Reader's Guide to the Catalog

Organization

The University of Oregon's largest academic units are its colleges and professional schools. Each consists of smaller units called departments or programs. The academic year is divided into three terms (fall, winter, spring) and one summer session.

Where to Find It

This catalog has four sections. The first section contains information about admission, registration, academic policies, undergraduate degree requirements, tuition and fees, financial aid and scholarships, employment, and academic and career planning. The second section outlines the majors, minors, and specializations defining the degrees and certificates that may be earned at the University of Oregon, as well as the array of core-education courses available that make up the foundational requirements of those degrees. The third (or curriculum) section describes all the university's academic programs in detail: faculty members, degree and nondegree programs, and course listings. This section includes the College of Arts and Sciences, the honors college, professional schools and colleges, the Division of Graduate Studies and graduate studies information, and ends with a review of undergraduate studies and supplemental academic programs. The final section contains information on academic resources and student services, physical education and recreation, and the academic calendar.

Definitions

The academic terms defined in the following list are used throughout this catalog.

Area-satisfying course. A course that counts toward partial fulfillment of bachelor's degree requirements in one of the three core-education areas: arts and letters, social science, science.

Certificate. A formal document that recognizes academic achievement in a specific discipline—only as an adjunct to an undergraduate degree program and either as an adjunct to or separate from a graduate degree program, and only for students in an admitted status. Stand-alone noncredit certificates are offered through Continuing and Professional Education to all students.

Colloquium. An academic meeting or assembly for discussion, sometimes led by a different lecturer speaking on a different topic at each meeting; a seminar with consultation, report, and exchange.

Competency. A specific skill in a specific area.

Concentration. A subarea of specialized study within an undergraduate or graduate major or undergraduate minor.

Corequisite. A course or other educational requirement that must be completed simultaneously with another course.

Course. A subject, or an instructional subdivision of a subject, offered through part of a term or a whole term. Each course is assigned a course level. Courses numbered 100–499 are undergraduate courses; 100–299

are lower division, and 300–499 are upper division. Courses numbered 500 and above are graduate or professional.

1 credit. Represents approximately three hours of the student's time each week for one term in a lower-division undergraduate course. This frequently means a minimum of one hour in the lecture hall or laboratory in addition to two hours spent in outside preparation. The number of lecture, recitation, laboratory, or other periods required each week for a course is listed in each term's class schedule.

Cultural Literacy course. A course that counts toward partial fulfillment of bachelor's degree requirements in one of two categories: Global Perspectives; and US: Difference, Inequality, Agency.

Curriculum. An organized program of study arranged to provide integrated cultural or professional education.

Discipline. A branch of learning or field of study (e.g., mathematics, history, psychology).

Dissertation or Thesis. A written document resulting from study or research and submitted as a major requirement for a degree.

Electives. Courses that students may choose to take, as contrasted with courses that are required for an academic program.

Endorsement. An affirmation of teaching competency by the Teacher Standards and Practices Commission.

Experimental course. A course under development that has not received formal acceptance to the curriculum. Subject matter, instructional materials, and activities are evaluated for effectiveness and long-term value to the discipline. *Experimental courses may not be used to clear core-education requirements.*

Field studies. A series of practical experiences on or off campus to understand principles or develop skills in performing selected tasks.

Generic courses. Courses numbered 100, 300, 196, 198, 199, 299, 399–410, 503–510, 601–610, and 704–710, for which credit is variable and which may be repeated for credit. Instructor's permission is often required for registration.

Grade point average (GPA). The GPA is determined by dividing the total points for all grades by total credits.

Grading option. Unless specified otherwise, nonmajors may take courses either graded (A+ through F) or pass/no pass (P/N). The online class schedule identifies courses for which majors are limited to a particular grading option.

Graduate specialization. A subdivision of a graduate major or an interdisciplinary track in which a strong graduate-level curriculum is available. For more details, visit the website (<https://gradschool.uoregon.edu/policies-procedures/graduate-specialization/>).

Interdisciplinary or multidisciplinary. A course of study from two or more academic disciplines.

Internship. Unpaid professional practice in an organization that integrates concepts studied at the university with career-related work experience.

License. See Endorsement.

Major. A primary undergraduate or graduate field of specialized study.

Minor. A secondary undergraduate field of specialized study.

Multilisted course. A single course that is listed under more than one subject code; course numbers end with the letter M.

Option. A subarea of specialized study within an undergraduate or graduate major or undergraduate minor.

Preparatory programs. Undergraduate courses of study taken in preparation for professional or graduate degrees.

Prerequisite. A course or other educational requirement that must be completed prior to registering for another course or before proceeding to more advanced study.

Practicum. A series of clinical experiences under academic supervision designed to integrate theory and principles with practice.

Reading and conference. A particular selection of material read by a student and discussed in conference with a faculty member.

Regression. Occurs when a student takes a course that is at a lower level than a course the student has previously passed. Academic departments have the authority to designate a course as regressive.

Repeatable for credit. Only courses designated "repeatable" may be repeated for credit. Except for generic, studio, or performance courses, the circumstances under which a course may be repeated for credit are restricted.

Research. Disciplined inquiry of a topic with varying techniques and assignments suited to the nature and conditions of the problem being investigated. Often pursued in relation to a dissertation or thesis.

Residence credit. Academic work completed while the student is formally admitted and officially registered at the University of Oregon; this includes courses taken in UO study abroad programs.

Semester. One-half the academic year (sixteen weeks), applicable only to the UO School of Law.

1 semester credit. One semester credit equals one and one-half quarter (or term) credits.

Seminar. A small group of students studying a subject with a faculty member. Although practices vary, students may do original research and exchange results through informal lectures, reports, and discussions.

Sequence. Two or three closely related courses that must be taken in specified order.

Series. Two or more closely related courses that may be taken in any order.

Special studies. A colloquium or experimental course, often taken concurrently with another course as a satellite seminar.

Specialization. A graduate-level subdivision of a major or an interdisciplinary track in which a strong graduate-level curriculum is available.

Subject code. An abbreviation used with a course number to indicate an academic subject area. See the list of subject codes in this section of the catalog.

Supervised college teaching. A student, under faculty supervision and sponsorship, accepts responsibility for teaching a university course.

Supervised tutoring. A student, under faculty supervision, accepts responsibility for tutoring other students within the discipline.

Temporary multilisted course. Courses numbered 200M, 400M, 500M, and 600M, which may be offered once without formal approval.

Term. Approximately one-third of the academic year (eleven weeks), either fall, winter, or spring.

Terminal project. A presentation incorporating the knowledge and skills acquired from course work completed for the master's degree.

Waive. To set aside without credit certain requirements for a degree or major.

Workshop. An intensive experience, limited in scope and time, in which a group of students focus on skills development rather than content mastery.

Courses

Abbreviations

The following abbreviations are used in course descriptions:

- **Coreq:** corequisite
- **H:** honors content of significant difficulty
- **M:** multilisted courses
- **Prereq:** prerequisite

Sample Course Listings

The following examples are from Biology (BI):

BI 122. *[BI lower-division course number]* **Introduction to Human Genetics.** *[course title]* **4 credits.** *[course credits]* Basic concepts of genetics as they relate to humans. Blood groups, transplantation and immune reaction, prenatal effects, the biology of twinning, selection in humans, and sociological implications. Lectures, discussions. *[course description]*

BI 523. *[BI graduate course number]* **Human Molecular Genetics.** *[course title]* **4 credits.** *[course credits]* Advanced topics in genetics that relate to human development and disease. The human genome, sex determination, X-chromosome inactivation, chromosomal abnormalities, trinucleotide repeat expansions, cancer. *[course description]* Prereq: BI 320. *[course prerequisite]*

BI 607. *[BI graduate-only course number]* **Seminar: [Topic].** *[course title]* **1–3 credits.** *[course credit range]* Topics may include neurobiology, developmental biology, ecology colloquium, genetics, molecular biology, and neuroscience. *[course description]* Repeatable.

Subject Codes

The following subject codes are used at the University of Oregon. They appear in University of Oregon catalogs and class schedules, on student schedules, degree audits, transfer articulation reports, and transcripts.

Course Numbering System

Except at the 500 and 600 levels, courses in University of Oregon catalogs are numbered in accordance with the course-numbering plan

of the schools in the Oregon University System. Institutions vary in their treatment of 500- and 600-level courses.

1–99

Remedial, terminal, semiprofessional, or noncredit courses that do not apply to degree requirements

100–299

Lower-division (freshman- and sophomore-level) courses

300–499

Upper-division (junior- and senior-level) courses

500–599

Courses that offer graduate-level work in classes that include undergraduate students

600–699

Courses for graduate students only

700–799

Except in the School of Music and Dance, professional or technical courses that apply toward professional degrees but not toward advanced academic degrees such as the MA, MS, or PhD. Both 600 and 700 numbers in the School of Music and Dance indicate graduate courses only.

Temporary Multilisted and Area-Satisfying Courses

100

Temporary lower-division area-satisfying course

200M

Temporary lower-division multilisted course

298

Temporary lower-division area-satisfying course

300

Temporary upper-division area-satisfying course

400M

Temporary upper-division multilisted course

500M

Temporary graduate-level multilisted course

600M

Temporary graduate-level multilisted course

Generic Courses

Certain numbers are reserved for generic courses that may be repeated for credit under the same number. Except in the School of Law, courses numbered 503, 601, and 603 are offered pass/no pass only.

Credit is assigned according to the work load in a particular course. Credit ranges indicate minimum and maximum credits available in a single course for a single term, and departments determine their own credit ranges.

196 Practicum: [Topic] or Field Studies: [Topic]

198 Workshop: [Topic] or Laboratory Projects: [Topic]

199 Special Studies: [Topic]

299 Special Studies: [Topic]

399 Special Studies: [Topic]

401 Research: [Topic]

402 Supervised College Teaching

403 Thesis

404 Internship: [Topic]

405 Reading and Conference: [Topic] or Special Problems: [Topic]

406 Practicum: [Topic] or Field Studies: [Topic]

407/507 Seminar: [Topic] or Colloquium: [Topic]

408/508 Workshop: [Topic] or Laboratory Projects: [Topic]

409 Terminal Project or Capstone

410/510 Experimental Course: [Topic]

503 Thesis

601 Research: [Topic]

602 Supervised College Teaching

603 Dissertation

604, 704 Internship: [Topic]

605, 705 Reading and Conference: [Topic] or Special Problems: [Topic]

606, 706 Practicum: [Topic] or Field Studies: [Topic]

607, 707 Seminar: [Topic] or Colloquium: [Topic]

608, 708 Workshop: [Topic] or Laboratory Projects: [Topic]

609, 709 Terminal Project or Capstone

610, 710 Experimental Course: [Topic]

Undergraduate Students

To receive an undergraduate degree, a student must have satisfied, at the time of graduation, all requirements for the degree listed in one of the following:

1. the unexpired catalog in effect when the student was first admitted and enrolled at the University of Oregon, **or**
2. any subsequent catalog that has not yet expired

To fulfill major or minor program requirements, a student must complete the requirements in effect

1. when the student first declared the major or minor, **or**
2. when the student changed to a different major or minor

Exceptions to major or minor requirements may be made by the department or program offering the major or minor.

Graduate Students

To receive a graduate degree, a continuously enrolled student must have completed, at the time of graduation, all requirements described in the department and **Division of Graduate Studies** sections of the catalog in effect when the student was first admitted and enrolled at the University of Oregon. A student who has not maintained continuous enrollment is subject to the requirements described in the department and **Division of Graduate Studies** sections of the catalog in effect the first term the student was readmitted by the Division of Graduate Studies and reenrolled at the University of Oregon.

Requests for exceptions to graduate degree requirements must be submitted in writing to the Division of Graduate Studies prior to graduation.

While every effort is made to ensure the accuracy of the information in this catalog, the University of Oregon has the right to make changes at any time without prior notice. This catalog is not a contract between the University of Oregon and current or prospective students.

Catalog Expiration and Requirements Policies

The *University of Oregon Catalog* lists requirements for active degrees offered by the university.

Each catalog goes into effect at the beginning of fall term the academic year of issue. It expires at the end of summer session the seventh academic year after publication.

Advisors and other university employees are available to help, but students have final responsibility for satisfying degree requirements for graduation.

Home

The *University of Oregon Catalog* contains complete details for all academic programs offered by the university. Whether you're an enrolled student or you're considering attending the UO, this site will provide the information you need as you consider your academic goals. Go Ducks!

About the University of Oregon

Mission Statement

Serving the state, the nation, and the world since 1876.

The University of Oregon is a comprehensive public research university committed to exceptional teaching, discovery, and service. The university is a community of scholars, helping members of its community to question critically, think logically, reason effectively, communicate clearly, act creatively, and live ethically.

Purpose

The university community strives for excellence in teaching, research, artistic expression, and the generation, dissemination, preservation, and application of knowledge, devoted to fostering the next generation of leaders and informed participants in the global community. Through these pursuits, the social, cultural, physical, and economic well-being of the students, the state, the nation, and the world are enhanced.

Vision

The university community aspires to create a preeminent and innovative public research university encompassing the humanities and arts, the natural and social sciences, and the professions, seeking to enrich the human condition through collaboration, teaching, mentoring, scholarship, creative inquiry, scientific discovery, outreach, and public service.

Values

The university community values

- the passions, aspirations, individuality, and success of the students and the members of its faculty and staff who work and learn here
- academic freedom, creative expression, and intellectual discourse
- diversity, and seeks to foster equity and inclusion in a welcoming, safe, and respectful community
- the unique geography, history, and culture of Oregon that shapes its identity and spirit
- a shared charge to steward resources sustainably and responsibly

Inspiration and Discovery

Generations of leaders and citizens have studied at the University of Oregon since it opened in 1876. Today's students, like the more than 250,000 alumni before them, have access to the most current knowledge in lectures, laboratories, and seminars conducted by active researchers. By sharing their research through teaching, faculty members are better able to articulate their findings and to integrate their specialized studies with broader areas of knowledge.

University of Oregon students select courses from departments and programs in the College of Arts and Sciences and from six professional schools and colleges and the Robert Donald Clark Honors College. Some 1,949 faculty members, 43 librarians, and 1,437 graduate and research assistants serve as mentors, colleagues, and friends to the 22,298 undergraduate and graduate students enrolled at the university.

Although more than half of all students are from Oregon, 44 percent are from other states and 5 percent are from other countries. The mix

of backgrounds gives students a chance to know people they might not meet otherwise—a real asset in a world where national and international relations influence everyday life.

Teaching, research, and a spirit of sharing are characteristics of the campus community. Faculty members and students engage in research programs that bring to the university approximately \$172.5 million in competitive research awards. The university's science departments receive national attention for their work in such areas as computer science, genetics, materials, optics, and neuroscience. Twelve current faculty members belong to the prestigious American Academy of Arts and Sciences, as well as five emeritus faculty. Seven current faculty members have been elected to the National Academy of Sciences, as well as five emeritus faculty. One current faculty member has been elected to the National Academy of Medicine.

Connection to Community

The sharing of knowledge and the love of learning do not stop at the campus borders. Public service is important to the university.

Members of the UO faculty share their experience and knowledge in community activities that include service in local and state governments. They also serve as consultants for businesses, industries, school districts, and government agencies. Students work as interns in a variety of educational programs in the community and volunteer for service activities.

University programs that serve the public include Academic Extension, which offers for-credit and noncredit activities throughout the state. Planning and technical assistance from the Community Service Center helps Oregon communities solve local problems and improve the quality of life in rural Oregon. For more than four decades, the Oregon Bach Festival has offered an annual program of concerts and master classes to music lovers in the Pacific Northwest. The UO's classical music radio station, KWAX-FM, is an affiliate of the Public Radio International Classical 24. KWAX programs are rebroadcast on translators in several coastal and central Oregon communities and cybercasts entertain listeners around the world. A second radio station, KWVA-FM, serves the Eugene-Springfield metropolitan area and has a live internet stream, playing a varied mix of music in addition to talk shows and live college sports broadcasts. KWVA is a voice for UO students as well as a place for them to gain broadcast, production, and operation experience.

The university's presence is evident at its off-campus facilities—Pine Mountain Observatory in central Oregon near Bend—and its academic programs in Portland and at the coastal Oregon Institute of Marine Biology in Charleston. Access is enabled through several online and hybrid programs.

The university is one of the largest and most stable employers in the state, directly employing 9,227 people. Overall, University of Oregon activity affects more than \$989 million in household earnings and 25,917 jobs in the state.

The Campus Experience

The university's 295-acre campus is an arboretum of more than 4,000 trees of approximately 500 species, located in the lush Willamette Valley, between the Pacific Ocean and the Cascade Mountains. Campus buildings date from 1876, when the UO's first building opened, to the present, with the recent opening of the Lyllye Reynolds-Parker Black Cultural Center; Willie and Donald Tykeson Hall, the university's hub for academic and career advising, and home to the College of Arts and

Sciences, University Career Center, and Division of Equity and Inclusion; and the Phil and Penny Knight Campus for Accelerating Scientific Impact.

The Museum of Natural and Cultural History is located at East 15th Avenue and Columbia Street. Across campus, the Jordan Schnitzer Museum of Art, a member of the American Alliance of Museums, is noted for its collections of Asian and Northwest art.

The UO Libraries, a member of the Association of Research Libraries, is an important research facility for scholars throughout the Northwest. The free Oregon Card Program allows Oregon residents who are sixteen or older to borrow from the libraries' three-million-volume collection.

Campus athletic facilities include the 54,000-seat Autzen Stadium, the Marcus Mariota Sports Performance Center, the Casanova Athletic Center, the Moshofsky Center, Papé Field, Jane Sanders Stadium, PK Park, Hayward Field, Matthew Knight Arena, and the Student Tennis Center.

Student-guided tours of the university are available Monday through Saturday. Tours may be arranged by calling 541-346-1274. Campus maps and pamphlets describing university programs, answers to questions about services and office locations, and general information about the university are available at the information desk in the main lobby of the Ford Alumni Center.

The university's website has daily news updates and information about programs and events: www.uoregon.edu (<http://www.uoregon.edu>).

Equal Opportunity

The university is committed to equal access to programs, course offerings, facilities, admission, and employment for all of its employees, students, and campus community members. It is the policy of the university to maintain an environment free from harassment and discrimination against any person.

The Office of Investigations and Civil Rights Compliance, formerly the Office of Affirmative Action and Equal Opportunity and the Office of the Title IX Coordinator, offers the UO community a place to discuss and report issues, concerns, and conflicts regarding discriminatory or harassing behavior. The office also helps identify how such concerns and conflicts may best be addressed and resolved. The office supports the university's compliance with federal and state laws regarding discrimination and harassment, affirmative action, and equal employment opportunity.

The office works with students, members of the faculty and staff, and campus community members by:

- Promoting a learning and working environment free from discrimination and harassment.
- Receiving concerns and complaints from any member of the UO community (i.e. students, faculty and staff members, visitors, and program participants) regarding issues of potential discrimination and discriminatory harassment at the university.
- Investigating reports and complaints of discrimination and harassment. As investigators, the office does not act as advocates, but serve in a neutral and impartial capacity.
- Addressing and resolving concerns and complaints of discrimination and harassment through referral and collaboration with stakeholders and partners across campus.

- Explaining and clarifying university policies and procedures as well as federal and state laws and regulations regarding discrimination, harassment, retaliation, and equal opportunity.

Direct related inquiries to the Office of Investigations and Civil Rights Compliance, 677 E. 12th Ave., Suite 452, 5221 University of Oregon, Eugene, Oregon 97403-5221; telephone 541-346-3123.

Accreditation

The University of Oregon was elected to membership in the Association of American Universities in 1969. The university is accredited by the Northwest Commission on Colleges and Universities. Individual programs in the university's professional schools and colleges are accredited by the following organizations:

Accrediting Council on Education in Journalism and Mass Communications
 Association to Advance Collegiate Schools of Business
 American Alliance of Museums
 American Bar Association
 American Chemical Society
 American Psychological Association
 American Speech-Language-Hearing Association
 Commission on Accreditation for Marriage and Family Therapy Education
 Commission on English Language Program Accreditation
 Council for Interior Design Accreditation
 Landscape Architecture Accreditation Board
 National Architectural Accrediting Board
 National Association of Schools of Art and Design
 National Association of Schools of Music
 National Association of Schools of Public Affairs and Administration
 Network of Schools of Public Policy, Affairs, and Administration
 Planning Accreditation Board

University of Oregon Board of Trustees

The University of Oregon is an independent public body governed by the Board of Trustees of the University of Oregon. The trustees have broad authority to supervise and manage the university and may exercise all of the powers, rights, duties, and privileges expressly granted by law or that are incident to the board's powers, rights, duties, and privileges. Except for the university president, who is an ex officio, nonvoting member, the trustees are appointed by the governor and confirmed by the Oregon Senate.

The names of the members follow. The expiration date for each term is June 30 of the year shown.

Ginevra Ralph, BA '83, MA '85, board chair, 2023
 Steve Holwerda, MBA '91, board vice chair, 2023

Disclaimer

While every effort is made to ensure the accuracy of the information in this catalog, the University of Oregon has the right to make changes at any time without prior notice. This catalog is not a contract between the University of Oregon and current or prospective students.

This publication will be made available in accessible formats upon request. Call Marketing Communications–Design and Editing Services, 541-346-2087.

From Admission to Graduation

This section of the catalog holds basic information for prospective students on how to apply to the University of Oregon, choose a major, register for courses, and apply for scholarships, grants, and financial aid, in addition to outlining and explaining their rights and responsibilities.

Admissions

Erin Hays, Director, Office of Admissions

541-346-3201
541-346-5815 fax
201 Oregon Hall

Admission requirements apply to all students seeking to enroll at the University of Oregon.

Application Deadlines for Fall 2023

Student Classification	Enrollment Deadline
Freshman, early action	November 1, 2022
Freshman, standard	January 15, 2023
University scholarship	January 15, 2023
International freshman	January 15, 2023
Transfer, priority	March 15, 2023
Undergraduate reenrollment	Friday, 2 weeks before registration opens
Transfer, standard	June 1, 2023
International transfer	June 1, 2023
Postbaccalaureate undergraduate or graduate	Thirty days before the start of the term
Graduate	Set by individual departments

Departmental Application Deadlines

The following majors require a separate consideration. Students applying to these majors will receive a separate decision about their acceptance into the major: architecture, art, interior architecture, product design, or music. Be aware of the special admission requirements and application deadlines, and contact that department directly for more information.

Music majors audition for placement and take a musicianship examination scheduled on several dates throughout the spring. Art majors need to declare their major by completing the declaration form available both online (<https://art.uoregon.edu/sites/art1.uoregon.edu/files/downloads/undergrad/ARTMajorDeclarationForm.pdf>) and at the art office located at 198 Lawrence Hall.

Application Deadlines for Winter–Summer 2023

Student Classification	Enrollment Deadline
	Winter 2023 Enrollment
Freshmen	October 15, 2022
Transfers	November 15, 2022
	Spring 2023 Enrollment
All classifications	February 1, 2023

	Summer 2023 Enrollment
Freshman	March 1, 2023
Transfer	April 15, 2023

Freshman Admission

For applicants who are in high school and will graduate prior to enrolling at the University of Oregon or students who have already graduated from high school and will not attempt and college-level coursework after graduation.

Standard Admission Process

Through the standard admission process, applications are evaluated based on the following criteria:

- Strength of academic course work
- Grades earned
- Grade trends, especially in junior and senior year of high school
- Senior-year course load
- Writing skill, personal characteristics, and special circumstances as shared in the various written and narrative sections of the application
- Extracurricular activities, including community service and employment
- Ability to enhance the diversity of the university community
- Special talents
- Standardized test scores from the ACT or SAT are optional for admission. However, these scores can be used as one option for meeting requirements such as English proficiency, or alternatives requirements for applicants from nonaccredited schools.

Application Procedure

Freshman applicants must submit the following to the Office of Admissions:

- Completed application for admission, including essays and activities and a nonrefundable application fee, by the standard application deadline. Students can use either the UO's own application, the Common Application, or the Coalition Application, and need to submit only one version of an application. Details are available online (<https://admissions.uoregon.edu/freshmen/>).
- An official high school transcript is not required at the time of applicant in most cases. Instead, students self-report their complete high school record, and official transcripts will be required at the end of the process unless requested sooner by Admissions.
- Test scores from the SAT or ACT are optional for admission. However, official test scores can be considered if submitted officially through the testing agency, or appearing on an official high school transcript. These scores play no specific role in the admission decision, but are sometimes one of a multiple alternatives applicants might use to address a particular situation.

Standard Admission Requirements

Graduation from a Regionally Accredited High School

Applicants who graduate from a nonaccredited high school, were homeschooled, or earned a general equivalency diploma (GED) must meet the alternative admission requirements explained

in more detail online (<http://admissions.uoregon.edu/freshmen/alternativeadmission/>).

Completion of Required Course Work

Applicants must satisfactorily complete the following high school course work. To meet minimum admission requirements, applicants must complete 15 units in the core areas listed below with a grade of C– or better in each course. Until further notice, during the pandemic, passing or credit-only results will be acceptable if the applicant's school has not provided grades for these courses. These requirements may be in progress at the time of application, provided they are complete by the time the student enrolls at Oregon.

- **English—four years.** All four years should be in preparatory composition and literature, with emphasis on and frequent practice in writing expository prose
- **Mathematics—three years.** Must include first-year algebra and two additional years of college-preparatory mathematics. An advanced mathematics course is highly recommended in the senior year. Algebra and geometry taken prior to ninth grade are acceptable. Regardless of the pattern of mathematics courses or the number of years of mathematics taken, the mathematics course work must include Algebra II (or equivalent) or higher
- **Science—three years.** Must include a year each in two fields of college-preparatory science such as biology, chemistry, physics, or earth and physical science. One year of laboratory science is recommended
- **Social studies—three years.** May include areas such as global studies, history, or social studies electives
- **Second-language proficiency.** Demonstrate with one of the following:
 - Two years of the same second language in high school
 - Two college terms of the same second language
 - Proficiency test (e.g., SAT Subject Test or BYU Foreign Language Assessment)
 - Other options for meeting the second-language requirement, including American Sign Language

Exceptions to this requirement are only considered for students graduating from high schools that do not offer two years of any second language.

College work may be used to complete courses missed in high school. A one-term transferable college course of at least 3 credits (quarter system) is equal to one year of high school work. Applicants are strongly encouraged to contact the UO Office of Admissions to verify that the courses completed will satisfy course pattern deficiencies.

An examination in a second language is strongly recommended to qualify a student for admission by meeting the second-language proficiency requirements. Students who do not take an SAT Subject Test have several other options to prove language proficiency through another approved process.

The UO offers tentative admission based on self-reported record and planned senior schedule. Final admission is granted only after the Office of Admissions has received official transcripts verifying successful completion of all admission requirements and graduation. If an applicant's final record shows a substantial change, or if the applicant does not complete a course that was in progress at the time of application or

admission or completes it with a low grade, the offer of admission may be withdrawn by the university.

Submission of Scores from Standardized Tests

The University of Oregon accepts scores for the SAT or ACT when reported on official high school transcripts or submitted to the Office of Admissions directly from the testing service. Test scores for applicants planning to participate in intercollegiate athletics must be received directly from the testing service.

When taking the test, applicants should list the University of Oregon as a score recipient. The school code number to use for the SAT is 4846; the code for the ACT is 3498.

Consideration of Narratives and Essays

Freshman applicants are required to submit an essay that serves as a personal statement to show not only writing ability but insights into the applicant's personal characteristics. Students are also offered a chance to write optional essays for various purposes.

Consideration of Activities, Work, and Accomplishments

Most applicants are required to share a set number of examples of their activities outside the classroom. Students choose a variety of ways to be involved in activities—lead, volunteer, intern, hold jobs, and achieve special recognition. No type of activity will be valued more highly than another, so students should consider anything they have done as a possibility to share and discuss. However, applicants are limited to a finite number of items, because the selection process does not reward sheer volume of activity. Instead, the university seeks to use this information to better understand who the applicants are, and to learn more about their most meaningful interests and accomplishments.

Explanation of Special Circumstances (optional)

Applicants whose high school or college performance was affected by any serious illness, diagnosed disability, personal difficulties, or family circumstances should provide a statement to summarize their situation. Dates should be included when applicable. Applicants with D or F grades, especially those grades that make them fall short of course requirements, are strongly encouraged to address the reasons for these grades in this section.

Alternative Admission

The requirements for standard admission confer no guarantees of admission, and applicants who meet them may or may not be admitted due to the selective, holistic process that takes many academic and personal factors into consideration. Also, students who do not meet these requirements will still be considered for admission. Students who fall short of the standard requirements in any way should never let that deter them from applying; they are strongly encouraged to contact the UO Office of Admissions for further guidance and additional requirements. Students from homeschool settings and those who attend nonaccredited schools may be required to submit additional information and materials. Students who fall short of core subject requirements or those with low grades (especially those who fall below a 3.00 GPA) are encouraged to explain the reasons for their situation in the application.

Premajor Status

Departments or programs with premajor admission requirements include the Lundquist College of Business, certain majors in the College of Design, the College of Education, the School of Journalism and

Communication, and the Department of International Studies. These units typically only permit newly admitted students to be considered premajors for their majors. A premajor student is eligible to take advantage of the department's advising services and, in most cases, complete lower-division course work required for the major. Each department screens enrolled premajor students who have completed some university study and decides if they may advance to major status.

Transfer Admission

For applicants who will have attempted any college-level coursework after graduating from high school and will have completed 35 or fewer quarter credits (or 23 or fewer semester credits) by the time of expected enrollment at Oregon, admission will be based on both freshman and transfer admission requirements.

For applicants who have completed 36 or more quarter credits (or 24 or more semester credits) by the time of expected enrollment at Oregon, admission will be based only on the transfer admission requirements.

Course Requirements

A grade of C– or better is required in the following:

- College-level composition and writing
- College-level mathematics
- Second language: two years in high school or two terms in college

Applicants who will not have completed these courses should still consider applying, and they are encouraged to submit a letter of explanation or include an explanation in the special circumstances statement.

Required GPA

In college-transferable courses, the following cumulative GPAs are required for admission consideration:

- 2.25 for Oregon residents
- 2.50 for applicants without Oregon residency
- 2.00 for applicants, regardless of residency, who earn an associate of arts Oregon transfer (AAOT) degree from an Oregon community college, an associate of science Oregon transfer (ASOT) degree in business, or an Oregon Transfer Module (OTM) from any public two-year or four-year institution in Oregon

The University of Oregon may recalculate grades for purposes of establishing an admissions GPA. This means that an applicant's admission GPA is not identical to the one presented by the previous institution. These recalculations will be made in regard to transferability of credit, repeat policies, or limits on certain types of credit.

Second-Language Proficiency

Applicants who graduated from high school or earned a general equivalency diploma (GED) in spring 1997 or later must document second-language proficiency by submitting an official transcript or score report verifying one of the following:

- Two years of the same language at an accredited high school
- Two terms of the same language at a regionally accredited college
- Proficiency test (e.g., SAT Subject Test or Brigham Young University Foreign Language Achievement Test)

Options for meeting the second language requirement, including American Sign Language, are available on the Office of Admissions (<http://admissions.uoregon.edu/apply/secondlanguage.htm>) website. Applicants admitted with an exception to this requirement are required to complete two college terms of the same language before graduating from the University of Oregon, regardless of the major or degree pursued.

Additional Considerations

Even if an applicant meets the minimum requirements stated above, factors of concern, especially a drop in GPA from recent course work, may still be considered before a decision on admission is made. In addition, when considering applicants who do not meet minimum admission requirements, the Office of Admissions considers additional factors such as whether the applicant holds an associate of arts Oregon transfer degree from an Oregon community college or associate of arts degree from select community colleges in other states; which of the applicant's completed courses fulfill university graduation requirements; the applicant's grade point average (GPA); and the applicant's grade trend throughout his or her academic history. Academic potential and special talents are also considered.

Application Procedure

Transfer applicants must submit the following to the Office of Admissions:

1. A completed application for admission and a nonrefundable application fee
2. An official transcript from each college and university attended. It is a firm requirement that applicants submit transcripts from any previous institution where credit was attempted, regardless of the grades or amount of credit earned, and regardless of how or whether the applicant intends to apply these credits toward UO requirements. Applicants who omit record of previous work attempted will be denied admission, and admitted students for whom this omission is discovered can have their offer of admission revoked, even if it is after they have begun enrollment at Oregon
3. A high school transcript is not always required, but is often needed—not only for admission but for federal aid eligibility. Students should provide the high school transcript at the time of application whenever possible

Transfer students may submit their applications up to six months before they plan to enroll at the university, but may be asked to provide updated transcripts before final decisions are reached. Applications and official transcripts should be received by the university by the deadlines listed above to allow time for a complete evaluation of the transferred credits.

Transfer of Credit

The amount of credit transferred depends on the nature of the applicant's college work, which is evaluated according to the academic requirements of the University of Oregon. Only college-level academic course work from regionally accredited two- and four-year colleges or universities will be considered for transfer. Up to 124 credits from regionally accredited community or junior colleges, of which only 90 credits may be transferred from an international junior college, may be applied to the bachelor's degree.

See **Bachelor's Degree Requirements** for requirements that apply to new undergraduates.

Premajor Status

Departments or programs with premajor admission requirements are the Lundquist College of Business, certain majors in the College of Design, the College of Education, the School of Journalism and Communication, and the Department of International Studies. These units only permit newly admitted students to be considered premajors for their majors.

A premajor student is eligible to take advantage of the department's advising services and, in most cases, complete lower-division course work required for the major. Each department screens enrolled premajor students who have completed some university study and decides if they may advance to major status.

Dual Enrollment Program

The University of Oregon has dual-enrollment agreements with Lane Community College and Southwestern Oregon Community College. These programs provide students with the academic and administrative advantages of simultaneous enrollment in two institutions. More information and applications for admission are available from the UO Office of Admissions and at either community college. No student can be in the dual enrollment program without first being successfully admitted to the University of Oregon.

International Admission

Applicants who are not United States citizens or permanent residents are considered for admission to the university as international students.

International applicants, whether freshman or transfer, may apply for admission fall, winter, and spring terms and summer session. All deadlines are the same as for US students in these categories. Applications received after the deadlines are considered on a space-available basis. See the admission requirements for individual countries (<http://admissions.uoregon.edu/international/apply/requirements/>).

A GPA of 2.50 is required for undergraduates who want to transfer from another university or college.

English Proficiency. Students whose native language is not English must supply results of a standardized language-proficiency test. The University of Oregon currently accepts the TOEFL, IELTS, or Duolingo English Test (DET) examinations for establishing proficiency, as well as the SAT or ACT. To be considered for full admission without an English placement test upon arriving, applicants must score an 88 on the TOEFL iBT, 6.5 in the IELTS, or a 100 on the DET. An applicant with at least a 61 TOEFL or 6.0 IELTS can be considered for full admission and will take an English language placement test after arriving at the university. Placement test results determine whether students are required to take language support courses in the Academic English for International Students (AEIS) program. Students placed in AEIS courses also concurrently enroll in regular university credit courses.

Conditional admission. International applicants who do not meet the proficiency requirements above may be offered conditional admission if their academic record is otherwise strong for admission. Through the conditional admission program, the student can take courses through the Intensive English Program (IEP), then proceed to regular university credit courses once IEP requirements are satisfied.

More information about the American English Institute and AEIS and IEP courses may be found in the **Academic Resources** section of this catalog and on the institute's website (<http://aei.uoregon.edu>).

Application Procedure

International applicants for freshman or transfer admission must submit the following to the Office of Admissions:

1. A completed international application for admission and a nonrefundable application fee
2. Official transcripts of all schoolwork taken beyond the eighth year of school (i.e., the equivalent of the American secondary school grades 9–12 and for any college or university work). An official transcript is an original or a certified copy in a sealed envelope. (In most cases, international freshman applicants will instead self-report their high school transcript at the time of application; they will still be required to provide an official final transcript at the end of the process.)
3. An official test score report from one of the English proficiency tests described above
4. Proof of sufficient funds to pay one year's tuition and living expenses while at the University of Oregon, consisting of a bank statement or certificate of balance prepared within the last six months, or a scholarship letter. This proof is a requirement of the US government

Postbaccalaureate Admission

Students who have earned a bachelor's degree and want to earn a second undergraduate degree or to take additional work without entering a formal degree or certification program may be admitted with postbaccalaureate undergraduate status. These students pay appropriate undergraduate fees. Applications and information are available from the Office of Admissions.

Graduate Admission

Students planning to pursue graduate study at the university must be admitted to the Division of Graduate Studies and the departments in which they plan to study. General admission requirements for the Division of Graduate Studies are described in that section of this catalog. Each school and department in the university determines its specific requirements and application deadlines for graduate admission. For this reason, inquiries concerning graduate admission should be sent directly to the department or school of interest.

Notice to Nonresidents of the State of Oregon

Definitions

The following words and phrases mean:

(1) *"Domicile" is a person's true, fixed, and permanent home and place of habitation. It is the place where a person intends to remain and to which the person expects to return when the person leaves without intending to establish a new domicile elsewhere. In order to establish a domicile in Oregon, a person must maintain a predominant physical presence in Oregon for 12 consecutive months after moving to the state.*

(2) *A "financially independent person" is a person who, at the time of application for residency status:*

(a) *declares himself or herself to be financially independent;*

(b) *has not been claimed as a dependent during the immediately preceding tax year, and will not be claimed as a dependent during the current tax year, on the federal or state income tax returns of any other person; and*

(c) has not received in the immediately preceding calendar year, and will not receive during the current calendar year, one-half or more of his or her support, in cash or in kind, from another person or persons, except for support received from his or her spouse.

A "financially dependent person" is a person who, at the time of application for residency status:

(a) has been claimed as a dependent on the federal and state income tax returns of another person during the immediately preceding tax year; or

(b) is eligible to be claimed as a dependent for tax purposes and can provide evidence that one-half or more of the individual's financial support was provided by another person or persons.

Determination of Residence

(1) For purposes of admission and instruction fee assessment, the University of Oregon shall classify a student as an Oregon resident or nonresident. In determining resident or nonresident classification, the primary issue is a person's intent in coming to Oregon. Intent is inferred from a person's conduct and history as they relate to the requirements of these residency rules. If a person is in Oregon primarily for the purpose of obtaining an education, that person will be considered a nonresident. It is possible for an individual to qualify as a resident of Oregon for purposes of voting or obtaining an Oregon driver's license and not meet the residency requirements established by these rules.

(2) An Oregon resident is a financially independent person who, prior to the term for which Oregon resident classification is requested, has both:

(a) established and maintained a domicile in Oregon for 12 consecutive months; and

(b) during that period, has been primarily engaged in activities other than those of being a college student.

(3) A student may be considered primarily engaged in educational activities regardless of the number of hours for which the student is enrolled. However, a student who is enrolled for more than 8 hours in any semester or quarter during the 12-month period referred to in section (2) of this rule shall be presumed to be in Oregon for primarily educational purposes. Such period of enrollment shall not be counted toward the establishment of a bona fide domicile of 12 consecutive months in this state unless the student proves, in fact, establishment of a bona fide domicile in this state primarily for purposes other than educational.

(4) An Oregon resident is also a financially dependent person who is claimed as a dependent by another person who has both:

(a) established and maintained an Oregon domicile for 12 consecutive months; and

(b) during that period, has been primarily engaged in activities other than those of being a college student.

(5) A financially dependent person who is claimed as a dependent by another person who has not established and maintained an Oregon domicile shall be presumed to be a non-resident. This presumption may be overcome by evidence of the student's long-standing presence in Oregon and demonstration of other factors.

(6) The criteria for determining Oregon resident classification shall also be used to determine whether a person who has moved from Oregon has established a non-Oregon residence.

(7) If institution records show that the residence of a student or the person upon whom the student is dependent is outside of Oregon, the student shall continue to be classified as a nonresident until entitlement to resident classification is shown. The burden of showing that the residence classification should be changed is on the student requesting the change.

(8) Notwithstanding section (4) of this rule, a student who is financially dependent on a non-Oregon resident may nonetheless be considered an Oregon resident if the student resides in Oregon for at least 12 consecutive months with a parent or legal guardian who has both:

(a) established and maintained an Oregon domicile for 12 consecutive months; and

(b) during that period, has been primarily engaged in activities other than those of being a college student.

Residency Consideration Factors

(1) The following factors, although not necessarily conclusive or exclusive, have probative value in support of a claim for Oregon resident classification:

(a) Reside in Oregon for 12 consecutive months prior to the beginning of the term for which resident classification is sought and during that period be primarily engaged in activities other than those of a college student;

(b) Reliance upon Oregon resources for financial support;

(c) Domicile in Oregon of persons legally responsible for the student;

(d) Acceptance of an offer of permanent employment in Oregon; and

(e) Ownership by the person of his or her living quarters in Oregon.

(2) The following factors, standing alone, do not constitute sufficient evidence to effect classification as an Oregon resident:

(a) Voting or registration to vote;

(b) Employment in any position normally filled by a student;

(c) The lease of living quarters;

(d) Admission to a licensed practicing profession in Oregon;

(e) Automobile registration;

(f) Public records, for example, birth and marriage records, Oregon driver's license;

(g) Continuous presence in Oregon during periods when not enrolled in school;

(h) Ownership of property in Oregon or the payment of Oregon income or other Oregon taxes; or

(i) Domicile in Oregon of the student's spouse.

(3) Reliance upon non-Oregon resources for financial support is an inference of residency in another state.

Evidence of Financial Dependency

(1) In determining whether a student is financially dependent, a student must provide:

(a) Evidence of established domicile of the person claiming the student as a dependent; and

(b) The identification of the student as a dependent on the federal and state income tax returns of the person claiming the student as a dependent. Additional documentation to substantiate dependency during the current calendar year may be required at a later time if deemed necessary by the institution.

(2) A student who provides evidence that he or she is a financially dependent person under these rules shall not be required to establish a 12-month domicile prior to classification of resident status, provided such a student may not be classified as a resident while receiving financial assistance from another state or state agency for educational purposes.

Residence Classification of Armed Forces Personnel

(1) For purposes of this rule, members of the armed forces means officers and enlisted personnel of:

(a) The Army, Navy, Air Force, Marine Corps, and Coast Guard of the United States;

(b) Reserve components of the Army, Navy, Air Force, Marine Corps, and Coast Guard of the United States;

(c) The National Guard of the United States and the Oregon National Guard.

(2) Active members of the armed forces and their spouses and dependent children shall be considered residents for purposes of the instructional fee if the members:

(a) Reside in this state while assigned to duty at any base, station, shore establishment, or other facility in this state;

(b) Reside in this state while serving as members of the crew of a ship that has an Oregon port of shore establishment as its home port or permanent station; or

(c) Reside in another state or a foreign country and file Oregon state income taxes no later than 12 months before leaving active duty.

(3) An Oregon resident entering the armed forces retains Oregon residence classification until it is voluntarily relinquished.

(4) An Oregon resident who has been in the armed forces and assigned on duty outside of Oregon, including a person who establishes residency under section (2)(c) of this rule, must, within a reasonable time, demonstrate an intent to retain classification as an Oregon resident. Such intent may be shown by returning to Oregon within six months after completing service in the armed forces.

(5) A person who continues to reside in Oregon after separation from the armed forces may count the time spent in the state while in the armed forces to support a claim for classification as an Oregon resident.

(6) The dependent child and spouse of a person who is a resident under section (2) of this rule shall be considered an Oregon resident. "Dependent child" includes any child of a member of the armed forces who:

(a) Is under 18 years of age and not married, otherwise emancipated or self-supporting; or

(b) Is under 23 years of age, unmarried, enrolled in a full-time course of study in an institution of higher learning, and dependent on the member for over one-half of his/her support.

Residence Classification of Members of Oregon Tribes

(1) Students who are enrolled members of federally recognized tribes of Oregon or who are enrolled members of a Native American tribe which had traditional and customary tribal boundaries that included parts of the state of Oregon or which had ceded or reserved lands within the state of Oregon shall be assessed resident tuition regardless of their state of residence.

(2) For purposes of this rule, the federally recognized tribes of Oregon are:

(a) Burns Paiute Tribe;

(b) Confederated Tribes of Coos, Lower Umpqua and Siuslaw;

(c) Confederated Tribes of Grand Ronde Community of Oregon;

(d) Confederated Tribes of Siletz Indians of Oregon;

(e) Confederated Tribes of the Umatilla Indian Reservation;

(f) Confederated Tribes of the Warm Springs Indian Reservation;

(g) Coquille Indian Tribe;

(h) Cow Creek Band of Umpqua Indians;

(i) Klamath Tribes.

(3) For purposes of this rule, the Native American tribes which had traditional and customary tribal boundaries that included parts of the state of Oregon or which had ceded or reserved lands within the state of Oregon are:

(a) CALIFORNIA:

(A) Benton Paiute Tribe;

(B) Big Bend Rancheria;

(C) Big Lagoon Rancheria;

(D) Blue Lake Rancheria;

(E) Bridgeport Indian Colony;

(F) Cedarville Rancheria;

(G) Fort Bidwell Indian Tribe;

(H) Hoopa Valley Tribe;

(I) Karuk Tribe of California;

(J) Likely Rancheria;

(K) Lookout Rancheria;

(L) Lytton Rancheria;

(M) Melochundum Band of Tolowa Indians;

(N) Montgomery Creek Rancheria;

- (O) Pit River Tribe;
- (P) Quartz Valley Indian Community;
- (Q) Redding Rancheria;
- (R) Roaring Creek Rancheria;
- (S) Smith River Rancheria;
- (T) Susanville Rancheria;
- (U) Tolowa-Tututni Tribe;
- (V) Winnemucca Colony;
- (W) XL Ranch;
- (X) Yurok Tribe.
- (b) IDAHO:
- (A) Nez Perce Tribe of Idaho;
- (B) Shoshone-Bannock Tribes.
- (c) NEVADA:
- (A) Duck Valley Shoshone-Paiute Tribes;
- (B) Fallon Paiute-Shoshone Tribe;
- (C) Fort McDermitt Paiute-Shoshone Tribe;
- (D) Lovelock Paiute Tribe;
- (E) Pyramid Lake Paiute Tribe;
- (F) Reno-Sparks Indian Colony;
- (G) Summit Lake Paiute Tribe;
- (H) Walker River Paiute Tribe;
- (I) Winnemucca Indian Colony;
- (J) Yerington Paiute Tribe.
- (d) OKLAHOMA: Modoc Tribe of Oklahoma.
- (e) WASHINGTON:
- (A) Chehalis Community Council;
- (B) Colville Confederated Tribes;
- (C) Quinault Indian Nation;
- (D) Shoalwater Bay Tribe;
- (E) Yakama Indian Nation.
- (4) A student seeking to be assessed resident tuition under the provisions of this rule shall submit, following procedures prescribed by the OUS institution where the student seeks to enroll, a photocopy of tribal enrollment that documents tribal membership.

Residence Classification of Non-Citizens

A person who is not a citizen of the United States may be considered an Oregon resident if the person qualifies as a resident and is one of the following:

- (1) A lawful permanent resident. The date of receipt of an application for lawful permanent residency shall be the earliest date upon which the 12-month residency requirements may begin to accrue.
- (2) An immigrant granted refugee or political asylum in the United States, or entering through a special parole program (such as the Haitian Family Reunification Parole Program, the Cuban Family Reunification Parole Program, the Central American Minor Refugee/Parole Program, the Filipino World War II Veterans Parole Program). The date of receipt of an application for political asylum, refugee status, or qualifying special parole program shall be the earliest date upon which the 12-month residency requirements under Section B may begin to accrue.
- (3) A person holding one of the following non-immigrant visa classifications: A, E, G, H-1B, H-1C, the spouse or child of a person holding an H-1B or H-1C visa, I, K, L, NATO, O, R, S, T, TN, U, or V. The date of the issuance of a visa for one of these classifications shall be the earliest date upon which the 12-month residency requirements may begin to accrue. A person possessing a non-immigrant or temporary visa that is not identified under this rule shall not be considered an Oregon resident.
- (4) A person who is a citizen of an American territory or a sovereign nation that does not require a nonimmigrant visa to travel to the US.
- (5) An immigrant granted a federal status leading to the establishment of permanent residency or citizenship in the United States. Documentation of a status that is not explicitly included in this compact will be at the discretion of the Interinstitutional Residency Committee.

Changes in Residence Classification

- (1) If an Oregon resident student enrolls in an institution outside of Oregon and later seeks to re-enroll in a University that applies these residency standards, the residence classification of that student shall be re-examined and determined on the same basis as for any other person.
- (2) A student who becomes eligible for resident tuition during a term of enrollment at a University will not qualify for resident tuition until the beginning of the next term.
- (3) Once established, classification as a resident continues so long as the student remains in continuous academic year enrollment in the classifying institution.
- (4) A person who seeks classification as a resident under these rules shall complete and submit a notarized Residence Information Affidavit. The affidavit and all required supportive documents and materials must be submitted by the last day to register for the term in which resident status is sought.
- (5) No other institution is bound by any determination of residency except by duly authorized officials under procedures prescribed by these rules including timely submittal of the notarized affidavit.

Review of Residence Classification Decisions

An interinstitutional residency committee (IRC) is established consisting of the officers who determine student residence classification at each university that applies this residency procedure. The chair of the committee shall rotate among the universities with no chair serving

more than two consecutive years. A majority of the members of the committee shall constitute a quorum. A majority of a quorum may make recommendations.

Residence cases of unusual complexity, especially where there may be conflict of rules, may be referred to by the originating classification officer to the IRC for its recommendation.

Any person who is aggrieved by the originating classification officer's classification decision may, within 10 days of the date of mailing or other service of the classification decision, request that the IRC review the classification and make recommendations to the registrar or designee of the originating university. The appeal must be in writing and shall be filed with the originating university. An aggrieved person may supply written statements to the IRC for consideration in reviewing the case and may also make oral presentation to the IRC on a date to be scheduled by the IRC. The IRC shall make a recommendation to the registrar or designee of the originating university. That registrar or designee shall then issue a decision. The decision of the registrar or designee shall be final unless appealed.

A person dissatisfied with the decision of the registrar or designee may, within 10 days of the date of the mailing or other service of the decision, appeal the decision to the president or designee of the originating university. An appeal shall be in writing only. The decision of the president or designee shall be final.

A person granted a meritorious hardship exception to residency under the Oregon Administrative Rules regarding residency prior to July 1, 1990, shall not lose the exception solely because of the repeal of the exception authorization.

Registration and Academic Policies

Julia Pomerenk, University Registrar

541-346-2935
541-346-6682 fax
234 Oregon Hall
registrar@uoregon.edu

Student Records Policy

In compliance with the Family Educational Rights and Privacy Act, the University of Oregon has formulated the Student Records Policy to outline the proper handling and release of student educational records. The following is a summary of that policy.

The university maintains only student records relevant to the educational or related purposes of the university. Students enrolled in the university generally have the right to inspect educational records maintained by the university that directly affect them. Those records are not released to anyone other than the student without the signed, written consent of the student, with the following exceptions:

1. University personnel who have legitimate interests
2. Officials at another school where the student seeks to enroll or is already enrolled
3. At the direction of a court
4. In situations of health or safety emergency
5. The disclosure is information designated as directory information

Upon request, the university releases directory information about the student, but the student may request, in writing, that such information not be released. Contact the Office of the Registrar for details about making a request for nonrelease.

The full text of the Student Records Policy is available from the Office of the Registrar and on the registrar's website.

Academic Year

The university divides the academic year into three terms of approximately 11 weeks each (except for the School of Law, which uses a semester calendar).

The summer session supplements the work of the fall, winter, and spring terms; announcements are issued for that session.

Students may enter the university at the beginning of any term, with the exception of architecture students, who should see Application Deadlines under **Admissions**. The university's new-student orientation, IntroDUCKtion, is held in July and August for freshman and transfer students who enter fall term. All new students are urged to attend; students who do not attend IntroDUCKtion are oriented and register for classes during the Week of Welcome. See the **Academic Calendar** for other important dates during the current academic year.

Students are held responsible for familiarity with university requirements governing such matters as registration, add/drop deadlines, academic standards, student activities, student conduct, and organizations. Academic regulations are listed on the registrar's website.

About the UO Catalog

This publication, the 2022-23 University of Oregon Catalog, is a statement of university rules, regulations, and calendars that goes into effect at the opening of fall term 2022. Changes to the university curriculum that were made through winter term 2022 are reflected in the academic sections of the catalog. **Bachelor's Degree Requirements**, in this section of the catalog, have been updated to reflect curriculum changes that were made through spring term 2022.

A student who is admitted and enrolls at the university during any academic year may graduate under the general requirement provisions of the catalog in effect that year, provided the catalog has not expired. A student may choose to graduate under the general requirements of a subsequent catalog, provided he or she completes all of those requirements. Major requirements are determined by the academic departments and programs; requirements are subject to change for students who are not continuously enrolled. See Catalog Expiration and Requirements Policies in the **Reader's Guide to the Catalog** section for more information.

Undergraduate and graduate degrees and certificates are listed in the **Degrees, Majors, Minors, and Certificates** section of this catalog. For details about graduate degrees, see the **Division of Graduate Studies** section.

Grading Systems

The university has two grading systems. When regulations permit, a student may elect to be evaluated for a course with a letter grade or pass/no pass (P/N). Letter-graded work is designated A, B, C, D, or F. Pass/no pass work is designated P or N. An asterisk after the P or N indicates that the course is offered P/N only. See Bachelor's Degree Requirements for regulations on graded credits.

Each department, school, or special program establishes regulations on pass/no pass courses for its majors. Before exercising the P/N option, students should confer with advisors.

Students must choose their grading option at the time of registration and are permitted to change it only within the period allowed.

Students who register and never attend or participate in a course and students who attend and participate in part of the course but do not complete the course requirements will receive a grade of F or N, based on the grading option in registration.

Graded

Student work is graded as follows: A, excellent; B, good; C, satisfactory; D, inferior; F, unsatisfactory (no credit awarded). Instructors may affix + or – to the grades A, B, C, and D.

Pass/No Pass

Courses that are offered pass/no pass only are assigned P* or N* grades. Courses offered for letter grades or pass/no pass use P or N grades without an asterisk.

Student work may be graded as follows: P (pass), satisfactory performance (C– or better for undergraduate course work, B– or better for graduate course work), or N (no pass), unsatisfactory performance, no credit awarded (D+ or worse for undergraduate course work, C+ or worse for graduate course work). The class schedule designates courses that are offered only pass/no pass. Passing credits are also awarded for advanced placement and College-Level Examination Program work and for work taken at another collegiate institution when that institution has already recorded a pass/no pass mark or if the registrar's staff cannot equate the quality of the work to the UO grading system.

Marks

AU (Audit)

Student-initiated mark. Audit enrollments are recorded on the student's academic record, but no credit is earned by audit. Audited classes do not satisfy degree requirements, nor do they count toward the Division of Graduate Studies continuous enrollment requirement.

I (Incomplete)

A mark of "I" represents an agreement between an instructor and a student to extend the deadline for coursework completion. Incompletes shall be granted when the instructor determines that the student meets all the following criteria. The student:

- has been active in the course;
- is unable to complete a portion of the course requirements due to extenuating circumstances beyond their control that occurred after the last day to drop a class (end of week 7 of fall/winter/spring terms; variable dates for summer courses);

- is able to independently complete the remaining requirements without attending additional classes beyond the term or receiving additional instruction; and
- requests an Incomplete by the published deadline

If additional class attendance or instruction is required to complete course requirements, the instructor shall not issue an Incomplete.

Lack of engagement, poor performance, or a desire to repeat the course are unacceptable reasons for issuance of the "I" mark.

Instructors shall provide to the student access to course materials necessary to complete the missing work.

Incomplete grades can only be granted by instructors and instructors are under no obligation to grant students an incomplete grade if in their judgement the criteria stated above are not met.

An Incomplete shall not be recorded by the instructor unless a contract between the instructor and student has been completed and filed appropriately.

Effective fall 2022 - General Process for Incompletes

- Incompletes are initiated by the student
- Student contacts instructor and requests Incomplete by 5pm on the last day of finals week (fall, winter, and spring terms)
- If the instructor agrees that the student meets the criteria, the instructor and the student complete a contract outlining how the Incomplete can be resolved, the deadline for resolving the incomplete, and the default grade should the student not complete the agreed upon work. The default grade is the grade the student would receive according to the syllabus grade guidelines with no credit for the missing work
- This form is filed
- The missing work indicated on the form must be completed by the earlier of:
 - grading deadline of the term the student applied to graduate, or
 - deadline stated on the Incomplete Request Form (can be extended at the discretion of the instructor), or
 - the day grades are due one academic year later

For students with Incomplete contracts, the instructor will record the "grade" in DuckWeb that indicates an Incomplete has been agreed to. Currently, that is an "I". The instructor will also record, in DuckWeb and/or the contract form, the grade the student would have received in the course if they received no credit for the missing work. This becomes the default grade that replaces the Incomplete mark should the student not complete the work outlined in the contract by the appropriate deadline (either the grading deadline of the term the student applied to graduate or the day grades are due one academic year later).

If the student completes the work defined in the contract by the agreed upon date, the instructor calculates and updates the grade via the grade change process.

This policy applies to all undergraduate and graduate courses.

The Incomplete mark will roll to the default grade even if an incomplete contract is in place if the student has applied to graduate. Degree application status is not directory information; instructors do not have a way to verify.

A mark of I/F will not convert to N as part of First Term Forgiveness. It will instead convert to an F.

Incompletes Assigned to Graduate Students

Graduate students must convert incompletes within one calendar year of the assignment of the incomplete. Students may request additional time for the removal of the incomplete by submitting a petition stating the course requirements that were not initially completed, with the instructor's signature, to the dean of the Division of Graduate Studies for review. This policy does not apply to incompletes routinely assigned to courses applying to the completion of research (601) and terminal or master's projects (609, 709, AAAP 611 (<https://catalog.uoregon.edu/search/?P=AAAP%20611>), ARCH 619 (<https://catalog.uoregon.edu/search/?P=ARCH%20619>), BA 740 (<https://catalog.uoregon.edu/search/?P=BA%20740>), CRES 611 (<https://catalog.uoregon.edu/search/?P=CRES%20611>), IARC 611 (<https://catalog.uoregon.edu/search/?P=IARC%20611>), LA 699 (<https://catalog.uoregon.edu/search/?P=LA%20699>), and LT 611 (<https://catalog.uoregon.edu/search/?P=LT%20611>)).

Accumulation of more than 7 credits of Incomplete is considered unsatisfactory. More information about satisfactory academic progress requirements is available on the Division of Graduate Studies website.

For students graduating, removal of incompletes awarded must be submitted on DuckWeb no later than the Friday following exam week of the graduating term. Grade changes must be submitted no later than 30 days after the degree is awarded. Incompletes will remain on the academic record after the degree is awarded and cannot be removed.

W (Withdrawal)

Student-initiated mark. Students may withdraw from a course through web registration. See the online class schedule for deadlines.

X (No Grade Reported)

Registrar-initiated mark. The instructor did not report a grade for the student.

Y (No Basis for Grade)

Instructor-initiated mark used prior to fall 2017. There is no basis for evaluating the student's performance.

Effective fall 2017, the Y mark is no longer used. Instructors issue a grade of F or N, as indicated by the grading option, to students who register and never attend or participate in the course, and to students who attend and participate in part of the course but do not complete all course requirements.

First-term Grade Forgiveness

Effective fall 2020, the grading option for first-term students who receive an F in a course will automatically be converted from graded to pass/no pass. First-term students who receive a D will have until the end of the following term (defined as 11:59 pm PT Friday of the 10th week for Fall, Winter, Spring and 11:59 pm PT Friday of the 11th week of the final 12-week summer session) to request that their grading option be converted from graded to pass/no pass. Students are required to meet with an advisor designated by the Office of Academic Advising before submitting a request to have D grades change to N and are encouraged to connect with a Financial Aid counselor.

Eligible students whose F is converted to N may, at their discretion, opt out of the policy and request that the Office of the Registrar convert the

grade back to F by the end of the following term. Academic standing will be based on the F grade.

This policy applies to:

- All matriculated first-term admitted undergraduate students pursuing their first bachelor degree, including transfer students.
- All undergraduate classes taken by those students that allow the Pass/No Pass grading option. Classes where the student's grade is associated with a conduct case where the student was found responsible will not be eligible to change to an N under this policy.

For students who receive a D, academic standing will initially be calculated using the letter grade but will be recalculated using the P/NP grade if the student requests the grading option change before the end of the following term.

For students who receive an F, academic standing will be calculated using the P/NP grading option.

Students who receive an F will have the change to Pass/No Pass made by the Office of the Registrar before calculation of academic standing for the term. Any other changes to grading mode made under this policy will result in a recalculation of academic standing for the term if the Office of the Registrar receives the request from the student prior to the end of the following term. That recalculation will be based on grades recorded for the student at the time the change takes place irrespective of whether any other grade changes were related to this policy.

F grades that are recorded after the grading deadline will not automatically convert to an N; students who wish to request such a change will need to submit a petition for a late grade option change.

A mark of I/F will not convert to N as part of First Term Forgiveness. It will instead convert to an F.

A student's record (grades, grade option, academic standing) will not be altered under this policy after the end of the following term. A student whose grade changes for other reasons (petitions to change grade option, instructor change, etc.) will not have their academic standing recalculated.

Students whose grade is updated as a result of this policy will be required to meet with an advisor designated by the Office of Academic Advising before the end of the following term. It is strongly recommended that if students are receiving veteran's benefits, they also meet with a veteran's certifying official in the Office of the Registrar.

Grade Point Average

For terms prior to fall 2016, grades for courses taken at the University of Oregon appear on both the official and unofficial transcript and are included in the term and cumulative GPA calculation.

Effective fall 2016 through summer 2019, for undergraduate courses not designated as repeatable for credit, only the second grade earned of a repeated course is calculated into the cumulative GPA.

Effective fall 2019, all graded attempts of courses taken at the University of Oregon are calculated into the term and cumulative GPAs.

Grades for undergraduate courses taken at the University of Oregon appear on both the official and unofficial transcript. However, credit for nonrepeatable courses is given only once.

Grades recorded as a result of sanctions and/or academic misconduct are included in the cumulative GPA and will not be excluded in any event of repetition. Conduct grades may not be petitioned.

Four points are assigned for each credit of A, three points for each credit of B, two points for each credit of C, one point for each credit of D, and zero points for each credit of F. The plus sign increases the points assigned the letter grade by 0.3 per credit, and the minus sign decreases the points assigned the letter grade by 0.3 per credit. The grade point average is calculated by dividing total points by total credits of A, B, C, D, and F. Marks of AU, I, W, X, Y, and the grades of P and N are disregarded in the computation of the grade point average. The grade point average is truncated at two digits after the decimal point.

Academic Standing

When there is evidence of lack of satisfactory progress toward meeting graduation requirements, the Scholastic Review Committee may place students on academic probation or disqualify them from attendance at the university. For information and assistance, students should inquire at the Office of Academic Advising, 101 Oregon Hall.

After grades are processed at the end of each term, term and cumulative UO GPAs are calculated for each undergraduate student, admitted or nonadmitted. A student's academic standing is based on attempted and earned hours and on the term and cumulative UO GPAs.

If a grade change affects the student's term and cumulative UO GPAs and academic standing, the student should ask the instructor to submit the grade change through DuckWeb immediately. Retroactive changes to a term's academic standing are made only to remove probation from the term record and only if grade changes are submitted by the last day to register and add classes for the following term. If grade changes that affect GPAs and academic standing are submitted later than this, the student's probation standing for the previous term is not amended.

Academic Warning

Students receive an academic warning when the UO term GPA is between 0.00 and 1.99, inclusive, even if the UO cumulative GPA is 2.00 or higher. This notation is not recorded on the student's official academic transcript, but does appear on the unofficial transcript. Terms with marks resulting in no GPA are considered to be below 2.00 unless all attempted credits for that term were passed. Students who completely withdraw from a term with W marks receive a 0.00 term GPA, and are thus subject to academic warning, probation, and/or disqualification.

Academic warning is given as a courtesy to advise students of potential academic difficulty. Academic probation does not depend on the student receiving prior notice of academic warning.

Academic Probation

Academic probation is earned and the notation "Academic Probation" is recorded on the student's academic transcript whenever the following conditions exist:

1. When the UO cumulative GPA is lower than 2.00. Students who have earned 44 or fewer credits are allowed two terms of probation before they are subject to disqualification. Students with more than 44 credits are only allowed one term of probation before they are subject to disqualification. Students on academic probation whose UO cumulative GPA is lower than 2.00 and whose UO term GPA is 2.00 or higher remain on academic probation

2. When students have received academic warning for two consecutive terms and their subsequent UO term GPAs are between 0.00 and 1.99, inclusive, even if the UO cumulative GPA is above a 2.00. Terms with marks resulting in no GPA are considered to be below 2.00 unless all attempted credits for that term were passed. Students who completely withdraw from a term with W marks receive a 0.00 term GPA, and are thus subject to academic warning, probation, and/or disqualification

Students on academic probation are limited to a study load of no more than 15 credits. Incoming students may be admitted on academic probation and are notified when such action has been taken; these students may be subject to disqualification after a single term of probation.

Academic Disqualification

Academic disqualification is earned and the notation "Disqualification" is recorded on the student's academic transcript whenever the following conditions exist:

1. Students on academic probation for having a UO cumulative GPA lower than 2.00 who earn a UO term GPA lower than 2.00 in their next term
2. Students on academic probation for having a term GPA below 2.00 after two consecutive terms on academic warning and who earn less than a 2.00 term GPA for the fourth consecutive term. Terms with marks resulting in no GPA are considered to be below 2.00 unless all attempted credits for that term were passed. Students who completely withdraw from a term with W marks receive a 0.00 term GPA, and are thus subject to academic warning, probation, and/or disqualification

Students may apply for reinstatement after disqualification by contacting the Office of Academic Advising. Petitions are reviewed to determine the probability that a student can satisfactorily complete the requirements of a degree program. The student may enroll during the academic year only if the Scholastic Review Committee allows the student to continue on probationary status. Students may enroll for summer classes without being reinstated. Students who have been disqualified must petition for reinstatement to graduate.

Exceptions to Academic Regulations

1. Two standing university committees review requests in writing for exceptions to university rules, regulations, deadlines, policies, and requirements: the Academic Requirements Committee and the Scholastic Review Committee. For information about how to submit a petition to the Academic Requirements Committee, inquire at the Office of the Registrar, 234 Oregon Hall; call 541-346-2935. For information about how to submit a petition to the Scholastic Review Committee, inquire at the Office of Academic Advising, 101 Oregon Hall; call 541-346-3211
2. For information about removal from academic probation and academic reinstatement options, inquire at the Office of Academic Advising

Registering for Classes

Class Schedule

The class schedule is published online two weeks prior to priority registration each term. The schedule lists courses offered for the term.

Dates, deadlines, procedures, and information about tuition and fees can be found on the registrar's website.

Registration

A registration period takes place before the start of classes each term; the dates are published in advance. Students are not officially registered and are not entitled to attend classes until they have completed the prescribed registration procedures. Students must minimally be registered for "audit" to sit in on classes.

Once registered, students are academically and financially responsible for their course enrollments until they officially withdraw. Withdrawal after the term begins results in some financial liability. Appropriate withdrawal procedures are explained on the registrar's website.

New Student Registration

Entering undergraduate students should plan to attend IntroDUCKtion, offered during the summer. After being notified of admission to the University of Oregon for fall term, new students receive information about this program. Space is limited, so sign up early. IntroDUCKtion is a requirement for all new students. Students admitted in terms other than fall term will attend an orientation session specific to the term for which they are admitted. Additional information is available on the Student Orientation (<https://orientation.uoregon.edu/introducktion/>) website.

Reenrollment

Admitted undergraduate students who plan to register any time during an academic year after an absence of four or more terms, not including summer session, must notify the Office of the Registrar by filing a reenrollment form, available on the registrar's website.

Reenrollment procedures for graduate students are described in the **Division of Graduate Studies** section of this catalog.

Summer Session

- Non-degree seeking (CEP) students planning to register for summer session should file the registration eligibility form, provided on our website (<https://registrar.uoregon.edu/non-degree-seeking/>). Non-degree seeking students who were enrolled within the prior year do not need to submit this form.
- Admitted undergraduate or graduate students may register without making any special request, subject to the normal reenrollment policies for their student level.
- Disqualified undergraduate students must file a reenrollment form if they have not enrolled during the preceding academic year.

Transcripts

Students are required to send official transcripts to the Office of the Registrar for any academic work taken at other institutions while completing their baccalaureate degree program. A student's official UO academic record must be kept complete at all times. Exceptions are made only for special and provisional students who are formally admitted under individual arrangements, and for summer transient and community education students who are not formally admitted. Failure to file required records can result in the cancellation of admission or registration; disciplinary action may be initiated and sanctions may be imposed by the university.

Nonrepeatable Courses

Undergraduate students may not (without prior approval by the Academic Requirements Committee) register for nonrepeatable courses in which

they are currently enrolled or for which they have already earned a Pass or C or better at the UO or from a transferring institution. Students may register for a nonrepeatable course for which they have already earned a No Pass or C– or less at the UO or from a transferring institution without prior approval, but not more than three times in total. All attempts are counted toward this limit. Credits for nonrepeatable courses are awarded only one time. All graded attempts of repeated courses taken at the UO are calculated into the term and cumulative GPAs. Additional information is available on the registrar's website.

Regression

Some courses build on one another. Regression occurs when a student takes a course that is at a lower level than a course the student has previously passed. General Limitation number 11 states *Student may not receive credit for courses that are designated by the department as regressive prerequisites for courses in which they are currently enrolled or have already received credit.*

Academic departments have the authority to designate courses as regressive. Information about the specific order in which courses must be taken and about course regression can be found on this website: <https://registrar.uoregon.edu/regression> (<https://registrar.uoregon.edu/regression/>). **Students do not earn credit for regressive courses.**

Alternate Ways to Earn Credit

The university has established programs through which students may earn credit toward graduation and, at the same time, decrease the cost and time required for standard undergraduate study. Brief descriptions of these programs appear below. Additional information is available from the Office of the Registrar.

Advanced Placement

Students who receive satisfactory grades in advanced placement examinations administered by the College Board may, on admission to the university, be granted credit toward a bachelor's degree in comparable university courses. Information about credit awarded and scores required is available from the registrar's website.

College-Level Examination Program

For some courses, departments have authorized the use of subject examinations prepared by the College-Level Examination Program (CLEP). Examinations are available, for example, in calculus, chemistry, economics, French, German, literature, Spanish, and sociology. Once a student is admitted to the university, it accepts as transfer credit the successful completion of CLEP subject examinations by students. More information is available online on the registrar's website (<http://registrar.uoregon.edu/current-students/alternative-ways-to-earn-credit/>) and at testing.uoregon.edu (<http://testing.uoregon.edu>).

Community Education Program

Individuals who want to enroll for 8 credits or fewer per term in university courses without formally applying for admission may do so through the Community Education Program. Part-time students of all ages choose from a variety of courses. More information is available at the Academic Extension office located at the Baker Downtown Center, 975 High St., Suite 110, 541-346-5614.

Credit by Examination

Credit by examination allows formally admitted undergraduate students to challenge undergraduate university courses by successful completion

of the exam. Course registration is not needed. Students seeking to receive credit by examination must be registered for the term in which the exam is given. Credit by examination may be earned only in courses whose content is identified by the title in the University of Oregon catalog. Students should first contact their department or advisor to determine the eligibility for credit by examination. Students must obtain faculty and department approvals before the exam can be scheduled. If eligible, the department approval form and instructor results form are available on the Office of the Registrar's website. Students are billed an examination fee of \$25 per credit hour..

Successful credit by examination is shown as transfer credit on the UO transcript and may be recorded as a pass (P) or graded (A, B, C, D), consistent with the options listed in the class schedule. Credit by examination may not be counted toward the satisfaction of the graduation residency requirement or for fulfillment of the requirement to complete 45 credits graded A, B, C, D at the University of Oregon. However, credit by examination may be counted toward the requirement to complete 168 credits graded A, B, C, D, P* from all institutions attended.

The following are not available for credit by examination:

- Courses numbered 0–99; Field Studies (196); Workshop, Laboratory Projects, or Colloquium (198); Special Studies (199); courses numbered 200 or 399–410
- First-year second-language courses
- 100-level mathematics courses and MATH 211, MATH 212, MATH 213
- English composition courses (WR 121, WR 122, WR 123)
- An elementary language course taught in the student's native language
- A course for which a CLEP examination is available
- A course that substantially duplicates credit already earned
- A course that is more elementary in nature than credit already earned
- A course in which the student is already enrolled for credit
- A course for which the student has received a grade of A, B, C, D, P, P*, I, X, or Y
- A course for which the student has already taken and failed an examination for credit

Contact the Office of the Registrar for more information.

International Baccalaureate

Students who receive satisfactory grades in International Baccalaureate examinations may, on admission to the university, be granted credit in comparable university courses toward a bachelor's degree. Credit can be earned, for example, in art, biology, business, chemistry, Chinese, computer science, economics, English, French, German, history, geography, Japanese, Chinese, mathematics, music, physics, psychology, social and cultural anthropology, Spanish, Swedish, and theater arts. A complete list of university credit earned by International Baccalaureate examinations is available from the registrar's website.

Military Credit

The university generally grants credit for military education experiences as recommended by the American Council on Education's *Guide to the Evaluation of Educational Experiences in the Armed Services*, and in accordance with University of Oregon policies regarding transfer credits. Students may request evaluation of credits earned through the Community College of the Air Force, Defense Language Institute, or military education. Students must submit official copies of college

transcripts or a Certificate of Completion from the Defense Language Institute. An official copy of the student's DD Form 214, DD Form 295, or a Joint Services Transcript (JST) is required for military credit.

Bachelor's Degree Requirements

To earn a University of Oregon bachelor's degree, students must satisfy the following requirements.

University Requirements

Credits

The bachelor of arts, bachelor of science, bachelor of education, bachelor of fine arts, bachelor of music, and bachelor of music in music education degrees require a total of 180 credits with passing grades. The bachelor of landscape architecture requires a total of 220 credits. The bachelor of interior architecture requires a total of 225 credits, and the bachelor of architecture requires a total of 231 credits.

Concurrent Degrees

Concurrent degrees are awarded under the following conditions:

1. The second degree may be offered by the same school or college
2. The student completes the departmental requirements for each major
3. The student completes the core education requirements (formerly the general-education requirements) for each degree
4. The student completes a minimum of 36 credits at the UO beyond those required for the degree that has the highest credit requirement
5. The student applies for the first degree on DuckWeb and submits a request to the Office of the Registrar for the second degree

Students are able to receive concurrent degrees from the same college or school when one of the majors is restricted to one degree.

Academic Major

All bachelor's degrees must be awarded with a major. Minimum requirements are 36 credits in the major, including 24 in upper-division work. Specific requirements are listed under individual departments.

A student may be awarded a bachelor's degree with more than one major by completing the general university degree requirements for the designated majors and degree and all requirements in each major as specified by the major departments, schools, or colleges.

Declaring a Major (First-Time, Full-Time Freshman Students)

1. Undergraduates who matriculated into the UO as first-time, full-time freshmen, should declare a major by the end of the fourth week of their sixth term of enrollment (typically spring term of the second year at Oregon)
2. Students who have not declared a major by the end of the fourth week of the sixth term of enrollment will need to see an advisor and receive a personal identification number (PIN) before they can register for the next term's classes. Advisors can either assist students in choosing a major or grant an exception and help students develop a plan to declare a major

Declaring a Major (Transfer Students)

1. Transfer students should declare a major by the end of the fourth week of the third term of enrollment at Oregon

- Transfer students who have not declared a major by the end of the fourth week of the third term of enrollment at the UO will need to see an advisor and receive a PIN before they can register for the next term's classes. Advisors can either assist students in choosing a major or grant an exception and help students develop a plan to declare a major

Academic Minor

Unless specified by a particular department, a minor is not required for a bachelor's degree. Students choosing to complete a minor must earn a minimum of 24 credits, including 12 in upper-division work. Minor requirements, including residency, are listed under department headings. A minor may be awarded only at the time a bachelor's degree is conferred.

Upper-Division Work

A minimum of 62 credits in upper-division courses (300 level or higher) are required.

Residency

After completing 120 of the 180 required credits, 160 of the 220 required credits, 165 of the 225 required credits, or 171 of the 231 required credits, each student must complete at least 45 credits of UO courses in residence at the university.

Total Credits of A, B, C, D, P*

Students must earn 168 transfer or University of Oregon credits with grades of A, B, C, D, or P*. Credits earned in courses offered only pass/no pass use the P* designation.

UO Credits of A, B, C, D

A minimum of 45 credits graded A, B, C, or D must be earned at the University of Oregon. Courses required in the major and designated in the class schedule as pass/no pass (P/N) only may be counted toward the 45-credit requirement only if the 168-credit requirement has been satisfied.

Satisfactory Work

Graduation from the university requires a minimum UO cumulative grade point average of 2.00.

Written English

Two courses (College Composition I (WR 121) and either College Composition II (WR 122) or College Composition III (WR 123) or equivalents) passed with grades of C– or better or P are required for all undergraduate degrees. For placement, prerequisites, or exemption, see policies in the **English** section of this catalog.

Requirements for Bachelor of Arts and Bachelor of Science

Students must choose to graduate with a specific degree and major (for example, bachelor of arts with a major in chemistry or bachelor of science with a major in chemistry). See degrees listed in the **Degrees, Majors** (p. 42), **Minors** (p. 43), and **Certificates** (p. 46) section of this catalog.

Bachelor of Arts Requirements

The bachelor of arts (BA) degree requires proficiency in a second language. The second-language requirement may be met in one of the following ways:

- Completion of at least the third term, second year of a second-language course taught in the language, with a grade of C– or better or P
- Satisfactory completion of an examination administered by the appropriate language department, showing language proficiency equivalent to that attained at the end of two years of college study
- For students whose native language is not English: provide a final official high school transcript to the Office of the Registrar as evidence of formal training in the native language and completion of College Composition I (WR 121) and either College Composition II (WR 122) or College Composition III (WR 123) with grades of C– or better or P. Students who graduate from a US high school are not eligible to receive the BA Language waiver.
- Students may fulfill the UO second-language requirement by taking the all three courses in the year-long sequence in Old English (ENG 428, ENG 429, ENG 430) and by achieving a B- or higher in ENG 430. The sequence must be taken in order, since ENG 428 is a prerequisite for ENG 429, which is a prerequisite for ENG 430.

Bachelor of Science Requirements

The bachelor of science (BS) degree requires proficiency in mathematics or computer science or a combination of the two. The requirement may be satisfied in one of the following ways, depending on the student's experience in mathematics. Courses must be completed with grades of C– or better or P.

- Students with a limited background in mathematics can complete the requirement with any of the combinations of three courses listed below. Inquire with your advisor for other possible combinations.

Code	Title	Credits
Option 1		
Select three of the following:		12
MATH 105	University Mathematics I	
MATH 106	University Mathematics II	
MATH 107	University Mathematics III	
MATH 111	College Algebra	
MATH 243	Introduction to Methods of Probability and Statistics	
	or MATH 425	
	Statistical Methods I	
CS 111	Introduction to Web Programming	
CS 122	Introduction to Programming and Problem Solving	
Option 2*		
MATH 211	Fundamentals of Elementary Mathematics I	4
MATH 212	Fundamentals of Elementary Mathematics II	4
MATH 213	Fundamentals of Elementary Mathematics III	4
*Recommended for Educational Foundations majors only		

2. Students who placed above the College Algebra (MATH 111) level on the mathematics placement test may complete MATH 112 or MATH 241 and one of the following:

Code	Title	Credits
MATH 105	University Mathematics I	4
MATH 106	University Mathematics II	4
MATH 107	University Mathematics III	4
MATH 243	Introduction to Methods of Probability and Statistics	4
or MATH 425	Statistical Methods I	
CS 111	Introduction to Web Programming	4
CS 122	Introduction to Programming and Problem Solving	4

*A student can satisfy this requirement by taking both MATH 112 and MATH 241.

3. Students who have College Algebra (MATH 111) skills and an additional prerequisite course or appropriate skills may complete the requirement with one course chosen from the following:

Code	Title	Credits
MATH 231	Elements of Discrete Mathematics I	4
MATH 242	Calculus for Business and Social Science II	4
MATH 246	Calculus for the Biological Sciences I	4
MATH 251	Calculus I	4
MATH 261	Calculus with Theory I	4
MATH 281	Several-Variable Calculus I	4
CS 210	Computer Science I	4

Areas of Inquiry Requirements

To promote educational breadth, bachelor's degree candidates are required to complete work in each of three areas representing comprehensive fields of knowledge: arts and letters, social science, and science. Approved area-satisfying courses must be at least 3 credits each.

Students may use a maximum of 3 courses that have the same subject code(s) as their primary major (e.g. MUS, MUJ for music majors) to simultaneously count for both a student's major requirements and Areas of Inquiry requirements.

The current list of area-satisfying courses is available online at registrar.uoregon.edu/group_courses (http://registrar.uoregon.edu/group_courses/).

"Double-Dipping" Restriction

Students may not use courses that fulfill the second-language requirement for the bachelor of arts degree to fulfill the arts and letters area requirement. Courses used to demonstrate proficiency in mathematics or in computer science or in a combination of the two for the bachelor of science degree may not also be used to fulfill the science area requirement.

Areas of Inquiry Requirements for Specific Degrees

1. **Bachelor of Arts or Science.** Students must complete a minimum of 45 credits—15 of those credits in approved area-satisfying courses in each of three general-education areas: arts and letters, social

science, and science. Each area must include coursework in two different subject codes. No more than three courses with the same subject code may be used to fulfill the 45-credit requirement.

2. **Bachelor of Architecture, Education, Fine Arts, Interior Architecture, Landscape Architecture, Music, or Music in Music Education.** Students must complete a minimum of 36 credits—12 of those credits in approved area-satisfying courses in each of three general-education areas: arts and letters, social science, and science. Each area must include coursework in two different subject codes. No more than three courses with the same subject code may be used to fulfill the total 36-credit requirement.

Substituting a Minor or Second Major

Some minors or second majors may be used to satisfy part of one area requirement. Students should consult their advisors or the Office of the Registrar for more information.

Cultural Literacy Requirements

United States: Difference, Inequality and Agency

These courses develop students' analytical and reflective capacities to help them understand and ethically engage with the ongoing (cultural, economic, political, social, etc.) power imbalances that have shaped and continue to shape the United States. In addition to considering the scholarship, cultural production, perspectives, and voices from members of historically marginalized communities, students in DIA courses:

- Inquire into intersecting aspects of identity such as race, gender, gender identity, sexuality, socioeconomic status, indigeneity, national origin, religion, or ability;
- Analyze uses of power to marginalize on the basis of identity, as well as the assertions of agency, resistance, and resilience by marginalized groups; and
- Examine historical and contemporary structures, forms of knowledge, cultural practices, or ideologies that perpetuate or change the distribution of power in society.

and undertake one or more of the following:

- Reflect on one's own multiple social identifications and on how they are formed and located in relation to power.
- Practice respectful listening and ethical dialogue around deeply felt or controversial issues.

Global Perspectives

These courses foster a student's encounter with and critical reflection upon cultures, identities, and ways of being in global contexts beyond the United States. Students will consider substantial scholarship, cultural production, perspectives, and voices from members of communities under study, as sources permit. Global Perspectives courses, students will do one or more of the following:

- Engage texts, literature, art, testimonies, practices, or other cultural products that reflect systems of meaning or beliefs beyond the U.S. context;
- Analyze power relations involving different nations, peoples, and identity groups or world regions;
- Examine hierarchy, marginality, or discrimination based on race, ethnicity, gender, gender identity, religion, sexuality, nationality, or ability (or some combination of these).

and undertake one or more of the following:

- Discuss possibly unfamiliar topics using critical vocabulary and concepts.
- Practice respectful listening and civil dialogue around controversial issues.

Study-abroad programs that are ten weeks or longer automatically satisfy this requirement. Programs between five and nine weeks in duration may qualify if specific criteria are met. Contact Global Education Oregon (<http://geo.uoregon.edu/>) for further information.

Bachelor's degree candidates must complete one course in each of the two categories listed above; a minimum of 6 credits in approved courses must be earned.

The current list of courses that satisfy these requirements are available online at registrar.uoregon.edu/group_courses (http://registrar.uoregon.edu/group_courses/).

General Limitations

1. A total maximum of 124 credits may be transferred from domestic, regionally accredited junior or community colleges and from international junior or technical colleges. Of the total maximum of 124 credits, only 90 credits may be transferred from an international junior or technical college.
2. A maximum of 48 credits in law, medicine, pharmacy, chiropractic medicine, dentistry, technology, or any combination may be used toward fulfilling total credit hours for the BA or BS degree.
3. A maximum of 24 credits may be used toward fulfilling total credits in the following areas with not more than 12 credits in any one area:
 - a. Lower-division professional-technical courses;
 - b. Physical education activity, military science activity (e.g., MIL 131 and 331), and dance activity (DANC) courses, except for dance activity courses for majors in dance;
 - c. Music lessons (in subject MUP), except for majors in music;
 - d. Applied and/or experiential courses, academic support skills courses, nonacademic field experience courses, or career and professional development courses.
4. For music majors, a maximum of 24 credits in music lessons (in subject code MUP), may count toward requirements for the BA or BS degree.
5. For dance majors, a maximum of 36 credits of DANC may count toward requirements for the BA or BS degree.
6. University of Oregon academic records are sealed thirty days after the official conferral date of a degree. After this date, changes to majors and minors, addition of departmental honors, removal of incompletes, grade changes, or other changes to an academic record cannot be made.
7. When the University awards credits for Advanced Placement Program (AP), International Baccalaureate Program (IB), Cambridge Examination Program, the College-Level Examination Program (CLEP), and credit by examination (course challenge), these credits are counted toward the satisfaction of bachelor's degree requirements--except residency and the 45 UO credits graded A,B,C,D. When the university grants credit for AP, IB, Cambridge, and CLEP examinations, pass (P*) credit is granted.
8. For limitations related to repeated courses please refer to *UO Policy on Repeatable and Non-repeatable Undergraduate Courses*.

9. Students may not receive credit for any course assessed as having substantially similar content as a course for which they have already received credit.
10. Students may not receive credit for courses beneath their assessed competency level. Competency level can be assessed by various means such as placement scores, faculty/departmental assessment, etc.
11. Student may not receive credit for courses that are designated by the department as regressive prerequisites for courses in which they are currently enrolled or have already received credit.
12. Students must have degree-seeking status in order to earn an undergraduate major, minor or certificate; undergraduate majors, minors and certificates must be completed at the time the degree is awarded.

Second Bachelor's Degree

A student who has been awarded a bachelor's degree from an accredited institution may earn an additional bachelor's degree at the University of Oregon. The student must satisfactorily complete all departmental, school, or college requirements for the second degree. Of these requirements, the following must be completed after the prior degree has been awarded:

1. The student must complete an additional 36 credits at the university as a formally admitted student if the prior bachelor's degree was awarded by the University of Oregon, or an additional 45 credits at the university if the prior bachelor's degree was awarded by another institution
2. A minimum cumulative UO GPA of 2.00 in courses taken for the second bachelor's degree is required for the second bachelor's degree
3. A minimum of 18 credits must be graded A, B, C, D if the prior bachelor's degree was earned at the University of Oregon, or 23 credits if at another institution
4. At least 27 credits from coursework within the major must be completed after the conferral of the most recent bachelor's degree
5. The bachelor of Arts degree requires proficiency in a second language. Students whose native language is not English may satisfy this requirement by providing a final official high school transcript to the Office of the Registrar as evidence of formal training in the native language and satisfactorily completing College Composition I (WR 121) and either College Composition II (WR 122) or College Composition III (WR 123). The bachelor of science degree requires proficiency in mathematics and/or computer science

Bachelor's Degree with Honors

Information about Latin honors, academic honors, and honor societies is listed in the **Honors and Awards** section of this catalog. Fellowship and scholarship information is in the Student Financial Aid and Scholarships (p. 32) and departmental sections of this catalog.

Oregon Transfer Module

The Oregon Transfer Module (OTM) provides a one-year curriculum for students who plan to transfer to a state of Oregon community college or another Oregon public university. The module allows students to complete one year of general-education foundation course work that is academically sound and readily transferable within Oregon. Although the OTM is not a certificate or degree, it documents that students have met

a subset of common general-education requirements at all Oregon two- and four-year public institutions of higher education.

Any student holding an Oregon Transfer Module that conforms to the guidelines will have met the requirements for the Transfer Module at any Oregon community college or Oregon public university. Upon transfer, the receiving institution may specify additional course work that is required for a major, degree requirement, or to make up the difference between the Transfer Module and the institution's total general-education requirements.

Transferring to the University of Oregon with an OTM

Students transferring to the University of Oregon with an OTM from another institution will have completed 45 credits of the university's general-education requirements.

Earning an OTM at the University of Oregon

To receive an OTM at the University of Oregon, students must complete a minimum of 45 credits—12 in residence at the UO—in foundational skills (writing, oral communication, and mathematics) and introduction to the disciplines (arts and letters, social sciences, and sciences). All courses must be completed with a grade of C– or better and students must have a minimum cumulative GPA of 2.00 at the time the OTM is posted on the transcript.

Application for an Undergraduate Degree

Undergraduates who plan to receive a bachelor's degree from the University of Oregon must submit an application through DuckWeb, the university's online information system, by the fourth Sunday of the anticipated term of graduation.

The Office of the Registrar encourages students to apply to graduate the term preceding their graduation term. This allows students to plan or change their final term's course schedule to ensure completion of all requirements.

Students who have been academically disqualified must petition for reinstatement to the Scholastic Review Committee to graduate. Students who are out of status due to suspension or expulsion cannot be awarded a degree until they are officially back in status with the university.

All grade changes, removals of incompletes, UO study abroad course work, and transfer work necessary for completion of degree requirements must be on file in the Office of the Registrar by the Friday following the end of the term of graduation. Academic records are sealed thirty days after the conferral of a degree; no changes to the record will be made following that date.

Students who do not apply to graduate will not receive retroactive degrees even if degree requirements were completed at an earlier date.

Applications for graduate degrees are available from the Division of Graduate Studies.

Tuition and Fees

Kelly Wolf, Associate Vice President Business Affairs and Controller
541-346-3170
Thompson's University Center

Tuition

Tuition and fees for admitted students are based on residency, student classification (undergraduate, graduate, etc.), major, the number of credits enrolled, and the first term enrolled, with exceptions for students enrolled in joint baccalaureate/graduate programs where tuition is assessed by course level rather than student level.

As of summer 2020, the University of Oregon will transition from a standard undergraduate tuition and fee structure to a Guaranteed Tuition Program under which students will know the cost of their education for at least 5 years. Both tuition and mandatory enrollment fees (other than the Incidental Fee) will be included in the guaranteed structure. The Guaranteed Tuition Program is mandatory. <https://financialaid.uoregon.edu/oregon-guarantee> (<https://financialaid.uoregon.edu/oregon-guarantee/>)

The tuition and fee schedule can be found at <https://registrar.uoregon.edu/costs/tuition-fees> (<https://registrar.uoregon.edu/costs/tuition-fees/>)

In the schedule, tuition is specified for one term only. There are three terms in the academic year: fall, winter, and spring (except for the School of Law, which operates on a two-semester system). Summer session operates on a separate tuition schedule that includes course self-support fees.

The University of Oregon reserves the right to make changes in the tuition schedule.

Mandatory Enrollment Fees

Building, Health Service, Recreation Center, Student Union, Technology, and Incidental

Students enrolled at the Eugene campus are required to pay all mandatory fees. Students enrolled at the Portland or Charleston campuses, or at an off-campus site, do not pay Recreation Center or EMU fees, and they pay 50% of the Incidental Fee. Students in Portland are required to pay Portland State University's Health Service Fee and students at the Charleston campus pay UO's Health Services Fee. Students at an off-campus site do not pay the Health Services Fee. For the purpose of assessing fees, student enrolled in only online courses pay the Off-Campus set of fees.

The tuition and fee schedule along with fee descriptions can be found at <https://registrar.uoregon.edu/costs/tuition-fees> (<https://registrar.uoregon.edu/costs/tuition-fees/>).

Matriculation Fee

This is a one-time fee required by all admitted students and appears on your bill at the beginning of your first term at the UO.

Course Fees

Certain courses have additional fees which may include lab fees, field trip fees, and material fees. Refer to the Schedule of Classes for individual course related fees. <http://classes.uoregon.edu/>

Tuition Billing

Tuition may be paid in monthly installments. Unpaid balances are assessed a \$6 billing fee and are charged 9 percent annual interest. The university uses an electronic billing process to bill student for charges incurred; payments are due on the first of each month.

Special Tuition Rates

Non-degree/Community Education Program

Tuition for non-degree seeking students is determined by residency, course level, and the number of credits enrolled. Non-degree seeking undergraduate students are assessed tuition and administrative mandatory fees at the most recent tuition cohort rate.

Senior Citizens Auditing a Course

Oregon senior citizens who are neither seeking academic credit nor working toward a degree may attend classes as senior auditors if space is available on the first day of classes and if the department approves, at no cost. Charges may apply for special course materials. Senior citizens who want to audit a self-support course must pay self-support tuition and fees for the course. Incidental fee services are not provided. Registration is handled through the Office of the Registrar, second floor, Oregon Hall.

Employees and Dependents

Staff tuition provisions are included in the employee benefit program to encourage and assist eligible employees with educational pursuits.

Eligible employees may transfer this benefit to a qualified family member each term. For more information see the Human Resources website. <https://hr.uoregon.edu/benefits/staff-rates-tuition-0> (<https://hr.uoregon.edu/benefits/staff-rates-tuition-0/>)

Special Fees

Special fees, fines, penalties, service charges, and other additional charges for specific courses, services, or supplies not covered in the tuition fee are set forth on a list available <https://brp.uoregon.edu/content/fee-guidelines> (<https://brp.uoregon.edu/content/fee-guidelines/>)

Type of Fee	Fee Amount	Information
Credit by Examination	\$25 per credit	Assessed for taking an examination to challenge undergraduate university courses.
Exceptions to Procedures	\$1–\$50	Approved exceptions to registration deadlines are subject to this fee.
Late Registration	\$100	A \$100 fee is charged for registration after the eighth day of class.
Testing	\$3–\$50	

Transcripts	\$15, other costs may apply	Instructions and delivery options are available at https://registrar.uoregon.edu/transcripts (https://registrar.uoregon.edu/transcripts/). The university reserves the right to withhold transcripts of students who have unpaid financial obligations to the institution. Debtors contesting their accounts should contact the collections department for counseling and instructions for a written appeal. The collections department is located in the Office of Business Affairs in the Thompson University Center. The mailing address is Collections Department, Office of Business Affairs, PO Box 3237, University of Oregon, Eugene, Oregon 97403-0237; call 541-346-3215
-------------	-----------------------------	---

Tuition and Fee Refunds

In the event of complete withdrawal from the university or a reduction in course load, refunds may be granted to students in accordance with the refund schedule <https://registrar.uoregon.edu/calendars/refund-schedules> (<https://registrar.uoregon.edu/calendars/refund-schedules/>)

1. Refunds are calculated from the date the student officially withdraws from the university, not from the date the student ceased attending classes, except in unusual cases when formal withdrawal has been delayed through causes largely beyond the student's control
2. No refunds are made for any amount less than \$1.00 unless a written request is made
3. In case of complete withdrawal, students who received financial aid are responsible for repayment of that aid in accordance with the university's financial aid repayment policy and schedule. See the class schedule for details

For complete withdrawal see instructions at <https://registrar.uoregon.edu/current-students/duckweb/complete-withdrawal> (<https://registrar.uoregon.edu/current-students/duckweb/complete-withdrawal/>). For questions concerning complete withdrawal please contact the Office of Academic Advising <https://advising.uoregon.edu/>.

The university has an appeal process for students or parents contending that individual circumstances warrant exceptions to published policy if circumstances of withdrawal or course-load reduction are beyond the student's control. Petitions for exception to the refund policy may be obtained from the Office of the Registrar at <https://registrar.uoregon.edu/forms> (<https://registrar.uoregon.edu/forms/>) or from the Office of Academic Advising at <https://advising.uoregon.edu/questions-about-petitions> (<https://advising.uoregon.edu/questions-about-petitions/>).

Veterans Access, Choice, and Accountability Act of 2014

Veterans Health Care and Benefits Improvement Act of 2016

Department of Veterans Affairs Expiring Authorities Act of 2018

Isakson and Roe Veterans Health Care and Benefits Improvement Act of 2020

Colonel John M. McHugh Tuition Fairness for Survivors Act of 2021

The following individuals shall be charged the in-state rate, or otherwise considered a resident, for tuition and fees purposes:

- A veteran using educational assistance under either Chapter 30 (Montgomery GI Bill®—Active Duty Program) or Chapter 33 (Post-9/11 GI Bill®), of Title 38, United States Code, who lives in the state of Oregon while attending the University of Oregon (regardless of his or her formal state of residence).
- Anyone using transferred post-9/11 GI Bill® benefits (38 U.S.C. § 3319) who lives in the state of Oregon while attending the University of Oregon (regardless of his or her formal state of residence).
- Anyone using benefits under the Marine Gunnery Sergeant John David Fry Scholarship [38 U.S.C. § 3311(b)(9)] who lives in the state of Oregon while attending the University of Oregon (regardless of his or her formal state of residence).
- Anyone using educational assistance under Chapter 31, Veteran Readiness and Employment, who lives in the state of Oregon while attending the University of Oregon (regardless of his or her formal state of residence).
- Anyone using educational assistance under Chapter 35, Dependents Educational Assistance, who lives in the state of Oregon while attending the University of Oregon (regardless of his or her formal state of residence).
- Anyone described above while he or she remains continuously enrolled (other than during regularly scheduled breaks between courses, semesters, or terms) at the University of Oregon.

GI Bill® is a registered trademark of the US Department of Veterans Affairs. More information about education benefits offered by the department is available at the official US government website (<https://www.benefits.va.gov/gibill/>).

Student Financial Aid and Scholarships

Jim Brooks, Director

541-346-3221
541-346-1175 fax
260 Oregon Hall
1278 University of Oregon
Eugene OR 97403-3221
financialaid@uoregon.edu

Financial aid in the form of scholarships, grants, loans, and employment is available to eligible students who need assistance to attend school. The Office of Student Financial Aid and Scholarships provides counseling and information services to students and parents and administers a comprehensive program of financial assistance. Office hours are

8:00am–5:00 pm, Monday, Tuesday, Thursday, and Friday, and 9:00 a.m.–5:00 pm on Wednesday. Drop-in counselors are available Monday through Friday, 9:00 am–11:45am and 1pm-3:45pm. Phone hours are also Monday through Friday, 9:00 am–11:45am and 1pm-3:45pm.

Federal and state regulations are subject to change and may affect current policies, procedures, and programs.

Estimated Student Expenses

The following information is provided to help students estimate the total cost of attending the University of Oregon.

Budgets established for financial aid purposes are based on average expenses. Some students have higher costs in a few categories. For example, students in the College of Design, the School of Music and Dance, and some of the science departments have expenses ranging from \$30 to \$500 a year for equipment, supplies, and field trips in addition to books. Students living alone in an apartment or in university housing may spend more than the budgeted amount for meals and housing, based on personal choice.

Residence hall room and board rates for 2022–23 range from \$9,462 to \$24,043. Cooperative housing costs are generally less than the minimum residence hall rate. Sorority and fraternity costs are typically higher.

Although the university does not require proof of health insurance for domestic students, the provisions of the Affordable Care Act may apply. International students are required to purchase health insurance. For more information about health services and coverage, please visit the University Health Services website. (<https://health.uoregon.edu/>)

Personal expenses are governed by individual preference but may include such items as transportation, health care, apparel, and entertainment.

The figures in the following table are the 2022-23 tuition and fees for an incoming undergraduate student enrolled in 15 credits and a graduate student enrolled in 9 credits. Due to Guaranteed Tuition (<https://financialaid.uoregon.edu/oregon-guarantee/>), rates and charges may vary by each individual student's cohort year. UO charges by the credit hour. To view tuition and fees by residency and credit hour, please see the **Tuition and Fees** section of this catalog.

Tuition and Fees

Student Classification	One Term or Semester	Three Terms or Semesters
Undergraduate resident	\$5,018	\$15,054
Undergraduate nonresident	\$13,900	\$41,700
Graduate tuition varies by program. A base tuition would be as follows:		
Graduate resident	\$6,165	\$18,495
Graduate nonresident	\$10,485	\$31,455
Law resident (semester)	\$22,041	\$44,082
Law nonresident (semester)	\$27,432	\$54,864

The Office of Student Financial Aid and Scholarships used the expenses in the following tables to estimate a student's educational costs for the 2022-23 academic year.

Meals and Housing

	One Term	Three Terms
Student commuter living with parents	\$1,083	\$3,249
Undergraduate student living off campus	\$3,752	\$11,256
Undergraduate student living on campus	\$4,880	\$14,640
Graduates	\$4,482	\$13,466
Law (semester)	\$6,723	\$13,446

A dependent child-care allowance may be added to the budget for each child less than 12 years of age who is living with a student and for whom the student is paying child-care expenses.

Books and Supplies

	One Term	Three Terms
Graduates and undergraduates	\$409	\$1,227
Law (semester)	\$613	\$1,227

Transportation

	One Term	Three Terms
Resident undergraduate or graduate	\$131	\$393
Nonresident undergraduate or graduate	\$461	\$1,383
Law resident (semester)	\$196	\$393
Law nonresident (semester)	\$691	\$1,383

Miscellaneous Personal Expenses

	One Term	Three Terms
Undergraduates	\$775	\$2,325
Graduates	\$775	\$2,325
Law (semester)	\$1,162	\$2,325

Applying for Financial Aid

Undergraduate, graduate, and law students use the following procedure to apply for financial aid:

1. Complete the Free Application for Federal Student Aid (FAFSA) online. The official website is <https://studentaid.gov/h/apply-for-aid/fafsa> (<https://studentaid.gov/h/apply-for-aid/fafsa/>)
2. List the University of Oregon (using code number 003223) on the FAFSA application as a school to receive the application information
3. Apply for admission to the University of Oregon

Deadlines

To be given priority consideration for the Federal Supplemental Educational Opportunity Grant, Federal Work-Study Program, and tuition waivers for all or part of any given academic year, a valid FAFSA must be received by the federal processor on or before March 1 prior to the academic year for which the student is applying. To meet this deadline, submit the FAFSA no later than February 15. The FAFSA is available on October 1 prior to the academic year for which the student is applying. Signing the FAFSA electronically is the recommended method for submission. If applicable, online applicants should mail the FAFSA signature page, obtained from the FAFSA website, in early February to meet the priority deadline.

Eligibility

Financial aid eligibility for any student is determined by the difference between the estimated cost of education at the University of Oregon and the expected family contribution (as determined by the FAFSA) from the student's family, the student and parents if the student is a dependent, or the student and spouse if the student is married. Students (and their families if appropriate) are expected to bear the primary responsibility for meeting educational costs. When a student's expected family contribution is less than the cost of education, the university attempts to meet the difference with need-based financial aid first, then attempts to fill the remaining difference with non-need based loans.

Assessing Financial Aid Eligibility

The university uses a method prescribed by law to determine an expected contribution from the student and family toward the cost of the student's education. The expected family contribution, derived from using the federal formula, is based on income and asset information as well as certain variables such as family size and number of family members attending college. This system ensures that students receive consistent and equitable treatment. Financial aid counselors review unique circumstances on a case-by-case basis, at the request of the student.

Satisfactory Academic Progress

To be eligible for financial aid, students must make satisfactory academic progress toward their degrees, maintain a minimum cumulative grade point average (GPA) and acceptable pace of completion, and graduate within the maximum time frame. Progress is reviewed annually at the end of spring term.

The minimum cumulative GPA needed to meet satisfactory academic progress is 2.00 for an undergraduate and 3.00 for a graduate student (except for law students seeking a JD or LLM degree, who require a 2.00 GPA). For more information on how your cumulative UO GPA is calculated, including how incompletes, withdrawals, or repetitions may affect your GPA, please visit the [GPA calculator \(https://registrar.uoregon.edu/current-students/grading-system/#calculating-a-grade-point-average\)](https://registrar.uoregon.edu/current-students/grading-system/#calculating-a-grade-point-average). If a student's cumulative GPA drops below the required minimum at the time of the evaluation, eligibility for financial aid will be suspended unless the student appeals and is approved for reinstatement. Students may also reestablish eligibility for the subsequent term after raising their GPA to the minimum requirement.

Pace of completion toward a degree is a further requirement, determined by dividing the number of credits attempted by the number of credits earned. Students are expected to earn credit for at least 67 percent of the credits attempted on an aggregate basis. Credit is earned for grades

A, B, C, D, and P. Credit is not earned for grades of F, W, I, Y, N, and X. A [pace calculator](https://financialaid.uoregon.edu/pace_calculator/) (https://financialaid.uoregon.edu/pace_calculator/) is located online.

Students must also complete their degrees within a maximum time frame. A student must graduate before accumulating 150 percent of the attempted credits required for completing his or her major. Most majors at the University of Oregon require 180 credits; 270 would be 150 percent of that. If a student is unable to fulfill the requirements for his or her degree before reaching this maximum time frame or the financial aid office determines that it is mathematically impossible to graduate within the maximum time frame, financial aid will be suspended.

Visit the Office of Student Financial Aid and Scholarship [website](http://financialaid.uoregon.edu/satisfactory_academic_progress/) (http://financialaid.uoregon.edu/satisfactory_academic_progress/) for information on the appeals process.

Completely withdrawing from (or not passing any) courses during a student's first term at the University of Oregon, or during any two consecutive terms, constitutes failure to meet satisfactory academic progress standards regardless of GPA, pace, or time frame.

For additional information, visit the Office of Student Financial Aid and Scholarship [website](http://financialaid.uoregon.edu/satisfactory_academic_progress/) (http://financialaid.uoregon.edu/satisfactory_academic_progress/).

Financial Aid Packages

Students will receive notification of their offer after their financial aid eligibility has been established. The Office of Student Financial Aid and Scholarships attempts to offer financial aid to students up to their estimated cost of education, which could include scholarship and grant money, work-study, and loan eligibility.

A student may not receive assistance from any financial aid (Title IV) program if:

1. The student is in default on any educational (Title IV) loan
2. The student has borrowed in excess of federal (Title IV) loan limits
3. The student owes a refund on federal or state grants or a Federal Perkins Loan due to an overpayment

A parent may not borrow from the Federal Direct Parent Loan for Undergraduate Students (Parent PLUS) if the parent or student is in default on any educational loan or owes a refund on an educational grant as described above.

There may be other conditions when a student would be ineligible for financial aid—for example, when a student is not maintaining satisfactory academic progress or when not enrolled in an eligible program.

Undergraduates

Federal Pell Grants, Oregon Opportunity Grants, and university scholarships are considered to be part of the student's financial aid package, even though the Office of Student Financial Aid and Scholarships may not determine eligibility for these programs.

The office determines the student's eligibility for and the amount of assistance from the Federal Supplemental Educational Opportunity Grant and the Federal Work-Study Program.

Financial aid offers are made in accordance with federal and state regulations, as well as university policies. Some offers are tentative if

selected for verification and may be revised after verification has been completed.

Graduate and Law Students

The Office of Student Financial Aid and Scholarships determines eligibility and the amount of assistance that may be received from the Federal Work-Study Program, Federal Direct Unsubsidized Loan, and Federal Direct Graduate PLUS Loan. Offers are made in accordance with federal regulations and university policies.

Refunds and Repayment

Students who withdraw from school may be required to repay all, or a portion of, their financial aid. According to a formula prescribed by federal and state regulations, any refundable amount used to pay tuition and fees or for university housing is returned to the appropriate financial aid sources. Students may also be required to pay the unearned portion of assistance that was directly disbursed to them.

Additional information concerning the institution's refund policy may be found on the website for the Office of the Registrar. (<https://registrar.uoregon.edu/calendars/refund-schedules/>)

Additional information concerning return of financial aid (http://financialaid.uoregon.edu/return_of_financial_aid/) and participation requirements (<http://financialaid.uoregon.edu/participation/>) may be found on the website for the Office of Student Financial Aid and Scholarships.

Notification of Financial Aid

Beginning in March, financial aid offers are mailed to first-year students who have supplied the necessary information to the Office of Student Financial Aid and Scholarships and the Office of Admissions. Financial aid offers are then mailed on a continuing basis to those entering students who supply the necessary information to the offices after the March 1 priority deadline.

When aid is accepted, the student (and spouse if married) and the student's parents (if applicable) may be asked to provide documents, such as federal income tax returns (IRS Form 1040), to verify the information on the application.

Students should read the financial aid offer and instructions carefully.

An explanation of revision and appeal policies and procedures may be found on the financial aid website. A financial aid package may be revised when a student's eligibility changes. The student receives a revised notification and, if necessary, is advised of any repayment of aid. The federal regulations covering financial aid programs, the explanation of the federal method of determining student and family contributions, and the university policies and procedures for offering financial aid are available in the Office of Student Financial Aid and Scholarships. Students are welcome to review them during office hours or on the financial aid website.

Financial Aid Programs

To be eligible for certain financial aid programs that depend on federal or state funding, the student must be a citizen of the United States or in the United States for other than a temporary purpose and with the intention of becoming a permanent resident. Students who are citizens of the Freely Associated States (the Republic of the Marshall Islands, the Federated

States of Micronesia, or the Republic of Palau) may be eligible for certain types of federal (Title IV) aid.

Financial aid is typically disbursed to students near the beginning of a term based on their enrollment at that time. However, financial aid is actually earned over the course of a term. Therefore, if a student completes a term at a different enrollment status than he or she began the term, some or all of the student's financial aid may need to be returned.

Federal Pell Grant

This program provides grants (funds that do not require repayment, provided you meet the terms of the award) to eligible undergraduates who do not have a bachelor's degree.

To be eligible for a Federal Pell Grant, a student must be admitted to the university in a program leading to a degree and enrolled in good standing. The amount of Federal Pell Grant funds a student may receive over their lifetime is limited to the equivalent of six years of Pell Grant funding.

The grant is reduced proportionately if the student is enrolled less than full time (12 credits a term).

The Free Application for Federal Student Aid (FAFSA) determines eligibility based on the student's and parents' income and assets, or the student's and spouse's, if applicable. The university disburses the money.

Federal Supplemental Educational Opportunity Grant (FSEOG)

Federal supplemental grants, which do not need to be repaid, provided you meet the terms of the award, are for undergraduates with exceptional need. To be eligible, a student must be admitted to the university in a program leading to a degree and enrolled in good standing. The amount a student receives is determined by university policy and fund availability.

Funds are granted to the university by the federal government to award to eligible students.

Iraq and Afghanistan Service Grants

The Iraq and Afghanistan Service Grant is a federal grant that, although it does not need to be repaid, provided you meet the terms of the award, has special eligibility criteria. This grant is for undergraduates who

- are not eligible for the Federal Pell Grant on the basis of their expected family contribution but meet the remaining Federal Pell Grant eligibility requirements
- have a parent or guardian who was a member of the US armed forces and died as a result of military service performed in Iraq or Afghanistan after the events of September 11, 2001
- were under 24 years old or enrolled in college at least part-time at the time of their parent's or guardian's death

State of Oregon Opportunity Grants

Oregon Opportunity Grants are awarded to eligible undergraduate Oregon residents who complete the FAFSA or the Oregon Student Aid Application (ORSAA).

A grant may be renewed for a total of 12 terms if the student applies each year, demonstrates financial need, is enrolled at least half time (6 credits a term) in a program leading to a degree, and has not completed a bachelor's degree. In addition, the State of Oregon Office of Student

Access and Completion (OSAC) may require that a student receive the Oregon Opportunity Grant during the fall term in order to have any eligibility for the remainder of the year.

OSAC determines eligibility and notifies the university. The funds are provided by the state and disbursed by the university.

University of Oregon Tuition Waiver (Grant)

The UO Tuition Waiver may remit (reduce) a portion of a full-time Oregon resident's tuition charges, for undergraduates who demonstrate financial need and complete their FAFSA application by the published priority deadline. Funding is limited and the amount a student receives is determined by university policy and fund availability.

Teacher Education Assistance for College and Higher Education Grant (TEACH)

The TEACH program provides up to \$4,000 a year to students enrolled in an eligible education program and who agree to teach in a high-need field at a low-income school for at least four years within eight years of completing the program for which the grant was awarded. If these requirements are not met, the grant converts to a loan, interest is assessed retroactively, and the loan must be repaid.

Federal Work-Study Program

The Federal Work-Study Program allows students with financial need the opportunity to pursue a part-time job. Work-study students must be in good academic standing in an eligible program leading to a degree or certificate.

The amount of work-study a student may earn is determined by university policy and fund availability. Students earn an hourly wage based on the type of work, their skills, and their experience. Students may work a maximum of 25 hours a week while school is in session. Monthly timesheets are completed with the employer and pay is generated at the end of each month.

Students earn work-study funds by working on-campus or off-campus at approved governmental or non-profit agencies that perform services in the public interest. Information on available job opportunities and assistance locating a position can be found at the University Career Center website (<https://career.uoregon.edu/>).

William D. Ford Federal Direct Student Loan Program

Federal Direct Subsidized Loan

Students must demonstrate need to qualify for a Federal Direct Subsidized Loan. The university determines the amount the student may borrow within federal limits: \$3,500 for the first academic year of undergraduate study (up to 44 credits); \$4,500 for the second academic year (45–89 credits); and \$5,500 an academic year for the remaining years of undergraduate study. Not all students are eligible for the maximums. The Federal Direct Subsidized Loan is for undergraduate students with financial need. The US Department of Education pays the interest on (subsidizes) a Direct Subsidized Loan while the student is enrolled, during a student's grace period, and during a period of deferment.

Student borrowers must be enrolled at least half-time, in good academic standing and have been accepted for admission to an eligible program leading to a degree or certificate. Once repayment begins, borrowers are charged a fixed interest rate. The fixed interest rate is set every July

1. For loans first disbursed on or after July 1, 2021 and before July 1, 2022, the interest rate is fixed at 3.73%. For loans first disbursed on or after July 1, 2022 and before July 1, 2023, the interest rate is fixed at 4.99%. There is an origination fee of 1.057% for loans first disbursed on or after October 1, 2020 and before October 1, 2023.

Federal Direct Unsubsidized Loan

Direct Unsubsidized Loans are available to students who do not qualify, in whole or in part, for the Direct Subsidized Loan. The university determines the amount the student may borrow within federal limits: \$5,500 for the first academic year of undergraduate study (up to 44 credits); \$6,500 for the second academic year (45–89 credits); and \$7,500 per year for the remaining years of undergraduate study. The amount of Direct Subsidized Loan eligibility is subtracted from the Direct Unsubsidized Loan maximum amounts listed. Not all students are eligible for the maximums.

Direct Unsubsidized Loans are available to undergraduate and graduate students. There is no requirement to demonstrate financial need. The student is responsible for paying the interest on a Direct Unsubsidized Loan during all periods. If the student chooses not to pay the interest while in school and during grace periods and deferment or forbearance periods, the interest will accrue (accumulate) and be capitalized (that is, interest will be added to the principal amount of the loan).

A student's financial need and dependency status determines the amount of the loan offered. Independent students, as defined by answers on the FAFSA, may borrow up to an additional \$4,000 in their freshman and sophomore years and up to an additional \$5,000 in their junior and senior years.

For loans first disbursed on or after July 1, 2021 and before July 1, 2022, the interest rate is fixed at 3.73%. For loans first disbursed on or after July 1, 2022 and before July 1, 2023, the interest rate is fixed at 4.99%. There is an origination fee of 1.057% for loans first disbursed on or after October 1, 2020 and before October 1, 2023. Interest that accrues during in-school, grace, and authorized deferment periods will be added to the principal when repayment begins. The interest rate for the Direct Unsubsidized Loan is a fixed rate set every July 1.

Graduate and law students may borrow up to \$20,500 a year depending on their financial need. For graduate and law students with loans first disbursed on or after July 1, 2021 and before July 1, 2022, the interest rate is fixed at 5.28%. For loans first disbursed on or after July 1, 2022 and before July 1, 2023, the interest rate is fixed at 6.54%. There is an origination fee of 1.057% for loans first disbursed on or after October 1, 2020 and before October 1, 2023.

Additional Federal Direct Unsubsidized Loan

Dependent undergraduate students whose parents are denied access to the Federal Direct Parent Loan for Undergraduate Students (Parent PLUS) program may be eligible for additional Direct Unsubsidized Loan funds. Students with fewer than 90 credits may borrow a maximum of \$4,000 per award year in additional funds above the maximum Federal Direct Loan limits. Students who have earned 90 credits or more may borrow a maximum of an additional \$5,000 per award year. Not all applicants qualify for the maximums. The Federal Direct Unsubsidized Loan may be used to replace expected family contribution, but the total borrowing for combined Direct Subsidized Loans and Direct Unsubsidized Loans cannot exceed the cost of education.

Generally, the cumulative amount a student can borrow from all Federal Direct Loans is as follows:

- \$31,000 (only \$23,000 may be subsidized) as a dependent undergraduate
- \$57,500 as an independent undergraduate (only \$23,000 of this amount may be subsidized)
- \$138,500 as a graduate or professional student

Federal Direct Parent Loan for Undergraduate Students (Parent PLUS)

This program provides loans to parents of dependent undergraduate students. Parents may borrow up to an annual amount that is equal to the cost of education minus any estimated financial assistance the student receives during the periods of enrollment. The borrower may use the amount of the Federal Direct PLUS to replace the expected family contribution for the loan period.

The Federal Direct PLUS is limited to parents who do not have an adverse credit history or who have obtained an endorser who does not have an adverse credit history or in default on federal loans. A direct loan servicer, contracted by the federal government, performs the required credit check. The interest on the Federal Direct PLUS is a fixed rate set every July 1. For loans first disbursed on or after July 1, 2021 and before July 1, 2022, the interest rate is fixed at 6.28%. For loans first disbursed on or after July 1, 2022 and before July 1, 2023, the interest rate is fixed at 7.54%. There is an origination fee of 4.228% for loans first disbursed on or after October 1, 2020 and before October 1, 2023.

Parents interested in participating in the Federal Direct PLUS program may apply for the loan by visiting the US Department of Education [website \(https://studentloans.gov/\)](https://studentloans.gov/).

Federal PLUS Loan for Graduate and Professional Students (Graduate PLUS)

This program is offered to qualified students with or without financial need, but the student must have financial aid eligibility. Like other direct loans for students, the US Department of Education is the direct lender of the Graduate PLUS. Typically, repayment must begin within 60 days after the Graduate PLUS is fully disbursed. However, students who meet the requirements may obtain an in-school deferment from the US Department of Education. There is no grace period for this loan. Interest begins to accrue at the time the first disbursement is made at a fixed rate set every July 1. For loans first disbursed on or after July 1, 2021 and before July 1, 2022, the interest rate is fixed at 6.28%. For loans first disbursed on or after July 1, 2022 and before July 1, 2023, the interest rate is fixed at 7.54%. There is an origination fee of 4.228% for loans first disbursed on or after October 1, 2020 and before October 1, 2023.

Repayment

Payment of all Direct Loans are handled through an assigned direct loan servicer. To locate the appropriate direct loan servicer, the student may sign in to Federal Student Aid (<https://studentaid.gov/>).

Repayment of Federal Direct Loans (subsidized and unsubsidized) begins six months after termination of at least half-time enrollment. Repayment of Federal PLUS loans typically begins within 60 days of the last disbursement of the loan. A deferment may be requested after loan approval. Borrowers have the right to prepay their loans without penalty. Furthermore, they may choose from the following repayment plans:

- A standard repayment plan with a fixed payment amount (at least \$50 a month) over a fixed period of time, not to exceed 10 years
- A graduated repayment schedule in which payments are lower at first and then increase, usually every two years, over a period of as much as 10 years
- An extended repayment plan with a fixed or graduated annual repayment of at least \$50 a month over a period of up to 25 years, depending on the total amount owed
- The pay as you earn (PAYE) plan is designed for new borrowers (since October 1, 2017) with at least a partial financial hardship. Payment amounts change as the borrower's income changes, with a repayment period of as much as 20 years. Borrowers must update income and family size each year. Parent PLUS Loans are not eligible for this plan
- The revised pay as you earn plan (REPAYE) has similar conditions to the plan listed above, but there is no requirement to be a new borrower
- An income-based repayment plan designed to make repaying federal loans easier for students who intend to pursue jobs with lower salaries such as careers in public service. Monthly payments are capped at a percentage of the borrower's discretionary income, which is based on family size and income rather than total amount borrowed. Payments change as the borrower's income changes and are made over a period of up to 25 years. Borrowers must update income and family size each year. Parent PLUS Loans are not eligible for this plan
- An income-contingent repayment plan with varying annual repayment amounts based on the total amount owed and the annual income of the borrower (and that of the borrower's spouse, if a joint return is filed) paid over a period not to exceed 25 years. Parent PLUS Loans may be eligible for this plan, if part of a Direct Consolidation Loan. Borrowers must update income and family size each year
- An income-sensitive repayment plan in which monthly payments are based on annual income. Loan must be paid in full within 15 years.
- unemployment (up to three years)
- economic hardship or serving in the Peace Corps (up to three years)
- active duty military service in connection with a war, military operation, or national emergency or post-active duty service grace period
- a Parent PLUS Loan if parent borrower is enrolled at least half-time at an eligible college, in an eligible program
- cancer treatment

During periods of approved deferment, a Federal Direct Subsidized Loan borrower does not need to make payments of principal, and the interest is paid by the federal government. For the Federal Direct Unsubsidized or PLUS borrower, principal repayment may be deferred, but interest continues to accrue and is capitalized or paid by the borrower during that time.

Forbearance

A direct loan borrower or endorser may receive forbearance (<https://studentaid.gov/manage-loans/lower-payments/get-temporary-relief/forbearance/>) from the federal government if the borrower or endorser is willing but unable to make scheduled loan payments. Forbearance is the temporary cessation of payments, an extension of time for making payments, or the temporary acceptance of smaller payments than previously scheduled. Forbearance may be granted for up to 12 months for reasons such as:

- financial difficulties
- medical expenses
- change in employment
- serving in a medical or dental internship or residency program
- the total amount a borrower owes each month for all student loans is 20 percent or more than the borrower's monthly gross income (up to three years)
- serving in an AmeriCorps position for which the borrower received a national service award
- qualifying for partial repayment of loans under the U.S. Department of Defense Student Loan Repayment Program
- performing teaching service that would qualify the borrower for teacher loan forgiveness
- a member of the National Guard and has been activated by a governor, but not eligible for military deferment
- other reasons acceptable to your direct loan servicer

During forbearance, interest will continue to accrue on the principal balance. If you do not pay the interest as it accrues, the unpaid interest will be capitalized, added to the principal balance of the loan.

Deferments and forbearance are handled by the assigned direct loan servicer. To locate the appropriate direct loan servicer, sign in to Federal Student Aid (<https://studentaid.gov/>).

If the borrower does not select one of these repayment plans, the Department of Education assigns the standard repayment plan. Visit the [website \(https://studentaid.gov/manage-loans/repayment/plans/\)](https://studentaid.gov/manage-loans/repayment/plans/) for details on all repayment plans.

The borrower's repayment liability is discharged if the borrower becomes permanently and totally disabled or dies or if the student for whom a parent has borrowed dies. Federal Direct Student Loans are generally not dischargeable in bankruptcy.

Deferring Repayment

Repayment of a Federal Direct Student Loan that is not in default may be temporarily deferred for: (<https://studentaid.gov/manage-loans/lower-payments/get-temporary-relief/deferment/>)

- at least half-time enrollment in an eligible program at an eligible school
- an approved graduate fellowship program
- enrollment in an approved rehabilitation training program

Public Service Loan Forgiveness

The Public Service Loan Forgiveness Program (PSLF) forgives the remaining balance on your direct loans after you have made 120 qualifying monthly payments under a qualifying repayment plan while working full-time for a qualified employer. More information about the PSLF program may be found on the US Department of Education [website \(https://studentaid.ed.gov/sa/repay-loans/forgiveness-cancellation/public-service/\)](https://studentaid.ed.gov/sa/repay-loans/forgiveness-cancellation/public-service/).

Federal Direct Consolidation Loan

Loan consolidation is a way of lowering monthly payments by combining several federal loans into one loan at the time of repayment. Borrowers may consolidate any amount of eligible loans including those borrowed under the Federal Family Education Loan program, the Federal Perkins Loan program, and the Direct Loan Program. The interest rate is fixed at the time of consolidation based on the weighted average of the loans being consolidated. Repayment of Consolidation loans may extend to 30 years depending on the repayment plan selected and the amount borrowed. The result of a longer repayment term, however, is an increase in the total cost of the loan. More information about Direct Loan Consolidation can be found on the US Department of Education [website \(https://studentaid.ed.gov/sa/repay-loans/consolidation/\)](https://studentaid.ed.gov/sa/repay-loans/consolidation/).

Entrance and Exit Counseling

First-time Direct Subsidized, Unsubsidized, and Graduate PLUS Loan borrowers must complete entrance counseling before a loan disbursement can be made.

Shortly before graduating from or terminating enrollment at the University of Oregon, borrowers must also complete exit loan counseling.

Both entrance and exit counseling sessions are completed at Federal Student Aid (<https://studentaid.gov/>).

Federal bankruptcy law generally prohibits student loan borrowers from the routine discharge of their federal student loan debt.

Alternative Loans

Privately funded loans are not based on need and no federal formula is applied to determine eligibility. However, the amount borrowed cannot exceed the cost of education minus other financial aid. Interest rates and repayment terms vary, but may be less favorable than those provided through the federal direct lending program. Private loans may be used to supplement the federal programs when the cost of education minus federal aid still leaves unmet need. Information is available in the Office of Student Financial Aid and Scholarships or on its website under Alternative Student Loans. (http://financialaid.uoregon.edu/alternative_loans/)

Debt Management and Default Reduction

The University of Oregon is committed to helping students achieve sound financial planning and debt management. Information about loans, repayment options, and debt management strategies are available in the Office of Student Financial Aid and Scholarships, on its website (<https://financialaid.uoregon.edu/>), and additional resources are available through the UO Financial Wellness Center (<https://financialwellness.uoregon.edu/>).

Scholarships

Scholarships Awarded by a Department or School

Undergraduate and graduate students who have selected a major field of study should consult the appropriate school or department about possible scholarships and application procedures and requirements.

Many departments offer assistantships and fellowships—which include an instructional fee waiver, a monthly salary, and health insurance benefits—to outstanding graduate students.

National ROTC Scholarships

The Army Reserve Officers Training Corps (ROTC) Scholarship Program sponsors two-, three-, and four-year scholarship options based on the time remaining to complete a degree. These scholarships include full tuition and fees or the option for room and board in place of tuition and fees. It also provides an additional book allowance of \$1,200 per year, and a monthly living allowance of \$420 per month. The University of Oregon also provides an additional subsidy for a portion of the housing cost to qualifying students. For more information, contact the Department of Military Science at 541-346-3102 or email mcmahond@uoregon.edu. High school seniors may also apply online (<https://www.goarmy.com/rotc.html/>) for a four-year Army ROTC National Scholarship or contact their school's career counselor.

National and Community Service Trust Act

This legislation created Americorps, which gives citizens the opportunity to perform community service in the United States and, for that service, receive an education award. This award can be used to pay for postsecondary education or to repay qualified student loans. Information about Americorps is available online.

Scholarships Awarded through the Office of Student Financial Aid and Scholarships

Stamps Scholarship

The Stamps Scholarship is awarded competitively to outstanding incoming domestic freshman students. Oregon resident Stamps Scholars receive UO resident tuition and fees with room and board for four years of undergraduate study. Out-of-state recipients receive nonresident tuition and fees. Approximately 10 students per year are awarded this merit-based scholarship by the University of Oregon in partnership with the Stamps Scholars Program. Recipients also benefit from as much as \$12,000 in enrichment funds to be used over four years to help them pursue study abroad, unpaid internships, or other experiences. In addition, students who receive a Stamps Scholarship are automatically granted admission to the University of Oregon's Robert Donald Clark Honors College.

Eligibility Requirements

To apply and compete for this scholarship for the 2022-23 school year, a student must:

- be an incoming domestic freshman
- have a minimum 3.85 cumulative high school grade point average on a 4.00 scale
- exemplify leadership, perseverance, scholarship, service, and innovation

Interested students may apply online. Students must apply for admission by November 1 and submit their Stamps application by November 15.

Your scholarship application will be evaluated along with the Self Reported Academic Record included in your UO Undergraduate Admissions Application.

The University of Oregon interviews as many as 36 semifinalists in on-campus interviews; finalists will also be interviewed by the Stamps Scholars Program. The Stamps Scholars Program will make the final selection of the recipients, who are notified by March 15.

Scholarship Renewal

Stamps Scholarships are available for up to 12 terms, renewed annually, provided recipients meet the following requirements:

- Enroll in and complete a minimum of 12 UO credits per term
- Maintain a 3.25 UO grade point average

See the [financial aid website \(http://financialaid.uoregon.edu/stamps_scholarship/\)](http://financialaid.uoregon.edu/stamps_scholarship/) for applications and filing deadlines.

Presidential Scholarship

In 1983, the university established the Presidential Scholarship Program to recognize and reward outstanding Oregon high school graduates. Presidential Scholarships awarded in 2022-23 will be \$9,000 a year for four years (12 terms).

For the 2022-23 year, incoming resident freshman students must submit the Presidential Scholarship application on our website by Feb 1 in addition to applying for admission by January 15.

Selection is based on academic achievement and leadership. To retain the scholarships for four years, recipients are expected to maintain a 3.25 grade point average at the university.

Diversity Excellence Scholarship

The University of Oregon Diversity Excellence Scholarship recognizes undergraduate and graduate students who enhance the educational experience of all students by sharing diverse cultural experiences. These tuition-remission scholarships are an integral part of the university's effort to meet the educational-diversity needs of its students, and they complement other programs in the UO diversity plan.

Diversity Excellence Scholarships awarded to undergraduates in 2022-23 will be \$6,500; graduate student awards will be \$9,000. Scholarships are renewable for up to 12 terms for entering freshmen, and are prorated for transfer, continuing, and graduate students. Recipients must meet specific scholarship renewal requirements to retain their scholarships.

Scholarship Criteria. To be considered for this scholarship for the 2022-23 school year, an applicant must be a currently enrolled UO student with at least a 3.00 GPA, or apply for admission and meet standard UO admission requirements and have a 3.00 high school GPA. Scholarship recipients are selected competitively by the UO Diversity Excellence Scholarship Selection Committee, based on the following:

- Past academic performance
- Participation in campus or community activities
- An individual's ability to contribute to diversity
- Preference given to students with financial need as defined by federal and state guidelines

- Preference given to first generation of the family to attend college
- Preference given to Oregon residents

Application. The application is electronic and the submission deadline for the 2022-23 Diversity Excellence Scholarship is February 1 for incoming freshman and March 1 for graduate, law, and continuing UO students. The application deadline for transfer students is April 1. Applications are available within the UO Scholarship Dashboard on the Office of Student Financial Aid and Scholarships website.

General University Scholarships

This group of university scholarships is not attached to a particular department or school. Detailed information is available on the financial aid website. All of these scholarships require academic achievement (merit). Some of them require financial need. Scholarships administered by this office are governed by the University Scholarship Committee, whose members are drawn from the faculty, the staff, and the student body. This committee reviews and formulates policies and evaluates applicants' academic qualifications.

A single application form is used for all the scholarships in this group. The application portal is available on the financial aid website for returning students. Applicants must provide copies of academic transcripts from schools they have attended.

For the 2022-23 year, prospective students entering from high school need only to apply for admission by the January 15 deadline to be considered for scholarships in this group. For students transferring from another college, the deadline to apply for admission is March 15 and the deadline to submit a scholarship application and supporting documents is April 1. Incoming graduate, law, and continuing UO students must apply by March 1.

When awarding financial assistance, the university does not discriminate on the basis of race, sex, religion, disability, age, national origin, veteran or marital status, or sexual orientation.

National Merit Scholarships

The University of Oregon participates with the National Merit Scholarship Corporation to award merit-based scholarships to incoming freshman students. Interested high school students should consult with their counselors and arrange to take the Preliminary Scholastic Assessment Test (PSAT) in their junior year. This test is usually offered during October.

UO Excellence Scholarship

The UO Excellence Scholarship for incoming freshman students in 2022-23 is awarded only to out-of-state scholars, with a \$60,000 payout over four years.

Out-of-state freshmen with exceptional admissions applications and stellar academic records will automatically be considered for the UO Excellence Scholarship. A limited number of these most prestigious awards are available.

Award Information. Out-of-state students receive \$15,000 per year for four years. The UO Excellence Scholarship may be combined with other scholarships, including the Diversity Excellence and General University Scholarships. The UO Excellence Scholarships may not be combined with the Summit Scholarship or the Apex Scholarship.

Application Procedures. Students who apply for admission by January 15 and meet the criteria are automatically considered for the UO Excellence Scholarship. No separate application is required.

Scholarship Renewal. UO Excellence Scholarships are renewable for up to 12 academic terms (excluding summer session) within a five-year period. Renewal awards require a minimum 3.00 cumulative UO GPA and completion of 36 credits per year.

Summit Scholarship

The Summit Scholarship for incoming freshman students in 2022-23 is awarded to Oregon resident scholars with a \$16,000 payout over four years, and to out-of-state scholars with a \$40,000 payout over four years.

Scholarship Criteria for 2022-23

- minimum 3.90 high school GPA on a 4.00 scale

Students who fail to meet the above criteria may qualify instead for the Apex Scholarship.

Award Information. Oregon residents receive \$4,000 per year for four years. Out-of-state students receive \$10,000 per year for four years. The Summit Scholarship may be combined with other scholarships, including the Presidential, Diversity Excellence, and General University Scholarships. Summit Scholarships may not be combined with the UO Excellence Scholarship or the Apex Scholarship.

Application Procedures. Students who apply for admission by January 15 and meet the criteria are automatically awarded the Summit Scholarship. No separate application is required. Application materials must be received by the February 15 document deadline.

Students whose high school GPA improves sufficiently to make them eligible for the Summit Scholarship by the February 15 document deadline should update their Self Reported Academic Record via the Admissions Portal. They will be notified of changes by April 1. New scholarship awards will not be made based on materials received after February 15.

Scholarship Renewal. Summit Scholarships are renewable for up to 12 academic terms (excluding summer session) within a five-year period. Renewal awards require a minimum 3.00 cumulative UO GPA and completion of 36 credits per year.

Apex Scholarship

The Apex Scholarship for incoming freshman in 2022-23 is awarded to Oregon resident scholars with a \$8,000 payout over four years, and to out-of-state scholars with \$30,000 over four years.

Scholarship Criteria for 2022-23

- minimum 3.70 high school GPA on a 4.00 scale

Students whose GPA and test scores are higher than the above criteria may instead qualify for the Summit Scholarship.

Award Information. Oregon residents receive \$2,000 per year for four years. Out-of-state students receive \$7500 per year for four years. The Apex Scholarship may be combined with other scholarships, including the Presidential, Diversity Excellence, and General University Scholarships. Apex Scholarships may not be combined with the UO Excellence Scholarship or the Summit Scholarship.

Application Procedures. Students who apply for admission by January 15 and meet the criteria are automatically awarded the Apex Scholarship. No separate application is required. Application materials, must be received by the February 15 document deadline.

Students whose high school GPA improves sufficiently to make them eligible for the Summit Scholarship by the February 15 document deadline should update their Self Reported Academic Record via the Admissions Portal. They will be notified of changes by April 1. New scholarship awards will not be made based materials received after February 15.

Scholarship Renewal. Apex Scholarships are renewable for up to 12 academic terms (excluding summer session) within a five-year period. Renewal awards require a minimum 3.00 cumulative UO GPA and completion of 36 credits per year.

Pathway Oregon

PathwayOregon is the University's promise of full tuition and fees for Oregon residents who are academically qualified and eligible for the Federal Pell Grant. Eligible students will have their tuition and fees covered by a combination of federal, state, and university grants and scholarships for up to four years. Students also receive the academic and personal support that enable them to succeed and graduate from the UO within 12 terms.

To be automatically eligible for PathwayOregon, students must:

- be Oregon residents, have graduated from an Oregon high school in the last two years, and be admitted to the UO as first-time freshmen
- complete a UO admissions application by January 15
- establish Federal Pell Grant eligibility by filing the Free Application for Federal Student Aid (FAFSA) by the March 1 deadline (include the UO code **003223** as a college choice)
- earn a minimum 3.40 high school GPA

Students who earn less than a 3.40 high school GPA but meet all other program eligibility criteria will be considered for the program on a space and funding-available basis.

Renewal Criteria

- Remain eligible for a Federal Pell Grant
- File the FAFSA by March 1
- Enroll for and maintain full-time attendance
- Make satisfactory academic progress

Academic and Career Planning

Advising

Office of Academic Advising

101 Oregon Hall
advising.uoregon.edu (<http://advising.uoregon.edu>)

The University of Oregon offers undergraduate students a choice of more than 2,000 courses. Out of these courses individualized programs emerge, reflecting each student's special interests, goals, and aspirations. Translating these goals and interests into courses, majors, and minors requires careful planning with an academic advisor. University

of Oregon advisors collaborate with students to help them achieve their personal goals, academic potential, and professional success.

Advisors provide students with a declared major a framework in which planning and decision-making may be efficiently completed. Exploring students should work with advisors in Tykeson Hall (see Willie and Donald Tykeson Hall below) early and often to explore interests.

Students are strongly urged to consult advisors regularly each term.

Students are also encouraged to speak with faculty members regularly.

Faculty can provide insight, guidance and mentorship within their areas of discipline and research.

The Office of Academic Advising supports new students in their transition to the university, as well as any student seeking guidance to achieve academic success. The office works closely with students in academic distress who may need particular assistance around navigating campus resources. See also Academic Advising in the Undergraduate Studies (p. 901) section of this catalog.

General Principles in Program Planning

1. To earn a degree in four years (12 terms), students should average 15 credits a term. In planning a term's studies, students should anticipate that each credit requires at least three hours a week for class meetings or homework
2. Each term's schedule should be planned to include the university bachelor's degree requirements and requirements for the major. Major requirements are listed in this catalog under the academic department headings. Students who have not selected a major should spend some time exploring possible majors
3. Students should read the course descriptions in this catalog and the notes in the class schedule to learn course pre- or corequisites
4. Many university major disciplines and courses require competence in mathematics. Mathematics should be started in the first year
5. A second language, whether required or elective, should also be started in the first year if possible. Students planning to study abroad on an international exchange program during the sophomore or junior year should achieve competence in a language early
6. Each student should prepare a four-year model program of courses and discuss the program with an advisor
7. New students might want to explore some special curricular programs such as Freshman Interest Groups and Academic Residential Communities, and should be investigated prior to or during orientation
8. Sound planning is necessary to design a program that combines courses demanding extensive reading, daily exercises, laboratory work, and lengthy papers
9. Planning might also include the use of university resources for improving skills in reading, computation, note-taking, test-taking, and writing.

Academic Majors, Minors, and Careers

University of Oregon undergraduate students must complete at least one academic major to graduate. A minor is another way to focus studies toward career and interest areas. Inquiries about minors should be directed to specific departments.

Willie and Donald Tykeson Hall

tykeson.uoregon.edu (<https://tykeson.uoregon.edu/>)

Willie and Donald Tykeson Hall, the college and careers building, offers students an integrated academic and career model focusing around one of six central themes called *flight paths*. These thematic paths

guide students in exploring and planning the academic and career paths that aligns with their values, skills, and interests. Students exploring options who are not yet ready to declare a major, who are premajors in a particular field, or who wish to declare a major should consult with advisors in Tykeson Hall. The advisors help plan programs that best suit each student's academic and career goals. Freshman students must declare their majors by the end of their second year; transfer students must declare their majors by the end of their first year.

Career Planning

University Career Center

Willie and Donald Tykeson Hall
career.uoregon.edu (<https://career.uoregon.edu/>)

The University Career Center, a unit of the Division of Student Life, exists to support the career readiness, preparation, and professional development of UO students. Students have an opportunity to learn about career options and paths, develop strategies to find and prepare for part-time jobs, internships, and full-time career opportunities, and meet potential employers. See also University Career Center in the Student Services (p. 927) section of this catalog.

Majors, Minors, Options

University of Oregon undergraduate students must complete an academic major to graduate; they may also complete additional majors, minors, or both. Options within majors or minors are additional ways of focusing academic interests, but they do not appear on academic transcripts. Other terms used for options include areas of concentration, emphasis, focus, or specialization; preparatory programs; primary and secondary areas or subjects; fields or subfields; programs of emphasis or study; and tracks. Technically, there are no minors in graduate degree and certificate programs. Graduate students also may pursue options within their major disciplines.

Violin/Viola Pedagogy (p. 843)

Majors, Minors, Options

University of Oregon undergraduate students must complete an academic major to graduate; they may also complete additional majors, minors, or both. Options within majors or minors are additional ways of focusing academic interests, but they do not appear on academic transcripts. Other terms used for options include areas of concentration, emphasis, focus, or specialization; preparatory programs; primary and secondary areas or subjects; fields or subfields; programs of emphasis or study; and tracks. Technically, there are no minors in graduate degree and certificate programs. Graduate students also may pursue options within their major disciplines.

Certificates

Undergraduate

Educational Foundations—secondary (p. 705)
 Film Studies (p. 130)
 Folklore and Public Culture (p. 264)
 Global Business (p. 591)
 Second-Language Acquisition and Teaching (p. 377)
 Special Education (p. 723)
 Teaching Dance (p. 820)
 Writing, Public Speaking, and Critical Reasoning (p. 240)

Graduate

Arts Management (p. 663)
 Communication Ethics (p. 783)
 Early Intervention—Early Childhood Special Education (p. 726)
 Ecological Design (p. 612)
 Environmental Humanities (p. 251)
 Indigenous, Race, and Ethnic Studies (p. 360)
 Institutional and Organizational Conflict Management (p. 798)
 Museum Studies (p. 663)
 Music Performance (p. 843)
 New Media and Culture (p. 663)
 Nonprofit Management (p. 669)
 Russian, East European, and Eurasian Studies (p. 519)
 School Psychology (p. 726)
 Technical Teaching in Architecture (p. 612)
 Women's, Gender, and Sexuality Studies (p. 544)

Majors, Minors, Options

University of Oregon undergraduate students must complete an academic major to graduate; they may also complete additional majors, minors, or both. Options within majors or minors are additional ways of focusing academic interests, but they do not appear on academic transcripts. Other terms used for options include areas of concentration, emphasis, focus, or specialization; preparatory programs; primary and secondary areas or subjects; fields or subfields; programs of emphasis or study; and tracks. Technically, there are no minors in graduate degree and certificate programs. Graduate students also may pursue options within their major disciplines.

Core Education Courses

Area of Inquiry and **Cultural Literacy** courses count toward partial fulfillment of bachelor's degree requirements under the groups and categories listed in each section.

See the Office of the Registrar page for more information about core education courses (formerly referred to as general-education courses): registrar.uoregon.edu/group_courses (http://registrar.uoregon.edu/group_courses/).

Arts and Letters

Arts & Letters (A&L) courses will create meaningful opportunities for students to engage actively in the modes of inquiry that define a discipline. Courses will be broad in scope and demonstrably liberal in nature (that is, courses that promote open inquiry from a variety of perspectives). Though some courses may focus on specialized subjects or approaches, there will be a substantial course content locating that subject in the broader context of the major issues of the discipline. Qualifying courses will not focus on teaching basic skills but will require the application or engagement of those skills through analysis and interpretation.

Courses that count towards either the Arts and Letters Area or fulfill the 2nd language requirement for the Bachelor of Arts degree can be found in the list at the bottom of this page. [Click here to see that list.](#) (p. 49)

Social Science

Social Science (SSC) courses will be liberal in nature rather than being professionally oriented or limited to the performance of professional skills. They will cover a representative cross-section of key issues, perspectives, and modes of analysis employed by scholars working on the subject matter addressed by the course. The subject matter of the course will be relatively broad, e.g., involving more than one issue, place, or time.

Science

Science (SC) area-satisfying courses will introduce students to the foundations of one or more scientific disciplines, or should provide an introduction to fundamental methods (such as mathematics) that are widely used in scientific disciplines. Courses will introduce students to the process of scientific reasoning.

Courses that count towards either the Science Area or the Bachelor of Science can be found listed at the bottom of this page. [Click here to see that list.](#) (p. 54)

United States: Difference, Inequality, and Agency

These courses fulfill the *United States: Difference, Inequality, and Agency* category of the Cultural Literacy Core Education requirement, a requirement informed by UO student activism. It is meant to develop students' analytical and reflective capacities to help them understand and ethically engage with the ongoing (cultural, economic, political, social, etc.) power imbalances that have shaped and continue to shape the United States. In addition to considering the scholarship, cultural production, perspectives, and voices from members of historically marginalized communities, students in DIA courses:

1. **Inquire** into intersecting aspects of identity such as race, gender, gender identity, sexuality, socioeconomic status, indigeneity, national origin, religion, or ability;
2. **Analyze** uses of power to marginalize on the basis of identity, as well as the assertions of agency, resistance, and resilience by marginalized groups; and
3. **Examine** historical and contemporary structures, forms of knowledge, cultural practices, or ideologies that perpetuate or change the distribution of power in society.

and undertake one or more of the following:

- **Reflect** on one's own multiple social identifications and on how they are formed and located in relation to power.
- **Practice respectful listening and ethical dialogue** around deeply felt or controversial issues.

Global Perspectives

These courses fulfill the *Global Perspectives* category of the Cultural Literacy Core Education requirement. A Global Perspectives course aims to foster student encounter with and critical reflection upon cultures, identities, and ways of being in global contexts beyond the United States.

Students will consider substantial scholarship, cultural production, perspectives, and voices from members of communities under study, as sources permit. In Global Perspectives courses, students will do one or more of the following:

1. **Engage** texts, literature, art testimonies, practices, or other cultural products that reflect systems of meaning or beliefs beyond the U.S. context;
2. **Analyze** power relations involving different nations, peoples, and identity groups or world regions;
3. **Examine** hierarchy, marginality, or discrimination based on race, ethnicity, gender, gender identity, religion, sexuality, nationality, or ability (or some combination of these).

and undertake one or more of the following:

- **Discuss** possibly unfamiliar topics using critical vocabulary and concepts.
- **Practice respectful listening and civil dialogue** around controversial issues.

College of Arts and Sciences

Christopher J. Poulsen, Dean

541-346-3902

401 Tykeson Hall

The College of Arts and Sciences is the academic and intellectual hub of the University of Oregon, providing a core liberal arts curriculum to the vast majority of UO undergraduates—including those who will go on to earn a degree in one of the professional schools such as journalism or business.

The University of Oregon was founded in 1876 on a liberal arts curriculum, which has evolved over time to meet the needs of contemporary students. The fundamental academic mission of the College of Arts and Sciences is to foster a solid and broad general education, which includes the cultivation of quantitative, analytical, and communication skills; an understanding of social and intellectual history; an appreciation of literary and artistic expression; and habits of creative and critical thinking.

Building on its foundational undergraduate curriculum, the college offers 50 major degree programs in the humanities, social sciences, and natural sciences. Moreover, the College of Arts and Sciences is the heart of the university's research enterprise. The college has almost 900 faculty members, including teaching specialists and research scholars who are engaged in active research programs and make original contributions to their respective fields of knowledge. Because of this, students have the opportunity to learn from leading researchers while receiving a liberal arts education that prepares them to be successful global citizens in the 21st century.

Students in the College of Arts and Sciences can take advantage of integrated academic and career advising to help them set their path forward, through a full set of services located in Willie and Donald Tykeson Hall. See "Advising" below for details.

Liberal Education

Social, political, and economic change is accelerating at a phenomenal pace, and career paths are evolving in response to these changes. When surveyed, employers say they place high value on critical thinking and problem solving; oral and written communication; teamwork and collaboration; adaptability to new and emerging technologies; leadership skills to guide, motivate, prioritize, and delegate work; and global and intercultural fluency. These are the very skills and knowledge that students gain from a liberal arts education.

No matter what their specific career paths, all UO students benefit from an educational foundation that emphasizes how values, history, and context combine with creative thought and informed inquiry to determine the best way forward, in both professional and civic life. A liberal arts education provides an essential framework for a lifetime of learning, work and growth in a world where many professions are undergoing profound, sweeping transformations.

Academic Programs

The College of Arts and Sciences offers numerous disciplinary and interdisciplinary degree programs and majors, a varied selection of minors, and several certificates. These are described in detail in the

materials that follow. As part of the requirements for graduation from the University of Oregon, every student undertakes in-depth study in an area of specialization that is the student's major. Many students find it advantageous to complete a minor or certificate in a further area of specialization that complements the major. Some minor programs offer a student whose major is in the College of Arts and Sciences the chance to gain expertise in subjects offered by a professional school.

Preparatory Programs

The college has preparatory programs for professional specializations. Information about these programs—those offered by the College of Arts and Sciences and those offered elsewhere in the university—is in the **Academic Resources** section of this catalog.

Undergraduate Research Opportunities

The University of Oregon offers the libraries, labs, equipment, resources, and academic opportunities of a major research institution, in a learning environment scaled for faculty-student interaction that feels more typical of a private liberal arts college.

More than 20 departments in the College of Arts and Sciences offer an honors program with an undergraduate research thesis requirement.

In addition, undergraduate students are encouraged to participate in faculty research projects. Arrangements must be made with the individual faculty member and the department, or coordinated through the Center for Undergraduate Research and Engagement (<https://cure.uoregon.edu/>) and the Undergraduate Research Opportunity Program (<https://uop.uoregon.edu/>). Other opportunities are available via Handshake, the platform UO uses for employment opportunities.

Opportunities are plentiful: last year, almost 800 undergraduates enrolled in research credit hours in the College of Arts and Sciences.

Advising

Students who are exploring majors in the College of Arts and Sciences can develop a personalized plan for success at UO and beyond through the integrated academic/career advising services in Tykeson Hall. This new building—designed from the ground up for student success—offers a suite of services that help students consider their life experiences, strengths, interests, and individual, family, and cultural values in the context of a wide array of educational options and career possibilities.

Advisors in Tykeson Hall are organized by six Flight Paths. Flight Paths are thematic categories based on academic and career interests—designed to help students find an intellectual home early in their academic careers by facilitating intentional exploration of their interests, strengths, and values. The University of Oregon's six Flight Paths are Healthy Communities; Scientific Discovery & Sustainability; Media, Arts & Expression; Global Connections; Industry, Entrepreneurship & Innovation; and Public Policy, Society & Identity.

Exploring students and students declared in majors and minors in the College of Arts and Sciences are encouraged to meet with Tykeson Academic and Career Advisors who are specialized in the majors in the Flight Path. College of Arts and Sciences majors and minors should also continue to seek out advising from departmental faculty when they are looking for specific information about their chosen major or career field, or detailed information about their department and its curricular and co-curricular offerings.

Freshman students must declare their majors by the end of their second year, and transfer students must declare their majors by the end of their first year at UO.

The University Career Center is also located in Tykeson Hall, and its career readiness coaches can help students prepare for life beyond college by building resume-writing or interviewing skills, locating internships or other meaningful experiences, and connecting with employers.

Preparation for Kindergarten through Secondary School Teaching Careers

Students who complete a degree in a College of Arts and Sciences department are eligible to apply to the College of Education's fifth-year licensure programs in middle-secondary and elementary teaching. More information is available in the **College of Education** section of this catalog.

African Studies

Melissa Graboyes, Program Director

541-346-5051

541-346-5041 fax

175 Prince Lucien Campbell Hall

5206 University of Oregon

Eugene, Oregon 97403-5206

The African Studies Program encourages teaching and scholarship on sub-Saharan Africa, North Africa, and the wider African diaspora. The program is a focal point for students and faculty members with expertise in African studies, encouraging course offerings related to Africa, promoting study abroad programs and internships, raising funds to expand African studies resources, and organizing campus and local community events pertaining to Africa. In addition, the program supports faculty and student research on Africa and facilitates dissemination of research through the lecture series.

Students may earn an undergraduate minor in African studies. A graduate specialization track in African studies is also available.

Overseas Opportunities

The university study abroad office organizes a journalism program in Ghana, a global health program in Ghana, and a summer Swahili program in Zanzibar that runs every other year. There are also many other opportunities for students to enroll in study abroad programs in Africa, which could involve enrolling at foreign universities or participating in specialized training programs. Financial aid is available for many of these programs. For more information, see <https://geo.uoregon.edu/programs> or call the Office of International Affairs, 541-346-3207.

Students in all University of Oregon study-abroad programs enroll in courses with subject codes that are unique to individual programs. Special course numbers are reserved for overseas study. See International Affairs in the **Academic Resources** section of this catalog. Students may earn academic credit while gaining career-related work experience through internships in sub-Saharan Africa overseen by GlobalWorks Internships program. Financial aid is available. Information may be requested from the Office of International Affairs.

African Language Study

The UO offers first- and second-year Modern Standard Arabic and Swahili, and occasionally offers these courses at the third-year level. UO 5-credit Arabic and Swahili courses satisfy the university's two-year BA foreign-language requirement. For courses in Arabic, see the Religious Studies (p. 483) section of this catalog.

The University of Oregon also offers opportunities for self-study, with the assistance of native speakers, in Akan, Wolof, Bamana-Dyula, Hausa-Fulani, Shona, and Amharic. Information is available from the Yamada Language Center at <https://babel.uoregon.edu/language-programs/self-study>; or call 541-346-4011.

Participating Faculty

Undergraduate Studies

Minor in African Studies

Students who want to earn an undergraduate minor in African studies must satisfy the following requirements, comprising 28 graded credits. Current Africa-related courses that count toward the minor are listed on the program website (africa.uoregon.edu (<http://africa.uoregon.edu>)) under the African studies minor link.

Code	Title	Credits
Core Courses		
AFR 215	Introduction to African Studies	4
History of Africa		
Select one of the following (or an approved alternative):		
HIST 325	Precolonial Africa	
HIST 326	Colonial and Postcolonial Africa	
ANTH 453	African Archaeology	
Contemporary African Issues		
Select one of the following (or an approved alternative):		
AFR 199	Special Studies: [Topic] (Health and Disease in Africa)	
BI 309	Tropical Diseases in Africa	
ENVS 450	Political Ecology	
FLR 225	Voices of Africa	
FR 407	Seminar: [Topic] (Contemporary Africa)	
GEOG 209	Geography of the Middle East and North Africa	
GEOG 475	Advanced Geography of Non-European-American Regions: [Topic] (Africa—Politics, Development, and Environment)	
HIST 417	Society and Culture in Modern Africa: [Topic]	

GLBL 345	Africa Today: Issues and Concerns	
Culture, Ethnicity, and Identity in Africa		4
Select one of the following (or an approved alternative):		
ANTH 410	Experimental Course: [Topic]	
DANC 185	African I	
DANC 199	Special Studies: [Topic] (African Drumming)	
FLR 225	Voices of Africa	
FR 407	Seminar: [Topic]	
FR 490	20th-Century Literature: [Topic] (Postcolonial Africa or Mongo Beti)	
LING 407	Seminar: [Topic] (African Language Families)	
MUS 462	Popular Musics in the African Diaspora	
Electives		
Electives (see Electives list) ¹		12
Total Credits		28

- ¹ Electives must be approved by a faculty advisor and must be at the 300 or 400 level, although as much as 8 credits of Swahili courses at any level may be applied. Recommended courses include any courses listed in the course list or electives list. Additional courses may be approved by the faculty advisor. For study abroad, courses will be evaluated for UO credit on a case-by-case basis through the standard Office of International Affairs procedures for assigning credit and course equivalency. Students consult with the faculty member who is sponsoring their study-abroad experience to prepare an agreement that must include the following:
- a list of readings relevant to the experience, which are to be completed prior to and during the experience
 - a reflective journal on the student's activities and cross-cultural experiences
 - a final paper integrating preparatory readings with the experience (approximately 4,500 words, plus references)

An African studies minor advisor must approve the credits earned in study-abroad or internship programs.

Electives

Code	Title	Credits
AFR 407	Seminar: [Topic] (Africa in Oregon)	1-5

WGS 432	Gender, Environment, and Development	4

¹ Repeatable.

Deviations from the requirements listed must be approved by an African studies advisor.

Restrictions

No more than 8 credits may be from courses with 25 to 49 percent Africa content. No more than 4 credits may be from performance courses. No more than 12 credits may be from a single department. No more than 4 credits may be taken pass/no pass. Students must consult with an African studies advisor to confirm that the curricular overlap between the student's major and the African studies minor maintains the principle of academic breadth.

Graduate Studies

Arranging a graduate degree program with a concentration in African studies is possible in a number of departments and programs in the College of Arts and Sciences and the School of Music and Dance. Anthropology, biology, dance, environmental studies, French (in the Romance languages department), folklore and public culture, geography, history, international studies, linguistics, political science, and sociology have faculty members with expertise and strong interest in this area.

Students should consult with the affiliated faculty members regarding such arrangements.

Graduate Specialization

Students in a University of Oregon MA or PhD program may choose a graduate specialization in African studies. The student will be assigned an advisor within African studies and must satisfy the following requirements:

Code	Title	Credits
ANTH 650		4
	Approved graduate course in African history	4
	Approved graduate course on issues in contemporary Africa	4
	Approved graduate course dealing with issues in African culture, ethnicity, and identity	4
Total Credits		16

American English Institute

Cheryl A. Ernst, Executive Director

541-346-3945

541-346-3917 fax

1787 Agate St.

5212 University of Oregon

Eugene, Oregon 97403-5212

aei@uoregon.edu

The American English Institute offers English language programs for adults who want to improve their English proficiency in order to perform effectively in an academic or professional setting:

- Intensive English Program
- Academic English for International Students Program
- Academic English for International Graduate Students Program
- Other innovative program offerings

Institute instructors are university faculty members with specialized training in linguistics, applied linguistics, or teaching English as a second language. Classes begin in September, January, March, and June.

Intensive English Program

The Intensive English Program (IEP) consists of a seven-level curriculum with electives. Students may enroll for the full 10-week term or one of two four-week sessions: 1) the first four weeks of the program or 2) the last four weeks of the program.

The curriculum is divided into integrated skills courses focusing on reading and writing, grammar, and speaking and listening. Students take

the core courses and one or more elective courses for a total of 18 to 22 hours of instruction per week.

The elective courses focus on areas of special concern or interest to students, including targeted skill practice for academic vocabulary, reading fluency, pronunciation, and test preparation. A rotating selection of courses may include on subjects such as journalism, current events, English as a world language, the world of hip-hop, and English conversation.

Students in good academic standing may enroll, with approval from the institute, in one regular university course (mathematics, foreign languages, or music performance) at an additional cost. Students who have partially completed the program may enroll in other university courses, with advising and approval from the institute.

Students receive additional language and study support through the Tutoring Office, where trained and supervised tutors help students with course work, conversation, listening, reading, composition, and pronunciation.

In addition to academics, students may participate in a selection of extracurricular activities. These activities include a conversation partner program, culturally and socially relevant activities, and volunteer and community-service programs.

Student Services

The institute's services for students in the intensive and short-term programs include host families, advising, an extensive orientation program prior to the start of classes, coordinated interaction through tutoring, conversation partners, and planned activities in Eugene and around Oregon.

Admission Procedures

The institute's Intensive English Program is open to students who have successfully completed secondary school and are able to demonstrate sufficient financial support for study at the institute. To apply, submit the following materials:

1. An American English Institute application form
2. Original or certified copies of the most recent degree or diploma received
3. A personal (or guarantor's) bank statement showing the exact amount available for the period of study, or evidence of a scholarship
4. A nonrefundable application fee of \$110

Admission to the Intensive English Program does not imply admission to any other school or program at the University of Oregon. Inquiries about admission should be directed to members of the institute's admissions office staff at aei@uoregon.edu.

Academic English for International Students

This program is offered to matriculated students who have scored between 61 and 87 on the internet-based TOEFL, between 500 and 575 on the paper-based TOEFL, or below 7.0 on the International English Language Testing System (IELTS) examination, or who request additional training in English as a second language for academic work. Courses are offered in listening, speaking, reading and vocabulary, and writing. International First-year Interest Groups (iFIG) are available in fall and winter. A placement test is required before registering. These

courses earn university credit and are taken at the same time as other university course work. Information about this program is available from the American English Institute main office, its advising office, the First-Year Programs office, and International Student and Scholar Services in the Office of International Affairs.

Academic English for International Graduate Students

Graduate-level English (GRST) courses provide language support in academic writing and oral communication skills to international graduate students. These include two levels of graduate and scholarly writing in which students develop and polish skills in academic discourse conventions, vocabulary choice, and the grammatical accuracy needed for a variety of graduate-level writing tasks. Other courses focus on advanced speaking and presentation skills, specifically fluency, pronunciation, pragmatics, and strategic competence needed for clear, effective communication in various academic contexts, including professional contexts and teaching as a graduate employee (GE). Testing is provided for the GE English language requirement. Information about this program is available from the American English Institute office, the UO Office of International Affairs, and the UO Division of Graduate Studies.

Innovative Programming

The American English Institute offers customized on-campus, online, and hybrid courses, workshops, and webinars. Specialized programs, curriculum, and materials can also be designed upon request in academic or professional areas of interest such as English-language learning, teacher training, university preparation, English for specific purposes, and US language and culture. A minimum number of students is required to offer these specialized programs.

Faculty

Edward Adamson, instructor (academic vocabulary, writing and grammar). BA, 1997, Wisconsin, Madison; MEd, 2006, Minnesota, Twin Cities. (2011)

John Busch, instructor (English linguistics, reading and vocabulary). BA 1982, Minnesota, Twin Cities; MA, 2007, Oregon. (2013)

Thomas Delaney, senior instructor (Teaching English to speakers of other languages, testing and assessment, differences in language learning); Academic English for International Speakers coordinator. BA, 1994, Loyola Marymount; MA, 1998, Monterey Institute of International Studies; PhD, 2009, Auckland. (2006)

Nancy C. Elliott, senior instructor (oral communication skills, English dialectology and sociolinguistics). BA, 1982, MA, 1986, Kansas; PhD, 2000, Indiana, Bloomington. (2010)

Robert K. Elliott, instructor (pronunciation and intonation, international GE training, distance education). BA, 1988, California, Los Angeles; MA, 1994, San Francisco State. (2007)

Alicia R. Going, senior instructor II. BA, 1987, Seattle; MA, 1995, School for International Training. (2003)

Monica Hatch, instructor (academic English for international students). BA, 1994, Georgia; MA, 2011, Georgia State. (2011)

Char Heitman, senior instructor (teacher training, cross-cultural communication, oral skills and fluency). BA, 1988, Northern Iowa; MA, 1993, Iowa. (1997)

Jessica Lynch, senior instructor (intensive English instruction, academic English for international students, assessments). BA, 2006, Oregon; MA, 2008, New Mexico State. (2011)

Tonya Mildon, instructor (academic writing, academic oral communication, academic success). BA, 1990, Washington (Seattle); MA, 2000, Central Washington. (2011)

Sueanne Parker, senior Instructor (grammar, critical reading, test preparation). BA, 2001, Western Washington; MA, 2005, Seattle Pacific. (2006)

Patricia Pashby, senior instructor (second-language teaching, teacher training, vocabulary acquisition); coordinator, international graduate teaching fellow program. BA, 1987, MA, 1990, San Francisco State; EdD, 2002, San Francisco. (2001)

Lara M. Ravitch, senior instructor (curriculum design, assessment, content-based instruction). BA, 1998, Connecticut College; MA, 2002, Monterey Institute of International Studies. (2011)

Jennifer Rice, senior instructor II (English as a second language oral-aural skills, curriculum and materials design, objectives-based course assessment). BS, 2000, Ashland; MA, 2002, Western Oregon. (2010)

Korey Rice, senior instructor (discussion skills assessment, curriculum development). BA, 1999, Ashland; MS, 2004, Shenandoah. (2004)

Robin Rogers, senior instructor (curriculum development, materials writing, assessment procedures). BS, 2001, George Fox; MA, 2006, Seattle Pacific. (2010)

Janine Sepulveda, senior instructor II (reading, writing, grammar). BA, 1991, Oregon; MA, 1995, Monterey Institute of International Studies. (1995)

Beth Sheppard, senior instructor II (speaking and listening instruction). BA, 2002, California, Berkeley; MA, 2008, Oregon. (2008)

Thomas Tasker, senior instructor (academic reading and writing, curriculum development). MA, 1992, Illinois, Chicago. (2013)

Misti Williamsen, senior instructor (academic reading and writing, curriculum development, listening and speaking instruction). BA, 2005, MA, 2010, Oregon. (2010)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Emerti

Laura G. Holland, senior instructor (intensive English-language teaching, teacher training, online distance education). BS, 1981, Wheelock College; MA, 1991, Columbia. (2010)

Academic English for International Students Courses

AEIS 101. Introductory Academic Oral Communication. 4 Credits.

Focuses on strategies to improve aural-oral academic communication through discussions, seminars, dialogue, videos, and lectures. Sequence with AEIS 102.

Pre- or coreq: placement test.

AEIS 102. Advanced Academic Oral Communication. 4 Credits.

Focuses on strategies to improve aural-oral academic communication through discussions, seminars, dialogue, and presentations. Sequence with AEIS 101.

Pre- or coreq: placement test or AEIS 101 with a grade of C– or better.

AEIS 107. Reading Academic Discourse. 4 Credits.

Focuses on interactive reading of academic text, building reading strategies for better comprehension, speed, and confidence, and developing critical reading skills.

Prereq: placement test.

AEIS 108. Advanced Reading Academic Discourse. 4 Credits.

Focuses on interactive reading of academic text, reading strategies for better comprehension, speed, and confidence, and further development of critical, interpretive and evaluative reading. Sequence with AEIS 107 (optional).

Prereq: placement test or AEIS 107 with a grade of C– or better.

AEIS 110. Introductory Academic Writing. 4 Credits.

Introduces conventions of expository essay writing. Emphasizes clear, effective written communication and development of editing skills. Covers grammar in context. Sequence with AEIS 111, AEIS 112.

Prereq: placement test.

AEIS 111. Intermediate Academic Writing. 4 Credits.

Intermediate writing for nonnative speakers of English. Critical analysis of academic texts leading to summary, paraphrase, essay-examination responses, and expository essays. Sequence with AEIS 110, AEIS 112.

Prereq: placement test or C– or better or P in AEIS 110.

AEIS 112. Advanced Academic Writing. 4 Credits.

Advanced writing for non-native speakers of English. Critical reading of academic texts for response in various academic modes: reporting research, critical analysis, and argumentation. Sequence with AEIS 110, AEIS 111.

Prereq: placement test or C– or better or P in AEIS 111.

AEIS 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

AEIS 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

Graduate Studies Courses

GRST 602. Supervised College Teaching. 1-5 Credits.

Repeatable.

GRST 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

GRST 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

GRST 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

GRST 610. Experimental Course. 1-5 Credits.

Repeatable.

GRST 621. Academic Discourse. 4 Credits.

For international graduate students. Strategies for effective interaction and discussion in academic settings, including lectures, seminars, and campus events. Feedback on intelligibility, accurate language use, and cultural appropriateness.

GRST 624. Teaching in United States Universities. 4 Credits.

Strategies for successful communication with undergraduates. Focuses on increasing cross-cultural awareness and developing language and interaction skills for effective instruction. Topics include presenting material, fielding questions, leading discussions, supervising labs.

GRST 626. Professional Presentations. 4 Credits.

Concepts and principles of academic and professional presentations for graduate students, focusing primarily on the needs of international students. Includes both theory and application in terms of cultural norms, rhetorical style, and linguistic performance. Repeatable twice for a maximum of 12 credits.

GRST 631. Graduate and Scholarly Writing I. 4 Credits.

Prepares first-year international graduate students to write academic papers; emphasis on fluency, organization, discourse conventions, accuracy, documentation, and appropriateness for writing tasks, including summaries, reviews, projects, reports, and research papers.

Anthropology

Frances J. White, Department Head

541-346-5278

541-346-0668 fax

308 Condon Hall

Anthropology, the study of humans, includes sociocultural anthropology, biological anthropology, and archaeology. Courses offered by the Department of Anthropology span the natural sciences, social sciences, and humanities and provide a broad understanding of human nature and society for students in other fields and for anthropology majors.

The broad perspective on human culture and biology that anthropology offers can enhance studies in many other fields, including history, psychology, international studies, environmental studies, ecology and evolution, geography, earth system science, literature, political science, folklore and public culture, language study, art history, and public policy and management.

Faculty

Scott A. Blumenthal, assistant professor, (paleoanthropology, biological anthropology, archaeology). BA, 2008, Illinois, Urbana-Champaign; PhD, 2015, City University of New York. (2018)

Alison K. Carter, assistant professor (archaeology). BA, 2001, Oberlin College; MS, 2007, PhD, 2013, Wisconsin, Madison. (2017)

L. Zachary DuBois, assistant professor (biocultural anthropology, gender and LGBT experience, stress and social determinants of health). BA, 2002, PhD, 2012, Massachusetts, Amherst. (2018)

Stephen Dueppen, associate professor (archaeology). BA, 1999, California, San Diego; MA, 2004, PhD, 2008, Michigan. (2012)

Maria Fernanda Escallón, assistant professor (sociocultural anthropology, cultural heritage). BA, 2003, MA, 2004, Los Andes; MA, 2009, PhD, 2016, Stanford. (2016)

Scott M. Fitzpatrick, professor; associate director, Museum of Natural and Cultural History. (island and coastal archaeology, Pacific, Caribbean) BA, 1994, Eastern Washington; MA, 1996, Montana; PhD, 2003, Oregon. (2012)

Stephen R. Frost, professor (human-primate evolution and paleontology, morphometrics, Africa). BA, 1994, California State, Long Beach; PhD, 2001, City University of New York, City College. (2004)

Lamia Karim, associate professor (cultural anthropology). BA, 1984, Brandeis; MA, 1993, Michigan; PhD, 2001 Rice. (2003)

Gyoung-Ah Lee, associate professor (paleoethnobotany, archaeology, East Asia); director, graduate studies. BA, 1992, Seoul National; MSc, 1997, PhD, 2003, Toronto. (2007)

Leah Lowthorp, assistant professor (cultural anthropologist, folklorist, critical heritage). BA, 2003, California, Berkeley; MA, 2005, Pennsylvania; MA, 2007, Institut Européen des Hautes Etudes Internationales; PhD, 2013, Pennsylvania. (2018)

Johanna Bard Richlin, assistant professor (religion, migration, and affect; U.S., Brazil, Europe) BA, 2008 Wesleyan University; M.T.S. 2010 Harvard Divinity School; MA, 2012, PhD, 2016, Stanford University. (2018)

Michelle Scalise Sugiyama, senior instructor 1, BA, 1985, San Diego State, MA, 1988, PhD, 1997 California Santa Barbara. (2015)

Philip W. Scher, professor (Caribbean, politics of culture, transnationalism); divisional dean, social sciences, College of Arts and Sciences. BA, 1987, Brown; MS, 1991, PhD, 1997, Pennsylvania. (2002)

J. Josh Snodgrass, professor (human biology, human nutrition and energetics, skeletal biology); associate vice provost, undergraduate education and student success. BA, 1995, California, Santa Cruz; MA, 1998, Florida; PhD, 2004, Northwestern. (2005)

Lynn Stephen, professor, Philip H. Knight Chair. (ethnicity and political economies, gender, U.S. Latinos and Latin America); BA, 1979, Carleton; PhD, 1987, Brandeis. (1998)

Kirstin Sterner, associate professor (molecular anthropology). BA, 2001, MA, 2005, PhD, 2009, New York. (2011)

Lawrence S. Sugiyama, professor (evolutionary psychology, behavioral ecology, biocultural anthropology). BA, 1985, MA, 1991, PhD, 1996, California, Santa Barbara. (1996)

Nelson Ting, associate professor (molecular anthropology, primate genetics, ecology, conservation Africa); director, undergraduate studies. BA, 1999, Washington (St. Louis); MA, 2001, Missouri, Columbia; PhD, 2008, City University of New York. (2011)

Larry R. Ulibarri, instructor; BA, 2002, Northern Colorado; MA, 2006, PhD, 2013, Colorado, Boulder. (2019)

Frances J. White, professor (evolution of primate behavior, Africa); department head. BA, 1980, MA, 1984, Cambridge; PhD 1986, State University of New York, Stony Brook. (2001)

Emeriti

C. Melvin Aikens, professor emeritus. BA, 1960, Utah; MA, 1962, PhD, 1966, Chicago. (1968)

William S. Ayres, professor emeritus. BA, 1966, Wyoming; PhD, 1973, Tulane. (1976)

Aletta Biersack, professor emerita. BA, 1965, MA, 1969, 1972, PhD, 1980, Michigan. (1982)

Don E. Dumond, professor emeritus. BA, 1949, New Mexico; MA, 1957, Mexico City College; PhD, 1962, Oregon. (1962)

Jon M. Erlandson, professor emeritus. BA, 1980, MA, 1983, PhD, 1988, California, Santa Barbara. (1990)

John R. Lukacs, professor emeritus. BA, 1969, MA, 1970, Syracuse; PhD, 1977, Cornell. (1976)

Geraldine Moreno Black, professor emerita. BA, 1967, State University of New York, Buffalo; MA, 1970, Arizona; PhD, 1974, Florida. (1974)

Madonna L. Moss, professor emerita. BA, 1976, William and Mary; MA, 1982, PhD, 1989, California, Santa Barbara. (1990)

Theresa O'Neill, associate professor emerita. BA, 1981, Notre Dame; MA, 1985, PhD, 1992, Harvard. (1998)

Carol T. Silverman, professor emerita. BA, 1972, City University of New York, City College; MA, 1974, PhD, 1979, Pennsylvania. (1980)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Participating

Andrew Boehm, Museum of Natural and Cultural History

Thomas J. Connolly, Museum of Natural and Cultural History

Ann Craig, Museum of Natural and Cultural History

Edward Davis, Museum of Natural and Cultural History

Pamela E. Endzweig, Museum of Natural and Cultural History

Samantha Hopkins, Museum of Natural and Cultural History

Dennis L. Jenkins, Museum of Natural and Cultural History

Elizabeth Kallenbach, Museum of Natural and Cultural History

Jaime Kennedy, Museum of Natural and Cultural History

Jeanne McLaughlin, Museum of Natural and Cultural History

Patrick O'Grady, Museum of Natural and Cultural History

Gregory Retallack, Museum of Natural and Cultural History

Chris Ruiz, Museum of Natural and Cultural History

- **Bachelor of Arts**
- **Bachelor of Science**
- **Minor in Anthropology**
- **Minor in Forensic Anthropology**

Undergraduate Studies

Preparation

High school students planning a major in anthropology should have a sound background in English, biological science, and mathematics (preferably algebra). Study in a modern second language is desirable.

Students transferring with two years of college work should have introductory course work in the social sciences. Introductory biology and the equivalent of two years of college-level study in a second language are recommended.

Careers

A bachelor's degree in anthropology prepares the graduate for employment in areas where clear communication, analysis and synthesis, and respect for diversity are valued. Anthropology provides a suitable background for positions with federal, state, and local agencies and prepares the student for citizenship in a multicultural world.

Students seeking work as professional anthropologists should plan for advanced degrees in anthropology. Graduates with master's or PhD degrees may find work in government, community colleges, or museums. For university teaching and research careers, a PhD degree is necessary.

Bachelor's Degree Requirements

The department offers course work leading to bachelor of arts (BA) and bachelor of science (BS) degrees. Major requirements are the same for each. Differences between the two degrees are explained under Requirements for Bachelor of Arts and Bachelor of Science (p. 26) in the **Bachelor's Degree Requirements** section of this catalog.

Bachelor of Arts Requirements

Code	Title	Credits
Core Requirements		12
ANTH 145	Principles of Archaeology	
ANTH 161	Introduction to Cultural Anthropology	
ANTH 270	Introduction to Biological Anthropology	
Breadth Requirements		12
One upper-division geographic area course in archaeology		
One course in cultural anthropology		
One courses in biological anthropology		
Four upper-division anthropology courses in one area of concentration ¹		16
Two upper-division anthropology electives ²		8
Total Credits		48

¹ Areas of concentration: cultural anthropology, biological anthropology, archaeology. ANTH 406, ANTH 408, ANTM 406, and ANTM 408, may not be used to fulfill Area of Concentration requirement. Courses that may only be taken P/NP, e.g., ANTH 401, 403, and 405 do not count toward the fulfillment of major requirements.

² No more than 8 credits of independent study and 8 credits of eligible courses in other departments may be used to fulfill Anthropology electives requirement.

Bachelor of Science Requirements

Code	Title	Credits
Core Requirements		12
ANTH 145	Principles of Archaeology	
ANTH 161	Introduction to Cultural Anthropology	
ANTH 270	Introduction to Biological Anthropology	
Breadth Requirements		12
One upper-division geographic area course in archaeology		
One course in cultural anthropology		
One courses in biological anthropology		
Four upper-division anthropology courses in one area of concentration ¹		16
Two upper-division anthropology electives ²		8
Total Credits		48

¹ Areas of concentration: cultural anthropology, biological anthropology, archaeology. ANTH 406, ANTH 408, ANTM 406, and ANTM 408, may not be used to fulfill Area of Concentration requirement. Courses that may only be taken P/NP, e.g., ANTH 401, 403, and 405 do not count toward the fulfillment of major requirements.

² No more than 8 credits of independent study and 8 credits of eligible courses in other departments may be used to fulfill Anthropology electives requirement.

Courses used to fulfill major requirements must be taken for letter grades and passed with a C– or better. To ensure a liberal education, anthropology majors are strongly encouraged to limit their anthropology credits to 52. Majors contemplating graduate work are advised to complete two years of a second language. Statistics is desirable for those with interests in biological anthropology and archaeology.

Majors must meet with an anthropology advisor at least once a year.

Cultural Resource Management

The following courses are recommended for students who want a focus in cultural resource management:

Code	Title	Credits
ANTH 340	Fundamentals of Archaeology	4
ANTH 344	Oregon Archaeology	4
ANTH 408	Workshop: [Topic] (Archaeology Field School)	1-21
ANTH 411	Politics, Ethnicity, Nationalism	4
ANTH 443	North American Archaeology	4
ANTH 449	Cultural Resource Management	4
AAAP 411	Introduction to Historic Preservation	3
AAAP 451	Historic Survey and Inventory Methodology	3

Honors

The Anthropology Honors Program is designed for outstanding Anthropology majors interested in independent exploration of a special topic of their own choosing under the guidance of a faculty member.

Students should identify an area of research interest during their junior years or earlier, and approach members of the faculty with whom they want to work. It is best if a student can take a class taught by the faculty

member during the junior year (at the latest). Some faculty members require students to take a course from them before allowing students to work in their laboratories.

Complete form with faculty advisor: Individualized Study Form (https://anthropology.uoregon.edu/files/2020/12/ISform-ANTH_Oct2020.pdf)

An honors thesis is expected to make a substantial and persuasive argument situated with in, and contributing to, current critical debates while demonstrating exceptional verbal clarity and sophistication.

If you intend to pursue honors in Anthropology you will need to notify the department via email, anthro@uoregon.edu, no later than the first term of your senior year.

Must meet all requirements:

- Maintains at least a 3.75 GPA in Anthropology coursework
- Maintain a cumulative 3.50 overall GPA
- Submit an original undergraduate thesis written under the guidance of a departmental faculty member, who serves as thesis advisor.
- Honors thesis must be submitted to thesis advisor **3 weeks** before the end of the term you are graduating. (*example Graduating: Fall – last week in November, Winter- last week in April, Spring- last week in May, Summer- last week in August*)
- An electronic copy of Honors Thesis emailed to anthro@uoregon.edu.

Minor Requirements

Code	Title	Credits
100- or 200-level anthropology course		4
300- or 400-level anthropology courses		12
400-level anthropology courses		4
Elective anthropology course at any level		4
Total Credits		24

The minor in anthropology complements a major in another discipline. Courses used to complete the minor must be chosen in consultation with an anthropology advisor. Of the 24 credits required in anthropology, 20 must be graded and passed with a C– or better.

Minor in Forensic Anthropology

Code	Title	Credits
Required Core Courses:		8
ANTH 270	Introduction to Biological Anthropology	
ANTH 176	Introduction to Forensic Anthropology	
Choose three courses from the following:		12
ANTH 366	Human Osteology Laboratory	
ANTH 376	Genomics and Anthropology	
ANTH 473	Advanced Forensic Anthropology	
ANTH 474	Human Skeletal Pathology	
ANTH 479	Taphonomy: Bones, Bugs, and Burials	
Electives - Choose one course from the following: ¹		4
ANTH 162	Introduction to Medical Anthropology	
ANTH 145	Principles of Archaeology	

ANTH 471 Zooarchaeology: [Topic]

Total Credits **24**

¹ Students may also select an additional course from the second section to satisfy the electives section.

Middle and Secondary School Teaching Careers

The College of Education offers a fifth-year program for middle-secondary teaching licensure in social studies. This program is described in the **College of Education** section of this catalog.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Bachelor of Arts in Anthropology

An optional minor is included in this example. Please consult with an anthropology advisor concerning a plan that is best for you.

Course	Title	Credits	Milestones
First Year

- Master of Arts
- Master of Science
- Doctor of Philosophy

Graduate Studies

There are no absolute requirements for admission to the master's degree program. A bachelor's degree in anthropology is helpful but not required. Admission is limited and preference is given to applicants with excellent academic records and Graduate Record Examinations (GRE) scores who have had at least a solid beginning in anthropology, who have had some second-language training, and who can demonstrate evidence of a sincere interest in the field. It typically takes two years to complete the program.

Three advanced degrees are offered in anthropology: the master of arts (MA), the master of science (MS), and the doctor of philosophy (PhD). These degrees entail work in the following subfields: archaeology, cultural anthropology, or biological anthropology. Graduate students must demonstrate competence in these subfields, typically through work at the master's level. A master's paper is required, but a thesis is not required. The MA requires competence in a second language. There is no language requirement for the MS, but the candidate for that degree must demonstrate proficiency in a skill such as statistics, computer science, or paleogeography, approved by the department faculty.

Graduate students become members of the Association of Anthropological Graduate Students and are represented in the Student Senate.

Master of Arts Degree Requirements

Code	Title	Credits
Graduate-level anthropology courses ¹		17
Select each of the following:		17
ANTH 615	Proseminar in Anthropology ³	
ANTH 681	Archaeology and Anthropology ³	
ANTH 680	Basic Graduate Physical Anthropology ²	
ANTH 688	Social Theory I ⁴	
ANTH 689	Social Theory II ⁴	
Other graduate-level courses		11
Total Credits		45

- ¹ Students spend the first year (and in some instances the first two years) establishing a broad foundation in anthropology with these courses, in which they must earn grades of B– or better.
- ² Basic Graduate Physical Anthropology (ANTH 680) is required for all majors.
- ³ It is preferable that majors take ANTH 615 and ANTH 681 in their first two years.
- ⁴ Social Theory I (ANTH 688) and Social Theory II (ANTH 689) are required for majors focusing on cultural anthropology; majors focusing on archaeology and biological anthropology must select one.

The MA requires competence in a second language.

Master of Science Degree Requirements

- ² Basic Graduate Physical Anthropology (ANTH 680) is required for all majors.
- ³ It is preferable that majors take ANTH 615 and ANTH 681 in their first two years.
- ⁴ Social Theory I (ANTH 688) and Social Theory II (ANTH 689) are required for majors focusing on cultural anthropology; majors focusing on archaeology and biological anthropology must select one.

There is no language requirement for the MS, but the candidate for that degree must demonstrate proficiency in a skill such as statistics, computer science, or paleogeography, approved by the department faculty.

There are no absolute requirements for admission to the master's degree program. A bachelor's degree in anthropology is helpful but not required. Admission is limited, and preference is given to applicants with excellent academic records and Graduate Record Examinations (GRE) scores who have had at least a solid beginning in anthropology, who have had some second-language training, and who can demonstrate evidence of a sincere interest in the field. It typically takes two years to complete the program.

PhD Degree Requirements

Admission to the doctoral program is contingent on the possession of a valid master's degree in anthropology from a recognized institution or on the completion of three of the master's core courses. Those who enter with a master's degree in another discipline take master's core courses early in the program.

Formal requirements of time and credit are secondary, but no candidate is recommended for the degree until the minimum Division of Graduate Studies requirements for credits, residence, and study have been satisfied.

The department requires competence in two modern second languages, one language and one skill, or two skills (including those earned for an MA or MS) approved by the department's faculty. The student's progress is measured by performance in the core courses and other course work; two comprehensive examinations covering two special fields of concentration in anthropology; a formal dissertation prospectus; and, finally, a doctoral dissertation. The dissertation should be based on original research, which ordinarily involves fieldwork or laboratory work, and should be written in a professional and publishable style appropriate to the subfield of specialization.

For information about general requirements, see the Division of Graduate Studies (p. 885) section of this catalog. More information about programs in anthropology may be obtained from the department.

Museum of Natural and Cultural History

The Museum of Natural and Cultural History and its research division, the Oregon State Museum of Anthropology, provide opportunities for students to gain research experience through field projects and museum experience through the natural history museum's public programs. The rich resources of the state museum's collections are available to anthropology students, faculty members, and other qualified researchers. The Museum of Natural and Cultural History is described in the **Academic Resources** section of this catalog; the Oregon State Museum of Anthropology is described under Research Centers and Institutes (p. 898).

Courses

ANTH 114. Anthropology of Pirates and Piracy. 4 Credits.

Examines the political and economic origins and legacies of piracy through 500 years of history in the Americas, Europe, and Africa.

ANTH 119. Anthropology and Aliens. 4 Credits.

Examines how anthropology and speculative fiction have mutually constituted each other historically as each explores culture and society, and what makes us human.

ANTH 145. Principles of Archaeology. 4 Credits.

Introduction to archaeology methods and interpretation.

ANTH 150. World Archaeology. 4 Credits.

Introduction to prehistoric societies and cultural change through the examination of archaeological case studies from around the world. Taught once or more per academic year.

ANTH 161. Introduction to Cultural Anthropology. 4 Credits.

A first look into the work of cultural anthropology and an introduction to the cultural diversity of the world.

ANTH 162. Introduction to Medical Anthropology. 4 Credits.

An introduction to medical anthropology focusing on health, illness and healing from a cross-cultural perspective.

ANTH 163. Origins of Storytelling. 4 Credits.

Application of evolutionary thinking to the origins and function of literature.

ANTH 165. Sexuality and Culture. 4 Credits.

Examines sexuality through the historical, cultural, economic, and political factors that contribute to the construction of sexual identities, relationships, and institutions.

ANTH 170. Introduction to Human Origins. 4 Credits.

Homo sapiens as a living organism; biological evolution and genetics; fossil hominids.

ANTH 171. Introduction to Monkeys and Apes. 4 Credits.

Evolutionary biology of the primates: the fossil record and ecology in the age of mammals, primate anatomy, locomotor feeding adaptations, taxonomic relations, primate ethology, primate conservation

ANTH 173. Evolution of Human Sexuality. 4 Credits.

Includes basic genetics, physiology, and behavior. Evolution of sex, of the sexes, and of the role of sex in mammal, primate, and human behavior.

ANTH 175. Evolutionary Medicine. 4 Credits.

Focuses on the application of evolutionary thinking to the study of human health and disease.

ANTH 176. Introduction to Forensic Anthropology. 4 Credits.

Introduction to human skeletal analysis and its application in a legal context, using biological and anthropological approaches to the recovery and identification of human remains.

ANTH 196. Field Studies: [Topic]. 1-2 Credits.

Repeatable.

ANTH 198. Laboratory Projects: [Topic]. 1-12 Credits.

Repeatable.

ANTH 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

ANTH 199L. Special Studies: [Topic]. 4 Credits.

Repeatable.

ANTH 220. Introduction to Nutritional Anthropology. 4 Credits.

Human nutrition from a biocultural anthropological perspective, including the relationship of food consumption patterns to evolution, contemporary issues relating to malnutrition, and diseases of nutrition.

ANTH 223. Anthropology of Chocolate. 4 Credits.

This course explores the impact and meaning that chocolate has had on cultures around the world and on the human body.

ANTH 224M. Introduction to Anthropology of the African Diaspora. 4 Credits.

Introduction to theoretical questions and methodological concerns framing an anthropology of the African diaspora. Multilisted with ES 224M.

ANTH 243. Island Archaeology. 4 Credits.

Provides an in-depth understanding about the prehistory of various island regions in a comparative perspective as seen in the material culture and how islands help archaeologists decipher patterns of changing human behavior over time, including migration processes, settlement patterns, environmental interactions, and exchange systems.

ANTH 248. Archaeology of Wild Foods. 4 Credits.

Examines how diet and early cooking affected human evolution, harvest-processing of wild Pacific Northwest foods, pre-Neolithic cooking technologies.

ANTH 255. Atlantis, Aliens, and Archaeology. 4 Credits.

Critically examines pseudoscientific examples of archaeology using case studies from around the world (e.g. the lost city of Atlantis, ancient aliens) and explores how proper scientific archaeological research is conducted.

ANTH 260. Domestic Animals. 4 Credits.

Explores human relationships with domestic animals, examining the domestication process and the effects of animal domestication on human society.

ANTH 270. Introduction to Biological Anthropology. 4 Credits.

Examines the biological aspects of the human species from comparative, ecological, and evolutionary perspectives. Explores theoretical and methodological issues in biological anthropology.

ANTH 274. Animals and People. 4 Credits.

Explores contemporary and historical examples of human-animal interactions around the globe from a cross-cultural perspective. We analyze the influences of culture and biology on these interactions, explore perspectives, and engage in hypothesis testing.

ANTH 278. Science, Race, and Society. 4 Credits.

Understanding past scientific attitudes on racial variation helps place modern concepts of human diversity and racial segregation in a broader anthropological and scientific context.

ANTH 311. Anthropology of Globalization. 4 Credits.

Introduces students to a wide range of issues related to economic, cultural, and ideological aspects of globalization.
Prereq: ANTH 161.

ANTH 315. Gender, Folklore, Inequality. 4 Credits.

Cross-cultural exploration of the expressive and artistic realm of women's lives. Topics include life-cycle rituals, religion, healing, verbal arts, crafts, and music.

ANTH 320. Native North Americans. 4 Credits.

Interpretive approach to accomplishments, diversity, and survival of precontact, postcontact, and present-day American Indian peoples. Impact of Euro-American stereotypes on politics and identity.
Prereq: ANTH 161.

ANTH 322. Anthropology of the United States. 4 Credits.

Explores the culture and the political economy of the contemporary United States, with a particular focus on race, class, and gender relations.
Pre or coreq: ANTH 161.

ANTH 329. Immigration and Farmworkers. 4 Credits.

Mexican farmworkers in the United States, their history and living and working conditions explored within the political culture of immigration. Introductory social science course recommended.

ANTH 330. Hunters and Gatherers. 4 Credits.

Survey of contemporary hunter-gatherer societies. Foraging, decision-making, exchange, prestige, marriage, gender roles, parenting, history, and demography in an ecological and evolutionary perspective.

ANTH 331. Cultures of India and South Asia. 4 Credits.

Survey of contemporary South Asia's religious and cultural diversity, issues of ethnic identity, gender construction, social conflict, and politics of poverty.

ANTH 332. Human Attraction and Mating Strategies. 4 Credits.

Evolutionary theory, experimental and real-world data illuminate what we find attractive in others, variation in who we are attracted to, and why.

ANTH 340. Fundamentals of Archaeology. 4 Credits.

Methods modern archaeology uses to reconstruct the past, including background research, field methods, laboratory analyses, and interpreting data.

Prereq: ANTH 145 or ANTH 150.

ANTH 341. Food Origins. 4 Credits.

Biological, ecological, and social dimensions of plant-animal domestication and the environmental impact of agriculture in the Late Pleistocene-Holocene epochs.

ANTH 342. Archaeology of Egypt and Near East. 4 Credits.

The archaeology of ancient Egypt and the Near East.

ANTH 343. Pacific Islands Archaeology. 4 Credits.

Archaeology and prehistoric cultural development of Pacific island peoples from earliest settlement through early Western contact. Emphasizes Southeast Asian cultural foundations and ecological adaptations.

Prereq: ANTH 145 or ANTH 150.

ANTH 344. Oregon Archaeology. 4 Credits.

Native American cultural history of Oregon based on archaeological evidence. Environmental and ecological factors that condition human adaptations and contemporary cultural resource protection.

ANTH 345. Archaeology of East Asia. 4 Credits.

Explores the evolution of diverse cultures and ethnic identities in East Asia during prehistoric and early historical times.

ANTH 346. Archaeology of Southeast Asia. 4 Credits.

Explores the evolution of the diverse cultures of Southeast Asia during the prehistoric and early historic periods.

ANTH 349. Origins of Art. 4 Credits.

Examines prehistoric and recent hunter-gatherer art to understand the role that art behavior played in ancestral human life.

ANTH 361. Human Evolution. 4 Credits.

Fossil evidence of human evolution; Homo sapiens' place among the primates; variability of populations of fossil hominids.
Prereq: ANTH 170 or ANTH 270.

ANTH 362. Human Biological Variation. 4 Credits.

Genetic and biological structure of human populations; population dynamics and causes of diversity; analysis of genetically differentiated human populations and their geographic distribution.
Prereq: one from ANTH 270, BI 213, or BI 283H.

ANTH 365. Food and Culture. 4 Credits.

Anthropological approach to the role of nutrients in human development (individual and group); cultural determinants and differences among populations; world food policy; applied nutritional anthropology.

ANTH 366. Human Osteology Laboratory. 4 Credits.

Human and nonhuman primate osteology and osteometry; fundamentals of dissection and primate anatomy.
Prereq: one from ANTH 170, ANTH 270, BI 212, or HPHY 321.

ANTH 369. Human Growth and Development. 4 Credits.

Examines key issues in human and nonhuman primate growth and development; addresses genetic, social and ecological determinants of variation in growth.

ANTH 373. Psychoactive Substances in Ancient Societies. 4 Credits.

Global review of psychoactive substances in past human societies, including the paraphernalia, iconography, and residues of drugs found in the archaeological record.

Prereq: ANTH 145 or ANTH 150.

ANTH 376. Decoding Your Genome. 4 Credits.

Explores what genomic data can tell us about human variation and evolution, and discusses how genomics is currently used in our daily lives.

Prereq: one from ANTH 175, ANTH 270, BI 211, BI 282H.

ANTH 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

ANTH 399L. Special Studies: [Topic]. 4 Credits.

Repeatable when subject changes

ANTH 400M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

ANTH 401. Research: [Topic]. 1-21 Credits.

Repeatable.

ANTH 403. Thesis. 1-12 Credits.

Repeatable.

ANTH 405. Special Problems: [Topic]. 1-12 Credits.

Repeatable.

ANTH 406. Field Studies: [Topic]. 1-12 Credits.

Repeatable.

ANTH 407. Seminar: [Topic]. 1-5 Credits.

Repeatable.

ANTH 408. Workshop: [Topic]. 1-21 Credits.

Repeatable.

ANTH 409. Terminal Project. 1-12 Credits.

Repeatable.

ANTH 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

ANTH 411. Politics, Ethnicity, Nationalism. 4 Credits.

Explores relationship between ethnicity, politics, and nationalism from historical and anthropological perspectives; addresses the way nationalism and ethnic identity construct and reproduce each other.

Prereq: junior standing in a social science.

ANTH 413. Culture and Psychology. 4 Credits.

Bridges anthropology and psychology to explore the relationship between the individual and culture; includes such topics as emotion, personality, mental illness, and sexuality.

ANTH 415. Human Life History. 4 Credits.

Explores evolution of key life history traits in comparative primatological, paleo-anthropological, behavioral ecology, and evolutionary psychology perspectives.

ANTH 420. Culture, Illness, and Healing. 4 Credits.

Cultural foundations of illness and healing. Attempts to analyze illness experiences, looks at therapies cross-culturally, and examines the nature of healing.

Prereq: ANTH 161.

ANTH 427M. Latino Roots I. 4 Credits.

Documents Latino history in the racial history of what is now Oregon since 1500 and teaches students to conduct oral history interviews. Multilisted with J 427M/J 527M. Sequence with ANTH 428M/ANTH 528M Latino Roots II.

ANTH 428M. Latino Roots II. 4 Credits.

Continuation of Latino Roots I, designed for producing a short documentary using oral history as the story. Covers basic theory and practice of digital film-video documentary production. Multilisted with J 428M/J 528M. Sequence with ANTH 427M/ANTH 527M.

Prereq: ANTH 427M.

ANTH 429. Jewish Folklore and Ethnology. 4 Credits.

Traditional expressive culture of East European Jews; includes narrative, proverbs, jokes, folk beliefs, rituals, holidays, food, customs, music, gender, and immigrant folklore in the United States.

ANTH 430. Balkan Society and Folklore. 4 Credits.

Explores ethnic groups of the Balkans with attention to the roles of folklore, nationalism, rural-urban relationships, gender, music, and folk arts.

ANTH 434. Native South Americans. 4 Credits.

Contact period and contemporary ethnography of native peoples; ecological adaptation, socioeconomic organization, and culture change.

Prereq: ANTH 161.

ANTH 438. Race and Gender in Latin America. 4 Credits.

Examines intersecting systems of race, gender, ethnicity, and nationalism through 600 years of Latin American history, focusing on five countries in three regions.

ANTH 441. Recent Cultural Theory. 4 Credits.

Survey of various cultural frameworks: Durkheimian, Marxian, feminist, transnationalism, Orientalism.

Prereq: 8 credits in social science.

ANTH 442. Northwest Coast Archaeology. 4 Credits.

Archaeological and prehistoric cultural development of peoples indigenous to the Northwest Coast of North America, from Alaska to northern California, from earliest settlement through Western contact.

Prereq: ANTH 145 or ANTH 150.

ANTH 443. North American Archaeology. 4 Credits.

Survey of interdisciplinary research applied to prehistoric cultures and environments in North America.

Prereq: ANTH 145 or ANTH 150.

ANTH 446. Practical Archaeobotany. 4 Credits.

Investigates interactions between human-plant populations in the past; laboratory training of analyzing plant fossils in archaeological contexts.

ANTH 448. Gender and Archaeology. 4 Credits.

Discussion of gender as an emerging focus of archaeological theory, method, and interpretation. Examination of case studies from around the world during prehistory.

Prereq: ANTH 145 or ANTH 150.

ANTH 449. Cultural Resource Management. 4 Credits.

Objectives, legal background, operational problems, ethical and scholarly considerations in the management of prehistoric and historic cultural resources.

Prereq: ANTH 145 or ANTH 150.

ANTH 453. African Archaeology. 4 Credits.

The archaeology of humans in Africa with an emphasis on the past 15,000 years.

ANTH 456. Peopling of the Americas. 4 Credits.

Reviews anthropological methods of the Americas including biological, genetic, archaeological, and paleoenvironmental evidence.
Prereq: ANTH 145 or ANTH 150.

ANTH 459. Advanced Evolutionary Medicine. 4 Credits.

Explores current research in the field of evolutionary medicine.
Prereq: one from ANTH 175, ANTH 270, ANTH 468, BI 131, BI 380; ANTH 175 strongly suggested.

ANTH 462. Primate Evolution. 4 Credits.

The fossil record and theoretical implications of the Cenozoic primates with special reference to their various adaptations: locomotion, special senses, dentition.
Prereq: ANTH 270.

ANTH 463. Primate Behavior. 4 Credits.

Ecology and ethology of free-ranging primates. Classification, distribution, and ecological relationships of living primates; social structure and social organizations.
Prereq: ANTH 171 or ANTH 270.

ANTH 467. Paleoeecology and Human Evolution. 4 Credits.

Relationship between ecology and comparative morphology as a basis for theories of hominid phylogeny; analysis of methods of paleoecological inference; current theories of hominid origins.
Prereq: ANTH 270.

ANTH 468. Evolutionary Theory. 4 Credits.

Provides a theoretical framework in evolutionary biology with which to explore human evolutionary history and aspects of modern human biology.

ANTH 470. Statistical Analysis of Biological Anthropology. 4 Credits.

The important methods in biometry (biological statistics) and their inherent assumptions, limitations, interpretations, and common uses (and misuses) as relevant to biological anthropology.
Prereq: MATH 243, MATH 425, or equivalent.

ANTH 471. Zooarchaeology: [Topic]. 4 Credits.

Analysis and interpretation of bone and shell animal remains from archaeological sites. Repeatable once for a maximum of 8 credits when the topic changes.
Prereq: ANTH 145 or ANTH 150.

ANTH 472. Primate Conservation Biology. 4 Credits.

Evaluates the conservation status of the order Primates. Explores biological-ecological issues and social-cultural influences on primate biodiversity, distribution, and abundance.
Prereq: ANTH 171 or ANTH 270.

ANTH 473. Advanced Forensic Anthropology. 4 Credits.

Teaches theory and analysis of human remains for medico-legal professionals, including estimating biological parameters from skeletons and outdoor crime scene processing and testimony.
Prereq: ANTH 176 with a grade of B– or better or ANTH 366 with a C– or better.

ANTH 474. Human Skeletal Pathology. 4 Credits.

Methods and techniques of paleopathology, the disease process, and how hard tissues are affected by them. Pivotal anthropological issues in which paleoanthropology plays a key role.
Prereq: ANTH 270.

ANTH 479. Taphonomy: Bones, Bugs, and Burials. 4 Credits.

Application of taphonomic studies in the fields of paleontology, archaeology, and forensic-medicolegal anthropology.
Prereq: one from ANTH 170, ANTH 176, ANTH 270, ANTH 366, BI 212, or equivalent.

ANTH 481. Principles of Evolutionary Psychology. 4 Credits.

Investigates how understanding of our evolutionary history is used to further understanding of the human mind.
Prereq: ANTH 170 or ANTH 270.

ANTH 487. Bioanthropology Methods. 4 Credits.

Laboratory-based introduction to research methods in biological anthropology, with an emphasis on research among living human populations.
Prereq: ANTH 270.

ANTH 488. Foundations of Social Theory. 4 Credits.

Important early social theorists (Marx, Engels, Freud, Durkheim, Weber) and the historical conditions in which the study of society emerged in Western thought.

ANTH 500M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

ANTH 503. Thesis. 1-16 Credits.

Repeatable.

ANTH 507. Seminar: [Topic]. 1-5 Credits.

Repeatable.

ANTH 508. Workshop: [Topic]. 1-21 Credits.

Repeatable.

ANTH 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

ANTH 511. Politics, Ethnicity, Nationalism. 4 Credits.

Explores relationship between ethnicity, politics, and nationalism from historical and anthropological perspectives; addresses the way nationalism and ethnic identity construct and reproduce each other.

ANTH 515. Human Life History. 4 Credits.

Explores evolution of key life history traits in comparative primatological, paleo-anthropological, behavioral ecology, and evolutionary psychology perspectives.

ANTH 520. Culture, Illness, and Healing. 4 Credits.

Cultural foundations of illness and healing. Attempts to analyze illness experiences, looks at therapies cross-culturally, and examines the nature of healing.

ANTH 527M. Latino Roots I. 4 Credits.

Documents Latino history in the racial history of what is now Oregon since 1500 and teaches students to conduct oral history interviews. Multilisted with J 427M/J 527M. Sequence with ANTH 428M/ANTH 528M Latino Roots II.

ANTH 528M. Latino Roots II. 4 Credits.

Continuation of Latino Roots I, designed for producing a short documentary using oral history as the story. Covers basic theory and practice of digital film-video documentary production. Multilisted with J 428M/J 528M. Sequence with ANTH 427M/ANTH 527M.
Prereq: ANTH 527M.

ANTH 529. Jewish Folklore and Ethnology. 4 Credits.

Traditional expressive culture of East European Jews; includes narrative, proverbs, jokes, folk beliefs, rituals, holidays, food, customs, music, gender, and immigrant folklore in the United States.

ANTH 530. Balkan Society and Folklore. 4 Credits.

Explores ethnic groups of the Balkans with attention to the roles of folklore, nationalism, rural-urban relationships, gender, music, and folk arts.

ANTH 534. Native South Americans. 4 Credits.

Contact period and contemporary ethnography of native peoples; ecological adaptation, socioeconomic organization, and culture change.

ANTH 538. Race and Gender in Latin America. 4 Credits.

Examines intersecting systems of race, gender, ethnicity, and nationalism through 600 years of Latin American history, focusing on five countries in three regions.

ANTH 541. Recent Cultural Theory. 4 Credits.

Survey of various cultural frameworks: Durkheimian, Marxian, feminist, transnationalism, Orientalism.

Prereq: 8 credits in social science.

ANTH 542. Northwest Coast Archaeology. 4 Credits.

Archaeological and prehistoric cultural development of peoples indigenous to the Northwest Coast of North America, from Alaska to northern California, from earliest settlement through Western contact.

ANTH 543. North American Archaeology. 4 Credits.

Survey of interdisciplinary research applied to prehistoric cultures and environments in North America.

ANTH 546. Practical Archaeobotany. 4 Credits.

Investigates interactions between human-plant populations in the past; laboratory training of analyzing plant fossils in archaeological contexts.

ANTH 548. Gender and Archaeology. 4 Credits.

Discussion of gender as an emerging focus of archaeological theory, method, and interpretation. Examination of case studies from around the world during prehistory.

ANTH 549. Cultural Resource Management. 4 Credits.

Objectives, legal background, operational problems, ethical and scholarly considerations in the management of prehistoric and historic cultural resources.

ANTH 553. African Archaeology. 4 Credits.

The archaeology of humans in Africa with an emphasis on the past 15,000 years.

ANTH 559. Advanced Evolutionary Medicine. 4 Credits.

Explores current research in the field of evolutionary medicine.

ANTH 562. Primate Evolution. 4 Credits.

The fossil record and theoretical implications of the Cenozoic primates with special reference to their various adaptations: locomotion, special senses, dentition.

ANTH 563. Primate Behavior. 4 Credits.

Ecology and ethology of free-ranging primates. Classification, distribution, and ecological relationships of living primates; social structure and social organizations.

ANTH 567. Paleoeology and Human Evolution. 4 Credits.

Relationship between ecology and comparative morphology as a basis for theories of hominid phylogeny; analysis of methods of paleoecological inference; current theories of hominid origins.

ANTH 568. Evolutionary Theory. 4 Credits.

Provides a theoretical framework in evolutionary biology with which to explore human evolutionary history and aspects of modern human biology.

ANTH 570. Statistical Analysis of Biological Anthropology. 4 Credits.

The important methods in biometry (biological statistics) and their inherent assumptions, limitations, interpretations, and common uses (and misuses) as relevant to biological anthropology.

Prereq: MATH 243, MATH 425, or equivalent.

ANTH 571. Zooarchaeology: [Topic]. 4 Credits.

Analysis and interpretation of bone and shell animal remains from archaeological sites. Repeatable once for a maximum of 8 credits when the topic changes.

ANTH 572. Primate Conservation Biology. 4 Credits.

Evaluates the conservation status of the order Primates. Explores biological-ecological issues and social-cultural influences on primate biodiversity, distribution, and abundance.

ANTH 573. Advanced Forensic Anthropology. 4 Credits.

Teaches theory and analysis of human remains for medico-legal professionals, including estimating biological parameters from skeletons and outdoor crime scene processing and testimony.

ANTH 574. Human Skeletal Pathology. 4 Credits.

Methods and techniques of paleopathology, the disease process, and how hard tissues are affected by them. Pivotal anthropological issues in which paleoanthropology plays a key role.

ANTH 579. Taphonomy: Bones, Bugs, and Burials. 4 Credits.

Application of taphonomic studies in the fields of paleontology, archaeology, and forensic-medicolegal anthropology.

ANTH 581. Principles of Evolutionary Psychology. 4 Credits.

Investigates how understanding of our evolutionary history is used to further understanding of the human mind.

ANTH 587. Bioanthropology Methods. 4 Credits.

Laboratory-based introduction to research methods in biological anthropology, with an emphasis on research among living human populations.

ANTH 601. Research: [Topic]. 1-16 Credits.

Repeatable.

ANTH 602. Supervised College Teaching. 1-5 Credits.

Repeatable.

ANTH 603. Dissertation. 1-16 Credits.

Repeatable.

ANTH 605. Special Problems: [Topic]. 1-16 Credits.

Repeatable.

ANTH 606. Practicum: [Topic]. 1-16 Credits.

Repeatable.

ANTH 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

ANTH 608. Workshop: [Topic]. 1-12 Credits.

Repeatable.

ANTH 609. Terminal Project. 1-12 Credits.

Repeatable.

ANTH 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

ANTH 611. Ethnographic Research: Epistemology, Methods, Ethics. 4 Credits.

Various techniques in ethnographic research. Examines the relationships between methods, theory, and ethics.

ANTH 615. Proseminar in Anthropology. 4 Credits.

Presents the department's structure, program, and faculty; explore various research and teaching facilities in UO; introduces research, writing, and funding resources.

ANTH 680. Basic Graduate Physical Anthropology. 5 Credits.

Introduction to major subfields of physical anthropology; geochronology, primate classification, paleoprimatology, paleoanthropology, human biology and diversity, processes of evolution, and primate ethology.

ANTH 681. Archaeology and Anthropology. 5 Credits.

Use by archaeologists of concepts drawn from anthropology; modifications and additions made necessary by the nature of archaeological data.

ANTH 685. Professional Writing. 2-4 Credits.

Covers the basics of professional writing for grant proposals, journal articles, and papers presented at professional meetings. Requires short proposal, longer proposal or article, and workshop participation.

ANTH 688. Social Theory I. 5 Credits.

Social theory survey organized around keywords: colonialism-postcolonialism, meaning, materiality-materialism, local-national-global, structure-agency-history, power, and difference.

ANTH 689. Social Theory II. 5 Credits.

Social theory survey organized around keywords: colonialism-postcolonialism, meaning, materiality-materialism, local-national-global, structure-agency-history, power, and difference.

Kyu Ho Youm, journalism and communication

- **Bachelor of Arts**
- **Minor in East Asian Studies**
- **Minor in South Asian Studies**
- **Minor in Southeast Asian Studies**

Undergraduate Studies

The Asian Studies Program's interdisciplinary program leads to a bachelor of arts (BA) degree in Asian studies.

Students may focus their studies on Japan, China, Korea, or, with outside language study, a special interdisciplinary major in Southeast Asian or South Asian studies. Students may enhance majors in other departments with a minor in East Asian studies, South Asian studies, or Southeast Asian studies.

Students who major in Asian studies often complement their course work with a year or more of residence in Asia or a double major to combine a profession with their area of expertise. Job possibilities are increasing in such fields as business, journalism, government, and education. Many students go on to graduate studies.

The curriculum includes courses in anthropology, art history, dance, ethnic studies, film, geography, history, global studies, linguistics, political science, religious studies, and Chinese, Japanese, and Korean language and literature. The program is administered by the Asian studies committee, which is composed of faculty members with Asian specializations.

Declaring a Major

To be accepted into the Asian studies major, a student must request acceptance as a major in the Asian studies office before attaining senior status. Depending on interests and career objectives, students are encouraged to discuss with their advisors or the program director the advisability of pursuing a second major in a supporting discipline or preprofessional program.

Major Requirements

The major in Asian studies offers

- strong training in at least one Asian language (Chinese, Japanese, or Korean)
- knowledge of the histories and cultures of the societies in which that language is used
- a sense of how academic disciplines contribute to interdisciplinary study
- a knowledge of transnational Asia beyond the primary language and civilization focus listed above

Students who have an overall grade point average (GPA) of 3.70 or higher and want to graduate with honors in Asian Studies write a 30- to 50-page thesis. A faculty advisor must be selected and a proposal must be approved by the advisor and the Asian Studies Program Director at least two terms before graduation. Students may apply as many as 4 credits in Research (401) or Thesis (403) to the appropriate block of the 48 credits required for the Asian Studies major. The thesis must address an international or cross-cultural topic relevant to Asian Studies, and it must make meaningful use of at least two sources in an Asian language.

Bachelor of Arts Degree Requirements

Students must complete 48 credits as specified below. As many as 8 of these credits may be taken pass/no pass; at least 40 of the 48 credits must be chosen at the 300 level or above. All other courses used to satisfy major requirements must be taken for letter grades and passed with grades of C– or better. Students should consult their advisors in planning programs of study.

Code	Title	Credits
Seminar		
ASIA 350	What Is Asia: Theoretical Debates	4
Subregional Interdisciplinary Focus ¹		
Six courses in the chosen subregion, if available; two courses must be in history, two in the social sciences, and two in the humanities; may include as many as 15 credits of upper-division Asian language courses related to the chosen subregion		24
Discipline or Thematic Focus		
Three courses in one discipline or theme ²		12
Regional Breadth		
Course in Asian studies outside chosen subregion; may include lower-division language courses of a second Asian language		4
Language Requirement		
Two years of Asian language related to the chosen subregion ³		

¹ Subregions: China, Japan, Korea, Southeast Asia, South Asia

² Disciplines or themes include but are not limited to film, food, literature, religion, pop culture, linguistics, or art. Discipline and thematic courses may be double-dipped from Interdisciplinary courses, but the major must include a minimum of 48 credits. Courses selected for the thematic area do not need to be taken within the declared subregional focus area. Courses selected for the thematic area cannot be language-based; linguistic and literature courses are acceptable.

³ Chinese and Japanese are taught through the fifth year in the Department of East Asian Languages and Literatures. Languages must be taken for letter grades and passed with grades of C– or better. Under special circumstances, students may demonstrate an equivalent competence by examination or by work in advanced language courses.

Students who have an overall grade point average (GPA) of 3.70 or higher and want to graduate with honors in Asian Studies write a 30- to 50-page thesis. A faculty mentor must be selected and a proposal must be approved by the Asian Studies Program Director at least two terms before graduation. Students may apply as many as 4 credits in Research (401) or Thesis (403) to the appropriate block of the 48 credits required for the Asian Studies major. The thesis must address an international or cross-cultural topic relevant to Asian Studies, it must make meaningful use of at least two Asian language sources.

Minor Requirements

Students should consult with the program director to determine whether a course has a full or partial focus on East Asia, South Asia, or Southeast Asia. A list of preapproved courses for each minor is outlined in this UO Catalog and available on the Asian Studies program website. Students should acquaint themselves with the selection of experimental courses offered each term and may pursue directed readings with East Asian, South Asian, or Southeast Asian specialists. First- and second-year language courses cannot be used to satisfy requirements for the minor. All courses used to satisfy minor requirements must be taken for letter grades and passed with grades of C– or better.

Minor in East Asian Studies

Code	Title	Credits
Courses from at least two departments focused on East Asia		20
ASIA 350	What Is Asia: Theoretical Debates	4
Two years of study in relevant Asian language or equivalent level of proficiency		
Total Credits		24

At least 12 of the 24 credits must be upper division.

Minor in South Asian Studies

Code	Title	Credits
Courses in South Asia history		4
Course in South Asian history, religion, or philosophy		4
Course in contemporary South Asian issues		4
Course on South Asian media or culture		4
Courses with full or partial South Asia focus		8
Total Credits		24

At least 12 of the 24 credits must be upper division. Students must consult with one of the South Asia faculty members when determining courses to take.

In addition, students must either demonstrate first-year proficiency in any South Asian vernacular language or complete a ten-week term of study or internship in South Asia, under the supervision of a member of the UO South Asia faculty.

Minor in Southeast Asian Studies

Code	Title	Credits
Courses focused on Southeast Asia ¹		20
Course with partial focus on Southeast Asia		4
Total Credits		24

¹ At least 12 credits must be upper division.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. This degree plan would grant a BA in Asian studies with a focus on Japan.

This degree plan is for general planning purposes only and, due to the interdisciplinary nature of the major, it is imperative that students speak with advisors to determine which courses would best match their personal, professional, and academic goals.

- **Master of Arts: Area Studies Track**
- **Master of Arts: Disciplinary Track**
- **Second Master's Degree**
- **Graduate Specialization**

Graduate Studies

The university offers an interdisciplinary program in Asian studies with an emphasis on East Asia, Southeast Asia, or South Asia leading to the master of arts (MA) degree. The MS degree program is inactive.

The curriculum includes courses in anthropology, art history, Chinese language and literature, geography, history, global studies, Japanese language and literature, linguistics, political science, and religious studies. The program is administered by the Asian studies committee, which is composed of faculty members with Asian specializations.

Application for Admission

An applicant for admission to the master's program must hold a bachelor's degree from an accredited four-year university. It is expected that applicants have a minimum of two years of language study and some undergraduate preparation in courses relating to Asia. Students lacking adequate Asian language or disciplinary training must take appropriate preparatory courses, for which no graduate credit is earned.

Required materials for admission and financial aid are as follows:

1. University of Oregon application form and application fee
2. Transcripts of all college or university course work, including the final transcripts for any degree received
3. Three letters of recommendation
4. Statement of objectives
5. Writing sample
6. Test score for Graduate Record Examinations (GRE) is preferred but optional.
7. For international applicants, either Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) scores. International applicants must submit a TOEFL score of at least 575 (paper-based test) or 88 (Internet-based test) or an IELTS score of at least 7, unless they have received a bachelor's degree from a college or university in an English-speaking country, such as Australia, Canada (excluding Quebec), Ireland, New Zealand, or the United Kingdom
8. Supplementary Application and Financial Statement for International Students must be submitted to the UO Office of Admissions by international applicants
9. Application for Graduate Award, if applying for graduate employment (e.g., a graduate teaching fellowship)

The application deadline is January 5 for admission the following fall term. Application information and materials are available online and from the Asian studies office.

Master's Degree Requirements

Students pursuing an MA in Asian studies must complete 48 credits of graduate study, including at least 44 in Asia-related courses, and a final

project. Graduate credit for language study may only be earned for work beyond the second-year level.

600-Level Courses. The Division of Graduate Studies requires that at least 9 credits in courses numbered 600–699 must be taken in residence.

Graded Courses. 24 of the total credits required must be earned at the University of Oregon for a letter grade. A minimum of 36 credits of course work and a minimum of 9 credits of Thesis (ASIA 503) is required. Credit for the thesis is given pass/no pass. In the final term, master's students must register for at least 3 credits, at least 1 of which must be in Thesis (ASIA 503).

Final Project Options.

Two Seminar Papers Option. Students choosing this option submit two Asia-related papers written for graduate seminars or colloquiums and pass an examination based on the submitted papers in their final term. The examination committee will include two members of the Asian studies faculty proposed by the student and approved by the director.

Thesis Option. Students choosing this option are required to take a minimum of 9 credits of Thesis (ASIA 503) as part of the 48 credits required for the degree. Credit for the thesis is given a grade of pass/no pass at the completion of the thesis. Students form a two-member thesis committee in their second or third term. Thesis writers are expected to defend their theses in the second year. In the final term, master's students must register for at least 3 credits, at least 1 of which must be in Thesis (ASIA 503).

In some circumstances, and in consultation with advisors, students may petition the director to extend the defense date of their thesis or seminar paper for up to but no more than two academic terms.

Continuous Enrollment and On-Leave Status. Master's students are expected to maintain continuous enrollment for a minimum of 3 credits each term until all degree requirements have been completed, unless on-leave status has been approved.

Minimum GPA. Graduate students must maintain at least a 3.00 grade point average (GPA) in all graduate courses taken with a graded option.

Time Limit. All requirements for the master's degree must be completed within a seven-year time period.

Master of Arts: Area Studies Track (Using the Two Seminar Papers Option as an Example)

Code	Title	Credits
ASIA 611	Perspectives on Asian Studies: [Topic]	1
ASIA 612	Theory and Methodology in Asian Studies: [Topic]	3
	Seminars or colloquia	8
	Two courses in architecture, art history, literature, music, religious studies	8
	Two courses in anthropology, economics, geography, international studies, political science	8
	Two history courses	8
	Two courses in a region other than the primary language and civilization focus ¹	8

ASIA 605	Reading and Conference: [Topic] (only if needed to complete credit requirement)	4
Total Credits		48

¹ Perspectives on Asian Studies: [Topic] (ASIA 611), Theory and Methodology in Asian Studies: [Topic] (ASIA 612), and interdisciplinary courses may be used to satisfy this cross-regional awareness requirement.

Master of Arts: Disciplinary Track (Using the Thesis Option as an Example)

Code	Title	Credits
Courses within the primary region of focus, drawn from two or more departments		16
Courses in primary discipline with at least one theory or methods course chosen in consultation with an advisor or the program director		12
Courses in region other than primary focus ¹		8
ASIA 503	Thesis	9
Additional course work		3
Total Credits		48

¹ Perspectives on Asian Studies: [Topic] (ASIA 611) and Theory and Methodology in Asian Studies: [Topic] (ASIA 612) may be counted toward this cross-regional focus.

Academic courses are to be mutually agreed upon by an academic advisor and the program director. A list of Asia-related courses approved for inclusion in the Asian studies graduate curriculum is available from the program coordinator.

Students should also review the Division of Graduate Studies' regulations for information on the university's general master of arts degree requirements.

Second Master's Degree

Students enrolled in graduate programs offered by other departments may earn a second master's degree in Asian studies. Besides satisfying the degree requirements set by the other departments, such students must complete the following:

Code	Title	Credits
Approved Asia-related graduate courses		32
ASIA 611	Perspectives on Asian Studies: [Topic]	1
ASIA 612	Theory and Methodology in Asian Studies: [Topic]	3
Demonstrate the language competence required for the MA degree in Asian studies		
Final project (two Asia-related seminar papers or a thesis) ¹		
Total Credits		36

¹ Applies the methodology of the student's discipline to an Asian subject.

The requirements for both the Asian studies and the departmental degree programs must be completed at the same time. A student completing this

option is granted two master's degrees, one in Asian studies and another in the departmental discipline.

Graduate Specialization in Asian Studies

The 16-credit graduate specialization in Asian studies is open to all UO graduate students except for MA students in the Asian Studies Program. This specialization enhances student education and future marketability in careers with nongovernmental or international organizations, the media, government service, education, or the academe.

Overview

In collaboration with faculty members, students achieve mastery in Asian studies by

- analyzing and critiquing primary and secondary sources related to Asia
- developing multiple disciplinary perspectives, sources, methods, and modes of analyses used in the study of Asia
- identifying major themes in Asian history, particularly historical continuities and critical junctures
- developing an advanced understanding of Asia's physical and political geography
- studying major topical issues relevant to modern Asia, which may include economic development, tropical diseases, environmental change, and globalization
- honing skills to critically analyze modern debates about Asia

Specialization Requirements

Code	Title	Credits
Core Seminars		
ASIA 611	Perspectives on Asian Studies: [Topic]	1
ASIA 612	Theory and Methodology in Asian Studies: [Topic]	3
Breadth Requirement		
Three 4-credit courses ¹		12
Total Credits		16

¹ Must include more than one academic discipline and more than one Asian country. One course must be outside the student's focal academic division (e.g., humanities, social science). No more than two of the three courses may be substantially focused on the same Asian country.

To apply for the graduate specialization, fill out the Division of G (<https://gradschool.uoregon.edu/sites/gradschool2.uoregon.edu/files/Specialization%20Declaration.pdf>) graduate Studies form (<https://gradschool.uoregon.edu/sites/gradschool2.uoregon.edu/files/Specialization%20Declaration.pdf>).

The Division of Graduate Studies has general information (<http://gradschool.uoregon.edu/academic-programs/#specializations>) about graduate specializations campus-wide.

Courses

ASIA 111. Great Books on Modern Asia. 4 Credits.

Students learn about Asia and how knowledge about Asia is produced by reading and discussing four great books written by different authors in various writing genres and perspectives.

ASIA 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable when topic changes.
Prereq: freshman or new student.

ASIA 350. What Is Asia: Theoretical Debates. 4 Credits.

An interdisciplinary seminar designed to introduce students to current theoretical debates about Asia, modernization, and area studies.

ASIA 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

ASIA 401. Research: [Topic]. 1-16 Credits.

Repeatable.

ASIA 403. Thesis. 1-12 Credits.

Repeatable.
Prereq: major honor's student.

ASIA 405. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

ASIA 406. Practicum: [Topic]. 1-16 Credits.

Closely supervised participation in the activities of public or private organizations, institutes, and community service agencies. Repeatable.

ASIA 407. Seminar: [Topic]. 1-5 Credits.

Repeatable.

ASIA 409. Terminal Project. 1-12 Credits.

Repeatable.

ASIA 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

ASIA 425. Asian Foodways. 4 Credits.

Explores socio-cultural, political-economic and historical dimensions of food in China, Japan, Korea, Southeast Asia and India, including modernization, transnationalism, globalization. Offered alternate years.

ASIA 480. Chinese Economy: Transition, Development, Globalization. 4 Credits.

Comprehensive introduction to the Chinese economy: market transition; macroeconomic conditions and policies; key sectors such as industry, banking, finance, energy, export, technology, agriculture; globalization. Offered alternate years.

ASIA 503. Thesis. 1-9 Credits.

Repeatable.

ASIA 507. Seminar: [Topic]. 1-5 Credits.

Repeatable.

ASIA 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

ASIA 525. Asian Foodways. 4 Credits.

Explores socio-cultural, political-economic and historical dimensions of food in China, Japan, Korea, Southeast Asia and India, including modernization, transnationalism, globalization. Offered alternate years.

ASIA 580. Chinese Economy: Transition, Development, Globalization. 4 Credits.

Comprehensive introduction to the Chinese economy: market transition; macroeconomic conditions and policies; key sectors such as industry, banking, finance, energy, export, technology, agriculture; globalization. Offered alternate years.

ASIA 601. Research: [Topic]. 1-16 Credits.

Repeatable.

ASIA 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

ASIA 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

ASIA 609. Terminal Project. 1-12 Credits.

Repeatable.

ASIA 611. Perspectives on Asian Studies: [Topic]. 1 Credit.

Explores the diverse perspectives that define Asian studies. Samples conflicts, controversies, and areas of consensus that characterize the field.

ASIA 612. Theory and Methodology in Asian Studies: [Topic]. 3 Credits.

Selected Asian studies issues. Repeatable once when topic changes for maximum of 6 credits.

Biology

Bruce A. Bowerman, Department Head

541-346-4502
77 Klamath Hall
1210 University of Oregon
Eugene, Oregon 97403-1210

Biologists investigate a broad spectrum of questions about living organisms and life processes—the physical and chemical bases of life, how organisms and their component parts are structured, how they function, how they interact with their environment, and how they have evolved.

Departmental teaching and research emphases in cellular and molecular biology, developmental biology, ecology and evolution, human biology, marine biology, neuroscience and behavior, and bioinformatics offer students opportunities to learn and work with scientists who are making important contributions to knowledge in these areas.

Faculty

Matthew F. Barber, assistant professor (evolutionary genetics, host-microbe interactions, and biochemistry). BA, 2006, Colgate; PhD, 2012, Stanford. (2016)

Nicola C. Barber, instructor (molecular biology, science education). BA, 2006, Colgate; PhD, 2011, California, Berkeley. (2016)

Brendan J. M. Bohannon, Alec and Kay Keith Professor (microbial ecology and evolution). BS, 1991, Humboldt State; PhD, 1997, Michigan State. (2006)

Bruce A. Bowerman, professor (developmental genetics, regulation of the cytoskeleton in *C. elegans*). BA, 1981, Kansas State; PhD, 1989, California, San Francisco. (1992)

William E. Bradshaw, professor (evolutionary genetics, population biology, evolutionary physiology). BA, 1964, Princeton; MS, 1965, PhD, 1969, Michigan. (1971)

Mark C. Carrier, senior instructor (developmental biology and physiology). BS, BA, 1987, Massachusetts; MS, 1998, California, Berkeley. (2000)

Amy A. Connolly, instructor (genetics, cell biology, cell division). BS, 2008, Kansas; PhD, 2014, Oregon. (2018)

William A. Cresko, professor (evolutionary developmental genetics). BA, 1992, Pennsylvania; PhD, 2000, Clark. (2005)

Jeffrey M. Diez, associate professor (community ecology, phenology, climate change ecology). BA, MA, 1998, University of Pennsylvania; PhD, 2005, University of Georgia. (2020)

Chris Q. Doe, professor (development of the nervous system, neural stem cells, asymmetric cell division). BA, 1981, New College, Sarasota; PhD, 1987, Stanford. (1998)

Judith S. Eisen, professor (development and function of the nervous system). BS, 1973, MS, 1977, Utah State; PhD, 1982, Brandeis. (1985)

Richard B. Emlet, professor (evolution and development of marine invertebrates). BS, 1977, Duke; PhD, 1985, Washington (Seattle). (1992)

Aaron W. E. Galloway, associate professor (marine trophic ecology, fatty acids). BA, 1999, Evergreen State College; MS, 2004, Central Washington; PhD, 2013, Washington (Seattle). (2015)

David M. Garcia, assistant professor (molecular biology and epigenetics, prions that regulate RNA). BS, 2004, California, Santa Cruz; PhD, 2012, Massachusetts Institute of Technology. (2018)

Jessica L. Green, professor (applied theoretical ecology). BS, 1992, University of California, Los Angeles; MS, 1994, PhD, 2001, University of California, Berkeley. (2007)

Daniel T. Grimes, assistant professor (developmental biology, zebrafish genetics, human disease models). MBiochem, 2008, DPhil, 2013, Oxford. (2019)

Lauren M. Hallett, assistant professor (plant community ecology, restoration ecology). BS, 2008, Yale; MSc, 2010, Western Australia; PhD, 2015, California, Berkeley. (2017)

Victoria Herman, associate professor (development and function of nervous system in *Drosophila*). BA, 1989, Harvard-Radcliffe; PhD, 1998, Massachusetts Institute of Technology. (2003)

Cristin L. Hulslander, senior instructor (behavioral ecology). BA, 1992, Bryn Mawr; PhD, 2003, Clark. (2003)

Santiago Jaramillo, associate professor (neuronal circuits underlying behavioral flexibility). BS, 1998, Universidad Pontificia Bolivariana; MS, 2002, New Mexico; PhD, 2007, National University of Ireland. (2013)

Eric A. Johnson, associate professor (*Drosophila* genetics, genomics and cellular physiology). BA, 1990, Grinnell; PhD, 1996, Iowa. (2001)

Andrew D. Kern, associate professor (population genetics, computational biology). ScB, 1999, Brown; PhD, 2005, California, Davis. (2017)

Diana E. Libuda, assistant professor (molecular genetics, DNA repair, chromosome dynamics during meiosis). BS, 2003, California, Los Angeles; PhD, 2008, Harvard. (2014)

Shawn R. Lockery, professor (invertebrate neurobiology and neural networks). BA, 1981, Yale; PhD, 1989, California, San Diego. (1993)

V. Patteson Lombardi, senior instructor with title of research assistant professor (human biology, medical physiology); director, undergraduate advising. BA, 1977, MAT, 1979, North Carolina, Chapel Hill; PhD, 1984, Oregon. (1984)

Stilianos Louca, assistant professor (microbial ecology and evolution, bioinformatics, mathematical modeling). BSc, 2010, Diplom, 2012, Friedrich Schiller; PhD, 2016, British Columbia. (2019)

Svetlana Maslakova, associate professor (evolution, development and systematics of marine invertebrates). BA, 1998, MS, 1999, Moscow State; PhD, 2005, George Washington. (2008)

Luca Mazzucato, assistant professor (neural basis sensory perception, neurostatistical analysis). MSci, 2002, Padua; PhD, 2005, Scuola Internazionale Superiore di Studi Avanzati. (2017)

David A. McCormick, professor (cellular mechanisms of cortical function); Presidential Chair. BA, BS, 1979, Purdue; PhD, 1983, Stanford. (2017)

Krista McGuire, associate professor (microbial ecology). BS, 2000, Muhlenberg College; PhD, 2007, Michigan, Ann Arbor. (2017)

Adam C. Miller, assistant professor (neural circuit formation and function). BS, 2001, PhD, 2008, Oregon. (2016)

James M. Murray, assistant professor (theoretical neuroscience, learning in neural circuits). BS, 2006, Montana State University; PhD, 2013, Johns Hopkins University. (2020)

Cristopher M. Niell, associate professor (development and function of neural circuits for visual processing). BS, 1995, PhD, 2004, Stanford. (2011)

Ken-ichi Noma, professor (3D genome organization in yeast and human systems). BS, 1995, Nagaoka University; PhD, 2000, University of Tokyo. (2018)

Laurel E. Pfeifer-Meister, instructor (ecology, climate change, biodiversity). BA, BS, 2000, Westmont College; PhD, 2008, Oregon. (2016)

Patrick C. Phillips, professor (evolution, genetics, complex traits). BA, 1986, Reed; PhD, 1991, Chicago. (2000)

Tobias J. Policha, senior instructor (plant community ecology, pollination, tropical orchid conservation). BS, 2007, MS, 2011, PhD, 2014, Oregon. (2017)

Lauren C. Ponisio, assistant professor (community ecology, species interactions, data science). BS, 2010, Stanford University; MS, 2011, Stanford University; PhD, 2017, UC Berkeley (2020)

Jana Prikryl, senior instructor (molecular genetics). BS, 1999, Colorado, Boulder; PhD, 2009, Oregon. (2010)

Peter L. Ralph, associate professor (evolution and population genetics, data analysis, stochastic processes). AB, 2002, PhD, 2009, California, Berkeley. (2016)

Eric Selker, professor (epigenetic mechanisms). BA, 1975, Reed; PhD, 1980, Stanford. (1985)

Lucas Silva, associate professor (terrestrial ecology, biogeochemistry, biogeography) BS 2005, Forest Engineering, University of Brasilia; MS 2007, Ecosystem Ecology, University of Miami/University of Brasilia; PhD, 2011, Environmental Biology, University of Guelph (2016)

Nadia D. Singh, associate professor (evolutionary genetics, genomics). BA, 1999, Harvard; PhD, 2006, Stanford. (2016)

Kryn Stankunas, associate professor (chromatin and regulators as dynamic sources of epigenetic information during heart development). BS, 1997, British Columbia; PhD, 2003, Stanford. (2009)

Jeffrey Stone, instructor (botany, plant pathology). BA, 1976, Antioch; PhD, 1986, Oregon. (2005)

Matthew A. Streisfeld, associate professor (adaptation in natural plant populations). BS, 1998, Emory; PhD, 2005, California, San Diego. (2009)

Kelly Sutherland, associate professor (marine biology). BS, 1999, Tufts; MSc, 2004, South Alabama; PhD, 2009, Massachusetts Institute of Technology. (2011)

Emily L. Sylwestrak, assistant professor (neural circuits of behavior, motivation, synaptic physiology). BS, 2006, Illinois Urbana-Champaign; PhD, 2011, California, San Diego. (2019)

George R. von Dassow, associate professor (cell biology of development). PhD, 2000, Washington (Seattle). (2014)

Philip E. Washbourne, associate professor (molecular neurobiology, synapse formation). BS, 1995, Imperial College; PhD, 2000, Padua. (2004)

Maya W. Watts, instructor/education coordinator (invertebrate zoology, parasitology). BS, 2004, College of Charleston; PhD, 2010, University of Oregon. (2018)

Monte Westerfield, professor (molecular genetics of nervous system development). AB, 1973, Princeton; PhD, 1977, Duke. (1981)

A. Michelle Wood, professor (microbial ecology and evolution, biological oceanography). BA, 1973, Corpus Christi; PhD, 1980, Georgia. (1990)

Craig M. Young, professor (marine ecology, deep-sea biology, invertebrate embryology); director, Oregon Institute of Marine Biology. BS, 1975, MS, 1978, Brigham Young. PhD, 1982, Alberta. (2002)

Anne Zemper, assistant professor (intestinal stem cell biology, adult homeostasis disease states). BA, 2003, Concordia; PhD, 2010, Oregon Health and Science. (2014)

Steven S. Rumrill, courtesy research associate (estuarine ecology and management, larval biology of marine invertebrates). BA, 1981, MS, 1983, California, Santa Cruz; PhD, 1987, Alberta. (1991)

Carl A. Stiefbold, courtesy senior instructor (science laboratory education). BS, 1971, Portland State. (1987)

David H. Wagner, courtesy associate professor (plant taxonomy, ecology, evolution of bryophytes and pteridophytes). BA, 1968, Puget Sound; MS, 1974, PhD, 1976, Washington State. (1976)

Emeriti

Andrew S. Bajer, professor emeritus. PhD, 1950, DSc, 1956, Cracow. (1964)

Alice Barkan, professor emerita (molecular genetics). BS, 1978, Massachusetts Institute of Technology; PhD, 1983, Wisconsin, Madison. (1991)

Howard T. Bonnett Jr., professor emeritus. BA, 1958, Amherst; PhD, 1964, Harvard. (1965)

Scott D. Bridgham, professor emeritus (ecosystem ecology, plant community dynamics). BA, 1980, BA, 1982, Maine; MS, 1986, Minnesota; PhD, 1991, Duke. (2002)

Roderick A. Capaldi, professor emeritus. BS, 1967, London; PhD, 1970, York. (1973)

George C. Carroll, professor emeritus. BA, 1962, Swarthmore; PhD, 1966, Texas. (1967)

John S. Conery, professor emeritus. BA, 1976, California, San Diego; PhD, 1983, California, Irvine. (1983)

David. O. Conover, professor emeritus (fisheries science, marine ecology, evolutionary biology). BS, 1975, Eckerd College; MS, 1979, PhD, 1981, University of Massachusetts, Amherst. (2016)

Alan Dickman, professor emeritus. BA, 1976, California, Santa Cruz; PhD, 1984, Oregon. (1986)

Janet Hodder, senior lecturer (ecology of marine birds and mammals, science education). BS, 1977, Liverpool; PhD, 1986, Oregon. (1986)

Charles B. Kimmel, professor emeritus. BA, 1962, Swarthmore; PhD, 1966, Johns Hopkins. (1969)

John H. Postlethwait, professor emeritus. BS, 1966, Purdue; PhD, 1970, Case Western Reserve. (1971)

William Roberts, professor emeritus. BA, 1970, Harvard; PhD, 1979, California, San Diego. (1989)

Bitty A. Roy, professor emerita. BS, 1982, Evergreen State; MS, 1985, Southern Illinois; PhD 1992, Claremont Graduate School. (2001)

Paul P. Rudy, professor emeritus. BA, 1955, MA, 1959, PhD, 1966, California, Davis. (1968)

Eric Schabtach, senior instructor emeritus. BS, 1963, McGill. (1969)

Alan Shanks, professor emeritus (marine and intertidal ecology, larval biology, zooplankton). BA, 1977, California, Santa Cruz; PhD, 1985, California, San Diego. (1993)

Lynda P. Shapiro, professor emerita. BA, 1960, MS, 1963, Arkansas; PhD, 1974, Duke. (1990)

George F. Sprague Jr., professor emeritus. BS, 1969, North Carolina State; PhD, 1977, Yale. (1981)

Karen U. Sprague, professor emerita. BA, 1964, Bryn Mawr; PhD, 1970, Yale. (1977)

Franklin W. Stahl, professor emeritus. AB, 1951, Harvard; PhD, 1956, Rochester. (1959)

Terry Takahashi, professor (analysis of neural circuitry). BS, 1975, California, Irvine; PhD, 1981, State University of New York, Downstate Medical Center. (1988)

Nora B. Terwilliger, professor emerita. BS, 1963, Vermont; MS, 1965, Wisconsin, Madison; PhD, 1981, Oregon. (1972)

Nathan J. Tublitz, professor emeritus (peptidergic regulation of behavior in insects and cephalopod mollusks). BA, 1975, Reed; PhD, 1984, Washington (Seattle). (1986)

Daniel Udovic, professor emeritus. BA, 1970, Texas; PhD, 1973, Cornell. (1973)

Janis C. Weeks, professor emerita. BS, 1975, Massachusetts Institute of Technology; PhD, 1980, California, San Diego. (1989)

Norman K. Wessells, professor emeritus; provost emeritus, academic affairs. BS, 1954, PhD, 1960, Yale. (1988)

James A. Weston, professor emeritus. BA, 1958, Cornell; PhD, 1963, Yale. (1970)

Peter B. Wetherwax, senior instructor emeritus with title of research assistant professor (pollination ecology, tropical ecology, science education). BA, 1980, California, Los Angeles; MA, 1985, Humboldt State; PhD, 1993, Oregon State. (1991)

Herbert P. Wisner, senior instructor emeritus. BA, 1949, MA, 1950, Syracuse. (1966)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

- **Bachelor of Arts: Biology**
- **Bachelor of Arts: Marine Biology**
- **Bachelor of Science: Biology**
- **Bachelor of Science: Marine Biology**
- **Minor in Biology**

Undergraduate Studies

Students may enter the program with a high school education or transfer from a college or university. The curriculum includes courses for majors in biology, marine biology, and related disciplines; preprofessional courses; and courses that serve as important elements in a liberal education for students in other majors. Course work for the biology major provides an exceptional foundation for students who plan to pursue graduate programs in biomedicine and research, and jobs in health services, private industry, and education.

Biology Advising Center

541-346-4525
65 Klamath Hall
bioadvise@uoregon.edu
biology.uoregon.edu/advising (<http://biology.uoregon.edu/advising/>)

In the Biology Advising Center, students can meet with members of the biology advising staff for help in planning an individualized program of study.

The center provides multiple resources and services including advising for biology students and those interested in biomedicine and research; contacts for local, national, and international internships; and evaluation of biology-specific transfer equivalencies. Transfer students should consult the university's website (<http://registrar.uoregon.edu/transfer-students/>) for approximate transfer evaluations and should confirm with each individual department advisor when questions arise.

Nonmajors

Courses for nonmajors offered at the 100 level are intended for students with little or no college background in biology, chemistry, or mathematics. Topics vary from year to year, but all focus on the biological basis of

animal behavior, cancer, ecology, evolution, genetics, and human physiology.

Students who are contemplating a major in biology or a related science are advised to begin their biology course work with one of the lower-division sequences: General Biology sequence—General Biology I: Cells (BI 211), General Biology II: Organisms (BI 212), General Biology III: Populations (BI 213), General Biology IV: Mechanisms (BI 214)—or Honors Biology sequence—Honors Biology I: Cells, Biochemistry and Physiology (BI 281H), Honors Biology II: Genetics and Molecular Biology (BI 282H), Honors Biology III: Evolution, Diversity and Ecology (BI 283H). Both sequences include rigorous laboratories and have mathematics and chemistry prerequisites.

Majors

Preparation

Modern biology is a quantitative interdisciplinary science. Students planning to specialize in biology should include in their high school preparation as much mathematics, chemistry, and physics as possible. International baccalaureate and advanced placement course work and testing are encouraged.

Transfer Students

Students who intend to transfer as majors from a community college or four-year institution should carefully plan the course work they take before transferring. Students who transfer after one year of college should have completed a year of college-level mathematics and general chemistry with laboratories. Satisfactory completion of a yearlong biology major's introductory sequence that includes laboratories and features strong components of genetics, evolution, and physiology, most often enables transfer students to earn credit for three of four courses in the General Biology sequence. If this is the case, to complete the 200-level, lower-division biology requirement, students must successfully complete (P or C– or better) General Biology IV: Mechanisms (BI 214). In addition to these biology courses, transfer students can complete major requirements by taking a year of general chemistry with laboratories, two terms of organic chemistry, mathematics through two terms of calculus, and a year of general physics for science majors. Students who plan on applying to graduate programs in medicine or allied health are encouraged to take a full year of organic chemistry and physics, with laboratories, to satisfy graduate program admissions requirements. Organic chemistry course work completed at a community or junior college may not be used to satisfy upper-division credit requirements at the University of Oregon unless an American Chemical Society exam is passed.

Lower-Division Biology Sequences

The standard, four-course sequence includes General Biology I: Cells (BI 211), General Biology II: Organisms (BI 212), General Biology III: Populations (BI 213), and General Biology IV: Mechanisms (BI 214).

The three-course honors sequence for those with a strong background in mathematics and chemistry includes Honors Biology I: Cells, Biochemistry and Physiology (BI 281H), Honors Biology II: Genetics and Molecular Biology (BI 282H), and Honors Biology III: Evolution, Diversity and Ecology (BI 283H).

Either sequence is appropriate for students with interests in any area of biology. Students should consult the department website or visit the Biology Advising Center to seek advice on which sequence is most appropriate for them, and for the most up-to-date information.

Careers

The biology major prepares students for many outstanding fields. Biology professions have been ranked among the top ten jobs in the United States for more than 20 years.

Many graduates have gone on to top US and international schools in medicine, dentistry, pharmacy, veterinary medicine, optometry, physical therapy, nursing, and teacher education. Others have pursued PhD and MS degrees in molecular biology, neuroscience, ecology and evolution, and marine biology, or have found employment with government agencies, private industry, or nonprofit organizations. Selected job listings are available online at [uocareer.uoregon.edu](https://career.uoregon.edu), (<https://career.uoregon.edu/>) in the Biology Advising Center, and in the University Career Center, 220 Hendricks Hall.

Biology majors are encouraged to become involved in a variety of learning experiences beyond their college course work. More than two-thirds of our students are actively involved in research, and many assist with tutoring or teaching laboratories. Local, national, and international internships are available for those interested in a wide variety of specialty areas. Sample international programs established by the biology faculty in collaboration with Global Education Oregon, the UO's overseas program, include neotropical ecology in Ecuador, tropical marine biology in Panama, and tropical diseases and service learning placements in Ghana.

Major Requirements

A major in biology or marine biology leads to a bachelor of science (BS) or a bachelor of arts (BA) degree. More than 95 percent of biology and marine biology majors seek the bachelor of science (BS) degree. The BA requires completion of the foreign-language requirement, while those with double majors or those emphasizing languages may choose to pursue a bachelor of arts (BA) degree.

Bachelor of Arts Degree Requirements: Biology

Code	Title	Credits
Core Courses

CH 227 & CH 228 & CH 229	General Chemistry Laboratory and General Chemistry Laboratory and General Chemistry Laboratory	
Organic Chemistry ²		8
CH 331	Organic Chemistry I	
CH 335	Organic Chemistry II	
Physics ³		12
PHYS 201 & PHYS 202 & PHYS 203	General Physics and General Physics and General Physics	

or PHYS 25 Foundations of Physics I
& PHYS 252 and Foundations of Physics I
& PHYS 253 and Foundations of Physics I

Lower-Division Biology 15-16

BI 211 General Biology I: Cells
& BI 212 and General Biology II: Organisms
& BI 213 and General Biology III: Populations
& BI 214 and General Biology IV: Mechanisms
or BI 281H Honors Biology I: Cells, Biochemistry and Physiology
& BI 282H and Honors Biology II: Genetics and Molecular Biology
& BI 283H and Honors Biology III: Evolution, Diversity and Ecology

Upper-Division Biology 44

At least one course needs to be completed from each area (I, II, and III):

Area I: 300-level molecular, cellular, and developmental biology course

Area II: 300-level systems and organisms course

Area III: 300-level ecology and evolution course

Two or more 300- or 400-level courses with significant laboratory or fieldwork

12 credits of courses numbered BI 410, 420–499

One course in modelling, analysis, programming, and statistics (MAPS) ⁵

Total Credits 105-106

¹ A course in statistics is required if an ecology and evolution or neuroscience and behavior emphasis area is selected.

² Graduate programs in medicine and allied health typically require an additional organic chemistry lecture, Organic Chemistry III (CH 336), and laboratories (CH 337, 338) beyond that required by the biology major. Often, course work in biochemistry and genetics as well as other additional courses are typically required or preferred. Please consult the Health Professions Program (<https://healthprofessions.uoregon.edu/>) for further details.

³ Graduate programs in medicine and allied health typically require additional laboratories (PHYS 204, 205, 206) or three terms of Foundations of Physics Laboratory (PHYS 290) beyond that required by the biology major. Please consult the Health Professions Program (<https://healthprofessions.uoregon.edu/>) for further details.

⁴ Students must complete a minimum of 44 upper-division biology credits. For a complete list of approved courses and other details about upper-division requirements, see the online requirements for the biology major (<https://biology.uoregon.edu/undergraduate-program/requirements/>).

⁵ Visit the Biology Advising Center for a list of approved courses.

Students are urged to contact specific institutions to confirm admission requirements. Please contact the Biology Advising Center at biology.uoregon.edu/advising or call 541-346-4525 for additional limitations and allowances.

Biology majors also must complete Arts & Letters, Cultural Literacy, Social Science & Writing courses and a minimum of 180 credits in order to graduate. For details, please see:

Emphasis Areas for the Biology Major

Fulfilling the requirements for an undergraduate degree in biology provides a solid, general foundation in the discipline. Some biology majors choose to concentrate their upper-division course work in one of five emphasis areas:

- ecology and evolution
- human biology
- marine biology
- molecular, cellular, and developmental biology
- neuroscience and behavior

The requirements listed for each emphasis may be fulfilled as the student completes the upper-division course work for the biology major. Though not required, emphasis areas are designed to guide students, based on their specific interests, through upper-division course work. Upon graduation, students who complete the requirements for an emphasis area receive a written recognition from the department.

Visit biology.uoregon.edu/undergraduate-program/requirements (<http://biology.uoregon.edu/undergraduate-program/requirements/>) for the

current requirements for each emphasis area, or contact the Biology Advising Center at 541-346-4525 for more information.

Total Credits 105-106

- ¹ A course in statistics is required if an ecology and evolution or neuroscience and behavior emphasis area is selected.
- ² Students must complete a minimum of 44 upper-division biology credits. For a complete list of approved courses and other details about upper-division requirements, see the online requirements for the marine biology major (<https://biology.uoregon.edu/undergraduate-program/requirements/>).
- ³ Courses at the Oregon Institute of Marine Biology (OIMB) are offered summer session, fall, and spring terms. See oimb.uoregon.edu (<http://oimb.uoregon.edu>) for details of OIMB courses.
- ⁴ Visit the Biology Advising Center for a list of approved courses.

Students are required to spend three terms completing upper-division course work (taking at least 12 credits per term) at the Oregon Institute of Marine Biology. A program plan for the marine biology major is available in the Biology, on the OIMB website, or Tykeson College and Career Advising.

Biology majors also must complete Arts & Letters, Cultural Literacy, Social Science & Writing courses and a minimum of 180 credits in order to graduate. For details, please see:

<https://catalog.uoregon.edu/genedcourses/>

<https://catalog.uoregon.edu/admissiontograduation/bachelorrequirements/>

<https://registrar.uoregon.edu/current-students/group-satisfying-and-multicultural-courses/> (<https://registrar.uoregon.edu/current-students/group-satisfying-and-multicultural-courses/>)

Animal Use in Teaching Laboratories

Students should be aware that the biology and marine biology majors require courses in which a variety of organisms, including vertebrate animals, are used in laboratory dissections and experiments.

Prospective majors who are concerned about this should discuss it with their advisors before beginning either program. Students are encouraged to review the syllabuses for laboratory courses before enrolling. Syllabuses are available on the department's website.

Department and university policies require that the use of live vertebrate animals be minimized in teaching laboratories and be approved by the curriculum committee of the Department of Biology and by the Institutional Animal Care and Use Committee of the University of Oregon. Students who have ethical objections to animal use in a course that requires it should consult the instructor of record before enrolling.

Recommended Program

Students are encouraged to periodically consult their degree guide and transfer evaluation reports, academic transcripts, and other information available on DuckWeb (<https://duckweb.uoregon.edu>). Students should consult with advisors in the Biology Advising Center at least once a year for help with determining a program of study.

Freshman majors typically take general chemistry and mathematics during their first year.

Upper-division biology electives and General Physics (PHYS 201), General Physics (PHYS 202), General Physics (PHYS 203) are typically taken after successful completion of an introductory biology sequence.

By the end of the sophomore year, each student should have met with a biology advisor to develop a program that satisfies both the interests of the student and the major requirements.

Courses that are taken to meet major requirements must be passed with grades of P or C– or better. Students should choose the pass/no pass (P/N) option sparingly or not at all. Some biomedical graduate programs do not allow transfer credit from courses taken pass/no pass.

Students meet the general-education group requirement in science by fulfilling the requirements for a major in biology. Transfer students should consult their advisors when selecting courses to meet the group requirements in arts and letters and social science. For more information, see the **Bachelor's Degree Requirements** section of this catalog.

Oregon Institute of Marine Biology

Located in Charleston on Coos Bay, the Oregon Institute of Marine Biology (OIMB), in conjunction with the biology department, offers an undergraduate marine biology major and a coordinated program of study for undergraduates in biology, general science, and environmental science or environmental studies. During fall and spring terms and the summer session, 300- and 400-level courses take advantage of the institute's unique coastal setting. Typical offerings include the following:

Code	Title	Credits
BI 322	Cell Biology	4
BI 390	Animal Behavior	4
BI 451	Invertebrate Zoology	8
BI 454	Estuarine Biology	5
BI 455	Marine Birds and Mammals	1-6

BI 457	Marine Biology: [Topic] (Biology of Fishes, Comparative Embryology and Larval Biology, Marine Conservation Biology, Molecular Marine Biology, Subtidal and Deep Sea Ecology)	4-5
BI 458	Biological Oceanography	5
BI 474	Marine Ecology	1-8

A seminar series, Seminar: [Topic] (BI 407), features weekly invited speakers who are active researchers in the marine sciences. Undergraduate research is encouraged.

The summer program offers additional 400-level courses emphasizing field studies and includes a variety of eight- and two-week courses as well as weekend workshops. Information and applications are available from the Biology Advising Center, from the director of the institute, or from the OIMB website. See also the **Research Centers and Institutes** section of this catalog.

Malheur Field Station

The University of Oregon is a member of the Malheur Field Station consortium. Located in southeastern Oregon in the heart of the Great Basin desert, the field station provides an excellent opportunity for students to study terrestrial and aquatic systems. Credits earned in courses at the field station may be transferred to the university and are included in the total credits required for a University of Oregon degree. Courses that have been preapproved by the department may be counted for the biology major. Detailed course information and applications may be obtained from the field station website.

Second Bachelor's Degree

Students may obtain a second bachelor's degree in biology after earning a bachelor's degree in another field. These students are admitted as postbaccalaureate nongraduates, but not students in the Division of Graduate Studies. For the second degree, all departmental and university requirements must be met. For more information, see Second Bachelor's Degree in the **Bachelor's Degree Requirements** section of this catalog.

Preprofessional Students

Preprofessional health science students who want to major in biology need to plan carefully to complete major requirements and meet entrance requirements of professional schools. These students should consult a biology advisor as well as the UO health professions advisors (<http://healthprofessions.uoregon.edu/>). See Preparatory Programs in the **Academic Resources** section of this catalog for more information about these requirements.

Although Organic Chemistry Lecture (CH 336), Organic Chemistry Laboratory (CH 337), Organic Chemistry Laboratory (CH 338) and Introductory Physics Laboratory (PHYS 204), Introductory Physics Laboratory (PHYS 205), Introductory Physics Laboratory (PHYS 206) are not required for the biology major, they are required for programs at most professional schools including biomedicine at Oregon Health and Science University in Portland.

Honors Program in Biology

The honors program requires substantial laboratory or field research supervised by a faculty member. Biology majors who satisfy the following requirements are eligible to graduate with honors:

1. Registration for the honors program through the Biology Advising Center, which includes obtaining an acceptance signature from the faculty research advisor, *before* beginning research
2. Completion of all requirements for the major in biology
3. Attainment of a minimum 3.30 GPA in all upper-division biology courses (including 300- and 400-level approved courses outside the department; see a biology advisor for a list). The GPA will be calculated for **all** courses in this category, regardless of the total number of credits.
4. Completion of a minimum of three terms of intensive research (summer session counts as a term); at least four terms and summer research experience are strongly encouraged
5. Completion of a minimum of 4 credits in Research: [Topic] (BI 401) under the supervision of a single faculty advisor. Up to 4 credits may be applied towards the 44 upper-division elective Biology credits. (*See #7 for Honors College students.*)
6. Completion of a thesis, with the following requirements:
 - a. Oversight by a thesis committee comprising two faculty members —a primary advisor and one faculty member on the Biology Undergraduate Affairs Committee
 - b. A final version of the thesis must be provided to the committee one week prior to the thesis defense
 - c. Both committee members must sign the thesis within one week of the thesis defense, and a final signed copy must be submitted to the Biology Advising Center
7. Thesis defense
 - a. Thesis committee must attend the thesis defense.
 - b. Defense must happen at least one week prior to the end of the term in which the student is graduating.
 - c. The thesis defense will be an open seminar. Other faculty, students, and staff will be encouraged to attend.

The chair of the Biology Undergraduate Affairs Committee will notify students during their senior year with the name of the committee member who will serve as their second thesis committee member. Students should contact both committee members via email sometime during the term before the defense to start working on a range of possible defense dates. For more information, contact the committee chair.

Honors Program in Marine Biology

To graduate with honors in marine biology, students must meet the following requirements:

1. Completion of all the requirements for the major in marine biology
2. A minimum cumulative GPA of 3.30 for all upper-division biology courses required for the major
3. Biology courses used to satisfy the marine biology degree requirements must be taken for letter grades
4. Registration for the honors program before research begins. This requires approval of the honors thesis topic by the faculty sponsor and the selection of a second member of the marine biology faculty to serve on the thesis approval committee
5. A minimum of 4 credits of research over at least three terms of research. One of these terms can be accomplished on the main campus while the thesis is being written. That term may, however, require periodic visits to the Oregon Institute of Marine Biology (OIMB)
6. Completion of a thesis, based on laboratory and/or field research that is approved by the OIMB faculty advisor and one other member of the

OIMB faculty. Included at the front of the thesis should be a title page and the thesis defense committee approval. A final copy of the thesis is to be submitted to the OIMB library

7. A public defense of the thesis at OIMB

Students in residence on the main campus while enrolled in the marine biology honors program should consider enrolling in Thesis (BI 403). Contact the instructor of record for information on this course.

Special Opportunities for Biology Undergraduates

Majors may participate in research; attend department research seminars; work as a biology undergraduate laboratory assistant, biology tutor for undergraduates, or peer advisor; spend a term at the Oregon Institute of Marine Biology; or participate in related activities.

Biology undergraduate lab assistants assist faculty instructors or graduate employees in charge of the laboratory or discussion sections associated with courses. Biology tutors for undergraduates hold regularly scheduled tutorials in the Biology Peer Center. Students interested in becoming either or both must complete an application available in the department office.

The Biology Undergraduate Lab Assistant (BULA) Program provides students with opportunities to gain teaching experience while deepening their knowledge of a particular field. Participants enroll in and receive credit for BI 402 Supervised College Teaching, which may be applied to the biology major upper-division credit requirements. Students who are considering a career in education are especially encouraged to consider this option.

Credit may be earned for conducting research under the supervision of a faculty member by enrolling in Research: [Topic] (BI 401). For more information, visit the Biology Advising Center in 65 Klamath Hall.

Students are invited to attend institute seminars that feature visiting and local scientists.

Peer advising is another way for students to become involved in the department. After an application process, selected students are trained during the spring term before the year they plan to work in the advising center.

Biology majors have the opportunity to attend the Oregon Institute of Marine Biology (<http://oimb.uoregon.edu/>) (OIMB), the university's marine biology institute. Students who major in marine biology spend at least three terms at the institute. Those majoring in biology with a marine biology emphasis spend at least one term at OIMB. To ensure balanced and diverse programs of study, biology majors are encouraged to enroll in course work that may include summer workshops at the marine station in Charleston. Interested students should plan to attend during their junior or senior years.

Students are encouraged to express ideas and offer suggestions about curriculum and student relations to the chair of the department's curriculum committee, the director of undergraduate advising, the chair of the department's undergraduate affairs committee, or the head of the department.

Students are asked to evaluate their biology courses and instructors near the end of each term. This information is available to instructors after the end of the term and placed on file for possible use in promotion and tenure deliberations. Student answers to summary questions are

available in electronic format in Knight Library and in the Office of Academic Advising.

The Biology Teacher Recognition Award highlights efforts to improve biology education through student feedback. Initiated by student nominations, the award recognizes faculty members and teaching assistants who excel in one or more aspects of teaching effectiveness.

Minor in Biology

Code	Title	Credits
Lower-Division Biology Courses		12-15
Select three of the following:		
BI 211	General Biology I: Cells	
BI 212	General Biology II: Organisms	
BI 213	General Biology III: Populations	
BI 214	General Biology IV: Mechanisms	
Or all three of the following:		
BI 281H	Honors Biology I: Cells, Biochemistry and Physiology	
BI 282H	Honors Biology II: Genetics and Molecular Biology	
BI 283H	Honors Biology III: Evolution, Diversity and Ecology	
Upper-Division Biology Courses ¹		16
Total Credits		28-31

¹ No more than 4 credits from BI 401–409.

Students interested in a minor in biology should develop a plan for the minor in consultation with an advisor in the Biology Advising Center. Students completing the minor in biology must provide the biology advisor with an electronic submission of a transcript or transfer evaluation that shows any transfer courses that may be applied to the minor.

At least 16 credits of biology applied to the minor must be taken at the University of Oregon.

Course work must be completed with grades of P or C– or better.

Kindergarten through Secondary Teaching Careers

Students who complete a degree in a College of Arts and Sciences department are eligible to apply to the College of Education's fifth-year licensure programs in middle-secondary and elementary teaching. More information is available in the **College of Education** section of this catalog.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

¹ Marine biology course lists for Areas I, II, and III may be found online (<https://oimb.uoregon.edu/academics/marine-biology-major/requirements-for-the-marine-biology-major/>).

Graduate Studies

The Department of Biology offers graduate study leading to the degrees of master of arts (MA), master of science (MS), and doctor of philosophy (PhD). The department's primary emphasis for graduate study is a research-oriented PhD. One of four research institutes provides a "home" for graduate training and coursework.

- Institute of Ecology & Evolution
- Institute of Molecular Biology
- Institute of Neuroscience
- Oregon Institute of Marine Biology

Interdisciplinary opportunities are available across institutes as well as between biology and other departments.

Financial support for PhD students is available through training grants, research grants and teaching assistantships. Support generally consists of a stipend, tuition waiver and health insurance. Financial support for master's students may also be available.

Detailed information about the graduate program, faculty research interests, and facilities is available at the biology department website (<https://biology.uoregon.edu/graduate-studies/>).

Application Deadline and Procedure

Applicants (master's and PhD) must submit all necessary materials online by December 1st. New students are accepted for fall term only.

Information on applying to the graduate program may be obtained from the biology department's website (<https://biology.uoregon.edu/graduate-studies/>).

Master's Degree in Biology

Master's degrees in biology may be earned in the following programs:

- Ecology and Evolution - this degree is typically completed on the UO campus and emphasizes ecology and evolution and can involve research on terrestrial, aquatic, or marine organisms.
- Marine Biology - this degree is typically completed at the Oregon Institute of Marine Biology campus location at Charleston Oregon (110 miles, 2.5 hours from Eugene) and provides training for a variety of careers in aquatic or marine biology.

Two years are typically required for completion of the master's degree. More information is available on the biology department website (<https://biology.uoregon.edu/graduate-studies/>).

Students may be able to accelerate completion of a master's degree program by completing graduate courses while still in the undergraduate program. For information, see Reservation of Graduate Credit (p.) in the Division of Graduate Studies (p. 885) section of this catalog.

Code	Title	Credits
	Graduate-level Coursework ¹	36
BI 503	Thesis	9
Total Credits		45

¹ Minimum 30 hours of Graduate-Level Biology Coursework. 24 credits must be completed in residence and graded. Minimum of 9 credits must be at the 600 level.

Nearly all master's candidates are admitted into the 'thesis' program. In very rare circumstances a student may complete a 'course only' program which would necessitate completing 60 graduate level credits.

Bioinformatics and Genomics Track, Knight Campus Graduate Internship Program

This degree is designed to meet the needs of industry, the medical field, and academic or government institutions in the genomic era. Students receive practical training in all aspects of acquiring and analyzing next-generation sequence data with exposure to additional omics data types. The program is typically completed in 18 months and includes coursework on the Eugene campus followed by a nine-month internship with one of many institutions around the country. Detailed program and application information can be found on the Knight Campus Graduate Internship Program website: (<http://internship.uoregon.edu/bioinformatics>) (<http://internship.uoregon.edu/bioinformatics/>).

Doctor of Philosophy Degree in Biology

Requirements for Doctoral Students

PhD students will be considered for one or more Institute-tracks depending on the research interests indicated on their application.

Course requirements for individual students vary based on the recommendation of their committees and advisors, but in general, there are very few required courses.

During the first year, students take courses in their area of interest and participate in a laboratory rotation program. The rotations provide direct exposure to research activities in three laboratories and therefore invaluable in helping students select a laboratory in which to carry out dissertation research. After the first year in the program, students devote nearly all of their efforts to research. These activities culminate in the public defense of a dissertation.

BI 603	Dissertation	
Total Credits:		81

Institute of Ecology and Evolution

The Institute of Ecology and Evolution brings together teams of scientists from biology, environmental studies, geography, earth sciences, mathematics, anthropology, landscape architecture, and computer science. Labs address fundamental questions of ecology and evolution from molecules to ecosystems using a combination of field work, laboratory experiments, genomics, and computational approaches. Weekly seminars, journal clubs, and workshops serve to promote interdisciplinary training and community among trainees and faculty and staff members.

Institute of Molecular Biology

The Institute of Molecular Biology is an interdisciplinary research community dedicated to investigating biological questions at the molecular level, bringing together scientists from the biology, chemistry, and physics departments and providing them with state-of-the-art, shared facilities. Graduate students are admitted into academic departments and subsequently receive their degrees through those departments. They may, however, choose any faculty member as a dissertation advisor.

Institute of Neuroscience

The Institute of Neuroscience comprises scientists from biology, psychology, and mathematics departments with research interests in cellular, developmental, systems, theoretical, and cognitive neuroscience. A coordinated graduate-degree program of instruction and research is available to students through the participating departments.

Oregon Institute of Marine Biology

The Oregon Institute of Marine Biology offers a full program of study and research for graduate students. Graduate courses are offered mainly during summer session, fall, and spring terms, and research is conducted year round. The marine biology graduate program focuses on research in biological oceanography, trophic ecology, invertebrate zoology, larval ecology and evolution, the biology of intertidal organisms, deep-sea biology, and marine ecology.

Developmental Biology Training Program

The Developmental Biology Program prepares the next generation of developmental biologists. Its varied and collaborative efforts range from molecular and cellular mechanisms of development to developmental neuroscience, evolution and development, developmental networks and genomics, organogenesis, disease modeling, and regenerative biology. Labs use model organisms including yeast, *Neurospora*, nematode worms, fruit flies, zebrafish, and mice. Individualized research training toward a PhD degree within one of 22 laboratories is the core of the program. Participating labs include the Institute of Molecular Biology, Institute of Neuroscience, Institute of Ecology and Evolution, and Oregon Institute of Marine Biology. Requirements include core graduate-level developmental biology courses combined with quantitative biology and other supplementary courses tailored to each student's specific interests. For more information, visit the website. (<https://devbio.uoregon.edu/>)

Environmental Studies

The Environmental Studies Program offers interdisciplinary graduate study leading to a master of arts (MA) or master of science (MS) in environmental studies and an interdisciplinary doctor of philosophy (PhD) degree in environmental sciences, studies, and policy. Students choose courses offered in appropriate disciplines to design a program that meets individual goals. Students may choose to have biology as a focal area. Applications are submitted through the Environmental Studies Program.

Courses

BI 121. Introduction to Human Physiology. 4 Credits.

Study of body functions with emphasis on organs and systems. Cell function, genetics, nutrition, exercise; function of the gut, heart, vessels, glands, lungs, nerves, and muscles with practical applications. Lecture, laboratories.

BI 122. Introduction to Human Genetics. 4 Credits.

Principle concepts of genetics and application to humans: genetic diseases, cancer, sex development, population genetics, and methodology of genetic testing, gene editing and gene therapy. Ethical and societal implications of prenatal tests, BRCA gene tests, sex-testing, ancestry services and CRISPR.

BI 123. Biology of Cancer. 4 Credits.

Comparison of cancer cells with normal cells; causes of cancer, including viral and environmental factors; biological basis of therapy. Lectures, laboratories.

BI 130. Introduction to Ecology. 4 Credits.

The concept of an ecosystem; organismal energetics; biogeochemical cycles; succession; population growth; species interactions, species diversity; implications for human ecosystems. Lectures, discussions.

BI 132. Introduction to Animal Behavior. 4 Credits.

Animal behavior, its evolutionary origins, and its neural mechanisms. Readings and films illustrate the adaptive nature of orientation, navigation, communication, and social behavior. Lectures, discussions.

BI 140. Science, Policy, and Biology. 4 Credits.

Explores the biology behind important topical issues such as stem cells, cloning, and genetically modified organisms. How policy decisions affect research in these areas. Lectures, discussions.

BI 150. The Ocean Planet. 4 Credits.

The diversity of marine life is introduced in the context of appreciating nature and using science in the solution of environmental problems. Lectures, discussions.

BI 160. From Brains to Artificial Intelligence. 4 Credits.

Basic concepts on how brains and artificial systems process information. Analysis of the similarities, differences, and complementarity between these systems.

BI 170. Happiness: a Neuroscience and Psychology Perspective. 4 Credits.

Examination of studies in neuroscience and positive psychology that explore the mental and behavioral actions leading to the self-reporting of a well-lived and fulfilling life. Exploration of the interaction of multiple psychological and neural circuit variables in development of a positive mental state.

BI 196. Field Studies: [Topic]. 1-2 Credits.

Repeatable.

BI 198. Laboratory Projects: [Topic]. 1-12 Credits.

Repeatable.

BI 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

BI 199L. Special Studies: [Topic]. 4 Credits.

Repeatable.

BI 211. General Biology I: Cells. 4 Credits.

How cells carry out functions of living organisms; genetic basis of inheritance; how genes and proteins work. Lectures, laboratories-discussions.

Prereq: C- or better or P in CH 111 or CH 113 or CH 114 or CH 221 or CH 224H.

BI 212. General Biology II: Organisms. 4 Credits.

How cells develop and interact within complex organisms. Comparative anatomy and physiology of plants and animals. Lectures, laboratories-discussions.

Prereq: C- or better or P in BI 211.

BI 213. General Biology III: Populations. 4 Credits.

How organisms interact with their environments and with each other; ecology, evolution, and behavior. Lectures, laboratories-discussions.

Prereq: C- or better or P in BI 211.

BI 214. General Biology IV: Mechanisms. 4 Credits.

Protein structure and function; metabolism; DNA structure, replication, mutation, and repair; gene mapping and complementation; and gene regulation. Lectures, laboratories.

Prereq: C- or better or P in BI 212 and CH 223 or CH 226H.

BI 281H. Honors Biology I: Cells, Biochemistry and Physiology. 5 Credits.

Focuses on the cellular structures and chemical reactions that allow cells to grow, to transform energy, and to communicate. Lectures, laboratories. Sequence with BI 282H, BI 283H.

Prereq: CH 223 or CH 226H or equivalent.

BI 282H. Honors Biology II: Genetics and Molecular Biology. 5 Credits.

How living organisms store, replicate, and transmit their genetic information, and how this information directs the activities of the cell and organism. Lectures, laboratories. Sequence with BI 281H, BI 283H.

Prereq: BI 281H with C- or better or P.

BI 283H. Honors Biology III: Evolution, Diversity and Ecology. 5 Credits.

The genetic basis and ecological context of evolutionary change leading to an examination of the generation and major patterns of biodiversity. Lectures, laboratories, field trips. Sequence with BI 281H, BI 282H.

Prereq: BI 282H with grade of C- or better or P

BI 307. Forest Biology. 4 Credits.

Structure and function of forested ecosystems emphasizing the Pacific Northwest. Interactions among trees, microorganisms, and animals; disturbance and recovery; forest management. Lectures, laboratories, field trips.

Prereq: BI 213 or BI 283H.

BI 309. Tropical Diseases in Africa. 4 Credits.

Biological and medical aspects of major infectious and parasitic diseases in Africa, including HIV/AIDS and malaria; socioeconomic issues in public health; case studies. Lectures, discussions.

Prereq: BI 212 or BI 282H.

BI 320. Molecular Genetics. 4 Credits.

Molecular mechanisms regulating control of gene expression. Topics include chromosome structure, transcription and processing of RNA, control of transcription, translational control, and genetic rearrangement. Lectures, discussions.

Prereq: BI 214 or BI 282H.

BI 322. Cell Biology. 4 Credits.

Eukaryotic cell nuclear structure and exchange, protein trafficking, endocytosis, chaperones, cytoskeletal functions, intercellular junctions, extracellular materials, signaling, cell division mechanics and controls, aging and death. Lectures, discussions.

Prereq: BI 214 or BI 282H; CH 331 recommended.

BI 326. Immunology and Infectious Disease. 4 Credits.

In this course we will explore the principles of immune system function as well as how microorganisms avoid the immune system to cause infectious disease. Topics include innate and adaptive immunity, cells of the immune system, vaccines, antibiotics, and immune-based therapies.

Prereq: BI 214 or BI 282H.

BI 328. Developmental Biology. 4 Credits.

Topics include genetic regulation, nucleocytoplasmic interactions, organogenesis, morphogenesis, pattern formation, cell differentiation, and neoplasia. Lectures, laboratories.

Prereq: BI 214 or BI 282H.

BI 330. Microbiology. 3 Credits.

Biology of bacteria: photosynthetic, heterotrophic, and others. Cell structure and function, metabolism including anaerobic and O₂-producing photosynthesis, nitrogen fixation, species interactions, and role in major geochemical cycles. Lectures.

Prereq: BI 214 or BI 282H.

BI 331. Microbiology Laboratory. 3 Credits.

Microbial diversity through laboratory projects involving enrichments, culture isolations, and partial characterizations. Two scheduled laboratories and one scheduled lecture per week; additional unscheduled time required. Laboratories.

Prereq: BI 214 or BI 282H; pre- or coreq: BI 330.

BI 353. Sensory Physiology. 4 Credits.

Introduction to physiology of the senses: cellular physiology of peripheral receptors through the computational mechanisms that are ultimately related to perception. Lectures, discussions.

Prereq: BI 214 or BI 282H.

BI 356. Animal Physiology. 5 Credits.

Neurophysiology, endocrinology, muscle contraction, and homeostatic mechanisms of circulation, respiration, metabolism, ionic regulation, and excretion in mammals; comparison with those in other animals. Lectures, laboratories.

Prereq: BI 214 or BI 281H.

BI 357. Marine Biology. 4 Credits.

Ecology and physiology of marine plants and animals. Comparisons of various marine habitats. Human influences on marine systems. Lectures, laboratories, field trips.

Prereq: BI 213 or BI 283H. Credits will be deducted for regression if BI 458 or BI 474 are taken first.

BI 358. Investigations in Medical Physiology. 4 Credits.

Human physiology with research and clinical medicine applications. Nervous system, addiction medicine, endocrinology, immunology, cardiology, digestion, nutrition, reproduction, infertility, pediatrics, and ophthalmology. Lectures, discussions, primary literature research. Human anatomy and physiology background preferred.

Prereq: one from BI 214, BI 283H, HPHY 324.

BI 359. Plant Biology. 4 Credits.

A detailed introduction of the unique features of the biology of land plants, including ecology, physiology, developmental genetics, and evolutionary biology. Lectures, discussions.

Prereq: BI 211; BI 212; BI 213 or BI 281H; BI 282H; BI 283H.

BI 360. Neurobiology. 4 Credits.

Function of the nervous system from the single neuron to complex neural networks. Topics range from molecular and cellular neurobiological mechanisms to systems and behavioral analyses. Lectures, discussions.

Prereq: BI 214 or BI 282H.

BI 370. Ecology. 5 Credits.

Relationship of organisms to their environment in space and time. Factors controlling the distribution and abundance of organisms, introductions to community systems, and ecosystems. Required fieldwork. Lectures, laboratories, field trips.

Prereq: BI 213 or BI 283H. Calculus or statistics recommended.

BI 374. Conservation Biology. 4 Credits.

Global patterns of biological diversity; major threats to biodiversity; application of ecology, evolution, genetics, and other areas to protect and maintain biodiversity. Lectures, discussions.

Prereq: BI 213 or BI 283H.

BI 380. Evolution. 4 Credits.

Origin and maintenance of genetic variability. Historical and geographic patterns of variation. Application of population genetics to understanding evolutionary processes; modes of speciation. Lectures, discussions.

Prereq: college algebra and BI 213 or BI 283H.

BI 390. Animal Behavior. 4 Credits.

How and why animals behave, and how animal behavior is studied.

Mechanisms of behavior, behavioral ecology, and sociobiology. Lectures, discussions.

Prereq: BI 213 or BI 283H.

BI 395. Tropical Ecology. 4 Credits.

Ecological theories for the maintenance of tropical diversity is the main focus of the course. Topics include biogeography, human land use change, and eco-evolutionary perspectives.

Prereq: BI 213 or BI 283H.

BI 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

Prereq: BI 212 and BI 213 and BI 214 or BI 283H.

BI 399L. Special Studies: [Topic]. 4 Credits.

Repeatable.

Prereq: BI 212 and BI 213 and BI 214 or BI 283H.

BI 401. Research: [Topic]. 1-16 Credits.

Repeatable.

BI 402. Supervised College Teaching. 1-6 Credits.

Repeatable for maximum of 9 credits.

BI 403. Thesis. 1-12 Credits.

Repeatable.

BI 404. Internship: [Topic]. 1-16 Credits.

Repeatable.

BI 405. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

BI 406. Practicum: [Topic]. 1-12 Credits.

Repeatable.

BI 407. Seminar: [Topic]. 1-2 Credits.

Repeatable.

BI 408. Workshop: [Topic]. 1-12 Credits.

Special laboratory training in research methods. A fee may be charged for supplies and materials that become the property of the student.

Repeatable

BI 409. Capstone. 1-12 Credits.

Repeatable.

BI 410. Experimental Course: [Topic]. 1-16 Credits.

Repeatable.

Prereq: BI 212 and BI 213 and BI 214 or BI 283H.

BI 410L. Experimental Course: [Topic]. 4 Credits.

Repeatable.

BI 422. Protein Toxins in Cell Biology. 4 Credits.

Mechanisms used by protein toxins to kill other organisms and how they have been used as molecular scalpels to dissect pathways in cell and neurobiology. Lectures, discussions.

Prereq: BI 322, BI 356, or BI 360.

BI 423. Human Molecular Genetics. 4 Credits.

Advanced topics in genetics that relate to human development and disease. The human genome, sex determination, X chromosome inactivation, chromosomal abnormalities, trinucleotide repeat expansions, cancer. Lectures, discussions.

Prereq: BI 320.

BI 424. Advanced Molecular Genetics. 4 Credits.

Structure and function of chromosomes with emphasis on unsolved genetic problems such as genomic imprinting, position effects, and gene silencing. Lectures, discussions.

Prereq: BI 320.

BI 425. Advanced Molecular Biology Research Laboratory. 4 Credits.

Provides an intensive, structured research experience that incorporates molecular biology, genetics, and genomic methodologies. Lectures, laboratories.

Prereq: one from BI 320, BI 322, BI 328.

BI 426. Genetics of Cancer. 4 Credits.

Genetic regulation of cancer. Topics include oncogenes and tumor suppressor genes, signal transduction pathways, genetic animal models, and rationale treatment design. Lectures, discussions.

Prereq: BI 214 or BI 282H; one course from BI 320, BI 322.

BI 427. Molecular Genetics of Human Disease. 4 Credits.

Advanced discussions of heritable diseases from single-gene mutations such as cystic fibrosis to complex multigenetic diseases such as autism and schizophrenia. Lectures, discussions.

Prereq: BI 320.

BI 428. Developmental Genetics. 4 Credits.

Genetic regulation of development, including investigations of molecular mechanisms and studies of developmental mutants. Topics include molecular biology of eukaryotic chromosomes, genetic mosaics, and models of gene regulation. Lectures, discussions.

Prereq: BI 320, BI 328.

BI 432. Mycology. 5 Credits.

Physiology, ecology, structure, and classification of fungi; emphasis on structural and physiological adaptations to saprophytic, parasitic, and symbiotic modes of existence. Lectures, laboratories.

Prereq: BI 213 or BI 283H.

BI 433. Bacterial-Host Interactions. 4 Credits.

Examines spectrum of interactions between bacteria and animals, from pathogenesis to symbiosis, focusing on the molecular and cellular bases of these interactions. Lectures, discussions.

Prereq: BI 320 or BI 322 or BI 330.

BI 442. Systematic Botany. 5 Credits.

Principles of plant classification with emphasis on flowering plants, introduction to taxonomic theory and methods of biosystematics, collection and identification procedures, recognition of common families in native flora. Lectures, laboratories, field trips.

Prereq: BI 213 or BI 283H.

BI 448. Field Botany. 4 Credits.

Intensive study of the regional flora; ecology and native uses; sight recognition of prominent species; field characteristics of principal plant families; identification using dichotomous keys. Lectures, field trips.

Offered summer session only.

Prereq: BI 213 or BI 283H.

BI 451. Invertebrate Zoology. 1-8 Credits.

Representative invertebrate groups with emphasis on marine forms; morphology, systematics, life history, and ecology. Lectures, laboratories, field trips. Offered at Oregon Institute of Marine Biology.

Prereq: BI 213 or BI 283H.

BI 452. Insect Biology. 4 Credits.

Anatomy, physiology, systematics, and behavior of insects. Insect societies. Lectures, laboratories, field trips. Offered summer session only.

Prereq: BI 213 or BI 283H.

BI 454. Estuarine Biology. 5 Credits.

The biological and physical factors regulating abundance, distribution, production, and biodiversity within estuaries. Includes field trips to marshes, tidal flats and exploration of estuarine habitats. Offered at Oregon Institute of Marine Biology.

Prereq: BI 213 or BI 283H.

BI 455. Marine Birds and Mammals. 1-6 Credits.

Principles of morphology, physiology, evolution, life history, and systematics as demonstrated through study of birds and mammals of the Oregon coast. Comparison of the fauna from the open sea to coastal waters. Lectures, laboratory, field trips. Offered at Oregon Institute of Marine Biology.

Prereq: BI 213 or BI 283H.

BI 457. Marine Biology: [Topic]. 1-8 Credits.

Content varies. Topics include comparative embryology, environmental issues, biology of fishes, and other subjects related to marine biology. Lectures, laboratories, field trips. Repeatable when topic changes.

Offered at Oregon Institute of Marine Biology.

Prereq: BI 212 & BI 213 or BI 283H.

BI 458. Biological Oceanography. 5 Credits.

Examines patterns of biological productivity and controlling physical and chemical mechanisms in the various environments of the world's oceans. Lectures, laboratories, field trips. Offered at Oregon Institute of Marine Biology.

Prereq: BI 213 or BI 283H.

BI 461. Systems Neuroscience. 4 Credits.

Principles of organization of nervous systems with emphasis on vertebrate brain and spinal cord. Functional implications of synaptic organization and pattern of projections, and comparative aspects. Lectures, discussions.

Prereq: BI 353 or BI 360 or equivalent.

BI 463. Cellular Neuroscience. 4 Credits.

Physiology of excitation, conduction, and synaptic transmission. Lectures, discussions.

Prereq: BI 360.

BI 464. Biological Clocks. 4 Credits.

Biological time keeping at ecological, evolutionary, behavioral, physiological, neurological, and molecular levels, with emphasis on daily and seasonal rhythmicity. Senior standing in Biology or Psychology required. Lectures, discussions.

Prereq: BI 320 or BI 322.

BI 466. Developmental Neurobiology. 4 Credits.

Mechanisms underlying development of the nervous system. The genesis of nerve cells; differentiation of neurons; synaptogenesis and neuronal specificity; plasticity, regeneration, and degeneration of nervous tissue. Lectures, discussions.

Prereq: BI 320, BI 328.

BI 468. Amphibians and Reptiles of Oregon. 4 Credits.

Field identification and understanding of ecology, biogeography, and evolution of the common herpetofauna of four major physiographic regions of Oregon. Conservation biology issues addressed. Lectures, field trips. Offered summer session only.

Prereq: one year of college biology or BI 213 or BI 283H.

BI 471. Population Ecology. 4 Credits.

Theoretical, experimental and applied aspects of growth, structure, and regulation of natural populations; population estimation; demographic analysis; life-history theory. Lectures, discussions.

Prereq: MATH 247 or MATH 252; BI 370.

BI 472. Community Ecology. 4 Credits.

Quantitative and conceptual approaches to the study of biological communities. Biodiversity measurement. Effect of climate and climate change on ecosystem structure and function. Lectures, discussions.

Prereq: BI 370.

BI 474. Marine Ecology. 1-8 Credits.

Factors that influence the distribution, abundance, and diversity of marine organisms. Field emphasis on local intertidal and shallow-water communities. Offered at Oregon Institute of Marine Biology.

Prereq: BI 213 or BI 283H.

BI 476. Terrestrial Ecosystem Ecology. 4 Credits.

Flux of nutrients, carbon, water, and energy in the environment; interactions and consequences for organisms. Scale ranges from microbial to global. Lectures, discussions.

Prereq: BI 370.

BI 484. Molecular Evolution. 4 Credits.

General description of patterns of molecular variation within and between species, underlying mechanisms, and methods of analysis.

Prereq: BI 320 or BI 380.

BI 485. Techniques in Computational Neuroscience. 4 Credits.

Introduction to numerical techniques for modeling the nervous system from single neurons to neural networks. Lectures, laboratories.

Prereq: BI 360 or BI 461; MATH 247 or MATH 252 or higher.

BI 488. Evolutionary Processes. 4 Credits.

Critical discussion of the ecological and evolutionary genetic processes associated with adaptation in natural populations; draws from topics in population, quantitative, and molecular genetics, molecular evolution, and statistics.

Prereq: BI 380.

BI 503. Thesis. 1-16 Credits.

Repeatable.

BI 507. Seminar: [Topic]. 1-2 Credits.

Repeatable.

BI 508. Laboratory Projects: [Topic]. 1-12 Credits.

Special laboratory training in research methods. A fee may be charged for supplies and materials that become the property of the student.

Repeatable.

BI 510. Experimental Course: [Topic]. 1-16 Credits.

Repeatable.

BI 510L. Experimental Course: [Topic]. 4 Credits.

Repeatable.

BI 522. Protein Toxins in Cell Biology. 4 Credits.

Mechanisms used by protein toxins to kill other organisms and how they have been used as molecular scalpels to dissect pathways in cell and neurobiology. Lectures, discussions.

BI 523. Human Molecular Genetics. 4 Credits.

Advanced topics in genetics that relate to human development and disease. The human genome, sex determination, X chromosome inactivation, chromosomal abnormalities, trinucleotide repeat expansions, cancer. Lectures, discussions.

BI 524. Advanced Molecular Genetics. 4 Credits.

Structure and function of chromosomes with emphasis on unsolved genetic problems such as genomic imprinting, position effects, and gene silencing. Lectures, discussions.

BI 525. Advanced Molecular Biology Research Laboratory. 4 Credits.

Provides an intensive, structured research experience that incorporates molecular biology, genetics, and genomic methodologies. Lectures, laboratories.

BI 526. Genetics of Cancer. 4 Credits.

Genetic regulation of cancer. Topics include oncogenes and tumor suppressor genes, signal transduction pathways, genetic animal models, and rationale treatment design. Lectures, discussions.

BI 527. Molecular Genetics of Human Disease. 4 Credits.

Advanced discussions of heritable diseases from single-gene mutations such as cystic fibrosis to complex multigenetic diseases such as autism and schizophrenia. Lectures, discussions.

BI 528. Developmental Genetics. 4 Credits.

Genetic regulation of development, including investigations of molecular mechanisms and studies of developmental mutants. Topics include molecular biology of eukaryotic chromosomes, genetic mosaics, and models of gene regulation. Lectures, discussions.

BI 532. Mycology. 5 Credits.

Physiology, ecology, structure, and classification of fungi; emphasis on structural and physiological adaptations to saprophytic, parasitic, and symbiotic modes of existence. Lectures, laboratories.

BI 533. Bacterial-Host Interactions. 4 Credits.

Examines spectrum of interactions between bacteria and animals, from pathogenesis to symbiosis, focusing on the molecular and cellular bases of these interactions. Lectures, discussions.

BI 542. Systematic Botany. 5 Credits.

Principles of plant classification with emphasis on flowering plants, introduction to taxonomic theory and methods of biosystematics, collection and identification procedures, recognition of common families in native flora. Lectures, laboratories, field trips.

BI 548. Field Botany. 4 Credits.

Intensive study of the regional flora; ecology and native uses; sight recognition of prominent species; field characteristics of principal plant families; identification using dichotomous keys. Lectures, field trips. Offered summer session only.

BI 551. Invertebrate Zoology. 1-8 Credits.

Representative invertebrate groups with emphasis on marine forms; morphology, systematics, life history, and ecology. Lectures, laboratories, field trips. Offered at Oregon Institute of Marine Biology.

BI 552. Insect Biology. 4 Credits.

Anatomy, physiology, systematics, and behavior of insects. Insect societies. Lectures, laboratories, field trips. Offered summer session only.

BI 554. Estuarine Biology. 5 Credits.

The biological and physical factors regulating abundance, distribution, production, and biodiversity within estuaries. Includes field trips to marshes, tidal flats and exploration of estuarine habitats. Offered at Oregon Institute of Marine Biology.

BI 555. Marine Birds and Mammals. 1-6 Credits.

Principles of morphology, physiology, evolution, life history, and systematics as demonstrated through study of birds and mammals of the Oregon coast. Comparison of the fauna from the open sea to coastal waters. Lectures, laboratory, field trips. Offered at Oregon Institute of Marine Biology.

BI 557. Marine Biology: [Topic]. 1-8 Credits.

Content varies. Topics include comparative embryology, environmental issues, biology of fishes, and other subjects related to marine biology. Lectures, laboratories, field trips. Repeatable when topic changes. Offered at Oregon Institute of Marine Biology.

BI 558. Biological Oceanography. 5 Credits.

Examines patterns of biological productivity and controlling physical and chemical mechanisms in the various environments of the world's oceans. Lectures, laboratories, field trips. Offered at Oregon Institute of Marine Biology.

BI 561. Systems Neuroscience. 4 Credits.

Principles of organization of nervous systems with emphasis on vertebrate brain and spinal cord. Functional implications of synaptic organization and pattern of projections, and comparative aspects. Lectures, discussions.

BI 563. Cellular Neuroscience. 4 Credits.

Physiology of excitation, conduction, and synaptic transmission. Lectures, discussions.

BI 564. Biological Clocks. 4 Credits.

Biological time keeping at ecological, evolutionary, behavioral, physiological, neurological, and molecular levels, with emphasis on daily and seasonal rhythmicity. Lectures, discussions.

BI 566. Developmental Neurobiology. 4 Credits.

Mechanisms underlying development of the nervous system. The genesis of nerve cells; differentiation of neurons; synaptogenesis and neuronal specificity; plasticity, regeneration, and degeneration of nervous tissue. Lectures, discussions.

BI 568. Amphibians and Reptiles of Oregon. 4 Credits.

Field identification and understanding of ecology, biogeography, and evolution of the common herpetofauna of four major physiographic regions of Oregon. Conservation biology issues addressed. Lectures, field trips. Offered summer session only.

BI 571. Population Ecology. 4 Credits.

Theoretical, experimental and applied aspects of growth, structure, and regulation of natural populations; population estimation; demographic analysis; life-history theory. Lectures, discussions.

BI 572. Community Ecology. 4 Credits.

Quantitative and conceptual approaches to the study of biological communities. Biodiversity measurement. Effect of climate and climate change on ecosystem structure and function. Lectures, discussions.

BI 574. Marine Ecology. 1-8 Credits.

Factors that influence the distribution, abundance, and diversity of marine organisms. Field emphasis on local intertidal and shallow-water communities. Offered at Oregon Institute of Marine Biology.

BI 576. Terrestrial Ecosystem Ecology. 4 Credits.

Flux of nutrients, carbon, water, and energy in the environment; interactions and consequences for organisms. Scale ranges from microbial to global. Lectures, discussions.

BI 584. Molecular Evolution. 4 Credits.

General description of patterns of molecular variation within and between species, underlying mechanisms, and methods of analysis.

BI 585. Techniques in Computational Neuroscience. 4 Credits.

Introduction to numerical techniques for modeling the nervous system from single neurons to neural networks. Lectures, laboratories.

BI 588. Evolutionary Processes. 4 Credits.

Critical discussion of the ecological and evolutionary genetic processes associated with adaptation in natural populations; draws from topics in population, quantitative, and molecular genetics, molecular evolution, and statistics.

BI 600M. Temporary Multilisted Course. 1-5 Credits.**BI 601. Research: [Topic]. 1-16 Credits.**

Repeatable.

BI 602. Supervised College Teaching. 1-5 Credits.

Repeatable.

BI 603. Dissertation. 1-16 Credits.

Repeatable.

BI 604. Internship: [Topic]. 1-16 Credits.

Repeatable.

BI 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

BI 606. Practicum: [Topic]. 1-16 Credits.

Repeatable.

BI 607. Seminar: [Topic]. 1-3 Credits.

Topics may include neurobiology, developmental biology, ecology colloquium, genetics, molecular biology, and neuroscience. Repeatable.

BI 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

BI 609. Capstone: [Topic]. 1-12 Credits.

Repeatable.

BI 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

BI 620. Molecular Genetics. 4 Credits.

Use of modern genetic techniques to analyze gene function. Illustrates the use of model organisms including yeast, worms, flies, and mice. Covers forward genetics (function-driven gene discovery) and reverse genetics.

BI 621. Computational Methods in Genomic Analysis. 4 Credits.

An introduction to Unix shell, Python, and R programming skills for analysis of biological data sets, specifically focusing on high-throughput sequencing data.

BI 622. Genomics Techniques. 4 Credits.

Students will be introduced to various genomics laboratory techniques, as well as trained in oral and written scientific communication.

BI 623. Advanced Topics in Genomics Analysis. 4 Credits.

Exposure to a variety of topics in genomics analysis including phylogenetics, transcriptome assembly, transcript quantification, and microbial community analysis.

BI 624. Genomics Research Lab. 4 Credits.

Group research on high-throughput sequencing data.

BI 625. Advanced Genomic Analysis. 4 Credits.

Group research on high-throughput sequencing data and special topics in genomics analysis.

Prereq: BI 624.

Minor in Black Studies

Code	Title	Credits
Core Course:		4
ES 250	Introduction to African American Studies	
	or ANTH 222 Introduction to Anthropology of the African Diaspora	
Roots - At least 12 credits from the following: ¹		12
ENG 241	Introduction to African American Literature	
HIST 250	African American History	
	or HIST 251 African American History	
WGS 199	Special Studies: [Topic]	
BLST 199	Special Studies: [Topic]	
Routes - At least 12 credits from the following: ²		12
ANTH 326	Caribbean Societies	
ES 345M	Music, Politics, and Race	
ES 352	Social Equity and Criminal Justice	
ES 442	Caribbean Literature and Politics	
ES 450	Race and Incarceration	
HIST 470	African American History to 1877: [Topic]	
	or HIST 471 African American History since 1877: [Topic]	

ENG 468 Ethnic Literature: [Topic]

or ENG 479 Major Authors: [Topic]

PHIL 452 Philosophy and Race

SPAN 490 20th-Century Latin American Literature:
[Topic]

WGS 399 Special Studies: [Topic]

Total Credits 28

¹ Following the successful completion of their gateway course and meeting with an advisor, students can decide if they want roots work in a combination of Anthropology, English, History, IRES, and WGSS lower-division courses.

² Consult with your advisor to discuss routes coursework.

Courses

BLST 141. Writing in Black: [Topic]. 4 Credits.

This course centers the act of writing and how blackness is understood and lived in the US, especially how Blackness can shape understandings of existence both in terms of critiquing power and enacting freedom dreams.

BLST 196. Field Studies: [Topic]. 1-12 Credits.

Repeatable.

BLST 198. Workshop: [Topic]. 1-12 Credits.

Repeatable.

BLST 199. Special Studies: [Topic]. 1-5 Credits.

Chemistry and Biochemistry

Mark Lonergan, Department Head

541-346-4603

541-346-4643 fax

91 Klamath Hall

The Department of Chemistry and Biochemistry offers bachelor of arts and bachelor of science degrees with majors in chemistry or biochemistry. The department enjoys a strong national reputation.

The curriculum in chemistry provides broad knowledge of the field as a part of the liberal education offered by the College of Arts and Sciences. Chemistry course work is a sound foundation for students interested in advanced work in chemistry or related sciences, particularly such fields as biochemistry, geochemistry, materials science, and molecular biology.

Faculty

Shannon W. Boettcher, professor (inorganic, materials science). BA, 2003, Oregon; PhD, 2008, California, Santa Barbara. (2010)

Carl Brozek, assistant professor (physical inorganic, materials science). SB, 2010, Chicago; PhD, 2015, Massachusetts Institute of Technology. (2018)

Jeffrey A. Cina, professor (physical). BS, 1979, Wisconsin, Madison; PhD, 1985, California, Berkeley. (1995)

Amanda Cook, assistant professor (organic, inorganic materials science). BS, 2010, California State, Fullerton; PhD, 2015, Michigan, Ann Arbor. (2018)

Victoria J. De Rose, professor (bioinorganic). BA, 1983, Chicago; PhD, 1990, California, Berkeley. (2006)

Kenneth M. Doxsee, professor (organic, materials science). BS, 1978, MS, 1979, Stanford; PhD, 1983, California Institute of Technology. (1989)

Deborah B. Exton, senior instructor. BS, 1987, Metropolitan State College of Denver; PhD, 1992, Denver. (1993)

Thomas Greenbowe, senior instructor. BA, 1972, William Paterson College of New Jersey; MS, 1974, Indiana State University; MS, 1979, Purdue University; PhD, 1982, Purdue University. (2015)

Marina G. Guenza, professor (physical). Laurea, 1985, Università degli Studi di Genova; PhD, 1989, degree granted by consortium of universities of Torino, Genova, and Pavia. (1998)

Michael M. Haley, Richard M. and Patricia H. Noyes Professor in Chemistry (organic, materials science). BA, 1987, PhD, 1991, Rice. (1993)

Scott Hansen, assistant professor (biochemistry, molecular biology and biophysics). BS, 2004, California, Davis; PhD, 2012, California, San Francisco. (2017)

Michael Harms, associate professor (biochemistry, molecular biology and biophysics). BS, 2004, Oregon State; PhD, 2008, Johns Hopkins. (2013)

Diane K. Hawley, professor (biochemistry). BA, 1976, Kansas; PhD, 1982, Harvard. (1986)

Christopher Hendon, assistant professor (computational materials). BSc, 2011, Monash; PhD, 2015, Bath. (2018)

James E. Hutchison, professor (organic, materials science); Lokey-Harrington Chair in the Department of Chemistry. BS, 1986, Oregon; PhD, 1991, Stanford. (1994)

Ramesh Jasti, professor (organic, inorganic, supramolecular). BS, 1998, North Carolina, Chapel Hill; PhD., 2006, California, Irvine. (2014)

Darren W. Johnson, Bradshaw and Holzapfel Research Professor in Transformational Science and Mathematics (organic). BS, 1996, Texas, Austin; PhD, 2000, California, Berkeley. (2003)

David C. Johnson, professor (inorganic, materials science); Rosaria P. Haugland Foundation Chair in Pure and Applied Chemistry. BA, 1978, Rutgers; MS, 1980, PhD, 1983, Cornell. (1986)

Michael E. Kellman, professor (physical). BS, 1971, California, Berkeley; PhD, 1977, Chicago. (1989)

Michael Koscho, senior instructor (organic). BS, 1993, Purdue; PhD, 1999, Illinois, Urbana-Champaign. (2006)

Mark Lonergan, professor (physical, materials science); director, Materials Science Institute. BS, 1990, Oregon; PhD, 1994, Northwestern. (1996)

Andrew H. Marcus, professor (physical, materials science). BA, 1987, California, San Diego; PhD, 1993, Stanford. (1996)

George V. Nazin, associate professor (physical). MS, 1999, Moscow Institute of Physics and Technology; PhD, 2007, California, Irvine. (2010)

Brad J. Nolen, professor (biochemistry). BA, 1997, Missouri State; PhD, 2003, California, San Diego. (2008)

Catherine J. Page, associate professor (inorganic, materials science). BA, 1980, Oberlin; PhD, 1984, Cornell. (1986)

Michael D. Pluth, professor (organic). BS, 2004, Oregon; PhD, 2008, California, Berkeley. (2011)

Kenneth E. Prehoda, professor (biochemistry). BA, 1991, California State, Sacramento; PhD, 1997, Wisconsin, Madison. (2001)

James Prell, assistant professor (physical). BA, 2005, Washington (St. Louis); PhD, 2011, California, Berkeley. (2014)

Geraldine L. Richmond, professor (physical, materials science); Presidential Chair. BS, 1975, Kansas State; PhD, 1980, California, Berkeley. (1985)

Tom H. Stevens, Philip H. Knight Professor (biochemistry). BA, 1974, MS, 1976, San Francisco State; PhD, 1980, California Institute of Technology. (1982)

David R. "Randy" Sullivan, senior instructor. BS, 1982, MS, 1989, North Texas. (2001)

Julia Widom, assistant professor (physical, biochemistry). BA, 2009, Northwestern; PhD, 2013, Oregon. (2018)

Cathy Wong, assistant professor (physical). BSc, 2004, McMaster; PhD, 2011, Toronto. (2015)

Emeriti

Bruce P. Branchaud, professor emeritus. BS, 1976, Massachusetts; MA, 1981, Dartmouth College; PhD, 1981, Harvard. (1983)

Frederick W. Dahlquist, professor emeritus. BA, 1964, Wabash; PhD, 1969, California Institute of Technology. (1971)

Thomas R. Dyke, professor emeritus. BA, 1966, Wooster; PhD, 1972, Harvard. (1974)

O. Hayes Griffith, professor emeritus. AB, 1960, California, Riverside; PhD, 1964, California Institute of Technology. (1965)

Julie A. Haack, senior instructor. BS, 1986, Oregon; PhD, 1991, Utah. (2000)

John F. W. Keana, professor emeritus. BA, 1961, Kalamazoo; PhD, 1965, Stanford. (1965)

James W. Long, senior instructor emeritus. BS, 1965, Washington (Seattle); PhD, 1969, California, Berkeley. (1978)

Robert M. Mazo, professor emeritus. AB, 1952, Harvard; MS, 1953, PhD, 1955, Yale. (1962)

David R. Tyler, Charles J. and M. Monteith Jacobs Professor in Chemistry (inorganic, materials science). BS, 1975, Purdue; PhD, 1979, California Institute of Technology. (1985)

Peter H. von Hippel, professor emeritus. BS, 1952, MS, 1953, PhD, 1955, Massachusetts Institute of Technology. (1967)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

- Bachelor of Arts in Chemistry
- Bachelor of Arts in Biochemistry
- Bachelor of Science in Chemistry
- Bachelor of Science in Biochemistry
- Chemistry Minor
- Biochemistry Minor

Undergraduate Studies

One strength of the program is the opportunity undergraduates have to participate in the activities of a dynamic research group that considers problems extending well beyond textbook instruction. Major and nonmajor students alike can enjoy this experience of scientific inquiry. One to two years of preparatory course work typically precede the research experience. The department enrolls twenty to thirty undergraduate students each term in CH 401 Research: [Topic].

Preparation

The high school preparation of a prospective chemistry major should include chemistry, physics, and a minimum of three years of mathematics. Those interested in biochemistry would also profit from biology courses in high school.

Two-year college students planning to transfer to the university to major in chemistry should prepare by taking courses equivalent to those outlined for the freshman and sophomore years.

The department offers two general-chemistry sequences, both of which lead to organic chemistry, the second-year sequence in chemistry.

Code	Title	Credits
General Chemistry Sequence Options		
CH 221 & CH 222 & CH 223	General Chemistry I and General Chemistry II and General Chemistry III	12

CH 224H & CH 225H & CH 226H	Advanced General Chemistry I and Advanced General Chemistry II and Advanced General Chemistry III	12
-----------------------------------	---	----

Each sequence covers the fundamentals of chemistry but uses a different approach and a textbook tailored to suit a student's background in high school chemistry and mathematics.

Careers

Career opportunities for chemists are available in education, government, and industry (see the annual October issue of *Chemical and Engineering News*). A bachelor's degree in chemistry provides a good background for advanced study in such fields as

- atmospheric science
- biochemistry
- biology
- environmental sciences
- forensic science
- geochemistry
- geological sciences
- pharmacy
- pharmacology
- physiology
- materials science
- medicine
- medicinal chemistry
- metallurgy
- molecular biology
- neuroscience
- oceanography

Chemists also find jobs in science writing, public relations, personnel, plant production, sales, management, safety management, market research, patent law, and financial analysis. The alumni newsletter, *Chemistry News*, has examples of careers UO majors have chosen. Follow the links on the department's website.

Chemistry Major

The program described below is the recommended curriculum for chemistry majors. It includes courses in chemistry and related fields. Courses taken to satisfy major requirements must be passed with grades of C- or better. Variations in courses and order may be worked out in consultation with an advisor. Advisors can also provide lists of substitute courses and courses that are recommended but not required.

Students are encouraged to participate in CH 401 Research: [Topic].

Biochemistry Major

Many undergraduate students who are interested in advanced study using molecular approaches to biological problems (e.g., biochemistry, molecular biology, neurochemistry, physical biochemistry, or perhaps medical research) may want to include courses in biologically based subjects. For these students, the Department of Chemistry offers a biochemistry major.

Courses taken to satisfy major requirements must be passed with grades of C– or better. Variations in courses and order may be worked out in consultation with an advisor.

Students who plan to attend graduate school should include research in their advanced work. If chemical research is included as part of the advanced work, at least 6 credits of CH 401 Research: [Topic] must be completed. Students who plan to apply to medical schools should investigate the need for a physics laboratory course that is not included in this curriculum.

BI 484	Molecular Evolution	
Total Credits		12

¹ Minimum of 6 credits of CH 401 and a written report are required for Research.

² See advisor for complete list. Courses used to satisfy the physical and advanced laboratory requirements cannot also be used as an advanced elective.

Sample Program for Biochemistry Majors

First Year	Credits
CH 224H–226H Honors General Chemistry or 221-223	12
CH 227–229 or 237-239 General Chemistry Laboratory	6
WR 121 College Composition I & WR 123	8
MATH 251–253 Calculus I-III	12
Electives (general-education, group-satisfying courses)	8-12
Second Year	
BI 281H–282H Honors Biology I-II	10
BI 320 Molecular Genetics	4
CH 341–343 Majors Track Organic Chemistry I-III	12
CH 337 Organic Chemistry Laboratory	3
CH 348 Organic Chemistry Laboratory for Majors	4
Electives (general-education, group-satisfying courses)	8-12
Third Year	
CH 461–463 Biochemistry	12
CH 467 Biochemistry Laboratory	4

PHYS 201–203	General Physics	12
PHYS 204–206	Introductory Physics Laboratory	6
Electives (general- education and advanced chemistry-biology courses)		8-12
Fourth Year		
CH 411–412	Physical Chemistry	8
CH 401	Research: [Topic] (or advanced laboratory)	4-6
Electives (general- education and advanced chemistry-biology courses)		21-28
Total Credits:		162-183

Honors Program

The criteria used for the selection of students who graduate with departmental honors in chemistry or biochemistry are as follows:

1. Grade point average (GPA) of at least 3.50 in all graded courses
2. Suitable accomplishment in undergraduate chemical or related research. Specifically, the student must pursue a research problem for one academic year or longer and be recommended as worthy of honors by the faculty supervisor. Positive accomplishment and publishable results are expected but not required
3. Endorsement for a major with honors by a member of the university faculty
4. Completion of all course requirements for the BS degree in chemistry (waivers or substitutions allowed with approval)

Chemistry Minor

A minor in chemistry may be designed from course work in general chemistry, including the laboratory sequence, and at least four additional upper-division courses. University requirements for the minor include a total of 24 credits in chemistry, 15 of which must be in upper-division courses and 12 of which must be completed at the University of Oregon. All courses for the minor must be completed with grades of C– or better. Credits earned in CH 407 Seminar: [Topic], CH 405 Reading and Conference: [Topic], and CH 409 Special Laboratory Problems may not be applied as required course work for the minor.

Biochemistry Minor

Code	Title	Credits
Lower Division		
General chemistry sequence		12
General chemistry laboratories		6
Upper Division		
CH 331 & CH 335	Organic Chemistry I and Organic Chemistry II	8
CH 461 & CH 462	Biochemistry and Biochemistry	8
CH 463	Biochemistry	4

or CH 467 Biochemistry Laboratory

Total Credits **38**

Other courses may be submitted for consideration and approval by the department. At least 12 credits for the biochemistry minor must be completed at the University of Oregon. All courses applied to the minor must be completed with grades of C– or better. Credits earned in CH 407 Seminar: [Topic], CH 405 Reading and Conference: [Topic], and CH 409 Special Laboratory Problems may not be applied to required course work for the biochemistry minor.

Academic Minors for Chemistry Majors

A carefully chosen minor can complement and enhance undergraduate study in chemistry. Following is a selection of academic minors that chemistry majors might want to consider:

- biology
- business administration
- computer science
- economics
- environmental studies
- geological sciences
- human physiology
- mathematics
- physics

Kindergarten through Secondary Teaching Careers

Students who complete the BA or BS degree with a major in chemistry or biochemistry are eligible to apply for the College of Education's fifth-year licensure program in middle-secondary teaching or the fifth-year licensure program to become an elementary teacher. More information is available from the department's K–12 education advisors, Catherine Page and Julie Haack; see also the **College of Education** section of this catalog.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

- **Chemistry**
- **Biochemistry**

Graduate Studies

Graduate work in chemistry is a research-oriented PhD program with options in

- biochemistry and molecular biology
- biophysics
- bioorganic and medicinal chemistry
- environmental chemistry
- inorganic and organometallic chemistry
- materials chemistry
- optics and spectroscopy
- organic synthesis
- polymer chemistry
- physical chemistry
- solid-state chemistry
- statistical mechanics of liquids and complex fluids
- surfaces and interfaces
- theoretical chemical physics

Master of science (MS) and master of arts (MA) degrees are also offered.

A strength of the University of Oregon program is its interdisciplinary approach to research and teaching. Many important advances in chemistry occur at the junctions of classically defined divisions of science.

Collaborative interaction between these divisions is fostered through interdisciplinary research institutes. Chemical scientists may be interested in the Institute of Molecular Biology, the Institute of Theoretical Science, the Materials Science Institute, the Oregon Center for Optics, and the programs in cell biology and in molecular synthesis, structure, and dynamics.

First-year students are offered financial assistance through graduate employee (GE) opportunities. Research assistantships are typically available for students with advanced standing. These research appointments are funded through grants to the university by federal agencies and private (industrial) sources for support of the basic research programs in the department. Students are selected for these positions based on their interest in a particular research area and by mutual agreement of the student and the faculty member directing the work.

An illustrated publication, *University of Oregon Doctoral Program in Chemistry*, may be requested from the department. The booklet presents information about the program, facilities, financial support, faculty members and their individual research interests, housing, and the local environment. People who request the booklet also receive information about admission and application forms for admission and GE opportunities.

Biochemistry, Molecular Biology, Cell Biology

One of the most active areas of research is the study of the molecular bases of cell function, including synthesis of macromolecules, regulation of gene expression, development, cell movement, and the structure and function of biological membranes. Research in these areas has been fostered by close collaboration among biologists, chemists, and physicists. The interdisciplinary nature of these programs has been greatly strengthened by the Institute of Molecular Biology and the program in cell biology. Eight members of the chemistry department are affiliated with these programs. Entering graduate students are in an excellent position to take advantage of the molecular-oriented avenues to study biological problems.

Biophysical Chemistry

Biophysical chemistry provides close collaboration and educational interaction among faculty members and students. Research groups that are developing and applying physical methods work closely with molecular and cellular biologists, neurobiologists, biochemists, and synthetic organic chemists. Most of the research programs in biophysical chemistry are interdisciplinary.

Another area of general interest is the nature of the excited electronic states of biopolymer components. This includes the use of the optical properties of biopolymers, such as their circular dichroism, as a probe of their conformational state; the relationship of excited state conformation changes to their resonance Raman spectra; and a fundamental interest in the nature of excited states.

Materials Science

The discipline of materials science seeks to understand the structures, properties, and structure-property relationships of condensed phase materials. It is by nature interdisciplinary, combining expertise from the fields of chemistry, physics, geology, and molecular biology. Most areas of chemistry can make an important contribution to materials science in the synthesis and characterization of various materials. Here the word materials generally means bulk crystalline solids but also includes low-

dimensional materials such as thin solid films or nanoscopic "wires" as well as amorphous solids and some aspects of liquids. Much of the excitement of the research in this area derives from the discovery and the improved understanding of new materials that have potential technological applications.

The Materials Science Institute was created to foster collaboration among the materials-oriented research groups at the University of Oregon. Members of the institute are active in the study of the structure, reactivity, and thermodynamics of materials in addition to the characterization of their electronic, magnetic, and optical properties. The chemistry and physics departments, dominant members of the institute, offer courses and seminars on the chemistry and physics of materials to foster the educational and research aspects of materials science. The list of active research topics includes the application of novel synthetic strategies toward the preparation of metastable phases (including the use of thin-film superlattice composites, sol-gel synthesis, self-assembly, and electron beam lithography), ultra-high vacuum surface science, laser-induced dynamics at surfaces, nonlinear optics of interfaces, characterization of electronic materials and devices, studies on the properties of amorphous and glassy materials, quantum size effects and fundamental limits of microelectronic devices, scanning force and scanning tunneling microscopy of modified surfaces and biological molecules, and electron transport across protein assemblies and biotechnological materials. Sharing of facilities and expertise among the various research groups is an important and valued aspect of the Materials Science Institute. Collaboration between institute members and industrial and national research laboratories is also an important dimension of the program. See also Materials Science Institute in the **Research Institutes and Centers** section of this catalog.

Organic, Bioorganic, Inorganic, Organometallic, and Materials Chemistry

The synthesis of new chemical substances and the study of their fundamental chemical and physical properties is at the heart of organic, bioorganic, organometallic, inorganic, and materials chemistry. Research and teaching in these traditionally distinct subareas is unified through a single, cohesive organic-inorganic area in the chemistry department.

Undergraduate students, graduate students, and postdoctoral researchers in organic-inorganic chemistry enjoy an especially broad education emphasizing the fundamental aspects of chemical synthesis, structural characterization, and mechanisms of chemical reactions and processes. Formal course work is organized around these interdisciplinary themes. Many research projects are interdisciplinary.

Weekly organic-inorganic seminars cover recent advances in organic, organometallic, inorganic, and materials research. Of foremost importance is the contiguous location of research laboratories. This proximity results in an open and active atmosphere that encourages spontaneous discussions of day-to-day research activities and problems, providing a chemical education unsurpassed by any textbook or formal course.

Organic-inorganic researchers have direct access to state-of-the-art instrumentation in the shared organic-inorganic instrumentation facility adjoining the research laboratories. Most faculty members in this area have varied research interests and expertise. Collaboration with researchers working in physics, materials science, biochemistry, and medicinal chemistry enhances the program.

Physical Chemistry

Physical chemistry focuses on understanding the physical basis of chemical phenomena. This goal is pursued through the concerted efforts of experimentalists and theorists. While experimentalists design and carry out laboratory investigations of chemical systems, theorists conceive and develop theoretical tools to explain and predict system properties. Ultimately, physical chemistry is about understanding the mysteries of chemical phenomena at a deep, fundamental level. The discipline draws from and contributes to many areas of chemistry, physics, biology, materials science, engineering, and mathematics.

At the University of Oregon, research in physical chemistry focuses on a variety of topics.

Experimental spectroscopy includes pulsed laser techniques to probe the molecular structure at wet interfaces; the development of new optical techniques to study the motions of intracellular species and macromolecules in liquids; and novel ultrafast, nonlinear spectroscopic methods to study the dynamics of excited states in molecules.

On the theoretical front, topics of interest include dynamics of highly excited molecules using quantum and semiclassical techniques, the development of a formal description of wave-packet interferometry, elucidation of molecular structure through theoretical studies of electronic potential energy surfaces, and theoretical statistical mechanics and simulation.

Much work at Oregon combines frontier experimental and theoretical approaches in tandem on particular topics. Theoretical and experimental studies in statistical mechanics concentrate on soft condensed matter and complex fluids. Another focus is quantum control using coherent and ultrafast laser pulses, pursued along both experimental and theoretical lines.

The physics of chemical systems at interfaces includes spectroscopic studies of organic, inorganic, and biomolecules at surfaces and interfaces as well as electrochemical and electrical investigations of charge transfer at molecular or nanoparticle-based semiconducting interfaces.

The research on semiconductor interfaces aims at identifying and controlling novel systems that enhance or mimic the behavior of conventional semiconductor interfaces.

Industrial Internships for Master's Degrees in Chemistry

These internships, sponsored by the Materials Science Institute, are described in the Research Centers and Institutes (p. 898) section of this catalog. Information and application materials are available through the institute.

Chemistry - Electrochemical Technology Accelerated Masters Program

Code	Title	Credits
Electrochemistry AMP Courses		
CH 554	Advanced Electrochemistry	4
CH 531	Inorganic Chemistry	4
CH 689	Chemistry Professional Development	1
CH 690	Numerical Simulation in Electrochemistry	2
CH 691	Analytical Electrochemistry Laboratory	2
CH 692	Electrochemical Device Engineering	4

CH 693	Electrochemical Device Laboratory	4
CH 694	Applied Electrochemistry Projects Laboratory	4
CH 695	External Graduate Internship	30
Core Undergraduate Chemistry Courses		
CH 221	General Chemistry I	4
or CH 224H	Advanced General Chemistry I	
CH 222	General Chemistry II	4
or CH 225H	Advanced General Chemistry II	
CH 223	General Chemistry III	4
or CH 226H	Advanced General Chemistry III	
CH 227	General Chemistry Laboratory	2
CH 228	General Chemistry Laboratory	2
CH 229	General Chemistry Laboratory	2
or CH 399	Special Studies: [Topic]	
CH 341	Majors Track Organic Chemistry I	4
or CH 331	Organic Chemistry I	
CH 342	Majors Track Organic Chemistry II	4
or CH 335	Organic Chemistry II	
CH 343	Majors Track Organic Chemistry III	4
or CH 337	Organic Chemistry Laboratory	
CH 337	Organic Chemistry Laboratory	3
CH 338	Organic Chemistry Laboratory	3
CH 348	Organic Chemistry Laboratory for Majors	4
CH 349	Organic Chemistry Lab for Majors	4
CH 411	Physical Chemistry	4
CH 412	Physical Chemistry	4
CH 413	Physical Chemistry	4
CH 417	Physical Chemistry Laboratory	4
CH 418	Physical Chemistry Laboratory	4
CH 419	Physical Chemistry Laboratory	4
CH 429	Instrumental Analysis	5
Required Math Courses		
MATH 251	Calculus I	4
MATH 252	Calculus II	4
MATH 253	Calculus III	4
MATH 256	Introduction to Differential Equations	4
MATH 281	Several-Variable Calculus I	4
Required Physics Courses		
PHYS 251	Foundations of Physics I	4
or PHYS 201	General Physics	
PHYS 252	Foundations of Physics I	4
or PHYS 202	General Physics	
PHYS 253	Foundations of Physics I	4
or PHYS 203	General Physics	
PHYS 204	Introductory Physics Laboratory	2
or PHYS 290	Foundations of Physics Laboratory	
PHYS 205	Introductory Physics Laboratory	2
or PHYS 290	Foundations of Physics Laboratory	
PHYS 206	Introductory Physics Laboratory	2
or PHYS 290	Foundations of Physics Laboratory	

University Requirements The Student will need complete the UO requirements in Writing, Arts and Letters, Social Science, and Cultural Literacy **53**

Total Credits **219**

Students apply to program during their junior year.

- (1) GPA and course of study to date
- (2) resume including volunteer and paid work, and previous experiences
- (3) personal statement including experiences, career goals and discussion of contributions to diversity, equity, and inclusion
- (5) interview including technical, experience, and behavioral components

Courses

CH 111. Introduction to Chemical Principles. 4 Credits.

Introduction to modern chemistry with emphasis on problem-solving skills and critical thinking. Fundamental mathematical techniques and skills are incorporated to illustrate the quantitative aspects of chemistry.

Prereq: Satisfactory placement test score for MATH 111; Coreq: MATH 111.

CH 113. The Chemistry of Sustainability. 4 Credits.

Illustrates how chemistry provides innovative materials, processes, and consumer products that support sustainable solutions related to energy utilization, global warming and pollution prevention.

Prereq: MATH 101 or higher; high school chemistry.

CH 196. Field Studies: [Topic]. 1-2 Credits.

Repeatable.

CH 198. Workshop: [Topic]. 1-2 Credits.

Repeatable.

CH 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

CH 221. General Chemistry I. 4 Credits.

First term of the three-term university chemistry sequence: components of matter, quantitative relationships, atomic structure, thermochemistry, and major classes of chemical reactions of the elements. Lectures. Students cannot receive credit for both CH 221 and CH 224H. Sequence with CH 222, CH 223.

Prereq: CH 111 or satisfactory placement score; MATH 111. Co-req: MATH 112; CH 227 or CH 237 recommended.

CH 222. General Chemistry II. 4 Credits.

Second term of the three-term university chemistry sequence: molecular structure, chemical bonding, gases and kinetic molecular theory, intermolecular forces, solutions and kinetics. Lectures. Students cannot receive credit for both CH 222 and CH 225H.

Prereq: CH 221 or CH 224H; MATH 112 with grades of C- or better. Concurrent CH 228 or CH 238 recommended.

CH 223. General Chemistry III. 4 Credits.

Third term of the three-term university chemistry sequence: thermodynamics, equilibrium, electrochemistry, nuclear chemistry. Lectures. Students cannot receive credit for both CH 223 and CH 226H. Sequence with CH 221, CH 222.

Prereq: CH 222 or CH 225H; MATH 112 with grades of C- or better. Concurrent CH 229 or CH 239 recommended.

CH 224H. Advanced General Chemistry I. 4 Credits.

First-year university chemistry for students with excellent backgrounds in high school chemistry, physics, and mathematics. Chemical structure, reactions, stoichiometry, thermochemistry, and an introduction to quantum chemistry. Students cannot receive credit for both CH 221 and CH 224H. Sequence with CH 225H, CH 226H.

Prereq: satisfactory placement test score; MATH 112. Coreq: one from MATH 241, MATH 246, MATH 251, MATH 261; CH 237 recommended.

CH 225H. Advanced General Chemistry II. 4 Credits.

First-year university chemistry for students with excellent backgrounds in high school chemistry, physics, and mathematics. Chemical bonding, states of matter, solutions, kinetics, and nuclear chemistry. Students cannot receive credit for both CH 222 and CH 225H.

Prereq: CH 221 or CH 224H; one from MATH 241, MATH 246, MATH 251, MATH 261 with grades of C- or better. coreq: one from MATH 242, MATH 247, MATH 252, MATH 262. Concurrent CH 238 recommended.

CH 226H. Advanced General Chemistry III. 4 Credits.

First-year university chemistry for students with excellent backgrounds in high school chemistry, physics, and mathematics. Chemical equilibrium, acid-base chemistry, thermodynamics, and electrochemistry. Students cannot receive credit for both CH 223 and CH 226H.

Prereq: CH 222 or CH 225H; one from MATH 242, MATH 247, MATH 252, MATH 262 with grades of C- or better. coreq: one from MATH 243, MATH 247, MATH 253, MATH 263. Concurrent CH 239 recommended.

CH 227. General Chemistry Laboratory. 2 Credits.

First term of the three-term laboratory sequence: basic laboratory skills, quantitative relationships, qualitative analysis, calorimetry.

Prereq: C- or better in MATH 111. Co-req: MATH 112. Pre- or coreq: CH 221 or CH 224H.

CH 228. General Chemistry Laboratory. 2 Credits.

Second term of the three-term laboratory sequence: graphical analysis, spectroscopy, spectrophotometry, gas laws, chromatography, kinetics.

Prereq: CH 227 or CH 237; MATH 112 with grades of C- or better. coreq: CH 222 or CH 225H.

CH 229. General Chemistry Laboratory. 2 Credits.

Third term of the three-term laboratory sequence: synthesis, equilibrium, acids and bases, volumetric analyses, electrochemistry, nuclear chemistry.

Prereq: CH 228 or CH 238; MATH 112 with grades of C- or better. coreq: CH 223 or CH 226H.

CH 237. Advanced General Chemistry Laboratory. 2 Credits.

First-year university laboratory course for students with a strong high school laboratory experience. Projects in analytical and inorganic chemistry emphasize the use of quantitative glassware, gravimetric and volumetric analysis, acid-base and precipitation reactions.

Prereq: MATH 112 with a grade of C- or better. coreq: CH 221 or CH 224H.

CH 238. Advanced General Chemistry Laboratory. 2 Credits.

Projects in inorganic and biochemistry with a focus on absorption spectroscopy, synthesis of coordination compounds, and measuring initial rates of reaction.

Prereq: CH 227 or CH 237; one from MATH 241, MATH 246, MATH 251, MATH 261 with grades of C- or better. coreq: CH 222 or CH 225H.

CH 239. Advanced General Chemistry Laboratory. 2 Credits.

Projects in biochemistry and inorganic chemistry involving enzymology, mechanisms of reactions, kinetics, and visible absorption spectroscopy.

Prereq: CH 228 or CH 238; one from MATH 242, MATH 247, MATH 252, MATH 262 with grades of C- or better. coreq: CH 223 or CH 226H.

CH 331. Organic Chemistry I. 4 Credits.

Structure, properties, and bonding of organic molecules.

Prereq: CH 223 or CH 226H. Concurrent CH 337 recommended.

CH 335. Organic Chemistry II. 4 Credits.

Reactions and mechanisms of organic chemistry.

Prereq: CH 331 or CH 341. Concurrent CH 338 recommended.

CH 336. Organic Chemistry III. 4 Credits.

Organic chemistry of biomolecules with a focus on chemical aspects.

Prereq: CH 335 or CH 342.

CH 337. Organic Chemistry Laboratory. 3 Credits.

Principles and techniques of laboratory practice in organic chemistry.

Prereq: CH 229 or CH 239; pre- or coreq: CH 331.

CH 338. Organic Chemistry Laboratory. 3 Credits.

Principles and techniques of laboratory practice in organic chemistry.

Prereq: CH 331 or CH 341, CH 337; pre- or coreq: CH 335.

CH 341. Majors Track Organic Chemistry I. 4 Credits.

Structure, properties, and bonding of organic molecules. Provides a rigorous foundation appropriate for chemistry and biochemistry majors as they become chemical practitioners. Sequence with CH 342, CH 343.

Prereq: CH 223 or CH 226H. Concurrent CH 337 recommended.

CH 342. Majors Track Organic Chemistry II. 4 Credits.

Focuses on mechanisms and reactions of common organic functional groups. Sequence with CH 341, CH 343.

Prereq: CH 331 (with grade of B- or better) or CH 341. Concurrent CH 348 recommended.

CH 343. Majors Track Organic Chemistry III. 4 Credits.

Incorporates topics from the recent chemistry literature. Sequence with CH 341, CH 342.

Prereq: CH 335 (with grade of B- or better) or CH 342. Concurrent CH 349 recommended.

CH 348. Organic Chemistry Laboratory for Majors. 4 Credits.

Problem solving in the organic chemistry laboratory. Sequence with CH 337, CH 349.

Prereq: CH 337; CH 331 or CH 341; coreq: CH 342.

CH 349. Organic Chemistry Lab for Majors. 4 Credits.

Organic chemistry laboratory projects. Two-dimensional nuclear magnetic resonance techniques. Sequence with CH 337, CH 348.

Prereq: CH 348; coreq: CH 343.

CH 360. Physiological Biochemistry. 4 Credits.

For preprofessional health science students. Topics include protein structure and function, enzyme mechanisms, central metabolism and bioenergetics, integration and regulation of metabolism by hormone action. Students cannot receive credit for both CH 360 and CH 462.

Prereq: CH 336 or CH 343; BI 214 or 282H recommended.

CH 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

CH 399L. Special Studies: [Topic]. 3 Credits.

Repeatable.

CH 401. Research: [Topic]. 1-21 Credits.

Repeatable. Introduction to methods of chemical investigation. For advanced undergraduates by arrangement with individual faculty members.

CH 403. Thesis. 1-12 Credits.

Repeatable. Open to students eligible to work for a bachelor's degree with honors in chemistry or biochemistry.

Prereq: Honors majors.

CH 405. Reading and Conference: [Topic]. 1-21 Credits.

Repeatable.

CH 406. Field Studies: [Topic]. 1-21 Credits.

Repeatable.

CH 407. Seminar: [Topic]. 1-5 Credits.

Biochemistry seminar for undergraduates who have completed or are enrolled in CH 461, CH 462, CH 463. No graduate credit. Repeatable.

CH 408. Laboratory Projects: [Topic]. 1-12 Credits.

Repeatable.

CH 409. Terminal Project. 1-12 Credits.

Repeatable.

CH 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

CH 410L. Experimental Course: [Topic]. 4 Credits.

Repeatable.

CH 411. Physical Chemistry. 4 Credits.

Methods of physics applied to chemical problems, including inorganic, organic, and biochemistry. Introduction to chemical thermodynamics. Prereq: two years of college chemistry (except for physics majors), PHYS 201, 202, 203; MATH 253; MATH 256, MATH 281, MATH 282 strongly recommended.

CH 412. Physical Chemistry. 4 Credits.

Methods of physics applied to chemical problems, including inorganic, organic, and biochemistry. Introduction to statistical mechanics and rate processes.

Prereq: two years of college chemistry (except for physics majors); CH 411; PHYS 201, 202, 203; MATH 253; MATH 256, MATH 281, MATH 282 strongly recommended.

CH 413. Physical Chemistry. 4 Credits.

Methods of physics applied to chemical problems, including inorganic, organic, and biochemistry. Introduction to quantum chemistry.

Prereq: two years of college chemistry (except for physics majors), PHYS 201, 202, 203; MATH 253; MATH 256, MATH 281, MATH 282 strongly recommended.

CH 417. Physical Chemistry Laboratory. 4 Credits.

Experiments in thermodynamics, modern electronic measurements, computer modeling, and data reduction.

Pre or coreq: CH 411.

CH 418. Physical Chemistry Laboratory. 4 Credits.

Experiments in statistical mechanics, chemical kinetics, plasma chemistry, and mass spectrometry.

Prerequisite CH 417; Pre or coreq: CH 412.

CH 419. Physical Chemistry Laboratory. 4 Credits.

Experiments molecular spectroscopy, quantum chemistry, and laser-excited chemical and physical processes to illustrate theoretical principles.

Prereq: CH 417; pre or coreq: CH 413.

CH 420. Physical Organic Chemistry I. 4 Credits.

Modern physical organic chemistry including chemical bonding, acid-base chemistry, thermochemistry, noncovalent interactions, and introduction to computational chemistry. Sequence with CH 421.

Prereq: CH 336.

CH 421. Physical Organic Chemistry II. 4 Credits.

Modern physical organic chemistry including tools to study reaction mechanisms, kinetic analysis, isotope effects, and qualitative molecular orbital theory. Sequence with CH 420.

Prereq: CH 420.

CH 429. Instrumental Analysis. 5 Credits.

Use of instrumental methods for quantitative determinations of unknown chemical samples.

Prereq: CH 417.

CH 431. Inorganic Chemistry. 4 Credits.

Introduction to group theory for molecular symmetry; syntheses, structures, reactions, and reaction mechanisms of coordination complexes and organometallic complexes.

CH 432. Inorganic Chemistry. 4 Credits.

Bioinorganic chemistry: metals in biological systems; coordination chemistry, reactions, spectroscopy, metaloclusters, and synthetic modeling.

Prereq: CH 431 recommended.

CH 433. Inorganic Chemistry. 4 Credits.

Solid-state inorganic chemistry: solid-state structure and its determination; the electrical, magnetic, and mechanical properties of materials and their physical description.

Prereq: CH 431 recommended.

CH 441. Quantum Chemistry. 4 Credits.

The principles of time-independent quantum mechanics and their application to model atomic and molecular systems.

Prereq: CH 413 or equivalent.

CH 442. Quantum Chemistry and Spectroscopy. 4 Credits.

Molecular structure theory, perturbation theory, time-dependent quantum mechanics, theory of spectra, selection rules.

Prereq: CH 441 or equivalent.

CH 443. Quantum Chemistry and Spectroscopy. 4 Credits.

Experimental spectra of atomic and molecular systems and surfaces.

Prereq: CH 442 or equivalent.

CH 445. Statistical Mechanics. 4 Credits.

Molecular basis of thermodynamics. Applications to the calculation of the properties of noninteracting and weakly interacting systems.

Prereq: CH 413 or equivalent.

CH 446. Chemical Kinetics: [Topic]. 4 Credits.

Description and interpretation of the time evolution of chemical systems. Repeatable.

Prereq: CH 413 or equivalent.

CH 447. Computational Chemistry. 4 Credits.

Introduction to modern computational methods used to understand the properties of molecules.

Prereq: CH 411, 412; or PHYS 353.

CH 451. Advanced Organic-Inorganic Chemistry. 4 Credits.

Principles of organic-inorganic reaction dynamics; kinetics and mechanisms, linear free-energy relationships, isotope effects, substitution reactions, dynamic behavior of reactive intermediates, electron transfer chemistry.

Prereq: CH 336 or equivalent.

CH 452. Advanced Organic Chemistry—Stereochemistry and Reactions. 4 Credits.

Principles and applications of stereochemistry; reagents and reactions, with mechanisms, used in contemporary organic synthesis; examples taken from the current literature.

CH 454. Advanced Electrochemistry. 4 Credits.

Advanced topics in electrochemistry including fundamental concepts (thermodynamics, kinetics, transport) and applications (analytical techniques, electrolysis, batteries).

Prereq: CH 411.

CH 461. Biochemistry. 4 Credits.

Structure and function of macromolecules.

Prereq: CH 336 or CH 343.

CH 462. Biochemistry. 4 Credits.

Metabolism and metabolic control processes. Energy and sensory transduction mechanisms.

Prereq: CH 461.

CH 463. Biochemistry. 4 Credits.

Mechanisms and regulation of nucleic acid and protein biosynthesis. Other current topics in biochemical genetics.

Prereq: CH 461/561; or CH 360 with a grade of B- or better.

CH 464. RNA Biochemistry. 4 Credits.

Introduction to the diverse field of RNA biochemistry.

Prereq: CH 463.

CH 465. Physical Biochemistry. 4 Credits.

Physical chemical properties of biological macromolecules; forces and interactions to establish and maintain macromolecular conformations; physical bases of spectroscopic, hydrodynamic, and rapid-reaction investigative techniques. Offered alternate years.

Prereq: CH 461.

CH 466. Structural Biochemistry. 4 Credits.

Protein and nucleic acid structures and energetics. Structure determination by x-ray crystallography and nuclear magnetic resonance. Computational methods for structural analysis. Offered alternate years.

Prereq: CH 461.

CH 467. Biochemistry Laboratory. 4 Credits.

Methods of modern molecular biology and protein purification.

Co-req: CH 461

CH 468. Cellular Biochemistry. 4 Credits.

This course surveys scientific discovery at the interface between cell biology and biochemistry. Emphasis will be placed on understanding how scientists visualize, quantify, and interpret how biochemical reactions are orchestrated in complex biological systems. Relationships between protein structure, function, and emergent properties will be defined.

Prereq: CH 461.

CH 503. Thesis. 1-16 Credits.

Repeatable.

CH 507. Seminar: [Topic]. 1-5 Credits.

Biochemistry seminar for undergraduates who have completed or are enrolled in CH 461, 462, 463. No graduate credit. Repeatable.

CH 508. Workshop: [Topic]. 1-21 Credits.

Repeatable.

CH 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

CH 510L. Experimental Course: [Topic]. 4 Credits.

Repeatable.

CH 511. Physical Chemistry. 4 Credits.

Methods of physics applied to chemical problems, including inorganic, organic, and biochemistry. Introduction to chemical thermodynamics.

CH 512. Physical Chemistry. 4 Credits.

Methods of physics applied to chemical problems, including inorganic, organic, and biochemistry. Introduction to statistical mechanics and rate processes.

CH 513. Physical Chemistry. 4 Credits.

Methods of physics applied to chemical problems, including inorganic, organic, and biochemistry. Introduction to quantum chemistry.

CH 517. Physical Chemistry Laboratory. 4 Credits.

Experiments in thermodynamics, modern electronic measurements, computer modeling, and data reduction.

Pre- or coreq: CH 511.

CH 518. Physical Chemistry Laboratory. 4 Credits.

Experiments in statistical mechanics, chemical kinetics, plasma chemistry, and mass spectrometry.

Pre or coreq: CH 512.

CH 519. Physical Chemistry Laboratory. 4 Credits.

Experiments in molecular spectroscopy, quantum chemistry, and laser-excited chemical and physical processes to illustrate theoretical principles.

Pre or coreq: CH 513.

CH 520. Physical Organic Chemistry I. 4 Credits.

Modern physical organic chemistry including chemical bonding, acid-base chemistry, thermochemistry, noncovalent interactions, and introduction to computational chemistry. Sequence with CH 521.

CH 521. Physical Organic Chemistry II. 4 Credits.

Modern physical organic chemistry including tools to study reaction mechanisms, kinetic analysis, isotope effects, and qualitative molecular orbital theory. Sequence with CH 520.

Prereq: CH 520.

CH 531. Inorganic Chemistry. 4 Credits.

Introduction to group theory for molecular symmetry; syntheses, structures, reactions, and reaction mechanisms of coordination complexes and organometallic complexes.

CH 532. Inorganic Chemistry. 4 Credits.

Bioinorganic chemistry: metals in biological systems; coordination chemistry, reactions, spectroscopy, metalloclusters, and synthetic modeling.

Prereq: CH 531 recommended.

CH 533. Inorganic Chemistry. 4 Credits.

Solid-state inorganic chemistry: solid-state structure and its determination; the electrical, magnetic, and mechanical properties of materials and their physical description.

Prereq: CH 531 recommended.

CH 541. Quantum Chemistry. 4 Credits.

The principles of time-independent quantum mechanics and their application to model atomic and molecular systems.

Prereq: CH 513 or equivalent.

CH 542. Quantum Chemistry and Spectroscopy. 4 Credits.

Molecular structure theory, perturbation theory, time-dependent quantum mechanics, theory of spectra, selection rules.

Prereq: CH 541 or equivalent.

CH 543. Quantum Chemistry and Spectroscopy. 4 Credits.

Experimental spectra of atomic and molecular systems and surfaces.

Prereq: CH 542 or equivalent.

CH 545. Statistical Mechanics. 4 Credits.

Molecular basis of thermodynamics. Applications to the calculation of the properties of noninteracting and weakly interacting systems.

Prereq: CH 513 or equivalent.

CH 546. Chemical Kinetics: [Topic]. 4 Credits.

Description and interpretation of the time evolution of chemical systems.

Repeatable.

Prereq: CH 513 or equivalent.

CH 547. Computational Chemistry. 4 Credits.

Introduction to modern computational methods used to understand the properties of molecules.

CH 551. Advanced Organic-Inorganic Chemistry. 4 Credits.

Principles of organic-inorganic reaction dynamics; kinetics and mechanisms, linear free-energy relationships, isotope effects, substitution reactions, dynamic behavior of reactive intermediates, electron transfer chemistry.

Prereq: CH 336 or equivalent.

CH 552. Advanced Organic Chemistry—Stereochemistry and Reactions. 4 Credits.

Principles and applications of stereochemistry; reagents and reactions, with mechanisms, used in contemporary organic synthesis; examples taken from the current literature.

CH 554. Advanced Electrochemistry. 4 Credits.

Advanced topics in electrochemistry including fundamental concepts (thermodynamics, kinetics, transport) and applications (analytical techniques, electrolysis, batteries).

CH 561. Biochemistry. 4 Credits.

Structure and function of macromolecules.

CH 562. Biochemistry. 4 Credits.

Metabolism and metabolic control processes. Energy and sensory transduction mechanisms.

Prereq: CH 561.

CH 563. Biochemistry. 4 Credits.

Mechanisms and regulation of nucleic acid and protein biosynthesis. Other current topics in biochemical genetics.

Prereq: CH 561.

CH 564. RNA Biochemistry. 4 Credits.

Introduction to the diverse field of RNA biochemistry.

CH 565. Physical Biochemistry. 4 Credits.

Physical chemical properties of biological macromolecules; forces and interactions to establish and maintain macromolecular conformations; physical bases of spectroscopic, hydrodynamic, and rapid-reaction investigative techniques. Offered alternate years.

CH 566. Structural Biochemistry. 4 Credits.

Protein and nucleic acid structures and energetics. Structure determination by x-ray crystallography and nuclear magnetic resonance. Computational methods for structural analysis. Offered alternate years.

Prereq: CH 561.

CH 567. Biochemistry Laboratory. 4 Credits.

Methods of modern molecular biology and protein purification.

CH 568. Cellular Biochemistry. 4 Credits.

This course surveys scientific discovery at the interface between cell biology and biochemistry. Emphasis will be placed on understanding how scientists visualize, quantify, and interpret how biochemical reactions are orchestrated in complex biological systems. Relationships between protein structure, function, and emergent properties will be defined.

CH 601. Research: [Topic]. 1-16 Credits.

Repeatable.

CH 602. Supervised College Teaching. 1-5 Credits.

Repeatable.

CH 603. Dissertation. 1-16 Credits.

Repeatable.

CH 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

CH 606. Field Studies: [Topic]. 1-16 Credits.

Repeatable.

CH 607. Seminar: [Topic]. 1-5 Credits.

Repeatable. Seminars offered in biochemistry, chemical physics, materials science, molecular biology, neuroscience, organic-inorganic chemistry, and physical chemistry.

CH 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

CH 609. Terminal Project. 1-16 Credits.

Repeatable.

CH 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

CH 613. Organic Chemistry: [Topic]. 1-4 Credits.

Topics include bioorganic and bioinorganic chemistry, computational chemistry, green chemistry, medicinal chemistry, natural products, organometallic chemistry, polymers, catalysis, molecular motors, and spectroscopic methods for structure determination. Repeatable when topic changes. Repeatable.

CH 623. Organic-Inorganic Chemistry Journal Club. 1 Credit.

Repeatable. Preparation and delivery of colloquium-style lectures in organic-inorganic chemistry based on papers from the literature. Repeatable for maximum of 12 credits.

CH 624. Physical Chemistry Journal Club. 1 Credit.

Repeatable. Preparation and delivery of colloquium-style lectures in physical chemistry based on papers from the literature. Repeatable for maximum of 12 credits.

CH 662. Advanced Biochemistry. 4 Credits.

Detailed consideration of enzyme mechanisms, macromolecular structure, protein-nucleic acid interactions, and selected aspects of biological synthesis.

CH 667. Polymers: Synthesis, Characterization, Processing. 4 Credits.

Methods of polymer synthesis and characterization; kinetics and mechanisms of the principal polymerization reactions. Introduction to mechanical properties and fabrication techniques.

CH 668. Physical Chemistry of Polymers and Coatings. 4 Credits.

Statistical and thermodynamic models for the equilibrium configuration, conformation, structure, mechanical properties, and phase transitions of polymer solutions, dense melts, liquid crystals.

CH 669. Polymer Synthesis and Characterization Laboratory. 4 Credits.

Preparation and physical characterization of polymers; emphasis on polymers of commercial interest.

CH 670. Industrial Polymer Projects Laboratory. 4 Credits.

Polymer industry-focused projects with emphasis on formulation and optimization of adhesives, coatings, thermoplastics, thermosets, drug delivery systems, biopolymers, personal care products.

Prereq: CH 667, CH 668, CH 669.

CH 677M. Semiconductor Device Physics. 4 Credits.

Introduction to the theory behind semiconductors. Elementary theory of inorganic solids; electronic structures and transport properties. Basic theory of devices including diodes, transistors, mosfets, and optoelectronic devices. Offered only in summer. Sequence with PHYS 678M, PHYS 679M. Multilisted with PHYS 677M.

CH 678M. Semiconductor Processing and Characterization Technology. 4 Credits.

Introduction to the techniques required to make semiconductors and test their properties. Solid-state and surface chemistry of inorganic semiconductors as it pertains to microelectronic devices. Offered only in summer. Multilisted with PHYS 678M.

Prereq: CH 677M.

CH 679M. Device Processing and Characterization Laboratory. 4 Credits.

Students use theory and techniques learned to design, fabricate, and test a device that performs a specific function, with an emphasis on wafer processing and device realization. Offered only in summer. Sequence with CH 677M, CH 678M. Multilisted with PHYS 679M.

Prereq: CH 678M.

CH 680. Electronics and Vacuum Systems. 4 Credits.

Introduction to modern electronic components, circuits, basic vacuum theory, vacuum failure modes, measurement systems, and troubleshooting.

CH 681. Introduction to Electron Microscopy. 4 Credits.

Introduction to theory and best practices for applying scanning electron (SEM) and transmission electron microscopy (TEM) in materials science.

CH 682. Electron Microprobe Analysis. 4 Credits.

Introduction to the theory and operation of instrumentation for electron microprobe analysis (EPMA) in materials science and geochemistry.

CH 683. Surface Analysis. 4 Credits.

Introduction to theory and best practices for surface analysis techniques (XPS and ToF-SIMS), with focus on applications for materials science.

CH 685. Advanced Transmission Electron Microscopy. 4 Credits.

Advanced theory and practices for using transmission electron microscopy, as applied to materials science.

Prereq: CH 681.

CH 686. Advanced Scanning Electron Microscopy. 4 Credits.

Advanced theory and practices for using focused ion beam and scanning electron microscopy in research and nanofabrication.

Prereq: CH 681.

CH 687. Advanced Surface Analysis. 4 Credits.

Advanced theory and practices for surface analysis spectroscopy, as applied to materials science.

Prereq: CH 683.

CH 689. Chemistry Professional Development. 1 Credit.

Students will develop their awareness of pathways for professional development in chemical technology and identify strategic areas for pursuing growth. Working with the instructors, they will design a plan to explore their strengths and interests and identify career opportunities.

CH 690. Numerical Simulation in Electrochemistry. 2 Credits.

Modern finite-element simulation software is widely used in engineering to predict system performance/properties or in science to understand complex system behavior. Students will learn use industry standard software suites to simulate electrochemical cells and devices to predict performance and develop an understanding of underlying phenomena.

Prereq: CH 454 or CH 554 is prereq or co-req.

CH 691. Analytical Electrochemistry Laboratory. 2 Credits.

This course will focus on typical three-electrode electrochemical experiments and laboratory techniques that form the basis for analytical electrochemistry and for building the basic electrochemistry knowledge and intuition with respect to thermodynamics, kinetics and mass transport.

Prereq: CH 454 or CH 554 is prereq or co-req.

CH 692. Electrochemical Device Engineering. 4 Credits.

This course examines the operational principles of electrochemical energy storage devices (batteries and capacitors), energy conversion devices (fuel cells, electrolyzers), and bioelectrochemical interfaces. The emphasis is on materials and device design based on fundamental chemistry and physics concepts that govern the properties and performance.

Prereq: CH 454 or CH 554.

CH 693. Electrochemical Device Laboratory. 4 Credits.

Students will work in small teams to build battery devices, electrolyzers for the production of chemicals and/or fuels, fuel cells, and biological interfaces. They will test the performance and response of these devices compared to theory and modelling, applying experimental design and statistical analysis methods.

Prereq: CH 454 or CH 554; Pre- or Coreq: CH 692.

CH 694. Applied Electrochemistry Projects Laboratory. 4 Credits.

This course requires students to work in teams to solve open-ended research and development projects in electrochemistry. The applied research and development projects for the course come from industry partners, national laboratories, and academic research laboratories.

Prereq: CH 454 or CH 554.

CH 695. External Graduate Internship. 1-10 Credits.

Student will complete internships in industry, a national laboratory, or other research setting to provide opportunities to make connections between the theory and practice of academic study and the practical application of that study in a professional environment.

Cinema Studies

Priscilla Peña Ovalle, Department Head

541-346-8104

201 McKenzie Hall

6223 University of Oregon

Eugene, Oregon 97403-6223

cinema@uoregon.edu

The cinema studies major blends a media-focused liberal arts education with creative work in digital filmmaking. Because cinema is inherently multidisciplinary, courses for the major span the College of Arts and Sciences, the College of Design, and the School of Journalism and Communication and include an array of courses in the history, theory, critical analysis, aesthetics, and production of cinema. As a result, majors approach cinema—including film, television, and new media—from a variety of disciplinary perspectives.

The bachelor of arts and science in cinema studies provides its graduates with a sound foundation for entering their chosen professions or continuing their education in graduate school. It also gives them the critical and analytic skills to adapt to the changes that are likely to occur in their professions throughout their lifetimes.

Students in the major are encouraged to study overseas in programs that immerse them in different cultures and languages, including the

department's own summer program in Dublin, Ireland, at the National Film School of Ireland, housed in the Dún Laoghaire Institute of Art, Design, and Technology. Students are also encouraged to seek internships in their chosen areas of potential career interest and expertise.

Faculty

Peter Alilunas, associate professor (cinema studies). BA, 2006, Oregon; MA, 2008, Texas, Austin; PhD, 2013, Michigan. (2014)

Michael G. Aronson, associate professor (cinema studies). BA, 1994, Pennsylvania; MA, 1997, PhD, 2002, Pittsburgh. (2003)

Michael Bray, instructor (digital arts, cinema). BA, 1997, Illinois, Urbana-Champaign; MFA, 2008, Oregon. (2008)

Sangita Gopal, associate professor (cinema studies). BA, 1990, Calcutta; MA, 1995, PhD, 2000, Rochester. (2004)

Erin Hanna, associate professor (cinema studies). BA, 2004, MA 2007 York (Toronto); PhD, 2014, Michigan. (2014)

Masami Kawai, assistant professor (cinema studies). BA, 2003, Hampshire College; MFA, 2013, California, Los Angeles. (2014)

Dong Hoon Kim, associate professor (cinema studies). BA, 1998, Yonsei; MA, 2002, PhD, 2008, Southern California. (2011)

Kevin May, instructor (cinema studies); multimedia assistant. BA, 2006, MEd, 2010, Oregon (2016)

HyeRyoung Ok, instructor (cinema studies). BA, 1996, MA, 2000, Seoul National; MA, 2002, New York; PhD, 2008, Southern California. (2011)

Priscilla Peña Ovalle, associate professor (cinema studies, ethnic studies). BS, 1998, Emerson College; MA, 2001, PhD, 2006, Southern California. (2006)

Ari Purnama, assistant professor (cinema studies). BA, 2007, Padjajaran; MA, 2011, PhD, 2019, Groningen. (2020)

Sergio Rigoletto, associate professor (cinema studies, Italian). Laurea, 2002, Catania; MA, 2004, Birkbeck, London; PhD, 2010, Reading. (2012)

Andre Sirois, senior instructor (cinema studies); multimedia supervisor. BA, 2002, Central Connecticut State; MA, 2005, Maine; PhD, 2011, Oregon. (2012)

Daniel Gómez Steinhart, associate professor (cinema studies). BA, 2000, Wesleyan; MA, 2006, PhD, 2013, California, Los Angeles. (2014)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Appointed Faculty

Michael Allan, comparative literature

Gabriela Martinez, journalism and communication

Affiliated Faculty

Kenneth S. Calhoon, comparative literature

Daniel L. Miller, journalism and communication

Kate Mondloch, history of art and architecture

Elizabeth M. Peterson, library

Stephen Rust, English

Biswarup "Bish" Sen, journalism and communication

Rick Silva, art

Janet Wasko, journalism and communication

- Bachelor of Arts in Cinema Studies (p. 128)
- Bachelor of Science in Cinema Studies (p. 129)
- Certificate in Film Studies (p. 130)

Undergraduate Studies

The bachelor of arts in cinema studies consists of 56 credits divided among four categories: fundamentals, production, core courses, and electives. The major includes the option of graduating with honors.

Courses in the major must be taken for a letter grade, and students must earn a grade of mid-C or better for credit toward the major. At least 28 credits must be taken in residence at the University of Oregon.

Honors

The department provides qualified undergraduate majors with options for participating in the honors program. Students arriving in the 2018–19 academic year or earlier may receive program honors at graduation if they have a final cumulative grade point average (GPA) of at least 3.75 in cinema studies course work. Beginning in 2019–20, incoming students must meet this GPA and, in addition, complete a scholarly or screenwriting project that originates from a cinema studies course and is then expanded in a faculty-led project development seminar. An honors college thesis also fulfills program honors requirements.

For more information, contact cinema@uoregon.edu.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Courses

CINE 110M. Introduction to Film and Media. 4 Credits.

Introduction to film and media studies and various methods of critical analysis. Multilisted with ENG 110M.

CINE 111. How to Watch TV. 4 Credits.

Introduction to the critical analysis of television narrative, aesthetics, and reception.

CINE 151M. Introduction to Korean Cinema. 4 Credits.

Surveys Korean national cinema, from the earliest days of the medium to the present. Multilisted with KRN 151M.

CINE 198. Workshop: [Topic]. 1-12 Credits.

Repeatable.

J 201; One from CINE 260M, ENG 260M; and two from CINE 265, CINE 266, CINE 267.

CINE 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

CINE 230. Remix Cultures. 4 Credits.

Study of issues surrounding media production and consumption in relation to intellectual property laws in modern society. Open to all majors.

CINE 260M. Media Aesthetics. 4 Credits.

Introduction to the analysis of form and style in cinema and related media, focusing on narrative, mise-en-scène, cinematography, editing, and sound. Multilisted with ENG 260M.

CINE 265. History of the Motion Picture I. 4 Credits.

Studies the technological, artistic, and cultural histories of motion pictures in various national contexts, from precinema through the silent era.

CINE 266. History of the Motion Picture II. 4 Credits.

Studies the technological, artistic, and cultural histories of motion pictures in various national contexts, from the transition to sound through the early 1960s.

CINE 267. History of the Motion Picture III. 4 Credits.

Studies the technological, artistic, and cultural histories of motion pictures in various national contexts, from the 1960s through the present.

CINE 268. United States Television History. 4 Credits.

Analyzes the history of US television, from its roots in radio broadcasting to the latest developments in digital television.

CINE 270. Introduction to Narrative Cinema Production. 4 Credits.

Focuses on basic theory and practice of digital video for narrative production.

Prereq: J 201; CINE 260M or ENG 260M; two from CINE 265, CINE 266, CINE 267.

CINE 320. Beginning Screenwriting. 4 Credits.

Introduction to the basics of writing for the screen. Provides students with an organized strategy for writing a feature film.

Prereq: J 201; CINE 260M or ENG 260M; One from ARTD 256, CINE 270, J 208; and two from CINE 265, CINE 266, CINE 267.

CINE 335. Exhibition and Audiences. 4 Credits.

Explores the exhibition and reception of film and other media by audiences in various contexts.

CINE 340. Production Studies. 4 Credits.

Introduction to the development of production practices and the lived realities of film and television production workers.

CINE 345. Stars. 4 Credits.

An examination of how and why stars and celebrities are produced and marketed by entertainment industries.

CINE 350. Queer European Cinema. 4 Credits.

Examines questions of gender and sexuality within the transnational and national contexts of Europe, including its diverse cinematic landscapes, traditions, and star imagery.

CINE 360. Film Theory. 4 Credits.

Introduction to theoretical debates about film as a medium of artistic expression in a transhistorical and global framework.

CINE 362M. Contemporary Korean Film. 4 Credits.

Introduction to contemporary South Korean film. Explores changes in film culture, practice, and industry in relation to social changes since the early 1990s. Offered alternate years. Multilisted with KRN 362M.

CINE 365. Digital Cinema. 4 Credits.

Examines the impact of digital media technologies on diverse dimensions of cinematic experience encompassing the production, delivery, and reception.

CINE 370. Narrative Production II. 4 Credits.

Focuses on the creative choices and intermediate skills of narrative production.

Prereq: J 201; CINE 260M or ENG 260M; two from CINE 265, CINE 266, CINE 267; one from ARTD 256, CINE 270, J 208.

CINE 381M. Film, Media, and Culture. 4 Credits.

Study of film and media as aesthetic objects shaped by a broad range of identity categories, reflecting communities identified by class, gender, race, ethnicity, and sexuality. Multilisted with ENG 381M.

CINE 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable when the topic changes.

CINE 401. Research: [Topic]. 1-12 Credits.

Repeatable.

CINE 404. Internship: [Topic]. 1-12 Credits.

Repeatable for a maximum of 12 credits; only 4 credits may count toward the cinema studies major.

CINE 405. Reading and Conference: [Topic]. 1-5 Credits.

Repeatable for a maximum of 12 credits; only 4 credits may count toward the cinema studies major.

CINE 407. Seminar: [Topic]. 1-5 Credits.

Repeatable.

CINE 408. Workshop: [Topic]. 1-12 Credits.

Repeatable when topic changes.

Prereq: J 201; CINE 260M or ENG 260M; One from ARTD 256, CINE 270, J 208; and two from CINE 265, CINE 266, CINE 267.

CINE 410. Experimental Course. 1-5 Credits.

Repeatable.

CINE 411M. US Film Industry. 4 Credits.

Traces the past and present of the U.S. film industry. Multilisted with J 411M.

Prereq: J 201 with a grade of mid-C or better.

CINE 420. Advanced Screenwriting. 4 Credits.

Provides advanced screenwriting students with an organized strategy for writing a feature film screenplay. Sequence with CINE 320.

Prereq: CINE 320 with grade of B– or better.

CINE 425. Cinema Production: [Topic]. 4 Credits.

Exploration of intermediate to advanced techniques used in cinema production—from music videos to digital sound recording to 16-millimeter film. Topics include Directing, Digital Single-Lens Reflex Camera Production, Music Video Production. Repeatable three times for a maximum of 16 credits when topic changes.

Prereq: CINE 260M or ENG 260M, J 201; two from CINE 265, CINE 266, CINE 267; one from ARTD 256, CINE 270, J 208.

CINE 440. National and Regional Cinema: [Topic]. 4 Credits.

Explores cinematic traditions, artistic styles and industrial practices in specific national and regional contexts as well as cinema's global development. Also examines issues of transnationalism, globalization, and diaspora.

CINE 490. Directors and Genres: [Topic]. 4 Credits.
Aesthetic, historical, and theoretical analysis of films, video, and television. Repeatable twice for a maximum of 12 credits when the topic changes.

CINE 508. Workshop: [Topic]. 1-12 Credits.
Repeatable.

CINE 510. Experimental Course. 1-5 Credits.
Repeatable.

CINE 511M. US Film Industry. 4 Credits.
Traces the past and present of the U.S. film industry. Multilisted with J 511M.

CINE 540. National and Regional Cinema: [Topic]. 4 Credits.
Explores cinematic traditions, artistic styles and industrial practices in specific national and regional contexts as well as cinema's global development. Also examines issues of transnationalism, globalization, and diaspora.

CINE 590. Directors and Genres: [Topic]. 4 Credits.
Aesthetic, historical, and theoretical analysis of films, video, and television. Repeatable twice for a maximum of 12 credits when the topic changes.

CINE 605. Reading and Conference: [Topic]. 1-16 Credits.
Repeatable.

Bachelor of Arts in Cinema Studies

The department offers bachelor of arts (BA) and bachelor of science (BS) degree programs, consisting of 56 credits divided among four categories: fundamentals, production, core courses, and electives. The major includes the option of graduating with honors.

Courses in the major must be taken for a letter grade, and students must earn a grade of mid-C or better for credit toward the major. At least 28 credits must be taken in residence at the University of Oregon.

Undergraduate Studies

Courses in the major must be taken for a letter grade, and students must earn a grade of mid-C or better for credit toward the major. At least 28 credits must be taken in residence at the University of Oregon.

Bachelor of Arts Degree Requirements

Code	Title	Credits
Fundamentals Courses ¹		
J 201	Media and Society	4
CINE 260M	Media Aesthetics	4
Select two of the following:		8
CINE 265	History of the Motion Picture I	
CINE 266	History of the Motion Picture II	
CINE 267	History of the Motion Picture III	
Production Courses		
Select one of the following Production A courses: ²		4
J 208	Introduction to Documentary Production	

ARTD 256	Introduction to Production	
CINE 270	Introduction to Narrative Cinema Production	
For a list of courses that satisfy Production B requirements (one is required), review the term course lists at cinema.uoregon.edu/term-course-lists .		4
Core Courses ³		
For a list of courses that satisfy core requirements, review the course lists at cinema.uoregon.edu/term-course-lists . A total of six core courses, at least one from each category, is required.		24
Electives ⁴		
For a list of courses that satisfy elective requirements, review the course lists at cinema.uoregon.edu/term-course-lists . Two electives are required and may include additional fundamentals, production, and/or core courses.		8
Total Credits		56

- 1 Fundamentals courses (16 credits) introduce majors to three central approaches to cinema studies: historical, social-institutional, and aesthetic. These must be completed before entry into production courses.
 - Students must complete Media and Society (J 201), Media Aesthetics (CINE 260M), and two of the three courses in the history sequence, History of the Motion Picture I (CINE 265), History of the Motion Picture II (CINE 266), and History of the Motion Picture III (CINE 267)], which may be taken in any order. Completion of all fundamentals courses is required before taking any production courses.
- 2 Production courses (8 credits: 4 from Production A and 4 from Production B) give majors a chance to learn the essentials of media production.
 - After completing the fundamentals requirements, students may enroll in a Production A course [Introduction to Production (ARTD 256), Introduction to Narrative Cinema Production (CINE 270), or Introduction to Documentary Production (J 208)].
 - After successful completion of a Production A course, students are eligible to register for Production B courses [various topics in production; please see term course list (<http://cinema.uoregon.edu/term-course-lists/>).
- 3 Core courses (24 credits) strengthen students' understanding of cinema as a dynamic, multicultural, and transnational phenomenon. Please see term course list (<http://cinema.uoregon.edu/term-course-lists/>) for offerings.
 - Students must complete six core courses, with at least one from each subcategory: Core A (cinema industries); Core B (theory and criticism); and Core C (national, regional, and transnational cinema).
- 4 Electives (8 credits) allow students to broaden their exposure to cinema and media studies. These courses are not focused exclusively on cinema but instead study it in relation to other modes of inquiry, including (but not limited to) Asian studies, comparative literature, ethnic studies, folklore and public culture, philosophy, journalism, literary studies, music, Romance languages, and women's, gender, and sexuality studies. A wide variety of elective courses from a range of departments and programs are available. Additional fundamentals, production, and core courses may also count as elective courses.

Honors

The department provides qualified undergraduate majors with options for participating in the honors program. Students arriving in the 2018–

19 academic year or earlier may receive program honors at graduation if they have a final cumulative grade point average (GPA) of at least 3.75 in cinema studies course work. Beginning in 2019–20, incoming students must meet this GPA and, in addition, complete a scholarly or screenwriting project that originates from a cinema studies course and is then expanded in a faculty-led project development seminar. An honors college thesis also fulfills program honors requirements.

 - After successful completion of a Production A course, students are eligible to register for Production B courses [various topics in production; please see term course list (<http://cinema.uoregon.edu/term-course-lists/>) (<http://cinema.uoregon.edu/term-course-lists/>) for offerings].
- Core courses (24 credits) strengthen students' understanding of cinema as a dynamic, multicultural, and transnational phenomenon. Please see term course list (<http://cinema.uoregon.edu/term-course-lists/>) for offerings.
 - Students must complete six core courses, with at least one from each subcategory: Core A (cinema industries); Core B (theory and criticism); and Core C (national, regional, and transnational cinema).
 - For students who declared the cinema studies major in fall 2013 or later: two courses in the core with the CINE subject code (8 credits out of the required 24) are required.
- Electives (8 credits) allow students to broaden their exposure to cinema and media studies. These courses are not focused exclusively on cinema but instead study it in relation to other modes of inquiry, including (but not limited to) Asian studies, comparative literature, ethnic studies, folklore and public culture, philosophy, journalism, literary studies, music, Romance languages, and women's, gender, and sexuality studies.

A wide variety of elective courses from a range of departments and programs are available. Additional fundamentals, production, and core courses may also count as elective courses. Elective credit for the major may also be derived from internship and/or independent study.

Honors

The department provides qualified undergraduate majors with options for participating in the honors program. Students arriving in the 2018–19 academic year or earlier may receive program honors at graduation if they have a final cumulative grade point average (GPA) of at least 3.75 in cinema studies course work. Beginning in 2019–20, incoming students must meet this GPA and, in addition, complete a scholarly or screenwriting project that originates from a cinema studies course and is then expanded in a faculty-led project development seminar. An honors college thesis also fulfills program honors requirements.

For more information, contact cinema@uoregon.edu

Certificate in Film Studies

The Film Studies Certificate is an interdisciplinary graduation certificate that can be completed by students in any major. It involves coursework from Cinema Studies and a variety of other departments on campus and offers a progression of film study that is structured, but less comprehensive than the major. Like a minor, completed certificates are included on a student's permanent transcript. Students who wish to study cinema while pursuing a different major can choose to 1) double major or 2) earn a Certificate in Film Studies.

Certificate in Film Studies

The certificate in film studies requires 36 credits in courses chosen from three groups:

1. Fundamental requirements
2. CINE Core requirements
3. General electives or additional CINE core courses

Code	Title	Credits
Fundamental Requirements		
CINE 260M	Media Aesthetics	4
Select two of the following:		8
CINE 265	History of the Motion Picture I	
CINE 266	History of the Motion Picture II	
CINE 267	History of the Motion Picture III	
CINE Core Requirements ¹		
Four core courses that strengthen students' understanding of cinema as a dynamic, multicultural, and transnational phenomenon.		16
General Electives or Additional CINE Core Courses		
Two elective courses that broaden students' exposure to cinema and media studies. These courses do not focus exclusively on cinema but study it in relation to other subjects of inquiry, including (but not limited to) Asian studies, comparative literature, ethnic studies, folklore, philosophy, journalism, literary studies, music, Romance languages, and women's, gender, and sexuality studies. A wide variety of elective courses from a range of departments and programs are available.		8
Total Credits		36

¹ At least one of the four courses must have the CINE subject code.

Students must earn a grade of mid-C or better in required courses to count toward the certificate. Cinema studies majors are not eligible for the certificate.

Please visit the department's online term lists for the most effective options (<http://cinema.uoregon.edu/term-course-lists/>).

Eugene, Oregon 97403-1267
classics@uoregon.edu

The field of classics embraces Greek and Roman culture from the prehistoric to the medieval periods. The department offers bachelor of arts and master of arts degrees in classics, and minors in classical civilization, Greek, and Latin.

One of the undergraduate's primary aims in studying classics at the university is to learn Greek or Latin (or both) well enough to read the ancient authors in their original languages.

Students may also study the archaeology of the ancient Mediterranean world. Through the study of classical archaeology, students acquire a broad understanding of Greek and Roman sites and material culture. Although grounded in the study of Greek and Roman buildings, tools, and objects, the courses stress the cross-cultural influences and interactions that informed how people produced, used, and valued these materials as well.

Through the study of classical literature in the original language and in English translation, and through the study of other areas encompassed by the classics, such as ancient history, philosophy, art history, mythology, and rhetoric, a student gains an understanding of the culture and ideals of the classical world and their influence on the languages and institutions of Western civilization.

Members of the classics faculty have a broad range of research and teaching specialties, including Greek poetry and prose, Roman poetry and prose, ancient philosophy and science, and classical archaeology, and foster close interdisciplinary ties with the faculty of several departments, including anthropology, art history, English, history, and philosophy.

Students who intend to major in classics should begin the study of one or both of the classical languages as early as possible in their undergraduate careers.

Careers

A bachelor's degree in classics prepares students for entry into graduate programs in classics, linguistics, comparative literature, ancient history, and archaeology, eventually leading to careers in college teaching, fieldwork, or the editorial professions.

Many prestigious professional schools look upon broad and thorough schooling in the humanities with greater favor than upon narrow preprofessional undergraduate training. Accordingly, students graduating from classics departments throughout the country have had notable success in schools of law, medicine, and business.

Faculty

P. Lowell Bowditch, professor (Latin literature, comparative literature, literary theory). BA, 1984, California, Berkeley; MA, 1989, PhD, 1992, Brown. (1993)

Cristina Calhoon, senior instructor (Latin literature, women in antiquity, Romans and barbarians). Laurea, 1978, Torino; MA, 1983, PhD, 1994, California, Irvine. (1988)

David Chamberlain, instructor (Greek literature, Latin literature). BA, 1989, Oxford; MA, 1991, PhD, 1997, California, Berkeley. (1997)

Kevin D. Dicus, assistant professor (classical archaeology, Latin literature) BA, 1992, MA, 2002, Arizona; PhD, 2012, Michigan, Ann Arbor. (2015)

Christopher Eckerman, associate professor (Greek literature, lyric poetry, social history). BA, 2000, California, Davis; MA, 2002, PhD, 2007, California, Los Angeles. (2008)

Mary K. Jaeger, professor (Latin literature, historiography, food in antiquity). BA, 1982, Gustavus Adolphus; MA, 1984, PhD, 1990, California, Berkeley. (1990)

Steven Shankman, professor. See **English**

Malcolm Wilson, professor (ancient philosophy, history of science). BA, 1985, Western Ontario; MA, 1986, Toronto; PhD, 1993, California, Berkeley. (1990)

Emeritus

Jeffrey M. Hurwit, professor emeritus. See **History of Art and Architecture**

John Nicols, professor emeritus. See **History**.

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Participating

Martha J. Bayless, English

Kristen Seaman, history of art and architecture

Undergraduate Studies

Major Requirements

The department offers a bachelor of arts (BA) degree. Students may choose to focus on Latin language and literature (Latin concentration), Greek language and literature (Greek concentration), or a combination of Greek and Latin. Students may also study the literature and culture of the ancient civilizations through courses that use secondary sources and translated texts (classical civilization concentration), or they may focus on classical archaeology and material culture.

Courses used to satisfy major requirements must be taken for letter grades and passed with grades of mid-C or better.

At least four upper-division courses (normally 16 credits) must be taken at the University of Oregon.

Bachelor of Arts in Classics: Greek Concentration

Code	Title	Credits
GRK 101–103	Basic Greek ¹	15
Select one of the following archaeology courses:		4
CLAS 188	Introduction to Classical Archaeology	
CLAS 330	Greek and Roman Archaeology: [Topic]	
CLAS 407	Seminar: [Topic]	
Select six of the following:		24
GRK 301	Authors: [Topic] ²	
GRK 302	Authors: [Topic] ²	
GRK 303	Authors: [Topic] ²	
300-level Greek courses where repeatable		
400-level Greek courses		
HIST 412	Ancient Greece: [Topic] ⁴	4
HIST 414	Ancient Rome: [Topic] ⁴	4
Three upper-division Greek or Latin courses beyond the first year, courses in translation, or courses from related departments ³		12
Total Credits		63

¹ Complete the introductory language courses or demonstrate proficiency at the introductory level.

² Repeated with departmental approval.

³ A list of approved courses is available from the department.

⁴ Please consult your undergraduate advisor for appropriate alternatives if HIST 412 and HIST 414 are unavailable.

Students are encouraged to take electives in ancient literature in translation and in ancient art, religion, mythology, or philosophy. They are also urged to take course work in Latin.

Bachelor of Arts in Classics: Latin Concentration

Total Credits 63

- ¹ Complete the introductory language courses with grades of mid-C or better or demonstrate proficiency at the introductory level.
- ² Language courses must be completed with grades of mid-C or better.
- ³ Please consult your undergraduate advisor for appropriate alternatives if HIST 412 and HIST 414 are unavailable.

Honors

The honors program in classics provides an opportunity for a student to focus on an area of concentration in a written thesis. The requirements for a bachelor's degree with honors in classics are as follows:

1. Satisfaction of the requirements for the major
2. A grade point average (GPA) of 3.50 or better in courses taken to meet the requirements of both the major and the university
3. A senior thesis of substantial quality, approved by the thesis director and at least one member of the program committee

Minor Requirements

Minor in Greek

Code	Title	Credits
	Upper-division Greek (GRK) courses ¹	16
	Upper-division Greek (GRK) or related courses in classics (CLAS), history (HIST), Latin (LAT), art history (ARH), English (ENG), philosophy (PHIL), religious studies (REL)	8
Total Credits		24

- ¹ Four credits of first-year Greek may be applied to this total.

Students must have a grade point average of 2.50 or better in courses applied to the minor. At least four courses (typically 16 credits) must be taken at the University of Oregon.

Minor in Latin

Code	Title	Credits
	Upper-division Latin (LAT) courses ¹	16
	Upper-division Latin (LAT) or related courses in classics (CLAS), history (HIST), Greek (GRK), art history (ARH), English (ENG), philosophy (PHIL), religious studies (REL)	8
Total Credits		24

- ¹ Four credits of first-year Latin may be applied to this total.

Students must have a grade point average of 2.50 or better in courses applied to the minor. At least four courses (typically 16 credits) must be taken at the University of Oregon.

Minor in Classical Civilization

Code	Title	Credits
	Lower- or upper-division courses from approved list	8
	Upper-division courses from approved list	16
Total Credits		24

Students must have a grade point average of 2.50 or better in courses applied to the minor. At least four courses (typically 16 credits) must be taken at the University of Oregon.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

- **Master of Arts in Classics: Languages and Literatures**
- **Master of Arts in Classics: Classical Archaeology and Material Culture**

Graduate Studies

The Department of Classics currently offers the master of arts (MA) in classics with a focus on ancient languages and literatures. Students may focus their course work on Greek, Latin, or Greek and Latin. In addition, the department offers a master of arts degree with a focus on classical archaeology and material culture.

Programs of study are arranged in consultation with two advisors, at least one of whom is a member of the Department of Classics, and comprise graduate courses selected from art history (subject code ARH), classics (CLAS), English (ENG), Latin (LAT), Greek (GRK), history (HIST), philosophy (PHIL), and religious studies (REL).

Admission

Procedures for admission to do graduate work in classics include the following:

1. A completed Graduate Admission Application
2. Transcripts of all college work
3. Three letters of recommendation
4. Scores on the verbal and quantitative sections of the Graduate Record Examinations (GRE)
5. Test of English as a Foreign Language (TOEFL) scores are required for international students
6. A sample of written work and a statement of academic purpose

Several graduate teaching fellowships are available each year for entering graduate students. Applicants seeking such fellowships must send an application postmarked by January 31.

Option 1

Select one of the following: ² 9

GRK 503 Thesis

LAT 503	Thesis
CLAS 503	Thesis

Option 2Two-part comprehensive examination: translation and essay ³**Total Credits** 51

- ¹ Equivalent courses taken as an undergraduate may fulfill this requirement.
- ² The credits may be counted toward the 45-credit minimum. Satisfactory completion of the thesis includes an oral defense.
- ³ The candidate must, in consultation with his or her advisors, define a reading list for the translation part of the examination.

Additional Requirements

- Complete the general MA requirements stipulated by the Division of Graduate Studies
- Pass with a grade of mid-B or better five courses in Greek and/or Latin authors
- Pass a translation examination in one modern language, usually French or German. This requirement may be fulfilled with a standardized examination offered by the university or by the successful translation of a significant scholarly text

Additional information may be obtained from the classics department and is included with the letter of admission.

Classics Courses**CLAS 110. Classical Mythology. 4 Credits.**

Introduction to the world of Greek and Roman mythology with an emphasis on the issues of personal and social identity.

CLAS 188. Introduction to Classical Archaeology. 4 Credits.

Introduction to the archaeology and material culture of the Ancient Greeks and Romans.

CLAS 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

CLAS 201. Greek Life and Culture. 4 Credits.

Introduces students to the literature, history, and art of ancient Greece. Students develop an appreciation for Greek culture and its similarities to and differences from American culture.

CLAS 202. Roman Life and Culture. 4 Credits.

Examines a thousand years of Roman life and culture from the founding of the city Rome in the 8th century BCE to the founding of the "New Rome, Constantinople, in the fourth century CE.

CLAS 301. Greek and Roman Epic. 4 Credits.

Analysis of the heroic tradition and epic themes in the Homeric poems, the works of Hesiod, and the Aeneid. Emphasis on literary criticism and intellectual history and the reception of these works by later writers and artists.

CLAS 302. Greek and Roman Tragedy. 4 Credits.

Examination of the major Greek tragedians, Aeschylus, Sophocles, Euripides, and the Roman, Seneca, from the viewpoint of literary criticism and cultural and intellectual history.

CLAS 303. Classical Greek Philosophers. 4 Credits.

Introduction to the philosophies of Plato and/or Aristotle from the viewpoint of Greek intellectual history.

CLAS 310. Early China, Ancient Greece. 4 Credits.

Examines the relationship between knowledge and wisdom in literature produced by two different ancient civilizations, Greece and China, from c. 1000 BCE to 86 CE. Offered alternate years.

CLAS 314. Gender and Sexuality in Antiquity. 4 Credits.

Introduction to construction of the categories of norms of Western sexuality through study of Greek and Roman attitudes toward gender roles, homo- and heterosexuality, the family, and privacy.

CLAS 330. Greek and Roman Archaeology: [Topic]. 4 Credits.

A course of variable content focusing on issues and methods of Mediterranean archaeology from the Bronze Age to Late Antiquity. Repeatable twice for a maximum of 12 credits when the topic changes.

CLAS 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

CLAS 401. Research: [Topic]. 1-21 Credits.

Repeatable.

CLAS 403. Thesis. 1-12 Credits.

CLAS 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

CLAS 609. Terminal Project. 1-12 Credits.

Repeatable.

CLAS 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

CLAS 611. Introduction to Philological Methods. 4 Credits.

Introduces graduate students to methodological approaches for the study of antiquity, employing faculty expertise in literary criticism, ancient art, historiography, epigraphy, ancient philosophy, and paleography.

Greek Courses

GRK 101. First-Year Greek. 5 Credits.

Fundamentals of the Attic Greek language; readings in Attic Greek and in koine.

GRK 102. First-Year Greek. 5 Credits.

Fundamentals of the Attic Greek language; readings in Attic Greek and in koine.

Prereq: GRK 101 or equivalent.

GRK 103. First-Year Greek. 5 Credits.

Fundamentals of the Attic Greek language; readings in Attic Greek and in koine.

Prereq: GRK 102 or equivalent.

GRK 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

GRK 301. Authors: [Topic]. 4 Credits.

Second-year Greek: selections from major Greek authors, either Plato or Lysias, with focus on reading and syntax. Repeatable when reading material changes.

GRK 302. Authors: [Topic]. 4 Credits.

Second-year Greek: selections from Euripides, with focus on reading and syntax. Repeatable when reading material changes.

GRK 303. Authors: [Topic]. 4 Credits.

Second-year Greek: selections from Homer or Hesiod, with focus on reading and syntax. Repeatable when reading material changes.

GRK 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

GRK 401. Research: [Topic]. 1-21 Credits.

Repeatable.

GRK 403. Thesis. 1-12 Credits.

Comparative Literature

Kenneth Calhoon, Department Head313 Villard Hall
5242 University of Oregon
Eugene, Oregon 97403-5242
complit@uoregon.edu

The University of Oregon offers major programs in comparative literature leading to the bachelor of arts (BA), bachelor of sciences (BS), and doctor of philosophy (PhD) degrees. In addition, comparative literature offers a compact minor program.

Interdisciplinary at its core, comparative literary study begins with the insistence that any artifact—whether from the realm of literature, cinema, the visual arts, or graphic and digital platforms—requires active attention and probing engagement. While the national literatures designate their subjects by language or cultural area, comparative literature provides for a pluralistic approach that bridges divides between languages and cultures, not to mention media.

Closely allied with critical theory, philosophy, and media studies, comparative literature is defined by an open-ended spirit of inquiry rather than a specific methodology or a preestablished canon of materials. Students of comparative literature develop a sense of their subject matter as they discover the meaning and method of their approach.

Oregon's graduate program, established in 1962, has an international reputation. It is the home of the founding journal in the field, *Comparative Literature*, and is closely involved with the leading national organization, the American Comparative Literature Association.

The department maintains an active schedule of lecture series, seminars, and workshops. In addition, comparative literature is the home of the Nomad Mentorship Program and *Nomad*, the journal of undergraduate criticism. Library holdings, which are strong in all areas of research in literature and other media, include an outstanding collection of journals and are augmented by an extensive interlibrary resources.

Faculty

Michael Allan, associate professor (Arabic and Francophone literature, postcolonial studies, cinema). BA, 2000, Brown; PhD, 2008, California, Berkeley. (2008)

Corinne Bayerl, senior instructor (16th- to early 18th-century French and German literature, philosophy, and religion; gender studies; early modern translation practices). MA, 1996, Ludwig-Maximilians-Universität München, PhD, 2014, Chicago. (2012)

Steven T. Brown, professor (Japanese film, comparative film, popular culture). BA, 1987, Illinois, Urbana-Champaign; MA, 1988, PhD, 1993, Stanford. (1993)

Katherine "Katy" Brundan, senior instructor (18th- and 19th-century English and European literature, novel, media and popular culture). BA 1992, MA, 1996, Cambridge; PhD, 2006, Oregon (2013)

Kenneth S. Calhoon, professor (18th- and 19th-century German and European literature and thought, psychoanalysis, cinema). BA, 1979, Louisville; MA, 1981, PhD, 1984, California, Irvine. (1987)

Roy Chan, associate professor. See **East Asian Languages and Literatures**.

Katya E. Hokanson, associate professor (Russian literature, travel literature, cultural studies). BA, 1984, Williams; MA, 1988, PhD, 1994, Stanford. (1995)

Dawn Marlan, senior lecturer (history of the novel, gender studies, cinema). BA, 1989, Bennington; MA, 1992, PhD, 2000, Chicago. (2004)

Leah Middlebrook, associate professor (16th-century Spanish and French lyric, court culture, theories of the subject). BA, 1989, Columbia; MA, 1991, PhD, 1998, California, Berkeley. (2002)

Jenifer Presto, associate professor (Russian literature, poetry, modernism). AB, 1985, Smith; MA, 1988, Middlebury; MA, 1989, PhD, 1996, Wisconsin, Madison. (2003)

Tze-Yin Teo, assistant professor (comparative, global, and transnational modernism; translation studies; literary theory). BA, 2009, National University of Singapore; PhD, 2015, Emory. (2015)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Participating

Stacy Alaimo, English

Susan C. Anderson, German and Scandinavian

Monique Balbuena, honors college

Mayra Bottaro, Romance languages

P. Lowell Bowditch, classics

Cory Browning, Romance languages

Anita Chari, political science

Joyce Cheng, history of art and architecture

James R. Crosswhite, English

Dianne M. Dugaw, English

Cecilia Enjuto Rangel, Romance languages

Pedro García-Caro, Romance languages

Sangita Gopal, English

D. Gantt Gurley, German and Scandinavian

Michael Hames-García, ethnic studies

Lamia Karim, anthropology

Martin Klebes, German and Scandinavian

Colin Koopman, Philosophy

Jeffrey S. Librett, German and Scandinavian

Massimo Lollini, Romance languages

Lanie Millar, Romance languages

Fabienne Moore, Romance languages

Dorothee Ostmeier, German and Scandinavian

Paul W. Peppis, English

F. Regina Psaki, Romance languages

Forest Pyle, English

Judith Raiskin, women's and gender studies

Sergio Rigoletto, Romance languages

Daniel Rosenberg, honors college

Gordon M. Sayre, English

Steven Shankman, English

Carol Silverman, anthropology

Beata Stawarska, philosophy

Michael Stern, German and Scandinavian

Analisa Taylor, Romance languages

Alejandro Vallega, philosophy

Daniela Vallega-Neu, philosophy

Yugen Wang, East Asian languages and literatures

Elizabeth A. Wheeler, English

Daniel N. Wojcik, English

- **Bachelor of Arts** and Bachelor of Science
- **Minor**

Undergraduate Studies

The undergraduate program offers a unique major that cuts across disciplines, teaches critical skills, and provides an intellectually challenging curriculum that trains students to analyze, critique and contribute to culture while preparing them for possible careers in the public humanities, media and multi-media, law, government, non-profit work, political activism and organization, public relations, advertising, or teaching. Students with a good background in one or more languages other than English find that the program gives them the opportunity to study literature and related cultural productions in a variety of historical and theoretical perspectives.

The program combines flexibility with a rigorous grounding in the basics of literary theory, cultural studies, and critical writing. Based on their interests, majors choose one of two tracks: language and culture or disciplines in dialogue. In the first, students develop proficiency in two linguistic traditions. In the second, students explore links between a single linguistic tradition and a nonliterary field. Both tracks are ideally suited to students considering either a double-major or a major and a minor, as students can combine their multiple interests into a single program of study.

A carefully designed core curriculum takes students through the basics of comparative literature as a discipline. Course work culminates with Capstone Seminar (COLT 415). This small seminar, capped at fifteen, offers both personalized attention and the sorts of pedagogical experiences that a small course enables, from workshop style formats to lengthier, individualized final projects. In addition, the Capstone allows students to work closely and collaboratively with other advanced students in their cohort.

Tracks within the Major

Because there are many different ways of thinking about literature from a comparative perspective, two emphases within the major are offered. One track, language and culture, features comparative study across different linguistic traditions. This track is recommended for students who want to study abroad, attend graduate school in comparative literature, or want to gain an in-depth understanding of linguistic cultures in addition to their own. A second track, disciplines in dialogue, requires less formal language study and allows students to combine the critical study of literature with work in another field. This emphasis offers a manageable path for students considering a double major in literature and another discipline. It is also well-suited to students who want to combine literary and cinema studies with creative writing, performance, the visual arts, philosophy, history, and journalism.

Language and Culture Track

Students in this track designate two linguistic traditions, a primary linguistic tradition and a second linguistic tradition. In addition, the language chosen to fulfill the language requirement should coincide with one of these national-linguistic traditions. The linguistic traditions commonly studied for the comparative literature major are listed below. Other traditions may be chosen, but must be approved by the department.

- Arabic
- Chinese

- Classics
- English
- French
- German
- Greek
- Italian
- Japanese
- Korean
- Romance Languages
- Russian
- Scandinavian
- Spanish

Disciplines in Dialogue Track

Students in this track designate one linguistic tradition and one additional disciplinary field. Courses taken in this disciplinary field may be spread out across several subject codes, with the approval of the director of undergraduate studies. The disciplinary focus fields commonly studied for the comparative literature major are listed below. An individualized course of study may be chosen, but must be approved by the department:

- African Studies
- Anthropology
- Art
- Art History
- Asian Studies
- Black Studies
- Business
- Cinema Studies
- Computer Science
- Comics and Cartoon Studies
- Creative Writing
- Dance
- Economics
- Environmental Studies
- Folklore
- Global Studies
- History
- Indigenous, Race, and Ethnic Studies
- Journalism
- Judaic Studies
- Latin American Studies
- Linguistics
- Music
- Philosophy
- Planning, Public Policy, and Management
- Political Science
- Psychology
- Religious Studies
- Sociology
- Theater Arts
- Women and Gender Studies

Students are strongly advised to complete their language requirement in a language relevant either to their linguistic tradition or to their disciplinary field.

Languages

The study of comparative literature entails advanced interdisciplinary work. Students who pursue the languages and culture track work across and between languages, and develop proficiencies beyond the two years required for the UO Bachelor's of Arts Degree. This proficiency can be

demonstrated in a number of ways (see below). Students who pursue the disciplines in dialogue track develop the language proficiency required for the UO Bachelor of Arts Degree.

Bachelor of Arts and Bachelor of Science Degree Requirements

The comparative literature major offers two tracks, language and culture and disciplines in dialogue. In order to complete a bachelor's degree in comparative literature in the language and culture track, it is necessary to complete the language and culture language requirement. Students may demonstrate language proficiency in any one of the following ways: 1) The student is a native speaker of a language other than English. 2) One of the upper division courses used to complete the Primary Linguistic Tradition was taught in the target language; that is, the course must be a full-fledged literature or cinema course, not a course whose primary focus is language acquisition. 3) Three, 300-level (or higher) language courses in the same language (not English).

In order to complete a bachelor's degree in comparative literature in the disciplines in dialogue track, it is necessary to complete at least the third term of the second year of a second-language course taught in the language (i.e., the language requirement for the Bachelor of Arts degree). Note that this requirement applies to students who seek both the Bachelor of Arts and the Bachelor of Science degree.

All course work required for the comparative literature major and minor must be taken for a letter grade and passed with grades of mid-C or better. Online courses do not count toward the comparative literature major.

Code	Title	Credits
Language Requirement ¹		
Core Courses		
Two COLT electives		8
COLT 301	Approaches to Comparative Literature	4
or COLT 305	Cultural Studies	
Select one of the following:		4
COLT 302	Theories of Poetry	
COLT 303	Theories of the Novel	
400-level COLT elective		4
COLT 415	Capstone Seminar	4
Focus Fields Courses		
Three upper-division courses in primary linguistic tradition ^{1,2}		12
Three upper-division courses in a secondary linguistic tradition (language and culture track) or a nonliterary discipline (disciplines in dialogue track)		12
Total Credits		48

¹ With the approval of the director of undergraduate studies, courses taken abroad may be used to fulfill this requirement.

² One of these courses may be on a non-literary topic relevant to the field such as history or philosophy.

Honors in Comparative Literature

Comparative literature students may apply to enter the honors track during spring of their junior year. Admission to the honors track is based on the recommendation of a comparative literature faculty member, instructor, or a participating faculty member; a writing sample; and the

student's transcript. Materials should be submitted by week 2 of spring term of the junior year. Completion of the honors track requires the successful completion of a bachelor of arts honors thesis. Students invited to participate in the Honors Track will develop and present a thesis prospectus in the fall term of their senior year. The thesis must be comparative in nature, and should entail work in both of the student's focus fields. If the prospectus is approved by the director of undergraduate studies, then the student enrolls in Thesis (COLT 403) during winter of the senior year. The full draft of the thesis is due by the end of week 10 of winter term. The thesis is completed under the supervision of the thesis advisor, and must be submitted to both the advisor and a second reader by the fifth week of spring term. The thesis must then be approved by the advisor and second faculty member after a formal presentation and defense, which will be held in spring term. The thesis advisor and the second reader should be chosen from the comparative literature faculty or participating faculty. With approval of the director of undergraduate studies, a second reader who is not a participating member may be chosen from another department.

Minor Requirements

The comparative literature minor offers an opportunity for students to pursue an interest in world literature and film without advanced language study.

Code	Title	Credits
COLT 301	Approaches to Comparative Literature	4
Four COLT courses (at least two upper-division courses)		16
Two upper-division literature or film courses in same subject area ¹		8
Total Credits		28

¹ Courses may be taught within the Department of Comparative Literature or in other departments and may be taken abroad or away from the University of Oregon

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Graduate Studies

The graduate program in comparative literature is founded on the conviction that literary traditions are best understood when contextualized across national and cultural boundaries. To thrive professionally, every scholar in the discipline must be closely trained in a primary national literature, proficient in at least three languages, and attuned to the importance of philology, bibliography, and linguistic training. At the same time, a commitment to comparative study requires a firm grasp of translation among languages and media and the history of reading practices, as well as aesthetic and cultural theory.

Students are admitted to the graduate program with the expectation that they will work toward the PhD degree. At present the Department of Comparative Literature does not offer a terminal master's degree. Instead, students become eligible for the MA on passing their PhD qualifying exams.

Admission

A complete application for admission includes the application form, a transcript of college- and graduate-level work, three letters of recommendation, a statement of purpose, and a 10- to 20-page sample in English of critical writing about literature. Graduate Record Examination scores are not required but are highly recommended. The application deadline is January 15 for entrance the following fall term. Application information and forms can be obtained from the department website.

Candidates for admission typically have an undergraduate major in one literature and competence in two of the following languages that are taught at the University of Oregon: Arabic, Chinese, French, German, Greek (classical), Hebrew (biblical), Italian, Japanese, Korean, Latin, Portuguese, Russian, Spanish, and Swedish. Under special circumstances, arrangements may be made with the director of graduate studies to study other literatures.

Overview of Requirements

Within their first three years of graduate study, students must complete the language requirement, six foundation courses, at least five courses in the primary field, and at least four courses in the secondary field. In

addition, students select at least three elective courses in consultation with their faculty advisors; these courses may be tangential to their main research interests or distributed according to those interests. The foundation courses include Graduate Studies in Translation (COLT 613), Graduate Studies in Comparative Literature (COLT 614), Graduate Studies in Comparative Literature (COLT 615), Transmedial Aesthetics (COLT 616), and at least two other graduate-level COLT courses. Courses applied to the degree must be passed with a grade of B+ or better, and students must maintain a grade point average of at least 3.50 in all graduate-level courses in order to remain in good standing in the program.

After completing all course work and language requirements, students are eligible to take their written and oral PhD qualifying examinations. Following successful completion of the exams, students submit a prospectus and meet with their committees for the prospectus conversation. A satisfactory prospectus conversation is required for advancement to candidacy. The approximate time from completion of course work to advancement is one year. Typically, the dissertation is completed within two years of advancing to candidacy.

Foundation Courses

The graduate program provides a solid foundation in theoretical and historical methods integral to comparative literature and relevant to working across national literary traditions, historical periods, theoretical paradigms, and media. Through these courses, students are expected to acquire a comprehensive understanding of scholarly method, encountering not only contemporary texts and theorists but also the history of the field, including the central controversies, crucial debates, and cultural contexts that have shaped its development. The student must complete six graduate-level foundation courses; these courses are Graduate Studies in Translation (COLT 613), Graduate Studies in Comparative Literature (COLT 614), Graduate Studies in Comparative Literature (COLT 615), Transmedial Aesthetics (COLT 616), and two others selected from among the COLT graduate course offerings.

Primary Field

The majority of comparative literature graduates are hired to teach in national literature departments and not in interdisciplinary programs. For this reason it is crucial that students develop a primary research field that is based either in a single national literature (e.g., Japanese literature) or in a single linguistic-cultural tradition that crosses national boundaries (e.g., Latin American literature). Depending on the relative breadth of a student's prior training, the primary field may be further delimited according to a period (e.g., postwar Japan) or a genre (e.g., German drama) or even an artistic movement (e.g., French postmodernism).

The student must complete five graduate-level courses in the primary field; at least three of the courses should share the same department subject code.

Secondary Field

This field complements the research within the primary field, either by providing counterpoint or a needed context. There are three ways to define one's secondary field. Most commonly, it represents a second national literature (e.g., Spanish literature) or a linguistic-cultural tradition that crosses national boundaries (e.g., Latin American literature). In addition, where two or more national-linguistic traditions share a common literary history—for example, within a given region or artistic movement—the secondary field may be defined in comparative terms (e.g., the Continental Renaissance, Caribbean literature, or East Asian film). Finally, the secondary field can eschew literary categories altogether

in order to represent an alternative disciplinary focus (e.g., religious studies).

At least four graduate-level courses must be taken in the secondary field. Three of them should share the same department subject code. At the discretion of the director of graduate studies, the three courses with shared subject code may be spread out over the secondary, foundation, and elective fields.

Electives

Three of the program's required 18 graduate-level courses are electives and should be chosen in consultation with an advisor. The electives may cover a wide range of interests or may be carefully distributed among the three research fields to fill gaps or achieve greater depth. Some students may wish to devote their electives to a fourth field of research (e.g., a third national literature). Students hoping to pursue this option are urged to meet with the director of graduate studies as soon as possible.

Language Requirement

Work in at least three languages is expected at all phases of the program, from course work to the dissertation. The language requirement addresses this expectation by ensuring both linguistic proficiency and a minimum level of graduate course work in all three languages. Students are required to complete graduate-level work in their languages. The following guidelines apply: (1) at least two graduate courses must be taken in each language to meet this requirement and should ideally be taught by a specialist in the target language; (2) the seminar paper for each course should demonstrate competency dealing with the target language and should be suitable for publication in the national literature field. The seminar paper for each of the two non-English languages must be submitted to the department at the end of the course for approval. The language requirement must be satisfied by the end of the third year.

Timetable from Entrance to Examinations

Advisors

During their first two terms of study (fall and winter), students are advised by the director of graduate studies. By Monday of week two of the third term, each student formally identifies an interim advisor—a faculty member who agrees to mentor the student through the completion of the first-year conversation and the first two terms of the second year.

By Monday of week two of the spring term of the second year, the student will have chosen his or her advisor of record. This advisor, who will be competent in the student's primary research interests, will mentor the student through the second-year review and the third year of study.

First Year

First-Year Statement

By Friday of week four of spring term, first-year students, in consultation with their interim advisors, submit a two- to three-page statement of purpose. It should identify and justify the primary and secondary fields the student intends to pursue—the general fields of study that form the backbone of a scholar's research profile. It should also clarify the relationship between the students' research languages and research fields, and indicate what linguistic study is necessary to complete the proposed course of study.

First-Year Conversation

In week six or seven of spring term, the first-year student, his or her interim advisor, the director of graduate studies, and one other comparative literature faculty member meet for a conversation about

the first-year statement. They evaluate the student's progress to date, including course work and language examinations, discuss the intended fields, and offer guidance for the remaining two years leading to the qualifying examination. With their approval of the statement and the student's general plan, as well as successful completion of all first-year course work with a GPA of 3.50, the student may proceed to the second year. A brief memo written by the student that summarizes the conversation is due to the department by Wednesday of week eight.

Second Year

Third-Year Article

During the second year, as part of preparation for publication in the field, students are required to begin expanding a seminar paper into an article for submission to a journal. Workshops are held to prepare students to write an article and select an appropriate publication venue. This process is meant to provide step-by-step guidance in publishing before the student advances to candidacy.

Second-Year Review

By Monday of week two in spring term of the second year, a student will have chosen the advisor of record. In consultation with that advisor, the student must write a careful self-review of his or her progress to date. The review should revisit both the first-year statement and the report of the first-year conversation. In particular, any recommendations made by the first-year conversation committee should be assessed: how were these recommendations pursued and with what result? The designation of the three research fields should also be addressed, along with any shifts in focus that have proved necessary or desirable. The review should explain what course work remains to be completed, and, where appropriate, should outline a plan for the completion of that work. Any problems in performance or concerns about timely progress should also be addressed. The second-year review must be approved by the advisor of record and submitted by Monday of week eight of spring term. The graduate committee reviews these reports, and small revisions and clarifications may be required before they approve the document. With approval of the review and completion of all second-year course work with a GPA of 3.50, the student may proceed to the third year.

Third Year

Third-Year Article

During the first term of the third year, the student will finalize the third-year article in consultation with an advisor in preparation for submitting it for peer review. By Friday of week five of spring term of the third year, the student will submit this article to the department along with a cover letter addressed to an appropriate journal.

Completion of Course Work and Language Requirement

The program is designed so that students may complete all course work and language requirements by the end of their third year. By Friday of week nine of spring term of the third year, students submit the course work and language requirement completion form for approval by the director of graduate studies and the graduate committee.

PhD Degree Requirements

Code	Title	Credits
Foundation Courses		
Six foundation courses: the four listed below and two other graduate COLT courses.		
COLT 613	Graduate Studies in Translation	4-5
COLT 614	Graduate Studies in Comparative Literature	5

COLT 615	Graduate Studies in Comparative Literature	5
COLT 616	Transmedial Aesthetics	5

Primary Field Courses

At least five graduate courses ¹

Secondary Field Courses

At least four graduate courses ²

Electives

At least three graduate courses ³

- At least three of the courses should share the same departmental subject code.
- Three courses should share the same departmental subject code. At the discretion of the director of graduate studies, the three courses with shared subject code may be spread out over the secondary, foundation, and elective fields.
- Choose electives in consultation with an advisor.

Additional Requirements

- Successfully passing the PhD qualifying exams
- Writing dissertation prospectus
- Dissertation

Examination Committee

By the beginning of spring term of the third year, each student selects an examination committee consisting of the advisor of record and two additional faculty members. Of these three, one represents the student's primary field of research (commonly the advisor of record), another represents the secondary field, and a third member is designated the committee chair. The third member also serves as chief mentor for the student's foundation field, advising him or her on the reading list inclusions from that field. All members must sign an agreement form to participate in the exam committee, and all must approve the exam statement and reading list. By Monday of week two in spring term of the third year, students must submit their examination committee membership to the department. Students who have chosen an additional fourth field of research may choose to be tested in that field as well. The logistics of this option should be pursued with the director of graduate studies as early in the process as possible. The examination committee membership must be approved by the director of graduate studies.

Examination Statement and Reading List

In consultation with the exam committee members, each student determines his or her examination fields. These fields correspond to the primary, secondary, and foundation research fields, but are usually narrower and more specialized in scope. Students then devise a reading list covering each field. Each list should include approximately fifteen to twenty primary items (an item is an author and a work or works that represent the author's perspective as a whole). Each field list should also include a separate sublist of pertinent critical-secondary works. Exam committee members can provide assistance in choosing the works on this list.

Students must also compose a six- to eight-page statement that defines the student's core interests, defends the examination fields, clarifies the scope of the reading list, and offers some indication of the future dissertation project and career aspirations for which this reading list provides the necessary comprehensive background and preparation. After being approved by all the examiners, the exam statement and reading list are submitted to the department by the end of week nine in

spring term of the third year. Prior to final approval, the exam statement and reading list are reviewed by the graduate committee, which may have additional recommendations and queries. Occasionally, these recommendations may be substantive enough to require additions to or deletions from the list and a resubmission process. Changes to the statement and list may be made no later than four weeks prior to the first written exam and must be approved by both the director of graduate studies and the examination committee members.

When the graduate committee and director of graduate studies have approved the Course Work and Language Requirements Completion Form and the exam statement and reading list, the student may proceed with the examination process.

Overview of Fourth Year

The fourth year is dedicated to completing the doctoral examinations and writing the dissertation prospectus. Typically, students prepare for the exams over the summer and early fall, sit for the written and oral exams by the end of fall term, and complete the prospectus by the middle of spring term. The prospectus conversation must be held by the beginning of week 10 of spring term in the fourth year, so that students may advance to candidacy in a timely manner at the end of spring term.

Written Examination

In this phase, students compose three essays over three 24-hour periods spread out over three weeks (weeks five, six, and seven of fall term in the fourth year). The first essay covers the primary field, with questions submitted by the examiner representing that field; the second covers the secondary field in the same manner; the third essay is comparative, addressing texts from both the primary and secondary fields, with questions submitted by all three examiners. For the primary and secondary field exams, students choose between two questions; for the comparative exam, they choose one of three questions. No exam will cover the foundation field. Instead, the examiners will explore the full gamut of the student's reading list with questions designed to ascertain the student's mastery of his or her methods as applied to the primary and secondary fields.

The three examiners all grade and comment on the comparative essay and read the field exams. The two field exams are graded separately and commented upon by the responsible examiners, except in the case of a failing grade. In this circumstance, the student's essay is graded by the other two examiners, as well. If two out of three examiners fail an essay, the student may retake the exam in that area in the following term. The exam may be retaken no more than once. If more than one of the student's essays fails, or if the student fails a retake exam, he or she does not proceed to candidacy, but may be eligible for a terminal master's degree. Grades for these exams are high pass, pass, or no pass. Students learn their exam results in week nine of fall term—that is, two weeks after completion of the final essay.

Oral Examination

The oral examination is scheduled during week 10 or 11 of fall term; it is proctored by the exam committee chair and is usually two hours in length. The committee and the student revisit the written examinations, discussing areas of strength and weakness. In addition, the examiners may explore the student's expertise more deeply by asking questions about reading list materials not covered during the written exams.

While no grade is assigned for performance on the oral exam, the committee may determine recommendations and even requirements for future study, including retaking the oral examination. Recommendations

are communicated in person to the student at the conclusion of the exam and in writing to the director of graduate studies as part of the committee chair's report on the exam. If substantive requirements or concerns have been articulated, the director of graduate studies will determine any official course of action to be taken.

For students who have failed one or more parts of the written exam, no oral examination will be held; instead, the time designated for the oral exam will be dedicated to a meeting with the student, the exam committee, and the director of graduate studies. Participants review the exam performance, discuss a possible retake exam, and/or review the advisability of a terminal master's degree.

Prospectus and Doctoral Candidacy

By Friday of week five of winter term in the fourth year, the student must designate a dissertation committee, including the dissertation chair and outside reader. The director of graduate studies must approve this committee. For details concerning faculty eligibility, students should refer to the Division of Graduate Studies' Dissertation Committee Policy at gradschool.uoregon.edu/committee-policy.

Committee members should be consulted during the process of writing the dissertation prospectus. A first draft of the prospectus should be submitted to the members of the dissertation committee by Friday of week 10 of winter term. A completed draft of the prospectus, approved by all four committee members, must be submitted by Friday of week five of spring term in the fourth year. After final approval from the director of graduate studies, the prospectus conversation is scheduled between weeks seven and nine of spring term.

A prospectus is not a first dissertation chapter; it is a snapshot of the dissertation project as envisioned by the student, prior to the completion of the bulk of his or her research. The prospectus is typically 10 to 15 pages in length. It should include a clear, concise examination of the problem to be studied, along with a compelling sense of the larger issues at stake in the project, both for the immediate topic and for the field at large. In addition, the prospectus should provide a clear vision of the project's trajectory: a narrative account of the dissertation's structure, an outline of chapters, and a justification for the particular authors and texts to be examined. A substantial research bibliography should be appended.

Prospectus Conversation

The prospectus conversation is scheduled between weeks seven and nine of spring term in the fourth year. This conversation, which includes the members of the dissertation committee, is facilitated by the committee chair and helps to develop the student's plans for the dissertation. Areas of strength and weakness in the project are discussed, and specific recommendations about structure, bibliography, and method are presented. After successful completion of this conversation, and with approval of the director of graduate studies and the graduate committee, the student advances to candidacy.

Dissertation

The dissertation, which is defended in a final oral presentation, is typically completed within two years of advancement to candidacy. Dissertations in a discipline such as comparative literature can hardly be said to follow exact specifications, but as a general principle any such project should involve at least two authors, works, and national literatures, and an explicit methodological orientation.

Courses

COLT 101. Introduction to Comparative Literature. 4 Credits.

Introduction to the comparative study of literature. Emphasis on literary genre, world literature, historical period.

COLT 102. Introduction to Comparative Literature. 4 Credits.

Introduction to the comparative study of literature. Emphasis on significant works of world literature in their social and political contexts.

COLT 103. Introduction to Comparative Literature. 4 Credits.

Study of visual culture from around the world.

COLT 198. Workshop: [Topic]. 1-2 Credits.

Repeatable.

COLT 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

COLT 211. Comparative World Literature. 4 Credits.

Explores literature from a global standpoint. Examines movement of literary forms (e.g., genres, motifs, rhetorical modes) from one culture, region, historical epoch to the next.

COLT 212. Comparative World Cinema. 4 Credits.

Introduces the principles of comparative analysis, exploring the aesthetic, ideological, and socio-economic exchanges between national cinematic traditions. Themes vary by instructor. Recent themes include Melodrama, Zombies, Queer Cinema.

COLT 231. Literature and Society. 4 Credits.

Introduction to the interdisciplinary study of literature in relation to society and politics. Draws on perspectives from political science, law, sociology, and related fields.

COLT 232. Literature and Film. 4 Credits.

Introduction to the interdisciplinary study of literature and film. Draws on perspectives from cinema studies, media aesthetics, and related fields.

COLT 301. Approaches to Comparative Literature. 4 Credits.

Introduction to theory and methods in comparative literature, with some attention to the history and problems of the discipline.

COLT 302. Theories of Poetry. 4 Credits.

Introduction to the study of poetry and poetic form from a world perspective. Offered alternate years.

COLT 303. Theories of the Novel. 4 Credits.

Introduction to the study of narrative and the novel from a world perspective. Offered alternate years.

COLT 305. Cultural Studies. 4 Credits.

Introduction to the interdisciplinary study of cultural discourses and practices.

COLT 360. Gender and Identity in Literature. 4 Credits.

Introduction to the study of gender in literature, from Asia to Europe to the Americas, and from the classics to the late 20th century.

COLT 370. Comparative Comics. 4 Credits.

Examines genre of narrative from a comparative and global standpoint, reviewing the impact of comics and other visual media on questions of national, regional, and ethnic identity. Offered alternate years.

COLT 380. Comparative Media: [Topic]. 4 Credits.

Critical analysis of a range of media from a transnational and/or intercultural perspective. Taught as a hybrid course blending face-to-face and online learning. Recent topics include Tokyo Cyberpunk, Asian Horror, Listening to Cinema. Repeatable thrice for a maximum of 16 credits.

COLT 390. Comparing Identities, Agencies and Differences. 4 Credits.

A critical reflection on contemporary US power imbalances and systems of race, ethnic, gender and religious privilege, as viewed through the lens of poetry. Students analyze U.S. poetry in comparative contexts (Europe, Asia, Africa). Depending on instructor, comparison may be across historical periods.

COLT 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

COLT 401. Research: [Topic]. 1-21 Credits.

Repeatable.

COLT 403. Thesis. 1-12 Credits.

Repeatable.

COLT 405. Reading and Conference: [Topic]. 1-21 Credits.

Repeatable.

COLT 407. Seminar: [Topic]. 1-5 Credits.

Repeatable.

COLT 408. Workshop: [Topic]. 1-21 Credits.

Repeatable.

COLT 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

COLT 415. Capstone Seminar. 4 Credits.

Senior seminar for all comparative literature students includes development and presentation of an original research project. Repeatable three times for a maximum of 16 credits.

COLT 440. Studies in Genre: [Topic]. 4 Credits.

Analysis of specific literary genres, modes, or both (e.g., lyric poetry, comedy, allegory). Offered every two to three years. Repeatable twice for a maximum of 12 credits when topic changes.

COLT 450. Comparative Studies in Cinema: [Topic]. 4 Credits.

Advanced consideration of the aesthetic (including literary) and cultural contexts of world film. Repeatable twice when topic changes for maximum of 12 credits.

COLT 460. Major Theorists: [Topic]. 4 Credits.

Concentrates on the work of a single literary or cultural theorist (e.g., Walter Benjamin, Jacques Derrida, Gayatri Spivak). Repeatable twice for a maximum of 12 credits when topic changes. Offered every two to three years.

COLT 462. Cultural Intersections: [Topic]. 4 Credits.

Studies designated issues between literatures and societies remote from one another, e.g., "minor" and "major" cultures, Asia and the West. Repeatable twice when topic changes for maximum of 12 credits.

COLT 470. Studies in Identity: [Topic]. 4 Credits.

Advanced study of gender, ethnicity, and other identity formations in literature. Offered every two to three years. Repeatable twice for a maximum of 12 credits when topic changes.

COLT 503. Thesis. 1-16 Credits.

Repeatable.

COLT 507. Seminar: [Topic]. 1-5 Credits.

Repeatable.

COLT 508. Workshop: [Topic]. 1-21 Credits.

Repeatable.

COLT 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

COLT 540. Studies in Genre: [Topic]. 4 Credits.

Analysis of specific literary genres, modes, or both (e.g., lyric poetry, comedy, allegory). Offered every two to three years. Repeatable twice for a maximum of 12 credits when topic changes.

COLT 550. Comparative Studies in Cinema: [Topic]. 4 Credits.

Advanced consideration of the aesthetic (including literary) and cultural contexts of world film. Repeatable twice when topic changes for maximum of 12 credits.

COLT 560. Major Theorists: [Topic]. 4 Credits.

Concentrates on the work of a single literary or cultural theorist (e.g., Walter Benjamin, Jacques Derrida, Gayatri Spivak). Repeatable twice for a maximum of 12 credits when topic changes. Offered every two to three years.

COLT 562. Cultural Intersections: [Topic]. 4 Credits.

Studies designated issues between literatures and societies remote from one another, e.g., "minor" and "major" cultures, Asia and the West. Repeatable twice when topic changes for maximum of 15 credits.

COLT 570. Studies in Identity: [Topic]. 4 Credits.

Advanced study of gender, ethnicity, and other identity formations in literature. Offered every two to three years. Repeatable twice for a maximum of 12 credits when topic changes.

COLT 601. Research: [Topic]. 1-16 Credits.

Repeatable.

COLT 603. Dissertation. 1-16 Credits.

Repeatable.

COLT 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

COLT 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

COLT 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

COLT 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

COLT 613. Graduate Studies in Translation. 4-5 Credits.

Approaches to literary translation in its theoretical, practical and pedagogical dimensions.

COLT 614. Graduate Studies in Comparative Literature. 5 Credits.

Overview of the state of the discipline. Treats historical and theoretical developments in literary studies including philology and cultural studies; reconsiders the place of comparative literature in a global, pluralistic curriculum.

COLT 615. Graduate Studies in Comparative Literature. 5 Credits.

Survey of contemporary literary theory.

COLT 616. Transmedial Aesthetics. 5 Credits.

Approaches to the analysis of film, photography, video, and new media. Emphasis on intersections between comparison and media theory.

COLT 618. Histories, Theories, and Cultures of New Media. 5 Credits.

Our class considers different traditions in media theory spanning generations, regions, languages, and methodological approaches to a range of media.

Computer Science

Reza Rejaie, Department Head

541-346-4408

541-346-5373 fax
120 Deschutes Hall
1202 University of Oregon
Eugene OR 97403-1202

Computer science, the study of computation, offers students the challenge and excitement of a dynamically evolving science whose discoveries and applications affect every aspect of modern life. Computer science is a rich intellectual field where practitioners apply a computational approach to address a wide variety of interesting and challenging problems. Computer scientists are engaged in research in core areas of theoretical computer science, computer systems design, algorithms, and programming languages, as well as more application-oriented areas such as databases and networking.

The Department of Computer Science (CS) is committed to a strong research program and a rewarding educational experience for undergraduate and graduate students.

The department offers instruction and opportunities for research in the following areas:

- Artificial Intelligence
- Assistive Technology
- Computational Science
- Computer Vision
- Cyber Security and Privacy
- High-Performance Computing
- Human-Computer Interaction
- Machine Learning
- Natural Language Processing
- Networking and Systems
- Parallel and Distributed Computing
- Performance Analysis
- Programming Languages and Compilers
- Scientific Visualization
- Software Engineering
- Theoretical Computer Science

The department offers bachelor's, master's and doctoral degrees; in addition, two undergraduate minors and a selection of service courses are offered for students who want introductory exposure to computers and computer applications. The computer science programs at the university are continually evolving as the discipline matures and as students' needs change.

Facilities

The Department of Computer Science is housed in Deschutes Hall, which holds faculty and graduate student offices and extensive laboratory space for research and instruction.

Undergraduate majors may use campus computing labs staffed by CS undergraduate tutors and lab assistants. Undergraduate majors taking upper-division courses and graduate students share a collaborative computing lab for the exclusive use of CS students. Graduate and undergraduate students engaged in active research also have access to the computing facilities of the associated research lab.

The cognitive modeling and eye-tracking laboratory features multiple Eyegaze eye trackers and a Tobii eye tracker, used to collect and analyze the eye movements people make during human-computer

interactions, and to develop eye-controlled user interfaces for people with disabilities.

Research in high-performance computing and computational science is supported by resources in the Oregon Advanced Computing Institute for Science and Society (OACISS) and the University of Oregon's Research Advanced Computing Services. The Talapas cluster provides a large-scale computational and storage resource to support research computing across the university.

The Advanced Integration and Mining Laboratory fosters research on discovering useful patterns from the mountain of data on biology, health, medicine, neuroscience, physiology, and social networks and on integrating data from structurally and semantically heterogeneous resources such as databases, online social networks, and the World Wide Web.

Oregon Networking Research Group (ONRG) conducts cutting-edge research in several areas of computer networking and networked systems including Internet measurements, multi-cloud computing, network telemetry systems, machine learning for networking, network security, social computing, and programmable optics. Research at ONRG is currently funded by federal agencies (e.g., NSF, NIH, etc.), industry (e.g., Ripple, Broadcom, Cisco, etc.), and foundations (e.g., Internet Society Foundation).

The Network & Security Research Laboratory features hardware and software facilities devoted to experimentation, simulation, and analysis of various computer networking techniques (such as Internet routing, software-defined networking, online social networking, and Internet of things), malicious network attacks (such as distributed denial-of-service attacks, traffic hijacking, Internet worms, botnets, social bots, phishing), and network defense solutions (such as firewalls, anti-phishing solutions, distributed denial-of-service defense, IP spoofing prevention, Internet routing security, Internet privacy protection, and Internet of things security and privacy).

The Research Group on Computing and Data-Understanding at Extreme Scale (CDUX) pursues problems in scientific visualization, high-performance computing, scientific computing, and computer graphics, and especially focuses on problems where these areas intersect. The group performs research for the Department of Energy, the National Science Foundation, and private companies, delivered in widely used software tools such as the VisIt visualization tool, and helps develop new tools, like VTK-m, a library for many-core visualization and analysis.

The High-Performance Computing Laboratory conducts research in several areas, including optimizing compilers, performance modeling and optimization, parallel algorithms, and software engineering. Example projects include static and dynamic analysis of software for building application performance models, ensuring software quality, or detecting security vulnerabilities; using machine learning and other approaches to model run-time characteristics of software; developing data mining techniques to study and improve HPC software engineering processes; applying natural language processing methods to study and improve HPC software developer productivity; designing new algorithms or improving existing ones in several application areas, including large-scale dynamic graphs, computational physics, and computational biology.

In addition, the university is a member of Internet2, a high-speed network connecting major research institutions.

Honors Program

The Computer Science department offers an honors program to their undergraduate majors. After obtaining advance approval, students in the degree program are eligible to attain honors in computer science by meeting the honors requirements of the department, including writing a thesis.

Careers

The undergraduate program is designed to prepare students for professional careers or graduate study. The field of computer science, which has become increasingly interdisciplinary over the past decade, offers a rich array of opportunities in fields as disparate as medicine, manufacturing, and the media as well as the computer industry.

Graduates come away with confidence that they can specify, design, and build large software systems; analyze the effectiveness of computing techniques for a specific problem; and work effectively in problem-solving teams. The master of arts (MA) and master of science (MS) degree programs prepare students for higher-level positions in the areas described above as well as for teaching positions in community colleges. The PhD degree program trains students as scientists for advanced research in specialized areas of computer science and for teaching in universities.

Faculty

Zena M. Ariola, professor (programming languages, lambda calculus, logic). BS, 1980, Pisa; PhD, 1992, Harvard. (1992)

Hank Childs, professor (scientific visualization, high-performance computing, computer graphics). BS, 1999, PhD, 2006, California, Davis. (2013)

Jee W. Choi, assistant professor (high-performance computing, scientific computation, data analytics). BS, 2000, PhD, 2015, Georgia Institute of Technology. (2019)

Phil Colbert, instructor (education, healthcare, environmental sciences, IoT, full stack development, CIT Minor). BS, 1990 CSU Chico; MS, 2008, CSU Chico. (2014)

Dejing Dou, professor (artificial intelligence, data mining, natural language processing). BE, 1996, Tsinghua; MS, 2000, PhD, 2004, Yale. (2004)

Brittany Erickson, assistant professor (scientific computing, computational seismology, high performance computing). BS, 2004, MS, 2006, PhD, 2010, California, Santa Barbara. (2018)

Ramakrishnan Durairajan, assistant professor (computer networking, multi-cloud computing, Internet data science, programmable optics, cybersecurity). BS, 2010, College of Engineering, Guindy; MS, 2014, PhD, 2017, Wisconsin, Madison. (2017)

Stephen F. Fickas, professor (software engineering, formal modeling of distributed systems, digital humanities). BS, 1971, Oregon State; MS, 1973, Massachusetts; PhD, 1983, California, Irvine. (1983)

Kathleen Freeman Hennessy, senior instructor; director of undergraduate studies. BS, 1982, Bucknell; PhD, 1993, Oregon. (2011)

Anthony J. Hornof, professor (human-computer interaction, assistive technology, cognitive modeling). BA, 1988, Columbia; MS, 1996, PhD, 1999, Michigan. (1999)

Lei Jiao, assistant professor (networking and distributed computing, performance modeling and evaluation, algorithm design and application). BS, 2007, MS, 2010, Northwestern Polytechnical; PhD, 2014, Göttingen. (2016)

Jun Li, professor (computer and network security, network architectures and protocols, distributed systems). BS, 1992, Peking; ME, 1995, Chinese Academy of Sciences; MS, 1998, PhD, 2002, California, Los Angeles. (2002)

Yingjiu (Joe) Li, professor (cyber security and privacy). BS, 1990, Dalian University of Technology; PhD, 2003, George Mason University. (2019)

Daniel Lowd, associate professor (machine learning, data mining, artificial intelligence). BS, 2003, Harvey Mudd College; MS, 2005, PhD, 2010, Washington (Seattle). (2009)

Allen D. Malony, professor (parallel processing, performance evaluation, neuroinformatics). BS, 1980, MS, 1982, California, Los Angeles; PhD, 1990, Illinois, Urbana-Champaign. (1991)

Thanh H. Nguyen, assistant professor (artificial intelligence, multi-agent systems, machine learning). BS, 2010, Hanoi University of Science and Technology; PhD, 2016, University of Southern California. (2018)

Thien Huu Nguyen, assistant professor (natural language processing, data mining, machine learning, artificial intelligence). BE, 2011, HUST, Hanoi; MS, 2014, PhD, 2018, NYU, New York. (2018)

Boyana Norris, associate professor (high-performance computing, compilers, performance analysis and optimization, software engineering, data science). BS, 1995, Wake Forest; PhD, 2000, Illinois, Urbana-Champaign. (2013)

Reza Rejaie, professor (computer networks, networked systems, Internet measurement). BS, 1991, Sharif University of Technology; MS, 1996, PhD 1999, Southern California. (2002)

Humphrey Shi, assistant professor (Computer Vision, Machine Learning, AI Systems & Applications). BS, 2005, Tsinghua University; PhD, 2017, University of Illinois at Urbana-Champaign. (2019)

Joseph Sventek, professor (complex event processing, Internet of Things). BS, 1973, Rochester; PhD, 1979, California, Berkeley. (2014)

Dave Wilkins, instructor. BA, 1965, Whitman College; MS, 1971, Oregon. (2010)

Eric D. Wills, senior instructor. BS, 2000, MS, 2002, PhD, 2008, Oregon. (2010)

Christopher B. Wilson, associate professor (computational complexity, models of computation). BS, 1978, Oregon; MS, 1980, PhD, 1984, Toronto. (1984)

Michal Young, associate professor (software engineering, software test and analysis). BA, 1983, Oregon; MS, 1985, PhD, 1989, California, Irvine. (1997)

Emeriti

Sarah A. Douglas, professor emerita. AB, 1966, California, Berkeley; MS, 1979, PhD, 1983, Stanford. (1983)

Arthur M. Farley, professor emeritus. BS, 1968, Rensselaer Polytechnic Institute; PhD, 1974, Carnegie-Mellon. (1974)

Michael Hennessy, senior instructor. BS, 1982, MS, 1984, Oregon. (1984)

Virginia M. Lo, associate professor emerita. BA, 1969, Michigan; MS, 1977, Pennsylvania State; PhD, 1983, Illinois, Urbana-Champaign. (1984)

Eugene M. Luks, professor emeritus. BS, 1960, City University of New York, City College; PhD, 1966, Massachusetts Institute of Technology. (1983)

Andrzej Proskurowski, professor emeritus. MS, 1967, Warsaw University of Technology; PhD, 1974, Royal Institute of Technology, Stockholm. (1975)

Kent A. Stevens, professor emeritus. BS, 1969, MS, 1971, California, Los Angeles; PhD, 1979, Massachusetts Institute of Technology. (1982)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Affiliated Faculty

Sameer Shende, research associate professor and director, Performance Research Laboratory (performance evaluation tools, programming models, software stack for HPC and AI/ML). BTech, 1991, IIT Bombay; MS, 1996, PhD 2001, University of Oregon. (2001)

Participating

Heidi Kaufman, English

Amy K. Lobben, geography

Marc Schlossberg, planning, public policy and management

McKay M. Sohlberg, special education and clinical sciences

Sanjay Srivastava, psychology

Jeffrey Stolet, music

Don M. Tucker, psychology

- Bachelor of Arts
- Bachelor of Science
- Computer Science Minor
- Computer Information Technology Minor

Undergraduate Studies

The Department of Computer Science offers a major and a minor in Computer Science (CS), a major in Mathematics and Computer science (MACS), and a minor in Computer Information Technology (CIT).

The Computer Science major is intended for students who want to study computers and computation with strong mathematical and scientific foundations. The Mathematics and Computer science major emphasizes formal and abstract problem solving complemented by computational

methods and computer technologies. This program, administered jointly with the Department of Mathematics, is described in the **Mathematics and Computer Science** section of this catalog. Both of these majors lead to the Bachelor of Arts (BA) or Bachelor of Science (BS) degrees.

Students majoring in Computer Science may choose to focus their studies in one of several areas of specialization, or concentrations, which build on the standard Computer Science core requirements. Each concentration specifies a set of coordinated choices for fulfilling upper-division computer science and other elective requirements. Current Computer Science concentrations include AI and Machine Learning, Computer Networks, High Performance Computing/Computational Science, Security, and Software Development.

Preparation

High school students who plan to major in Computer Science should pursue a strong academic program, including substantial work in mathematics, the sciences, and writing. Courses in algebra, geometry, trigonometry, and more advanced topics should be included. Courses in computer programming or computer technology are useful but not required. Students who have taken AP or IB Computer Science courses should check the UO TES® Public View for equivalent transfer credits and score minimums. Upon arrival at the university, students should consult with an advisor to determine the entry-level course best suited to the student's background.

Transfer and Second Baccalaureate Students

Transfer and second baccalaureate students should consult the online Interactive Transfer Catalog as well as an advisor to determine whether computer science, mathematics, and science courses they have taken fulfill the major requirements. Completing only general-university requirements prior to transferring to the University of Oregon will not be sufficient preparation to complete a CS degree in two years.

Students attending community college in Oregon are encouraged to follow the Oregon Computer Science Major Transfer Map (MTM) or obtain the associate of arts Oregon transfer degree or the associate of science Oregon transfer degree in computer science before entering the University of Oregon. While earning an associate's degree, community college transfer students should take discrete mathematics and computer science. In addition, calculus and laboratory science are recommended.

Bachelor of Arts Degree Requirements

To earn a BA in computer science, majors must complete the requirements for a BS and also demonstrate proficiency in a second language. Computer science majors must complete at least 60 credits of CS courses, of which 24 must be earned in residence at the University of Oregon. In addition, majors must complete 28 credits in mathematics, 12 credits in the sciences, and 4 credits of technical or business writing. The specific requirements for the CS major fall into five categories: core courses, concentration and elective courses, mathematics, writing, and science.

Computer Science I (CS 210), Computer Science II (CS 211), Computer Science III (CS 212), Elements of Discrete Mathematics I (MATH 231), and Elements of Discrete Mathematics II (MATH 232) must be passed with grades of B– or better before students can take the upper-division core courses. Courses required for the major must be taken for a letter grade; upper-division electives in CS courses numbered 410 or higher

(12 credits) must also be taken for a letter grade. Upper-division courses must be passed with a grade of C– or better.

Code	Title	Credits
Core Courses: Lower Division		
CS 210–212	Computer Science I-III	12
MATH 231–232	Elements of Discrete Mathematics I-II	8
Core Courses: Upper Division		
CS 313	Intermediate Data Structures	4
CS 314	Computer Organization	4
CS 315	Intermediate Algorithms	4
CS 330	C/C++ and Unix	4
CS 415	Operating Systems	4
CS 422	Software Methodology I	4
CS 425	Principles of Programming Languages	4
Core Courses: Mathematics		
Select one of the following:		8
MATH 251–252	Calculus I-II	
MATH 261–262	Calculus with Theory I-II	
MATH 246–247	Calculus for the Biological Sciences I-II	
Select two of the following:		8
MATH 347	Fundamentals of Number Theory I	
	or MATH 35:Elementary Numerical Analysis II	
	or MATH 39:Fundamentals of Abstract Algebra I	
MATH 253	Calculus III	
	or MATH 263:Calculus with Theory III	
MATH 341	Elementary Linear Algebra	
MATH 343	Statistical Models and Methods

PHYS 201–203	General Physics	
	or PHYS 25 Foundations of Physics I	
	253	
Psychology		
PSY 201	Mind and Brain	
Select two of the following:		
PSY 301	Scientific Thinking in Psychology	
PSY 304	Biopsychology	
PSY 305	Cognition	
PSY 348	Music and the Brain	
Core Course: Writing		
WR 320	Scientific and Technical Writing	4
	or WR 321 Business Communications	
Electives: Upper Division		
Upper-division CS courses in student's chosen concentration (concentration information below)		12
Upper-division CS courses in student's chosen concentration, honors thesis, capstone project, or other upper-division courses ^{4,5}		8
Upper-division mathematics or theoretical computer science course ⁶		4
Total Credits		104

¹ To support interdisciplinary study, students in any concentration are encouraged to complete a minor (typically 24–32 credits) or major in a computing-related field. Students who complete a minor (other than computer information technology or mathematics) or another major (including mathematics) in a computing-related field may, with the approval of the Undergraduate Education Committee, replace the CS laboratory science requirement with the completed minor or major.

² Students are encouraged to complete the accompanying lab courses.

³ Physics is recommended for networks concentration students.

⁴ If Experimental Course: [Topic] (CS 410) courses are applied, they must have different topic subtitles to satisfy this requirement.

⁵ A maximum of 8 credits in upper-division courses numbered less than 410, or DSCI 311. CS courses numbered 400–499 may be taken for a maximum of 4 credits when used to satisfy this requirement. Special Studies: [Topic] (CS 399), Seminar: [Topic] (CS 407), and Experimental Course: [Topic] (CS 410) courses must have different topic subtitles to satisfy this requirement. CS 399 and CS 410 courses must have a prerequisite of CS 313 and have regular weekly class meetings and homework assignments.

⁶ The mathematics elective is selected from upper-division mathematics courses with a prerequisite of Calculus II (MATH 252) or higher, or from theoretical computer science courses. A list of theoretical computer science courses is available in the computer science office or the department website.

Bachelor of Science Degree Requirements

To earn a BS in computer science, majors must complete at least 60 credits of CS courses, of which 24 must be earned in residence at the

University of Oregon. In addition, majors must complete 28 credits in mathematics, 12 credits in the sciences, and 4 credits of technical or business writing. The specific requirements for the CS major fall into five categories: core courses, concentration and elective courses, mathematics, writing, and science.

Computer Science I (CS 210), Computer Science II (CS 211), Computer Science III (CS 212), Elements of Discrete Mathematics I (MATH 231), and Elements of Discrete Mathematics II (MATH 232) must be passed with a grade of B– or better before students can take the upper-division core courses. Courses required for the major must be taken for a letter grade; upper-division electives in CS courses numbered 410 or higher (12 credits) must also be taken for a letter grade. Upper-division courses must be passed with a grade of C– or better.

- ¹ To support interdisciplinary study, students in any concentration are encouraged to complete a minor (typically 24–32 credits) or major in a computing-related field. Students who complete a minor (other than computer information technology or mathematics) or another major (including mathematics) in a computing-related field may, with the approval of the Undergraduate Education Committee, replace the CS laboratory science requirement with the completed minor or major.
- ² Students are encouraged to complete the accompanying lab courses.
- ³ Physics is recommended for networks concentration students.
- ⁴ If Experimental Course: [Topic] (CS 410) courses are applied, they must have different topic subtitles to satisfy this requirement.

- ⁵ A maximum of 8 credits in upper-division courses numbered less than 410, or DSCI 311. CS courses numbered 400–499 may be taken for a maximum of 4 credits when used to satisfy this requirement. Special Studies: [Topic] (CS 399), Seminar: [Topic] (CS 407), and Experimental Course: [Topic] (CS 410) courses must have different topic subtitles to satisfy this requirement. CS 399 and CS 410 courses must have a prerequisite of CS 313 and have regular weekly class meetings and homework assignments.
- ⁶ The mathematics elective is selected from upper-division mathematics courses with a prerequisite of Calculus II (MATH 252) or higher, or from theoretical computer science courses. A list of theoretical computer science courses is available in the computer science office or the department website.

Upper-Division Electives

In addition to the core computer science, mathematics, science, and writing courses, Computer Science majors must complete 20 credits of upper-division computer science and 4 credits of upper-division mathematics or theoretical computer science. Students should choose at least 12 of their upper-division CS credits with courses from courses numbered 410 or higher; the 8 remaining upper-division credits may be additional upper-division courses, an honors thesis, capstone project, or other upper-division electives. Students with a concentration should choose at least 12 of their upper-division CS credits with courses from their selected concentration.

A maximum of 8 credits in upper-division CS courses with numbers less than 410 may be applied to the upper-division electives requirement. Courses numbered 400–409 may be taken for a maximum of 4 credits when used to satisfy this requirement. (Courses numbered 399, 407, or 410 may be repeated only with different course subtitles.) Special Studies: [Topic] (CS 399) and Experimental Course: [Topic] (CS 410) courses used as upper-division electives must have a prerequisite of CS 313 and have regular weekly class meetings and homework assignments.

The mathematics elective is selected from upper-division mathematics courses with a prerequisite of MATH 252 or higher, or from theoretical computer science courses. A list of courses is available in the computer science office or at the department website.

Concentrations

Concentrations, or focus areas, highlight areas of specialization within the department and guide student elective choices. Each concentration has an approved list of CS courses, available from the Computer Science office or the department website. Concentrations may also include recommended science or mathematics courses or a recommended minor in another field.

AI and Machine Learning Concentration

The artificial intelligence and machine learning concentration prepares students to develop computational solutions to problems that require emerging problem solving techniques, often involving inference from large collections of noisy data. Course work focuses on neural and statistical approaches to inference as well as search.

Computer Networks Concentration

The Computer Networks concentration prepares students for careers as network systems administrators, network protocol developer-programmers, or network security specialists in a wide range of environments, including educational institutions, business enterprises,

and government agencies, as well as for advanced graduate studies and research in the field of computer networks. Course work encompasses most aspects of network theory and practice.

High Performance Computing/Computational Science Concentration

The High Performance Computing/Computational science concentration prepares students to apply computational and mathematical techniques to the analysis and management of scientific data. Course work in this concentration combines depth in applied and formal aspects of Computer Science.

Security Concentration

The Security concentration provides a foundation in topics and concepts relating to the security of computer systems and networks. It prepares students to work as security analysts and provides a highly desirable skill set for all employers, ranging from software engineers to administrators, in both the private and government sectors. It also provides a foundation for further graduate study and research in security. Course work encompasses a strong understanding of computer systems and networks and their security, and can be tailored to a more theoretical or more applied focus.

Software Development Concentration

The Software Development concentration prepares students for careers in software engineering, software project management, software quality assurance, and other areas involving the creation of software. Course work focuses on solving problems related to the cost of development as well as the quality of the software delivered in complex software projects.

Preparation for the Major

Students who take Computer Science I (CS 210) are expected to have completed Elementary Functions (MATH 112) or the equivalent.

Students who do not have the required mathematical background are strongly encouraged to take one or more introduction to programming courses such as Introduction to Programming and Problem Solving (CS 122) along with their math preparation courses. Students who are unsure about their level of preparation for CS 210 should meet with an advisor.

Sequence of Courses for Students Prepared for CS 210

First Year		Credits
CS 210–212	Computer Science I-III	12
MATH 231–232	Elements of Discrete Mathematics I-II	8
Total Credits:		20

Sequence of Courses for Students Preparing for CS 210

First Year		Credits
Fall		
MATH 112	Elementary Functions	4
	Select one of the following: ¹	4
CS 122	Introduction to Programming and Problem Solving	4
CS 111	Introduction to Web Programming	4
Winter		

MATH 231	Elements of Discrete Mathematics I	4
CS 210	Computer Science I	4
Spring		
MATH 232	Elements of Discrete Mathematics II	4
CS 211	Computer Science II	4
Total Credits:		32

- 1 Taken either in first term or first year. Students are encouraged to take more than one course. CS 122 strongly recommended.
- 2 Taken in either second term or second year.

Major Progress Review and Major in Good Standing

Each major must meet with a computer science advisor and file the Major Progress Review form while taking Intermediate Data Structures (CS 313) or Computer Organization (CS 314). Mathematics and CS core courses and at least 12 credits of CS upper division elective courses numbered 410 or higher must be taken for letter grades and passed with grades of C– or better. Other courses used to satisfy the major requirements may be taken for letter grades or pass/no pass. Grades of C– or better or P must be earned in these courses. At least 12 of the CS upper-division credits applied to the degree must be taken in residence at the university. A student who receives two grades below C– in the upper-division core, or three grades below C– in any CS upper-division courses, will be removed from the major.

Mathematics and Computer Science

The Department of Computer Science and the Department of Mathematics jointly offer an undergraduate major in mathematics and computer science, leading to a bachelor of arts or a bachelor of science degree. This program is described in the Mathematics and Computer Science section of this catalog. This major prepares students for a wide range of careers in the high tech industry, for advanced graduate study, and for careers as middle school and high school teachers.

Honors Program

Students with a GPA of 3.50 or higher in computer science and a cumulative GPA of 3.50 or higher, or a GPA of 3.75 or higher in computer science and a cumulative GPA of 3.25 or higher, are encouraged to apply to the department honors program after completing Intermediate Data Structures (CS 313), Computer Organization (CS 314), Intermediate Algorithms (CS 315), and C/C++ and Unix (CS 330). The application form is available in the department office. To graduate with departmental honors, a student must write and present a thesis under the supervision of a faculty member. Honors students will take 4 credits of CS 403 Thesis and up to 4 credits of CS 401 Research to satisfy this requirement.

Computer Science Accelerated Master's Program

Computer Science undergraduate majors at the UO have the opportunity to graduate with B.S. and M.S. Computer Science degrees in a five-year program.

Students with junior or senior status in the upper-division of the Computer Science major may apply to the Accelerated Master's Program in Computer Science (AMP-CS). Upon acceptance to AMP-CS, students may take graduate courses to fulfill major requirements that will also

fulfill Master's degree requirements, according to UO AMP guidelines, for students admitted to the Computer Science Master's degree program.

AMP-CS students will work closely with undergraduate and graduate advisors to ensure that they are on track to graduate with both degrees. Students who do not maintain satisfactory progress or who choose not to continue to a master's degree can still graduate with a B.S. degree in Computer Science in four years.

Computer Science Early Start Master's Program

This program is open to students who earn a BS or BA degree in computer science at the University of Oregon and who want to enter the master's degree program.

If a UO undergraduate takes one or two 400-level electives that also are offered as 500-level courses, the student can petition the department to have 4 or 8 credits deducted from the total number of elective credits required for the master's degree. The student must earn an A– or better in the 400-level course and have an overall GPA of 3.50 in upper-division CS courses to participate in this Computer Science Early Start Master's program. Note that all admission procedures, as outlined in the Master's Degree Program (p. 160) section, are also applicable. Applications are available in the department office. This program may be combined with the Computer Science Accelerated Master's Program (described above).

Internships

Practical work experience in the software industry is seen as a valuable complement to academic coursework. The department works with students to place them in internship positions in the summer and throughout the academic year. Students may also use the services of the University Career Center and other agencies to identify internship opportunities. Majors may receive academic credit (CS 404) for internships. To earn upper-division elective credit for an internship, the work experience must be at a technical level beyond Intermediate Data Structures (CS 313) and be sponsored by a CS faculty member. A contract signed by the faculty sponsor, internship supervisor, and the student must be filed with the department before the internship begins.

Research

Faculty members in the Computer Science department receive grants from government, industry, and private sources to conduct research in their areas of expertise. Undergraduate majors are encouraged to take part in the various research groups in the department. Most students begin approaching faculty members for such opportunities while taking the 300-level courses. Research can be used to fulfill upper-division electives, as part of an honors thesis, or in some cases as a paid internship.

Awards and Honor Societies

The Erwin and Gertrude Juilfs Scholarship in Computer Science, in honor of Erwin and Gertrude Juilfs, is awarded to one or more students who show exceptional promise for achievement as evidenced by grade point average, originality of research, or other creative activities.

The Geoffery Eric Wright Outstanding Junior Award, in honor of CS student Geoffery Wright, is a scholarship for students displaying high-quality academic performance, commitment to learning, and a promise of further outstanding achievement in computer science and its applications.

The J. Donald Hubbard Scholarship in Computer Science, in honor of J. Donald Hubbard, recognizes an undergraduate or graduate student who shows outstanding promise in the fields of computer-human interaction, computer graphics, or multimedia.

The Phillip Seeley Scholarship in Computer Science has been established as a permanent endowment to provide a source of income supporting a scholarship for outstanding undergraduate CS students. This scholarship is based on overall quality of academic work, commitment to learning, and potential for further academic achievement. Preference is given to resident Oregon students with financial need, as determined by the UO Office of Student Financial Aid and Scholarships.

Students with outstanding academic accomplishments may be invited to become members of Upsilon Pi Epsilon, the international honor society in computer science.

Minor Requirements

Computer Science Minor

The minor in computer science introduces the theories and techniques of computer science and develops programming skills that are applicable to the student's major. It is a strong complement to a major in any of the sciences and in related fields such as multimedia arts. Students from all majors have found their career opportunities enhanced through the CS minor.

Before enrolling in upper-division courses, students planning a minor in computer science must file an application form with the department. Each student should consult with a CS faculty advisor to plan the minor program.

Computer Science I (CS 210), Computer Science II (CS 211), Computer Science III (CS 212), Elements of Discrete Mathematics I (MATH 231), and Elements of Discrete Mathematics II (MATH 232) must be passed with grades of B- or better before students can take the upper-division core courses.

Code	Title	Credits

Computer Information Technology Minor

The minor in computer information technology (CIT) prepares students to work with evolving technologies for work environments that require development and management of web applications, databases, computer networks, open-source platforms, and cloud computing. It provides practical experience in understanding the tools and technologies of the computing field. It goes well with majors in the professional schools such as business and journalism and is an excellent match with almost any major on campus.

Before enrolling in CIT upper-division courses, students planning a minor in computer information technology must file an application form with the

department. Each student should consult with an assigned CIT faculty advisor to plan the minor program.

Lower-division courses must be completed with grades of B– or better. Upper-division courses must be taken in sequence and are offered only once a year. Upper-division courses must be completed with grades of C– or better.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them. Additional information may be found at the department website (<https://cs.uoregon.edu>).

- **Master of Science**
- **Doctor of Philosophy**

Graduate Studies

The department offers programs leading to the master of science (MS) and doctor of philosophy (PhD).

Computer Science Accelerated Master's Program

Computer Science undergraduate majors at the UO will have the opportunity to graduate with B.S. and M.S. Computer Science degrees in a five-year program.

Students with junior or senior status in the upper-division of the Computer Science major may apply to the Accelerated Master's Program in Computer Science (AMP-CS). Upon acceptance to AMP-CS, students may take graduate courses to fulfill major requirements that will also fulfill Master's degree requirements, according to UO AMP guidelines, for students admitted to the Computer Science Master's degree program.

AMP-CS students will work closely with undergraduate and graduate advisors to ensure that they are on track to graduate with both degrees. Students who do not maintain satisfactory progress or who choose not to continue to a master's degree can still graduate with a B.S. degree in Computer Science in four years.

Computer Science Early Start Master's Program

This program is open to students who earn a BS or BA degree in computer science at the University of Oregon and who want to enter the master's degree program.

If a UO undergraduate takes one or two 400-level electives that also are offered as 500-level courses, the student can petition the department to have 4 or 8 credits deducted from the total number of elective credits required for the master's degree. The student must earn an A– or better in the 400-level course and have an overall GPA of 3.50 in upper-division CS courses to participate in this Computer Science Early Start Master's program. Note that all admission procedures, as outlined in the Master's Degree Program section, are also applicable. Applications are available in the department office. This program may be combined with the Computer Science Accelerated Master's Program (described above).

Master's Degree Program

Admission

Admission to the master's degree program in computer science is competitive. It is based on prior academic performance, Graduate Record Examinations (GRE) scores, and computer science background. Minimum requirements for admission with graduate master's status are as follows:

1. Documented knowledge of
 - a. Principles of computer organization and operating systems
 - b. Programming languages
 - c. Program development and analysis
 - d. Data structures and algorithm analysis
2. GRE scores on the general test. The computer science test is optional.
3. A score of at least 100 on the Internet-based option of the Test of English as a Foreign Language (TOEFL iBT) or a score of 7.0 on the International English Language Testing System (IELTS) for applicants who have no justification for a waiver. Applicants may be required to study one or more terms at the university's American English Institute or elsewhere before taking any graduate work in the department. International applicants for teaching assistantships who score at least 26 on the speaking section of the TOEFL iBT will not have to take the Speaking Proficiency English Assessment Kit (SPEAK) test upon arrival at the university.
4. Three letters of recommendation, a statement of purpose, and unofficial transcripts (via an online application). Note that official transcripts are sent to the UO Office of Admissions.

Grades from previous course work should indicate the ability to maintain at least a 3.00 grade point average in graduate-level courses.

Application materials should be submitted by February 1 for admission, via GradWeb (<http://gradweb.uoregon.edu>), for the following fall term.

Admission to the master's degree program requires the substantive equivalent of an undergraduate degree in computer science. A second bachelor's degree program can be used to gain the required level of computer science background. Students without this background may be admitted conditionally and required to complete remedial course work before achieving unconditional standing in the program.

Master of Science Degree Requirements

Code	Title	Credits
Breadth Requirement: 12 credits total ¹		12
CS 621	Algorithms and Complexity	
CS 670	Data Science	

And one of the following:

CS 630	Distributed Systems	
CS 631	Parallel Processing	

Depth Requirement: Choose one, 12 credits total¹ **12**

Each Depth requires three courses, at least one at 600-level

Foundations Depth

CS 513	Advanced Data Structures	
CS 520	Automata Theory	
CS 527	Introduction to Logic	
CS 543	User Interfaces	
CS 545	Modeling and Simulation	
CS 561	Introduction to Compilers	
CS 624	Structure of Programming Languages	

Data Science Depth

CS 543	User Interfaces	
CS 551	Database Processing	
CS 553	Data Mining	
CS 571	Introduction to Artificial Intelligence	

CS 572	Machine Learning

CS 632	Computer Networks	
--------	-------------------	--

CS 633	Advanced Network Security	
--------	---------------------------	--

Writing Requirement **2**

CS 640	Writing in Computer Research	
--------	------------------------------	--

Elective Options: 28 credits total **4** **28**

Up to twelve credits in courses outside department in area closely related to professional goals may be used⁵

Thesis Option ⁶

CS 503	Thesis	
--------	--------	--

CS 5XX and CS 6XX: Minimum of 8 graded credits, maximum of 11 P/NP credits

Non-Thesis Option

CS 609	Terminal Project	
--------	------------------	--

CS 5XX and CS 6XX: Minimum of 18 graded credits, maximum of 10 P/NP credits

DRP Option ⁸

CS 601	Research: [Topic]	
--------	-------------------	--

CS 5XX and CS 6XX: Minimum of 8 graded credits

Completion of the directed research project (DRP) milestone in the CS PhD program and approval from the DRP committee that the project meets the standards of an MS thesis.

Total Credits **54**

- ¹ A grade of B- or better is required
- ² Cannot duplicate Depth course used
- ³ Cannot duplicate Breadth course used
- ⁴ A grade of C or better is required in graded elective credits
- ⁵ Courses must be approved by petition to the CS GEC; options include courses in linguistics, mathematics, physics, and psychology.
- ⁶ Cannot include CS 609 Final Project
- ⁷ CS 609 Final Project requirements: 8-12 credits; graded or P/NP
- ⁸ No credit of CS 503 (Thesis) or CS 609 (Final Project) may count toward the elective credit requirements

Grade Requirements

The 24 credits in the breadth courses and the depth courses must be passed with grades of B- or better. Graded elective courses must be passed with grades of C or better. A 3.00 GPA must be maintained for courses taken in the program.

Master's Thesis

The research option requires a written thesis and 9 to 12 credits in Thesis (CS 503). Thesis research is supervised by a faculty advisor; this advisor and other faculty members constitute the thesis committee. The master's thesis is expected to be scholarly and to demonstrate mastery of the practices of computer science. This option is recommended for students who plan subsequent PhD research.

Master's Project

The project option requires a minimum of 9 credits, and as many as 12, in Final Project Terminal Project (CS 609).

Under the supervision of a faculty member, the project may entail a group effort involving several master's degree students.

Awards and Honor Societies

The Erwin and Gertrude Juilfs Scholarship in Computer Science, in honor of Erwin and Gertrude Juilfs, is awarded to one or more students who show exceptional promise for achievement as evidenced by grade point average, originality of research, or other creative activities.

The J. Donald Hubbard Scholarship in Computer Science, in honor of J. Donald Hubbard, recognizes an undergraduate or graduate student who shows outstanding promise in the fields of computer-human interaction, computer graphics, or multimedia.

The Gurdeep Pall Scholarship in Computer Science, in honor of Gurdeep Pall, is awarded to a student based on the overall quality of their academic work, their commitment to learning, and their potential for further academic achievement.

Students with outstanding academic accomplishments may be invited to become members of Upsilon Pi Epsilon, the international honor society in computer science.

Doctoral Degree Program

The doctor of philosophy in computer science is, above all, a high-quality degree that is not conferred simply for the successful completion of a specified number of courses or years of study. It is a degree reserved for students who demonstrate a comprehensive understanding of computer science and an ability to do creative research. Each PhD student produces a significant piece of original research, presented in a written dissertation and defended in an oral examination.

The PhD program is structured to facilitate the process of learning how to do research. Students begin by taking required courses to build a foundation of knowledge that is essential for advanced research. Early in the program the student gains research experience by undertaking a directed research project under the close supervision of a faculty member and the scrutiny of a faculty committee. In the later stages of the program, students take fewer courses and spend most of their time exploring their dissertation area to learn how to identify and solve open problems. The final steps are to propose an independent research project, do the research, and write and defend a dissertation.

Admission

Application materials should be submitted by December 15 for the following fall term. Materials include everything required for admission to the master's program as well as a discussion of the anticipated research area.

Students who enter the UO with a master's degree may petition the Graduate Education Committee for credit toward the course requirements listed below, indicating how their prior graduate work corresponds to these courses. See the graduate coordinator for the petition.

PhD Course Requirements

CS 632	Computer Networks	
CS 633	Advanced Network Security	
Writing Requirement		2
CS 640	Writing in Computer Research	
Elective Options: 24 credits total		24
Total Credits		50

¹ A grade of B- or better is required

² Cannot duplicate Depth course used

³ Cannot duplicate Breadth course used

⁴ A grade of C or better is required in graded elective credits

PhD Degree Requirements

PhD candidates who enter the program without a master's degree in computer science must take 48 credits in graduate course work including

the core and cluster courses required for the MS program. Doctoral students must earn a minimum grade of B– and an overall GPA of 3.50 in the six courses they use to satisfy the breadth and depth requirements.

Minimum Annual Enrollment

PhD students are expected to enroll in at least 6 credits of 600-level course work each year until their advancement to candidacy. Research: [Topic] (CS 601), Dissertation (CS 603), and Reading Conference: [Topic] (CS 605) do not satisfy this requirement. After candidacy, PhD students are encouraged to continue participation in 600-level courses

Directed Research Project

Complete a directed research project, which is supervised by a faculty member and evaluated by a faculty committee. The research project comprises the following:

1. The definition and expected results of the project in the form of a Directed Research Project Contract
2. Delivery of the materials constituting the results of the project and oral presentation of the results
3. A private oral examination by the committee members

Status Change

PhD candidates are admitted conditionally. Successful completion of the directed research project leads to a change in the student's doctoral status from conditional to unconditional.

Dissertation Advisory Committee

After successfully completing the directed research project, PhD students form a Dissertation Advisory Committee chaired by their research advisor. The main role of the committee is to advise the student between completion of the research project and mounting the dissertation defense. The committee takes primary responsibility for evaluating student progress. In addition, it approves the plan for the area examination, which in turn is approved by the graduate education committee. See the graduate coordinator for further instructions.

Area Examination

The student chooses an area of research and works closely with an advisor to learn the area in depth by surveying the current research and learning research methods, significant achievements, and how to pose and solve problems. The student gradually assumes a more independent role and prepares for the area examination, which tests depth of knowledge in the research area. The examination contains the following:

1. A survey of the area in the form of a position paper and an annotated bibliography
2. A public presentation of the position paper
3. A private oral examination by committee members

Advancement to Candidacy

After the area examination, the committee decides whether the student is ready for independent research work; if so, the student is advanced to candidacy.

Dissertation and Defense

Identify a significant unsolved research problem and submit a written dissertation proposal to the dissertation committee. The dissertation committee, comprising three department members and one member

from an outside department, is approved by the graduate education committee. In addition to these four, the dissertation committee often includes a fifth examiner. This outside examiner should be a leading researcher in the candidate's field who is not at the University of Oregon. The outside member should be selected a year before the candidate's dissertation defense, and no later than six months before.

The student submits a written dissertation proposal to the committee for approval, and the proposal is then submitted to the graduate education committee. The proposal presents the research problems to be tackled, related research, methodology, anticipated results, and work plan. The committee may request an oral presentation, similar to the area exam, which allows the student to explain and answer question about the proposed research. The student then carries out the research.

The final stage is writing a dissertation and defending it in a public forum by presenting the research and answering questions about the methods and results. The dissertation committee may accept the dissertation, request small changes, or require the student to make substantial changes and schedule another defense

Division of Graduate Studies Requirements

PhD students must meet the requirements set by the Division of Graduate Studies as listed in that section of this catalog

Research Areas

It is important that a PhD student be able to work effectively with at least one dissertation advisor. Hence the student should identify, at an early stage, one or more areas of research to pursue. The student should also find a faculty member with similar interests to supervise the dissertation.

Computer Information Technology Courses

CIT 281. Web Applications Development I. 4 Credits.

Fundamentals of web application development using open-source software tools and technologies (Unix, Git), client-side frameworks, server-side programming (Node.js, PHP), model-view-controller pattern, data storage and APIs, cloud hosting.
Prereq: CS 111 with a B- or higher.

CIT 381. Database Systems. 4 Credits.

Introduction to database systems, emphasis on database design and access. Database concepts, data modeling, SQL, connecting database to web.
Prereq: B- or better in CIT 281, and CS 110 or CS 115.

CIT 382. Web Applications Development II. 4 Credits.

Server- and client-side technologies and their interaction for database-driven web applications: application frameworks, single-page applications, cloud platforms, and open-source software stacks—MEAN (MongoDB, ExpressJS, AngularJS, Node.js) versus LAMP (Linux, Apache, MySQL, PHP).
Prereq: CIT 381.

CIT 383. Networking Fundamentals. 4 Credits.

Fundamentals of data communication and networks. Network management and security.
Prereq: CIT 382.

CIT 405. Reading and Conference: [Topic]. 1-4 Credits.

Repeatable.

Computer Science Courses

CS 102. Fundamentals of Computer and Information Security. 4 Credits.

This course introduces fundamental concepts, terminologies, principles, methods, and scenarios of computer and information security.

CS 110. Fluency with Information Technology. 4 Credits.

Introduction to information technology (IT), the study of computer-based information systems. Basics of the Internet and World Wide Web. Students create websites using XHTML and CSS.

CS 111. Introduction to Web Programming. 4 Credits.

Project-based approach to learning computer programming by building interactive web pages using JavaScript and XHTML. Programming concepts including structured and object-oriented program design. CS 110 recommended preparation.

Prereq: MATH 101 or equivalent.

CS 122. Introduction to Programming and Problem Solving. 4 Credits.

Computational problem solving, algorithm design, data structures, and programming using a multi-paradigm programming language. Introduces techniques for program design, testing, and debugging.

Prereq: MATH 101 or equivalent.

CS 196. Field Studies: [Topic]. 1-2 Credits.

Repeatable.

CS 198. Workshop: [Topic]. 1-2 Credits.

Repeatable.

CS 199. Special Studies in Computer Science: [Topic]. 1-5 Credits.

Repeatable.

CS 199L. Special Studies in Computer Science: [Topic]. 1-5 Credits.

Repeatable.

CS 210. Computer Science I. 4 Credits.

Basic concepts and practices of computer science. Topics include algorithmic problem solving, levels of abstraction, object-oriented design and programming, software organization, analysis of algorithm and data structures. Sequence with CS 211, CS 212.

Prereq: MATH 112. Prior programming experience strongly encouraged.

CS 211. Computer Science II. 4 Credits.

Basic concepts and practices of computer science. Topics include algorithmic problem solving, levels of abstraction, object-oriented design and programming, software organization, analysis of algorithm and data structures. Sequence with CS 210, CS 212.

Prereq: CS 210.

CS 212. Computer Science III. 4 Credits.

Basic concepts and practices of computer science. Topics include algorithmic problem solving, levels of abstraction, object-oriented design and programming, software organization, analysis of algorithm and data structures. Sequence with CS 210, CS 211.

Prereq: CS 211.

CS 313. Intermediate Data Structures. 4 Credits.

Design and analysis of data structures as means of engineering efficient software; attention to data abstraction and encapsulation. Lists, trees, heaps, stacks, queues, dictionaries, priority queues.

Prereq: CS 210, CS 211, CS 212, MATH 231, MATH 232 with grades of B- or better.

CS 314. Computer Organization. 4 Credits.

Introduction to computer organization and instruction-set architecture -- digital logic design, binary arithmetic, design of central processing unit and memory, machine-level programming.

Prereq: CS 210, CS 211, CS 212 with grades of B- or better.

CS 315. Intermediate Algorithms. 4 Credits.

Algorithm design, worst-case and average-behavior analysis, correctness, computational complexity.

Prereq: CS 313.

CS 322. Introduction to Software Engineering. 4 Credits.

A project-intensive introduction to software engineering intended to build skills, knowledge, and habits of mind that prepare students for 400-level computer science courses, internships, and other software.

Prereq: CS 210, CS 211, CS 212 with grades of B- or better.

CS 330. C/C++ and Unix. 4 Credits.

Practical software design and programming activities in a C/C++ and Unix environment, with emphasis on the details of C/C++ and good programming style and practices.

Prereq: CS 314.

CS 333. Applied Cryptography. 4 Credits.

This course provides a systematic study of cryptography and its application. It covers cryptographic algorithms, including symmetric-key cryptography, public-key cryptography, cryptanalysis, cryptographic hash functions, and their usage toward message authentication codes, digital signatures, key management and distribution, and user authentication protocols.

Prereq: CS 212.

CS 372M. Machine Learning for Data Science. 4 Credits.

Introduction to Machine Learning, with an emphasis on topics relevant for data science. Multilisted with DSCI 372M.

Prereq: CS 212, DSCI 345M, MATH 342.

CS 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable when the topic changes.

CS 400M. Temporary Multilisted Course. 1-5 Credits.

Repeatable

CS 401. Research: [Topic]. 1-16 Credits.

Repeatable.

Prereq: CS 313.

CS 402. Supervised College Teaching. 1-2 Credits.

Repeatable.

Prereq: CS 313.

CS 403. Thesis. 1-12 Credits.

Repeatable.

Prereq: CS 313.

CS 404. Internship; [Topic]. 1-4 Credits.

Repeatable.

Prereq: CS 313.

CS 405. Reading and Conference: [Topic]. 1-12 Credits.

Repeatable up to five times.

Prereq: CS 313.

CS 406. Practicum: [Topic]. 1-2 Credits.

Supervised consulting. Students provide learning assistance in computer science courses. Repeatable for a maximum of 4 credits.

Prereq: CS 313.

CS 407. Seminar: [Topic]. 1-5 Credits.

Repeatable when the topic changes. Opportunity to study in greater depth specific topics arising out of other courses.

Prereq: CS 313.

CS 408. Workshop: [Topic]. 1-21 Credits.

Repeatable.

Prereq: CS 313.

CS 409. Terminal Project. 1-12 Credits.

Repeatable.

Prereq: CS 313.

CS 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable when the topic changes.

CS 413. Advanced Data Structures. 4 Credits.

Complex structures, storage management, sorting and searching, hashing, storage of texts, and information compression.

Prereq: CS 315.

CS 415. Operating Systems. 4 Credits.

Principles of operating system design. Process and memory management, concurrency, scheduling, input-output and file systems, security.

Prereq: CS 330.

CS 420. Automata Theory. 4 Credits.

Provides a mathematical basis for computability and complexity. Models of computation, formal languages, Turing machines, solvability. Nondeterminism and complexity classes.

Prereq: CS 315.

CS 422. Software Methodology I. 4 Credits.

Technical and nontechnical aspects of software development, including specification, planning, design, development, management and maintenance of software projects. Student teams complete projects.

Prereq: CS 313.

CS 423. Software Methodology II. 4 Credits.

Application of concepts and methodologies covered in CS 422/CS 522. Student teams complete a large system design and programming project. Final system specification, test plan, user documentation, and system walk throughs.

Prereq: CS 422 with a grade of B- or better.

CS 425. Principles of Programming Languages. 4 Credits.

Syntax and semantics. Scope rules, environments, stores, denoted and expressed values, procedures, and parameters. Definitional interpreters. Types, overloading, parametric polymorphism, and inheritance. Varieties of abstraction.

Prereq: CS 315.

CS 429. Computer Architecture. 4 Credits.

RISC (reduced instruction-set computer) and CISC (complex instruction-set computer) design, storage hierarchies, high-performance processor design, pipelining, vector processing, networks, performance analysis.

Prereq: CS 313, CS 314, CS 330.

CS 431. Introduction to Parallel Computing. 4 Credits.

Parallel architecture, theory, algorithms, and programming with emphasis on parallel programming, focusing on models, languages, libraries, and runtime systems.

Prereq: CS 330.

CS 432. Introduction to Networks. 4 Credits.

Principles of computer network design. Link technologies, packet switching, routing, inter-networking, reliability. Internet protocols. Programming assignments focus on protocol design.

Prereq: CS 330. CS 415 recommended.

CS 433. Computer and Network Security. 4 Credits.

Security for various aspects of computers and networks. Elementary cryptography, program security, trusted operating systems, network security, privacy, and legal and ethical issues.

Prereq: CS 415.

CS 434. Computer and Network Security II. 4 Credits.

This course covers security threats and solutions for distributed systems and networks, particularly the Internet, the Internet of Things, and distributed systems based on them.

Prereq: CS 432, CS 433.

CS 436. Secure Software Development. 4 Credits.

This course establishes a foundation for applying security principles to the lifecycle of software development in order to minimize software vulnerabilities and counter cyber threats.

Prereq: CS 330.

CS 441. Introduction to Computer Graphics. 4 Credits.

Introduction to the hardware, geometrical transforms, interaction techniques, and shape representation schemes that are important in interactive computer graphics. Programming assignments using contemporary graphics hardware and software systems.

Prereq: CS 330.

CS 443. User Interfaces. 4 Credits.

Introduction to user interface software engineering. Emphasis on theory of interface design, understanding the behavior of the user, and implementing programs on advanced systems.

Prereq: CS 313.

CS 445. Modeling and Simulation. 4 Credits.

Theoretical foundations and practical problems for the modeling and computer simulation of discrete and continuous systems. Simulation languages, empirical validation, applications in computer science.

Prereq: CS 315, CS 330.

CS 451. Database Processing. 4 Credits.

Fundamental concepts of DBMS. Data modeling, relational models and normal forms. File organization and index structures. SQL, embedded SQL, and concurrency control.

Prereq: CS 313, CS 314.

CS 453. Data Mining. 4 Credits.

Databases, machine learning, artificial intelligence, statistics, and data visualization. Examines data warehouses, data preprocessing, association and classification rule mining, and cluster analysis.

Prereq: CS 451/CS 551.

CS 461. Introduction to Compilers. 4 Credits.

Lexical analysis, parsing, attribution, code generation.

Prereq: CS 314, CS 425. CS 420 strongly recommended.

CS 471. Introduction to Artificial Intelligence. 4 Credits.

Basic themes, issues, and techniques of artificial intelligence, including agent architecture, knowledge representation and reasoning, problem solving and planning, game playing, and learning.

Prereq: CS 315.

CS 472. Machine Learning. 4 Credits.

A broad introduction to machine learning and its established algorithms. Topics include concept learning, decision trees, neural network. Prereq: CS 315.

CS 473. Probabilistic Methods for Artificial Intelligence. 4 Credits.

Fundamental techniques for representing problems as probability distributions, performing inference, and learning from data. Topics include Bayesian and Markov networks, variable elimination, loopy belief propagation, and parameter. Prereq: CS 315.

CS 500M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

CS 503. Thesis. 1-16 Credits.

Repeatable.

CS 507. Seminar: [Topic]. 1-5 Credits.

Repeatable. Opportunity to study in greater depth specific topics arising out of other courses.

CS 508. Workshop: [Topic]. 1-21 Credits.

Repeatable.

CS 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

CS 513. Advanced Data Structures. 4 Credits.

Complex structures, storage management, sorting and searching, hashing, storage of texts, and information compression.

CS 520. Automata Theory. 4 Credits.

Provides a mathematical basis for computability and complexity. Models of computation, formal languages, Turing machines, solvability. Nondeterminism and complexity classes.

CS 522. Software Methodology I. 4 Credits.

Technical and nontechnical aspects of software development, including specification, planning, design, development, management and maintenance of software projects. Student teams complete projects.

CS 523. Software Methodology II. 4 Credits.

Student teams complete a large system design and programming project. Final system specifications, test plan, user documentation, and system walk-through. Prereq: CS 522.

CS 529. Computer Architecture. 4 Credits.

RISC (reduced instruction-set computer) and CISC (complex instruction-set computer) design, storage hierarchies, high-performance processor design, pipelining, vector processing, networks, performance analysis.

CS 531. Introduction to Parallel Computing. 4 Credits.

Parallel architecture, theory, algorithms, and programming with emphasis on parallel programming, focusing on models, languages, libraries, and runtime systems.

CS 532. Introduction to Networks. 4 Credits.

Principles of computer network design. Link technologies, packet switching, routing, inter-networking, reliability. Internet protocols. Programming assignments focus on protocol design.

CS 533. Computer and Network Security. 4 Credits.

Security for various aspects of computers and networks. Elementary cryptography, program security, trusted operating systems, network security, privacy, and legal and ethical issues.

CS 534. Computer and Network Security II. 1-4 Credits.

This course covers security threats and solutions for distributed systems and networks, particularly the Internet, the Internet of Things, and distributed systems based on them. Prereq: CS 532, CS 533.

CS 536. Secure Software Development. 4 Credits.

This course establishes a foundation for applying security principles to the lifecycle of software development in order to minimize software vulnerabilities and counter cyber threats.

CS 541. Introduction to Computer Graphics. 4 Credits.

Introduction to the hardware, geometrical transforms, interaction techniques, and shape representation schemes that are important in interactive computer graphics. Programming assignments using contemporary graphics hardware and software systems.

CS 543. User Interfaces. 4 Credits.

Introduction to user interface software engineering. Emphasis on theory of interface design, understanding the behavior of the user, and implementing programs on advanced systems.

CS 545. Modeling and Simulation. 4 Credits.

Theoretical foundations and practical problems for the modeling and computer simulation of discrete and continuous systems. Simulation languages, empirical validation, applications in computer science.

CS 551. Database Processing. 4 Credits.

Fundamental concepts of DBMS. Data modeling, relational models and normal forms. File organization and index structures. SQL, embedded SQL, and concurrency control.

CS 553. Data Mining. 4 Credits.

Databases, machine learning, artificial intelligence, statistics, and data visualization. Examines data warehouses, data preprocessing, association and classification rule mining, and cluster analysis. Prereq: CS 551.

CS 561. Introduction to Compilers. 4 Credits.

Lexical analysis, parsing, attribution, code generation. Prereq: CS 314 or equivalent. CS 520 strongly recommended.

CS 571. Introduction to Artificial Intelligence. 4 Credits.

Basic themes, issues, and techniques of artificial intelligence, including agent architecture, knowledge representation and reasoning, problem solving and planning, game playing, and learning.

CS 572. Machine Learning. 4 Credits.

A broad introduction to machine learning and its established algorithms. Topics include concept learning, decision trees, neural network.

CS 573. Probabilistic Methods for Artificial Intelligence. 4 Credits.

Fundamental techniques for representing problems as probability distributions, performing inference, and learning from data. Topics include Bayesian and Markov networks, variable elimination, loopy belief propagation, and parameter.

CS 601. Research: [Topic]. 1-16 Credits.

Repeatable.

CS 602. Supervised College Teaching. 1-5 Credits.

Repeatable.

CS 603. Dissertation. 1-16 Credits.

Repeatable.

CS 604. Internship: [Topic]. 1-4 Credits.

Repeatable.

CS 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

CS 606. Field Studies: [Topic]. 1-16 Credits.

Repeatable.

CS 607. Seminar: [Topic]. 1-5 Credits.

Repeatable. Research topics are presented.

CS 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

CS 609. Terminal Project. 1-16 Credits.

Repeatable. Final project for master's degree without thesis.

CS 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

CS 621. Algorithms and Complexity. 4 Credits.

Design and analysis of algorithms, strategies for efficient algorithms, introduction to complexity theory including NP-completeness.

Prereq: CS 520 recommended.

CS 624. Structure of Programming Languages. 4 Credits.

Introduction to axiomatic, operational, and denotational semantics. Environments, stores, and continuations. Type theory, subtypes, polymorphism, and inheritance. Functional and logic programming.

CS 630. Distributed Systems. 4 Credits.

Principles of distributed computer systems: interprocess communication, distributed file systems, distributed timing and synchronization, distributed programming, transactions, process scheduling, distributed shared memory.

Prereq: CS 529.

CS 631. Parallel Processing. 4 Credits.

Advanced topics in parallel processing including massively parallel computer architecture, supercomputers, parallelizing compiler technology, performance evaluation, parallel programming languages, parallel applications.

Prereq: CS 529.

CS 632. Computer Networks. 4 Credits.

Advanced issues in computer networks, focusing on research to extend the services offered by the Internet.

Prereq: CS 532.

CS 633. Advanced Network Security. 4 Credits.

Classic and state-of-the-art research topics in network security; threats and attacks, defense algorithms and mechanisms, measurement and evaluation of both security problems and solutions. Offered alternate years.

Prereq: CS 533.

CS 640. Writing in Computer Research. 2 Credits.

Students learn to provide and accept constructive criticism of writing samples in a workshop format.

CS 670. Data Science. 4 Credits.

Data science is the development of methods to study large and complex data sets. Methods that scale to very large data sets are of particular interest. This course introduces state-of-art data science methods focused on processing very large data sets of real-world data.

Prereq: CS 551.

Creative Writing

Daniel D. Anderson, Program Director

541-346-3944

108 Alder Building

5243 University of Oregon

Eugene, Oregon 97403-5243

Faculty

Daniel Anderson, professor (poetry). BA, 1987, Cincinnati; MA, 1989, Johns Hopkins. (2010)

Jason Brown, associate professor (fiction). BA, 1991, Bowdoin; MFA, 1995, Cornell. (2011)

Marjorie Celona, associate professor (fiction). BA, 2006, Victoria; MFA, 2009, Iowa. (2015)

Geri Doran, professor (poetry). BA, 1986, Vassar; MFA, 1995, Florida. (2007)

Garrett K. Hongo, College of Arts and Sciences Distinguished Professor (poetry). BA, 1973, Pomona; MFA, 1980, California, Irvine. (1989)

Mat Johnson, Philip H. Knight Chair of the Humanities, professor (fiction), BA, 1993, Earlham College; MFA, 1999, Columbia (2018)

Karen Thompson Walker, assistant professor (fiction). BA, 2002, California, Los Angeles; MFA, 2006, Columbia. (2017)

Emeritus

Richard M. Lyons, professor emeritus. BA, 1957, Brooklyn; MFA, 1962, Iowa. (1969)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Undergraduate Studies

The Creative Writing Program offers two formal courses of study for University of Oregon undergraduates:

Minor in Creative Writing

The creative writing minor offers courses in which students study matters of craft by reading and writing creative works, develop critical thinking and interpretive skills, hone their ability to articulate complex ideas with subtlety and clarity, and gain instruction in the mechanics of writing. Students must take courses for letter grades. Course work required for the minor must be passed with grades of B– or better.

Of the 24 required credits, a maximum of 8 credits at the 200 or 300 level may be transferred. All courses at the 400 level must be taken in residence at the University of Oregon.

Code	Title	Credits
Select two from one of the following groups:		8
Group 1		
CRWR 225	Kidd Workshop I ¹	
CRWR 235	Kidd Workshop II Poetry ¹	
	or CRWR 24Kidd Workshop II: Fiction	
Group 2		
CRWR 230	Introduction to Poetry Writing	
CRWR 240	Introduction to Fiction Writing	
Select two of the following:		8
CRWR 330	Intermediate Poetry Writing ²	
CRWR 335	Kidd Workshop III: Poetry ¹	
	or CRWR 34Kidd Workshop III: Fiction	

CRWR 336	Intermediate Creative Writing: Literary Nonfiction ²	
CRWR 340	Intermediate Fiction Writing ²	
Select two of the following:		8
CRWR 407	Seminar: [Topic]	
CRWR 413	Literature for Poets ²	
CRWR 414	Literature for Fiction Writers ²	
CRWR 435	Advanced Poetry Writing ²	
CRWR 445	Advanced Fiction Writing ²	
Total Credits		24

¹ Nontransferable. Kidd Tutorial courses are by application only.

² Repeatable for credit.

Questions regarding the minor should be addressed to the program director. Students must apply for the minor through the program's office well in advance of graduation for transcript evaluation. In order to be eligible for the minor, students must complete all degree requirements and a major in another academic department.

Kidd Tutorial Program

Implemented through the generosity of the Walter P. Kidd family, this yearlong tutorial offers the chance to study writing and literary craft using literary models. The program, which requires a three-term commitment from participants, accommodates a highly flexible and individualized study of fiction, poetry, and literary nonfiction writing. Each section matches one graduate employee—a poet or fiction writer—with as many as 10 students and is overseen by the director of the Kidd Tutorial Program. Participants earn 12 credits in Kidd Workshop I (CRWR 225), Kidd Workshop II Poetry (CRWR 235), Kidd Workshop III: Poetry (CRWR 335) or Kidd Workshop I (CRWR 225), Kidd Workshop II: Fiction (CRWR 245), Kidd Workshop III: Fiction (CRWR 345). Information about application procedures is available on the program's website.

Graduate Studies

Master of Fine Arts Degree

Admission Requirements

1. Bachelor's degree
2. Other materials submitted for admission giving evidence that the applicant will be able to complete the prescribed course of study satisfactorily

Admission Procedures

Apply online from the Creative Writing Program's website; the application fee may be paid by credit card (nonrefundable). The online application requires the following:

- Personal statement (PDF upload)
- Sample of the applicant's writing (PDF upload)
- Transcripts (PDF upload)
- Contact information for as many as four people (three are required) who agree to offer a recommendation

Arrange to have official copies of transcripts sent from institutions where a degree was earned to the UO Office of the Registrar.

Application materials must be submitted online by the deadline for admission to the program the following fall term. Admission is made for

fall term only. Find information, deadlines, and application instructions on the program's website.

Master of Fine Arts Degree Requirements

The candidate must complete the graduate work during six consecutive terms in residence at the university. The candidate must pass a written examination on a reading list of works of fiction or poetry.

Code	Title	Credits
CRWR 605	Writing and Conference: [Topic]	9
CRWR 607	Seminar: [Topic] (MFA Seminar)	18
CRWR 609	Terminal Creative Project: [Topic]	9
CRWR 635	MFA Poetry Workshop	36
	or CRWR 645 MFA Fiction Workshop	
Total Credits		72

Courses

CRWR 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable up to six times.

CRWR 225. Kidd Workshop I. 4 Credits.

Introduction to an intensive, yearlong sequence devoted to the study and practice of poetry, fiction, and nonfiction.

CRWR 230. Introduction to Poetry Writing. 4 Credits.

Introduction to forms and techniques of writing poetry.

CRWR 235. Kidd Workshop II Poetry. 4 Credits.

Second in a yearlong sequence devoted to the studying and practicing poetry and fiction, with an emphasis on poetry. Projects include beginning to develop an individual line of inquiry as well as workshopping original poetry.

Prereq: CRWR 225 with a grade of B- or above.

CRWR 240. Introduction to Fiction Writing. 4 Credits.

Introduction to forms and techniques of writing fiction.

CRWR 244. Introduction to Literary Nonfiction. 4 Credits.

Introduction to techniques of writing creative nonfiction (the literary essay). Development of a critical appreciation of the art of writing.

CRWR 245. Kidd Workshop II: Fiction. 4 Credits.

Second class in a yearlong sequence devoted to studying and practicing poetry and fiction, with an emphasis on fiction. Projects include beginning to develop an individual line of inquiry as well as workshopping original fiction.

Prereq: CRWR 225 with a grade of B- or better.

CRWR 330. Intermediate Poetry Writing. 4 Credits.

Intermediate-level study of poetry writing. Repeatable twice for a maximum of 12 credits.

Prereq: one from CRWR 230, CRWR 235 with a grade of B- or better.

CRWR 335. Kidd Workshop III: Poetry. 4 Credits.

Third class in a yearlong sequence devoted to studying and practicing poetry and fiction, with a special emphasis on poetry. Projects include completing the individual line of inquiry, an original portfolio, and the Kidd Workshops student anthology.

Prereq: CRWR 235 with a Grade of B- or better.

CRWR 336. Intermediate Creative Writing: Literary Nonfiction. 4 Credits.

Intermediate-level study of literary nonfiction writing. Repeatable twice for a maximum of 12 credits.

Prereq: one from CRWR 240, CRWR 244, CRWR 245 with a grade of B– or better.

CRWR 340. Intermediate Fiction Writing. 4 Credits.

Intermediate-level study of fiction writing. Repeatable twice for a maximum of 12 credits.

Prereq: one from CRWR 240, CRWR 244, CRWR 245 with a grade of B– or better.

CRWR 345. Kidd Workshop III: Fiction. 4 Credits.

Third class in a yearlong sequence devoted to studying and practicing poetry and fiction, with a special emphasis on fiction. Projects include completing the individual line of inquiry, an original portfolio, and the Kidd Workshops student anthology.

Prereq: CRWR 245 with a Grade of B- or better.

CRWR 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable up to six times

CRWR 405. Writing and Conference: [Topic]. 1-21 Credits.

Repeatable.

CRWR 407. Seminar: [Topic]. 1-5 Credits.

Repeatable up to six times

CRWR 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable up to six times

CRWR 413. Literature for Poets. 4 Credits.

Advanced discourse on issues and principles related to the craft of poetry. Repeatable twice for a maximum of 12 credits.

Prereq: one from CRWR 330, CRWR 335 with a grade of B– or better. Students majoring in English, journalism, or comparative literature may also enroll with instructor approval.

CRWR 414. Literature for Fiction Writers. 4 Credits.

Advanced discourse on issues and principles related to the craft of fiction. Repeatable twice for a maximum of 12 credits.

Prereq: One from CRWR 336, CRWR 340, CRWR 345 with a grade of B– or better. Students majoring in English, journalism, or comparative literature may also enroll with instructor approval.

CRWR 435. Advanced Poetry Writing. 4 Credits.

Advanced workshop in the writing of poetry. Repeatable twice for a maximum of 12 credits.

Prereq: One from CRWR 330, CRWR 335 with a grade of B– or better.

CRWR 445. Advanced Fiction Writing. 4 Credits.

Advanced workshop in the writing of fiction. Repeatable twice for a maximum of 12 credits.

Prereq: One from CRWR 336, CRWR 340, CRWR 345 with a grade of B– or better.

CRWR 503. Thesis. 1-16 Credits.

Repeatable.

CRWR 507. Seminar: [Topic]. 1-5 Credits.

Repeatable up to six times

CRWR 601. Research: [Topic]. 1-16 Credits.

Repeatable.

CRWR 605. Writing and Conference: [Topic]. 1-16 Credits.

Repeatable.

CRWR 607. Seminar: [Topic]. 1-5 Credits.

Selected seminars offered each year. Repeatable when topic changes.

CRWR 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

CRWR 609. Terminal Creative Project: [Topic]. 1-16 Credits.**CRWR 610. Experimental Course [Topic]. 1-5 Credits.**

Repeatable when topic changes.

CRWR 635. MFA Poetry Workshop. 6 Credits.

Concentration on student writing in a workshop setting. Open only to students admitted to creative writing master of fine arts program in poetry. Repeatable five times for a maximum of 36 credits.

CRWR 645. MFA Fiction Workshop. 6 Credits.

Concentration on student writing in a workshop setting. Open only to students admitted to creative writing master of fine arts program in fiction. Repeatable five times for a maximum of 36 credits.

Data Science

Bill Cresko

Executive Director for the Data Science Initiative

Professor of Biology

541-346-4779

The UO's data science program has a data science + domain structure, which means you study core quantitative methods – and apply those methods to your chosen area of emphasis (or “domain”).

This gives you a strong understanding of how to extract data using quantitative methods such as math, statistics, and machine learning, and how to visually communicate those results in ways that are relevant to your chosen domain. You'll take two to three core courses, providing insight into the basics of the domain. After completing the quantitative skills in the program, you then take four elective domain courses – providing the opportunity to apply those quantitative skills to data sets within the area.

Undergraduate Degree in Data Science

The data science curriculum combines general principles with domain-specific application. The curriculum is sub-divided into the following categories with the corresponding requirements:

Bachelor's Degree in Data Science

The data science curriculum combines general principles with domain-specific application. The curriculum is sub-divided into the following categories with the corresponding requirements:

Code	Title	Credits
Data Science Core Courses:		16
DSCI 101	Foundations of Data Science I	
DSCI 102	Foundations of Data Science II	
DSCI 311	Principles and Techniques of Data Science	
Data Science Capstone Project		
Foundations in Mathematics and Computing		
MATH 251 & MATH 252	Calculus I and Calculus II	
CS 210 & CS 211 & CS 212	Computer Science I and Computer Science II and Computer Science III	
MATH 341 & MATH 342	Elementary Linear Algebra and Elementary Linear Algebra	

DSCI 345M	Probability and Statistics for Data Science	
DSCI 372M	Machine Learning for Data Science	
DSCI 410	Experimental Course: [Topic] (Data Science Capstone Project) ¹	
Mathematics Courses:		16
Ethics Course:		4
PHIL 223	Data Ethics	
Computational and Inferential Depth:		
Select three courses from the list below:		12
CS 314	Computer Organization	
CS 322	Introduction to Software Engineering	
CS 330	C/C++ and Unix	
CS 333	Applied Cryptography	
CS 415	Operating Systems	
CS 432	Introduction to Networks	
MATH 253	Calculus III	
MATH 307	Introduction to Proof	
MATH 461	Introduction to Mathematical Methods of Statistics I	
MATH 462	Introduction to Mathematical Methods of Statistics II	
MATH 463	Mathematical Methods of Regression Analysis and Analysis of Variance	
MATH 458	Introduction to Mathematical Cryptography	
Modeling, Learning and Decision Making		
Probability		
CS 372M	Machine Learning for Data Science	
MATH 345M	Probability and Statistics for Data Science	

Domain Emphasis

The domain emphasis consists of completing 2-3 courses (8-12 credits) in the domain core, followed by a minimum of 4 courses (16 credits) of domain specialization. For each domain emphasis, a curated list of courses has been developed for both the core and specialization component. Please see the previous section (tracks/concentrations) for a detailed list of courses that satisfy each available domain emphasis.

¹ An additional course from the domain specialization list may be taken in place of the capstone project.

An essential aspect of the degree in data science is that data science majors develop critical competencies in a domain emphasis of their choosing. The domain emphasis consists of completing 2-3 courses (8-12 credits) in the domain core, followed by a minimum of 3 courses (12 credits) of domain specialization. For each domain emphasis, a curated list of courses has been developed for both the core and specialization component.

Currently, domain emphases have been established for biology, geography, accounting analytics, marketing analytics, and linguistics. The curated list of domain core and domain specialization courses for each domain is outlined below.

Data Science Domain - Accounting Analytics

Data has proliferated in business as organizations generate large volumes of information within their day to day operations while increasingly having access to externally created information as well.

Data science applied to accounting data can help organizations understand the implications for decision-making and provide better insights. You might delve into company sales data, purchasing data, contracts, or company disclosures to help solve a variety of business problems.

In the data science domain area of accounting analytics, you will learn to search for relationships between different variables and outcomes they influence, driving business decisions and informing success.

Code	Title	Credits
Core Courses:		8-12
BA 101	Introduction to Business	
BA 215	Accounting: Language of Business Decisions	
EC 201	Introduction to Economic Analysis: Microeconomics	
Required		
BA 240	Spreadsheet Analysis and Visualization	
ACTG 350	Intermediate Accounting I	
Take two out of the following three		
ACTG 410	Experimental Course: [Topic] (Accounting Data and Analytics)	
ACTG 410	Experimental Course: [Topic] (Accounting Data and Analytics Capstone)

Data Science Domain - Biology

Recent technological breakthroughs in DNA sequencing mean that scientists can characterize an organism's entire genome in a matter of days. But a great challenge remains in translating that genomic sequence — nature's data set — into biology.

That translation is fundamentally changing how we study biology.

In the data science domain area of biology, you will find yourself on the cutting edge of the field, working in the acquisition, analysis, and interpretation of data and how it applies to gene function, disease, microbial ecology, and the assembly and characterization of new genomes.

Code	Title	Credits
Core Courses:		8-12
BI 211	General Biology I: Cells	
BI 212	General Biology II: Organisms	
BI 213	General Biology III: Populations	
Select four of the following		16
BI 320	Molecular Genetics	
BI 360	Neurobiology	
BI 370	Ecology	

BI 399	Special Studies: [Topic] (Computational Genomics)
BI 399	Special Studies: [Topic] (Modeling in Biology: Deterministic Models)
BI 410	Experimental Course: [Topic] (Data Management and Visualization)
BI 410	Experimental Course: [Topic] (Modeling in Biology: Stochastic Models)
BI 410	Experimental Course: [Topic] (Neural Data Analysis)
BI 471	Population Ecology
BI 485	Techniques in Computational Neuroscience
DSCI 411	Capstone Project

Data Science Domain - Earth Sciences

Code	Title	Credits
Core Courses:		
ERTH 202	Earth's Surface and Environment	4
PHYS 201	General Physics	4
or PHYS 251	Foundations of Physics I	
ERTH 315	Earth Physics	4
Choose four of the following:		
ERTH 353	Geologic Hazards	
ERTH 415	Field Geophysics	4
ERTH 438	Geobiology	4
ERTH 441	Hillslope Geomorphology	4
ERTH 453	Tectonics	3
ERTH 454	Fluid Dynamics	4
ERTH 455	Mechanical Earth	4
ERTH 467	Fault Mechanics	4
Data Science Capstone Course		

Data Science Domain - Economics

Code	Title	Credits
Core Courses:		
EC 201	Introduction to Economic Analysis: Microeconomics	4
EC 311	Intermediate Microeconomic Theory	4
EC 320	Introduction to Econometrics	4
EC 421	Introduction to Econometrics	4
Choose three from the following:		
EC 422	Economic Forecasting	
EC 428	Behavioral and Experimental Economics	
EC 434	Environmental Economics	
EC 443	Health Economics	
EC 451	Issues in Labor Economics	
EC 460	Theories of Industrial Organization	
EC 482	Economics of Globalization	
EC 490	Economic Growth and Development	

Data Science Domain - Geography

Spatial data is integrated into our everyday lives and employed in a range of professions. We are all integrated into a complex web of movement, place, and discovery, whether we're navigating across town or interpreting maps of election results.

UO geographers use spatial data technologies to focus on remote sensing of the changing environment, climate-change analysis, web-mapping, cartography and data visualization, spatial cognition, and spatial patterns in public health.

In the data science domain area of geography, you will be studying how spatial data can revolutionize business, nonprofit, and government worlds.

Code	Title	Credits
Core Courses:		
GEOG 181	Our Digital Earth	
GEOG 281	The World and Big Data	
GEOG 481	GIScience I	
Select four of the following		16
GEOG 482	GIScience II	
GEOG 485	Remote Sensing I	
GEOG 486	Remote Sensing II	
GEOG 490	GIScience: [Topic]	
GEOG 491	Advanced Geographic Information Systems	
GEOG 493	Advanced Cartography	
GEOG 496	Location-Aware Systems	
GEOG 498	Geospatial Project Design	
DSCI 411	Capstone Project	

Data Science Domain - Linguistics

Usage-based linguistics studies language as a dynamic, constantly changing system. Much of this work involves working with large collections of text or speech – referred to as “corpora.” Examples of readily available real-world corpora include Amazon product reviews and collections of Twitter messages.

Linguists use corpora to help identify patterns and structures in language, providing insights into how we both acquire and lose language skills, how language use varies across people and contexts, and how real-life speech and language evolve.

In the data science domain area of linguistics, you will learn methods to identify linguistic structures within corpora, glean new insights while using the best and latest practices in the field. These methods will allow you to answer basic science questions as well as questions that are of interest to marketing firms, political consulting groups, or other commercial enterprises. So, for example, you can use the knowledge you acquire in the linguistics domain to explore how the use of a word like “cool” has changed over time (a basic science question) or to identify linguistic strategies associated with leading positive product reviews for different product types (a marketing question).

Code	Title	Credits
Core Courses:		
LING 301	Introduction to Linguistics Analysis	
LING 302	Introduction to Linguistic Behavior	

Electives:

LING 435	Morphology and Syntax
LING 451	Functional Syntax I
LING 493	Corpus Linguistics
Data Science Capstone Course	

Data Science Domain - Marketing Analytics

Marketing analytics is the practice of measuring, managing, and analyzing marketing performance to maximize effectiveness and optimize return on investment. Data science applied to marketing data can help a business predict consumer behavior, improve decision-making, and gauge the success of marketing investments.

For example, machine learning and statistical techniques can be used to classify data and detect patterns that might predict a campaign's success.

In the data science domain area of marketing analytics, you will learn how to see the future, through the lens of both existing and new methods of predictive analytics.

Code	Title	Credits
Core Courses:		8-12
BA 101	Introduction to Business	
BA 215	Accounting: Language of Business Decisions	
EC 201	Introduction to Economic Analysis: Microeconomics	
Required		
BA 240	Spreadsheet Analysis and Visualization	
BA 317	Marketing: Creating Value for Customers

PHYS 481	Design of Experiments	
PHYS 491	Research Project I	
Data Science Capstone Project		

Courses

DSCI 101. Foundations of Data Science I. 4 Credits.

This course utilizes a quantitative approach to explore fundamental concepts in data science. Students will develop key skills in programming and statistical inference as they interact with real-world data sets across a variety of domains. Ethical and privacy concerns are explored. Sequence with DSCI 102.

DSCI 102. Foundations of Data Science II. 4 Credits.

This course expands upon critical concepts and skills introduced in DSCI 101. Topics include the normal distribution, confidence intervals, regression, and classifiers. Sequence with DSCI 101.

Prereq: DSCI 101, MATH 101 (or equivalent placement score) or any other college-level math course.

DSCI 196. Field Studies: [Topic]. 1-12 Credits.

Repeatable.

DSCI 198. Workshop: [Topic]. 1-12 Credits.

Repeatable.

DSCI 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

DSCI 299. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

DSCI 311. Principles and Techniques of Data Science. 4 Credits.

Intermediate and advanced techniques in data science. Topics include managing data using software programs, data cleaning, handling text, dimensionality, principle component analysis, regression, classification and inference.

Prereq: DSCI 102, CS 211, MATH 342.

DSCI 345M. Probability and Statistics for Data Science. 4 Credits.

Introduction to probability and statistics, with an emphasis upon topics relevant for data science. Students cannot get credit for both MATH 343 and DSCI 345M/MATH 345M.

Prereq: MATH 342, CS 211.

DSCI 372M. Machine Learning for Data Science. 4 Credits.

Introduction to Machine Learning, with an emphasis on topics relevant for data science. Multilisted with CS 372M.

Prereq: CS 212, DSCI 345M, MATH 342.

DSCI 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

DSCI 401. Research: [Topic]. 1-12 Credits.

Repeatable.

DSCI 402. Supervised College Teaching. 1-6 Credits.

Repeatable for a max of 6 credits.

DSCI 403. Thesis. 1-12 Credits.

Repeatable.

DSCI 404. Internship: [Topic]. 1-12 Credits.

Repeatable.

DSCI 405. Reading and Conference: [Topic]. 1-5 Credits.

Repeatable.

DSCI 406. Field Studies: [Topic]. 1-12 Credits.

Repeatable.

DSCI 407. Seminar: [Topic]. 1-5 Credits.

Repeatable.

DSCI 409. Terminal Project. 1-12 Credits.

Repeatable.

DSCI 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

DSCI 411. Capstone Project. 4 Credits.

This course for Data Science majors provides a student the opportunity to apply the theoretical knowledge and techniques acquired during the Data Science degree curriculum to a project involving real data from the student's domain of specialization. Requires an average 3.75 GPA in courses required.

Prereq: DSCI 311, DSCI 372M, PHIL 223.

DSCI 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

Earth Sciences

Eugene, Oregon 97403-1272

Faculty

Ilya N. Bindeman, professor (stable isotope geochemistry, volcanology). BS, 1988, Moscow; PhD, 1998, Chicago. (2004)

Edward B. Davis, associate professor (vertebrate paleontology). BS, 1999, Tennessee, Knoxville; PhD, 2005, California, Berkeley. (2013)

Rebecca J. Dorsey, professor (sedimentology, basin analysis). BS, 1983, Vermont; MA, 1986, PhD, 1989, Princeton. (1997)

Josef Dufek, professor (volcanology). BS, 2000, Chicago; MS, 2004, PhD, 2006, Washington (Seattle). (2017)

Brittany Erickson, assistant professor (computational science). PhD, 2010, Santa Barbara (2018)

Thomas Giachetti, assistant professor (volcanology). MS, 2006, PhD, 2010, Université Blaise Pascal, Clermont-Ferrand. (2015)

Emilie Hooft Toomey, associate professor (marine geophysics). BSc, 1990, Trinity College, Toronto; PhD, 1997, Massachusetts Institute of Technology and Woods Hole Oceanographic Institution. (1999)

Samantha Hopkins, associate professor (paleontology). See **Robert Donald Clark Honors College**.

Eugene D. Humphreys, professor (seismology, regional tectonics). BS, 1974, MS, 1978, California, Riverside; PhD, 1985, California Institute of Technology. (1985)

Qusheng Jin, associate professor (biogeoscience). BS, 1994, Nanjing; MS, 1997, Chinese Academy of Sciences; PhD, 2003, Illinois, Urbana-Champaign. (2005)

Leif A. Karlstrom, assistant professor (volcanology, geomorphology, fluid mechanics). BS, 2006, Oregon; PhD, 2011, California, Berkeley. (2011)

Diego Melgar, assistant professor (earthquake seismology, tsunamis, geodetic imaging). BEng., 2009, Universidad Nacional Autonoma de Mexico; MS, 2010, PhD, 2014, Scripps College. (2017)

Marli B. Miller, senior instructor (structural geology). BA, 1982, Colorado College; MS, 1987, PhD, 1992, Washington (Seattle). (1997)

Matthew Polizzotto, associate professor (soil and environmental hydrogeochemistry). BS, BA, 2001, Rochester; PhD, 2007, Stanford. (2016)

Mark H. Reed, professor (mineral deposits, aqueous geochemistry). BA, 1971, Carleton; MS, 1974, PhD, 1977, California, Berkeley. (1979)

Alan W. Rempel, professor (geomechanics and applied mathematics). BAsC, 1991, MSc, 1995, British Columbia; PhD, 2001, Cambridge. (2004)

Gregory J. Retallack, professor (paleobotany, paleosols). BA, 1973, Macquarie; PhD, 1978, New England University, Australia. (1981)

Joshua J. Roering, professor (surface processes, geomorphology). BS, 1994, MS, 1995, Stanford; PhD, 2000, California, Berkeley. (2000)

Valerie Sahakian, assistant professor (tectonics, ground seismology, marine geophysics). BS, 2009, Rhode Island; MS, 2010, PhD, 2015, Scripps College. (2018)

David A. Sutherland, associate professor (physical oceanography). BA, 2001, North Carolina, Wilmington; PhD, 2008, Massachusetts Institute of Technology and Woods Hole Oceanographic Institution. (2011)

Amanda M. Thomas, associate professor (earthquake seismology and fault mechanics). BS, 2007, Georgia Institute of Technology; PhD, 2012, California, Berkeley. (2015)

Douglas R. Toomey, professor (seismology, tectonics, midocean ridges). BS, 1981, Pennsylvania State; PhD, 1987, Massachusetts Institute of Technology and Woods Hole Oceanographic Institution. (1990)

Meredith Townsend, assistant professor (volcanology). BS, 2011, Washington and Lee, PhD, 2017, Stanford (2019)

Paul J. Wallace, professor (igneous petrology, volcanology, geochemistry). BS, 1986, George Washington University; PhD, 1991, California, Berkeley. (2001)

James M. Watkins, associate professor (experimental petrology, geochemistry, volcanology). BS, 2005, Wisconsin, Eau Claire; PhD, 2010, California, Berkeley. (2012)

Ray J. Weldon, professor (neotectonics, structural and quaternary geology). BA, 1977, Pomona; PhD, 1986, California Institute of Technology. (1987)

Research Staff

Andrew Hadlock, research assistant. BS, 2018, Florida (2019)

Sara Meyer, field technician. BS, 2010, California, Santa Cruz; IT specialist certification, 2015, Alaska, Fairbanks. (2017)

Leland O'Driscoll, seismic field technician. PhD, 2012, Oregon (2015)

James Palandri, research associate. PhD, 2000, Oregon. (2001)

Silas Thoms, research assistant. BS, 2019, Oregon State (2019)

Lucy Walsh, research assistant. MS, 2012, Oregon. (2017)

Emeriti

A. Dana Johnston, professor (experimental petrology, geochemistry). BS, 1976, Bates; MS, 1978, PhD, 1983, Minnesota. (1986)

M. Allan Kays, professor emeritus. BA, 1956, Southern Illinois; MA, 1958, PhD, 1960, Washington (St. Louis). (1961)

William N. Orr, professor emeritus. BS, 1961, Oklahoma; MA, 1963, California, Riverside and Los Angeles; PhD, 1967, Michigan State. (1967)

Jack M. Rice, professor emeritus. AB, 1970, Dartmouth College; MS, 1972, PhD, 1975, Washington (Seattle). (1977)

Norman M. Savage, professor emeritus. BSc, 1959, Bristol; PhD, 1968, Sydney. (1971)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

- **Bachelor of Arts in Earth Sciences**
- **Bachelor of Science in Earth Sciences**
- **Minor in Earth Sciences**

Undergraduate Studies

The undergraduate program in the Department of Earth Sciences provides an understanding of the materials that constitute the earth and the processes that have shaped the earth from deep in its interior to the surface environment—geology. Geology applies all the basic sciences—biology, chemistry, mathematics, and physics—to understanding earth processes in the historical context of geologic time. It is a science that explores problems by combining field investigations with laboratory experiments and theoretical studies.

Geology also addresses many natural hazards—earthquakes, flooding, and volcanic eruptions—that affect humans. It addresses the impact of humans on the earth's surface environment, where we pollute rivers and ground water, cause rapid erosion and landslides, or attempt to re-engineer rivers and shorelines.

Preparation

High school students planning to major in geological sciences should include in their high school program as much mathematics and science (physics, chemistry, biology, or earth science) as possible.

Students who transfer to the department after two years of college work elsewhere should have completed a year of general chemistry, a year of general physics, and two quarters or a semester of calculus. A year of general geology with laboratory is recommended.

Careers

Students with a degree in earth sciences are qualified for employment in a broad range of careers: geotechnical and environmental consultants; K–12 school teachers (with an additional teaching certificate); laboratory technicians; professional geologists, geophysicists, or geochemists; and positions in the petroleum and mining industries or in state and federal agencies such as the United States Geological Survey or the Environmental Protection Agency. The current climate for employment in the earth sciences is good. Geoscience jobs require skills in critical thinking and problem solving, quantitative analysis, oral and written communication, and team work. The Department of Earth Sciences curriculum emphasizes these skills.

Earth Sciences Curriculum

The Department of Earth Sciences offers a bachelor of science (BS) or a bachelor of arts (BA) degree with a major in earth sciences.

Major Tracks

Earth science is an unusually broad subject. It addresses everything from the chemical processes that make rocks and minerals to the physics behind plate tectonics and the travel of earthquake waves through the planet. It explores the history of the evolution of life revealed in fossils, and it probes the earth processes that affect how humans can survive on the surface of the planet. To address this breadth, the department offers four curricular tracks for a major in earth sciences: geology, geophysics, environmental geoscience, and paleontology.

All of the tracks require a common core of general chemistry, calculus, general geology, and physics, except that paleontology- and environmental geoscience—track students may take two terms of biology in place of two terms of physics. Beyond the core, each track requires certain additional courses and a selection of electives.

Undergraduate Research

As many as 4 credits of research can be counted toward electives in any of the tracks. To receive such credit, students must

- submit a short letter, approved by the faculty research advisor and addressed to the head undergraduate advisor in earth sciences, stating the nature of the research and asserting that there is faculty supervision
- submit a final written report to the faculty advisor describing the results of the research

Students may earn credit in this category by registering for any of the following:

Code	Title	Credits
ERTH 401	Research: [Topic]	1-21
ERTH 406	Practicum: [Topic]	1-6
ERTH 408	Laboratory Projects: [Topic]	1-6

Students who complete an honors thesis may not apply this option toward elective credits.

Grade Options and Standards

Undergraduate majors must take for letter grades (the pass/no pass option is not acceptable) all the courses required in their degree program. Required courses must be completed with grades of C– or better. Exceptions for honors students are noted under Honors in Earth Sciences.

Honors in Earth Sciences

Application for graduation with honors in earth sciences must be made no later than spring term of the student's junior year. To be eligible for graduation with honors, a student must

- maintain a grade point average (GPA) of 3.50 or better in geological sciences courses or a 3.00 or better in all science courses
- submit and orally present an acceptable honors thesis written under the supervision of a department faculty member and evaluated by a committee consisting of three faculty members including the supervisor. The thesis should be presented no later than three weeks before final examinations during the term the student plans to graduate

Honors students may register for 3 credits of Research: [Topic] (ERTH 401) the term before they intend to graduate, and 3 credits of Thesis (ERTH 403) the term of graduation. These credits may be applied toward electives.

Group Requirements

Fourteen earth sciences courses satisfy university science group requirements. See the Group Requirements section of this catalog under **Registration and Academic Policies**.

Kindergarten through Secondary Teaching Careers

Students who complete a degree with a major in earth sciences are eligible to apply to the College of Education's fifth-year licensure program in middle-secondary teaching or the fifth-year licensure program in elementary teaching. More information is available in the College of Education (p. 685) section of this catalog.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

- Geology Track (p. 175)
- Geophysics Track (p. 176)
- Environmental Geoscience Track (p. 177)
- Paleontology Track (p. 178)

Master's Degrees in Earth Sciences (p. 195)

Ph.D. in Earth Sciences (p. 196)

Graduate Studies

The Department of Earth Sciences offers programs of graduate study leading to master of science (MS), master of arts (MA), and doctor of philosophy (PhD) degrees with opportunity for research in a wide variety of specialty fields. Course work is designed to meet individual needs, and students may pursue independent research in geobiology, geochemistry, geodesy, geomechanics, geomorphology, geophysics, mineralogy, petrology, volcanology, paleontology, stratigraphy, sedimentary petrology, structural geology, and ore deposit geology. The master's degree program requires two years or more for completion.

Admission to the graduate program is competitive and based on academic records, scores on the Graduate Record Examinations (GRE), and letters of recommendation. Nonnative speakers of English must also submit scores for the Test of English as a Foreign Language (TOEFL) and the Test of Spoken English (TSE). Applications are welcome from students who are interested in using their background in related fields, such as physics, chemistry, and biology, to solve geologic or geophysical problems.

Graduate students are advised by a guidance committee consisting of three faculty members. This committee meets with each student shortly after he or she arrives on campus and as often thereafter as necessary for planning purposes.

Requirements

Basic university requirements for graduate degrees are described in the Division of Graduate Studies (p. 885) section of this catalog. The department sets additional examination, course work, seminar, and thesis requirements. Applicants should read the *Guide to Graduate Study* on the department website (<http://earthsciences.uoregon.edu/graduate-program/>) or write to the Department of Earth Sciences for details.

Programs

Graduate study in earth sciences is offered in five broad areas:

1. volcanology-petrology-geochemistry
2. stratigraphy-surface processes
3. paleontology-paleopedology-geobiology
4. structural geology-geophysics
5. economic geology (mineral deposits)

Volcanology-Petrology-Geochemistry

The department has excellent analytical and other research facilities for studies in these subdisciplines, and the volcanic and metamorphic terrane of the Northwest offers unsurpassed opportunities for field studies. Active research programs are diverse and include studies of eruption dynamics, magma volatile inventories, and magma rheology; experimental studies of igneous phase equilibria and trace element partitioning; calculations of multicomponent equilibria in aqueous systems and volcanic gases; and studies of igneous protogenesis.

Stratigraphy-Surface Processes

The stratigraphic record of tectonically active sedimentary basins indicates the dynamic interactions among basin subsidence, sediment input from eroding sources, evolution of depositional systems, and active faulting and folding that govern these processes. Research in this area

combines field-based stratigraphic, sedimentologic, and geomorphic analysis with provenance studies and concepts derived from theoretical models to decipher the complex structural and climatic controls on the filling histories of active basins.

Surface processes regulate how tectonics and climate affect landscape evolution. Field observations, numerical simulations, topographic analyses, and experimental facilities are used to study sediment transport processes over a range of spatial and temporal scales. Projects incorporate links between active tectonics and structural geology, biology, geomechanics, and surface processes to address problems such as landsliding and hill-slope evolution, biological contributions to soil creep and landscape lowering, and the geomorphic implications of seismic-induced landsliding.

Paleontology-Paleopedology-Geobiology

Studies of fossil soils, plants, and vertebrates aim to reconstruct life on land and its role in global change. Global changes of interest include Neogene paleoclimate and paleoenvironment of ape and human evolution in East Africa, environmental effects of terminal Cretaceous impact and dinosaur extinction in Montana, consequences of mass extinction and methane clathrate degassing at the Permian-Triassic boundary, and the effect of early land plants and forests on weathering and atmospheric composition during the early Paleozoic.

Geobiology focuses on the interaction of microorganisms with the geologic environment and the ways life forms affect geological processes, such as weathering and mineralization.

Structural Geology-Geophysics

Graduate work in the structural geology-geophysics area involves the study of the earth's dynamic processes.

Seismic imaging techniques using regional arrays provide tools for understanding regional tectonics. Studies of upper-mantle and lithospheric structure beneath the Rocky Mountains and in the Pacific Northwest subduction zone are providing essential constraints, unavailable from surface geology, for detailed dynamical models of plate-lithospheric deformation.

Structural geology focuses on applying modern field and analytical techniques to solving problems in Cenozoic tectonics and active faulting. Detailed field mapping, trench logging, and geomorphic analysis are combined with seismic array data, land- and space-based geodetic data, and theoretical modeling to address problems including Oregon's Basin and Range province and coastal deformation, active tectonics of the San Andreas Fault system, and seismic risk along the Pacific margin of the United States and southeast and central Asia.

Geophysical experiments conducted at sea investigate the nature of sea-floor spreading including the segregation, transport, and storage of melt; the rifting of oceanic lithosphere; and the spatial and temporal connectivity between magmatic, tectonic, and hydrothermal processes.

Mineral Deposits

Current research on ore deposits includes studies of porphyry copper deposits, epithermal veins, and active geothermal systems. These projects combine field mapping, petrography, and chemical analyses with theoretical chemical modeling of processes of ore fluid generation, alteration, and mineralization.

Related Research Activities

The Condon Collection of Fossils at the Museum of Natural and Cultural History maintains strong ties to the Department of Earth Sciences. Two geology professors are curators of the collection, and paleontology undergraduate and graduate students are often employed as assistants. The Condon Collection contains 60,000 specimens, including invertebrate and vertebrate fossils, paleobotanical remains, and an extensive collection of modern animals that are available to interested researchers for study.

Research Facilities

Students may use a variety of analytical facilities and equipment including a three-component broadband (0.03–50Hz) seismic array, an electron microprobe, a scanning electron microscope with image analysis, x-ray diffraction, FTIR spectroscopy, stable isotope mass spectroscopy, and a geobiology laboratory.

An experimental petrology laboratory covers a range of crustal temperatures and pressures and includes equipment for doing experiments in controlled atmospheres. Two piston-cylinder apparatus with pressure-temperature capability to 35 kilobars and 1,500° C may be used to study crystalline, partially molten, and molten silicates under mantlelike conditions.

Computers are used for much of the research in the department including acquisition and processing of seismic and gravity data and numerical modeling of geophysical processes and geochemical reactions. A geochemistry laboratory is equipped with sophisticated computer programs for thermodynamic calculations of gas-liquid-solid equilibria and reaction processes important in metamorphic, volcanic gas, hydrothermal, and diagenetic systems. The Internet can be accessed through the UONet fiber-optic link. A student computer facility, equipped with PC and Macintosh computers and laser printers, is also connected to the networks.

The sedimentological and paleontological laboratories have, in addition to standard laboratory equipment, an electronic particle-size analyzer, an x-radiography unit, photomicroscopes, a Leitz Aristophot unit, a fully maintained catalog of foraminifera, an acid room, and a conodont-processing laboratory.

Financial Aid for Graduate Students

Most of the department's graduate students are fully supported through teaching and research assistantships. More information about financial assistance and department policies for awarding and renewing teaching and research fellowships may be obtained by reading the *Guide to Graduate Study* on the department website (<http://earthsciences.uoregon.edu/graduate-program/>) or by writing to the department.

Courses

ERTH 101. Exploring Planet Earth. 4 Credits.

Plate tectonics, mantle flow, and magmatism. Volcanoes, earthquakes, mountain building, generation of Earth's crust; rocks and minerals; Earth's internal structure. Comparison with other planets. Laboratory, lecture.

ERTH 102. Exploring Earth's Environment. 4 Credits.

Landforms, surface processes, and interactions between humans and the environment. Weathering, erosion, sedimentation, ground water, streams, glaciers, deserts, oceans, and coastlines; geologic hazards. Laboratory, lecture. Roering.

ERTH 103. Exploring Earth History. 4 Credits.

History of the Earth. Geologic time, sedimentary environments; oceans, mountains, and climate through time; stratigraphic history of North America; evolution of plants and animals; interactions between humans, science, and the environment.

ERTH 110. People, Rocks, and Fire. 4 Credits.

Investigation of topics in geology, ecology, and anthropology relevant to contemporary global energy debates; current energy policy issues investigated through term projects.

ERTH 137. Mountains and Glaciers. 4 Credits.

Survey of the geological processes that both create and destroy mountain ranges around the world, and an introduction to geological science.

ERTH 156M. Scientific Revolutions. 4 Credits.

Surveys several major revolutions in our views of the natural and technological world, focusing on scientific concepts and methodological aspects. For nonscience majors. Multilisted with PHYS 156M.

ERTH 198. Laboratory Projects: [Topic]. 1-12 Credits.

Repeatable.

ERTH 199. Special Studies: [Topic]. 1-6 Credits.

Repeatable. Studies of geologic topics combine background lectures with guided field trips to areas of geologic interest.

ERTH 201. Dynamic Planet Earth. 4 Credits.

Processes that cause earthquakes, volcanism, mountain building, and plate tectonics. Includes Earth's origin and internal structure, rocks and minerals, gravity and magnetics. Weekly lectures, two-hour laboratory.

ERTH 202. Earth's Surface and Environment. 4 Credits.

Earth materials, the rock record, human interactions with surface environment. Sedimentary rocks and environments, chemical and physical weathering, hydrogeology, ground-water contamination, surface processes, human impacts. Weekly lectures, two-hour laboratory.

ERTH 203. History of Life. 4 Credits.

Origin, history, and physical evolution of the Earth; geologic time scales, development of the global stratigraphic section. Weekly lectures, two-hour laboratory.

ERTH 213. Geology of National Parks. 4 Credits.

Examines selected geologic features in United States national parks/monuments and the processes that form them within a historical approach to the development of the North American continent. Focuses on parks and monuments throughout the conterminous 48 states.

ERTH 304. The Fossil Record. 4 Credits.

This course will cover the history of life on Earth through time as found in the fossil record, as well as how scientists go about studying the fossil record. The curriculum also includes the processes of speciation and the disciplines of functional morphology and paleoecology.

ERTH 305. Dinosaurs. 4 Credits.

This course covers the evolution, occurrence, and variety of animals classified within the Dinosauria and the changing climate and vegetation during their time. Students will discuss dinosaur video depiction in popular culture and will assess the accuracy of those representations.

ERTH 306. Volcanoes and Earthquakes. 4 Credits.

Mechanisms that cause earthquakes and volcanoes, relation to plate tectonics, associated hazards, examples in Oregon and the western United States.

ERTH 307. Oceanography. 4 Credits.

Characteristics and physical, chemical, and biological processes of the world's oceans. Includes sections on origin of the oceans, plate tectonics, and human use and misuse of oceans.

ERTH 308. Geology of Oregon and the Pacific Northwest. 4 Credits.

The region's geologic and tectonic history and the plate tectonic processes responsible for its evolution.

ERTH 310. Earth Resources and the Environment. 4 Credits.

Geology of energy, mineral, and water resources and environmental issues related to their use. Topics include fossil fuels, metals, nuclear waste disposal, and water pollution.

ERTH 311. Earth Materials. 5 Credits.

Chemical and mineralogical composition of rocks, sediment, and soil. Properties of common minerals; origin of rocks; microscopic study of rock textures; environmental issues.

Prereq: EARTH 101, EARTH 102 or EARTH 201, EARTH 202; coreq CH 221 or CH 224.

ERTH 315. Earth Physics. 4 Credits.

Physics of basic Earth processes; application of physics to plate tectonics and lithospheric deformation. Topics include forces, deformation, gravity, and seismology. Taught once or more per academic year.

Prereq: MATH 252, PHYS 201.

ERTH 316. Introduction to Hydrogeology. 4 Credits.

Examines the role of water in geologic and environmental processes. Topics include the water cycle, groundwater flow, and contaminant transport.

Pre- or coreq: MATH 252, PHYS 201.

ERTH 318. Introduction to Field Methods. 3 Credits.

Introduction to geologic mapping and related field skills, rock descriptions, cross sections, and structures. Lectures, laboratories, mandatory field trips.

Prereq: EARTH 101–ERTH 103 or EARTH 201–ERTH 203.

ERTH 319. Cascade Volcanoes - Field Studies. 4 Credits.

Two-week summer course. Physical processes that cause volcanic activity, and an introduction to geological science. Examines recent volcanic activity in the Cascades, impacts of volcanism on people, infrastructure, and natural resources, and volcano monitoring and hazard assessment.

ERTH 331. Mineralogy. 5 Credits.

Crystal chemistry, systematic study of rock-forming silicate, and selected other minerals, mineral optics, and x-ray diffraction. Lab work with hand samples and petrographic microscopes.

Prereq: EARTH 201, EARTH 202 or EARTH 101, EARTH 102; coreq: CH 221 or CH 224.

ERTH 332. Introduction to Petrology. 5 Credits.

Origin and classification of igneous, metamorphic, and sedimentary rocks. Microscopic study of rocks in thin section.

Prereq: EARTH 331.

ERTH 334. Sedimentology and Stratigraphy. 4 Credits.

Sedimentary processes; characteristic properties of sedimentary rocks and their use in interpreting depositional environments; principles of lithostratigraphy and sequence stratigraphy.

Prereq: EARTH 101–ERTH 103 or EARTH 201–ERTH 203; pre- or coreq: EARTH 311 or EARTH 332.

ERTH 337. Introduction to Physical Oceanography. 4 Credits.

Introduction to the physical processes that occur in the ocean. These processes control the movement of sediment, pollution, nutrients, and biota, as well as heat and freshwater. Topics might include waves, global ocean circulation, sediment transport, estuarine circulation, and biological oceanography.

Prereq: EARTH 101 and EARTH 102 or EARTH 201 and EARTH 202; PHYS 101 and PHYS 102 or PHYS 201 and PHYS 202 or PHYS 251 and PHYS 252.

ERTH 350. Structural Geology. 3 Credits.

Description, analysis, and origin of geologic structures including faults, folds, and tectonites. Focus on kinematic and dynamic analysis of deformation of earth materials.

Prereq: EARTH 318; EARTH 311 or EARTH 332.

ERTH 351. Structural Geology Problems. 1 Credit.

Exercises in solving structural geology problems using orthographic and stereographic projection techniques. Problems emphasize calculating stress and strain from structural markers.

Coreq: EARTH 350.

ERTH 352. Structural Geology Laboratory and Field. 1 Credit.

Collection and interpretation of field and map data for structural analysis. Includes field trips, map and cross-section generation, and some computer-based exercises.

Coreq: EARTH 350.

ERTH 353. Geologic Hazards. 4 Credits.

A hands-on study of natural hazards, their physical processes and geography, and their impact on societies worldwide including recent occurrences of natural disasters. This course is accessible and to individuals interested in Geosciences, Geography, and Environmental Science.

Prereq: EARTH 101 or EARTH 201.

ERTH 363. Computational Tools for Earth Sciences. 4 Credits.

Introduction to computational tools vital to the work of Earth scientists, including data management and analysis, algorithms, basic programming, computational environments, and visualization.

Prereq: MATH 251.

ERTH 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

ERTH 400M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

ERTH 401. Research: [Topic]. 1-21 Credits.

Repeatable.

ERTH 403. Thesis. 1-6 Credits.

Repeatable thrice for maximum of 6 credits.

Prereq: earth sciences honors or senior thesis students only.

ERTH 405. Reading and Conference: [Topic]. 1-21 Credits.

Repeatable.

ERTH 406. Practicum: [Topic]. 1-6 Credits.

Repeatable once.

ERTH 407. Seminar: [Topic]. 1-5 Credits.

Repeatable.

ERTH 408. Laboratory Projects: [Topic]. 1-12 Credits.

Repeatable.

ERTH 409. Terminal Project. 1-12 Credits.

Repeatable.

ERTH 410. Experimental Course: [Topic]. 1-5 Credits.
Repeatable.

ERTH 410L. Experimental Course: [Topic]. 1-5 Credits.
Repeatable.

ERTH 414. Igneous and Metamorphic Petrology. 4 Credits.
Advanced principles of igneous and metamorphic petrogenesis. Gibbs phase rule, phase diagrams, mineral thermodynamics; magma geochemistry and rheology; metamorphic facies, geothermometry and geobarometry. Johnston.
Prereq: ERTH 332; CH 223 or CH 226H.

ERTH 415. Field Geophysics. 4 Credits.
Introduction to geophysical methods for subsurface investigation, useful for exploration, geotechnical engineering, and characterization of subsurface groundwater and environmental conditions.
Prereq: MATH 112 or PHYS 201.

ERTH 416. Geophysical and Environmental Sensors. 4 Credits.
This experiential course will provide students an introduction to sensors, microcontrollers, automation, data collection and programming from the perspective of sensing the Earth and the environment.
Prereq: MATH 252, ERTH 363 or CS 122.

ERTH 418. Earth and Environmental Data Analysis. 4 Credits.
Tools-based instruction in data analysis for earth and environmental scientists. Topics include descriptive statistics, visualization, uncertainty analysis, hypothesis testing, regression, time series, and directional data.
Prereq: MATH 246 or MATH 251.

ERTH 420. Geocommunication. 3 Credits.
Scientific writing and presentations for the geological sciences. Focus on writing scientific papers and proposals, preparing oral and visual presentations.

ERTH 423M. Introduction to Space Physics. 4 Credits.
Course explores the interaction of the solar wind with the Earth's magnetosphere using fundamental plasma physics supported and motivated by spacecraft observations. Students will gain an understanding of the physics governing the interaction building from single particle plasma motion to specific observation supported examples.
Prereq: PHYS 253, MATH 282.

ERTH 425. Geology of Ore Deposits. 5 Credits.
Porphyry copper-molybdenum, epithermal, massive sulfides in volcanic rocks, and base and precious metals in sedimentary rocks. Geologic setting, alteration and ore mineral assemblages, and geochemistry of ore formation.
Prereq: CH 223; ERTH 332.

ERTH 433. Paleobotany. 4 Credits.
Evolution and ecology of plants and microbes from the origin of life to global warming. Laboratory exercises and field trip to collect plant fossils.
Pre- or coreq: ERTH 103 or ERTH 203.

ERTH 434. Vertebrate Paleontology. 4 Credits.
Evolution of vertebrates, including ourselves, based on fossil evidence. Physical and other evolutionary constraints are addressed, and lab exercises provide practical experience.
Prereq: ERTH 103 or ERTH 203.

ERTH 435. Paleopedology. 4 Credits.
Soil formation; mapping and naming fossil soils; features of soils in hand specimens and petrographic thin sections; interpretations of ancient environments from features of fossil soils.
Prereq: ERTH 311 or ERTH 332.

ERTH 436. Paleocology and Functional Morphology. 4 Credits.
Ecological methods for the study of fossil organisms, both terrestrial and marine. Covers a range of methods from those that reconstruct the ecology of individual species to those that deal with whole communities and ecosystems. Laboratory offers practical and analytical experience in the methods.
Prereq: ERTH 103, ERTH 203, or BI 213.

ERTH 438. Geobiology. 4 Credits.
Studies how microorganisms interact with geological environments at scales from enzymes to global element cycles.

ERTH 440. Sedimentary Basin Analysis. 4 Credits.
Evolution of sedimentary basins, emphasizing tectonic controls on basin formation and filling. Interpretation of subsidence mechanisms and sedimentary processes through analysis of the stratigraphic record.
Prereq: ERTH 334, ERTH 350.

ERTH 441. Hillslope Geomorphology. 4 Credits.
Hillslope processes and landforms; includes hillslope hydrology, overland flow erosion, weathering and soil formation, soil creep, landslides and related hazards, glacial and periglacial processes, effects of land-use practices and fire, and landscape evolution.

ERTH 451. Hydrogeology. 4 Credits.
Study of the origin, motion, and physical and chemical properties of ground water. Emphasizes quantitative analysis of flow and interaction with geologic materials.
Prereq: CH 222 or CH 225H; ERTH 316.

ERTH 452. Neotectonics and Quaternary Geology. 4 Credits.
Interpretation of active structures from deformed quaternary sediments and surfaces using case histories. Field project uses air photos and field techniques. Repeatable once for maximum of 8 credits.
Prereq: ERTH 334, ERTH 350.

ERTH 453. Tectonics. 3 Credits.
Tectonic processes and examples. Global kinematics of plates and the forces that drive them. Continental deformation in compressional, shear, and extensional settings.
Prereq: ERTH 350 and calculus.

ERTH 454. Fluid Dynamics. 4 Credits.
Introduction to the continuum theory of fluid dynamics, focusing on the Navier-Stokes equations of motion including common simplified limits and extensions. Applications are drawn from Earth and Planetary Science, Biology, and Physics.
Prereq: PHYS 252, MATH 252.

ERTH 455. Mechanical Earth. 4 Credits.
Introduction to continuum mechanics. Includes stress and strain, friction, elasticity, viscous fluids, constitutive laws, equations of motion, and deformation of the Earth.
Prereq: ERTH 315, PHYS 202, or equivalent; MATH 256.

ERTH 456. Signal Processing. 4 Credits.
A theoretical and hands-on introduction to signal processing techniques that are widely used in geophysical, geological, and related fields.
Prereq: MATH 252 or ERTH 363.

ERTH 458. Earth Monitoring. 4 Credits.
Learn hands-on applications of tools used to monitor the solid earth and its changes through time (deformation, gravity, etc.). Address problems related to natural hazards (earthquakes, landslides, volcanoes) and natural resources (climate change).
Prereq: ERTH 101 or ERTH 201, PHYS 201 or MATH 252.

ERTH 462. Environmental Geomechanics. 4 Credits.

Application of fluid and solid mechanics to understanding processes in the earth and environmental sciences. Offered alternate years.
Prereq: ERTH 455.

ERTH 463. Computational Earth Science. 4 Credits.

Practical techniques for scientific computing. Topics include root finding, curve fitting, interpolation, integration and differentiation, optimization, differential equations.
Prereq: MATH 253; ERTH 363 or equivalent.

ERTH 466. Geodynamics. 4 Credits.

Introduction to the process of the earth's physical workings. Includes rheology, bending of lithosphere, viscous flow, and heat transport.
Prereq: MATH 256 or equivalent; ERTH 455.

ERTH 467. Fault Mechanics. 4 Credits.

The physics of faulting throughout the earthquake cycle. Topics include fault friction, seismic rupture, earthquake triggering, and other fault zone processes. Offered alternate years.
Prereq: ERTH 315, MATH 253.

ERTH 468. Introduction to Seismology. 4 Credits.

Introduction to observational, theoretical, and computational seismology. Includes review of earth structure, source representation, ray theory, and seismic wave phenomena.
Prereq: MATH 256, ERTH 455.

ERTH 471. Thermodynamic Geochemistry. 4 Credits.

Introduction to geologic application of classical chemical thermodynamics. Gibbs free energy and its temperature, pressure, and composition derivatives; fugacity, activity, and chemical potential. Solutions, ideal and nonideal.
Prereq: ERTH 311 or ERTH 332, CH 223, MATH 253.

ERTH 472. Aqueous-Mineral-Gas Equilibria. 4 Credits.

Aqueous chemistry applied to natural waters (geothermal, diagenetic, continental brines). Equilibrium calculations applied to aqueous-mineral-gas systems.
Prereq: CH 223; MATH 252.

ERTH 473. Isotope Geochemistry. 4 Credits.

Introduction to nuclear physics and isotope systematics; techniques of isotope analysis; applications of stable and radioactive isotopes in geochronology and as tracers of geological processes.

ERTH 474. Soil and Environmental Chemistry. 4 Credits.

Understanding the flow and cycling of chemicals in soils is vital for addressing many pressing societal issues, including mitigating climate change, growing abundant and safe food, and protecting water quality. This class will describe fundamental soil chemical principles and consider their broader applications.
Prereq: ENVS 477, CH 222.

ERTH 480. Volcanology. 4 Credits.

Products and processes of volcanism, transport of magma in the conduit and into the atmosphere, eruptive mechanisms, volcanic hazards.
Prereq: ERTH 201, PHYS 201 or PHYS 251, and MATH 251 or MATH 246.

ERTH 500M. Temp Multilist Course. 1-5 Credits.

Repeatable.

ERTH 503. Thesis. 1-16 Credits.

Repeatable.

ERTH 507. Seminar: [Topic]. 1-5 Credits.

Repeatable.

ERTH 508. Laboratory Projects: [Topic]. 1-12 Credits.

Repeatable.

ERTH 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

ERTH 510L. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

ERTH 514. Igneous and Metamorphic Petrology. 4 Credits.

Advanced principles of igneous and metamorphic petrogenesis. Gibbs phase rule, phase diagrams, mineral thermodynamics; magma geochemistry and rheology; metamorphic facies, geothermometry and geobarometry. Johnston.

ERTH 515. Field Geophysics. 4 Credits.

Introduction to geophysical methods for subsurface investigation, useful for exploration, geotechnical engineering, and characterization of subsurface groundwater and environmental conditions.

ERTH 516. Geophysical and Environmental Sensors. 4 Credits.

This experiential course will provide students an introduction to sensors, microcontrollers, automation, data collection and programming from the perspective of sensing the Earth and the environment.

ERTH 518. Earth and Environmental Data Analysis. 4 Credits.

Tools-based instruction in data analysis for earth and environmental scientists. Topics include descriptive statistics, visualization, uncertainty analysis, hypothesis testing, regression, time series, and directional data.
Prereq: MATH 246 or MATH 251.

ERTH 520. Geocommunication. 3 Credits.

Scientific writing and presentations for the geological sciences. Focus on writing scientific papers and proposals, preparing oral and visual presentations.

ERTH 523M. Introduction to Space Physics. 4 Credits.

Course explores the interaction of the solar wind with the Earth's magnetosphere using fundamental plasma physics supported and motivated by spacecraft observations. Students will gain an understanding of the physics governing the interaction building from single particle plasma motion to specific observation supported examples.

ERTH 525. Geology of Ore Deposits. 5 Credits.

Porphyry copper-molybdenum, epithermal, massive sulfides in volcanic rocks, and base and precious metals in sedimentary rocks. Geologic setting, alteration and ore mineral assemblages, and geochemistry of ore formation.

ERTH 533. Paleobotany. 4 Credits.

Evolution and ecology of plants and microbes from the origin of life to global warming. Laboratory exercises and field trip to collect plant fossils.

ERTH 534. Vertebrate Paleontology. 4 Credits.

Evolution of vertebrates, including ourselves, based on fossil evidence. Physical and other evolutionary constraints are addressed, and lab exercises provide practical experience.

ERTH 535. Paleopedology. 4 Credits.

Soil formation; mapping and naming fossil soils; features of soils in hand specimens and petrographic thin sections; interpretations of ancient environments from features of fossil soils.

ERTH 536. Paleocology and Functional Morphology. 4 Credits.

Ecological methods for the study of fossil organisms, both terrestrial and marine. Covers a range of methods from those that reconstruct the ecology of individual species to those that deal with whole communities and ecosystems. Laboratory offers practical and analytical experience in the methods.

ERTH 538. Geobiology. 4 Credits.

Studies how microorganisms interact with geological environments at scales from enzymes to global element cycles.

ERTH 540. Sedimentary Basin Analysis. 4 Credits.

Evolution of sedimentary basins, emphasizing tectonic controls on basin formation and filling. Interpretation of subsidence mechanisms and sedimentary processes through analysis of the stratigraphic record.

ERTH 541. Hillslope Geomorphology. 4 Credits.

Hillslope processes and landforms; includes hillslope hydrology, overland flow erosion, weathering and soil formation, soil creep, landslides and related hazards, glacial and periglacial processes, effects of land-use practices and fire, and landscape evolution.

ERTH 551. Hydrogeology. 4 Credits.

Study of the origin, motion, and physical and chemical properties of ground water. Emphasizes quantitative analysis of flow and interaction with geologic materials.

ERTH 552. Neotectonics and Quaternary Geology. 4 Credits.

Interpretation of active structures from deformed quaternary sediments and surfaces using case histories. Field project uses air photos and field techniques. Repeatable once for maximum of 8 credits.

ERTH 553. Tectonics. 3 Credits.

Tectonic processes and examples. Global kinematics of plates and the forces that drive them. Continental deformation in compressional, shear, and extensional settings.

ERTH 554. Fluid Dynamics. 4 Credits.

Introduction to the continuum theory of fluid dynamics, focusing on the Navier-Stokes equations of motion including common simplified limits and extensions. Applications are drawn from Earth and Planetary Science, Biology, and Physics.

ERTH 555. Mechanical Earth. 4 Credits.

Introduction to continuum mechanics. Includes stress and strain, friction, elasticity, viscous fluids, constitutive laws, equations of motion, and deformation of the earth.

ERTH 556. Signal Processing. 4 Credits.

A theoretical and hands-on introduction to signal processing techniques that are widely used in geophysical, geological, and related fields.

ERTH 558. Earth Monitoring. 4 Credits.

Learn hands-on applications of tools used to monitor the solid earth and its changes through time (deformation, gravity, etc.). Address problems related to natural hazards (earthquakes, landslides, volcanoes) and natural resources (climate change).

ERTH 562. Environmental Geomechanics. 4 Credits.

Application of fluid and solid mechanics to understanding processes in the earth and environmental sciences. Offered alternate years.

ERTH 563. Computational Earth Science. 4 Credits.

Practical techniques for scientific computing. Topics include root finding, curve fitting, interpolation, integration and differentiation, optimization, differential equations.

ERTH 566. Geodynamics. 4 Credits.

Introduction to the process of the earth's physical workings. Includes rheology, bending of lithosphere, viscous flow, and heat transport.

ERTH 567. Fault Mechanics. 4 Credits.

The physics of faulting throughout the earthquake cycle. Topics include fault friction, seismic rupture, earthquake triggering, and other fault zone processes. Offered alternate years.

ERTH 568. Introduction to Seismology. 4 Credits.

Introduction to observational, theoretical, and computational seismology. Includes review of earth structure, source representation, ray theory, and seismic wave phenomena.

ERTH 571. Thermodynamic Geochemistry. 4 Credits.

Introduction to geologic application of classical chemical thermodynamics. Gibbs free energy and its temperature, pressure, and composition derivatives; fugacity, activity, and chemical potential. Solutions, ideal and nonideal.

ERTH 572. Aqueous-Mineral-Gas Equilibria. 4 Credits.

Aqueous chemistry applied to natural waters (geothermal, diagenetic, continental brines). Equilibrium calculations applied to aqueous-mineral-gas systems.

Prereq: CH 223; MATH 252.

ERTH 573. Isotope Geochemistry. 4 Credits.

Introduction to nuclear physics and isotope systematics; techniques of isotope analysis; applications of stable and radioactive isotopes in geochronology and as tracers of geological processes.

ERTH 574. Soil and Environmental Chemistry. 4 Credits.

Understanding the flow and cycling of chemicals in soils is vital for addressing many pressing societal issues, including mitigating climate change, growing abundant and safe food, and protecting water quality. This class will describe fundamental soil chemical principles and consider their broader applications.

ERTH 580. Volcanology. 4 Credits.

Products and processes of volcanism, transport of magma in the conduit and into the atmosphere, eruptive mechanisms, volcanic hazards.

ERTH 601. Research: [Topic]. 1-16 Credits.

Repeatable.

ERTH 602. Supervised College Teaching. 1-16 Credits.

Repeatable.

ERTH 603. Dissertation. 1-16 Credits.

Repeatable.

ERTH 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

ERTH 606. Practicum: [Topic]. 1-16 Credits.

Repeatable.

ERTH 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

ERTH 608. Laboratory Projects: [Topic]. 1-16 Credits.

Repeatable.

ERTH 609. Terminal Project. 1-12 Credits.

Repeatable.

ERTH 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

ERTH 620. Advanced Igneous Petrology. 3 Credits.

Igneous rocks of the ocean basins, continental margins, and stable continental interior including basalts, calcalkaline series, and granites. Content varies according to research interests.

Prereq: ERTH 514, 571, or equivalent.

ERTH 692. Advanced Volcanology. 4 Credits.

This course introduces students to concepts of heat and mass transfer to understand the transport of magma in the subsurface and the physical processes involved in volcanic eruptions.

Prereq: ERTH 480, ERTH 580.

Bachelor of Arts & Bachelor of Science in Earth Sciences

The Department of Earth Sciences offers a bachelor of science (BS) or a bachelor of arts (BA) degree with a major in earth sciences.

Major Tracks

Earth science is an unusually broad subject. It addresses everything from the chemical processes that make rocks and minerals to the physics behind plate tectonics and the travel of earthquake waves through the planet. It explores the history of the evolution of life revealed in fossils, and it probes the earth processes that affect how humans can survive on the surface of the planet. To address this breadth, the department offers four curricular tracks for a major in earth sciences: geology, geophysics, environmental geoscience, and paleontology.

All of the tracks require a common core of general chemistry, calculus, general geology, and physics, except that paleontology- and environmental geoscience-track students may take two terms of biology in place of two terms of physics. Beyond the core, each track requires certain additional courses and a selection of electives.

- Bachelor of Arts: Geology Track (p. 186)
- Bachelor of Science: Geology Track (p. 187)

Bachelor of Arts: Geology Track

Code	Title	Credits
Core Courses		
ERTH 101 & ERTH 102 & ERTH 103 or ERTH 201 & ERTH 202 & ERTH 203	Exploring Planet Earth and Exploring Earth's Environment and Exploring Earth History Dynamic Planet Earth and Earth's Surface and Environment and History of Life	12
PHYS 201–202 or PHYS 251 & PHYS 252	General Physics Foundations of Physics I and Foundations of Physics I	8
CH 221–222 or CH 224H–225H	General Chemistry Honors General Chemistry	8
MATH 251–252	Calculus I-II	8
ERTH 315	Earth Physics	4
ERTH 316	Introduction to Hydrogeology	4
ERTH 318	Introduction to Field Methods	3
ERTH 418 or MATH 253 or MATH 343 or MATH 425	Earth and Environmental Data Analysis Calculus III Statistical Models and Methods Statistical Methods I	4
ERTH 363 or CS 122	Computational Tools for Earth Sciences Introduction to Programming and Problem Solving	4
Additional Requirements		
ERTH 331	Mineralogy	5
ERTH 332	Introduction to Petrology	5
ERTH 334	Sedimentology and Stratigraphy	4

ERTH 350 & ERTH 351 & ERTH 352	Structural Geology and Structural Geology Problems and Structural Geology Laboratory and Field	5

Minor in Earth Sciences

Undergraduate Studies

The undergraduate program in the Department of Earth Sciences provides an understanding of the materials that constitute the earth and the processes that have shaped the earth from deep in its interior to the surface environment—geology. Geology applies all the basic sciences—biology, chemistry, mathematics, and physics—to understanding earth processes in the historical context of geologic time. It is a science that explores problems by combining field investigations with laboratory experiments and theoretical studies.

Geology also addresses many natural hazards—earthquakes, flooding, and volcanic eruptions—that affect humans. It addresses the impact of humans on the earth's surface environment, where we pollute rivers and ground water, cause rapid erosion and landslides, or attempt to re-engineer rivers and shorelines.

Minor Requirements

Code	Title	Credits
Choose one of the following three-course sequences:		12
ERTH 101 & ERTH 102 & ERTH 103	Exploring Planet Earth and Exploring Earth's Environment and Exploring Earth History	
ERTH 201 & ERTH 202 & ERTH 203	Dynamic Planet Earth and Earth's Surface and Environment and History of Life	
Choose from the following courses: ¹		16
ERTH 213	Geology of National Parks	
ERTH 300 - ERTH 499		
Total Credits		28

¹ 16 credits of earth sciences courses (exclusive of independent study courses) must be earned with course numbers greater than ERTH 299 (ERTH 213 is acceptable, however). No more than 8 credits may be applied to the minor from the following list: Geology of National Parks (ERTH 213), The Fossil Record (ERTH 304), Dinosaurs (ERTH 305), Volcanoes and Earthquakes (ERTH 306), Oceanography (ERTH 307), Geology of Oregon and the Pacific Northwest (ERTH 308), Earth Resources and the Environment (ERTH 310).

Undergraduate minors must take all required courses for letter grades and complete them with grades of C– or better.

Graduate Studies in Earth Sciences

Graduate Studies

The Department of Earth Sciences offers programs of graduate study leading to master of science (MS), master of arts (MA), and doctor of philosophy (PhD) degrees with opportunity for research in a wide variety of specialty fields. Course work is designed to meet individual needs, and students may pursue independent research in geobiology, geochemistry, geodesy, geomechanics, geomorphology, geophysics, mineralogy, petrology, volcanology, paleontology, stratigraphy, sedimentary

petrology, structural geology, and ore deposit geology. The master's degree program requires two years or more for completion.

Admission to the graduate program is competitive and based on academic records, scores on the Graduate Record Examinations (GRE), and letters of recommendation. Nonnative speakers of English must also submit scores for the Test of English as a Foreign Language (TOEFL) and the Test of Spoken English (TSE). Applications are welcome from students who are interested in using their background in related fields, such as physics, chemistry, and biology, to solve geologic or geophysical problems.

Graduate students are advised by a guidance committee consisting of three faculty members. This committee meets with each student shortly after he or she arrives on campus and as often thereafter as necessary for planning purposes.

Requirements

Basic university requirements for graduate degrees are described in the Graduate School (p. 885) section of this catalog. The department sets additional examination, course work, seminar, and thesis requirements. Applicants should read the *Guide to Graduate Study* on the department website (<http://earthsciences.uoregon.edu/graduate-program/>) or write to the Department of Earth Sciences for details.

Programs

Graduate study in earth sciences is offered in five broad areas:

1. volcanology-petrology-geochemistry
2. stratigraphy–surface processes
3. paleontology-paleopedology-geobiology
4. structural geology–geophysics
5. economic geology (mineral deposits)

Volcanology-Petrology-Geochemistry

The department has excellent analytical and other research facilities for studies in these subdisciplines, and the volcanic and metamorphic terrane of the Northwest offers unsurpassed opportunities for field studies. Active research programs are diverse and include studies of eruption dynamics, magma volatile inventories, and magma rheology; experimental studies of igneous phase equilibria and trace element partitioning; calculations of multicomponent equilibria in aqueous systems and volcanic gases; and studies of igneous protogenesis.

Stratigraphy–Surface Processes

The stratigraphic record of tectonically active sedimentary basins indicates the dynamic interactions among basin subsidence, sediment input from eroding sources, evolution of depositional systems, and active faulting and folding that govern these processes. Research in this area combines field-based stratigraphic, sedimentologic, and geomorphic analysis with provenance studies and concepts derived from theoretical models to decipher the complex structural and climatic controls on the filling histories of active basins.

Surface processes regulate how tectonics and climate affect landscape evolution. Field observations, numerical simulations, topographic analyses, and experimental facilities are used to study sediment transport processes over a range of spatial and temporal scales. Projects incorporate links between active tectonics and structural geology, biology, geomechanics, and surface processes to address problems such as landsliding and hill-slope evolution, biological contributions to soil creep

and landscape lowering, and the geomorphic implications of seismic-induced landsliding.

Paleontology-Paleopedology-Geobiology

Studies of fossil soils, plants, and vertebrates aim to reconstruct life on land and its role in global change. Global changes of interest include Neogene paleoclimate and paleoenvironment of ape and human evolution in East Africa, environmental effects of terminal Cretaceous impact and dinosaur extinction in Montana, consequences of mass extinction and methane clathrate degassing at the Permian-Triassic boundary, and the effect of early land plants and forests on weathering and atmospheric composition during the early Paleozoic.

Geobiology focuses on the interaction of microorganisms with the geologic environment and the ways life forms affect geological processes, such as weathering and mineralization.

Structural Geology–Geophysics

Graduate work in the structural geology–geophysics area involves the study of the earth’s dynamic processes.

Seismic imaging techniques using regional arrays provide tools for understanding regional tectonics. Studies of upper-mantle and lithospheric structure beneath the Rocky Mountains and in the Pacific Northwest subduction zone are providing essential constraints, unavailable from surface geology, for detailed dynamical models of plate-lithospheric deformation.

Structural geology focuses on applying modern field and analytical techniques to solving problems in Cenozoic tectonics and active faulting. Detailed field mapping, trench logging, and geomorphic analysis are combined with seismic array data, land- and space-based geodetic data, and theoretical modeling to address problems including Oregon’s Basin and Range province and coastal deformation, active tectonics of the San Andreas Fault system, and seismic risk along the Pacific margin of the United States and southeast and central Asia.

Geophysical experiments conducted at sea investigate the nature of sea-floor spreading including the segregation, transport, and storage of melt; the rifting of oceanic lithosphere; and the spatial and temporal connectivity between magmatic, tectonic, and hydrothermal processes.

Mineral Deposits

Current research on ore deposits includes studies of porphyry copper deposits, epithermal veins, and active geothermal systems. These projects combine field mapping, petrography, and chemical analyses with theoretical chemical modeling of processes of ore fluid generation, alteration, and mineralization.

Related Research Activities

The Condon Collection of Fossils at the Museum of Natural and Cultural History maintains strong ties to the Department of Earth Sciences. Two geology professors are curators of the collection, and paleontology undergraduate and graduate students are often employed as assistants. The Condon Collection contains 60,000 specimens, including invertebrate and vertebrate fossils, paleobotanical remains, and an extensive collection of modern animals that are available to interested researchers for study.

Research Facilities

Students may use a variety of analytical facilities and equipment including a three-component broadband (0.03–50Hz) seismic array, an electron

microprobe, a scanning electron microscope with image analysis, x-ray diffraction, FTIR spectroscopy, stable isotope mass spectroscopy, and a geobiology laboratory.

An experimental petrology laboratory covers a range of crustal temperatures and pressures and includes equipment for doing experiments in controlled atmospheres. Two piston-cylinder apparatus with pressure-temperature capability to 35 kilobars and 1,500° C may be used to study crystalline, partially molten, and molten silicates under mantlelike conditions.

Computers are used for much of the research in the department including acquisition and processing of seismic and gravity data and numerical modeling of geophysical processes and geochemical reactions. A geochemistry laboratory is equipped with sophisticated computer programs for thermodynamic calculations of gas-liquid-solid equilibria and reaction processes important in metamorphic, volcanic gas, hydrothermal, and diagenetic systems. The Internet can be accessed through the UONet fiber-optic link. A student computer facility, equipped with PC and Macintosh computers and laser printers, is also connected to the networks.

The sedimentological and paleontological laboratories have, in addition to standard laboratory equipment, an electronic particle-size analyzer, an x-radiography unit, photomicroscopes, a Leitz Aristophot unit, a fully maintained catalog of foraminifera, an acid room, and a conodont-processing laboratory.

Financial Aid for Graduate Students

Most of the department’s graduate students are fully supported through teaching and research assistantships. More information about financial assistance and department policies for awarding and renewing teaching and research fellowships may be obtained by reading the *Guide to Graduate Study* on the department website (<http://earthsciences.uoregon.edu/graduate-program/>) or by writing to the department.

Master of Science and Master of Arts in Earth Sciences

Code	Title	Credits
500 or 600 level ¹		24
600-699 level ²		9
Thesis ³		9
Remaining Credits ⁴		3
Total Credits		45

At least 30 credit hours in residence, in the major

- ¹ Only graded courses apply. Up to 15 credits may be taken in courses offered outside the department (with advisor approval)
- ² May be taken graded or pass/no pass, but only graded courses can apply toward the 24 credits above.
- ³ GEOL 503. At least 3 thesis credits must be taken in the final term.
- ⁴ Can include research, readings, and seminars. Students are expected to register for and attend the department seminar and graduate student seminar (607) each term.

Ph.D. in Earth Sciences

Code	Title	Credits
500 or 600 Level Courses	¹	15
Dissertation	²	18
Additional Credits	³	48
Total Credits		81

¹ Must be taken for grade.

² GEOL 603, with a minimum of 3 credits must be taken in the last term.

³ 3+ years of full-time study (at least 9 credits/term may include research or reading credits). Students are expected to register for and attend the department seminar and graduate student seminar (607) each term.

Ph.D. students are required to take 15 graded classroom credits at the graduate-level (500-600 level). These courses must be approved by the guidance/dissertation committee chair to ensure that they are geared toward achieving balance between the increasing the breadth of their academic experience and maintaining focus on areas of relevance to their research. They must also take 18 hours of dissertation credits (GEOL 603).

East Asian Languages and Literatures

Yugen Wang, Department Head

304 Friendly Hall
1248 University of Oregon
Eugene, Oregon 97403-1248

The Department of East Asian Languages and Literatures presents a wide range of courses in several programs, from introductory courses in the languages and literatures of East Asia (Chinese, Japanese, and Korean) to advanced graduate-level study of linguistics and literature. Undergraduate degrees include a bachelor of arts (BA) degree in Chinese or Japanese and minors in Chinese, Japanese, or Korean. The department also offers master's (MA) and doctoral (PhD) degrees in East Asian languages and literatures. At all levels, students may choose to focus on either language or literature, though all degree programs require course work from both areas.

The department typically supports dozens of students in graduate-level study while 100 undergraduate BA majors graduate each year. Faculty members are strongly committed to promoting a rich immersion in Chinese, Japanese, and Korean, and undergraduates and graduate students alike are encouraged to study abroad and conduct research throughout East Asia.

Preparation

The department recommends the following preparation for study leading to an undergraduate major or minor in Chinese, Japanese, or Korean:

1. As much work as possible in the student's major language, focusing on oral and written communication and reading comprehension
2. Knowledge of the history, culture, and geography of the area in which that language is spoken
3. Course work in literary analysis and cultural studies

Careers

Students with an undergraduate degree in Chinese, Japanese, or Korean are well prepared for graduate-level study in the humanities, social sciences, and professions (e.g., law or business). They are also suited to a range of jobs in many different sectors, including business, education, and journalism as well as government agencies and nonprofit organizations. Recent graduates have found jobs in all of these areas.

Faculty

Roy Chan, associate professor (modern Chinese and Russian literature). BA, 2002, Washington (Seattle); PhD, 2009, California, Berkeley. (2013)

Weijun Chen, senior instructor (Chinese). BA, 1997, Anhui; MA, 2000, Nanjing. (2008)

Rachel DiNitto, professor (modern Japanese literature, cultural studies). BA, 1988, Pennsylvania; MA, 1996, PhD, 2000, Washington (Seattle). (2015)

Maram Epstein, professor (Ming-Qing vernacular fiction). BA, 1983, MA, 1987, PhD, 1992, Princeton. (1994)

Alisa D. Freedman, professor (modern Japanese literature and film). BA, 1991, Wesleyan; MA, 1995, PhD, 2002, Chicago. (2005)

Yukari Furikado-Koranda, senior instructor (Japanese). BA, 2002, Kobe College; MA, 2010, Oregon. (2010)

Denise Gigliotti, senior instructor (Chinese). BA, 1995, National Taiwan; MA, 1998, California, Los Angeles. (2002)

Alison Groppe, associate professor (Chinese culture). BA, 1989, Wellesley College; MA, 1995, PhD, 2006, Harvard. (2008)

Reiko Hashimoto, senior instructor (Japanese). BA, 1982, Chukyo; MA, 1992, Minnesota State, Mankato; PhD, 2000, Indiana, Bloomington. (2000)

Luke Habberstad, associate professor (early Chinese literature). BA, 2003, Yale; MA, 2007, PhD, 2014, California, Berkeley. (2014)

Kaori Idemaru, professor (linguistics). BA, 1990, Osaka; MA, 1992, Northern Iowa; PhD, 2005, Oregon. (2008)

Rika Ikei, senior instructor (Japanese). BA, 1992, Kyoto University of Foreign Studies; MA, 1998, West Chester. (2003)

Zhuo Jing-Schmidt, professor (Chinese linguistics). BA, 1992, MA, 1995, Peking; MA, 1997, California, Los Angeles; PhD, 2005, Cologne. (2010)

Jina Kim, associate professor (Korean literature). BA, 1993, University of Chicago; MA, 2002, University of Washington; MA, 2009, Cornell; PhD, 2006, University of Washington. (2018)

Nayoung Kwon, associate professor (Korean linguistics). BA, 1997, Korea; MA, 1999, Korea; MA, 2003, California (San Diego); PhD, 2008, California (San Diego). (2020)

Fengjun Mao, senior instructor (Chinese). BA, 2000, MA, 2003, East China Normal. (2008).

Naoko Nakadate, senior instructor (Japanese). BA, 1988, Tokyo University of Foreign Studies; MA, 1992, Oregon. (1993)

Yoko O'Brien, senior instructor (Japanese). BA, 1996, Washington State; MA, 2000, Oregon. (2007)

Thomas Glynne Walley, associate professor (early modern Japanese literature). BA, 1996, Brigham Young; MA, 2001, Washington (St. Louis); PhD, 2009, Harvard. (2012)

Yugen Wang, professor (classical Chinese poetry and poetics). BA, 1992, Anhui Normal; MA, 1995, Peking; PhD, 2005, Harvard. (2005)

Jean Yuanpeng Wu, senior instructor (Chinese). BA, 1982, China University of Geosciences; MA, 1990, West Virginia; PhD, 1998, Michigan State. (1996)

Emeriti

Stephen W. Durrant, professor emeritus. BA, 1968, Brigham Young; PhD, 1975, Washington (Seattle). (1990)

Michael B. Fishlen, associate professor emeritus. BA, 1965, Knox College; MA, 1968, PhD, 1973, Indiana; JD, 1987, Oregon. (1970)

Angela Jung-Palandri, professor emerita. BA, 1946, Catholic University, Peking; MA, 1949, MLS, 1954, PhD, 1955, Washington (Seattle). (1962)

Stephen W. Kohl, associate professor emeritus. BA, 1967, PhD, 1974, Washington (Seattle). (1972)

Wendy Larson, professor emerita. BA, 1974, Oregon; MA, 1978, PhD, 1984, California, Berkley. (1985)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

- **Bachelor of Arts in Chinese**
- **Bachelor of Arts in Japanese**
- U (p. 214) **ndergraduate Minors**

Undergraduate Studies

The Department of East Asian Languages and Literatures offers undergraduate major programs in Chinese and Japanese languages and literatures. Each program enables students to achieve proficiency in reading, writing, and speaking the language and to acquire a fundamental knowledge of the literature and culture of the country. The Department also offers undergraduate minors in Chinese, Japanese, and Korean.

Preparation

Students considering a major in Chinese or Japanese should decide their major as early as possible so that they can satisfy the requirements in four years of undergraduate study. Background in languages, literature, or history at the high school or community college level is good preparation for the student majoring in Chinese or Japanese.

Requirements

Prospective majors must meet with an East Asian languages and literatures faculty advisor when declaring the major, each spring to obtain the advisor's signature before fall term registration, and two terms before graduation.

Any course for which a grade lower than C– is received does not count toward the major.

Prospective majors who place above the first term of the third year of a language (Third-Year Chinese (CHN 301 (<http://catalog.uoregon.edu/>

[search/?P=CHN%20301](http://catalog.uoregon.edu/search/?P=CHN%20301))) or Third-Year Japanese (JPN 301 (<http://catalog.uoregon.edu/search/?P=JPN%20301>))) must draft an individualized program in conjunction with a department advisor.

Careers

A major in Chinese or Japanese prepares a student for graduate study in the humanities, social sciences, and professional schools and also for careers in business, teaching, law, journalism, and government agencies. Career options for people with knowledge of Chinese, Japanese, or Korean are steadily increasing.

Chinese Flagship Program

This program is a language option for students who wish to achieve advanced levels of proficiency in Chinese.

Code	Title	Credits
CHN 420/520	Intermediate Language Strategies	4
CHN 421/521	Intermediate Language Strategies	4
CHN 422/522	Intermediate Language Strategies	4
CHN 439/539	Chinese Academic Writing	4
CHN 445/545	Advanced Chinese: [Topic]	4
CHN 480/580	Chinese Linguistics	4

Flagship courses as well as content courses taught in Chinese in other departments expose students to the language and content of a broad range of disciplines, including business, journalism, social sciences, sciences, and the humanities. These courses prepare students to pursue a wide variety of careers in Chinese-speaking environments. Students do not need to be Chinese majors to enroll in Chinese Flagship courses or the program. Those interested in either Flagship-level courses or formally enrolling in the program should visit chineseflagship.uoregon.edu (<http://chineseflagship.uoregon.edu>).

Japanese Global Scholars Program

Specifically designed for advanced Japanese speakers committed to linguistic, cultural, and intellectual advancement. The program, open to majors and nonmajors, offers courses on academic topics conducted in Japanese, helping students to become proficient both in the subject areas and the language. For more information, visit the website (<https://casls.uoregon.edu/legacy-projects/student-programs/japanese-global-scholars/>).

Honors

Graduation with departmental honors is approved for students who

1. Earn a cumulative GPA of 3.50 or better in all UO work
2. Earn a cumulative GPA of 3.75 or better in major course work
3. Complete, under the supervision of a faculty member, a senior thesis to be evaluated by the thesis director and one other faculty member in the department

Students must enroll for at least 6 pass/no pass (P/N) credits in Thesis (CHN 403) or Thesis (JPN 403) in addition to meeting the standard major requirements. Transfer work and P/N credits are not included in determining the GPA.

Honors Thesis in Chinese

With the support of an advisor, students may write a thesis on a Chinese topic. Thesis topics must be approved at least one term before the thesis is submitted for honors credit.

Thesis Written in English. To count toward a Chinese degree, the thesis must be on a Chinese cultural topic with a suggested length of forty pages.

Thesis Written in Chinese. With an advisor's approval, language-track majors may opt to write a thesis in Chinese with a suggested length of 12,500 characters. Students in the Chinese Flagship Program who are culture majors may petition to have a Chinese-language thesis count toward honors in the department. The thesis must be on a topic that reflects an aspect of Chinese culture.

Honors Thesis in Japanese

With the support of an advisor, students may write a thesis on a Japanese topic. Thesis topics must be approved at least one term before the thesis is submitted for honors credit.

Thesis Written in English. To count toward a Japanese degree, the thesis must be on a Japanese topic with a suggested length of forty pages.

Thesis Written in Japanese. With an advisor's approval, majors may opt to write a thesis in Japanese with a suggested length of 12,500 characters.

East Asian Studies Minor

See the **Asian Studies** section of this catalog for a description of the minor in East Asian studies.

Overseas Study

The University of Oregon has overseas study programs in Japan. Students in University of Oregon study abroad programs enroll in courses with subject codes that are unique to individual programs. Special course numbers are reserved for overseas study. See Division of Global Engagement in the Student Services section of this catalog. Students are strongly advised to talk with their major advisor before they study abroad to plan their courses of study and make sure the courses they take in Japan will count toward major requirements.

Kindergarten through Secondary Teaching Careers

Students who are interested in being licensed for K-12 teaching should consult a Tykeson advisor for MA opportunities at UO.

- **Master of Arts in East Asian Languages and Literatures**
- Doctor of Philosophy in East Asian Languages and Literatures (p. 217)

Graduate Studies

The Department of East Asian Languages and Literatures offers programs of study leading to the degrees of master of arts (MA) and doctor of philosophy (PhD) in East Asian languages and literatures. Students may choose to specialize in Chinese, Japanese, or Korean studies.

In addition to departmental requirements, graduate students must fulfill the general requirements of the Division of Graduate Studies listed in that section of this catalog.

The Chinese, Japanese, and Korean studies programs, which prepare students to work in a variety of professional and academic fields, provide intensive training in linguistic and textual analysis and an extensive exposure to literary theory, film studies, and comparative and cultural studies. The department encourages students to develop their specialization in East Asian literatures and films in broader, more comparative, and more interdisciplinary and transnational perspectives than has been the case in traditional programs. The faculty's research and teaching interests cover the major fields, genres, and chronological divisions of Chinese, Japanese and Korean literature and film. They encourage creative connections and challenges to conventional disciplinary boundaries by exploring the relationships between literature-cinema and such areas as history, law, linguistics, politics, religion, philosophy, sociology, theater and the performing arts, and women's, gender, and sexuality studies.

Comparative Literature

Several members of the department's faculty participate in the Comparative Literature Program. For more information, see the **Comparative Literature** section of this catalog.

Linguistics

The departmental Chinese, Japanese and Korean linguists work closely with the Department of Linguistics in research, teaching, and program development in theoretical and applied linguistics. Interested students are encouraged to work closely with a departmental advisor to pursue a specialization or field in East Asian linguistics and/or East Asian second-language acquisition.

In addition, several members of the department's faculty are affiliated with other UO graduate programs, including the graduate specialization in translation studies, graduate certificate in new media and culture, graduate certificate in women's and gender studies, and cinema studies.

Complete details and answers to specific questions about graduate programs in the Department of East Asian Languages and Literatures are available from the department's graduate secretary.

Admission

An applicant for admission to the MA program should have completed an undergraduate major in Chinese, Japanese, or Korean language, literature, or linguistics, or have equivalent experience.

An applicant for admission to the PhD program should have completed an MA degree in Chinese, Japanese, or Korean language and literature, linguistics, or have equivalent experience.

Application Procedure

Graduate program applications are submitted via an online process found at the department's web site. In the course of completing the application, students are required to upload the following:

1. **Statement of Purpose.** The 750-word statement of purpose should address the applicant's specific academic preparation or experience, all areas of research interest, career goals, and reason for attending the University of Oregon. In addition, PhD applicants should include potential research questions

2. **Writing Sample.** The writing sample must come from a course that shows up on the transcript. International students must submit a sample in English and may submit an additional sample in Chinese or Japanese
3. **Transcripts.** Unofficial copies of undergraduate and/or graduate transcripts should be uploaded from all institutions attended. In addition, official transcripts from these institutions should be sent to the University of Oregon, Office of Admissions, 1217 University of Oregon, Eugene, OR 97403-1217
4. **Letters of Recommendation.** Three persons familiar with the applicant's academic experience and ability to carry out independent research must be identified. The online application requests contact information (name, position, institution, telephone number, and e-mail address) from each of these people. Upon submission of the online application, each person will be notified via e-mail and provided with instructions on how to upload their recommendations
5. **Graduate Record Examination (GRE) scores.** The GRE test is required for all applicants. Applicants should take the test in time for the official results to arrive to the university prior to January 1. The online application is self-reporting, however official GRE scores need to be sent to the University of Oregon (institution code 4846) and the Department of East Asian Languages and Literatures (department code 2601)

Applications are due by January 1. New students are typically admitted to the program for fall term.

Graduate Employee Fellowships

A number of graduate employee fellowships (GEs) are available each year for new graduate students in the department. Students must apply to the department by January 1 for admission and appointment the following fall term. During each term of the appointment, graduate employees must register for and complete at least 9 credits of course work that can be applied to the degree program.

First-year GEs must attend an orientation and training workshop, which is held the week before fall term begins.

MA Students Seeking Entry to the PhD Program

If the student also decides to seek admission into the PhD program, the MA examination administered shall include the oral component.

An oral examination shall take place no later than the seventh week of the term in which a request for the degree has been made. It shall consist of a one- to two-hour interview with the faculty committee, which is required to be formed by the student and the advisor before the student takes the comprehensive exam, and shall include evaluation of the following:

- the student's skills in critical thinking, reading, listening, and writing
- the student's ability to formulate a pedagogical approach to topics appropriate to the student's career goals
- a discussion of career options and prospects

The committee shall determine whether the candidate has successfully fulfilled the requirements for the MA degree, and shall confer one of the following grades: *distinction*, *clear pass*, *marginal pass*, or *failure*. This determination is independent of the student's candidacy to the PhD program. As in the case of terminal MA students, should the committee determine that the candidate has not been successful, it may recommend

that the student be given one additional opportunity to pass the exam during the next academic term.

Master's degree candidates must also fulfill the requirements of the UO Division of Graduate Studies.

Doctor of Philosophy Degree Program

The PhD program in East Asian languages and literatures is designed to provide students with a high level of competence in their area of specialization and a familiarity with applicable methodologies and theories. The program has four components:

- course work
- comprehensive examination
- prospectus for the dissertation
- the dissertation itself

Specific courses and projects used to fulfill requirements must be approved by the student's advisor, who works with the other faculty members to develop the student's program.

Timeline for Completion of the PhD Program

Course work—two years

Comprehensive examination and approval of prospectus or qualifying paper—one year

Dissertation writing and defense—two years

Additional Course Work

Depending on the student's background when admitted to the PhD program, additional course work may be required.

Chinese Courses

CHN 101. First-Year Chinese. 5 Credits.

Provides thorough grounding in listening comprehension, speaking, reading, and writing. Emphasis on aural-oral skills. For students with no background in Mandarin Chinese.

CHN 102. First-Year Chinese. 5 Credits.

Provides thorough grounding in listening comprehension, speaking, reading, and writing. Emphasis on aural-oral skills. For students with no background in Mandarin Chinese.

Prereq: CHN 101 or equivalent.

CHN 103. First-Year Chinese. 5 Credits.

Provides thorough grounding in listening comprehension, speaking, reading, and writing. Emphasis on aural-oral skills. For students with no background in Mandarin Chinese.

Prereq: CHN 102 or equivalent.

CHN 105. Accelerated First-Year Chinese I. 5 Credits.

Provides proficiency-based language-learning using American Council on the Teaching of Foreign Language benchmarks as standards for teaching and assessment of listening comprehension, speaking, reading, and writing. Sequence with CHN 106.

Prereq: CHN 101 with grade of A- or higher.

CHN 106. Accelerated First-Year Chinese II. 5 Credits.

Provides proficiency-based language-learning using American Council on the Teaching of Foreign Language benchmarks as standards for teaching and assessment of grounding in listening comprehension, speaking, reading, and writing. Sequence with CHN 105.

Prereq: CHN 102 with a grade of A or higher or CHN 105 with a grade of A or higher.

CHN 150. Introduction to Chinese Narrative. 4 Credits.

Introduction to specific features of Chinese narrative. Readings may span traditional to contemporary literature. Focuses on analysis of characterization, symbolism, causality, and formal issues. Taught in English.

CHN 151. Introduction to Chinese Film. 4 Credits.

Introduction to the cinemas of China, Taiwan, and Hong Kong, featuring films by directors Zhang Yimou, Chen Kaige, John Woo, Wong Kar-Wei, and Ang Lee. No background in Chinese necessary; English subtitles.

CHN 152. Introduction to Chinese Popular Culture. 4 Credits.

Introduction to popular Chinese cultures in China, Hong Kong, Taiwan, and the United States. Discussion focuses on nationalism, globalization, identity, and gender. No background in Chinese necessary; taught in English.

CHN 196. Field Studies: [Topic]. 1-2 Credits.

Repeatable.

CHN 198. Workshop: [Topic]. 1-2 Credits.

Repeatable.

CHN 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

CHN 200M. Temp Multilist Course. 4 Credits.**CHN 201. Second-Year Chinese. 5 Credits.**

Training in aural-oral skills designed to build listening comprehension and fluency. Development of proficiency in written Chinese.

Prereq: CHN 103 or equivalent.

CHN 202. Second-Year Chinese. 5 Credits.

Training in aural-oral skills designed to build listening comprehension and fluency. Development of proficiency in written Chinese.

Prereq: CHN 201 or equivalent.

CHN 203. Second-Year Chinese. 5 Credits.

Training in aural-oral skills designed to build listening comprehension and fluency. Development of proficiency in written Chinese.

Prereq: CHN 202 or equivalent.

CHN 204. Accelerated Second-Year Chinese I. 5 Credits.

Provides proficiency-based language-learning using American Council on the Teaching of Foreign Language benchmarks as standards for teaching and assessment of grounding in listening comprehension, speaking, reading, and writing. Sequence with CHN 205, CHN 206.

Prereq: CHN 103 with a grade of A or higher or CHN 106 with a grade of B+ or higher.

CHN 205. Accelerated Second-Year Chinese II. 5 Credits.

Provides proficiency-based language-learning using American Council on the Teaching of Foreign Language benchmarks as standards for teaching and assessment of grounding in listening comprehension, speaking, reading, and writing. Sequence with CHN 204, CHN 206.

Prereq: CHN 201 with a grade of A or higher or CHN 204 with a grade of B+ or higher.

CHN 206. Accelerated Second-Year Chinese III. 5 Credits.

Provides proficiency-based language-learning using American Council on the Teaching of Foreign Language benchmarks as standards for teaching and assessment of grounding in listening comprehension, speaking, reading, and writing. Sequence with CHN 204, CHN 205.

Prereq: CHN 202 with a grade of A or higher or CHN 205 with a grade of B+ or higher.

CHN 301. Third-Year Chinese. 5 Credits.

Continued training in listening, speaking, reading, and writing.

Prereq: CHN 203 or equivalent.

CHN 302. Third-Year Chinese. 5 Credits.

Continued training in listening, speaking, reading, and writing.

Prereq: CHN 301 or equivalent.

CHN 303. Third-Year Chinese. 5 Credits.

Continued training in listening, speaking, reading, and writing.

Prereq: CHN 302 or equivalent.

CHN 305. History of Chinese Literature. 4 Credits.

Survey ranging from early Confucian and Daoist classics through Tang and Song poetry, short fiction and novels, the 1919 May Fourth Movement writers, and into the contemporary period. Readings in English.

Prereq: WR 121 or equivalent.

CHN 306. History of Chinese Literature. 4 Credits.

Survey ranging from early Confucian and Daoist classics through Tang and Song poetry, short fiction and novels, the 1919 May Fourth Movement writers, and into the contemporary period. Readings in English.

Prereq: WR 121 or equivalent.

CHN 307. History of Chinese Literature. 4 Credits.

Survey ranging from early Confucian and Daoist classics through Tang and Song poetry, short fiction and novels, the 1919 May Fourth Movement writers, and into the contemporary period. Readings in English.

Prereq: WR 121 or equivalent.

CHN 308. Literature of Modern Taiwan. 4 Credits.

Surveys the literature of Taiwan from the postwar era to the present. Discussion focuses on national identity, gender, class, modernization, and globalization. Taught in English.

Prereq: WR 121 or equivalent.

CHN 350. Gender and Sexuality in Traditional Chinese Literature. 4 Credits.

Examines the changing constructions of gender and sexuality in premodern China. Topics include arranged marriage and concubinage, attitudes toward the body and transgender identities. No background in Chinese necessary; readings in English.

Prereq: WR 121 or equivalent.

CHN 351. Gender and Sexuality in Modern Chinese Literature. 4 Credits.

Primary and secondary works about women, sexuality, and changing gender roles in republican, socialist, and post-Mao China. Readings in English.

Prereq: WR 121 or equivalent.

CHN 380. Self and Society in Traditional Chinese Literature. 4 Credits.

Examines the role of the self in premodern Chinese society through reading some of the most important works in traditional Chinese literature. Taught in Chinese.

Prereq: Proficiency in modern Chinese as confirmed by instructor.

CHN 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable. Topic varies from term to term.

CHN 399L. Special Studies: [Topic]. 4 Credits.

Repeatable. Topic varies from term to term.

CHN 400M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

CHN 401. Research: [Topic]. 1-21 Credits.

Repeatable.

CHN 403. Thesis. 1-6 Credits.

Repeatable for maximum of 6 credits.

CHN 405. Reading and Conference: [Topic]. 1-21 Credits.

Repeatable.

CHN 406. Field Studies: [Topic]. 1-21 Credits.

Repeatable.

CHN 407. Seminar: [Topic]. 1-4 Credits.

Studies and projects in Chinese literature, linguistics, or pedagogy. Sources are in Chinese, English, or both. Repeatable when topic changes.

CHN 408. Workshop: [Topic]. 1-21 Credits.

Repeatable.

CHN 409. Terminal Project. 1-12 Credits.

Repeatable.

CHN 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

CHN 413. Modern Chinese Texts: [Topic]. 1-4 Credits.

Readings and discussion in Chinese of Chinese modern literary and cultural texts. Topics change yearly. Repeatable once when topic changes, for maximum of 8 credits.

CHN 420. Intermediate Language Strategies. 4 Credits.

Focuses on topics in one of these areas: social sciences, sciences, and humanities. Sequence with CHN 421, CHN 422.

Prereq: CHN 303 or third-year Chinese language proficiency.

CHN 421. Intermediate Language Strategies. 4 Credits.

Focuses on topics in one of these areas: social sciences, sciences, and humanities. Sequence with CHN 420, CHN 422.

Prereq: CHN 303 or third-year Chinese language proficiency.

CHN 422. Intermediate Language Strategies. 4 Credits.

Focuses on topics in one of these areas: social sciences, sciences, and humanities. Sequence with CHN 420, CHN 421.

Prereq: CHN 303 or third-year Chinese language proficiency.

CHN 436. Literary Chinese. 4 Credits.

Readings in various styles and genres of classical Chinese literature; stress on major works of different periods. Preparation for research.

CHN 437. Literary Chinese. 4 Credits.

Readings in various styles and genres of classical Chinese literature; stress on major works of different periods. Preparation for research.

CHN 439. Chinese Academic Writing. 4 Credits.

Expansion of skills in formal written Chinese to communicate with native speakers about thoughts and professional knowledge. Repeatable three times for a maximum of 16 credits.

Prereq: CHN 420.

CHN 445. Advanced Chinese: [Topic]. 4 Credits.

Focuses on group and individual language study on a specific topic, such as cultural geography of China, religious studies, or business. Repeatable twice for a maximum of 12 credits.

Prereq: CHN 422.

CHN 452. Chinese Film and Theory. 4 Credits.

Examines Chinese film and film theory. Focuses on Chinese film in cultural debate and in the international film arena.

CHN 480. Chinese Linguistics. 4 Credits.

Introduces students to various linguistic levels of Chinese; covers basic concepts and methodologies of linguistic analysis, including the relationship between language structure, culture, and cognition.

CHN 481. Pedagogical Grammar of Chinese. 4 Credits.

Introduces students to theoretically grounded pedagogical approaches to Chinese as a foreign language. Topics include theoretical models, tones, characters, morphology, syntactic construction, and discourse pragmatics.

CHN 482. History of the Chinese Language. 4 Credits.

Introduction to the various stages of the historical development of the Chinese language family. Offered alternate years.

CHN 500M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

CHN 503. Thesis. 1-6 Credits.

Repeatable.

CHN 507. Seminar: [Topic]. 1-4 Credits.

Studies and projects in Chinese literature, linguistics, or pedagogy. Sources are in Chinese, English, or both. Repeatable when topic changes.

CHN 508. Workshop: [Topic]. 1-21 Credits.

Repeatable.

CHN 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

CHN 513. Modern Chinese Texts: [Topic]. 4 Credits.

Readings and discussion in Chinese of Chinese modern literary and cultural texts. Topics change yearly. Repeatable once when topic changes, for maximum of 8 credits.

CHN 520. Intermediate Language Strategies. 4 Credits.

Focuses on group and individual language study that is typically correlated with a specific content course concerning China or other Chinese-speaking areas. Sequence with CHN 521, CHN 522.

CHN 521. Intermediate Language Strategies. 4 Credits.

Focuses on group and individual language study that is typically correlated with a specific content course concerning China or other Chinese-speaking areas. Sequence with CHN 520, CHN 522.

CHN 522. Intermediate Language Strategies. 4 Credits.

Focuses on group and individual language study that is typically correlated with a specific content course concerning China or other Chinese-speaking areas. Sequence with CHN 520, CHN 521.

CHN 536. Literary Chinese. 4 Credits.

Readings in various styles and genres of classical Chinese literature; stress on major works of different periods. Preparation for research.

CHN 537. Literary Chinese. 4 Credits.

Readings in various styles and genres of classical Chinese literature; stress on major works of different periods. Preparation for research.

CHN 539. Chinese Academic Writing. 4 Credits.

Expansion of skills in formal written Chinese to communicate with native speakers about thoughts and professional knowledge. Repeatable thrice for a maximum of 16 credits when topic changes.

Prereq: CHN 520.

CHN 545. Advanced Chinese: [Topic]. 4 Credits.

Focuses on group and individual language study on a specific topic, such as cultural geography of China, religious studies, or business. Repeatable twice for a maximum of 12 credits.

CHN 552. Chinese Film and Theory. 4 Credits.

Examines Chinese film and film theory. Focuses on Chinese film in cultural debate and in the international film arena.

CHN 580. Chinese Linguistics. 4 Credits.

Introduces students to various linguistic levels of Chinese; covers basic concepts and methodologies of linguistic analysis, including the relationship between language structure, culture, and cognition.

CHN 581. Pedagogical Grammar of Chinese. 4 Credits.

Introduces students to theoretically grounded pedagogical approaches to Chinese as a foreign language. Topics include theoretical models, tones, characters, morphology, syntactic construction, and discourse pragmatics.

CHN 582. History of the Chinese Language. 4 Credits.

Introduction to the various stages of the historical development of the Chinese language family. Offered alternate years.

CHN 601. Research: [Topic]. 1-10 Credits.

Repeatable.

CHN 602. Supervised College Teaching. 1-16 Credits.

Repeatable.

CHN 603. Dissertation. 1-16 Credits.

Repeatable.

CHN 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable as student projects warrant.

CHN 606. Field Studies: [Topic]. 1-16 Credits.

Repeatable.

CHN 607. Seminar: [Topic]. 1-6 Credits.

Studies and projects in Chinese literature, linguistics, or pedagogy. Sources in Chinese, English, or both. Repeatable when topic changes.

CHN 609. Terminal Project. 1-12 Credits.

Repeatable.

CHN 623. Early Chinese Literature. 5 Credits.

Explores scholarship on and questions raised about early Chinese literary forms; examines notions of ritual, manuscript culture, history, and narrative.

CHN 624. Medieval and Late Imperial Chinese Literature. 5 Credits.

Explores methodological and disciplinary debates central to the study of medieval Chinese literature.

CHN 625. Modern Chinese Literature. 5 Credits.

Introduces some of the major issues, topics and debates in the field of modern Chinese literary studies in the English-speaking academy by surveying a select group of texts by prominent scholars. Concerns include literary form, modernity, revolution, and gender and sexuality.

East Asian Languages and Literatures Courses

EALL 196. Field Studies: [Topic]. 1-2 Credits.

Repeatable.

EALL 198. Workshop: [Topic]. 1-2 Credits.

Repeatable.

EALL 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

EALL 209. Languages and Societies in East Asia. 4 Credits.

Introduction to languages and societies in East Asia. Topics include the structure of Chinese, Japanese, and Korean; politeness; intercultural communication; writing; minority and immigrant communities. Taught in English.

EALL 211. Japan: A Cultural Odyssey. 4 Credits.

Introduction to distinctive features of Japan's linguistic, literary, artistic, and religio-philosophical heritage. Includes guest lectures, films.

EALL 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

EALL 401. Research: [Topic]. 1-21 Credits.

Repeatable.

EALL 402. Supervised Tutoring. 1-12 Credits.

Repeatable.

EALL 405. Reading and Conference: [Topic]. 1-21 Credits.

Repeatable.

EALL 406. Field Studies: [Topic]. 1-21 Credits.

Repeatable.

EALL 407. Seminar: [Topic]. 1-4 Credits.

Repeatable.

EALL 408. Workshop: [Topic]. 1-21 Credits.

Repeatable.

EALL 409. Terminal Project. 1-12 Credits.

Repeatable.

EALL 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

EALL 442. Second-Language Acquisition. 4 Credits.

Analyzes how important theories and concepts in second-language acquisition apply specifically to the learning of Chinese, Japanese, and Korean.

EALL 443. Chinese, Japanese, and Korean Pedagogy. 4 Credits.

Advanced language pedagogy; includes investigation of issues pertinent to the teaching of East Asian languages.

Prereq: CHN 303, JPN 303, or KRN 303.

EALL 460. Teaching East Asian Languages and Literatures at College Level. 2 Credits.

Training in Chinese and Japanese language instruction through lectures, observations, and teaching practicums. Repeatable thrice for maximum of 8 credits.

EALL 507. Seminar: [Topic]. 1-4 Credits.

Repeatable.

EALL 508. Workshop: [Topic]. 1-21 Credits.

Repeatable.

EALL 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

EALL 542. Second-Language Acquisition. 4 Credits.

Analyzes how important theories and concepts in second-language acquisition apply specifically to the learning of Chinese, Japanese, and Korean.

EALL 543. Chinese, Japanese, and Korean Pedagogy. 4 Credits.

Advanced language pedagogy; includes investigation of issues pertinent to the teaching of East Asian languages.

EALL 560. Teaching East Asian Languages and Literatures at College Level. 2 Credits.

Training in Chinese and Japanese language instruction through lectures, observations, and teaching practicums. Repeatable thrice for maximum of 8 credits.

EALL 601. Research: [Topic]. 1-10 Credits.

Repeatable.

EALL 603. Dissertation. 1-16 Credits.

Repeatable.

EALL 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

EALL 607. Seminar: [Topic]. 1-6 Credits.

Repeatable.

EALL 608. Workshop: [Topic]. 1-4 Credits.

Repeatable three times when topic changes for maximum of 12 credits.

EALL 609. Terminal Project. 1-12 Credits.

Repeatable.

EALL 611. Critical Approaches. 2 Credits.

Introduces recent research and methodologies in the fields of Chinese, Japanese and Korean traditional and modern literary, cultural, film, and linguistic studies.

EALL 680. Linguistics Research and Bibliography. 5 Credits.

Provides critical training in quantitative and qualitative methods and bibliography research in linguistics and language pedagogy.

Japanese Courses

JPN 101. First-Year Japanese. 5 Credits.

Provides thorough grounding in listening, speaking, reading, and writing Japanese. Special stress on aural-oral skills. For beginners or by placement.

JPN 102. First-Year Japanese. 5 Credits.

Provides thorough grounding in listening, speaking, reading, and writing Japanese. Special stress on aural-oral skills. For beginners or by placement.

Prereq: JPN 101 or equivalent.

JPN 103. First-Year Japanese. 5 Credits.

Provides thorough grounding in listening, speaking, reading, and writing Japanese. Special stress on aural-oral skills. For beginners or by placement.

Prereq: JPN 102 or equivalent.

JPN 196. Field Studies: [Topic]. 1-2 Credits.

Repeatable.

JPN 198. Workshop: [Topic]. 1-2 Credits.

Repeatable.

JPN 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

JPN 201. Second-Year Japanese. 5 Credits.

Additional training in oral-aural skills designed to build listening comprehension and fluency. Development of basic proficiency in reading and writing Japanese.

Prereq: JPN 103 or equivalent.

JPN 202. Second-Year Japanese. 5 Credits.

Additional training in oral-aural skills designed to build listening comprehension and fluency. Development of basic proficiency in reading and writing Japanese.

Prereq: JPN 201 or equivalent.

JPN 203. Second-Year Japanese. 5 Credits.

Additional training in oral-aural skills designed to build listening comprehension and fluency. Development of basic proficiency in reading and writing Japanese.

Prereq: JPN 202 or equivalent.

JPN 250. Manga Millennium. 4 Credits.

Surveys the 1,000-year history of visual-verbal narratives—comics—in Japan, ranging from medieval picture to modern manga.

JPN 301. Third-Year Japanese. 5 Credits.

Provides a solid foundation in listening, speaking, reading, and writing. Prepares students for advanced study.

Prereq: JPN 203 or equivalent.

JPN 302. Third-Year Japanese. 5 Credits.

Provides a solid foundation in listening, speaking, reading, and writing. Prepares students for advanced study.

Prereq: JPN 301 or equivalent.

JPN 303. Third-Year Japanese. 5 Credits.

Provides a solid foundation in listening, speaking, reading, and writing. Prepares students for advanced study.

Prereq: JPN 302 or equivalent.

JPN 305. Introduction to Japanese Literature. 4 Credits.

Historical survey of Japanese literature from the 8th century to the present. Analysis and appreciation of major works, genres, and authors such as "The Tale of Genji," Haiku, Kawabata, and Mishima. Readings in English.

Prereq: WR 121 or equivalent.

JPN 306. Introduction to Japanese Literature. 4 Credits.

Historical survey of Japanese literature from the 8th century to the present. Analysis and appreciation of major works, genres, and authors such as "The Tale of Genji," Haiku, Kawabata, and Mishima. Readings in English.

Prereq: WR 121 or equivalent.

JPN 307. Introduction to Japanese Literature. 4 Credits.

Historical survey of Japanese literature from the 8th century to the present. Analysis and appreciation of major works, genres, and authors such as "The Tale of Genji," Haiku, Kawabata, and Mishima. Readings in English.

Prereq: WR 121 or equivalent.

JPN 315. Introduction to Japanese Linguistics. 4 Credits.

Survey of general characteristics of the Japanese language in the aspects of sound structure, vocabulary, writing system, meaning, and sentence constructions. Offered alternate years.

Prereq: JPN 103.

JPN 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

JPN 401. Research: [Topic]. 1-4 Credits.

Repeatable for maximum of 12 credits.

JPN 403. Thesis. 1-6 Credits.

Repeatable for maximum of 6 credits.

JPN 405. Reading and Conference: [Topic]. 1-21 Credits.

Repeatable.

JPN 406. Field Studies: [Topic]. 1-21 Credits.

Repeatable.

JPN 407. Seminar: [Topic]. 1-4 Credits.

Studies and projects in Japanese literature or linguistics. Sources are in Japanese, English, or both. Repeatable when topic changes.

JPN 408. Workshop: [Topic]. 1-21 Credits.

Repeatable.

JPN 409. Terminal Project. 1-12 Credits.

Repeatable.

JPN 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

JPN 411. Fourth-Year Spoken Japanese. 4 Credits.

Development of speaking and listening skills related to concrete and abstract topics. Emphasis on sociolinguistic skills.

Prereq: JPN 303 or equivalent.

JPN 412. Fourth-Year Spoken Japanese. 4 Credits.

Development of speaking and listening skills related to concrete and abstract topics. Emphasis on sociolinguistic skills.

Prereq: JPN 411.

JPN 413. Fourth-Year Spoken Japanese. 4 Credits.

Development of speaking and listening skills related to concrete and abstract topics. Emphasis on sociolinguistic skills.

Prereq: JPN 412.

JPN 414. Fourth-Year Reading and Writing Japanese. 4 Credits.

Development of reading skills, vocabulary, and knowledge of kanji.

Writing exercises include message writing, letter writing, and short essays.

Prereq: JPN 303 or equivalent.

JPN 415. Fourth-Year Reading and Writing Japanese. 4 Credits.

Development of reading skills, vocabulary, and knowledge of kanji.

Writing exercises include message writing, letter writing, and short essays.

Prereq: JPN 414.

JPN 416. Fourth-Year Reading and Writing Japanese. 4 Credits.

Development of reading skills, vocabulary, and knowledge of kanji.

Writing exercises include message writing, letter writing, and short essays.

Prereq: JPN 415.

JPN 425. Modern Japanese Literature: [Topic]. 4 Credits.

Investigates topics relevant to Japanese literary studies in a comparative context. Recent topics include youth culture, postwar literature, digital-age stories. Repeatable twice when topic changes for maximum of 12 credits.

JPN 434. Advanced Readings in Japanese Literature. 4 Credits.

Reading modern Japanese literature in Japanese. Students acquire proficiency in reading, writing, and translation as well as knowledge of literature.

Prereq: JPN 416.

JPN 435. Advanced Readings in Japanese Literature. 4 Credits.

Reading modern Japanese literature in Japanese. Students acquire proficiency in reading, writing, and translation as well as knowledge of literature.

Prereq: JPN 434.

JPN 436. Advanced Readings in Japanese Literature. 4 Credits.

Reading modern Japanese literature in Japanese. Students acquire proficiency in reading, writing, and translation as well as knowledge of literature.

Prereq: JPN 435.

JPN 437. Classical Japanese Literary Language. 4 Credits.

Introduction to the basic principles and forms of classical Japanese literary language--style, syntax, and textuality. Selected readings of texts in classical Japanese from Nara through Edo periods.

Prereq: JPN 303.

JPN 455. Japanese Business Culture and Language. 4 Credits.

Provides extensive training in communication skills in all formats (oral and visual) in a business setting. The goal is a successful interview of local Japanese business people conducted in Japanese.

Prereq: JPN 303 or equivalent.

JPN 471. The Japanese Cinema. 4 Credits.

Major filmmakers and works are introduced. Comparative analysis of Japanese cinema as narrative form and artists' efforts to grapple with the Japanese experience of modernity. Readings, films, and discussions in English.

JPN 473. Japanese Environmental Cinema. 4 Credits.

Study of Japanese environmental cinema since the 1970s. Examines environmental themes and film genres. Readings, films, and discussion in English.

JPN 480. Early Modern Comics. 4 Credits.

Focuses on comic books in 18th and 19th century Japan and their place in the "floating world" of popular culture.

JPN 490. Translation and Japanese Literature. 4 Credits.

Explores the theory and practice of translation as it relates to Japanese literature. Students produce their own translations and critique existing translations.

Prereq: JPN 412 or JPN 416 or JPN 303.

JPN 503. Thesis. 1-6 Credits.

Repeatable.

JPN 507. Seminar: [Topic]. 1-4 Credits.

Studies and projects in Japanese literature or linguistics. Sources are in Japanese, English, or both. Repeatable when topic changes.

JPN 508. Workshop: [Topic]. 1-21 Credits.

Repeatable.

JPN 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

JPN 511. Fourth-Year Spoken Japanese. 4 Credits.

Development of speaking and listening skills related to concrete and abstract topics. Emphasis on sociolinguistic skills.

Prereq: JPN 303 or equivalent.

JPN 512. Fourth-Year Spoken Japanese. 4 Credits.

Development of speaking and listening skills related to concrete and abstract topics. Emphasis on sociolinguistic skills.

Prereq: JPN 511.

JPN 513. Fourth-Year Spoken Japanese. 4 Credits.

Development of speaking and listening skills related to concrete and abstract topics. Emphasis on sociolinguistic skills.

Prereq: JPN 512.

JPN 514. Fourth-Year Reading and Writing Japanese. 4 Credits.

Development of reading skills, vocabulary, and knowledge of kanji.

Writing exercises include message writing, letter writing, and short essays.

Prereq: JPN 303 or equivalent.

JPN 515. Fourth-Year Reading and Writing Japanese. 4 Credits.

Development of reading skills, vocabulary, and knowledge of kanji.

Writing exercises include message writing, letter writing, and short essays.

Prereq: JPN 514.

JPN 516. Fourth-Year Reading and Writing Japanese. 4 Credits.

Development of reading skills, vocabulary, and knowledge of kanji.

Writing exercises include message writing, letter writing, and short essays.

Prereq: JPN 515.

JPN 525. Modern Japanese Literature: [Topic]. 4 Credits.

Investigates topics relevant to Japanese literary studies in a comparative context. Recent topics include suicide and literature East and West, nations and resistance, atomic bomb literature. Repeatable twice when topic changes for maximum of 12 credits.

JPN 534. Advanced Readings in Japanese Literature. 4 Credits.

Reading modern Japanese literature in Japanese. Students acquire proficiency in reading, writing, and translation as well as knowledge of literature.

Prereq: JPN 516.

JPN 535. Advanced Readings in Japanese Literature. 4 Credits.

Reading modern Japanese literature in Japanese. Students acquire proficiency in reading, writing, and translation as well as knowledge of literature.

Prereq: JPN 534.

JPN 536. Advanced Readings in Japanese Literature. 4 Credits.

Reading modern Japanese literature in Japanese. Students acquire proficiency in reading, writing, and translation as well as knowledge of literature.

Prereq: JPN 535.

JPN 537. Classical Japanese Literary Language. 4 Credits.

Introduction to the basic principles and forms of classical Japanese literary language--style, syntax, and textuality. Selected readings of texts in classical Japanese from Nara through Edo periods.

Prereq: JPN 303 or equivalent.

JPN 571. The Japanese Cinema. 4 Credits.

Major filmmakers and works are introduced. Comparative analysis of Japanese cinema as narrative form and artists' efforts to grapple with the Japanese experience of modernity. Readings, films, and discussions in English.

JPN 573. Japanese Environmental Cinema. 4 Credits.

Study of Japanese environmental cinema since the 1970s. Examines environmental themes and film genres. Readings, films, and discussion in English.

JPN 580. Early Modern Comics. 4 Credits.

Focuses on comic books in 18th and 19th century Japan and their place in the "floating world" of popular culture.

JPN 590. Translation and Japanese Literature. 4 Credits.

Explores the theory and practice of translation as it relates to Japanese literature. Students produce their own translations and critique existing translations.

Prereq: JPN 512 or JPN 516.

JPN 601. Research: [Topic]. 1-10 Credits.

Repeatable.

JPN 602. Supervised College Teaching. 1-16 Credits.

Repeatable.

JPN 603. Dissertation. 1-16 Credits.

Repeatable.

JPN 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable as approved by the faculty.

JPN 606. Practicum: [Topic]. 1-4 Credits.

Repeatable for maximum of 18 credits.

JPN 607. Seminar: [Topic]. 1-6 Credits.

Studies and projects in Japanese literature, linguistics, or pedagogy.

Sources in Japanese, English, or both. Repeatable when topic changes.

JPN 609. Terminal Project. 1-12 Credits.

Repeatable.

JPN 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

Korean Courses

KRN 101. First-Year Korean. 5 Credits.

Introduction to basic Korean grammar, syllabary, conversation, and characters. Offered annually with KRN 201, KRN 202, KRN 203.

KRN 102. First-Year Korean. 5 Credits.

Introduction to basic Korean grammar, syllabary, conversation, and characters.

Prereq: KRN 101.

KRN 103. First-Year Korean. 5 Credits.

Introduction to basic Korean grammar, syllabary, conversation, and characters.

Prereq: KRN 102.

KRN 151M. Introduction to Korean Cinema. 4 Credits.

Surveys Korean national cinema, from the earliest days of the medium to the present. Multilisted with CINE 151M.

KRN 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

KRN 201. Second-Year Korean. 5 Credits.

Continued development of skills in speaking, reading, and writing Korean.

Introduction of additional characters. Offered annually with KRN 101, KRN 102, KRN 103.

Prereq: KRN 103 or equivalent.

KRN 202. Second-Year Korean. 5 Credits.

Continued development of skills in speaking, reading, and writing Korean.

Introduction of additional characters.

Prereq: KRN 201.

KRN 203. Second-Year Korean. 5 Credits.

Continued development of skills in speaking, reading, and writing Korean.

Introduction of additional characters.

Prereq: KRN 202.

KRN 301. Third Year Korean. 5 Credits.

Develops advanced language skills in Korean with focus on literary and cultural texts, writing, and oral skills. Sequence with KRN 302, KRN 303. Prereq: KRN 203

KRN 302. Third-Year Korean. 5 Credits.

Develops advanced language skills in Korean with focus on literary and cultural texts, writing, and oral skills. Sequence with KRN 301, KRN 303. Prereq: KRN 301.

KRN 303. Third-Year Korean. 5 Credits.

Develops advanced language skills in Korean with focus on literary and cultural texts, writing, and oral skills. Sequence with KRN 301, KRN 302. Prereq: KRN 302.

KRN 309. Languages and Cultural Formation in Korea. 4 Credits.

Examines the roles that languages and literacies played in the formation of Korean culture from a socio-historical linguistic perspective.

KRN 315. Introduction to Korean Linguistics. 4 Credits.

Surveys general characteristics of the Korean language and places them in their cultural and historical context.

Prereq: KRN 103.

KRN 361. Korean Popular Culture and Transnationalism. 4 Credits.

Explores contemporary South Korean popular culture in a global frame and key issues in cultural transnationalization.

KRN 362M. Contemporary Korean Film. 4 Credits.

Introduction to contemporary South Korean film. Explores changes in film culture, practice, and industry in relation to social changes since the early 1990s. Offered alternate years. Multilisted with CINE 362M.

KRN 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

KRN 403. Thesis. 1-6 Credits.

Repeatable for a maximum of 6 credits.

KRN 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

KRN 503. Thesis. 1-6 Credits.

Repeatable.

KRN 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

KRN 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

KRN 609. Terminal Project. 1-12 Credits.

Repeatable.

Bachelor of Arts in Chinese

The Department of East Asian Languages and Literatures offers undergraduate major programs in Chinese and Japanese languages and literatures. Each program enables students to achieve proficiency in reading, writing, and speaking the language and to acquire a fundamental knowledge of the literature and culture of the country. The Department also offers undergraduate minors in Chinese, Japanese, and Korean.

Prospective majors must meet with an East Asian languages and literatures faculty advisor when declaring the major, each spring to obtain the advisor's signature before fall term registration, and two terms before graduation.

The Bachelor of Arts in Chinese comes with three options: Culture-Intensive, Language-Intensive, and Linguistics-Intensive.

Bachelor of Arts in Chinese: Culture-Intensive Option

At least five of the required courses must be completed within the Department of East Asian Languages and Literatures.

Code	Title	Credits
CHN 301	Third-Year Chinese	5
CHN 302	Third-Year Chinese	5
CHN 303	Third-Year Chinese	5
Select four of the following, with two in upper division. These four courses must be taken in residence on the UO campus from the Department of East Asian Languages and Literatures.		16
CHN 150	Introduction to Chinese Narrative	
CHN 151	Introduction to Chinese Film	
CHN 152	Introduction to Chinese Popular Culture	
CHN 305	History of Chinese Literature	
CHN 306	History of Chinese Literature	
CHN 307	History of Chinese Literature	
CHN 308	Literature of Modern Taiwan	
Four upper-division courses ¹		16
Total Credits		47

¹ Courses must be in Chinese language, culture, literature, linguistics, film, or other advisor-approved areas taken from this or other departments. Of these, at least three must be from the Department of East Asian Languages and Literatures, with two having the CHN subject code. A third non-Chinese course chosen from within the department may also count toward the culture-intensive option.

Bachelor of Arts in Chinese: Language-Intensive Option

At least five of the required courses must be completed within the Department of East Asian Languages and Literatures.

Code	Title	Credits
CHN 301	Third-Year Chinese	5
CHN 302	Third-Year Chinese	5
CHN 303	Third-Year Chinese	5
Select three of the following:		12
CHN 305	History of Chinese Literature	
CHN 306	History of Chinese Literature	
CHN 307	History of Chinese Literature	
CHN 308	Literature of Modern Taiwan	
CHN 480	Chinese Linguistics	
CHN 436	Literary Chinese	4
CHN 437	Literary Chinese	4
Select three of the following:		12
CHN 411	Fourth-Year Chinese	
CHN 412	Fourth-Year Chinese	
CHN 413	Modern Chinese Texts: [Topic]	
CHN 439	Chinese Academic Writing	
Total Credits		47

Bachelor of Arts in Chinese: Linguistics-Intensive Option

Code	Title	Credits
CHN 301	Third-Year Chinese	5
CHN 302	Third-Year Chinese	5
CHN 303	Third-Year Chinese	5
Select two of the following:		8
CHN 411	Fourth-Year Chinese	
CHN 412	Fourth-Year Chinese	
CHN 413	Modern Chinese Texts: [Topic]	
CHN 420	Intermediate Language Strategies	
CHN 421	Intermediate Language Strategies	
CHN 422	Intermediate Language Strategies	
CHN 439	Chinese Academic Writing	
CHN 445	Advanced Chinese: [Topic]	
Select three of the following linguistics survey courses:		12
CHN 480	Chinese Linguistics	
CHN 482	History of the Chinese Language	
EALL 209	Languages and Societies in East Asia	
LING 301	Introduction to Linguistics Analysis	
Select two of the following:		8
CHN 481	Pedagogical Grammar of Chinese	
CHN 482	History of the Chinese Language	
CHN 436	Literary Chinese	
CHN 437	Literary Chinese	
EALL 442	Second-Language Acquisition	
EALL 443	Chinese, Japanese, and Korean Pedagogy	
EALL 407	Seminar: [Topic]	1-4
One advisor-approved elective in courses with the subject codes EALL, CHN, and LING		4
Total Credits		48-51

Four-Year Degree Plans

Sample Cultural-Intensive Option (p. 207)

Sample Language-Intensive Option (p. 208)

Sample Linguistics-Intensive Option (p. 209)

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Bachelor of Arts in Japanese

The Department of East Asian Languages and Literatures offers undergraduate major programs in Chinese and Japanese languages and literatures. Each program enables students to achieve proficiency in reading, writing, and speaking the language and to acquire a fundamental knowledge of the literature and culture of the country. The Department also offers undergraduate minors in Chinese, Japanese, and Korean.

Prospective majors must meet with an East Asian languages and literatures faculty advisor when declaring the major, each spring to obtain the advisor's signature before fall term registration, and two terms before graduation.

The Bachelor of Arts in Japanese comes with three options: Culture-Intensive, Language-Intensive, and Linguistics-Intensive.

Bachelor of Arts in Japanese: Culture-Intensive Option

At least five of the required courses must be completed within the Department of East Asian Languages and Literatures.

Code	Title	Credits
JPN 301	Third-Year Japanese	5
JPN 302	Third-Year Japanese	5
JPN 303	Third-Year Japanese	5
Select two of the following:		8
JPN 411	Fourth-Year Spoken Japanese	
JPN 412	Fourth-Year Spoken Japanese	
JPN 413	Fourth-Year Spoken Japanese	
JPN 414	Fourth-Year Reading and Writing Japanese	

JPN 415	Fourth-Year Reading and Writing Japanese	
JPN 416	Fourth-Year Reading and Writing Japanese	
JPN 434	Advanced Readings in Japanese Literature	
JPN 435	Advanced Readings in Japanese Literature	
JPN 436	Advanced Readings in Japanese Literature	
JPN 437	Classical Japanese Literary Language	
JPN 455	Japanese Business Culture and Language	
Select two of the following:		8
JPN 305	Introduction to Japanese Literature	
JPN 306	Introduction to Japanese Literature	
JPN 307	Introduction to Japanese Literature	
JPN 315	Introduction to Japanese Linguistics	
Four upper-division courses ¹		16
Total Credits		47

¹ Courses must be in Japanese culture, literature, linguistics, film, or other advisor-approved areas taken from this or other departments. Of these, at least three must be from the Department of East Asian Languages and Literatures, with two having the JPN subject code. A third non-JPN course chosen from within the department may also count toward the culture-intensive option.

Bachelor of Arts in Japanese: Language-Intensive Option

At least five of the required courses must be completed within the Department of East Asian Languages and Literatures.

Code	Title	Credits
JPN 301	Third-Year Japanese	5
JPN 302	Third-Year Japanese	5
JPN 303	Third-Year Japanese	5

Minors in East Asian Languages and Literatures

Minors

The East Asian Languages and Literatures department offers undergraduate minors in Chinese, Japanese, and Korean.

Minor in Chinese

The Chinese minor requires a minimum of six upper-division courses (24 graded credits), which must consist of at least three language courses, two courses in literature, linguistics, and/or culture, and a sixth course with a CHN or EALL subject code. At least three of the six courses must be taken in residence on the University of Oregon campus from the Department of East Asian Languages and Literatures.

Code	Title	Credits
Modern Chinese language—a minimum of three courses, at third-year level or higher, chosen from the following:		
CHN 301	Third-Year Chinese	
CHN 302	Third-Year Chinese	
CHN 303	Third-Year Chinese	
CHN 411	Fourth-Year Chinese	
CHN 412	Fourth-Year Chinese	
CHN 413	Modern Chinese Texts: [Topic]	
Culture, literature, film, linguistics—a minimum of two courses chosen from the following		
CHN 305	History of Chinese Literature	
CHN 306	History of Chinese Literature	
CHN 307	History of Chinese Literature	
CHN 308	Literature of Modern Taiwan	
CHN 480	Chinese Linguistics	

Upper-division language courses must be taken at the University of Oregon or through an Oregon University System program in China. Lower-division courses must be passed with grades of C– or better or P; upper-division courses must be passed with grades of C– or better.

Minor in Japanese

The Japanese minor requires a minimum of 6 upper-division courses (a minimum of 24 graded credits), which must consist of at least 3 language courses, 2 courses in literature, linguistics, and/or culture, and a sixth course that has any JPN or EALL subject code. At least three of the six

courses must be taken in residence on the University of Oregon campus from the Department of East Asian Languages and Literatures.

Code	Title	Credits
Japanese language—a minimum of three courses, at third-year level or higher, chosen from the following:		
JPN 301	Third-Year Japanese	
JPN 302	Third-Year Japanese	
JPN 303	Third-Year Japanese	
JPN 411	Fourth-Year Spoken Japanese	
JPN 412	Fourth-Year Spoken Japanese	
JPN 413	Fourth-Year Spoken Japanese	
JPN 414	Fourth-Year Reading and Writing Japanese	
JPN 415	Fourth-Year Reading and Writing Japanese	
JPN 416	Fourth-Year Reading and Writing Japanese	
JPN 434	Advanced Readings in Japanese Literature	
JPN 435	Advanced Readings in Japanese Literature	
JPN 436	Advanced Readings in Japanese Literature	
JPN 437	Classical Japanese Literary Language	
JPN 455	Japanese Business Culture and Language	
Culture, literature, film, linguistics—a minimum of two courses chosen from the following		
JPN 305	Introduction to Japanese Literature	
JPN 306	Introduction to Japanese Literature	
JPN 307	Introduction to Japanese Literature	
JPN 315	Introduction to Japanese Linguistics	

Upper-division language courses must be taken at the University of Oregon or through an Oregon University System program in Japan. Lower-division courses must be passed with grades of C– or better or P; upper-division courses must be passed with grades of C– or better.

Minor in Korean

The Korean minor requires a minimum of six upper-division courses (24 graded credits), which must consist of at least three language courses, two courses in literature, linguistics, and/or culture, and a sixth course with a KRN or EALL subject code. At least three of the six courses must be taken in residence on the University of Oregon campus from the Department of East Asian Languages and Literatures.

Code	Title	Credits
Korean language—a minimum of three courses, at third-year level or higher, chosen from the following:		
KRN 301	Third Year Korean	5
KRN 302	Third-Year Korean	5
KRN 303	Third-Year Korean	5
KRN 411	Fourth-Year Korean	4
KRN 412	Fourth-Year Korean	4
KRN 413	Fourth-Year Korean	4
Culture, literature, film, linguistics—a minimum of two courses chosen from the following:		
KRN 309	Languages and Cultural Formation in Korea	4
KRN 315	Introduction to Korean Linguistics	4

KRN 361	Korean Popular Culture and Transnationalism	4
---------	---	---

Upper-division language courses must be taken at the University of Oregon or through an Oregon University System program in Korea. Lower-division courses must be passed with grades of C– or better or P; upper-division courses must be passed with grades of C– or better.

Master of Arts in East Asian Languages and Literatures

The Department of East Asian Languages and Literatures offers programs of study leading to the degrees of master of arts (MA) and doctor of philosophy (PhD) in East Asian languages and literatures. Students may choose to specialize in Chinese Studies, Japanese Studies, Korean studies, or Linguistics.

In addition to departmental requirements, graduate students must fulfill the general requirements of the Division of Graduate Studies listed in that section of this catalog.

The Chinese, Japanese, and Korean studies programs, which prepare students to work in a variety of professional and academic fields, provide intensive training in linguistic and textual analysis and an extensive exposure to literary theory, film studies, and comparative and cultural studies. The department encourages students to develop their specialization in East Asian literatures and films in broader, more comparative, and more interdisciplinary and transnational perspectives than has been the case in traditional programs. The faculty's research and teaching interests cover the major fields, genres, and chronological divisions of Chinese, Japanese and Korean literature and film. They encourage creative connections and challenges to conventional disciplinary boundaries by exploring the relationships between literature-cinema and such areas as history, law, linguistics, politics, religion, philosophy, sociology, theater and the performing arts, and women's, gender, and sexuality studies.

Master of Arts in East Asian Languages and Literatures, Chinese Studies: Option One

This is the usual option for students seeking the MA degree in East Asian languages and literatures with a specialization in Chinese studies. It prepares students for study at the doctoral level.

Code	Title	Credits
CHN 623	Early Chinese Literature	5
CHN 624	Medieval and Late Imperial Chinese Literature	5
CHN 625	Modern Chinese Literature	5
EALL 611	Critical Approaches	2
Five seminars on Chinese subject matter (at least three with the CHN subject code)		20

Two graduate courses in linguistics, literary theory, or another literature (advisor approved); as appropriate, these courses may count toward the five Chinese seminars

One course in language pedagogy, Asian history, or another field relevant to student's career objectives (advisor approved); as appropriate, may count as one of the five Chinese seminars¹

CHN 503	Thesis ²	9
Total Credits		46

- 1 Reading and Conference: [Topic] (CHN 605) may be counted toward the fourteen required courses, with advisor approval.
- 2 Students who elect to write a thesis must register for this course.

Students must pass a comprehensive written examination at the end of study or write a master of arts thesis.

Master of Arts in East Asian Languages and Literatures, Chinese Studies: Option Two

A master's student may, in consultation with the student's advisor, apply for early entry to the PhD program. Such applications are typically made spring term but, in any event, after at least two terms at the university. Applications must include transcripts, three recommendations, and a statement of the student's prospective course of study. Students who elect this option are awarded the master's degree upon completion of the course work for the PhD degree. Students must pass a comprehensive oral examination that covers the student's primary areas of study.

Code	Title	Credits
CHN 623	Early Chinese Literature	5
CHN 624	Medieval and Late Imperial Chinese Literature	5
CHN 625	Modern Chinese Literature	5
EALL 611	Critical Approaches	2
Five seminars on Chinese subject matter (at least three with the CHN subject code)		20
Two graduate courses in linguistics, literary theory, or another literature (advisor approved); as appropriate, may count toward the five Chinese seminars		
One course in language pedagogy, Asian history, or another field relevant to student's career objectives (advisor approved); as appropriate, may count as one of the five Chinese seminars ¹		
Total Credits		37

- 1 Reading and Conference: [Topic] (CHN 605) may be counted toward the twelve required courses, with advisor approval.

Master of Arts in East Asian Languages and Literatures, Japanese Studies

The student takes 12 related to the field of Japanese studies:

Code	Title	Credits
Six courses in Japanese studies		24
Two courses in methodology-theory		8
Two East Asian-related courses, which may be taught outside of the department		8
Select one of the following:		4
JPN 537	Classical Japanese Literary Language	
JPN 534	Advanced Readings in Japanese Literature	
Course in the Japanese Global Scholars Program ¹		4
Total Credits		48

¹ For nonnative speakers of Japanese; native speakers of Japanese take an additional course in Japanese studies in place of this requirement.

In addition to the completion of the required courses, students must pass a comprehensive examination at the end of study or complete a master of arts thesis. The examination and degree-granting process differs for terminal MA students and for students who apply for continued study in the university's PhD program (see below).

Terminal MA Students in Japanese Studies

Those students who are not planning to go on to the PhD must successfully pass a **two-part written examination** based on the following reading list:

1. Approximately 20 works of Japanese literature and/or Japanese film, which should provide comprehensive coverage of major periods, writers, and genres of Japanese literature and/or film. The student's advisor will provide a model reading list.
2. Approximately 10 works of general theory and criticism, based on the student's specialized area, which can be outside the area of Japanese studies.
3. Approximately 10 works in a specialized area of the student's own choosing.

The first part of the exam shall include questions pertaining to broad issues in the field of Japanese literature and film deriving from section one of the student's reading list. The second part of the exam, to be administered a week later, shall cover more specialized questions deriving from sections two and three of the student's reading list. The student shall have forty-eight hours for each part to produce the final typed, double-spaced exams of approximately ten to twelve pages each.

The faculty committee administering the examination shall determine whether the student has successfully fulfilled the requirements for the MA degree, and shall confer one of the following grades: *distinction*, *clear pass*, *marginal pass*, or *failure*. Should the advisor determine that the candidate has not been successful, he or she may recommend that the student be given one additional opportunity to pass the exam during the next academic term.

Consulting the advisor, the student can complete an MA thesis instead of passing a comprehensive examination at the end of study. Students who elect to write a thesis must register for 9 credits of Thesis (JPN 503). As in the case of students who take comprehensive examinations, the faculty committee shall determine whether the student has successfully fulfilled the requirements of the MA degree, and shall confer one of the following grades: *distinction*, *clear pass*, *marginal pass*, or *failure*. Should the committee determine that the candidate has not been successful, its members may recommend that the student be given additional time to revise the thesis or to pass the exam during the next academic term.

Master of Arts in East Asian Languages and Literatures, Korean Studies

The MA degree in East Asian Languages and Literatures with a specialization in Korean literature, film, and culture requires successful completion of a minimum of 12 graduate-level courses (at least 4 credits each). These courses must be chosen in consultation with the student's advisor.

Code	Title	Credits
	Three courses in the Korean sector	12
	Four Korea-related courses, which may be taught outside the department	16
	Five advisor-approved electives with the subject code EALL	20
Total Credits		48

In addition to completion of the required courses, students must pass a comprehensive examination at the end of study or write and defend a MA thesis.

Option 1: MA Comprehensive Exam

Students who choose to take a comprehensive exam must successfully pass a two-part written examination based on the following reading list:

1. Approximately 20 works of Korean literature and/or film, which should provide comprehensive coverage of major periods, writers, and genres of Korean literature and/or film. The student's advisor will provide a model reading list.
2. Approximately 10 works of general theory and criticism, based on the student's specialized area, which can be outside of the area of Korean studies.
3. Approximately 10 works of a specialized area of the student's own choosing.

The first part of the exam shall include questions pertaining to broad issues in the field of Korean literature and/or film deriving from section one of the students' reading list. The second part of the exam, to be administered a week later, shall cover more specialized questions deriving from sections two and three of the student's reading list. The student shall have 48 hours for each part to produce the final typed, double-spaced exams of approximately 10 to 12 pages each.

Option 2: MA Thesis

Students who elect to write a thesis must register for 9 credits of Thesis (KRN 503).

Two terms before graduation, the student meets with the advisor during the first week of the term to set up a two-member committee and a schedule for submitting thesis or project drafts (e.g., the first week of winter term if planning to graduate spring term).

At least six weeks before the date of the thesis or project defense, the student submits a draft to the main advisor for approval. The advisor is expected to return comments within two weeks. Then, a continuing dialogue ensues between the student and advisor until the manuscript is considered complete. If approval is not obtained at this point, there is no guarantee that the student will be able to graduate that term.

The student submits a clean copy of the thesis or project to the advisor and committee members either two weeks before defense or four weeks before the filing date for an approved thesis as published by the Graduate School.

Master of Arts in East Asian Languages and Literatures, Linguistics and Language Pedagogy

This MA program offers a complete East Asian linguistics and pedagogy program, covering Chinese, Japanese, and Korean. Students may elect to specialize in Chinese, Japanese, or Korean linguistics and pedagogy.

EALL 543	Chinese, Japanese, and Korean Pedagogy	
EALL 680	Linguistics Research and Bibliography	
One course in Japanese pedagogical grammar		
Core Courses (Korean Focus)		
Choose four from the following:		16
EALL 541		
EALL 542	Second-Language Acquisition	
EALL 543	Chinese, Japanese, and Korean Pedagogy	
EALL 680	Linguistics Research and Bibliography	
One course in Korean pedagogical grammar		
Linguistics Electives		
Choose at least four of the following:		16
CHN 582	History of the Chinese Language	
CHN 507	Seminar: [Topic] (Figurative Language)	
EALL 507	Seminar: [Topic] (Sociophonetics)	
EALL 507	Seminar: [Topic] (Phonetics and Second-Language Acquisition)	
Open Electives		
Four advisor-approved courses in linguistics, literature, and languages with an EALL subject code		16

¹ Must be taken by all graduate students during first term.

Doctor of Philosophy in East Asian Languages and Literatures

The Department of East Asian Languages and Literatures offers programs of study leading to the degrees of master of arts (MA) and doctor of philosophy (PhD) in East Asian languages and literatures. Students may choose to specialize in Chinese, Japanese, or Korean studies.

In addition to departmental requirements, graduate students must fulfill the general requirements of the Division of Graduate Studies listed in that section of this catalog.

The Chinese, Japanese, and Korean studies programs, which prepare students to work in a variety of professional and academic fields, provide intensive training in linguistic and textual analysis and an extensive exposure to literary theory, film studies, and comparative and cultural studies. The department encourages students to develop their specialization in East Asian literatures and films in broader, more comparative, and more interdisciplinary and transnational perspectives

than has been the case in traditional programs. The faculty's research and teaching interests cover the major fields, genres, and chronological divisions of Chinese, Japanese and Korean literature and film. They encourage creative connections and challenges to conventional disciplinary boundaries by exploring the relationships between literature-cinema and such areas as history, law, linguistics, politics, religion, philosophy, sociology, theater and the performing arts, and women's, gender, and sexuality studies.

PhD in East Asian Languages and Literatures, Chinese Studies

The PhD degree in East Asian languages and literatures with a specialization in Chinese studies requires completion of a minimum of six 4-credit graduate-level courses beyond those required for the MA degree. Depending on the student's background or preparation at the time of admission to the PhD program, the number of required courses may be nine or twelve. Courses must be chosen in consultation with the student's advisor.

Code	Title	Credits
Six courses in Chinese literature, linguistics, or film		
CHN 623	Early Chinese Literature	5
CHN 624	Medieval and Late Imperial Chinese Literature	5
CHN 625	Modern Chinese Literature	5

Select one of the following:

Demonstrate the ability to use a second foreign language substantively in research or pass a translation examination in the language

Demonstrate advanced knowledge of a particular methodology or theory by taking three graduate-level courses, including one course in CHN 605 for which the student writes a paper applying the methodology to Chinese literature

Complete three courses in a secondary literature

¹ Or equivalents—unless the student has already taken these courses.

Other electives may be taken in linguistics, language teaching specialization, or psychology in consultation with an advisor.

Students in the PhD track must successfully complete a comprehensive examination and prospectus defense (culture students) or qualifying paper (linguistics students) to advance to candidacy (all but dissertation) status. By the end of their second year in the program (at the very latest), each student should identify a committee of three faculty members who will oversee their training for the comprehensive examination. Since each person's needs and interests may be different, students are expected to work closely with their primary advisor at all stages of the process.

PhD in East Asian Languages and Literatures, Japanese Studies

The PhD with a specialization in Japanese studies requires students to successfully complete nine graduate courses beyond the number required for the MA degree. These courses must be chosen in consultation with the student's advisor. Appropriate courses in related fields (e.g., Japanese history, religion) may be substituted with the advisor's approval.

Code	Title	Credits
Four courses in Japanese studies		
Two courses in methodology-theory, preferably in Japanese studies ¹		
Japanese linguistics or teaching methodology course		
Two courses chosen in consultation with advisor ¹		

¹ At least one of the two must be in EALL

Other electives may be taken outside the department in consultation with an advisor.

Students in the PhD track must successfully complete a comprehensive examination and prospectus defense (culture students) or qualifying paper (linguistics students) to advance to candidacy (all but dissertation) status. By the end of their second year in the program (at the very latest), each student should identify a committee of three faculty members who will oversee their training for the comprehensive examination. Since each person's needs and interests may be different, students are expected to work closely with their primary advisor at all stages of the process.

PhD in East Asian Languages and Literatures, Korean Studies

The PhD degree in East Asian languages and literatures with a specialization in Korean studies requires nine to twelve graduate-level courses depending on the student's background or preparation at the time

of admission to the PhD program. The program will be customized in consultation with the student's advisor.

PhD in East Asian Languages and Literatures, Linguistics

The PhD with a specialization in East Asian linguistics is designed to build a high level of competence in linguistics research in Chinese, Japanese, or Korean. The program has four components:

- Course work
- Comprehensive exam
- Qualifying paper
- Dissertation

A total of nine graduate courses beyond those at the MA level is required. Courses must be chosen in consultation with a doctoral advisor.

Code	Title	Credits
Choose three or more core courses in East Asian linguistics:		
CHN 580	Chinese Linguistics	
EALL 540	Japanese and Korean Phonetics	
EALL 541	Japanese and Korean Syntax	
EALL 680	Linguistics Research and Bibliography	
Choose three or more electives in East Asian linguistics:		
CHN 581	Pedagogical Grammar of Chinese	
CHN 582	History of the Chinese Language	
EALL 543	Chinese, Japanese, and Korean Pedagogy	
KRN 510	Experimental Course: [Topic]	
EALL 542	Second-Language Acquisition	

CHN 603	Dissertation
JPN 603	Dissertation

Other electives may be taken in linguistics, language teaching specialization, or psychology in consultation with an advisor.

Students in the PhD track must successfully complete a comprehensive examination and prospectus defense (culture students) or qualifying paper (linguistics students) to advance to candidacy (all but dissertation) status. By the end of their second year in the program (at the very latest), each student should identify a committee of three faculty members who will oversee their training for the comprehensive examination. Since each person's needs and interests may be different, students are expected to work closely with their primary advisor at all stages of the process.

Comprehensive Examination

The goal of the comprehensive examination is to ensure that students have received training broad enough to qualify as a teacher beyond the narrow research focus of their dissertation. The comprehensive examination is composed of a written and an oral component.

In conjunction with their primary advisor, students choose three fields, a major field and two minor fields, each to be advised by a faculty member in that area. Cultural fields may be determined by genre, time period, or methodology; linguistic fields may be determined by theoretical orientation, language orientation, and methodology. In conjunction with their advisors, students develop a reading list of twenty to forty items for each field. For culture students, these items may include both primary and secondary texts; the composition of each reading list will be tailored to the individual student's needs. It is expected that reading lists will develop organically from graduate seminars and readings and conferences.

For each field, the student will submit a comprehensive examination paper. The papers may be developed from a term paper written for a seminar or written for the sake of the examination, as determined by the advisor. These comprehensive examination papers should demonstrate the student's broad knowledge of a field. Ideally, for the major field, this paper will be the basis for a dissertation chapter. In some instances, students may be asked to develop a syllabus rather than write a research paper.

Advisors have two weeks to read and approve each comprehensive examination paper. After the three comprehensive examination papers have been approved by the field examiner and the primary advisor, the student schedules an oral examination. The oral examination (one to two hours in duration) is an opportunity for the three examiners to engage the student in an in-depth conversation about the items on the reading lists. The goal of the oral examination is to ensure that students have enough familiarity with both the critical and primary works in the field to teach at the postsecondary level. The oral examination is not open to the public.

Both parts of the comprehensive examination should be completed by the end of the student's third year in the program. It is at the discretion of the committee to determine if students should have a second opportunity to sit for an oral examination if the first attempt is not successful. At the discretion of the committee, those students whose performance is deemed unsatisfactory may be granted a terminal MA.

Prospectus (Culture Track)

Before scheduling the prospectus defense, students need to notify the graduate secretary of the membership of their dissertation committee (three faculty members from the department and one from another

department). The prospectus defense is the first meeting of the entire dissertation committee to provide feedback on the dissertation research project. The prospectus, a document of twenty to thirty pages, should introduce the research question, the methodology, and a basic outline of the dissertation; a bibliography is required. Once the advisors approve a draft of the dissertation prospectus, certifying that in their opinion the project is well-conceived and viable, the student schedules a meeting of the entire committee. A defense is an opportunity for the committee to ask questions and provide advice and direction for the research project. The prospectus defense is public.

In order to leave enough time for the dissertation research and writing, the prospectus defense should take place during the third year of study and no later than the winter term of the fourth year. Students who are unable to complete a viable prospectus by spring of their fourth year in the program will be granted a terminal MA.

Qualifying Paper (Linguistics Track)

As the equivalent of the prospectus defense for culture track students, linguistics students are expected to produce an original publishable paper, of substantial length and quality, in a subfield of linguistics. This qualifying paper should demonstrate the student's ability to carry out an empirical study and write an analytical research paper. The unmodified MA thesis cannot serve this purpose.

A committee consisting of the advisor and a second faculty member familiar with the subfield will referee the qualifying paper. The student may be asked to revise the qualifying paper before it is accepted as satisfactory work. Upon documented completion of the paper, the student needs to identify a dissertation committee (three faculty members from the department and one from another department) and notify the graduate secretary. The student then confirms the dissertation topic and presents a prospectus constituting a short abstract detailing their research topic. This should be done within one term of completing the qualifying paper. After the prospectus has been approved, the student will advance to candidacy.

To leave enough time for the dissertation research and writing, the qualifying paper and prospectus should be completed during the third year of study and no later than the winter term of the fourth year. Students who are unable to complete a viable qualifying paper by spring of their fourth year in the program will be granted a terminal MA.

Program Goals

The comprehensive examination is distinct from the dissertation prospectus or qualifying paper. The comprehensive examination papers and oral examination involve general preparation and give the student an opportunity to show broad knowledge of a field. The prospectus defense for culture-track students is more narrowly focused on the dissertation project and demonstrates the student's ability to identify and define a research project. Similarly, the qualifying paper for linguistics students is focused on the student's main research area and demonstrates the ability to undertake a research project. The comprehensive examination and prospectus defense or qualifying paper enable students to demonstrate that they can be successful as teachers and researchers. Students will advance to ABD (all but dissertation) status after the successful completion of both the comprehensive examination and the prospectus defense or qualifying paper, in addition to the completion of all required course work.

Dissertation

A dissertation committee is formed at least one month before the prospectus is presented for review and approval. This committee advises the student on writing the dissertation and approves the completed dissertation.

Students who have taken an MA comprehensive exam in Japanese studies do not need to take a PhD comprehensive exam. However, they need to defend their dissertation prospectus within one academic term after the completion of doctoral course work.

Economics

Jeremy Piger, Department Head

541-346-8845

435 Prince Lucien Campbell Hall

Economics addresses the problem of using scarce resources to satisfy society's unlimited wants. The discipline is divided into two general areas—microeconomics and macroeconomics. Microeconomics explores questions about the way society allocates resources; it applies to public policy in such areas as urban, industrial organization, and labor economics. Macroeconomics considers such questions as the causes of inflation and unemployment; it applies to such areas as monetary policy, development and international economics.

Faculty

Bruce A. Blonigen, Philip H. Knight Professor (international trade, industrial organization, applied econometrics); dean for faculty and operations, College of Arts and Sciences. BA, 1988, Gustavus Adolphus; MA, 1992, PhD, 1995, California, Davis. (1995)

Alfredo Burlando, associate professor (development, labor economics, industrial organization). BA, 2003, MA, 2003, California, Davis; PhD, 2010, Boston. (2010)

Jose Carreno, assistant professor (macroeconomics). BA, 2012, Castilla-La Mancha; M.Phil, 2014, CEMFI; MA, 2016, PhD 2020, Northwestern.

Shankha Chakraborty, professor (growth and development, macroeconomics). BS, 1992, Presidency; MA, 1994, Delhi School of Economics; PhD, 1999, California, Los Angeles. (1999)

Mark Colas, assistant professor (public economics and urban economics). BA, 2009, California, Davis; MS, 2013, PhD, 2017, Wisconsin, Madison. (2017)

Anca D. Cristea, associate professor (international economics, industrial organization, applied econometrics). BA, 2003, Babes-Bolyai; MA, 2005, Clemson; PhD, 2010, Purdue, West Lafayette. (2010)

Jonathan M. V. Davis, assistant professor (applied microeconomics, labor economics). BA, 2009, PhD, 2016, Chicago. (2018)

Timothy A. Duy, assistant professor with title of professor of practice (macroeconomics, monetary policy, international finance); director, Oregon Economic Forum. BA, 1991, Puget Sound; MS, PhD, 1998, Oregon. (2002)

Christopher J. Ellis, professor (applied economic theory, public economics, political economy). BA, 1978, Essex; MA, 1979, PhD, 1983, Warwick. (1983)

David Evans, assistant professor (macroeconomics, computational economics, public finance). BS, 2008, Stanford; PhD, 2015, New York. (2015)

George W. Evans, professor (econometrics, macroeconomics); John Hamacher Chair in Economics. BA, 1972, Oxford; BA, 1974, MA, 1976, PhD, 1980, California, Berkeley. (1994)

Benjamin Hansen, W. E. Miner Professor in Economics (labor economics, public economics, econometrics); associate professor. BA, 2004, Brigham Young; MA, 2005, PhD, 2009, California, Santa Barbara. (2010)

William T. Harbaugh, professor (public economics, behavioral economics, neuroeconomics). BS, 1983, MS, 1986, Montana State; PhD, 1995, Wisconsin, Madison. (1995)

Van Kolpin, professor (microeconomic theory, game theory, social choice theory). BA, 1982, Coe; MS, 1983, MA, 1984, PhD, 1986, Iowa. (1986)

Michael Kuhn, assistant professor (behavioral economics, labor, public finance). BA, 2009, California, Los Angeles; PhD, 2014, California, San Diego. (2014)

Grant R. McDermott, assistant professor (environmental and natural resource economics, applied econometrics, uncertainty and Bayesian learning), BS, 2004, Cape Town; MS, 2011, PhD, 2015, Norwegian School of Economics. (2017)

Bruce McGough, professor (macroeconomics). BA, 1991, Reed; MS, 1993, PhD, 2000, Oregon. (2012)

Keaton Miller, assistant professor (industrial organization, health economics, applied econometrics). BS, 2008, Wisconsin, Madison; PhD, 2015, Minnesota, Twin Cities. (2015)

Jeremy M. Piger, professor (macroeconomics, econometrics). BA, 1996, Seattle Pacific; MA, 1998, PhD, 2000, Washington (Seattle). (2006)

Edward A. Rubin, assistant professor (environmental and energy, development economics, econometrics and data science). BS, 2007, MS, 2013, Nebraska, Lincoln; MS, 2015, PhD, 2018, California, Berkeley. (2018)

Michael B. Urbancic, senior instructor (behavioral economics, experimental economics, economic history). BA, BA, BS, 2002, Arizona; MA, 2007, PhD, 2012, California, Berkeley. (2012)

Anne van den Nouweland, professor (game theory, microeconomic theory). BA, 1984, MA, 1989, Nijmegen; PhD, 1993, Tilburg. (1996)

Glen R. Waddell, professor (applied econometrics, industrial organization, labor economics). BS, 1995, Trent; MS, 1996, Miami; PhD, 2000, Purdue. (2001)

Woan Foong Wong, assistant professor (international economics, international trade). BA, 2009, Oberlin; MS, 2013, PhD, 2017, Wisconsin, Madison. (2017)

Jiabin Wu, assistant professor (experimental economics, behavior economics, political economy). BA, 2008, Hong Kong; MS, 2010, PhD, 2014, Wisconsin, Madison. (2014)

Eric Y. Zou, assistant professor (environmental economics, health economics). BS, 2012, East China Normal; MS, 2013, PhD, 2018, Illinois, Urbana-Champaign. (2018)

Emeriti

Trudy Ann Cameron, professor emerita. BA, 1977, British Columbia; PhD, 1982, Princeton. (2001)

Henry N. Goldstein, professor emeritus. BA, 1950, North Carolina, Chapel Hill; MS, 1953, PhD, 1967, Johns Hopkins. (1967)

Jo Anna Gray, professor emerita. BA, 1971, Rockford; AM, 1973, PhD, 1976, Chicago. (1989)

Stephen E. Haynes, professor emeritus. BA, 1968, PhD, 1976, California, Santa Barbara. (1978)

Peter J. Lambert, professor emeritus. PhD, 1971, Oxford. (2002)

Joe A. Stone, professor emeritus. BA, 1970, Texas, El Paso; MA, 1974, PhD, 1977, Michigan State. (1979)

Mark A. Thoma, professor emeritus. BA, 1980, California State, Chico; PhD, 1985, Washington State. (1987)

Wesley W. Wilson, professor emeritus. BS, BA, 1980, North Dakota; MA, 1984, PhD, 1986, Washington State. (1989)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

- Minor

Undergraduate Studies

The Department of Economics offers an undergraduate major leading to a bachelor's degree. Undergraduate courses in economics provide broad knowledge of the field as a part of the program of liberal education offered by the College of Arts and Sciences. They also lay a solid foundation in economics to students interested in professional graduate training in economics or in careers in business, law, government, or journalism.

For more detailed information, students are encouraged to visit the department website.

Preparation

Suggested preparation for freshman students is four years of high school mathematics. Prospective majors are strongly urged to satisfy part of their science group requirement with an introductory calculus sequence and the combination of mathematics and computer science required for the bachelor of science degree, to be taken in the freshman or sophomore year. Suggested preparation for second-year college transfer students is

1. the equivalents of EC 201 Introduction to Economic Analysis: Microeconomics and EC 202 Introduction to Economic Analysis: Macroeconomics and
2. the equivalents of MATH 251 Calculus I, MATH 252 Calculus II—or MATH 241 Calculus for Business and Social Science I, MATH 242 Calculus for Business and Social Science II for students not intending to pursue graduate training in economics—as well as MATH 243 Introduction to Methods of Probability and Statistics.

Career and Advising Services

The Career and Advising Services office in the Department of Economics provides academic planning and career development support for economics majors and minors. This includes advice about courses, minors, and concentrations, as well as assistance with résumés, job and internship search, and interviewing preparation. Career opportunities in economics include technical roles (actuarial, data analyst, financial analyst, researcher, consulting) as well as less technical roles (management, sales, human resources). Common employers include banks, financial institutions, government agencies, corporations, small businesses, and nonprofit organizations.

Online Economics Courses

Code	Title	Credits
EC 201	Introduction to Economic Analysis: Microeconomics	4
EC 202	Introduction to Economic Analysis: Macroeconomics	4
EC 313	Intermediate Macroeconomic Theory	4
EC 320	Introduction to Econometrics	4
EC 380	International Economic Issues	4
EC 421	Introduction to Econometrics	4

These courses are self-paced; the examinations are administered in the Social Sciences Instructional Laboratory for on-campus students and online for off-campus students. The courses, which must be completed within a standard ten-week term, are open to enrolled and community-education students and to high school students who want accredited university course work.

Careers

Career opportunities in economics are found in federal, state, and local government agencies; private industry; various nonprofit organizations; and journalism. A bachelor's degree in economics provides an excellent background for graduate admission in law, business, and public policy. Students with superior undergraduate academic records frequently go on to graduate work in economics, which leads to careers in higher education, economic research organizations in government, and private industry.

Advanced Options

Students interested in pursuing graduate work in economics, or who otherwise wish to pursue a more advanced track, may make any or all of the substitutions displayed to the standard requirements for the major.

Code	Title	Credits
EC 201 & EC 202	Introduction to Economic Analysis: Microeconomics and Introduction to Economic Analysis: Macroeconomics ¹	8
MATH 251–252 or MATH 261–262	Calculus I-II ² or Calculus with Theory I-II	8
EC 423–424	Econometrics ^{1,3}	8
EC 411 & EC 413	Advanced Microeconomic Theory and Advanced Macroeconomic Theory ^{4,5}	8
Economics courses numbered 300 or above ^{3,4}		28

Any upper-division mathematics course in statistics in place of MATH 243	4
--	---

- Should be completed by the end of the sophomore year.
- In place of Calculus for Business and Social Science I-II (MATH 241–242).
- In place of Introduction to Methods of Probability and Statistics (MATH 243), Introduction to Econometrics (EC 320), and Introduction to Econometrics (EC 421). Econometrics (EC 425) is recommended but not required. These can also count as 400-level field courses if one has already taken Introduction to Econometrics (EC 320) and Introduction to Econometrics (EC 421).
- Take either course or both courses in place of Intermediate Microeconomic Theory (EC 311) and Intermediate Macroeconomic Theory (EC 313). If Intermediate Microeconomic Theory (EC 311) and/or Intermediate Macroeconomic Theory (EC 313) have already been taken, these 400-level courses may be used as field courses. Should be completed by the end of the junior year.
- At least 28 of the 44 required upper-division credits required for the major must be taken at the University of Oregon.

Well prepared undergraduate Economics majors with Junior or Senior status are eligible to apply to the Accelerated Master's Degree Program in Economics (http://catalog.uoregon.edu/arts_sciences/economics/#graduatestudiesext).

Departmental Honors

Qualified students may apply to graduate with honors in economics. Two requirements must be met:

- Completion of upper-division economics courses with at least a 3.50 grade point average
- Completion of a research paper, written under the guidance of a faculty member, for 4 credits in EC 401 Research: [Topic]. A copy of the completed paper, approved by the faculty advisor, must be presented to the department by Friday of the week before final examinations during the term the student plans to graduate

Students interested in honors also should consider taking EC 418 Economic Analysis of Community Issues I and EC 419 Economic Analysis of Community Issues II. Instructor approval is required for EC 418–419. Students who intend to satisfy these requirements should notify the director of undergraduate studies early in the term in which they intend to graduate.

Kindergarten through Secondary Teaching Careers

Students who complete a degree in economics are eligible to apply to the College of Education's fifth-year licensure program in middle-secondary teaching or the fifth-year licensure program in elementary teaching. More information is available in the **College of Education** section of this catalog.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

- Doctor of Philosophy

Graduate Studies

The Department of Economics offers graduate work leading to the degrees of master of arts (MA), master of science (MS), and doctor of philosophy (PhD). Graduate fields include macroeconomics; applied econometrics; game theory; economic growth and development; industrial organization; and international, labor, public, environmental, and behavioral-experimental economics. A detailed description of degree requirements may be obtained from the department website.

General information about graduate work at the University of Oregon is available in the **Division of Graduate Studies** section of this catalog.

Applicants for admission must submit the following:

1. Scores on the general test of the Graduate Record Examinations (GRE), sent by the testing center
2. Letters of recommendation (2 for MA and MS applicants, 3 for PhD applicants)
3. Transcripts of course work sent by all previous degree-granting institutions

4. A brief statement of purpose or personal statement (optional for MA and MS applicants)
5. Curriculum vitae or résumé (optional for MA and MS applicants)

At minimum, doctoral applicants should have substantial knowledge of intermediate economic theory and of mathematics equivalent to:

Code	Title	Credits
EC 311	Intermediate Microeconomic Theory	4
EC 313	Intermediate Macroeconomic Theory	4
MATH 251	Calculus I	4
MATH 252	Calculus II	4
MATH 253	Calculus III	4
MATH 281	Several-Variable Calculus I	4
MATH 341	Elementary Linear Algebra	4
MATH 243 or MATH 425	Introduction to Methods of Probability and Statistics Statistical Methods I	4

Strong grades in economics and mathematics courses, in addition to scholarly potential, will be valued by the admissions committee.

Applicants whose native language is not English must also submit their scores on the Test of English as a Foreign Language Internet-Based Test or the International English Language Testing System examination. Applicants to the master's program may waive this requirement if they received a bachelor's degree from an accredited institution in the United States, Australia, Canada (excluding Quebec), Ireland, New Zealand, or the United Kingdom.

Master's Degree

The Department of Economics offers an intensive one-academic-year master's degree. Students gain applied skills in microeconomics, macroeconomics, and econometrics while specializing through elective courses. The program prepares students for consulting, applied research, and data science careers in private industry and government. The program also offers outstanding preparation for students interested in pursuing a PhD in economics.

The master's degree program consists of the following departmental requirements in addition to university and Division of Graduate Studies requirements for the master of arts (MA) or the master of science (MS) degree. Each master's degree candidate chooses either the course work or the research option. The department also offers an Accelerated Master's Program for well-prepared undergraduate Economics majors in their senior year. Students may apply to the program in either their junior or senior year.

Credit Requirements

The course work option requires a minimum of 48 graduate credits. The research option requires a minimum of 45 graduate credits if the candidate writes a research paper or a minimum of 51 graduate credits if the candidate writes a thesis.

Courses

EC 101. Contemporary Economic Issues. 4 Credits.

Examines contemporary public policy using economic principles. Topics may include balanced budgets and tax reform, unemployment, health care, poverty and income redistribution, environmental policy, and international trade policy.

EC 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

EC 201. Introduction to Economic Analysis: Microeconomics. 4 Credits.

Examines how consumers, firms, and governments make decisions when facing scarce resources and how those decisions affect market outcomes, such as prices and output. MATH 111 recommended.

EC 202. Introduction to Economic Analysis: Macroeconomics. 4 Credits.

Examines the aggregate activity of a market economy, the problems that arise, such as inflation and unemployment, and how the government can use macroeconomic policy to address these problems. EC 201 recommended.

EC 311. Intermediate Microeconomic Theory. 4 Credits.

Consumer and firm behavior, market structures. General equilibrium theory, welfare economics, collective choice, rules for evaluating economic policy. Students cannot receive credit for both EC 311 and FIN 311.

Prereq: EC 201, MATH 111.

EC 313. Intermediate Macroeconomic Theory. 4 Credits.

Determination of aggregate income, employment, and unemployment; evaluation of macroeconomic policies.

Prereq: EC 202, MATH 111; EC 311 strongly recommended.

EC 320. Introduction to Econometrics. 4 Credits.

Application of classical statistical techniques of estimation, hypothesis testing, and regression to economic models. Includes laboratory section in Social Science Instructional Laboratory.

Prereq: MATH 242, MATH 243.

EC 327. Introduction to Game Theory. 4 Credits.

Introductory course in game theory. Develops game-theoretic methods of rational decision making and equilibriums, using many in-class active games. Ellis.

Prereq: one from EC 101, EC 201.

EC 328. Behavioral Economics and Its Applications. 4 Credits.

This is an introductory course on behavioral economics, which brings together economics and psychology to understand human decision making in a wide range of real life applications.

Prereq: EC 201.

EC 330. Urban and Regional Economic Problems. 4 Credits.

Topics may include urban and metropolitan growth, land use, race and poverty, education systems, slums and urban renewal, transportation, crime, and pollution and environmental quality.

Prereq: EC 201.

EC 333. Resource and Environmental Economic Issues. 4 Credits.

Economic analysis of replenishable and nonreplenishable natural resources; environmental issues and policies.

Prereq: EC 201.

EC 340. Issues in Public Economics. 4 Credits.

Principles and problems of government financing. Expenditures, revenues, debt, and financial administration. Production by government versus production by the private sector. Tax measures to control externalities.

Prereq: EC 201.

EC 350. Labor Market Issues. 4 Credits.

Topics may include the changing structure of employment, the minimum wage, the dual labor market hypothesis, collective bargaining, discrimination, and health and safety regulation.

Prereq: EC 201.

EC 360. Issues in Industrial Organization. 4 Credits.

Topics may include analysis of market power, trends in industrial structure, the role of advertising, pricing policies and inflation, impact of social regulation (e.g., OSHA, EPA), and international comparisons.

Prereq: EC 201.

EC 370. Money and Banking. 4 Credits.

Operations of commercial banks, the Federal Reserve System, and the Treasury that affect the United States monetary system.

Prereq: EC 202.

EC 380. International Economic Issues. 4 Credits.

Exchange across international boundaries, theory of comparative advantage, balance of payments and adjustments, international financial movements, exchange rates and international financial institutions, trade restrictions and policy.

Prereq: EC 201.

EC 390. Problems and Issues in the Developing Economies. 4 Credits.

Topics may include the role of central planning, capital formation, population growth, agriculture, health and education, interaction between economic and cultural change, and the "North-South debate."

Prereq: EC 201.

EC 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

EC 400M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

EC 401. Research: [Topic]. 1-21 Credits.

Repeatable.

EC 404. Internship. 1-4 Credits.

Repeatable for maximum of 4 credits.

EC 405. Reading and Conference: [Topic]. 1-21 Credits.

Repeatable.

EC 407. Seminar: [Topic]. 1-5 Credits.

Repeatable only when the topic changes. Yearly offerings vary depending on interests and needs of students and on availability of faculty members.

EC 408. Workshop: [Topic]. 1-21 Credits.

Repeatable.

EC 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable only when the topic changes.

Prereq: EC 311; EC 313; one from EC 320, EC 423.

EC 411. Advanced Microeconomic Theory. 4 Credits.

Advanced theory of consumer and firm behavior, market structures.

Prereq: one from MATH 253, MATH 263.

EC 412. Foundations of Economic Policy Analysis. 4 Credits.

Advanced theoretical foundations of economic policy design and analysis.

Prereq: EC 411.

EC 413. Advanced Macroeconomic Theory. 4 Credits.

Advanced theory about the determination of aggregate income, employment, unemployment; evaluation of macroeconomic policies.

Prereq: one from MATH 253, MATH 263.

EC 418. Economic Analysis of Community Issues I. 2 Credits.

Hands-on experience applying economic analysis and econometrics to problems that face local community nonprofits and government agencies.

Prereq: EC 311, EC 313; one from EC 320, EC 423.

EC 419. Economic Analysis of Community Issues II. 4 Credits.

Hands-on experience applying economic analysis and econometrics to problems that face local community nonprofits and government agencies.

Prereq: EC 311, EC 320.

EC 421. Introduction to Econometrics. 4 Credits.

Application of classical statistical techniques of estimation, hypothesis testing, and regression to economic models.

Prereq: one from EC 320, EC 423.

EC 422. Economic Forecasting. 4 Credits.

Basic techniques of economic forecasting that are typically used in a business environment.

Prereq: one from EC 320, EC 423; coreq: one from EC 421, EC 424.

EC 423. Econometrics. 4 Credits.

Introductory topics in probability theory and statistical inference; regression problems of autocorrelation, heteroskedasticity, multicollinearity, and lagged dependent variables; special single-equation estimating techniques; the identification problem in a simultaneous equation setting; development of simultaneous equation estimating procedures.

Prereq: MATH 281, MATH 341; MATH 282 and MATH 461 strongly recommended.

EC 424. Econometrics. 4 Credits.

Introductory topics in probability theory and statistical inference; regression problems of autocorrelation, heteroskedasticity, multicollinearity, and lagged dependent variables; special single-equation estimating techniques; the identification problem in a simultaneous equation setting; development of simultaneous equation estimating procedures.

Prereq: one from EC 423, EC 523.

EC 425. Econometrics. 4 Credits.

Introductory topics in probability theory and statistical inference; regression problems of autocorrelation, heteroskedasticity, multicollinearity, and lagged dependent variables; special single-equation estimating techniques; the identification problem in a simultaneous equation setting; development of simultaneous equation estimating procedures.

Prereq: one from EC 424, EC 524.

EC 427. Games and Decisions. 4 Credits.

Game-theoretic methods of decision-making. Topics may include extensive-form games, noncredible threats, subgame perfect equilibrium, strategic-form games, undominated strategies, Nash equilibrium, coalitional games, and the core.

Prereq: EC 311; one from EC 320, EC 423.

EC 428. Behavioral and Experimental Economics. 4 Credits.

Investigates the "rational choice" model and behavioral alternatives, using laboratory experiments. Topics may include altruism, auctions, bargaining, behavioral finance, hyperbolic discounting, and decision-making under uncertainty.

Prereq: EC 311; one from EC 320, EC 423.

EC 430. Urban and Regional Economics. 4 Credits.

Location theory; urbanization and metropolitan growth; regional analysis; intraurban rent, location and land use, size distribution of urban areas; welfare economics, political economy, and urban problems.

Prereq: EC 311, FIN 311 or equiv; one from EC 320, EC 423.

EC 434. Environmental Economics. 4 Credits.

Introduction to the field that includes theoretical environmental policy, issues in environmental regulation, and empirical techniques used by practitioners.

Prereq: EC 311; one from EC 320, EC 423.

EC 435. Natural Resource Economics. 4 Credits.

Applications of economic theory and empirical methods to natural resources problems: ecosystems and renewable resources (land, water, fisheries, forests); exhaustible resources (energy, minerals).

Prereq: EC 311, EC 320.

EC 440. Public Economics. 4 Credits.

Theory of public goods and their optimal provision. Collective choice versus private choice and implications for resource allocation and efficiency.

Prereq: EC 311; one from EC 320, EC 423.

EC 443. Health Economics. 4 Credits.

Includes moral hazard and adverse selection; incentives faced by health care providers through reimbursement, managed care, and malpractice; rationale for government intervention in the health care sector.

Prereq: EC 311; one from EC 320, EC 423.

EC 448. Political Economy. 4 Credits.

Covers the economic problems that arise when the government is a self-interested actor in the economy. We study political agency, voting, the economic origins of political institutions and the size and number of nations.

Prereq: EC 311, EC 313, EC 320.

EC 450. Labor Economics. 4 Credits.

Supply and demand for labor, wage determination under various market structures, minimum wage and worker exploitation, human capital investments, labor market signaling and sorting, discrimination, uncertainty, and job matching.

Prereq: EC 311; one from EC 320, EC 423.

EC 451. Issues in Labor Economics. 4 Credits.

Topics may include the determination of wages, employment, and unemployment; globalization and immigration; income inequality; internal labor markets; the role of unions; human capital, education, and schools.

Prereq: EC 311; one from EC 320, EC 423.

EC 460. Theories of Industrial Organization. 4 Credits.

Theories, quantitative measures, and institutional descriptions of the structure, conduct, and results that characterize American industry. Emphasis is on the determinants and consequences of market power.

Prereq: EC 311; one from EC 320, EC 423.

EC 462. Economics of Transportation. 4 Credits.

Examines economic transportation issues and models, including regulation, demand-cost modeling, productivity analysis, random utility and choice modeling, and spatial economics.

Prereq: EC 311; one from EC 320, EC 423.

EC 470. Monetary Policy. 4 Credits.

Federal Reserve System strategies and methods of monetary and credit control. Effects of federal policies on prices, output, and employment.

Prereq: EC 313; one from EC 320, EC 423.

EC 471. Monetary Theory. 4 Credits.

Money creation, deficit finance, and taxation in monetary economies.

Topics may include the government budget constraint, causes and consequences of inflation, Richardian equivalence, and seigniorage.

Prereq: EC 311, EC 313; one from EC 320, EC 423.

EC 480. International Finance. 4 Credits.

Foreign exchange markets, interaction between spot and forward markets, speculation and interest arbitrage, balance-of-payments accounting, measures of deficits and surpluses, "open-economy" macroeconomic issues.

Prereq: EC 311, EC 313; one from EC 320, EC 423.

EC 481. International Trade. 4 Credits.

Theories of international trade, direction of trade flows, determination of prices and volumes in international trade, tariffs, quotas, customs unions, free versus restricted trade.

Prereq: EC 311; one from EC 320, EC 423.

EC 482. Economics of Globalization. 4 Credits.

Applications of economic theories and empirical methods to globalization issues: market integration of goods and factors, international labor and environmental standards, economic growth and income inequality, financial stability, global governance.

Prereq: EC 311, EC 320.

EC 484. Multinational Corporations. 4 Credits.

Economist's perspective of multinational corporations. Explores the policies governments use to influence corporate behavior and patterns of investment; taxation as a tool for implementing public policy.

Prereq: EC 311; one from EC 320, EC 423.

EC 490. Economic Growth and Development. 4 Credits.

Experience of developed countries and theories of development.

Analysis of specific development programs, role of agriculture, sources of investment, techniques and strategies of investment planning.

Prereq: EC 311, EC 313; one from EC 320, EC 423.

EC 491. Issues in Economic Growth and Development. 4 Credits.

Economic issues in developing countries, including use of central planning or markets, capital formation, agriculture, population growth, health and education systems, and the "North-South debate."

Prereq: EC 311, EC 313; one from EC 320, EC 423.

EC 503. Thesis. 1-16 Credits.

Repeatable.

EC 507. Seminar: [Topic]. 1-5 Credits.

Repeatable only when the topic changes. Yearly offerings vary depending on interests and needs of students and on availability of faculty members.

EC 508. Workshop: [Topic]. 1-21 Credits.

Repeatable.

EC 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable only when the topic changes.

EC 511. Advanced Microeconomic Theory. 4 Credits.

Advanced theory of consumer and firm behavior, market structures.

EC 512. Foundations of Economic Policy Analysis. 4 Credits.

Advanced theoretical foundations of economic policy design and analysis.

EC 513. Advanced Macroeconomic Theory. 4 Credits.

Advanced theory about the determination of aggregate income, employment, unemployment; evaluation of macroeconomic policies.

EC 522. Economic Forecasting. 4 Credits.

Basic techniques of economic forecasting that are typically used in a business environment.

EC 523. Econometrics. 4 Credits.

Introductory topics in probability theory and statistical inference; regression problems of autocorrelation, heteroskedasticity, multicollinearity, and lagged dependent variables; special single-equation estimating techniques; the identification problem in a simultaneous equation setting; development of simultaneous equation estimating procedures.

Prereq: MATH 281, MATH 341; MATH 282 and MATH 461 strongly recommended.

EC 524. Econometrics. 4 Credits.

Introductory topics in probability theory and statistical inference; regression problems of autocorrelation, heteroskedasticity, multicollinearity, and lagged dependent variables; special single-equation estimating techniques; the identification problem in a simultaneous equation setting; development of simultaneous equation estimating procedures.

Prereq: EC 523.

EC 525. Econometrics. 4 Credits.

Introductory topics in probability theory and statistical inference; regression problems of autocorrelation, heteroskedasticity, multicollinearity, and lagged dependent variables; special single-equation estimating techniques; the identification problem in a simultaneous equation setting; development of simultaneous equation estimating procedures.

Prereq: EC 524.

EC 527. Games and Decisions. 4 Credits.

Game-theoretic methods of decision-making. Topics may include extensive-form games, noncredible threats, subgame perfect equilibrium, strategic-form games, undominated strategies, Nash equilibrium, coalitional games, and the core.

EC 528. Behavioral and Experimental Economics. 4 Credits.

Investigates the "rational choice" model and behavioral alternatives, using laboratory experiments. Topics may include altruism, auctions, bargaining, behavioral finance, hyperbolic discounting, and decision-making under uncertainty.

EC 530. Urban and Regional Economics. 4 Credits.

Location theory; urbanization and metropolitan growth; regional analysis; intraurban rent, location and land use, size distribution of urban areas; welfare economics, political economy, and urban problems.

EC 534. Environmental Economics. 4 Credits.

Introduction to the field that includes theoretical environmental policy, issues in environmental regulation, and empirical techniques used by practitioners.

EC 535. Natural Resource Economics. 4 Credits.

Applications of economic theory and empirical methods to natural resources problems: ecosystems and renewable resources (land, water, fisheries, forests); exhaustible resources (energy, minerals).

EC 540. Public Economics. 4 Credits.

Theory of public goods and their optimal provision. Collective choice versus private choice and implications for resource allocation and efficiency.

Prereq: EC 311.

EC 543. Health Economics. 4 Credits.

Includes moral hazard and adverse selection; incentives faced by health-care providers through reimbursement, managed care, and malpractice; rationale for government intervention in the health-care sector.

EC 548. Political Economy. 4 Credits.

Covers the economic problems that arise when the government is a self-interested actor in the economy. We study political agency, voting, the economic origins of political institutions and the size and number of nations.

EC 550. Labor Economics. 4 Credits.

Supply and demand for labor, wage determination under various market structures, minimum wage and worker exploitation, human capital investments, labor market signaling and sorting, discrimination, uncertainty, and job matching.

EC 551. Issues in Labor Economics. 4 Credits.

Topics may include the determination of wages, employment, and unemployment; globalization and immigration; income inequality; internal labor markets; the role of unions; human capital, education, and schools.

EC 560. Theories of Industrial Organization. 4 Credits.

Theories, quantitative measures, and institutional descriptions of the structure, conduct, and results that characterize American industry. Emphasis is on the determinants and consequences of market power.

EC 562. Economics of Transportation. 4 Credits.

Examines economic transportation issues and models, including regulation, demand-cost modeling, productivity analysis, random utility and choice modeling, and spatial economics.

EC 571. Monetary Theory. 4 Credits.

Money creation, deficit finance, and taxation in monetary economies. Topics may include the government budget constraint, causes and consequences of inflation, Richardian equivalence, and seigniorage.

EC 580. International Finance. 4 Credits.

Foreign exchange markets, interaction between spot and forward markets, speculation and interest arbitrage, balance-of-payments accounting, measures of deficits and surpluses, "open-economy" macroeconomic issues.

EC 581. International Trade. 4 Credits.

Theories of international trade, direction of trade flows, determination of prices and volumes in international trade, tariffs, quotas, customs unions, free versus restricted trade.

EC 582. Economics of Globalization. 4 Credits.

Applications of economic theories and empirical methods to globalization issues: market integration of goods and factors, international labor and environmental standards, economic growth and income inequality, financial stability, global governance.

EC 584. Multinational Corporations. 4 Credits.

Economist's perspective of multinational corporations. Explores the policies governments use to influence corporate behavior and patterns of investment; taxation as a tool for implementing public policy.

EC 590. Economic Growth and Development. 4 Credits.

Experience of developed countries and theories of development. Analysis of specific development programs, role of agriculture, sources of investment, techniques and strategies of investment planning.

EC 591. Issues in Economic Growth and Development. 4 Credits.

Economic issues in developing countries, including use of central planning or markets, capital formation, agriculture, population growth, health and education systems, and the "North-South debate."

EC 601. Research: [Topic]. 1-16 Credits.

Repeatable.

EC 602. Supervised College Teaching. 1-5 Credits.

Repeatable.

EC 603. Dissertation. 1-16 Credits.

Repeatable.

EC 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

EC 606. Practicum: [Topic]. 1-16 Credits.

Repeatable. Graduate teaching fellows may earn 3 credits a term; available to other graduate students with department head's consent.

EC 607. Seminar: [Topic]. 1-5 Credits.

Repeatable. Recent topics are Econometrics, Game Theory, Labor Economics, and Public Finance.

EC 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

EC 609. Terminal Project. 1-12 Credits.

Repeatable.

Bachelor of Arts and Bachelor of Science in Economics

The Department of Economics offers an undergraduate major leading to a bachelor's degree. Undergraduate courses in economics provide broad knowledge of the field as a part of the program of liberal education offered by the College of Arts and Sciences. They also lay a solid foundation in economics to students interested in professional graduate training in economics or in careers in business, law, government, or journalism.

For more detailed information, students are encouraged to visit the department website.

Bachelor of Arts Degree Requirements

Code	Title	Credits
EC 201 & EC 202	Introduction to Economic Analysis: Microeconomics and Introduction to Economic Analysis: Macroeconomics ¹	8
MATH 241–242 or MATH 251– 252 or MATH 261– 262	Calculus for Business and Social Science I-II ¹	8
MATH 243	Introduction to Methods of Probability and Statistics ¹	4
EC 311 & EC 313	Intermediate Microeconomic Theory and Intermediate Macroeconomic Theory 2,3,4	8
EC 320 & EC 421 or EC 423– 424	Introduction to Econometrics and Introduction to Econometrics ^{2,3} Econometrics	8
Economics courses numbered 300 or above ^{3,5}		28

- ¹ Should be completed by the end of the sophomore year.
- ² Should be completed by the end of the junior year.
- ³ At least 28 of the 44 required upper-division credits required for the major (i.e., EC 311 Intermediate Microeconomic Theory, EC 313 Intermediate Macroeconomic Theory, EC 320 Introduction to Econometrics, EC 421 Introduction to Econometrics, and the 28 required field course credits) must be taken at the University of Oregon
- ⁴ Students cannot receive credit for both EC 311 and FIN 311.
- ⁵ At least 20 credits in courses numbered 400 or above. No more than 8 of the 28 credits may be in courses numbered 401, 404, 405, 407, or 408; no more than 2 credits in course numbered 407 may count toward the 8 of the 28 credits.

Grades of C– or better in courses taken to satisfy major requirements.

Bachelor of Science Degree Requirements

Code	Title	Credits
EC 201 & EC 202	Introduction to Economic Analysis: Microeconomics and Introduction to Economic Analysis: Macroeconomics ¹	8
MATH 241–242 or MATH 251– 252 or MATH 261– 262	Calculus for Business and Social Science I-II ¹	8
MATH 243	Introduction to Methods of Probability and Statistics ¹	4
EC 311 & EC 313	Intermediate Microeconomic Theory and Intermediate Macroeconomic Theory 2,3,4	8
EC 320 & EC 421 or EC 423– 424	Introduction to Econometrics and Introduction to Econometrics ^{2,3} Econometrics	8
Economics courses numbered 300 or above ^{3,5}		28

- ¹ Should be completed by the end of the sophomore year.
- ² Should be completed by the end of the junior year.
- ³ At least 28 of the 44 required upper-division credits required for the major (i.e., EC 311 Intermediate Microeconomic Theory, EC 313 Intermediate Macroeconomic Theory, EC 320 Introduction to Econometrics, EC 421 Introduction to Econometrics, and the 28 required field course credits) must be taken at the University of Oregon
- ⁴ Students cannot receive credit for both EC 311 and FIN 311.
- ⁵ At least 20 credits in courses numbered 400 or above. No more than 8 of the 28 credits may be in courses numbered 401, 404, 405, 407, or 408; no more than 2 credits in course numbered 407 may count toward the 8 of the 28 credits.

Grades of C– or better in courses taken to satisfy major requirements.

Courses Offered Pass/No Pass Only

Code	Title	Credits
EC 401	Research: [Topic]	1-21
EC 404	Internship	1-4
EC 405	Reading and Conference: [Topic]	1-21
EC 408	Workshop: [Topic]	1-21

EC 320 Introduction to Econometrics (or EC 423 Econometrics) is a prerequisite for almost all 400-level courses. EC 311 Intermediate Microeconomic Theory and sometimes EC 313 Intermediate Macroeconomic Theory are as well. Because MATH 242 Calculus for Business and Social Science II and MATH 243 Introduction to Methods of Probability and Statistics are prerequisites for EC 320 Introduction to Econometrics, it is important for students to take those courses early. See the course listings for details on prerequisites.

Minor in Economics

The Department of Economics offers an undergraduate major leading to a bachelor's degree. Undergraduate courses in economics provide broad knowledge of the field as a part of the program of liberal education offered by the College of Arts and Sciences. They also lay a solid foundation in economics to students interested in professional graduate training in economics or in careers in business, law, government, or journalism.

For more detailed information, students are encouraged to visit the department website.

Economics Minor

Code	Title	Credits
EC 201	Introduction to Economic Analysis: Microeconomics	4
EC 202	Introduction to Economic Analysis: Macroeconomics	4
EC 311	Intermediate Microeconomic Theory	4
EC 313	Intermediate Macroeconomic Theory	4
Two additional upper-division 4-credit courses in economics		8
Total Credits		24

Two of the four upper-division 4-credit courses must be taken from the UO economics department. Minor requirements cannot be satisfied with EC 401 Research: [Topic], EC 404 Internship, EC 405 Reading and Conference: [Topic], EC 407 Seminar: [Topic], or EC 408 Workshop: [Topic]. Courses applied to the economics minor must be completed with grades of C– or better.

Master of Arts and Master of Science in Economics

The Department of Economics offers graduate work leading to the degrees of master of arts (MA), master of science (MS), and doctor of philosophy (PhD). Graduate fields include macroeconomics; applied econometrics; game theory; economic growth and development; industrial organization; and international, labor, public, environmental, and behavioral-experimental economics. A detailed description of degree requirements may be obtained from the department website.

Master of Arts Degree Requirements

Code	Title	Credits
Core Courses		
EC 523–525	Econometrics ¹	12
EC 511	Advanced Microeconomic Theory ¹	4
EC 513	Advanced Macroeconomic Theory ¹	4
EC 512	Foundations of Economic Policy Analysis	4

Elective Economics Courses ²

Option 1: Course work

Six elective courses taken at the 500 level.

Option 2: Research

Four elective courses taken at the 500 level. ³

- ¹ To be completed by the end of the first full academic year.
- ² Excluding EC 503 Thesis. PhD students who transfer to the master's program and who have completed the micro- and macroeconomics core courses (EC 607 Seminar: [Topic]) may apply those courses to master's degree requirements.
- ³ No more than 5 credits in EC 601 Research: [Topic] may be applied to the 45-credit minimum for the research paper and no more than 9 credits in EC 503 Thesis may be applied to the 51-credit minimum for the thesis.

Master of Science Degree Requirements

Option 2: Research

Four elective courses taken at the 500 level. ³

- ¹ To be completed by the end of the first full academic year.
- ² Excluding EC 503 Thesis. PhD students who transfer to the master's program and who have completed the micro- and macroeconomics core courses (EC 607 Seminar: [Topic]) may apply those courses to master's degree requirements.
- ³ No more than 5 credits in EC 601 Research: [Topic] may be applied to the 45-credit minimum for the research paper and no more than 9 credits in EC 503 Thesis may be applied to the 51-credit minimum for the thesis.

The thesis or research paper, on a topic from the area of economics in which a 500-level field course was taken, must be approved by two department faculty members. The candidate's committee must have approved a prospectus for the thesis or research paper before the term in which the thesis or research paper is approved.

Courses taken to satisfy master's degree requirements (except EC 503 Thesis, EC 601 Research: [Topic], and EC 605 Reading and Conference: [Topic]) must be taken for letter grades and completed with at least a 3.00 cumulative grade point average. A GPA below the level of 3.00 at any time during a graduate student's studies or the accumulation of

more than 5 credits of N or F grades, regardless of GPA, is considered unsatisfactory and may lead to termination from the program.

Unless on-leave status has been approved, a student must attend the university continuously until all program requirements have been completed. The student must register for 3 graduate credits each term, excluding summer sessions, to be continuously enrolled. A minimum of 30 credits toward the master's degree must be taken in residence over a period of at least two terms.

Substitutions and Waivers

Substitutions of alternative courses or courses taken elsewhere require the joint approval of the master's program committee and the department head before they can be counted toward the credit minimum. Any other waivers or exceptions to departmental requirements require the approval of the department faculty.

Time Limits

Students who choose the course work option must complete all the master's degree requirements within three years. Students who choose the research option must complete all the master's degree requirements within five years.

The master's degree typically requires five to six terms of full-time work. A few well-qualified students have satisfied requirements for the degree in four terms.

DEGREE REQUIREMENTS

Students in the accelerated degree program must meet all degree requirements for both degrees.

A. Graded credit requirements:

Must the graduate-level courses taken while an undergraduate be taken for a letter grade and/or passed with a minimum grade to count toward the master's degree?

Yes, the graduate-level courses must be taken for a letter grade and passed with a minimum grade of "B" in order to count toward the master's degree.

B. Shared credit hour allowance:

List the maximum number of credits a student may use to fulfill requirements of both the bachelor's and master's degrees (maximum 16).

12

C. Which courses may count toward both the undergraduate and graduate degree, and what requirements will they fulfill for each degree?

Indicate whether only specific courses may count toward both degrees, or if there are categories of courses to choose from.

Students in the AMPED may choose any three courses from the list of all 500 level courses offered in a given year, with the exception of EC 503, 511, 513, 521, 523, 524, and 525. The courses will count as upper-division electives for the bachelor's degree, and as electives for the Master's degree.

D. List all courses that may not be shared (i.e., must be taken as a graduate student):

Culminating experiences (e.g., terminal project, capstone, etc.) may not be shared. An undergraduate thesis may not serve as a substitute for a master's thesis. See guidelines for details.

EC 503, EC 511, EC 513, EC 523, EC 524, EC 525

SAMPLE PLANS OF STUDY

Provide a sample plan of study for both the undergraduate (senior year) and graduate portions of the program. If proposing more than one combination of majors, provide a sample plan of study for each.

Sample Program of Study – Senior Year

Fall Quarter: EC 421, University Requirement, EC 4xx

Winter Quarter: EC 4xx, EC 4xx, EC 5xx

Spring Quarter: EC 4xx, EC 5xx, EC 5xx

Sample Program of Study – Master's Program

Fall Quarter: EC 523, EC 511, EC 513

Winter Quarter: EC 524, EC 5xx elective, EC 5xx elective

Spring Quarter: EC 525, EC 5xx elective, EC 5xx elective

Doctor of Philosophy in Economics

The Department of Economics offers graduate work leading to the degrees of master of arts (MA), master of science (MS), and doctor of philosophy (PhD). Graduate fields include macroeconomics; applied econometrics; game theory; economic growth and development; industrial organization; and international, labor, public, environmental, and behavioral-experimental economics. A detailed description of degree requirements may be obtained from the department website.

General information about graduate work at the University of Oregon is available in the **Graduate School** section of this catalog.

Doctor of Philosophy Degree Requirements

A PhD in economics prepares students to teach at liberal arts and research universities; to work in state, federal, and international organizations; and to conduct research or work as a consultant for private industry. Graduate students seeking the PhD degree in economics at the University of Oregon must complete the following departmental requirements as well as all university requirements. Except for EC 601 Research: [Topic], EC 603 Dissertation, EC 605 Reading and Conference: [Topic], and EC 606 Practicum: [Topic], economics courses must be taken for letter grades.

Code	Title	Credits
EC 607	Seminar: [Topic] (Core Microeconomic Theory (Three Terms)) ¹	1-5
EC 607	Seminar: [Topic] (Core Macroeconomic Theory (Three Terms)) ¹	1-5
EC 607	Seminar: [Topic] (Core Econometrics (Three Terms)) ¹	1-5
EC 607	Seminar: [Topic] (two-term sequences) ²	1-5

EC 601	Research: [Topic] ³	6
EC 607	Seminar: [Topic] (five courses) ⁴	1-5
EC 603	Dissertation ⁴	18

¹ Students who complete these courses with a GPA of 2.90 or higher will be invited to take the qualifying examination in microeconomic and macroeconomic theory when it is offered in early summer. Records of students whose GPA is lower than 2.90 are evaluated to determine eligibility for the qualifying examination. Students who fail the qualifying examination may be asked to retake it early the following September. Students who pass the qualifying examination but have a GPA less than 3.00 in econometrics must take a competency examination in econometrics, which is administered the Thursday before the first week of fall classes. Students who fail the competency examination must retake each econometrics course in which they received a grade of less than B and pass it with a grade of B or better. Students must file an approved program of study by December 15 following the qualifying examination.

² Sequences in two fields of economics must be completed with a 3.00 GPA or better. Credit for Research: [Topic] (EC 601), Dissertation (EC 603), Reading and Conference: [Topic] (EC 605), or Practicum: [Topic] (EC 606) cannot be counted toward the field requirement.

³ By winter term of the third year, a research paper for at least 6 credits must be completed in one of the fields and approved by two members of the faculty with specialties in that field

⁴ Must be taken outside the two fields of economics previously chosen and completed with a 3.00 GPA or better. Credit for Research: [Topic] (EC 601), Dissertation (EC 603), Reading and Conference: [Topic] (EC 605), or Practicum: [Topic] (EC 606) cannot be counted toward the field requirement. Advancement to candidacy may be requested after the student has completed the above requirements and orally defended a prospectus for the dissertation, which must include a minimum of 6 credits in Research: [Topic] (EC 601). Students must be enrolled for at least 3 credits during the term of advancement.

⁵ The dissertation must be a significant contribution to the field and must be completed in conjunction with at least 18 credits of Dissertation (EC 603). A formal, public defense must take place on the UO campus at a date set by the committee chair and approved by the Division of Graduate Studies.

Time Limits

The seven-year time limit for completion of PhD degree requirements begins with the first term of admission—either conditional or unconditional—as a doctoral student at the university. The required year of residency on the Eugene campus, passing of comprehensive examinations for advancement to candidacy, and completion of the doctoral dissertation must all be accomplished within this seven-year limit.

Courses other than those described above and courses taken elsewhere may not be substituted without approval of the PhD program committee and the department head. In no instance can the qualifying examination be waived.

Students in the PhD program may apply to be awarded a master's degree upon completion of the master's program requirements and the approval of the master's program advisor.

Detailed information is given on the department's website.

English

Mark Whalan, Department Head

541-346-1509 fax

118 Prince Lucien Campbell Hall

1286 University of Oregon

Eugene, Oregon 97403-1286

With nearly 50 full-time faculty members, the Department of English offers students a broad foundation in traditional British, American, and Anglophone literary studies, as well as intensive course work in interdisciplinary studies, emerging media, and current critical methodologies. Its lower-division courses provide training in writing and introduce the student to literature as a humanistic discipline. Its upper-division courses emphasize the humanistic values that emerge from studying literature and allied disciplines analytically and in depth.

Careers

The study of English opens doors to many careers. All fields of endeavor place high value on the ability to read intelligently and to write clearly. The English major may lead most directly to careers in education, journalism, or communications; it is also highly regarded as undergraduate training for law, government, social work, community service, and business. Indeed, the ability to handle the language with clarity and cogency is the skill most frequently cited by business professionals as desirable. A major in English, with judiciously selected electives, prepares students not only to find that essential first job but also to possess the breadth of outlook and depth of perspective that become increasingly important in subsequent phases of their careers. A student preparing for graduate study in English should construct an appropriate course of undergraduate study in consultation with a faculty advisor.

Expository Writing

The English department offers required and elective courses in expository writing for all university students to help them improve their ability to write clearly and effectively. Students must fulfill the university writing requirement of two composition courses or be cleared according to established waiver and exemption policies. The requirement is College Composition I (WR 121) and either College Composition II (WR 122) or College Composition III (WR 123), or their approved equivalents. Students should complete the writing requirement—with course work, by exemption, or by waiver examination—early in their studies.

Exemptions

Scores of 37 or better on the new College Board SAT Reading and Writing tests waive the need to take College Composition I (WR 121). No credit is given for this waiver. A score of 710 or better on the old SAT Critical Reading test (650 prior to 1995) or 32 or better on the ACT English test will also waive WR 121 (without credit). A score of 3, 4, or 5 on the Advanced Placement (AP) Language and Composition Examination produces credit for WR 121.

Waiver Examinations

Waiver examinations for College Composition I (WR 121) and College Composition II (WR 122) are offered during the first week of classes, fall through spring terms, at the UO Testing Office, 238 University Health, Counseling, and Testing Center Building; call 541-346-3230. Visit the Testing Office website (<http://testing.uoregon.edu/PlacementTesting/>)

WritingPlacement/WritingWaiverExam/tabid/79/Default.aspx) to sign up for an examination. No credit is awarded for waiver examinations, and students may not take waiver examinations for both courses in the same term. The essay exams are graded pass/no pass by three members of the Department of English composition committee. Students who do not pass may not retake the examination and should register for the appropriate writing course as soon as possible. Students who pass the exam have an "exemption by exam" notation for either College Composition I (WR 121) or College Composition II (WR 122) placed on their degree audit. Waiver exams are not returned to students, nor are they used as a teaching device. Additional help and special tutoring are available to students through the University Teaching and Learning Center.

Placement

Students for whom English is the native language are placed in their first writing course based on their SAT or ACT verbal scores. Students whose scores fall below 26 on the new SAT Reading and Writing tests, below 480 on the old SAT Verbal, or below 19 on the ACT are eligible for concurrent enrollment in Writing Tutorial (WR 195) WR 195)WR 195)WR 195) with College Composition I (WR 121).

Nonnative Speakers

Students for whom English is not the native or primary language are placed in their first writing course on the basis of a placement test. These may include Introductory Academic Writing (AEIS 110), Intermediate Academic Writing (AEIS 111), and Advanced Academic Writing (AEIS 112) (taught in the Department of Linguistics). Placement tests are administered before registration. Nonnative speakers should inquire at the American English Institute, 107 Pacific Hall, for placement test dates.

Transfer Students

Transfer students in doubt about the equivalency of courses taken elsewhere should bring transcripts and catalog descriptions to the composition office, Department of English, for evaluation.

Faculty

Faith Barter, assistant professor (19th-century African American literature). AB, 2001, Dartmouth College; JD, 2007, American; MA, 2012, PhD, 2016, Vanderbilt. (2018)

Martha J. Bayless, professor (medieval literature). BA, 1980, Bryn Mawr; MA, 1984, PhD, 1990, Cambridge. (1989)

Carolyn Bergquist, senior lecturer (Renaissance literature; rhetoric and composition). BA, 1994, California State, Stanislaus; MA, 1996, PhD, 2003, Oregon. (2003)

Elizabeth A. Bohls, professor (18th-century literature), associate department head. BA, 1979, Mount Holyoke College; PhD, 1989, Stanford. (1998)

Tina Boscha, senior instructor (composition). BA, 1995, Calvin College; MFA, 2003, Oregon. (2003)

Lara Bovilsky, associate professor (Renaissance literature and culture; graduate professionalism). BA, 1995, Brown; MA, 1998, PhD, 2001, Duke. (2008)

Kirby Brown, associate professor (Native and ethnic American literatures). BA, 1997, Texas, Austin; MA, 2005, Texas, San Antonio. (2011)

Kristy Bryant-Berg, senior instructor (composition). BA, 2002, Colorado, Boulder; MA, 2004, Oregon; PhD, 2009, Oregon. (2014)

Mattie Burkert, assistant professor (digital humanities). BA 2009, New York, NY; MA 2011, Wisconsin, Madison; PhD, 2016, Wisconsin, Madison. (2020)

Anna Carroll, instructor (composition). BA, 2007, MA, 2010, West Florida; PhD, 2015, Oregon. (2018)

Ulrick Casimir, instructor (composition). BA, 1995, North Carolina State; MFA, 2000, North Carolina; MA, 2005, PhD, 2008, Oregon. (2018)

Stephanie Clark, associate professor (medieval literature). BA, 2002, Texas, Dallas; MA, 2004, PhD, 2011, Illinois, Urbana-Champaign. (2011)

Kara Clevinger, senior instructor. BA, 2000, Temple University; MA, 2006, Temple University; Phd, 2015, Temple University.(2014)

Michael Copperman, senior instructor (composition). BA, 2002, Stanford; MFA, 2006, Oregon. (2006)

José Cortez, assistant professor (rhetoric and composition). BA, 2009, MA, 2011, Eastern Washington; PhD, 2017, Arizona. (2018)

James R. Crosswhite, professor (rhetoric, writing, critical theory). BA, 1975, California, Santa Cruz; MA, 1979, PhD, 1987, California, San Diego. (1989)

Rachel Eccleston, instructor (composition). BA, 2007, Texas, Austin; PhD, 2017, Oregon. (2018)

Tara S. Fickle, associate professor (Asian American literature, multiethnic literature). BA, 2006, Wesleyan; MA, 2010, PhD 2014, California. Los Angeles. (2014)

Karen J. Ford, professor (poetry and poetics, modern poetry, American literature). BA, 1978, California State, Sacramento; MA, 1981, California, Davis; PhD, 1989, Illinois, Urbana-Champaign. (1992)

John T. Gage, professor (rhetoric, writing, modern poetry). BA, 1969, MA, 1971, PhD, 1976, California, Berkeley. (1980)

Miriam Gershow, senior instructor (composition); associate director, composition. BS, 1992, Michigan, Ann Arbor; MFA, 2002, Oregon. (2004)

Warren Ginsberg, Philip H. Knight Professor (medieval literature). MA, 1971, State University of New York, Stony Brook; PhD, 1975, Yale. (2000)

Helen Huang, instructor (composition). BA, 2002, National Chengchi; MA, 2007, National Taiwan; PhD, 2018, Oregon. (2018)

Michael Jarvis, instructor (composition). BA, 2008, North Carolina, Chapel Hill; MA, 2012, PhD, 2018, California, Riverside. (2018)

Heidi N. Kaufman, Sherl K. Coleman and Margaret E. Guitteau Teaching Professor in the Humanities; associate professor (19th-century British literature). BA, 1991, Drew; MA, 1994, Boston; PhD, 2011, New Hampshire. (2013)

Katherine Kelp-Stebbins, assistant professor (comic studies). BA, 2003, Wesleyan; MA, 2009, PhD, 2014, California, Santa Barbara. (2018)

Anna Kovalchuk, instructor (composition). BA, 2007, California, San Diego; PhD, Oregon, 2017. (2018)

C. Anne Laskaya, associate professor (medieval literature, women writers, rhetoric). BA, 1976, Lawrence; BMus, Lawrence Conservatory of Music; MA, 1978, PhD, 1989, Rochester. (1983)

Stephanie LeMenager, Barbara and Carlisle Moore Distinguished Professor in English and American Literature (environmental literature). BA, 1991, Stanford; MA, 1994, PhD, 1999, Harvard. (2013)

Quinn Miller, associate professor (film and media studies). BA, 2003, Chicago; MA, 2005, PhD, 2010, Northwestern. (2012)

Kate Myers, senior instructor (composition). BA, 2002, Goshen College; MA, 2006, North Florida; PhD, 2016, Oregon. (2016)

Brendan O'Kelly, instructor (composition). BA, 2002, MA, 2004, Colorado, Boulder; PhD, 2016, California, Los Angeles. (2015)

Paul W. Peppis, professor (modern British literature); director, Oregon Humanities Center. BA, 1984, Williams; MA, 1987, PhD, 1993, Chicago. (1995)

Ana Zalyubovskiy, instructor (composition). BA, 1992, MA, 1994, Minnesota State; MFA, 1996, Vermont College. (2018)

Forest Pyle, professor (romanticism, literary theory). BA, 1980, MA, 1983, PhD, 1988, Texas, Austin. (1988)

Mark Quigley, associate professor (Irish literature, 20th-century literature). BA, 1992, Stanford; MA, 1997, PhD, 2003, California, Los Angeles. (2006)

Nick Recktenwald, senior instructor (composition); associate director composition. BA, 2008, North Carolina, Asheville; MA, 2014, Oregon. (2016)

Stephen Rust, senior instructor (composition). BS, 1999, Idaho State; MA, 2006, Oregon State; PhD, 2011, Oregon. (2015)

Benjamin D. Saunders, professor (Renaissance literature, comics studies). BA, 1991, East Anglia; MPhil, 1992, Cambridge; PhD, 2000, Duke. (2000)

Gordon M. Sayre, professor (early American literature, 18th-century literature, folklore), director of undergraduate studies. BA, 1988, Brown; PhD, 1993, State University of New York, Buffalo. (1993)

Steven Shankman, professor (18th-century literature, the classical tradition, comparative literature). BA, 1969, Texas, Austin; BA, 1971, MA, 1976, Cambridge; PhD, 1977, Stanford. (1984)

Emily Simnitt, senior instructor (composition). BA, 1995, Brigham Young; MA, 2005, Idaho State. (2015)

Helen Southworth, professor (modernism, digital humanities). BA, 1989 London; PhD, 1999, California, Los Angeles. (2001)

Courtney Thorsson, associate professor (African American literature, 19th- and 20th-century American literature, food studies). BA, 2000, Virginia; MA, 2004, MPhil, 2006, PhD, 2009, Columbia. (2009)

Avinash Tiwari, instructor (composition). BA, 2010, Pennsylvania; MA, 2013, Oregon. (2016)

Corbett Upton, senior instructor (Central American poetry); associate director, undergraduate studies. BA, 2001, Arizona State; MA, 2006, PhD, 2010, Oregon. (2010)

Eleanor Wakefield, instructor (composition). BA, 2007, Gonzaga; MA, 2011, PhD, 2017, Oregon, 2017. (2018)

Mark Whalan, professor (modern and 20th-century literature); Robert D. and Eve D. Horn Chair in English and American Literature. BA, 1995, Warwick; MA, 1996, Durham; PhD, 2002, Exeter. (2011)

Elizabeth A. Wheeler, professor (post-1945 literature, cultural studies, disability studies). BA, 1982, Bowdoin; MA, 1988, City University of New York; PhD, 1996, California, Berkeley. (1996)

Jenée Wilde, instructor (composition). BA, 1994, Boise State; MFA, 2003, Goddard College; PhD, 2015, Oregon (2016)

Daniel N. Wojcik, professor (folklore, popular culture). BA, 1978, California, Santa Barbara; MA, 1986, PhD, 1992, California, Los Angeles. (1991)

Henry B. Wonham, professor (19th- and 20th-century American literature). BA, 1983, Princeton; PhD, 1991, Virginia. (1995)

Mary E. Wood, professor (19th-century American literature, gender studies). BA, 1978, Yale; MA, 1980, PhD, 1987, Stanford. (1987)

Emeriti

James L. Boren, professor emeritus. BA, 1965, San Francisco State; MA, 1967, PhD, 1970, Iowa. (1970)

William Cadbury, professor emeritus. BA, 1956, Harvard; MS, 1957, PhD, 1961, Wisconsin, Madison. (1961)

Suzanne Clark, professor emerita. BA, 1961, MA, 1965, Oregon; PhD, 1980, California, Irvine. (1990)

Dianne M. Dugaw, professor emerita. BA, 1971, Portland; MA, 1976, PhD, 1982, California, Los Angeles. (1990)

James W. Earl, professor emeritus. BA, 1967, Bucknell; PhD, 1971, Cornell. (1987)

Marilyn Farwell, professor emerita. BA, 1963, MacMurray; MA, 1966, PhD, 1971, Illinois. (1971)

Thelma Greenfield, professor emerita. BA, 1944, MA, 1947, Oregon; PhD, 1952, Wisconsin, Madison. (1963)

Robert Grudin, professor emeritus. BA, 1960, Harvard; MA, 1963, PhD, 1969, California, Berkeley. (1971)

Ruth F. Jackson, senior instructor emerita. BA, 1929, MA, 1933, Oregon. (1955)

Kathleen Rowe Karlyn, professor emerita. BA, 1969, Connecticut; MLA, 1973, Johns Hopkins; PhD, 1992, Oregon. (1994)

Linda Kintz, professor emerita. BA, 1967, Texas Tech; MA, 1969, Southern Methodist; PhD, 1982, Oregon. (1988)

Julia Lesage, professor emerita. MA, 1962, PhD, 1972, Indiana. (1988)

David Leiwei Li, Collins professor of the humanities emeritus. BA, 1982, Shanghai Foreign Languages Institute; MA, 1986, Indiana University of Pennsylvania; PhD, 1991, Texas, Austin. (1999).

Glen A. Love, professor emeritus. BA, 1954, MA, 1959, PhD, 1964, Washington (Seattle). (1965)

William Rockett, associate professor emeritus. BA, 1961, MA, 1963, Oklahoma; PhD, 1969, Wisconsin, Madison. (1966)

William Rossi, professor emeritus. BA, 1972, MA, 1979, Missouri; PhD, 1986, Minnesota. (1989)

George Rowe, professor emeritus; editor, *Comparative Literature*. BA, 1969, Brandeis; MA, 1971, PhD, 1973, Johns Hopkins. (1985)

Sharon R. Sherman, professor emerita. PhD, 1965, Wayne State; MA, 1971, California, Los Angeles; PhD, 1978, Indiana. (1976)

Richard L. Stein, professor emeritus. BA, 1965, Amherst; AM, 1966, PhD, 1970, California, Berkeley. (1976)

Richard C. Stevenson, professor emeritus. AB, 1961, AM, 1963, PhD, 1969, Harvard. (1968)

Nathaniel Teich, professor emeritus. BS, 1960, Carnegie-Mellon; MA, 1962, Columbia; PhD, 1970, California, Riverside. (1969)

Louise Westling, professor emerita. BA, 1964, Randolph-Macon Woman's; MA, 1965, Iowa; PhD, 1974, Oregon. (1985)

George Wickes, professor emeritus. BA, 1944, Toronto; MA, 1949, Columbia; PhD, 1954, California, Berkeley. (1970)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Participating

David A. Frank, honors college

Michael Hames-García, ethnic studies

Mat Johnson, creative writing

Sharon Luk, ethnic studies

Sarah Wald, environmental studies

- **Bachelor of Arts**

- **Minor in Comics and Cartoon Studies**
- Minor in Digital Humanities (p. 235)
- **Minor in Disability Studies**
- **Minor in Writing, Public Speaking, and Critical Reasoning**

Undergraduate Studies

The Department of English expects its majors to acquire knowledge of English and American literature. In addition, it expects them to gain a sense of history and a reading knowledge of at least one second language. Majors should construct their programs in consultation with an advisor. The major requirements for the degree of bachelor of arts (BA) in the Department of English are listed below.

Course work required for the English major, both lower division and upper division, must be passed with grades of mid-C or better. Majors must complete the university second-language requirement for the BA degree. At least 28 of the required 36 upper-division credits must be taken at the University of Oregon.

Bachelor of Arts Degree Requirements

Code	Title	Credits
Lower-Division Courses		12-16
ENG 205	Genre: [Topic] (two courses with differing topics)	
Two lower-division elective courses ¹		
Foundation Courses ²		8
ENG 303	Foundations of the English Major: Text	
ENG 304	English Major Foundations: Context	4
or ENG 305	English Major Foundations: Theory	
Writing Requirement ³		4
Upper-Division Courses ⁴		28-32
Literature course, pre-1500		
Literature course, 1500–1789		
Literature course, 1789 to the present		
Literary theory or rhetoric course		
Media, folklore, or culture course		
Gender, ability, queer studies, or sexuality course		
Empire, race, or ethnicity course		
Additional upper-division course work in literature, media, folklore, or writing ⁵		
Total Credits		56-64

- ¹ May include only one of the following: Introduction to Literature: Fiction (ENG 104), Introduction to Literature: Drama (ENG 105), Introduction to Literature: Poetry (ENG 106), and may include no courses with a WR subject code. ENG 209 counts for writing requirement and lower-division elective.
- ² Completion of at least one Genre: [Topic] (ENG 205) topics course is a prerequisite or co-requisite for enrolling in ENG 303. Completion of ENG 303 is a pre-requisite for enrolling in ENG 304 or ENG 305.
- ³ May be fulfilled using (a) (ENG 209) The Craft of the Sentence, (b) The Art of the Sentence (ENG 420), or (c) any upper-division WR course.
- ⁴ One course may satisfy a maximum of two upper-division area requirements at once, as indicated on the current advising supplement.
- ⁵ No more than 8 credits of Research: [Topic] (ENG 401), Thesis (ENG 403), Reading and Conference: [Topic] (ENG 405), or Writing and Conference: [Topic] (CRWR 405). Upper-division CRWR courses may also be used to fulfill this requirement.

Honors Program in English

The program provides qualified undergraduate majors with special options for fulfilling departmental requirements. Honors students interested in the intensive study of literature in small discussion seminars independently explore a special topic of their own choosing, under the guidance of a faculty member. Typically, students spend a major portion of the senior year writing their honors thesis.

Requirements

1. Completion of all English department requirements
2. Minimum of two terms of Seminar: [Topic] (ENG 407) (Capstone).
3. Two terms of Thesis (ENG 403), a directed program of study or creative writing under the guidance of an appropriate advisor.
4. Senior thesis—either a critical essay of thirty-five to fifty pages or a substantial piece of creative writing. The thesis must be approved by the advisor and a second reader (typically both faculty members in English) after an oral defense.

Admission and Supervision

Applicants must have a cumulative GPA of 3.70 in their English courses and completed at least two upper-division English courses and, if possible, all lower-division major requirements. Admission is based on the applicant's academic record, a brief description of the applicant's proposed project, and the recommendation of two faculty members in the department.

Beginning with the 2014–15 academic year, Clark Honors College English majors who have been accepted into the English honors program and who complete the requirements for both the Clark Honors College thesis and the English honors program may submit an English honors thesis, awarded a pass or pass with distinction, to fulfill the thesis requirement for both English department honors and the Clark Honors College thesis. Failing theses cannot earn English department honors or be used to satisfy the Clark Honors College thesis.

To apply for admission to the honors program, contact Paul Peppis, the program director and associate department head.

Minor in English

The English minor requires 24 credits of approved course work selected from the documents titled *University of Oregon English Major Requirements and Advising Supplement*, which are updated each year. Both documents are available in the English department and on our [website \(https://english.uoregon.edu/undergraduate/explore-our-minors/english-minor/\)](https://english.uoregon.edu/undergraduate/explore-our-minors/english-minor/).

- Of the total 24 credits, a maximum of 8 credits may be taken in lower-division courses.
- All upper-division courses must be taken in residence at the University of Oregon
- Course work must be taken for letter grades and passed with grades of mid-C or better.
- Courses with the prefixes ENG, FLR, HC and writing (WR) courses Principles of Tutoring Writing (WR 312) WR 320, WR 321, Independent Writing Projects (WR 408) or WR 423 may be used for the minor.
- Only one of the three Introduction to Literature courses (ENG 104, ENG 105, ENG 106) and transfer equivalents may be used to satisfy minor requirements.
- Research: [Topic] (ENG 401), Thesis (ENG 403), Reading and Conference: [Topic] (ENG 405) and College Composition I (WR 121), College Composition II (WR 122), College Composition III (WR 123) may not be used to satisfy minor requirements.

Minor in Comics and Cartoon Studies

This interdisciplinary minor in comics and cartoon studies presents students with an international, historical, and critical perspective on the

art of comics, from editorial cartoons to comic books to graphic novels. In taking courses for this minor, students will be required to think beyond accustomed disciplinary boundaries and to analyze and experiment with the interaction of visual and linguistic systems of meaning.

To qualify for the minor, students must take 24 credits of approved courses, including one required course, Introduction to Comic Studies (ENG 280). The remaining courses may be selected from the range of comics-related courses offered through the Departments of Art, Comparative Literature, East Asian Languages and Literatures, English, Ethnic Studies, History of Art and Architecture, and Romance Languages, the Arts and Administration Program, and the School of Journalism and Communication. For details regarding these courses, students should consult the list of offerings available in the Department of English office or online at comics.uoregon.edu (<http://comics.uoregon.edu>).

No more than 12 credits may be taken in lower-division courses, and course work must be passed with grades of mid-C or better.

Minor in Digital Humanities

Code	Title	Credits

¹ Two classes must be at the upper division level. To ensure interdisciplinary, these four courses must come from at least two different departments.

Minor in Disability Studies

disability.uoregon.edu

Elizabeth Wheeler, Director

541-346-3929

238 Prince Lucien Campbell Hall

ewheeler@uoregon.edu

The minor in disability studies prepares students for a growing range of careers through study of disability and deaf cultures, politics, and histories in fields such as international development, health, design, sign language interpreting, education, and nonprofit management. The interdisciplinary program of study ranges across the university, and many courses fulfill university general-education, multicultural, and second-language requirements.

Course work required for the minor must be passed with grades of mid-C or better. At least 12 of the required 24 credits must be taken at the University of Oregon; at least 12 must be upper-division credits.

¹ Reasoning, Speaking, Writing (ENG 494), Internship: [Topic] (ENG 404) or Independent Writing Project (WR 198) may be taken to satisfy one course requirement.

² If not already taken.

Kindergarten through Secondary Teaching Careers

Students who complete a degree in English are eligible to apply to the College of Education's fifth-year licensure program in middle-secondary teaching or the fifth-year licensure program in elementary teaching. More information is available from the department's education advisors, Elizabeth Wheeler and Mary Wood; see also the College of Education (p. 685) section of this catalog.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Graduate Studies

The Department of English offers graduate study in English and American literature, film and television studies, folklore, critical theory, rhetoric and composition, cultural studies, popular culture, ecocriticism, ethnic literatures, gender studies, postcolonial studies, comic studies, disability studies. It offers the master of arts (MA) and doctor of philosophy (PhD) degrees in English. Detailed descriptions of these programs and instructions about how to apply to the English graduate program are available on the department's website.

Master of Arts Degree

The Department of English offers an MA for students who want to study beyond the BA but who do not plan to complete a PhD. Students whose goal is a doctorate should apply for admission to the department's doctoral program (described below). Students who complete the MA program at the University of Oregon and want to enter the PhD program must reapply to the department for admission into that program.

The number of seats in the MA program is limited, and admission is competitive.

Admission Requirements

1. An undergraduate grade point average (GPA) of at least 3.50 or, if the student has 12 or more credits of graduate work in English, a graduate GPA of 3.50 or better
2. For nonnative speakers: a minimum score of 600 on the paper-based Test of English as a Foreign Language (TOEFL) or a minimum score of 100 on the Internet-based test

Admission Procedures

Information on applying to the graduate program may be obtained from the department website or from the department office. Application materials are submitted electronically at https://gradweb.uoregon.edu/online_app/application/guidelines1.asp. The following information is part of the application process and must be submitted electronically:

- Degree transcripts (unofficial copies are acceptable)
- Contact information (names, e-mail addresses) for three people willing to write letters of recommendation
- A personal statement (500-word maximum) of background and objectives in pursuing the course of study
- A writing sample that demonstrates the applicant's ability in literary, film, folklore, or cultural studies (5,000-word maximum, including bibliography and notes)

In addition to the transcripts uploaded to the online application, official copies of transcripts should be mailed to the Office of the Registrar, 5257 University of Oregon, Eugene, Oregon 97403-1286.

Information about graduate employee (GE) opportunities may be found on the department website.

The application deadline for admission is January 15. Candidates are admitted only for fall term.

The completed file is reviewed by the department's graduate admissions committee, which notifies the applicant of its decision. All admissions are conditional.

Master of Arts Degree Requirements

Code	Title	Credits
ENG 690	Introduction to Graduate Studies in English	5
Select one of the following:		
Pre-1500 course		
1500-1660 course		
1660–1800 course		
Select one of the following:		
19th-century course		
20th-century course		
Rhetoric or advanced theory course		
Nine formal 600-level seminars		

A master's thesis may be substituted for one elective seminar with the prior approval of the director of graduate studies in consultation with the faculty thesis advisor. The MA thesis is a substantial scholarly essay researched and written over two terms during the second year of study.

Graduate course work should be completed at the 600 level. Exceptions to this policy must be made in advance by the director of graduate studies in consultation with the individual faculty advisor.

A minimum cumulative GPA of 3.50 in all graduate course work at the UO is required for completion of the MA degree. At least nine courses must be taken in residence at the University of Oregon.

Students who have completed 12 graduate-level English courses (nine taken at the university), attained reading knowledge of one foreign language, and maintained a cumulative GPA of 3.30 or better may apply for the MA degree with a specialty in English or American literature.

Language Requirement

Completion of the degree requires reading competence in one foreign language. Reading competence may be demonstrated by a B+ average in the yearlong Old English sequence; a grade of mid-B or better in the last term of a second-year language course or an approved 300-, 400-, or 600-level literature course with readings in the target language; scoring at required levels on the College Level Examination Program (CLEP) test; or passing the Toronto Medieval Latin examination at the master's level.

Interdisciplinary MA

See the description of the Interdisciplinary Studies: Individualized Program (IS:IP) in the **Division of Graduate Studies** section of this catalog.

Doctor of Philosophy Degree

Students who want to pursue a PhD at the University of Oregon should apply directly to the doctoral program. Students in the doctoral program who have not earned an MA prior to being admitted may receive the MA at the appropriate stage of their course of study, typically at the end of the

second year (subject to the fulfillment of department and university MA requirements listed in the **Division of Graduate Studies** section of this catalog).

The number of places in the PhD program is limited, and admission is competitive.

Admission Requirements

1. A bachelor of arts (BA) or a master of arts (MA) in English or a related field, with at least a 3.50 graduate grade point average (GPA)
2. The submission of scores on the verbal and analytical writing sections of the general test of the Graduate Record Examinations (GRE); the score on the subject test for literature in English is optional
3. For nonnative speakers: a minimum score of 600 on the paper-based Test of English as a Foreign Language (TOEFL) or a minimum score of 100 on the Internet-based version

Admission procedures are the same as for MA degrees. The application deadline is December 15; candidates are admitted only for fall term.

Residency Requirements

The Division of Graduate Studies requires at least three years of full-time work beyond the bachelor's degree for the doctorate with at least one year spent in continuous residence on the Eugene campus. The Division of Graduate Studies requires three consecutive terms (fall, winter, spring) with a minimum of 9 graduate credits of formal course work per term for the PhD year of residency; graduate employees (GEs) must also enroll for a minimum of 9 graduate credits each term they hold a GE appointment.

Doctor of Philosophy Degree Requirements

Code	Title	Credits
ENG 614	Introduction to Literary and Cultural Theory	5
ENG 690	Introduction to Graduate Studies in English	5

Select two of the following: ¹

Pre-1500 course

1500-1660 course

1660-1800 course

Select two of the following: ¹

19th century course

20th century course

Rhetoric or advanced theory course

Twelve seminars ²

¹ Film and folklore courses are included under the appropriate time period.

² The seminars, constituting the individual plan of study, may be distributed among any areas, and the plan must be approved by the student's graduate faculty advisor and the director of graduate studies before the second year of study.

Graduate course work should be completed at the 600 level. Exceptions to this policy must be made in advance by the director of graduate studies in consultation with the individual faculty advisor.

A cumulative GPA of 3.50 or better in all graduate work at the UO is the minimum requirement for satisfactory progress toward the PhD.

Second Language

The graduate language requirement for the doctoral degree is reading competence in two non-English languages or high proficiency in one. Reading competence may be demonstrated in each of two foreign languages as specified under the language requirement for the MA degree. High proficiency may be demonstrated by a grade of A- or better in an approved 400-, 500-, or 600-level literature course, with readings in the target language; scoring at the required levels on the College Level Examination Program (CLEP) test; or passing the Toronto Medieval Latin examination at the PhD level.

Students may petition the graduate committee to test in languages that don't fit the above criteria.

Teaching

Doctoral candidates must have experience as classroom teachers in the department before they receive the degree.

Structured Emphasis

Students may define their individual plan of study according to one of seven structured emphasis options: ethnic literary studies, film studies, folklore, literature and the environment, medieval studies, poetry and poetics, or rhetoric and composition. Each emphasis has a focused set of courses and a special section.

Breadth Examination

Doctoral candidates must take the PhD breadth examination at the beginning of the third year of study, or, if they enter with 6 or more transfer credits, at the beginning of the second year of study. The student and the student's advisor select two examination fields chosen for proximity to and/or importance for the separate, primary research field and project. These fields may provide broad familiarity with readings, texts, or methods that will inform dissertation research, and may also develop areas of relevant professional or teaching competence. They may include historical fields adjacent to the primary research field; genres; or areas of critical theory. The examination includes written (take-home) and oral components based on reading lists generated by the student in consultation with faculty examiners and approved by the Graduate Committee. A student must pass the breadth examination in order to take the PhD major field examination, administered the following year. Students who fail either written portion of the breadth examination do not take the oral portion until they have retaken and passed the failed written part; retakes will occur at the end of that term, postponing the PhD major field examination to the following term.

Major Field Examination

After students in the PhD program have completed their course work, they must take a two-and-a-half-hour major field examination. Typically taken fall term following completion of all course work and the language requirement, the major field examination provides each student with the opportunity to present and defend a short paper on a topic related to the dissertation. The examination also allows the student to demonstrate expertise in his or her field of specialization. It is divided into two parts:

1. A discussion of a relatively broad field of study that provides a context for the topic or problem examined in part two
2. A prepared presentation by the student on a topic or problem of the student's choice that is related to the dissertation, followed by a discussion of that topic

The topic and areas covered by the major field examination are defined, in the form of a project description and reading list, by the student in consultation with an advisor or advisors and must be approved by the English department graduate committee. As a supplement to the major field examination, a student may choose to complete a one- to two-hour written examination on part two. The major field examination may be retaken only once.

PhD Dissertation

After completing all other degree requirements, the candidate should consult with a faculty advisor willing to work in the area of the student's interest and submit a dissertation prospectus for approval by the student's dissertation committee. Once the prospectus is approved by the committee and the director of graduate studies, the student is advanced to candidacy. A three-year period for completion of the dissertation begins when the Division of Graduate Studies approves the advancement to candidacy.

The dissertation may be a work of literary, film, folklore, or linguistic scholarship or, with the approval of the committee, a collection of three substantial essays exhibiting internal coherence though not necessarily treating a single subject. The candidate gives an oral presentation or defense of the dissertation when it is completed and found acceptable by the committee.

Certificate in Writing, Public Speaking, and Critical Reasoning

The English department's certificate in writing, public speaking, and critical reasoning is available to all University of Oregon undergraduates in any minor.

A certificate in writing, public speaking, and critical reasoning requires 36 credits as follows:

Code	Title	Credits
Select three courses in writing (at least one at the 400 level):		12
ENG 413	Theories of Literacy	
ENG 420	The Art of the Sentence	
WR 123	College Composition III	
WR 320	Scientific and Technical Writing	
WR 321	Business Communications	
WR 423	Advanced Composition	
Select three courses in rhetoric (at least one of which must be ENG 200 or ENG 330):		12
ENG 200	Public Speaking as a Liberal Art	
	or ENG 330 Oral Controversy and Advocacy	
ENG 492	History of Rhetoric and Composition	
ENG 493	Modern Rhetorical Criticism	
Select two courses in reasoning:		8
ENG 335	Inventing Arguments	
PHIL 103	Critical Reasoning

ENG 494	Reasoning, Speaking, Writing ¹	
Total Credits		36

English Courses

ENG 104. Introduction to Literature: Fiction. 4 Credits.

Works representing the principal literary genres.

ENG 105. Introduction to Literature: Drama. 4 Credits.

Works representing the principal literary genres.

ENG 106. Introduction to Literature: Poetry. 4 Credits.

Works representing the principal literary genres.

ENG 107. World Literature. 4 Credits.

Reading and analysis of selected works in a global survey of ancient literatures, 2500 BCE–1500 CE.

ENG 108. World Literature. 4 Credits.

Reading and analysis of selected works in a global survey of the early modern period to the industrial revolution, 1500 CE–1789 CE.

ENG 110M. Introduction to Film and Media. 4 Credits.

Introduction to film and media studies and various methods of critical analysis. Multilisted with CINE 110M.

ENG 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable three times.

ENG 200. Public Speaking as a Liberal Art. 4 Credits.

Study and practice of public speaking as grounded in the five rhetorical canons of invention, arrangement, style, delivery, and memory.

Prereq: WR 122 or equivalent.

ENG 200M. Temporary Multilisted Course. 4 Credits.

ENG 205. Genre: [Topic]. 4 Credits.

Traces the historical development and transformations of key genres for the study of English and American literature and culture, including canonical and popular literary as well as media forms. Repeatable twice for a maximum of 12 credits when topic changes.

ENG 207. Shakespeare. 4 Credits.

The major plays in chronological order with emphasis on the early and middle plays through "Hamlet."

ENG 208. Shakespeare. 4 Credits.

The major plays in chronological order with emphasis on the later plays beginning with "Twelfth Night."

ENG 209. The Craft of the Sentence. 4 Credits.

Study of basic sentence mechanics, grammatical terminology, and the conventions of punctuation. Includes some historical background on the development of English grammar. Students cannot receive credit for both ENG 209 and LING 494.

ENG 225. Age of King Arthur. 4 Credits.

Introduction to the literature of the Middle Ages set against the backdrop of medieval culture.

ENG 230. Introduction to Environmental Literature. 4 Credits.

Introduction to literature that examines the human place in the natural world. Consideration of how writers understand environmental crises and scientific ideas of their generation.

ENG 240. Introduction to Disability Studies. 4 Credits.

Introduces students to central concepts and essential texts in disability studies and applies them to literary and cultural texts, with a focus on racial diversity and learning directly from writers and scholars who experience a wide spectrum of bodymind variabilities.

ENG 241. Introduction to African American Literature. 4 Credits.

African American literature and culture in relevant intellectual, social, and historical contexts.

ENG 242. Introduction to Asian American Literature. 4 Credits.

Asian American literature and culture in relevant intellectual, social, and historical contexts.

ENG 243. Introduction to Chicano and Latino Literature. 4 Credits.

Chicano and Latino literature and culture in relevant intellectual, social, and historical contexts.

ENG 244. Introduction to Native American Literature. 4 Credits.

Native American literature and culture in relevant intellectual, social, and historical contexts.

ENG 250. Literature and Digital Culture. 4 Credits.

This course will focus on the intersection of digital culture and literary studies. Students will learn how to use digital tools to study literature. Simultaneously, they will use literary analysis approaches to study contemporary digital culture.

ENG 260M. Media Aesthetics. 4 Credits.

Introduction to the analysis of form and style in cinema and related media, focusing on narrative, mise-en-scène, cinematography, editing, and sound. Multilisted with CINE 260M.

ENG 280. Introduction to Comic Studies. 4 Credits.

Introduction to the art of comics and the methodologies of comics studies.

ENG 300. Introduction to Literary Criticism. 4 Credits.

Various techniques and approaches to literary criticism (e.g., historical, feminist, formalist, deconstructionist, Freudian, Marxist, semiotic) and their applications.

Prereq: sophomore standing.

ENG 303. Foundations of the English Major: Text. 4 Credits.

Chronological study of literary and media works in English, beginnings to the present, emphasizing analytic reading and writing skills.

ENG 304. English Major Foundations: Context. 4 Credits.

Chronological study of literary and media works in English, from beginnings to the present, emphasizing their cultural and historical contexts.

Prereq: ENG 205, ENG 303.

ENG 305. English Major Foundations: Theory. 4 Credits.

Chronological study of literary and media works in English, beginnings to the present, emphasizing analytic reading and writing skills.

Prereq: ENG 205.

ENG 313. Teen and Children's Literature. 4 Credits.

Books for young readers, their social implications and historical context, from the 19th century to the present.

ENG 315. Women Writers' Cultures: [Topic]. 4 Credits.

Women's writing in a particular cultural matrix (race, ethnicity, class, sexual orientation, region, religion) examined in the context of feminist literary theories. Repeatable three times when topic changes.

Prereq: sophomore standing.

ENG 316. Women Writers' Forms: [Topic]. 4 Credits.

Women's writing in a particular genre or form (prose, fiction, drama, poetry, autobiography, folksong) examined in the context of current feminist literary theories. Repeatable three times when topic changes.

Prereq: sophomore standing.

ENG 321. English Novel. 4 Credits.

Rise of the novel from Defoe to Austen.

ENG 322. English Novel. 4 Credits.

Rise of the novel from Scott to Hardy.

ENG 323. English Novel. 4 Credits.

Rise in the novel from Conrad to the present.

ENG 325. Literature of the Northwest. 4 Credits.

Survey of significant Pacific Northwest literature as set against the principles of literary regionalism. Offered alternate years.

Prereq: Sophomore standing.

ENG 330. Oral Controversy and Advocacy. 4 Credits.

In-depth study of the habits of research, reasoning, selection, and presentation necessary for ethical and effective oral advocacy on contested topics. Not open to freshmen.

Prereq: WR 122 or equivalent.

ENG 335. Inventing Arguments. 4 Credits.

Analysis and use of patterns of reasoning derived from the disciplines of rhetoric, informal logic, cognitive science, and the theory of argumentation.

Prereq: WR 122 or WR 123.

ENG 340. Jewish Writers. 4 Credits.

Forms and varieties of fiction, poetry, and drama by Jewish writers from the 19th century to the present.

ENG 352. Shakespeare on Page and Stage. 4 Credits.

Intermediate-level study of Shakespeare's plays and poems.

Supplements traditional lectures and texts with acting workshops, film, live theater viewings, and student performances.

Prereq: sophomore standing.

ENG 360. African American Writers. 4 Credits.

Examines the origins and development of African American literature and culture in relevant intellectual, social, and historical contexts.

Prereq: sophomore standing.

ENG 361. Native American Writers. 4 Credits.

Examines the origins and development of Native American literature and culture in relevant intellectual, social, and historical contexts. Course will be taught once or more per academic year.

Prereq: Sophomore standing.

ENG 363. Chicano and Latino Writers. 4 Credits.

Examines the origins and development of Chicano and Latino literature and culture in relevant intellectual, social, and historical contexts. Course will be taught once or more per academic year.

Prereq: Sophomore standing.

ENG 365. Global Literatures in English. 4 Credits.

Examination of non-U.S. and non-British authors writing in English in relation to the historical, cultural, and intellectual contexts of their native countries.

Prereq: sophomore standing.

ENG 381M. Film, Media, and Culture. 4 Credits.

Study of film and media as aesthetic objects shaped by a broad range of identity categories, reflecting communities identified by class, gender, race, ethnicity, and sexuality. Multilisted with CINE 381M.

ENG 385. Graphic Narratives and Cultural Theory. 4 Credits.

Survey of 20th- and 21st- century graphic novels in the context of cultural theory. Sophomore standing required. Offered alternate years.

ENG 386. Bodies in Comics. 4 Credits.

Examines questions and representations of bodily identity in comics through the lenses of disability studies and gender theory.

ENG 391. American Novel. 4 Credits.

Development of the American novel from its beginnings to 1900.

ENG 392. American Novel. 4 Credits.

Development of the American novel from 1900 to present.

ENG 394. 20th-Century Literature. 4 Credits.

Modern literature from American, British, and European cultures, 1890 to 1945. Significant works of poetry, fiction, drama, and nonfiction in relation to intellectual and historical developments.

ENG 395. 20th-Century Literature. 4 Credits.

Modern literature from American, British, and European cultures, 1945 to present. Significant works of poetry, fiction, drama, and nonfiction in relation to intellectual and historical developments.

ENG 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable up to four times.

Prereq: sophomore standing.

ENG 400M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

ENG 401. Research: [Topic]. 1-21 Credits.

Repeatable.

Prereq: junior standing.

ENG 403. Thesis. 1-12 Credits.

Repeatable.

Prereq: junior standing.

ENG 404. Internship: [Topic]. 1-6 Credits.

On- or off-campus internship in a variety of writing or literacy-related settings in connection with designated courses. Repeatable.

Prereq: junior standing.

ENG 405. Reading and Conference: [Topic]. 1-21 Credits.

Repeatable.

Prereq: junior standing.

ENG 407. Seminar: [Topic]. 1-5 Credits.

Selected seminars offered each year. Repeatable up to five times.

ENG 408. Workshop: [Topic]. 1-21 Credits.

Repeatable twice.

Prereq: junior standing.

ENG 410. Experimental Course: [Topic]. 1-5 Credits.

Selected topics offered each year. Repeatable nine times.

Prereq: junior standing.

ENG 413. Theories of Literacy. 4 Credits.

Approaches to literacy through literary theory, rhetoric and cultural studies. Examines issues involved with school and community literacy.

Pre- or coreq: ENG 404 Internship: Community Literacy; junior standing.

ENG 419. Contemporary Literary Theory. 4 Credits.

Developments in critical thinking after the New Criticism.

Prereq: Junior standing.

ENG 420. The Art of the Sentence. 4 Credits.

Analysis of English grammar and style in literary and academic contexts.

Offered alternate years.

Prereq: junior standing.

ENG 423. The Age of Beowulf. 4 Credits.

A reading of Anglo-Saxon literature and culture as the intersection of Germanic, Celtic, and Christian traditions. Readings include Irish epic, Welsh romance, Norse mythology, and Icelandic saga.

Prereq: Junior standing.

ENG 425. Medieval Romance. 4 Credits.

Study of selected romances in the context of European intellectual and social history. May include elementary linguistic introduction to Middle English.

Prereq: Junior standing.

ENG 427. Chaucer. 4 Credits.

Close textual study of selected Canterbury Tales in Middle English; instruction in the grammar and pronunciation of Chaucer's language.

Prereq: Junior standing.

ENG 428. Old English I. 4 Credits.

Introduction to Old English language. Sequence with ENG 429, ENG 430.

Prereq: Junior standing.

ENG 429. Old English II: [Topic]. 4 Credits.

Study of Old English prose or poetry in the original language. Sequence with ENG 428, ENG 430. Repeatable twice when topic changes.

Prereq: ENG 428.

ENG 430. Old English III: [Topic]. 4 Credits.

Study of Beowulf or works by other major Old English authors in the original language. Sequence with ENG 428, ENG 429. Repeatable twice when topic changes.

Prereq: ENG 429

ENG 434. Spenser. 4 Credits.

Examines the works of Edmund Spenser.

Prereq: Junior standing.

ENG 436. Advanced Shakespeare. 4 Credits.

Detailed study of selected plays, poetry, or both.

Prereq: Junior standing.

ENG 440. 17th-Century Poetry and Prose. 4 Credits.

Poetry from the Metaphysicals and Jonson to the Restoration; prose from Burton and Bacon to Hobbes and Milton.

Prereq: Junior standing.

ENG 455. English Romantic Writers. 4 Credits.

Romantic thought and expression. The second generation including Byron, Keats, Mary and Percy Shelley. Junior standing required.

ENG 457. Victorian Literature and Culture: [Topic]. 4 Credits.

Exploration of major works, figures, controversies, social and cultural issues. Readings in Victorian fiction, poetry, drama, and nonfictional prose; study of examples of the visual arts and popular culture.

Repeatable when topic changes for maximum of 8 credits.

Prereq: Junior standing.

ENG 461. American Literature to 1800. 4 Credits.

Readings in American poetry, nonfiction prose, drama, and fiction.

Prereq: Junior standing.

ENG 462. American Literature, 1800-1900. 4 Credits.

Readings primarily in American poetry, nonfiction prose, drama, and fiction.

Prereq: Junior standing.

ENG 468. Ethnic Literature: [Topic]. 4 Credits.

Advanced study of one or more authors or literary genres related to ethnic literature including African, Native, Asian, or Chicano American.

Repeatable twice when topic changes for a maximum of 12 credits.

Prereq: junior standing.

ENG 469. Literature and the Environment: [Topic]. 4 Credits.

In-depth study of various topics related to literature and the environment including Bioart/Bioethics, Biosemiotics, Critical Animal Studies, Food Culture, Ideas of Wilderness, Rhetoric of Nature Writing, Virtual Ecologies. Repeatable thrice when topic changes for maximum of 16 credits.

Prereq: Junior standing.

ENG 470. Technologies and Texts Capstone. 4 Credits.

This course examines the way humanities disciplines use digital technologies to forge a new role in the public sphere, exploring how digital and print cultures (re)shape forms of cultural expression and knowledge production. Students will create their own digital projects in this course.

Prereq: ENG 250 with a grade of C.

ENG 475. Modern Poetry. 4 Credits.

20th-century British and American poetry with emphasis on the modernist period, 1910–45. Representative authors include Yeats, Stein, Pound, Eliot, H. D., Williams, and Stevens.

Prereq: Junior standing.

ENG 479. Major Authors: [Topic]. 4 Credits.

In-depth study of one to three major authors from medieval through modern periods. Repeatable three times.

Prereq: Junior standing.

ENG 480. Modern American Superhero. 4 Credits.

Examination of the path of the American comic book superhero and an exploration of the ways in which that journey reflects large processes of social change.

ENG 485. Television Studies. 4 Credits.

Study of television's institutional contents and representational practices, including such television genres as serials, news, and reality TV. Offered alternate years.

ENG 488. Race and Representation in Film: [Topic]. 4 Credits.

Screening, interpretation, and analysis of films from developing non-European cultures and by people of color. Mechanisms of racism in dominant U.S. media. Repeatable twice for a maximum of 12 credits.

Prereq: Junior standing.

ENG 491. Rhetoric and Ethics. 4 Credits.

Investigation of historical and contemporary theories of ethical rhetoric in both written and oral arguments.

Prereq: WR 122 or WR 123.

ENG 492. History of Rhetoric and Composition. 4 Credits.

History of rhetoric as related to the theory and practice of writing, relations between rhetoric and poetics, and rhetorical criticism through the 19th century.

Prereq: Junior standing.

ENG 493. Modern Rhetorical Criticism. 4 Credits.

Theoretical topics addressed by 20th-century rhetorical critics. Varieties of rhetorical interpretation, from neo-Aristotelian to reader-response, postmodernist views of metaphor.

Prereq: Junior standing.

ENG 494. Reasoning, Speaking, Writing. 4 Credits.

Application of advanced study in argumentation theory, particularly procedural standards of rationality developed in recent argumentation studies, to selected public policy controversies.

ENG 496. Feminist Film Criticism: [Topic]. 4 Credits.

Critical analysis of film and television texts from a feminist perspective. Repeatable when topic changes.

Prereq: Junior standing.

ENG 503. Thesis. 1-16 Credits.

Repeatable.

ENG 507. Seminar: [Topic]. 1-5 Credits.

Selected seminars offered each year. Repeatable up to seven times.

ENG 508. Workshop: [Topic]. 1-21 Credits.

Repeatable.

ENG 510. Experimental Course: [Topic]. 1-5 Credits.

Selected topics offered each year. Repeatable nine times.

ENG 513. Theories of Literacy. 4 Credits.

Approaches to literacy through literary theory, rhetoric and cultural studies. Examines issues involved with school and community literacy. Pre- or coreq: ENG 604.

ENG 519. Contemporary Literary Theory. 4 Credits.

Developments in critical thinking after the New Criticism.

ENG 520. The Art of the Sentence. 4 Credits.

Analysis of English grammar and style in literary and academic contexts. Offered alternate years.

ENG 528. Old English I. 4 Credits.

Introduction to Old English language. Sequence with ENG 529, ENG 530.

ENG 529. Old English II: [Topic]. 4 Credits.

Study of Old English prose or poetry in the original language. Sequence with ENG 528, ENG 530. Repeatable twice for a maximum of 12 credits when topic changes.

Prereq: ENG 528.

ENG 530. Old English III: [Topic]. 4 Credits.

Study of Beowulf or works by other major Old English authors in the original language. Sequence with ENG 528, ENG 529. Repeatable twice when topic changes.

Prereq: ENG 529.

ENG 536. Advanced Shakespeare. 4 Credits.

Detailed study of selected plays, poetry, or both.

ENG 540. 17th-Century Poetry and Prose. 4 Credits.

Poetry from the Metaphysicals and Jonson to the Restoration; prose from Burton and Bacon to Hobbes and Milton.

ENG 555. English Romantic Writers. 4 Credits.

Romantic thought and expression. The second generation including Byron, Keats, Mary and Percy Shelley.

ENG 557. Victorian Literature and Culture: [Topic]. 4 Credits.

Exploration of major works, figures, controversies, social and cultural issues. Readings in Victorian fiction, poetry, drama, and nonfictional prose; study of examples of the visual arts and popular culture. Repeatable when topic changes for maximum of 8 credits.

ENG 561. American Literature to 1800. 4 Credits.

Readings in American poetry, nonfiction prose, drama, and fiction.

ENG 562. American Literature, 1800-1900. 4 Credits.

Readings primarily in American poetry, nonfiction prose, drama, and fiction.

ENG 568. Ethnic Literature: [Topic]. 4 Credits.

Advanced study of one or more authors or literary genres related to ethnic literature including African, Native, Asian, or Chicano American. Repeatable twice when topic changes for a maximum of 12 credits.

ENG 569. Literature and the Environment: [Topic]. 4 Credits.

In-depth study of various topics related to literature and the environment including Bioart/Bioethics, Biosemiotics, Critical Animal Studies, Food Culture, Ideas of Wilderness, Rhetoric of Nature Writing, Virtual Ecologies. Repeatable thrice when topic changes for maximum of 16 credits.

ENG 570. Technologies and Texts Capstone. 4 Credits.

This course examines the way humanities disciplines use digital technologies to forge a new role in the public sphere, exploring how digital and print cultures (re)shape forms of cultural expression and knowledge production. Students will create their own digital projects in this course.

ENG 575. Modern Poetry. 4 Credits.

20th-century British and American poetry with emphasis on the modernist period, 1910–45. Representative authors include Yeats, Stein, Pound, Eliot, H. D., Williams, and Stevens.

ENG 579. Major Authors. 4 Credits.

In depth study of one to three major authors from medieval through modern periods. Repeatable three times.

ENG 580. Modern American Superhero. 4 Credits.

Examination of the path of the American comic book superhero and an exploration of the ways in which that journey reflects large processes of social change.

ENG 585. Television Studies. 4 Credits.

Study of television's institutional contents and representational practices, including such television genres as serials, news, and reality TV. Offered alternate years.

ENG 588. Race and Representation in Film: [Topic]. 4 Credits.

Screening, interpretation, and analysis of films from developing non-European cultures and by people of color. Mechanisms of racism in dominant U.S. media. Repeatable twice for a maximum of 12 credits.

ENG 591. Rhetoric and Ethics. 4 Credits.

Investigation of historical and contemporary theories of ethical rhetoric in both written and oral arguments.

Prereq: WR 122 or equivalent.

ENG 592. History of Rhetoric and Composition. 4 Credits.

History of rhetoric as related to the theory and practice of writing, relations between rhetoric and poetics, and rhetorical criticism through the 19th century.

ENG 593. Modern Rhetorical Criticism. 4 Credits.

Theoretical topics addressed by 20th-century rhetorical critics. Varieties of rhetorical interpretation, from neo-Aristotelian to reader-response, postmodernist views of metaphor.

ENG 596. Feminist Film Criticism: [Topic]. 4 Credits.

Critical analysis of film and television texts from a feminist perspective. Repeatable when topic changes.

ENG 601. Research: [Topic]. 1-16 Credits.

Repeatable.

ENG 602. Supervised College Teaching. 1-5 Credits.

Repeatable.

ENG 603. Dissertation. 1-21 Credits.

Repeatable.

ENG 604. Internship: [Topic]. 1-6 Credits.

Repeatable. On- or off-campus internship in a variety of writing or literacy-related settings.

ENG 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

ENG 607. Seminar: [Topic]. 1-5 Credits.

Selected seminars offered each year. Repeatable up to seven times.

ENG 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

ENG 609. Terminal Project. 1-16 Credits.**ENG 610. Experimental Course: [Topic]. 1-5 Credits.**

Repeatable nine times.

ENG 611. Composition Graduate Teaching Fellow Seminar I. 1-3 Credits.

Issues in pedagogy related to the university's writing requirement.

ENG 612. Composition Graduate Teaching Fellow Seminar II. 1-3 Credits.

Discussions designed to increase the effectiveness of first-year graduate teaching fellows as teachers of courses that fulfill the university's writing requirement.

ENG 613. Graduate Teaching Fellow Composition Apprenticeship. 1-3 Credits.

Supervised practical experience in all aspects of teaching WR 121, WR 122.

Prereq: ENG 611 or equivalent.

ENG 614. Introduction to Literary and Cultural Theory. 5 Credits.

Introduces students to a number of the most important and influential developments in 20th-century literary and cultural theory. Graduate seminar.

ENG 615. Advanced Studies in Literary Theory: [Topic]. 5 Credits.

Intensive study of one to three major theorists or a significant theoretical problem. Repeatable up to 4 times.

ENG 620. Medieval Literature: [Topic]. 5 Credits.

Recent offerings include Chaucer's *Troilus and Criseyde*, *Humor and Vulgarity in Medieval Literature*. Repeatable.

ENG 630. Renaissance Literature: [Topic]. 5 Credits.

Recent offerings include *Hamlet*, *Jacobean Potboilers*, *Renaissance Irrationalities*. Repeatable.

ENG 645. 18th-Century Literature: [Topic]. 5 Credits.

Intensive study of one to three major authors or selected topics from the 18th century. Recent offerings include *Enlightenment and Revolution*. Repeatable.

ENG 660. American Literature: [Topic]. 5 Credits.

Recent offerings include *African American Women Writers*, *Evolutionary Theories and Narrative*, *Sentimental Novel*, *V. Deloria and Native American Cultural Values*. Repeatable.

ENG 670. Modern Literature: [Topic]. 5 Credits.

Recent offerings include *H. James*, *Modernist Politics*, *Environmental Humanities*, *Postmodernism*. Repeatable.

ENG 690. Introduction to Graduate Studies in English. 5 Credits.

Examination of selected professional, methodological, and theoretical issues.

ENG 691. Composition Theory: [Topic]. 5 Credits.

Intensive study of topics related to rhetorical theory and the teaching of writing. Repeatable.

ENG 695. Film Studies: [Topic]. 5 Credits.

Intensive study of selected topics related to film studies and literature. Recent topics include *Introduction to Film Theory*; *Feminism*, *Comedy*, and the *Carnavalesque*; *Melodrama*. Repeatable three times.

Writing Courses

WR 121. College Composition I. 4 Credits.

Written reasoning as discovery and inquiry. Frequent essays explore relationship of thesis to structure and audience. Strong focus on the process of revising. Regular work on editing.

Prereq: SAT Reading or SAT Writing score below 37, or SAT verbal score below 710 if taken before March 2016, or ACT verbal score below 32, or equivalent.

WR 122. College Composition II. 4 Credits.

Written reasoning as a process of argument. Developing and supporting theses in response to complex questions. Attention to critical reading in academic setting. Continuing focus on revising and editing.

Prereq: WR 121 or equivalent.

WR 123. College Composition III. 4 Credits.

Written reasoning in the context of research. Practice in writing documented essays based on the use of sources. Continuing focus on revising and editing.

Prereq: WR 121 or equivalent.

WR 195. Writing Tutorial. 1 Credit.

Provides students concurrently enrolled in WR 121 with one-on-one tutoring. Enrollment priority based on entrance exam (SAT or ACT) scores. Repeatable once.

Coreq: WR 121.

WR 198. Laboratory Projects: [Topic]. 1-12 Credits.

Repeatable.

Prereq: WR 122 or equivalent.

WR 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable up to five times.

WR 312. Principles of Tutoring Writing. 4 Credits.

The practice and ethics of tutoring writing in the context of writing in various academic disciplines. Theories of teaching, tutoring techniques, and assessment of writing.

WR 320. Scientific and Technical Writing. 4 Credits.

Emphasis on form, function, and style of scientific, professional, and technical writing; weekly writing assignments include proposals, reports, definitions, instructions, summaries. Use of documentation in publication.

Prereq: completion of university writing requirement; junior standing.

WR 321. Business Communications. 4 Credits.

Practice in writing and analyzing internal and external messages common to business, industry, and professions. Suggested for business and management students.

Prereq: completion of university writing requirement; junior standing.

WR 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

Prereq: sophomore standing.

WR 408. Independent Writing Projects. 1-3 Credits.

Supervised writing projects in nonfiction prose. Repeatable up to five times.

WR 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

Prereq: Junior standing.

WR 423. Advanced Composition. 4 Credits.

Emphasis on critical thinking skills and rhetorical strategies for advanced written reasoning in different academic disciplines.

Prereq: Completion of University Writing Requirement; junior standing.

WR 508. Independent Writing Projects. 1-12 Credits.

Supervised writing projects in nonfiction prose. Repeatable up to five times.

WR 510. Experimental Course: [Topic]. 1-5 Credits.

Environmental Studies

Mark Carey, Program Director

541-346-5257

144 Columbia Hall

5223 University of Oregon

Eugene, Oregon 97403-5223

Environmental Studies crosses the boundaries of traditional disciplines in the natural sciences, social sciences, humanities, management, policy, design, and law. It challenges students to look at the relationship between humans and their environment from new perspectives. The Environmental Studies Program is dedicated to gaining greater understanding of the natural world from an ecological perspective; devising policies and behaviors that address contemporary environmental problems; and promoting a rethinking of basic cultural premises, ways of structuring knowledge, and the root metaphors of contemporary society.

The Environmental Studies Program offers two undergraduate majors (Environmental Studies and Environmental Science), three undergraduate minors (Environmental Studies, Environmental Humanities, and Food Studies), Master's and Doctoral degrees. It also houses several high-profile interdisciplinary centers, programs and initiatives including the Center for Environmental Futures, Tribal Climate Change Project, Environmental Leadership Program, Just Futures Institute for Racial and Climate Justice, and Climate Change and Indigenous Peoples Initiative.

Faculty

With 29 core faculty from three colleges and 17 different departments, the Environmental Studies Program is doing exciting boundary-breaking interdisciplinary research and teaching related to the environment. In addition, over 100 faculty from all UO colleges who have environmental expertise are affiliated with Environmental Studies as participating faculty. Profiles for core faculty and a list of participating faculty are on the Environmental Studies website.

Stacy Alaimo, professor (material ecocriticism, anthropocene feminisms, blue humanities).

Brendan J. M. Bohannon, professor (microbial ecology).

Peg Boulay, senior instructor II (environmental monitoring, wildlife conservation, outreach and education); co-director, environmental leadership.

Scott D. Bridgham, professor (ecosystem ecology, climate change).

Trudy Ann Cameron, professor (environmental economics).

Mark Carey, professor (glaciers, climate change, natural disasters); director, environmental studies program.

Lauren Hallett, assistant professor (plant community and restoration ecology).

Stephanie LeMenager, professor (American studies, environmental humanities).

Kathryn Lynch, senior instructor II (environmental education, environmental anthropology); co-director, environmental leadership.

Kathy Lynn, research associate (Tribal Climate Change Project).

Richard D. Margerum, associate professor (collaborative environmental management, conflict management in multistakeholder processes).

Galen Martin, senior instructor II (sustainable agriculture, food systems).

Patricia McDowell, professor (river management and restoration).

Krista McGuire, professor (microbial ecology, sustainable management).

Ronald Mitchell, professor (environmental politics, international relations), assistant director of environmental studies program.

Erin Moore, associate professor (life-cycle environmental impacts)

Nicolae Morar, associate professor (applied ethics, recent continental philosophy, philosophy of biology).

Barbara Muraca, assistant professor (human-nature relationships, ecosystem services valuation, sustainability theory).

Kari Norgaard, professor (environmental justice, climate-change denial), director of graduate studies.

Alexandra Rempel, assistant professor (environmental design, passive heating and cooling).

Joshua J. Roering, associate professor (geomorphology, landscape evolution modeling).

Kory Russel, assistant professor (sustainable design; water, public health, and environment).

Emily Scott, assistant professor (art and the public sphere, critical approaches to the built environment, visual cultures of nature).

Lucas Silva, assistant professor (terrestrial ecology, biogeochemistry, biogeography).

David Sutherland, associate professor (ice-ocean interaction, coastal and estuarine oceanography).

Sarah Wald, associate professor (race and ethnic studies, environmental humanities).

Peter A. Walker, professor (environmental politics, political ecology).

Marsha Weisiger, associate professor (environmental, Native American, American West).

Richard York, associate professor (assessing anthropogenic driving forces of global environmental change).

Emeritus

Alan Dickman, professor emeritus (forest ecology and management).

Matthew Dennis, professor (colonial and early national America, American cultural and environmental history, American Indian history).

- **Bachelor of Arts in Environmental Studies**
- **Bachelor of Arts in Environmental Science**
- **Bachelor of Science in Environmental Studies**

- **Bachelor of Science in Environmental Science**
- **Minor in Environmental Studies**
- **Minor in Environmental Humanities**
- **Minor in Food Studies**

The program offers two majors. The Environmental Studies major focuses on social sciences, policy studies, the humanities, and sustainable design and practice. It is designed for students who are interested in such areas as environmental policy, planning, ethics or philosophy, ecocriticism, environmental justice, sustainable development, international environmental issues, or social theory and the environment.

The Environmental Science major is designed for students who want to focus on scientific careers in conservation biology, climate science, pollution prevention and abatement, or ecosystem protection, restoration, and management.

You can obtain a bachelor of arts (BA) or a bachelor of science (BS) in both of these majors.

We also offer a minor in Environmental Studies, Environmental Humanities or Food Studies.

Both majors provide a broad, solid, interdisciplinary perspective on the relationship between humans and nature. Their goals are to develop awareness of environmental issues and to develop an understanding of the nature and scope of the forces underlying environmental problems, the various approaches used to bring environmental problems to the public's attention, and the methods and approaches used to solve these problems.

Majors gain an appreciation of the interdisciplinary nature of environmental studies, and they master content and skills associated with a number of different disciplines.

Majors and minors have considerable latitude in designing a course of study that combines theory and practice, invites active participation, and fits specific interests, needs, and aptitudes. The majors, which provide a well-rounded basic education, prepare students for entry-level positions in business, government, non-governmental and nonprofit organizations, and for a variety of graduate and professional degree programs. Students are encouraged to take advantage of career planning services offered by the University Career Center.

Students should plan their programs early in their undergraduate careers with the aid of a Tykeson advisor in the Scientific Discover and Sustainability (SDS) flight path. Majors are encouraged to consider completing a second major or a minor in a related field. Visit the Tykeson College and Career Advising (<https://advising.uoregon.edu/tykeson/>) homepage to find out how to schedule an appointment with an advisor.

Up-to-date information, major requirements sheets, and tip sheets are available in the program office and on the website.

Opportunities for Majors

The Environmental Studies Program offers many hands-on learning experiences for students to apply their academic learning while developing as professionals and scholars.

Environmental Leadership Program

The Environmental Leadership Program is an interdisciplinary community-based learning program. Student teams work with non-profit organizations, governmental agencies and businesses to address

local environmental needs. Through unique and practical learning experiences, undergraduate students gain leadership, communication, collaboration and professional skills by engaging directly in applied problem-resolution while providing valuable assistance to our community partners. Depending on the project, students earn 4-8 credits that count towards the environmental studies and environmental science major requirements as well as the environmental studies minor.

Internships

By offering academic credit for environmentally focused work experience, the internship program allows students to connect their academic studies with practical applications. Potential internship sponsors include non-profit organizations, governmental agencies and businesses. Students are expected to be self-motivated and arrange their own positions in their areas of particular interest. However, if a student needs assistance finding an internship position, the internship coordinator can help identify potential opportunities related to the student's interests and professional goal. Students may take up to 12 credits of Internship: [Topic] (ENVS 404). To fulfill the practical learning experience requirement for the environmental studies and environmental science majors, students take 4 credits (which translates to 120 hours) of internship service.

Honors

Students majoring in Environmental Studies and Environmental Science are encouraged to participate in our honors program. Writing a senior thesis is good preparation for future professional positions and graduate studies. It provides an opportunity to develop your research and writing skills. Graduating with honors demonstrates a high level of initiative and ability to work independently. An honors thesis is a way to become an expert on a topic of interest and gain recognition for your outstanding academic work.

Students who want to graduate with honors in environmental studies or environmental science must have a 3.30 overall grade point average (GPA) and a 3.50 GPA in courses required for the major. Honors candidates complete a research-based thesis or creative project conducted under the direction of a faculty adviser. Due to the breadth of potential research topics, students can do original laboratory or field-based research, library-based research, or a terminal or creative project.

Honors students who are not enrolled in the Clark Honors College must earn 4 credits of Research: [Topic] (ENVS 401) and 4 credits of Thesis (ENVS 403) in environmental studies or another appropriate department. These credits count towards environmental studies and environmental science major requirements.

Environmental Careers

The environmental studies and environmental science majors provide a well-rounded basic education to prepare students for entry-level positions in business, government, or non-governmental organizations. Alumni work in diverse fields including conservation, climate policy, political action, land use planning, public and environmental health, pollution prevention and abatement, sustainable design, sustainable agriculture and food systems, environmental justice, green business, and ecosystem protection, restoration, and management. Many alumni continue their education through graduate programs.

Kindergarten through Secondary Teaching Careers

Students who complete a bachelor's degree with a major in environmental studies or environmental science are eligible to apply

for the College of Education's fifth-year licensure program in middle-secondary teaching or the fifth-year licensure program to become an elementary teacher. More information is available from the department's undergraduate advisor; see also the College of Education (p. 685) section in this catalog.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

- **Master of Arts**
- **Master of Science**
- **Doctor of Philosophy**
- **Graduate Certificate in Environmental Humanities**
- **Graduate Certificate in Food Studies**

Graduate Studies

The Environmental Studies Program offers graduate study leading to the degrees of master of arts (MA) or master of science (MS) in environmental studies, and an interdisciplinary doctor of philosophy (PhD) degree in environmental sciences, studies, and policy.

Students choose courses offered in appropriate disciplines to design a course plan based on individual goals and backgrounds.

Some financial support for graduate students in the Environmental Studies Program is available through graduate teaching fellowships. Support generally consists of a stipend, health insurance, and a tuition waiver.

Application instructions and materials are available on the program's website.

Application Deadline

Applicants for admission to the master's program must submit all necessary materials online by January 15. New students are accepted for fall term only.

Concurrent Master's Degrees Programs

Environmental studies students may obtain concurrent degrees in other disciplines. Applicants must apply separately to each program. For more information, contact the program office.

Courses

ENVS 196. Field Studies: [Topic]. 1-5 Credits.

Repeatable three times for a maximum of 20 credits.

ENVS 198. Laboratory Projects: [Topic]. 1-12 Credits.

Repeatable.

ENVS 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

ENVS 201. Introduction to Environmental Studies: Social Sciences. 4 Credits.

Contributions of the social sciences to analysis of environmental problems. Topics include human population, the relationship between social institutions and environmental problems, and appropriate political, policy, and economic processes.

ENVS 202. Introduction to Environmental Studies: Natural Sciences. 4 Credits.

Contributions of the natural sciences to analysis of environmental problems. Topics include biological processes, ecological principles, chemical cycling, ecosystem characteristics, and natural system vulnerability and recovery.

ENVS 203. Introduction to Environmental Studies: Humanities. 4 Credits.

Contributions of the humanities and arts to understandings of the environment. Emphasis on diverse ways of thinking, writing, creating, and engaging in environmental discourse.

ENVS 225. Introduction to Food Studies. 4 Credits.

An exploration of the field of "food studies" and examination of the role of food in historical and contemporary life in the US and around the world.

ENVS 335. Allocating Scarce Environmental Resources. 4 Credits.

Considerations for the design of environmental and natural resources policies and regulations: balancing society's preferences and the costs of environmental protection and resource conservation.

Prereq: MATH 105 or higher.

ENVS 345. Environmental Ethics. 4 Credits.

Key concepts and various moral views surveyed; includes anthropocentrism, individualism, ecocentrism, deep ecology, and ecofeminism. Exploration includes case studies and theory.

ENVS 350. Ecological Footprint of Energy Generation. 4 Credits.

Detailed study of the ecological consequences of all forms of energy generation including fossil fuels and alternative energy sources. Open to environmental science, environmental studies, and planning, public policy and management majors only.

Prereq: ENVS 201, MATH 112.

ENVS 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

ENVS 400M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

ENVS 401. Research: [Topic]. 1-12 Credits.

Repeatable.

ENVS 403. Thesis. 1-8 Credits.

Repeatable up to 5 times.

ENVS 404. Internship: [Topic]. 1-12 Credits.

Repeatable.

Prereq: Instructor's approval.

ENVS 405. Reading and Conference: [Topic]. 1-18 Credits.

Repeatable.

ENVS 406. Practicum: [Topic]. 1-12 Credits.

Repeatable.

ENVS 407. Seminar: [Topic]. 1-5 Credits.

Repeatable.

ENVS 408. Workshop: [Topic]. 1-8 Credits.

Repeatable.

ENVS 409. Terminal Project. 1-12 Credits.

Repeatable.

ENVS 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

ENVS 411. Environmental Issues: [Topic]. 4 Credits.

In depth examination of a particular environmental topic such as global warming, ecosystem restoration, energy alternatives, geothermal development, public lands management, or environmental literature. Repeatable twice when topic changes for maximum of 12 credits.

Prereq: junior or senior standing.

ENVS 425. Environmental Education Theory and Practice. 4 Credits.

Learning theories, environmental literacy, and the planning, implementation, and evaluation of environmental education programs. Development of teaching materials in collaboration with a community partner for group project.

Prereq: instructor's approval.

ENVS 427. Environmental and Ecological Monitoring. 4 Credits.

Theory, design, and practice of monitoring sampling mapping, field techniques, data collection, management, analysis and presentation methods, local case studies.

ENVS 429. Environmental Leadership: [Topic]. 1-4 Credits.

Partnering with governmental agencies, nonprofit organizations, public schools and local businesses, students develop service learning projects. Repeatable twice for a maximum of 12 credits when topic changes.

Prereq: instructor's approval.

ENVS 429L. Environmental Leadership: [Topic]. 4 Credits.

Partnering with governmental agencies, nonprofit organizations, public schools and local businesses, students develop service learning projects. Repeatable twice for a maximum of 12 credits when topic changes.

ENVS 435. Environmental Justice. 4 Credits.

Environmental justice and its impact on current decisions. Focus on civil rights law, perception of risk, and relation of sustainability and equity.

Prereq: ENVS 201.

ENVS 450. Political Ecology. 4 Credits.

Examines how social relations and economic, social, and cultural control of natural resources shape human interactions with the environment. Theory and case studies.

Prereq: ENVS 201.

ENVS 455. Sustainability. 4 Credits.

Examines the evolution of the concept of sustainability and its complex and sometimes problematic uses among scholars, policymakers, environmentalists, and businesses.

Pre- or coreq: ENVS 201; junior or senior standing.

ENVS 459. Water, Public Health, and the Environment. 4 Credits.

Water, Public Health, and the Environment examines the provision of water and sanitation services around the world with a particular focus on its impacts for public health and the environment in low- and middle-income communities.

ENVS 465. Wetland Ecology and Management. 4 Credits.

Examines management, law, and policies related to wetlands in an ecological framework; includes wetland type definitions, classification, distribution, formation and development, and restoration.

Prereq: BI 307 or BI 370 or GEOG 360.

ENVS 467. Sustainable Agriculture. 4 Credits.

Examines sustainability issues in agricultural production and current food systems. Focuses on environmental aspects of seed, water, soil, energy, and pest management.

Prereq: ENVS 201 or ENVS 202.

ENVS 477. Soil Science. 4 Credits.

Chemical and physical characteristics and classification of soils, field soil identification, soil degradation.

Prereq: CH 111 or CH 221 or CH 224H.

ENVS 493M. Passive Cooling. 4 Credits.

Conceptual and quantitative investigations of passive cooling design and performance, including precedents, shading, natural ventilation, evaporative cooling, use of thermal mass, radiant cooling assisted by cold night skies, and control scheduling, supported by field investigations and introductory energy modeling. Multilisted with ARCH 493M.

Prereq: ARCH 491.

ENVS 494M. Passive Heating. 4 Credits.

Conceptual and quantitative investigations of passive solar heating design and performance, including precedents, solar resource evaluation, glazing selection and orientation, thermal mass materials and positioning, movable insulation, and control scheduling, supported by solar site surveys and modeling in EnergyPlus. Multilisted with ARCH 494M.

Prereq: ARCH 491.

ENVS 500M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

ENVS 503. Thesis. 1-16 Credits.

Repeatable up to eight times.

ENVS 507. Seminar: [Topic]. 1-5 Credits.

Repeatable.

ENVS 508. Workshop: [Topic]. 1-8 Credits.

Repeatable.

ENVS 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

ENVS 525. Environmental Education Theory and Practice. 4 Credits.

Learning theories, environmental literacy, and the planning, implementation, and evaluation of environmental education programs. Development of teaching materials in collaboration with a community partner for group project.

ENVS 535. Environmental Justice. 4 Credits.

Environmental justice and its impact on current decisions. Focus on civil rights law, perception of risk, and relation of sustainability and equity.

ENVS 550. Political Ecology. 4 Credits.

Examines how social relations and economic, social, and cultural control of natural resources shape human interactions with the environment. Theory and case studies.

ENVS 555. Sustainability. 4 Credits.

Examines the evolution of the concept of sustainability and its complex and sometimes problematic uses among scholars, policymakers, environmentalists, and businesses.

ENVS 559. Water, Public Health, and the Environment. 4 Credits.
Water, Public Health, and the Environment examines the provision of water and sanitation services around the world with a particular focus on its impacts for public health and the environment in low- and middle-income communities.

ENVS 565. Wetland Ecology and Management. 4 Credits.
Examines management, law, and policies related to wetlands in an ecological framework; includes wetland type definitions, classification, distribution, formation and development, and restoration.

ENVS 567. Sustainable Agriculture. 4 Credits.
Examines sustainability issues in agricultural production and current food systems. Focuses on environmental aspects of seed, water, soil, energy, and pest management.

ENVS 577. Soil Science. 4 Credits.
Chemical and physical characteristics and classification of soils, field soil identification, soil degradation.

ENVS 593M. Passive Cooling. 4 Credits.
Conceptual and quantitative investigations of passive cooling design and performance, including precedents, shading, natural ventilation, evaporative cooling, use of thermal mass, radiant cooling assisted by cold night skies, and control scheduling, supported by field investigations and introductory energy modeling. Multilisted with ARCH 593M.
Prereq: ARCH 591.

ENVS 594M. Passive Heating. 4 Credits.
Conceptual and quantitative investigations of passive solar heating design and performance, including precedents, solar resource evaluation, glazing selection and orientation, thermal mass materials and positioning, movable insulation, and control scheduling, supported by solar site surveys and modeling in EnergyPlus. Multilisted with ARCH 594M.
Prereq: ARCH 591

ENVS 601. Research: [Topic]. 1-16 Credits.
Repeatable.

ENVS 602. Supervised College Teaching. 1-5 Credits.
Repeatable.

ENVS 603. Dissertation. 1-16 Credits.
Repeatable.

ENVS 604. Internship: [Topic]. 1-5 Credits.
Repeatable for maximum of 10 credits.

ENVS 605. Reading and Conference: [Topic]. 1-16 Credits.
Repeatable.

ENVS 606. Field Studies: [Topic]. 1-16 Credits.
Repeatable nine times.

ENVS 607. Seminar: [Topic]. 1-5 Credits.
Repeatable.

ENVS 608. Workshop: [Topic]. 1-16 Credits.
Repeatable.

ENVS 609. Terminal Project. 1-16 Credits.
Repeatable up to eight times.

ENVS 610. Experimental Course: [Topic]. 1-5 Credits.
Repeatable. A recent topic is Interdisciplinary Capstone Project.

ENVS 631. Environmental Studies Theory and Practice. 4 Credits.
Introduction to various disciplinary perspectives that contribute to environmental studies, including their research methods, vocabularies, and core concepts.

ENVS 632. Environmental Studies Research Methodology. 2 Credits.
Identifying a clear and concise research problem, developing methodology to address that problem, and the process of developing a thorough knowledge of relevant literature.

ENVS 633. Environmental Studies Thesis Development. 3 Credits.
Interdisciplinary readings in environmental studies focused on topics chosen by each student in consultation with instructor. Preparation for presentations at the Joint Campus Conference.

Bachelor of Arts and Bachelor of Science in Environmental Science

The Environmental Science major is designed for students who want to focus on scientific careers in conservation biology, climate science, pollution prevention and abatement, or ecosystem protection, restoration, and management.

Bachelor of Arts in Environmental Science

The major requires a minimum of 112 credits including 60 upper-division credits. Upper-division credits may be earned through course work or through a combination of course work and an honors thesis. Sample course plans are available on the program's website. Major requirements sheets containing detailed information about specific courses that meet the major requirements are available in the program office, from an environmental science advisor, or on the program website (<http://envs.uoregon.edu/undergrad/escifocus/>).

Code	Title	Credits
Lower-Division Core Courses		
ENVS 201	Introduction to Environmental Studies: Social Sciences	4
ENVS 203	Introduction to Environmental Studies: Humanities	4
Mathematics and Statistics Courses		
MATH 246–247	Calculus for the Biological Sciences I-II	8
	or MATH 251–252	Calculus I-II
	Approved statistics course	4
	Approved course in analytical approaches	4
Lower-Division Introductory Science Sequences		
	Two introductory sequences in focal area	24
	Up to three approved introductory courses in nonfocal area ¹	12
Upper-Division Natural Science Courses		
	Six upper-division natural science courses in focal area (life sciences or earth and physical sciences)	24
	At least two upper-division courses in nonfocal area ¹	8
Upper-Division Social Science, Policy, Humanities, and Design Courses		
	Three courses from the areas of social science, policy, humanities, or design (no more than one course per area)	12
Environmental Issues Course		
ENVS 411	Environmental Issues: [Topic]	4
	or ENVS 425	Environmental Education Theory and Practice
	or ENVS 427	Environmental and Ecological Monitoring
Practical Learning Experience		

Choose from one of several approved practical learning experience options. These include internships, participation in the Environmental Leadership Program, research experiences with UO faculty members, and honors thesis. 4

Total Credits 112

¹ Five courses total are required for nonfocal area.

¹ Five courses total are required for nonfocal area.

Bachelor of Arts and Bachelor of Science in Environmental Studies

The Environmental Studies major focuses on social sciences, policy studies, the humanities, and sustainable design and practice. It is designed for students who are interested in such areas as environmental policy, planning, ethics or philosophy, ecocriticism, environmental justice, sustainable development, international environmental issues, or social theory and the environment.

The environmental studies curriculum is designed to provide a solid foundation in the sciences, social sciences, and humanities; to build on these foundations in advanced course work in a variety of disciplines; to develop the skills necessary to study human-environment interactions; and to encourage participation in experiential learning activities that help students prepare for active participation in the work force and in local and global communities. Students should have a strong foundation in written and verbal skills.

Courses applied to the major, except environmental studies courses numbered 401 through 409, must be taken for letter grades and passed with grades of C– or better. As many as four upper-division courses may be used to fulfill requirements of another major.

Bachelor of Arts in Environmental Studies

Upper-division credit may be earned through course work or through a combination of course work and an honors thesis. Major requirements sheets containing detailed information about specific courses that meet the major requirements are available on the program website (<http://envs.uoregon.edu/undergrad/envsfocus/>), in the program office, or from a SDS flight path Tykeson Advisor.

Choose from one of several approved practical learning experience options. These include internships, participation in the Environmental Leadership Program, research experiences with UO faculty members, honors thesis.

Total Credits 92

¹ Recommended course; however, a university-level mathematics course that counts toward the bachelor of science mathematics requirement fulfills the requirement.

Minors in Environmental Studies, Environmental Humanities, and Food Studies

The Environmental Studies Program offers two undergraduate majors (Environmental Studies and Environmental Science), three undergraduate minors (Environmental Studies, Environmental Humanities, and Food Studies), Master's and Doctoral degrees. It also houses several high-profile interdisciplinary centers, programs and initiatives including the Center for Environmental Futures, Tribal Climate Change Project, Environmental Leadership Program, Just Futures Institute for Racial and Climate Justice, and Climate Change and Indigenous Peoples Initiative.

Environmental Studies Minor

The interdisciplinary minor in environmental studies includes three lower-division courses and five upper-division elective courses for a minimum of 32 credits. Courses applied to the minor must be taken for letter grades and passed with grades of C– or better. At least 16 of the 32 credits must be taken at the University of Oregon. No more than 8 upper-division credits from the major may be applied to minor requirements. With the advisor's consent, an environmental issues course and a practical learning experience may be substituted for one of the elective courses. Students may also submit a petition to their advisor to substitute one upper-division course for one of the required lower-division courses.

Required Courses		
ENVS 201	Introduction to Environmental Studies: Social Sciences	4
ENVS 202	Introduction to Environmental Studies: Natural Sciences	4
ENVS 203	Introduction to Environmental Studies: Humanities	4
Advanced Course Requirements		
	One upper-division natural science course from the major requirements sheet	4
	Four electives from areas of social science, policy, humanities, or design	16
Total Credits		32

The Environmental Humanities Minor helps students to understand the environment and the human condition through interdisciplinary scholarship in the humanities and allied disciplines—history, literature, philosophy, art and architecture and their histories, anthropology, sociology, and historical and cultural geography—in conversation with the natural sciences. Through interpretation, argumentation, storytelling, and the arts, Environmental Humanities students reflect on the interactions between humans and their environments over time and among different

cultures, grapple with complex moral and ethical issues, think critically about the world around us, and help to transform our environmental futures through imaginative and creative projects. This minor differs from the Environmental Studies minor in its primary focus on how humanities disciplines and the arts can contribute to understandings of environmental change; environmental ethics and politics; environmental justice; climate justice; and equitable, sustainable futures. At the UO, the Environmental Humanities are also concerned with the long histories of colonialism and racism.

Total Credits		24

¹ Undergraduate students must take 24 credit hours, 20 of which come from an approved list of electives (listed below). Students must take ENVS 203, Introduction to Environmental Studies: Humanities, for a maximum of 4 credit hours. No more than two courses for the Environmental Humanities minor may have the same subject code with the exception of ENVS, which can be two courses beyond the required ENVS 203. All courses must be at the 200-level or above.

All upper-division courses for the minor must be taken in residency at UO. Up to 4 lower-division credits may be taken elsewhere, with the approval of academic and career advisors in Tykeson Hall.

Minor in Food Studies

Foundational Courses		12
ENVS 225	Introduction to Food Studies	4
ANTH 220	Introduction to Nutritional Anthropology	4
or ANTH 248	Archaeology of Wild Foods	
or HPHY 105	Principles of Nutrition	
HIST 215	Food in World History	4
or HUM 245	Food, Art, and Literature	
or PHIL 220	Food Ethics	
Elective Courses ¹		8
Capstone Seminar ²		4
Total Credits		36

¹ Any upper division elective course listed on the current Food Studies minor requirements or tip sheet.

² Students are required to take at least one capstone seminar course. A Food Studies minor-approved 400-level course, LA 390, HPHY 399 Nutrition and Metabolism, or a practical learning experience approved by the Food Studies faculty advisor (e.g. an internship, study abroad, service learning, or research) satisfy the capstone seminar requirement.

- The minor requires 24 graded credits (6 courses) from approved courses, at least twelve of which must be upper-division courses.
- Letter grades of C- or better must be earned in all courses applied to the minor.
- Students can count up to two upper division courses from their major department.
- Students are required to take at least one 400-level course or capstone seminar.
- Some "special topics" courses that focus on food may count toward the minor. Check with the advisors if you have one in mind.
- All upper-division courses for the Food Studies minor must be taken in residency at the University of Oregon. ("In residency" includes UO study abroad courses.)
- No more than three courses with the same subject heading will count for the minor (including ENVS).

Master of Arts and Master of Science in Environmental Studies

The Environmental Studies Program offers graduate study leading to the degrees of master of arts (MA) or master of science (MS) in environmental studies, and an interdisciplinary doctor of philosophy (PhD) degree in environmental sciences, studies, and policy.

Master of Arts Degree in Environmental Studies

The master of arts degree requires demonstrated proficiency in a second language.

Doctor of Philosophy in Environmental Sciences, Studies, and Policy

The Environmental Studies Program offers graduate study leading to the degrees of master of arts (MA) or master of science (MS) in environmental studies, and an interdisciplinary doctor of philosophy (PhD) degree in environmental sciences, studies, and policy.

Doctor of Philosophy Degree in Environmental Sciences, Studies, and Policy

The interdisciplinary PhD degree is offered by the Environmental Studies Program under the umbrella of the Joint-Campus Graduate Program in Environmental Sciences, Studies, and Policy, established by Oregon State University, Portland State University, and the University of Oregon.

The environmental sciences, studies, and policy program takes four or more years of study after earning the master's degree.

Admissions Procedure

Admission to the PhD program must be granted by the Environmental Studies Program and approved by the focal department—another University of Oregon academic unit, chosen by the applicant, that offers a PhD degree. Applications are reviewed independently by the admissions committee in the Environmental Studies Program and in the focal department. Both committees must approve the application before the applicant can be accepted into the program. The online application must be completed and submitted by December 1 for the following fall admission.

Doctor of Philosophy Degree Requirements

Code	Title	Credits
	Focal department course work ¹	
	Environmental studies course work ²	32
	Focal department assessment of competence ³	
	Interdisciplinary assessment of competence ³	
Dissertation:		18
ENVS 603	Dissertation	

¹ Completion of graduate course work as established by the focal department, which includes basic graduate-level proficiency in research methods appropriate to the designated focal discipline.

² Courses taken in departments or programs outside the focal department. First-year students participate in a sequence of courses required of all incoming environmental studies graduate students.

³ The term "assessment of competence" is used in lieu of "comprehensive examination" in recognition of the different ways in which departments engage in such assessments.

PhD students must satisfy breadth and concentration requirements established by the Environmental Studies Program and the focal department. Working with an advisory committee, each student customizes a plan of action for completion of the degree.

Requirements may vary depending on the chosen focal department. In addition to the course work, candidates are required to complete and defend a written dissertation and receive approval of the dissertation by a committee chosen in accordance with Division of Graduate Studies regulations. The committee must have at least five members. The chair and two additional members must be from the focal department. At least three members of the committee must be participants in the Environmental Studies Program.

Graduate Courses

Graduate students typically choose courses that contribute to their individual environmental focus from the Departments of Anthropology; Architecture; Biology; Chemistry and Biochemistry; Earth Sciences; Economics; English; Geography; History; Landscape Architecture; Philosophy; Physics; Planning, Public Policy and Management; Political Science; Psychology; and Sociology; from the International Studies Program; from the School of Law; and others. Consult the individual department listings in this catalog for course descriptions.

Environmental Humanities and Food Studies Graduate Certificates

Our graduate curriculum emphasizes flexible and individualized programs. We encourage innovative and interdisciplinary work culminating in first-rate, interdisciplinary scholarship and creative projects that draw from the natural sciences, social sciences, humanities, environmental design, law and policy, journalism, and education. Students design an individualized course plan and select faculty mentors from across the university to advise them in developing and completing their projects and theses

Graduate Certificate in Environmental Humanities

The field of the Environmental Humanities is inherently interdisciplinary, drawing on the humanities disciplines of history, literature, philosophy, art and architectural history, theater arts, and the humanistic social sciences (anthropology, historical and cultural geography, sociology). The purpose of this certificate is to encourage students to deepen and broaden their understanding of the Environmental Humanities by sampling from a variety of disciplines that focus on the interactions between humans and the natural environment. Students will gain a deeper understanding of these interactions by studying the environment from a variety of humanistic perspectives.

¹ No more than two courses with the same subject code.

² One of these courses may be taken as part of the 24 credit hours of electives, subject to the limitation on more than two courses with the same subject code.

³ Up to 4 credit hours may be taken as part of the 24 credit hours of electives. This course is not subject to the limitation on more than two courses with the same subject code.

Graduate students must take 24 credit hours from an approved list of courses. No more than two of those courses may have the same subject code (with the exception of ENVS 609), and only one course can come

from the Methods Elective courses list. All courses must be at the 500 level or above. There are no required courses. However, students must produce and successfully present a public-facing creative project that draws on two or more disciplines, in consultation with a project advisor from each discipline. Students may elect to take up to 4 credit hours of ENVS 609 Terminal Project as part of their required credit hours, in addition to up to two courses with the ENVS subject code.

Students who wish to earn a certificate will submit a letter of interest to the Center for Environmental Futures, explaining what most compels them about the field of the Environmental Humanities. This letter will help to guide advising.

16 hours must be earned "in residence" at UO.

Graduate Specialization in Food Studies

This 18-credit interdisciplinary graduate specialization track is open to all UO graduate students. By combining the food studies specialization with their primary degree, students can enhance their education and future marketability. The specialization offers a coherent structure that allows students to develop a richer intellectual foundation than would be possible or practical outside the program. The specialization also is designed to enrich the qualifications of Master's and doctoral students, whether they have academic or community-based work aspirations.

European Studies

Nathalie Hester, Program Director

175 Prince Lucien Campbell Hall
5206 University of Oregon
Eugene, Oregon 97403-5206

European studies offers an interdisciplinary minor for undergraduates in any major or professional school discipline. The program is designed for students who seek to enhance work in the major with a broad and comparative knowledge of Europe. The minor designates a student's special expertise in the subject as having acquired a knowledge of Europe beyond that of a single discipline or that concentrated on one country or part of Europe.

The program combines a small number of required core courses that address cross-national topics over a broad sweep of time. Elective courses, chosen by the student in consultation with an advisor or the Program Director, ensure some diversity beyond the field of the student's major.

Undergraduate Studies

Minor in European Studies

The College of Arts and Sciences administers an undergraduate minor in European studies, overseen by the program committee.

To earn a minor, a student must complete 24 credits in addition to a paper or project on a European topic and two to three years of a European language other than English, as described below. Of the 24 credits of core and elective courses, a minimum of 16 credits must be upper division. Courses taken to fulfill the language requirement may not be used to fulfill the 24-credit requirement.

The courses that satisfy the minor are distributed as follows: two core courses, four elective courses, and two to three years of a European foreign language. Core and elective courses applied to the minor must be taken for letter grades and passed with grades of C– or better.

Foreign Language RequirementTwo to three years of a European foreign language⁴**Total Credits** **24**

¹ At least three of the six courses taken to satisfy core and elective course requirements must be taken outside the student's major. With the advisor's approval, exceptions can be made for double majors and for certain interdisciplinary majors, especially global studies and humanities.

² Sixteen of the 24 credits of core and elective courses must be at the upper-division level.

³ Courses preapproved are listed on the program website. Substitutions may be made only with the approval of the student's advisor. At least 4 credits of the humanities electives must be at the 400 level, and at least 4 credits of the social sciences electives must be at the 400 level.

⁴ For BA students, at least three years of college study of a European language other than English is required. For BS students majoring in science, studying for a bachelor of architecture, or majoring in subjects outside the social sciences and humanities, two years of college-level study of a European language other than English is required.

Students seeking to qualify for a minor should, as early as possible, consult the program director, who will assign the student an advisor.

Developing the plan for elective courses with the advisor's help ensures that the courses selected satisfy the minor requirements.

No later than two terms before graduation, the student must notify the advisor of intent to graduate for verification of European studies course work and transcript evaluation. The student must also indicate the European studies minor on the application for graduation. Students must complete major requirements for an undergraduate degree in another department or school of the university.

Significant Paper or Project

A research paper on a topic appropriate to the student's interests is the final requirement. Many EURO minors complete this requirement in the Idea of Europe seminar. For students majoring in disciplines such as music, theater, or the fine arts, a project that draws on these crafts may be substituted for the research paper. The paper or project requirement may be satisfied by work done in the student's major, such as a seminar paper, as long as the content of the paper or project is focused primarily on Europe. The requirement may also be satisfied by a paper done for any of the courses listed below. Students who want to satisfy the requirement in this way must notify the instructor of their intention at the outset of the term so that the instructor can evaluate the paper with this intent in mind. The requirement may also be satisfied by a research paper done under the supervision of a professor in any field for 3 graded credits, such as a paper for Thesis (403). The instructor's agreement to supervise must be obtained in advance, and the 403 subject code may be either in that instructor's department or Thesis (EURO 403).

Folklore and Public Culture**Martha Bayless, Program Director**

541-346-3930

344 Prince Lucien Campbell Hall

The interdisciplinary Folklore and Public Culture Program offers perspectives on ethnic, regional, occupational, gender, and other traditional identities of individuals in specific societies and cultures. Students in the program study the extent to which traditions enrich and express the dynamics of human behavior throughout the world. Folklore and public culture courses examine the historical, cultural, social, political, and economic dimensions of such expressive forms as mythology, legend, folktale, art, music, dance, culinary practices, religion, ritual,

and ceremony. Theoretical analyses, research methods, and fieldwork techniques are integral parts of the curriculum.

The Folklore and Public Culture Program offers bachelor of arts, master of arts, and master of science degrees in folklore and public culture. An undergraduate minor is also available. Folklore and public culture courses cover an extensive range of interdisciplinary topics: cultural heritage, ethnicity, subcultures, popular culture, performance, gender, film, religion, public folklore, and issues of diversity and globalization. Folklore and public culture graduates work in public and private agencies as educators, archivists, editors, arts and humanities consultants, museum curators, and festival planners.

Folklore Archive

The Randall V. Mills Archive of Northwest Folklore is a research repository available to folklore scholars and students. It houses raw field data, student and faculty research projects, and audio-visual materials including more than 7,000 slides. Located in 453 Prince Lucien Campbell Hall, the archive is open to the public.

Undergraduate Studies

Students studying folklore and public culture at the UO receive comprehensive training in scholarly approaches and methods for researching, documenting, and presenting traditional arts and cultural practices within the United States and abroad. Students majoring in folklore and public culture must earn a minimum of 48 credits, of which 32 must be upper division, and 20 of the 48 must be Folklore (FLR) credits.

Women's and Gender Studies		
WGS 321	Feminist Perspectives: Identity, Race, Culture	4

Students may substitute courses to fulfill requirements with the approval of their major advisor. Programs from other departments or programs offering folklore-related courses include anthropology, arts and administration, classics, dance, English, ethnic studies, German and Scandinavian, historic preservation, humanities, international studies, journalism and communication, Judaic studies, music, religious studies, Romance languages, theater arts, and women's, gender, and sexuality studies.

Residency Requirement

Twenty-eight credits of upper-division course work for the major must be completed at the University of Oregon.

Advising

Majors should construct their programs in consultation with an advisor from the core folklore and public culture faculty. At least two terms before graduation, students who want to apply for a folklore and public culture degree should consult the program director to obtain authorization and course work approval.

Minimum Grade

Course work required for the folklore and public culture major, both lower division and upper division, must be passed with grades of C– or better. No more than 8 pass/no pass credits may be applied to the major.

Foreign Language Requirement

Majors must complete the university foreign-language requirement for the BA degree.

Minor in Folklore and Public Culture Courses

The minor requires the completion of 24 credits. Introduction to Folklore (FLR 250) is required of all minors. A maximum of 8 credits may be taken in lower-division courses. A minimum of 12 credits must be "FLR" courses. Remaining courses are selected from the list of courses on the program website. Students may substitute courses from other departments to fulfill this requirement with the approval of their minor advisor. Programs from other departments and programs offering folklore-related courses include anthropology, arts and administration, classics, dance, English, ethnic studies, German and Scandinavian, historic preservation, humanities, international studies, journalism and communication, Judaic studies, music, religious studies, Romance languages, theater arts, and women's and gender studies.

Residency Requirement

Sixteen credits of course work for the minor must be completed at the University of Oregon.

Advising

Minors should construct their programs in consultation with an advisor from the core folklore and public culture faculty. At least two terms before graduation, students who want to apply for a folklore and public culture minor should consult the program director to obtain authorization and course work approval.

Minimum Grade

Course work required for the folklore and public culture minor, both lower division and upper division, must be passed with grades of C– or better. No more than 4 pass/no pass credits may be applied to the minor.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

- **Master of Arts: General Folklore**
- **Master of Arts: Public Folklore**
- **Master of Science: General Folklore**
- **Master of Science: Public Folklore**
- **Graduate Specialization: Folklore and Public Culture**

Graduate Studies

The master of arts (MA) or master of science (MS) degree in folklore and public culture is interdisciplinary. In consultation with an advising committee, students take designated courses from faculty members in anthropology, arts and administration, English, folklore and public culture, German, Scandinavian, and music in addition to elective courses that strengthen their areas of expertise. A public folklore track is available to students preparing for careers in the public sector. A thesis or terminal project is required for completion of the degree. Students working toward an MA degree must demonstrate competence in a second language.

The Department of English's PhD program offers a structured emphasis in folklore. For more information, see the **English** section of this catalog.

Admission Requirements

1. An undergraduate GPA of at least 3.30 (B+)
2. A minimum score of 153 on the verbal section of the general test of the Graduate Record Examinations (GRE), and a score of 4 or better on the analytical writing section (GRE-AW)
3. For nonnative speakers: a minimum score of 575 on the paper-based Test of English as a Foreign Language (TOEFL) or a minimum score of 88 on the Internet-based test

Application procedures are listed on the program website.

Language Requirement for the MA Degree

The master of arts degree requires the satisfactory completion of a second-year level of proficiency in a second language, as required for the B.A. degree (see Bachelor's Degree Requirements (p. 26) in the catalog for details). Competency may be demonstrated by either a standardized test or with adequate undergraduate course work. Language competence must be demonstrated within the overall seven-year limit for completion of a master's degree.

Additional Courses

Consult the program's website or members of its faculty each term for special offerings that fulfill degree requirements. Visit the program website for a list of additional approved courses.

Other undergraduate and graduate courses with related subject matter may be applied to folklore and public culture certificate programs by arrangement with the instructors and the folklore and public culture director. For a list of these courses, visit the program website.

Graduate Specialization: Folklore and Public Culture

Code	Title	Credits
FLR 681	History and Theory of Folklore Research	5
FLR 550	Folklore in the Public Sector	4
Minimum of 7 credits from the following: ²		7
FLR 511	Folklore and Religion	
FLR 513	Folk Art and Material Culture	
FLR 515	Folklore and Foodways	
FLR 583	Folklore and Mythology of the British Isles	
FLR 605	Reading and Conference: [Topic]	
FLR 606	Field Studies: [Topic]	
Total Credits		16

¹ One fieldwork/public folklore course, chosen from FLR 550 (*Public Folklore*), FLR 684 (*Fieldwork*) or another Folklore course or a course taught by core faculty approved by the Director of Graduate Studies in the Folklore and Public Culture Program.

² FLR 550 and FLR 684 are also applicable if not taken to satisfy the fieldwork and public folklore section.

³ Courses must be taken for a letter grade and grade must be a B- or better to count for the specialization. An overlap maximum of 4 credits may be permitted with permission of the Folklore Director of Graduate Studies.

See https://folklore.uoregon.edu/welcome/course_descriptions/ for course descriptions

Additional Requirements:

A statement of interest and a transcript of higher education to date are required. Contact information for recommenders is required, but recommendations are not required at this stage. Send application, including statement of purpose, transcripts, and list of recommenders, to Folklore secretary Beth Magee at emagee@uoregon.edu. Applications are accepted on a rolling basis. Students must be matriculated students at the University of Oregon.

Courses

FLR 198. Workshop: [Topic]. 1-2 Credits.

Repeatable.

FLR 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

FLR 199L. Special Studies: [Topic]. 0 Credits.

Repeatable.

FLR 225. Voices of Africa. 4 Credits.

Novels, music, dance, dress, paintings, films, and cartoons serve as a primary sources from which to learn about the diversity and vivacity of contemporary African peoples.

FLR 235. Folklore and the Supernatural. 4 Credits.

Introduces the study of beliefs about the supernatural by examining diverse approaches to the description and analysis of belief traditions and religious culture.

FLR 236. Magic in the Middle Ages. 4 Credits.

Examines how medieval culture defined magic and how the exploration of magic led to the beginnings of science. Analyzes the practices of medieval western Europe, particularly Britain.

FLR 250. Introduction to Folklore. 4 Credits.

The process and genres of traditional (i.e., folk) patterning; the relations between these forms of expression and other arts, especially English and American literature.

FLR 255. Folklore and United States Popular Culture. 4 Credits.

Explores the relationship between folklore and popular culture, with special emphasis on the analysis of legends, myths, icons, stereotypes, heroes, celebrities, rituals, and celebrations.

FLR 320. Car Cultures. 4 Credits.

Examines car customizing and tuning as forms of vernacular art; studies the environmental impacts of automobiles, the history of the industry, and the peculiarities of drivers' behavior. Offered alternate years.

FLR 350. Folklore and the Bible. 4 Credits.

Studies readings of the Judeo-Christian Bible in connection with mythological and traditional contexts and meanings from ancient times to the present. Offered alternate years.

FLR 370. Folklore and Sexuality. 4 Credits.

Examines intersections of folklore and sexuality as entry points for discussing social issues of sexual and gender identity, intolerance, and resistance. Offered alternate years.

FLR 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

FLR 400M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

FLR 401. Research: [Topic]. 1-6 Credits.

Repeatable.

FLR 403. Thesis. 1-6 Credits.

Repeatable.

FLR 404. Internship: [Topic]. 1-8 Credits.

Repeatable.

FLR 405. Reading and Conference: [Topic]. 1-6 Credits.

Repeatable.

FLR 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

FLR 681. History and Theory of Folklore Research. 5 Credits.

Examines nature of scholarly inquiry, research questions, and techniques. Historic orientation with emphasis on ideological development of folkloristics from its beginnings to the present.

General Social Sciences

Jamie Bufalino, Program Director

275 McKenzie Hall
541-346-4802
gensocialsciences@uoregon.edu

General Social Sciences is a multidisciplinary, undergraduate program that prepares students for success in an interconnected global environment. GSS majors learn how to analyze social issues using research and critical thinking. They also develop innovative problem-solving skills, which are applicable to professional fields like business, government, law, and education. The GSS curriculum provides flexibility in both class schedules and coursework. This allows students to tailor their educations according to their interests, and to balance multiple academic or personal pursuits in their lives.

GSS majors take courses on specific social topics from a variety of disciplinary perspectives. Students can also earn course credit for internships in their desired fields. The curriculum is divided into 4 distinct concentrations (<https://gss.uoregon.edu/concentrations/>):

- Applied Economics, Business, and Society (AEBS)
- Crime, Law, and Society (CLS)
- Globalization, Environment, and Policy (GEP)
- Social Science Teaching (SST)

Each concentration serves as a central focus for required and elective courses within the major. After declaring a concentration, students select courses from a wide range of social sciences departments as well as the university's professional schools (Business, Education, Journalism, and Planning and Public Policy Management).

- Bachelor of Arts and Bachelor of Science (p. 270)
- Minor in Commerce and Society (p. 276)
- Minor in Criminology (p. 277)

Undergraduate Studies

The program has four concentrations. Each concentration has its own set of core courses and then provides a number of elective courses from various departments. Major requirements for each of the four concentrations may be found on the program website.

Applied Economics, Business, and Society

This concentration combines technical training in business with the analytical training of the liberal arts. It draws heavily from courses in the business college and the economics department to offer specific business skills while exploring how business functions in society, on the national level, and in the global context. This concentration is designed specifically for students who plan to work in business or to pursue a master of business administration degree.

Crime, Law, and Society

This concentration provides broad exposure to problems that confront society on the causes and consequences of, and policies on, crime, offering preparation for students with an interest in criminology, law practice, law enforcement, or social services.

Globalization, Environment, and Policy

This concentration focuses on broad social-political and environmental issues at the regional, national, and global levels, as well as the policy planning required to meet these issues within an interdisciplinary context. The globalization concentration provides training for students planning to work in green industry, government, NGOs, and environmental organizations. In addition, the track prepares students to earn graduate degrees in planning, public management, policy studies, or other applied social sciences with a global emphasis.

Social Studies Teaching

This concentration prepares students with the course requirements for admission to the graduate teacher licensure program at the University of Oregon—UO Teach. This concentration does not, in and of itself, lead to a teaching license; rather, it provides a well-defined content so that students are prepared to enroll in a graduate program to become licensed to teach social studies at the middle or high school level.

General social science majors are encouraged to consult with their advisors at least once a year to ensure their remaining course work is structured to meet all the requirements for the major. Students should notify the General Social Science Program office of their intention to graduate at least one term before the proposed graduation date.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Bachelor of Arts and Science in General Social Science

Undergraduate Studies

The program has four concentrations. Each concentration has its own set of core courses and then provides a number of elective courses from various departments. Major requirements for each of the four concentrations may be found on the program website.

Applied Economics, Business, and Society

This concentration combines technical training in business with the analytical training of the liberal arts. It draws heavily from courses in the business college and the economics department to offer specific business skills while exploring how business functions in society, on the national level, and in the global context. This concentration is designed

specifically for students who plan to work in business or to pursue a master of business administration degree.

Crime, Law, and Society

This concentration provides broad exposure to problems that confront society on the causes and consequences of, and policies on, crime, offering preparation for students with an interest in criminology, law practice, law enforcement, or social services.

Globalization, Environment, and Policy

This concentration focuses on broad social-political and environmental issues at the regional, national, and global levels, as well as the policy planning required to meet these issues within an interdisciplinary context. The globalization concentration provides training for students planning to work in green industry, government, NGOs, and environmental organizations. In addition, the track prepares students to earn graduate degrees in planning, public management, policy studies, or other applied social sciences with a global emphasis.

Social Studies Teaching

This concentration prepares students with the course requirements for admission to the graduate teacher licensure program at the University of Oregon—UO Teach. This concentration does not, in and of itself, lead to a teaching license; rather, it provides a well-defined content so that students are prepared to enroll in a graduate program to become licensed to teach social studies at the middle or high school level.

General social science majors are encouraged to consult with their advisors at least once a year to ensure their remaining course work is structured to meet all the requirements for the major. Students should notify the General Social Science Program office of their intention to graduate at least one term before the proposed graduation date.

Undergraduate Studies

The program has four concentrations or tracks. Each concentration has its own set of core courses and then provides a number of elective courses from various departments. Major requirements for each of the four concentrations may be found on the program website.

Applied Economics, Business, and Society

This track combines technical training in business with the analytical training of the liberal arts. It draws heavily from courses in the business college and the economics department to offer specific business skills while exploring how business functions in society, on the national level, and in the global context. This concentration is designed specifically for students who plan to work in business or to pursue a master of business administration degree.

Code	Title	Credits
GSS Applied Economics, Business, and Society Concentration		
Preliminary Core		
BA 101	Introduction to Business	4
EC 201	Introduction to Economic Analysis: Microeconomics	4
EC 202	Introduction to Economic Analysis: Macroeconomics	4
Methods Requirement		

BA 215	Accounting: Language of Business Decisions	4
MATH 243	Introduction to Methods of Probability and Statistics	4

Research Methods Requirement

Complete one of the following courses.		4
GEOG 391	Social Science Inquiry and Research	
PS 102	Thinking Like a Social Scientist	
SOC 311	Research Methods	
PPPM 415	Policy and Planning Analysis	

Specialization Requirements

Must take 7 of the following courses, at least two of the courses must be outside of Economics and Business.		28
BA 316	Management: Creating Value through People	
BA 317	Marketing: Creating Value for Customers	
BA 318	Finance: Creating Value through Capital	
EC (All 300+ and 400+ courses approved, except 400 – 409.		
ENVS 345	Environmental Ethics	
GEOG 342	Geography of Globalization	
GEOG 442	Urban Geography	
GEOG 448	Tourism and Development	
GEOG 468	Contemporary Food Systems

GLBL 431	Cross-Cultural Communication	
HIST 363	American Business History	
HIST 383	Soccer and Society in Latin America	
HIST 425	Economic History of Modern Europe: [Topic]	
HIST 463	American Economic History: [Topic]	
PS 210	Politics of Business	
PS 340	International Political Economy	

Undergraduate Studies

The program has four concentrations or tracks. Each concentration has its own set of core courses and then provides a number of elective courses from various departments. Major requirements for each of the four concentrations may be found on the program website.

Crime, Law, and Society Concentration

This track provides broad exposure to problems that confront society on the causes and consequences of, and policies on, crime, offering preparation for students with an interest in criminology, law practice, law enforcement, or social services.

Code	Title	Credits
GSS Crime, Law, and Society Concentration		
Preliminary Core		
Must Take:		
SOC 204	Introduction to Sociology	4
or SOC 207	Social Inequality	
PS 275	Legal Process: An Introduction to the American Judiciary	4

ES 101	Introduction to Ethnic Studies	4
--------	--------------------------------	---

Methods Requirement

Complete one of the following courses:		4
GEOG 391	Social Science Inquiry and Research	
PPPM 415	Policy and Planning Analysis	
PS 102	Thinking Like a Social Scientist	
SOC 311	Research Methods	

Specialization Requirements

Must take 8 of the following courses:		
ANTH 176	Introduction to Forensic Anthropology	
ANTH 322	Anthropology of the United States	
ANTH 366	Human Osteology Laboratory	
ANTH 473	Advanced Forensic Anthropology	
ANTH 479	Taphonomy: Bones, Bugs, and Burials	
ES 345M		
ES 352	Social Equity and Criminal Justice	
ES 450	Race and Incarceration	
ES 452	Race and Ethnicity and the Law: [Topic]	
FHS 482	Prevention of Youth Violence	
FHS 483	Prevention of Interpersonal Violence	
GEOG 343	Society, Culture, and Place	
GLBL 370	International Human Rights	
J 385	Communication Law	
J 397	Media Ethics	
LING 415	Semantics	
PHIL 344	Introduction to Philosophy of Law	
PHIL 425	Philosophy of Language	
PPPM 418	Introduction to Public Law	
PS 348	Women and Politics	
PS 368	Gender in the Law	
PS 371	United States Congress	
PS 375	Race, Politics, and the Law	
PS 466	Civil Rights in Post-Warren Era	
PS 470	Constitutional Law	
PS 472		
PS 484	United States Supreme Court	
PS 485	Civil Rights and Civil Liberties	
PSY 309	Psychopathology	
PSY 366	Culture and Mental Health	
PSY 380	Psychology of Gender	
PSY 388	Human Sexuality	
SOC 313	Social Issues and Movements	
SOC 328	Self and Society	
SOC 330	Sociology of the Family	
SOC 370	Urban Sociology	
SOC 380	Introduction: Deviance, Control, and Crime	
SOC 425	Issues in Sociology of Family: [Topic]	
SOC 445	Sociology of Race and Ethnicity: [Topic]	
SOC 452	Issues of Migration: [Topic]	
SOC 484	Issues in Deviance, Control, and Crime: [Topic]	

WGS 321	Feminist Perspectives: Identity, Race, Culture
WGS 341	Women, Work, and Class

Requirements

Students must complete 48 credits with a minimum of 24 upper-division credits within the major.

Courses must be completed with a grade of C- or better. A maximum of one course with a grade of 'P' or 'P*' may be used.

Double Dipping Policy

GSS will accept a maximum of 3 courses that overlap ("double-dip") with another major, or 1 course that overlaps with a minor. Please note that degree guide may not reflect the double-dipping policy and it will be the responsibility of the student to ensure they are meeting the requirements. For additional information, meet with an advisor (see Advising (<https://gss.uoregon.edu/contact-infoenroll/>)). The Criminology minor is designed for students that are not majoring in GSS-Crime, Law, and Society. A GSS-CLS major will not be permitted to declare this minor in Criminology.

Undergraduate Studies

The program has four concentrations or tracks. Each concentration has its own set of core courses and then provides a number of elective courses from various departments. Major requirements for each of the four concentrations may be found on the program website.

Globalization, Environment, and Policy

This track focuses on broad social-political and environmental issues at the regional, national, and global levels, as well as the policy planning required to meet these issues within an interdisciplinary context. The globalization concentration provides training for students planning to work in green industry, government, NGOs, and environmental organizations. In addition, the track prepares students to earn graduate degrees in planning, public management, policy studies, or other applied social sciences with a global emphasis.

Code	Title	Credits
GSS Globalization, Environment, and Policy Concentration		
Preliminary Core (Complete all 3 courses)		
GEOG 141	The Natural Environment	4
GEOG 142	Human Geography	4
PS 297	Introduction to Environmental Politics	4
Methods Requirement (Complete one of the following courses)		4
GEOG 391	Social Science Inquiry and Research	
PPPM 415	Policy and Planning Analysis	
PS 102	Thinking Like a Social Scientist	
SOC 311	Research Methods	
Breadth Requirements (Complete two courses from the following list)		8
ANTH 161	Introduction to Cultural Anthropology	
EC 201	Introduction to Economic Analysis: Microeconomics	
ENVS 201	Introduction to Environmental Studies: Social Sciences	
GLBL 240	Perspectives on International Development	

GLBL 250	Value Systems in Cross-Cultural Perspective
GLBL 260	Culture, Capitalism, and Globalization
GLBL 280	Global Environmental Issues and Alternatives
HIST 273	Introduction to Global Environmental History
J 201	Media and Society
LING 211	Languages of the World
PPPM 201	Introduction to Public Policy
PPPM 202	Healthy Communities
PS 205	Introduction to International Relations

Specialization Requirements

Must complete 6 of the following courses:

ANTH 310	
ANTH 329	Immigration and Farmworkers Political Culture
ANTH 411	Politics, Ethnicity, Nationalism
EC 333	Resource and Environmental Economic Issues
ENVS 335	Allocating Scarce Environmental Resources
ENVS 411	Environmental Issues: [Topic]
ENVS 429	Environmental Leadership: [Topic]
ENVS 435	Environmental Justice
ENVS 450	Political Ecology
GEOG 321	Climatology
GEOG 322	Geomorphology
GEOG 323	Biogeography
GEOG 341	Population and Environment
GEOG 342	Geography of Globalization
GEOG 410	Experimental Course: [Topic]
GEOG 425	Hydrology and Water Resources
GEOG 430	Long-Term Environmental Change
GEOG 441	Political Geography
GEOG 448	Tourism and Development
GEOG 461	
GEOG 463	
GEOG 467	International Water Policy
GLBL 323	Islam and Global Forces
GLBL 345	Africa Today: Issues and Concerns
GLBL 360	International Cooperation and Conflict
GLBL 370	International Human Rights
GLBL 421	Gender and International Development
GLBL 423	Development and the Muslim World
GLBL 425	Global Food Security
GLBL 432	Indigenous Cultural Survival
GLBL 433	Childhood in Cross-Cultural Perspective
GLBL 442	South Asia: Development and Social Change
GLBL 444	Development and Social Change in Southeast Asia
GLBL 446	Development and Social Change in Latin America

HIST 415	Advanced World History: [Topic]
HIST 473	American Environmental History: [Topic]
J 320	Gender, Media, and Diversity
J 350	Principles of Public Relations
J 396	International Communication
J 467	Issues in International Communication: [Topic]
LA 410	Experimental Course: [Topic]

PPPM 331	Environmental Management
PPPM 407	Seminar: [Topic]
PPPM 408	Workshop: [Topic]
PS 302	States' Rights (and Wrongs)
PS 304	Democracy, Dictators, and Development
PS 320	International Organization
PS 330	Governments and Politics in Latin America
PS 337	The Politics of Development
PS 367	Science and Politics of Climate Change
PS 380	Gender and Politics in Developing Countries
PS 471	
PS 477	International Environmental Politics
SOC 304	Community, Environment, and Society
SOC 416	Issues in Environmental Sociology [Topic]
WGS 351	Decolonial Feminisms
WGS 432	Gender, Environment, and Development

*ENVS 335 and EC 333 cover much of the same material. Students are discouraged from taking both.

**Topic course is subject to title change; only specific titles approved. Contact GSS director for approval.

Students must complete 48 credits with a minimum of 24 upper division credits within the major.

Courses must be completed with a grade of C- or better. A maximum of one course with a grade of 'P' or 'P*' may be used.

Double Dipping Policy

GSS will accept a maximum of 3 courses that overlap ("double-dip") with another major, or 1 course that overlaps with a minor. Please note that degree guide may not reflect the double-dipping policy and it will be the responsibility of the student to ensure they are meeting the requirements. For additional information, meet with an advisor (see Advising (<https://gss.uoregon.edu/contact-infoenroll/>)).

Undergraduate Studies

The program has four concentrations or tracks. Each concentration has its own set of core courses and then provides a number of elective courses from various departments. Major requirements for each of the four concentrations may be found on the program website.

Social Studies Teaching

This track prepares students with the course requirements for admission to the graduate teacher licensure program at the University of Oregon—UO Teach. This concentration does not, in and of itself, lead to a teaching license; rather, it provides well-defined content so that students are

prepared to enroll in a graduate program to become licensed to teach social studies at the middle or high school level.

General social science majors are encouraged to consult with their advisors at least once a year to ensure their remaining course work is structured to meet all the requirements for the major. Students should notify the General Social Science Program office of their intention to graduate at least one term before the proposed graduation date.

SOC 346 Work and Occupations

SOC 355 Sociology of Gender

SOC 380 Introduction: Deviance, Control, and Crime

Recommended Courses ³

¹ We recommend that students select one course from each of the two categories (European and world history).

² The remaining two courses must be taken exclusively in one area of concentration. 400-level courses from several areas of specialization are not listed below due to the significant number of prerequisites. However, you may take 400-level courses as substitutes for 300-level courses with approval from a General Social Science adviser

³ It is recommended (but not required) that students take one to three courses in Education Studies in preparation for teacher training. Recommended courses include EDST 111, and 420. Additional courses might include EDST 342, 343, 399, 451, 452, 453, 454, 455, 456, 457.

Requirements

Students must complete 68 credits with a minimum of 40 upper division credits within the major.

Courses subject to change as UOTeach/Oregon/National Content standards change.

Courses cannot overlap between sections (i.e., section 1 & 2 or section 2 & 6, etc.).

Courses must be completed with a grade of C- or better. A maximum of one course with a grade of 'P' or 'P*' may be used.

Double Dipping Policy

GSS will accept a maximum of 3 courses that overlap ("double-dip") with another major, or 1 course that overlaps with a minor. Please note that degree guide may not reflect the double-dipping policy and it will be the responsibility of the student to ensure they are meeting the requirements. For additional information, meet with an advisor.

Minor in Commerce and Society

Jamie Bufalino, Program Director

275 McKenzie Hall

541-346-4802

gensocialsciences@uoregon.edu

Minor in Commerce and Society

The buying and selling of goods and services shapes our lives every single day and connects us with people around the globe. The Commerce and Society minor allows students to analyze how these daily transactions work and how they impact people, governments, and the environment. Coursework for the minor encourages the examination of the relationship between commerce and issues such as climate change, social inequality, and globalization from a variety of social scientific perspectives.

The minor is a great option for:

Entrepreneurial and socially-conscious students interested in learning sustainable, equitable business practices.

Intellectually curious students who want to take courses from multiple different departments on campus like political science, global studies, business, and economics.

Independent students who want to tailor the minor to their schedule and their interests.

Total Credits	36

¹ The courses on this list do not have pre-requisites (except where noted). Students are encouraged to request approval of new upper-division courses from any department on related topics and courses that have pre-requisites (in cases where students have completed the required pre-reqs).

Students may take no more than 3 courses from the same subject code (includes both preliminary core and specialization courses). All courses must be taken for a letter grade and be passed with a C- or better. At least 16 credits must be upper-division courses. At least one course must be at the 400 level; it is recommended that students select a 400-level course from a subject code in which they have previously taken a course. Topics courses count toward the minor no matter what the topic.

The Commerce and Society minor is designed for students that are not majoring in GSS-Applied Economic, Business, and Society. A GSS-AEBS major will not be permitted to declare this minor in Commerce and Society.

Minor in Criminology

The criminology minor affords students the opportunity to analyze how society defines, regulates and seeks to prevent criminal behavior as well as considering what factors lead people to commit crimes.

Courses address the role of systemic inequality and state violence in relation to crime. Students select courses from multiple social scientific disciplines including sociology, anthropology, political science, psychology and indigenous, race and ethnic studies to gain an understanding of the nature of crime, including the social and cultural factors contributing to criminal behavior and institutional efforts to prevent it. They also gain skills in analyzing evidence as well as identifying, apprehending and rehabilitating perpetrators.

Minor in Criminology

Code	Title	Credits
Required Core Courses:		16
SOC 204	Introduction to Sociology	
PS 106	Power, Politics, and Inequality	
SOC 380	Introduction: Deviance, Control, and Crime	
ANTH 176	Introduction to Forensic Anthropology	
Electives: ¹		20
ANTH 473	Advanced Forensic Anthropology ²	
CRES 420	Restorative Justice	
CRES 445	Conflicts of Incarceration	
ES 352	Social Equity and Criminal Justice	
ES 450	Race and Incarceration	
FHS 482	Prevention of Youth Violence	
PS 275	Legal Process: An Introduction to the American Judiciary	
PS 375	Race, Politics, and the Law	
PS 466	Civil Rights in Post-Warren Era	
PS 485	Civil Rights and Civil Liberties	
PPPM 418	Introduction to Public Law	
PSY 309	Psychopathology	
PSY 366	Culture and Mental Health	
SOC 370	Urban Sociology	
SOC 484	Issues in Deviance, Control, and Crime: [Topic]	
Total Credits		36

¹ Up to 4 credits of internship or practicum can be applied towards the minor.

² ANTH 176 and ANTH 473 must be taken in sequence if ANTH 473 is selected as an elective.

Geography

Xiaobo Su, Department Head

541-346-4555

541-346-2067 fax

107 Condon Hall
1251 University of Oregon
Eugene, Oregon 97403-1251
uogeog@uoregon.edu

Students who major in geography develop skills in understanding the complex social, economic, political, and environmental processes that shape places around the world. The Department of Geography offers courses that span a broad array of subjects, such as food systems, tourism, the role of borders, climate change, river systems, and invasive species. The geographic perspective provides a critical look at social, environmental, and policy issues relevant in today's world. Students may also develop skills in geographic information systems (GIS), cartography, and spatial analysis that provide them with in-demand tools to apply in their postgraduate career.

Geography provides for varied perspectives about places to help students develop into critical thinkers, efficient communicators, and problem-solvers. Geography can often enhance other fields, including spatial data science and technology, history, public policy and management, earth sciences, political science, sociology, and environmental studies. For more information, visit <https://geography.uoregon.edu/>.

InfoGraphics Lab

The InfoGraphics Lab is a mapping and geospatial technologies facility located in the Department of Geography (<http://geography.uoregon.edu/>). The laboratory works on a variety of supported projects with faculty members, researchers, and government agencies. The application of cartographic design and geographic information science is its focus. It supports research, instruction, and public service activities at the university. Graduate and undergraduate students may be employed on lab projects.

Faculty

Daniel P. Buck, associate professor (political economy, food geographies, East Asia). BA, 1987, California State, Chico; MA, 1996, PhD, 2002, California, Berkeley. (2008)

Mark Carey, professor (environmental history, human geography, environmental justice, and science and technology studies). BA, 1991, State University of New York at Potsdam; MA, 1998, University of Montana, Missoula; PhD, 2005 University of California, Davis. (2010)

Shaul E. Cohen, associate professor (political, environmental, cultural; Middle East). BA, 1983, Clark; MA, 1987, PhD, 1991, Chicago. (1996)

Sarah Cooley, assistant professor (hydrology, remote sensing, climate change). BS, 2015, NC at Chapel Hill, MPhil, 2016, University of Cambridge, PhD, 2020, Brown. (2021)

Carolyn Fish, assistant professor (geographic information system science, cartography). BS, 2008, Pennsylvania State; MS, 2010, Michigan State; PhD, 2018, Pennsylvania State. (2018)

Mark Fonstad, associate professor (geomorphology, remote sensing, hydrology). BA, 1995, Wisconsin, Madison; MA, 1997, Ohio; PhD, 2000, Arizona State. (2011)

Daniel G. Gavin, professor (biogeography, paleoecology, climate change). BA, 1992, Dartmouth College; MS, 1997, PhD, 2000, Washington (Seattle). (2006)

Leigh Johnson, assistant professor (political ecology, development, economic geography). BA, 2003, Columbia; PhD, 2011, California, Berkeley. (2016)

Nicholas P. Kohler, senior instructor (geographic information systems, cartography, human-environmental relations). BA, 1989, Princeton; MA, 1997, PhD, 2005, Oregon. (2006)

Amy K. Lobben, professor (geographic information system science, behavioral geography, data visualization). BA, 1991, MA, 1996, Georgia State; PhD, 1999, Michigan State. (2004)

Hui "Henry" Luan, assistant professor (geographic information system science, spatial statistics). BS, 2009, MS, 2011, Wuhan; PhD, 2016, Waterloo. (2018)

Leslie McLees, senior instructor/ug director (urban geography, urban agriculture, Africa); undergraduate advisor. BS, 1999, Washington State; MA, 2004, Hawaii, PhD, 2012, Oregon. (2014)

Joanna Merson, research assistant (cartography, data-visualization, GIS). BSc, 2009, Victoria; MA, 2013, Arizona State. (2017)

Laura Pulido, professor (critical ethnic studies, environmental justice, Chicano studies). See **Indigenous, Race, and Ethnic Studies**.

Johnny Ryan, assistant professor (glaciology, geospatial data science, remote sensing). BS, 2012, University of Nottingham, UK, 2013 MPhil, University of Cambridge, UK, PhD, 2018, Aberystwyth University, UK (2021)

Lucas Silva, assistant professor (terrestrial ecology, biogeochemistry, biogeography). See **Environmental Studies**.

Alethea Y. Steingisser, senior research assistant (cartography and graphic design, geographic information systems); cartographic project manager, InfoGraphics Lab. BS, 2002, California State, Northridge; MS, 2006, Oregon. (2006)

Xiaobo Su, professor (cultural politics, tourism and urban conservation, China). BArch, 2000, Southeast University (Nanjing); MSc, 2003, Sun Yat-sen University; PhD, 2007, National University of Singapore. (2007)

Peter A. Walker, professor (cultural and political ecology, US West, Africa). BA, 1986, California, Berkeley; MS, 1990, Harvard; PhD, 1997, California, Berkeley. (1997)

Emeriti

Patrick J. Bartlein, professor emeritus. BA, 1972, MS, 1975, PhD, 1978, Wisconsin, Madison. (1982)

Stanton A. Cook, professor emeritus. AB, 1951, Harvard; PhD, 1960, California, Berkeley. (1960)

W. Andrew Marcus, professor emeritus. BS, 1978, Stanford; MA, 1983, Arizona State; PhD, 1987, Colorado. (2001)

Patricia F. McDowell, professor emeritus. BA, 1971, MA, 1977, Illinois Institute of Technology; PhD, 1980, Wisconsin, Madison. (1982)

Alexander B. Murphy, professor emeritus. BA, 1977, Yale; JD, 1981, Columbia; PhD, 1987, Chicago. (1987)

Alvin W. Urquhart, professor emeritus. AB, 1953, MA, 1958, PhD, 1962, California, Berkeley. (1960)

Ronald Wixman, professor emeritus. BA, 1968, Hunter; MA, 1972, Columbia; PhD, 1978, Chicago. (1975)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

- **Bachelor of Arts in Geography**
- **Bachelor of Science in Geography**
- **Bachelor of Arts in Spatial Data Science and Technology**
- **Bachelor of Science in Spatial Data Science and Technology**
- **Minor in Geography**
- **Minor in Climate Studies**

Undergraduate Studies

The Department of Geography offers bachelor of arts and bachelor of science degrees with majors in geography and spatial data science and technology. Undergraduate students in the geography major develop an awareness of the natural and cultural landscapes of several regions of the world and investigate the processes that form them; students in the spatial data science and technology major develop skills in data sciences and geospatial technologies. Lower-division courses are open to any student at the university. For students transferring to the university in their third year, preparation in introductory college geography courses is desirable.

Geography

An undergraduate major in geography follows a broadly based general degree program. Both bachelor of arts (BA) and bachelor of science (BS) degrees are offered in the department. To achieve depth in a particular subfield of geography, electives are chosen from one of six specializations:

1. environment, economy, and sustainability
2. geographic education
3. water science and policy
4. culture, politics, and place
5. environmental systems
6. geographic information system science

Although a degree in geography is a liberal arts degree, many graduates have found related vocational opportunities in government or private employment, principally in planning, environmental research, cartography, or geographic information system science.

Bachelor of Arts in Geography: Degree Requirements

Code	Title	Credits
Fundamentals: Introductory Core		
GEOG 141	The Natural Environment	4
GEOG 142	Human Geography	4
GEOG 181	Our Digital Earth	4
Fundamentals: Advanced Core

At least eight geography courses must be taken for a letter grade. A grade of C– or better or P (pass) is required in each course, and a GPA of 2.25 or better is required in courses used to satisfy major requirements.

Geography majors seeking a BA degree must demonstrate proficiency in a second language by passing the third term of a second-year university language course with a grade of C– or better or by examination indicating an equivalent level of proficiency.

Geography majors seeking a BS degree must complete a mathematics sequence that satisfies the university's mathematics requirement for a BS degree. Mathematics courses must be passed with a grade of at least C– or P. The optimal courses for the university's mathematics requirement depend on one's track and focus; consult with an advisor.

Students considering graduate school should complete both the mathematics and language requirements.

Spatial Data Science and Technology

The spatial data science and technology major requires a minimum of 48 credits, drawing on courses in geography and computer information science. The major requires four compulsory courses (16 credits) that provide foundational skills, concepts, and critical thinking abilities. An additional eight elective courses (32 credits) are required. Upon declaring the major, students meet with the geography undergraduate advisor to tailor a series of elective courses best suited to individual student needs and employment aspirations. At least nine courses used for the major must be taken for a letter grade. A grade of C– or better and a GPA of 2.25 or better is required in courses applied to the major.

For more information, e-mail the undergraduate advisor, Leslie McLees, at geogadvr@uoregon.edu, or schedule an advising appointment at <https://geography.uoregon.edu/undergrad/advising/>.

Bachelor of Arts in Spatial Data Science and Technology: Degree Requirements

Core courses provide foundational skills, concepts, and critical thinking abilities. Some of the introductory courses, such as GIScience I (GEOG 481), are prerequisites for more advanced courses. Students are not required to complete these before moving to elective courses (except where prerequisites are required).

Electives. Rather than adopting a series of specializations, the electives component will remain flexible. Upon declaring the major, students should meet with the undergraduate advisor to work out a series of courses that best fit student needs and employment aspirations. A full list of elective courses can be found on the major page (<https://geography.uoregon.edu/sdst/>) on the department website.

Choose courses totaling 32 credits from the following:		32
GEOG 403	Thesis	
GEOG 482	GIScience II	
GEOG 485	Remote Sensing I	
GEOG 490	GIScience: [Topic] ¹	
GEOG 491	Advanced Geographic Information Systems	
GEOG 493	Advanced Cartography	
GEOG 494	Spatial Analysis	
GEOG 495	Geographic Data Analysis	
GEOG 498	Geospatial Project Design	
CS 210	Computer Science I	
CS 211	Computer Science II	

300- or 400-level course with a GEOG subject code not listed above

400-level course with a CS subject code not listed above

Total Credits **48**

¹ Special topics include courses that are offered less frequently, but also qualify for credit when offered under the course number GIScience: [Topic] (GEOG 490). Topics include Web Mapping, Server GIS, Qualitative Spatial Reasoning, and Spatial Simulation.

Honors Programs

The Department of Geography offers an honors option for its majors. More information is available on the department website (<https://geography.uoregon.edu/undergrad/honors/>) or by contacting the undergraduate advisor, geogadvr@uoregon.edu.

Minor in Geography

Requirements

Code	Title	Credits
Upper-division GIScience course		4
Upper-division biophysical geography course		4
Upper-division human geography course		4
Three geography courses		12
Total Credits		24

At least 16 credits must be taken for a letter grade and 12 credits must be upper division. Grades of C– or better or P must be earned in all geography courses applied to the minor.

Minor in Climate Studies

Code	Title	Credits
Required Course Courses: ¹		
GEOG 141	The Natural Environment	
GEOG 321	Climatology	
GEOG 361	Global Environmental Change	
Minimum two social science courses on impacts, policy, and adaptation: ²		
GEOG 465	Environment and Development	
PS 367	Science and Politics of Climate Change	
ENVS 435	Environmental Justice or ENVS 535 Environmental Justice	
PPPM 340	Climate-Change Policy	
Science Electives: ³		
GEOG 421	Advanced Climatology: [Topic]	4
GEOG 430	Long-Term Environmental Change	4

¹ GEOG 321 and 361 can be taken in any order but must follow 141.

² Experimental Course: [Topic] (GEOG 410), Temporary Multilisted Course (ENVS 400M), Experimental Course: [Topic] (EDST 410) and Experimental Course: [Topic] (SOC 410) courses approved individually.

³ One required if using two social-science electives. Experimental Course: [Topic] (GEOG 410) and Temporary Multilisted Course (ENVS 400M) courses approved individually.

Second Majors

Geography majors may also complete a second major in any field of the student's choice. Two of the most common are environmental studies or environmental science—an excellent combination with geography because they offer grounding in the physical and human systems within which environmental issues are situated in a larger global context. For details about adding a second major, visit the department's website.

Internships in Geography

Internships are unpaid off-campus work experiences. Students receive one credit for each three hours of participation as an intern; internships may be extended to a second term with prior departmental approval. Interns apply geographic concepts in the service of government, private industry, or nongovernmental organizations. Internships are initiated by students or may come at the suggestion of a faculty member or the request of an employer. Past interns have worked in the Eugene Planning and Development Department, the US Department of Agriculture Forest Service, Lane County Soil Conservation District, and many other organizations and agencies.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

- Master of Arts
- Master of Science
- Doctor of Philosophy

Graduate Studies

Graduate work leading to the master of arts (MA), master of science (MS), and doctor of philosophy (PhD) degrees is offered.

The department's graduate programs emphasize the natural environment; the interactions of environment and society; culture, politics, and space; geographic information system science; and geographic education. The master's and PhD programs closely follow the research

interests of the geography faculty. Students follow an individualized program that includes courses and seminars in related disciplines.

Although the department requires knowledge of the fundamentals of geography, it welcomes students whose undergraduate work has been in other disciplines and who can apply their training to geographic problems.

Admission

The Department of Geography only accepts applications for admission fall term. Application materials should arrive by December 10 to be considered the following fall term. The department notifies applicants of the admission decision around April 1. Graduate teaching fellowships typically are awarded once a year, in April.

The department's website has online application materials and information about the application process.

Applicants must submit scores from the Graduate Record Examinations general test. There is no minimum requirement for GRE scores.

International students whose native language is not English must submit results from the Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) examination from within five years of the application date. The Department of Geography requires a minimum score of 575 (paper-based) or 88 (Internet-based) for the TOEFL. The minimum overall band score on the academic module of the IELTS is 7.0. For more information about the TOEFL and IELTS examination, visit their respective websites.

For more information about the geography department graduate application process, visit geography.uoregon.edu/graduate/admissions (<http://geography.uoregon.edu/graduate/admissions/>).

General Requirements

In both the master's and the doctoral programs, students are expected to develop a broad background in the discipline of geography, in-depth knowledge in an area of emphasis, and the ability to conduct and report independent research, including the use of appropriate geographic techniques. The area of emphasis may combine more than one traditional subfield of geography. The PhD requires development of more in-depth knowledge in the area of emphasis and a substantial independent research project resulting in a dissertation.

Area of Emphasis	Course Topics
The Natural Environment	<ul style="list-style-type: none"> • Advanced biogeography • Advanced climatology • Advanced geomorphology • Hydrology and water resources • Fluvial geomorphology • Long-term environmental change • Climatological aspects of global change • Fire and natural disturbances

Environment and Society	<ul style="list-style-type: none"> • Environmental alteration • Geography, law, and the environment • Environment and development • Gender and environment • International water policy • North American historical landscapes • Political ecology
-------------------------	---

Culture, Politics, and Place	<ul style="list-style-type: none"> • Political geography • Urban geography • Global migration • Cultural geography • Tourism and development
------------------------------	---

Geographic Information System Science	<ul style="list-style-type: none"> • Geographic information system science • Remote sensing • Advanced geographic information systems • Advanced cartography • Geographic data analysis
---------------------------------------	--

Geographic Education	<ul style="list-style-type: none"> • Research in geographic education • Preparing to teach Advanced Placement human geography • Geospatial technology for educators • Geography education assessment
----------------------	--

The department also offers course work and faculty expertise in the American West, Europe (both West and East), the Middle East, Latin America, Asia, and Africa.

Master's Degree Program

The master's degree in geography (MA or MS) emphasizes broad understanding of physical and human geography and basic geographic techniques. Students develop specialized research skills during work on the thesis.

The master of arts degree requires second-year university-level proficiency in a second language. Competency may be demonstrated by a standardized test or with adequate undergraduate course work. Competency in a foreign language or a computer language may be used to meet the departmental language requirement for the master of science degree.

The master's degree option in geographic education is designed for teachers who have K–12 teaching licensure or are working toward their initial or continuing licensure. Most graduate students who take the geographic education option also have several years of teaching experience.

A committee of two geography faculty members supervises the research and writing of a master's thesis that shows evidence of original research and writing.

Master of Arts in Geography

Code	Title	Credits
Core Courses ¹		
GEOG 608	Workshop: [Topic] (Thesis Writing) ²	2-16
GEOG 611–612 & GEOG 613	Theory and Practice of Geography I-II and Research Design ³	12
Breadth Requirement		
Three upper-division or graduate-level courses, with one in each area of emphasis (physical geography, human geography, geographic information system science)		12
Methods Courses		
Master's students must take one methods course, either quantitative or qualitative		4
Total Credits		30-44

¹ Core courses or their equivalents must be completed either during the program or prior to entering.

² Must take course for 1 credit every winter and spring term the student is in residence.

³ Must be taken during the first year the graduate student is in residence.

Code	Title	Credits
Additional Master's Required Courses		
GEOG 507	Seminar: [Topic]	1-5
or GEOG 607	Seminar: [Topic]	
GEOG 507	Seminar: [Topic]	1-5
or GEOG 607	Seminar: [Topic]	
GEOG 503	Thesis ¹	9
Total Credits		11-19

¹ At least 3 credits must be taken during the term the degree is granted. Every master's thesis must be presented at a public lecture.

Master of Science in Geography

or GEOG 607	Seminar: [Topic]	
GEOG 503	Thesis ¹	9
Total Credits		11-19

¹ At least 3 credits must be taken during the term the degree is granted. Every master's thesis must be presented at a public lecture.

Doctoral Degree Program

The PhD program requires competent understanding of one of the systematic fields of geography and a broad understanding of geographic topics that enables the student to address and synthesize problems that cross the various fields of geography. While this program is designed to suit each individual's background and interests, prospective candidates should pay attention to the systematic specialization and regional interests of the department's faculty members before applying for admission.

The candidate may use Research: [Topic] (GEOG 601) and Reading and Conference: [Topic] (GEOG 605) to follow specific interests with individual members of the faculty. The PhD program, planned with faculty committee approval, is measured by achievement of the stated goals rather than by any specific number of credits.

PhD Requirements

Code	Title	Credits
Core Courses ¹		
GEOG 608	Workshop: [Topic] (Thesis Writing) ²	2-16
GEOG 611–612 & GEOG 613	Theory and Practice of Geography I-II and Research Design ³	12
Breadth Requirement		
Four upper-division or graduate-level courses, with at least one in each area of emphasis (physical geography, human geography, geographic information science) and no more than one in the student's focal area.		16
Methods Courses		
Doctoral students must take two methods courses, one quantitative and one qualitative		8
Total Credits		38-52

¹ Core courses or their equivalents must be completed either during the program or prior to entering.

² Must take course for 1 credit every winter and spring term the student is in residence.

³ Must be taken during the first year the graduate student is in residence.

Code	Title	Credits
Additional Doctoral Required Courses		
GEOG 607	Seminar: [Topic]	1-5
GEOG 607	Seminar: [Topic]	1-5
GEOG 603	Dissertation ¹	1-16

¹ At least 3 credits must be taken during the term the degree is granted. Every doctoral dissertation must be presented at a public lecture.

PhD students must complete a preparation in fields of specialization requirement that entails completion of courses and seminars recommended by the advisor or committee members.

After completing the appropriate course work, graduate seminars, advancement to candidacy is achieved by passing a comprehensive written examination. The comprehensive exam is an opportunity to demonstrate that the student

- can articulate core areas of expertise and situate the student's overall research agenda in relation to these areas of expertise
- understands and can defend major theoretical and methodological issues in these core research and teaching areas
- has a sense of where those theories and methods stand in relation to major themes in contemporary and interdisciplinary scholarship

PhD students develop their own questions. These questions should focus on the three areas of expertise as identified in consultation between the student and advisor. At least three questions should be developed for each of the three areas. The committee may ask for more than three. At this point, the committee selects four examination questions. The committee may constrain, expand, or otherwise edit any of the student-written questions. The student has four weeks to write the responses (four to five pages to each question). Approximately one to three weeks after turning in the written responses, the student defends the responses orally. Please see the geography department's *Graduate Program Handbook* for additional details.

Within nine months of completing the comprehensive examination, the student must present a dissertation proposal for approval by the student's dissertation committee. The completed dissertation, the capstone of the doctoral program, presents the results of substantive and original research on a significant geographic problem. It is defended in a public oral presentation.

Courses

GEOG 141. The Natural Environment. 4 Credits.

The earth's physical landscapes, vegetation patterns, weather, and climate; emphasis on the dynamic interactions among climate, landforms, vegetation, and soils.

GEOG 142. Human Geography. 4 Credits.

The spatial organization of humans and their activities on Earth's surface. Cultural, political, and economic influences shaping places and their interconnections.

GEOG 181. Our Digital Earth. 4 Credits.

Exploring the emergence of geospatial data and technologies that are pervasive in our everyday lives and how they are shaping society.

GEOG 196. Field Studies: [Topic]. 1-2 Credits.

Repeatable.

GEOG 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

GEOG 201. World Regional Geography. 4 Credits.

Introduction to the world's cultural regions. Study of the cultural and environmental factors that make different parts of the world distinct.

GEOG 202. Geography of Europe. 4 Credits.

Physical and cultural processes that have shaped the rural and urban landscapes of Europe.

GEOG 208. Geography of the United States and Canada. 4 Credits.

Historical and geographical analysis of the physical and human geography of the U.S. and Canada. Topics include physical regions, settlement patterns, economic development, and urbanization. Offered alternate years.

GEOG 209. Geography of the Middle East and North Africa. 4 Credits.

Physical and cultural processes that have shaped the rural and urban landscapes of the Middle East and North Africa.

GEOG 281. The World and Big Data. 4 Credits.

Explores technical foundations and social and economic applications of big data along the "5V" dimensions of volume, variety, velocity, veracity, and visualization.

GEOG 321. Climatology. 4 Credits.

Energy and moisture in the atmosphere, atmospheric circulation, controls of regional and microclimates, applied climatology, climatic variations, past and future climates.

Prereq: GEOG 141.

GEOG 322. Geomorphology. 4 Credits.

Landforming processes with emphasis on mass movements, rivers, eolian, glacial, and coastal processes. Special fee.

Prereq: one from GEOG 141, EARTH 102, EARTH 202.

GEOG 323. Biogeography. 4 Credits.

Relation of plants and animals to the environment, distribution of individual species, historical changes in plant distribution.

Prereq: one from GEOG 141, EARTH 103, EARTH 203, BI 370.

GEOG 341. Population and Environment. 4 Credits.

Patterns of population growth over history and place, current policies and programs, and impacts and trends in United States and international contexts. Includes method and theory.

GEOG 342. Geography of Globalization. 4 Credits.

Historical and geographical dimensions of globalization; emphasizes economic and social factors. Topics include multinationals, trade agreements, sustainability, global inequalities, and racial and gender divisions of labor.

GEOG 343. Society, Culture, and Place. 4 Credits.

Examines ways in which geographical context reflects and shapes cultural and social processes. Importance of place and territory in human affairs.

GEOG 360. Watershed Science and Policy. 4 Credits.

Physical and biological processes of watersheds; problems of land use, water quality, riparian zones, aquatic ecology; scientific basis of watershed management and policy. Special fee.

Prereq: one from GEOG 141, EARTH 102, EARTH 202, BI 130, BI 213.

GEOG 361. Global Environmental Change. 4 Credits.

Natural and human-induced environmental changes and their impact on different environmental systems. Not available to those who have taken GEOG 143.

Prereq: GEOG 141.

GEOG 391. Social Science Inquiry and Research. 4 Credits.

Understanding scientific inquiry, the scientific method and learning to critique social science research. Readings and discussion focus on the questions, methods, conclusions and outcomes of research.

GEOG 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

GEOG 400M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

GEOG 401. Research: [Topic]. 1-21 Credits.

Repeatable.

GEOG 403. Thesis. 1-12 Credits.

Repeatable.

GEOG 405. Reading and Conference: [Topic]. 1-21 Credits.

Repeatable.

GEOG 406. Practicum: [Topic]. 1-12 Credits.

Repeatable.

GEOG 407. Seminar: [Topic]. 1-5 Credits.

Repeatable.

GEOG 408. Workshop: [Topic]. 1-16 Credits.

Repeatable.

GEOG 409. Terminal Project. 1-12 Credits.

Repeatable.

GEOG 410. Experimental Course: [Topic]. 1-4 Credits.

Repeatable. Topics are listed in the class schedule each term.

GEOG 419. Professional Geographer. 2 Credits.

Explores the geographical perspective on world cultures and global issues, and prepares students how to articulate a spatial perspective and effectively communicate geographic training and skills to broader audiences.

GEOG 421. Advanced Climatology: [Topic]. 4 Credits.

Topics in climatology, including physical climatology, dynamic and synoptic climatology, and paleoclimatology. Repeatable when topic changes.

Prereq: GEOG 321.

GEOG 425. Hydrology and Water Resources. 4 Credits.

Emphasis on surface water including precipitation, evapotranspiration, surface runoff, and stream flow. Understanding and analysis of processes. Management for water supply and quality. Special fee.

Prereq: GEOG 321 or GEOG 322; MATH 111.

GEOG 427. Fluvial Geomorphology. 4 Credits.

Hydraulics and hydrology of stream channels; channel morphology and processes; drainage network development; fluvial deposits and landforms; field and analytical methods. Required field trips. Special fee.

Prereq: MATH 112; one from GEOG 322, GEOG 425, EARTH 334.

GEOG 430. Long-Term Environmental Change. 4 Credits.

Evolution of the physical landscape during the Quaternary period. Elements of paleoclimatology, paleoecology, and geomorphology. Required field trips. Special fee.

Prereq: one from GEOG 321, GEOG 322, GEOG 323.

GEOG 433. Fire and Natural Disturbances. 4 Credits.

Wildfire and other landscape disturbance processes, historical and current patterns of fire, use and management of fire. Offered alternate years.

Prereq: BI 307 or GEOG 323 or BI 370.

GEOG 441. Political Geography. 4 Credits.

Spatial perspectives on global political patterns and processes.

Relationship of political territories to resources, ethnic patterns, and ideological communities. Impact of political arrangements on landscapes.

Prereq: Junior standing.

GEOG 442. Urban Geography. 4 Credits.

Urbanization throughout the world, the structure of urban settlements; cities as regional centers, physical places, and homes for people; geographic problems in major urban environments.

Prereq: Junior standing.

GEOG 444. Cultural Geography. 4 Credits.

Patterns of culture as a force in human affairs. Dynamics of identity, place, and power. The creation of culture at different scales.

GEOG 445. Culture, Ethnicity, and Nationalism. 4 Credits.

Relationship of ethnic groups and nationality to landscapes, perception, and cultural geographic phenomena. Distribution of ethnic and national groups. Junior standing required.

GEOG 448. Tourism and Development. 4 Credits.

Tourism-related concepts and practices associated with tourism planning, development, marketing, and impacts in different geographic contexts.

GEOG 465. Environment and Development. 4 Credits.

Critical analysis of development concepts. Economic activity and environmental impacts. Sustainable development. Development projects and landscapes in the industrializing world.

Prereq: Junior standing.

GEOG 467. International Water Policy. 4 Credits.

Examines problems in water policy and governance in a global context. Draws on interdisciplinary perspectives, compares case studies, and analyzes institutions.

GEOG 468. Contemporary Food Systems. 4 Credits.

Explores contemporary food systems at local, national, and global scales. Emphasis on the political economy and sociocultural dynamics linking agriculture, food industries, and consumption.

GEOG 471. North American Historical Landscapes. 4 Credits.

Examines the origin and evolution of cultural landscapes in North America through historical and contemporary sources, and draws upon the local region for student projects.

Prereq: Junior standing.

GEOG 475. Advanced Geography of Non-European-American Regions: [Topic]. 4 Credits.

Repeatable. Examination of the settlement patterns, regional economies, political organization, and character of the landscapes of selected major regions of the non-European and American world. Repeatable when region changes.

GEOG 481. GIScience I. 4 Credits.

Introduction to geographic information science, geographic information systems (GIS), the current population survey (CPS), remote sensing, and cartography. Sequence with GEOG 482, GEOG 491.

GEOG 482. GIScience II. 4 Credits.

Spatial data collection, spatial data models, database design, data editing, geographic information system (GIS) project management, and advanced topics in geographic information science. Sequence with GEOG 481, GEOG 491, GEOG 493.

Prereq: GEOG 481.

GEOG 485. Remote Sensing I. 4 Credits.

Introduction to remote sensing science including its physical basis, instruments, platforms, data, processing methods, and applications. Sequence with GEOG 486.
Prereq: GEOG 481.

GEOG 486. Remote Sensing II. 4 Credits.

The use of digital electromagnetic data for classification, mapping, and monitoring biologic, hydrologic, atmospheric, geologic, and human processes and environmental change. Sequence with GEOG 485.
Prereq: GEOG 485.

GEOG 490. GIScience: [Topic]. 4 Credits.

Repeatable. Advanced topics on geographic information systems science including spatial analysis and modeling, data visualization, cartography, volunteered geographic information, GIS programming. Repeatable five times for a maximum of 24 credits.
Prereq: GEOG 481.

GEOG 491. Advanced Geographic Information Systems. 4 Credits.

Automated processing of geospatial data using Python scripting language. Programming for spatial analysis such as 3-D and network modeling; processing of big data (satellite imagery, climate data, demographic information). Sequence with GEOG 481, GEOG 482.
Prereq: GEOG 482.

GEOG 493. Advanced Cartography. 4 Credits.

Map design and production methods; use of color, cartographic visualization, graphing, data graphics theory, and integration of geographic information systems (GIS) and graphics tools. Sequence with GEOG 481, GEOG 482.
Prereq: GEOG 481.

GEOG 494. Spatial Analysis. 4 Credits.

Introduction to a variety of spatial analysis techniques that can be used for understanding and modeling geographic phenomena.
Prereq: GEOG 481.

GEOG 495. Geographic Data Analysis. 4 Credits.

Analysis and display of geographical data by traditional data-analytical methods and by scientific-visualization approaches.
Prereq: GEOG 481.

GEOG 497. Qualitative Methods in Geography. 4 Credits.

Explores conceptual and practical dimensions of qualitative research. Includes linking theory and method; research question formulation; project design; ethics; data gathering, analysis, and presentation.
Prereq: one from GEOG 341, GEOG 342, GEOG 343.

GEOG 498. Geospatial Project Design. 4 Credits.

Introduction to methods for designing and implementing professional projects involving geospatial data, technologies, and analytical methods.
Prereq: GEOG 481.

GEOG 503. Thesis. 1-16 Credits.

Repeatable.

GEOG 507. Seminar: [Topic]. 1-5 Credits.

Repeatable.

GEOG 508. Workshop: [Topic]. 1-16 Credits.

Repeatable.

GEOG 510. Experimental Course: [Topic]. 1-4 Credits.

Repeatable. Topics are listed in the class schedule each term.

GEOG 521. Advanced Climatology: [Topic]. 4 Credits.

Topics in climatology, including physical climatology, dynamic and synoptic climatology, and paleoclimatology. Repeatable when topic changes.

GEOG 525. Hydrology and Water Resources. 4 Credits.

Emphasis on surface water including precipitation, evapotranspiration, surface runoff, and stream flow. Understanding and analysis of processes. Management for water supply and quality. Special fee.

GEOG 527. Fluvial Geomorphology. 4 Credits.

Hydraulics and hydrology of stream channels; channel morphology and processes; drainage network development; fluvial deposits and landforms; field and analytical methods. Required field trips. Special fee.

GEOG 530. Long-Term Environmental Change. 4 Credits.

Evolution of the physical landscape during the Quaternary period. Elements of paleoclimatology, paleoecology, and geomorphology. Required field trips. Special fee.

GEOG 533. Fire and Natural Disturbances. 4 Credits.

Wildfire and other landscape disturbance processes, historical and current patterns of fire, use and management of fire. Offered alternate years.

GEOG 541. Political Geography. 4 Credits.

Spatial perspectives on global political patterns and processes. Relationship of political territories to resources, ethnic patterns, and ideological communities. Impact of political arrangements on landscapes.

GEOG 542. Urban Geography. 4 Credits.

Urbanization throughout the world, the structure of urban settlements; cities as regional centers, physical places, and homes for people; geographic problems in major urban environments.

GEOG 544. Cultural Geography. 4 Credits.

Patterns of culture as a force in human affairs. Dynamics of identity, place, and power. The creation of culture at different scales.

GEOG 545. Culture, Ethnicity, and Nationalism. 4 Credits.

Relationship of ethnic groups and nationality to landscapes, perception, and cultural geographic phenomena. Distribution of ethnic and national groups.

GEOG 548. Tourism and Development. 4 Credits.

Tourism-related concepts and practices associated with tourism planning, development, marketing, and impacts in different geographic contexts.

GEOG 565. Environment and Development. 4 Credits.

Critical analysis of development concepts. Economic activity and environmental impacts. Sustainable development. Development projects and landscapes in the industrializing world.

GEOG 568. Contemporary Food Systems. 4 Credits.

Explores contemporary food systems at local, national, and global scales. Emphasis on the political economy and sociocultural dynamics linking agriculture, food industries, and consumption.

GEOG 571. North American Historical Landscapes. 4 Credits.

Examines the origin and evolution of cultural landscapes in North America through historical and contemporary sources, and draws upon the local region for student projects.

GEOG 575. Advanced Geography of Non-European-American Regions: [Topic]. 4 Credits.

Repeatable. Examination of the settlement patterns, regional economies, political organization, and character of the landscapes of selected major regions of the non-European and American world. Repeatable when region changes.

GEOG 581. GIScience I. 4 Credits.

Introduction to geographic information science, geographic information systems (GIS), the current population survey (CPS), remote sensing, and cartography. Sequence with GEOG 582, GEOG 591.

GEOG 582. GIScience II. 4 Credits.

Spatial data collection, spatial data models, database design, data editing, geographic information system (GIS) project management, and advanced topics in geographic information science. Sequence with GEOG 581, GEOG 591, GEOG 593.

Prereq: GEOG 581.

GEOG 585. Remote Sensing I. 4 Credits.

Introduction to remote sensing science including its physical basis, instruments, platforms, data, processing methods, and applications. Sequence with GEOG 586.

Prereq: GEOG 581.

GEOG 586. Remote Sensing II. 4 Credits.

The use of digital electromagnetic data for classification, mapping, and monitoring biologic, hydrologic, atmospheric, geologic, and human processes and environmental change. Sequence with GEOG 585.

Prereq: GEOG 585.

GEOG 590. GIScience: [Topic]. 4 Credits.

Advanced topics on geographic information systems science including spatial analysis and modeling, data visualization, cartography, volunteered geographic information, GIS programming. Repeatable five times for a maximum of 24 credits.

Prereq: GEOG 581.

GEOG 591. Advanced Geographic Information Systems. 4 Credits.

Socioeconomic analysis with geographic information systems (GIS) and the U.S. census, network modeling, 3-D models of natural and urban landscapes, web-based GIS and programming. Sequence with GEOG 581, GEOG 582.

Prereq: GEOG 582.

GEOG 593. Advanced Cartography. 4 Credits.

Map design and production methods; use of color, cartographic visualization, graphing, data graphics theory, and integration of geographic information systems (GIS) and graphics tools. Sequence with GEOG 581, GEOG 582.

Prereq: GEOG 582.

GEOG 594. Spatial Analysis. 4 Credits.

Introduction to a variety of spatial analysis techniques that can be used for understanding and modeling geographic phenomena.

Prereq: GEOG 581.

GEOG 595. Geographic Data Analysis. 4 Credits.

Analysis and display of geographical data by traditional data-analytical methods and by scientific-visualization approaches.

Prereq: GEOG 581.

GEOG 597. Qualitative Methods in Geography. 4 Credits.

Explores conceptual and practical dimensions of qualitative research. Includes linking theory and method; research question formulation; project design; ethics; data gathering, analysis, and presentation.

GEOG 598. Geospatial Project Design. 4 Credits.

Introduction to methods for designing and implementing professional projects involving geospatial data, technologies, and analytical methods.

GEOG 601. Research: [Topic]. 1-16 Credits.

Repeatable.

GEOG 602. Supervised College Teaching. 1-5 Credits.

Repeatable.

GEOG 603. Dissertation. 1-16 Credits.

Repeatable.

GEOG 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

GEOG 606. Practicum: [Topic]. 1-16 Credits.

Repeatable.

GEOG 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

GEOG 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

GEOG 609. Terminal Project. 1-12 Credits.

Repeatable.

GEOG 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

GEOG 611. Theory and Practice of Geography I. 4 Credits.

Introduction to professional practice in geography and the development of geographic concepts and theories from Ancient times through the mid-twentieth century. Sequence with GEOG 612, GEOG 613.

GEOG 612. Theory and Practice of Geography II. 4 Credits.

The development of geographic concepts and theories from the mid-20th century to the present. Students learn to refine effective geographic research questions. Sequence with GEOG 611 and GEOG 613.

Prereq: GEOG 611.

GEOG 613. Research Design. 4 Credits.

Examines main components of research design, including research questions, methodological approach, institutional review boards, funding programs, proposal writing, and application. Sequence with GEOG 611 and GEOG 612.

Prereq: GEOG 612.

GEOG 631. Progress in Physical Geography. 1 Credit.

Recent developments in climatology, geomorphology, hydrology, and biogeography. Lectures, readings, and presentation of faculty and student works in progress. Repeatable for maximum of 12 credits.

GEOG 632. Progress in Human Geography. 1 Credit.

Recent developments in cultural, economic, environmental and political geography. Lectures, readings, and presentation of faculty and student works in progress. Repeatable for maximum of 12 credits.

GEOG 633. Progress in Geographic Information Science. 1 Credit.

Recent developments in cartography, GIS, remote sensing, data analysis, and visualization. Lectures, readings, and presentation of faculty and student works in progress. Repeatable for maximum of 12 credits.

German and Scandinavian

Ian F. McNeely, Department Head

541-346-4051
202 Friendly Hall
1250 University of Oregon
Eugene, Oregon 97403-1250

The Department of German and Scandinavian offers a range of courses and degree programs, from instruction in beginning German and Swedish through a wealth of general-education and advanced undergraduate and graduate offerings in the literatures and cultures of German-speaking and Scandinavian Europe. Students may earn a bachelor of arts (BA) or a bachelor of science (BS) degree with a focus on German language, literature, and culture; interdisciplinary German and Scandinavian studies; or Scandinavian. Minors in all three of these focuses are also possible, and many undergraduates pursue concurrent degrees with second majors or minors in other departments and programs. At the

graduate level, the department offers the master of arts (MA) and doctor of philosophy (PhD) degrees in German. Our five-year combined BA/MA program is an excellent option for motivated students. Ours is the only program in the state of Oregon that grants a PhD in German.

Preparation

The department recommends that students intending to major in German have at least some high school German or its equivalent. With careful planning it is also possible to complete a bachelor's degree in German by starting at the introductory level in our program. Our Scandinavian programs, which focus on Swedish, presume no prior knowledge of the language. Interest in the literature, film, history, art, politics, and geography of German-speaking and Scandinavian Europe is also helpful.

Careers

Students who graduate with a degree in German or Scandinavian typically enter a great variety of occupations, including but by no means limited to those with a direct connection to the languages and countries of Europe. Proficiency in a second language opens career opportunities in any number of fields that demand superior skills in oral and written communication, critical thinking and analysis, and intercultural understanding. The department's alumni have found positions in media and communications, government and public service, international business and law, education and teaching, social services, and the travel and tourism industry. Many go on to graduate school in education, law, the humanities, and other fields. Particularly in combination with another major or minor, the career possibilities are limitless.

Study Abroad

The department encourages all its students to study abroad in Germany or Scandinavia, and provides a scholarship funding to majors (and some minors) who are interested in an approved study-abroad program. Interested students should contact the department or consult a Global Education Oregon advisor in the Office of International Affairs.

Germany

The department encourages students of German to study in Germany on one of the many UO-sponsored exchange programs. Possibilities include the yearlong Baden-Württemberg program and the intensive Heidelberg accelerated program during spring term. Study for one or two months in summer is also available in Berlin. Students may also study for one or two terms in Vienna. We encourage all students to study abroad or to attend summer school programs such as the Deutsche Sommerschule am Pazifik in Portland.

Students in University of Oregon overseas study programs enroll in courses with subject codes that are unique to individual programs. Special course numbers are reserved for overseas study. See **Study Abroad** in the Supplementary Academic Programming section of this catalog.

For more information, students should consult departmental representatives and the Global Education Oregon office. Students working toward a German major or minor must consult an undergraduate advisor before beginning any study abroad program in order to ensure that departmental requirements can be met.

German majors with a focus in language, literature, and culture must complete six courses on the UO campus, two of which must be 400-level courses with the GER subject code, unless they intend to graduate in absentia while enrolled through the Baden-Württemberg program.

German majors with a focus on interdisciplinary German Studies must complete three courses on the UO campus, one of which must have a GER subject code.

Denmark, Finland, Norway, and Sweden

Students in Scandinavian are strongly encouraged to spend a year studying in an exchange program at Denmark's International Study Program in Copenhagen, at Copenhagen Business School, at Aalborg University in Denmark, at the University of Tampere in Finland, at the University of Bergen or the University of Oslo in Norway, or at the University of Uppsala in Sweden. For more information, consult departmental advisors in Scandinavian.

Faculty

Corinne Bayerl, senior instructor (16th- to early 18th-century French and German literature and philosophy; gender questions; history of pedagogy). See **Comparative Literature**.

Sonja Boos, associate professor (19th- through 21st-century German literature, culture, and film; critical thought). MA, 1997, Heinrich-Heine Universität Düsseldorf; MA, 2004, PhD, 2008, Princeton. (2013)

Kenneth S. Calhoun, professor (Enlightenment, Romanticism, literary and film history and theory). See **Comparative Literature**.

D. Gantt Gurley, associate professor (Scandinavian literature and folklore, Old Norse literature, Jewish studies). BA, 1994, Bard College; MA, 2002, PhD, 2007, California, Berkeley. (2009)

Martin Klebes, associate professor (18th- to 21st-century literature, philosophy, critical thought). PhD, 2003, Northwestern. (2007)

Jeffrey S. Librett, professor (literature since 1750, theoretical discourses, Jewish studies). BA, 1979, Yale; MA, 1981, Columbia; PhD, 1989, Cornell. (2004)

Dawn A. Marlan, senior lecturer (German and European literature and culture from 1700 forward; modernist novel). BA, 1989, Bennington College; MA, 1991, PhD, 2000, Chicago. (2004)

Dorothee Ostmeier, professor (18th- and 20th-century literature, culture, philosophy). Staatsexamen, 1984, MA, 1985, Ruhr; PhD, 1993, Johns Hopkins. (2001)

Michael Stern, associate professor (Nietzsche, Kierkegaard, 19th-century Scandinavian literature). BA, 1993, MA, 1995, PhD, 2000, California, Berkeley. (2001)

Matthias Vogel, senior instructor (second-language acquisition); language coordinator, German language programs; coordinator, German Global Scholars. BA, 1993, Johannes Gutenberg, Mainz; MA, 1996, Oregon. (2011)

Emeriti

Susan C. Anderson, professor emeritus. BA, 1978, North Carolina, Asheville; MA, 1981, PhD, 1985, North Carolina, Chapel Hill. (1986)

Alexander Mathäs, professor emeritus. Staatsexamen, 1981, Tübingen; MA, 1984, Oregon; PhD, 1990, Texas, Austin. (1996)

James R. McWilliams, associate professor emeritus. BA, 1951, MA, 1957, PhD, 1963, California, Berkeley. (1960)

Helmut R. Plant, associate professor emeritus. BA, 1957, Fairmont; MA, 1961, PhD, 1964, Cincinnati. (1966)

Karla L. Schultz, professor emerita. BA, 1967, Alma; MA, 1968, Washington (Seattle); MA, 1980, PhD, 1984, Oregon. (1987)

Ingrid A. Weatherhead, senior instructor emerita. BA, 1950, MA, 1951, Puget Sound. (1962)

Virpi Zuck, professor emerita. BA, 1964, MA, 1965, University of Helsinki; PhD, 1977, Wisconsin, Madison. (1974)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

German Studies Participating Faculty

Susan C. Anderson, German and Scandinavian

Corinne Bayerl, comparative literature

Sonja Boos, German and Scandinavian

Jack Boss, music

Kenneth S. Calhoon, German and Scandinavian and comparative literature

Joyce Cheng, history of art and architecture

Gantt Gurley, German and Scandinavian

Martin Klebes, German and Scandinavian

Lori Kruckenberg, music

Jeffrey Librett, German and Scandinavian (German Studies program director)

David M. Luebke, history

Alexander Mathas, German and Scandinavian

John McCole, history

Ian F. McNeely, history

Dorothee Ostmeier, German and Scandinavian

Stephen Rodgers, music

Marian Smith, music

Michael Stern, German and Scandinavian

Daniela Vallega-Neu, philosophy

Matthias Vogel, German and Scandinavian

Peter Warnek, philosophy

- **Bachelor of Arts or Bachelor of Science: German Language, Literature, and Culture Focus**
- **Bachelor of Arts or Bachelor of Science: Scandinavian Focus**
- **Bachelor of Arts or Bachelor of Science: German and Scandinavian Studies Focus**
- Minor in German (p.)

- **Minor in Scandinavian**
- **Minor in German and Scandinavian Studies**

Undergraduate Studies

The Department of German and Scandinavian offers a bachelor of arts (BA) and bachelor of science (BS) degree with a major in German. Students may focus their studies by emphasizing German language, literature, and culture; Scandinavian; or German studies. The Department of German and Scandinavian also offers a combined bachelor of arts or science–master of arts degree in German. In this program, students complete the requirements for both degrees in a total of five years. For further information, see the Graduate Studies section.

Preparation

German majors and minors must demonstrate German language proficiency through successful completion of second-year German or a placement examination. Incoming students with experience in German must take the placement examination during registration week to help with proper placement.

Careers

A bachelor's degree in German enables students to pursue careers in college and secondary teaching, international business, government and foreign service, tourism, and translation and editorial work. Recent graduates of the department have been successful applicants to schools of law and business as well as graduate programs in German, Scandinavian, linguistics, history, comparative literature, and international studies. Majors planning to pursue graduate studies are encouraged to write an honors thesis.

Major Requirements

Students intending to major with a focus in German language, literature, and culture or interdisciplinary German studies must first acquire proficiency in the German language, typically demonstrated by satisfactory completion of the third term of Second-Year German III (GER 203) or a placement exam. Thereafter, students may begin to take upper-division courses taught in German.

The department does not accept a grade of C– or lower in any course used to fulfill requirements for a major in German.

German Language, Literature, and Culture Focus

Code	Title	Credits
	Four upper-division German language courses	16
	Eight upper-division German literature and culture courses	32
	Total Credits	48

Of the requirements listed above, the following rules apply:

- Six courses must be taken in the UO Department of German and Scandinavian
- At least two courses must be 400-level courses with the GER subject code, and must be taken at the University of Oregon; one of the two must be in literature, culture, or theory
- One course may be taken pass/no pass
- Up to two courses taught in English may count toward the major

The following courses may not be used to satisfy major requirements:

Code	Title	Credits
GER 199	Special Studies: [Topic]	1-5
GER 405	Reading and Conference: [Topic]	1-16
GER 406	Special Problems: [Topic]	1-16
GER 408	Workshop: [Topic]	1-16
GER 409	Practicum: [Topic] ¹	1-4

¹ 4 credits of Practicum: Teaching Internship (GER 409) will satisfy a requirement for the major or minor.

Since all courses are not offered every year, plans should be made well in advance so that students can take prerequisites for 400-level courses. Specific questions should be addressed to departmental undergraduate German advisors.

Scandinavian Focus

Code	Title	Credits
	One topical upper-division course from related field (advisor approved)	4
SWED 201–203	Second-Year Swedish (or the equivalent)	12
	Eight Scandinavian literature or culture courses	32
Total Credits		48

Of the requirements listed above, the following rules apply:

- Three courses must be taken in the UO Department of German and Scandinavian
- One literature or culture course may be taken pass/no pass

Majors in Scandinavian must be proficient in Swedish at the third-year level, demonstrated either by evaluation by the Scandinavian advisor or by successful completion of work beyond Second-Year Swedish (SWED 203). Typically, this will occur through independent study in Reading and Conference: [Topic] (SWED 405), work with supplementary texts in advanced Swedish as extra requirements in the department's Scandinavian courses, and/or through study abroad in Scandinavia. Students should plan their course work carefully in consultation with a departmental undergraduate advisor in Scandinavian. They may also satisfy this requirement in Danish or Norwegian.

German and Scandinavian Studies Focus Bachelor of Arts in German: German and Scandinavian Studies Focus

German and Scandinavian studies is a focus for the German major offered by the Department of German and Scandinavian.

Requirements

The German and Scandinavian studies focus requires second-year language proficiency. Of the 48 credits beyond second-year language, at least 24 must be in courses taught by the UO Department of German and Scandinavian; at least 44 must be taken for a letter grade.

Code	Title	Credits
	16 upper-division credits in courses taught in German or a Scandinavian language ¹	16
	16 additional upper-division credits in approved courses	16

16 additional lower- or upper-division credits in approved courses

Completion of an approved capstone project	
Total Credits	48

¹ Eligible courses in this category include GER 311–313, GER 340–341, GER 360–499, and SWED 405.

Approved Courses

- German (GER) and Scandinavian (SCAN) courses numbered 210–499
- Courses taken at a European university taught in German or a Scandinavian language above the second-year level
- Courses from the preapproved list, which count automatically toward the major and the minor: European Union History (EURO 415), German History: [Topic] (HIST 342), Europe in the 20th Century: [Topic] (HIST 428), Medieval Central Europe: [Topic] (HIST 436), 16th-Century European Reformations (HIST 441), , Modern Germany: [Topic] (HIST 443), , The Jewish Encounter with Modernity (JDST 213), The Music of Bach and Handel (MUS 351), History of Philosophy: 19th Century (PHIL 312), 19th-Century Philosophers: [Topic] (PHIL 453), Shadows of Modernity (PS 312), European Politics (PS 324)
- Other courses taken as part of an approved thematic pathway

Thematic Pathways. These are recommended course lists that include a significant number of approved course options beyond those on the preapproved list. Students are strongly encouraged to follow a thematic pathway, culminating in a capstone project, in consultation with a faculty advisor. Details are posted on the department's website and are also available from the director of undergraduate studies.

Capstone Project. This is a piece of guided independent scholarly or creative work integrating knowledge acquired in courses for the major, typically as the culmination of a thematic pathway. It must be preapproved and either supervised or cosupervised by a faculty member in the department. This requirement typically will be met by a research paper of at least 15 pages or by a comparable scholarly or creative project in a 400-level course in an appropriate department, or through at least one credit of GER 401, 403, or 405; SCAN 401, 403, or 405; or SWED 401, 403, or 405. Work with non-English materials is strongly encouraged.

Double-Counting. Majors who seek an additional minor in either German or Scandinavian may count all credits for both. The same rule applies to minors who seek an additional major in either German or Scandinavian. Majors may not seek an additional major in either German or Scandinavian. The department encourages, and imposes no restrictions on, major or minor combinations with other programs.

Honors

To earn a bachelor's degree with departmental honors, a student must maintain at least a 3.50 grade point average (GPA) and write an honors essay or thesis approved by the departmental honors committee for 4 credits in Thesis (GER 403).

Minor in German

The German minor correlates well with studies that have an international or European concentration. It is particularly useful for students of international studies, international business, European history, medieval

studies, sociology, political science, journalism, linguistics, art history, music history, other languages, theater, and related fields.

Code	Title	Credits
	Seven upper-division German courses ¹	28
Total Credits		28

¹ May include courses in language, literature, or culture. Only one course taught in English may be applied to the minor. No courses from other departments count toward the minor in German. Grades of at least mid-C or P (pass) must be earned in all courses used to satisfy requirements for the minor. One course may be taken pass/no pass. At least 12 credits must be taken in the UO Department of German and Scandinavian.

The following courses may not be used to satisfy minor requirements:

Code	Title	Credits
GER 199	Special Studies: [Topic]	4
GER 405	Reading and Conference: [Topic]	4
GER 406	Special Problems: [Topic]	4
GER 408	Workshop: [Topic]	4
GER 470	German for Reading Knowledge I	4
GER 471	German for Reading Knowledge II	4

Minor in Scandinavian

The Scandinavian minor correlates well with studies that have an international or European concentration. It is particularly useful for students of international business, European history, sociology, political science, theater arts, and art history.

Code	Title	Credits
	Successful completion of one year of Swedish or equivalent	12
	Six Scandinavian literature or culture courses	24
Total Credits		36

Of the requirements listed above, the following rules apply:

- Three courses must be taken in the UO Department of German and Scandinavian
- One literature or culture course may be taken pass/no pass

Minors in Scandinavian must demonstrate basic aptitude in Swedish, demonstrated either by evaluation by the Scandinavian advisor or by successful completion of First-Year Swedish (SWED 103) with a grade of mid-C or better.

Specific questions about the Scandinavian minor should be addressed to departmental undergraduate advisors in Scandinavian.

Minor in German and Scandinavian Studies

The German and Scandinavian studies minor requires second-year language proficiency. Of the 24 credits beyond second-year language, at least 12 must be in courses taught by the UO Department of German and Scandinavian; at least 20 must be taken for a letter grade.

Code	Title	Credits
	12 upper-division credits in courses taught in German or a Scandinavian language ¹	12
	8 additional upper-division credits in approved courses	8

4 additional lower- or upper-division credits in approved courses	4
Completion of an approved capstone project	
Total Credits	24

¹ Eligible courses in this category include GER 311–313, GER 340–341, GER 360–499, and SWED 405.

Approved courses are described in the Bachelor of Arts in German: German and Scandinavian Studies Focus section above.

General-Education Requirements

The Department of German and Scandinavian offers many courses, including several taught in English, that satisfy university general-education requirements. See the Group Requirements and Multicultural Requirement sections of this catalog under Bachelor's Degree Requirements (p. 26).

Kindergarten through Secondary Teaching Careers

Students who complete the bachelor's degree with a major in German are eligible to apply for the College of Education's fifth-year licensure program in middle-secondary teaching, or the fifth-year licensure program to become an elementary teacher. More information is available from the department's education advisors; see also the **College of Education** section of this catalog.

Some German courses may be applied to requirements for the certificate in second-language acquisition and teaching. See the **Linguistics** section of this catalog for a description of the certificate. More information is available from department advisors.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

- ¹ Beyond the German major and general-education requirements, this example includes 15 further courses for a second major and/or electives for a total of 180 credits, with only three courses each term senior year. With a full load of four courses per term, which would add up to 192 credits, there would room for 18 further courses.
- ² The first of eight upper-division German literature and culture courses for the major, and the one that may be taken in English language. For this and subsequently listed upper-division literature and culture courses in the Department of German and Scandinavian, any other 300- or 400-level courses could be substituted.
- ³ Advanced German grammar review completed (for increased fluency). Four upper-division German language courses now complete (including 300-level language courses).

Graduate Studies

The graduate program in German offers the master of arts (MA) in German, either through a regular two-year program or through a combined BA-MA program that enables students to complete the requirements for both the BA and the MA in German in five years. The program also offers the doctor of philosophy (PhD) degree in German, for which applicants may apply either with a BA or an MA already earned. The requirements for the PhD include one year of graded course work past the MA level and a written dissertation. The MA degree prepares students for teaching German language and culture up through the secondary-school level (in conjunction with teacher certification), while the PhD degree, as the highest degree in the field, is generally expected for an academic career involving both research and teaching.

The graduate curriculum acquaints students with the history of German letters (with a primary focus on modernity since the enlightenment), places this history in a European context, and provides tools for a critical analysis of the literary, theoretical, and cinematic discourses involved. The program encourages comparative, theoretically oriented work.

Core Curriculum

Students take one course each term. These courses are grouped according to common themes to give the program a topical and critical coherence. Core courses are paired with seminars of related or complementary content, and students are encouraged to explore connections between courses.

In the first year, core courses address a specific genre (narrative, drama, and lyric). While their content may vary with the instructor, they are intended to present in general terms the history of the genre itself and of critical thinking about that genre. In the second year, core courses have less traditional themes and present a broader concept of textuality.

Code	Title	Credits
GER 621	Narrative	4
GER 622	Drama	4
GER 623	Lyric	4
GER 624	Critical and Philosophical Prose ¹	4
GER 625	Translations-Transformations ²	4
GER 690	Literary Studies: [Topic] ³	4

¹ Acquaints students with important aspects of German philosophical discourse since Kant.

² Presents the theory and practice of translation. "Transformations" is added to suggest that translation is not limited to written texts (e.g., the sister arts, literature into film).

³ Various topics in research methods, literary theory, history of German literature, and advanced methodology.

Beyond course work, the program features close mentoring, including guidance for developing portfolio papers that expand on writing done for courses, and, at the PhD level, a dissertation-writing colloquium in which students and faculty members join in responding to ongoing dissertation work by students in the program.

Students should consult the director of graduate studies in the German and Scandinavian department for more information on graduate programs or to seek waivers or substitutions of core courses. Information and application materials are also available on the department website.

Graduate Specialization in Translation Studies

Students may choose to complete a graduate specialization in translation studies. Translation studies examines the theory, description, and practice of translation, interpretation, and localization between languages and language-users. The specialization offers graduate students the opportunity to receive recognition for work in this complex academic discipline. For requirements, visit translationstudies.uoregon.edu/graduate-specialization (<https://translationstudies.uoregon.edu/graduate-specialization/>).

Other relevant graduate certificate programs and graduate specializations with which students may supplement their PhD work in German include women's, gender, and sexuality studies; nonprofit management; and new media and culture. For details, visit gradschool.uoregon.edu/academic-programs (<https://gradschool.uoregon.edu/academic-programs/>).

German Courses

GER 101. First-Year German. 5 Credits.

Provides a thorough grammatical foundation and an elementary reading knowledge of German as well as an understanding of the spoken language. Sequence.

GER 102. First-Year German. 5 Credits.

Provides a thorough grammatical foundation and an elementary reading knowledge of German as well as an understanding of the spoken language.

Prereq: GER 101.

GER 103. First-Year German. 5 Credits.

Provides a thorough grammatical foundation and an elementary reading knowledge of German as well as an understanding of the spoken language.

Prereq: GER 102.

GER 196. Field Studies: [Topic]. 1-2 Credits.

Repeatable.

GER 198. Workshop: [Topic]. 1-2 Credits.

Repeatable.

GER 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

GER 201. Second-Year German I. 4 Credits.

Grammar and composition, reading selections from representative authors, conversation. Sequence.

Prereq: GER 103 or equivalent.

GER 202. Second-Year German II. 4 Credits.

Grammar and composition, reading selections from representative authors, conversation.

Prereq: GER 201.

GER 203. Second-Year German III. 4 Credits.

Grammar and composition, reading selections from representative authors, conversation.

Prereq: GER 202.

GER 220M. From Kierkegaard to Kafka. 4 Credits.

Survey of the existential tradition in German and Scandinavian literature, philosophy, drama, and film. Historical and conceptual developments are considered, from Kierkegaard to Kafka. Taught in English. Multilisted with SCAN 220M.

GER 221. Postwar Germany: Nation Divided. 4 Credits.

Introduction to literary and cultural movements of public dissent, including 1960s student revolutions, in postwar Germany. Conducted in English.

GER 222. Voices of Dissent in Germany. 4 Credits.

Key debates in German culture, including the adequate representation of the Holocaust, literature in society, and the roles of ethnic and gender identities within the nation. Conducted in English.

GER 223. Germany: A Multicultural Society. 4 Credits.

Examines the multiethnic complexities of German, Austrian, and/or Swiss societies through the writings of African, Turkish, or Jewish Germans.

Period of focus varies. Conducted in English.

GER 250. The Culture of Money. 4 Credits.

Explores ideas about money, value, and exchange in German-speaking cultures from selected moments in modern history through readings of literature, philosophy, and the arts.

GER 251. Sexuality. 4 Credits.

Examines discourses on sexuality (e.g., sexual norms, gender roles, and divergences from them) in modern German, Austrian, and Swiss-German contexts through literature, essays, and films.

GER 252. War, Violence, Trauma. 4 Credits.

Examines war, violence, and trauma in German and Austrian cultural history, during the modern period, through works of literature, thought, art, music, and film.

GER 280M. The Quality of Life in Germany and Scandinavia. 4 Credits.

An interdisciplinary cultural-historical inquiry into a region with some of the highest quality of life indicators in the world. Examines family, community, work, leisure, security, health, education, and other topics. Taught in English with some German and Swedish (no prior language ability required). Multilisted with SCAN 280M.

GER 311. Intermediate Language Training. 4 Credits.

Extensive practice in speaking and writing German; complex grammatical structures in writing.

Prereq: GER 203 or equivalent.

GER 312. Intermediate Language Training. 4 Credits.

Extensive practice in speaking and writing German; complex grammatical structures in writing.

Prereq: GER 203 or equivalent.

GER 313. Intermediate Language Training. 4 Credits.

Extensive practice in speaking and writing German; complex grammatical structures in writing. Option during 313 to take the Zertifikat Deutsch exam.

Prereq: GER 312.

GER 345M. Food, Culture, and Identity in Germany and Scandinavia. 4 Credits.

Examines the relationships among food, culture, and identity in Germany and Scandinavia. Interdisciplinary readings, lectures, films, and discussions focus on literary and symbolic representations of food from production to consumption, and on images and depictions of cooking, eating, drinking, and feasting. Multilisted with SCAN 345M.

GER 351. Diversity in Germany. 4 Credits.

Examines the social construction of identity in German literature and culture. Addresses topics of plural voices and tolerance in German-speaking cultures. Topics vary. Conducted in English.

GER 354. German Gender Studies. 4 Credits.

Student oral presentations and written papers on such topics as men and women writers of German romanticism, mothers and daughters in German literature, comparison of men and women dramatists. No knowledge of German required; readings and discussions in English.

GER 355. German Cinema: History, Theory, Practice. 4 Credits.

In-depth analysis of various facets of German cinema. Topics include film and the Third Reich, cinema and technology, German filmmakers in American exile, German New Wave. Conducted in English.

GER 356. German Fairy Tales. 1-4 Credits.

The German fairy tale in historical and theoretical context, from the Brothers Grimm and romantic tales to adaptations by Tchaikovsky and Sendak. Taught in English.

GER 357. Nature, Culture, and the Environment. 4 Credits.

Introduction to the contributions German writers, philosophers, scientists, and artists have made to changing notions of nature and its supposed opposition to culture. Offered alternate years.

GER 360. Introduction to German Literature: Poetry, Plays, Prose. 4 Credits.

Introduction to textual analysis--poetry, plays, and prose from 1800 to the present--in the context of major literary movements (romanticism, realism, modernism) and their social determinants. Focus on genre: poetry, plays, and prose.

Coreq: GER 311.

GER 361. Introduction to German Literature: Literary Movements. 4 Credits.

Introduction to textual analysis--poetry, plays, and prose from 1800 to the present--in the context of major literary movements (romanticism, realism, modernism) and their social determinants. Focus on literary movements.

Coreq: GER 311.

GER 362. Introduction to German Literature: Interpretive Models. 4 Credits.

Introduction to textual analysis--poetry, plays, and prose from 1800 to the present--in the context of major literary movements (romanticism, realism, modernism) and their social determinants. Focus on interpretive models. Coreq: GER 311.

GER 366. Themes in German Literature. 4 Credits.

Significant literary texts organized by theme--crime and society, travels and explorations, nature and technology, relationships between the sexes, the Nazi past. Coreq: GER 311.

GER 367. Themes in German Literature. 4 Credits.

Significant literary texts organized by theme--crime and society, travels and explorations, nature and technology, relationships between the sexes, the Nazi past. Coreq: GER 311.

GER 368. Themes in German Literature. 4 Credits.

Significant literary texts organized by theme--crime and society, travels and explorations, nature and technology, relationships between the sexes, the Nazi past. Coreq: GER 311.

GER 399. Special Studies: [Topic]. 1-5 Credits.

New topics or approaches appropriate for third-year German proficiency level. Content varies; focus may be on various aspects of German language, literature, or culture and civilization. Repeatable when topic changes. Coreq: GER 311.

GER 401. Research: [Topic]. 1-16 Credits.

Survey of the existential tradition in German and Scandinavian literature, philosophy, drama, and film. Historical and conceptual developments are considered, from Kierkegaard to Kafka. Taught in English. Multilisted with GER 220M.

SCAN 251. Text and Interpretation. 4 Credits.

Introduction to textual analysis; explores the relationship between experience, description, and identity through the reading and viewing of Scandinavian literature and film. Taught in English.

SCAN 259. Vikings through the Icelandic Sagas. 4 Credits.

Introduction to the social, political, and cultural expressions of Viking society through the Sagas, the unique prose narratives of medieval Iceland. Conducted in English.

SCAN 280M. The Quality of Life in Germany and Scandinavia. 4 Credits.

An interdisciplinary cultural-historical inquiry into a region with some of the highest quality of life indicators in the world. Examines family, community, work, leisure, security, health, education, and other topics. Taught in English with some German and Swedish (no prior language ability required). Multilisted with GER 280M.

SCAN 315. Nordic Cinema. 4 Credits.

Examines cinematic culture in the Nordic countries of Denmark, Finland, Iceland, Norway, and Sweden. Includes works by Ingmar Bergman and the Danish group Dogma 95. Taught in English.

SCAN 316. History of Cinema. 4 Credits.

A survey of Nordic cinema from the silent era to the present. Films will be viewed and analyzed within their aesthetic and historical contexts. Taught in English. Offered alternate years.

SCAN 317. Directors, Movements, and Manifestos. 4 Credits.

A directed study of specific directors, movements, and manifestos from the Nordic cinematic tradition. Taught in English. Offered alternate years.

SCAN 325. Constructions versus Constrictions of Identity. 4 Credits.

Explores the notion of regional, ethnic, gender, and class identity in Scandinavian texts and culture. Topics include immigrant-emigrant experience, lore of the Arctic, folklore, Finland-Swedish writing. Conducted in English.

SCAN 341. Revisions of the Scandinavian Dream. 4 Credits.

Examines development of Scandinavian countries from impoverished kingdoms on the European periphery to modern, multicultural welfare societies. Analyzes patterns in the arts, social and political structures, ecological issues. Taught in English.

SCAN 343. Norse Mythology. 4 Credits.

Critical evaluation of the religious beliefs in Scandinavia from prehistory through the Viking Age. Taught in English. Offered alternate years.

SCAN 344. Medieval Hero and Monster. 4 Credits.

Study of medieval Scandinavian and Germanic literature addressing the remarkably fine line drawn between the heroes and monsters depicted. Offered alternate years.

SCAN 345M. Food, Culture, and Identity in Germany and Scandinavia. 4 Credits.

Examines the relationships among food, culture, and identity in Germany and Scandinavia. Interdisciplinary readings, lectures, films, and discussions focus on literary and symbolic representations of food from production to consumption, and on images and depictions of cooking, eating, drinking, and feasting. Multilisted with GER 345M.

SCAN 351. Periods in Scandinavian Literature. 4 Credits.

Possible topics are modern breakthrough and modernism in Scandinavian literature. Student discussion, oral presentations, and written papers. Readings and discussions in English.

SCAN 353. Scandinavian Women Writers. 4 Credits.

Examines social issues, especially gender, in literature written by women from Denmark, Finland, Iceland, Norway, and Sweden. Primary emphasis on 19th- and 20th-century texts.

SCAN 354. Genres in Scandinavian Literature. 4 Credits.

Recent topics include short narrative fiction and Scandinavian drama. Student discussion, oral presentations, and written papers. Readings and discussions in English.

Global Studies

Yvonne Braun, Department Head

541-346-5051

175 Prince Lucien Campbell Hall

5206 University of Oregon

Eugene, Oregon 97403-5206

The Department of Global Studies (formerly the Department of International Studies) offers bachelor of arts (BA), bachelor of science (BS), and master of arts (MA) degrees in global studies and minors in global studies, global health, and global service. The programs are tailored to give students the theoretical tools to make sense of the fast-changing global arena; ensure the practical application of their research; immerse them in the language, history, and culture of a major world region; ensure they live, study, conduct research, or hold an internship that enhances their intercultural knowledge, understanding, and skills; and help them develop a professional concentration area suitable for their career goals. For the Global Studies undergraduate major programs, professional concentration and geographic focus options are listed in the Undergraduate section of the department page.

The Department of Global Studies is a member of the Association of Professional Schools of International Affairs and the International Studies Association. These associations provide more opportunities in research, internships, funding, and employment for global studies students.

Faculty

Yvonne A. Braun, professor (gender and development, social change, Africa). BA, 1994, State University of New York, Geneseo; MA, 2000, PhD, 2005, California, Irvine. (2005)

Kathie Carpenter, associate professor (childhood, children's museums, Southeast Asia). BA, 1975, California, San Diego; MA, 1983, PhD, 1987, Stanford. (1989)

Dennis C. Galvan, professor (comparative politics, international development, Africa and Indonesia). BA, 1987, Stanford; MA, 1990, PhD, 1996, California, Berkeley. (2001)

Derrick Hindery, associate professor (environment and development, global economic restructuring, indigenous movements, Latin America). BA, 1994, MA, 1997, PhD, 2003, California, Los Angeles. (2007)

Galen Martin, senior instructor II (environmental and cultural geography, global food security, Latin America). AA, 1977, Hesston College; BA, 1980, Goshen College; MA, 1985, Oregon; PhD, 2003, California, Davis. (1998)

David Meek, assistant professor (food sovereignty, popular education, India and Brazil). BA, 2004, Bard College; MSc, 2007, Antioch, New England; PhD, 2014, Georgia. (2018)

Gabe Paquette, professor (intellectual history, Portuguese and Spanish history, history of European empires). See **History**.

Lesley Jo Weaver, associate professor (health disparities, race, India and Brazil). BA, 2004, Smith College; MPH 2008, PhD, 2014, Emory University. (2018)

Anita M. Weiss, professor (gender and development, political Islam, South Asia). BA, 1975, Rutgers; MA, 1976, PhD, 1983, California, Berkeley. (1987)

Stephen R. Wooten, associate professor (local-global dynamics, food studies, Africa). BA, 1986, Massachusetts, Amherst; MA, 1993, PhD, 1997, Illinois, Urbana-Champaign. (1999)

Kristin Yarris, associate professor (global health, migration, Latin America). BA, 1994, Lewis and Clark College; MPH, MA, 2004, PhD, 2011, California, Los Angeles. (2012)

Emeritus

Gerald W. Fry, professor emeritus. BA, 1964, Stanford; MPA, 1966, Princeton; PhD, 1977, Stanford. (1981)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Participating

Carlos Aguirre, history

Ina Asim, history

Oluwakemi Balogun, women's, gender, and sexuality studies

Diane B. Baxter, anthropology

Erin Beck, political science

Bruce A. Blonigen, economics

Lindsay F. Braun, history

Daniel P. Buck, geography

Alfredo Burlando, economics

Mark Carey, honors college

Shankha Chakraborty, economics

Liska Chan, landscape architecture

Shaul E. Cohen, geography

Rick Colby, religious studies

Jane K. Cramer, political science

Robert L. Davis, Romance languages

André Djiffack, Romance languages

Maram Epstein, East Asian languages and literatures

Michael Fakhri, law

John B. Foster, sociology

Alisa D. Freedman, East Asian languages and literatures

Pedro García-Caro, Latin American studies

Ibrahim J. Gassama, law

Bryna Goodman, history

Sangita Gopal, English

Jeffrey E. Hanes, history

Robert S. Haskett, history

Michael Hibbard, planning, public policy and management

David Hollenberg, religious studies

Zhuo Jing-Schmidt, East Asian languages and literatures

Lamia Karim, anthropology

Craig Kauffman, political science

Karrie Koesel, political science

Nicolas Larco, architecture

Jeffrey Magoto, Yamada Language Center

Gabriela Martinez, journalism and communication

Michelle McKinley, law

Karen McPherson, Romance languages

Ronald B. Mitchell, political science

Alexander B. Murphy, geography

Michael Malek Najjar, theater arts

Kevin Nute, architecture

Eileen M. Otis, sociology

Craig Parsons, political science

Doris L. Payne, linguistics

Eric W. Pederson, linguistics

Philip W. Scher, anthropology

Carol T. Silverman, anthropology

Lars Skalnes, political science

Alison Snyder, architecture

H. Leslie Steeves, journalism and communication

Lynn Stephen, anthropology

Jeffrey Stolle, management

Xiaobo Su, geography

Tuong Vu, political science

Peter A. Walker, geography

Janis C. Weeks, biology

Undergraduate Programs

Majors

- Global Studies (p. 312)

Minors

- Global Health (p. 328)
- Global Service (p. 329)
- Global Studies (p. 331)

Advising

Advising about specific major and minor requirements is provided by advisors in the Tykeson College & Career Advising unit. Regular consultation with the Global Connections Advisors is strongly recommended for Global Studies majors, premajors, and minors. For Global Health minors, advising is available via the Healthy Communities advising flight path, and for Global Service minors, advising is available via the Scientific Discovery and Sustainability flight path. Additionally, for Global Studies majors, the role of the faculty mentor is central to the program. Students applying to the major are required to choose a faculty member with whom they have a common area of interest to act as their mentor, typically one of the core or participating faculty members named in the departmental faculty list or a faculty member from the student's concentration areas, professional or geographic.

Admission

The first step for students planning to major in global studies is to declare the premajor. Students should make an appointment with a Global Connections Advisor to declare the premajor. Global studies premajors must first complete the requirements listed below before they can apply to the global studies major.

Students must maintain a grade point average of 3.00 (cumulative) or higher than 3.00 for three consecutive terms prior to the term of application.

Courses required for the premajor must be passed with a C– or better. Freshman seminars do not count toward this requirement. Students are strongly encouraged not to wait until their junior or senior year to apply. Premajor advising and help with the application process are available via appointments made with Global Connections Advisors in the Tykeson College & Career Advising unit. Applicants are required to meet with a Global Connections Advisor as part of the major application process. Applications are due on Monday of the fourth week of fall, winter, and spring terms.

In exceptional cases (and to accommodate transfer students), students entering the university may apply to become a global studies major without completing the required two terms. More information is available from the GLBL Director of Undergraduate Studies.

Code	Title	Credits
GLBL 101	Introduction to International Issues	4
or GLBL 102	Foundations for Intercultural Competence	
Select two of the following:		
GLBL 230	Global Wellbeing	4
GLBL 240	Perspectives on International Development	4
GLBL 250	Value Systems in Cross-Cultural Perspective	4
GLBL 270	Globalization and the Global Economy	4
Second-language sequence or equivalency demonstrated		
WR 121	College Composition I	4
or WR 123	College Composition III	

Additional Requirements

Courses must be passed with grades of C– or better to satisfy major requirements. In addition, three years' proficiency in a second language is required (see below for details).

Courses applied to the major, with the exception of the language requirement and up to 8 credits related to an Honors Thesis, must be taken for letter grades.

A maximum of 20 credits in courses taken in a single department other than global studies may be applied toward the global studies major, exclusive of the language requirement and the External Block B Professional Concentration option.

For the most current information about courses and requirements, visit the department website.

Language Requirement

To satisfy this requirement, students must achieve proficiency in a second language at a level associated with three years of study. Proficiency in the language may be demonstrated by passing three terms

of a 300-level language sequence, by an examination, or by graduating from a high school in which English was not the medium of instruction.

A student may also fulfill the language requirement with two years' proficiency in two different languages exclusive of the student's native language. Students wishing to pursue this option must get approval from the GLBL Director of Undergraduate Studies faculty.

Intercultural Experience

Majors must have a significant immersive intercultural experience to complete requirements for the major. One way that this can be satisfied is with at least one term (ten weeks) of study or work in another country that coincides with the student's geographic focus area. Visit the department website for information about other ways to satisfy this requirement. For information about study in another country, see Study Abroad in the **Supplementary Academic Programming** section of this catalog. Advice is available from the Office of International Affairs, 330 Oregon Hall. *Domestic (US-based) cultural experiences and internships must be preapproved by the advising team.*

Internship Option

Students may earn pass/no pass (P/N) credit for work done as interns. Interested students should consult with their Global Studies faculty mentor or with a Global Connections advisor.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Bachelor of Arts in Global Studies

Below is an example of how to complete a BA in global studies with a diplomacy and international relations professional concentration and a Middle East geographic focus. Since the major offers 16 options for professional concentration areas and seven different geographic focus regions, with a wide variety of courses that can count toward each concentration, there are innumerable paths through the global studies major.

This degree plan is for general planning purposes only and, due to the interdisciplinary nature of the major, it is imperative that students speak with advisors to determine which courses would best match their personal, professional, and academic goals.

Graduate Programs

Global Studies (MA) (p. 331)

Courses

GLBL 101. Introduction to International Issues. 4 Credits.

Survey of major political, economic, and cultural themes in international studies through in-class debates on key contemporary issues.

GLBL 102. Foundations for Intercultural Competence. 4 Credits.

This course teaches practical skills and analytic frameworks that support safe, respectful, enlightening experiences of intercultural engagement.

GLBL 196. Field Studies: [Topic]. 1-2 Credits.

Repeatable.

GLBL 198. Workshop: [Topic]. 1-12 Credits.

Repeatable.

GLBL 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

GLBL 230. Global Wellbeing. 4 Credits.

Interdisciplinary introduction to human wellbeing, focusing on health, education, and the environment and the ways they impact wellbeing. Topics will be framed by the larger issue of whether or not something called "wellbeing" is a human universal, as well as how wellbeing can be improved.

GLBL 240. Perspectives on International Development. 4 Credits.

Introduction to major ideologies, theories, historical processes, and contemporary challenges in international development. Galvan.

GLBL 250. Value Systems in Cross-Cultural Perspective. 4 Credits.

Introduction to value systems of various cultures, focusing on how values relate to religion, forms of social organization, group affiliation, and patterns of conflict resolution.

GLBL 260. Culture, Capitalism, and Globalization. 4 Credits.

Cultural and historical perspectives on the development of capitalism as a way of life and its relationship to contemporary global issues and imbalances.

GLBL 270. Globalization and the Global Economy. 4 Credits.

Introduction to the study of globalization and the global economy, analyzing ways the global economy is structured and maintained through various political interventions and regimes. This course aims to provide tools for understanding and explaining these structures and their impacts.

GLBL 280. Global Environmental Issues and Alternatives. 4 Credits.

Examines root causes of "environmental problems" at local, regional, national, and global scales. Critically compares approaches to addressing international environmental challenges.

GLBL 323. Islam and Global Forces. 4 Credits.

Addresses interactions between global forces and processes in historical and modern Muslim societies and the salience of Islam in contemporary global arenas. Sequence with GLBL 423. Offered alternate years.

GLBL 340. Global Health and Development. 4 Credits.

Introduction to major issues in global health, their causes and possible solutions, with a focus on the poor in developing countries.

GLBL 345. Africa Today: Issues and Concerns. 4 Credits.

Introduces students to current challenges facing African peoples today. Extends survey of Africa courses, and prepares students for more advanced study regarding the African continent.

GLBL 350. Education and Development. 4 Credits.

This course will introduce students to the foundational ideas in the field of international and comparative education, and help build a theoretical toolkit of the major approaches scholars utilize when analyzing education from a global perspective.

GLBL 360. International Cooperation and Conflict. 4 Credits.

Utilizes case studies and selected themes to examine the root causes, stakeholder perspectives, and attempts to resolve international conflicts.

GLBL 370. International Human Rights. 4 Credits.

Survey of human rights, examining diverse perspectives on the concept, practice, and implementation of human rights and human rights regimes.

GLBL 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

GLBL 401. Research: [Topic]. 1-12 Credits.

Repeatable.

GLBL 403. Thesis. 1-12 Credits.

Repeatable.

GLBL 405. Reading and Conference: [Topic]. 1-12 Credits.

Repeatable.

GLBL 406. Field Studies: [Topic]. 1-12 Credits.

Repeatable.

GLBL 407. Seminar: [Topic]. 1-5 Credits.

Repeatable. Special topics in international studies.

GLBL 408. Workshop: [Topic]. 1-12 Credits.

Repeatable.

GLBL 409. Terminal Project. 1-12 Credits.

Repeatable.

GLBL 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable. Recent topics include Africa: Development and Social Change. Repeatable when topic changes.

GLBL 415. The Global Story of Race. 4 Credits.

Working from a historical and cultural perspective, this course uses global case studies to explore how race came to be a key principle of social organization around the world through colonialism and extractive capitalism, and how it manifests today.

GLBL 420. Global Community Development. 4 Credits.

Introduction to communitarian theory and local-level grass-roots development practices. Comparison across North-South divide of efforts to alleviate poverty, promote sustainability, and ensure mobilization and cohesion.

Prereq: GLBL 240.

GLBL 421. Gender and International Development. 4 Credits.

Analysis of the changing roles, opportunities, and expectations of Third World women as their societies undergo social upheavals associated with the problematic effects of development.

Prereq: GLBL 240.

GLBL 422. Aid to Developing Countries. 4 Credits.

Examines the history and current dynamics of international bilateral and multilateral development assistance, the possibilities and constraints of aid, and other related issues.

Prereq: GLBL 240.

GLBL 423. Development and the Muslim World. 4 Credits.

Introduction to discourse on current development in various Muslim societies. Focuses on North Africa, the Middle East, South Asia, and Southeast Asia. Weiss.

GLBL 424. United Nations Intervention in Global Crises. 4 Credits.

Explores the theory and practice of humanitarian aid, peace-building, and development during or after violent conflict. Focuses on work of international organizations in conflict areas or on issues of conflict.

GLBL 425. Global Food Security. 4 Credits.

Explores explanations for, and solutions to, persistent inequities in food access. Considers the political, agricultural, economic and humanitarian aspects of the global food system.

GLBL 431. Cross-Cultural Communication. 4 Credits.

Focuses on skills and insights needed by professionals working in cross-cultural settings. Considers values, development, education, politics, and environment as central to cross-cultural understanding.

GLBL 432. Indigenous Cultural Survival. 4 Credits.

Explores case studies of global indigenous peoples who are facing cultural survival issues and developing strategies and institutions to deal with this complex process.

GLBL 433. Childhood in Cross-Cultural Perspective. 4 Credits.

Explores the experience of childhood around the world and examines how this experience is shaped by beliefs about who and what children are and by local conditions and contingencies.

GLBL 434. Language Issues for International Studies. 4 Credits.

Explores the influence of language on policy issues in societies around the world relative to nationalism, identity, multilingualism, education, human rights globalization, and language spread and loss.

GLBL 435. Global Perspectives on Disability. 2 Credits.

This class uses a human rights paradigm to examine issues facing people with disabilities throughout the world. Readings and discussions will emphasize cross-disability and cross-cultural approaches to gender and disability, international development and disability, inclusive educational models, and cross-cultural aspects of disability.

GLBL 442. South Asia: Development and Social Change. 4 Credits.

Introduction to the vast social changes and development issues confronting the South Asian subcontinent.

GLBL 444. Development and Social Change in Southeast Asia. 4 Credits.

Introduction to the region and to the complex social issues facing the peoples of Southeast Asia.

GLBL 445. Development and Social Change in Sub-Saharan Africa. 4 Credits.

Introduces theoretical and practical aspects of development and social change in sub-Saharan Africa, with focus on key issues in African development during the post-colonial era.

GLBL 446. Development and Social Change in Latin America. 4 Credits.

Explores development challenges, debt cycles, urban growth, neoliberalism, populism, socialism, gender, the environment, U.S.–Latin American relations, ecotourism, and drug geographies in the region.

GLBL 448. Bollywood's Lens on Indian Society. 4 Credits.

Explores Indian society through film, focusing on critical social issues; depicted vs. the historical reality; and ongoing transformations of social orientations and values.

GLBL 463. Population Displacement and Global Health. 4 Credits.

Explores health and mental health problems affecting displaced (migrant and refugee) communities and considers underdevelopment as a fundamental cause of displacement and health problems. Offered once per academic year.

GLBL 465. Global Reproductive Health. 4 Credits.

Overview of issues in global reproductive health, including politics, economics, historical and cultural factors. Implications for international health and development programs reviewed. Offered alternate years.

GLBL 467. Global Mental Health. 4 Credits.

Overview of global mental health from a critical, anthropological, and historical perspective, with attention to cross-cultural differences in illness experience and treatment options.

GLBL 503. Thesis. 1-12 Credits.

Repeatable.

GLBL 507. Seminar: [Topic]. 1-5 Credits.

Repeatable. Special topics in international studies.

GLBL 508. Workshop: [Topic]. 1-12 Credits.

Repeatable.

GLBL 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable. Recent topics include Africa: Development and Social Change. Repeatable when topic changes.

GLBL 515. The Global Story of Race. 4 Credits.

Working from a historical and cultural perspective, this course uses global case studies to explore how race came to be a key principle of social organization around the world through colonialism and extractive capitalism, and how it manifests today.

GLBL 520. Global Community Development. 4 Credits.

Introduction to communitarian theory and local-level grass-roots development practices. Comparison across North-South divide of efforts to alleviate poverty, promote sustainability, and ensure mobilization and cohesion.

GLBL 521. Gender and International Development. 4 Credits.

Analysis of the changing roles, opportunities, and expectations of Third World women as their societies undergo social upheavals associated with the problematic effects of development.

GLBL 522. Aid to Developing Countries. 4 Credits.

Examines the history and current dynamics of international bilateral and multilateral development assistance, the possibilities and constraints of aid, and other related issues.

GLBL 523. Development and the Muslim World. 4 Credits.

Introduction to discourse on current development in various Muslim societies. Focuses on North Africa, the Middle East, South Asia, and Southeast Asia.

GLBL 524. United Nations Intervention in Global Crises. 4 Credits.

Explores the theory and practice of humanitarian aid, peace-building, and development during or after violent conflict. Focuses on work of international organizations in conflict areas or on issues of conflict.

GLBL 525. Global Food Security. 4 Credits.

Explores explanations for, and solutions to, persistent inequities in food access. Considers the political, agricultural, economic and humanitarian aspects of the global food system.

GLBL 531. Cross-Cultural Communication. 4 Credits.

Focuses on skills and insights needed by professionals working in cross-cultural settings. Considers values, development, education, politics, and environment as central to cross-cultural understanding.

GLBL 532. Indigenous Cultural Survival. 4 Credits.

Explores case studies of global indigenous peoples who are facing cultural survival issues and developing strategies and institutions to deal with this complex process.

GLBL 533. Childhood in Cross-Cultural Perspective. 4 Credits.

Explores the experience of childhood around the world and examines how this experience is shaped by beliefs about who and what children are and by local conditions and contingencies.

GLBL 534. Language Issues for International Studies. 4 Credits.

Explores the influence of language on policy issues in societies around the world relative to nationalism, identity, multilingualism, education, human rights globalization, and language spread and loss.

GLBL 535. Global Perspectives on Disability. 2 Credits.

This class uses a human rights paradigm to examine issues facing people with disabilities throughout the world. Readings and discussions will emphasize cross-disability and cross-cultural approaches to gender and disability, international development and disability, inclusive educational models, and cross-cultural aspects of disability.

GLBL 542. South Asia: Development and Social Change. 4 Credits.

Introduction to the vast social changes and development issues confronting the South Asian subcontinent.

GLBL 544. Development and Social Change in Southeast Asia. 4 Credits.

Introduction to the region and to the complex social issues facing the peoples of Southeast Asia.

GLBL 545. Development and Social Change in Sub-Saharan Africa. 4 Credits.

Introduces theoretical and practical aspects of development and social change in sub-Saharan Africa, with focus on key issues in African development during the post-colonial era.

GLBL 546. Development and Social Change in Latin America. 4 Credits.

Explores development challenges, debt cycles, urban growth, neoliberalism, populism, socialism, gender, the environment, U.S.–Latin American relations, ecotourism, and drug geographies in the region.

GLBL 548. Bollywood's Lens on Indian Society. 4 Credits.

Explores Indian society through film, focusing on critical social issues; depicted vs. the historical reality; and ongoing transformations of social orientations and values.

GLBL 563. Population Displacement and Global Health. 4 Credits.

Explores health and mental health problems affecting displaced (migrant and refugee) communities and considers underdevelopment as a fundamental cause of displacement and health problems. Offered once per academic year.

GLBL 565. Global Reproductive Health. 4 Credits.

Overview of issues in global reproductive health, including politics, economics, historical and cultural factors. Implications for international health and development programs reviewed. Offered alternate years.

GLBL 567. Global Mental Health. 4 Credits.

Overview of global mental health from a critical, anthropological, and historical perspective, with attention to cross-cultural differences in illness experience and treatment options.

GLBL 601. Research: [Topic]. 1-12 Credits.

Repeatable.

GLBL 602. Supervised College Teaching. 1-5 Credits.

Repeatable.

GLBL 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

GLBL 606. Field Studies: [Topic]. 1-16 Credits.

Repeatable.

GLBL 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

GLBL 608. Workshop: [Topic]. 1-16 Credits.

Repeatable

GLBL 609. Terminal Project. 1-12 Credits.

Repeatable.

GLBL 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

GLBL 655. International Studies Graduate Core Seminar. 4 Credits.

Graduate introduction to the field of International Studies, including exploration of development, culture, communication, and research methods, design, and ethics.

GLBL 656. Research and Writing in International Studies. 1 Credit.

Focus on conceptualizing research topics; accessing bibliographic databases; writing grant applications, reports, and theses.

GLBL 657. Proseminar: Proposal Writing. 2 Credits.

An introduction to thesis proposal writing for first-year graduate students in international studies.

Bachelor of Arts and Science in Global Studies

The bachelor's degree offers students a rigorous education in the basic elements of the field. The program provides a sound general education for the student interested in the complex interrelationships (political, economic, environmental, social, and cultural) that exist among nations in the interdependent modern world.

Bachelor of Arts Degree Requirements

Code	Title	Credits
Preparatory Courses		8
GLBL 101	Introduction to International Issues	
GLBL 102	Foundations for Intercultural Competence	
Block A: International Core Foundation		16

GLBL 230	Global Wellbeing
GLBL 240	Perspectives on International Development
GLBL 250	Value Systems in Cross-Cultural Perspective
GLBL 270	Globalization and the Global Economy

Block B: Professional Concentration Area 16

Either Internal Block B Option 1: Four upper-division courses (16 credits) in one of 12 areas of concentration or External Block B Option 2: four upper-division INTL/GLBL courses (16 credits) plus a minor/certificate in any other UO department. See professional concentration areas list and tables.³

1) Internal Block B Option: Choose 1 of 12 Professional Concentration options. Earn 16 credits total: A) 1 or 2 required INTL/GLBL course(s) (4-8 credits); B) 2 or 3 electives (8 or 12 credits); C) All credits must be upper division.

2) External Block B Option: A) Complete any minor or certificate in any other UO department; B) In addition, breadth requirement of 4 additional INTL/GLBL courses; 3) If a INTL/GLBL course is counted towards the minor/certificate, it may also count among those 4.

Block C: Geographic Focus 16

Four upper-division courses on one of the following areas: Africa, Europe, Southeast & East Asia, South & Central Asia, Latin America & Caribbean, Middle East, and North America; at least one of the four must have the INTL/GLBL subject code. See geographic focus areas list and tables.⁴

Total Credits 56

- Should be taken before global core foundation courses. Must be taken prior to applying to the major.
- INTL/GLBL courses at the 300- and 400-level may be used to fulfill this requirement if it is not already being used toward completion of a student's Block B or C requirements. More information is available from an global studies advisor.
- Students may design their own professional concentration area if none of the predefined areas fits the student's professional goals. Students who choose this option must designate one of the core faculty members of the Department of Global Studies as an advisor and work with that individual in designing the concentration.
- As many as 4 credits in a third-year language sequence may be used to fulfill the geographic focus requirement. Appropriate courses should have significant course content on the region of study. Areas of focus may include Africa, Europe, Latin America and the Caribbean, the Middle East, North America, South and Central Asia, and East and Southeast Asia. A North American geographic focus is only open to international students.

Total Credits	16

External Block B Option

- A) Complete any minor or certificate in any other UO department;
- B) In addition, breadth requirement of 4 additional INTL/GLBL courses;
- 3) If a INTL/GLBL course is counted towards the minor/certificate, it may also count among those 4.

Code	Title	Credits
External Block B Option		
Non-GLBL Minor		
Complete all requirements for a minor or certificate in any other UO department.		
GLBL Required Courses		16
Select any four upper division courses with an GBLBL prefix.		
Total Credits		16

Block C: Geographic Focus Areas

Choose 1 of the following 7 Geographic Focus options. Earn 16 credits total:

- A) 1 required GBLBL course (4 credits)
- B) 2 or 3 electives (12 credits)
- C) All credits must be upper division.

As many as 4 credits in a third-year language sequence may be used to fulfill the geographic focus requirement. Appropriate courses should have significant course content on the region of study. Areas of focus may include Africa, Europe, Latin America and the Caribbean, the Middle East, North America, South and Central Asia, and East and Southeast Asia. A North American geographic focus is only open to international students.

Students may submit a substitution request to use one term (4.00 or 5.00 credits) of introductory (100 or 200-level) language for their geographic focus requirement, and, as long as it is confirmed as different from the language the student is using for their 3-year language requirement for the major, the substitution will be approved. Students seeking this exceptional substitution should discuss the matter with Global Connections Advisors in the Tykeson College & Career Advising unit.

- Africa (p. 322)
- Europe (p. 323)
- Southeast & East Asia (p. 324)
- South & Central Asia (p. 325)
- Latin America & Caribbean (p. 326)
- Middle East (p. 326)
- North America (p. 327)

Global Health Minor

The College of Arts and Sciences administers an undergraduate minor in global health, overseen by the global health program director and a faculty advisory committee.

To earn a minor, students must complete a total of 24 graded credits from approved courses, at least 12 of which must be at the upper-division level, as well as a 400-level field experience or internship, to be arranged in consultation with a faculty advisor from an affiliated program.

The courses that satisfy the minor are distributed as follows: two core courses and four elective courses. Core and elective courses applied to the minor must be taken for letter grades and passed with grades of C- or better.

Students seeking to qualify for a minor should, as early as possible, consult the global health program director as well as advisors in the Tykeson College & Career Advising unit. Developing the plan for elective courses with the advisors' help ensures that the courses selected satisfy the minor requirements and may be completed in a timely fashion.

No later than two terms before graduation, the student must notify the advisors in the Tykeson College & Career Advising unit of intent to graduate for verification of the global health minor coursework and transcript evaluation. The student must also indicate the global health minor on the application for graduation. Students must complete major requirements for an undergraduate degree in another department or school of the university.

Requirements

Code	Title	Credits

Deviations from the requirements listed must be approved by a global health advisor.

Restrictions

- 24 Credits are required for the minor, with a minimum of 12 upper division credits
- A maximum of 12 credits in a single department (including major department) will count towards the Global Health minor. No more than 3 courses with the same subject heading.
- Twenty credits for the minor must be taken in residence
- All courses taken for the minor must be taken for a letter grade, with the exception of the Field Work Experience requirement
- Courses applying to the minor must be passed with a C- or above

No more than three courses (12 credits) from a single department (courses with the same subject code) may count toward the minor.

Global Service Minor

The global service minor provides students with the opportunity to add a global perspective to any major, in addition to providing a solid grounding in intercultural communication and the foundations of global citizenship. Students are able to tailor coursework to their own professional and personal objectives, so the minor is a suitable complement to a BA or BS degree in any school or department.

Global studies minors must complete 24 global studies (subject code GLBL) course credits, 12 of which must be upper division, with a grade of C– or better or P. Course selection is up to the individual student, but for advising purposes tracks are suggested for students coming from different majors. Tracks have been designed to align with particular career goals. Student may elect up to 12 lower-division credits, which share a common purpose of fostering critical and cross-cultural thinking as well as encouraging students to seek out and understand diverse perspectives and ways of approaching and communicating about current global issues. The 12 required upper-division credits allow a deeper investigation of issues, regions, and cultures and also hone skills in research, effective writing, and oral presentation to address rapidly changing and complex current and future issues.

Students select a professional sector concentration and a world region concentration.

- The six sector concentrations are: *Youth in Development, Health, Environment, Community Economic Development, Education and Agriculture*
- The three world region concentrations are: Latin America, West Africa, World at large

All students complete four required core competencies and students who select Latin America or West Africa complete a fifth.

- **Core competency 1: Professional Sector Concentration (12 credits)**
- **Core competency 2: Intercultural Competence (12 credits)**
- **Core competency 3: Practical experience (non-credit)**

- Students complete 50 hours practical experience related to their professional sector concentration. Site supervisor certifies satisfactory completion of hours and tasks.

• **Core competency 4: Professional and leadership development - 3 activities (non-credit)**

- Resume review/critique with UO Career Center or Faculty Mentor
- Attend a workshop on interview skills with the UO Career Center
- Develop and carry out a significant leadership experience and submit a 2-page reflection paper on it.

• **Core competency 5: Language proficiency (variable; up to 8 credits)**

- Latin America-focused students: Two 200-level Spanish courses or equivalent proficiency
- West Africa-focused students: One 200-level course in a Romance language, or equivalent proficiency

Global Studies Minor

The Global Studies minor provides students with the opportunity to add a global health perspective to any major, in addition to providing a solid grounding in intercultural communication and the foundations of global citizenship. Students are able to tailor course work to their own professional and personal objectives, so the minor is a suitable complement to a BA or BS degree in any school or department.

International studies minors must complete 24 international studies (subject code GLOBL) course credits, 12 of which must be upper division, with a grade of C– or better or P. Course selection is up to the individual student, but for advising purposes optional, nonrigid tracks are suggested for students coming from different majors, tracks that can especially complement particular career goals. Student may elect up to 12 lower-division credits, which share a common purpose of fostering critical and cross-cultural thinking as well as encouraging students to seek out and understand diverse perspectives and ways of approaching and communicating about current global issues. The 12 required upper-division credits allow a deeper investigation of issues, regions, and cultures and also hone skills in research, effective writing, and oral presentation to address rapidly changing and complex current and future issues.

Master of Arts in Global Studies

Graduate Studies

The interdisciplinary MA degree in global studies is offered for students who contemplate careers in international affairs, international development, diplomacy, international organizations, or domestic

organizations with an international focus. A minimum of 65 credits must be completed for the degree.

The degree program can be tailored to meet the unique professional needs of each student. In close consultation with a faculty advisor, the student develops a program that combines expertise in a specific professional area with interdisciplinary training in global studies.

Concentrations

In consultation with their faculty advisor, students identify a professional concentration. Suggested areas include the following:

- comparative development
- cross-cultural training
- cultural arts
- environment
- food and food systems
- gender and development
- health
- international community development
- international education
- international tourism
- journalism
- migration
- nonprofit management
- public policy and planning

Concentrations in other professional areas can be arranged.

Graduates of the Department of Global Studies serve as international technical advisors, career diplomats, community development professionals, international business and trade experts, analysts in developing countries, international educators, administrators of international programs, and cross-cultural communication consultants.

Admission

The applicant must be a graduate of an accredited four-year college or university with a grade point average (GPA) of 3.30 or better in all academic work. The application deadline is January 5 for the following fall term. A Graduate Record Examinations (GRE) score is required. Students whose native language is not English must verify a score of 575 (paper-based test) or 90 (Internet-based test) or better on the Test of English as a Foreign Language (TOEFL) unless they have earned a bachelor's degree from a college or university in an English-speaking country such as Australia, Canada (excluding Quebec), Ireland, New Zealand, or the United Kingdom. A score of 7.0 or better on the overall band of the International English Language Testing System test may be submitted instead of the TOEFL. Additional information about the graduate program may be obtained from the Department of International Studies website. The application process is online.

International Students

International students are especially encouraged to apply. Study programs are designed to meet students' professional needs and those of their home countries.

Additional Requirements

Students must take a minimum of 24 graded credits in the professional concentration area. A maximum of 24 credits may be taken in any

department other than international studies in order to allow an appropriate degree of specialization.

Language Study and Competence

Students must demonstrate a third-year level of proficiency in a second language relevant to their professional or geographic focus before completing the program. The University of Oregon offers formal courses in a number of European and non-European languages. Students also may study languages through self-instruction at the Yamada Language Center. International students whose high school or university instruction was not in English demonstrate proficiency in English as a second language through completion of the master's degree requirements. It is recommended that international students study a language from their geographic focus.

Supervised Field Internship or Field Research

The program assists students in locating internships or research opportunities and securing funding. International students may do their internship or research in the United States. Students are responsible for obtaining funding for the costs or for otherwise paying the costs in their entirety. Many graduate students in the program have competed successfully for funding to support internship and research experiences.

The international studies faculty expects students to gain the following from the internship or research experience:

1. a reasonably in-depth experience in a culture other than the student's own
2. greater fluency in the language of the culture in which the internship or research takes place
3. knowledge and experience useful to the career goals of the intern

Master of Arts Project

Each student must prepare an MA project, usually in the form of a thesis or capstone project. Students are required to present a thesis or capstone proposal defense, and at the conclusion of the project, present an oral defense before the student's final project committee. Other types of projects may be approved on a case-by-case basis by the student's master's advisor. Nine credits are awarded for a thesis or capstone project.

Concurrent Doctor of Jurisprudence/Master of Arts Degree

A four-year program for students interested in international human rights, this program provides background in legal theory and instruments sensitive to social, cultural, economic, and political realities against which international human-rights law is implemented. Future lawyers concerned with asylum, immigration, or public-interest law benefit from the study of international relations and cross-cultural communication.

Master of Arts Degree Requirements

Code	Title	Credits
Interdisciplinary Core		
GLBL 655	International Studies Graduate Core Seminar	4
Proseminar Series		
GLBL 656	Research and Writing in International Studies	1
GLBL 657	Proseminar: Proposal Writing	2

Professional Concentration Area ¹	
Concentration area courses from relevant departments or professional schools ²	24
Geographic Focus	
Courses in geographic focus area ³	12
Supervised Field Internship or Field Research	
Internship or research experience related to student's career plans	12
Master of Arts Project	
Thesis or capstone project	9
Total Credits	64

- ¹ Three of the four courses (12 credits) must have the INTL subject code.
- ² Concentration areas are tailored to individual student interests. Students interested in agricultural extension, forestry, and public health may take courses at Oregon State University. (For information about concurrent enrollment, see the **Bachelor's Degree Requirements** section of this catalog.)
- ³ Geographic focus areas are Africa, East Asia, Europe, Latin America, the Middle East, South Asia, or Southeast Asia. Students who earned their undergraduate degrees from institutions outside the United States may substitute an additional 12 credits in the professional concentration for the 12 credits of geographic focus. Students are encouraged to choose a geographic focus outside their home region.

History

Vera Keller, Department Head

541-346-5913
275 McKenzie Hall

The study of history offers a framework for a liberal education and the background that is essential for understanding the contemporary world. Through analyzing interpretive studies, accounts by witnesses to past events, and historical records, students come to appreciate the complexity of human experience. By examining changes in the past, they develop a broad perspective and the ability to weigh evidence and argument.

Faculty

Carlos Aguirre, Professor (Latin America). BA, 1986, Lima (Peru); MA, 1990, Peru; PhD, 1996, Minnesota. (1996)

Ina Asim, Associate Professor (Premodern China). MA, 1982, PhD, 1992, Dr. phil. habil., 2001, Wurzburg. (2002)

Steven Beda, Assistant Professor (20th-century United States, history of labor, environmental history). BA, 2002, Colorado, Boulder; MA, 2008, PhD, 2014, Washington (Seattle). (2015)

Lindsay F. Braun, Associate Professor (Africa). BS, 1994, Eastern Michigan; MA, 1997, Michigan State; PhD, 2008, Rutgers. (2009)

Jamie M. Bufalino, Instructor (Women and Gender in history). BA, 1997, MA, 2001, PhD, 2009, California, Riverside. (2012)

Alexander Dracoby, Senior Instructor (Modern Europe, military, medical). BA, 1987, Grinnell; MA, 1989, PhD, 1996, Chicago. (1995)

Andrew E. Goble, Professor (Premodern Japan, Medical History, East Asia). BA, 1975, MA, 1981, Queensland; PhD, 1987, Stanford. (1990)

Bryna Goodman, Professor (modern China). BA, 1978, Wesleyan; MA, 1982, PhD, 1990, Stanford. (1991)

Melissa Graboyes, Associate Professor. Director of African Studies.

Annelise Heinz, Assistant Professor (US women's & gender, LGBTQ, race/ethnicity). BA, 2003, Whitman College, Walla Walla, WA. PhD, 2015, Stanford.

Ellen Herman, Professor (Modern United States). BA, 1979, Michigan; PhD, 1993, Brandeis. (1997)

Julie Hessler, Associate Professor (20th-century Russia, Europe). BA, 1988, Yale; MA, 1989, PhD, 1996, Chicago. (1995)

Ocean Howell, Associate Professor (Urban City history US). PhD, 2009, Berkeley (Univ. of California).

Ryan Tucker Jones, Associate Professor (early modern Europe, Russian empire, Atlantic history); Ann Swindells Chair in History. BA, 1998, Walla Walla; MA, 2001, Georgetown; PhD, 2008, Columbia. (2016)

Vera Keller, Associate Professor (history of science). BA, 2002, Harvard; PhD, 2008, Princeton. (2010)

David M. Luebke, Professor (early modern Europe, Germany). BA, 1983, Nebraska; PhD, 1990, Yale. (1997)

John McCole, Associate Professor (European intellectual, cultural, and social; modern Europe; historiography and theory). BA, 1975, Brown; MA, 1982, PhD, 1988, Boston. (1994)

Ian F. McNeely, Professor (Europe, the world). AB, 1992, Harvard; MA, 1993, PhD, 1998, Michigan. (2000)

Gabe Paquette, Professor (Intellectual History, Portuguese and Spanish history, History of European Empires); dean, honors college. BA, 1999, Wesleyan; MA, 2001, National University of Ireland; MPhil, 2002, PhD, 2006, Cambridge. (2018)

Daniel Rosenberg, Professor.

Brett Rushforth, Associate Professor (Colonial America, Atlantic world). BA, 1995, Utah; MA, 1998, Utah State; PhD, 2003, California, Davis. (2016)

Arafaat Valiani, Associate Professor (South Asia). BFA, 1996, Concordia; MA, 1997, London School of Economics and Political Science; PhD, 2005, Columbia. (2012)

Marsha Weisiger, Associate Professor (Environmental, Native American, American West); Julie and Rocky Dixon Chair in US Western History. BA, 1978, Arizona State; MA, 1991, PhD, 2000, Wisconsin, Madison. (2010)

Julie Weise, Associate Professor (20th-century United States, modern Mexico, global migration). BA, 2000, MA 2005, MPhil, 2006, PhD, 2009, Yale. (2013)

Timothy Williams, Associate Professor.

Lisa Wolverton, Professor (medieval Europe). BSFS, 1986, Georgetown; MMS, 1991, PhD, 1997, Notre Dame. (2000)

Reuben Zahler, Associate Professor (Latin America). BA, 1991, Cornell; MA, 1999, PhD, 2005, Chicago. (2012)

Emeriti

Robert Bussel, Labor Education and Research Center

Matthew Dennis, Professor Emeritus. BA, 1977, California, Irvine; MA, 1979, PhD, 1986, California, Berkeley. (1988)

Robert S. Haskett, Professor (Latin America). BA, 1975, California, Long Beach; MA, 1978, PhD, 1985, California, Los Angeles. (1988)

Jeffrey E. Hanes, Associate Professor (modern Japan). AB, 1973, Williams; MA, 1978, PhD, 1988, California, Berkeley. (1993)

R. Alan Kimball, Professor Emeritus. (modern Russia). BA, 1961, Kansas; MA, 1963; PhD, 1967, Washington (Seattle).

Jack P. Maddex, Professor Emeritus. BA, 1963, Princeton; PhD, 1966, North Carolina. (1966)

Randall E. McGowen, Professor Emeritus. BA, 1970, American; MA, 1971, PhD, 1979, Illinois. (1982)

James C. Mohr, Professor Emeritus. BA, 1965, Yale; MA, 1966, PhD, 1969, Stanford. (1992)

John Nicols, Professor Emeritus. AB, 1966, California, Berkeley; MA, 1968, PhD, 1974, California, Los Angeles. (1980)

Jeffrey Ostler, Carrie C. Beekman Professor of Northwest and Pacific History (American West). BA, 1979, Utah; MA, 1984, Oregon; PhD, 1990, Iowa. (1990)

Daniel A. Pope, Professor Emeritus. BA, 1966, Swarthmore; MA, 1968, PhD, 1973, Columbia. (1975)

George J. Sheridan Jr., Professor (France, European Socioeconomic). BA, 1969, Princeton; MA, 1974, PhD, 1978, Yale. (1976)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Participating

Judith R. Baskin, Judaic studies

Mark Carey, Honors College

Charise Cheney, Ethnic Studies

James D. Fox, Library

Kevin Hatfield, Office of University Housing

Roxann Prazniak, Honors College

Elizabeth Reis, Women's and Gender Studies

Gretchen Soderlund, Journalism and Communication

- **Bachelor of Arts and Bachelor of Science**
- **Minor**

Undergraduate Studies

Students who plan to major in history should include in their high school studies four years of social studies, four years of English, and preparation

in a second language. Students who transfer to the university at the end of their sophomore year should have completed a year of college-level history and at least one year of a second language.

Careers

History provides a foundation for careers in teaching, journalism, international endeavors, law, foreign service, business, government, ministry, librarianship, museum and archival work, and historic preservation. Work beyond the bachelor's degree is required in many of these fields.

Advising and Entering the Major

The Department of History requires students to have formal advising at the time that they enter the major. The advising coordinator directs each student to our faculty advisor who reviews departmental requirements and helps the student develop a plan that directs the course of study and ensures timely completion of the requirements. The faculty advisor is available for periodic review of the program and of progress in the major at historyadvising@uoregon.edu.

A staff of advisors is available from Tykeson College and Career Advising to help prospective majors. These advisors are trained in university and history major requirements, and they are a resource for information about our program, graduate programs in history, careers in history, and history-related activities in the university and the community. Students may obtain a checklist outlining the major in the history office and from the Tykeson College and Career Advising office.

Forms and checklists for majors and minors may be found online at history.uoregon.edu/undergraduate/forms (<http://history.uoregon.edu/undergraduate/forms/>).

Bachelor's Degree Requirements

The Department of History offers two undergraduate degrees, a bachelor of arts (BA) and a bachelor of science (BS). Requirements are the same for both.

All history majors, regardless of whether they are earning a BA or BS, must fulfill the second-language requirement associated with the university's bachelor of arts general-education requirement. They must demonstrate proficiency in a second language either by completing, with a C– or better or P, at least the third term, second year of a second language. History courses that satisfy major requirements must be taken for a letter grade and that grade must be a C- or better. Specific requirements follow:

Bachelor of Arts and Bachelor of Science Requirements

Code	Title	Credits
Upper-Division History Courses		33
21 credits at the 400 level, including a 5-credit Seminar (HIST 407) ¹		
8 credits in history before 1800		
8 credits in each of three concentration areas selected from a list of six historical fields ²		
Additional History Courses³		12
HIST 290	Historian's Craft	4
Total Credits		49

- ¹ No more than 8 credits of Reading and Conference (HIST 405) may be used to fulfill major requirements.
- ² Historical fields: 1) Europe, 2) United States, 3) Africa and the Middle East, 4) Asia, 5) Latin America, 6) World
- ³ Upper or lower division

Additional Requirements

In exceptional circumstances, a term paper written in Seminar: [Topic] (HIST 408) or in a 400-level course may be expanded into a research paper. Students who have secured approval from the director of undergraduate studies for this option enroll in Reading and Conference: [Topic] (HIST 405) for 2 graded credits. The arrangement for writing a research paper based on the term paper is one that requires not only the approval of the director of undergraduate studies but also the agreement of the instructor in the relevant 400-level course to teach the reading and conference course and to supervise the writing of the research paper. This procedure for writing a research paper does not duplicate the seminar experience. It should not be used to compensate for a student's lack of planning or preparation. It is permitted only when there are strong pedagogical reasons for pursuing it.

A grade point average (GPA) of 2.50 or higher is required in history courses taken at the University of Oregon. A mid-C or better is required in courses taken to fulfill the research paper requirement. Majors who maintain a GPA of 3.50 or better qualify for the history honors track. More information on this option may be found on the department website.

A total of 21 upper-division credits, including three courses numbered 408, 410–499, and all courses taken to fulfill the research paper requirement must be taken at the University of Oregon.

History Honors Program

The honors program provides an opportunity for capable and highly motivated history majors to develop their interests in historical research by writing a thesis during the senior year. To be eligible for admission to the program, students must have completed at least 28 credits in history, of which at least 16 upper-division credits must have been taken at the University of Oregon. The grade point average in all history courses must be 3.50 or better. Students who satisfactorily complete the thesis and related work and fulfill the requirements of the history major are eligible for a bachelor's degree with honors in history. Information about procedures for admission to the honors program, the course of study, the nature of the thesis, and the oral examination on the thesis may be obtained from the history department staff.

Minor Requirements

These new requirements became effective at the beginning of winter term 2010. Minors who signed up when the previous plan was in force may opt to fulfill the requirements of the 2010 plan, although they must formally declare their intention to do so with the director of undergraduate studies of the Department of History.

At least 20 credits—including at least 8 400-level credits—must be completed at the University of Oregon. Courses in history before 1800 and non-European or non-U.S. history require a grade of C– or better to apply toward the minor requirements. Four of the credits may be completed at the lower division. Specific requirements follow:

Code	Title	Credits
History Courses		28
24 upper-division credits ¹		
4 credits in a course on history before 1800		
4 upper-division credits in a course that does not focus on either European or United States history		

- ¹ 12 of the 24 credits must be at the 400 level (three courses from among HIST 408, 410–499).

Additional Requirements

A grade point average (GPA) of 2.50 or higher is required in history courses taken at the University of Oregon.

Advising and Entering the Minor

To declare a minor in history, students must first have a formal advising session with the director of undergraduate studies. The director aids the student in developing and directing a plan of study that ensures timely completion of the requirements.

The faculty advisor is available for initial advising and periodic review of the progress in the minor at historyadvising@uoregon.edu.

Kindergarten through Secondary Teaching Careers

Students completing a degree with a major in history are eligible to apply for the College of Education's fifth-year licensure program in middle-secondary teaching in social studies. Students may also apply to the fifth-year licensure program to become an elementary teacher. More information is available at the **College of Education** section of this catalog and at the College of Education website.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

- Master of Arts
- Doctor of Philosophy

Graduate Studies

The department offers graduate instruction leading to the degrees of master of arts (MA) and doctor of philosophy (PhD) specializing in colonial & Native America and the United States, Europe, East and Southeast Asia, Latin America, and Africa.

Admission

Applicants must submit the following items to be considered for admission to the graduate program in history:

1. A completed UO Graduate Admission Application
2. Transcripts of all college work
3. Three letters of recommendation
4. Scores on the verbal, quantitative, and analytical sections of the Graduate Record Examinations (GRE)
5. Test of English as a Foreign Language (TOEFL) scores for international students
6. A sample of written work and a statement of academic purpose

A number of graduate awards in the form of graduate employee positions (previously known as graduate teaching fellowships) are available each year for entering graduate students.

Fields of Study

The primary fields include medieval Europe, Europe 1400–1815, Europe since 1789, Russia, colonial America and the United States, US West, Native American history, environmental history, East Asia, Southeast Asia, Latin America, and Africa.

Master of Arts Degree Requirements

Applicants are expected to have completed an undergraduate degree in the liberal arts with emphasis on history. The MA program is typically completed in two years of full-time study. Before receiving the degree, students must demonstrate competence in a second language.

Students must write a master's thesis or complete two substantial research papers in the primary field and defend the thesis or research papers in an oral examination.

Major Field Requirement

Students must declare a major field of study, chosen in consultation with a faculty advisor.

Plan of Study

By the end of the first term in the program, students are required to file a plan of study, signed by the advisor, in which they state their major field, list all anticipated course work, and specify their language requirement. The plan of study may be modified later by agreement of both student and advisor. All plans of study are reviewed and approved by the director of graduate studies.

Code	Title	Credits
HIST 611	Field Readings ¹	5
HIST 612	Historical Methods and Writings ²	5
HIST 615	Professional Development ³	1
HIST 616	Graduate Student Conference ⁴	1
HIST 507 or HIST 607	Seminar: [Topic] (two seminars) Seminar: [Topic]	5
HIST 608	Colloquium: [Topic] (two colloquia) ⁵	5

¹ Completed during the first two terms of the first year. This requirement may also be satisfied by completion of (1) an appropriate 500-level course, approved by an advisor, or (2) Colloquium: [Topic] (HIST 608), if equivalent to Field Readings (HIST 611).

² Taken fall term.

³ Taken winter term.

⁴ Taken spring term.

⁵ Student may petition to replace Colloquium: [Topic] (HIST 608) with Colloquium: [Topic] (HIST 508).

Language Requirement

All MA students must demonstrate proficiency in at least one foreign language by passing an exam that tests the ability to read and comprehend a passage of average difficulty drawn from primary sources or the secondary literature. The language exam is offered once each term during the regular academic year.

Advisors must approve the choice of language. MA students whose thesis or research papers require work in foreign language sources are strongly urged to complete this requirement by the end of the first year of study. Advisors may set higher standards or include additional languages

in which students must demonstrate competence. These standards should be established at the time a faculty member accepts a graduate student and fills out the plan of study form.

Writing Requirement

There are two options for satisfying the major writing requirement for the MA:

- A student must complete a master's thesis in his or her major focus of study and pass an oral defense of the thesis before a committee of three faculty members
- A student must complete two substantial research papers and pass an oral defense of these papers before a committee of three faculty members. For the purposes of this option, a research paper is defined as a paper of twenty-five pages or more, based on primary source research

Students completing the thesis option may enroll in a maximum of 10 credits of Thesis (HIST 503), usually in the winter and spring of their second year. Students choosing the research papers option may register for 5 credits of Research: [Topic] (HIST 601), usually in either winter or spring of their second year.

Under ordinary circumstances, it takes students two full years of work to complete this program.

Doctor of Philosophy Degree Requirements

Typically, incoming PhD students who enter with a master's degree are expected to have completed the equivalent of the history department's MA program. Students admitted on the BA-to-PhD track complete the program's MA requirements as they progress toward their PhD degrees. In some cases, doctoral students might be admitted without having fulfilled some of these prerequisites—for example, a course equivalent to Historical Methods and Writings (HIST 612). If this is the case, doctoral students will be required to take Historical Methods and Writings (HIST 612), Professional Development (HIST 615), and Graduate Student Conference (HIST 616).

PhD students prepare themselves in three fields, as follows:

1. **Major Research Field.** A specific, more narrowly defined field—typically, the area of one's dissertation, as conventionally understood
2. **Major Teaching Field.** A general, more broadly defined field that encompasses the research field but is more extensive—typically, a teaching field, as conventionally understood
3. **Minor Thematic, Methodological, or Comparative Field.** Typically the theme, method, or comparison to be advanced in the dissertation

For example, a student of modern France might choose modern France as a major research field, modern Europe as a major teaching field, and gender history, intellectual history, or military history as a minor thematic field. A student of China might take a major research field in modern China, a teaching field in China, and a minor comparative field in Japan.

Plan of Study

By the end of the first term in the program, students are required to file a plan of study, signed by the advisor, in which they state their major field, list all anticipated course work, and specify their language requirement. The plan of study may be modified later by agreement of both student

and advisor. All plans of study are reviewed and approved by the director of graduate studies.

An entering PhD student lacking the equivalent to Historical Methods and Writings (HIST 612) must take the same HIST 612, 615, 616 sequence (<http://history.uoregon.edu/graduate/ma/#course>) as that required of MA students (see table below). This requirement may be waived for incoming students with sufficient preparation based on prior graduate work.

Code	Title	Credits
HIST 611	Field Readings ¹	5
HIST 612	Historical Methods and Writings ²	5
HIST 615	Professional Development ³	1
HIST 616	Graduate Student Conference ⁴	1
HIST 507 or HIST 607	Seminar: [Topic] (two seminars)	5
HIST 608	Workshop: [Topic] (two colloquia) ⁵	5

¹ Completed during the first two terms of the first year. This requirement may also be satisfied by completion of (1) an appropriate 500-level course, approved by an advisor, or (2) Workshop: [Topic] (HIST 608), if equivalent to Field Readings (HIST 611).

² Taken fall term.

³ Taken winter term.

⁴ Taken spring term.

⁵ Student may petition to replace Workshop: [Topic] (HIST 608) with Workshop: [Topic] (HIST 508).

Additional Requirements

- **Minor Field.** Two courses at the 500 or 600 level that, together, define a thematic, methodological, or comparative field. A nonhistory course may be used with approval
- One additional course at the 500 or 600 level in history or another field
- **Distribution Requirement.** PhD students are required to take two courses focusing on subjects outside their country or region of geographic specialization

There is no total credit requirement for the PhD—rather, the Division of Graduate Studies stipulates both a minimum (per term) credit requirement and a residency requirement (<http://gradschool.uoregon.edu/?page=residencyEnrollmentRequirements>).

Language Requirement

PhD students must demonstrate proficiency in at least one foreign language by passing an exam that tests their ability to read and comprehend a passage of average difficulty drawn from primary sources or the secondary literature. The language exam is offered once each term during the regular academic year.

Advisors must approve the choice of language. The language requirements of PhD students, however, will vary according to field. Students admitted into the PhD program should have the language preparation required to enable historical work in their field. Some additional language study might be required by individual advisors as an essential part of a student's PhD work. These standards should be established at the time a faculty member accepts a graduate student and fills out the plan of study form.

Oral Comprehensive Examination

PhD students should take and pass their oral comprehensive examinations in the winter term of their second year, or during spring term at the latest. BA-to-PhD students should take their oral comprehensive exams in their third year. Students may, but are not required, to register for Comprehensive Exam Preparation (HIST 618) to prepare for their comprehensive examinations with the appropriate faculty members.

Dissertation

After completing course work, demonstrating language competence, and passing the oral comprehensive examination, the doctoral student advances to candidacy. The doctoral candidate must compose and defend a dissertation prospectus and then research and write a dissertation that makes an original scholarly contribution to the field and shows evidence of ability in independent investigation. Finally, the candidate defends the dissertation in a formal, public session.

Students should have tentatively identified a dissertation topic by the end of their first year (or, for BA-to-PhD students, by the fall of the third year) and should then file a Tentative Dissertation Topic Form with the graduate director.

PhD students must also prepare and defend a dissertation prospectus no later than the term subsequent to successful passage of the oral comprehensive exam. Students may, but are not required, to register for Dissertation Prospectus (HIST 619) to prepare their dissertation prospectus with the appropriate faculty.

Time to Degree

Applicants with MA degrees who are accepted into the PhD program must complete the PhD requirements within seven years.

Students with BA degrees who are admitted to the PhD program must complete the MA requirements within two years. Such students must complete both the MA and the PhD requirements within a total of seven years from the time of admission.

Courses

HIST 101. Ancient Mediterranean. 4 Credits.

Historical development of the ancient world focusing on the Near East, Egypt, Greece, Rome. Examines major changes in value systems, ideas, social structures, economic institutions, forms of political life.

HIST 102. Making Modern Europe. 4 Credits.

Historical development of Europe; major changes in value systems, ideas, social structures, economic institutions, and forms of political life. From the Renaissance to Napoleon.

HIST 103. Europe and the World. 4 Credits.

Historical development of the Western world; major changes in value systems, ideas, social structures, economic institutions, and forms of political life. From Napoleon to the present.

HIST 104. World History. 4 Credits.

Survey of world cultures and civilizations and their actions. Includes study of missionary religions, imperialism, economic and social relations. Ancient societies.

HIST 105. World History. 4 Credits.

Survey of world cultures and civilizations and their actions. Includes study of missionary religions, imperialism, economic and social relations. Early modern.

HIST 106. World History. 4 Credits.

Survey of world cultures and civilizations and their actions. Includes study of missionary religions, imperialism, economic and social relations. Modern.

HIST 186. Cultures of India. 4 Credits.

Introduces students to the historical study of culture in the Indian subcontinent.

HIST 190. Foundations of East Asian Civilizations. 4 Credits.

Introduction to traditional China and Japan; Confucianism, Buddhism, Daoism; floating worlds; family and gender; traditional views of the body; literati class; samurai; Mongols and Manchus.

HIST 191. China, Past and Present. 4 Credits.

Introduction to Chinese culture. Explores meanings of past and present in 20th-century efforts to modernize China. Chronological and topical inquiry into politics, literature, social structure, gender, art, economy.

HIST 192. Japan, Past and Present. 4 Credits.

Introduction to Japanese culture. Explores myth, tradition, modernity, and postmodernity with one eye trained on the future. Examples from personal experience.

HIST 199. Special Studies: [Topic]. 1-5 Credits.

Problem-oriented course designed for students interested in history who might or might not become majors. Repeatable.

HIST 201. Inventing America. 4 Credits.

Development of the North American continent socially, economically, politically, culturally. Native America, European colonization, colonial development, origins of slavery, Revolution, early Republic.

HIST 202. Building the United States. 4 Credits.

Creation and development of the United States and its social, economical, political, and cultural consequences. Jacksonian era, expansion, commercial and industrial revolution, slavery, Civil War, Reconstruction, Gilded Age, imperialism, and the Progressive Era.

HIST 203. American Century. 4 Credits.

Creation and development of the so-called "American Century" socially, economically, politically, culturally. Imperialism, progressivism, modernity, the 1920s, Depression and New Deal, world wars and Cold War, 1960s, and recent developments.

HIST 211. Reacting to the Past. 4 Credits.

Centers on complex, exciting role-playing simulations of decisive historical events and the development of key analytical skills in close readings of classic texts.

HIST 215. Food in World History. 4 Credits.

Surveys the development of eating practices, tastes, foodstuffs, and culinary philosophies from early human history to the present in diverse parts of the world.

HIST 221. Sex in History. 4 Credits.

Introduces students to the history of sexuality. Comparative overview of sexual politics, ethics, and identities in diverse societies from the ancient world to the present.

HIST 240. War in the Modern World I. 4 Credits.

Evolution of the conduct of war in the 19th and 20th centuries as a reflection of social, political, and technological developments.

HIST 241. War in the Modern World II. 4 Credits.

Surveys changes in the nature and conduct of warfare in light of social, political, and technological developments from 1945 to present.

HIST 248. Latinos in the Americas. 4 Credits.

Explores historical experiences of Latino groups, emphasizing Mexican and Caribbean migrations. Lectures in English; readings and discussions in English, Spanish, and Spanglish. Three years of high school Spanish, SPAN 103 with a grade of C or better, or raised in a bilingual household recommended.

HIST 250. African American History. 4 Credits.

The African background, development of slavery, abolitionism, the Civil War and Reconstruction.

HIST 251. African American History. 4 Credits.

The 20th-century African American experience including the great migration, World War II, the Civil Rights Movement, post-1970 African America.

HIST 273. Introduction to Global Environmental History. 4 Credits.

Introduction to concepts, concerns, and methods of environmental history.

HIST 286. Cities in India and South Asia. 4 Credits.

This course examines the economic, cultural and social dimensions of cities in the subcontinent of India with comparisons from other Asian and North American cities.

HIST 290. Historian's Craft. 4 Credits.

Gateway course to the History major. Explores the diverse meanings and methods of modern historical interpretation. Trains students to work with original historical sources and become more effective consumers and producers of historical writing, preparing them for upper-division coursework.

HIST 301. Modern Europe. 4 Credits.

Political, social, cultural, intellectual, and economic trends from the 18th century to the present. 18th century. McCole.

HIST 302. Modern Europe. 4 Credits.

Political, social, cultural, intellectual, and economic trends in the 19th century.

HIST 303. Modern Europe. 4 Credits.

Political, social, cultural, intellectual, and economic trends in the 20th century.

HIST 308. History of Women in the United States I. 4 Credits.

Survey of the diverse experiences of American women from 1600 to 1870.

HIST 309. History of Women in the United States II. 4 Credits.

Survey of the diverse experiences of American women from 1870 to present.

HIST 319. Early Middle Ages in Europe. 4 Credits.

Emergence, from the remains of the late Roman Empire, of a uniquely medieval Christian culture in the Germanic kingdoms of northern Europe between the 4th and 9th centuries.

HIST 320. High Middle Ages in Europe. 4 Credits.

Changes that swept Europe from 1000 to 1225, including the rise of towns and universities, new spiritual and artistic visions, and varieties of religious and social reform.

HIST 321. Late Middle Ages in Europe. 4 Credits.

A survey of Europe, 1250-1430, the age of Dante and the Black Death, when breakthroughs alternated with disasters in the realms of politics, economics, and religion.

HIST 325. Precolonial Africa. 4 Credits.

Survey of African history to the mid-19th century, analyzing processes of state formation, regional and long-distance trade, religion, oral tradition, and systems of slavery.

HIST 326. Colonial and Postcolonial Africa. 4 Credits.

Survey of African history from the late 1800s to the turn of the 21st century. Emphasis is on the internal dynamics of change as well as the effects of colonialism and global interaction.

HIST 336. France. 4 Credits.

Ancient regime, 1789–1870—French Revolutions of 1789, 1830, and 1848; Napoleonic Empire; monarchy, republicanism, and dictatorship; society and culture in post-Revolutionary France. Birn, Sheridan.

1870 to the present—the Paris Commune and Third Republic; the Dreyfus affair; popular front, fall of France and Resistance; Algeria, de Gaulle, the 1968 student movement.

HIST 340. US Military History. 4 Credits.

Survey of US military history from the colonial period to the present with a focus on the organization, operations, and strategy of the US Army in wartime.

HIST 342. German History: [Topic]. 4 Credits.

Middle Ages to the end of the 20th century. I: Middle Ages and Reformation (1410–1648). II: Germany in the Old Regime and Age of Revolution (1648–1848). III: Modern Germany (1848–present). Repeatable twice when topic changes for a maximum of 12 credits.

HIST 346. Imperial Russia. 4 Credits.

Siberian and North American expansion; Peter the Great; Catherine the Great; abolition of serfdom; industrialization; Silver Age culture and revolution; World War I and collapse.

HIST 347. Soviet Union and Contemporary Russia. 4 Credits.

Examines the rise, development, and collapse of the Soviet Union, the world's first communist regime. Topics include the Russian Revolution, Stalinism, war, culture, and society.

HIST 352. The United States in the 1960s. 4 Credits.

Exploration of a watershed era: civil rights, student activism, educational crisis, Vietnam War, gender revolution, environmentalism.

HIST 361. Early Modern Science. 4 Credits.

Explores the subject, practice, and social place of science in the early modern world.

HIST 362. History of US Cities. 4 Credits.

Course introduces students to the history of one of the most fascinating and contradictory social forms of the modern world. Students learn about the cities of the United States from a variety of perspectives, including urban planning, power and politics, and segregation and inequality.

HIST 363. American Business History. 4 Credits.

American businesses from their colonial origins to the present. Interaction between the political, social, economic, and ideological environment and the internal structure and activities of business enterprises.

HIST 368. American West in Popular Culture. 4 Credits.

Examines the idea of the West in the American imagination as expressed in popular literature, captivity narratives, dime novels, travel literature, art, Wild West shows, films, and television.

HIST 378. American Environmental History to 1890. 4 Credits.

Considers how humans and their natural environments have interacted and reshaped each other through time from 1491 to 1890.

HIST 379. American Environmental History, 1890-Present. 4 Credits.

Focuses on environmental change and the rise of environmental politics from the Progressive Era to the present.

HIST 380. Latin America. 4 Credits.

Major economic, political, and cultural trends and continuities. Pre-Columbian and Iberian history, the colonial period up to 1750. Prereq: Sophomore standing recommended.

HIST 381. Latin America. 4 Credits.

Major economic, political, and cultural trends and continuities. Transition from late colonial mercantilism to political independence and national definition, 1750–1910.

Prereq: Sophomore standing recommended.

HIST 382. Latin America, 1910 to the Present. 4 Credits.

A survey of major economic, political, social, and cultural changes in Latin America since 1910.

HIST 383. Soccer and Society in Latin America. 4 Credits.

Exploring the complexities of Latin American societies using soccer as a historical, cultural, and sociological window to issues of race, class, gender, and national identity.

HIST 386. India. 4 Credits.

This course will survey the history of the Indian subcontinent as both a colony of Britain and then as a cluster of independent countries in the 20th and 21st centuries.

HIST 387. Early China. 4 Credits.

Survey from the beginnings to the 10th century focuses on the development of Chinese thought and religion and the growth of the imperial state and bureaucracy.

HIST 388. Vietnam War and the United States. 4 Credits.

Vietnamese society and history: the First Indochina War, origins and escalation of United States involvement in Vietnam; de-escalation and defeat.

HIST 396. Samurai in Film. 4 Credits.

Examination of the image of Japan's warrior class, the most prominent social group in Japan for over seven centuries. Combines films, readings, and lectures.

HIST 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

HIST 400M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

HIST 401. Research: [Topic]. 1-9 Credits.

Repeatable.

HIST 402. Supervised Tutoring. 1-4 Credits.

Repeatable four times for maximum of 8 credits.

HIST 403. Thesis. 1-9 Credits.

Repeatable.

HIST 404. Internship. 1-3 Credits.

Repeatable once for a maximum of 6 credits.

HIST 405. Reading and Conference: [Topic]. 1-6 Credits.

Repeatable.

HIST 407. Seminar: [Topic]. 5 Credits.

Recent topics include History of Los Angeles, Modern Japanese Culture, Rethinking America in the 1960s, and Stalinism. Repeatable.

HIST 408. Workshop: [Topic]. 1-12 Credits.

Current topics include Southeast Asia Interpretations. Repeatable.

HIST 409. Terminal Project. 1-12 Credits.

Repeatable.

HIST 410. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

HIST 411. Advanced Reacting to the Past: [Topic]. 4 Credits.

Intensive exploration of historical events through interactive games. Possible topics include U.S. Constitutional Convention, French Revolution, Democracy in Athens, India 1947. Repeatable once for a maximum of 8 credits when topic changes.

HIST 412. Ancient Greece: [Topic]. 4 Credits.

Political, cultural, and intellectual history of ancient Greece; emphasis on urban culture. I: Classical Greece. II: Hellenistic World. III: Greek Science. Repeatable twice when topic changes for maximum of 12 credits.

HIST 414. Ancient Rome: [Topic]. 4 Credits.

Political, social, cultural, and intellectual history of ancient Rome from its foundation to late antiquity; emphasis on urban culture. I: Roman Republic. II: Roman Empire. III: Roman Society. Repeatable twice when topic changes for maximum of 12 credits.

HIST 415. Advanced World History: [Topic]. 4 Credits.

Advanced intensive study of selected issues in world history. Possible topics include biology and ecology, ancient empires, or intercultural encounters. Repeatable three times for a maximum of 16 credits when topic changes.

HIST 416. Advanced Women's History: [Topic]. 4 Credits.

Intensive study of select issues in women's history. Emphasis on the construction of their diverse identities; the framework for political, social, and economic empowerment; the historical development of gendered categories. Offered alternate years. Repeatable twice for a maximum of 12 credits when topic changes.

HIST 417. Society and Culture in Modern Africa: [Topic]. 4 Credits.

Explorations in various topics with attention to class, gender, and generational and political struggles. Repeatable twice when topic changes for maximum of 12 credits.

HIST 419. African Regional Histories: [Topic]. 4 Credits.

Examines the historiography of specific nations or regions. Repeatable twice for a maximum of 12 credits.

HIST 420. The Idea of Europe. 4 Credits.

The concept and experience of Europe explored creatively throughout history from multiple disciplinary perspectives.

HIST 425. Economic History of Modern Europe: [Topic]. 4 Credits.

Industrial revolution, economic transformation, growth, and integration in political and social contexts. Focuses on Britain, France, Germany, and Russia. I: European Economies to 1914. II: European Economies in the 20th Century. Repeatable once when topic changes for maximum of 8 credits.

HIST 427. Intellectual History of Modern Europe: [Topic]. 4 Credits.

Major thinkers and movements include classical liberalism, utopian socialism, political economy, Marxism, aestheticism, Nietzsche, classical sociology, psychoanalysis, radical conservatism, Keynesian economics, intellectuals and political engagement, and Western Marxism. I: German Intellectual History. II: Ideas and Society, 19th Century. III: Ideas and Society, 20th Century. Repeatable twice when topic changes for maximum of 12 credits.

HIST 428. Europe in the 20th Century: [Topic]. 4 Credits.

War, revolution, social change, political transformation, and related intellectual and cultural developments in Europe from the Great War of 1914–18 through the present. I: European Fascism. II: Jews in Modern Europe. III: Eastern Europe since World War I. IV: Europe since 1945. Repeatable when chronological or thematic topic changes.

HIST 436. Medieval Central Europe: [Topic]. 4 Credits.

Selected topics in the political, cultural, religious and economic history of Germany and neighboring peoples during the Middle Ages, from the eighth through 13th centuries. Offered alternate years. Repeatable three times for a maximum of 16 credits when topic changes.

HIST 441. 16th-Century European Reformations. 4 Credits.

History of religious, personal, and institutional reforms. Includes late medieval reform movements and the ideas of Erasmus, Luther, Calvin, Ignatius Loyola, and Teresa of Avila.

HIST 443. Modern Germany: [Topic]. 4 Credits.

Topics include class formation, revolutionary movements, the socialist tradition, the Third Reich. Repeatable twice for a maximum of 12 credits when topic changes.

HIST 444. The Holocaust. 4 Credits.

Surveys history of Nazi genocide, focusing on terror and complicity in formation of racial policy; and on perceptions of Nazi anti-Semitism as the Holocaust was occurring.

HIST 446. Modern Russia: [Topic]. 4 Credits.

Explores topics such as the intellectual and cultural history of Russia from the revolution to recent times. Repeatable twice for a maximum of 12 credits.

HIST 449. Race and Ethnicity in the American West. 4 Credits.

Explores the growth of communities of color in western cities of the United States, with particular reference to competition and cooperation between groups.

HIST 450. The Iraq War. 4 Credits.

A history of the Iraq War including the US decision to invade, the subsequent civil war, the rise and fall of the Islamic State in Iraq and Syria (ISIS), and beyond.

HIST 455. Colonial American History. 4 Credits.

Native Americans; motives, methods, implications of European colonization; origins of American slavery; interaction of diverse peoples in shaping colonial North American societies, economies, landscapes, politics.

HIST 456. Revolutionary America. 4 Credits.

Origins, consequences, meanings of American Revolution; changing social, economic, and political contexts; intellectual, religious, and ideological trends; Constitution; institutional, social, and cultural legacy.

HIST 457. 19th-Century United States: [Topic]. 4 Credits.

Political, social, economic, and cultural history. I: Jacksonian Era. II: Civil War. III: Reconstruction. IV: Gilded Age. Repeatable thrice when topic changes for maximum of 16 credits.

HIST 463. American Economic History: [Topic]. 4 Credits.

Varying topics on the economic development of the United States as a preindustrial, industrial, and postindustrial society. I: The Great Depression. II: Industrialization. Repeatable twice when topic changes for maximum of 12 credits.

HIST 466. The American West. 4 Credits.

Social, political, and cultural history. Peoples of the American West and the expansion of the United States in the 19th century.

HIST 467. The American West. 4 Credits.

Social, political, and cultural history. 20th-century immigration, urban growth, economic development; social and political institutions; politics of race, ethnicity, and gender in a multicultural region.

HIST 468. The Pacific Northwest. 4 Credits.

Regional history to the mid-20th century. How the Pacific Northwest mirrors the national experience and how the region has a distinctive history and culture.

HIST 469. American Indian History: [Topic]. 4 Credits.

Variable chronological, thematic, and regional topics, including Indian history to 1860; 1860 to the present; Indians and colonialism; Indians and environments; Indians and gender; regional histories. Repeatable twice when topic changes for maximum of 12 credits.

HIST 470. African American History to 1877: [Topic]. 4 Credits.

Explores aspects of the African American experience in the era of slavery and Reconstruction. Repeatable twice when the topic changes for a maximum of 12 credits.

HIST 471. African American History since 1877: [Topic]. 4 Credits.

In-depth exploration of specific topics in African American history from the late 19th century to the present. Repeatable twice when the topic changes for a maximum of 12 credits.

HIST 473. American Environmental History: [Topic]. 4 Credits.

Variable topics examine the social, cultural, economic, and political history of the American landscape; how Americans have understood, transformed, degraded, conserved, and preserved their environments. I: To 1800. II: 19th Century. III: 20th-Century Environment and Environmentalism. IV: Environment and the West. Repeatable thrice when topic changes for maximum of 16 credits.

HIST 482. Aztecs and Incas. 4 Credits.

Impact of Iberian conquest and settlement on the lives of the indigenous peoples of the Caribbean, Mexico, Central America, and South America.

HIST 483. Latin America: [Topic]. 4 Credits.

Variable topics include the experience of blacks and Indians; the struggle for land, reform, and revolution. Repeatable thrice when topic changes for maximum of 16 credits.

HIST 487. China: [Topic]. 4 Credits.

Survey from the 10th century. Foundations and transformations of state and society; popular rebellions; impact of imperialism; issues of modernity; state building; political, cultural, and social revolutions. I: Song and Yuan. II: Ming and Qing. III: Late Qing. IV: Republican China. V: China since 1949. Repeatable thrice when topic changes for maximum of 16 credits.

HIST 490. Japan: [Topic]. 4 Credits.

Political, social, and cultural history from ancient through contemporary. Origins, aristocratic society, medieval age, Zen, warrior class, urban growth, modernization, imperialism, Pacific war, postwar society. I: Classical Age. II: Shogun's Japan, 1550–1800. III: Modern Age. Repeatable twice when topic changes for maximum of 12 credits.

HIST 491. Medicine and Society in Premodern Japan. 4 Credits.

Examines the interweaving of folk, Buddhist, Chinese, and Dutch influences. Diseases, knowledge, sexual hygiene, and medical challenges in social context.

HIST 497. Culture, Modernity, and Revolution in China: [Topic]. 4 Credits.

I: Modernity and Gender. II: Cultural Revolution and Memory. III: Historiography of the Communist Revolution. Repeatable twice when topic changes for maximum of 12 credits.

HIST 498. Early Japanese Culture and Society: [Topic]. 4 Credits.

Aspects of social history through 1800—social change, hierarchy and power, interrelationship of society and religion, medieval transformations, warrior class. I: Buddhism and Society in Medieval Japan. II: Samurai and War. III: Medieval Japan. Repeatable twice when topic changes for maximum of 12 credits.

Prereq: Courses on Japanese or medieval history recommended.

HIST 500M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

HIST 503. Thesis. 1-12 Credits.

Repeatable.

HIST 507. Seminar: [Topic]. 5 Credits.

Repeatable. Recent topics include History of Los Angeles, Modern Japanese Culture, Rethinking America in the 1960s, and Stalinism.

HIST 508. Workshop: [Topic]. 1-12 Credits.

Repeatable.

HIST 510. Experimental Course: [Topic]. 1-6 Credits.

Repeatable.

HIST 512. Ancient Greece: [Topic]. 4 Credits.

Political, cultural, and intellectual history of ancient Greece; emphasis on urban culture. I: Classical Greece. II: Hellenistic World. III: Greek Science. Repeatable twice when topic changes for maximum of 12 credits.

HIST 514. Ancient Rome: [Topic]. 4 Credits.

Political, social, cultural, and intellectual history of ancient Rome from its foundation to late antiquity; emphasis on urban culture. I: Roman Republic. II: Roman Empire. III: Roman Society. Repeatable twice when topic changes for maximum of 12 credits.

HIST 515. Advanced World History: [Topic]. 4 Credits.

Advanced intensive study of selected issues in world history. Possible topics include biology and ecology, ancient empires, or intercultural encounters. Repeatable three times for a maximum of 16 credits when topic changes.

HIST 516. Advanced Women's History: [Topic]. 4 Credits.

Intensive study of select issues in women's history. Emphasis on the construction of their diverse identities; the framework for political, social, and economic empowerment; the historical development of gendered categories. Offered alternate years. Repeatable twice for a maximum of 12 credits when topic changes.

HIST 517. Society and Culture in Modern Africa: [Topic]. 4 Credits.

Explorations in various topics with attention to class, gender, and generational and political struggles. Repeatable twice when topic changes for maximum of 12 credits.

HIST 519. African Regional Histories: [Topic]. 4 Credits.

Examines the historiography of specific nations or regions. Repeatable twice for a maximum of 12 credits.

HIST 520. The Idea of Europe. 4 Credits.

The concept and experience of Europe explored creatively throughout history from multiple disciplinary perspectives.

HIST 525. Economic History of Modern Europe: [Topic]. 4 Credits.

Industrial revolution, economic transformation, growth, and integration in political and social contexts. Focuses on Britain, France, Germany, and Russia. I: European Economies to 1914. II: European Economies in the 20th Century. Repeatable once when topic changes for maximum of 8 credits.

HIST 527. Intellectual History of Modern Europe: [Topic]. 4 Credits.

Major thinkers and movements include classical liberalism, utopian socialism, political economy, Marxism, aestheticism, Nietzsche, classical sociology, psychoanalysis, radical conservatism, Keynesian economics, intellectuals and political engagement, and Western Marxism. I: German Intellectual History. II: Ideas and Society, 19th Century. III: Ideas and Society, 20th Century. Repeatable twice when topic changes for maximum of 12 credits.

HIST 528. Europe in the 20th Century: [Topic]. 4 Credits.

War, revolution, social change, political transformation, and related intellectual and cultural developments in Europe from the Great War of 1914-18 through the present. I: European Fascism. II: Jews in Modern Europe. III: Eastern Europe since World War I. IV: Europe since 1945. Repeatable when chronological or thematic topic changes.

HIST 536. Medieval Central Europe: [Topic]. 4 Credits.

Selected topics in the political, cultural, religious and economic history of Germany and neighboring peoples during the Middle Ages, from the eighth through 13th centuries. Offered alternate years. Repeatable three times for a maximum of 16 credits when topic changes.

HIST 541. 16th-Century European Reformations. 4 Credits.

History of religious, personal, and institutional reforms. Includes late medieval reform movements and the ideas of Erasmus, Luther, Calvin, Ignatius Loyola, and Teresa of Avila.

HIST 543. Modern Germany: [Topic]. 4 Credits.

Topics include class formation, revolutionary movements, the socialist tradition, the Third Reich. Repeatable twice for a maximum of 12 credits when topic changes.

HIST 544. The Holocaust. 4 Credits.

Surveys history of Nazi genocide, focusing on terror and complicity in formation of racial policy; and on perceptions of Nazi anti-Semitism as the Holocaust was occurring.

HIST 546. Modern Russia: [Topic]. 4 Credits.

Explores topics such as the intellectual and cultural history of Russia from the revolution to recent times. Repeatable twice for a maximum of 12 credits.

HIST 549. Race and Ethnicity in the American West. 4 Credits.

Explores the growth of communities of color in western cities of the United States, with particular reference to competition and cooperation between groups.

HIST 550. The Iraq War. 4 Credits.

A history of the Iraq War including the US decision to invade, the subsequent civil war, the rise and fall of the Islamic State in Iraq and Syria (ISIS), and beyond.

HIST 555. Colonial American History. 4 Credits.

Native Americans; motives, methods, implications of European colonization; origins of American slavery; interaction of diverse peoples in shaping colonial North American societies, economies, landscapes, politics.

HIST 556. Revolutionary America. 4 Credits.

Origins, consequences, meanings of American Revolution; changing social, economic, and political contexts; intellectual, religious, and ideological trends; Constitution; institutional, social, and cultural legacy.

HIST 557. 19th-Century United States: [Topic]. 4 Credits.

Political, social, economic, and cultural history. I: Jacksonian Era. II: Civil War. III: Reconstruction. IV: Gilded Age. Repeatable thrice when topic changes for maximum of 16 credits.

HIST 563. American Economic History: [Topic]. 4 Credits.

Varying topics on the economic development of the United States as a preindustrial, industrial, and postindustrial society. I: The Great Depression. II: Industrialization. Repeatable twice when topic changes for maximum of 12 credits.

HIST 566. The American West. 4 Credits.

Social, political, and cultural history. Peoples of the American West and the expansion of the United States in the 19th century.

HIST 567. The American West. 4 Credits.

Social, political, and cultural history. 20th-century immigration, urban growth, economic development; social and political institutions; politics of race, ethnicity, and gender in a multicultural region.

HIST 568. The Pacific Northwest. 4 Credits.

Regional history to the mid-20th century. How the Pacific Northwest mirrors the national experience and how the region has a distinctive history and culture.

HIST 569. American Indian History: [Topic]. 4 Credits.

Variable chronological, thematic, and regional topics, including Indian history to 1860; 1860 to the present; Indians and colonialism; Indians and environments; Indians and gender; regional histories. Repeatable twice when topic changes for maximum of 12 credits.

HIST 570. African American History to 1877: [Topic]. 4 Credits.

Explores aspects of the African American experience in the era of slavery and Reconstruction. Repeatable twice when topic changes for a maximum of 12 credits.

HIST 571. African American History since 1877: [Topic]. 4 Credits.

In-depth exploration of specific topics in African American history from the late 19th century to the present. Repeatable twice when the topic changes for a maximum of 12 credits.

HIST 573. American Environmental History: [Topic]. 4 Credits.

Variable topics examine the social, cultural, economic, and political history of the American landscape; how Americans have understood, transformed, degraded, conserved, and preserved their environments. I: To 1800. II: 19th Century. III: 20th-Century Environment and Environmentalism. IV: Environment and the West. Repeatable thrice when topic changes for maximum of 16 credits.

HIST 582. Aztecs and Incas. 4 Credits.

Impact of Iberian conquest and settlement on the lives of the indigenous peoples of the Caribbean, Mexico, Central America, and South America.

HIST 583. Latin America: [Topic]. 4 Credits.

Variable topics include the experience of blacks and Indians; the struggle for land, reform, and revolution. Repeatable thrice when topic changes for maximum of 16 credits.

HIST 587. China: [Topic]. 4 Credits.

Survey from the 10th century. Foundations and transformations of state and society; popular rebellions; impact of imperialism; issues of modernity; state building; political, cultural, and social revolutions. I: Song and Yuan. II: Ming and Qing. III: Late Qing. IV: Republican China. V: China since 1949. Repeatable thrice when topic changes for maximum of 16 credits.

HIST 590. Japan: [Topic]. 4 Credits.

Political, social, and cultural history from ancient through contemporary. Origins, aristocratic society, medieval age, Zen, warrior class, urban growth, modernization, imperialism, Pacific war, postwar society. I: Classical Age. II: Shogun's Japan, 1550-1800. III: Modern Age. Repeatable twice when topic changes for maximum of 12 credits.

HIST 591. Medicine and Society in Premodern Japan. 4 Credits.

Examines the interweaving of folk, Buddhist, Chinese, and Dutch influences. Diseases, knowledge, sexual hygiene, and medical challenges in social context.

HIST 597. Culture, Modernity, and Revolution in China: [Topic]. 4 Credits.

I: Modernity and Gender. II: Cultural Revolution and Memory. III: Historiography of the Communist Revolution. Repeatable twice when topic changes for maximum of 12 credits.

HIST 598. Early Japanese Culture and Society: [Topic]. 4 Credits.

Aspects of social history through 1800—social change, hierarchy and power, interrelationship of society and religion, medieval transformations, warrior class. I: Buddhism and Society in Medieval Japan. II: Samurai and War. III: Medieval Japan. Repeatable twice when topic changes for maximum of 12 credits.

Prereq: Courses on Japanese or medieval history recommended.

HIST 601. Research: [Topic]. 1-9 Credits.

Repeatable.

HIST 602. Supervised Tutoring. 1-12 Credits.

Repeatable.

HIST 603. Dissertation. 1-12 Credits.

Repeatable.

HIST 604. Internship: [Topic]. 1-3 Credits.

Repeatable once for a maximum of 6 credits.

HIST 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

HIST 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

HIST 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

HIST 609. Terminal Project. 1-16 Credits.

Repeatable.

HIST 610. Experimental Course: [Topic]. 1-4 Credits.

Repeatable.

HIST 611. Field Readings. 5 Credits.

Independent study designed to ground students in major works and issues of their chosen field. Intensive study, based on a substantial reading list, requiring substantial written work.

HIST 612. Historical Methods and Writings. 5 Credits.

Introduction to the historical profession; includes historical questions, methods, and theories, and historiographic debates. Sequence.

HIST 615. Professional Development. 1 Credit.

Promotes understanding of the history profession and development of professional skills through a variety of activities—workshops on research and writing, critiques of scholarly presentations, discussion of the academic job market. Offered once per academic year.

HIST 616. Graduate Student Conference. 1 Credit.

Designed to build on work from HIST 612 and HIST 615 courses. Promotes understanding of history profession, standards, protocols; plan and host conference. Offered once per academic year.

HIST 618. Comprehensive Exam Preparation. 5 Credits.

Independent readings with faculty members to discuss a predetermined reading list in preparation for PhD comprehensive examination.

HIST 619. Dissertation Prospectus. 5 Credits.

Independent research under the direction of student's adviser with the specific aim of producing a defensible dissertation prospectus.

The Humanities Program offers students the opportunity to pursue their interests across the humanistic disciplines. Combining the study of the arts, literature, and methods of inquiry, the curriculum fosters intellectual coherence and integration, awareness of cultural contexts and traditions, and the connection of humanistic theory to practice. It is designed to provide essential skills and understanding for intelligent action and preparation for a wide range of careers.

Program Committee

Rachel DiNitto, East Asian languages and literatures

Katya E. Hokanson, comparative literature

Mary Jaeger, classics

Jeffrey S. Librett, German and Scandinavian

F. Regina Psaki, Romance languages

George J. Sheridan Jr., history

Michael Stern, German and Scandinavian

Lisa Wolverton, history

Mary E. Wood, English

Undergraduate Studies

Major Requirements

The humanities major is an interdisciplinary bachelor of arts (BA) degree program. Proficiency in at least one second language, a requirement for the BA degree, is central to the humanities major. Although majors are not required to do more than meet the BA requirement, it is strongly recommended that they continue language study in upper-division courses.

Grades of mid-C or better must be earned in courses taken to satisfy major requirements. For graduation, humanities majors must maintain at least a 2.00 grade point average (GPA) in required courses. No upper-division course may be used to satisfy more than one major requirement.

Bachelor of Arts Degree Requirements

Code	Title	Credits
Introductory Courses		
Option 1		8
Select two of the following:		
HUM 101	Introduction to the Humanities I	
HUM 102	Introduction to the Humanities II	
HUM 103	Introduction to the Humanities III	

Option 2		
HUM 300	Themes in the Humanities ¹	4
Breadth Requirement ²		
Arts (music history, theater history, art history) (see Courses from Other Department below)		4
Philosophy (see Courses from Other Department below)		4
Ancient World (see Courses from Other Department below)		4
History (see Courses from Other Department below)		4
Concentration		
Seven upper-division courses in concentration ³		28
Total Credits		48-52

¹ Recommended for students who declare the major in the junior or senior year.

² At least two breadth requirement courses must be in the upper division.

³ Students must submit a brief essay defending the coherence of the concentration and outlining the seven courses they plan to take. No more than three of the seven courses may be taken in any one department. Students should choose at least one Seminar (407) as part of their concentration.

Courses from Other Departments

Arts: Any course with an ARH, ART, MUP, MUS, or TA prefix.

Philosophy: Any course with a PHIL prefix excluding course(s) applied to Ancient World.

Ancient World: Any course with a CLAS prefix, Ancient Mediterranean (HIST 101), World History (HIST 104), Foundations of East Asian Civilizations (HIST 190), Precolonial Africa (HIST 325), History of Philosophy: Ancient and Medieval (PHIL 310), Early Judaism (REL 211).

History: Any course with a HIST prefix excluding course(s) applied to Ancient World.

Honors

Honors in humanities allows a student to focus on an area of concentration in a written thesis. Requirements are as follows:

1. Satisfaction of the requirements for the major
2. A grade point average of 3.50 or better in courses taken to meet the upper-division requirements of the major
3. A senior thesis of substantial quality, approved by the thesis director and at least one member of the program committee

Kindergarten through Secondary Teaching Careers

Students who complete a degree with a major in humanities are eligible to apply to the College of Education's fifth-year programs for a license in middle-secondary teaching or elementary teaching. More information is available in the **College of Education** section of this catalog. Students who want to teach language arts need more preparation in grammar, literature, and writing. Students who want to teach social studies need more preparation in history, economics, American government, culture, and society.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Courses

HUM 101. Introduction to the Humanities I. 4 Credits.

Ideas and modes of vision Western culture has inherited from the classical period. Readings and discussions focus on literature, philosophy, history, the arts, and religion.

HUM 102. Introduction to the Humanities II. 4 Credits.

Ideas and modes of vision Western culture has inherited from the medieval to the Renaissance periods. Readings and discussions focus on literature, philosophy, history, the arts, and religion.

HUM 103. Introduction to the Humanities III. 4 Credits.

An interdisciplinary introduction to the global humanities in the modern period.

HUM 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable up to four times.

HUM 240. Medical Humanities. 4 Credits.

Examines the intersection of literature, philosophy, history, and the arts with medical theory and practice.

HUM 245. Food, Art, and Literature. 4 Credits.

The study of food in the Ancient Greco-Roman world, ancient China, or the modern world using historical, literary, and practical approaches.

HUM 260. Postwar European Culture. 4 Credits.

Addresses the broad history and culture of 20th century Europe through humanistic themes and texts that reflect aspects of that experience.

HUM 300. Themes in the Humanities. 4 Credits.

Interdisciplinary and multimedia introduction to the study of the humanities. Analysis of such themes as tragedy in music, literature, and art.

HUM 361. Ancient Science and Culture. 4 Credits.

Explores the subject, practice, and social place of science in the ancient world.

HUM 399. Special Studies: [Topic]. 1-5 Credits.

Problem-oriented course designed to explore new topics or approaches to studies in the humanities. Repeatable.

HUM 403. Thesis. 1-6 Credits.

Repeatable.

HUM 405. Reading and Conference: [Topic]. 1-6 Credits.

Repeatable.

HUM 406. Practicum: [Topic]. 1-5 Credits.

Repeatable with consent of instructor and program head.

HUM 407. Seminar: [Topic]. 1-5 Credits.

Repeatable.

HUM 409. Terminal Project. 1-12 Credits.

Repeatable.

HUM 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

HUM 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

Human Physiology

Andrew Karduna, Department Head

541-346-4107

541-346-2841 fax

181 Esslinger Hall

Human physiology is the science of the mechanical, physical, and biochemical function of humans, and serves as the foundation of modern medicine. As a discipline, it connects science, medicine, and health, and creates a framework for understanding how the human body adapts to stresses, physical activity, and disease.

Human physiology and anatomy are closely related—anatomy is the study of form, physiology is the study of function, and form and function are intrinsically linked. The study of human physiology integrates knowledge across many levels, including biochemistry, cell physiology, and organ systems. Contemporary research in human

physiology explores new ways to maintain or improve the quality of life, the development of new medical therapies and interventions, and the unanswered questions about how the human body works. The Department of Human Physiology serves its students by providing strong training in human physiology and anatomy to prepare them for careers in medicine, allied health professions, and biomedical research.

Richard Troxel, senior instructor emeritus. BS, 1975, MS, 1977, Oregon. (1976)

Marjorie Woollacott, professor emerita. BA, 1968, PhD, 1973, Southern California. (1980)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

- Bachelor of Arts
- Bachelor of Science

Undergraduate Studies

The department offers a program leading to either a bachelor of science (BS) or a bachelor of arts (BA) degree.

The rigorous undergraduate curriculum provides an in-depth exploration of the field as well as a strong foundation for future studies. Majors complete sequences in biology, chemistry, physics, and mathematics, in addition to upper-level course work in human physiology.

Preparation

High school preparation should include a strong background in chemistry, biology, mathematics, and physics. Students involved in Advanced Placement (AP) or International Baccalaureate (IB) programs can complete some lower division requirements by earning sufficient test scores. However, some graduate degree programs may require students to complete these courses at the collegiate level.

Transfer Students

Before transferring, students should complete as many general-education requirements and lower-division major requirements as possible, including general chemistry, general biology, general physics, and mathematics. Students should ensure that courses transfer specifically

as required sequences. The University's Transfer Course Equivalency (<http://registrar.uoregon.edu/transfer-students/>) tool is a helpful resource.

The anatomy and physiology sequence (HPHY 321–325) provides the bulk of upper-division credits human physiology majors complete. The courses are the foundation on which students learn the human physiology culture and expectations, and are designed to prepare students for senior-level course work in the major. As a result, HPHY 321–325 must be completed in residence at the University of Oregon; transfer students should plan on taking the courses on the UO campus.

Scholarships

Numerous scholarships are available; a complete list is available on the department website.

Careers

A degree in human physiology prepares students to be critical thinkers who can independently assess their own personal health, using the guiding principles of scientific inquiry as a model for understanding the world around them. Students seeking a career in medicine, dentistry, physical therapy, or other health professions should work closely with the human physiology undergraduate advisor as well as health professions advisors to plan their program of study to meet the specific admission requirements of the postgraduate schools in which they are interested. Information on additional courses that may be required for graduate programs is available from the Health Professions Program (<http://healthprofessions.uoregon.edu/health-fields/>) website.

¹ Should be taken in the first year.

² Must be taken in residence at the University of Oregon.

Courses required for the major must be taken for letter grades and passed with grades of C- or better. Additional requirements for the bachelor's degree are described in the **Bachelor's Degree Requirements** section of this catalog.

Honors

To apply to graduate with departmental honors, a student must have a GPA of 3.50 or better in courses applied toward the human physiology degree requirements and complete an honors thesis under the supervision of a human physiology thesis committee. In addition, human physiology majors enrolled in the Robert Donald Clark Honors College at the University of Oregon are eligible to complete an honors thesis through that program.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

The bachelor of science is shown below. A bachelor of arts in human physiology may be earned by completing (or demonstrating proficiency in) two years of a foreign language.

Bachelor of Science in Human Physiology

Course	Title	Credits	Milestones
First Year			
Fall			
MATH 112	Elementary Functions ¹	4	
CH 221	General Chemistry I	4

Total Credits		45	

¹ Students not starting in Elementary Functions (MATH 112) may require additional terms to graduate.

² To complete general-education requirements within eight courses, students must take arts and letters or social science group-satisfying courses that also satisfy multicultural requirements.

³ List A and List B options may be found online. (<https://cas.uoregon.edu/physiology/undergraduates/major-requirements/>)

- **Master of Science: Athletic Training Emphasis**
- **Master of Science–Doctor of Philosophy: Research-Intensive Emphasis**

Graduate Studies

The department offers a graduate program in human physiology with an emphasis on research leading through the master of science (MS) degree to the doctor of philosophy (PhD) degree. The goal is to provide classroom and research experiences that turn students into professionals with the knowledge and experience to be superior researchers or become university-level educators. This is an individualized program with a strong emphasis on research. Decisions on accepting applicants to the graduate program are made by the faculty members, and are based on available laboratory space and financial support—both of which vary greatly from year to year. graduate employee (GE) opportunities and research fellowships are available for highly qualified students to teach undergraduate laboratories or assist in research projects. The GE award provides a full-tuition waiver and a monthly stipend that varies in amount according to the assignment. For more information, visit the department website.

Master of Science Degree Requirements

Code	Title	Credits
HPHY 611 & HPHY 612 & HPHY 613	Professional Skills I: Effective Teaching and Professional Skills II: Responsible Research and Professional Skills III: Career Development	3
HPHY 621 & HPHY 622 & HPHY 623	Systems Physiology I and Systems Physiology II and Systems Physiology III	12
EDUC 614	Educational Statistics ¹	3
EDUC 640	Applied Statistical Design and Analysis ¹	3
Human physiology courses or other courses most appropriate to student's line of study ²		4
Total Credits		25

¹ Statistical analysis courses covering the following topics: descriptive statistics, logic of hypothesis testing, elementary inferential statistics, confidence intervals, one-way analysis of variance, post hoc comparisons, a priori contrasts, within-subjects and between-subjects effects, two-way and higher-order designs, and interactions. For recent additions to these course options, check with the director of graduate studies for the department.

² Determined in conjunction with program committee.

Additional Requirements

The master of science degree requires completion of a substantial research project. Department faculty members, in consultation with the student, determine the format for the presentation of the project, which will include an oral defense in combination with either a master's thesis, a journal-style manuscript, or a comprehensive project report. Required courses must be taken for letter grades and passed with grades of B–

or better. Students must maintain at least a 3.00 grade point average for all courses. Additional university master's degree requirements are described under Master's Degrees in the **Division of Graduate Studies** section of this catalog.

Doctor of Philosophy Degree Requirements

Code	Title	Credits
HPHY 611 & HPHY 612 & HPHY 613	Professional Skills I: Effective Teaching and Professional Skills II: Responsible Research and Professional Skills III: Career Development	3
HPHY 621 & HPHY 622 & HPHY 623	Systems Physiology I and Systems Physiology II and Systems Physiology III	12

Select one of the following:		4
HPHY 670	Advanced Respiratory Physiology	
HPHY 676	Human Cardiovascular Control	
HPHY 684	Kinematics of Human Movement	
HPHY 685	Kinetics of Human Movement	
HPHY 603	Dissertation ³	1-16
Total Credits		30-45

¹ Statistical analysis courses covering the following topics: descriptive statistics, logic of hypothesis testing, elementary inferential statistics, confidence intervals, one-way analysis of variance, post hoc comparisons, a priori contrasts, within-subjects and between-subjects effects, two-way and higher-order designs, and interactions. For recent additions to these course options, check with the director of graduate studies for the department.

² Determined in conjunction with program committee.

³ Must register for course every term of enrollment after advancing to candidacy.

The doctoral degree requires completion of a minimum of 135 credits beyond the bachelor's degree; at least 60 of these credits must be completed through human physiology courses. Written and oral doctoral comprehensive examinations are taken after completing a substantial portion of the program of study. Upon passing these examinations, the student is advanced to candidacy. A final oral defense is held after completion of the dissertation and after all other degree requirements have been met. Required courses must be taken for letter grades and passed with grades of B– or better. Students must maintain at least a 3.00 grade point average for all courses. Additional university doctor of philosophy degree requirements are described under Doctoral Degrees in the **Division of Graduate Studies** section of this catalog.

Admission Requirements

Applicants for the athletic training MS program should check the Graduate Studies in Athletic Training website (<http://pages.uoregon.edu/uogradat/>) and applicants for the research-intensive MS-PhD program should check the department website (<http://physiology.uoregon.edu/>) for information on the online graduate application and deadlines.

Recommended criteria for applying to all graduate programs include the following:

- Baccalaureate degree from an accredited university with a GPA of 3.40 or higher on a 4.00 scale
- Completed course work with a grade of B+ or better in general chemistry, general biology, and two courses of physiology or combined anatomy and physiology
- International students who have not received a degree from a university in a country whose official language is English must have a TOEFL score of 575 (paper test) or 90 (Internet-based test) or an IELTS overall band score of 7.0.

Minimum requirements for admission to all graduate programs include the following:

- Baccalaureate degree from an accredited university with a GPA of 3.00 or higher on a 4.00 scale
- Completed course work with a grade of B– or better in general chemistry, general biology, and two courses of physiology or combined anatomy and physiology
- International students who have not received a degree from a university in a country whose official language is English must have a TOEFL score of 575 (paper test) or 90 (Internet-based test) or an IELTS overall band score of 7.0

In addition, for graduate studies in athletic training:

- Recommended GRE scores of 153 or better on each of the verbal and quantitative sections (institution code: 4846; department code: 0217); minimum GRE scores of 148 or better on each of the verbal and quantitative sections
- Completed course work with a grade of B– or better in physics and biomechanics
- Must be a certified athletics trainer at time of matriculation

Courses

HPHY 103. Exercise and Performance. 4 Credits.

Structure and function of the human body including movement analysis. Topics include training and exercise responses; sport, daily living, and workplace performance; and injury adaptations.

HPHY 105. Principles of Nutrition. 4 Credits.

Explores the fundamentals of nutrition and its application to culture, lifestyle, and health as they relate to humans across the lifespan. Course will be taught once or more per academic year.

HPHY 111. The Science of Sex. 4 Credits.

The anatomy and physiology of sex, with assignments and discussion designed to develop scientific literacy.

HPHY 199. Special Studies: [Topic]. 1-4 Credits.

Repeatable.

HPHY 211. Medical Terminology. 3 Credits.

Explore and develop skills in language and terminology specific to the medical sciences with an emphasis on derivation, meaning, and pronunciation.

HPHY 212. Scientific Investigation in Physiology. 4 Credits.

Explores the process of conducting and communicating scientific research, and how data and statistics help us build and understand scientific knowledge about physiology and medicine.

HPHY 321. Human Anatomy I. 5 Credits.

Introduction to the human body and histology; nerves; central, autonomic, and peripheral nervous systems; cranial nerves; regional anatomy of the head; special senses. Includes cadaver laboratory. Sequence with HPHY 322, HPHY 323, HPHY 324, HPHY 325.

Prereq: HPHY 211; BI 211 or BI 281H; BI 212 or BI 282H; CH 221 or CH 224H; CH 222 or CH 225H; CH 223 or CH 226H; MATH 246 or MATH 251.

HPHY 322. Human Physiology I. 5 Credits.

Neuro- and muscular physiology: action potentials; synapses and receptors; skeletal muscle; central, peripheral, and autonomic nervous systems; special senses. Includes human-based laboratory. Sequence with HPHY 321, HPHY 323, HPHY 324, HPHY 325.

Prereq: HPHY 212; BI 211 or BI 281H; BI 212 or BI 282H; CH 221 or CH 224H; CH 222 or CH 225H; CH 223 or CH 226H; MATH 246 or MATH 251.

HPHY 323. Human Anatomy II. 5 Credits.

Heart, lungs, and vasculature in addition to regional exploration of the musculoskeletal system. Includes cadaver laboratory. Sequence with HPHY 321, HPHY 322, HPHY 324, HPHY 325.

Prereq: HPHY 321.

HPHY 324. Human Physiology II. 5 Credits.

Cardiovascular system; respiratory system; immunology. Includes human-based laboratory. Sequence with HPHY 321, HPHY 322, HPHY 323, HPHY 325.

Prereq: HPHY 212, HPHY 321, HPHY 322.

HPHY 325. Human Anatomy and Physiology III. 5 Credits.

Anatomy and physiology of the digestive, reproductive, and renal systems; endocrinology. Includes combination of cadaver laboratory and human-based laboratory. Sequence with HPHY 321, HPHY 322, HPHY 323, HPHY 324.

Prereq: HPHY 323, HPHY 324.

HPHY 333. Motor Control. 4 Credits.

Introduction to the processes of control and coordination in the performance of motor skills. Neurophysiological, mechanical, and cognitive bases of motor skill acquisition.

Prereq: HPHY 321, HPHY 322; or PSY 304.

HPHY 362. Tissue Injury and Repair. 4 Credits.

Exploration of the physiology of injury and trauma. Emphasis on inflammation and healing of connective tissue injury, tissue biomechanics, mechanisms of injury, and clinical orthopedic evaluation techniques.

Prereq: HPHY 323, HPHY 324.

HPHY 371. Physiology of Exercise. 4 Credits.

Physiology of exercise, physical conditioning, and training; mechanisms and significance of these effects for health and performance.

Prereq: HPHY 323, HPHY 324.

HPHY 374. Clinical Electrocardiography and Exercise. 4 Credits.

Overview of pathophysiology, diagnostic testing, exercise prescription and rehabilitation of cardiovascular diseases. Incorporated throughout the course, students will learn the fundamentals of electrocardiography and how this tool is applied in both the diagnostic and rehabilitative settings.

Prereq: HPHY 371. Must be passed with grades of C or better.

HPHY 375. Metabolism and Nutrition. 4 Credits.

Exploration of cellular, tissue, and whole body integrated metabolic processes as the basis of physiologic function. Integrating the metabolism of macronutrients at the cellular, tissue, and whole body systems level in the context of human growth, function, and disease. Prereq: HPHY 325, HPHY 371.

HPHY 381. Biomechanics. 4 Credits.

Fundamental principles of physics applied to the analysis of human movement. Emphasis on developing abilities to analyze human movement quantitatively. Prereq: HPHY 323, PHYS 201.

HPHY 399. Special Studies: [Topic]. 1-4 Credits.

Repeatable.

HPHY 401. Research: [Topic]. 1-15 Credits.

Repeatable.

HPHY 403. Thesis. 1-4 Credits.

For honors students during the terms in which they conduct research or write a thesis.

HPHY 404. Internship: [Topic]. 1-16 Credits.

Repeatable. Field experience in an agency, institution, or business. Practice knowledge from courses: planning, organizing, directing, evaluating, and developing professional competence.

HPHY 405. Special Problems: [Topic]. 1-12 Credits.

Repeatable. Reading and assignments in connection with other courses for extra credit. Honors readings.

HPHY 406. Practicum: [Topic]. 1-12 Credits.

Assist students learning anatomy or physiology in either the lecture or lab courses. Repeatable.

HPHY 407. Seminar: [Topic]. 1-5 Credits.

Repeatable. Topics are offered regularly in such areas as health sciences, motor control, biomechanics, and physiology.

HPHY 408. Workshop: [Topic]. 1-15 Credits.

Repeatable.

HPHY 409. Terminal Project. 1-12 Credits.

Repeatable.

HPHY 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

HPHY 411. Scientific Teaching. 1 Credit.

For students currently completing the human anatomy and physiology core sequence; focuses on how people learn, evidence-based teaching practices, and strategies to improve student inclusion and representation. Prereq: HPHY 211, HPHY 212.

HPHY 412. Sleep Physiology. 4 Credits.

Fundamental principles of sleep and how physiology is affected by sleep. Prereq: HPHY 325.

HPHY 413. Muscle Structure, Function, and Plasticity. 4 Credits.

Physiologic basis for skeletal muscle adaptation to increased and decreased use and injury. Emphasizes how structure dictates function relevant to rehabilitation. Prereq: HPHY 323, HPHY 324.

HPHY 414. Muscle Metabolism. 4 Credits.

Metabolic basis for skeletal muscle adaptation to increased and decreased use, and injury models. Emphasizes interorgan communication; uses clinical models. Prereq: HPHY 371.

HPHY 420. Human Anatomy Dissection. 2 Credits.

Dissection of one region of a preserved donated human cadaver and preparation of the specimen for the HPHY 321/HPHY 323/HPHY 325 laboratory experience. Students are accepted by application, which are due early February. Prereq: HPHY 323.

HPHY 422. Physiology of Obesity. 4 Credits.

Explores potential causes of the obesity epidemic, cellular mechanisms linking obesity to insulin resistance and metabolic diseases, and interventions in treatment of metabolic disease and obesity. Prereq: HPHY 325, HPHY 371.

HPHY 423. Physiology of Aging. 4 Credits.

Examines changes that occur to cells and organs in old age and the causes of age-related disease and dysfunction (cardiovascular disease, diabetes, osteoporosis, Alzheimer's); interventions to increase longevity. Prereq: HPHY 325.

HPHY 432. Neural Development. 4 Credits.

Exploration of development of the cells in the nervous system. We will discuss the importance of "critical periods" in development and how interventions or dysfunction during critical periods can lead to neurodevelopmental disorders using the respiratory system as a model system. Prereq: HPHY 323, HPHY 324.

HPHY 433. Neurophysiology of Concussion. 4 Credits.

Investigate diagnosis, deficits, and treatment of mild traumatic brain injury and neurophysiological effects. Prereq: HPHY 325, HPHY 333.

HPHY 434. Movement Disorders. 4 Credits.

Discusses the clinical manifestations and underlying physiological mechanisms of selected movement disorders. Emphasizes the role of scientific experiment in diagnosis and treatment. Prereq: HPHY 325, HPHY 333.

HPHY 436. Clinical Neuroscience. 4 Credits.

This course covers neurological diseases and disorders from a neuroscience perspective. The focus will be on applying basic neuroscience principles to better understand clinical practices including patient diagnosis and treatments. Prereq: HPHY 321, HPHY 322.

HPHY 444. Clinical Anatomy. 4 Credits.

Through case-based learning, students have the opportunity to apply the knowledge of anatomy and physiology in the context of clinical practice and diagnosis. Prereq: HPHY 325.

HPHY 462. Therapeutic Techniques. 4 Credits.

Clinical application of therapeutic techniques including modalities and rehabilitation for soft-tissue orthopedic injuries. Offered alternate years. Prereq: HPHY 362.

HPHY 470. Environmental Physiology. 4 Credits.

Examination of physiological adaptations to acute and chronic exposure to extreme heat, cold, and high altitude. Prereq: HPHY 371.

HPHY 473. High Altitude Physiology and Medicine. 4 Credits.

Explores major physiologic responses to high altitude (hypoxia), both adaptive and maladaptive, from systems to molecular level, as well as pathophysiological conditions at high altitude. Offered alternate years. Prereq: HPHY 325 and 371.

HPHY 503. Thesis. 1-16 Credits.

Repeatable.

HPHY 507. Seminar: [Topic]. 1-5 Credits.

Repeatable. Topics are offered regularly in such areas as health sciences, motor control, biomechanics, and physiology.

HPHY 508. Workshop: [Topic]. 1-15 Credits.

Repeatable.

HPHY 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

HPHY 512. Sleep Physiology. 4 Credits.

Fundamental principles of sleep and how physiology is affected by sleep.

HPHY 513. Muscle Structure, Function, and Plasticity. 4 Credits.

Physiologic basis for skeletal muscle adaptation to increased and decreased use and injury. Emphasizes how structure dictates function relevant to rehabilitation.

HPHY 514. Muscle Metabolism. 4 Credits.

Metabolic basis for skeletal muscle adaptation to increased and decreased use, and injury models. Emphasizes interorgan communication; uses clinical models.

HPHY 520. Human Anatomy Dissection. 2 Credits.

Dissection of one region of a preserved donated human cadaver and preparation of the specimen for the HPHY 321/HPHY 323/HPHY 325 laboratory experience. Students are accepted by application, which are due early February.

HPHY 522. Physiology of Obesity. 4 Credits.

Explores potential causes of the obesity epidemic, cellular mechanisms linking obesity to insulin resistance and metabolic diseases, and interventions in treatment of metabolic disease and obesity.

HPHY 523. Physiology of Aging. 4 Credits.

Examines changes that occur to cells and organs in old age and the causes of age-related disease and dysfunction (cardiovascular disease, diabetes, osteoporosis, Alzheimer's); interventions to increase longevity.

HPHY 532. Neural Development. 4 Credits.

Exploration of development of the cells in the nervous system. We will discuss the importance of "critical periods" in development and how interventions or dysfunction during critical periods can lead to neurodevelopmental disorders using the respiratory system as a model system.

HPHY 533. Neurophysiology of Concussion. 4 Credits.

Investigate diagnosis, deficits, and treatment of mild traumatic brain injury and neurophysiological effects.

HPHY 534. Movement Disorders. 4 Credits.

Discusses the clinical manifestations and underlying physiological mechanisms of selected movement disorders. Emphasizes the role of scientific experiment in diagnosis and treatment.

HPHY 536. Clinical Neuroscience. 4 Credits.

This course covers neurological diseases and disorders from a neuroscience perspective. The focus will be on applying basic neuroscience principles to better understand clinical practices including patient diagnosis and treatments.

HPHY 570. Environmental Physiology. 4 Credits.

Examination of physiological adaptations to acute and chronic exposure to extreme heat, cold, and high altitude.

HPHY 573. High Altitude Physiology and Medicine. 4 Credits.

Explores major physiologic responses to high altitude (hypoxia), both adaptive and maladaptive, from systems to molecular level, as well as pathophysiological conditions at high altitude. Offered alternate years.

HPHY 601. Research: [Topic]. 1-16 Credits.

Repeatable.

HPHY 602. Supervised College Teaching. 1-5 Credits.

Repeatable.

HPHY 603. Dissertation. 1-16 Credits.

Repeatable.

HPHY 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

HPHY 606. Practicum: [Topic]. 1-16 Credits.

Repeatable. Selected problems in the field of human physiology.

HPHY 607. Seminar: [Topic]. 1-9 Credits.

Repeatable. Topics are offered regularly in such areas as health sciences, motor control, biomechanics, and physiology.

HPHY 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

HPHY 609. Terminal Project. 1-12 Credits.

Repeatable.

HPHY 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

HPHY 611. Professional Skills I: Effective Teaching. 1 Credit.

Development of professional skills for academic careers related to human physiology. Sequence with HPHY 612, HPHY 613.

HPHY 612. Professional Skills II: Responsible Research. 1 Credit.

Development of professional skills for academic careers related to human physiology. Sequence with HPHY 611, HPHY 613.

HPHY 613. Professional Skills III: Career Development. 1 Credit.

Development of professional skills for academic careers related to human physiology. Sequence with HPHY 611, HPHY 612.

HPHY 621. Systems Physiology I. 4 Credits.

Advanced overview of neural physiology, neural control of human movement, and the biomechanical constraints underlying that control. Sequence with HPHY 622, HPHY 623.

HPHY 622. Systems Physiology II. 4 Credits.

Advanced overview of cardiovascular physiology and skeletal muscle cell physiology and metabolism.

HPHY 623. Systems Physiology III. 4 Credits.

Advanced overview of renal and respiratory physiology.

HPHY 631. Human Performance and Sports Products. 3 Credits.

Exploration of sciences of human performance: physiology and kinesiology, which inform the Sports Product Industry at the level of product development, product design and marketing. Available to non-majors only.

HPHY 631M. Human Performance and Sports Products. 3 Credits.

Exploration of sciences of human performance: physiology and kinesiology, which inform the Sports Product Industry at the level of product development, product design and marketing. Multilisted with SPM 631M.

HPHY 632. Human Biomechanics and Sports Product Design. 2 Credits.

Exploration of sciences of human biomechanics, which inform the Sports Product Industry at the level of product development, product design and marketing. Sequence with HPHY 631.

Prereq: HPHY 631.

HPHY 660. Basic Science in Clinical Decisions. 4 Credits.

Literature-based investigation into the basic science and clinical research underlying clinical decisions in athletic medicine.

HPHY 661. Manual Therapy: Movement Patterns, Core Stability. 2 Credits.

Advanced skills in proprioceptive neuromuscular facilitation (PNF) movement patterns, and both pilates principles and manual therapy to improve core stability. For certified athletic trainers. Offered alternate years.

HPHY 662. Manual Therapy: Spine, Lower Quadrant. 2 Credits.

Advanced skills in muscle energy, mobilization, and trigger-point release techniques for the spine and lower quadrant. For certified athletic trainers. Offered alternate years.

HPHY 669. The Female Athlete. 4 Credits.

Literature-based investigation of the unique anatomy and physiology, as well as social-cultural issues, of the female athlete related to sports medicine.

HPHY 670. Advanced Respiratory Physiology. 4 Credits.

Explores advanced concepts in respiratory physiology; includes exercise adaptations and examples of pathophysiology. Offered alternate years. Prereq: HPHY 623.

HPHY 671. Therapeutic Restoration of Biomotor Abilities. 3 Credits.

Exploration of advanced rehabilitation techniques for athletic trainers, including advanced program design, evaluation, and movement-sport analysis.

Pre- or coreq: certification as an athletic trainer or physical therapist.

HPHY 676. Human Cardiovascular Control. 4 Credits.

Cardiovascular physiology, including central control of blood pressure and flow regulation. An integrative approach toward how the cardiovascular system is coordinated with overall body function. Offered alternate years.

Prereq: HPHY 623.

HPHY 684. Kinematics of Human Movement. 4 Credits.

Theory and application of kinematic analysis of human motion. Emphasis on 2D and 3D kinematics, including data collection, analysis and modeling. Offered alternate years.

Prereq: HPHY 621.

HPHY 685. Kinetics of Human Movement. 4 Credits.

Experimental methods and mechanical theories associated with the analysis of joint forces and movements during human motion. Offered alternate years.

Prereq: HPHY 621.

Indigenous, Race, and Ethnic Studies

Brian Klopotek, Department Head

541-346-0900

541-346-0904 fax

104 Alder Building

5268 University of Oregon

Eugene, Oregon 97403-5268

IRES classes examine the construction and context of indigeneity, race, and ethnicity in the United States, highlighting the histories, experiences, and movements of people of color and Indigenous peoples in the Americas. As elements of identity that cut across disciplinary categories, indigeneity, race, and ethnicity require a mode of study that draws on the humanities and the social sciences as well as interdisciplinary sources such as cultural studies.

IRES scholars investigate race and racism alongside settler colonialism and other historical and contemporary manifestations of white supremacy and domination, analyzing how such systems of domination have created, and continue to create, social injustice. While the social construction of race in the United States is at the center of traditional ethnic studies, it is impossible to discuss racial dynamics without also paying significant attention to issues of gender, class, sexuality, indigeneity, immigration, transnational migration, and the diasporic formations resulting from the slave trade, indentured labor, colonialism, postcolonialism, imperialism, and globalization.

IRES courses that satisfy university core-education requirements are listed under Area Requirements and Cultural Literacy Requirement in the Bachelor's Degree Requirements section of this catalog.

Faculty

Charise L. Cheney, associate professor (African American popular and political cultures; Black nationalist ideologies and practices; gender and sexuality). BSJ, 1993, Northwestern; PhD, 1999, Illinois, Urbana-Champaign. (2009)

Courtney M. Cox, assistant professor (Race and Sport, cultural, political and economic effects of global sport, advanced analytics in sport). BJ, 2008, University of Texas at Austin; MA, 2013, University of Texas at Austin; MA, 2017, University of Southern California; PhD, 2019, University of Southern California. (2019) - On leave, AY 23

Lynn H. Fujiwara, associate professor (women of color, Asian American studies, labor). BA, 1990, California, San Diego; MA, 1993, PhD, 1999, California, Santa Cruz. (2000)

Brian Klopotek, associate professor (federal recognition of Indian tribes, Native American education, environmentalism). BA, 1994, Yale; PhD, 2004, Minnesota, Twin Cities. (2003)

Sharon Luk, associate professor (racism and racial capitalism, ethnic ontologies, epistemology). BA, 2001, Brown; MA, 2008, PhD, 2012, Southern California. (2014) - On leave, AY 23

Ernesto J. Martínez, associate professor (comparative ethnic studies, queer studies, feminist theory). BA, 1998, Stanford; MA, 2003, PhD, 2005, Cornell. (2006)

Jennifer R. O'Neal, acting assistant professor (Native American and Indigenous history, American West history, decolonizing methodologies, cultural heritage archives, traditional knowledge systems, digital humanities). BS, 1999, Utah State University; MA, 2002, Utah State University; MA, 2003, University of Arizona; (ABD) PhD, 2019, Georgetown University. (2019)

Laura Pulido, professor (critical human geography, environmental justice, Chicano studies). BA, 1984, California State, Fresno; MA, 1987, Wisconsin, Madison; PhD, 1991, California, Los Angeles. (2016)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

- Bachelor of Arts
- Bachelor of Science
- Minor in Ethnic Studies
- Minor in Latinx Studies

Undergraduate Studies

Students may earn a major or minor in ethnic studies. Through broadly interdisciplinary analysis (literature, history, film, education, environmental studies, and many more), the program is designed to help students understand the ways race, ethnicity, and indigeneity shape our lives in concert with a range of other vectors of power. Upper-division courses with related subject matter offered in other departments may be included in an ethnic studies major or minor program; check the UO Class Schedule or Duckweb or contact the IRES Director of Undergraduate Studies for details.

Bachelor of Arts Degree Requirements

Code	Title	Credits
Lower Division		
ES 101	Introduction to Ethnic Studies	4
Select one of the following:		4
ES 250	Introduction to African American Studies	
ES 252	Introduction to Asian American Studies	
ES 254	Introduction to Chicano and Latino Studies	
ES 256	Introduction to Native American Studies	
ES 258	Introduction to Pacific Islander Studies	
Additional 100- or 200-level course		4
Upper Division		
ES 301	Theoretical Perspectives in Ethnic Studies	4
Two 400-level courses		8
Six additional 300- or 400-level courses		24
Total Credits		48

Bachelor of Science Degree Requirements

Code	Title	Credits
Lower Division		
ES 101	Introduction to Ethnic Studies	4
Select one of the following:		4
ES 250	Introduction to African American Studies	
ES 252	Introduction to Asian American Studies	
ES 254	Introduction to Chicanx and Latinx Studies	
ES 256	Introduction to Native American Studies	
ES 258	Introduction to Pacific Islander Studies	
Additional 100- or 200-level course		4
Upper Division		
ES 301	Theoretical Perspectives in Ethnic Studies	4
Two 400-level courses		8
Six additional 300- or 400-level courses		24
Total Credits		48

Majors must construct their programs in consultation with an ethnic studies advisor. At least 24 of the required upper-division credits must be taken in residence at the University of Oregon. Courses applied to the major must be taken for letter grades and passed with grades of mid-C or better. Majors must maintain a grade point average of at least 2.00 in courses applied to the major. Students majoring in ethnic studies may apply credits in Research: [Topic] (ES 401) and Reading and Conference: [Topic] (ES 405) toward their degree only if completed with letter grades of mid-C or better. Practicum: [Topic] (ES 406) may be applied toward the major on a graded or pass/no pass basis.

Minor in Ethnic Studies

Code	Title	Credits
Lower Division		
ES 101	Introduction to Ethnic Studies	4
Two 200-level courses with ES subject code		8
Upper Division		
Four approved courses, including two with ES subject code		16
Total Credits		28

Upper-division courses must be taken in residence at the University of Oregon. The minor program must be planned in consultation with an ethnic studies advisor at least two terms before graduation. Courses applied to the minor must be taken for letter grades and passed with grades of mid-C or better. Students minoring in ethnic studies may apply credits in Research: [Topic] (ES 401) and Reading and Conference: [Topic] (ES 405) only if completed with letter grades of mid-C or better. Credits in Practicum: [Topic] (ES 406) may be applied toward the minor on a graded or pass/no pass basis.

Minor in Latinx Studies

The Latinx Studies Minor will require a broad introduction to the study of race and ethnicity in the United States as well as a focused introduction to the study of Latinx peoples in the United States.

Code	Title	Credits
ES 101	Introduction to Ethnic Studies	4
At least one of the following courses:		
ENG 243	Introduction to Chicano and Latino Literature	
ES 254	Introduction to Chicanx and Latinx Studies	
HIST 248	Latinos in the Americas	
SPAN 218	Latino Heritage I	
SPAN 228	Latino Heritage II	
UGST 111	Academic Residential Community—Arts and Letters: [Topic]	

At least one qualifying course from any of the following humanities subjects:¹

ENG 243	Introduction to Chicano and Latino Literature	
ENG 363	Chicano and Latino Writers	
LING 297	Introduction to Bilingualism	
SPAN 218	Latino Heritage I	
SPAN 228	Latino Heritage II	
SPAN 448	National Identities and Border Cultures in the Americas	

SPAN 308	Cultura y lengua: comunidades bilingües
SPAN 312	Spanish in the Media
SPAN 348	United States Latino Literature and Culture
SPAN 428	Spanish in the United States
SPAN 448	National Identities and Border Cultures in the Americas
TA 472	Multicultural Theater: [Topic]
At least one qualifying course from any of the following professional subjects: ¹	
EDST 225	School and Representation in Media
EDST 457	Immigration, Diaspora and Education
J 427M	Latino Roots I
J 428M	Latino Roots II
J 467	Issues in International Communication: [Topic]
MUS 349	American Ethnic and Protest Music
MUS 359	Music of the Americas
MUS 365	Regional Ethnomusicology: [Topic]
At least one qualifying course from any of the following social science subjects:	
ANTH 329	Immigration and Farmworkers Political Culture
ANTH 427M	Latino Roots I
ANTH 428M	Latino Roots II
ES 254	Introduction to Chicana and Latina Studies
ES 442	Caribbean Literature and Politics
ES 354	Environmental Racism
ES 370	Race, Ethnicity, and Cinema: [Topic]
ES 380	Race, Migration, and Rights
ES 440	Race, Literature, and Culture: [Topic]
ES 452	Race and Ethnicity and the Law: [Topic]
ES 460	Race, Culture, Empire: [Topic]
HIST 248	Latinos in the Americas
SOC 445	Sociology of Race and Ethnicity: [Topic]
WGS 250	Gender, Literature, and Culture
WGS 261	Gender and Popular Culture
WGS 321	Feminist Perspectives: Identity, Race, Culture
WGS 350	Literature as Feminist Theory
Total Credits: ²	24

¹ Some topics courses might also apply. See <https://ethnicstudies.uoregon.edu/> for details.

² The final 4 credits may be selected from any of the above lists or from other qualifying courses approved each year based on approval by the Latinx Studies Coordinating Committee. Qualifying courses will have at least two-thirds content covering Latinx peoples in the United States.

At least 16 credits must be completed for a letter grade and passed with a mid-C or better to count toward the minor. Coursework must include 12 upper-division credits and must represent a range of disciplinary and professional approaches to the subject of Latinx Studies. All 12 upper-division credits must be taken in residence.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Graduate Certificate in Indigenous, Race, and Ethnic Studies

The graduate certificate in Indigenous, Race, and Ethnic Studies provides graduate students across campus the opportunity to enroll in a concentrated program of study centered on race, indigeneity, and intersectionality. The certificate provides a foundational curriculum as well as a specialized focus in areas aligned with students' interests.

Code	Title	Credits

Graduate students will develop their curriculum plans with the IRES Director of Graduate Studies to best complement individual needs and goals for their graduate studies. Courses not taught by our graduate faculty may be approved by the Director of Graduate Studies.

To Apply:

Students should email the Director of Graduate Studies at iresgradstudies@uoregon.edu to apply for the graduate certificate, more information and forms can be found on our graduate certificate website (<https://ethnicstudies.uoregon.edu/graduate-certificate/>).

Courses

ES 101. Introduction to Ethnic Studies. 4 Credits.

This course is an introduction to the academic field of Ethnic Studies, the interdisciplinary, comparative and relational study of race, ethnicity and indigeneity in the United States. Special attention paid to how systems of domination and acts of resistance (re)create racial subjects.

ES 196. Field Studies: [Topic]. 1-5 Credits.

Repeatable.

Prereq: approval of program administrators.

ES 198. Workshop: [Topic]. 1-12 Credits.

Repeatable.

ES 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable up to five times.

ES 200M. Temporary Multilisted Course. 4 Credits.

ES 224M. Introduction to Anthropology of the African Diaspora. 4 Credits.

Introduction to theoretical questions and methodological concerns framing an anthropology of the African Diaspora. Multilisted with ANTH 224M.

ES 250. Introduction to African American Studies. 4 Credits.

This course introduces students to the theoretical models used in the interdisciplinary study of African-America. Using a thematic approach, students will learn to critically engage the development of and dynamics between race, racism and blackness in the United States.

ES 252. Introduction to Asian American Studies. 4 Credits.

Focuses on historical, cultural, and social issues in Asian America and surveys scholarship in Asian American studies.

ES 254. Introduction to Chicanx and Latinx Studies. 4 Credits.

Focuses on historical, social, and cultural issues in Chicanx and Latinx communities and surveys scholarship in Chicanx and Latinx studies.

ES 256. Introduction to Native American Studies. 4 Credits.

Interdisciplinary approaches to understanding Native American lives, examining Native American identities, practices, histories, creative works, cultures, and political status in context.

ES 258. Introduction to Pacific Islander Studies. 4 Credits.

Focuses on historical, social, and cultural issues in Pacific Islander communities and surveys scholarship in Pacific Island Studies.

ES 301. Theoretical Perspectives in Ethnic Studies. 4 Credits.

Introduction to contemporary theoretical frameworks in the discipline of ethnic studies. Offered fall term only.

Prereq: ES 101; one from ES 250, ES 252, ES 254, ES 256.

ES 310. Race and Popular Culture: [Topic]. 4 Credits.

Examines the interface between race and popular culture, surveying the historical development, political significance, and social influence of popular culture in the United States. Repeatable four times for a maximum of 20 credits when topic changes. Offered alternate years.

ES 321. Indigenous Peoples of Oregon. 4 Credits.

This course examines the history, culture, social and political issues of the Indigenous peoples of Oregon through oral traditions, primary sources, and secondary sources, focused on the major themes of sovereignty, traditional knowledge, and decolonization.

ES 330. Women of Color: Issues and Concerns. 4 Credits.

Contemporary social issues and feminism among women of color in the United States.

Prereq: ES 101 recommended.

ES 350. Native Americans and the Environment. 4 Credits.

Critical issues in Native American environmentalism.

ES 352. Social Equity and Criminal Justice. 4 Credits.

Critical issues related to police, prisons, criminal justice, and racial and gender inequalities.

ES 354. Environmental Racism. 4 Credits.

Explores environmental justice as both a field of scholarship and organizing framework that links power, justice, and inequality to environmental issues. Special attention is given to the specific forms of racism which produce environmental injustice.

ES 360. Black Sexual Politics. 4 Credits.

Explores the gender and sexuality politics that influence the social, political, economic and cultural development of black communities in the diaspora, including the United States.

ES 370. Race, Ethnicity, and Cinema: [Topic]. 4 Credits.

Examines the history and politics of race, ethnicity, and indigenesness in relation to film, including questions of production, distribution, and reception in the United States. Repeatable four times for a maximum of 20 credits when topic changes. Offered alternate years.

ES 380. Race, Migration, and Rights. 4 Credits.

Examines historical and contemporary politics in race, immigration, and migration.

ES 385. Critical Whiteness Studies: [Topic]. 4 Credits.

This course explores the social construction of race by investigating and historicizing "whiteness" as a racial category in the U.S. Repeatable once for a maximum of 8 credits.

Prereq: ES 101 or one 200 level ES course.

ES 399. Special Studies: [Topic]. 1-5 Credits.

Recent topics include Caribbean Migrations; Asian American Women; Critical Whiteness Studies; Native Americans and Film; Asian Diasporas; Race and Resistance in United States History. Repeatable up to 5 times.

ES 401. Research: [Topic]. 1-21 Credits.

Repeatable.

Prereq: majors or minors only.

ES 404. Internship: [Topic]. 1-12 Credits.

Repeatable.

ES 405. Reading and Conference: [Topic]. 1-21 Credits.

Repeatable.

Prereq: majors or minors only.

ES 406. Practicum: [Topic]. 1-12 Credits.

Repeatable.

Prereq: majors or minors only.

ES 407. Seminar: [Topic]. 1-5 Credits.

Repeatable.

ES 409. Terminal Project. 1-12 Credits.

Repeatable.

Prereq: majors or minors only.

ES 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

ES 440. Race, Literature, and Culture: [Topic]. 4 Credits.

Examines race, literature, and culture from an interdisciplinary perspective. Repeatable four times for a maximum of 20 credits when topic changes. Offered alternate years.

ES 442. Caribbean Literature and Politics. 4 Credits.

Discusses how Caribbean diaspora literature employs themes of colonialism, sexuality, racism, migration, state violence, nationalism, and identity.

ES 450. Race and Incarceration. 4 Credits.

Introduces several key questions necessary for understanding the crisis of prisons and incarceration in the United States, with an emphasis on race, gender, and class.

ES 452. Race and Ethnicity and the Law: [Topic]. 4 Credits.

Addresses issues of social justice and the participation of Asian Americans, African Americans, Chicanos and Latinos, and Native Americans in the legal system. Repeatable when topic changes.

ES 456. History of Native American Education. 4 Credits.

Examines the historical conflict between traditional culture and knowledge transmission among Native Americans and the assimilationist educational system and practices of Euro-American culture. Offered alternative years.

ES 460. Race, Culture, Empire: [Topic]. 4 Credits.

Examines how racial discourses have informed United States domestic and foreign policy, with special attention on cultural representations of U.S. colonialism and imperialism. Repeatable four times for a maximum of 20 credits when topic changes. Offered alternate years.

ES 464. Relational Studies of Indigeneity, Race and Culture: [Topic]. 4 Credits.

Seminar centers relation between Indigenous peoples and peoples of color instead of focusing on white/non-white line. Called comparative or relational studies, the approach yields unique insights into how race and settler-colonialism work in the United States and beyond.

ES 465. Feminist Theories of Race: [Topic]. 4 Credits.

This course focuses on the political and theoretical trajectory of feminist and race theories associated with particular groups, such as Asian American feminisms, or comparatively in relation to Women of Color and queer politics. Repeatable three times for a maximum of 16 credits when topic changes.

ES 466. Native American Ethnohistory. 4 Credits.

In this seminar, we read, evaluate, analyze, and critique major texts in Native American ethnohistory (a combination of anthropological and historical methods) with a focus on perspectives and concerns of contemporary Indigenous peoples.

ES 468. Indigenous Research Methods and Ethics. 4 Credits.

This course addresses methodological and ethical issues related to conducting research about and with Indigenous peoples. The course introduces students to the principles of Indigenous research, including practices, collaboration, ethics, and Indigenous approaches to the construction of knowledge.

ES 470. Native American and Indigenous Feminisms. 4 Credits.

This class will acquaint students with critical issues in Native American and Indigenous feminisms. We will review past and present struggles, including gendered violence, cultural systems of gender and sexuality, successes and failures in efforts towards alliance, life stories, film, and literature, in comparative perspective.

ES 507. Seminar: [Topic]. 1-5 Credits.

Repeatable.

ES 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

ES 540. Race, Literature, and Culture: [Topic]. 4 Credits.

Examines race, literature, and culture from an interdisciplinary perspective. Repeatable four times for a maximum of 20 credits when topic changes. Offered alternate years.

ES 542. Caribbean Literature and Politics. 4 Credits.

Discusses how Caribbean diaspora literature employs themes of colonialism, sexuality, racism, migration, state violence, nationalism, and identity.

ES 550. Race and Incarceration. 4 Credits.

Introduces several key questions necessary for understanding the crisis of prisons and incarceration in the United States, with an emphasis on race, gender, and class.

ES 552. Race and Ethnicity and the Law: [Topic]. 4 Credits.

Addresses issues of social justice and the participation of Asian Americans, African Americans, Chicanos and Latinos, and Native Americans in the legal system. Repeatable when topic changes.

ES 556. History of Native American Education. 4 Credits.

Examines the historical conflict between traditional culture and knowledge transmission among Native Americans and the assimilationist educational system and practices of Euro-American culture. Offered alternative years.

ES 560. Race, Culture, Empire: [Topic]. 4 Credits.

Examines how racial discourses have informed United States domestic and foreign policy, with special attention on cultural representations of U.S. colonialism and imperialism. Repeatable four times for a maximum of 20 credits when topic changes. Offered alternate years.

ES 564. Relational Studies of Indigeneity, Race and Culture: [Topic]. 4 Credits.

Seminar centers relation between Indigenous peoples and peoples of color instead of focusing on white/non-white line. Called comparative or relational studies, the approach yields unique insights into how race and settler-colonialism work in the United States and beyond.

ES 565. Feminist Theories of Race: [Topic]. 4 Credits.

This course focuses on the political and theoretical trajectory of feminist and race theories associated with particular groups, such as Asian American feminisms, or comparatively in relation to Women of Color and queer politics. Repeatable three times for a maximum of 16 credits when topic changes.

ES 566. Native American Ethnohistory. 4 Credits.

In this seminar, we read, evaluate, analyze, and critique major texts in Native American ethnohistory (a combination of anthropological and historical methods) with a focus on perspectives and concerns of contemporary Indigenous peoples.

ES 568. Indigenous Research Methods and Ethics. 4 Credits.

This course addresses methodological and ethical issues related to conducting research about and with Indigenous peoples. The course introduces students to the principles of Indigenous research, including practices, collaboration, ethics, and Indigenous approaches to the construction of knowledge.

ES 570. Native American and Indigenous Feminisms. 4 Credits.

This class will acquaint students with critical issues in Native American and Indigenous feminisms. We will review past and present struggles, including gendered violence, cultural systems of gender and sexuality, successes and failures in efforts towards alliance, life stories, film, and literature, in comparative perspective.

ES 601. Research: [Topic]. 1-16 Credits.

Repeatable.

ES 603. Dissertation. 1-16 Credits.

Repeatable.

ES 604. Internship: [Topic]. 1-5 Credits.

Repeatable for a maximum of 10 credits.

ES 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

ES 607. Seminar: [Topic]. 1-5 Credits.

Repeatable.

ES 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

ES 614. Colloquium: Professional Development. 1 Credit.

Professional development, teaching skills, and mentorship for first year Ethnic Studies PhD students. Repeatable twice for a total of three credits.

ES 615. Theoretical Foundations in Ethnic Studies. 5 Credits.

Introduction to the theoretical foundations and debates in Ethnic Studies scholarship.

ES 616. Interdisciplinary Research Methods in Ethnic Studies. 5 Credits.

Introduction to interdisciplinary methodologies in the various fields of ethnic studies, with an eye towards developing interdisciplinary competence and students applying it to their own work.

ES 617. Genealogies of Ethnic Studies. 5 Credits.

Examines the emergence and evolution of the discipline of Ethnic Studies, including major intellectual shifts in the field, particularly as they relate to changes in the social science and humanities; and the state of the discipline today.

ES 620. Race, Space, and Power: [Topic]. 5 Credits.

This course questions the variety of ways that social constructions of race and space are inextricable from one another and constitute, as much as they are constituted by, modern power relations. Repeatable once for a maximum of 10 credits.

ES 621. Cultural Production: [Topic]. 5 Credits.

Graduate introduction to the theories and methods utilized within Cultural Studies scholarship with attention to race, gender, nation, sexuality and indigeneity. Repeatable twice for a maximum of 15 credits.

ES 622. Resistance and Dissent: [Topic]. 5 Credits.

Surveys historical and contemporary methods people of color have used to subvert and challenge white power and privilege in the United States. Repeatable twice for a maximum of 15 credits.

ES 623. Race, Gender and Sexuality Studies: [Topic]. 5 Credits.

This course closely examines the ways in which race is deeply intertwined with gender and sexuality in the production of racial, gender, and sexual violence since the inception of European settler colonialism in the Americas. Repeatable twice for a maximum of 15 credits.

Judaic Studies

D. Gantt Gurley, Program Director

541-346-5288

311 Susan Campbell Hall

5273 University of Oregon

Eugene, Oregon 97403-5273

The interdisciplinary Harold Schnitzer Family Program in Judaic Studies provides a comprehensive undergraduate curriculum in the history, religion, and cultural traditions of the Jewish people and offers instruction in biblical Hebrew language and literature. The program offers a major leading to a bachelor of arts (BA) degree and a minor. It sponsors courses, lectures, and other events of interest to the general student population and the wider community.

Faculty

D. Gantt Gurley, associate professor. See **German and Scandinavian**.

Emerita

Judith R. Baskin, professor emerita. See **Religious Studies**.

- **Minor**

Undergraduate Studies

The Judaic studies program consists of core courses taught under the HBRW, JDST, and REL subject codes and related courses taught in the disciplines of participating faculty members—anthropology, art history, comparative literature, conflict and dispute resolution, English, geography, folklore and public culture, German and Scandinavian, history, landscape architecture, music, philosophy, political science, religious studies, Romance languages, and women's and gender studies.

The focus on Jewish cultures and experience as a lens to study the world provides a liberal arts background suitable to careers in a range of professional fields (law, education, rabbinate, social service, public policy) and prepares students for graduate work in Judaic studies, religious studies, and related fields.

Bachelor of Arts Degree Requirements

Code	Title	Credits
Lower-Division Requirements		
HBRW 111 & HBRW 112 & HBRW 113	Biblical Hebrew I and Biblical Hebrew II and Biblical Hebrew III	12
REL 211	Early Judaism	4
JDST 212	Medieval and Early Modern Judaism	4
JDST 213	The Jewish Encounter with Modernity	4
REL 222	Introduction to the Bible I	4
Upper-Division Requirements		
Select three of the following:		12
HBRW 311	Biblical Narrative	
JDST 330	American Jewish Cultures	4
HBRW 399	Special Studies: [Topic]	1-12

Six approved elective courses ¹	24
Total Credits	69-80

¹ Courses must focus on significant issues in Judaic studies from the perspective of the instructor's academic discipline. See Electives table for a list of recently offered courses.

Electives

Code	Title	Credits
ANTH 429	Jewish Folklore and Ethnology	4
ENG 340	Jewish Writers	4
FLR 411	Folklore and Religion	4
GER 368	Themes in German Literature	4
HIST 415	Advanced World History: [Topic]	4
HIST 428	Europe in the 20th Century: [Topic]	4
JDST 330	American Jewish Cultures	4
PHIL 320	Philosophy of Religion	4
REL 414	Biblical Book: [Topic]	4

A list of approved courses is available from the program director preceding each term; it also appears in the online class schedule and the program website.

Honors in Judaic Studies

A degree with honors in Judaic studies requires the following:

1. Satisfaction of the requirements of the major
2. A cumulative grade point average of 3.50 in courses taken to satisfy the major requirements
3. Satisfactory completion of an honors thesis

The candidate for honors must register for 4 credits in Research: [Topic] (JDST 401) winter term of the senior year in order to prepare for writing the thesis, and for 4 credits in Thesis (JDST 403) spring term for its completion. A faculty committee of two supervises the project. A first draft of the thesis must be submitted six weeks before the end of the term in which the student expects to graduate and the final draft two weeks before the end of the term.

Minor in Judaic Studies

Code	Title	Credits
Lower-Division Requirements		
REL 211	Early Judaism	4
JDST 212	Medieval and Early Modern Judaism	4
JDST 213	The Jewish Encounter with Modernity	4
Upper-Division Requirements		
Four courses including one about the American Jewish experience ¹		16
Total Credits		28

¹ As many as 4 credits in Internship: [Topic] (JDST 404) or Practicum: [Topic] (JDST 409) or Practicum: [Topic] (HBRW 409) may be used to satisfy minor requirements.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Hebrew Courses

HBRW 111. Biblical Hebrew I. 4 Credits.

Prepares students to read biblical and postbiblical Hebrew texts. Emphasis on classical Hebrew grammar, vocabulary, and syntax.

HBRW 112. Biblical Hebrew II. 4 Credits.

Prepares students to read biblical and postbiblical Hebrew texts. Emphasis on classical Hebrew grammar, vocabulary, and syntax. Prereq: HBRW 111.

HBRW 113. Biblical Hebrew III. 4 Credits.

Prepares students to read biblical and postbiblical Hebrew texts. Emphasis on classical Hebrew grammar, vocabulary, and syntax. Prereq: HBRW 112.

HBRW 199. Special Studies: [Topic]. 1-12 Credits.

Repeatable.

HBRW 311. Biblical Narrative. 4 Credits.

Readings in extended narrative prose passages from the Hebrew Bible; emphasis on reading, translation, vocabulary formation, and Hebrew syntax. Taught in Hebrew. Repeatable twice. Prereq: HBRW 113 or equivalent.

HBRW 399. Special Studies: [Topic]. 1-12 Credits.

Repeatable.

HBRW 401. Research: [Topic]. 1-12 Credits.

Repeatable.

HBRW 402. Supervised College Teaching. 1-12 Credits.

Repeatable.

HBRW 403. Thesis. 1-12 Credits.

Repeatable.

HBRW 404. Internship: [Topic]. 1-12 Credits.

Repeatable.

HBRW 405. Reading and Conference: [Topic]. 1-12 Credits.

Repeatable.

HBRW 406. Practicum: [Topic]. 1-12 Credits.

Repeatable.

HBRW 407. Seminar: [Topic]. 1-16 Credits.

Repeatable.

HBRW 408. Workshop: [Topic]. 1-12 Credits.

Repeatable.

HBRW 409. Terminal Project. 1-12 Credits.

Repeatable.

HBRW 410. Experimental Course: [Topic]. 1-16 Credits.

Repeatable.

HBRW 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

Judaic Studies Courses

JDST 199. Special Studies: [Topic]. 1-12 Credits.

Repeatable.

JDST 212. Medieval and Early Modern Judaism. 4 Credits.

Interdisciplinary introduction to Jewish life, literature, religion, culture, and thought in the Middle Ages and early modern times in both Muslim and Christian environments.

JDST 213. The Jewish Encounter with Modernity. 4 Credits.

Survey of Jewish encounters with modernity outside the Americas from 1700 to 1948; concentrates on transformations in political status, national identity, Jewish culture, and religious self-definition.

JDST 330. American Jewish Cultures. 4 Credits.

American Jewish culture, ritual, identity, institutions from 1880s to the present. Examines pluralism within American Jewish community and relationships with other religious and ethnic groups.

JDST 352. Jewish Literature and Culture. 4 Credits.

Focuses on Jewish literature, the figure of the Jew in literature, and Jewish culture. Possible topics include but are not limited to the writings of Franz Kafka, the Shtetl, the Jewish memoir, etc.

JDST 353. Jewish Image and Media. 4 Credits.

Focuses on visual and intermedialities through a Jewish lens. Possible topics include but are not limited to Jewish Hollywood, Jewish Graphic Novels, Jewish Humor on TV, etc. Student discussion, oral presentations, and written papers. Readings and discussions in English.

JDST 354. Jewish Thought and History. 4 Credits.

Focuses on Jewish philosophy, critical theory, and history. Possible topics included but are not limited to: Contemporary Jewish Philosophy, the writings of Emanuel Levinas, Spinoza, Modern Jewish History, etc.

JDST 399. Special Studies: [Topic]. 1-12 Credits.

Repeatable.

JDST 401. Research: [Topic]. 1-12 Credits.

Repeatable.

JDST 402. Supervised College Teaching. 1-12 Credits.

Repeatable.

JDST 403. Thesis. 1-12 Credits.

Repeatable.

JDST 404. Internship: [Topic]. 1-12 Credits.

Repeatable.

JDST 405. Reading and Conference: [Topic]. 1-12 Credits.

Repeatable.

JDST 406. Practicum: [Topic]. 1-12 Credits.

Repeatable.

JDST 407. Seminar: [Topic]. 1-16 Credits.

Repeatable.

5206 University of Oregon
Eugene, Oregon 97403-5206

The University of Oregon offers a bachelor of arts degree in Latin American studies. A minor in Latin American studies is also available. An emphasis on Latin America is available for master of arts (MA) degrees with majors in anthropology, history, global studies, and Spanish. See the Anthropology (p. 66), History (p. 333), **Global Studies** (p. 305), and **Romance Languages** sections of this catalog.

Study Abroad

Students in University of Oregon overseas study programs enroll in courses with subject codes that are unique to individual programs. Special course numbers are reserved for overseas study. See the Study Abroad (p. 911) section in the **Supplementary Academic Programming** section of this catalog.

Participating Faculty

Michael B. Aguilera, sociology

Carlos Aguirre, history

Monique Balbuena, honors college

Erin Beck, political science

Mark Carey, honors college

Christopher Chavez, journalism and communication

Alexandre Dossin, music

Michael Dreiling, sociology

Stephen Dueppen, anthropology

Cecilia Enjuto Rangel, Romance languages

Dennis Galvan, global studies

Pedro García-Caro, Romance languages

Spike Gildea, linguistics

Amalia Gladhart, Romance languages

Derrick Hindery, global studies

Undergraduate Studies

Preparation

High school students who have taken courses in economics, history, political science, or other approaches to international affairs, or who have participated in extracurricular activities (such as the Oregon High School International Relations League) may be interested in Latin American studies.

Community college students who have taken courses in international relations may be interested in specializing in Latin American studies.

Careers

Career opportunities for students completing Latin American studies are available through such avenues as the Peace Corps, the U.S. Foreign Service (including the Information Agency), the foreign-aid programs of the United States government, the United Nations and other international organizations, private foundations, international businesses, and international nongovernmental organizations (including church, human-rights, and environmental organizations).

Total Credits **48**

¹ Students may confer with a program advisor to determine other applicable courses not listed here. Check for courses with Latin American Studies (LAS) themes listed in the Schedule of Classes each term; courses listed under LAS count toward the major or minor. In addition, students may petition the director of the major or minor for the inclusion of other applicable LAS-related courses that have at least 50 percent Latin American Studies-related content.

Additional Requirements

Of the total 48 credits required for the Latin American studies major—

- 40 credits must be taken for a letter grade and passed with a grade of C- or better (8 credits may be taken pass/no pass)
- 36 credits must be upper-division (200 or 400-level)
- 28 credits must be taken at the University of Oregon's campus in Eugene, OR
- **Limit on Multiple Department Credits:** No more than 16 credits (or four courses) from any single department can count toward the major
- **Limit on LAS Credits Focused on United States Topics:** No more than 16 credits in courses related to United States Latino studies or US Hispanic culture or society can count toward the major.
- **Social Science Credits Required:** 8 of the 48 credits must be from the following Social Science units: ANTH, EC, ENVS, ES, EURO, GEOG, GBL, PS, SOC, WGS.
- **Limit on Individualized Study Credits:** 8 credits maximum may be independent study or internship credit.
- **Allowances for Study Abroad and Study Away (i.e., Escuela Helvetia) Credits:** 8 credits may be earned through successful completion of pre-approved courses in a study abroad program at an accredited Latin American college or university, a faculty-led field school; transfer credits from universities outside Latin America are considered individually, following existing procedures in appropriate departments for determining their equivalence to UO courses.

Language Requirements

In addition to the minimum of 48 credits in required and elective courses, all majors are required to demonstrate a third-year level of proficiency in Spanish, Portuguese, or an Indigenous language from our area of study. This will entail completing (with a grade of C- or better or P) the basic two years of college-level language courses and taking at least four 300-level courses taught in the respective foreign language—such as Cultura y Lengua: Identidades Hispanas (SPAN 301), Cultura y lengua: expresiones artisticas (SPAN 303), Cultura y lengua: cambios sociales (SPAN 305), Hispanic Cultures through Literature III (SPAN 343), or Hispanic Cultures through Literature IV (SPAN 344).

Total Credits 28

¹ Students may confer with a program advisor to determine other applicable courses not listed here. Check for courses with Latin American Studies (LAS) themes listed in the Schedule of Classes each term; courses listed under LAS count toward the major or minor. In addition, students may petition the director of the major or minor for the inclusion of other applicable LAS-related courses that have at least 50 percent Latin American Studies-related content.

Language Requirements

Students must satisfactorily complete, with grades of C– or better or P, two years of college-level Spanish- or Portuguese-language courses. Language credits may be earned at the University of Oregon through an approved study abroad or study away program or transferred from another accredited college or university. As an alternative, students may satisfy the language requirement by examination, demonstrating a level of competence equivalent to two years of college-level Spanish or Portuguese. Students whose native language is either Spanish or Portuguese may substitute equivalent competence in English in lieu of this requirement.

Additional Requirements

Of the total 28 credits for the Latin American studies minor—

- 20 credits must be taken for a letter grade and a passed with a grade of C- or better (8 credits may be taken pass/no pass)
- 20 credits must be in upper-division (300- or 400-level)
- 20 credits must be taken on campus at the University of Oregon or in a UO faculty-led study abroad or study away program
- **Limit on Multiple Department Credits:** No more than four departments, disciplines, or programs can count toward the minor.
- **Limit on Single Department Credits:** No more than 12 credits (or three courses) from any single department can count toward the minor.
- **Allowances for Study Abroad and Study Away Credits:** 8 credits may be earned through successful completion of pre-approved courses in a study abroad program at an accredited Latin American college or university or a study away program such as Escuela Helvetia; transfer credits from universities outside Latin America are considered individually, following existing procedures in appropriate departments for determining their equivalence to UO courses.
- **Allowances for Upper-Division Language Courses as Electives for the LAS Minor:** Spanish, Portuguese, or Indigenous language courses must be upper-division literature and culture courses to count toward completion of the 28-credit minor requirement.

Advising

Students who want a major or a minor in Latin American studies should complete the add major/minor request form on the program website. The first point of contact for advising for Latin American Studies students is the Global Connections advising flight path in Tykeson Hall. Referrals are made by Tykeson advisors to the Latin American Studies program director when needed. Program staff work with the program director to determine which courses offered during any given academic year may be applied to requirements for the degree or minor.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Its purpose is to provide an example of one possible route through the Latin American studies major.

This degree plan is for general planning purposes only and, due to the interdisciplinary nature of the major, it is imperative that students speak with advisors to determine which courses would best match their personal, professional, and academic goals.

Graduate Studies

Specialization in Latin American studies at the graduate level is possible in a number of departments in the College of Arts and Sciences. Anthropology, economics, history, global studies, political science, sociology, and Spanish (in the Romance languages department) have

faculty members who are competent and interested in the area. It is possible to arrange graduate degree programs in these departments with a concentration in Latin American studies.

Courses

LAS 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable twice when topic changes for a maximum of 15 credits.

LAS 200. Introduction to Latin American Studies. 4 Credits.

Introduction to the history, peoples, and cultures of Latin America and of the Latino population in the United States.

LAS 211. Latin American Humanities: [Topic]. 4 Credits.

Focuses on the comparative study of Latin American cultural and intellectual traditions. Introduces scholarship in the humanities about Latin American and U.S. Latinos. Repeatable once for a maximum of 8 credits when topic changes.

LAS 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable twice when topic changes for a maximum of 15 credits.

LAS 400M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

LAS 401. Research: [Topic]. 1-4 Credits.

Repeatable.

LAS 403. Thesis. 1-4 Credits.

Melissa Redford, Department Head

541-346-3906
161 Straub Hall
1290 University of Oregon
Eugene, Oregon 97403-1290

The Department of Linguistics offers instruction leading to a bachelor of arts (BA), a master of arts (MA), and a doctor of philosophy (PhD) degree in linguistics. A master of arts in language teaching studies is also offered. The interests of its faculty are in the documentation, preservation, and revitalization of endangered languages; historical linguistics; laboratory phonology; language acquisition and learning; language variation and change; morphosyntax; phonetics; psycholinguistics; semantics; Slavic linguistics; sociolinguistics; and typology.

Faculty

Melissa Michaud Baese-Berk, associate professor (second-language acquisition, phonetics, laboratory phonology, psycholinguistics). BA, 2004, Boston; PhD, 2010, Northwestern. (2013)

B. Mokaya Bosire, senior instructor (Swahili). BA, 1991, MA, 1993, Nairobi; PhD, 2008, State University of New York, Albany. (2012)

Don Daniels, assistant professor (languages of Papua New Guinea, language change and reconstruction, linguistic fieldwork, morphosyntax). BA, 2006, Dartmouth College; PhD, 2015, California, Santa Barbara. (2018)

Spike Gildea, professor (language description, diachronic syntax, typology, phonology, comparative linguistics, field methods and ethics, Cariban and other South American languages). BA, 1983, MA, 1989, PhD, 1992, Oregon. (2000)

Vsevolod M. Kapatsinski, professor (psycholinguistics, corpus linguistics, experimental morphology and phonology, language learning in the lab). BA, 2003, MA, 2005, New Mexico; PhD, 2009, Indiana. (2009)

Tyler S. Kendall, professor (sociolinguistics, corpus linguistics, phonetics, language and law). BA, 1998, Cornell; PhD, 2009, Duke. (2010)

Kristopher Kyle, assistant professor (second language acquisition, language assessment, natural language processing, second language writing). BA, 2005, Harding; MA, 2011, Colorado State; PhD, 2016, Georgia State. (2019)

Doris L. Payne, professor (morphology, syntax, semantics, discourse; Amerindian and African languages). BS, 1974, Wheaton; MA, 1976, Texas, Arlington; PhD, 1985, California, Los Angeles. (1987)

Eric W. Pederson, associate professor (cognitive and psycholinguistics, language and culture; South Indian languages). BA, 1982, MA, 1985, PhD, 1991, California, Berkeley. (1997)

Gabriela Pérez Báez, assistant professor (language documentation and description, language revitalization, semantic typology, language and cognition, Zapotec languages). BFA, 1997, MA, 2005, PhD 2009, State University of New York, Buffalo. (2018)

Melissa Redford, professor (phonetics, laboratory phonology, psycholinguistics, cognitive science). BA, 1992, California, Berkeley; MA, 1995, PhD, 1999, Texas, Austin. (2002)

Julie M. Sykes, associate professor (second language acquisition, interlanguage pragmatics, transformative pedagogy). BA, 2001, MA, 2005, Arizona State; PhD, 2008, Minnesota. (2016)

Charlotte R. Vaughn, instructor (speech perception, psycholinguistics, talker variability, sociophonetics). BA, 2005, Duke; MA, 2011, PhD, 2014, Northwestern. (2014)

Keli D. Yerian, senior lecturer (language teacher education, curriculum development, gesture in discourse); director, Language Teaching Specialization MA Program. BA, 1991, North Carolina, Chapel Hill; MS, 1994, PhD, 2000, Georgetown. (2007)

Emeriti

Scott DeLancey, professor emeritus. BA, 1972, Cornell; PhD, 1980, Indiana. (1982)

T. Givón, professor emeritus. BSc, 1959, Jerusalem; MS, 1962, MA, 1966, PhD, 1969, California, Los Angeles. (1981)

Russell S. Tomlin, professor emeritus. BA, 1973, Knox; MA, 1975, PhD, 1979, Michigan. (1979)

Cynthia M. Vakareliyska, professor emerita. BA, 1973, Princeton; JD, 1976, Columbia; PhD, 1990, Harvard. (1994)

Participating

Gregory D. Anderson, linguistics

Dare A. Baldwin, psychology

Marjorie S. Barker, linguistics

Robert L. Davis, Romance languages

Tom Delaney, American English Institute

Robert Elliott, Northwest Indian Language Institute

Andrew Halvorsen, American English Institute

Laura G. Holland, American English Institute

Kaori Idemaru, East Asian languages and literatures

Zhuo Jing-Schmidt, East Asian languages and literatures

Mark Johnson, philosophy

Sarah Klinghammer, linguistics

Jeffrey Magoto, Yamada Language Center

Thomas E. Payne, linguistics

Trish Pashby, American English Institute

Janne Underiner, Northwest Indian Language Institute

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

- **Bachelor of Arts and Bachelor of Science**
- Minor in Linguistics (p. 373)
- Minor in Interdisciplinary Cognitive Sciences (p. 373)

Undergraduate Studies

The program offers instruction in the nature of human language, the structural variety of individual languages, and the methodology of conducting a linguistic investigation. The primary aim of linguistics as a science is to study the use and organization of human language in coding and communicating knowledge. Although linguists may study specific facts of many languages, they do so to gain insight into the properties and processes common to all languages. Such common features may in turn reflect universals of human cognitive, cultural, and social organization.

Language occupies a central position in the human universe, so much so that it is often cited as a major criterion for defining humanity. Its use in the coding and processing of knowledge makes it relevant to psychology. As a tool of reasoning, it verges on logic and philosophy. As

a computational system, it relates to computer science and language-data processing. As a repository of one's cultural worldview, it is a part of anthropology. As an instrument of social intercourse and a mark of social identity, it interacts with sociology. As a biological subsystem lodged in the brain, it is highly relevant to neurology. As the primary vehicle of learning and maturation, it is important for education. As an expressive medium, it is the crux of literature and rhetoric.

Careers

To gain understanding into the complexities of human language is thus to gain entrance into numerous fields of academic investigation and practical use. Indeed, computer programmers, conflict mediators, cryptologists, elementary school teachers, language teachers, lawyers, psychiatrists, speech therapists, and translators all depend heavily on understanding the nature and use of language.

The BA degree in linguistics provides a solid foundation for graduate studies in anthropology, communication, communication disorders and sciences, computer-science education, journalism, law, linguistics, literature and languages, philosophy, psychology, or sociology. It offers a strong entry into the applied fields listed above.

Advising

Undergraduate majors should consult one of the departmental undergraduate advisors each term about their study program. The undergraduate major requirements changed in Fall of 2020. Students admitted to the major before Fall of 2020 can choose to follow the current degree requirements or the previous major requirements. The Linguistics Department website provides more information.

Bachelor of Arts Degree and Bachelor of Science Requirements

Code	Title	Credits
Core Courses		
LING 301	Introduction to Linguistics Analysis	4
LING 302	Introduction to Linguistic Behavior	4
LING 311	Phonetics and Phonology	4
LING 312	Morphosyntax	4
Specialization Courses		
Choose three of the following:		12
LING 411	Phonetics	
LING 415	Semantics	
LING 416	Language and Cognition	
LING 435	Morphology and Syntax	
LING 444	Second-Language Acquisition	
LING 450	Introduction to Phonology	
LING 451	Functional Syntax I	
LING 460	Historical and Comparative Linguistics	
LING 491	Sociolinguistics	
LING 493	Corpus Linguistics	
Electives		
LING 407	Seminar: [Topic] (Proseminar)	8
Any 200-level or greater LING course		
Total Credits		36

Core Courses

The six core courses are designed to expose you to the analysis of linguistic data and language acquisition, variation, and change: two introductory courses, Introduction to Linguistics Analysis (LING 301) and Introduction to Linguistic Behavior (LING 302); two courses focusing on sound, Phonetics (LING 411) and Introduction to Phonology (LING 450); and two courses focusing on grammar, Morphology and Syntax (LING 435) and Functional Syntax I (LING 451).

Specialization Courses

These three courses allow students to focus either on language behavior or linguistic analysis, on cognitive aspects or grammar.

Electives

Two courses complete the requirements:

- **Elective.** Any linguistics (LING) course numbered between 200 and 499.
- **Proseminar elective.** Seminar: [Topic] (LING 407). It is sometimes possible to substitute another 400-level course that has fewer students, most readings from primary literature, and discussion-oriented class periods with a rigorous term paper. Seminars typically have prerequisites, often a subset of the required courses.

For a list of preapproved non-LING courses that can serve as an elective, visit the department website (<http://linguistics.uoregon.edu/undergraduate/electives/>).

Additional Requirements

Two years of one second language and one year of another.

Courses applied to the major in linguistics must be taken for letter grades. A course in which a grade of D+ or lower is earned cannot count toward the major.

The study program of undergraduate linguistics majors must be approved by a departmental undergraduate advisor.

Honors in Linguistics

By fulfilling the following requirements, any linguistics major may graduate with honors.

Grade Point Average

On entry to the honors program at the end of the junior year, a grade point average (GPA) of 3.75 or better in linguistics courses and at least 3.50 overall is required. At the end of the senior year, a GPA of 3.75 or better in linguistics courses is required.

Senior Thesis

Write an original honors thesis under the guidance of a thesis advisor from the linguistics faculty, chosen in consultation with the undergraduate advisor. The thesis must be a substantial piece of work; it may be a revised and expanded term paper. The thesis advisor determines whether the thesis is acceptable; the student is required to register for at least 6 credits in Thesis (LING 403), taken pass/no pass, over the course of at least two terms.

Upon fulfilling these requirements, the candidate is approved to receive a BA degree with honors in linguistics.

Minor in Linguistics

The minor grounds the student in the basics of linguistic analysis and offers the opportunity to pursue areas of special interest. The minor requires at least 28 credits in linguistics course work. Under special circumstances substitutions to courses listed below are possible. Students need permission from an undergraduate advisor to pursue an alternative program of study. The undergraduate minor requirements will change in Fall of 2020. Students admitted to the minor before Fall of 2020 can choose to follow the current degree requirements or the previous major requirements. The Linguistics Department website provides more information.

Minor Degree Requirements

Code	Title	Credits
Required Courses:		16
LING 301	Introduction to Linguistics Analysis	
LING 302	Introduction to Linguistic Behavior	
LING 311	Phonetics and Phonology	
LING 312	Morphosyntax	
Electives ¹		12
Total Credits		28

¹ Two electives must be at the 400+ level with a third elective at the 200+ level.

Language Requirement

The language requirement for the minor is the same as the language requirement that is required for the Bachelor of Arts at the UO. See the UO Academic Policies (<http://uocatalog.uoregon.edu/admissionto graduation/bachelorrequirements/>); scroll down to the "Bachelor of Arts Requirements" for an explanation of the BA second language requirement.

Minor in Interdisciplinary Cognitive Sciences

Code	Title	Credits
One course from each of the following core disciplines:		12
Linguistics		
LING 294	Child Language	
LING 302	Introduction to Linguistic Behavior	
LING 416	Language and Cognition	
LING 407	Seminar: [Topic]	
Computer Science		
CS 122	Introduction to Programming and Problem Solving	
CS 210	Computer Science I	
CS 211	Computer Science II	
Psychology		
PSY 201	Mind and Brain	
PSY 301	Scientific Thinking in Psychology	
PSY 304	Biopsychology	
PSY 305	Cognition	
One additional course from one of the aforementioned disciplines (depth requirement) ¹		4

One course from a supplemental department (breadth requirement) ² 4

Biology		
BI 160	From Brains to Artificial Intelligence	
BI 132	Introduction to Animal Behavior	
Philosophy		
PHIL 101	Philosophical Problems	
PHIL 110	Human Nature	
PHIL 225	Introduction to Formal Logic	
Anthropology		
ANTH 413	Culture and Psychology	
Sociology		
SOC 328	Self and Society	
Economics		
EC 201	Introduction to Economic Analysis: Microeconomics	
EC 320	Introduction to Econometrics	
EC 327	Introduction to Game Theory	
EC 428	Behavioral and Experimental Economics	
Methods Course		4
CS 122	Introduction to Programming and Problem Solving	
CS 210	Computer Science I	
CS 211	Computer Science II	
EC 320	Introduction to Econometrics	
PHIL 225	Introduction to Formal Logic	
PSY 301	Scientific Thinking in Psychology	
Cognitive Science Seminar or independent study or minor thesis		4
LING 407	Seminar: [Topic]	
Total Credits		28

¹ One additional course from one of the aforementioned disciplines (depth requirement). Note: If majoring on one of the three disciplines, this depth course must be in one of the disciplines outside of the major.

² Another department/course in consultation with advisor.

³ At least 12 credits must be upper division.

At least 16 credits must be taken in residence, including the upper division capstone course and 8 other upper division course credits.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Bachelor of Arts in Linguistics

- Master of Arts in Language Teaching Studies (p. 375)
- **Doctoral Degree**

Graduate Studies

Solid preparation in linguistics is indispensable to any specialization at the graduate level. Although the courses deal with a variety of linguistic topics, three facets of linguistics are strongly emphasized in the graduate program:

1. A pragmatic approach to the study of language structure and use, variation and change, and acquisition and learning
2. An empirical, live-data, fieldwork, experimental, and cross-linguistic approach to the methodology of linguistic research
3. Interdisciplinary emphasis on the place of human language in its wider natural context

Advising and Review Practices

Graduate students meet regularly with the departmental director of graduate studies. In addition, students are assigned a faculty member to advise them in the areas of their academic interest. The faculty reviews the performance of each graduate student at the end of each academic term. In case a student falls below what the faculty considers minimal standards of performance, a representative of the faculty notifies the student and suggests appropriate remedial steps.

Master of Arts in Linguistics

For those who intend to complete the PhD, the MA is not necessary and may delay completion of the advanced degree. While not necessary, the option of completing a terminal theoretical MA may be appropriate for some whose goals are, for example, professional work in a language community. Prospective students who are unsure which program would be appropriate are encouraged to consult with the department's director of graduate studies.

Prerequisites. Students may be required to take and pass (with grades of B– or better) certain prerequisite courses, typically an introductory course, such as Morphology and Syntax (LING 535) and Phonetics (LING 511).

Master of Arts Degree Requirements

Code	Title	Credits
Core Courses		
LING 550	Introduction to Phonology	4
LING 551	Functional Syntax I	8
& LING 552	and Functional Syntax II	
LING 507	Seminar: [Topic]	4
or LING 607	Seminar: [Topic]	
LING 614	Linguistic Theory: Phonology	4
LING 615	Linguistic Theory: Syntax	4
LING 616	Linguistic Theory: Semantics	4
Elective Courses		
Graduate-level linguistics or other relevant courses ¹		20
Total Credits		48

¹ Select electives in consultation with department's director of graduate studies and the student's faculty advisor.

No course with a grade lower than B– may be used to satisfy degree requirements.

Second-Language Requirement

Candidates for the MA are required to have taken at least two years of one second language within the past seven years. At the MA level, any foreign language is acceptable, including English for an international student whose first language is not English. It should be noted that the MA language may count toward the two language requirements for the PhD program if the language is used as a research language (see PhD requirements below).

MA Thesis or Substitute

Students in good standing may form an MA committee consisting of two linguistics faculty members who indicate their agreement to serve by signing a standard form and who share equal responsibility for directing the thesis. For the MA to be granted, both members of the committee must approve the thesis and the main content of the thesis must be presented as a departmental colloquium.

Students who elect not to write a thesis or who are unsuccessful in forming the two-member thesis committee may complete the degree by taking an additional 8 credits of course work approved by the director of graduate studies.

Master of Arts in Language Teaching Studies

The MA in Language Teaching Studies does not require a background in linguistics or second-language teaching preparation, but experience in these areas is encouraged. For more information, visit the website (<https://lts.uoregon.edu/>).

Prerequisites. It is preferred that students should have a BS or BA degree in linguistics or a related field.

Master of Arts in Language Teaching Studies

Code	Title	Credits
LING 520	Language, Mind and Society	4
LT 510	Experimental Course: [Topic] (Language Learning in Context)	4
LT 535	Language Learning Design	4
LING 544	Second-Language Acquisition	4
LT 536	Design for Learning Language Systems	4
LT 537	Second-Language Teaching Practice	4
LING 530	Research Methods for Applied Linguistics	4
LT 510	Experimental Course: [Topic] (Design for Language Learning Pragmatics)	4
LT 548	Curriculum and Materials Development	5
LT 539	Design for Language Learning Pronunciation	4
LT 549	Measuring Language Ability	5
LT 608	Workshop: [Topic] (Digitally Mediated Language Learning)	1
LT 608	Workshop: [Topic] (Microteaching & Materials)	3
LT 611	Terminal Project	7
Total Credits		57

Students who choose to take 2 years to complete the program can delay some coursework to the 2nd year, but must take LT 535 before LT 536 or LT 548. Electives credits are described after the required courses.

Electives

Students may take additional elective course work, which may include any number of language or education related coursework, internships, or supervised tutoring or teaching opportunities.

Students who have already taken any of the required courses or their equivalents previous to entering LTS should replace them with elective credits in consultation with the LTS Director. Students who have taken any of the required LTS courses at the 400 level as undergraduates or as UO Community Education Program credits may be able to have up to 15 of these credits waived from the 60 credit total. Students who already have two years or more of language teaching experience can choose to focus on additional coursework for their elective credit, while students with less than two years are advised to gain additional practical experience through the many supervised teaching opportunities noted below.

Courses that can count as electives include additional LT seminars and any graduate Linguistics course (e.g. LING 507 Heritage Language Acquisition; LING 507 Bilingualism, and LING 507 Speech Perception and Production; LING 591 Sociolinguistics; or LING 644 Advanced Second Language Acquisition), as well as graduate level courses in other

language departments, the School of Education, International Studies, Psychology, and others. Any course that relates to topics in education, language, or both is a potential elective choice, with Director approval. A few examples of the many possible electives courses are EDLD 530 Comparative Education, CHN 581 Chinese Pedagogical Grammar, GBL 534 Language Issues in International Studies, and PSY 533 Learning and Memory.

Internships and Supervised Teaching (LT 602) are arranged on an individual basis in a range of language teaching or curriculum development contexts. Students can assist in language classrooms at the American English Institute (AEI) at all proficiency levels, at Lane Community College, in various Foreign Language classes at the UO or LCC, at the Center for Applied Second Language Studies (CASLS), and in K-12 classrooms, such as in the local Japanese, Spanish, or French immersion programs. Classroom internships involve observation, assisting, and some teaching under the supervision of a cooperating teacher.

Only graded courses may be used to satisfy degree requirements. Exceptions must be approved by the department. No course with a grade lower than B– may be used to satisfy degree requirements.

Master's Project

Students working toward the Language Teaching Studies MA degree must complete a master's project over two consecutive terms. The project topic must be approved by the faculty advisor, and be presented in a LT 611 class session during the final term.

Doctor of Philosophy

The doctor of philosophy (PhD) program in linguistics is individually tailored to meet the needs and professional goals of the student, drawing strong interdisciplinary support from related fields at the university. These fields may include—but are not limited to—anthropological linguistics, cognitive science, communication disorders and sciences, discourse and text analysis, English linguistics, first- and second-language acquisition, language-data processing, neurolinguistics, and sociolinguistics.

Residency Requirement

The Division of Graduate Studies requires at least three years of full-time work beyond the bachelor's degree for the doctorate, with at least one year spent in continuous residence on the Eugene campus. The Department of Linguistics interprets the latter requirement to mean that at least six courses, including seminars, must be taken in the program while the student is in continuous residence for three academic terms.

Doctoral Advisor

The department head appoints a doctoral advisor for each student upon admission to the PhD program.

Second-Year Review

By the end of a doctoral student's second year, he or she shall be given a review by the faculty members at a department meeting. Materials submitted by the student to the department for this review must include the following:

1. A report that includes a research plan for the next year's course work, potential topics for the two qualifying papers, a statement about the student's career plans beyond the doctoral degree (and how the specific qualifying paper and thesis topics are relevant), and any other details worked out in consultation with the student's advisor

2. A curriculum vitae (CV)
3. Written evidence of research progress and scholarly potential, such as a substantive term paper or revision of a term paper that demonstrates excellence of original research or a linguistics master's thesis; the materials must be submitted to the Department by April 15

Following review of these materials, the faculty members decides either to *accept* or *deny* the student for continued study in the PhD program. In some cases, a probation year may be granted for a student's third year of study; the review process is repeated at the end of the third year with an *accept* outcome the only possibility for continued study.

As soon as possible after completion of the review, a letter to each graduate student under review is issued by the director of graduate studies informing the student of his or her status and, in the case of a one-year probation, specifying the conditions that must be met for a successful outcome during the additional third-year review. The language of the probation conditions is drafted by the student's doctoral advisor and the director of graduate studies. The director may also meet with any students who are denied continued study or who are granted probation.

Annual review

Beginning in the third year of the program, each graduate student must submit an annual report and CV to his or her advisor by April 15 of each year. The report should be no more than one page in length and should detail what the student has accomplished over the past year in the program.

Doctoral Examination and Advancement to Candidacy

Requirements for the Qualifying Paper

The doctoral examination consists of two original publishable papers (QPs) in different subfields of linguistics. The term "different subfields" may include two different methodological approaches to a single broad topic. Acceptance of a QP indicates that the review committee has deemed the paper to constitute sufficient evidence for the student's readiness to perform PhD-level research and write a dissertation. Submission of both QPs for publication is required before the student can advance to candidacy. The publishing venue may be a refereed journal, a refereed or nonrefereed conference proceedings volume, an online publication, or another venue. While submission of each qualifying paper to a publishing venue is required for advancement to candidacy, acceptance for publication is not a requirement.

An unmodified MA thesis cannot serve as one of the qualifying papers. A qualifying paper may be, however, a publishable expansion or revision of an MA thesis or publishable term paper written for a course conducted by any faculty member in the department or, where deemed reasonable, for a course conducted by a faculty member outside the department. The paper may be written under the supervision of either the student's advisor or another faculty member in consultation with the student's advisor, who approves the topic and the final version before submission to the QP Coordinator.

Composition of the Qualifying Paper Committee

A committee of three faculty members is drawn up to review each qualifying paper. The committee is composed of two faculty member reviewers and the student's doctoral advisor. In cases where the qualifying paper supervisor is not the student's doctoral advisor, the doctoral advisor will be one of the two reviewers and the supervisor will be the third member of the committee. The advisor sits on both of an

individual student's committees, whereas at least one of the two faculty reviewers serves on only one of the two committees. One of the two faculty members on the committee may be from another department, where appropriate.

Upon completion and documented submission to a publisher of both qualifying papers and completion of all required course work and the research language requirement, the student advances to candidacy for the PhD degree. The student and the department must electronically submit the advancement to candidacy to the Division of Graduate Studies for approval.

At least one of the QP reviewers must not be a co-author of the QP at the time of the QP's submission to the committee. One QP reviewer may be a co-author of the QP as long as they have not contributed to the writing of the manuscript prior to its submission for review.

Qualifying Paper Coordinator and Reviewers

The qualifying paper coordinator is a member of the faculty who

- receives papers submitted by the graduate student (after approval of the qualifying paper by the student's doctoral advisor and the QP supervisor)
- selects reviewers for the paper in consultation with the doctoral advisor and the QP supervisor
- sends the paper to the reviewers and sets a deadline for review (typically four weeks)
- receives the reviewers' comments and decisions
- sends a summary of the comments and decisions, together with the reviewers' specific comments, to the doctoral advisor and the student
- notifies the department when the qualifying paper is submitted and when it is accepted by the reviewers
- resolves disputes in cases of intractable disagreement among members of the QP committee

In the event that one or both of the reviewers requests revisions, the student (after the QP supervisor approves the revised version of the paper) submits the revision to the coordinator. A reviewer may choose whether or not to review the revised version. If a reviewer chooses to review the revision, the coordinator sends the revised version to the reviewer and sets a deadline for review (typically four weeks). Any further comments or revision requirements from the reviewer or reviewers are sent by the coordinator to the student, the QP supervisor and the student (with copies to the student's doctoral advisor). In the event that both reviewers reject a qualifying paper, the student may submit a substitute paper with the approval of the doctoral advisor. Except by petition to the faculty and subsequent faculty approval, there may be no third submission of a qualifying paper.

Doctoral Dissertation

A doctoral committee must include at least three linguistics faculty members and one outside member, and must be either chaired or cochaired by the student's doctoral advisor in linguistics. A dissertation prospectus must be submitted to and approved by the doctoral committee before the writing of the dissertation commences. The PhD will be granted upon completion of the preceding requirements, the writing of an original dissertation acceptable to the doctoral committee, and an oral examination on the dissertation.

Required Courses

Code	Title	Credits
LING 614 & LING 615 & LING 616	Linguistic Theory: Phonology and Linguistic Theory: Syntax and Linguistic Theory: Semantics	12

LING 617 & LING 618 & LING 618	and and and	
Sequence of courses in quantitative methods		
Sequence of courses in philological methods		
Combination of courses from two of these areas		
Total Credits		32

The course work must be approved by the student's doctoral advisor. Even those students who have already earned an MA degree are typically expected to complete all of the MA degree course work requirements at Oregon as part of the normal progress toward the PhD.

For each student, the specific course requirements in courses the student selects are to be determined by the student's advisor and the department's director of graduate studies, as are all other courses required for the PhD. No course with a grade lower than B- may be used to satisfy degree requirements. Candidates for the PhD must demonstrate proficiency equivalent to two years of college-level study of a second language and either proficiency equivalent to one year in a third research-related language or proficiency in programming or statistics in order to be advanced to candidacy.

Certificate in Second-Language Acquisition and Teaching

In collaboration with several UO departments, the Department of Linguistics offers an undergraduate certificate that focuses on the theory of second-language acquisition and teaching and its application in pedagogical settings. The certificate complements any other major. Specific course requirements may be found at slat.uoregon.edu (<http://slat.uoregon.edu>).

Certificate Requirements

Code	Title	Credits
Three courses in second-language acquisition theory and language-teaching methodology		12
Three courses in linguistic description of target language		12
One practicum, internship, supervised tutoring		2-4
Total Credits: ¹		36

¹ Additional requirement of college-level second-language study (two years of any second language if the certificate target language is English; three years for any other target language) will bring total credits to a minimum of 36.

Ichishkiin Courses

ICH 101. First-Year Ichishki in. 5 Credits.

Ichishkiin (Sahaptin) is a Native American language of the Columbia River Plateau. The language is critically endangered, and this course adds to language preservation efforts. The course has been designed under the guidance of Yakama Elder, Dr. Virginia Beavert, a renowned language activist and scholar.

ICH 102. First-Year Ichishki in. 5 Credits.

Ichishkiin (Sahaptin) is a Native American language of the Columbia River Plateau. The language is critically endangered, and this course adds to language preservation efforts. The course has been designed under the guidance of Yakama Elder, Dr. Virginia Beavert, a renowned language activist and scholar.

Prereq: ICH 101.

ICH 103. First-Year Ichishki in. 5 Credits.

Ichishkiin (Sahaptin) is a Native American language of the Columbia River Plateau. The language is critically endangered, and this course adds to language preservation efforts. The course has been designed under the guidance of Yakama Elder, Dr. Virginia Beavert, a renowned language activist and scholar.

Prereq: ICH 102.

ICH 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

ICH 201. Second-Year Ichishki in. 5 Credits.

Ichishkiin (Sahaptin) is a Native American language of the Columbia River Plateau. The language is critically endangered, and this course adds to language preservation efforts. The course has been designed under the guidance of Yakama Elder, Dr. Virginia Beavert, a renowned language activist and scholar.

Prereq: ICH 103.

ICH 202. Second-Year Ichishki in. 5 Credits.

Ichishkiin (Sahaptin) is a Native American language of the Columbia River Plateau. The language is critically endangered, and this course adds to language preservation efforts. The course has been designed under the guidance of Yakama Elder, Dr. Virginia Beavert, a renowned language activist and scholar.

Prereq: ICH 201.

ICH 203. Second-Year Ichishki in. 5 Credits.

Ichishkiin (Sahaptin) is a Native American language of the Columbia River Plateau. The language is critically endangered, and this course adds to language preservation efforts. The course has been designed under the guidance of Yakama Elder, Dr. Virginia Beavert, a renowned language activist and scholar.

Prereq: ICH 202.

ICH 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

Language Teaching Courses

LT 199. Special Studies: [Topic]. 1-5 Credits.

Various languages offered through the Yamada Language Center. Repeatable when topic changes.

LT 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

LT 402. Supervised College Teaching. 1-12 Credits.

Repeatable.

LT 405. Reading and Conference: [Topic]. 1-12 Credits.

Repeatable four times for a maximum of 16 credits.

LT 407. Seminar: [Topic]. 1-5 Credits.

Repeatable.

LT 409. Terminal Project. 1-12 Credits.

Repeatable.

LT 410. Experimental Course: [Topic]. 1-8 Credits.

Repeatable twice for a maximum of 8 credits.

LT 428. Teaching English Culture and Literature. 4 Credits.

The interaction between language and culture as it relates to second-language teaching. Application to the teaching of literature.

LT 434. Language Learning in Context. 4 Credits.

This course is designed to sensitize future language professionals to the complex global and local dynamics in language use and vitality, and to enable them to make informed decisions about choosing appropriate approaches to instructional design for particular populations, including classroom and non-classroom instruction.

LT 435. Language Learning Design. 4 Credits.

Theoretical and research-based approaches to designing second language learning experiences.

LT 436. Design for Learning Language Systems. 4 Credits.

Application of language learning design to word, sentence, and discourse-level systems in listening, speaking, reading, and writing second languages.

Prereq: LING 444, LT 435.

LT 437. Second-Language Teaching Practice. 4 Credits.

Intensive workshop and practice in language instruction. Team-teaching of weekly English as a spoken language course including designing activities and creating materials. Sequence with LT 435, LT 436.

Prereq: LT 435. Pre- or coreq: LT 436.

LT 438. Design for Language Learning Pragmatics. 4 Credits.

Designed to engage students in the teaching and learning of pragmatics using theoretical and empirical inquiry to examine first language and second language pragmatic behaviors, intercultural communication, and classroom practice. Special topics to be addressed include research methodology, and pragmatic competence and language learning.

LT 439. Design for Language Learning Pronunciation. 4 Credits.

Approaches to supporting the learning of pronunciation for any second language, including lesson plan development and practice teaching.

LT 441. Teaching English Pronunciation. 4 Credits.

Introduction to English phonetics and phonology, methods for teaching pronunciation, lesson plan development, and practice teaching.

LT 448. Curriculum and Materials Development. 5 Credits.

Introduction to elements of curriculum design and related materials development. Development and implementation of language curriculum. Practical application.

Prereq: LT 436.

LT 449. Measuring Language Ability. 5 Credits.

Principles and types of language testing; focuses on how to assess language learners' abilities in a variety of contexts.

Prereq: LT 436.

LT 507. Seminar: [Topic]. 1-5 Credits.

Repeatable twice for a maximum of 8 credits.

LT 510. Experimental Course: [Topic]. 1-8 Credits.

Repeatable twice for a maximum of 8 credits.

LT 528. Teaching English Culture and Literature. 4 Credits.

The interaction between language and culture as it relates to second-language teaching. Application to the teaching of literature.

LT 534. Language Learning in Context. 4 Credits.

This course is designed to sensitize future language professionals to the complex global and local dynamics in language use and vitality, and to enable them to make informed decisions about choosing appropriate approaches to instructional design for particular populations, including classroom and non-classroom instruction.

LT 535. Language Learning Design. 4 Credits.

Theoretical and research-based approaches to designing second language learning experiences.
Prereq: LING 540 or LING 544.

LT 536. Design for Learning Language Systems. 4 Credits.

Application of language learning design to word, sentence, and discourse-level systems in listening, speaking, reading, and writing second languages.
Prereq: LING 544, LT 535.

LT 537. Second-Language Teaching Practice. 4 Credits.

Intensive workshop and practice in language instruction. Team-teaching of weekly English as a spoken language course including designing activities and creating materials. Sequence with LT 535, LT 536.
Prereq: LT 535. Pre- or coreq: LT 536

LT 538. Design for Language Learning Pragmatics. 4 Credits.

Designed to engage students in the teaching and learning of pragmatics using theoretical and empirical inquiry to examine first language and second language pragmatic behaviors, intercultural communication, and classroom practice. Special topics to be addressed include research methodology, and pragmatic competence and language learning.

LT 539. Design for Language Learning Pronunciation. 4 Credits.

Approaches to supporting the learning of pronunciation for any second language, including lesson plan development and practice teaching.

LT 541. Teaching English Pronunciation. 4 Credits.

Introduction to English phonetics and phonology, methods for teaching pronunciation, lesson plan development, and practice teaching.

LT 548. Curriculum and Materials Development. 5 Credits.

Introduction to elements of curriculum design and related materials development. Development and implementation of language curriculum. Practical application.
Prereq: LT 536.

LT 549. Measuring Language Ability. 5 Credits.

Principles and types of language testing; focuses on how to assess language learners' abilities in a variety of contexts.
Prereq: LT 536.

LT 602. Supervised College Teaching. 1-12 Credits.

Repeatable.

LT 605. Reading and Conference: [Topic]. 1-9 Credits.

Repeatable five times for a maximum of 21 credits.

LT 606. Practicum: [Topic]. 1-16 Credits.

Repeatable.

LT 607. Seminar: [Topic]. 1-5 Credits.

Repeatable five times for a maximum of 16 credits.

LT 608. Workshop: [Topic]. 1-5 Credits.

Repeatable five times for a maximum of 16 credits.

LT 609. Terminal Project. 1-16 Credits.

Repeatable.

LT 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable twice for a maximum of 8 credits.

LT 611. Terminal Project. 1-7 Credits.

Two-term course required to complete an MA in language teaching specialization. Individual projects. Weekly group sessions provide guidance. Repeatable once for a maximum of 7 credits.
Prereq: LT 536.

LT 629. Foundations in Language Theory. 4 Credits.

Provides a foundation in linguistic theory, sociolinguistics, and language acquisition for teachers assisting language-minority students.

Linguistics Courses

LING 101. Introduction to Language. 4 Credits.

Nontechnical introduction to language. Issues of general concern such as language attitudes; language and legislation, nationalism, gender; language learning; and human language versus animal communication.

LING 144. Learning How To Learn Languages. 4 Credits.

The course will focus on how to learn languages, empowering students to become more self-directed and effective learners. Topics will include psycholinguistics, sociolinguistics, diversity in linguistic structures and learning situations (heritage vs. second languages), plus cognitive and metacognitive strategies for learning languages and in general.

LING 150. Structure of English Words. 4 Credits.

Word structure and derivation in English Greek- and Latin-derived vocabulary; Germanic- and Romance-derived derivational rules. Understanding the dynamic structure of the English lexicon; prefixes, suffixes, and morphology.

LING 196. Field Studies: [Topic]. 1-2 Credits.

Repeatable.

LING 198. Workshop: [Topic]. 1-2 Credits.

Repeatable.

LING 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

LING 199L. Special Studies: [Topic]. 4 Credits.

Repeatable.

LING 201. Language and Power in the United States. 4 Credits.

Explores the nature of language, dialects, accents, and multilingualism, and relates these to issues of political, educational, and other forms of social power in the United States.

LING 211. Languages of the World. 4 Credits.

Survey of the variability and distribution of the languages of the world in terms of linguistic typology, genetic relationships, and geographic location.

LING 225. Writing Systems. 4 Credits.

Surveys historical and current systems for encoding languages through writing. Examines the different systems and the advantages and disadvantages of these systems, evaluating them in their historical development.

LING 294. Child Language. 4 Credits.

Systematic survey of language structure and representation presented through the lens of language acquisition. Sounds, words, phrases, discourse, and pragmatics in typically and atypically developing children.

LING 296. Language and Society in the United States. 4 Credits.

English and non-English language diversity in the U.S., including regional varieties, African American English, Latino English. Explores language and social structure, policy, and educational issues.

LING 297. Introduction to Bilingualism. 4 Credits.

The linguistic, cognitive, cultural, and social dimensions of individual and societal bilingualism, which dispel common myths about the way bilinguals develop and use their two or more languages.

LING 301. Introduction to Linguistics Analysis. 4 Credits.

Study of human language and linguistics as a scientific and humanistic discipline. Lexicon, phonology, syntax, semantics, language change. Basic analytic techniques for drawing linguistic generalizations.

LING 302. Introduction to Linguistic Behavior. 4 Credits.

Study of language as a human behavior, focusing on developmental, cognitive, and social aspects of language use. Theories and methods involved in empirical, quantitative linguistics.

LING 311. Phonetics and Phonology. 4 Credits.

The purpose of this class is to introduce students to basic concepts of sounds and sound structure in language. Students will learn to describe sounds of the world's languages in terms of their articulatory and acoustic properties.

Prereq: LING 301.

LING 312. Morphosyntax. 4 Credits.

This course will introduce you to the building blocks that every language uses to produce an infinite number of possible utterances. Topics include: how words are formed, how they're combined, and how they relate to each other in phrases and sentences.

Prereq: LING 301.

LING 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

LING 401. Research: [Topic]. 1-21 Credits.

Repeatable.

LING 403. Thesis. 1-12 Credits.

Repeatable.

LING 404. Internship: [Topic]. 1-12 Credits.

Repeatable.

LING 405. Reading and Conference: [Topic]. 1-21 Credits.

Repeatable.

LING 406. Field Studies: [Topic]. 1-21 Credits.

Repeatable.

LING 407. Seminar: [Topic]. 1-5 Credits.

Repeatable. Topics include history of linguistics, language contact, morphology, discourse pragmatics, conversational analysis, acoustic phonetics, psycholinguistics, language acquisition, applied linguistics..

LING 408. Workshop: [Topic]. 1-21 Credits.

Repeatable.

LING 409. Terminal Project. 1-12 Credits.

Repeatable.

LING 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

LING 411. Phonetics. 4 Credits.

The articulatory and acoustic basis for understanding the production and perception of speech sounds; relevance of this phonetic base to phonological analysis.

Pre- or coreq: LING 301 passed with a grade of C- or better.

LING 415. Semantics. 4 Credits.

Survey of the fundamentals of semantic theory from traditional formal logic to modern cognitive approaches. Additional coverage of fundamental notions in pragmatics.

Prereq: LING 301 passed with a grade of C- or better.

LING 416. Language and Cognition. 4 Credits.

How human thought is coded by language. Topics include meaning, categorization; linguistic units and speech behavior; language use and memory; language comprehension and production.

Prereq: LING 301 or LING 302.

LING 420. Language, Mind and Society. 4 Credits.

Exploration of the relationship between language, human cognition, and social dynamics.

LING 430. Research Methods for Applied Linguistics. 4 Credits.

Introduces students to a number of common research practices in the field of applied linguistics, including research design, ethics, and collecting and analyzing quantitative and qualitative data. Students will gain hands-on experience with analysis software to assist their research.

Prereq: LING 301.

LING 431. Statistical Methods in Linguistics. 4 Credits.

This course serves as a hands-on introduction to the state of the art in statistical analysis of linguistic data. Common pitfalls in statistical analysis and the challenges posed by linguistic data are reviewed. Topics covered are mixed-effects regression models, conditional inference trees and model averaging.

LING 435. Morphology and Syntax. 4 Credits.

Methods of determining the morphological and syntactic patterns of natural language data, with introduction to typological and theoretical issues in morphology.

Prereq: LING 301 passed with a grade of C- or better.

LING 444. Second-Language Acquisition. 4 Credits.

Introduction to cognitive and social processes of acquiring second languages. Students cannot receive credit for both LING 440/LING 540 and LING 444/LING 544.

LING 450. Introduction to Phonology. 4 Credits.

Study of sound systems in language. Phonemic contrasts, allophonic variation, and complementary distribution in relation to lexical coding of words, phonological processes operating at the segmental and suprasegmental levels.

Prereq: LING 311.

LING 451. Functional Syntax I. 4 Credits.

Syntax within grammar; its interaction with lexical meaning, propositional semantics, and discourse pragmatics; syntactic structure; case roles; word order; grammatical morphology; tense, aspect, modality, and negation; definiteness and referentiality.

Prereq: LING 435 passed with a grade of C- or better.

LING 460. Historical and Comparative Linguistics. 4 Credits.

Principles of language change and the methods of comparative and internal reconstruction; typological change in phonology, morphology, and syntax; language families and protolanguages.

Prereq: LING 450 with a grade of C- or better.

LING 491. Sociolinguistics. 4 Credits.

Major approaches and frameworks to the study of sociolinguistics; social-cultural variation in language use and its relationship to change; attitudes about variations, multilingualism.

Prereq: LING 301.

LING 493. Corpus Linguistics. 4 Credits.

Corpus-based approaches to the study of natural, human language, focusing on the use of computer-based methods to conduct empirical analyses of written and spoken language. Developing skills in computer programming for linguistic analysis.

Prereq: LING 301, LING 302.

LING 494. English Grammar. 4 Credits.

Survey of grammatical, syntactic, and morphological structures of English in terms of semantic and functional criteria. Students cannot receive credit for both ENG 209 and LING 494.

LING 503. Thesis. 1-16 Credits.

Repeatable.

LING 507. Seminar: [Topic]. 1-5 Credits.

Repeatable. Topics include history of linguistics, language contact, morphology, discourse pragmatics, conversational analysis.

LING 508. Workshop: [Topic]. 1-21 Credits.

Repeatable.

LING 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

LING 511. Phonetics. 4 Credits.

The articulatory and acoustic basis for understanding the production and perception of speech sounds; relevance of this phonetic base to phonological analysis.

LING 515. Semantics. 4 Credits.

Survey of the fundamentals of semantic theory from traditional formal logic to modern cognitive approaches. Additional coverage of fundamental notions in pragmatics.

LING 516. Language and Cognition. 4 Credits.

How human thought is coded by language. Topics include meaning, categorization; linguistic units and speech behavior; language use and memory; language comprehension and production.

LING 520. Language, Mind and Society. 4 Credits.

Exploration of the relationship between language, human cognition, and social dynamics.

LING 530. Research Methods for Applied Linguistics. 4 Credits.

Introduces students to a number of common research practices in the field of applied linguistics, including research design, ethics, and collecting and analyzing quantitative and qualitative data. Students will gain hands-on experience with analysis software to assist their research.

LING 531. Statistical Methods in Linguistics. 4 Credits.

This course serves as a hands-on introduction to the state of the art in statistical analysis of linguistic data. Common pitfalls in statistical analysis and the challenges posed by linguistic data are reviewed. Topics covered are mixed-effects regression models, conditional inference trees and model averaging.

LING 535. Morphology and Syntax. 4 Credits.

Methods of determining the morphological and syntactic patterns of natural language data, with introduction to typological and theoretical issues in morphology.

LING 544. Second-Language Acquisition. 4 Credits.

Introduction to cognitive and social processes of acquiring second languages. Students cannot receive credit for both LING 440/LING 540 and LING 444/LING 544.

LING 550. Introduction to Phonology. 4 Credits.

Study of sound systems in language. Phonemic contrasts, allophonic variation, and complementary distribution in relation to lexical coding of processes operating at the segmental and suprasegmental levels.

LING 551. Functional Syntax I. 4 Credits.

Syntax within grammar; its interaction with lexical meaning, propositional semantics, and discourse pragmatics; syntactic structure; case roles; word order; grammatical morphology; tense, aspect, modality, and negation; definiteness and referentiality.

LING 560. Historical and Comparative Linguistics. 4 Credits.

Principles of language change and the methods of comparative and internal reconstruction; typological change in phonology, morphology, and syntax; language families and protolanguages.

LING 591. Sociolinguistics. 4 Credits.

Major approaches and frameworks to the study of sociolinguistics; social-cultural variation in language use and its relationship to change; attitudes about variations, multilingualism.

LING 593. Corpus Linguistics. 4 Credits.

Corpus-based approaches to the study of natural, human language, focusing on the use of computer-based methods to conduct empirical analyses of written and spoken language. Developing skills in computer programming for linguistic analysis.

LING 594. English Grammar. 4 Credits.

Survey of grammatical, syntactic, and morphological structures of English in terms of semantic and functional criteria.

LING 601. Research: [Topic]. 1-16 Credits.

Repeatable.

LING 602. Supervised Teaching. 1-5 Credits.

Repeatable.

LING 603. Dissertation. 1-16 Credits.

Repeatable.

LING 604. Internship: [Topic]. 1-9 Credits.

Repeatable.

LING 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

LING 606. Practicum: [Topic]. 1-8 Credits.

Repeatable three times with a maximum of 9 credits.

Prereq: LT 545.

LING 607. Seminar: [Topic]. 1-5 Credits.

Repeatable. Topics include syntax, semantics, discourse pragmatics, stylistics, psycholinguistics, neurolinguistics.

Prereq: LING 550, LING 552.

LING 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

LING 609. Terminal Project. 1-16 Credits.

Repeatable.

LING 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

LING 614. Linguistic Theory: Phonology. 4 Credits.

Detailed investigation of phonological theory with emphasis on experimental evidence. Topics may include sound systems and their typology, morphophonology, and the acquisition of phonological structures.

Prereq: LING 550.

LING 615. Linguistic Theory: Syntax. 4 Credits.

Issues in syntactic theory. Topics may include universals of semantic, pragmatic, and discourse function and their relation to syntax, syntactic typology and universals, formal models in syntactic description.

Prereq: LING 452/552.

LING 616. Linguistic Theory: Semantics. 4 Credits.

Detailed investigation of issues in semantic and pragmatic theory. Topics may include universals of lexical semantics and discourse pragmatics and their interaction.

Prereq: LING 515.

Swahili Courses

SWAH 101. First Year Swahili. 5 Credits.

Introduction to Swahili with emphasis on speaking, reading, writing and comprehension. Sequence with SWAH 102, SWAH 103.

SWAH 102. First-Year Swahili. 5 Credits.

Introduction to Swahili with emphasis on speaking, reading, writing, and comprehension. Sequence with SWAH 101, SWAH 103.

Prereq: SWAH 101 or equivalent.

SWAH 103. First-Year Swahili. 5 Credits.

Introduction to Swahili with emphasis on speaking, reading, writing, and comprehension. Sequence with SWAH 101, SWAH 102.

Prereq: SWAH 102.

SWAH 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

SWAH 201. Second-Year Swahili. 5 Credits.

Continued development of Swahili language skills with emphasis on African culture. Sequence with SWAH 202, SWAH 203.

Prereq: SWAH 103 or equivalent.

SWAH 202. Second-Year Swahili. 5 Credits.

Continued development of Swahili language skills with emphasis on African culture. Sequence with SWAH 201, SWAH 203.

Prereq: SWAH 201 or equivalent.

SWAH 203. Second Year Swahili. 5 Credits.

Continued development of Swahili language skills with emphasis on African culture. Sequence with SWAH 201, SWAH 202.

Prereq: SWAH 202.

SWAH 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

SWAH 405. Reading and Conference: [Topic]. 1-5 Credits.

Repeatable.

Mathematics

Nicholas Proudfoot, Department Head

541-346-4705
205 Fenton Hall
1222 University of Oregon
Eugene, Oregon 97403-1222

Courses offered by the Department of Mathematics are designed to satisfy the needs of majors and nonmajors interested in mathematics primarily as part of a broad liberal education. They provide basic mathematical and statistical training for students in the social, biological, and physical sciences and in the professional schools; prepare teachers of mathematics; and provide advanced and graduate work for students specializing in the field.

Facilities

The department office and the Mathematics Library are housed in Fenton Hall. A reading and study area is located in the Moursund Reading Room of the Mathematics Library. The Hilbert Space, an undergraduate mathematics center, is in University Hall.

Awards and Prizes

- The William Lowell Putnam examination, a competitive, nationally administered mathematics examination, is given early each December. It contains twelve very challenging problems, and prizes are awarded to the top finishers in the nation. Interested students

should consult the chair of the undergraduate affairs committee at the beginning of fall term

- The Anderson Award, endowed by Frank and Dorothy Anderson, is awarded to one or more graduate students with outstanding teaching records
- The Jack and Peggy Borsting Award for Scholastic Achievement in Graduate Mathematics is awarded to a finishing graduate student based on outstanding academic work
- The Charles W. and Elizabeth H. Curtis Scholarship is awarded to a sophomore or junior to continue their studies in mathematics
- The DeCou Prize, which honors a former long-time department head, E. E. DeCou, and his son, E. J. DeCou, is awarded to an outstanding graduating senior
- The Juilfs Scholarship, in honor of Erwin and Gertrude Juilfs, is awarded to one or more students who show exceptional promise for achievement as evidenced by GPA, originality of research, or other applicable criteria
- The Marion Walter Future Teachers Award, which honors Professor Emerita Marion Walter, is awarded to an outstanding senior graduating with a precollege-teaching option
- The Civin Graduate Award, endowed by the family of Paul and Harriet Civin, is awarded for the purpose of attracting and retaining promising graduate students and encouraging underrepresented students in mathematics
- The Harrison Memory Award, endowed by Ann Hill Harrison in honor of former mathematics professor David K. Harrison, is awarded to outstanding students in mathematics

Faculty

Nicolas Addington, associate professor (algebraic geometry). BS, 2004, Washington (Seattle); PhD, 2009, Wisconsin, Madison. (2015)

Shabnam Akhtari, associate professor (number theory). BA, 2002, Sharif University of Technology; PhD, 2008, British Columbia. (2012)

Arkadiy D. Berenstein, professor (quantum groups, representation theory). MS, 1988, Moscow Transport Institute; PhD, 1996, Northeastern. (2000)

Tricia H. Bevans, senior instructor. BA, 1995, MS, 1998, Oregon. (2013)

Boris Botvinnik, professor (algebraic topology). MS, 1978, Novosibirsk State; PhD, 1984, USSR Academy of Sciences, Novosibirsk. (1993)

Marcin Bownik, professor (harmonic analysis, wavelets). Magister, 1995, Warsaw, Poland; MA, 1997, PhD, 2000, Washington (St. Louis). (2003)

Jonathan Brundan, professor (Lie theory, representation theory). BA, 1992, Queens College, Cambridge; PhD, 1996, University of London. (1997)

Daniel K. Dugger, professor (algebraic topology and geometry, K-theory, commutative algebra). BA, 1994, Michigan, Ann Arbor; PhD, 1999, Massachusetts Institute of Technology. (2004)

Ellen E. Eischen, associate professor (number theory). BA, 2003, Princeton; PhD, 2009, Michigan, Ann Arbor. (2015)

Ben Elias, associate professor (representation theory, categorification). BA, 2005, Princeton; PhD, 2011, Columbia. (2014)

Cassandra Fisher, senior instructor. BS, 2010, George Fox; MS, 2012, Texas Tech. (2012)

Laura Fredrickson, assistant professor (geometric analysis and complex geometry). BS, 2010, California, Irvine; PhD, 2016, Texas, Austin. (2019)

Hayden Harker, senior instructor II. BA, 1995, Oberlin College; MS, 2000, PhD, 2005, Oregon. (2011)

Weiyong He, professor (differential geometry, geometric analysis and partial differential equations). MS, 2004, Science and Technology of China; PhD, 2007, Wisconsin, Madison. (2009)

Kristen Henderson, senior instructor. BA, 2001, California, Berkeley; MS, 2003, Nevada, Reno. (2015)

Patricia Hersh, professor (combinatorics). BA, 1995, Harvard; PhD, 1999, Massachusetts Institute of Technology. (2019)

Alexander S. Kleshchev, professor (algebra, representation theory). BS, MS, 1988, Moscow State; PhD, 1993, Institute of Mathematics, Academy of Sciences of Belarus, Minsk. (1995)

Elina Kleshcheva, instructor, BS, 1987, MS, 1988, Moscow State. (1995)

David A. Levin, associate professor (probability theory and stochastic processes). BS, 1993, Chicago; MA, 1995, PhD, 1999, California, Berkeley. (2006)

Huaxin Lin, professor (functional analysis). BA, 1980, East China Normal, Shanghai; MS, 1984, PhD, 1986, Purdue. (1995)

Robert Lipshitz, professor (differential topology). AB, 2002, Princeton; PhD, 2006, Stanford. (2015)

Peng Lu, professor (differential geometry, geometric analysis). BSc, 1985, Nanjing; MSc, 1988, Nanki Mathematics Institute; PhD, 1996, State University of New York, Stony Brook. (2002)

Luca Mazzucato, assistant professor (computational neuroscience). Laurea, 2001, Padua; PhD, 2005, ISAS, Trieste. (2017)

James Murray, assistant professor (computational neuroscience). BS, Montana State; PhD, Johns Hopkins, 2013. (2020)

Maria Nemirovskaya, instructor. MS, 1996, Brigham Young; PhD, 2002, Massachusetts Institute of Technology. (2017)

Tammy Nezol, senior instructor. BA, 2004, BS, 2006, MS, 2008, Oregon. (2008)

Victor V. Ostriker, professor (representation theory). MS, 1995, PhD, 1999, Moscow State. (2003)

Liliana Pazdan-Siudeja, senior instructor. MS, 2010, Illinois, Urbana-Champaign. (2013)

N. Christopher Phillips, professor (functional analysis). AB, 1978, MA, 1980, PhD, 1984, California, Berkeley. (1990)

Alexander Polishchuk, professor (algebraic geometry). MS, 1993, Moscow State; PhD, 1996, Harvard. (2003)

Michael R. Price, senior instructor II; assistant department head. BS, 2003, MS, 2005, Oregon. (2005)

Nicholas J. Proudfoot, professor (algebraic geometry, combinatorics, topological groups). AB, 2000, Harvard; PhD, 2004, California, Berkeley. (2007)

Peter Ralph, associate professor (populations and evolution with genomic data). AB, 2002, PhD, 2009, California, Berkeley. (2016)

Hal Sadofsky, associate professor (algebraic topology, homotopy theory). BS, 1984, Rochester; PhD, 1990, Massachusetts Institute of Technology. (1995)

Bijan Shahir, instructor. MS, 1979, PhD, 1987, Oregon; MSEE, 1999, Washington (Seattle). (2011)

Yefeng Shen, assistant professor (algebraic geometry). BS, 2006, Zhejiang University; MS, 2009, Peking University; PhD, 2013, University of Michigan. (2017)

Christopher D. Sinclair, associate professor (random matrix theory, number theory). BS, 1997, Arizona; PhD, 2005, Texas, Austin. (2009)

Dev P. Sinha, associate professor (algebraic and differential topology). BS, 1993, Massachusetts Institute of Technology; PhD, 1997, Stanford. (2001)

David C Steinberg, senior instructor. BSc, 2004, Alberta; MA, 2006, State University of New York, Binghamton; PhD, 2012, British Columbia. (2013)

Jennifer Thorenson, senior instructor. BS, 2003, North Dakota State; MS, 2005, PhD, 2013, Montana State. (2013)

Craig Tingey, senior instructor. BA, BS, 1989, MS, 1991, Utah. (2001)

Kathy Trigueiro, senior instructor emerita

Arkady Vaintrob, associate professor (algebraic geometry, Lie theory and representation theory, mathematical physics). BA, 1976, Moscow Institute of Railway Engineering; MS, 1979, PhD, 1987, Moscow State. (2000)

Kai Shyang Wang, instructor. MA, 1985, California, Berkeley. (2009)

Micah Warren, associate professor (geometric analysis). BS, 2000, Pacific Lutheran; MS, 2006, PhD, 2008, Washington (Seattle). (2012)

Yuan Xu, professor (numerical analysis). BS, 1982, Northwestern (China); MS, 1984, Beijing Institute of Aeronautics and Astronautics; PhD, 1988, Temple. (1992)

Benjamin Young, associate professor (combinatorics). BS, 2001, MS, 2002, Carleton; PhD, 2008, British Columbia. (2012)

Emeriti

Bruce A. Barnes, professor emeritus. BA, 1960, Dartmouth College; PhD, 1964, Cornell. (1966)

Richard B. Barrar, professor emeritus. BS, 1947, MS, 1948, PhD, 1952, Michigan. (1967)

Glenn T. Beelman, senior instructor emeritus. BS, 1938, South Dakota State; AM, 1962, George Washington. (1966)

Charles W. Curtis, professor emeritus. BA, 1947, Bowdoin; MA, 1948, PhD, 1951, Yale. (1963)

Micheal N. Dyer, professor emeritus. BA, 1960, Rice; PhD, 1965, California, Los Angeles. (1967)

Peter B. Gilkey, professor (global analysis, differential geometry). BS, MA, 1967, Yale; PhD, 1972, Harvard. (1981)

James A. Isenberg, professor (mathematical physics, differential geometry, nonlinear partial differential equations). AB, 1973, Princeton; PhD, 1979, Maryland. (1982)

William M. Kantor, professor emeritus. BS, 1964, Brooklyn; MA, 1965, PhD, 1968, Wisconsin, Madison. (1971)

Richard M. Koch, professor emeritus. BA, 1961, Harvard; PhD, 1964, Princeton. (1966)

Shlomo Libeskind, professor emeritus. BS, 1962, MS, 1965, Technion-Israel Institute of Technology; PhD, 1971, Wisconsin, Madison. (1986)

Theodore W. Palmer, professor emeritus. BA, 1958, MA, 1958, Johns Hopkins; AM, 1959, PhD, 1966, Harvard. (1970)

Kenneth A. Ross, professor emeritus. BS, 1956, Utah; MS, 1958, PhD, 1960, Washington (Seattle). (1964)

Gary M. Seitz, professor emeritus. AB, 1964, MA, 1965, California, Berkeley; PhD, 1968, Oregon. (1970)

Brad S. Shelton, professor emeritus. BA, 1976, Arizona; MS, PhD, 1982, Washington (Seattle). (1985)

Allan J. Sieradski, professor emeritus. BS, 1962, Dayton; MS, 1964, PhD, 1967, Michigan. (1967)

Stuart Thomas, senior instructor emeritus. AB, 1965, California State, Long Beach; MA, 1967, California, Berkeley. (1990)

Kathy Trigueiro, senior instructor emerita

Marie A. Vitulli, professor emerita. BA, 1971, Rochester; MA, 1973, PhD, 1976, Pennsylvania. (1976)

Jerry M. Wolfe, associate professor emeritus. BS, 1966, Oregon State; MA, 1969, PhD, 1972, Washington (Seattle). (1970)

Charles R. B. Wright, professor emeritus. BA, 1956, MA, 1957, Nebraska; PhD, 1959, Wisconsin, Madison. (1961)

Sergey Yuzvinsky, professor (representation theory, combinatorics, multiplication of forms). MA, 1963, PhD, 1966, Leningrad. (1980)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

- **Bachelor of Arts: Standard Track**
- **Bachelor of Arts: Pure Mathematics**
- **Bachelor of Arts: Secondary Teaching**
- **Bachelor of Science: Standard Track**
- **Bachelor of Science: Pure Mathematics**
- **Bachelor of Science: Secondary Teaching**
- **Minor**

Undergraduate Studies

Students planning to major in mathematics at the university should take four years of high school mathematics including a year of mathematics

as a senior. Courses in algebra, geometry, trigonometry, and more advanced topics should be included whether offered as separate courses or as a unit.

College transfer students who have completed a year of calculus should be able to satisfy the major requirements in mathematics at the University of Oregon in two years.

Science Group Requirement

The department offers courses that satisfy the science group requirement:

Code	Title	Credits
MATH 105–107	University Mathematics I-III	12
MATH 211–213	Fundamentals of Elementary Mathematics I-III	12
MATH 231–232	Elements of Discrete Mathematics I-II	8
MATH 241–242 & MATH 243	Calculus for Business and Social Science I-II and Introduction to Methods of Probability and Statistics	12
MATH 246–247	Calculus for the Biological Sciences I-II	8
MATH 251–253	Calculus I-III	12
MATH 261–263	Calculus with Theory I-III	12
MATH 307	Introduction to Proof	4

The 100-level courses present important mathematical ideas in an elementary setting, stressing concepts more than computation. They do not provide preparation for other mathematics courses but are compatible with further study in mathematics.

Enrollment in Courses

Beginning and transfer students must take a placement examination before enrolling in their first UO mathematics course; the examination is given during each registration period. Students who transfer credit for calculus to the university are excused from the examination.

To enroll in courses that have prerequisites, students must complete the prerequisite courses with grades of C– or better or P.

Students cannot receive credit for a course that is a prerequisite to a course they have already taken. For example, a student with credit in Calculus for Business and Social Science I (MATH 241) cannot later receive credit for College Algebra (MATH 111). For more information about credit restrictions, contact a mathematics advisor.

Bridge Requirement

Most upper-division courses include mathematical proof as a significant element. To prepare for this, students must satisfy the bridge requirement as a prerequisite to taking any 300- or 400-level course other than Elementary Linear Algebra (MATH 341–342), Statistical Methods I-II (MATH 425–426), or Partial Differential Equations: Fourier Analysis I-II (MATH 421–422).

The bridge requirement is one of the following:

Code	Title	Credits
MATH 307 and four of MATH 201, MATH 202, MATH 203, MATH 204, MATH 205, and MATH 206		12

MATH 231, MATH 232, and two of MATH 201, MATH 202, MATH 203, MATH 204, MATH 205, and MATH 206	12
MATH 261, MATH 262, and two of MATH 201, MATH 202, MATH 203, MATH 204, MATH 205, and MATH 206	12

Calculus Sequences

The department offers four calculus sequences. Students need to consult an advisor in mathematics or in their major field about which sequence to take.

Sequence	Description
MATH 251–253	<ul style="list-style-type: none"> Standard sequence recommended to most students in the physical sciences and mathematics For students interested in more advanced mathematics courses
MATH 261–263	<ul style="list-style-type: none"> Same material as the standard sequence but includes theoretical background material and is for strong students with an interest in mathematics For students interested in more advanced mathematics courses
MATH 246–247, MATH 253	<ul style="list-style-type: none"> Covers comparable material as Calculus I,II but with an emphasis on modeling and applications to the life sciences For students interested in more advanced mathematics courses
MATH 241–242	<ul style="list-style-type: none"> Serves the mathematical needs of students in the business, managerial, and social sciences For students not interested in more advanced mathematical courses

The first three sequences are equivalent as far as department requirements for majors or minors and as far as prerequisites for more advanced courses.

Program Plan Example

First Year	Credits
Select one of the following:	12
MATH 251–253 Calculus I-III	12
MATH 261–263 Calculus with Theory I-III	12
Select two of the following	4
MATH 201 Algebra Math Lab	2
MATH 202 Geometry Math Lab	2
MATH 203 Analysis and Number Theory Math Lab	2
Second Year	

Select two of the following	4
MATH 204 Probability and Statistics Math Lab	2
MATH 205 Foundations Math Lab	2
MATH 206 Combinatorics Math Lab	2

Select one of the following	8
MATH 281–282 Several-Variable Calculus I-II	8
MATH 341–342 Elementary Linear Algebra	8

Select one of the following	8
MATH 231–232 Elements of Discrete Mathematics I-II	8
MATH 261–262 Calculus with Theory I-II	8
MATH 307 Introduction to Proof	4

Third Year

Complete second year sequence as necessary

CS 122 Introduction to Programming and Problem Solving	4
--	---

Select one of the following Fundamentals sequences	8
--	---

MATH 316–317 Fundamentals of Analysis I-II	8
MATH 347–348 Fundamentals of Number Theory I-II	8
MATH 391–392 Fundamentals of Abstract Algebra I-II	8

One upper division mathematics course	4
---------------------------------------	---

Fourth Year

Three upper-division mathematics courses	12
--	----

Total Credits: 64

Students who are considering graduate school in mathematics should take at least one or two of the pure math sequences, Introduction to Analysis I-III (MATH 413–415), Introduction to Abstract Algebra I-III (MATH 444–446), or Introduction to Topology (MATH 431–432) and Introduction to Differential Geometry (MATH 433). The choice merits discussion with an advisor.

Bachelor's Degree Requirements

The department offers undergraduate preparation for positions in government, business, and industry and for graduate work in mathematics and statistics. Each student's major program is individually constructed in consultation with an advisor.

Upper-division courses used to satisfy major requirements must be taken for letter grades, and only one D grade (D+ or D or D–) may be

counted toward the upper-division requirement. At least 12 credits in upper-division mathematics courses must be taken in residence at the university.

Statistical Methods I (MATH 425) cannot be used to satisfy requirements for a mathematics major or minor.

To qualify for a bachelor's degree with a major in mathematics, a student must satisfy the requirements for one of three options: the standard track, pure mathematics, or secondary teaching. In each option, most courses require calculus as a prerequisite, and in each option some of the courses require satisfying the bridge requirement.

Mathematics and Computer Science

The Department of Mathematics and the Department of Computer Science jointly offer an undergraduate major in mathematics and computer science, leading to a bachelor of arts or a bachelor of science degree. This program is described in the **Mathematics and Computer Science** section of this catalog.

Recommended Mathematics Courses for Other Areas

Students with an undergraduate mathematics degree often change fields when enrolling in graduate school. Common choices for a graduate career include computer science, economics, engineering, law, medicine, and physics. It is not unusual for a mathematics major to complete a second major as well. The following mathematics courses are recommended for students interested in other areas:

Code	Title	Credits
Actuarial Science		
MATH 351–352	Elementary Numerical Analysis I-II	8
MATH 461–462	Introduction to Mathematical Methods of Statistics I-II	8
MATH 463	Mathematical Methods of Regression Analysis and Analysis of Variance ¹	4
Biological Sciences		
MATH 461–462	Introduction to Mathematical Methods of Statistics I-II	8
Computer Science		
MATH 231–232	Elements of Discrete Mathematics I-II	8
MATH 351–352	Elementary Numerical Analysis I-II	8
	or MATH 461– Introduction to Mathematical Methods of Statistics I-II 462	
MATH 456	Networks and Combinatorics	4
Economics, Business, and Social Science		
MATH 461–462	Introduction to Mathematical Methods of Statistics I-II ²	8
Physical Sciences and Engineering		
MATH 351–352	Elementary Numerical Analysis I-II	8
MATH 411–412	Functions of a Complex Variable I-II	8
MATH 320	Theory of Differential Equations	4
MATH 421–422	Partial Differential Equations: Fourier Analysis I-II	8

¹ Courses in computer science, accounting, and economics are also recommended. It is possible to take the first few actuarial examinations (on calculus, statistics, and numerical analysis) as an undergraduate student.

² Students who want to take upper-division mathematics courses should take Calculus I-II (MATH 251–252) in place of Calculus for Business and Social Science I-II (MATH 241–242).

Honors Program

Students preparing to graduate with honors in mathematics should notify the department's honors advisor no later than the first term of their senior year (and ideally during the penultimate year of study). There are two requirements for receiving departmental honors:

1. Complete all upper division mathematics courses with a net GPA of 3.7 or greater.
2. Write a thesis covering advanced topics as assigned by the honors advisor.

The degree with departmental honors is awarded to students whose work is judged truly exceptional.

Preparation for Kindergarten through Secondary School Teaching Careers

The College of Education offers a fifth-year program for middle-secondary licensure in mathematics and for elementary teaching. For more information, see the **College of Education** section of this catalog.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

To enroll with courses that have prerequisites, students must complete the prerequisite course with grades of C– or better or P. All upper-division mathematics courses must be taken for letter grades to count toward a mathematics major or minor, and only one D grade (D+ or D or D–) may be counted toward the upper-division requirements for the major or minor.

- **Standard Track**
- Pure Mathematics (p. 389)
- Secondary Teaching (p. 391)

- Accelerated Master's Program (p. 404)
- **Master of Arts**
- **Master of Science**
- **Master of Arts: PrePhD**
- **Master of Science: PrePhD**
- **Doctor of Philosophy**

Graduate Studies

The university offers graduate study in mathematics leading to the master of arts (MA), master of science (MS), and doctor of philosophy (PhD) degrees.

Master's degree programs are available to suit the needs of students with various objectives. There are programs for students who intend to enter a doctoral program and for those who plan to conclude their formal study of pure or applied mathematics at the master's level.

Admission depends on the student's academic record—both overall academic quality and adequate mathematical background for the applicant's proposed degree program. The application for admission is available online (<http://math.uoregon.edu/graduate/apply-online/>). Prospective applicants should note the general university requirements for graduate admission that appear in the **Division of Graduate Studies** section of this catalog as well as requirements specific to the department at math.uoregon.edu/graduate/admissions (<http://math.uoregon.edu/graduate/admissions/>).

Transcripts from all undergraduate and graduate institutions attended should be submitted to the department.

In addition to general Division of Graduate Studies requirements, the specific graduate program courses and conditions listed below must be fulfilled. More details can be found in the Department of Mathematics *Graduate Student Handbook*, available in the department office and online (<http://math.uoregon.edu/graduate/handbook/>). All mathematics courses applied to degree requirements, including associated reading courses, must be taken for letter grades. A final written or oral examination or both is required for master's degrees except under the pre-PhD option outlined below. This examination is waived under circumstances outlined in the departmental *Graduate Student Handbook*.

Courses

MATH 099. Special Studies: [Topic]. 1-2 Credits.

Credit for enrollment (eligibility) but not for graduation; satisfies no university or college requirement. Repeatable.

MATH 101. Foundations of Algebra and Mathematical Modeling. 4 Credits.

Critical elements of pre-college algebra, topics including equation solving; rational, radical, and polynomial expression evaluation and simplification; lines, linear equations, and quadratic equations. Focus on mathematical modeling and preparation for additional college level mathematics. Prereq: UO Math Placement Exam with a score of 35-48.

MATH 105. University Mathematics I. 4 Credits.

Topics include logic, sets and counting, probability, and statistics. Instructors may include historical context of selected topics and applications to finance and biology.

Prereq: MATH 101 or satisfactory placement test score.

MATH 106. University Mathematics II. 4 Credits.

Topics include mathematics of finance, applied geometry, exponential growth and decay, and a nontechnical introduction to the concepts of calculus.

Prereq: MATH 101 or satisfactory placement test score.

MATH 107. University Mathematics III. 4 Credits.

Topics chosen from modular arithmetic and coding, tilings and symmetry, voting methods, apportionment, fair division, introductory graph theory, or scheduling.

Prereq: MATH 101 or satisfactory placement test score.

MATH 111. College Algebra. 4 Credits.

Algebra needed for calculus including graph sketching, algebra of functions, polynomial functions, rational functions, exponential and logarithmic functions, linear and nonlinear functions.

Prereq: MATH 101 or satisfactory placement test score.

MATH 112. Elementary Functions. 4 Credits.

Exponential, logarithmic, and trigonometric functions. Intended as preparation for MATH 251.

Prereq: MATH 111 or satisfactory placement test score.

MATH 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

MATH 201. Algebra Math Lab. 2 Credits.

Exploratory course in mathematics. Course focuses on techniques of mathematical exploration and discovery, the language of mathematics, and foundational issues. Topics from algebra.

MATH 202. Geometry Math Lab. 2 Credits.

Exploratory course in mathematics. Course focuses on techniques of mathematical exploration and discovery, the language of mathematics, and foundational issues. Topics from geometry.

MATH 203. Analysis and Number Theory Math Lab. 2 Credits.

Exploratory course in mathematics. Course focuses on techniques of mathematical exploration and discovery, the language of mathematics, and foundational issues. Topics from analysis and the theory of numbers.

MATH 204. Probability and Statistics Math Lab. 2 Credits.

Exploratory course in mathematics. Course focuses on techniques of mathematical exploration and discovery, the language of mathematics, and foundational issues. Topics from probability and statistics.

MATH 205. Foundations Math Lab. 2 Credits.

Exploratory course in mathematics. Course focuses on techniques of mathematical exploration and discovery, the language of mathematics, and foundational issues. Topics from the foundations of mathematics.

MATH 206. Combinatorics Math Lab. 2 Credits.

Exploratory course in mathematics. Course focuses on techniques of mathematical exploration and discovery, the language of mathematics, and foundational issues. Topics from combinatorics.

MATH 211. Fundamentals of Elementary Mathematics I. 4 Credits.

Structure of the number system, logical thinking, topics in geometry, simple functions, and basic statistics and probability. Calculators, concrete materials, and problem solving are used when appropriate. Covers the mathematics needed to teach grades K–8. Sequence.

Prereq: MATH 101, MATH 111, or satisfactory placement score.

MATH 212. Fundamentals of Elementary Mathematics II. 4 Credits.

Structure of the number system, logical thinking, topics in geometry, simple functions, and basic statistics and probability. Calculators, concrete materials, and problem solving are used when appropriate. Covers the mathematics needed to teach grades K–8. Sequence.

Prereq: MATH 211, C- or better.

MATH 213. Fundamentals of Elementary Mathematics III. 4 Credits.

Structure of the number system, logical thinking, topics in geometry, simple functions, and basic statistics and probability. Calculators, concrete materials, and problem solving are used when appropriate. Covers the mathematics needed to teach grades K–8. Sequence.

Prereq: MATH 212, C- or better.

MATH 231. Elements of Discrete Mathematics I. 4 Credits.

Sets, mathematical logic, induction, sequences, and functions. Sequence.

Prereq: MATH 112 or satisfactory placement test score.

MATH 232. Elements of Discrete Mathematics II. 4 Credits.

Relations, theory of graphs and trees with applications, permutations and combinations.

Prereq: MATH 231.

MATH 241. Calculus for Business and Social Science I. 4 Credits.

Introduction to topics in differential and integral calculus including some aspects of the calculus of several variables. Sequence. Students cannot receive credit for more than one of MATH 241, MATH 246, MATH 251.

Prereq: MATH 111 or satisfactory placement test score; a programmable calculator capable of displaying function graphs.

MATH 242. Calculus for Business and Social Science II. 4 Credits.

Introduction to topics in differential and integral calculus including some aspects of the calculus of several variables. Students cannot receive credit for more than one of MATH 242, MATH 247, MATH 252.

Prereq: MATH 241.

MATH 243. Introduction to Methods of Probability and Statistics. 4 Credits.

Discrete and continuous probability, data description and analysis, sampling distributions, emphasizes confidence intervals and hypothesis testing. Students cannot receive credit for both MATH 243 and MATH 425.

Prereq: MATH 101 or satisfactory placement test score; MATH 111 recommended; a programmable calculator capable of displaying function graphs.

MATH 246. Calculus for the Biological Sciences I. 4 Credits.

For students in biological science and related fields. Emphasizes modeling and applications to biology. Differential calculus and applications. Sequence. Students cannot receive credit for more than one of MATH 241, MATH 246, MATH 251.

Prereq: MATH 112 or satisfactory placement test score.

MATH 247. Calculus for the Biological Sciences II. 4 Credits.

For students in biological science and related fields. Emphasizes modeling and applications to biology. Integral calculus and applications. Students cannot receive credit for more than one of MATH 242, MATH 247, MATH 252.

Prereq: MATH 246.

MATH 251. Calculus I. 4 Credits.

Standard sequence for students of physical and social sciences and of mathematics. Differential calculus and applications. Sequence. Students cannot receive credit for more than one of MATH 241, MATH 246, MATH 251.

Prereq: MATH 112 or satisfactory placement test score.

MATH 252. Calculus II. 4 Credits.

Standard sequence for students of physical and social sciences and of mathematics. Integral calculus. Sequence. Students cannot receive credit for more than one of MATH 242, MATH 247, MATH 252.

Prereq: MATH 251.

MATH 253. Calculus III. 4 Credits.

Standard sequence for students of physical and social sciences and of mathematics. Introduction to improper integrals, infinite sequences and series, Taylor series, and differential equations. Sequence.

Prereq: MATH 252.

MATH 256. Introduction to Differential Equations. 4 Credits.

Introduction to differential equations and applications. Linear algebra is introduced as needed.

Prereq: MATH 253.

MATH 261. Calculus with Theory I. 4 Credits.

Covers both applications of calculus and its theoretical background. Axiomatic treatment of the real numbers, limits, and the least upper bound property.

MATH 262. Calculus with Theory II. 4 Credits.

Covers both applications of calculus and its theoretical background. Differential and integral calculus.

Prereq: MATH 261.

MATH 263. Calculus with Theory III. 4 Credits.

Covers both applications of calculus and its theoretical background. Sequences and series, Taylor's theorem.

Prereq: MATH 262.

MATH 281. Several-Variable Calculus I. 4 Credits.

Introduction to calculus of functions of several variables including partial differentiation; gradient, divergence, and curl; line and surface integrals; Green's and Stokes's theorems. Linear algebra introduced as needed. Sequence.

Prereq: MATH 253.

MATH 282. Several-Variable Calculus II. 4 Credits.

Introduction to calculus of functions of several variables including partial differentiation; gradient, divergence, and curl; line and surface integrals; Green's and Stokes's theorems. Linear algebra introduced as needed.

Prereq: MATH 281.

MATH 307. Introduction to Proof. 4 Credits.

Proof is how mathematics establishes truth and communicates ideas. Introduces students to proof in the context of interesting mathematical problems. Students cannot receive credit for both PHIL 225 and MATH 307.

Prereq: MATH 247 or MATH 252 or MATH 262.

MATH 316. Fundamentals of Analysis I. 4 Credits.

Rigorous treatment of topics introduced in calculus such as limits, sequences, series, the Cauchy condition, and continuity. Development of mathematical proof in these contexts. Sequence with MATH 317.

Prereq: MATH 253 or equivalent; one from MATH 232, MATH 262, MATH 307.

MATH 317. Fundamentals of Analysis II. 4 Credits.

Rigorous treatment of topics introduced in calculus such as continuity, uniform convergence, power series, differentiation, and integration. Development of mathematical proof in these contexts. Sequence with MATH 316.

Prereq: MATH 316.

MATH 320. Theory of Differential Equations. 4 Credits.

An introduction to differential equations for students with background in linear algebra, with a mixture of applications and theory. Topics include linear and nonlinear equations, systems of equations, and questions of existence and uniqueness.

Prereq: MATH 281, MATH 342; one from MATH 232, MATH 262, MATH 307.

MATH 341. Elementary Linear Algebra. 4 Credits.

Vector and matrix algebra; n-dimensional vector spaces; systems of linear equations; linear independence and dimension; linear transformations; rank and nullity; determinants; eigenvalues; inner product spaces; theory of a single linear transformation. Sequence.

Prereq: MATH 252. MATH 253 is recommended.

MATH 342. Elementary Linear Algebra. 4 Credits.

Vector and matrix algebra; n-dimensional vector spaces; systems of linear equations; linear independence and dimension; linear transformations; rank and nullity; determinants; eigenvalues; inner product spaces; theory of a single linear transformation.

Prereq: MATH 341.

MATH 343. Statistical Models and Methods. 4 Credits.

Review of theory and applications of mathematical statistics including estimation and hypothesis testing. Students cannot get credit for both MATH 343 and DSCI 345M/MATH 345M.

Prereq: MATH 252.

MATH 345M. Probability and Statistics for Data Science. 4 Credits.

Introduction to probability and statistics, with an emphasis upon topics relevant for data science. Multilisted with DSCI 345M. Students cannot get credit for both MATH 343 and DSCI 345M/MATH 345M.

Prereq: MATH 342, CS 211.

MATH 347. Fundamentals of Number Theory I. 4 Credits.

A study of congruences, the Chinese remainder theorem, the theory of prime numbers and divisors, Diophantine equations, and quadratic reciprocity. Development of mathematical proof in these contexts.

Sequence with MATH 348.

Prereq: MATH 253 or equivalent; one from MATH 232, MATH 262, MATH 307.

MATH 348. Fundamentals of Number Theory II. 4 Credits.

Study of nonlinear Diophantine equations, sums of squares, the theory of partitions, geometric number theory, and the distribution of prime numbers. Development of mathematical proof in these contexts.

Sequence with MATH 347.

Prereq: MATH 347.

MATH 351. Elementary Numerical Analysis I. 4 Credits.

Basic techniques of numerical analysis and their use on computers. Topics include root approximation, linear systems, interpolation, integration, and differential equations. Sequence.

Prereq: MATH 253 or equivalent; one from MATH 232, MATH 262, MATH 307.

MATH 352. Elementary Numerical Analysis II. 4 Credits.

Basic techniques of numerical analysis and their use on computers. Topics include root approximation, linear systems, interpolation, integration, and differential equations.

Prereq: MATH 351.

MATH 391. Fundamentals of Abstract Algebra I. 4 Credits.

Introduction to algebraic structures including groups, rings, fields, and polynomial rings. Sequence.

Prereq: MATH 341; one from MATH 232, MATH 262, MATH 307.

MATH 392. Fundamentals of Abstract Algebra II. 4 Credits.

Introduction to algebraic structures including groups, rings, fields, and polynomial rings.

Prereq: MATH 391.

MATH 394. Geometries from an Advanced Viewpoint I. 4 Credits.

Topics in Euclidean geometry in two and three dimensions including constructions. Emphasizes investigations, proofs, and challenging problems. For prospective secondary and middle school teachers.

Prereq: MATH 253 or equivalent; one from MATH 232, MATH 262, MATH 307.

MATH 395. Geometries from an Advanced Viewpoint II. 4 Credits.

Analysis of problems in Euclidean geometry using coordinates, vectors, and the synthetic approach. Transformations in the plane and space and their groups. Introduction to non-Euclidean geometries. For prospective secondary teachers.

Prereq: grade of C- or better in MATH 394.

MATH 397. History and Applications of Calculus. 4 Credits.

Historical applications of calculus. Topics may include volumes by the method of exhaustion, Archimedean spiral, Kepler problem, calculus of variations, brachistochrone problem, spread of infectious disease, analysis of savings.

Prereq: MATH 253; one from MATH 232, MATH 262, MATH 307.

MATH 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

MATH 401. Research: [Topic]. 1-21 Credits.

Repeatable.

MATH 403. Thesis. 1-4 Credits.

Repeatable.

MATH 405. Reading and Conference: [Topic]. 1-4 Credits.

Repeatable.

MATH 407. Seminar: [Topic]. 1-4 Credits.

Repeatable.

MATH 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

MATH 411. Functions of a Complex Variable I. 4 Credits.

Complex numbers, linear fractional transformations, Cauchy-Riemann equations, Cauchy's theorem and applications, power series, residue theorem, harmonic functions, contour integration, conformal mapping, infinite products. Sequence.

Prereq: MATH 281; one from MATH 232, MATH 262, MATH 307.

MATH 412. Functions of a Complex Variable II. 4 Credits.

Complex numbers, linear fractional transformations, Cauchy-Riemann equations, Cauchy's theorem and applications, power series, residue theorem, harmonic functions, contour integration, conformal mapping, infinite products.

Prereq: MATH 411.

MATH 413. Introduction to Analysis I. 4 Credits.

Differentiation and integration on the real line and in a dimensional Euclidean space; normed linear spaces and metric spaces; vector field theory and differential forms. Sequence.

Prereq: MATH 282, MATH 317.

MATH 414. Introduction to Analysis II. 4 Credits.

Differentiation and integration on the real line and in a dimensional Euclidean space; normed linear spaces and metric spaces; vector field theory and differential forms.

Prereq: MATH 413.

MATH 415. Introduction to Analysis III. 4 Credits.

Differentiation and integration on the real line and in a dimensional Euclidean space; normed linear spaces and metric spaces; vector field theory and differential forms. Sequence.

Prereq: MATH 414.

MATH 421M. Partial Differential Equations: Fourier Analysis I. 4 Credits.

Introduction to PDEs with a view towards applications in physics. Wave and heat equations, classical Fourier series on the circle, Bessel and Legendre series. Multilisted with PHYS 421M.

Prereq: MATH 253; one from MATH 256, MATH 281.

MATH 422. Partial Differential Equations: Fourier Analysis II. 4 Credits.

General theory of PDEs; the Fourier transform. Laplace and Poisson equations; Green's functions and application. Mean value theorem and max-min principle.

Prereq: MATH 421M or PHYS 421M.

MATH 425. Statistical Methods I. 4 Credits.

Statistical methods for upper-division and graduate students anticipating research in nonmathematical disciplines. Presentation of data, sampling distributions, tests of significance, confidence intervals, linear regression, analysis of variance, correlation, statistical software. Sequence. Only nonmajors may receive upper-division credit. Students cannot receive credit for both MATH 243 and MATH 425.

Prereq: MATH 111 or satisfactory placement test score.

MATH 431. Introduction to Topology. 4 Credits.

Elementary point-set topology with an introduction to combinatorial topology and homotopy. Sequence.

Prereq: MATH 317.

MATH 432. Introduction to Topology. 4 Credits.

Introduction to smooth manifolds and differential topology. Sequence.

Prereq: MATH 281, MATH 341, MATH 431.

MATH 433. Introduction to Differential Geometry. 4 Credits.

Plane and space curves, Frenet-Serret formula surfaces. Local differential geometry, Gauss-Bonnet formula, introduction to manifolds.

Prereq: MATH 282, 342; one from MATH 232, MATH 262, MATH 307.

MATH 434. Introduction to Topology III. 4 Credits.

Introduction to differential topology and de Rham cohomology. Sequence.

Prereq: MATH 432.

MATH 441. Linear Algebra. 4 Credits.

Theory of vector spaces over arbitrary fields, theory of a single linear transformation, minimal polynomials, Jordan and rational canonical forms, quadratic forms, quotient spaces.

Prereq: MATH 342; one from MATH 232, MATH 262, MATH 307.

MATH 444. Introduction to Abstract Algebra I. 4 Credits.

Theory of groups, rings, and fields. Polynomial rings, unique factorization, and Galois theory. Sequence.

Prereq: MATH 342; one from MATH 232, MATH 262, MATH 307.

MATH 445. Introduction to Abstract Algebra II. 4 Credits.

Theory of groups, rings, and fields. Polynomial rings, unique factorization, and Galois theory.

Prereq: MATH 444.

MATH 446. Introduction to Abstract Algebra III. 4 Credits.

Theory of groups, rings, and fields. Polynomial rings, unique factorization, and Galois theory.

Prereq: MATH 445.

MATH 456. Networks and Combinatorics. 4 Credits.

Fundamentals of modern combinatorics; graph theory; networks; trees; enumeration, generating functions, recursion, inclusion and exclusion; ordered sets, lattices, Boolean algebras.

Prereq: one from MATH 232, MATH 262, MATH 307.

MATH 458. Introduction to Mathematical Cryptography. 4 Credits.

Mathematical theory of public key cryptography. Finite field arithmetic, RSA and Diffie-Hellman algorithms, elliptic curves, generation of primes, factorization techniques. Offered alternate years.

Prereq: MATH 341.

MATH 461. Introduction to Mathematical Methods of Statistics I. 4 Credits.

Discrete and continuous probability models; useful distributions; applications of moment-generating functions; sample theory with applications to tests of hypotheses, point and confidence interval estimates. Sequence.

Prereq: MATH 253 or MATH 263; one from MATH 232, MATH 262, MATH 307.

MATH 462. Introduction to Mathematical Methods of Statistics II. 4 Credits.

Discrete and continuous probability models; useful distributions; applications of moment-generating functions; sample theory with applications to tests of hypotheses, point and confidence interval estimates.

Prereq: MATH 461.

MATH 463. Mathematical Methods of Regression Analysis and Analysis of Variance. 4 Credits.

Multinomial distribution and chi-square tests of fit, simple and multiple linear regression, analysis of variance and covariance, methods of model selection and evaluation, use of statistical software.

Prereq: MATH 342, MATH 462.

MATH 467. Stochastic Processes. 4 Credits.

Basics of stochastic processes including Markov chains, martingales, Poisson processes, Brownian motion and their applications.

Prereq: MATH 341, MATH 461.

MATH 503. Thesis. 1-12 Credits.

Repeatable.

MATH 507. Seminar: [Topic]. 1-4 Credits.

Repeatable.

MATH 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

MATH 511. Functions of a Complex Variable I. 4 Credits.

Complex numbers, linear fractional transformations, Cauchy-Riemann equations, Cauchy's theorem and applications, power series, residue theorem, harmonic functions, contour integration, conformal mapping, infinite products. Sequence.

MATH 512. Functions of a Complex Variable II. 4 Credits.

Complex numbers, linear fractional transformations, Cauchy-Riemann equations, Cauchy's theorem and applications, power series, residue theorem, harmonic functions, contour integration, conformal mapping, infinite products.

Prereq: MATH 511.

MATH 513. Introduction to Analysis I. 4 Credits.

Differentiation and integration on the real line and in a dimensional Euclidean space; normed linear spaces and metric spaces; vector field theory and differential forms. Sequence.

MATH 514. Introduction to Analysis II. 4 Credits.

Differentiation and integration on the real line and in a dimensional Euclidean space; normed linear spaces and metric spaces; vector field theory and differential forms. Sequence.

Prereq: MATH 513.

MATH 515. Introduction to Analysis III. 4 Credits.

Differentiation and integration on the real line and in a dimensional Euclidean space; normed linear spaces and metric spaces; vector field theory and differential forms. Sequence.

Prereq: MATH 514.

MATH 521M. Partial Differential Equations: Fourier Analysis I. 4 Credits.

Introduction to PDEs with a view towards applications in physics. Wave and heat equations, classical Fourier series on the circle, Bessel and Legendre series. Multilisted with PHYS 521M.

MATH 522. Partial Differential Equations: Fourier Analysis II. 4 Credits.

General theory of PDEs; the Fourier transform. Laplace and Poisson equations; Green's functions and application. Mean value theorem and max-min principle.

Prereq: MATH 421/521.

MATH 525. Statistical Methods I. 4 Credits.

Statistical methods for upper-division and graduate students anticipating research in nonmathematical disciplines. Presentation of data, sampling distributions, tests of significance, confidence intervals, linear regression, analysis of variance, correlation, statistical software. Sequence. Only nonmajors may receive graduate credit.

MATH 531. Introduction to Topology. 4 Credits.

Elementary point-set topology with an introduction to combinatorial topology and homotopy. Sequence.

MATH 532. Introduction to Topology. 4 Credits.

Elementary point-set topology with an introduction to combinatorial topology and homotopy. Sequence.

Prereq: MATH 531.

MATH 533. Introduction to Differential Geometry. 4 Credits.

Plane and space curves, Frenet-Serret formula surfaces. Local differential geometry, Gauss-Bonnet formula, introduction to manifolds.

MATH 534. Introduction to Topology III. 4 Credits.

Introduction to differential topology and de Rham cohomology. Sequence.

Prereq: MATH 352.

MATH 541. Linear Algebra. 4 Credits.

Theory of vector spaces over arbitrary fields, theory of a single linear transformation, minimal polynomials, Jordan and rational canonical forms, quadratic forms, quotient spaces.

MATH 544. Introduction to Abstract Algebra I. 4 Credits.

Theory of groups, rings, and fields. Polynomial rings, unique factorization, and Galois theory. Sequence.

MATH 545. Introduction to Abstract Algebra II. 4 Credits.

Theory of groups, rings, and fields. Polynomial rings, unique factorization, and Galois theory.

Prereq: MATH 544.

MATH 546. Introduction to Abstract Algebra III. 4 Credits.

Theory of groups, rings, and fields. Polynomial rings, unique factorization, and Galois theory.

Prereq: MATH 545.

MATH 556. Networks and Combinatorics. 4 Credits.

Fundamentals of modern combinatorics; graph theory; networks; trees; enumeration, generating functions, recursion, inclusion and exclusion; ordered sets, lattices, Boolean algebras.

MATH 561. Introduction to Mathematical Methods of Statistics I. 4 Credits.

Discrete and continuous probability models; useful distributions; applications of moment-generating functions; sample theory with applications to tests of hypotheses, point and confidence interval estimates. Sequence.

MATH 562. Introduction to Mathematical Methods of Statistics II. 4 Credits.

Discrete and continuous probability models; useful distributions; applications of moment-generating functions; sample theory with applications to tests of hypotheses, point and confidence interval estimates.

Prereq: MATH 561.

MATH 563. Mathematical Methods of Regression Analysis and Analysis of Variance. 4 Credits.

Multinomial distribution and chi-square tests of fit, simple and multiple linear regression, analysis of variance and covariance, methods of model selection and evaluation, use of statistical software.

Prereq: MATH 562.

MATH 567. Stochastic Processes. 4 Credits.

Basics of stochastic processes including Markov chains, martingales, Poisson processes, Brownian motion and their applications.

Prereq: MATH 561.

MATH 600M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

MATH 601. Research: [Topic]. 1-9 Credits.

Repeatable.

MATH 602. Supervised College Teaching. 1-16 Credits.

Repeatable.

MATH 603. Dissertation. 1-16 Credits.

Repeatable.

MATH 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

MATH 607. Seminar: [Topic]. 1-5 Credits.

Repeatable. Topics include Advanced Topics in Geometry, Ring Theory, Teaching Mathematics.

MATH 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

MATH 616. Real Analysis. 4-5 Credits.

Measure and integration theory, differentiation, and functional analysis with point-set topology as needed. Sequence.

MATH 617. Real Analysis. 4-5 Credits.

Measure and integration theory, differentiation, and functional analysis with point-set topology as needed. Sequence.

Prereq: MATH 616.

MATH 618. Real Analysis. 4-5 Credits.

Measure and integration theory, differentiation, and functional analysis with point-set topology as needed. Sequence.

Prereq: MATH 617.

MATH 619. Complex Analysis. 4-5 Credits.

The theory of Cauchy, power series, contour integration, entire functions, and related topics.

MATH 634. Algebraic Topology. 4-5 Credits.

Development of homotopy, homology, and cohomology with point-set topology as needed. Sequence.

MATH 635. Algebraic Topology. 4-5 Credits.

Development of homotopy, homology, and cohomology with point-set topology as needed. Sequence.

Prereq: MATH 634.

MATH 636. Algebraic Topology. 4-5 Credits.

Development of homotopy, homology, and cohomology with point-set topology as needed. Sequence.

Prereq: MATH 635.

MATH 637. Differential Geometry. 4-5 Credits.

Topics include curvature and torsion, Serret-Frenet formulas, theory of surfaces, differentiable manifolds, tensors, forms and integration. Sequence.

MATH 638. Differential Geometry. 4-5 Credits.

Topics include curvature and torsion, Serret-Frenet formulas, theory of surfaces, differentiable manifolds, tensors, forms and integration. Sequence.

Prereq: MATH 637.

MATH 639. Differential Geometry. 4-5 Credits.

Topics include curvature and torsion, Serret-Frenet formulas, theory of surfaces, differentiable manifolds, tensors, forms and integration. Sequence.

MATH 647. Abstract Algebra. 4-5 Credits.

Group theory, fields, Galois theory, algebraic numbers, matrices, rings, algebras. Sequence.

MATH 648. Abstract Algebra. 4-5 Credits.

Group theory, fields, Galois theory, algebraic numbers, matrices, rings, algebras. Sequence.

Prereq: MATH 647.

MATH 649. Abstract Algebra. 4-5 Credits.

Group theory, fields, Galois theory, algebraic numbers, matrices, rings, algebras. Sequence.

Prereq: MATH 648.

MATH 672. Theory of Probability. 4-5 Credits.

Measure and integration, probability spaces, laws of large numbers, central-limit theory, conditioning, martingales, random walks.

Prereq: MATH 671.

MATH 673. Theory of Probability. 4-5 Credits.

Measure and integration, probability spaces, laws of large numbers, central-limit theory, conditioning, martingales, random walks.

Prereq: MATH 672.

MATH 681. Advanced Algebra: [Topic]. 4-5 Credits.

Repeatable. Topics selected from theory of finite groups, representations of finite groups, Lie groups, Lie algebras, algebraic groups, ring theory, algebraic number theory.

MATH 682. Advanced Algebra: [Topic]. 4-5 Credits.

Repeatable. Topics selected from theory of finite groups, representations of finite groups, Lie groups, Lie algebras, algebraic groups, ring theory, algebraic number theory.

MATH 683. Advanced Algebra: [Topic]. 4-5 Credits.

Repeatable. Topics selected from theory of finite groups, representations of finite groups, Lie groups, Lie algebras, algebraic groups, ring theory, algebraic number theory.

MATH 684. Advanced Analysis: [Topic]. 4-5 Credits.

Repeatable. Topics selected from Banach algebras, operator theory, functional analysis, harmonic analysis on topological groups, theory of distributions.

MATH 685. Advanced Analysis: [Topic]. 4-5 Credits.

Repeatable. Topics selected from Banach algebras, operator theory, functional analysis, harmonic analysis on topological groups, theory of distributions.

MATH 686. Advanced Analysis: [Topic]. 4-5 Credits.

Repeatable. Topics selected from Banach algebras, operator theory, functional analysis, harmonic analysis on topological groups, theory of distributions.

MATH 690. Advanced Geometry and Topology: [Topic]. 4-5 Credits.

Repeatable. Topics selected from classical and local differential geometry; symmetric spaces; low-dimensional topology; differential topology; global analysis; homology, cohomology, and homotopy; differential analysis and singularity theory; knot theory.

MATH 691. Advanced Geometry and Topology: [Topic]. 4-5 Credits.

Repeatable. Topics selected from classical and local differential geometry; symmetric spaces; low-dimensional topology; differential topology; global analysis; homology, cohomology, and homotopy; differential analysis and singularity theory; knot theory.

MATH 692. Advanced Geometry and Topology: [Topic]. 4-5 Credits.

Repeatable. Topics selected from classical and local differential geometry; symmetric spaces; low-dimensional topology; differential topology; global analysis; homology, cohomology, and homotopy; differential analysis and singularity theory; knot theory.

Bachelor of Arts in Mathematics

The department offers undergraduate preparation for positions in government, business, and industry and for graduate work in mathematics and statistics. Each student's major program is individually constructed in consultation with an advisor.

Upper-division courses used to satisfy major requirements must be taken for letter grades, and only one D grade (D+ or D or D-) may be counted toward the upper-division requirement. At least 12 credits in upper-division mathematics courses must be taken in residence at the university.

Statistical Methods I (MATH 425) cannot be used to satisfy requirements for a mathematics major or minor.

To qualify for a bachelor's degree with a major in mathematics, a student must satisfy the requirements for one of three options: the standard track, pure mathematics, or secondary teaching. In each option, most courses require calculus as a prerequisite, and in each option some of the courses require satisfying the bridge requirement.

Bachelor of Arts: Standard Track

Code	Title	Credits
MATH 253	Calculus III	4
MATH 281–282	Several-Variable Calculus I-II	8
MATH 341–342	Elementary Linear Algebra	8
CS 122	Introduction to Programming and Problem Solving	4
Select one of the following sets of Bridge courses:		12
MATH 231–232 and two of MATH 201–206		
MATH 261–262 and two of MATH 201–206		
MATH 307 and four of MATH 201–206		
Select one of the following Fundamentals sequences:		8
MATH 316–317	Fundamentals of Analysis I-II	
MATH 347–348	Fundamentals of Number Theory I-II	

MATH 391–392	Fundamentals of Abstract Algebra I-II	
Select four of the following, including at least one two-term sequence: ²		16
MATH 316	Fundamentals of Analysis I	
MATH 317	Fundamentals of Analysis II	
MATH 320	Theory of Differential Equations	
MATH 343	Statistical Models and Methods ^{3, 4}	
MATH 345M	Probability and Statistics for Data Science ^{3, 4}	
DSCI 345M	Probability and Statistics for Data Science ^{3, 4}	
MATH 347	Fundamentals of Number Theory I	
MATH 348	Fundamentals of Number Theory II	
MATH 351	Elementary Numerical Analysis I	
MATH 352	Elementary Numerical Analysis II	
MATH 391	Fundamentals of Abstract Algebra I	
MATH 392	Fundamentals of Abstract Algebra II

¹ For students who have completed Calculus with Theory I-III (MATH 261–263) with grades of mid-C or better, the department will waive the requirement for Fundamentals of Analysis I-II (MATH 316–317).

Minor in Mathematics

The department offers undergraduate preparation for positions in government, business, and industry and for graduate work in mathematics and statistics. Each student's minor program is individually constructed in consultation with an advisor.

Minor Requirements

The minor is intended for any student, regardless of major, with a strong interest in mathematics. While students in such closely allied fields as computer science or physics often complete double majors, students with more distantly related majors such as psychology or history may find the minor useful.

The flexibility of the mathematics minor program allows each student, in consultation with a mathematics advisor, to tailor the program to his or her needs.

Code	Title	Credits
MATH courses at or above the 200-level ¹		30
15 upper-division MATH credits ^{2, 3}		

¹ Students cannot receive credit for Statistical Models and Methods (MATH 343), Probability and Statistics for Data Science (MATH 345M), or Probability and Statistics for Data Science (DSCI 345M) after completing Introduction to Mathematical Methods of Statistics II (MATH 462).

² Students may only count one of: Statistical Models and Methods (MATH 343), Probability and Statistics for Data Science (MATH 345M), Introduction to Mathematical Methods of Statistics II (MATH 462) toward the upper-division requirement for the minor.

³ Students may not use Statistical Methods I (MATH 425) toward the upper-division requirement for the minor.

To earn a minor in mathematics, a student must complete at least 30 credits in mathematics at the 200 level or higher, with at least 15 upper-division mathematics credits; Statistical Methods I (MATH 425) cannot be used toward the upper-division requirement. A minimum of 15 credits must be taken at the University of Oregon.

Only one D grade (D+ or D or D–) may be counted toward fulfilling the upper-division requirement. All upper-division courses must be taken for letter grades.

Master of Arts in Mathematics

The university offers graduate study in mathematics leading to the master of arts (MA), master of science (MS), and doctor of philosophy (PhD) degrees.

Master of Arts Degree Requirements

Code	Title	Credits
Option 1		
One 600-level sequence ¹		12-15
Select two of the following:		24
MATH 513–515	Introduction to Analysis I-III	
MATH 531–532 & MATH 533	Introduction to Topology and Introduction to Differential Geometry	
MATH 544–546	Introduction to Abstract Algebra I-III	
Option 2		
Two 600-level sequences ¹		24-30
Select one of the following:		12
MATH 513–515	Introduction to Analysis I-III	
MATH 531–532 & MATH 533	Introduction to Topology and Introduction to Differential Geometry	
MATH 544–546	Introduction to Abstract Algebra I-III	

¹ Excluding Reading and Conference: [Topic] (MATH 605)

Of the required 45 credits, 15 may be in graduate-level courses other than mathematics. Students should also have taken a three-term upper-division or graduate sequence in statistics, numerical analysis, computing, or other applied mathematics.

Master of Science in Mathematics

The university offers graduate study in mathematics leading to the master of arts (MA), master of science (MS), and doctor of philosophy (PhD) degrees.

Master of Science Degree Requirements

MATH 647 & MATH 648 & MATH 649	Abstract Algebra and Abstract Algebra and Abstract Algebra	
MATH 634 & MATH 635 & MATH 636	Algebraic Topology and Algebraic Topology and Algebraic Topology	
MATH 637 & MATH 638 & MATH 639	Differential Geometry and Differential Geometry and Differential Geometry	
MATH 616 & MATH 617 & MATH 618	Real Analysis and Real Analysis and Real Analysis	
MATH 616 & MATH 672 & MATH 673	Real Analysis and Theory of Probability and Theory of Probability	
MATH 607 & 607 & 607	Seminar: [Topic] and Seminar: [Topic] and Seminar: [Topic]	

Electives ²	9-15
Total Credit Requirement:	45

¹ At least 9 credits of 600 level mathematics courses

² Up to 15 credits can be taken outside of mathematics.

Doctor of Philosophy

Doctor of Philosophy

The PhD is a degree of distinction not to be conferred in routine fashion after completion of a specific number of courses or after attendance in Graduate School for a given number of years.

The department offers programs leading to the PhD degree in the areas of algebra, analysis, applied mathematics, combinatorics, geometry, mathematical physics, numerical analysis, probability, statistics, and topology. Advanced graduate courses in these areas are typically offered in Seminar: [Topic] (MATH 607). Each student, upon entering the graduate degree program in mathematics, reviews previous studies and objectives with the graduate advising committee. Based on this consultation, conditional admission to the master's degree program or the pre-PhD program is granted. A student in the pre-PhD program may also be a candidate for the master's degree.

Pre-PhD Program

To be admitted to the pre-PhD program, an entering graduate student must have completed a course of study equivalent to the graduate preparatory bachelor's degree program described above. Other students are placed in the master's degree program and may apply for admission to the pre-PhD program following a year of graduate study. Students in the pre-PhD program must take the qualifying examination by the beginning of their third year, during the week before classes begin fall term. It consists of examinations on two basic 600-level graduate course sequences, one each from two of the following three categories:

1. algebra
2. analysis and probability
3. topology and geometry

PhD Program

Admission to the PhD program is based on the following criteria:

- satisfactory performance on the qualifying examination
- completion of three courses at a level commensurate with study toward a PhD
- satisfactory performance in seminars or other courses taken as a part of the pre-PhD or PhD program.

Students who are not admitted to the PhD program because of unsatisfactory performance on the fall-term qualifying examination may retake the examination at the beginning of winter term.

A student in the PhD program is advanced to candidacy after passing a language examination and the comprehensive examination. To complete the requirements for the PhD, candidates must submit a dissertation, have it read and approved by a dissertation committee, and defend it orally in a formal public meeting.

Language Requirement

The department expects PhD candidates to be able to read mathematical material in a second language selected from French, German, and

Russian. Other languages are acceptable in certain fields. To fulfill the language requirement, the student must meet with a faculty member—a doctoral advisor or a member of the PhD committee—to obtain advice for a suitable paper or book. The paper or book should be written in French, German, or Russian and have mathematical material beneficial to the student's area of study. After reading, translating, and understanding the material, the student meets with the faculty member again. The faculty member determines whether the student understands the material. If satisfied, the faculty member deems the requirement met and the decision is added in writing to the student's record.

Comprehensive Examination

This oral examination emphasizes the basic material in the student's general area of interest. A student is expected to take this examination by the end of the second academic year in the PhD program. To be eligible to take this examination, a student must have completed the language examination and nearly all the course work needed for the PhD.

Dissertation

PhD candidates in mathematics must submit a dissertation containing substantial original work in mathematics. Requirements for final defense of the dissertation are those of the Graduate School.

Mathematics and Computer Science

Arkady Vaintrob and Christopher B. Wilson, Advisors

The undergraduate major in mathematics and computer science leads to a bachelor of arts or bachelor of science degree. The major combines elements of the mathematics and computer science curricula into a four-year program that offers an alternative to the undergraduate degree programs in either field. It serves students who want knowledge in both fields but are not ready to specialize in either. The courses selected for the program provide a solid foundation for professional work or for advanced study.

The program is designed to develop team players for information-based occupations. Its graduates have the tools to analyze complex problems and compute the answers to them. Consistent with its emphasis on teamwork and communication, the program requires college-level exposure to an additional scientific field and an upper-division writing course.

Students with strong mathematics backgrounds in high school are frequently advised to major in computer science at the university, often without a clear idea of what the field of study is actually like. The joint major program offers such students the chance to experiment with computer science while retaining the anchor to mathematics. It also allows students the possibility of changing easily to the single-major program in either mathematics or computer science with no loss of credit and, at least through the junior year, without jeopardizing degree completion in four years.

Careers

Graduates with this major can enter industrial positions that require computer science skills and mathematical problem-solving ability. They are particularly well suited for positions in the high-performance computing industry, developing the software tools for large-scale scientific computation. The combination of mathematics and computer science forms an excellent professional background for secondary-school

mathematics teachers, and the major program also provides a solid foundation for actuarial, financial, and related professions. Graduates are also prepared to enter advanced programs of study in either mathematics or computer science, or in applied areas such as biological computational science.

Preparation

A high school student planning to major in mathematics and computer science should pursue a strong academic program with four years of mathematics. Courses in algebra, geometry, trigonometry, and more advanced topics should be included. Experience preparing substantial written reports is highly desirable.

Transfer Students

College transfer students who have completed a year of calculus should be able to fit the remaining mathematics courses for the degree into just two years, provided that they have already completed the bulk of their general-education requirements before they transfer.

Transfer students should call or write to the Department of Computer Science to determine whether computer courses they have taken can be counted toward the joint major requirements. Sequential subjects such as mathematics and computer science typically require several years to progress from introductory to senior-level courses. The joint program lets students move forward in both fields at once with limited prerequisites, making it relatively accessible to transfer students and to students who change from other major programs. Students who want to pursue the material in greater depth need to consider prerequisite paths carefully.

Students attending community college in Oregon are encouraged to obtain the Associate of Arts Oregon Transfer degree or the Associate of Science-Computer Science Transfer degree before entering the University of Oregon. While earning this degree, community college transfer students should take as much discrete mathematics, calculus, and computer science as possible, and also try to complete the science requirement for the major. The associate degree does not automatically satisfy the science requirement for this major.

Faculties and Facilities

The faculties and facilities in both the mathematics and the computer science departments are available to students in the combined major program. For detailed descriptions, see those sections of this catalog. Information is also available online.

Honors Program

Both of the cooperating departments offer departmental honors programs to their undergraduate majors. After obtaining advance approval from both of their advisors, students in the joint degree program are eligible to attain honors in mathematics and computer science by meeting the honors requirements of either department, including writing a thesis.

Preparation for Kindergarten through Secondary School Teaching Careers

The College of Education offers a fifth-year program for middle-secondary licensure in mathematics and for elementary teaching. More information is available from the mathematics department's advisors; see also the **College of Education** section of this catalog.

Minor

Minors are offered by the Department of Mathematics and the Department of Computer Science. There is no joint minor in mathematics and computer science.

- Bachelor of Arts
- Bachelor of Science

Undergraduate Studies

Bachelor of Arts Degree Requirements

To earn a bachelor of arts (BA) in mathematics and computer science (MACS), majors must complete the requirements for a bachelor of science (BS) and also demonstrate proficiency in a second language.

The requirements for the MACS major fall into four categories: mathematics, computer science, writing, and science, with 44 credits taken in mathematics, 40 credits in computer science, and 16 credits (science and writing) in other departments.

Computer Science I (CS 210), Computer Science II (CS 211), Computer Science III (CS 212), Elements of Discrete Mathematics I (MATH 231), and Elements of Discrete Mathematics II (MATH 232) must be passed with grades of B– or better before students can take the upper-division core courses. Courses required for the major must be taken for a letter grade. Upper-division courses must be passed with a grade of C– or better.

Code	Title	Credits
Core Courses

Total Credits **96**

¹ Excludes Statistical Methods I-II (MATH 425–426)

² Special Studies: [Topic] (CS 399) and Experimental Course: [Topic] (CS 410) courses used as electives must have a prerequisite of Intermediate Data Structures (CS 313) and have regular class meetings and homework assignments. At least one course must be numbered 410 or above.

³ Students are encouraged to complete the accompanying lab courses.

Additional Bachelor Requirements

Students must earn no grade below a B– in required lower-division mathematics and computer science courses—Computer Science I (CS 210), Computer Science II (CS 211), Computer Science III (CS 212), Elements of Discrete Mathematics I (MATH 231), Elements of Discrete Mathematics II (MATH 232)—for automatic advancement to upper-division computer science courses. At least 12 of the mathematics upper-division credits applied to the degree must be taken in residence at the university. The science courses may be taken pass/no pass (P/N) or for letter grades.

Advising and Program Planning

Since both mathematics and computer science are sequential subjects, it is especially important that a student planning for this combined major consult closely with an advisor to develop a degree plan.

Programming Experience

Students who take Computer Science I (CS 210) are expected to have completed Elementary Functions (MATH 112) or the equivalent.

Students who do not have the required mathematical background are strongly encouraged to take one or more introduction to programming courses such as Introduction to Programming and Problem Solving (CS 122) along with their math preparation courses. Students who are

unsure about their level of preparation for CS 210 should meet with an advisor.

Sequence of Courses

Elements of Discrete Mathematics I-II (MATH 231–232) and Computer Science I-III (CS 210–212) go well together, as do calculus and physics. Students with advanced placement credit in calculus may want to take Elements of Discrete Mathematics I-II (MATH 231–232) and Computer Science I-III (CS 210–212) in the freshman year. Students with no programming experience may prefer to take Introduction to Programming and Problem Solving (CS 122), Calculus I-III (MATH 251–253), and the major science requirement in the freshman year. In the sophomore year, students should take whichever of calculus or computer science was not taken freshman year, and continue into the 300 level of the branch that was taken.

Major Progress Review and Major in Good Standing

Each major must meet with a CS advisor to file a Major Progress Review form after completing 12 credits of the upper-division core, including at least one course from each department. Mathematics and computer science courses and at least 8 credits of upper-division CS courses used to satisfy upper-division major requirements must be taken for letter grades and passed with grades of C– or better. At least 12 of the upper-division mathematics credits and 12 of the upper-division computer science credits applied to the degree must be taken in residence at the university. A student who receives two grades below C– in the upper-division core or three grades below C– in any upper-division courses may be removed from the major.

Code	Title	Credits

Computer Science Courses

CS 102. Fundamentals of Computer and Information Security. 4 Credits.

This course introduces fundamental concepts, terminologies, principles, methods, and scenarios of computer and information security.

CS 110. Fluency with Information Technology. 4 Credits.

Introduction to information technology (IT), the study of computer-based information systems. Basics of the Internet and World Wide Web. Students create websites using XHTML and CSS.

CS 111. Introduction to Web Programming. 4 Credits.

Project-based approach to learning computer programming by building interactive web pages using JavaScript and XHTML. Programming concepts including structured and object-oriented program design. CS 110 recommended preparation.

Prereq: MATH 101 or equivalent.

CS 122. Introduction to Programming and Problem Solving. 4 Credits.

Computational problem solving, algorithm design, data structures, and programming using a multi-paradigm programming language. Introduces techniques for program design, testing, and debugging.

Prereq: MATH 101 or equivalent.

CS 196. Field Studies: [Topic]. 1-2 Credits.

Repeatable.

CS 198. Workshop: [Topic]. 1-2 Credits.

Repeatable.

CS 199. Special Studies in Computer Science: [Topic]. 1-5 Credits.

Repeatable.

CS 199L. Special Studies in Computer Science: [Topic]. 1-5 Credits.

Repeatable.

CS 210. Computer Science I. 4 Credits.

Basic concepts and practices of computer science. Topics include algorithmic problem solving, levels of abstraction, object-oriented design and programming, software organization, analysis of algorithm and data structures. Sequence with CS 211, CS 212.

Prereq: MATH 112. Prior programming experience strongly encouraged.

CS 211. Computer Science II. 4 Credits.

Basic concepts and practices of computer science. Topics include algorithmic problem solving, levels of abstraction, object-oriented design and programming, software organization, analysis of algorithm and data structures. Sequence with CS 210, CS 212.

Prereq: CS 210.

CS 212. Computer Science III. 4 Credits.

Basic concepts and practices of computer science. Topics include algorithmic problem solving, levels of abstraction, object-oriented design and programming, software organization, analysis of algorithm and data structures. Sequence with CS 210, CS 211.

Prereq: CS 211.

CS 313. Intermediate Data Structures. 4 Credits.

Design and analysis of data structures as means of engineering efficient software; attention to data abstraction and encapsulation. Lists, trees, heaps, stacks, queues, dictionaries, priority queues.

Prereq: CS 210, CS 211, CS 212, MATH 231, MATH 232 with grades of B- or better.

CS 314. Computer Organization. 4 Credits.

Introduction to computer organization and instruction-set architecture -- digital logic design, binary arithmetic, design of central processing unit and memory, machine-level programming.

Prereq: CS 210, CS 211, CS 212 with grades of B- or better.

CS 315. Intermediate Algorithms. 4 Credits.

Algorithm design, worst-case and average-behavior analysis, correctness, computational complexity.

Prereq: CS 313.

CS 322. Introduction to Software Engineering. 4 Credits.

A project-intensive introduction to software engineering intended to build skills, knowledge, and habits of mind that prepare students for 400-level computer science courses, internships, and other software.

Prereq: CS 210, CS 211, CS 212 with grades of B- or better.

CS 330. C/C++ and Unix. 4 Credits.

Practical software design and programming activities in a C/C++ and Unix environment, with emphasis on the details of C/C++ and good programming style and practices.

Prereq: CS 314.

CS 333. Applied Cryptography. 4 Credits.

This course provides a systematic study of cryptography and its application. It covers cryptographic algorithms, including symmetric-key cryptography, public-key cryptography, cryptanalysis, cryptographic hash functions, and their usage toward message authentication codes, digital signatures, key management and distribution, and user authentication protocols.

Prereq: CS 212.

CS 372M. Machine Learning for Data Science. 4 Credits.

Introduction to Machine Learning, with an emphasis on topics relevant for data science. Multilisted with DSCI 372M.

Prereq: CS 212, DSCI 345M, MATH 342.

CS 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable when the topic changes.

CS 400M. Temporary Multilisted Course. 1-5 Credits.

Repeatable

CS 401. Research: [Topic]. 1-16 Credits.

Repeatable.

Prereq: CS 313.

CS 402. Supervised College Teaching. 1-2 Credits.

Repeatable.

Prereq: CS 313.

CS 403. Thesis. 1-12 Credits.

Repeatable.

Prereq: CS 313.

CS 404. Internship; [Topic]. 1-4 Credits.

Repeatable.

Prereq: CS 313.

CS 405. Reading and Conference: [Topic]. 1-12 Credits.

Repeatable up to five times.

Prereq: CS 313.

CS 406. Practicum: [Topic]. 1-2 Credits.

Supervised consulting. Students provide learning assistance in computer science courses. Repeatable for a maximum of 4 credits.

Prereq: CS 313.

CS 407. Seminar: [Topic]. 1-5 Credits.

Repeatable when the topic changes. Opportunity to study in greater depth specific topics arising out of other courses.

Prereq: CS 313.

CS 408. Workshop: [Topic]. 1-21 Credits.

Repeatable.

Prereq: CS 313.

CS 409. Terminal Project. 1-12 Credits.

Repeatable.

Prereq: CS 313.

CS 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable when the topic changes.

CS 413. Advanced Data Structures. 4 Credits.

Complex structures, storage management, sorting and searching, hashing, storage of texts, and information compression.

Prereq: CS 315.

CS 415. Operating Systems. 4 Credits.

Principles of operating system design. Process and memory management, concurrency, scheduling, input-output and file systems, security.

Prereq: CS 330.

CS 420. Automata Theory. 4 Credits.

Provides a mathematical basis for computability and complexity.

Models of computation, formal languages, Turing machines, solvability. Nondeterminism and complexity classes.

Prereq: CS 315.

CS 422. Software Methodology I. 4 Credits.

Technical and nontechnical aspects of software development, including specification, planning, design, development, management and maintenance of software projects. Student teams complete projects.

Prereq: CS 313.

CS 423. Software Methodology II. 4 Credits.

Application of concepts and methodologies covered in CS 422/CS 522.

Student teams complete a large system design and programming project. Final system specification, test plan, user documentation, and system walk throughs.

Prereq: CS 422 with a grade of B- or better.

CS 425. Principles of Programming Languages. 4 Credits.

Syntax and semantics. Scope rules, environments, stores, denoted and expressed values, procedures, and parameters. Definitional interpreters. Types, overloading, parametric polymorphism, and inheritance. Varieties of abstraction.

Prereq: CS 315.

CS 429. Computer Architecture. 4 Credits.

RISC (reduced instruction-set computer) and CISC (complex instruction-set computer) design, storage hierarchies, high-performance processor design, pipelining, vector processing, networks, performance analysis.

Prereq: CS 313, CS 314, CS 330.

CS 431. Introduction to Parallel Computing. 4 Credits.

Parallel architecture, theory, algorithms, and programming with emphasis on parallel programming, focusing on models, languages, libraries, and runtime systems.

Prereq: CS 330.

CS 432. Introduction to Networks. 4 Credits.

Principles of computer network design. Link technologies, packet switching, routing, inter-networking, reliability. Internet protocols. Programming assignments focus on protocol design.
Prereq: CS 330. CS 415 recommended.

CS 433. Computer and Network Security. 4 Credits.

Security for various aspects of computers and networks. Elementary cryptography, program security, trusted operating systems, network security, privacy, and legal and ethical issues.
Prereq: CS 415.

CS 434. Computer and Network Security II. 4 Credits.

This course covers security threats and solutions for distributed systems and networks, particularly the Internet, the Internet of Things, and distributed systems based on them.
Prereq: CS 432, CS 433.

CS 436. Secure Software Development. 4 Credits.

This course establishes a foundation for applying security principles to the lifecycle of software development in order to minimize software vulnerabilities and counter cyber threats.
Prereq: CS 330.

CS 441. Introduction to Computer Graphics. 4 Credits.

Introduction to the hardware, geometrical transforms, interaction techniques, and shape representation schemes that are important in interactive computer graphics. Programming assignments using contemporary graphics hardware and software systems.
Prereq: CS 330.

CS 443. User Interfaces. 4 Credits.

Introduction to user interface software engineering. Emphasis on theory of interface design, understanding the behavior of the user, and implementing programs on advanced systems.
Prereq: CS 313.

CS 445. Modeling and Simulation. 4 Credits.

Theoretical foundations and practical problems for the modeling and computer simulation of discrete and continuous systems. Simulation languages, empirical validation, applications in computer science.
Prereq: CS 315, CS 330.

CS 451. Database Processing. 4 Credits.

Fundamental concepts of DBMS. Data modeling, relational models and normal forms. File organization and index structures. SQL, embedded SQL, and concurrency control.
Prereq: CS 313, CS 314.

CS 453. Data Mining. 4 Credits.

Databases, machine learning, artificial intelligence, statistics, and data visualization. Examines data warehouses, data preprocessing, association and classification rule mining, and cluster analysis.
Prereq: CS 451/CS 551.

CS 461. Introduction to Compilers. 4 Credits.

Lexical analysis, parsing, attribution, code generation.
Prereq: CS 314, CS 425. CS 420 strongly recommended.

CS 471. Introduction to Artificial Intelligence. 4 Credits.

Basic themes, issues, and techniques of artificial intelligence, including agent architecture, knowledge representation and reasoning, problem solving and planning, game playing, and learning.
Prereq: CS 315.

CS 472. Machine Learning. 4 Credits.

A broad introduction to machine learning and its established algorithms. Topics include concept learning, decision trees, neural network.
Prereq: CS 315.

CS 473. Probabilistic Methods for Artificial Intelligence. 4 Credits.

Fundamental techniques for representing problems as probability distributions, performing inference, and learning from data. Topics include Bayesian and Markov networks, variable elimination, loopy belief propagation, and parameter.
Prereq: CS 315.

CS 500M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

CS 503. Thesis. 1-16 Credits.

Repeatable.

CS 507. Seminar: [Topic]. 1-5 Credits.

Repeatable. Opportunity to study in greater depth specific topics arising out of other courses.

CS 508. Workshop: [Topic]. 1-21 Credits.

Repeatable.

CS 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

CS 513. Advanced Data Structures. 4 Credits.

Complex structures, storage management, sorting and searching, hashing, storage of texts, and information compression.

CS 520. Automata Theory. 4 Credits.

Provides a mathematical basis for computability and complexity. Models of computation, formal languages, Turing machines, solvability. Nondeterminism and complexity classes.

CS 522. Software Methodology I. 4 Credits.

Technical and nontechnical aspects of software development, including specification, planning, design, development, management and maintenance of software projects. Student teams complete projects.

CS 523. Software Methodology II. 4 Credits.

Student teams complete a large system design and programming project. Final system specifications, test plan, user documentation, and system walk-through.
Prereq: CS 522.

CS 529. Computer Architecture. 4 Credits.

RISC (reduced instruction-set computer) and CISC (complex instruction-set computer) design, storage hierarchies, high-performance processor design, pipelining, vector processing, networks, performance analysis.

CS 531. Introduction to Parallel Computing. 4 Credits.

Parallel architecture, theory, algorithms, and programming with emphasis on parallel programming, focusing on models, languages, libraries, and runtime systems.

CS 532. Introduction to Networks. 4 Credits.

Principles of computer network design. Link technologies, packet switching, routing, inter-networking, reliability. Internet protocols. Programming assignments focus on protocol design.

CS 533. Computer and Network Security. 4 Credits.

Security for various aspects of computers and networks. Elementary cryptography, program security, trusted operating systems, network security, privacy, and legal and ethical issues.

CS 534. Computer and Network Security II. 1-4 Credits.

This course covers security threats and solutions for distributed systems and networks, particularly the Internet, the Internet of Things, and distributed systems based on them.

Prereq: CS 532, CS 533.

CS 536. Secure Software Development. 4 Credits.

This course establishes a foundation for applying security principles to the lifecycle of software development in order to minimize software vulnerabilities and counter cyber threats.

CS 541. Introduction to Computer Graphics. 4 Credits.

Introduction to the hardware, geometrical transforms, interaction techniques, and shape representation schemes that are important in interactive computer graphics. Programming assignments using contemporary graphics hardware and software systems.

CS 543. User Interfaces. 4 Credits.

Introduction to user interface software engineering. Emphasis on theory of interface design, understanding the behavior of the user, and implementing programs on advanced systems.

CS 545. Modeling and Simulation. 4 Credits.

Theoretical foundations and practical problems for the modeling and computer simulation of discrete and continuous systems. Simulation languages, empirical validation, applications in computer science.

CS 551. Database Processing. 4 Credits.

Fundamental concepts of DBMS. Data modeling, relational models and normal forms. File organization and index structures. SQL, embedded SQL, and concurrency control.

CS 553. Data Mining. 4 Credits.

Databases, machine learning, artificial intelligence, statistics, and data visualization. Examines data warehouses, data preprocessing, association and classification rule mining, and cluster analysis.

Prereq: CS 551.

CS 561. Introduction to Compilers. 4 Credits.

Lexical analysis, parsing, attribution, code generation.

Prereq: CS 314 or equivalent. CS 520 strongly recommended.

CS 571. Introduction to Artificial Intelligence. 4 Credits.

Basic themes, issues, and techniques of artificial intelligence, including agent architecture, knowledge representation and reasoning, problem solving and planning, game playing, and learning.

CS 572. Machine Learning. 4 Credits.

A broad introduction to machine learning and its established algorithms. Topics include concept learning, decision trees, neural network.

CS 573. Probabilistic Methods for Artificial Intelligence. 4 Credits.

Fundamental techniques for representing problems as probability distributions, performing inference, and learning from data. Topics include Bayesian and Markov networks, variable elimination, loopy belief propagation, and parameter.

CS 601. Research: [Topic]. 1-16 Credits.

Repeatable.

CS 602. Supervised College Teaching. 1-5 Credits.

Repeatable.

CS 603. Dissertation. 1-16 Credits.

Repeatable.

CS 604. Internship: [Topic]. 1-4 Credits.

Repeatable.

CS 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

CS 606. Field Studies: [Topic]. 1-16 Credits.

Repeatable.

CS 607. Seminar: [Topic]. 1-5 Credits.

Repeatable. Research topics are presented.

CS 608. Workshop: [Topic]. 1-16 Credits.

Repeatable.

CS 609. Terminal Project. 1-16 Credits.

Repeatable. Final project for master's degree without thesis.

CS 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

CS 621. Algorithms and Complexity. 4 Credits.

Design and analysis of algorithms, strategies for efficient algorithms, introduction to complexity theory including NP-completeness.

Prereq: CS 520 recommended.

CS 624. Structure of Programming Languages. 4 Credits.

Introduction to axiomatic, operational, and denotational semantics. Environments, stores, and continuations. Type theory, subtypes, polymorphism, and inheritance. Functional and logic programming.

CS 630. Distributed Systems. 4 Credits.

Principles of distributed computer systems: interprocess communication, distributed file systems, distributed timing and synchronization, distributed programming, transactions, process scheduling, distributed shared memory.

Prereq: CS 529.

CS 631. Parallel Processing. 4 Credits.

Advanced topics in parallel processing including massively parallel computer architecture, supercomputers, parallelizing compiler technology, performance evaluation, parallel programming languages, parallel applications.

Prereq: CS 529.

CS 632. Computer Networks. 4 Credits.

Advanced issues in computer networks, focusing on research to extend the services offered by the Internet.

Prereq: CS 532.

CS 633. Advanced Network Security. 4 Credits.

Classic and state-of-the-art research topics in network security; threats and attacks, defense algorithms and mechanisms, measurement and evaluation of both security problems and solutions. Offered alternate years.

Prereq: CS 533.

CS 640. Writing in Computer Research. 2 Credits.

Students learn to provide and accept constructive criticism of writing samples in a workshop format.

CS 670. Data Science. 4 Credits.

Data science is the development of methods to study large and complex data sets. Methods that scale to very large data sets are of particular interest. This course introduces state-of-art data science methods focused on processing very large data sets of real-world data.

Prereq: CS 551.

Mathematics Courses

MATH 099. Special Studies: [Topic]. 1-2 Credits.

Credit for enrollment (eligibility) but not for graduation; satisfies no university or college requirement. Repeatable.

MATH 101. Foundations of Algebra and Mathematical Modeling. 4 Credits.

Critical elements of pre-college algebra, topics including equation solving; rational, radical, and polynomial expression evaluation and simplification; lines, linear equations, and quadratic equations. Focus on mathematical modeling and preparation for additional college level mathematics. Prereq: UO Math Placement Exam with a score of 35-48.

MATH 105. University Mathematics I. 4 Credits.

Topics include logic, sets and counting, probability, and statistics. Instructors may include historical context of selected topics and applications to finance and biology. Prereq: MATH 101 or satisfactory placement test score.

MATH 106. University Mathematics II. 4 Credits.

Topics include mathematics of finance, applied geometry, exponential growth and decay, and a nontechnical introduction to the concepts of calculus. Prereq: MATH 101 or satisfactory placement test score.

MATH 107. University Mathematics III. 4 Credits.

Topics chosen from modular arithmetic and coding, tilings and symmetry, voting methods, apportionment, fair division, introductory graph theory, or scheduling. Prereq: MATH 101 or satisfactory placement test score.

MATH 111. College Algebra. 4 Credits.

Algebra needed for calculus including graph sketching, algebra of functions, polynomial functions, rational functions, exponential and logarithmic functions, linear and nonlinear functions. Prereq: MATH 101 or satisfactory placement test score.

MATH 112. Elementary Functions. 4 Credits.

Exponential, logarithmic, and trigonometric functions. Intended as preparation for MATH 251. Prereq: MATH 111 or satisfactory placement test score.

MATH 199. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

MATH 201. Algebra Math Lab. 2 Credits.

Exploratory course in mathematics. Course focuses on techniques of mathematical exploration and discovery, the language of mathematics, and foundational issues. Topics from algebra.

MATH 202. Geometry Math Lab. 2 Credits.

Exploratory course in mathematics. Course focuses on techniques of mathematical exploration and discovery, the language of mathematics, and foundational issues. Topics from geometry.

MATH 203. Analysis and Number Theory Math Lab. 2 Credits.

Exploratory course in mathematics. Course focuses on techniques of mathematical exploration and discovery, the language of mathematics, and foundational issues. Topics from analysis and the theory of numbers.

MATH 204. Probability and Statistics Math Lab. 2 Credits.

Exploratory course in mathematics. Course focuses on techniques of mathematical exploration and discovery, the language of mathematics, and foundational issues. Topics from probability and statistics.

MATH 205. Foundations Math Lab. 2 Credits.

Exploratory course in mathematics. Course focuses on techniques of mathematical exploration and discovery, the language of mathematics, and foundational issues. Topics from the foundations of mathematics.

MATH 206. Combinatorics Math Lab. 2 Credits.

Exploratory course in mathematics. Course focuses on techniques of mathematical exploration and discovery, the language of mathematics, and foundational issues. Topics from combinatorics.

MATH 211. Fundamentals of Elementary Mathematics I. 4 Credits.

Structure of the number system, logical thinking, topics in geometry, simple functions, and basic statistics and probability. Calculators, concrete materials, and problem solving are used when appropriate. Covers the mathematics needed to teach grades K–8. Sequence. Prereq: MATH 101, MATH 111, or satisfactory placement score.

MATH 212. Fundamentals of Elementary Mathematics II. 4 Credits.

Structure of the number system, logical thinking, topics in geometry, simple functions, and basic statistics and probability. Calculators, concrete materials, and problem solving are used when appropriate. Covers the mathematics needed to teach grades K–8. Sequence. Prereq: MATH 211, C- or better.

MATH 213. Fundamentals of Elementary Mathematics III. 4 Credits.

Structure of the number system, logical thinking, topics in geometry, simple functions, and basic statistics and probability. Calculators, concrete materials, and problem solving are used when appropriate. Covers the mathematics needed to teach grades K–8. Sequence. Prereq: MATH 212, C- or better.

MATH 231. Elements of Discrete Mathematics I. 4 Credits.

Sets, mathematical logic, induction, sequences, and functions. Sequence. Prereq: MATH 112 or satisfactory placement test score.

MATH 232. Elements of Discrete Mathematics II. 4 Credits.

Relations, theory of graphs and trees with applications, permutations and combinations. Prereq: MATH 231.

MATH 241. Calculus for Business and Social Science I. 4 Credits.

Introduction to topics in differential and integral calculus including some aspects of the calculus of several variables. Sequence. Students cannot receive credit for more than one of MATH 241, MATH 246, MATH 251. Prereq: MATH 111 or satisfactory placement test score; a programmable calculator capable of displaying function graphs.

MATH 242. Calculus for Business and Social Science II. 4 Credits.

Introduction to topics in differential and integral calculus including some aspects of the calculus of several variables. Students cannot receive credit for more than one of MATH 242, MATH 247, MATH 252. Prereq: MATH 241.

MATH 243. Introduction to Methods of Probability and Statistics. 4 Credits.

Discrete and continuous probability, data description and analysis, sampling distributions, emphasizes confidence intervals and hypothesis testing. Students cannot receive credit for both MATH 243 and MATH 425. Prereq: MATH 101 or satisfactory placement test score; MATH 111 recommended; a programmable calculator capable of displaying function graphs.

MATH 246. Calculus for the Biological Sciences I. 4 Credits.

For students in biological science and related fields. Emphasizes modeling and applications to biology. Differential calculus and applications. Sequence. Students cannot receive credit for more than one of MATH 241, MATH 246, MATH 251. Prereq: MATH 112 or satisfactory placement test score.

MATH 247. Calculus for the Biological Sciences II. 4 Credits.

For students in biological science and related fields. Emphasizes modeling and applications to biology. Integral calculus and applications. Students cannot receive credit for more than one of MATH 242, MATH 247, MATH 252. Prereq: MATH 246.

MATH 251. Calculus I. 4 Credits.

Standard sequence for students of physical and social sciences and of mathematics. Differential calculus and applications. Sequence. Students cannot receive credit for more than one of MATH 241, MATH 246, MATH 251.

Prereq: MATH 112 or satisfactory placement test score.

MATH 252. Calculus II. 4 Credits.

Standard sequence for students of physical and social sciences and of mathematics. Integral calculus. Sequence. Students cannot receive credit for more than one of MATH 242, MATH 247, MATH 252.

Prereq: MATH 251.

MATH 253. Calculus III. 4 Credits.

Standard sequence for students of physical and social sciences and of mathematics. Introduction to improper integrals, infinite sequences and series, Taylor series, and differential equations. Sequence.

Prereq: MATH 252.

MATH 256. Introduction to Differential Equations. 4 Credits.

Introduction to differential equations and applications. Linear algebra is introduced as needed.

Prereq: MATH 253.

MATH 261. Calculus with Theory I. 4 Credits.

Covers both applications of calculus and its theoretical background. Axiomatic treatment of the real numbers, limits, and the least upper bound property.

MATH 262. Calculus with Theory II. 4 Credits.

Covers both applications of calculus and its theoretical background. Differential and integral calculus.

Prereq: MATH 261.

MATH 263. Calculus with Theory III. 4 Credits.

Covers both applications of calculus and its theoretical background. Sequences and series, Taylor's theorem.

Prereq: MATH 262.

MATH 281. Several-Variable Calculus I. 4 Credits.

Introduction to calculus of functions of several variables including partial differentiation; gradient, divergence, and curl; line and surface integrals; Green's and Stokes's theorems. Linear algebra introduced as needed. Sequence.

Prereq: MATH 253.

MATH 282. Several-Variable Calculus II. 4 Credits.

Introduction to calculus of functions of several variables including partial differentiation; gradient, divergence, and curl; line and surface integrals; Green's and Stokes's theorems. Linear algebra introduced as needed.

Prereq: MATH 281.

MATH 307. Introduction to Proof. 4 Credits.

Proof is how mathematics establishes truth and communicates ideas. Introduces students to proof in the context of interesting mathematical problems. Students cannot receive credit for both PHIL 225 and MATH 307.

Prereq: MATH 247 or MATH 252 or MATH 262.

MATH 316. Fundamentals of Analysis I. 4 Credits.

Rigorous treatment of topics introduced in calculus such as limits, sequences, series, the Cauchy condition, and continuity. Development of mathematical proof in these contexts. Sequence with MATH 317.

Prereq: MATH 253 or equivalent; one from MATH 232, MATH 262, MATH 307.

MATH 317. Fundamentals of Analysis II. 4 Credits.

Rigorous treatment of topics introduced in calculus such as continuity, uniform convergence, power series, differentiation, and integration. Development of mathematical proof in these contexts. Sequence with MATH 316.

Prereq: MATH 316.

MATH 320. Theory of Differential Equations. 4 Credits.

An introduction to differential equations for students with background in linear algebra, with a mixture of applications and theory. Topics include linear and nonlinear equations, systems of equations, and questions of existence and uniqueness.

Prereq: MATH 281, MATH 342; one from MATH 232, MATH 262, MATH 307.

MATH 341. Elementary Linear Algebra. 4 Credits.

Vector and matrix algebra; n-dimensional vector spaces; systems of linear equations; linear independence and dimension; linear transformations; rank and nullity; determinants; eigenvalues; inner product spaces; theory of a single linear transformation. Sequence.

Prereq: MATH 252. MATH 253 is recommended.

MATH 342. Elementary Linear Algebra. 4 Credits.

Vector and matrix algebra; n-dimensional vector spaces; systems of linear equations; linear independence and dimension; linear transformations; rank and nullity; determinants; eigenvalues; inner product spaces; theory of a single linear transformation.

Prereq: MATH 341.

MATH 343. Statistical Models and Methods. 4 Credits.

Review of theory and applications of mathematical statistics including estimation and hypothesis testing. Students cannot get credit for both MATH 343 and DSCI 345M/MATH 345M.

Prereq: MATH 252.

MATH 345M. Probability and Statistics for Data Science. 4 Credits.

Introduction to probability and statistics, with an emphasis upon topics relevant for data science. Multilisted with DSCI 345M. Students cannot get credit for both MATH 343 and DSCI 345M/MATH 345M.

Prereq: MATH 342, CS 211.

MATH 347. Fundamentals of Number Theory I. 4 Credits.

A study of congruences, the Chinese remainder theorem, the theory of prime numbers and divisors, Diophantine equations, and quadratic reciprocity. Development of mathematical proof in these contexts.

Sequence with MATH 348.

Prereq: MATH 253 or equivalent; one from MATH 232, MATH 262, MATH 307.

MATH 348. Fundamentals of Number Theory II. 4 Credits.

Study of nonlinear Diophantine equations, sums of squares, the theory of partitions, geometric number theory, and the distribution of prime numbers. Development of mathematical proof in these contexts.

Sequence with MATH 347.

Prereq: MATH 347.

MATH 351. Elementary Numerical Analysis I. 4 Credits.

Basic techniques of numerical analysis and their use on computers. Topics include root approximation, linear systems, interpolation, integration, and differential equations. Sequence.

Prereq: MATH 253 or equivalent; one from MATH 232, MATH 262, MATH 307.

MATH 352. Elementary Numerical Analysis II. 4 Credits.

Basic techniques of numerical analysis and their use on computers.

Topics include root approximation, linear systems, interpolation, integration, and differential equations.

Prereq: MATH 351.

MATH 391. Fundamentals of Abstract Algebra I. 4 Credits.

Introduction to algebraic structures including groups, rings, fields, and polynomial rings. Sequence.

Prereq: MATH 341; one from MATH 232, MATH 262, MATH 307.

MATH 392. Fundamentals of Abstract Algebra II. 4 Credits.

Introduction to algebraic structures including groups, rings, fields, and polynomial rings.

Prereq: MATH 391.

MATH 394. Geometries from an Advanced Viewpoint I. 4 Credits.

Topics in Euclidean geometry in two and three dimensions including constructions. Emphasizes investigations, proofs, and challenging problems. For prospective secondary and middle school teachers.

Prereq: MATH 253 or equivalent; one from MATH 232, MATH 262, MATH 307.

MATH 395. Geometries from an Advanced Viewpoint II. 4 Credits.

Analysis of problems in Euclidean geometry using coordinates, vectors, and the synthetic approach. Transformations in the plane and space and their groups. Introduction to non-Euclidean geometries. For prospective secondary teachers.

Prereq: grade of C- or better in MATH 394.

MATH 397. History and Applications of Calculus. 4 Credits.

Historical applications of calculus. Topics may include volumes by the method of exhaustion, Archimedean spiral, Kepler problem, calculus of variations, brachistochrone problem, spread of infectious disease, analysis of savings.

Prereq: MATH 253; one from MATH 232, MATH 262, MATH 307.

MATH 399. Special Studies: [Topic]. 1-5 Credits.

Repeatable.

MATH 401. Research: [Topic]. 1-21 Credits.

Repeatable.

MATH 403. Thesis. 1-4 Credits.

Repeatable.

MATH 405. Reading and Conference: [Topic]. 1-4 Credits.

Repeatable.

MATH 407. Seminar: [Topic]. 1-4 Credits.

Repeatable.

MATH 410. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

MATH 411. Functions of a Complex Variable I. 4 Credits.

Complex numbers, linear fractional transformations, Cauchy-Riemann equations, Cauchy's theorem and applications, power series, residue theorem, harmonic functions, contour integration, conformal mapping, infinite products. Sequence.

Prereq: MATH 281; one from MATH 232, MATH 262, MATH 307.

MATH 412. Functions of a Complex Variable II. 4 Credits.

Complex numbers, linear fractional transformations, Cauchy-Riemann equations, Cauchy's theorem and applications, power series, residue theorem, harmonic functions, contour integration, conformal mapping, infinite products.

Prereq: MATH 411.

MATH 413. Introduction to Analysis I. 4 Credits.

Differentiation and integration on the real line and in a dimensional Euclidean space; normed linear spaces and metric spaces; vector field theory and differential forms. Sequence.

Prereq: MATH 282, MATH 317.

MATH 414. Introduction to Analysis II. 4 Credits.

Differentiation and integration on the real line and in a dimensional Euclidean space; normed linear spaces and metric spaces; vector field theory and differential forms.

Prereq: MATH 413.

MATH 415. Introduction to Analysis III. 4 Credits.

Differentiation and integration on the real line and in a dimensional Euclidean space; normed linear spaces and metric spaces; vector field theory and differential forms. Sequence.

Prereq: MATH 414.

MATH 421M. Partial Differential Equations: Fourier Analysis I. 4 Credits.

Introduction to PDEs with a view towards applications in physics. Wave and heat equations, classical Fourier series on the circle, Bessel and Legendre series. Multilisted with PHYS 421M.

Prereq: MATH 253; one from MATH 256, MATH 281.

MATH 422. Partial Differential Equations: Fourier Analysis II. 4 Credits.

General theory of PDEs; the Fourier transform. Laplace and Poisson equations; Green's functions and application. Mean value theorem and max-min principle.

Prereq: MATH 421M or PHYS 421M.

MATH 425. Statistical Methods I. 4 Credits.

Statistical methods for upper-division and graduate students anticipating research in nonmathematical disciplines. Presentation of data, sampling distributions, tests of significance, confidence intervals, linear regression, analysis of variance, correlation, statistical software. Sequence. Only nonmajors may receive upper-division credit. Students cannot receive credit for both MATH 243 and MATH 425.

Prereq: MATH 111 or satisfactory placement test score.

MATH 431. Introduction to Topology. 4 Credits.

Elementary point-set topology with an introduction to combinatorial topology and homotopy. Sequence.

Prereq: MATH 317.

MATH 432. Introduction to Topology. 4 Credits.

Introduction to smooth manifolds and differential topology. Sequence.

Prereq: MATH 281, MATH 341, MATH 431.

MATH 433. Introduction to Differential Geometry. 4 Credits.

Plane and space curves, Frenet-Serret formula surfaces. Local differential geometry, Gauss-Bonnet formula, introduction to manifolds.

Prereq: MATH 282, 342; one from MATH 232, MATH 262, MATH 307.

MATH 434. Introduction to Topology III. 4 Credits.

Introduction to differential topology and de Rham cohomology. Sequence.

Prereq: MATH 432.

MATH 441. Linear Algebra. 4 Credits.

Theory of vector spaces over arbitrary fields, theory of a single linear transformation, minimal polynomials, Jordan and rational canonical forms, quadratic forms, quotient spaces.

Prereq: MATH 342; one from MATH 232, MATH 262, MATH 307.

MATH 444. Introduction to Abstract Algebra I. 4 Credits.

Theory of groups, rings, and fields. Polynomial rings, unique factorization, and Galois theory. Sequence.

Prereq: MATH 342; one from MATH 232, MATH 262, MATH 307.

MATH 445. Introduction to Abstract Algebra II. 4 Credits.

Theory of groups, rings, and fields. Polynomial rings, unique factorization, and Galois theory.

Prereq: MATH 444.

MATH 446. Introduction to Abstract Algebra III. 4 Credits.

Theory of groups, rings, and fields. Polynomial rings, unique factorization, and Galois theory.

Prereq: MATH 445.

MATH 456. Networks and Combinatorics. 4 Credits.

Fundamentals of modern combinatorics; graph theory; networks; trees; enumeration, generating functions, recursion, inclusion and exclusion; ordered sets, lattices, Boolean algebras.

Prereq: one from MATH 232, MATH 262, MATH 307.

MATH 458. Introduction to Mathematical Cryptography. 4 Credits.

Mathematical theory of public key cryptography. Finite field arithmetic, RSA and Diffie-Hellman algorithms, elliptic curves, generation of primes, factorization techniques. Offered alternate years.

Prereq: MATH 341.

MATH 461. Introduction to Mathematical Methods of Statistics I. 4 Credits.

Discrete and continuous probability models; useful distributions; applications of moment-generating functions; sample theory with applications to tests of hypotheses, point and confidence interval estimates. Sequence.

Prereq: MATH 253 or MATH 263; one from MATH 232, MATH 262, MATH 307.

MATH 462. Introduction to Mathematical Methods of Statistics II. 4 Credits.

Discrete and continuous probability models; useful distributions; applications of moment-generating functions; sample theory with applications to tests of hypotheses, point and confidence interval estimates.

Prereq: MATH 461.

MATH 463. Mathematical Methods of Regression Analysis and Analysis of Variance. 4 Credits.

Multinomial distribution and chi-square tests of fit, simple and multiple linear regression, analysis of variance and covariance, methods of model selection and evaluation, use of statistical software.

Prereq: MATH 342, MATH 462.

MATH 467. Stochastic Processes. 4 Credits.

Basics of stochastic processes including Markov chains, martingales, Poisson processes, Brownian motion and their applications.

Prereq: MATH 341, MATH 461.

MATH 503. Thesis. 1-12 Credits.

Repeatable.

MATH 507. Seminar: [Topic]. 1-4 Credits.

Repeatable.

MATH 510. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

MATH 511. Functions of a Complex Variable I. 4 Credits.

Complex numbers, linear fractional transformations, Cauchy-Riemann equations, Cauchy's theorem and applications, power series, residue theorem, harmonic functions, contour integration, conformal mapping, infinite products. Sequence.

MATH 512. Functions of a Complex Variable II. 4 Credits.

Complex numbers, linear fractional transformations, Cauchy-Riemann equations, Cauchy's theorem and applications, power series, residue theorem, harmonic functions, contour integration, conformal mapping, infinite products.

Prereq: MATH 511.

MATH 513. Introduction to Analysis I. 4 Credits.

Differentiation and integration on the real line and in a dimensional Euclidean space; normed linear spaces and metric spaces; vector field theory and differential forms. Sequence.

MATH 514. Introduction to Analysis II. 4 Credits.

Differentiation and integration on the real line and in a dimensional Euclidean space; normed linear spaces and metric spaces; vector field theory and differential forms. Sequence.

Prereq: MATH 513.

MATH 515. Introduction to Analysis III. 4 Credits.

Differentiation and integration on the real line and in a dimensional Euclidean space; normed linear spaces and metric spaces; vector field theory and differential forms. Sequence.

Prereq: MATH 514.

MATH 521M. Partial Differential Equations: Fourier Analysis I. 4 Credits.

Introduction to PDEs with a view towards applications in physics. Wave and heat equations, classical Fourier series on the circle, Bessel and Legendre series. Multilisted with PHYS 521M.

MATH 522. Partial Differential Equations: Fourier Analysis II. 4 Credits.

General theory of PDEs; the Fourier transform. Laplace and Poisson equations; Green's functions and application. Mean value theorem and max-min principle.

Prereq: MATH 421/521.

MATH 525. Statistical Methods I. 4 Credits.

Statistical methods for upper-division and graduate students anticipating research in nonmathematical disciplines. Presentation of data, sampling distributions, tests of significance, confidence intervals, linear regression, analysis of variance, correlation, statistical software. Sequence. Only nonmajors may receive graduate credit.

MATH 531. Introduction to Topology. 4 Credits.

Elementary point-set topology with an introduction to combinatorial topology and homotopy. Sequence.

MATH 532. Introduction to Topology. 4 Credits.

Elementary point-set topology with an introduction to combinatorial topology and homotopy. Sequence.

Prereq: MATH 531.

MATH 533. Introduction to Differential Geometry. 4 Credits.

Plane and space curves, Frenet-Serret formula surfaces. Local differential geometry, Gauss-Bonnet formula, introduction to manifolds.

MATH 534. Introduction to Topology III. 4 Credits.

Introduction to differential topology and de Rham cohomology. Sequence.

Prereq: MATH 352.

MATH 541. Linear Algebra. 4 Credits.

Theory of vector spaces over arbitrary fields, theory of a single linear transformation, minimal polynomials, Jordan and rational canonical forms, quadratic forms, quotient spaces.

MATH 544. Introduction to Abstract Algebra I. 4 Credits.

Theory of groups, rings, and fields. Polynomial rings, unique factorization, and Galois theory. Sequence.

MATH 545. Introduction to Abstract Algebra II. 4 Credits.

Theory of groups, rings, and fields. Polynomial rings, unique factorization, and Galois theory.

Prereq: MATH 544.

MATH 546. Introduction to Abstract Algebra III. 4 Credits.

Theory of groups, rings, and fields. Polynomial rings, unique factorization, and Galois theory.

Prereq: MATH 545.

MATH 556. Networks and Combinatorics. 4 Credits.

Fundamentals of modern combinatorics; graph theory; networks; trees; enumeration, generating functions, recursion, inclusion and exclusion; ordered sets, lattices, Boolean algebras.

MATH 561. Introduction to Mathematical Methods of Statistics I. 4 Credits.

Discrete and continuous probability models; useful distributions; applications of moment-generating functions; sample theory with applications to tests of hypotheses, point and confidence interval estimates. Sequence.

MATH 562. Introduction to Mathematical Methods of Statistics II. 4 Credits.

Discrete and continuous probability models; useful distributions; applications of moment-generating functions; sample theory with applications to tests of hypotheses, point and confidence interval estimates.

Prereq: MATH 561.

MATH 563. Mathematical Methods of Regression Analysis and Analysis of Variance. 4 Credits.

Multinomial distribution and chi-square tests of fit, simple and multiple linear regression, analysis of variance and covariance, methods of model selection and evaluation, use of statistical software.

Prereq: MATH 562.

MATH 567. Stochastic Processes. 4 Credits.

Basics of stochastic processes including Markov chains, martingales, Poisson processes, Brownian motion and their applications.

Prereq: MATH 561.

MATH 600M. Temporary Multilisted Course. 1-5 Credits.

Repeatable.

MATH 601. Research: [Topic]. 1-9 Credits.

Repeatable.

MATH 602. Supervised College Teaching. 1-16 Credits.

Repeatable.

MATH 603. Dissertation. 1-16 Credits.

Repeatable.

MATH 605. Reading and Conference: [Topic]. 1-16 Credits.

Repeatable.

MATH 607. Seminar: [Topic]. 1-5 Credits.

Repeatable. Topics include Advanced Topics in Geometry, Ring Theory, Teaching Mathematics.

MATH 610. Experimental Course: [Topic]. 1-5 Credits.

Repeatable.

MATH 616. Real Analysis. 4-5 Credits.

Measure and integration theory, differentiation, and functional analysis with point-set topology as needed. Sequence.

MATH 617. Real Analysis. 4-5 Credits.

Measure and integration theory, differentiation, and functional analysis with point-set topology as needed. Sequence.

Prereq: MATH 616.

MATH 618. Real Analysis. 4-5 Credits.

Measure and integration theory, differentiation, and functional analysis with point-set topology as needed. Sequence.

Prereq: MATH 617.

MATH 619. Complex Analysis. 4-5 Credits.

The theory of Cauchy, power series, contour integration, entire functions, and related topics.

MATH 634. Algebraic Topology. 4-5 Credits.

Development of homotopy, homology, and cohomology with point-set topology as needed. Sequence.

MATH 635. Algebraic Topology. 4-5 Credits.

Development of homotopy, homology, and cohomology with point-set topology as needed. Sequence.

Prereq: MATH 634.

MATH 636. Algebraic Topology. 4-5 Credits.

Development of homotopy, homology, and cohomology with point-set topology as needed. Sequence.

Prereq: MATH 635.

MATH 637. Differential Geometry. 4-5 Credits.

Topics include curvature and torsion, Serret-Frenet formulas, theory of surfaces, differentiable manifolds, tensors, forms and integration. Sequence.

MATH 638. Differential Geometry. 4-5 Credits.

Topics include curvature and torsion, Serret-Frenet formulas, theory of surfaces, differentiable manifolds, tensors, forms and integration. Sequence.

Prereq: MATH 637.

MATH 639. Differential Geometry. 4-5 Credits.

Topics include curvature and torsion, Serret-Frenet formulas, theory of surfaces, differentiable manifolds, tensors, forms and integration. Sequence.

MATH 647. Abstract Algebra. 4-5 Credits.

Group theory, fields, Galois theory, algebraic numbers, matrices, rings, algebras. Sequence.

MATH 648. Abstract Algebra. 4-5 Credits.

Group theory, fields, Galois theory, algebraic numbers, matrices, rings, algebras. Sequence.

Prereq: MATH 647.

MATH 649. Abstract Algebra. 4-5 Credits.

Group theory, fields, Galois theory, algebraic numbers, matrices, rings, algebras. Sequence.

Prereq: MATH 648.

MATH 672. Theory of Probability. 4-5 Credits.

Measure and integration, probability spaces, laws of large numbers, central-limit theory, conditioning, martingales, random walks.

Prereq: MATH 671.

MATH 673. Theory of Probability. 4-5 Credits.

Measure and integration, probability spaces, laws of large numbers, central-limit theory, conditioning, martingales, random walks.
Prereq: MATH 672.

MATH 681. Advanced Algebra: [Topic]. 4-5 Credits.

Repeatable. Topics selected from theory of finite groups, representations of finite groups, Lie groups, Lie algebras, algebraic groups, ring theory, algebraic number theory.

MATH 682. Advanced Algebra: [Topic]. 4-5 Credits.

Repeatable. Topics selected from theory of finite groups, representations of finite groups, Lie groups, Lie algebras, algebraic groups, ring theory, algebraic number theory.

MATH 683. Advanced Algebra: [Topic]. 4-5 Credits.

Repeatable. Topics selected from theory of finite groups, representations of finite groups, Lie groups, Lie algebras, algebraic groups, ring theory, algebraic number theory.

MATH 684. Advanced Analysis: [Topic]. 4-5 Credits.

Repeatable. Topics selected from Banach algebras, operator theory, functional analysis, harmonic analysis on topological groups, theory of distributions.

MATH 685. Advanced Analysis: [Topic]. 4-5 Credits.

Repeatable. Topics selected from Banach algebras, operator theory, functional analysis, harmonic analysis on topological groups, theory of distributions.

MATH 686. Advanced Analysis: [Topic]. 4-5 Credits.

Repeatable. Topics selected from Banach algebras, operator theory, functional analysis, harmonic analysis on topological groups, theory of distributions.

MATH 690. Advanced Geometry and Topology: [Topic]. 4-5 Credits.

Repeatable. Topics selected from classical and local differential geometry; symmetric spaces; low-dimensional topology; differential topology; global analysis; homology, cohomology, and homotopy; differential analysis and singularity theory; knot theory.

MATH 691. Advanced Geometry and Topology: [Topic]. 4-5 Credits.

Repeatable. Topics selected from classical and local differential geometry; symmetric spaces; low-dimensional topology; differential topology; global analysis; homology, cohomology, and homotopy; differential analysis and singularity theory; knot theory.

MATH 692. Advanced Geometry and Topology: [Topic]. 4-5 Credits.

Repeatable. Topics selected from classical and local differential geometry; symmetric spaces; low-dimensional topology; differential topology; global analysis; homology, cohomology, and homotopy; differential analysis and singularity theory; knot theory.

Medieval Studies

Stephanie Clark, Program Director

311 Susan Campbell Hall

Medieval studies, an interdisciplinary undergraduate program, integrates various approaches to the Middle Ages by medievalists in several departments. Medieval studies provides an excellent general education or a solid base for graduate work in a more specialized area. Study abroad is strongly encouraged.

Medieval studies concentrates on the period from 300 to 1500, combining courses in art and architecture, history, language, literature, music, philosophy, and religion. A typical course of study includes diverse topics such as the Bible, the early Church, Byzantium, Islam, the Vikings, the

Crusades, women in the Middle Ages, mysticism, romance, the Gothic cathedral, Chaucer, Dante, and medieval China and Japan. The program aims to provide a comprehensive introduction to the medieval worldview in Europe and beyond, and the origins of the modern world.

Participating Faculty

Ina Asim, history

Martha J. Bayless, English

Louise M. Bishop, honors college

Steven T. Brown, comparative literature

Stephanie Clark, English

Frederick Colby, religious studies

Andrew E. Goble, history

Deborah A. Green, Judaic studies

D. Gantt Gurley, German and Scandinavian

David Hollenberg, religious studies

Maile Hutterer, history of art and architecture

Mary Jaeger, classics

Lori Kruckenberg, music

Charles H. Lachman, history of art and architecture

C. Anne Laskaya, English

Eric Mentzel, music

Stephen J. Shoemaker, religious studies

Mark T. Unno, religious studies

Cynthia M. Vakareliyska, linguistics

Marc Vanscheewijck, music

David Wacks, Romance languages

Lisa Wolverton, history

- Bachelor of Arts
- Minor

Undergraduate Studies

Bachelor of Arts Degree Requirements

Medieval studies majors must complete twelve medieval courses in at least three departments with a grade of mid-C or better. At least 24 credits must be in upper-division work. Two years of Latin are recommended for those who want to do graduate work in medieval studies. See the program website for more information.

Honors in Medieval Studies

A degree with honors in medieval studies allows a student to focus on an area of concentration in a written thesis. Requirements are as follows:

1. Satisfaction of the requirements for the major
2. A grade point average of 3.50 or better in courses taken to meet the upper-division requirements of the major. A minimum cumulative UO grade point average of 3.00
3. A prospectus for the thesis approved by both the thesis director and the program director. The prospectus must be submitted no later than week seven of the term before the student plans to complete the honors project. When the prospectus has been approved, the student and thesis director will agree on a schedule of submission of work
4. A senior thesis of substantial quality, representing new or substantially new work beyond any project or paper submitted within other university courses, approved by the thesis director and at least one other member of the medieval studies participating faculty. The thesis must be complete and ready for public presentation no later than week seven of the fall, winter, or spring term
5. **A presentation of the project.** The student presents the honors project to students and faculty members and participates in an open discussion of the project with the audience. Presentations typically occur in weeks seven through ten of fall, winter, or spring terms and are arranged in consultation with both the director of the Medieval Studies Program and the student's thesis advisor
6. Honors in medieval studies are not given for substantially the same project or paper submitted for honors to any other unit in the university. Departmental honors theses shall be written exclusively for honors in medieval studies
7. Students normally enroll in at least one but no more than two terms of Thesis (MDVL 403). Enrollment in Thesis is not required but is recommended. Thesis credits cannot serve to fulfill the minimum major requirements

Minor Requirements

Students who want a minor in medieval studies must complete seven medieval courses in at least two departments.

Suggested Courses

Students should plan their programs as early as possible with the aid of a medieval studies faculty advisor. With the advisor's consent, courses numbered 199, 399, 405, 407, 408, or 410 may be substituted for suggested courses. At least five of the courses must be taken at the University of Oregon. More information is available from the medieval studies office or from the Medieval Studies Program director.

Middle East–North Africa Studies

Oregon Consortium for International and Area Studies

175 Prince Lucien Campbell Hall
5206 University of Oregon
Eugene, Oregon 97403-5206
mena@uoregon.edu

The Middle East and North Africa region is home to a wide range of peoples and cultures and has a crucial place in the history of societies and cultures. It is also in the midst of grave instability and unrest, which has global consequences.

The Middle East–North Africa studies minor is a broad examination of the Middle East and North Africa region. The minor requires a minimum of 24 credits and one of three concentrations: language study, study abroad, or research. The minor is designed to offer flexibility so that students may focus on particular areas of interest while providing them with an introduction to critical issues in the contemporary Middle East and North Africa.

Participating Faculty

Michael Allan, comparative literature

Judith R. Baskin, religious studies

Diane Baxter, anthropology

Shaul Cohen, geography

Rick Colby, religious studies

Jane Cramer, political science

Alex Dracobly, political science

Stephen Dueppen, anthropology

Hanan Elsherif, religious studies

David Frank, honors college

Deborah Green, Judaic studies

David Hollenberg, religious studies

Farhad Malekafzali, political science

Michael Malek Najjar, theater arts

Lindsey Mazurek, history

Stephen Shoemaker, religious studies

Priscilla Southwell, political science

David Wacks, Romance languages

Anita Weiss, global studies

Minor in Middle East–North Africa Studies

Students must satisfactorily complete a minimum of 24 credits of course work. Courses applied toward the minor must be passed with a C– or better or P (pass). Of the 24 credits, a minimum of 20 must be graded. Students must take a minimum of 16 credits in residence. In addition, students must complete an area of concentration (language, study abroad, or research). Some credits toward the concentration may be used to satisfy the 24 credits of course work, as described below. Because not every course in the follow list of 'Requirements' will be offered regularly enough or at a time that fits each students' schedules, students are encouraged to contact the Program Director to discuss potential substitutions when such issues arise.

Requirements

Code	Title	Credits
MENA 111	Media Coverage of the Middle East	4
Choose one of the following:		4
GEOG 209	Geography of the Middle East and North Africa	
GLBL 423	Development and the Muslim World	
PS 199	Special Studies: [Topic] (Crisis in the Middle East)	
COLT 231	Literature and Society ¹	
COLT 370	Comparative Comics ¹	
COLT 462	Cultural Intersections: [Topic] ¹	
COLT 470	Studies in Identity: [Topic] ¹	
Elective courses		16
Total Credits		24

¹ Taken as applicable and/or available.

Electives. Of the 16 required credits in elective courses, 8 must be drawn from social science courses and 8 must be drawn from humanities courses, as listed of below. Confer with a program advisor to determine other applicable courses not listed below. Check for courses with Middle East–North Africa (MENA) themes listed in the Schedule of Classes each term; courses listed under MENA count toward the minor. In addition, students may petition the director of the minor for the inclusion of other applicable MENA-related courses that have at least 50 percent Middle East–North Africa content.

A minimum of 12 credits must be in upper-division courses (300 or 400 level). No more than 8 elective credits from any one department may count toward the minor. Courses must be taken from a minimum of three departments.

The social science and humanities elective course lists are not exhaustive, as new courses are added periodically. Other courses may count toward these requirements. See the program advisor and/or the Middle East-North Africa studies entry in the Schedule of Classes for up-to-date information.

- REL 432: Islamic Mysticism: [Topic]
- TA 472: Multicultural Theater: [Topic], when topic is "Israeli and Palestinian Theater"
- TA 472: Multicultural Theater: [Topic], when topic is "Middle Eastern Theater"
- WGS 410: Experimental Course: [Topic], when topic is "Muslim Women: Life and Identity"

Concentration

In addition to the credit requirements above, students choose to complete one of the three following concentrations: language, study abroad, or research.

Language Concentration. Students must satisfactorily complete a minimum of one year of a MENA language: Arabic, Hebrew, Turkish, or Persian-Farsi. Language credits may be earned at the UO, through an approved overseas program, or transferred from another college

or university. Students may also satisfy the language requirement by examination, demonstrating a level of competence equivalent to one year of college-level language.

Currently, Arabic and Hebrew are offered as regular UO language courses. Turkish and Persian-Farsi are offered through the Yamada Language Center. Students may earn university credit for courses taken at the Yamada Center (1–3 credits per term). In order to complete the minimum one-year requirement for Turkish and Persian, students must take the New York University 12-point Foreign Language Proficiency Examination. Students who receive 12 points on the exam have satisfactorily completed the minimum one-year language requirement.

In addition, students may complete a second year of a MENA language and apply 8 credits of this work toward satisfaction of the humanities credits requirements.

Study-Abroad or Internship Concentration. Students spend a minimum of one term in an approved study-abroad or internship program in a Middle Eastern–North African country.

Currently, there are 19 study-abroad programs offered through the UO, in Jordan, Morocco, Israel, Turkey, and Tunisia. All of these programs meet the study-abroad requirement option. Other programs through accredited universities and organizations may be accepted for university credit and for the study-abroad requirement option. For these programs to count toward the concentration, the student must meet with the minor advisor. Students planning on the study-abroad or internship option must meet with the program advisor to discuss the study-abroad program that fits with the objectives of the minor.

The UO participates in IE₃ Global, which offers internships in Tunisia and which count toward the study-abroad or internship requirement. Other internship possibilities may be available. For these programs to count toward the concentration, the student must meet with the minor advisor and have it approved before signing up for the internship program.

Once students return from their study-abroad or internship experience, they must write a five- to six-page reflection of their experiences abroad, to be read and approved by the minor advisor. As noted, the minor advisor must approve courses taken abroad and the structure and content of an internship in advance. With the approval of the advisor, up to 8 credits taken abroad may count toward the overall minor requirement of 24 credits.

Research Concentration. Students write a high-quality, 15- to 20-page research paper on a MENA-related topic. For this pathway, students work with a professor who guides their research, monitors their progress, and approves their completed research paper. To research and write their paper, students may select to enroll in a 401 (Research) or 405 (Reading and Conference) course. Four credits of 401 or 405 may apply to the 24-credit requirement.

Multidisciplinary Science

Jana Prikryl, Program Director

jprikryl@uoregon.edu
65C Klamath Hall

The multidisciplinary science curriculum allows students to design academic programs that satisfy the requirements for a bachelor of science degree and provide more breadth than traditional science programs. Many exciting areas of scientific inquiry, such as bioinformatics, environmental science, and biophysical science, require

broad science backgrounds and encompass several disciplines. Students planning technical careers in one of these areas or careers in the health sciences, in science education, or in a science-related business or social service might be best served by a well-designed multidisciplinary science program.

One strength of the Multidisciplinary Science Program is its flexibility. To exploit that strength, students need to design their programs carefully, consulting frequently with their Advisors in the Tykeson College and Career Center. Course sequences that meet requirements for professional schools and training programs should be selected in consultation with advisors that specialize in the specific area (for example the Health Professions Program advisors). Students should seek assistance in program planning when they identify or change career goals, because successful application to professional schools and training programs may require completion of additional courses beyond those required for the multidisciplinary science major.

Examples of cross-disciplinary fields, and the subject-matter areas that might be combined in designing a program, are given below:

- **Animal behavior and ethology**—anthropology, biology, psychology
- **Biophysical sciences**—biology, chemistry, human physiology, physics
- **Cognitive sciences**—computer science, mathematics, psychology
- **Environmental sciences**—biology, chemistry, earth sciences, geography, physics
- **Bioinformatics**—biology, computer science

Multidisciplinary science majors are encouraged to consult with the program director during their junior year to ensure that their remaining course work is structured to meet all the requirements for the major. Students should notify the Multidisciplinary Science Program office of their intention to graduate at least one term before the proposed graduation date.

Preparation

High school students planning to major in multidisciplinary science should take as much mathematics as possible, including two years of algebra and trigonometry. They should also take science courses in their areas of interest. Students planning to transfer into the Multidisciplinary Science Program after two years at a community college or at another college or university should complete courses equivalent to the lower-division requirements listed in this catalog and as many of the university's general-education requirements for a bachelor's degree as possible. Acceptance of transfer courses and credits is determined by evaluators in the Office of Admissions in consultation with departmental advisors.

Upon admission, transfer students should consult with the multidisciplinary science director in the program office.

Careers

Through the Multidisciplinary Science Program, prehealth science students preparing for careers in medicine, dentistry, or related fields can meet professional school admission requirements. Multidisciplinary science, when combined with a minor or a second major, can work well for students planning careers in science-related business, public relations, and human services.

- **Bachelor of Arts**
- **Bachelor of Science**

Undergraduate Studies

Bachelor of Arts Degree Requirements

Code	Title	Credits
Lower Division MATH/CS Requirement ¹		8
MATH 251	Calculus I or MATH 241 (Calculus for the Biological Sciences I)	
Select one of the following		
CS 122	Introduction to Programming and Problem Solving	
MATH 231	Elements of Discrete Mathematics I	
MATH 243	Introduction to Methods of Probability and Statistics	
MATH 247	Calculus for the Biological Sciences II	
MATH 252	Calculus II	
MATH 425	Statistical Methods I (Students who complete MATH 425 as part of the math requirement, cannot also use this same class towards the 32 credits of upper-division General Science major requirements.)	
Select three sequences or three-course combinations from the following; two sequences must include labs: ²		36-48
Anthropology: Applies as a non-lab course combination		
ANTH 270	Introduction to Biological Anthropology (Required for ANTH course combination)	
Select two of the following:		
ANTH 145	Principles of Archaeology	
ANTH 170	Introduction to Human Origins	
ANTH 171	Introduction to Monkeys and Apes	
ANTH 173	Evolution of Human Sexuality	
ANTH 175	Evolutionary Medicine	
ANTH 176	Introduction to Forensic Anthropology	
ANTH 361	Human Evolution	
ANTH 362	Human Biological Variation	
Biology: Applies as a lab sequence		
BI 211–214	General Biology I-IV (choose three: BI 211, BI 212, and either BI 213 or BI 214) or BI 281H– Honors Biology I-III 283H	
Chemistry: Can apply as either a lab sequence or a non-lab sequence		
Select one of the following:		
CH 221–223	General Chemistry & CH 227–229 and General Chemistry Laboratory	
CH 224H– 226H	Honors General Chemistry and Advanced General Chemistry & CH 237–239 Laboratory	
Computer Science: Applies as a lab sequence		
CS 210–212	Computer Science I-III	
Earth Sciences: Applies as a lab sequence		
ERTH 201	Dynamic Planet Earth (OR ERTH 101 with a mid-B or better grade)	

ERTH 202	Earth's Surface and Environment (OR ERTH 102 with a mid-B or better grade)	
ERTH 203	History of Life (OR ERTH 103 with a mid-B or better grade)	
Geography: Applies as a non-lab course combination		
GEOG 141	The Natural Environment (Required for GEOG course combination)	
Select two of the following:		
GEOG 181	Our Digital Earth	
GEOG 321	Climatology	
GEOG 322	Geomorphology	
GEOG 323	Biogeography	
GEOG 360	Watershed Science and Policy	
GEOG 361	Global Environmental Change	
Physics: Can apply as a lab sequence or a non-lab sequence		
Select one of the following:		
PHYS 201– 203	General Physics and Introductory Physics Laboratory	
& PHYS 204– 206		
PHYS 251– 253	Foundations of Physics I and Foundations of Physics Laboratory	
& PHYS 290	(must take all 3 terms of PHYS 290 for this to count as a lab sequence)	
Upper Division	32 credits of approved upper-division courses from the below departments ³	32
BI, CH, CS, ERTH, HPHY, MATH, PHYS, and PSY	Upper division courses from these departments are approved for the major.	
ANTH	Upper division ANTH courses from the biological anthropology and physical archeology subfields are approved (for a complete list of approved upper division ANTH courses see the Program website). Experimental courses (410) require program approval.	
GEOG	Upper division GEOG courses from the physical geography and GIScience subfields are approved (for a complete list of approved upper division GEOG courses see the Program website). Experimental courses (410) require program approval.	
Emphasis areas	At least twelve graded credits (not P/NP) must be in one department and at least twelve graded credits must be in a second department. We strongly encourage students to take all majors classes for a grade.	
401-409	4 of the 32 credits may be research (401), thesis (403), or supervised college teaching (402) credits. Seminar, Readings & Conference, Practicum, Internship, and Tutorial credits (404-409) may not be used for the Multidisciplinary Science major.	
Residency requirement	24 credits must be taken at UO.	

Double Majors upper division credits used for another major may not be used to satisfy MSCI requirements.

Minors in related fields There is no MSCI imposed restriction on course overlap between the MSCI major and any minor (though the department offering the minor might have restrictions). We encourage you to look into minors in your emphasis areas.

Prerequisites All students are subject to all prerequisites, minimum grade requirements, and registration restrictions set by each department for its own courses. These things cannot be circumvented because one is a MSCI major. Please investigate the prerequisites and restrictions for the courses you are interested in taking early on.

Total Credits **76-88**

- ¹ All students must demonstrate a proficiency in mathematics by passing calculus I and one additional math or computer science class from the provided list. All courses must be completed with grades of C– or P (pass) or better
- ² All students must take three course sequences (or three course combinations in the case of ANTH and GEOG) from the provided list, two of which must include laboratories. The labs might be embedded in the class (as with BI, CS, and GEOL), or taken as separate courses (as with CH and PHYS). All courses must be completed with grades of C– or P (pass) or better, except EARTH 101-103 which must be completed with grades of mid-B or better.
- ³ All courses must be completed with grades of C– or P or better. All upper division emphasis area courses must be taken for a letter grade.

Bachelor of Science Degree Requirements

Code	Title	Credits
Lower Division MATH/CS Requirement ¹		8
MATH 251	Calculus I or MATH 24I (Calculus for the Biological Sciences I)	
Select one of the following		
CS 122	Introduction to Programming and Problem Solving	
MATH 231	Elements of Discrete Mathematics I	
MATH 243	Introduction to Methods of Probability and Statistics	
MATH 247	Calculus for the Biological Sciences II	
MATH 252	Calculus II	
MATH 425	Statistical Methods I (Students who complete MATH 425 as part of the math requirement, cannot also use this same class towards the 32 credits of upper-division General Science major requirements.)	

Select three sequences or three-course combinations from the following; two sequences must include labs: ² **36-48**

Anthropology: Applies as a non-lab course combination

ANTH 270 Introduction to Biological Anthropology (Required for ANTH course combination)

Select two of the following:

ANTH 145 Principles of Archaeology

ANTH 170 Introduction to Human Origins

ANTH 171 Introduction to Monkeys and Apes

ANTH 173 Evolution of Human Sexuality

ANTH 175 Evolutionary Medicine

ANTH 176 Introduction to Forensic Anthropology

ANTH 361 Human Evolution

ANTH 362 Human Biological Variation

Biology: Applies as a lab sequence

BI 211–214 General Biology I-IV (choose three: BI 211, BI 212, and either BI 213 or BI 214)

or BI 281H– Honors Biology I-III
283H

Chemistry: Can apply as either a lab sequence or a non-lab sequence

Select one of the following:

CH 221–223 General Chemistry
& CH 227–229 and General Chemistry Laboratory

CH 224H– Honors General Chemistry
226H and Advanced General Chemistry
& CH 237–239 Laboratory

Computer Science: Applies as a lab sequence

CS 210–212 Computer Science I-III

Earth Sciences: Applies as a lab sequence

ERTH 201 Dynamic Planet Earth (OR EARTH 101 with a mid-B or better grade)

ERTH 202 Earth's Surface and Environment (OR EARTH 102 with a mid-B or better grade)

ERTH 203 History of Life (OR EARTH 103 with a mid-B or better grade)

Geography: Applies as a non-lab course combination

GEOG 141 The Natural Environment (Required for GEOG course combination)

GEOG 181 Our Digital Earth

GEOG 321 Climatology

GEOG 322 Geomorphology

GEOG 323 Biogeography

GEOG 360 Watershed Science and Policy

GEOG 361 Global Environmental Change

Physics: Can apply as a lab sequence or a non-lab sequence

Select one of the following:

PHYS 201– General Physics
203 and Introductory Physics Laboratory
& PHYS 204–
206

PHYS 251– Foundations of Physics I
253 and Foundations of Physics Laboratory
& PHYS 290 (must take all 3 terms of PHYS 290 for this to count as a lab sequence)

Upper Division **32 credits of approved upper-division courses from the below departments ³** **32**

BI, CH, CS, EARTH, HPHY, MATH, PHYS, and PSY	Upper division courses from these departments are approved for the major.
ANTH	Upper division ANTH courses from the biological anthropology and physical archeology subfields are approved (for a complete list of approved upper division ANTH courses see the Program website). Experimental courses (410) require program approval.
GEOG	Upper division GEOG courses from the physical geography and GIScience subfields are approved (for a complete list of approved upper division GEOG courses see the Program website). Experimental courses (410) require program approval.
Emphasis areas	At least twelve graded credits (not P/NP) must be in one department and at least twelve graded credits must be in a second department. We strongly encourage students to take all majors classes for a grade.
401-409	4 of the 32 credits may be research (401), thesis (403), or supervised college teaching (402) credits. Seminar, Readings & Conference, Practicum, Internship, and Tutorial credits (404-409) may not be used for the Multidisciplinary Science major.
Residency requirement	24 credits must be taken at UO.
Double Majors	upper division credits used for another major may not be used to satisfy MSCI requirements.
Minors in related fields	There is no MSCI imposed restriction on course overlap between the MSCI major and any minor (though the department offering the minor might have restrictions). We encourage you to look into minors in your emphasis areas.
Prerequisites	All students are subject to all prerequisites, minimum grade requirements, and registration restrictions set by each department for its own courses. These things cannot be circumvented because one is a MSCI major. Please investigate the prerequisites and restrictions for the courses you are interested in taking early on.

Total Credits**76-88**

- ¹ All students must demonstrate a proficiency in mathematics by passing calculus I and one additional math or computer science class from the provided list. All courses must be completed with grades of C– or P (pass) or better

- ² All students must take three course sequences (or three course combinations in the case of ANTH and GEOG) from the provided list, two of which must include laboratories. The labs might be embedded in the class (as with BI, CS, and GEOL), or taken as separate courses (as with CH and PHYS). All courses must be completed with grades of C– or P (pass) or better, except EARTH 101-103 which must be completed with grades of mid-B or better.
- ³ All courses must be completed with grades of C– or P or better. All upper division emphasis area courses must be taken for a letter grade.

Multidisciplinary science courses must be completed with grades of C– or P (pass) or better. Courses graded N (no pass) or F may be repeated for credit, in accordance with university policy.

The upper-division requirements are for students who declared the multidisciplinary science major fall 2000 or later. Students who declared the major before fall 2000 follow the requirements that were in effect when they declared the major. Upper-division credits used to satisfy minimum requirements of another major may not be used to satisfy upper-division requirements in multidisciplinary science. At least 24 upper-division science credits must be completed at the University of Oregon to meet the multidisciplinary science residency requirement.

Upper-division courses may be selected from the multidisciplinary science website (<http://gensci.uoregon.edu/>).

Honors Program

Students preparing to graduate with honors in multidisciplinary science should notify the program director no later than the first term of the senior year.

Honors in multidisciplinary science centers on a thesis, which is the culmination of research conducted under the direction of a faculty advisor. The advisor does not need to be a member of the Multidisciplinary Science Committee.

To graduate with honors, students must have at least a 3.50 overall grade point average and an average GPA of 3.50 or better in all classes counting towards the multidisciplinary science major. In addition, they must complete 6 credits (or equivalent experience per-approved by MSCI Director) of Research (401) or Thesis (403) or both in an appropriate department. These credits must be distributed over at least two terms and cannot be used to fulfill emphasis-area requirements.

Upon approval of the thesis by the advisor and the program director, honors in multidisciplinary science are awarded.

For guidelines and calendar, contact the Multidisciplinary Science Program Director.

Program Planning

Information about program planning and detailed sample programs are available on the Multidisciplinary Science Program website. Pre-health science students who choose the multidisciplinary science major should design their programs to meet the admission requirements of the professional school of their choice. See also Preparatory Programs in the **Academic Resources** section of this catalog.

Kindergarten through Secondary Teaching Careers

An academic major in multidisciplinary science can provide a strong background for certain teacher-education licensure programs. Students interested in teaching science in middle school and junior high school should be aware that the integrated science endorsement requires broader preparation than the minimum requirements for the multidisciplinary science major. The College of Education offers a fifth-year program for middle-secondary teaching licensure in science. See the College of Education (p. 685) section of this catalog.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Native American and Indigenous Studies

Kirby Brown, Program Director

541-346-0900
541-346-0904 fax
104 Alder Building
5268 University of Oregon
Eugene, Oregon 97403-5268

The University of Oregon offers a major and a minor in Native American and Indigenous Studies (NAIS) housed in the Department of Indigenous, Race, and Ethnic Studies (IRES).

Native American and Indigenous Studies provides students extensive grounding in Indigenous history and culture as well as nuanced understandings of tribal sovereignty, Indigenous nationhood, and the diversity and beauty of contemporary Indigenous lives and experiences across the Americas and throughout the Pacific. Drawing upon multiple approaches from history, anthropology, law, literature, ethnic studies, political science, education, the arts, and other disciplines, the central goal of NAIS is to inform students about the unique place of Indigenous nations in state-tribal-federal intergovernmental matrices and about the myriad distinct issues Indigenous peoples face, from language and cultural protection to environmental issues and economic development to social and political self-determination and tribal sovereignty. This foundation prepares students for diverse career paths including tribal political leadership, education and administration, social services/social work, language revitalization and instruction, environmental policy, natural/cultural resources management, law, cultural heritage preservation, the arts, journalism and new media, and community/economic development. In a state with nine federally recognized Indigenous nations and an Indigenous population 50 percent higher proportionally than the national average, NAIS provides critical information for future leaders in all fields.

Undergraduate Studies

Students may earn an undergraduate major in Native American and Indigenous Studies (NAIS) housed in the Department of Indigenous, Race, and Ethnic Studies (IRES). The primary goal of the NAIS major is to provide students extensive grounding in Indigenous history and culture as well as nuanced understandings of tribal sovereignty, Indigenous nationhood, and the diversity and beauty of contemporary Indigenous identities, lives, and experiences across the Americas and throughout the Pacific. A secondary goal of the program is to encourage student awareness of the ethnic and cultural dimensions and applications of other major fields of study. Students of literature, social sciences, education, urban planning, arts, humanities, law, and international studies—to name only a few—find that related Native American and Indigenous Studies courses greatly enrich their academic programs. This foundation prepares students for diverse career paths including tribal political leadership, education and administration, social services/social work, language revitalization and instruction, environmental policy, natural/cultural resources management, law, cultural heritage preservation, the arts, journalism and new media, and community/economic development.

Up to 3 courses, or 12 credits, applied to the Native American and Indigenous Studies major may be used to satisfy major or minor requirements for other programs. All courses applied to a minor in Native American and Indigenous Studies may be used to satisfy major or minor requirements for other programs.

Specific details and course approvals must be obtained from the director of the Native American and Indigenous Studies program (nastudies@uoregon.edu).

Requirements for the Major: Conventional Track

The conventional track of the Native American and Indigenous Studies major requires 56 credits. At least 28 credits must be taken in residence at the University of Oregon. Up to two courses, or 8 credits, may be counted toward the major from a list of related courses that fall outside the core of NAIS but that focus on other issues closely related to the field (see course list below). Courses must be taken for a grade, and grades must be mid-C or higher to count toward the minor. The conventional track requires one year of Native language classes that may be fulfilled at the University of Oregon or any other accredited institution or tribal partner. See program director for details. The course load is distributed as follows:

Code	Title	Credits
ES 256	Introduction to Native American Studies	4
	Additional lower division elective	4
	One year of Ichishkiin or Chinuk Wawa (or other Indigenous language) (3 quarters/12 credits)	12
Upper Division Courses		
	Six upper-division electives from approved courses list, one of which must be in NAIS group 3 (literature/media/creative arts)	24
ES 321	Indigenous Peoples of Oregon	4
ES 468	Indigenous Research Methods and Ethics Students who elect to pursue a senior research practicum (ES 409) will need to be concurrently enrolled in or have satisfactorily completed this course	4
ES 470	Native American and Indigenous Feminisms (OR WGS 251: Transnational and Indigenous Feminisms) Students who fulfill this requirement with WGS 251 may do so via a lower division elective; they will still need to fulfill all upper division requirements for the major.	4
Total Credits		56

Requirements for the Major: Language Track

The language track of the Native American and Indigenous Studies major requires 56 credits. At least 28 credits must be taken in residence at the University of Oregon. Up to two courses, or 8 credits, may be counted toward the major from a list of related courses that fall outside the core of NAIS but that focus on other issues closely related to the field (see course list below). Courses must be taken for a grade, and grades must be mid-C or higher to count toward the minor. The language track requires two years of Indigenous language classes that may be taken at the University of Oregon or any other accredited institution or tribal partner. See program director for details. The course load is distributed as follows:

Code	Title	Credits
ES 256	Introduction to Native American Studies	4
Two years (6 quarters) of Ichishkiin (UO), Chinuk Wawa (LCC), or other Indigenous language		24
Upper Division Courses		
Four upper-division electives from approved courses list, one of which must be in NAIS group 3 (literature/media/creative arts)		16
ES 321	Indigenous Peoples of Oregon	4
ES 468	Indigenous Research Methods and Ethics Students who elect to pursue a senior research practicum (ES 409) will need to be concurrently enrolled in or have satisfactorily completed this course.	4
ES 470	Native American and Indigenous Feminisms (OR WGS 251: Transnational and Indigenous Feminisms) Students who fulfill this requirement with WGS 251 may do so via a lower division elective; they will still need to fulfill all upper division requirements for the major.	4
Total Credits		56

ES 370	Race, Ethnicity, and Cinema: [Topic] (Native Americans and Film)	4
J 412	Issues in Communication Studies: [Topic] (Indigenous Peoples & the Media)	4
TA 472	Multicultural Theater: [Topic] (Native American Theater)	4

Native American and Indigenous Studies

Students may earn an undergraduate minor in Native American and Indigenous Studies (NAIS) housed in the Department of Indigenous, Race, and Ethnic Studies (IRES).

The primary goal of the NAIS minor is to provide students extensive grounding in Indigenous history and culture as well as nuanced understandings of tribal sovereignty, Indigenous nationhood, and the diversity and beauty of contemporary Indigenous identities, lives, and experiences across the Americas and throughout the Pacific. A secondary goal of the program is to encourage student awareness of the ethnic and cultural dimensions and applications of other major fields of study. Students of literature, social sciences, education, urban planning, arts, humanities, law, and international studies—to name only a few—find that related Native American and Indigenous Studies courses greatly enrich their academic programs. This foundation prepares students for diverse career paths including tribal political leadership, education and administration, social services/social work, language revitalization and instruction, environmental policy, natural/cultural resources management, law, cultural heritage preservation, the arts, journalism and new media, and community/economic development.

Courses applied to a minor in Native American and Indigenous studies may be used to satisfy major or minor requirements for other programs.

Specific details and course approvals must be obtained from the Native American and Indigenous Studies program director/adviser (nastudies@uoregon.edu).

Requirements for the Minor

The Native American and Indigenous Studies minor requires 28 credits. At least 16 credits must be taken in residence at the University of Oregon. Up to 4 credits may be counted toward the minor from a list of related courses that fall outside the core of Native American studies but that focus on other issues closely related to the field. Courses must be taken for a grade, and grades must be mid-C or higher to count toward the minor. The course load is distributed as follows:

Code	Title	Credits
ES 256	Introduction to Native American Studies	4
Additional Courses		24
16 credits must be in upper-division courses		
At least 4 credits focusing on Oregon Indians		
At least 4 credits in each of three distribution groups ¹		
Up to 4 credits may be taken from a list of related courses approved by a program advisor		
Total Credits		28

¹ Distribution groups: 1) culture, language, and education; 2) law, policy, governance, and history; 3) literature, media, and the arts.

Neuroscience

Nicole Dudukovic, Director
neuro@uoregon.edu
541-346-7225

Neuroscience is the interdisciplinary study of neural function, development, and behavior. The University of Oregon offers an undergraduate major in Neuroscience. The graduate training program in neuroscience is centered in the Institute of Neuroscience (ion.uoregon.edu (<https://ion.uoregon.edu>)). Affiliated faculty members in the undergraduate major as well as participating faculty members in the graduate training program are drawn from the Departments of Biology, Human Physiology, and Psychology, along with the Phil and Penny Knight Campus for Accelerating Scientific Impact.

Graduate Studies

The Interdepartmental Neuroscience Graduate Program (INGP), administered through the Institute of Neuroscience offers robust graduate training in Neuroscience across departments at the University of Oregon. The goal of INGP is to train students to think independently, creatively, and critically about problems in neuroscience. We aim to train students in a variety of skills that will prepare students for a successful research, teaching, policy or industry career. Students can enter INGP through the department of biology (<https://biology.uoregon.edu/>), human physiology (<https://physiology.uoregon.edu/>), psychology (<https://psychology.uoregon.edu/>), mathematics (<https://math.uoregon.edu/>), and physics (<https://physics.uoregon.edu/>), depending on their interest. The majority of our students enter through the department of biology, which allows students to complete three rotations during their first year, in order to help students identify a laboratory in which to do their dissertation research. Students who enter through psychology, human physiology and mathematics begin in their dissertation labs immediately. Regardless of how students enter INGP, they are provided with a set of mentors at the peer, and faculty level. All graduate students are required to teach for at least one academic year during their graduate career; at least a portion of this teaching takes place the first year.

The two training programs we offer are: 1) cellular, developmental and molecular neuroscience, and 2) systems, cognitive and theoretical neuroscience. Students take courses and journal clubs specific to these topics to enhance their knowledge.

Typical courses, journal clubs and meetings:

- Cellular, Developmental and Molecular
 - Courses: Molecular genetics, advanced biochemistry, developmental neurobiology, developmental genetics, cellular neuroscience, systems neuroscience.
 - Journal clubs: developmental and cell biology, developmental neurobiology.
 - Meetings: developmental interest group, zebrafish groupie.
- Systems, Cognitive and Theoretical

- Courses: cellular neuroscience, systems neuroscience, cognitive neuroscience, computational neuroscience, combinatorics, stochastic processes, neural networks.
- Journal clubs: systems neuroscience, theoretical neuroscience.
- Meetings: neural circuits and behavior, zebrafish groupie, joint theory lab meetings.

Students who want to enter the neuroscience graduate program should apply to the PhD program of a participating department and indicate their interest in neuroscience. Typically, students interested in cognitive neuroscience apply to the psychology department; students interested in molecular, cellular, developmental, or systems neuroscience apply to the biology department. Such applications are reviewed by the neuroscience faculty as well as the departmental admission committee. Answers to specific questions about prerequisites and deadlines may be obtained by writing directly to one of the participating departments, University of Oregon, Eugene, Oregon 97403. Additional information about the Institute of Neuroscience may be obtained from the institute website. See also the Institute of Neuroscience section in the Research Centers and Institutes (p. 898) area of this catalog.

Courses

Biology. Molecular Genetics (BI 320), Cell Biology (BI 322), Developmental Biology (BI 328), Sensory Physiology (BI 353), Animal Physiology (BI 356), Neurobiology (BI 360), Experimental Course: [Topic] (BI 410) (Neurobiology of Motivation & Addiction, Neural Basis of Cognition, Neurogenetics), Experimental Course: [Topic] (BI 410) (Analysis of Neural Data, Data Visualization, Matlab for Biologists), Protein Toxins in Cell Biology (BI 422), Molecular Genetics of Human Disease (BI 427), Systems Neuroscience (BI 461), Cellular Neuroscience (BI 463), Developmental Neurobiology (BI 466), Experimental Course: [Topic] (BI 510) (Neurobiology of Motivation & Addiction, Neural Basis of Cognition, Neurogenetics), Experimental Course: [Topic] (BI 510) (Analysis of Neural Data, Data Visualization, Matlab for Biologists), Protein Toxins in Cell Biology (BI 522), Molecular Genetics of Human Disease (BI 527), Systems Neuroscience (BI 561), Cellular Neuroscience (BI 563), Developmental Neurobiology (BI 566), Experimental Course: [Topic] (BI 610) (Advanced Cellular Neuroscience)

Human Physiology. Motor Control (HPHY 333), Sleep Physiology (HPHY 412), Neural Development (HPHY 432), Neurophysiology of Concussion (HPHY 433), Movement Disorders (HPHY 434), Clinical Neuroscience (HPHY 436), Sleep Physiology (HPHY 512), Neural Development (HPHY 532), Neurophysiology of Concussion (HPHY 533), Movement Disorders (HPHY 534), Clinical Neuroscience (HPHY 536)

Psychology. Biopsychology (PSY 304), Cognition (PSY 305), Music and the Brain (PSY 348), Psychoactive Drugs (PSY 383), Learning and Memory (PSY 433), Human Performance (PSY 436), Perception (PSY 438), Brain Mechanisms of Behavior (PSY 445), Cognitive Neuroscience (PSY 449), Hormones and Behavior (PSY 450), Decision-Making (PSY 458), Cognitive Development (PSY 475), Learning and Memory (PSY 533), Human Performance (PSY 536), Perception (PSY 538), Brain Mechanisms of Behavior (PSY 545), Cognitive Neuroscience (PSY 549), Hormones and Behavior (PSY 550), Decision-Making (PSY 558), Cognitive Development (PSY 575), Experimental Course: [Topic] (PSY 610) (Advanced Cognitive Neuroscience)

Neuroscience

As outlined below, the Neuroscience majors consists of the following components: 1) foundation courses in the natural sciences; 2) math and statistics coursework; 3) life science fundamentals; 4) a core neuroscience sequence; 5) upper-division elective courses; and 6) advanced skills courses and/or research experience. The total number of credits is 104-107 (depending on whether majors complete the General Biology Sequence or the Biology Honors Sequence).

¹ 16 required credits with at least 12 credits from 400-level courses; at least one course from each of the three area

All courses counted towards the Neuroscience Major requirements must be taken for a letter grade and passed with a grade of C or better.

At least 34 credits of coursework applied to the major must be taken at the University of Oregon.

Criteria for Honors

To graduate with Honors in Neuroscience, the following requirements must be met:

1. A completed Neuroscience Honors application with signature of a faculty research advisor from BI, HPHY or PSY
2. Completion of all Neuroscience major requirements
3. A minimum 3.5 GPA in all courses applied to the major
4. At least three credits in BI 403, HPHY 403, or PSY 403 Thesis (*These credits may be applied to the advanced skills courses and research experience requirement*).
5. Completion of an honors thesis under supervision of a committee, consisting of one BI, HPHY, or PSY faculty member and at least one other committee member (Ph.D. student, postdoctoral scholar, or faculty) from BI, HPHY, or PSY.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

Pacific Island Studies

William S. Ayres, Program Director

541-346-5119
541-346-0668 fax
273 Condon Hall
1218 University of Oregon
Eugene, Oregon 97403-1218

The Pacific Island Studies Program, part of the Center for Asian and Pacific Studies, offers individualized programs of study and research related to islands and island cultures. The University of Oregon's long-standing educational and scholarly interest in the Pacific islands, involving active researchers and teachers in many fields, was formalized as a program committee in 1987 and it has worked since to coordinate instructional, research, and exchange programs related to the islands.

The program emphasizes interdisciplinary perspectives essential for understanding natural and cultural environments, cultural history and change, and educational and contemporary socioeconomic issues in the Pacific.

Courses about the Pacific cover a range of topics. Students can enroll in undergraduate courses and advanced degree programs in various departments and through the Asian Studies Program. Students may also work with committee members from Pacific island studies toward an Interdisciplinary Studies: Individualized Program master's degree (MA or MS). Information is available in the Graduate Studies (p. 885) section of this catalog.

The Pacific island studies faculty participates in the Asian studies BA and MA degree programs by teaching courses that may be used to satisfy degree requirements (e.g., in developing a secondary cultural or geographical area with Southeast Asia). Undergraduate- and graduate-level courses are available in anthropology and archaeology, art history, biology, earth sciences, international studies, ethnic studies, and sociology. A small number of courses focus solely on the Pacific Islands, but a broader range includes ones related to islands and coastal communities.

The Pacific Islands Archaeological Project, directed by William S. Ayres and Scott Fitzpatrick, offers students opportunities to participate in archaeological and anthropological study in the Pacific. Members of the anthropology faculty offer a field school in archaeology.

Training in selected Pacific island languages is possible through individual study using tutors and materials developed for use at the Yamada Language Center. The center now has language-study modules for Pohnpeian and Kosraen. Tutoring in Samoan and other island languages is possible.

Courses

Anthropology. , Pacific Islands Archaeology (ANTH 343), Workshop: [Topic] (ANTH 408) (Archaeology Field Schools: Micronesia and Caribbean), Experimental Course: [Topic] (ANTH 410) (Pacific Island Studies; Polynesian Archaeology), Workshop: [Topic] (ANTH 508) (Archaeology Field Schools: Micronesia and Caribbean)

Earth Sciences. Oceanography (ERTH 307)

Sociology. SOC 450 or similar.

Approved Seminars (407, 507) and Experimental Courses (410, 510) are other possibilities in these and other departments.

Program Committee

William S. Ayres, anthropology

Aletta Biersack, anthropology

Scott Fitzpatrick, anthropology

Richard G. Hildreth, law

Judith Raiskin, women's, gender, and sexuality studies

Richard A. Sundt, history of art and architecture

Stephanie 'Lani' Teves, ethnic studies

Philosophy

Colin Koopman, Department Head

541-346-5549
211C Susan Campbell Hall
1295 University of Oregon
Eugene, Oregon 97403-1295

Philosophy asks fundamental questions about human identity, the nature of knowledge and reality, moral virtue and responsibility, the nature of community and political authority, aesthetic judgments and values, and other concepts central to the meaning and value of human existence. Through the study of primary texts and concrete issues, drawn from various historical periods and cultures, philosophy provides a means for reflection on actions, beliefs, and values while developing critical thinking, reading, and writing skills. Philosophy also strengthens the ability to reason, enlarges the imagination, and refines aesthetic sensitivity. A philosophical education thus offers excellent preparation for a broad range of careers that require critical intelligence and creative problem-solving as well as oral and written communication skills.

Faculty

Ramón Alvarado, assistant professor of philosophy and data science initiative (data ethics, philosophy of computation, philosophy of technology). BA, 2011, University of Texas at El Paso; MA, 2014, University of Texas at El Paso; MA, 2017, University of Kansas; PhD, 2019, University of Kansas. (2019)

Steven Brence, senior instructor (social and political philosophy, philosophy of film, ethics). BS, 1989, MA, 1993, PhD, 2001, Oregon. (2001)

Colin Koopman, Robert F. and Evelyn Nelson Wulf Professor in the Humanities; professor (political philosophy, data politics, pragmatism,

genealogy). BA, 1997, Evergreen State College; MA, 1999, Leeds; PhD, 2006, McMaster. (2010)

Bonnie Mann, professor (feminist, Continental). BA, 1983, Portland State; PhD, 2002, State University of New York, Stony Brook. (2003)

Erin McKenna, professor (feminist theory, American pragmatism). BA, 1987, Claremont McKenna College; MA, 1990, PhD, 1992, Purdue. (2016)

Nicolae Morar, associate professor (bioethics, philosophy of biology, ecology). BA, 2004, MA, 2005, Université Jean Moulin Lyon 3; PhD, 2011, Purdue. (2015)

Barbara Muraca, assistant professor (environmental and social philosophy, process philosophy, feminist philosophy). MA, 1998, Turin; PhD, 2008, Greifswald. (2019)

Scott L. Pratt, Dean of the Graduate School and professor of philosophy (American philosophy, history of philosophy, education). BA, 1981, Beloit; PhD, 1995, Minnesota. (1995)

Camisha Russell, assistant professor (critical philosophy of race, bioethics, African American philosophy). BA, 2000, American; MA, 2008, Memphis; PhD, 2013, Penn State. (2017)

Beata Stawarska, professor (phenomenology, Continental, philosophical psychology). BA, 1992, MA, 1994, PhD, 2000, Louvain. (2003)

Alejandro Vallega, professor (Latin American philosophy, Continental philosophy, aesthetics). BA, 1993, Saint John's College; MA, 1996, Boston; PhD, 1999, Vienna. (2010)

Daniela Vallega-Neu, professor (19th- and 20th-century European philosophy, history of philosophy, phenomenology). BA, 1984, European School, Varese; MA, 1992, PhD, 1995, Universitat Freiburg. (2010)

Peter Warnek, associate professor (ancient philosophy, 19th- and 20th-century Continental philosophy, Kant). BA, 1986, Seattle; MA, 1990, Villanova; PhD, 1998, Vanderbilt. (1999)

Emeriti

William E. Davie, associate professor emeritus. BA, 1964, Washington (Seattle); PhD, 1969, California, Irvine. (1968)

Mark Johnson, professor emeritus (cognitive science, metaphor theory, pragmatism). BA, 1971, Kansas; MA, 1972, PhD, 1977, Chicago. (1994)

Naomi Zack, professor (race, feminism, disaster). BA, 1966, New York University; PhD, 1970, Columbia. (2001)

The date in parentheses at the end of each entry is the first year on the University of Oregon faculty.

Participating

Kristen Bell, Knight Law School

Joyce Cheng, history of art and architecture

Michael Hames-García, ethnic studies

Jeffrey S. Librett, German and Scandinavian

Lisa Mazzei, education studies

Jerry L. Rosiek, education studies

Steven Shankman, English

Michael Stern, German and Scandinavian

Mark T. Unno, religious studies

Malcolm Wilson, classics

Undergraduate Studies

The department offers bachelor of arts (BA) and bachelor of science (BS) degree programs. University degree requirements are listed in the **Bachelor's Degree Requirements** section of this catalog and in the schedule of classes. Declaration of a major may be accomplished online by completing a form available on the department website.

Major Requirements

Course work for the major in philosophy must be passed with grades of C– or better or P (pass). No more than 8 credits may be taken pass/no pass.

Honors in Philosophy

The philosophy honors program is designed to provide outstanding, highly motivated philosophy majors with the opportunity to develop their skills during the senior year through the independent exploration of a special topic of their own choosing under the guidance of a faculty mentor. To be eligible for admission to the honors program, students must have completed at least 24 credits in philosophy, at least 12 of which have been taken at the University of Oregon. The honors candidate's grade point average (GPA) in philosophy must be at least 3.50, maintained through graduation. To graduate with honors, the candidate must fulfill the following requirements:

Courses

Besides the courses required of majors, a candidate for departmental honors must take at least 16 of the 52 credits in philosophy at the 400 level.

Senior Thesis

The candidate must write an honors thesis under the guidance of a member of the philosophy faculty chosen as thesis advisor. The thesis must demonstrate the student's ability to formulate a significant research problem, research primary resources, interpret sources with imagination and technical skill, and present the finished work in a form meeting professional standards in philosophy. The thesis must be approved by a thesis committee consisting of two faculty members from the philosophy department. Approval of the thesis depends in part on a public defense attended by the committee.

Upon fulfilling these requirements, the candidate is approved to receive a bachelor's degree with honors in philosophy.

Minor Requirements

Minor in Philosophy

Code	Title	Credits
Select two of the following:		8
PHIL 310	History of Philosophy: Ancient and Medieval	
PHIL 311	History of Philosophy: Modern	
PHIL 312	History of Philosophy: 19th Century	
Course on the work of a specific philosopher		4
Upper-division course		4
Two additional philosophy courses		8
Total Credits		24

Courses must be passed with grades of C– or better or P (pass). No more than 8 credits may be taken pass/no pass.

Minor in Ethics

Code	Title	Credits
PHIL 102	Ethics	4
or PHIL 323	Moral Theory	
Five ethics-related courses chosen from the following (or from additional rotating topics courses):		20
PHIL 102	Ethics	
PHIL 120	Ethics of Enterprise and Exchange	
PHIL 123	Internet, Society, and Philosophy	
PHIL 130	Philosophy and Popular Culture	
PHIL 135	Ethics in the Life Sciences	
PHIL 170	Love and Sex	
PHIL 216	Philosophy and Cultural Diversity	
PHIL 220	Food Ethics	
PHIL 223	Data Ethics	
PHIL 307	Social and Political Philosophy	
PHIL 308	Social and Political Philosophy	
PHIL 309	Global Justice	
PHIL 315	Introduction to Feminist Philosophy	
PHIL 323	Moral Theory	

PHIL 330	
PHIL 335	Medical Ethics
PHIL 340	Environmental Philosophy
PHIL 342	Introduction to Latin American Philosophy
PHIL 343	Critical Theory
PHIL 344	Introduction to Philosophy of Law
ENVS 345	Environmental Ethics
PHIL 443	Feminist Philosophy: [Topic]
PHIL 451	Native American Philosophy
PHIL 452	Philosophy and Race

Total Credits **24**

- Philosophy majors are allowed to complete the Ethics minor with a maximum of a two-course overlap.

Courses must be passed with grades of C– or better or P (pass). No more than 8 credits may be taken pass/no pass. Twelve credits must be taken at the upper-division level, 4 credits of which must be at the 400 level.

A minimum of 12 upper-division credits must be taken in residence at the University of Oregon.

Students minoring in ethics and also pursuing either a minor in philosophy or a major in philosophy may have a maximum two-course overlap between their ethics minor courses and their philosophy major/minor courses.

Diversity Focus

The diversity focus in philosophy gives students the opportunity to combine diversity courses in race, gender, and class with lectures, events, and workshops to earn formal recognition of focused philosophical study in diversity. The program must be completed within four years of the time the student signed up.

Requirements for Students Majoring or Minor in Philosophy or Minor in Ethics

Code	Title	Credits
PHIL 399	Special Studies: [Topic] (Philosophy and Diversity)	1-5

Select two diversity-related courses from the following: ¹

PHIL 110	Human Nature
PHIL 170	Love and Sex
PHIL 216	Philosophy and Cultural Diversity
PHIL 315	Introduction to Feminist Philosophy
PHIL 342	Introduction to Latin American Philosophy
PHIL 443	Feminist Philosophy: [Topic]
PHIL 451	Native American Philosophy
PHIL 452	Philosophy and Race

Documented attendance at six diversity-related events on campus or an equivalent event as approved by the diversity focus administrator

¹ Students may substitute other topics courses or an equivalent course on this theme with the approval of the diversity focus administrator.

Requirements for All Other Students

Code	Title	Credits
PHIL 399	Special Studies: [Topic] (Philosophy and Diversity)	1-5

Select three diversity-related courses from the following: ¹

PHIL 110	Human Nature
PHIL 170	Love and Sex
PHIL 216	Philosophy and Cultural Diversity
PHIL 315	Introduction to Feminist Philosophy
PHIL 342	Introduction to Latin American Philosophy
PHIL 443	Feminist Philosophy: [Topic]
PHIL 451	Native American Philosophy
PHIL 452	Philosophy and Race

Documented attendance at six diversity-related events on campus or an equivalent event as approved by the diversity focus administrator

¹ Students may substitute other topics courses or an equivalent course on this theme with the approval of the diversity focus administrator.

Four-Year Degree Plan

The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.

- Master of Arts: Distribution (p. 444)
- Master of Arts: Thesis (p. 444)
- **Doctor of Philosophy**

Graduate Studies

The department offers a graduate program leading to the master of arts (MA) and the doctor of philosophy (PhD) degrees. The program, which is

pluralistic in orientation, requires students to develop a broad knowledge of the history of philosophy, major fields, and various approaches and methods. Students are urged to concentrate in a specific area at the advanced level. Specializations are supported in American philosophy, Continental philosophy, feminist philosophy, Latin American philosophy, philosophy of race, philosophical psychology, and environmental philosophy.

Each student designs a program in consultation with the graduate advisor. Two or more years are typically required for completing the MA degree, and five or more years are typically required for completing the PhD degree. A complete and detailed list of the university and department requirements for graduate degrees is available online through the department website.

Master of Arts Degree Requirements

The master's program is designed to prepare students for PhD research or other professional pursuits through providing a broad background in the history of philosophy and recent developments in the areas of philosophy that are strengths of the department.

There are two paths to earning a master's degree. The first requires completion of the second-language requirement and 48 credit hours of graduate course work including the distribution requirements (listed below). The second requires satisfaction of the second-language requirement, completing 45 credits of graduate course work—9 of which are taken in Thesis (PHIL 503)—and the writing of a master's thesis under the direction of a thesis advisor with a second faculty reader.

The distribution requirements may be satisfied by receiving a mid-B or better in

- one course from each of three historical periods: ancient, modern (16th–18th centuries), 19th century,
- one courses from each of the four philosophical traditions—continental, analytic, American, and feminist—that ground the diverse philosophical perspectives of the department, usually satisfied by taking the Advanced Introduction for each area (571, 572, 573, 574), taken within the first two years of graduate study
- three two courses in Emerging and Engaged Philosophies: Students must complete *two courses* in Emerging Philosophies, such as Critical Race Theory, Latin American Philosophy, Native American Philosophy, Feminist Philosophy and LGBTQ philosophy. Students must also complete *one course* in Engaged philosophies, such as Environmental Philosophy, Biomedical Ethics, Animal Ethics, and Data Ethics.
- Note on criteria for multiple fulfillment: Graduate courses may be listed as counting toward the simultaneous fulfillment of multiple categories of distribution simultaneously, though this is possible for only some of the categories. A course may count toward one Historical Period while also fulfilling a Philosophical Tradition or a course in Emerging and Engaged Philosophies. Courses may count toward either a Philosophical Tradition or the Emerging and Engaged requirement, but no course may count toward both of these requirements at once. For example, a course in nineteenth-century feminist philosophy can count toward either the requirement in the Feminist Tradition or in Emerging and Engaged Philosophies (but not both) and at the same time fulfill a requirement for Historical Periods. When a course is listed so as to provide an option for fulfillment of either the Traditions or Emergent & Engaged requirements, students must choose which requirement the course is to fulfill.

Master of Arts: Distribution

Code	Title	Credits
History Requirements		
One course from each of the following:		12
Course from ancient period		
Course from modern (16th-18th centuries) period		
Course from 19th century		
Traditions Requirements		
One course about continental philosophical traditions ¹		4
One course about analytic philosophic traditions ¹		4
One course about American philosophical traditions ¹		4
One course about feminist philosophical traditions ¹		4
Emerging and Engaged Philosophies		
Two courses in Emerging Philosophies		8
One course in Engaged Philosophies		4
Total Credits		40

¹ Usually satisfied by taking the Advanced Introduction in each area (571, 572, 573, 574).

For the thesis requirement, the student asks two faculty members to serve as his or her master's committee, with one agreeing to serve as chair. The student prepares a short (maximum five pages) description of the proposed thesis topic. Once both committee members have approved the thesis proposal, the student registers for as many as 9 credits of Thesis (PHIL 503) during the one or two terms over which the thesis is written. Typically, the committee chair meets periodically with the student to assess progress and to oversee the writing of the thesis. When both members of the thesis committee agree that the thesis is suitable for a final defense, the candidate schedules a one-hour oral examination, during which the committee members ask questions about the argument and make suggestions for further revision, if necessary. The thesis is completed when it is given final approval by both members of the committee and is accepted by the Division of Graduate Studies as satisfying its requirements for thesis preparation.

Master of Arts: Thesis

Code	Title	Credits
PHIL 503	Thesis	9
Additional graduate-level philosophy courses		36
Total Credits		45

Additional Requirement

Students must complete the second-language requirement.

Doctor of Philosophy

Students must complete at least 81 graduate credits, of which at least 18 must be dissertation research credits. As part of the requirements for completing the PhD, students must also take at least *twelve* 4-credit graduate courses within the department of philosophy. Students must complete the course distribution requirements, demonstrate proficiency in a second language and pass two comprehensive examinations, which in our program are extensive research projects — one in the history of philosophy (the 'history paper') and one in the student's intended area of research specialization (the literature review). Most students finish
