and Policies), pending school or department endorsement and Division of Graduate Studies approval. This is within the overall 15-credit maximum for transfer. Grades earned must be A+, A, A-, B+, B, or P. A Request for Transfer of Graduate Credit form (available on the Division of Graduate Studies website) must be approved for credits completed under these classifications to be applied to degree requirements.

Transfer of Credit for Doctoral Students

There is no formal university transfer credit process for doctoral students. Each program sets its own policy regarding acceptance of transfer credits, and is responsible for tracking how transfer credits fit into departmental degree requirements. Transfer credits can only be used to meet departmental degree requirements; they cannot be used to waive or substitute for minimum Division of Graduate Studies doctoral degree requirements.

Distinction between MA and MS Degrees

Students pursuing a master of arts (MA) degree must demonstrate competence in a second language. Details of the MA language requirement are available on the Division of Graduate Studies website. There is no language requirement for the master of science (MS) and professional master's degrees unless the department so specifies.

Examinations and Thesis

The student's major school or department may require qualifying, comprehensive, or final examinations or any combination of these. The content and methods of conducting such examinations are the responsibility of the school or department.

In some fields, master's degree candidates must submit a thesis; in others the thesis is optional. A student who writes a thesis must complete the following procedures:

1. Request information from the major school or department about the various steps involved and the standards expected
2. Consult the Thesis and Dissertation Style and Policy Manual, available on the Division of Graduate Studies website. Only theses that meet the standards of style and form discussed in that manual are accepted

The advisory committee, appointed by the department, determines the work to be completed in light of the student's academic background and objectives. The number of committee members is determined by the department. The advisor is expected to be a member of the regular faculty, tenured or tenure-track.

Research Compliance

See Research Compliance (p. 891) in the **General Requirements and Policies** section of this catalog.

Summary of Division of Graduate Studies Requirements

The following outline lists minimum Division of Graduate Studies requirements for master's degrees. Specific departmental requirements must also be met before the student is awarded an advanced degree. Credit requirements listed below must be met with graduate credits.

Language Requirement	MA only
Minimum GPA	3.00
Minimum thesis credits*	9 credits

Time limit for program completion	Seven years
Total credit minimum	45 credits
Registration minimum per term	3 credits
Minimum graded credits taken in residence	24 credits
Minimum 600 level credits in residence	9 credits
Minimum credits in major	30 credits
Minimum credits taken at UO	30 credits

*The school or department specifies whether a thesis is mandatory or optional; however, a student writing a thesis must register for at least 9 credits in Thesis (503).

Interdisciplinary Master's Degree Programs

Interdisciplinary Studies Program

The Interdisciplinary Studies Program (ISP) is the university's most flexible interdisciplinary program leading to MA and MS degrees. The program is designed for students with specific, well-articulated goals that cannot be reached through established departmental programs. Although flexibility is allowed in program design, the program must be composed of existing graduate courses from two or three approved master's degree programs. Detailed requirements are available on the Division of Graduate Studies website.

Guidelines in the ISP include the following:

1. A maximum of 15 credits may be used from practicum, field studies, research, and reading and conference courses. Such credit must be distributed across the different areas of the program
2. The terminal project or thesis consists of 9 credits in either Terminal Project (IST 609) or Thesis (IST 503)
 - a. At least 30 of the 45 minimum credits for the degree must be taken after the candidate is admitted to the IS program

Admission is selective. Acceptance into the program is based on background qualifications, the statement of purpose, and the appropriateness and availability of courses and advisors at the university. An applicant who has been denied admission to a departmental graduate program at the university must have departmental permission to use that department as a program area.

Approval must be obtained in writing from each of the two or three advisors, indicating their willingness to serve and their approval of the Tentative Program of Study. One of the advisors must be designated as chair. Prior to being offered admission, approval is also required from the department head or director of graduate studies from each department included in the applicant's program of study. Subsequent changes in the program must be approved by both the advisor in the area involved and the ISP director. More information about the ISP is available on the Division of Graduate Studies website.

Doctoral Degrees

Doctor of Philosophy

The degree of doctor of philosophy (PhD) requires distinguished achievement in both scholarship and original research. The degree is granted chiefly in recognition of the candidate's high attainment and ability in a special field of an academic discipline, as shown by work on required examinations and by the preparation of a dissertation. Minimum university and school, college, or department requirements

of residence and study must be satisfied. The requirements for PhD degrees established by the Division of Graduate Studies are given below. Individual programs have additional specific requirements, which are presented in the departmental sections of this catalog.

Residency and Credit Requirements

For the PhD degree, the student must complete the equivalent of at least 81 credits of graduate-level academic work beyond the bachelor's degree over the course of at least three calendar years.

The doctoral residency requirement is as follows:

- At least 27 credits of graduate course work toward the doctoral degree must be completed at the University of Oregon while classified as a doctoral student. Course work completed as a UO master's student may count toward the doctoral residency requirement under these circumstances: (1) the master's program is in the same major as the doctoral program; (2) no more than one calendar year has lapsed between the last term of enrollment as a master's student and the start of the doctoral program
- Of these 27 credits, at least 14 credits must be in regular course work—i.e., not in individualized study credits such as Research (601), Reading and Conference (605), and Special Problems (605)
- The 18 required credits in Dissertation (603) do not count toward the residency requirement

Language Requirement

Individual departments or programs may require knowledge of a second language or of other specialized disciplines, such as computer science or statistics, as part of a PhD program. Information about these requirements is available from the department or program offering the degree.

Candidates for the doctor of philosophy degree at the University of Oregon are expected to have proficiency in at least one language in addition to English if a substantial, relevant body of literature in one or more languages exists in the candidate's specialized field of dissertation research. It is the responsibility of the candidate's advisor or doctoral committee to determine which languages the candidate is expected to know before beginning dissertation research. Guidelines for language proficiency are established by the candidate's home department or program.

Advisory Committee

The advisory committee, appointed by the department, determines the work to be completed in light of the student's academic background and objectives. This committee usually consists of three or four members, and the student's advisor is chair.

Examinations and Advancement to Candidacy

Every PhD student must pass comprehensive examinations (oral, written, or both) or other similar requirements set by the department that cover the primary areas of the student's program and, if applicable, any supporting area required by the department. The student is responsible for material directly covered in completed graduate courses and for additional independent study in his or her field. Students should consult their department's/program's website or graduate handbook for information about requirements for advancing to candidacy.

Within two weeks of the student meeting these requirements, the home department and the student must submit a report via GradWeb to the Division of Graduate Studies recommending advancement to candidacy.

Dissertation

All candidates must submit a dissertation based on independent and original research. The dissertation must contribute significantly to knowledge, show a mastery of the literature of the subject, be written in acceptable literary style, and conform to the standards outlined in the University of Oregon Thesis and Dissertation Style and Policy Manual. The manual is available from the Division of Graduate Studies website. Doctoral dissertations must be submitted electronically to ProQuest. Copyright registration is optional. Theses and dissertations completed at the University of Oregon will be available in Scholars' Bank, the UO's open-access repository for the intellectual work of its faculty, students, and staff at the University of Oregon.

Research Compliance

See Research Compliance (p. 891) in the **General Requirements and Policies** section of this catalog.

Dissertation Committee

Following advancement to candidacy, the candidate's department proposes the membership of the dissertation committee to the vice provost of graduate studies, who appoints the committee after approving it.

The dissertation committee consists of a minimum of four members, each with a particular role:

- Chair (<https://gradschool.uoregon.edu/academics/policies/doctoral/dissertation-committee-policy/#chair>)
- 2 Core Members (<https://gradschool.uoregon.edu/academics/policies/doctoral/dissertation-committee-policy/#core-members>)
- Institutional Representative (<https://gradschool.uoregon.edu/academics/policies/doctoral/dissertation-committee-policy/#institutional-rep>)
- Note: Committees in Biology, Chemistry and Biochemistry, and Physics also have an Advisor separate from the Chair

The chair and core members are typically from the department awarding the degree and the Institutional Representative is from another department. When appropriate, some of the home department committee members may be from another department, with the approval of the Division of Graduate Studies and the home department. The committee must be proposed to the Division of Graduate Studies no later than six months before the dissertation defense.

A detailed description of the policy on dissertation committees is available on the Division of Graduate Studies website.

Dissertation Registration

Registration for Dissertation (603) is allowed only after the candidate has advanced to candidacy. Doctoral students must have a minimum of 18 credits of Dissertation (603) to graduate. Doctoral students are required to enroll for a minimum of 3 credits of Dissertation (603) in the term of degree completion and during any other term in which they are utilizing faculty time or university resources.

Defense of Dissertation

A formal, public defense must take place at a date set by the committee chair and approved by the Division of Graduate Studies.

Tentative approval of the dissertation by the committee is recommended prior to formal defense. This evaluation is based on copies of the final manuscript, which the candidate provides for the dissertation committee at least three weeks before the formal defense.

The approved application for final oral defense must also be filed with the Division of Graduate Studies two weeks before the formal defense. Visit the Division of Graduate Studies website for specific instructions.

The time and place of the defense must be publicly noted. The dissertation committee must be present at the defense (with some exceptions—see the Division of Graduate Studies website for details). Remote defenses are also allowed; refer to the Division of Graduate Studies website for details.

Completion of Dissertation

Within two weeks following the defense of the dissertation but before the dissertation is submitted to the Division of Graduate Studies, committee members must enter their approval of the defense in GradWeb, only if they have seen and approved what is substantially a final draft and if they are willing to delegate the oversight of any remaining minor revisions to the chair. If this is not the case, they should not approve the defense. Approval requires a unanimous vote. In the event of a split vote, the vice provost for graduate studies determines the review procedure after consultation with the student, the department chair (or the school or college dean), and the committee. Once the dissertation has been approved by the committee, the student must submit the dissertation electronically to the Division of Graduate Studies. Visit the Division of Graduate Studies website for deadlines and submission instructions.

Time Limit

The seven-year time limit for completing a doctoral degree begins with the first term of admission as a conditional or regular doctoral student at the University of Oregon. The residency requirement, the completion of advancement to candidacy requirements, and the completion of the doctoral dissertation must all be accomplished within this seven-year period. On-leave status does not extend the seven-year deadline except when the leave is for the student's serious health or medical condition or for parenting needs during the 12 months immediately following a child's birth or placement in the home.

A petition for an extension of the period can only be considered if the student has already advanced to candidacy and has an approved dissertation proposal by the end of the seventh year. Petitions for extension of the seven-year limit may include the requirements of recompleting the doctoral residency requirement, advancement to candidacy requirements, or both. Petitions are evaluated case by case and are not automatically granted. Students on seven-year extensions must submit quarterly renewals outlining their progress before they are allowed to register for the next quarter.

Continuous Enrollment

Unless on-leave status has been approved, a student enrolled in a doctoral program must attend the university continuously until all the program and university requirements, including submission of the dissertation to the Division of Graduate Studies, have been met. To be continuously enrolled, the student must register for 3 graduate

credits each term excluding summer sessions. See On-Leave Status (p. 888) under General Requirements and Policies.

On-Leave Status

While on on-leave status, the doctoral candidate acknowledges that he or she is not using any university or faculty services (e.g., no examinations are being taken, no committee changes are being processed, and no dissertation chapters are being submitted for review). On-leave status maintains the student's status as a degree candidate and reserves a place for dissertation supervision and other academic affairs upon the student's return to active enrollment within the seven-year time limit.

Doctor of Education

The Doctor of Education (DEd) degree is granted in recognition of the candidate's mastery of theory, practice, and research in professional education. The general requirements for residence, dissertation, advancement to candidacy, time limit, and continuous enrollment are the same as for the PhD degree. See the College of Education (p. 685) section of this catalog for details.

Doctor of Musical Arts

Requirements for the doctor of musical arts (DMA) degree include formal admission, proficiency and comprehensive examinations, second languages, a program of study including area of emphasis, and a dissertation, lecture document, or digital portfolio. Requirements for residence, time limit, and continuous enrollment are the same as those listed for the PhD degree. See the **School of Music and Dance** section of this catalog for details.

Chronological Summary of Procedures Leading to Doctoral Degrees

- 1. Admission**
- 2. Continuous enrollment.** Students enrolled in advanced degree programs must attend the university continuously (except for summers) until all the program's requirements are completed, unless on-leave status has been approved. Minimum enrollment is 3 graduate credits a term.
- 3. Course work and residence.** Student's advisory committee, appointed by the department, school, or college, determines the program, which must include at least 81 credits of accredited graduate work beyond the bachelor's degree over the course of at least three years, of which at least 27 credits must be completed at the University of Oregon, and of which 18 credits are in Dissertation (603).
- 4. Second languages or other specialized knowledge.** Regulations are set by the department, school, or college.
- 5. A comprehensive examination or other similar requirements** covering the major discipline advances the student to candidacy for the degree. Advancement to candidacy is completed after the majority of required course work has been completed and after most of the requirements for the degree, except completion and defense of the dissertation, have been satisfied.
- 6. Appointment of dissertation committee, registration for Dissertation (603), and completion of dissertation.** The committee is appointed following advancement to candidacy and at least six months before completion of the dissertation. Typically, the committee consists of at least three members of the graduate faculty of the candidate's home department as well as an Institutional Representative who is a graduate faculty member from outside the

candidate's department. A minimum of 18 credits in Dissertation (603) are required after advancement.

- 7. Application for degree** made to the Division of Graduate Studies. Deadlines and instructions are available on the Division of Graduate Studies website.
- 8. Defense of dissertation.** The approved application for final oral defense must be filed with the Division of Graduate Studies no later than three weeks before the date of defense.
- 9. Dissertation submission and publication.** Dissertations are submitted electronically through ProQuest. Detailed instructions are available on the Division of Graduate Studies website.
- 10. Conferral of degree.** The degree is conferred at end of term in which all degree requirements are satisfied.
- 11. Diploma issued.** The diploma is issued by Office of the Registrar approximately 6-10 weeks after the end of the term of degree conferral.

Graduate Studies Courses

GRST 602. Supervised College Teaching. 1-5 Credits.

Repeatable.

GRST 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

GRST 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

GRST 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

GRST 610. Experimental Course. 1-5 Credits.

Repeatable.

GRST 621. Academic Discourse. 4 Credits.

For international graduate students. Strategies for effective interaction and discussion in academic settings, including lectures, seminars, and campus events. Feedback on intelligibility, accurate language use, and cultural appropriateness.

GRST 624. Teaching in United States Universities. 4 Credits.

Strategies for successful communication with undergraduates. Focuses on increasing cross-cultural awareness and developing language and interaction skills for effective instruction. Topics include presenting material, fielding questions, leading discussions, supervising labs.

GRST 626. Professional Presentations. 4 Credits.

Concepts and principles of academic and professional presentations for graduate students, focusing primarily on the needs of international students. Includes both theory and application in terms of cultural norms, rhetorical style, and linguistic performance. Repeatable twice for a maximum of 12 credits.

GRST 631. Graduate and Scholarly Writing I. 4 Credits.

Prepares first-year international graduate students to write academic papers; emphasis on fluency, organization, discourse conventions, accuracy, documentation, and appropriateness for writing tasks, including summaries, reviews, projects, reports, and research papers.

Interdisciplinary Studies Courses

IST 503. Thesis. 1-16 Credits.

Repeatable.

IST 601. Research: [Topic]. 1-16 Credits.

Repeatable.

IST 602. Supervised College Teaching. 1-5 Credits.

Repeatable.

IST 605. Special Problems: [Topic]. 1-16 Credits.

Repeatable.

IST 606. Practicum: [Topic]. 1-16 Credits.

Repeatable.

IST 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

IST 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

IST 609. Terminal Project. 1-16 Credits.

Repeatable.

IST 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

Joint Campus Courses

JC 610. Joint Campus Experimental Course: [Topic]. 1-15 Credits.

Knight Campus

Robert Guldberg, Vice President and Robert and Leona DeArmond Executive Director Faculty Affiliate

541-346-2120

The Guldberg Lab

The Phil and Penny Knight Campus for Accelerating Scientific Impact is a \$1 billion initiative to fast-track scientific discoveries into innovations that improve the quality of life for people in Oregon, the nation, and the world. The campus creates the intellectual infrastructure to establish Oregon as a center for both research and development, making Oregon a place where companies can start-up, grow, and stay.

Mission: Science advancing society

Vision: Dramatically shorten the timeline between discovery and societal impact through world-class research, training and entrepreneurship in a nimble scientific enterprise.

Goals:

- Redefine the modern research university by fostering world-changing research unfettered by traditional academic boundaries
- Serve as the educational engine driving the new economy of Oregon
- Transform student education through discovery-driven learning
- Engage the public in the excitement and creativity of scientific research
- Foster diverse perspectives and participation in scientific research
- Improve the health and wellbeing of the citizens of Oregon, the nation, and the world

Bioengineering

The Phil and Penny Knight Campus for Accelerating Scientific Impact is a \$1 billion initiative to fast-track scientific discoveries into innovations that improve the quality of life for people in Oregon, the nation, and the world. The campus creates the intellectual infrastructure to establish Oregon as a center for both research and development, making Oregon a place where companies can start-up, grow, and stay.

Minor in Bioengineering

Code	Title	Credits
Core Courses		
BIOE 251 & BIOE 252 & BIOE 253	Fundamentals of Bioengineering I and Fundamentals of Bioengineering II and Fundamentals of Bioengineering III	12

BIOE minor interdisciplinary electives

Up to eight credits from this list may be applied towards the upper-division bioengineering minor requirement. Courses used to complete a student's major core requirements may not be applied towards the bioengineering minor elective requirement.

Bioengineering resides at the interface of engineering and the natural sciences, and a thorough knowledge of both is essential for innovation and problem solving in the discipline. The courses below provide an opportunity for students to strengthen their knowledge within their primary discipline in several areas particularly relevant to bioengineering,

including: genetics, microbiology, physiology, chemistry, neuroscience, physics and electronics.

Code	Title	Credits
Biology		
BI 320	Molecular Genetics	4
BI 322	Cell Biology	4
BI 326	Immunology and Infectious Disease	4
BI 328	Developmental Biology	4
BI 330	Microbiology	3
BI 331	Microbiology Laboratory	3
BI 353	Sensory Physiology	4
BI 358	Investigations in Medical Physiology	4
BI 360	Neurobiology	4
BI 423	Human Molecular Genetics	4
BI 424	Advanced Molecular Genetics	4
BI 426	Genetics of Cancer	4
BI 427	Molecular Genetics of Human Disease	4
BI 428	Developmental Genetics	4
BI 461	Systems Neuroscience	4
BI 466	Developmental Neurobiology	4
BI 485	Techniques in Computational Neuroscience	4
Chemistry and Biochemistry		
CH 360	Physiological Biochemistry	4
CH 461	Biochemistry	4
CH 462	Biochemistry	4
CH 463	Biochemistry	4
CH 464	RNA Biochemistry	4
CH 465	Physical Biochemistry	4
CH 466	Structural Biochemistry	4
CH 467	Biochemistry Laboratory	4
Physics		
PHYS 351	Foundations of Physics II	4
PHYS 352	Foundations of Physics II	4

PHYS 481	Design of Experiments	4
Human Physiology		
HPHY 321	Human Anatomy I	5
HPHY 322	Human Physiology I	5
HPHY 323	Human Anatomy II	5
HPHY 324	Human Physiology II	5
HPHY 325	Human Anatomy and Physiology III	5
HPHY 362	Tissue Injury and Repair	4
HPHY 381	Biomechanics	4

HPHY 432	Neural Development	4
HPHY 436	Clinical Neuroscience	4

At least 12 upper-division credits must be completed in residence.

The joint OSU-UO PhD program combines an immersive curriculum, impactful research, and targeted professional development to advance science, society, and your career. Joint program students have full access to resources at both UO and OSU, including research facilities and collaborations, coursework, training workshops, and student groups.

Students may choose an advisor or co-advisors from the bioengineering faculty at either UO or OSU.

Doctor of Philosophy in Bioengineering

Courses

BIOE 196. Field Studies: [Topic]. 1-12 Credits.

Repeatable.

BIOE 198. Laboratory Projects: [Topic]. 1-12 Credits.

Repeatable.

BIOE 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

BIOE 251. Fundamentals of Bioengineering I. 4 Credits.

This is the first in a three-course series that introduces students to foundational principles in bioengineering. Topics include units, dimensional analysis, energy balances, conservation of mass, energy, and momentum, and introductory biomechanics.

Prereq: BIOE 111, BIOE 112, BIOE 113, MATH 251; Co-req: PHYS 251.

BIOE 252. Fundamentals of Bioengineering II. 4 Credits.

This is the second in a three-course series that introduces students to foundational principles in bioengineering. Topics include linear circuits, Fourier transforms, fluid pressure, the Bernoulli Equation, conservation principles in fluid control volumes, and laminar fluid flow.

Prereq: BIOE 251.

BIOE 253. Fundamentals of Bioengineering III. 4 Credits.

This is the third in a three-course sequence that introduces students to foundational principles in bioengineering. In this course, students will apply the engineering concepts acquired in the first two Fundamentals of Bioengineering courses to solve complex, real-world bioengineering problems. Sequence with BIOE 251, BIOE 252.

Prereq: BIOE 252.

BIOE 299. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

BIOE 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

BIOE 401. Research: [Topic]. 1-12 Credits.

Repeatable.

BIOE 402. Supervised College Teaching. 1-5 Credits.

Repeatable.

BIOE 403. Thesis. 1-12 Credits.

Repeatable.

BIOE 404. Internship: [Topic]. 1-12 Credits.

Repeatable.

BIOE 405. Reading and Conference: [Topic]. 1-5 Credits.

Repeatable.

BIOE 406. Field Studies: [Topic]. 1-12 Credits.

Repeatable.

BIOE 407. Seminar: [Topic]. 1-5 Credits.

Repeatable.

BIOE 408. Laboratory Projects: [Topic]. 1-12 Credits.

Repeatable.

BIOE 409. Terminal Project. 1-12 Credits.

BIOE 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

BIOE 601. Research: (Topic). 1-16 Credits.

Repeatable.

BIOE 603. Dissertation. 1-16 Credits.

Repeatable.

BIOE 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

BIOE 610L. Experimental Course: [Topic]. 4 Credits.

Repeatable.

Research Centers and Institutes

The university's interdisciplinary centers and institutes provide opportunities for graduate training and research. Members hold faculty positions in related academic departments. Students who want to work in one of the institutes as part of thesis or dissertation research must satisfy the graduate degree requirements of the related department through which they earn their degree.

Students who want to work in any of these fields may obtain information about the programs and financial aid from institute and center directors as well as online (<http://research.uoregon.edu/content/uo-research-centers-and-institutes/>).

Center for Cybersecurity and Privacy

Jun Li, Director

541-346-4424

[ccsp.uoregon.edu \(http://ccsp.uoregon.edu/\)](http://ccsp.uoregon.edu/)

The Center for Cybersecurity and Privacy conducts a variety of research projects and educational efforts focusing on the security of computer networks and systems. The center brings together faculty members working in multiple departments and schools, including the Department of Computer Science, the Department of Philosophy, the Charles H. Lundquist College of Business, the School of Law, and Information Services, among others.

Center for the Study of Women in Society

Michelle McKinley, Director

541-346-5015

[csws.uoregon.edu \(http://csws.uoregon.edu/\)](http://csws.uoregon.edu/)

This multidisciplinary research center generates, supports, and disseminates research on gender and all aspects of women's lives. A member of the National Council for Research on Women, the center is one of 95 women's research and policy centers in the United States and among 300 such centers in more than 80 countries.

Committee on the Advancement of Women Chemists

Geri Richmond, Director

[coach.uoregon.edu/ \(https://coach.uoregon.edu/\)](https://coach.uoregon.edu/)

The committee is a grassroots organization working to increase the number and career success of women scientists and engineers. In addition to providing avenues for networking and mentoring of scientists and engineers at all levels, it works closely in an advisory capacity with many institutions, government organizations, and departments to create a professional workplace that provides an equal opportunity for discovery.

Institute for Fundamental Science

Graham Kribs, Director

[ifs.uoregon.edu/ \(https://ifs.uoregon.edu/\)](https://ifs.uoregon.edu/)

The Institute for Fundamental Science (IFS) is the home at the University of Oregon for research whose primary aim is to understand, explore, and extend the fundamental laws of nature, with an emphasis on the

consequences for observable phenomena. The IFS brings together the UO's investigations in experimental and theoretical high energy particle physics, astrophysics and astronomy, and is complemented by a variety of inquiries into other foundational topics.

Institute for a Sustainable Environment

Heidi Huber-Stearns, Director

541-346-0675

[sustainable.uoregon.edu \(http://sustainable.uoregon.edu\)](http://sustainable.uoregon.edu/)

The institute performs interdisciplinary research at the nexus of ecological, economic, and social sustainability, resolving complex problems and enabling communities to sustain economies and environmental systems through investigation and analysis of natural resource management, land use, climate change, rural development, transportation, renewable energy, natural hazards, and environmental education.

Institute of Ecology and Evolution

Matt Streisfeld, Director

541-346-4532

[ie2.uoregon.edu \(http://ie2.uoregon.edu\)](http://ie2.uoregon.edu/)

The Institute of Ecology and Evolution, established in 2002 as the Center for Ecology and Evolutionary Biology, promotes and facilitates research and graduate education in ecology and evolutionary biology. The institute encourages scientific interactions among its members and between members and the wider academic community.

Institute of Molecular Biology

Alice Barkan, Director

541-346-5145

[molbio.uoregon.edu \(http://molbio.uoregon.edu/\)](http://molbio.uoregon.edu/)

The University of Oregon offers a wide variety of research and training opportunities in contemporary molecular, structural, cellular, and developmental biology. The institute fosters research and training in contemporary biology at the molecular level by bringing scientists from biology, chemistry, and physics into a common intellectual and physical space.

Institute of Neuroscience

David McCormick, Director

541-346-4556

[ion.uoregon.edu/ \(https://ion.uoregon.edu/\)](https://ion.uoregon.edu/)

The Institute of Neuroscience is an interdisciplinary research group of scientists, with faculty members and students drawn from the Departments of Biology, Human Physiology, and Psychology. Its laboratories offer graduate and postdoctoral training in the neurosciences with projects that address the development of the nervous system and human cognitive processes.

Materials Science Institute

Darren Johnson, Director

541-346-6442

[materialscience.uoregon.edu \(http://materialscience.uoregon.edu\)](http://materialscience.uoregon.edu/)

The purpose of the Materials Science Institute is to study the structure and properties of materials, to educate in the sciences of materials, and to serve Oregon as a resource in these sciences. Since 1985, the

institute has more than tripled the size of its research program, developed four new graduate programs in materials, and contributed to the state's prosperity through collaboration with more than 25 Oregon companies.

Oregon Advanced Computing Institute for Science and Society

Allen D. Malony, Director

541-346-0534

www.nic.uoregon.edu (<http://www.nic.uoregon.edu>)

The center researches the application of computer science and numerical computation to problems with brain modeling and imaging. High-performance computing plays a significant role in the research at the center.

Oregon Center for Optical, Molecular, and Quantum Science

Steven van Enk, Director

541-346-4528

oco.uoregon.edu (<http://oco.uoregon.edu>)

The center encompasses research in basic and applied aspects of optics in physics and physical chemistry. Members of the center are instructors in physics and chemistry; associate members are from these departments as well as from institutions outside the university; students—undergraduate, master's, and doctoral—are involved in all aspects of research at the center.

Oregon Humanities Center

Paul Peppis, Director

541-346-3934

ohc.uoregon.edu (<http://ohc.uoregon.edu>)

The center is the sole interdisciplinary umbrella organization for the humanities at the University of Oregon. It seeks to promote and strengthen the humanities both on campus and in the broader community by supporting faculty research and teaching, fostering collaboration among the disciplines, and sponsoring a wide variety of public programs.

Oregon Institute of Marine Biology

Craig M. Young, Director

541-888-2581

<https://oimb.uoregon.edu/>

Founded in 1930, the Oregon Institute of Marine Biology is the third-oldest marine laboratory on the Pacific Coast. The 130-acre campus, located about two hours from Eugene, maintains housing and research facilities for visiting investigators and students from other institutions. Members of the resident faculty are from the UO Department of Biology, conducting research on the development, ecology, evolution, and physiology of marine organisms worldwide from the intertidal zone to the deep sea.

Prevention Science Institute

Elizabeth A. Stormshak, Director

541-346-9396

psi.uoregon.edu (<http://psi.uoregon.edu>)

The Prevention Science Institute is a multidisciplinary institute focused on understanding human development, preventing behavioral health

problems, and implementing effective interventions in community settings, engaging in research on social and emotional processes among children, adolescents, and families to improve their lives and well-being throughout their lifespan. The institute also provides vital professional and research training for graduate and undergraduate students.

Research Core Facilities

The university's research core facilities are administered to promote excellence in research, innovation, and graduate education at the University of Oregon. To that end, these specialized facilities provide access to specific types of research capacity—equipment, material, data acquisition, data analysis, consultation and expertise, and other services.

Aquatic Animal Care Services

Timothy Mason, Manager

541-346-8980

aqacs.uoregon.edu (<http://aqacs.uoregon.edu>)

Aquatic Animal Care Services provides support for researchers using aquatic and semi-aquatic animal models, primarily fish, to study vertebrate genomics and vertebrate development. The most widely used fish model at the University of Oregon is the zebrafish (*Danio rerio*). Zebrafish research was founded at the University of Oregon in the early 1980's by George Streisinger and has since spread to include thousands of researchers drawn from institutions from around the world.

Center for Advanced Materials Characterization in Oregon

Kurt Langworthy, Director

541-346-3660

camcor.uoregon.edu (<http://camcor.uoregon.edu>)

The Center for Advanced Materials Characterization in Oregon is a user facility housing a comprehensive array of materials characterization instrumentation and expertise to serve the needs of researchers on the University of Oregon campus, regional industries, and academic institutions. The facilities provide infrastructure for research in chemistry, nanoscience, engineering, physics, materials science, geology, bioscience, and optics.

Genomics and Cell Characterization Core Facility

Doug Turnbull, Director

541-346-5170

gc3f.uoregon.edu (<https://gc3f.uoregon.edu>)

The Genomics and Cell Characterization Core Facility supports scientific research at the University of Oregon by offering genetic and genomic technologies. The facility provides in-house services and specialized equipment, including Sanger DNA sequencing, microarray-based genotyping, microarray printing, robotics for high-throughput manipulation of DNA samples, and next-generation, Illumina-based, high-throughput DNA sequencing and associated bioinformatics. In the near future, the facility will offer cell-sorting services.

Greenhouse Facility

Susan Belcher, Manager

541-346-2546

uogreenhousefacility.uoregon.edu (<http://uogreenhousefacility.uoregon.edu>)

The University of Oregon Greenhouse Facility comprises more than 6,000 square feet of greenhouse space and a one-acre field to support research and teaching activities. The facility consists of a small

greenhouse on the fourth floor of Onyx Bridge, two large greenhouses near Campus Operations, and the Quonset, with an incubator, growth chambers, drying ovens, potting bench, and more. The facility supports the research and teaching missions of the faculty and students in multiple academic departments and institutes across the university, as well as many universities throughout the country. The facility is staffed by a part-time greenhouse manager and by student workers.

Histology and Genetic Modifications Core Facility

Ute Hostick, Manager

541-346-4935

hgem.uoregon.edu (<http://hgem.uoregon.edu>)

The facility provides all the services necessary to produce and maintain genetically modified mice. These services range from designing projects to maintaining colonies. The facility also houses histology services.

Robert and Beverly Lewis Center for Neuroimaging

Alison Burggren, Director

541-346-0337

lcni.uoregon.edu (<http://lcni.uoregon.edu>)

The Lewis Center for Neuroimaging, a component of the Brain, Biology, and Machine Initiative at the University of Oregon, supports interdisciplinary, multifaceted research in cognitive neuroscience and biological imaging. The center has a Siemens Magnetom Skyra 3T magnetic resonance imaging (MRI) unit and full capabilities for the design and fabrication of magnetic resonance coils to support a broad range of research needs and applications.

Technical Science Administration

John Boosinger, Director

541-346-4683

tsa.uoregon.edu (<http://tsa.uoregon.edu>)

The Technical Science Administration is a collection of professional machinists and electrical engineers who help support internal and external research projects and equipment. The shops prototype sophisticated instrumentation for novel research projects, engineer creative solutions and products, and repair, upgrade, or retrofit existing scientific instrumentation.

Terrestrial Animal Care Services

Audrey Harris, Director

541-346-4957

teacs.uoregon.edu (<https://teacs.uoregon.edu>)

Terrestrial Animal Care Services is responsible for administering all activities related to the care and use of animals. Its functions include procurement of all live vertebrates for research and teaching, supervision of animal technicians, control of animal holding facilities, and provision of veterinary care. Terrestrial Animal Care Services also has the responsibility for developing and implementing a plan for obtaining accreditation from the Association for Assessment and Accreditation of Laboratory Animal Care International for the University of Oregon's animal care and use program.

Undergraduate Education and Student Success

Undergraduate Education and Student Success, a division of the Office of the Provost, offers programs that enrich the academic life of all undergraduate students. Under the leadership of the vice provost for undergraduate education and student success, the division promotes

- a campus culture of intellectual curiosity and engagement
- opportunities for students at all levels to be creative and to work in close association with outstanding faculty members
- a coherent approach to general education

The central responsibility of the division is to introduce students to the university and the world of ideas, supporting those who are curious and intellectually vigorous regardless of their cultural background or socioeconomic circumstances.

Courses

UGST 101. Introduction to University Study. 3 Credits.

Helps students learn, adapt, and apply effective study skills, including strategies for time management, note taking, critical reading, writing, and test preparation.

UGST 109. First Year Experience: [Topic]. 1 Credit.

Repeatable.

UGST 111. Academic Residential Community—Arts and Letters: [Topic]. 1-4 Credits.

Introduces students to the academic and social aspects of university life and to the discipline of Arts and Letters with a small group environment with Arts and Letters faculty. Repeatable twice for a maximum of 4 credits.

UGST 112. Academic Residential Community—Social Science: [Topic]. 1-4 Credits.

Introduces students to the academic and social aspects of university life and to the discipline of Social Sciences with a small group environment with Social Sciences faculty. Repeatable twice for a maximum of 4 credits.

UGST 113. Academic Residential Community—Science: [Topic]. 1-4 Credits.

Introduces students to the academic and social aspects of university life and to the discipline of Science with a small group environment with Sciences faculty. Repeatable twice for a maximum of 4 credits.

UGST 198. Workshop: [Topic]. 1-12 Credits.

Repeatable.

UGST 199. Special Studies: [Topic]. 1-4 Credits.

Repeatable.

UGST 200M. Temporary Multilisted Course. 4 Credits.

UGST 399. Special Studies: [Topic]. 1-4 Credits.

Repeatable.

UGST 400M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

UGST 404. Internship: [Topic]. 1-12 Credits.

Repeatable.

UGST 405. Reading and Conference: [Topic]. 1-5 Credits.

Repeatable.

UGST 406. Practicum: [Topic]. 1-12 Credits.

Repeatable.

UGST 407. Seminar: [Topic]. 1-4 Credits.

Repeatable.

UGST 408. Workshop: [Topic]. 1-4 Credits.

Repeatable.

UGST 409. Terminal Project. 1-12 Credits.

Repeatable.

UGST 410. Experimental Course. 1-4 Credits.

Repeatable.

UGST 609. Terminal Project. 1-12 Credits.

Repeatable.

Academic Advising

Lori Manson, Director

541-346-3211

541-346-6048 fax

101 Oregon Hall

The Office of Academic Advising assists students in making a smooth transition to the university, understanding general-education requirements, class scheduling, solving academic problems, and understanding academic sanctions and petitioning processes. The office supports students seeking guidance to achieve academic success, working closely with students in academic distress who may need particular assistance in navigating campus resources.

See **Preparatory Programs** in this section of the catalog for information about advising in preprofessional areas of study.

Academic Standing

Academic standing at the University of Oregon is determined by the grade point average (GPA) a student earns in university courses. Good academic standing means that the student has a cumulative UO GPA of 2.00 or better.

Academic sanctions are explained in the **Registration and Academic Policies** section of this catalog. Advisors in the Office of Academic Advising are available to assist students who want to discuss their academic standing.

Preparatory Programs

Students may begin preparing for the following professional or graduate programs at the University of Oregon. Some of the programs simply require a bachelor's degree for admission, while others require specific undergraduate courses, standardized examinations, and field experience. Students who are interested in the preparatory programs should consult appropriate university advisors as listed below.

Forensic Science, Preparatory

Deborah B. Exton, Head Advisor

541-346-4629

Forensic science is the application of scientific principles and technological practices to the study and resolution of criminal, civil, and regulatory issues. The role of the forensic scientist is twofold: to analyze

physical evidence and to provide expert testimony in a court of law. This information is helpful in determining the innocence or guilt of the suspect. The University of Oregon provides advising and course work for students interested in pursuing a career or graduate study in the forensic science field, but does not offer a degree in forensic science. The majority of positions in crime laboratories require a minimum of a bachelor's degree in a physical science. The choice of major depends on your interests and the area of forensic science in which you plan to seek employment. Advanced degrees are useful for career advancement and may be required for certain positions. Employment opportunities exist in law enforcement agencies at the local, state, and national level as well as in the private sector. Employment can also be found within such agencies as the U.S. Food and Drug Administration, Environmental Protection Agency, Fish and Wildlife Service, and Drug Enforcement Administration.

Minimum Requirements

- Bachelor's degree in any discipline, although biology, chemistry, computer science, general science, or physics are most appropriate
- For graduate programs, scores from Graduate Record Examinations; a few schools will accept Medical College Admission Test scores instead
- Letters of recommendation from science faculty members

Suggested Science Courses

- A yearlong biology sequence is recommended. Check with the preforensic science advisor for the option that is best for you
- General Chemistry (CH 221, 222, 223) with laboratories (CH 227, 228, 229) or Honors General Chemistry (CH 224H, 225H, 226H) with laboratories (CH 237, 238, 239); Organic Chemistry (CH 331, 335, 336) with laboratories (CH 337, 338)
- Instrumental Analysis (CH 429) is strongly recommended
- Calculus I,II (MATH 251, 252) and a course in statistics
- General Physics (PHYS 201, 202, 203) with laboratories (PHYS 204, 205, 206)

Additional recommended course subjects are photography and public speaking.

Students are urged to contact the graduate programs of their choice for information about application procedures.

Law, Preparatory Advising

Willie and Donald Tykeson Hall
prelaw.uoregon.edu (<https://prelaw.uoregon.edu/>)

Law schools require that applicants for admission have a Bachelor's degree. They do not, however, require specific undergraduate majors or prescribe a specific prelegal curriculum. Law schools suggest that prospective students choose majors that provide education in broad cultural fields, which orient students to the general societal framework within which our legal system has developed.

Whatever the undergraduate major, prelaw students should place considerable emphasis on the development of skills in problem solving, critical reading, writing and editing, oral communication and listening, and research. Many law schools advise against a large concentration of courses in vocational training.

The following courses are an example, but not a comprehensive list of what would be appropriate. While these courses are not required for law school admission (but may be required within the undergraduate UO

core education curriculum), these courses can serve to make you a more competitive law school applicant.

- College Composition I (WR 121 (<http://uocatalog.uoregon.edu/search/?P=WR%20121>)), College Composition II (WR 122 (<http://uocatalog.uoregon.edu/search/?P=WR%20122>)), College Composition III (WR 123 (<http://uocatalog.uoregon.edu/search/?P=WR%20123>)), Advanced Composition (WR 423 (<http://uocatalog.uoregon.edu/search/?P=WR%20423>))
- Introduction to Economic Analysis: Microeconomics (EC 201 (<http://uocatalog.uoregon.edu/search/?P=EC%20201>)), Introduction to Economic Analysis: Macroeconomics (EC 202 (<http://uocatalog.uoregon.edu/search/?P=EC%20202>))
- Inventing America (HIST 201 (<http://uocatalog.uoregon.edu/search/?P=HIST%20201>)), Building the United States (HIST 202 (<http://uocatalog.uoregon.edu/search/?P=HIST%20202>)), American Century (HIST 203 (<http://uocatalog.uoregon.edu/search/?P=HIST%20203>))
- Introduction to Accounting I (ACTG 211 (<http://uocatalog.uoregon.edu/search/?P=ACTG%20211>)), Introduction to Accounting II (ACTG 213 (<http://uocatalog.uoregon.edu/search/?P=ACTG%20213>)), or Accounting: Language of Business Decisions (BA 215 (<http://uocatalog.uoregon.edu/search/?P=BA%20215>))
- Critical Reasoning (PHIL 103 (<http://uocatalog.uoregon.edu/search/?P=PHIL%20103>)), Social and Political Philosophy (PHIL 307 (<http://uocatalog.uoregon.edu/search/?P=PHIL%20307>)), Social and Political Philosophy (PHIL 308 (<http://uocatalog.uoregon.edu/search/?P=PHIL%20308>)), Logic, Inquiry, and Argumentation (PHIL 325 (<http://uocatalog.uoregon.edu/search/?P=PHIL%20325>)), Introduction to Philosophy of Law (PHIL 344 (<http://uocatalog.uoregon.edu/search/?P=PHIL%20344>))
- Legal Process (PS 275), Constitutional Law (PS 470), United States Supreme Court (PS 484)
- Public Speaking as a Liberal Art (ENG 200) or Oral Controversy and Advocacy (ENG 330)
- Literature and additional expository writing courses
- Undergraduate legal studies courses (LAW) or conflict resolution courses (CRES)
- Journalism -- Media and Society (J201), Communication Law (J385)
- Courses in psychology and sociology are recommended

Accredited American Bar Association (ABA) law schools in the United States require their applicants to submit scores from the Law School Admission Test (LSAT). The examination is given multiple times a year. Consult the Law School Admission Council's website, lsac.org, for online registration and additional information. Registration must be completed at least a month before the testing date. For those planning to attend law school immediately upon graduation, it is recommended that the examination be taken in the spring of the junior year or at the earliest possible date in the senior year.

Each law school has its own admission criteria. The primary predictors of admission are LSAT scores and student undergraduate GPA from all undergraduate institutions attended. Various subjective factors are also considered. Students should use the pass/no pass option with restraint. They should expect to provide letters of recommendation and statement(s) of purpose.

Additional information about pre-law advising and law school admission is available from the Law School Admission Council's website (<https://www.lsac.org/>) and the UO Pre-Law Advising Blog (<https://prelaw.uoregon.edu/>)

prelaw.uoregon.edu/). Students who want more information or assistance should speak with a Pre-Law Advisor in Tykeson Hall.

Accessible Education Center

Katie Wolf, Assistant Director

541-346-1155
541-346-6013 fax
155 Oregon Hall
uoaec@uoregon.edu

The University of Oregon is dedicated to the principles of equal opportunity in education and recognizes disability as an aspect of diversity integral to the university and to society. The mission of the Accessible Education Center is to ensure the access and full inclusion of students with disabilities; the center staff works to create an educational environment that is usable, equitable, sustainable, and inclusive for all members of the university community. Inclusive design is promoted as a necessary approach to creating that environment.

The center is a resource to the university community on issues related to disability, inclusion, and access. Students, parents, and community members are encouraged to contact the office with questions, concerns, or requests regarding full participation in university classes, programs, and offerings. Members of the faculty and staff are encouraged to consult with the center on a range of student accessibility, accommodation, and universal design issues.

The office provides consultation, outreach, training, and direct support and services in the form of academic accommodations under guidance from the Americans with Disabilities Act and Section 504 of the Rehabilitation Act of 1973. These include, but are not limited to, academic advising, accessible technology assistance, classroom relocation, alternative testing procedures, instructor notification, note taking, and sign-language interpreting. The Accessible Education Center meets with students to discuss individual access needs and educational history, and reviews documentation to establish eligibility for services.

The university does not discriminate on the basis of disability in admission or access to, treatment of, or employment in its programs or activities. Modifications to academic requirements are made when needed to ensure that such requirements neither discriminate nor have the effect of discriminating on the basis of disability against a qualified applicant or student.

Center for Undergraduate Research and Engagement

Kevin Hatfield, Assistant Vice Provost for Undergraduate Research and Distinguished Scholarships, Lanch McCormick, Director of Student Engagement, and Jacy Berg, Program Coordinator
uocure@uoregon.edu

The **Center for Undergraduate Research and Engagement** (CURE) serves as the campus hub for providing comprehensive advising and support for undergraduate exploration of research and experiential learning opportunities both internal and external to the UO. CURE supports students in all eight undergraduate colleges at UO, taking an expansive definition of research encompassing scholarship and creative work in the sciences, social sciences, arts, humanities, and professional schools. CURE also provides financial support for research experiences, including the **First-Year Research Experience (FYRE)**

Fellowships and Summer Undergraduate Research Fellowships (SURF), as well as funding for conference travel to present research and small grant awards. CURE is also part of the the annual **Undergraduate Research Symposium** planning team and supports students with research presentations and communications.

Office of Distinguished Scholarships

Kevin Hatfield, Assistant Vice Provost for Undergraduate Research and Distinguished Scholarships, Lanch McCormick, Director of Student Engagement, and Jacy Berg, Program Coordinator
dsinfo@uoregon.edu

The **Office of Distinguished Scholarships (ODS)** provides comprehensive advising and mentorship to current UO students and recent alumni exploring and pursuing highly competitive national and international awards and fellowships supporting undergraduate research, graduate study, in the US/abroad, and public service. ODS serves as the official institutional representative to the scholarship foundations and coordinates the internal review and nomination processes for those scholarships requiring institutional endorsement (e.g. Goldwater, Marshall, Mitchell, Rhodes, Truman), including the writing and submission of institutional endorsement letters. Through receptions, workshops, class visits, fairs, and weekly open hours (in-person and virtual) the ODS team supports students throughout the scholarship exploration, development, submission, and interview process. To assemble internal review committees, mock interview panels, and individual consultations that best represent the composition of those students will engage with the foundations, ODS partners with University Advancement, Government and Community Relations, and the Alumni Association to involve UO alumni, donors, and advocates in all aspects of the application and interview development and preparation process.

First-Year Programs

Amy Hughes Giard, Director
541-346-1241
107 Oregon Hall

The University of Oregon's nationally recognized First-Year Programs offer freshmen the opportunity to

- Develop mentor relationships between student and faculty members
- Make connections between academic classes and potential majors or career paths
- Cultivate intellectual curiosity
- Develop a sense of community among students with similar interests and create a sense of belonging
- Connect to vital university resources

First-Year Interest Groups (FIGs)

In a FIG, 20 first-year students jointly take two core education courses and a faculty-led First-Year Experience Seminar during fall term. Students engage in projects and assignments specific to each FIG as faculty members offer mentoring and advising. The seminar may also include informal out-of-class events such as hikes, dinner with the professor, or excursions to events. Each group has a First-Year Experience Assistant—an advanced undergraduate student—who assists

in the seminar to help new students navigate the university. There are more than 50 FIGs to choose from each year.

Honors and Awards

Academic Honors

Departmental Honors

Many departments at the University of Oregon offer a bachelor's degree with honors in the academic major. Students may graduate with honors in the following majors:

College of Arts and Sciences—anthropology; biochemistry; biology; chemistry; Chinese; cinema studies; classics; comparative literature; computer science; earth sciences; economics; English; environmental science; environmental studies; ethnic studies; French; general science; general social science; geography; German; history; humanities; human physiology, international studies; Italian; Japanese; linguistics; marine biology; mathematics; medieval studies; philosophy; physics; political science; psychology; religious studies; Romance languages; Russian, East European, and Eurasian studies; sociology; Spanish; theater arts; women's, gender, and sexuality studies.

Charles H. Lundquist College of Business—accounting; business administration.

College of Design—art history; planning, public policy and management.

School of Journalism and Communication—journalism: advertising; journalism: media studies; journalism: public relations.

Specific requirements of departmental honors programs are listed in the departmental sections in this catalog.

Honors Lists

Dean's List

The Dean's List is announced after each fall, winter, and spring term. To qualify, a student must be an admitted undergraduate, complete at least 12 credits taken for a letter grade during the term, and have a term GPA of 3.75 or better. Credits deducted do not count toward the minimum number of credits. Grade changes recorded through the second week of the subsequent term resulting in a change to the term GPA may affect the Dean's List notation (removal or addition).

Junior Scholars

The 100 undergraduates with 90 to 134 credits, the last 45 taken at the UO, and the highest GPAs are named junior scholars by the Mortar Board senior honor society during winter term.

Latin Honors

Graduating seniors who have earned at least 90 credits in residence at the University of Oregon and have successfully completed all other university degree requirements are eligible for graduation with Latin honors. These distinctions are based on students' cumulative GPA levels for each academic year, determined by rounding the previous five-year running average to the first decimal point. Post-baccalaureate students are not eligible for Latin honors. The Office of the Registrar computes Latin honors upon graduation.

Honor Societies

One means of recognizing outstanding students at the University of Oregon is through election to membership in a chapter of a local, national, or international honor society. Criteria for membership and the scope of activities vary. Some focus on scholastic achievement; others consider grades and other factors such as community service and leadership. Some honor societies select members by invitation only; for others, students must submit applications.

Initiation Fees

Many honor societies charge initiation fees. The Olwen William Harris Endowment Fund has been established to help students who cannot afford to pay initiation fees. To receive money from this fund, students must complete a request form, available from the Office of the Dean of Students. An advisory committee reviews all requests and dispenses the awards.

Honoraries Based on Scholarship

(membership by invitation)

Golden Key

Golden Key national honor society recognizes scholastic achievement in undergraduate fields of study. Eligibility is limited to the top 15 percent of juniors and seniors. Students must have a 3.70 GPA and a minimum of 45 credits at the university to be invited. A membership reception is held in the spring, and two scholarships are awarded annually to outstanding junior and senior initiates. Initiation fee: \$95.

Phi Beta Kappa Society

Kevin Hatfield, President

541-346-1977

pbk.uoregon.edu (<http://www.uoregon.edu/~pbk/>)

Founded in 1776, the Phi Beta Kappa Society is the oldest and most prestigious honor society in the nation. The UO has the only Phi Beta Kappa chapter in the Oregon University System.

The society honors students whose undergraduate academic records fulfill the objectives of a liberal arts education. Selection for Phi Beta Kappa is not automatic, but students do not have to apply or be nominated for consideration.

After screening academic records, a committee of Phi Beta Kappa members makes recommendations to the membership at large. Following an election meeting in late May, elected students are invited to join. Also elected are the Oregon Six—six students voted the most outstanding of those elected to membership that year. Students who accept the invitation to join are initiated before spring commencement. Initiation fee: \$85.

Criteria for membership are listed on the Phi Beta Kappa website. Students are typically invited to join the society shortly before they graduate.

Honoraries Based on Scholarship, Leadership, and Service

(membership by invitation and application)

Friars

Established in 1910, Friars is the oldest honorary on campus. Membership is composed of faculty members and of students who have completed at least three years of study. Criteria are contributions to the university, potential for community leadership, and commitment to the university as alumni. No application is required. Prospective members are nominated by the active membership. New members are selected each spring.

Mortar Board

A national honor society for seniors, Mortar Board emphasizes excellence in the areas of scholarship, leadership, and service. To be eligible for membership, students must have at least a 3.00 GPA, must be a full-time student at the University of Oregon, and must have attained junior academic standing as of fall term. Selection and initiation of qualified candidates takes place spring term. Fee: \$90.

Professional Organizations

Alpha Kappa Delta

C. J. Pascoe, Advisor
541-346-1384
cpascoe@uoregon.edu

An international sociological honor society, Alpha Kappa Delta is open to juniors and seniors who meet the following criteria: a cumulative GPA of at least 3.30, a cumulative GPA in UO sociology courses of at least 3.00, and completion of at least five sociology courses at the University of Oregon, at least four of which must be graded. Members investigate sociological issues and problems through social and intellectual activities that lead to improvement of the human condition. Initiation fee: \$55.

Alpha Kappa Psi

Chuck Kalnbach, Advisor
541-346-6164
akpsi@uoregon.edu

Alpha Kappa Psi is a national, professional fraternity for majors and minors in business, computer science, and economics. Founded to enhance the business education of men and women, the organization's mission is to develop well-trained, ethical, skilled, resourceful, and experienced business leaders. To achieve this, each chapter supplements the traditional classroom experience with business field trips, seminars, career activities, research surveys, and other professional events. A cumulative GPA of at least 3.00 is required for membership. Alpha Kappa Psi stands for the highest ideals of conduct and achievement in university and professional life. Initiation fee: \$100.

Asklepiads

Megan Weiler, Advisor
541-346-8035
mweiler@uoregon.edu

Asklepiads is for students interested in careers in the health sciences. Activities include dispensing prehealth sciences literature, maintaining information files on medical schools, supervising preceptorships in health fields, and arranging tours of the Oregon Health and Science University in Portland. Information and applications are available on OrgSync (<https://orgsync.com/48859/chapter/>).

Beta Alpha Psi

Shannon Dolan, Advisor
541-346-9197
sdolan@uoregon.edu

Beta Alpha Psi is a national scholastic and professional accounting and finance fraternity. Its primary objectives are to encourage and recognize scholastic and professional excellence in the field, to provide members with opportunities for self-development and association with practicing accountants and finance professionals, and to encourage in members a sense of ethical, social, and public responsibility. A cumulative GPA of at least 3.00, with a 3.00 in the upper-division accounting and finance courses, is required for membership. Additional requirements include 10 volunteer hours and 10 professional hours. Initiation fee: \$100.

Beta Gamma Sigma

Jonathan Moulton, Advisor
541-346-8694
jmoulton@uoregon.edu

Beta Gamma Sigma, a national scholastic honor society in business administration, promotes the advancement of education in the art and science of business and fosters integrity in the conduct of business operations. To be eligible for membership, a student must rank in the top 10 percent of the junior class, the top 10 percent of the senior class, or the top 20 percent of a master's degree program, or be a graduating doctoral candidate. Membership is by invitation only. Selection is by a faculty committee. Beta Gamma Sigma is strictly an honorary organization with no formal meetings other than the social functions accompanying initiation. Initiation fee: \$75.

Delta Phi Alpha

Chartered in 1936, Delta Phi Alpha is a national honor society dedicated to promoting the study of German language, literature, and civilization; to furthering an interest in and a better understanding of German-speaking people; and to fostering a sympathetic appreciation of German culture.

Membership is open to graduate and undergraduate students who have completed two years of college German. Students must have an overall GPA of 2.70 and a GPA of 3.30 in their upper-division German courses. Initiation fee: \$25.

Kappa Kappa Psi

Kappa Kappa Psi is an honorary band fraternity, a brotherhood dedicated to the betterment of bands and ensembles at the University of Oregon. The fraternity provides service around the School of Music and Dance, the campus, and the community, and honors high-quality musicians and students with membership. Initiation fee: \$110. Active dues: \$100 per year.

Kappa Tau Alpha

Kappa Tau Alpha is a national honor society that recognizes and encourages high scholastic and professional standards among journalism majors. Membership is by invitation to undergraduate and graduate students in the top 10 percent of their classes. Faculty members in the School of Journalism and Communication select new members. Initiation fee: \$30.

Mathematics Association of America

The student chapter of the Mathematics Association of America sponsors films and talks on subjects that are not usually encountered in the classroom. The talks, by students and faculty members, are geared to undergraduates. Students are welcome to attend events regardless of whether they choose to join the chapter.

Mu Phi Epsilon

An international music fraternity, Mu Phi Epsilon members gain experience in public performances. Music majors who have reached second-term freshman standing in the music-major curriculum are eligible for election on the basis of scholarship, musicianship, character, and personality. Activities include presenting musical programs on and off campus, organizing receptions at musical events, and hosting guest artists. Initiation fee: \$43.

Order of the Coif

Margaret L. Paris, Advisor

541-346-3880
mparis@uoregon.edu

Chartered at the UO in 1934, Order of the Coif is a national law school honor society that recognizes superior scholarship and promotes the ethical standards of the legal profession. The School of Law faculty selects members from the top 10 percent of each graduating class. Initiation fee: \$25.

Phi Beta

www.phibeta.com (<http://www.phibeta.com>)

Phi Beta is a professional fraternity for students of music, speech, drama, dance, or art. It aims to encourage high professional standards and support for the creative and performing arts. Membership criteria are based on scholarship and intellectual achievement, career development, and the use of students' talents to serve other students, schools, and communities. Initiation fee: \$25.

Pi Alpha Alpha

Pi Alpha Alpha, a national honor society, promotes scholarship and recognition among students and professionals in public affairs and administration and fosters integrity and creative performance in government and related public service. To become members, past or present students or teachers must display high academic achievement or outstanding public service in public-affairs or public-administration programs of universities that belong to the National Association of Schools of Public Affairs and Administration. Initiation fee: \$30.

Psi Chi

The purpose of the national Psi Chi society is to encourage, stimulate, and maintain scholarship among psychology undergraduate and graduate students. Potential members must be in the top 35 percent of their class and have at least 12 credits in psychology. A 3.00 GPA is required of graduate students. Selection by application takes place throughout the year. Initiation fee: \$35.

Sigma Tau Delta

Corbett Upton, Advisor

541-346-3961
cupton@uoregon.edu

Sigma Tau Delta is the international English honor society, an organization that confers distinction for high achievement in English language and literature in undergraduate, graduate, and professional studies. Sigma Tau Delta also recognizes the accomplishments of professional writers who have contributed to the fields of language and literature. A member of the Association of College Honor Societies, Sigma Tau Delta began in 1924 at Dakota Wesleyan University. There are more than 800 active chapters located in the United States, the Caribbean, Europe, and the Middle East. To be eligible to apply, students must have a minimum overall GPA of 3.25 and a minimum English GPA of 3.50, and have completed at least three semesters or five terms of college course work and four English courses by the spring term. Initiation fee: \$45.

Upsilon Pi Epsilon

Michal Young, Advisor

541-346-4140
michal@uoregon.edu

Upsilon Pi Epsilon is the only existing honors society in the computing and information disciplines. Its mission is to recognize academic excellence at both the undergraduate and graduate levels. Criteria for membership are available from the advisor. Initiation fee: \$15.

Service Organizations

Alpha Phi Omega

apo@uoregon.edu

A service honorary organization for undergraduate and graduate students, Alpha Phi Omega develops leadership skills and promotes friendship by serving the local community. Applications are accepted year-round in Suite 4 of the EMU. Initiation fee: \$15.

Awards and Prizes

Individual and Organization Awards

Listed are major university awards presented during Family Weekend in May. Selection criteria are available from the honors and awards coordinator in the Office of the Dean of Students.

- American Association of University Women Senior Recognition Award (senior woman)
- Arts and Advocacy in the Lesbian Community Award (art or music student)
- Bess Templeton Cristman Award (junior woman)
- Burt Brown Barker Vice Presidential Cups (men's and women's living organizations)
- Centurion Awards (undergraduate and graduate students)
- Robert and Opal Clark Scholarship (any student)
- Dean's Award for Service (senior)
- Doyle Higdon Memorial Trophy (sophomore student-athlete)
- Ella Travis Edmundson and Mercy Travis Davis Scholarship (sophomore, junior, and senior women)
- Emerald Athletic Award (senior student-athlete)
- Friendship Foundation Awards (international student)
- Frohnmayer Award (fifth-year senior)
- John Moore Scholarship (lesbian, gay, bisexual, and transgender concerns)

- Gerlinger Cup (junior woman)
- Gherty-Moore Nontraditional Student Scholarship
- Golda Parker Wickham Scholarship (any student)
- Graduate Service Awards (master's or doctoral students)
- R. J. Hoyman Scholarship (lesbian, gay, bisexual, and transgender concerns)
- International Student Awards (any student)
- Jackson Athletic Trophy (senior woman athlete)
- Jewel Hairston Bell Award (person of color)
- Jim Buch Award (junior)
- Koyl Cup (junior man)
- Mary Hudzikiewicz Award (freshman)
- Maurice Harold Hunter Leadership Scholarship (junior man from Oregon)
- Mother's Club Scholarships (any student)
- Nontraditional Student Award
- Osher Scholarship (reentry nontraditional students)
- Paul Olum Award (senior)
- Ray Hawk Award (senior)
- School of Music and Dance (music students)
- Theresa Kelly Janes Award (any student)
- Vernon Barkhurst Award (sophomore)
- Wilson Cup (senior)

Fellowships and Scholarships

For information about other fellowships and scholarships, see Student Financial Aid and Scholarships and departmental sections of this catalog.

- Neil D. Blackman Memorial Scholarship (political science award to undergraduate and graduate students studying humanities or political philosophy relevant to human rights and the responsibilities of individuals to democratic institutions)
- Thomas Condon Fellowship in Paleontology (graduate student of paleontology)
- Eric Englund Scholarship (senior or first-year graduate student in English or history)
- Alice Henson Ernst Scholarship (first-year graduate student in English)
- Barry M. Goldwater Scholarship (sophomore or junior math and science majors)
- Fulbright Grants for Overseas Study (graduate students)
- Fulbright-Hays Dissertation Research Abroad Program (doctoral candidates)
- German Academic Exchange Service Study Grant
- Walter and Nancy Kidd Scholarships (undergraduate students)
- Marshall Scholarship
- Rhodes Scholarship
- Rotary International Ambassadorial Scholarship (junior or senior-year undergraduate or graduate)
- Stanley Maveety Scholarship (first-year graduate student in English)
- Lloyd Staples Fellowship (undergraduate and graduate students in geological sciences)
- Truman Scholarship (junior-year undergraduate student)
- James C. Stovall Fellowship Fund (awards to undergraduate students of geological sciences)

Prizes

Several cash prizes are awarded for student essays and other competitions. The Department of Women's, Gender, and Sexuality Studies administers the Bruce M. Abrams Award in Lesbian, Gay, Bisexual Studies. The winning undergraduate project, which may be from any discipline, is honored with a \$500 prize.

The Department of Mathematics administers the William Lowell Putnam examination, a national competition offering prizes to top finishers.

The George W. Cherry Speech Award is a scholarship given to the best public speaker in the forensics program.

The Department of Philosophy oversees the George Rebec Essay Contest. Two prizes—\$100 gift certificates to the Duck Store—are awarded for the best undergraduate and graduate essays on any area of philosophy. Walter and Nancy Kidd Writing Prizes for undergraduate students are administered by the Creative Writing Program.

Students should inquire at their home departments about additional contests or competitions for expository or creative writing or other student projects.

Pathway Oregon

Pathway Oregon

Grant Schoonover, Director

541-346-3211

Oregon Hall, first floor

Pathway Oregon is a UO program that provides comprehensive support to eligible students. Advisors assist students in making choices that help them achieve their academic, personal, and career goals. This program is offered to eligible students at the time of their admission to the University of Oregon.

McNair Scholars Program

TRIO Student Support Services

TRIO Student Support Services

Tara Parrillo, Director

541-346-3211

101 Oregon Hall

TRIO Student Support Services is a college retention program funded by a federal TRIO Grant. TRIO SSS provides first-generation, low-income students, and students with accommodations through the Accessible Education Center with comprehensive support. Support includes, academic and personal counseling, help understanding student aid and securing financial aid and scholarships, skill-building and financial literacy workshops, career advising, and assistance preparing for and applying to graduate school.

Tutoring and Academic Engagement Center

Grant Schoonover, Director

541-346-3226

408 Knight Library

engage@uoregon.edu (<https://engage.uoregon.edu/>)

The Tutoring and Academic Engagement Center offers resources and guidance to help students improve their learning and the quality of their course work.

Tutoring

Free tutoring for mathematics and writing is available throughout the week on the fourth floor of Knight Library. Writing tutors offer feedback that aids students in taking the next step in their studies. For math help, tutors clarify concepts in algebra, trigonometry, and calculus. Remote support for math, writing, sciences and language is also available.

For consistent, ongoing help throughout the term, students should consider small-group tutoring. Groups of six or fewer students meet two hours a week for support in specific math, language, and science courses.

Visit <https://engage.uoregon.edu/tutoring/> for additional tutoring information.

Class Encore

Small study groups for challenging classes allow students to gather once a week outside of class to practice course concepts and strategies. Peer leaders attend the classes and design collaborative activities for each group meeting. Offerings typically include groups for accounting, biology, chemistry, computer science, and mathematics.

Courses

One- to 3-credit courses offer strategies to improve the quality of course work, enhance learning, and boost academic confidence. Subjects include time management, test-taking, memory improvement, speed reading, and more.

Individual Meetings

Learning specialists are available to meet students on an individual basis to discuss specific concerns related to study skills, writing, and math/science as well as provide additional resources that help students reach their educational goals.

Workshops

Throughout the year, the center's Get Savvy program features free workshops on academic success topics such as maximizing time or preparing for midterm examinations that are available throughout the year.

Test Preparation

The center offers preparation for the Graduate Record Examination (GRE) and Medical College Admission Test (MCAT). These fee-based test preparation workshops are designed to help students gain knowledge, skills, practice, and confidence.

Undergraduate Support Program

This program offers academic support to students who have the potential, motivation, and commitment to earn University of Oregon degrees, despite having faced obstacles that affected previous academic performance. Students are notified of eligibility at the time of their UO admission.

Undergraduate Research Symposium

Kevin Hatfield, Assistant Vice Provost for Undergraduate Research and Distinguished Scholarships

Lanch McCormick, Director of Student Engagement; Jacy Berg, Program Coordinator

ugresearch@uoregon.edu

The annual UO Undergraduate Research Symposium celebrates the remarkable contributions undergraduates make to research, scholarship, and other creative work in a wide range of disciplines. Participation in the Undergraduate Research Symposium empowers undergraduates to share their ideas, discoveries, and artistic work with the campus and community. The event traditionally takes place in May in the EMU in the style of an academic conference and includes all types of academic research presentations--poster and oral presentations, art exhibits, film screenings, and theater, music and dance performances. The symposium is co-chaired by Kevin Hatfield and Nadia Singh, and aspires to engage undergraduates in the research mission of the University of Oregon by supporting the creation and dissemination of knowledge, while inspiring younger undergraduates to seek out research opportunities and removing barriers to interdisciplinary education and discourse. Since its debut in 2011 the Symposium has hosted over 3,200 students from all eight colleges, the Phil and Penny Knight Campus for Accelerating Scientific Impact, and over 90 majors. The Symposium also partners with Lane Community College and Central Oregon Community College to involve community college students as presenters and visitors, as well as the Summer Academy to Inspire Learning (SAIL) to host high school students and teachers at the event. The Symposium YouTube Channel (<https://www.youtube.com/channel/UCWIFRY6RyaXdnHW5kM78JMw/>) curates over 800 research presentations and serves as a permanent digital exhibit of UO undergraduate research.

Supplementary Academic Programming

The college experience may not be limited to what is learned solely on the university campus. Continuing and Professional Education offers options for those returning to higher education after a period away, those interested in noncredit educational opportunities, or those who seek degree credit outside the classroom. Opportunities to study abroad are available through the Division of Global Engagement for those who want to expand their intellectual and cultural horizons and to broaden their perspective of the world. For those who want to pursue a career in the military, the Department of Military Science provides opportunities to study leadership principles, military organization and history, and the place of the armed forces in serving the goals of national policy.

Continuing and Professional Education

Sandra Gladney, Executive Director

541-346-4231

800-824-2714

Baker Downtown Center

975 High St., Suite 110

1277 University of Oregon

Eugene, Oregon 97403-1277

Continuing and Professional Education at the University of Oregon, working in partnership with campus schools and colleges, selected vendors, and national credentialing associations, provides educational opportunities to people seeking instruction and enrichment beyond the traditional campus experience.

Lifelong Learning

Osher Lifelong Learning Institute

osher.uoregon.edu (<http://osher.uoregon.edu>)

The Osher Institute is part of a national network of more than 120 programs serving seasoned adults in the continued pursuit of knowledge. This noncredit program is designed for adults 50 and older, providing year-round access to a variety of lectures, short courses, peer-led study and discussion groups, educational tours and field trips, and shared interest groups. Annual or six-month registration options are available. The institute has two long standing physical locations in central Oregon and Eugene-Springfield but allows for virtual membership around the state.

Nearly 800 members engage in learning experiences led by institute staff members, independent scholars, community experts, and current or retired university faculty members in an informal classroom setting. Membership is open to all interested adults; a previous affiliation with the University of Oregon is not a requirement of membership.

UO Insight Seminars

uoin sight.uoregon.edu (<http://uoin sight.uoregon.edu>)

UO Insight Seminars are short-term, in-depth investigations of art, literature, poetry, philosophy, history, architecture, archaeology, religion, and current events. Led by UO and guest faculty members who provide

formal study guides and lead college-level discussions, the seminars offer college-level study for the sake of personal fulfillment.

Professional Development

Boot Camps

bootcamp.uoregon.edu/

UO Boot Camps are intense, immersive short duration programs offered in four subject areas: Coding, Data Analytics, Cybersecurity, and UX/UI. Boot camps are designed with in-demand market needs and allow students to apply knowledge to solve real-world problems. Courses taught by subject matter practitioners.

Other Services

continue.uoregon.edu/services (<https://continue.uoregon.edu/services/>)

Administration of Conferences and Special Programs

Administrative support is provided for a variety of conferences and noncredit workshops, including events offered by academic departments and individual faculty members developing activities for UO students and community members, academic societies, associations, regional meetings, and nonacademic community-interest programs.

Baker Downtown Center Community Engagement

continue.uoregon.edu/services/meeting.php (<https://continue.uoregon.edu/services/meeting.php>)

Baker Downtown Center classroom facilities located in downtown Eugene are managed by Continuing and Professional Education, a unit within Student Services and Enrollment Management. Space can be utilized for community engagement events that align with the university and departmental missions and have an education and/or community engagement purpose.

Military Science

LTC Joseph F. Snyder

541-346-3102

541-346-2813 fax

1679 Agate St.

1297 University of Oregon

Eugene, Oregon 97403-1297

mcmahond@uoregon.edu

The Department of Military Science, an instructional department that reports to the senior vice president and provost, offers four years of military science courses, lower and upper division. The 300- and 400-level courses are restricted to contracted Reserve Officer Training Corps (ROTC) cadets pursuing commissions as officers in the United States Army. The 100- and 200-level courses are open to qualified and interested students.

Curriculum

The curriculum is an interdisciplinary course of study designed to meet the following objectives:

1. Provide opportunities to learn and practice leadership styles, dimensions, and techniques
2. Provide an understanding of the historical role of the US Army and how that role supports the goals and objectives of national policy
3. Develop and improve communication skills using practical oral and written exercises
4. Develop an understanding of the professional military ethic
5. Provide general knowledge of the structure of the US Army, its organization, and how its various components work together
6. Provide an understanding of American military history and the leadership principles that cause military leaders to succeed or fail

Lower Division

Lower-division (100- and 200-level) courses are offered for 1 or 2 credits each. The 100-level courses are offered to freshmen; the 200-level courses are offered to sophomores and upperclassmen. These courses provide the basic framework of knowledge and emphasize basic military terms, leadership, organization, and military history.

Upper Division

Upper-division (300- and 400-level) courses primarily are offered for 4 credits each. These courses are offered only to contracted cadets, or those in the process of contracting, who have satisfactorily completed the two three-course sequences Military Science I (MIL 121–123) and Military Science II (MIL 221–223). They provide the advanced leadership, decision-making, communication, ethics, and tactical education to prepare the student to become a commissioned officer in the U.S. Army.

Extracurricular Activities

The department supports a variety of events including ranger challenge (a club sport), intramural football, basketball, softball, and color guard for all home football games and UO Commencement.

About ROTC

The US Army supports ROTC programs at colleges and universities throughout the United States. Students who take military science courses may also participate, by contractual arrangement with the Department of the Army, in the process that leads to a commission. Each cadet must take, in addition to military science courses, a course in military history and in written communication. Most of these courses count toward general-education group requirements for a bachelor's degree.

The US Army sponsors two-, three-, and four-year federal scholarships, awarded competitively by the Army to students who seek a commission. It is possible for undergraduate students to obtain a commission through either a two-, three-, or four-year program of instruction. Graduate students who meet age requirements and have two academic years remaining at the UO may also pursue a commission through ROTC. Students interested in pursuing a commission, a scholarship, or both should contact the department.

Courses

MIL 121. Military Science I. 2 Credits.

Constitutional beginnings, organization, and role of today's army; physical fitness; introduction to equipment and small-unit operations.

MIL 122. Military Science I. 2 Credits.

Operational and survival skills, topographic map reading and land navigation, first-aid, small-unit tactics, and practical exercises with Army weapons and equipment.

MIL 123. Military Science I. 2 Credits.

Characteristics and methods of successful leadership--building trust, understanding, cooperation, and communication; responsibilities of leadership including personal motivation and ethics.

MIL 131. Physical Training. 1 Credit.

Participatory physical training program that follows the U.S. Army's physical fitness program. Prepares students for the rigors of military activities through a systematic physical conditioning process. Repeatable five times for a maximum of 6 credits.

MIL 141. Ranger Challenge. 3 Credits.

Course training focuses on basic infantry individual and team skills. Course culminates in squad-sized teams competing against other schools in the region. Repeatable once for a maximum of 6 credits.

MIL 191. Leadership Laboratory. 1 Credit.

Repeatable. Laboratory for practical experience. Assesses cadet leadership potential, communication, problem-solving, and decision-making skills. One field-training exercise a term. Repeatable five times for maximum of 6 credits.

MIL 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable. A current topic is Physical Fitness Training. Repeatable six times for maximum of 6 credits.

MIL 221. Military Science II. 2 Credits.

Basic leadership and technical military skills--map reading, first aid, and communication skills. Focus is individual abilities and building effective teams.

MIL 222. Military Science II. 2 Credits.

Purpose, roles, and obligations of commissioned officers; organizational values and their application to the decision-making process; military tactics in small-unit operations.

MIL 223. Military Science II. 2 Credits.

Self and team development in Army operations; comprehension and use of the five-paragraph Operations Order; tactics; land navigation.

MIL 321. Military Science III. 4 Credits.

Teaches the sixteen leadership dimensions and application to infantry tactics, operation orders, and orienteering. Lectures, laboratory, field training exercises.

Prereq or coreq: MIL 223

MIL 322. Military Science III. 4 Credits.

Strengthens individual abilities with experience in marksmanship, drill, and tactics. Lectures, laboratory, field training exercises.

Prereq: MIL 223

MIL 323. Military Science III. 4 Credits.

Evaluates leadership abilities in tactical and nontactical settings.

Lectures, laboratory, field training exercises.

Prereq: MIL 223

MIL 331. Physical Training. 1 Credit.

Emphasizes physical fitness and overall good health. Focus is on the intensity, duration, and frequency of fitness training, resulting in improved health and physical fitness. Repeatable five times for a maximum of 6 credits.

MIL 405. Reading and Conference: [Topic]. 1-3 Credits.

Repeatable once.

MIL 410. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

MIL 421. Military Science IV. 4 Credits.

Planning, evaluating, and conducting unit training and practical exercises. Lectures, laboratory, and field training exercises.
Prereq: MIL 323.

MIL 422. Military Science IV. 4 Credits.

Study of judicial and nonjudicial proceedings and administrative actions available to commanders. Lectures, laboratory, and field training exercises.
Prereq: MIL 323.

MIL 423. Military Science IV. 4 Credits.

Duties and responsibilities of a lieutenant; ethical decision making, counseling subordinates, evaluation reports, transition to active duty. Lectures, laboratory, and field training exercises.
Prereq: MIL 323.

refer to the course equivalency process (<https://geo.uoregon.edu/course-equivalency/>) and the Office of the Registrar course equivalency database (<https://registrar.uoregon.edu/study-abroad-course-equivalencies/>).

Study Abroad

Global Education Oregon

geoinfo@uoregon.edu
541-346-3207
300 W Oregon Hall
[geo.uoregon.edu \(https://geo.uoregon.edu/\)](https://geo.uoregon.edu)

Global Education Oregon (GEO) offers more than 300 study abroad programs in about 70 countries where UO students may take classes, conduct research, or participate in a wide range of internships or service-learning experiences. These opportunities include full-term, study-abroad programs; academic year exchanges with international universities; and short-term, faculty-led programs. For complete information about all program opportunities, visit [geo.uoregon.edu \(https://geo.uoregon.edu/\)](https://geo.uoregon.edu).

Internships

UO students may earn academic credit while they gain professional development experience abroad. Internships are open to sophomores, juniors, seniors, and master's degree students who are currently enrolled in a UO degree program. Financial aid, including scholarships, is available. Several GEO programs allow students to combine part-time internships and part-time study in the same term abroad.

Scholarships and Finances

Because students are registered at the UO while participating in study abroad programs and international internships, they are eligible to receive most or all of their UO-awarded financial aid. In addition, numerous scholarships are available for both undergraduate and graduate students planning to study or intern abroad, including new scholarships for first-generation college students and students with disabilities.

Distinguished scholarships are also available for students participating in study abroad programs. The Gilman Scholarship supports Pell Grant eligible undergraduate students who are pursuing study abroad experiences, and the Boren Scholarship funds students interested in studying a critical language abroad. In addition to these awards, qualified graduating seniors and graduate students can pursue other distinguished scholarships such as the U.S. Student Fulbright program to support international research, university study, or teaching. For a comprehensive overview of funding options abroad, visit [geo.uoregon.edu/scholarships \(https://geo.uoregon.edu/scholarships/\)](https://geo.uoregon.edu/scholarships).

Course Equivalencies

When you participate in a GEO or sponsored study-abroad program, you will receive University of Oregon credit. For complete details,

Academic Resources

To help students succeed in navigating the rigors of competitive higher education, the University of Oregon offers an array of support programs and resources for dedicated scholars in their quest for academic excellence.

Technology Service Desk

541-346-4357
 036 Erb Memorial Union
<https://livehelp.uoregon.edu>

The Information Services Technology Service Desk (<https://service.uoregon.edu/TDCClient/2030/Portal/KB/ArticleDet/?>

ID=31704) ("Tech Desk") helps university-affiliated students, faculty, and staff with their technology needs. Tech Desk services include the following:

- Software troubleshooting
- Duck ID account and password support for all current and retired UO-affiliated persons
- Virus and spyware removal
- Backups and data transfers
- First-level Ethernet and wireless network support
- Guidance about personal computing best practices

The Tech Desk provides remote support 6:00 a.m.–midnight Pacific Time, seven days a week, during the fall, winter, and spring terms, except UO breaks and holidays. Up-to-date information about hours and how to get in-person support is available online (<https://service.uoregon.edu/TDCClient/2030/Portal/KB/ArticleDet/?ID=31704>).

UO Service Portal

<https://service.uoregon.edu>

The UO Service Portal includes the following:

- Help for Students (<https://service.uoregon.edu/TDCClient/2030/Portal/Home/?ID=bf51cccd-fd92-4083-b8a3-b47d8a0edb6c>) page
- Service catalog (<https://service.uoregon.edu/TDCClient/2030/Portal/Requests/ServiceCatalog/>) containing UO technology service listings, where you can submit help tickets
- Knowledge base (<https://service.uoregon.edu/TDCClient/2030/Portal/KB/>) containing how-to guides, troubleshooting information, and answers to common questions

Labor Education and Research Center

Robert Bussel, Director

541-346-5054
 541-346-2790 fax
 1675 Agate St.
 1289 University of Oregon
 Eugene OR 97403-1289

The Labor Education and Research Center (LERC) was established at the University of Oregon in 1977 with funding provided by the Oregon legislature to serve the educational and research needs of Oregon workers and their organizations. LERC has an advisory board that includes representatives from state labor and community organizations and other related constituencies. LERC faculty collaborate with academic departments on research, teaching, and public service projects.

The center serves as a liaison between members of Oregon's labor relations community and the state university system. The center's research and educational programs provide a catalyst for interaction among labor leaders, public officials, arbitrators, labor relations specialists, community and nonprofit organizations, and members of the academic community.

The center produces educational programs including seminars, conferences, workshops, and short courses on campus and throughout the state. It offers training and education to workers and unionists in grievance handling, arbitration, collective bargaining, health and safety,

and other issues of concern in today's complex and rapidly changing economy. Most of these programs are offered without credit.

Faculty members conduct both applied and scholarly research on current and emerging issues in labor relations and working life. Areas of research include the changing environment and structure of collective bargaining, sustainability and green jobs, immigration and Oregon's changing workforce, workplace health and safety, economic justice and the low-wage economy, privatization, and worker rights in organizing and dispute resolution.

For students enrolled at the University of Oregon, the LERC faculty teaches for-credit courses in academic departments on topics such as labor history, labor policy, immigration, and economic justice. In addition, LERC also provides a participatory learning experience for undergraduate students, an intensive internship with Oregon labor organizations on research and related projects—Supervised Field Study (LERC 406). Students earn 4 credits each term of the internship. To participate, students must get pre-approval from the LERC faculty.

LERC also offers a GE research position each year to a graduate student working on issues related to labor, employment policy, or worker justice.

LERC in Portland

LERC offices in Portland offer services to the metropolitan area through general and specialized programs. The Portland office is located in the University of Oregon's White Stag Block at 70 NW Couch Street, Suite 353; telephone 503-412-3721.

The Labor Education and Research Center is a member of the United Association for Labor Education and the Pacific Northwest Labor History Association.

Library Administration, Knight Library

1299 University of Oregon

Eugene, Oregon 97403-1299

libref@uoregon.edu

About the Libraries

The University of Oregon Libraries supports the teaching, learning, and research programs of the university and is open to the general public. The range of support provided to the faculty and students is broad, including

- reference and research assistance
- information literacy and research data management instruction
- access to print, media, and digital collections, including extensive special collections and archives
- interlibrary loan services
- access to computers and electronic resources
- access to fabrication labs, AR/VR technology and a sound recording studio
- media-rich and technology-enhanced classroom facilities

The UO Libraries, an Association of Research Libraries member, houses one of the largest research collections in the Pacific Northwest, with more than 2 million titles in its general collection, and serves as many as 50,000 users per week during the academic year. Extensive holdings of manuscripts, microforms, CDs, DVDs, phonograph records, films, videotapes, slides, maps, and state, federal, and international documents complement the core collections. To meet the growing demand for digital resources, the UO Libraries continues to expand its digital holdings, with millions of objects and two million digital newspaper pages currently available online. The Libraries is home to a special collection which holds one of the largest manuscript collections on the west coast, and a plethora of rare, distinctive, and globally significant records that annually draw visitors from around the world. The Libraries is also home to the University Archives, which preserves and provides access to the University of Oregon's institutional history.

The Libraries serves as a cross-disciplinary connector across campus and annually hosts numerous events and exhibits that bring academic communities together.

A special center within Libraries is the Network Startup Research Center, which provides support and training to build foundational network infrastructure around the world, making it easier for scientists, engineers and educators to collaborate via the Internet with their international colleagues by helping to connect communities of interest.

The UO Libraries is committed to providing a culturally inclusive environment where diversity of thought and expression is valued and respected. With a more global outlook and a focus on equity in service, we strive to create a powerful learning community, a welcoming space where all Library patrons can access the information necessary to achieve their personal and professional goals.

Facilities and Resources

The University of Oregon Libraries comprises seven libraries: Knight Library (the main branch), four branch libraries in Eugene, and two branch libraries outside of Eugene. Eugene campus libraries include the John E. Jaqua Law Library, located in the Knight Law Center; the Allen Price Science Commons and Research Library, located in the Lorry I. Lokey Science Complex; the Mathematics Library in Fenton Hall; and the Design Library in Lawrence Hall. Branch libraries at other UO campuses include the Loyd and Dorothy Rippey Library at the Oregon Institute of Marine Biology in Charleston, Oregon, and the Portland Library and Learning Commons based at UO's Portland, Oregon campus. Reference and research service is provided in all libraries. For hours of operation, consult the Libraries' website (<http://library.uoregon.edu>).

The libraries provides access to an array of services and technology resources, including technology workshops, scanning equipment, digital cameras, color printers, and desktop computers equipped with production, presentation, and graphics software. The libraries also offers technology-rich and creative spaces such as the Visualization Lab and DeArmond MakerSpace in the Price Science Commons, and the Digital Research, Education, and Media (DREAM) Lab and the Innovate, Design, Aspire (IDEA) Space in Knight Library.

The UO Libraries' website is an excellent starting point from which to explore information resources and services. With robust search capabilities, the website provides access to information on library services and programs and to resources in all formats. Materials not held by the UO Libraries or its regional partners may be borrowed through interlibrary loan.

The libraries' online catalog is updated constantly with information about library materials, new books and book orders, and electronic journals. Users can search numerous online periodical indexes, databases, newspapers, e-books, and e-journals. Search tools for e-journals are accompanied by a feature that allows users to easily locate the full text of articles. Convenient access to unique digital collections is provided through the website as well.

Services

The UO Libraries' instructional programs include technology workshops, in-class presentations by librarians and archivists, and credit courses on research methods, information access, data management, and digital scholarship. These programs reach more than 22,000 students and faculty members each year.

The UO Libraries collaborates with faculty members and students to advance research and scholarly communication using new media and digital technologies. Based on a foundation of access, sharing, and preservation, the library provides digital asset management, digital preservation, training, consultations, and tools for digital scholarship. The library also manages and maintains the UO Scholars' Bank, an online archive of the scholarly output of the campus community, and assists researchers with the organization, management, and curation of data.

The UO Libraries personnel are committed to the principle of equal opportunity in education, research, and service, and strive to ensure that collections, services, and facilities are accessible to all users. For more information, consult the website (<http://library.uoregon.edu/library-accessibility/>). For assistance or accommodation, please contact a library employee in person at any service desk or by phone, email, or a live chat session. Special accommodation requests may be directed to Library Administration at 541-346-3056.

Borrowing

Students who are currently enrolled or registered and University of Oregon employees may borrow materials from the UO Libraries. They also may borrow materials and receive online article deliveries from any of the other libraries with which the UO Libraries has reciprocal lending agreements. A number of document delivery services are available, including special programs for distance-education students. Through its course reserves program, the library provides students with access to selected course readings. Information on access to user accounts and other services is available on the library's website.

Student Employment

The UO Libraries employs students to assist in all facets of library operations, and students often are able to work in areas related to their academic, professional, and personal interests. For more information, contact the library's Human Resources office at libhr@uoregon.edu.

History

The first official library at the University of Oregon was established in 1891, when Henry Villard donated a book collection valued at \$1,000. As collections grew during the next twenty years, the library moved to progressively larger quarters in various locations. In 1905 the legislature appropriated funds for a new library building, now Fenton Hall. The building was completed in 1907, and a fireproof stack annex was added in 1913.

Knight Library was designed by Ellis F. Lawrence and constructed in 1937. The facade has been described as "exotic, a combination of modernized Lombardy and Greco-Roman with art deco details." The building contains exceptionally fine exterior and interior decorative work, including the fifteen stone heads by Edna Dunberg and Louise Utter Pritchard, ornamental memorial gates by O. B. Dawson, and carved wooden panels by Arthur Clough. The 1937 building and the quadrangle it faces are listed on the National Register of Historic Places.

Additions to Knight Library were constructed in 1950 and 1966. During a third expansion and renovation project, a 132,000-square-foot addition was completed in 1992, and substantial renovation of the existing building was completed in 1994.

Donor Program

Gifts from alumni and friends help strengthen library collections, enhance library facilities, purchase new technology, employ student assistants, and preserve Oregon's rich history. For more information, call the Library Administration office at 541-346-3056.

Multicultural Academic Excellence

Rosa Chavez, Director

541-346-3479

541-346-3416 fax

164 Oregon Hall

<https://inclusion.uoregon.edu/content/center-multicultural-academic-excellence-cmae> (<https://inclusion.uoregon.edu/content/center-multicultural-academic-excellence-cmae/>)

cmae@uoregon.edu

The Center for Multicultural Academic Excellence is committed to the retention, support, and academic success of historically underrepresented and underserved populations, including low-income, first-generation, and multiple-identity students. The center provides academic services, leadership development, cultural programming, and dedicated space structured around a program of best practices for student access and success. Services include but are not limited to the following:

- academic advising and support
- scholarship administration
- leadership development and mentoring

- cultural programming
- advocacy (academic petition; financial aid; bias or discrimination)
- graduate school preparation
- tutorial assistance
- dedicated space (computer laboratory with printing privileges)
- selected course offerings with preregistration, including

Code	Title	Credits
WR 121	College Composition I	4
WR 122	College Composition II	4
MATH 111	College Algebra	4
MATH 241	Calculus for Business and Social Science I	4
MATH 242	Calculus for Business and Social Science II	4
MATH 243	Introduction to Methods of Probability and Statistics	4

The Center for Multicultural Academic Excellence sponsors the Reach for Success middle school visitation program, a multicultural Awards and Graduation Ceremony, and multicultural speakers and presenters. The office also provides technical, advisory, and financial support of student organizations, and it enhances the new student experience by participating in IntroDUCKtion, Week of Welcome activities, Duck Days, and a fall orientation retreat for new students of color.

Services are free. All students, in particular those historically underrepresented, are encouraged to use the center.

Museums

Jordan Schnitzer Museum of Art

John Weber, Executive Director

541-346-0972

541-346-0976 fax

1430 Johnson Lane

1223 University of Oregon

Eugene, Oregon 97403-1223

jsma.uoregon.edu (<http://jsma.uoregon.edu>)

The Jordan Schnitzer Museum of Art (JSMA) is a visual arts resource for students, faculty members, and visitors. The museum collects, preserves, studies, exhibits, and interprets works of art for the benefit of the UO curriculum and for the enrichment of the general public. The museum's 14,000 piece collection has strengths in Asian, Pacific Northwest, and American art and has recently expanded collecting into the areas of European and Latin American art. More than half of the museum's collection is searchable online, thanks to grants from the Oregon Cultural Trust.

The JSMA presents exhibitions and programs that emphasize cross-cultural understanding, provide broad education experiences, and support collaborative and interdisciplinary opportunities on and off campus. The collection galleries feature art from the Americas, Europe, China, Japan, and Korea, enhanced with a provocative series of special exhibitions and a full complement of programs designed to keep visitors engaged. A multicultural destination, the museum offers Spanish language materials throughout the galleries.

As a nationally accredited university museum, the Jordan Schnitzer Museum of Art is an important teaching resource. Its exhibitions and programs are based on the multidisciplinary curricular and extracurricular interests of university and community audiences. Museum staff and faculty members lecture, teach, and lead museum tours for UO students and others in the community. Student involvement is encouraged at several levels, beginning with a free student membership program and ranging from internships, practicums, and paid and volunteer opportunities to service on advisory committees.

Opened in 1933 and designed by architect and former dean of the architecture school Ellis Lawrence, the museum, including its Prince Lucien Campbell Memorial Courtyard, is on the National Registry of Historic Places. In 2005, the museum reopened after a few years of renovation, doubling its original size. Today, in addition to its galleries, the museum houses an art-making studio, lecture and reception halls, a museum café, and two exterior courtyards.

Admission is free for museum members, children under eighteen, UO and other college students, and UO faculty and staff members. University identification is required. The museum hours are Wednesday through Sunday, 11:00 a.m. to 5:00 p.m., with extended evening hours every Wednesday until 8:00 p.m.

Museum of Natural and Cultural History

Jon M. Erlandson, Executive Director

541-346-3024

541-346-5334 fax

1680 E. 15th Ave.

1224 University of Oregon

Eugene, Oregon 97403-1224

mnch.uoregon.edu (<https://mnch.uoregon.edu/>)

The Museum of Natural and Cultural History is a place for making connections—to each other, to our past, and to our future. It's a place for digging into science, celebrating culture, and joining together to create a just and sustainable world.

A center of interdisciplinary research and education, the museum is a resource for teaching, learning, and connecting at the University of Oregon. Throughout the year, students conduct research, tour collections, and complete internships and participatory learning experiences at the museum. The MNCH is also home to a vibrant student club that enhances student life through a variety of events and social gatherings throughout the year. Each year, courses in anthropology, biology, geology, architecture, design, and other departments and schools use the museum. Faculty and staff members lecture, teach, and lead museum and field tours for UO students and the broader community. Graduate students and visiting scholars use the collections for research leading to theses, dissertations, and other publications or reports.

As the state's official repository for publicly owned anthropological and paleontological collections, the museum works closely with Oregon tribes and safeguards hundreds of thousands of significant artifacts—including 10,000-year-old sagebrush bark sandals from Fort Rock Cave. The museum is also home to the Condon Collection of Fossils, Oregon's premier paleontological research collection. Museum exhibits focus on Pacific Northwest geology, archaeology, Native American cultures, traditional cultures worldwide, and social and environmental justice. Offering tours and educational activities for children, families, and community groups, the museum serves school districts and a wide variety of community groups across the state. The museum annually welcomes

more than 30,000 visitors and serves another 20,000 Oregonians through its statewide outreach programs. A winner of the 2018 National Medal for Museum and Library Service (<https://www.ims.gov/issues/national-initiatives/national-medal-museum-and-library-service/2018-medals/>), the museum is fully accredited by the American Alliance of Museums (<http://www.aam-us.org/home/>), distinguishing it as one of the very best museums in the nation.

Admission is free for UO students, faculty, staff, and museum members; \$6 for adults, \$4 for seniors and youth, and \$12 for families; visitors presenting Oregon Trail or other electronic benefit transfer (EBT) cards are admitted at a reduced rate. Admission is free for all on the first Friday of every month. Please visit mnch.uoregon.edu or call 541-346-3024 for current hours.

Condon Collection of Fossils

541-346-3461
214 Volcanology Building
1272 University of Oregon
Eugene, Oregon 97403-1272

The Condon Collection, part of the Museum of Natural and Cultural History, is the State of Oregon's official repository for paleontological materials. It includes geological specimens collected by Thomas Condon, pioneer geologist and science professor at the University of Oregon. Condon was one of the first professors to join the UO faculty when it was established in 1876. When he died in 1907, his extensive teaching collection of fossils and rocks became the permanent possession of the university. Since 1907 the collection has grown to include more than 65,000 catalogued specimens—including the type specimen of Oregon's famous giant spike-toothed salmon. While vertebrate fossils make up the bulk of the collection, it also includes invertebrates, large holdings of fossil plants (largely leaf impressions), and several thousand skulls and skeletons of recent mammals, birds, reptiles, amphibians, and fish.

University of Oregon in Portland

503-412-3696
70 NW Couch St. and 109 NW Naito Ave.
Portland, Oregon 97209
<http://pdx.uoregon.edu>

The University of Oregon has offered programs in Portland for more than 100 years. Continuing this tradition, the University of Oregon Portland—based in the historic White Stag Block—offers students and professionals advanced learning opportunities, professional graduate degree programs, and access to city and industry leaders. Students have access to support services, career counseling, branches of the UO Libraries and the Duck Store, and state-of-the-art maker-spaces.

Events, exhibits, lectures, and networking opportunities for students and community members take place in both the White Stag Block and the 109 NW Naito building.

College of Design

The College of Design at the University of Oregon Portland partners in multiple ways with the city and the metropolitan area through teaching, research creative work, and service activities. Portland is an extraordinary urban laboratory for the University of Oregon students and faculty members.

The School of Architecture and Environment offers master's degrees in architecture and historic preservation. Students can earn a bachelor of fine arts (BFA) or a master of science in sports product design from the School of Art and Design.

Research centers include the Energy Studies in Buildings Laboratory—with a climate chamber, mirrored-box artificial skies, heliodons, and wind tunnels—and Urbanism Next, which focuses on the secondary impact of new technology on city development.

Charles H. Lundquist College of Business

The Oregon Executive Master of Business Administration Program allows accomplished executives to hone their skills and reinvigorate their careers through interactions with peers, faculty members, and members of the UO's business network. The sports product management degree program offers both full-time and online options to earn a master's degree that prepares graduate students to learn the business of creating athletic and outdoor apparel, footwear, and equipment.

School of Journalism and Communication

The multimedia journalism and strategic communications graduate programs in Portland provide flexible schedules for working professionals. Students have access to the Oregon Reality Lab, a place to use emerging technology such as virtual reality, augmented reality, and 360-degree video. The Agora Journalism Center is the gathering place for innovation in communication and civic engagement.

School of Law

UO law school students can spend their third year studying in Portland. The School of Law's Portland Program includes specialized courses, externships, and a bridge to practice. Students build relationships with Portland-area employers and practitioners through mentorships, innovative programming, and networking events.

Physical Education

Chantelle Russell, Associate Director

The physical education program offers physical activity courses for university students, UO faculty and staff members, and members of the Eugene-Springfield community. Physical education courses emphasize the development of physical skills, improvement in fitness levels, and the acquisition of knowledge that contributes to a healthy lifestyle.

Approximately 130 courses are offered each term in a variety of activity areas—aquatics and scuba, fitness, individual activities, leadership, martial arts, mind-body, outdoor pursuits, racquet sports, running, team sports, and weight training. This ever-changing array of courses is taught by an exceptional staff of faculty members and contract employees.

Most classes meet twice a week for 1 credit. As many as 12 credits in physical education may be applied as electives to a bachelor's degree. Each term's offerings are listed in the Schedule of Classes online. Students may register for courses through DuckWeb, which is explained in the **Registration and Academic Policies** section of this catalog.

Students and members of the staff, faculty, and community may enroll in physical education courses as noncredit participants, if space is available. Noncredit participants pay the PE course fee and register in person at the service desk in the Student Recreation Center or online (<https://recweb.uoregon.edu/>) once registration is open for the term.

Opportunities are available for students who have disabilities or who need special accommodations in order to participate in physical education courses. More information and support is available by calling 541-346-4113, 8:00 a.m.–5:00 p.m., Monday–Friday, or visit the PE and Rec website. (<https://rec.uoregon.edu/>)

Fees for Physical Education Courses

Course	Fee
Activity (1 credit)	\$90
Activity (2 credits)	\$180
Outdoor pursuits	\$105–\$200
Practicum (1–3 credits)	\$40

Some courses require additional fees to pay for equipment, transportation, contract expenses, and certification. Fees and fee-refund schedules are printed in each term's schedule of classes.

Faculty

Anne Borland, senior instructor (outdoor pursuits). BA 1987, Oregon. (2008)

Daniel Crowe, senior instructor (outdoor pursuits). BA, 1997, Concordia College. (2004)

David Rubino, senior instructor (individual activities, martial arts, running, team sports, weight training); assistant director. BS, 1987, State University of New York, Cortland; MA, 1988, Northern Colorado. (2001)

Joan Dobbie, senior instructor (mind body). BA, 1967, State University of New York, Potsdam. (1998)

Justine Halliwill, senior instructor (martial arts, mind body). BS, 2005, Oregon. (2005)

Linda Metzger, senior instructor (fitness). BA, 2008, Platteville; WI. (2011)

Michele Bulgatz, senior instructor (mind body). BA, 1985, California, Santa Barbara. MS, 1994, Oregon. (2001)

Michie Kawada, senior instructor (aquatics, fitness). BA, 1998, Oregon. (2002)

Nat Lundin, senior instructor (mind body). BS, 2007, Oregon. (2009)

Ryan Kelly, senior instructor (martial arts). (1999)

Emeritae

Karla S. Rice, senior instructor emerita. BS, 1962, Central Michigan; MA, 1965, Michigan State. (1967)

Becky L. Sisley, professor emerita; athletic liaison. BA, 1961, Washington (Seattle); MSPE, 1964, EdD, 1973, North Carolina, Greensboro. (1965)

Lois J. Youngen, associate professor emerita. BS, 1955, Kent State; MA, 1957, Michigan State; PhD, 1971, Ohio State. (1960)

Michael Strong, senior instructor II emerita (outdoor pursuits). MS, 1986 University of Oregon. BS 1976, University of Alberta. (1986)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Physical Education: Aquatics—Scuba Courses

PEAS 199. Special Studies: [Topic]. 1 Credit.
Repeatable.

PEAS 368. Scuba: Basic. 2 Credits.
Repeatable. Open water certification. Techniques and equipment used in underwater diving. Water safety, diving physics, medical aspects of diving, and decompression. Leads to basic scuba certification. Equipment provided. Repeatable once for maximum of 4 credits.
Prereq: Beginning swim experience

PEAS 369. Scuba: Advanced. 1 Credit.
Repeatable. Advanced open water diver certification. Navigation, deep diving, night diving and other topics. Develop underwater skills and learn speciality diving activities. Equipment provided. Repeatable once for a maximum of 2 credits.
Prereq: PEAS 368 or equivalent.

PEAS 370. Scuba: Rescue Diver. 1 Credit.
Repeatable. Rescue Diver certification. Concepts of self rescue, psychological and physical stress, tows, assists, in-water resuscitation and rescue techniques. Equipment provided. Repeatable once for maximum of 2 credits.
Prereq: PEAS 369 or equivalent.

PEAS 375. Scuba: Deep Diver. 1 Credit.
Learn to dive to greater depths and develop special skills for deep dive planning, organization, procedures, techniques and hazards. R once for a maximum of 2 credits.

PEAS 378. Scuba: Nitrox. 1 Credit.
Instruction in diving with enriched air to extend 'no decompression' limits, increasing time spent underwater. Repeatable once for a maximum of 2 credits.

PEAS 381. Scuba: Dive Master I. 1-2 Credits.

Repeatable. Dive master certification. Preparation toward becoming a diving instructor. In-depth knowledge of general diving theory and watermanship skills. Assist a PADI instructor with the supervision of underwater diving students, dive planning and organization. Equipment provided. Repeatable once for a maximum of 4 credits.
Prereq: PEAS 370; 18 years old, 20 logged dives.

PEAS 382. Scuba: Dive Master II. 1-2 Credits.

Repeatable. Advanced watermanship skills, leading to certification as a Dive Master. Responsible for demonstrating techniques and skills, class management, and assist students with common problems. Construct an underwater map. Repeatable once for a maximum of 4 credits.
Prereq: PEAS 381 or equivalent.

PEAS 399. Special Studies: [Topic]. 1-2 Credits.

Repeatable.

Physical Education: Aquatics Courses**PEAQ 111. Learn to Swim. 1 Credit.**

Learn to swim and gain confidence/comfort in shallow and deep water. A beginning course for the non-swimmer to learn how to float, submerge comfortably, and move through the water. Repeatable once for a maximum of 2 credits.

PEAQ 121. Water Fitness I. 1 Credit.

Repeatable. Principles of effective water-based conditioning. Cardio respiratory fitness and strength building workout. An effective workout to music using both shallow and deep water. Repeatable once for a maximum of 2 credits.

PEAQ 122. Water Fitness II. 1 Credit.

Repeatable. Principles of effective water-based conditioning. Cardio respiratory fitness and strength building workout. An effective workout to music using both shallow and deep water. Repeatable once for a maximum of 2 credits.

PEAQ 140. Paddleboard Yoga. 1 Credit.

All the benefits of yoga delivered on top of the water. The standup paddleboard (SUP) provides a balance challenge to strengthen and tone your core while gaining strength, awareness and range of motion from head to toes. A playful and unique experience for all levels. Repeatable once for a maximum of 2 credits.

PEAQ 199. Special Studies: [Topic]. 1-2 Credits.

Repeatable.

PEAQ 201. Swimming I. 1 Credit.

Repeatable. A beginning swim course for those who need to learn breathing and fundamental stroke work in freestyle and backstroke. Must be able to swim one length of the pool and be comfortable in deep water. Repeatable once for a maximum of 2 credits.

PEAQ 202. Swimming II. 1 Credit.

Repeatable. An intermediate-level swim course for those who want to master freestyle and breathing; improve technique in backstroke, breaststroke, and butterfly; and improve stroke efficiency and endurance. Repeatable once for a maximum of 2 credits.

PEAQ 203. Swimming III. 1 Credit.

Repeatable. An advanced-level swim course emphasizing endurance, sprint, and stroke work. Must be proficient in all four strokes: butterfly, backstroke, breaststroke, and freestyle. Repeatable once for a maximum of 2 credits.

PEAQ 351. Lifeguard Certification. 1 Credit.

Repeatable. StarGuard Lifeguard, First Aid and CPR for the Professional Rescuer certification course. Repeatable once for a maximum of 2 credits.

Prereq: Pass swimming test.

PEAQ 399. Special Studies: [Topic]. 1-2 Credits.

Repeatable.

Physical Education: Certification Courses**PEC 199. Special Studies: [Topic]. 1-5 Credits.**

Repeatable.

PEC 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

PEC 408. Workshop: [Topic]. 1-5 Credits.

Repeatable.

Physical Education: Fitness Courses**PEF 131. Body Sculpting I. 1 Credit.**

Repeatable. Emphasizes muscular endurance training for the upper body, lower body, and abdominals. Dumbbells, soft weights, tubing, steps, small medicine balls, and body resistance challenge every major muscle group in the body. Repeatable once for maximum of 2 credits.

PEF 132. Body Sculpting II. 1 Credit.

Repeatable. Intermediate level emphasis on muscular endurance training for the upper body, lower body, and abdominals. Dumbbells, soft weights, tubing, steps, small medicine balls, and body resistance challenge every major muscle group in the body. Repeatable once for maximum of 2 credits.

Prereq: PEF 131 or equivalent.

PEF 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

PEF 205. Pilates Yoga Fusion. 1 Credit.

Repeatable. This course combines Pilates and Yoga techniques to improve balance and flexibility while building a strong muscular core. Repeatable once for credit.

PEF 207. Fitness Yoga. 1 Credit.

Incorporates fitness moves with traditional yoga postures in a flowing format. Use of breath and principles of alignment to condition strength, core, balance, and flexibility, along with focus, concentration, and relaxation. Repeatable once for a maximum of 2 credits.

PEF 208. Fitness Barre. 1 Credit.

A fusion of Pilates, yoga and elements of aerobics to deliver a total body workout. Focus on posture, body awareness, strength, flexibility, and balance through low-impact, isometric and dynamic movements using a barre for a prop. All fitness levels, no dance experience necessary. Repeatable once for a maximum of 2 credits.

PEF 220. Introduction to CrossFit. 1 Credit.

Designed for beginners, focusing on form and technique and introducing concepts of CrossFit through simple workouts. Students will develop comfort and strength in barbell lifts, and use body weight and other equipment for loading during the workouts that are done with an element of speed. Repeatable once for a maximum of 2 credits.

PEF 221. CrossFit I. 1 Credit.

Introduction to highly functional cross-training movements, constantly varied and performed with intensity. Strength, endurance, power, and agility are built in a supportive, team-oriented environment. PE activity courses are repeatable once for credit.

PEF 222. CrossFit II. 1 Credit.

Intermediate and advanced dynamic exercises and training progressions. Technique, strength, endurance, power and agility are enhanced. Sequence with PEF 221. PE activity courses are repeatable once for credit.

Pre-requisite: PEF 221 or equivalent experience.

PEF 241. Group Cycling I. 1 Credit.

Repeatable. A high intensity workout on a specialized stationary cycle (Startrac V-bike). Designed for beginning to intermediate fitness levels, students exercise to music using a variety of riding techniques. Equipment care, muscular activation and endurance, and cardiorespiratory fitness, are covered. Repeatable once for a maximum of 2 credits.

PEF 243. Cycle Sculpt. 1 Credit.

A combination of indoor cycling and functional strength training for students who are pressed for time and want to improve strength, endurance and cardio conditioning. Appropriate for all fitness levels, learning to apply various riding techniques and full body exercises. Repeatable once for a maximum of 2 credits.

PEF 251. Fitness Kickboxing. 1 Credit.

Repeatable. Practice jabs, punches, footwork, and kick patterns adapted from martial arts for the aerobics participant. Features a warm-up, more than 30 minutes of skills training and combinations, a cool-down, and stretching. Repeatable once for a maximum of 2 credits.

PEF 261. Cardio Fusion. 1 Credit.

A fusion of aerobic dance, martial arts, and yoga movements, this course focuses on improving strength, cardiovascular fitness, and neuromuscular coordination. Repeatable. All PE activity classes are repeatable once for credit.

PEF 291. Speed and Agility. 1 Credit.

Topics include techniques for acquiring speed, agility, and conditioning; learning movement skills and applying energy systems. Minimal lectures complement practical application of drills. Repeatable once for maximum of 2 credits per activity.

PEF 301. Core and Stretch. 1 Credit.

Gain physical strength, flexibility, and muscular endurance while learning about physiology and anatomy. Develop personalized training program. Repeatable once for maximum of 2 credits.

PEF 311. Boot Camp. 1 Credit.

Sport conditioning drills, running, resistance training, and dynamic core work to improve cardiovascular fitness, muscular endurance, agility, and flexibility. For students with a good base of physical fitness. Repeatable once for credit.

PEF 321. Zumba. 1 Credit.

Repeatable. Fitness and dance moves to Latin rhythm and music: salsa, meringue, cumbia, and others. Simple enough for beginners yet can challenge the fitness of advanced exercisers. Repeatable once for credit.

PEF 326. Fitness Dance. 1 Credit.

Cardiovascular workout, dance moves and routines to Top Forty hits, music videos, and hip-hop. Typical class features warm-up, 30 minutes of dance, and cool-down. Repeatable once for credit.

PEF 335. Healthy Cooking. 1 Credit.

Learn cooking basics and nutrition education through a combination of lecture and activity in the kitchen; including food preparation and tasting, grocery store tour, deciphering food labels, shopping on a budget, and basic cooking techniques for grains, vegetables, and proteins. Repeatable once for a maximum of 2 credits.

PEF 340. Personal Trainer. 3 Credits.

Lecture and lab experiences for administering fitness assessments in individual and group settings. Prepares the student for the American Council on Exercise Personal Trainer Certification Exam.

PEF 342. . 3 Credits.**PEF 344. Eat, Move, and Be Well. 2 Credits.**

For students in need of lifestyle behavior change and guidance who are motivated to use a holistic wellness approach (nutrition, exercise, stress management) to initiate healthy habits. Class includes twice a week 50-minute movement sessions.

PEF 345. Nutrition and Performance. 3 Credits.

Explores the influence of nutrition on athletic performance and health. Includes body composition assessment, nutritional analysis, and personal dietary and training behaviors. Risks and benefits of nutritional supplements.

PEF 347. Nutrition Daily. 1 Credit.

Learn the foundations of nutrition and how it applies to you, the individual, based on goals, physical make-up, lifestyle and activity. Learn the importance and identification of macronutrients, efficient meal planning and preparation, grocery shopping and navigating nutrition labels.

PEF 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

PEF 408. Workshop: [Topic]. 1-5 Credits.

Repeatable.

Physical Education: Individual Activities Courses

PEI 199. Special Studies: [Topic]. 1-2 Credits.

Repeatable.

PEI 201. Juggling I. 1 Credit.

Repeatable. Introduces and develops juggling skills with balls, rings, clubs and other props. Emphasis on creative exploration, relaxation and fun. Repeatable once for a maximum of 2 credits.

PEI 202. Juggling II. 1 Credit.

Repeatable. Advanced development of juggling skills with balls, rings, clubs and other props. Visual independence and imagination, relaxation and breath awareness. Repeatable once for a maximum of 2 credits. Prereq: PEI 201 or equivalent.

PEI 241. Golf I. 1 Credit.

Introduction to the game. The majority of class time is at the driving range learning swing techniques for distance, pitching, chipping and putting, rules, etiquette, and golf vocabulary. Students must provide their own transportation. Repeatable once for a maximum of 2 credits,

PEI 242. Golf II. 1 Credit.

For the experienced golfer who wants to refine their skills. Includes review of swing techniques for all situations, rules, etiquette, and golf vocabulary. Students must provide their own transportation. Repeatable once for a maximum of 2 credits. Prereq: PEI 241 or equivalent.

PEI 243. Golf III. 1 Credit.

Emphasis on course play for the advanced golfer to hone basic skills. Includes time on the driving range and putting green. Students must provide their own transportation. Repeatable once for a maximum of 2 credits. Prereq: PEI 242 or equivalent.

PEI 244. Golf Swing Exercise. 1 Credit.

Improve your golf swing in the off-season via swing specific exercises. Sequence with Golf I, Golf II, Golf III. All PE activity classes are repeatable once for credit.
Prereq: PEI 243 or equivalent.

PEI 399. Special Studies: [Topic]. 1-2 Credits.

Repeatable.

Physical Education: Intercollegiate Athletics Courses

PEIA 199. Special Studies: [Topic]. 1-2 Credits.

Repeatable.

PEIA 301. Lacrosse. 1 Credit.

Repeatable once for a maximum of 2 credits.

PEIA 305. Acrobatics and Tumbling. 1 Credit.

Repeatable. Varsity athletes may earn a PE credit for their team workouts during their competitive season. All PE activity courses are repeatable once for credit.

Prereq: Must be a varsity team member.

PEIA 311. Women's Golf. 1 Credit.

Repeatable once for a maximum of 2 credits.

PEIA 312. Men's Golf. 1 Credit.

Repeatable once for a maximum of 2 credits.

PEIA 317. Women's Tennis. 1 Credit.

Repeatable once for a maximum of 2 credits.

PEIA 318. Men's Tennis. 1 Credit.

Repeatable once for a maximum of 2 credits.

PEIA 323. Women's Cross-Country. 1 Credit.

Repeatable once for a maximum of 2 credits.

PEIA 324. Men's Cross-Country. 1 Credit.

Repeatable once for a maximum of 2 credits.

PEIA 329. Women's Track. 1 Credit.

Repeatable once for a maximum of 2 credits.

PEIA 330. Men's Track. 1 Credit.

Repeatable once for a maximum of 2 credits.

PEIA 341. Softball. 1 Credit.

Repeatable once for a maximum of 2 credits.

PEIA 342. Baseball. 1 Credit.

Repeatable. Varsity athletes may earn a PE credit for their team workouts during their competitive season. All PE activity courses are repeatable once for credit.

Prereq: Must be a varsity team member.

PEIA 346. Sand Volleyball. 1 Credit.

Repeatable once for maximum of 2 credits.

Prereq: varsity athletes only.

PEIA 347. Volleyball. 1 Credit.

Repeatable once for a maximum of 2 credits.

PEIA 350. Soccer. 1 Credit.

Repeatable once for a maximum of 2 credits.

PEIA 353. Women's Basketball. 1 Credit.

Repeatable once for a maximum of 2 credits.

PEIA 354. Men's Basketball. 1 Credit.

Repeatable once for a maximum of 2 credits.

PEIA 360. Football. 1 Credit.

Repeatable once for a maximum of 2 credits.

PEIA 371. Sport Conditioning I. 1 Credit.

Repeatable. A strength and conditioning training opportunity for varsity and club sport student-athletes. Sequence with PEIA 372, PEIA 373. All PE activity courses are repeatable once for credit.

PEIA 372. Sport Conditioning II. 1 Credit.

Repeatable. A strength and conditioning training experience for varsity and club sports student-athletes. Sequence with PEIA 371, PEIA 373. All PE activity classes are repeatable once for credit.

PEIA 373. Sport Conditioning III. 1 Credit.

A strength and conditioning training experience for varsity and club sport student-athletes. Sequence with PEIA 371, PEIA 372. All PE activity courses are repeatable once for credit.

PEIA 399. Special Studies: [Topic]. 1-2 Credits.

Repeatable.

Physical Education: Leadership Courses

PEL 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

PEL 310. Coaching. 2 Credits.

Addresses all aspects of coaching from kindergarten through college. Topics include philosophy, objectives and outcomes, communication styles, writing workouts, discipline, and age-appropriate skills, drills and strategies. Sequence with PEL 406 is possible with successful completion of the course.

PEL 311. Coaching II. 2 Credits.

Practical application of knowledge and skills from PEL 310 Coaching I, by implementing strategies and techniques in teaching or coaching situation. Students will write a practice plan and teach a technical and tactical skill to the class. Sequence with PEL 310.

Prereq: PEL 310 or equivalent experience.

PEL 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

PEL 406. Practicum: [Topic]. 1-4 Credits.

Practical experiences in equipment and facilities management service, outdoor pursuits, recreation and intramurals, and physical education. Repeatable five times for a maximum of 6 credits.

PEL 408. Workshop: [Topic]. 1-5 Credits.

Repeatable. Professional topics in physical education.

PEL 409. Terminal Project. 1-12 Credits.

Repeatable.

Physical Education: Martial Arts Courses

PEMA 115. Self-Defense. 1 Credit.

Fundamental concepts of self defense. Mental and physical strategies, awareness and reaction training. Class theme is prevention, covering the "Three As": Awareness, Assessment, Action.

PEMA 116. Women's Self Defense. 2 Credits.

Supportive, empowering class focusing on verbal and physical skills for avoiding and resisting assault. Includes boundary-setting, de-escalation, assertiveness, healthy relationship skills, and effective fighting techniques. Repeatable once for a maximum of 4 credits.

PEMA 199. Special Studies: [Topic]. 1-2 Credits.

Repeatable.

PEMA 255. Kickboxing. 1 Credit.

Repeatable. This dynamic martial art includes punching and kicking skills, techniques and the rules of competitive kickboxing. Develops balance, flexibility and strength. All PE courses are repeatable once for credit.

PEMA 311. Jeet Kune Do I. 1 Credit.

Repeatable. Basic concepts of Jeet Kune Do and the Filipino Martial Arts. Basic movements, including strikes, kicks, grappling, and defensive weaponry. Develop individualized training methods. Repeatable once for a maximum of 2 credits.

PEMA 312. Jeet Kune Do II. 1 Credit.

Repeatable. Intermediate concepts of Jeet Kune Do and the Filipino Martial Arts. Demonstrate movements, immobilization techniques, and practical self defense skills. Repeatable once for a maximum of 2 credits. Prereq: PEMA 311 or equivalent.

PEMA 321. Jiu-Jitsu I. 1 Credit.

Repeatable. Introduction to concepts of Brazilian Jiu-Jitsu. Combative activity incorporating throwing, falling, grappling, holds, and safe positioning. Development of practical self-defense knowledge and skills. Repeatable once for a maximum of 2 credits.

PEMA 322. Jiu-Jitsu II. 1 Credit.

Repeatable. Basic and intermediate motions of Brazilian Jiu-Jitsu. History, rules and scoring system for sport, escape movements, submission holds. Repeatable once for a maximum of 2 credits. Prereq: PEMA 321 or equivalent.

PEMA 331. Mixed Martial Arts I. 1 Credit.

Introductory techniques from boxing, wrestling, jiu-jitsu and muay thai. Rules and scoring system of competitive mixed martial arts. Sequence with PEMA 332. PE activity courses are repeatable once for credit.

PEMA 332. Mixed Martial Arts II. 1 Credit.

Intermediate techniques; building on skills learned in PEMA 331. Develops strategy, game-plan skills, training methods; increases physical strength and skills. Sequence with PEMA 331. PE activity courses are repeatable once for credit.

PEMA 399. Special Studies: [Topic]. 1-2 Credits.

Repeatable.

Physical Education: Mind-Body Courses

PEMB 101. Meditation I. 1 Credit.

Repeatable. Fundamentals of body alignment, breathing, mental focus, and relaxation. Philosophy of yoga as it applies to the different styles and methods of meditation, the nature of thought, awareness, and management of thought processes. Repeatable once for a maximum of 2 credits.

PEMB 103. Mindful Meditation. 1 Credit.

Learn and apply mindfulness practices, including mindful movement, breath work, and body scans, that enhance overall well-being by calming the mind, concentrating fully, releasing stress, and being more attentive in the present moment. Improves focus, mood and relieves stress. Repeatable once for a maximum of 2 credits.

PEMB 108. Kundalini Meditation. 1 Credit.

Repeatable. Fundamentals of using the body, breath, and mind to focus attention. Concepts of mantra (sound), mudra (form), and timing to achieve meditative states. Purification of the mind, self awareness, and energy. Repeatable once for a maximum of 2 credits.

PEMB 110. Beginning Yoga. 1 Credit.

All levels introduction to yoga practices. Learn to perform and recognize benefits of commonly used yoga postures. Great for beginners or people who do not have a strong sense of what type of yoga is best for them. Class will explore a variety of styles. Repeatable once for a maximum of 2 credits.

PEMB 131. Tai Chi I. 1 Credit.

Repeatable. Fundamentals of Tai Chi, a traditional centuries old Chinese art. Yang-style short form emphasizes relaxation, balancing and breathing skills. Individual dance-like movements linked together in a continuous and smooth-flowing sequence to release stress and improve flexibility. Repeatable once for a maximum of 2 credits.

PEMB 132. Tai Chi II. 1 Credit.

Repeatable. Intermediate concepts of both Yang and Chen styles of Tai Chi. Use of body strength, flexibility, and mental control skills. Coordination of eyes, movement, breathing, and internal energy. Repeatable once for a maximum of 2 credits. Prereq: PEMB 131 or equivalent.

PEMB 199. Special Studies: [Topic]. 1-2 Credits.

Repeatable.

PEMB 201. Gentle Yoga. 1 Credit.

Repeatable. Beginning hatha yoga postures to reduce stress, discomfort or pain. Techniques for relaxation and mental focus, breathing patterns, and personal energy. Modify positions to accommodate injury or physical limitations. Increase strength, body alignment, comfort, balance, and flexibility. Repeatable once for a maximum of 2 credits.

PEMB 210. Intermediate Yoga. 1 Credit.

Solidify your understanding of a variety of styles of yoga and master the art of personalizing your practice. Follow up to PEMB 110 Beginning Yoga. Develop a strong foundation and confidence to take with you into any type of yoga, anywhere. Repeatable once for a maximum of 2 credits.

PEMB 211. Hatha Yoga I. 1-2 Credits.

Repeatable. Beginning hatha yoga postures and meditation techniques. Increase strength, balance and flexibility. Improve mental concentration and relaxation with yoga poses and breathing awareness. Relieve tension and fatigue. Repeatable once for a maximum of 2 credits.

PEMB 212. Hatha Yoga II. 1-2 Credits.

Repeatable. Intermediate hatha yoga poses and meditation techniques to improve mental concentration and relaxation. Breathing awareness exercises, mind and body flexibility. Repeatable once for a maximum of 2 credits. Prereq: PEMB 211 or equivalent.

PEMB 213. Hatha Yoga III. 1-2 Credits.

Repeatable once for a maximum of 2 credits.

PEMB 216. Vinyasa Flow Yoga. 1 Credit.

Repeatable. Based on a specialized and dynamic sequence of postures and focused breathing techniques. Participation aids in development of postural strength, stability, and muscular flexibility. All PE activity courses are repeatable once for credit.

PEMB 221. Sports Yoga I. 1 Credit.

Repeatable. Covers important yogic concepts and practices for athletes. Improve your flexibility and strength as you learn yoga techniques, practice, and philosophy. Sequence with PEMB 222. Repeatable once for credit.

PEMB 222. Sports Yoga II. 1 Credit.

Covers advanced yogic concepts and practices for athletes. Improve your flexibility and strength as you learn yoga techniques, practice, and philosophy. Sequence with PEMB 221. Repeatable once for credit.
Prereq: PEMB 221.

PEMB 234. Power Yoga I. 1 Credit.

Practice postures and alignment principles to strengthen the body as well as the lungs and the mind. Emphasis is placed on building muscular endurance and stamina through an athletic, fitness-based approach to flowing yoga poses and breath. Repeatable once for a maximum of 2 credits.

PEMB 302. Ashtanga Yoga. 1 Credit.

Repeatable. Advanced techniques of yoga using breath, movement, focus of eyes, and mastery of the mind. Learn control of the senses and stamina. Repeatable once for a maximum of 2 credits.
Prereq: PEMB 211 or equivalent.

PEMB 305. Aerial Silks Yoga I. 1 Credit.

Breath work and yoga postures for increasing strength and wellness, using the silk hammock as a prop to adjust intensity levels up and down. An emphasis on safe inversions and aided relaxation floating in a silk hammock.

PEMB 310. Yoga Lifelong Practices. 1 Credit.

Advanced studies for students who enjoy the wide variety of styles introduced in other yoga classes and are looking for a deeper more focused practice.
Prereq: At least 2 credits of PEMB coursework.

PEMB 320. Yoga Wellness Techniques. 1 Credit.

Learn and apply effective techniques for managing stress and increasing well-being. In a fun, supportive and calming atmosphere, students will gain lifelong tools for coping with stress. The material will include safe, strengthening asana (poses), breathing, active relaxation, and meditation techniques.

PEMB 399. Special Studies: [Topic]. 1-2 Credits.

Repeatable.

Physical Education: Outdoor Pursuits Courses

PEO 199. Special Studies: [Topic]. 1-2 Credits.

Repeatable.

PEO 242. Bouldering I. 1 Credit.

Techniques for rock climbing without the security of a rope. Emphasis is on safety, skill development and conditioning. Repeatable once for a maximum of 2 credits.

PEO 251. Rock Climbing I. 1 Credit.

Repeatable. Basics of safe and responsible rock climbing. Equipment, knots, belaying, rappelling and a range of other climbing techniques. Conducted on the indoor rock climbing wall. Repeatable once for a maximum of 2 credits.

PEO 252. Rock-Climbing Fitness. 1 Credit.

Repeatable. Continued development of basic climbing skills, with emphasis on improving flexibility and injury prevention. Refine face and crack climbing techniques. Conducted on the indoor climbing wall. Repeatable once for a maximum of 2 credits.
Prereq: PEO 251 or equivalent.

PEO 285. Wilderness Survival. 1 Credit.

Repeatable. Our gateway course must be passed (C- or better) prior to participating in our backcountry-oriented courses. Emphasizes navigation, safety and survival. Repeatable once for a maximum of 2 credits.

PEO 315. Basics of Technical Rescue. 2 Credits.

Introduces students to basic technical rescue skills including, knots, rope management, belaying, rappelling, transporting an injured climber, lowering, raising and improvised rescue techniques. All PE courses are repeatable once for credit.
Prereq: PEO 251 or equiv experience.

PEO 325. Swift-Water Safety. 1 Credit.

Repeatable. Covers methods of crossing shallow and deep swift-water streams. Includes hazard assessment, swimming techniques, knots, rope work, technical systems, pendulum and Tyrolean traverse crossings. All PE courses are repeatable once for credit.
Prereq: PEO 285 and basic swimming ability.

PEO 331. Outdoor Rock Climbing. 2 Credits.

Repeatable. Introduction to anchor building, basic rescue techniques, and outdoor climbing in the context of classroom sessions and a 3-day outing to Smith Rock. Sequence: PEO 251 or equiv experience. All PE courses are repeatable once for credit.
Prereq: PEO 251.

PEO 351. Backpacking. 2 Credits.

Repeatable. For those with little or no backpacking experience. Introduces the basics of backpacking in the context of classroom sessions and a three-day outing to the Oregon Coast. Repeatable once for a maximum of 4 credits.
Prereq: PEO 285

PEO 353. Backcountry Cuisine. 1 Credit.

Students learn how to plan menus, package food, and implement "leave no trace" cooking and baking techniques utilizing backcountry stoves and cooking systems. Repeatable once for a maximum of 2 credits.

PEO 356. Backcountry Navigation. 2 Credits.

Repeatable. Provides an opportunity to master efficient on- and off-trail navigation techniques on a three-day trip in rugged subalpine terrain. Repeatable once for a maximum of 4 credits.
Prereq: PEO 285 and 351 or equivalent experience.

PEO 362. Mountaineering. 2 Credits.

Covers basic mountaineering skills during classroom sessions and an intensive three-day mountain outing. Emphasis on hazards, rigging, roped travel, ice ax arrests, belays, and rescue.
Prereq: PEO 285, PEO 351.

PEO 366. Vertical Rescue Techniques. 2 Credits.

Repeatable. Introduces vertical rescue techniques including belay escapes, passing a knot, rope ascension, counterbalance, lowering and raising rescues. Held at the rescue facility and rock wall. Repeatable once for a maximum of 4 credits.
Prereq: PEO 315 or 331 or equivalent experience

PEO 369M. Science of Climbing. 2 Credits.

Introduction to the physics and scientific principles behind climbing, climbing equipment, anchors, ropes, climbing gear, static versus dynamic load, fall factor, and breaking strength. A prerequisite is students must have completed at least one Outdoor Program climbing course. Multilisted with PHYS 369M.
Prereq: PEO 251.

PEO 371. Snow Camping. 2 Credits.

Repeatable. Emphasis on winter camping skills, campsite selection, construction of snow shelters, winter route finding, and survival techniques. Repeatable once for a maximum of 4 credits.

Prereq: PEO 285 and 351 or equivalent experience.

PEO 391. Winter Navigation. 2 Credits.

Topics include cold weather clothing and equipment requirements, thermoregulation, cold injuries, route finding, Leave No Trace travel and camping ethics, and winter navigation and survival techniques. Skills applied on a three-day outing. Repeatable once for a maximum of 4 credits.

Prereq: PEO 285, PEO 351.

PEO 392. Backcountry Survival. 1 Credit.

Repeatable. Basic survival skills for cool, wet, and windy Pacific Northwest environment. Topics/techniques include survival gear and techniques, emergency shelters, and fire building. Repeatable once for a maximum of 2 credits.

Prereq: PEO 285 and 351 or equivalent experience

PEO 399. Special Studies: [Topic]. 1-2 Credits.

Repeatable.

PEO 411. Leadership Dynamics. 2 Credits.

Discover how leadership, group dynamics, risk management, and other factors play an integral role in shaping the character, productivity, and safety of teams.

Prereq: PEO 285.

PEO 412. Leading in Nature. 2 Credits.

Focuses on the natural history of the regions explored on field outings and on developing outdoor teaching skills.

PEO 413. Field Leadership. 2 Credits.

Focuses on campcraft, field leadership, navigation, and safety skills. Includes a three-day outing and van driver training.

Prereq: PEO 285, PEO 351 or equivalent experience.

Physical Education: Racquet Sports Courses**PERS 199. Special Studies: [Topic]. 1-2 Credits.**

Repeatable.

PERS 211. Table Tennis I. 1 Credit.

Repeatable. Introduction to table tennis, including rules, scoring, and etiquette. Service, strokes, and game strategy. Repeatable once for a maximum of 2 credits.

PERS 212. Table Tennis II. 1 Credit.

Repeatable. Intermediate game strategies and skills. Repeatable once for a maximum of 2 credits.

Prereq: PERS 211 or equivalent.

PERS 231. Badminton I. 1 Credit.

Repeatable. Basic strokes, court positioning and strategies. Introduction to equipment, rules, scoring, and etiquette. Repeatable once for a maximum of 2 credits.

PERS 232. Badminton II. 1 Credit.

Repeatable. Intermediate shots, positioning and strategy through drills, match play, and class tournaments. Repeatable once for a maximum of 2 credits.

Prereq: PERS 231 or equivalent.

PERS 271. Tennis I. 1 Credit.

Repeatable. Introduction to basic strokes, the serve, basic strategy, and beginning level positioning. Rules, scoring and etiquette will also be taught. Repeatable once for a maximum of 2 credits.

PERS 272. Tennis II. 1 Credit.

Repeatable. Refinement of basic strokes and introduction to advanced strokes and positioning. Drills, game play, and a class tournament.

Repeatable once for a maximum of 2 credits.

Prereq: PERS 271 or equivalent.

PERS 273. Tennis III. 1 Credit.

Repeatable. Advanced level singles and doubles positioning, strategies and skills. Repeatable once for a maximum of 2 credits.

Prereq: PERS 272 or equivalent.

PERS 399. Special Studies: [Topic]. 1-2 Credits.

Repeatable.

Physical Education: Running Courses**PERU 131. Jog-Run. 1 Credit.**

Repeatable. Instruction in running mechanics including intervals and pacing. Various running surfaces and courses, injury prevention, and cardiovascular endurance are emphasized. Repeatable once for a maximum of 2 credits.

PERU 199. Special Studies: [Topic]. 1-2 Credits.

Repeatable.

PERU 331. 5K Training I. 1-2 Credits.

Repeatable. Techniques for increasing speed and preparation for road racing. Repeatable once for maximum of 2 credits per activity.

Prereq: PERU 131 or equivalent.

PERU 399. Special Studies: [Topic]. 1-2 Credits.

Repeatable.

Physical Education: Team Sports Courses**PETS 101. Bocce Ball. 1 Credit.**

Learn pointing, blocking, spocking; offensive and defensive strategies; scoring, safety, rules, and etiquette that combine for a fun environment for learning this ancient game. Repeatable once for a maximum of 2 credits.

PETS 111. Flag Football. 1 Credit.

Throwing, catching, running, cutting, pulling flags; strategies and techniques; offense, defense, game rules, and ground rules that create a safe and fun playing experience. Repeatable once for a maximum of 2 credits.

PETS 199. Special Studies: [Topic]. 1-2 Credits.

Repeatable.

PETS 232. Volleyball II. 1 Credit.

Repeatable. Designed for students with previous volleyball experience and want to continue play. Skill-building, rules, offensive and defensive strategies. Repeatable once for a maximum of 2 credits.

Prereq: beginning volleyball experience.

PETS 233. Volleyball III. 1 Credit.

Repeatable. Advanced play in a friendly atmosphere. Skills, drills, big hits, occasional blocks, aces. Repeatable once for a maximum of 2 credits.

Prereq: PETS 232 or equivalent.

PETS 242. Basketball II. 1 Credit.

Repeatable. Designed for students with previous basketball experience and want to continue play. Shooting, ball handling, defense, give go, and the back door. Repeatable once for a maximum of 2 credits.

Prereq: beginning basketball experience.

PETS 243. Basketball III. 1 Credit.

Repeatable. Advanced play, including offenses, defenses, drills, and full-court action. Repeatable once for a maximum of 2 credits.

Prereq: PETS 242 or equivalent.

PETS 252. Ultimate Frisbee I. 1 Credit.

Repeatable. Introduction to basic skills, including throws, catches, moves, strategies, and rules. Sequence with PETS 253, PETS 254. Repeatable once for a maximum of 2 credits.

PETS 253. Ultimate Frisbee II. 1 Credit.

Repeatable. Intermediate and advanced play and skill development. Sequence with PETS 252, PETS 254. Repeatable once for a maximum of 2 credits.

Prereq: PETS 252 or equivalent.

PETS 261. Soccer I. 1 Credit.

Repeatable. Introduction to the basic skills of passing, dribbling, heading, tackling, and shielding. Game strategies and rules are taught through drills and team play. Repeatable once for a maximum of 2 credits.

PETS 262. Soccer II. 1 Credit.

Repeatable. Develop proficiency in soccer skills through drills and games. Group and team tactics as well as official soccer rules. Repeatable once for a maximum of 2 credits.

Prereq: PETS 261 or equivalent preferred.

PETS 263. Soccer III. 1 Credit.

Repeatable. Advanced techniques, principles of attack and defense, and kicks--corner, free, and penalty. Repeatable once for a maximum of 2 credits.

Prereq: PETS 262 or equivalent preferred.

PETS 265. Indoor Soccer II. 1 Credit.

Repeatable. Intermediate and advanced play, using the walls of a court as an additional dimension to play. Repeatable once for a maximum of 2 credits.

Prereq: beginning soccer experience.

PETS 399. Special Studies: [Topic]. 1-2 Credits.

Repeatable.

Physical Education: Weight Training Courses

PEW 199. Special Studies: [Topic]. 1-2 Credits.

Repeatable.

PEW 211. Weight Training I. 1 Credit.

Repeatable. Technique for basic lifts in a variety of workout formats. Develop strength and muscular endurance. Weight training principles and physical fitness evaluation. Repeatable once for a maximum of 2 credits.

PEW 212. Weight Training II. 1 Credit.

Repeatable. Advanced weight training exercises are introduced. Students can expect to work more independently. Intermediate program design, exercise science, and evaluation of strength and muscular endurance. Repeatable once for a maximum of 2 credits.

Prereq: PEW 211 or equivalent.

PEW 220. Olympic Weight Lifting. 1 Credit.

A beginning technique course for the Olympic lifts (snatch and clean and jerk) following a progression of drills and exercises designed to develop movement patterns, muscular endurance, strength and power. Practice quality repetitions and receive feedback with focus and conscious effort.

PEW 399. Special Studies: [Topic]. 1-2 Credits.

Repeatable.

Student Services

Kris Winter, Interim Vice President for Student Life

Administrative units at the University of Oregon provide a network of student services that support success in the classroom and challenge students to develop as individuals through an array of cocurricular experiences.

Emergencies

Many support services, including the Office of the Dean of Students (<https://dos.uoregon.edu/>) (541-346-3216), the University Health Center (<https://health.uoregon.edu/>) (541-346-2770), and University Health Center Counseling Services (<https://counseling.uoregon.edu/>) (541-346-3227) provide emergency aid to students during regular office hours—8:00 a.m. to 5:00 p.m., Monday through Friday.

Counseling Services offers a crisis line staffed at all hours by mental health professionals, and the University Health Center offers a health nurse advice line when the center is closed (541-346-2770, then press 1). In addition, a 24-hour, round-the-clock crisis line is available for those seeking support after experiencing sexual violence (541-346-7233).

In case of any other emergency, call 911 or the UO Police Department (541-346-2919).

ASUO

Associated Students of the University of Oregon

541-346-3724
Erb Memorial Union, Suite 4
asuo@uoregon.edu

The Associated Students of the University of Oregon (ASUO) is the recognized representative organization of students at the university. Its network of committees, activities, and student organizations serves student needs and interests. The ASUO gives students the opportunity to plan and direct their own groups, to become involved in many aspects of university life, and to influence the decisions that affect the quality of education and student life at the university. Students who pay into the incidental fund are members of the ASUO.

Organization

The ASUO is comprised of three branches: the executive, the legislative, and the judicial.

- The executive is responsible for university-wide campaigns; the recognition and oversight of 225+ ASUO-Recognized Student Organizations; and officer and committee appointments.
- The legislative is comprised of the Student Senate, the Programs Finance Committee, the Contracts Finance Committee, and the Departments Finance Committee. This branch is responsible for initiating funding and policy decisions. This includes crafting and passing resolutions and certifying the actions of the finance committees. Student Senate is also responsible for coordinating the confirmation of appointees to the legislative and judicial branch.

- The judicial regulates decisions related to questions which arise under the ASUO Constitution or any rule promulgated under it, and serves as the appeals board for issues which arise out of the ASUO Elections.

ASUO's Executive Branch

The ASUO Executive Branch consists of the ASUO Student Body President, the Student Body Vice President, and approximately thirty appointed students who serve as Executive Cabinet Members. The President is elected during the association's campus wide election in the spring, and all members of the Executive Branch serve one-year terms.

Executive Cabinet Members work with the ASUO President to identify issues and endeavors of importance to UO students, and take steps to positively impact the student experience by engaging on these issues in order to make change. The Executive welcomes all students to bring their ideas for campus improvement to the ASUO President, who can be reached at asuopres@uoregon.edu.

In addition to coordinating campaigns, the executive approves, oversees, and works alongside more than 200 student organizations which are recognized by ASUO. Any students who wish to form a student organization and seek recognition should reach out to the Programs Coordinator at asuoprog@uoregon.edu. Finally, the executive coordinates all appointments on behalf of ASUO, to University-wide committees, task forces, and work groups. Students interested in serving on a university-wide committee or task force should contact ASUO at asuo@uoregon.edu.

ASUO's Legislative Branch: Student Senate and Finance Committees

The ASUO Legislative Branch consists of the 24-member Student Senate and four finance committees comprising seven to 12 student members each. A majority of the positions on the senate and its finance committees are elected during the association's campus-wide election in the spring; a small number are appointed by the executive. Members of the legislative branch serve either one- or two-year terms.

The **Student Senate** debates policy and financial decisions and holds confirmation discussions at its weekly hearings that occur every Wednesday evening at 7:00 p.m. in the Dusty Miller Room, 107 Erb Memorial Union. Students, faculty, and staff members are welcome to attend these hearings, and time is set aside during each meeting for those assembled to address the senate.

The **Programs Finance Committee** is engaged in recommending the allocation and appropriation of incidental fees for over 150 ASUO-Recognized Student Organizations. Any such organization is eligible to request money from the incidental fund, and this committee meets with each organization annually to discuss budget requests and examine its financial performance. This process typically begins in October and concludes in January (for the following fiscal year).

The **Contracts Finance Committee** recommends the allocation and appropriation of incidental fees for contracted service providers. It annually examines six campus-wide contracts, evaluates their performance, and makes decisions related to continuation of contracted services for UO students. Among the services in the committee's purview are:

- Lane Transit District (LTD) transit passes for students
- Legal services for students
- Experiences in student journalism with the Daily Emerald and ETHOS Magazine
- Childcare services at Spencer View Housing

The **Departments Finance Committee** recommends the allocation and appropriation of incidental fees for department-based programs of the university. It oversees expenditures to 17 units within the university, including but not limited to: the Mills International Center, the Duck Rides Program, Student Government Engagement and Success, Conflict Resolution Services, Zero Waste, and the Women's Center.

ASUO's Judicial Branch: Constitution Court

The Constitution Court is a five-member body appointed by the student body president and confirmed by Student Senate. Associate justices serve terms for the duration of their time as UO students.

The Court has the authority to rule on any question arising under the ASUO Constitution or any rule promulgated under it. This review power covers almost any action by ASUO government bodies, programs, and—in special cases such as elections—actions by individual students within the ASUO program. The Constitution Court has broad powers to impose sanctions to compel compliance with its rulings.

Counseling Services

Shelly Kerr, Director

541-346-3227

541-346-2842 fax

University Health, Counseling, and Testing Center Building, Second Floor
1590 E. 13th Ave.

counseling.uoregon.edu (<http://counseling.uoregon.edu/>)

University Health Center Counseling Services, a unit of the Division of Student Services and Enrollment Management, provides mental health programs and services to currently enrolled UO students; consultation and education and prevention programs for faculty and staff members, parents and families of students; and training and supervision to graduate-level therapists. A professional support and crisis line is available when the center is closed.

Counseling Services provides initial assessment, brief individual therapy, support and therapy groups, crisis intervention, referral to community resources, and education and prevention workshops to UO students. Issues commonly addressed include depression, anxiety, suicidal thoughts, relationship concerns, psychosis, mania, identity development, body image concerns, eating disorders, grief and loss, and sexual assault. Psychologists and counselors provide consultation on issues relevant to the mental health of students and education and prevention programs to members of the university community. The Collegiate Recovery Center provides support for students in recovery from drug and alcohol addiction. More information, including hours of operation, is available on the website (<http://recovery.uoregon.edu/>).

Dean of Students

Marcus R. Langford, Dean of Students

541-346-3216

185 Oregon Hall

uodos@uoregon.edu

dos.uoregon.edu (<http://uodos.uoregon.edu>)

The Office of the Dean of Students is a unit within the Division of Student Life that helps students derive full benefit from their university experience by providing education and support programs and services. The office staff works to ensure that all students are supported and accepted and that the obstacles to student success are minimized.

Basic Needs and Community Support Services

The Basic Needs and Community Support team utilizes trauma-informed frameworks to offer case management services to students who struggle with houselessness, housing insecurity, food insecurity, and financial insecurity. This team can assist students in accessing resources and solutions essential to achieve temporary and long-term basic needs stability. This unit oversees and distributes student financial support including the Students in Crisis Fund, Childcare subsidy program, Textbook Fund, and Housing subsidy program.

Multicultural Education, Student Engagement and Support

This unit provides support to the programs that enhance the educational, cultural, and social development of students with a special emphasis on the unique needs of students of color and historically underrepresented and marginalized student groups. It acknowledges, celebrates, and promotes the diverse cultural experiences of each member of the university community, strives to build collaborative relationships, and advocates for social justice.

Fraternity and Sorority Life

Fraternities and sororities are organizations that focus on scholarship and learning, leadership, brother- and sisterhood, community service, philanthropy, and community awareness among members. Since the founding of the first fraternity in 1776, hundreds of Greek-lettered organizations have been established across college campuses in North America. A longtime part of the student experience at the University of Oregon, the fraternity and sorority community has existed since 1900, when the first fraternity was established on campus. The mission of Fraternity and Sorority Life is to enhance the quality of student life at the University of Oregon by aiding members of the Greek community through advising with a developmental approach, educating with a purpose, collaborating with stakeholders, promoting academic success, encouraging civic responsibility, advocating for healthy lifestyles, and advancing values-based leadership and decision-making.

More than 3,300 students are currently involved in more than 30 Greek-lettered organizations.

Holden Center for Leadership and Community Engagement

The Holden Center helps prepare students to be positive contributors on campus, within the community, and globally. The center provides opportunities for students to develop as leaders and citizens, regardless of their previous experience or exposure to leadership roles. Members of the center's multidisciplinary staff work directly with students to increase their leadership efficacy and capacity, explore their strengths and passions, teach them new skills and effective practices, help involve them in productive collaborations, and increase their chances of success as agents of change.

Many entry points and opportunities exist for students to get involved at the center, including advising, mentorship, teaching, and experiential programming, with space for students to grow and excel as leaders, get involved with the community, find solutions to problems, and improve the future. These efforts include workshops on identifying individual talents and group effectiveness; volunteer opportunities to help students cultivate their involvement in the local community; service-based trips regionally and internationally; and an intensive leadership development institute.

Honors and Awards

See the **Honors at Oregon** section of this catalog for information about honorary societies, outstanding-student awards, scholarships and prizes, and the Dean's List.

Lesbian, Gay, Bisexual, and Transgender Education and Support Services

Understanding and acceptance are essential to creating a welcoming environment for lesbian, gay, bisexual, transgender, queer, questioning, intersex, and ally students. This program develops and provides educational services related to homophobia and heterosexism; assists student organizations and academic units in bringing speakers to campus for educational programs; serves as a referral source for and provides consultation to members of the lesbian, gay, bisexual, and transgender community; and offers support services for lesbian, gay, bisexual, and transgender people and their heterosexual allies.

Nontraditional and Veterans Engagement and Success

Nontraditional students—students over the age of 24, students who are reentering the university after a break, student parents, and veterans—are offered support and assistance specific to their needs. The office works closely and advises the Nontraditional Student Union, ensuring that nontraditional student needs are heard and addressed.

Parent and Family Programs

Parent and Family Programs is a unit in the Division of Student Life, operating with the conviction that informed parents and family members are a valuable resource for their students as well as the larger university community. The program office offers support and resources—communication, event coordination, and other opportunities for participation—to parents and families of UO students, including assistance in navigating the university and in addressing parental concerns.

Parent and Family Programs hosts activities for parents and family members during Week of Welcome, Fall Family Weekend, and Spring Family Weekend. Family members are also encouraged to stay involved through the Parent and Family Association, the Regional Representative Volunteer Program, the Parent Professional Network, or the Parent Leadership Council.

For more information and important dates, visit the website (<https://families.uoregon.edu/>).

Sexual Violence Prevention and Education

The Sexual Violence Prevention and Education team utilizes a variety of initiatives to educate, train, and build awareness around complex issues of sexual and dating violence at the University of Oregon. Specific programs include Get Explicit, Sexual Assault Awareness Month, and the interactive facilitation group Sexual Wellness Advocacy Team (SWAT).

Care and Advocacy Program (CAP)

This program provides support and advocacy for students who are experiencing any significant concern or crisis that might impact their academics or student status while enrolled at UO. CAP also has confidential support services for students who have experienced sexual harassment, sexual assault, domestic or dating violence, and stalking. There is a 24-hour hotline for students who would like to speak with an advocate, 541-346-SAFE. For more information visit safe.uoregon.edu (<http://safe.uoregon.edu/>). CAP also provides confidential support to students who are accused of sexual harassment or other Title-IX violations. Please visit <https://dos.uoregon.edu/help> (<https://dos.uoregon.edu/help/>) for more information about all CAP services or to make an appointment with an advocate.

Student Conduct and Community Standards

The Office of Student Conduct and Community Standards protects the rights, health, safety, and well-being of every member of the university community while promoting the educational objectives of the university. All students are held responsible to the community standards in the UO's student conduct code. The conduct code may be viewed in full by visiting the dean's website.

Substance Abuse Prevention and Student Success

The Substance Abuse Prevention and Student Success program addresses high-risk drinking and substance abuse on the UO campus and its impact on students' academic and personal success. With evidence-based, comprehensive, and coordinated efforts, staff members of the program collaborate with campus and community partners to provide alternative programming and services to students.

The Duck Store

Arlyn Schaufler, General Manager

541-255-0700
895 E. 13th Ave.
uoduckstore.com (<http://uoduckstore.com>)

The Duck Store (formerly the University of Oregon Bookstore), located just west of the campus, is open daily, Monday through Thursday, 7:45 a.m. to 7:00 p.m.; Friday, 7:45 a.m. to 6:00 p.m.; Saturday, 10:00 to 6:00 p.m.; and Sunday, 10:00 a.m. to 6:00 p.m. Special hours apply during term breaks and holidays. Check the website for exceptions.

The Duck Store comprises five departments: books, technology, art and school supplies, sportswear (UO-related apparel and memorabilia), and the Duck Store Café.

History

The Duck Store was established in 1920 as a cooperative and is now run as a nonprofit organization owned by UO students and members of the faculty and classified staff. Policy is decided by a board of directors composed of eight students, two faculty members, and one classified staff member. The directors are selected in annual elections by the membership.

General Services

The Duck Store offers no-charge check cashing for amounts up to \$20, ATM machines, postage stamp sales and a mail drop, UPS

package service, and fax service. The store also provides the university community with graduation regalia and announcements.

The bookstore offers course book rentals and e-books as well as traditional textbooks. University of Oregon students and members of the faculty and staff receive a discount off the publisher's list price of new textbooks and at least 32 percent off used books. Students may resell their books at any time. For the best prices and buy-back dates, visit uoduckstore.com/student (<http://uoduckstore.com/student/>). Dates are posted on the Duck Store website. Thousands of book award and school supply scholarships have been awarded since 2003. For more information on the awards program, visit the website.

Art and School Supplies

The art and school supplies department in the store basement is Oregon's largest art store south of Portland. As well as housing a wide variety of art and architecture materials, it offers everything you need in school and office supplies. Local artists frequent the Duck Store for its extensive selection of art supplies and the personal service from its knowledgeable staff.

Technology

The technology department provides computers, software, and technology solutions for the UO community. Low educational prices on hardware and software are available for UO students, faculty, and staff. The computer department also provides a Kodak instant-print kiosk and fax services.

Duck Store Café

The Duck Store Café gourmet coffee and espresso counter features specialty coffee drinks, food, and snacks.

Sportswear, Gifts, and Cards

The sportswear department carries the latest officially licensed UO sportswear, gifts, and Oregon memorabilia. Profits return to campus and support the discount on course materials, and help other campus units provide benefits for UO students and alumni. Visit the Duck Store main floor for a selection of distinctive gifts, greeting cards, and magazines, or visit the main website.

Knight Law Center

The Duck Store serves the John E. Jaqua Law Library with the Court Café, selling coffee, beverages, and food. Students can pick up law course packets and books and send faxes. Court Café hours may be found on the Duck Store website.

The Duck Store at the Rec

The Duck Store at the Student Recreation Center features a Shake Smart location selling protein drinks, acai bowls, and other food and beverages. Students using the Rec Center may purchase yoga mats, swimsuits, water bottles, protein bars, and other items needed in a gym environment. Hours may be found on the Duck Store website.

Other Locations

Duck Store locations may be found at Autzen Stadium and Valley River Center. During home football games, the Club Store is also open inside

Autzen Stadium, and two retail locations are open during events at Matthew Knight Arena.

For the convenience of students, alumni, and friends of the university outside the Eugene area, the Duck Store sells university sportswear and insignia merchandise at the University of Oregon facility at the White Stag Block in Portland, the Washington Square Mall in Tigard, and the Clackamas Town Center in the Portland Metro area. For directions to any of these locations, visit the website (<https://www.uoduckstore.com/find-a-store/>).

Internet Store

The Duck Store online is a great resource for reserving course books, ordering merchandise and gifts, finding information about current events, and much more.

Erb Memorial Union

Laurie Woodward, Director

541-346-6064
1228 E. 13th Ave.
emu.uoregon.edu (<http://emu.uoregon.edu>)

The Erb Memorial Union (EMU) is the community center for the University of Oregon. A unit within the Division of Student Life, the EMU provides programs, facilities, food, and other services for students and the entire campus community.

Through the various programs, services, and student organizations that have offices in the EMU, students are provided with a safe place to explore new ideas and take risks, an environment that fosters real-world experience and a process that allows students to learn at their own pace—all within the framework of staff support and guidance. Other services provided include a wellness center, guest services desk, ticket office, computer and copy centers, the Mills International Center, art galleries, a branch of the Duck Store, healthy food options, banking services, and a variety of meeting and event spaces for student groups and the campus community to use.

The programs and services listed below are managed through the EMU and provide students with a broad array of activities and experiences designed to complement and enhance the educational experience.

Board

The Erb Memorial Union Board is responsible for making general policy decisions and long-range plans for the Erb Memorial Union. The board approves allocation of the EMU's multi-million dollar budget, assigns space for student organizations, and advises the EMU staff in the union's management and administration. The sixteen-member board comprises twelve students, three faculty representatives, and one EMU staff representative.

Associated Students of the University of Oregon (ASUO)

The ASUO is the student governing body at the University of Oregon. With more than 200 student organizations, the ASUO offers students many opportunities to direct their own programs, become involved in every aspect of student life, and influence the decisions that affect the quality of education at the UO. Many of these programs have offices in the building, including the Women's Center, Multicultural Center, Men's Center, Designated Driver Shuttle, Student Veterans Center, and the

Nontraditional Student Union. For more information, see the Associated Students of the University of Oregon section of this catalog.

Club Sports

Club Sports is an athletic and leadership program that provides UO student with the opportunity to compete in a variety of team and individual sports and activities. Club teams practice, host games, and events, travel to competitions throughout the US, and contend for national championships every year. Currently there are 43 club teams with more than 1,250 participants. For more information, call 541-346-8025, or visit the website at clubsports.uoregon.edu (<http://clubsports.uoregon.edu>).

Craft Center

The Craft Center offers workshops in ceramics, woodworking, glassblowing, jewelry, fibers, painting, photography, silkscreen, glass torch working, and many areas of the visual arts in a collaborative environment designed to enhance the student experience in a creative atmosphere free from grades and assignments.

Well-equipped studios are available for use. Current UO students may sign up for a free pass each term. Materials and supplies are sold for each studio area. The center's professional staff members, instructors, and student staff members are excellent resources for students' artistic projects. For more information, call 541-346-4361, or visit the website at craftcenter.uoregon.edu (<http://craftcenter.uoregon.edu>).

Center for Student Involvement

The Center for Student Involvement is the hub for student organizations and groups on campus. The staff supports and puts on large events such as Ducks after Dark, Flock Party, and Homecoming, but also works to present cultural events in music, film, performing arts, contemporary topics, and the visual arts that reflect the diverse interests of students and encourage a social and educational exchange for both the campus community. The office serves as a resource center for student groups to meet and plan events.

The Center for Student Involvement supports student organizations and activities that enliven UO traditions, keep students engaged, and strengthen the campus community. The center manages many student organization services that enhance students' ability to get involved. In addition, staff members advise the Student Activities Board and create safe, fun student events that create positive learning opportunities.

Esports Program

Esports is a new program in the EMU and has three areas of focus. The Esports Lounge is a gathering spot for all gamers from the beginner through our competitive teams. It is located in the lower level of the EMU. Our competitive teams hold tryouts every fall and we are currently fielding 5 teams playing a variety of Esport Games. Finally the program is dedicated to helping students learn about careers in the Esports field ranging from game development to player or broadcaster.

KWVA 88.1 FM

KWVA is the student radio station, broadcasting at 88.1 FM and on the Internet. KWVA broadcasts 24 hours a day, 365 days a year. Programs are produced at KWVA in the Erb Memorial Union, and include diverse music, news, and sports. Students and non-students are welcome to participate as DJs and as news, sports, production, and marketing volunteers. No experience is necessary. For more information, call 541-346-4091 or visit the website, kwvaradio.org (<http://kwvaradio.org>).

Moss Street Children's Center

Moss Street Children's Center provides developmentally appropriate child care for infants, toddlers, preschoolers, and school children in kindergarten through the fifth grade. Priority for child-care services is given to enrolled students; however, members of the UO faculty and staff, as well as community families, may also enroll if space is available. Many students work in the program as employees or volunteers and receive practicum credit through various academic departments. The center is located on the edge of campus at 1685 Moss St. For more information, call 541-346-4384 or visit the website, moss.uoregon.edu (<http://moss.uoregon.edu>).

Outdoor Program

The Outdoor Program offers a variety of affordable, cooperative activities such as hiking, rafting, kayaking, backpacking, rock climbing, skiing, and snowboarding. The program provides trip-planning resources, skill-building clinics, and a free do-it-yourself bike maintenance shop in the EMU. The Outdoor Program "Barn," where students may rent low-cost outdoor equipment and bikes, is located five blocks from the EMU, at the corner of University Street and East 18th Avenue. For more information, call 541-346-4365 or visit the website at outdoorprogram.uoregon.edu (<http://outdoorprogram.uoregon.edu>).

Student Sustainability Coalition

The Student Sustainability Coalition (SSC) is a collaborative space for student-led initiatives that fosters and supports the simultaneous pursuit of human equity, environmental vitality, and economic well-being. By working together with individual students, student groups, and academic programs, the SSC helps students develop the skills, strategies, and networks necessary to achieve a more sustainable world. The coalition also plans university-wide events throughout the year, including the Sustainability Fair and Earth Week. For more information, call 541-346-8321 or visit the website (<https://emu.uoregon.edu/sustainability/>).

UO Scheduling and Event Services

This office facilitates the scheduling and support for most nonacademic use of UO buildings, rooms, and outdoor spaces. Scheduling and Event Services offers professional planning assistance to both university and unaffiliated groups for their events, provides the necessary personnel and technical equipment to aid in the success of those events, and helps sponsors navigate campus policies to assure their events are in compliance. For more information, call 541-346-6000 or visit the website at scheduling.uoregon.edu (<http://scheduling.uoregon.edu>).

UO Card Office

This office provides students, faculty and staff members, and guests with official university identification cards to be used for a number of services across campus. Your photo ID card may be used as a debit card for purchases on campus with a UO Duck Bucks account.

UO Ticket Office and Passport Center

This office provides a full range of ticketing and box office services for university student groups and departments, including the University Theatre, UO School of Music and Dance, and Oregon Bach Festival. As a sales outlet for Ticketmaster, TicketsWest, Hult Center, WOW Hall, and Matthew Knight Arena, the Ticket Office sells admission for a broad range of events in Eugene, Portland, and throughout the Pacific

Northwest. For more information, call 541-346- 4363 or visit the website at tickets.uoregon.edu. (<http://tickets.uoregon.edu>)

The Ticket Office also serves as a US passport application acceptance location and passport photo center. This is a drop-in passport location; no appointments are needed for passport acceptance or photos.

GlobalWorks International Internships

globalworks@uoregon.edu
541-346-5088
Gerlinger Hall

GlobalWorks International Internship Program, administered by the UO's Global Studies Institute, connects academic study with real-world experiences by providing full-time, international internship opportunities to UO students in a wide variety of career sectors, ranging from business to education to public relations. Students earn UO credits as well as life-changing work experience in a different culture. Several scholarships are available for all locations.

Health Services

Debra Beck, RN, MBA, Executive Director

University Health, Counseling, and Testing Center Building
1590 East 13th Avenue (at the corner of 13th and Agate)
541-346-2770

The University Health Center is a unit of the Division of Student Services and Enrollment Management. The health center is nationally accredited, offering high-quality primary care, acute care, psychiatry, and specialty care services to help UO students stay healthy. These services are provided by a highly qualified staff that includes board-certified physicians and nurse practitioners, dentists, registered nurses, certified medical assistants, laboratory and x-ray technicians, physical therapists, pharmacists, dental hygienists, health initiatives staff members, massage therapists, an acupuncturist, and business and administrative support staff.

Health Care Services

- Primary care
- Acute care
- Psychiatry
- Endocrinology
 - Diabetes management
 - Transgender medicine
- Musculoskeletal care
- Sexual health
 - STI screening and treatment
 - Contraceptives
- Dental care
- Physical therapy/Sports Medicine
 - Massage and acupuncture
- Pharmacy
 - Tobacco cessation
 - Allergy and asthma care
 - Contraceptive prescribing

- Laboratory and x-ray
- Travel health
- Vaccines

Other Services

- The Duck Nest Wellness Center
 - Nutrition and food security
 - Stress reduction and sleep management
 - Sexual health
 - Physical activity
- Protection-Connection sexual health supply program
- Body Project body acceptance intervention
- Promotion of a smoke-, tobacco- and e-cigarette free campus
- Communicable disease prevention and management

Hours of Operation

The health center's normal hours of operation for the fall through spring terms are 9:00 a.m. to 5:00 p.m., Monday through Friday, and from 9:00 a.m. to noon on Saturday. Summer hours are 9:00 a.m. to 4:30 p.m., Monday through Friday, and closed weekends. The health center is closed on all university holidays. Some clinics may have extended hours; please refer to the health center website (<https://health.uoregon.edu/>) for more information.

Appointments

Students are encouraged to make appointments by calling 541-346-2770 during weekday hours or by logging in to the online portal (<https://health.uoregon.edu/myuohealth/>).

A nurse advice line is available for students 24 hours a day at 541-346-2770.

Local emergency rooms and after-hours clinics are available for emergency and immediate care when the health center is closed.

Student Health Fee and Health Center Charges

All registered students must pay the student health fee, part of the UO tuition and fees package. The health fee ensures a healthy and safe campus. The fee supports immunization compliance, funds health education and wellness activities, provides access to contraceptives and safer sex resources, and enables the health center to plan for and respond to campus health emergencies. It also provides crisis intake for psychiatry, sexual victim advocacy, alcohol education, triage nursing advice, after-hours nursing telephone advice 365 days per year, and more.

Students are responsible for payment of medical services at the health center, when referred for medical services not available at the health center, and when using medical services outside of the health center. Check the website (<https://health.uoregon.edu/costs-services/>) for further information about the cost of services.

Student Health Insurance

The University of Oregon provides the UO Student Health Benefits Plan, which offers excellent coverage at affordable rates, including 100 percent coverage for most services at the University Health Center. International students are automatically enrolled in the plan; domestic students must opt-in to the plan before published deadlines.

The University Health Center is now accepting some insurance plans as an in-network provider. Check the website (<https://health.uoregon.edu/insurance/>) for further information about insurance billing options.

Immunization Requirements

The University of Oregon has immunization and communicable disease screening requirements for all incoming students. Students are encouraged to satisfy all of their immunization requirements before arriving on campus. The following vaccines are required:

- Measles, mumps, and rubella (MMR) (two doses or proof of immunity or birthdate prior to 1957)
- Meningococcal quadrivalent (serogroups A, C, Y, and W-135) vaccination for all students younger than 22 (dose received on or after age 16)
- Varicella (chickenpox) (two doses or proof of immunity)
- Tetanus-diphtheria-pertussis (Tdap) (one dose on or after age 11)

Incoming students also must complete an online screening questionnaire for tuberculosis (TB). Results of this evaluation, in addition to documentation of required vaccinations (or evidence of immunity to these diseases) must be submitted to the health center. Visit the health center website (<https://health.uoregon.edu/enrollment-requirements/>) for more information.

While not required at this time, the health center highly recommends vaccines for meningococcal B strain, hepatitis A and B, and human papillomavirus (HPV), in addition to an annual flu shot. Pneumococcal vaccine is recommended for students with certain medical conditions.

Other General Information

The University Health Center is a covered entity of the Health Insurance Portability and Accountability Act of 1996 and the health-care services provided are confidential. Medical records, patient bills, and other patient information are released only with the specific written authorization of the patient, unless required by law.

The health center is a member in good standing with the American College Health Association and is fully accredited by the Accreditation Association for Ambulatory Health Care.

For more information, visit the website (<https://health.uoregon.edu/>).

International Student and Scholar Services

intl@uoregon.edu
541-346-3206
300 W Oregon Hall
issu.uoregon.edu (<https://issu.uoregon.edu/>)

International Student and Scholar Services provides a wide array of advising services and programs to more than 1,000 international students regarding visa and immigration matters, academic support and success, and social and cultural adjustment.

Primary programs include pre-arrival resources; personal immigration advising; scholarships and financial aid; and a peer mentor program that brings together newly arrived international students and returning students.

International Student and Scholar Services is a long-time partner of the Friendship Foundation for International Students, a local community organization that coordinates short-term homestays, cultural conversations, and friendship programs. The unit also administers \$1 million worth of scholarship programs for international students, among them the award-winning International Cultural Service Program, Global Corners International Student Recruitment and Retention awards, international work-study assistance, and other resources.

In addition, International Student and Scholar Services offers services to more than 200 visiting international researchers, faculty, and staff members, including advising on a wide range of immigration, employment, and adjustment matters.

Investigations and Civil Rights Compliance

Nicole Commissiong, Chief Civil Rights Officer and Title IX Coordinator

Contact Information:

oicrc@uoregon.edu
541-346-3123
541-346-4168 fax
677 E. 12th Ave., Suite 452
5221 University of Oregon, Eugene, OR 97403-5221

The Office of Investigations and Civil Rights Compliance offers the UO community a place to discuss and report concerns regarding discriminatory or harassing behavior, and helps identify how such concerns may best be addressed and resolved. The office supports the university's compliance with federal and state laws regarding prohibited discrimination and harassment and equal employment opportunity. Staff members in the office work with students, faculty and staff, as well as campus partners to promote an environment free from discrimination and harassment.

To report a concern or complaint, visit the website and click on How to Report (<https://investigations.uoregon.edu/how-report/>). You may also make reports or send questions via email at oicrc@uoregon.edu

Division of Global Engagement

intl@uoregon.edu
541-346-3206
300 W Oregon Hall
international.uoregon.edu (<https://international.uoregon.edu/>)

The Division of Global Engagement manages study abroad and global internship opportunities, welcomes and supports international students and scholars, and coordinates the wide range of international projects and transnational partnerships launched and maintained in many University of Oregon academic units. The university enrolls more than 1,000 international students from nearly 80 countries and sponsors more than 300 study-abroad programs in 70 countries.

Global Education Oregon (GEO)

geoinfo@uoregon.edu
541-346-3207
300 W Oregon Hall

[geo.uoregon.edu \(https://geo.uoregon.edu/\)](https://geo.uoregon.edu/)

Global Education Oregon (GEO) offers more than 300 study abroad programs in about 70 countries where UO students may take classes, conduct research, or participate in a wide range of internships or service-learning experiences. These opportunities include full-term, study-abroad programs; academic year exchanges with international universities; and short-term, faculty-led programs. For complete information about all program opportunities, visit geo.uoregon.edu.

Internships

UO students may earn academic credit while they gain professional development experience abroad. Internships are open to sophomores, juniors, seniors, and master's degree students who are currently enrolled in a UO degree program. Financial aid, including scholarships, is available. Several GEO programs allow students to combine part-time internships and part-time study in the same term abroad.

Grants and Scholarships

Because students are registered at the UO while participating in study abroad programs and international internships, they are eligible to receive most or all of their UO-awarded financial aid. In addition, numerous scholarships are available for both undergraduate and graduate students planning to study or intern abroad, including new scholarships for first-generation college students and students with disabilities.

Distinguished scholarships are also available for students participating in study abroad programs. The Gilman Scholarship supports Pell Grant eligible undergraduate students who are pursuing study abroad experiences, and the Boren Scholarship funds students interested in studying a critical language abroad. In addition to these awards, qualified graduating seniors and graduate students can pursue other distinguished scholarships such as the U.S. Student Fulbright program to support international research, university study, or teaching. For a comprehensive overview of funding options abroad, visit [geo.uoregon.edu/scholarships \(https://geo.uoregon.edu/scholarships/\)](https://geo.uoregon.edu/scholarships/).

Course Equivalencies

When you participate in a GEO or sponsored study-abroad program, you will receive University of Oregon credit. For complete details, refer to the course equivalency process and the Office of the Registrar course equivalency database.

Global Studies Institute

Gerlinger Hall
[gsi.uoregon.edu \(https://gsi.uoregon.edu/\)](https://gsi.uoregon.edu/)

The Global Studies Institute supports internationally oriented research centers, programs, and initiatives to enhance faculty research, enrich the student experience, and promote the University of Oregon's academic excellence at home and with partners around the world. It hosts and supports 14 of the university's critical international research centers and programs and serves as a coordinator and promoter of the full range of international programs, projects, and related activities on campus. In partnership with schools and colleges, the institute encourages interdisciplinary and cross-regional research, curriculum development, and community outreach, and pursues a program of fundraising and grant writing to sustain global projects with the greatest impact on student success and faculty recruitment and retention. For more information

about constituent units and programs of the Global Studies Institute, visit [gsi.uoregon.edu \(https://gsi.uoregon.edu/\)](https://gsi.uoregon.edu/).

GlobalWorks

globalworks@uoregon.edu
541-346-5088
Gerlinger Hall
[globalworks.uoregon.edu \(https://globalworks.uoregon.edu/\)](https://globalworks.uoregon.edu/)

GlobalWorks International Internship Program, administered by the UO's Global Studies Institute, connects academic study with real-world experiences by providing full-time, international internship opportunities to UO students in a wide variety of career sectors, ranging from business to education to public relations. Students earn UO credits as well as life-changing work experience in a different culture. Several scholarships are available for all locations.

International Student and Scholar Services

intl@uoregon.edu
541-346-3206
300 W Oregon Hall
[iss.uoregon.edu \(https://iss.uoregon.edu/\)](https://iss.uoregon.edu/)

International Student and Scholar Services provides a wide array of advising services and programs to more than 1,000 international students regarding visa and immigration matters, academic support and success, and social and cultural adjustment.

Primary programs include pre-arrival resources; personal immigration advising; scholarships and financial aid; and a peer mentor program that brings together newly arrived international students and returning students.

International Student and Scholar Services is a long-time partner of the Friendship Foundation for International Students, a local community organization that coordinates short-term homestays, cultural conversations, and friendship programs. The unit also administers \$1 million worth of scholarship programs for international students, among them the award-winning International Cultural Service Program, Global Corners International Student Recruitment and Retention awards, international work-study assistance, and other resources.

In addition, International Student and Scholar Services offers services to more than 200 visiting international researchers, faculty, and staff members, including advising on a wide range of immigration, employment, and adjustment matters.

Mills International Center

mills@uoregon.edu
541-346-0887

The Mills International Center, located in the Erb Memorial Union, is known on campus as "a meeting place for the world." More than 31,000 visits annually to the Mills International Center by students, faculty, staff, and community members to study, attend international events, relax, or use the media resources—travel and adventure books and films, international magazines, newspapers, cookbooks, and music.

Orientation

Cora Bennett, Director, Student Orientation Programs

541-346-1167

450 Oregon Hall

5263 University of Oregon

Eugene, Oregon 97403-5263

orientation@uoregon.edu (uointro@uoregon.edu)

orientation.uoregon.edu (<http://orientation.uoregon.edu>)

Student Orientation Programs introduces new and prospective students and their families to the university's intellectual climate, improving the quality of the new-student experience by providing assistance with academic, social, and personal adjustment to the university.

Ambassador Program

Through the Ambassador Program, undergraduate student leaders participate in various recruiting, public relations, and leadership activities for prospective new students and visitors to the university. Ambassadors assist with weekly campus tours six days a week at various times throughout the year; please visit the website for current list of tour offerings. In addition, ambassadors participate in campus open houses, college fairs, and high school visitations. Ambassadors are trained to interact with potential UO students, answer general questions about the university, and help ease anxieties about college life at the University of Oregon.

IntroDUCKtion

This is an orientation and transition program for new students and their families, which takes place for each academic term. University faculty and staff members and trained undergraduate student leaders coordinate programs that offer information about the University of Oregon's academic programs and support services. New students meet with an academic advisor and register for courses for their first term. During the program, participants may live in the residence halls, become familiar with campus, and acquire college survival skills before Week of Welcome activities in September. In addition to the student program, a separate but concurrent parent and family program is offered during each two-day program.

Week of Welcome

This five-day orientation and transition program is held in September before the start of fall term. Faculty members and returning students help ease incoming first-year and transfer students' transition to the University of Oregon by presenting dozens of academic, social, and cultural activities. During the orientation, new students meet other students, start their college careers smoothly, and discover the campus and community resources vital to their academic success.

Physical Education and Recreation

Lynn Nester, Director

541-346-4183

Student Recreation Center

[rec.uoregon.edu \(https://uorec.uoregon.edu\)](https://uorec.uoregon.edu)

The Department of Physical Education and Recreation—one of four units in the Division of Student Life—educates, engages, and inspires the campus community to live active, balanced lives.

Recreational Facilities

The Student Recreation Center (SRC) provides state-of-the-art equipment and spaces for all sport and fitness needs of the UO campus community. The recreation complex is located primarily on 42 acres at the southeast corner of the campus. Membership to the SRC is included in fees for most currently enrolled students. Faculty and staff members, alumni, and community members are eligible to purchase memberships on an annual or term-by-term basis.

The SRC features a climbing wall, bouldering wall, suspended running track, 12-lane lap pool, warm water leisure pool, hot tub, eight basketball and volleyball courts, fitness and weight rooms, locker rooms, racquetball and squash courts, and multipurpose rooms. A wide variety of spaces are available for open recreation during open hours, and additional spaces are made available outside of scheduled classes and programs. Equipment and towels are also available for the use of members.

Physical Education and Recreation programming may take place at the SRC or one of the other facilities or fields managed by the department. Two multipurpose rooms are located in Gerlinger Hall; Gerlinger Annex has two gymnasiums primarily used for physical education classes and intramural sports. The Student Tennis Center is located behind McArthur Court and features six courts. In addition, six outdoor courts are located near the corner of East 18th Avenue and Onyx Street. Four lighted artificial turf fields are located east and south of the Student Recreation Center. For more information about facilities and court reservations, call 541-346-4183.

Inclusive Recreation

The department is committed to providing a welcoming and inclusive environment that promotes the right of every person to lead a healthy, balanced life. Inclusion is one of the department's core values, and when designing the SRC renovation, developing programming, and purchasing exercise equipment, accessibility was a guiding principle. A variety of accommodations are provided to ensure that people of all abilities are encouraged to participate in programs and activities.

Intramural Sports

The Intramural Sports program provides opportunities for members of the university community to participate in a variety of sports and recreational activities. All ability levels are welcome, from beginning athletes trying a sport for the first time to seasoned competitors. Purchasing an Intramural membership for a low, flat rate opens access to the multiple leagues, tournaments, and special events offered each term. Some of the most popular activities are flag football, basketball, soccer, volleyball, softball, and ultimate Frisbee.

Recreational Fitness

Recreational fitness programs provide high-quality, inexpensive opportunities to exercise in groups or one-on-one with a trainer.

The Group X program offers a variety of workout sessions led by student instructors for drop-in participation. Workouts include modifications for every fitness level to ensure that everyone may participate and work toward meeting their fitness goals. Daily Group X programming includes Webfoot Strength and Conditioning, cycling, body sculpting, boot camp, yoga, F45, and more. Students and SRC members may purchase an

unlimited Group X workout pass per term or annually to drop into classes at their convenience.

Personal training is also available for individuals seeking a more individualized experience. Nationally certified personal trainers perform fitness assessments and create individualized training programs. Each welcome session includes a risk assessment and goal-setting consultation, personalized workout program, and physical training to refine the participant's technique and form.

Youth and Family Programs

The department strives to support inclusive, active lifestyles for members of the university community, including their families. Children are welcome in the Student Recreation Center for Duck Trails youth camps, youth and family lessons, family recreation time, and multiple special events per year.

Duck Trails provides multiple summer and school-year camps, introducing campers to a variety of fun activities designed to promote teamwork and friendship.

The Student Recreation Center is also an independent, authorized provider of the Starfish Swimming Program—a nationally recognized swim instruction curriculum developed by the Starfish Aquatics Institute. Lessons are open to all children from ages 18 months to 14 years.

Police Department

Jason Wade, Chief of Police

541-346-2919
541-346-0947 fax
2141 E. 15th Ave.
police.uoregon.edu (<http://police.uoregon.edu>)

The University of Oregon Police Department (UOPD) is responsible for the general safety of the campus community twenty-four hours a day, seven days a week. Its police officers are the primary law enforcement providers on campus, trained to exceed standards established by the Oregon Department of Public Safety Standards and Training.

The department works closely with all campus departments as well as community law enforcement and emergency, health, and safety agencies to plan for and maintain a safe environment, and to quickly and effectively resolve safety and security issues. Residents and visitors should report campus crimes or safety concerns immediately to the UOPD by calling 541-346-2919 or, in emergencies, 9-1-1.

The UOPD receives its police powers under the Oregon Revised Statutes (Section 352.383). The department employs state-certified police officers as well as security officers and civilian personnel—including student security assistants—in various roles. University police officers have the same authority and basic training as other police officers in the state, with advanced training developed to support a global campus environment.

In compliance with the federal Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act, the University of Oregon prepares an annual report that describes campus safety and security programs and services.

A copy of the university's annual security and fire safety report is available on the department website. This report includes statistics for the previous three years about reported crimes that occurred on campus; in certain off-campus buildings or property owned or controlled by the University of Oregon; and on public property within or immediately

adjacent to and accessible from campus. The report also includes institutional policies about campus security, such as alcohol and drug use, crime prevention, the reporting of crimes, and sexual assault.

UOPD facilitates and manages building access control, provides first response for medical or other emergencies, crime prevention, emergency dispatch, security assessment, and special event safety planning. UOPD personnel patrol the campus and respond to needs 24 hours a day, by vehicle, by bicycle, and on foot.

UOPD is part of the Safety and Risk Services unit within the Office of the Vice President for Finance and Administration. The department joins Emergency Management and Fire Prevention and Risk Management and Environmental Health and Safety in a shared mission to safeguard the campus and reduce vulnerabilities so that students and members of the faculty can safely learn, teach, and conduct research.

Special Services

High School Equivalency Program

Armando I. Bravo, Recruiter

541-346-0881
1685 E. 17th Ave.
hep@uoregon.edu
education.uoregon.edu/HEP (<http://education.uoregon.edu/HEP/>)

Federally funded and sponsored by the University of Oregon, the High School Equivalency Program is a multicultural, bilingual, alternative education program for migrant and seasonal farm workers. The program offers services to students with a wide range of academic and language skills and provides instruction in social, academic, and critical-thinking skills necessary to pass the general educational development (GED) test and to be placed in college, job training, or employment. The program office is open weekdays from 8:00 a.m. to 5:00 p.m.

Speech-Language-Hearing Center

Margit Mayr-McGaughey, Director

541-346-6772
HEDCO Education Building
education.uoregon.edu/clinic (<http://education.uoregon.edu/clinic/>)

The Speech-Language-Hearing Center is part of the Communication Disorders and Sciences program at the College of Education. Graduate student clinicians, under the supervision of licensed clinical faculty members, provide high-quality services to individuals with speech, language, cognitive, and hearing disorders. Services include diagnostic evaluations and individual and group therapy to people of all ages and cultural backgrounds. The center provides community outreach and serves as a local, state, and national resource for innovative clinical service and research.

Veterans Affairs

Julia Pomerenk, University Registrar

541-346-3119
220 Oregon Hall
registrar.uoregon.edu/veterans (<http://registrar.uoregon.edu/veterans/>)

The Office of Veterans Affairs, a unit within the Office of the Registrar, helps eligible student veterans, reservists, and dependents obtain educational benefits in compliance with the procedures and regulations of the United States Department of Veterans Affairs (VA). The office

provides basic information about educational benefits administered by the VA and also those provided by Oregon state laws.

Eligible students should contact the office by telephone, e-mail, or mail as soon as they are admitted to the university. The mailing address is Office of the Registrar, 5257 University of Oregon, Eugene, Oregon 97403-5257. The office is open from 8:00 a.m. to 5:00 p.m., Monday through Friday.

Veterans Access, Choice, and Accountability Act of 2014
Veterans Health Care and Benefits Improvement Act of 2016
Department of Veterans Affairs Expiring Authorities Act of 2018
Isakson and Roe Veterans Health Care and Benefits Improvement Act of 2020
Colonel John M. McHugh Tuition Fairness for Survivors Act of 2021

The following individuals shall be charged the in-state rate, or otherwise considered a resident, for tuition and fees purposes:

- A veteran using educational assistance under either Chapter 30 (Montgomery GI Bill®—Active Duty Program) or Chapter 33 (Post-9/11 GI Bill®), of Title 38, United States Code, who lives in the state of Oregon while attending the University of Oregon (regardless of his or her formal state of residence).
- Anyone using transferred post-9/11 GI Bill® benefits (38 U.S.C. § 3319) who lives in the state of Oregon while attending the University of Oregon (regardless of his or her formal state of residence).
- Anyone using benefits under the Marine Gunnery Sergeant John David Fry Scholarship [38 U.S.C. § 3311(b)(9)] who lives in the state of Oregon while attending the University of Oregon (regardless of his or her formal state of residence).
- Anyone using educational assistance under Chapter 31, Veteran Readiness and Employment, who lives in the state of Oregon while attending the University of Oregon (regardless of his or her formal state of residence).
- Anyone using benefits under Departments Education Assistance (DEA) program (38 U.S.C. § 3500) who lives in the state of Oregon while attending the University of Oregon (regardless of his or her formal state of residence).
- Anyone described above while he or she remains continuously enrolled (other than during regularly scheduled breaks between courses, semesters, or terms) at the University of Oregon.

GI Bill® is a registered trademark of the US Department of Veterans Affairs. More information about education benefits offered by the department is available at the official US government website (<https://www.benefits.va.gov/gibill/>).

Veteran Priority Registration

Students who are either active members of the military, veterans with an honorable discharge or general discharge under honorable conditions, or dependents receiving federal veterans' educational benefits and who self-report to the Office of the Registrar are offered priority registration for courses. Students who are eligible for priority registration are able to register before other students in their category as shown below. Priority is given to graduate students, then to undergraduates. Seniors register before juniors, juniors before sophomores, and so forth, based on number of credits accumulated.

1. Graduate and postbaccalaureate students
2. Seniors with 135 or more credits
3. Juniors with 90 or more credits

4. Sophomores with 45 or more credits
5. Freshman students with fewer than 45 credits

Veterans Benefits and Transition Act of 2018

The following policy (38 U.S.C., section 3679) applies to any covered individual, who is any individual entitled to educational assistance under Chapter 31, Vocational Rehabilitation and Employment, or Chapter 33, Post-9/11 GI Bill benefits:

1. Any covered individual is permitted to attend or participate in the course of education during the period beginning on the date on which the individual provides to the University of Oregon a certificate of eligibility for entitlement to educational assistance under Chapter 31 or 33 (a "certificate of eligibility" can also include a "Statement of Benefits" obtained from the Department of Veterans Affairs website—eBenefits, or a VAF 28-1905 form for Chapter 31 authorization purposes) and ending on the earlier of the following dates: (a) the date on which payment from the VA is made to the institution or (b) the date that is 90 days after the date the institution certified tuition and fees following the receipt of the certificate of eligibility.
2. The University of Oregon will not impose any penalty, including the assessment of late fees, the denial of access to classes, libraries, or other institutional facilities, or the requirement that a covered individual borrow additional funds, on any covered individual because of the individual's inability to meet his or her financial obligations to the institution due to the delayed disbursement funding from the VA under Chapter 31 or 33.
3. The University of Oregon requires the covered individual to take the following additional actions:
 - Submit a certificate of eligibility for entitlement to educational assistance no later than the first day of a course of education
 - Submit a written request to use such entitlement
 - Provide additional information, if requested, necessary to the proper certification of enrollment by the educational institution
 - Make a payment for the amount that is the difference between the amount of the student's financial obligation and the amount of the VA education benefit disbursement and understand that late fees may apply to these charges

Yamada Language Center

Jeffrey Magoto, Director

541-346-4011

541-346-3917 fax

175 McKenzie Hall

ylc@uoregon.edu

babel.uoregon.edu (<http://babel.uoregon.edu>)

The Yamada Language Center is the university's center for language teaching and learning, with resources and facilities to support more than 25 world languages. The center is an active partner with the university's language and linguistics departments, providing training, equipment, and technology to more than 200 instructors and 4,000 students.

The center's classrooms are designed for language teaching, featuring state-of-the-art audio-visual technology and furniture that can be easily reconfigured for a variety of active teaching environments. In addition, the student center offers space for lectures, workshops, and conversation

practice. A library of films and multilingual reading material in a variety of languages are also located there.

Among the center's key student services are the Self-Study Language Program, Foreign Language Exchange, and an annual Foreign Languages and International Studies Day. The center is also one of the founding members of the UO Language Council, a campus group aimed at raising the profile and impact of language study.

As a research unit, the center develops web-based software that serves the campus and the worldwide language teaching community. Its Virtual Language Laboratory and ANVILL (A National Virtual Language Laboratory) applications are used by thousands of students daily.

Student Alumni Association

541-346-2107
1720 E. 13th Ave., Suite 119
uosaa@uoregon.edu
www.uoalumni.com/saa (<http://www.uoalumni.com/saa/>)

The Student Alumni Association is an organization of students led by students that maintains University of Oregon traditions, inspires commitment in students, and serves the greater community. As the student chapter of the UO Alumni Association, the organization seeks to

- increase the career opportunities of students by providing opportunities for them to network with alumni
- provide leadership opportunities for students in the organizing of campus and community events
- provide professional development opportunities for students through internships and events
- generate excitement surrounding university activities and traditions, creating a legacy of student involvement

Student Housing

Michael Griffel, Director
541-346-4277

University Housing
1416 Columbia Street
Eugene, Oregon 97403

housing.uoregon.edu (<http://housing.uoregon.edu/>)

University Housing is dedicated to providing student housing that promotes academic success through academic residential communities and student-centered services. As a unit of the Division of Student Services and Enrollment Management, the staff is committed to supporting the mission of the University of Oregon.

All first-year students live on campus. Students may choose housing options in a residence hall community, which include room and board, and apartment communities. A small number of university houses in residential neighborhoods adjacent to campus are also available. University Housing also offers dining services with healthy options that incorporate locally sourced, organic ingredients whenever possible for residents and the campus community.

Residence Halls and Academic Residential Communities

The university maintains 10 residence hall (<http://housing.uoregon.edu/residence-halls/>)s (<https://housing.uoregon.edu/halls/>), which house approximately 4,900 students during the academic year. All residence halls have study areas, TV lounges, and laundry facilities, and a few have community kitchens. Available room types include single-, double-, or triple-occupancy, as well as a limited number of suites and rooms with bathrooms or sinks. All rooms contain a bed, desk, chair, and a wardrobe, dresser, or closet for each resident. Ethernet and/or Wi-Fi access are included. In addition to the amenities, a dedicated staff of professionals and student leaders live in the halls to help support the college experience in the halls and ensure residents are aware of resources.

University Housing partners with campus departments and academic schools and colleges to offer a variety of academic connections and A (<https://housing.uoregon.edu/communities/>)cademic Residential Communities (<http://housing.uoregon.edu/academics/>) (ARCs) for residents. Such programs include Art + Design, Business, Environmental Leaders, Global Engagement, Health Sciences, Latinx Scholars, LGBTQIA+ Scholars, Media and Social Action, Native American and Indigenous Studies, Performing Artists Collective, Sustainable Cities and the Public Good, Thrive: Healthy Living, Umoja Black Scholars, Women in Science and Math, and Robert D. Clark Honors College. The residence halls also connect students with faculty fellows, advisors, and the Faculty-in-Residence program.

Residential communities are another way residents can customize their experience. University Housing also offers the Creative Practice Community, Flying V: Substance Free Community, Gender Equity Community, Quiet Community, Industry, Entrepreneurship, and Innovation Path Community, and Science, Sustainability, and Health Path Community. For more information, visit housing.uoregon.edu/communities/ (<https://housing.uoregon.edu/communities/>)

Dining on Campus

The residence halls have five flexible meal plans (<http://housing.uoregon.edu/meal-plans/>). Four meal plans operate on a point system loaded weekly on a student's UO ID card. With these plans, students may use their meal plan points in any of the 14 housing dining venues. Venues include a traditional all-you-care-to-eat dining center, street tacos, coffee houses, a bistro, hearth-baked pizza, a pasta bar, deli-style locations, fresh sush, and markets with everything from sushi to sandwiches, soups, entrées, fresh fruit, açai bowls, and beverages. The other plan, Carson Limited, allows two entries per meal period to Carson Dining, the all-you-care-to-eat venue, and five meal points per week. This plan is only valid at Carson Dining. All meal plans come with \$50 of Duck Bucks to use in other locations on campus.

Registering for Housing

Any student admitted to the university may register for on-campus housing. After receiving notice of admission from the Office of Admissions, students should visit the housing website (<https://housing.uoregon.edu/register/>) and fill out an online housing registration form. After completing and submitting the registration, students must then read and sign the online housing contract and make an online payment of their initial housing payment and nonrefundable registration fee to immediately secure a housing space. For information on exemptions, please visit housing.uoregon.edu/first-year/live-on/. (<https://housing.uoregon.edu/first-year/live-on/>)

The earlier students register for housing, the more choices they will have when selecting their rooms. Returning residents are also given priority in room choices. Information and instructions on registering for residence hall housing (<http://housing.uoregon.edu/register/>) may be found on the housing website.

Residence Hall Contract and Rates

Residence hall contracts cover the full academic year. For residence halls, the academic year typically begins a few days before classes start in fall term through the end of spring term (June 10, 2022), excluding winter break. During the winter break and summer session, residents may stay in the halls for an additional fee.

Residents must sign a contract that explains the rights, privileges, and responsibilities of residence hall occupancy. These terms are based on consideration for other residents, health and safety standards, and compliance with established state laws and the University of Oregon student conduct code. Failure to comply with the terms and conditions of occupancy can lead to eviction.

Room and meal charges are billed to students' university accounts each term. Rates vary based on room type and meal plan. For information about billing and rates (<http://housing.uoregon.edu/costs/>), please visit the housing website.

Family Housing and University Apartments

University Housing maintains apartment communities and a limited number of houses for approximately 500 students and their families. Housing in Family Housing and University Apartments (<http://housing.uoregon.edu/apartments/>) is open to full-time students. One building offers single-dwelling units with priority for graduate students; other one-, two-, and three-bedroom apartments may be occupied by graduate or undergraduate students who are 20 or older or are either married, in a domestic partnership, or have minor children.

Apartments and houses are unfurnished, although each unit is equipped with a stove and a refrigerator. On-site laundry facilities are available in apartment communities, and laundry hook-ups are available in most houses. Some buildings include Ethernet service with the rent. In addition, some apartment communities have playgrounds, recreation rooms, community gardens, childcare programs on site, and recycling facilities.

Residents of Family Housing and University Apartments may pay with cash or debit or credit cards for meals at any of University Housing's dining venues or purchase the Ducks Dine On (<http://housing.uoregon.edu/ducks-dine-on/>) meal plan.

Rates

Rental rates vary by community or house, based on size and amenities. Occupancy limits are based on the number of bedrooms and the number of people in the household. There are a limited number of units that can accommodate three UO students; otherwise, no more than two adults may reside in a single unit.

To be eligible for a housing assignment, students must be enrolled and maintain full-time status at the university. Applications for Family Housing and University Apartments must be accompanied by a nonrefundable application fee. In addition, a security deposit and a prepayment toward the first month's rent are required at the time the offer is accepted.

As soon as students are admitted to the University of Oregon, they may apply for university apartments. Assignments are made based on variety

of factors, such as date of application, desired move-in date, numbers of household members, and availability. Early application and frequent application updates are highly encouraged.

University Testing Center

Jeff Bulkley, Director

541-346-3230

University Health Services Building, Second Floor

1590 E. 13th Ave.

testing.uoregon.edu (<http://testing.uoregon.edu/>)

The University Testing Center (UTC), a unit of the Division of Student Services and Enrollment Management, schedules, coordinates, and administers a wide range of academic and licensure testing for students and community members. The UTC works extensively with the Accessible Education Center to provide proctoring for students with accommodations. The UTC offers community and student support by offering a wide variety of testing programs such as academic examinations, placement assessments, language assessments, credit by examination programs (CLEP and DANTES), teacher certifications (ORELA and PRAXIS), licensing programs for the Oregon Department of Agriculture and Building Codes Division, admissions exams (GRE, GMAT, MAT, MPRE, and Cambridge Assessments) to name just a few. Students and community members taking online, distance-education courses from other schools and programs are also able to have their examinations proctored at the center. The UTC is always open to offering new academic and licensure exams as requested by the community.

Registration materials and information are available on the website (<https://testing.uoregon.edu/>) or by e-mailing a request (testing@uoregon.edu) to testing@uoregon.edu. The center is located in E248 University Health Services Building. Tests are administered by appointment. Hours of operation are listed on the website.

Transportation Services

David Reesor, Director

541-346-5444

The Transportation Services department coordinates the use of sustainable transportation options and provides parking services for students, members of the faculty and staff, and campus visitors. The department currently maintains approximately 3,200 parking spaces on or adjacent to campus in more than 60 lots and one multilevel underground garage, and operates the university's Access Shuttle, a free, on-campus ride service for students, employees, and visitors with limited mobility.

University Career Center

Paul Timmins, Director

541-346-6008

Willie and Donald Tykeson Hall, Garden Level

The University Career Center is a unit of the Division of Student Life that exists to support the career readiness, preparation, and professional development of students. Its mission is to help students learn about career options and paths; develop strategies to find and prepare for part-time jobs, internships, and full-time career opportunities; meet potential employers; and reach their fullest career potential.

Career Coaching

Career-readiness coaches help students learn about the world of employment—career choices, applications for jobs, internships, and graduate school—and assist with job and internship search strategies. Group sessions, workshops, and individual coaching appointments are available to help students advance their goals.

The center website provides a multitude of resources on careers, jobs and internships, search strategies, and employer profiles.

Jobs, Internships, and Career Resources

Handshake. Each year thousands of jobs—part-time, full-time, work-study, summer, international, and internship opportunities—are listed in Handshake (<https://career.uoregon.edu/handshake/>), the university's online career services tool listing jobs, internships, and other career resources. The center also actively develops part-time jobs, internships, and full-time career opportunities for students.

On-Campus Recruiting Program, Career Discovery, and Networking Events. The on-campus recruiting program brings more than 200 employers to campus each year, and career fairs and many career-related events with opportunities to interact with employers are held annually. Panels of industry experts demystify the world of employment and offer career and job-search advice.

Internship for Credit. This course offers students academic credit for engaging in supervised, preprofessional, career-related learning experiences. Students gain professional experience, develop skills, and explore career fields, all while earning credit. More information may be found on the center website.

University Career Center Partner Program. This program introduces students to employers who are committed to hiring University of Oregon students. They offer a variety of opportunities ranging from part-time jobs to internships and career positions.

Student Employment Enhancement Initiative. Hundreds of student employee positions are available each year at a variety of times. In an effort to make the student employment experience as meaningful as possible, this program supports student supervisors and, ultimately, students. More information about this program is available online (<https://uosee.uoregon.edu/>).

Support

The University Career Center is committed to providing customized opportunities and partnerships that support students who identify as traditionally underrepresented or underserved.

Multicultural Career Alliance. The alliance provides programming focused on career exploration and future employment opportunities for traditionally underrepresented groups of students, such as students of color, students with disabilities, student veterans, and students who identify as LGBTQ.

International Student Career Alliance. A collaborative effort to respond to the career and professional development needs and opportunities of international students on campus.

Student Veteran Career Peer Advising. Student veterans on campus are provided with career assistance through peer-advising sessions. The services offered include assistance writing résumé and cover letters as well as full-and part-time job and internship searches.

For more information about career exploration and academic planning, see the Academic and Career Planning (p. 40) section of this catalog.

Work-Life Resources

Jennifer Mirabile, Assistant Director, Human Resources Programs & Services

541-346-2195 or -3195

541-346-2548 fax

677 E. 12th Ave., Suite 400

hr.uoregon.edu/worklife (<http://hr.uoregon.edu/worklife/>)

University Work-Life Resources, a program in Human Resources, coordinates information about campus and community child-care options, resources for families and elder care, work and life resources, wellness programs, help with life events, and university work-life policies.

UO Affiliated Child-Care Programs

Co-op Family Center

The center is an independent, nonprofit co-operative located in Spencer View Family Housing. Student families receive priority and a tuition discount. The center serves children eight weeks to 10 years. For more information, visit the website (<http://coopfamilycenter.org/>) or telephone 541-346-7400.

Moss Street Children's Center

The center offers university student families priority and a tuition discount, serving children three months through third grade. It is described more fully under Erb Memorial Union in this section of the catalog. For more information, visit the website (<https://moss.uoregon.edu/>) or telephone 541-346-4384.

Vivian Olum Child Development Center

The center, which offers priority services to employee families, has seven classrooms and serves as many as 110 children, from eight weeks old through fifth grade. For more information, visit the website (<https://olum.uoregon.edu/>) or telephone 541-346-6586.

Caregiver Resources and Caregiver Provider Networks

Caregiving responsibilities have a unique impact on UO community members and their families. While UO cannot provide ready-made solutions to child care and other care giving issues individuals are encountering, the Caregiver Resources (<https://www.uoregon.edu/caregivers/>) website is a one-stop point of access to existing resources, including networking opportunities, and is intended to provide potential solutions to the challenges of caregiving while working and pursuing an education. The Caregiver Networks (<https://www.uoregon.edu/caregivers/#caregiver-networks>) are exclusive to the UO community, and connect members of our community with UO families needing caregiving.

Family Community Opportunities

A subscription-based email listserv for the UO community provides information about family-related campus and community events and programs. More information on the listserv and how to subscribe is available online (<https://hr.uoregon.edu/programs-services/work-life-resources/family-resources/parenting-family-resources/>).

Financial Assistance for Child Care

UO Child-Care Subsidy

This student fee funded program provides financial assistance to eligible student parents to help ease the cost of childcare. Eligibility is based on financial need. Email subsidy@uoregon.edu for more information or apply online. <https://uoregon.campuslabs.com/engage/submitter/form/start/488016> (<https://uoregon.campuslabs.com/engage/submitter/form/start/488016/>)

Employee-Dependent Child-Care Account

UO employee parents have an opportunity to pay for dependent care with pretax income. For more information, call the Human Resources Benefits Office, 541-346-3085.

Graduate Assistance Fund

The Graduate Student Assistance Fund program is designed to assist our graduate students facing financial hardship (<https://graduatestudies.uoregon.edu/funding/special-assistance-funds/assistance-fund/#financial-hardship>) relating to a qualifying event (https://graduatestudies.uoregon.edu/funding/special-assistance-funds/assistance-fund/#qualifying_event).

Maximum award amounts are capped and are determined by the nature of the qualifying event (https://graduatestudies.uoregon.edu/funding/special-assistance-funds/assistance-fund/#qualifying_event).

Availability and size of awards is contingent upon the amount of available monies in the fund, as well as applicants' meeting the eligibility requirements. Visit the website (<https://gradschool.uoregon.edu/current-students/assistance-fund/>) for more information.

Oregon Department of Human Services Child-Care Subsidy

The State of Oregon can provide families with financial help with child care costs. ERDC is a subsidy program. This means eligible families still pay part of the child care cost. This amount depends on the family's income, size, and the amount the child care provider charges.

Phone: 541-686-7878 | **Location:** 2885 Chad Dr., Eugene, OR 97408
Hours: Monday – Friday 7:00 a.m. – 6:00 p.m. (except state holidays)

Graduate Families GE

Questions, concerns, or needs related to graduate students with families may be found online (<https://gradschool.uoregon.edu/students-with-families/>) or directed to Graduate Families Graduate Employee via email (familyge@uoregon.edu). Graduate Families GE serves as a resource, providing referrals and support, hosting free family events, and managing the graduate families listserver, a subscription-based email service for the UO community providing information about family-related campus and community events and programs. More information on the listserver is available online (<https://lists-prod.uoregon.edu/mailman/listinfo/uofamilies/>).

Lactation Support Programs and Rooms

Each of the eleven lactation support rooms provide a private space for student, faculty, and staff mothers to nurse or express milk. View the Family-Friendly Resources (<https://map.uoregon.edu/s/family-friendly/>) map for specific lactation room locations. UO parents may register to use one of the campus lactation rooms (<https://hr.uoregon.edu/worklife/>)

children-elders-family/lactation-support/) by contacting a staff member in Human Resources, 541-346-2195. The Women's Center, located in the Erb Memorial Union, has private spaces available for lactation support on a first-come, first-served drop-in basis during business hours. Contact the Women's Center at 541-346-4095 or womenctr@uoregon.edu.

The Personal Refrigerator Lending Program provides nursing mothers working for the university with small, apartment-sized refrigerators for their campus offices and workspaces in which to store expressed milk. Call Human Resources to request a refrigerator.

Using the international symbol for breastfeeding is one way for nursing mothers on campus to communicate to those around them the need for privacy while nursing or expressing milk. To request a free sign contact Human Resources at 541-346-2195.

School and Summer Camp Information

Information on the Eugene 4J, Bethel, and Springfield school districts as well as UO-affiliated summer camps are available on the Human Resources website (<https://hr.uoregon.edu/>).

Youth and Family Program

The Department of Physical Education and Recreation offers a variety of youth lessons and family recreation time, as well as summer and no-school day camps. For more information, telephone 541-346-4183.
